7. Railway Bridge - Station Road/Hill Road, Portchester

At the request of Councillor R H Price, under Standing Order 52.1, to consider the following:

“ The Panel should investigate the dangers of the single file traffic movement underneath the railway bridge in Station Road/Hill Road, Portchester.

Although this is an experimental scheme it is becoming obvious that the current working arrangements are extremely dangerous and an accident is waiting to happen. Under these circumstances the Panel should consider the risks to people's lives in this matter and make recommendations of changes necessary.

It is essential that the pavement is kept at its current width to provide safe access for pedestrians, especially those with double buggies and wheelchairs. Under these circumstances the only safe way to allow single file traffic under the bridge is to have traffic lights controlling the flow of traffic.”
