

Flood Mapping - Present Day 1 in 200 Year Event Flood Depth

Present and future flood risk to:

410 residential properties (present day)

685 residential properties by (year 2115)

66 commercial properties (present day)

93 commercial properties by (year 2115)

A27 transport route

Investment confidence

The current standard of protection along this coastline ranges from as low as 1:1 years in some places to 1 in 200 years in others.

Recent winter storms have showed the effect that even a 1:1 year event can have, with some of the lower defences being overtopped.

The residual life of the existing defences ranges from <math><5</math> years to 20 years.

Working together - protecting our coastline
