7 SIGNED ..... ~~Applicant~~/Agent Date 3 JAN 2003

NOTES

These notes are for guidance when applying for planning permission. If the information required on the application form does not appear to fit the circumstances of your case, or if in doubt on any other point, please seek further advice from the Local Planning Office for the area in which the site is located.

1 This form provides supplementary information to that already entered on Form 1, and accompanying plans, in relation to proposed industrial or commercial development. It is not a separate planning application.

2 In addition, the Local Planning Authority would find the following kinds of information helpful and in appropriate cases they should be included in a covering letter :

- if the proposals involve a relocation from existing premises, the address of those premises
- if the proposal forms a stage of a larger scheme for which permission is not at present being sought
- if the proposal is related to an existing use on or near the site

3 Hazardous materials. Where operations in the proposed development will involve the prouction, storage or use of large quantities of hazardous materials it is essential for the Local Planning Authority to be able to assess the potential effects on the surrounding area. It is not possible to provide a comprehensive list of such materials. The advice of the Health and Safety Executive should be sought and applicants are requested to confirm that they have been consulted. It may also be necessary to obtain consent from the LPA under the Planning (Hazardous Substances) Regulations 1992.
