- 4.41 At para 4.5 of the consultation document, the Borough Council put forward a contribution of 847 dwellings towards meeting unmet need. There is no evidence of how this figure has been derived. All that is evident from the earlier passages of that paragraph is the very unclear picture that exists and which is subject to additional work by PUSH. Consequently, the proposed contribution of 847 dwellings – 13% - to unmet need doesn't appear to have any basis in a full and proper assessment of future housing requirement and supply across the sub-region. This is significant because, historically, Welborne had been identified to provide housing supply for that sub-regional purpose whereas now its contribution almost entirely to meet Fareham's housing need.
- 4.42 Switching the role of Welborne in this fashion is taking away a supply of housing identified previously to meet sub-regional needs in the longer term, when plainly that need still exists, and elevating supply available to meet the Borough's need. This denies the original intention of Welbourne, and places a very heavy reliance on one source of housing to meet local needs; on the basis of the Council's strategy, some two thirds of the Borough's housing needs would be met at Welborne.
- 4.43 Again, this illustrates why preparing a Regulation 19 Plan on this basis isn't justified and does not contribute to effective planning across the sub-region.
- 4.44 Moreover, on this basis, the evidence to justify the Council having discharged its duty under Section 33A is not at all obvious; this is particularly significant as this is the Regulation 19 Plan to be submitted for Examination.

Plan Period

- 4.45 The current consultation document is based on the plan period 2021-2037. This is 16 years and would accord with the 'at least 15 years' in the NPPF, if the Local Plan were in fact adopted in 2021. Experience of Local Plan Examinations and the length of time between Regulation 19 and adoption suggests this is highly unlikely. But assuming the Plan is adopted in the 2022 this would provide the bare 15-year plan period.
- 4.46 It is in this context that one has to consider whether the plan is "*sufficiently flexible to adapt to rapid change*". For the reasons given later we say it does not meet this requirement.

⁴ Table 4 Comparison of Housing Need and Supply 2020-2036

Delivery at Welborne

- 4.47 The consultation document's housing strategy is heavily reliant on housing delivery at Welborne, which was previously identified to meet sub-regional requirements. Table 4.2 of the consultation indicates that over 4,000 new homes are to be built at Welborne by 2037 to meet Fareham Borough's local housing need.
- 4.48 This is not a realistic assumption.
- 4.49 It has been readily apparent for some time that past delivery assumptions at Welborne could not be achieved. Despite the Core Strategy and the Welborne Plan assuming a significant number of new homes would have been built at Welborne by the present time, there is still no outline planning permission some 14 months after the Borough Council's Planning Committee resolved in October 2019 to grant permission for the outline planning application (P/17/0266/OA).
- 4.50 In our response to the January 2020 Supplement, we noted that it wasn't surprising that by that time the Section 106 had not been signed given the particular scale of that development.
- 4.51 However, by the present time, the absence of an outline planning permission raises a more fundamental concern about delivery at Welborne.
- 4.52 Nowhere do the Council provide any evidence as to when they expect outline permission to be granted, the extent of any pre-commencement works and their associated timescale, when reserved matters applications are expected and when first completions will be achieved. The closest the Council gets to any justification is that the housing trajectory has been agreed with the developer Buckland.
- 4.53 We are aware that there will also need to be Highway Agreements relating to works to the M27 Junction 10 prior to those works being commenced; again, in our experience such highway agreements are complex and can take a long period of time to complete. The works to be undertaken to the M27 and A32 are substantial. The Planning Officer's Report highlights the estimated costs of these works as £80m-£90m and that funding gap exists in relation to these works. More recently, we understand the Council has had to seek additional funding from Government to cover earlier Local Enterprise Partnership funding that has since been lost. Hampshire County Council has recently confirmed that: "The J10 works are not fully committed at this stage and there is no defined timescale for delivery." This is clearly a major risk in overall terms but also in terms of when such works will be undertaken and the duration of such works.
- 4.54 This is germane to timescales as to when development at Welborne can be anticipated, notwithstanding the milestone it reached in 2019.
- 4.55 A number of housing trajectories have been proposed for Welborne at different stages. The Borough Council's January 2017 Background Paper concerning Welborne set out the Council's assumption at that time. This suggested that 4,090 new homes would be built at Welborne by 2036. Whilst this would align with the current assumption, this overlooks the fact that circumstances have already moved beyond the key dates suggested therein.
- 4.56 If the 2017 trajectory is simply rolled forward to the present day and it is assumed that outline planning permission is granted in 2021/2022 and development commences in 2023/24 then the

total number of completions would be 3,090 dwellings by 2037 – see *Appendix 1*.

- 4.57 This trajectory is clearly sensitive to assumptions. Any delay in commencing development beyond will 2023/24 will cause fewer completions in the plan period.
- 4.58 Moreover, the extent to which 250 dwellings can be built and sustained each year from 2026 onwards is also a highly sensitive assumption.
- 4.59 We note that more recent research from Lichfields⁵ suggests that for sites of more than 2000 dwellings, the average period of time from planning to delivery is 2.9 years. Moreover, that research indicates that for scheme the size of Welborne the number of houses built each year averaged 140 dwellings.
- 4.60 If a mid point between these two assumptions of 185 dwellings per annum were achieved and sustained as the peak output, this would only yield 2,360 dwellings in the plan period.
- 4.61 It is instructive to note that to achieve 4,020 completions in the plan period would require a build rate from 2024/25 onwards of 309 dwellings per annum. A build rate in excess of 300 dwellings per annum was rejected by the Council in 2017.
- 4.62 What is clear from the above is that Welborne’s contribution to housing supply during the plan period has been over-estimated. This component of housing supply is not justified and consequently the housing supply strategy is not effective.

Proposed Allocations

- 4.63 From our analysis of proposed allocations we have been able to identify that, whilst a number of subject to current planning applications, a significant number are subject to constraints that could delay their development. A number of Sites are owned by public bodies or are subject to multiple landownerships and with existing uses⁶. Moreover, a great many are Sites within the urban areas which are likely only suited to flatted schemes to achieve the capacity numbers and may not be suitable to developers.
- 4.64 Other Sites are subject to nitrates constraints⁷ which may require a strategic solution to enable their release.
- 4.65 Consequently, it is questionable whether they will all be developed and this supports not only the principle of a contingency allowance but also the importance that that allowance reflects the overall level of uncertainty associated with the housing supply strategy.

Windfall

- 4.66 Table 4.2 of the consultation document includes a windfall allowance of 1,224 new homes between 2021 and 2037.
- 4.67 The principle of including a windfall allowance is explained in the NPPF at para 70 in the

⁵ Start to Finish (2016), Driving Housing Delivery (2018)

⁶ FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13, HA22, HA24, HA31, HA36-39, HA42, HA44

⁷ HA1, HA12, HA34, HA40

following terms:

- Firstly, there should be compelling evidence that they will provide a reliable source of supply.
- Secondly, any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 4.68 It is evident that the above is much more than a consideration of historic windfall delivery and requires the plan-maker to actively consider future supply from this source.
- 4.69 The Council's Windfall Background Paper projects forward 51 windfall completions on small sites from 2024/25 and an additional 52 windfall completions from large sites from 2025/26. The only source of information that the Council has used to arrive at these figures is its breakdown of past windfall delivery from 2009 – 2019 which averaged 101 dwellings (51 for small sites and 52 for large sites).
- 4.70 Para 3.6 of the Background Papers states: *"The estimated rate of windfall development is based on past completion rates..."* (emphasis added)
- 4.71 Para 3.9 of the Background Paper states: *"To ensure that a cautious approach is taken and windfall projections are not overly optimistic, the projections have only taken account of windfall delivery since 2009/10"*.
- 4.72 The very next paragraphs states *"Based on the preceding analysis, the windfall projections for the Borough are 51 dwellings per year from small site delivery and 51 dwellings per year from large site delivery"*.
- 4.73 It is clear that the assumption in Table 4.2 of the consultation document is derived solely from past trends and it is claimed that this demonstrates *"a compelling case"*. However, nowhere in the analysis is there consideration of whether this is a reliable source of future supply, rather it is just a forward projection of what happened in the past. The analysis does not provide any consideration of expected future trends.
- 4.74 It is important to recognise that windfall opportunities are finite. Opportunities to redevelop vacant or redundant land will have largely been exhausted by the present time because of planning policies that have prioritised such sources of supply for the past decade and longer. Consequently, future windfall over the plan period will rely to a much greater extent on recycling of land (i.e. existing uses being changed). This is inevitable a less certain source of housing supply.
- 4.75 For the purpose of assessing whether the Plan's housing supply strategy is sound, we have adjusted the windfall contribution by 25% i.e. 918 completions over the plan period.

Revised Housing Strategy

- 4.76 In the preceding Sections we have considered both the level of local housing need and the housing supply strategy providing a reasoned justification why this Regulation 19 Plan is not sound. The following table illustrates the effect of this.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	8,320	520 dpa
Under-supply 2018-2020	875	Added to reflect actual housebuilding relative to LHN
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	10,050	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect roll-forward of 2017 Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 25% to reflect finite supply
Total Supply	7,150	Sum of Supply estimates
Shortfall	2,900	

*retained at 13% of unmet need for illustrative purposes absent any Statement of Common Ground

- 4.77 The above illustrates that with these alternative assumptions, additional land needs to be identified for some 3,000 new homes.
- 4.78 Even if the strategic housing requirement were calculated simply by reference to 403 dwellings per annum, there would be no contingency to take account of changing circumstances over the plan period, contrary to the assertion in the plan to this effect.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	6,448	403 dpa
Under-supply 2018-2020	nil	N/A
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	7,295	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect 2017 Housing Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 20% to reflect finite supply
Total Supply	7,153	Sum of Supply estimates
Shortfall	142	

- 4.79 The above analysis clearly shows that Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to assumptions about housing supply, additional housing land should be allocated for development.
- 4.80 In the following Section we submit that the Strategic Growth Area identified in the Local Plan Supplement 2020 should be allocated for housing development.

5 South Fareham Strategic Growth Area

- 5.1 In our previous representations we supported the inclusion of Strategic Growth Areas in the Local Plan. Hallam control a substantial tract of land to the South of Fareham, adjoining the Stubbington Bypass, the construction of which has recently commenced. This land, along with other parcels in this location, is identified in Figure 3.2 of the Local Plan Supplement Consultation Document as the Proposed Strategic Growth Area South of Fareham.
- 5.2 The justification for the allocation of a Strategic Growth Areas is evident from the preceding Section which identified a significant shortage in the amount of new housing to be provided in the Borough and the amount of future development land allocated for this purpose. Development South of Fareham could provide housing land over the plan period, both in the immediate term and continuity over the long term.

South of Fareham

- 5.3 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. The town is the largest in the Borough with a population of around 37,300. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town.
- 5.4 Fareham is also an important economic centre, which has developed further over recent years with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane and the Peel Common Roundabout.
- 5.5 A new, mixed use masterplanned development to the South of Fareham, contiguous with Longfield Avenue, benefits from its proximity to the town centre, Daedalus, the railway station and existing local services and amenities with good access to walking, cycling and public transport links. These are locational merits that align with *Good Growth*.
- 5.6 Stubbington and Hill Head form a single urban area and have a population of c.14,300. These settlements have a range of services with a local centre, doctors, dentists, two primary schools, a secondary school and a community centre.
- 5.7 Local employment has improved with the development at Daedalus, which lies to the south east of the settlement. Development in south Fareham would delivery homes close to this economic and employment zone, providing housing for the growing workforce.
- 5.8 The Stubbington Bypass is being constructed to connect Gosport Road, Peak Lane and Titchfield Road. This will inevitably create an urbanising influence through the centre of the existing Strategic Gap. Development to the south of Fareham would assist in assimilating the bypass into the landscape and soften the impact of the road on the gap, beyond what could be achieved from constructing the bypass alone.

Development Potential

- 5.9 Paragraph 3.24 of the consultation document identifies high-level development principles and

requirements. Hallam support these intended outcomes and these have underpinned their proposals for a mixed-use masterplanned development.

- 5.10 Work undertaken over a long period of time has identified the suitability of the land controlled by Hallam to accommodate new development, how development can be arranged and the extent of mitigation required.
- 5.11 In our response to the 2019 Issues and Options consultation, we identified potential areas for development in this location and for convenience we have attached this at *Appendix 1*. Whilst this considered only land which Hallam control, we recognise that there are other smaller scale development opportunities within the general location, and that the Borough Council intend to work with landowners and site promoters to develop a Council-led masterplan which will focus on the delivery of community benefits as part of Good Growth. In this context, Hallam are committed to working with the Council and others to develop these proposals further as part of a co-ordinated approach.
- 5.12 A development scheme could comprise the following:
- Approximately 1,200 units
 - a new healthcare facility
 - a primary school
 - a care home
 - community hub
 - local shops
 - sports hub and
 - Green Infrastructure to include public open space, equipped areas of play, Sustainable Drainage Systems (SuDS), tree, hedge and shrub planting, meadows, structural woodland planting, allotment gardens and permissive footpaths and cycleways.
- 5.13 Development would be accessed from a primary and secondary access from Longfield Avenue, along with associated improvements to the existing Long field Avenue/Bishopsfield Road junction and carriageway and a primary access from Peak Lane.
- 5.14 An outline planning application for such a proposed development was submitted in June 2020 and is presently undetermined.

Accessibility and Movement

- 5.15 The accessibility advantages of this location enables positive promotion of active travel. The proposed development will be served by an internal network of footways and access arrangements that can be utilised by both pedestrians and cyclists. The site is surrounded by Public Rights of Way (PRoW) that in turn can serve as cycle/walking connections from the site to other roads in the vicinity of the site. These will be maintained and improved in order to encourage more sustainable modes of travel as an alternative to the conventional car.
- 5.16 Bus based public transport is also a feasible means of sustainable travel from this location. Service provision on the route number X5 operated by First Group provides opportunity for peak commuter travel and also for off-peak travel. The scale of development proposed is

sufficient to deliver dedicated public transport coverage between the Site and key destinations that will have the frequency and reliability to attract patronage to secure long term viability. Any improvement will be discussed with the necessary stakeholders, but it is envisaged that the development will support the introduction of new services.

- 5.17 The Eclipse Busway - a Bus Rapid Transport scheme between Fareham and Gosport opened in 2012 providing a priority public transport route connecting the two towns. The BRT scheme provides a more efficient service using new, comfortable, low-emission buses that encourages bus travel through enhancing the bus travel experience. Using the new busway, buses are able to avoid congested parts of the highway network including A32 so that passengers can benefit from reliable journey times and can plan their onward travel connections.
- 5.18 A number of new highway improvements works have been implemented or are currently under construction which is intended to improve bus journey reliability, and encourage more people to switch from car travel to using the bus. This would have an effect of helping reduce traffic numbers and traffic congestion between Fareham and Gosport, including along Newgate Lane.

Nitrates

- 5.19 The land is located directly west of the edge of urban area that forms part of the designated Chichester, Langstone and Portsmouth Harbours Eutrophic NVZ (TraC) (Nitrate Vulnerable Zone). The land is currently predominantly arable farmland with a history of mixed crops such as wheat, barley, oats, rape etc. and break crops such as peas, winter oil seed rape and beans.
- 5.20 The above is recorded on a Nutrient plan detailing fertilizer types, tonnages and time applied for each individual field. The fertilizer applied during the period of record is a mix of pig and farm yard manures.
- 5.21 It is recognised that intense farming with fertilization with natural manures will lead to nitrate leaching into the surrounding surface water and ground water environment.
- 5.22 Through development of the land, the leaching of nitrates through farming activities will be curtailed. While there will be a new source of nitrate production and leachate associated with the new development, this is considered to be at worst a neutral impact and through further assessment a net reduction in nitrate leaching can be achievable.

Biodiversity

- 5.23 The Hallam land is divided into two areas by Peak Lane; the eastern area comprises largely of arable land with hedgerows and ditches forming the compartmentalisation typical of the surrounding arable tenure and has limited nature conservation value. The western compartment consists of a large area of set aside land, with areas of arable crops, which are bound by limited hedgerows and tree lines.
- 5.24 The most significant habitat is Oxleys Coppice which is designated as a SINC and an area of ancient and semi-ancient woodland (ASNW), which has been evaluated as county level conservation value. The Scheme can ensure that Oxleys Coppice is protected.
- 5.25 Hedgerows are mostly classified under the Hedgerow Evaluation Grade System (HEGS) as moderate and moderate/high value. Only two hedgerows are classified as 'important' under the

Hedgerow Regulations (REGS). Several drainage ditches are found through the Site but only have limited marginal and aquatic vegetation. These are classified as no more than local conservation value.

- 5.26 Surveys have identified the presence of a number of protected species, bats and breeding birds. Measures to safeguard these species and their habitats can readily be accommodated as part of the development proposed. The habitats created and the species which will benefit from the mitigation measures proposed in the Site will lead to an overall beneficial effect in the long term. Similarly, in accordance with the Solent Waders and Brent Goose Strategy, a financial contribution will be made to this, based on the classification of land's suitability for supporting such species.
- 5.27 The Solent & Southampton Water Ramsar/SPA, which also includes Titchfield Haven SSSI, is approximately 700m from the Site. Portsmouth Harbour Ramsar/SPA/SSSI is located approximately 1.3km to the east of the Site at its nearest point, which also support a variety of habitats and an assemblage of dark-bellied brent geese. The Solent Maritime SAC extends from the River Hamble mouth up to Botley in the west, this is approximately 4.7km west of the Site.
- 5.28 There is the potential for a Likely Significant Effect on the Solent SPAs from an increase in recreation from new housing development within a 5.6km zone of influence of the Solent. As a result, an Interim Solent Recreation Mitigation Strategy was published in 2014 to enable initial mitigation measures to be placed, so LAs could continue to grant permission for new homes. The strategy has been updated to form the basis for future new housing up to 2034, with the Bird Aware Solent Recreation Mitigation Strategy (2017).
- 5.29 As this Site falls within the established zone of likely significant effect (5.6km), a HRA/AA will be required by the LPA; however a site specific Test of Likely Significance will be provided to facilitate the LPA assessment. The mitigations measures required to facilitate the Proposed Development will see a financial contribution provided for the in-combination effects on the Solent SPA, with additional bespoke mitigation provided within the Site to mitigate for the alone effects.
- 5.30 The details of bespoke mitigation are to be discussed with Natural England. Current proposals will include an area of County Park/Green Infrastructure to the west of Peak Lane, measuring approximately 23ha, which will include a circular walk, car park and habitat features to provide point of interest, as well as safe areas for dogs to be exercised off the lead. Alternative areas of GI will be provided around the main residential areas to the east of Peak Lane, here approximately 32ha will be provided, which will incorporate recreational opportunities and areas of biodiversity net gain.
- 5.31 The mitigation measures provided within the Site will ensure that there are no likely significant effects on the Solent alone and in-combination with other schemes within Fareham.

Strategic Gap

- 5.32 The current Core Strategy designates land between Fareham and Stubbington as a Strategic Gap. This follows such a designation being contained within earlier Development Plans; Settlement Gap policies in Hampshire date back at least 30 years when they were included within the South and Mid Hampshire Structure Plans (1988 and 1989). They were carried forward into the Hampshire County Structure Plan 1994 and the Hampshire County Structure

Plan 1996-2011. Consequently, with each new development plan needing to make provision for current and future development needs, the role and function of gaps need to be considered having regard to up to date circumstances.

- 5.33 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. As described earlier, this new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. Such a conclusion is similar to the assessment undertaken by Hallam previously.

Summary

- 5.34 Hallam support the identification of the Strategic Growth Area to the South of Fareham and have identified a development scheme that achieves the high-level development principles and requirements set out in the consultation document.
- 5.35 Importantly, development in this location can be brought forward that provides new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.
- 5.36 The merits of this location are substantial, and carefully planned development will not result in the coalescence of Fareham and Stubbington and the separate identities of these settlements can be retained.
- 5.37 As such, the allocation of land at South Fareham in the Local Plan for future development is considered wholly appropriate.

6 Policy NE5 and Policies Map

- 6.1 The Policies Map includes designations relating to Waders and Brent Geese and are associated with Policy NE5. This designation covers four categories of land – Core and Primary Support Areas, Secondary Support Areas, Low Use Areas and Candidate Areas.
- 6.2 The extent to which the land concerned is used by Waders and Brent Geese, particularly beyond the Core Areas, is transitory and can differ from time to time as a consequence of changes in agricultural practices (for example, arable land with wintering cereals provides an optimal foraging resource, whereas when this is replaced / succeeded by grassland habitats its function can change, which could affect species assemblages and regularity it is used. Changes in land use also promote further recreational uses which is the case for areas west of Peak Lane) or changes to the extent of the built environment (for example newly built structures, such as the Stubbington Bypass, will change the suitability of a location in proximity to it as a receptor). Therefore, to delineate these areas in the manner shown on a Policies Map, which affords permanence to the designation, fails to take account of the potential changes in circumstance and is not sound as a matter of principle.
- 6.3 The practical effect of this is that Policy NE5 directs the decision-maker to consider development proposals against the criteria listed therein and the status of the land by reference to the designations shown on the proposals map, which may at that point in time no longer be up-to-date or relevant.
- 6.4 Through Hallam's work in respect of the land to the South of Fareham, and through discussion with Natural England, it has identified a different classification to that shown on the Policies Map for certain of those parcels of land, as shown on *Appendix 2*. This illustrates how the application of Policy NE5 could misdirect the decision maker.
- 6.5 On this basis, these designations should not be shown on the Policies Map in the manner they are presently.
- 6.6 A more generic designation such as Areas of Waders and Brent Geese Sensitivity, which does not classify individual land parcels, would be more appropriate.
- 6.7 It would follow that Policy NE5 would be amended to require planning applications to assess and determine the use of land subject to those development proposals and at that point, when an up to date classification has been determined, the criteria and mitigation in Policy NE5 would apply.

7 Summary

- 7.1 These Representations have been prepared on behalf of Hallam Land Management Limited (Hallam), who control a substantial tract of land to the South of Fareham, adjoining the existing urban area and Stubbington Bypass, the construction of which has recently commenced.
- 7.2 This land was identified in the Local Plan Supplement 2020 as a potential Strategic Growth Area. Whilst the Regulation 19 Plan does not propose to carry forward the South of Fareham Strategic Growth Area, as is evident from these representations the need for such an allocation has not diminished.
- 7.3 The consultation document rightly identifies the Borough Council's commitment to meet the Borough's housing need by the end of the plan-period. This is plainly aligned with the NPPF and the Government's objectives. What is notably absent from the Vision and Strategic Priorities, is the recognition that Fareham is important in a sub-regional context and was previously intended to provide significant development land at Welborne to meet wider needs.
- 7.4 Policy H1 is not founded on a sound basis. In preparing and publishing this Regulation 19 Plan, the Borough Council has afforded greater weight to a potential revision to the Government's Standard Method and has disregarded the published and established measure of local housing need which has underpinned its work to date. Unless and until the Government publish a revision to the Standard Method, this version of the Plan cannot be submitted for Examination as it is plainly unsound. The Borough Council recognise this from its Committee Papers.⁸ This is nothing other than a "wait and see" Plan.
- 7.5 Only if the Standard Method is published in the same final form will the Plan be able to proceed – there is no indication if or when the Government intend to complete this exercise given the significant scrutiny it has attracted.
- 7.6 A more positive approach would have been to retain the higher level of housing as the basis of the Plan to provide surety over a long term with policy measures to manage housing supply in the event the level of local housing need was reduced. Unfortunately, the Council hasn't considered this as an option or a reasonable alternative in the Sustainability Assessment.
- 7.7 Even in the event the proposed revision to the Standard Method were confirmed as the Plan assumes, there is little if any evidence of a cogent understanding of the level of unmet need across neighbouring authorities. There is no apparent evidence of effective co-operation to justify the contribution the Plan proposes to unmet need.
- 7.8 Moreover, the Council hasn't applied its mind to the level of housing that been achieved since the Standard Method was introduced at the start of the plan making process and the date the plan is to be adopted. Viewed objectively, housing completions over that three year period were below the level of local housing need and this shortfall, which is part of a much greater shortfall when compared to the Core Strategy's housing intentions, should be accounted for.
- 7.9 Turning to housing supply, the assumption that Welborne will provide 4000 new homes within the plan period is not founded upon evidence previously produced by the Council and the level

⁸ Executive Briefing Paper 12th October 2020, para 12

of housing output assumed is at a level the Council previously considered unrealistic.

- 7.10 The windfall assumption drawn simply from past trends has not justified why this is a source of future supply. Uncertainties also exist in relation to a number of the proposed allocated sites because of landownership, extent of existing uses and location.
- 7.11 For all of the above reasons, the Plan's approach to housing will fall short of its Vision and Strategic Priorities. Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to housing supply, additional housing land should be allocated for development.

South of Fareham

- 7.12 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town. Similarly, Fareham is an important economic centre, including the Solent Enterprise Zone at Daedalus to the south of the town.
- 7.13 It is considered that development to the south of Fareham would be in a sustainable location, with good access to walking, cycling and public transport links, as well as local services and amenities. This location adjacent to the existing urban area creates a good opportunity for a natural and sustainable extension to the urban area. Development in south Fareham would deliver homes close to an important source of new employment and jobs at Daedalus.

Strategic Gap

- 7.14 The current Core Strategy designated land between Fareham and Stubbington as a Strategic Gap.
- 7.15 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. This new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. The delineation of the Strategic Gap on the Policies Map should be amended accordingly.

Proposed Modifications

- 7.16 The following Modifications are considered necessary for the Local Plan to be sound:
 - 7.16.1 The minimum housing requirement in Policy H1 to be defined by reference to the existing Standard Method;
 - 7.16.2 The housing requirement be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;

- 7.16.3 The level of unmet need that is accommodated be based on constructive, active and on ongoing engagement with neighbouring authorities;
- 7.16.4 Assumptions about the delivery of new housing at Welborne be revisited and revised down;
- 7.16.5 The windfall allowance be revised down;
- 7.16.6 Alternatively, to 6.16.4 and 6.16.5 the level of contingency be increased;
- 7.16.7 Additional housing allocations be provided for;
- 7.16.8 Land South of Fareham is allocated for housing development; and
- 7.16.9 Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood is amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- 7.16.10 The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

Executive Summary

Local Plans should be prepared to contribute to the achievement of sustainable development. They should be positively prepared and seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. As the starting point, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas. These requirements exist within the context of the Government's now longstanding objective to significantly boost the supply of homes.

The Regulation 19 Plan, which is meant to be the Plan the Council intends to submit for Examination, is not founded on the Government's published Standard Method as required by the NPPF and NPPG.

Rather, the Council has alighted upon the possible outcome of a Government consultation document and has based the Development Strategy, Policy H1 and the strategy to meet housing needs on this lower level of housing. This is manifestly unsound.

The fact that the Council do not intend to submit its plan until there is certainty as to a change to the Standard Method does not mitigate the cost of conducting this consultation to the public purse or unnecessary expenditure by other public and private bodies. Moreover, this approach plainly risks undermining public confidence in the plan-led system, if, as is possible, the housing requirement has to be increased. The Council has simply acted prematurely in seizing upon a consultation document that suggests a lower housing requirement; this may be expedient but is the antithesis of positive planning. Put simply, there is no basis for the Council to have formed this consultation document at the present time.

In the event that the Government decides not to proceed with its amendment to the Standard Method, or that such an amendment results in a different outcome for Fareham, the Council will need to further amend the plan. In that instance, a wholly new consultation exercise would be required given the likely magnitude of amendments that would be necessary, adding further delay to the plan-making process, and cost to the public purse and to interested parties, whilst, regrettably, undermining confidence in the Local Plan process.

Moreover, the Council has not recognised the context within which this Plan is being prepared. Housing delivery relative to the Core Strategy has resulted in a substantial shortfall in new housing over past years and this Plan provides an opportunity for positive and ambitious planning to ensure development needs are met and the principles of good growth are achieved. The Plan fails in this regard.

The Council purports to make a contribution towards meeting the unmet need of its neighboring authorities; however, this does not reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PfSH) of over 10,000 homes. It is not at all apparent that this Plan is founded on constructive, active and on an ongoing engagement as required by Section 33A.

It is instructive that whilst Welborne was identified to provide housing to meet sub-regional requirements, its role has now changed to meeting the Borough's housing needs first and foremost;

consequently this Plan makes a significantly lower contribution to the wider sub-regional needs which plainly have not diminished.

Furthermore, the Plan has exaggerated the likely housing supply from Welborne and other sources to such an extent that a shortfall in housing supply is inevitable.

The Plan overlooks the opportunity provided by the previously identified Strategic Growth Area at South Fareham which would make an important contribution to housing supply in the short term and providing surety of supply over the longer term. The suitability of this location is apparent from the Council's evidence base; it is accessible to the Borough's main urban area, it is not an area that is sensitive in landscape terms, development can be accommodated without undermining the principle of separation between Fareham and Stubbington, there are no environmental designations that preclude development and the transport modelling and its' conclusions has assumed development in this location. A development scheme in this location can also deliver nitrate neutrality and biodiversity net gain. Development to the South of Fareham can achieve *Good Growth*.

Unfortunately, the Sustainability Appraisal does not consider higher levels of growth consistent with the January 2020 Local Plan Supplement, and, as such, fails to consider a reasonable alternative.

The following Modifications are considered necessary for the Local Plan to be sound:

- The minimum housing requirement should be defined by reference to the existing Standard Method;
- The housing requirement should be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;
- The level of unmet need that is accommodated should be based on constructive, active and on ongoing engagement with neighbouring authorities;
- Assumptions about the delivery of new housing at Welborne should be revisited and revised down;
- The windfall allowance should be revised down;
- Alternatively, the level of contingency should be increased;
- Additional housing allocations should be provided for;
- Land South of Fareham should be allocated for housing development; and
- Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood should be amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1 Introduction

- 1.1 Hallam Land Management Limited ('Hallam') control a substantial tract of land to the South of Fareham, south of Longfield Avenue, west of HMS Collingwood and adjoining the Stubbington Bypass, the construction of which has recently commenced.
- 1.2 In successive representations to the Local Plan Review we have draw attention to the merits and advantages of locating development to the South of Fareham and how this would achieve the Borough Council's objective of *Good Growth*.
- 1.3 In the January 2020 Local Plan Supplement, this land, along with other parcels in this location, was identified by the Borough Council as a potential Strategic Growth Area.
- 1.4 In the current consultation document, such an allocation has not been carried forward.
- 1.5 On this occasion, the Borough Council's has alighted upon the possible revision to the Government's Standard Method for assessing local housing need, which suggests a lower level of housing for Fareham.
- 1.6 In our opinion, the Borough Council are wrong to have published this consultation document in this form given the status of this version of the Plan is afforded by the Local Plan Regulations; *the Plan a Local Planning Authority intends to submit for Examination*. To have based a Plan on the possible outcome of a Government consultation is plainly premature and, regrettably, the Plan's housing strategy is not positively prepared and is unsound.
- 1.7 The Plan's housing strategy is not an effective one. It has no regard to past performance relative to the objective assessment of housing need and the level of contingency is not sufficient when the likely delivery of Welbourne is viewed objectively. Over the plan period a significant shortfall in new housing is inevitable.
- 1.8 For the reasons given in this representation, additional housing land should be allocated in Policy H1.
- 1.9 Land South of Fareham is an eminently suitable and sustainable location for future development and should be identified accordingly. In the context of the Borough Council's *Good Growth* principles that underpin the Plan's Development Strategy, Hallam's development proposals achieve the high-level development principles and requirements set out in the Local Plan Supplement which remain entirely appropriate.
- 1.10 It is especially significant that the Borough Council's assessment of Strategic Gaps has drawn the conclusion that new development can be located south of Longfield Avenue without harming the integral purpose of this earlier designation. We agree with this conclusion, which accords with our previous submissions that carefully planned development will not result in the coalescence of Fareham and Stubbington and that the separate identities of these settlements can be retained.
- 1.11 Development at South Fareham can be brought forward to provide new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality

of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.

- 1.12 As such, and for the reasons given herein, the previous potential Strategic Growth Area at South Fareham should have been retained in the Local Plan for future development.
- 1.13 In our representations in the following Sections we set out that, whilst the Plan's Vision and Strategic Priorities are correct, absent amendments to Policy H1, this version of the Local Plan will not provide sufficient housing and this will run counter to its stated intention to address housing needs by the end of the plan period.

2 Vision and Strategic Priorities

- 2.1 In this Section of our representations we consider the consultation document's Vision and the Strategic Priorities that the Borough Council has identified. It is instructive to consider the extent to which the Plan's policies and proposals will, in practice, contribute towards this Vision being realised and the Strategic Priorities being met, in the context of what the NPPF's anticipates of a Local Plan.

National Planning Policy Framework

- 2.2 Para 15 of the NPPF requires that each Local Plan should provide a positive vision for the future of its area; a framework for addressing housing needs and other economic, social and environmental priorities. (emphasis added)
- 2.3 Para 17 requires that a Local Plan includes strategic policies to address the local authority's priorities for the development and the use of land in its area.
- 2.4 Para 20 states that strategic policies should set out the overall strategy for the pattern, scale and quality of development, and make provision for, *inter alia*, housing, employment, retail, leisure and other commercial development, infrastructure, community facilities and conservation and enhancement of the environment.
- 2.5 Para 22 states that strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure.
- 2.6 Para 23 states that strategic policies should provide a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development. This should include planning for and allocating sufficient sites to deliver the strategic priorities of the area.
- 2.7 In the context of plan making making, the NPPF's presumption in favour of sustainable development is framed in the following terms:
- a. *plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
 - b. *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:*
 - i. *the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - ii. *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.*
- 2.8 In this context, it is important to recognise the significance of the Regulation 19 stage in the plan-making process. This is the Plan the Borough Council intends to submit to the Secretary of

State for the purpose of Examination pursuant to Section 20 of the Act. This is explained in the NPPG *"The publication stage plan should be the document that the local authority considers ready for examination"*. Therefore, this is the Plan and the approach to meeting objectively assessed need that the Borough Council now consider appropriate.

- 2.9 But, as the Borough Council has suggested it won't decide whether or not to submit the Plan until it knows the outcome of the Government's review of the Standard Method, this is little more than a "wait and see" approach. This is plainly wrong given the importance of the plan-led system in overall terms, the alacrity with which an up-to-date Local Plan is needed in Fareham, and the need to maintain public confidence in the plan-making system generally.
- 2.10 As will be shown later, the practical difference between a housing strategy based of 520 dwellings per annum and 403 dwellings per annum is an 'end date' five years hence. When viewed in the context of providing surety over the longer term and the emphasis in the NPPF on exceeding the minimum requirement, adopting a higher growth level at this stage would have been the positive and responsible response to this circumstance.

The Vision

- 2.11 The Borough Council's Vision as set out in the consultation document intends that it:
- *"will accommodate development to address the need for new homes and employment space in Fareham Borough; and*
 - *new housing will address the particular needs in the Borough, such as our growing housing need and an ageing population and creating attractive places to live".*
- 2.12 The Vision is framed by reference to the Borough's needs, whereas Fareham is part of the established Partnership for Urban Southampton and has a role in contributing to meeting the housing needs of the sub-region. Indeed, there is no reference to Fareham's sub-regional role on any of the text associated with the Vision and Strategic Priorities in Section 2 of the Plan. In this context, the Vision should be drawn more widely.
- 2.13 Significantly, the allocation at Welborne in the Core Strategy was specifically for a sub-regional purpose, but its role by the present time appears to have been recast entirely; a matter we return to later.
- 2.14 Without prejudice to the above, achieving any Vision requires policies and proposals that are genuinely aligned with it. In respect of housing, the outcome of the Local Plan's policies and proposals should be that the Borough's housing needs are met.
- 2.15 As such, the Local Plan must, first, establish the correct strategic housing requirement in Policy H1 i.e. the overall number of new homes that need to be built by 2037 and, second, ensure a housing supply strategy that has the necessary surety that this can be achieved.
- 2.16 What experience both in Fareham and elsewhere has shown is that there must be an element of theoretical overprovision as part of the housing strategy to ensure that sufficient new housing is built.
- 2.17 To an extent the consultation document recognises this, but, as will be shown, it significantly

misjudges housing supply to such an extent that it undermines achievement of the Vision.

2.18 Conversely had a positive approach to plan-making been adopted, the Local Plan would have provided a robust planning strategy for the Borough.

Strategic Priorities

2.19 In the context of the Vision, the first Strategic Priority is to:

- *address the housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.*

2.20 Again, there is no reference to Fareham's wider sub-regional role. In the context of Section 33A of the Planning and Compulsory Purchase Act, which requires constructive and active engagement on strategic matters, this is a surprising omission.

2.21 Without prejudice to this point, as a matter of principle, such a strategic objective is soundly based and is aligned with the significant importance the Government attaches to housing provision. Such a Strategic Priority is universally found in Local Plans national-wide.

2.22 However, in this instance, the apparent driver to the Publication Draft has been an attempt to reduce the scale of housing provision despite the Vision and Strategic Priority. This is the only conclusion that can be drawn from the Council having based its Regulation 19 Plan on a consultation document concerning a potential revision to the Standard Method.

2.23 This approach is plainly not sound for the following reasons:

2.24 Firstly, it departs from the method of calculating local housing need set out in para 60 of the NPPF. No exceptional circumstance has been suggested other than a lower figure is derived from the potential revision to the Standard Method. In a recent comment the Planning Minister referred to outputs based on the consultation exercise as "*entirely speculative*".

2.25 Secondly, even if that figure is correct, it is in no way obvious how the wider needs of the sub-region are to be met; across the wider geographic area as a whole the level of local housing need is suggested to be greater than has hitherto been the case.

2.26 Thirdly, the approach to housing supply significantly overstates likely housing delivery and the scale of contingency is simply not sufficient to ensure future housing supply would meet identified need.

2.27 The inevitable conclusion is that this version of the Local Plan is not positively prepared, justified, effective or consistent with national policy. Therefore, whilst the Plan may have a clear strategic priority to address the need for new homes in the Borough, its subsequent policy to base the strategic housing requirement of 403 dwellings per annum means, when considered objectively, that it fails to do so. To consciously plan for 20% less housing than has been identified firstly as necessary, and secondly as capable of being accommodated, is not properly addressing the need for new homes in the Borough.

2.28 In short, the Plan provides for too few houses over the plan period. This in turn will give rise to

adverse effects. It will restrict the number of people who are able to purchase new housing from doing so and constrain the operation of the housing market. It will also reduce the amount of affordable housing that is built because that is a proportion of the overall amount of housing. Moreover, by restricting market housing it creates an additional and greater incidence of housing need as people who would otherwise have been able to buy a market home are prevented from and they fall into housing need. This will have harmful socio-economic effects and runs counter to the Vision to meet the Borough's housing need.

2.29 For these reasons, the consultation document is not soundly based.

3 Development Strategy

- 3.1 The preceding Section has considered the Regulation 19 Plan's Vision and Strategic Priorities as they relate to housing provision and has identified that, as a practical effect, its policies and proposal will not deliver the intended outcome in terms of meeting housing need by the end of the plan period. In this Section, we consider the proposed Development Strategy and the extent to which it could accommodate a greater level of development if necessary.
- 3.2 The Plan's Development Strategy, set out on pages 17 – 32, and its associated Key Diagram and more detailed Policies Map, are framed by the Borough Council's approach to housing provision. This is evident from comparing the direction of travel outlined in the January 2020 Local Plan Supplement based on the published Standard Method and which identified the need for Strategic Areas of Growth to be allocated for future development, and the present approach which includes very few new housing allocations.
- 3.3 In the event the Borough Council has to re-cast its approach to housing provision, it will also need to adjust its Development Strategy in order to be able to deliver the strategic objective to address housing need. In this regard, it is of note that para 3.5 of the consultation document acknowledges that *"the [Local Plan] Supplement consultation in early 2020 identified the Council's preferred approach to its Development Strategy which it proposes to use to guide the focus of development until at least 2037"*. This clearly illustrates the suitability of the Strategy at that time as the basis of plan-making presently.
- 3.4 In the following paragraphs we comment on the various elements of the Council's Development Strategy both as articulated presently but also in the context of a revised housing strategy which would require additional land to be identified for development in the plan period.

Good Growth

- 3.5 The 2019 Issues and Options consultation established the principle of **Good Growth** as the keystone for the Local Plan's Development Strategy.
- 3.6 *Good Growth* was defined in the 2020 Local Plan Supplement in the following terms:
- building homes and creating employment spaces in such a way as to improve the quality of life whilst protecting the most valued and natural historic environments.
 - respecting environmental protections and delivering opportunities for environmental gain, providing opportunities for reduced energy demand and waste production, whilst sensitively managing the countryside and valued landscapes.
 - providing open space and leisure opportunities to encourage healthy and active lifestyles and encouraging more of us to use active forms of travel rather than the car.
- 3.7 This definition has been retained in the Regulation 19 Plan.
- 3.8 These principles exist within an overarching scale of development that the Borough will need to provide for over the plan period. It is of paramount importance that, in the context of the Plan's Vision and Strategic Priorities, this scale of development is correctly defined at the outset; only then can it be said the Plan will address housing and employment needs adequately,

appropriately and sustainably. If the housing requirement is drawn too low, it will have negative social and economic effects.

- 3.9 It follows that, at the plan-making stage, the Local Plan is able to set out strategic and development management policies that have *Good Growth* principles at their core; both in terms of determining which locations in the Borough are to be allocated for new development and then the form and nature of such development.
- 3.10 The ensuing Land Use Strategy should prioritise locations that are able to achieve the principles of *Good Growth*, albeit there are instances where there are competing interest and, as with all planning decisions, balanced judgements will be necessary.

Development Strategy

- 3.11 This Section of the Regulation 19 Plan describes the factors that the Council has used to determine its Development Strategy. Because of the range of considerations that are inputted to, and then flow from this, what the Plan is actually describing is its land use strategy, namely where development is acceptable and conversely where factors determine new development would not be appropriate and other considerations are more important.

Landscape and countryside

- 3.12 We agree that there are parts of the Borough which have a fundamental importance in landscape terms and it is right that preservation of the landscape in those locations is the principal consideration. Figure 3.1 which illustrates the Key Diagram identifies "Areas of Special Landscape Quality" and we agree with the designation of the areas shown in this regard. Policy DS3, which we comment on later, should be worded to ensure that preserving the special landscape quality of these areas is given primacy.

Settlement boundaries

- 3.13 Settlement boundaries delineated in earlier development plans were drawn in the context of development needs as determined at that time.
- 3.14 Where the scale of development cannot be met on land within the Borough's urban area, development in the countryside adjoining main settlements is a wholly necessary and legitimate proposition.
- 3.15 As a consequence of allocating land for development to meet identified needs, settlement boundaries can and should be amended accordingly. In short, the existing settlement boundaries are not immutable.

The desire to respect settlement identity

- 3.16 Given that Areas of Special Landscape Quality have been assessed and delineated on the Key Diagram it is also necessary to consider whether land identified in the current Development Plan as Strategic Gap still requires such protection, whether its boundaries can justifiably be amended in light of up-to-date circumstances or whether any areas of land subject to that designation can be developed in order to contribute to a sustainable pattern of development.

- 3.17 The *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* considers existing Strategic Gaps in the adopted Local Plan and concludes that land south of Fareham, east of Peak Lane and west of HMS Collingwood does not perform the same function in terms of maintaining separation between Fareham and Stubbington as other land that is subject to this designation and is more integral to the purpose of preserving identity.
- 3.18 Chapter 4 of that Study, Paragraph 10 states that *"there exists some opportunities for development to be absorbed within the strategic gap subject to scale and future detailed design, without compromising its gap function combined with mitigation measures that can support green infrastructure enhancement"*.
- 3.19 It follows as a matter of principle that this land should not be designated as Strategic Gap in this Local Plan as this designation plainly cannot be justified in that location. Conversely, to continue to propose this land as Strategic Gap is not justified on the basis of the Council's own evidence.
- 3.20 It is highly material that the Local Plan Supplement had anticipated a Strategic Growth Area in this location, reflecting the broad conclusions of the earlier Options testing that this represents a sustainable and accessible location for new development and that such development can be accommodated without harm to the separation between Fareham and Stubbington. The significance of this is especially important in the context of the greater scale of development the Local Plan should accommodate and as such this represents an eminently suitable location for development. The fact this land is outside of the settlement boundary is in no way an overriding determinant that would preclude its allocation.

Climate change, flood zones and coastal management areas

- 3.21 We agree that the Local Plan should not direct major new development to areas identified as having a role in mitigating the impacts of flooding or coastal erosion. It is noteworthy that the areas of potential flood risk are associated with the River Hamble, River Meon, River Wallington and Lee-Solent estuary and are largely subject to nature conservation designations and landscape designations which limit the extent these locations would be suitable for development in any event.
- 3.22 In this context, the land identified as suitable for future development to the south of Fareham is not subject to flood risk and can be developed with Sustainable Urban Drainage measures that would not increase the risk of flooding elsewhere.

Protected areas for nature conservation

- 3.23 There are strategic nature conservation constraints that exist in the Borough in the form of International and Nationally designated sites. These overlap with other environmental designations and exert a significant constraint on where development can be located, limiting the extent of land absent a constraint. None of these constraints directly affect the land south of Fareham referred to in preceding paragraphs.

Transport corridors and opportunities to encourage more active travel modes

- 3.24 The NPPF advises that the planning system should actively manage patterns of growth to support sustainable travel. Significant development should be focused on locations which are

or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health.

- 3.25 In this regard, the Local Plan Strategic Transport Assessment states the following: *The proposed growth locations in the Local Plan to accommodate forecast population and economic growth, took a wide range of factors into consideration, including transport and access implications. Most of the Local Plan growth is located either within or on the edge of existing conurbations, providing good opportunities for trips to be made by modes of transport other than the private car. Consequently, the proposed growth in the Local Plan is generally in sustainable locations in terms of transport and access*”.
- 3.26 It is important to stress that this Transport Assessment in fact includes development at the Strategic Growth Areas, therefore, this conclusion reflects the suitability of new development in this location in these terms.
- 3.27 Whilst certain representations have previously raised concern about traffic impacts, the Transport Assessment concludes that the scale of development proposed (including the Strategic Growth Areas) and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective.

Need to encourage diversity in the housing market

- 3.28 We agree that there needs to a balance in the portfolio of housing sites. We comment later on the likely delivery of housing from Welborne, which can only represent a modest supply of housing in anything other than the longer term.
- 3.29 To meet the objective of providing sufficient housing, additional housing allocations are required for all of the reasons in this representation and in particular those in response to Policy H1. Whilst development to the south of Fareham will change the character of part of the undeveloped land between Fareham and Stubbington, this must be balanced with the material benefits of the scheme in terms of the new housing to increase housing supply in the short term and to provide a surety of supply over the longer term.
- 3.30 The opportunity to the south of Fareham is of a sufficient scale to meet the identified need for market housing, affordable housing, specialist accommodation and self-build and custom build housing, along with the co-location of local services and facilities to support a new neighbourhood.

Sustainability and accessibility to services

- 3.31 Fareham is identified in the Core Strategy as a ‘key growth point’ in the South Hampshire sub region and a ‘secondary regional centre’. The town is the largest in the Borough with a population of approximately 37,000 people. Fareham is also an important economic centre, which has developed further over recent years, with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane, Peel Common Roundabout and the construction of the Stubbington Bypass.
- 3.32 Amongst the advantages previously identified for the South Fareham Strategic Growth Area is

its proximity to the town centre, the Solent Enterprise Zone at Daedalus, the railway station and existing local services and amenities with good access to walking, cycling, and public transport links. Local facilities are situated along Bishopsfield Avenue and at Broadlaw Walk. Large-scale out-of-town retail facilities are located at Newgate Lane and Fareham Road to the east of Longfield Avenue.

- 3.33 Large-scale development to the south of Fareham, rather than a more dispersed pattern, would maximise opportunities to prioritise pedestrian and cycle links and extend public transport to maximise sustainable modes of travel.

The requirement to meet housing and employment needs

- 3.34 *Good Growth* can only be achieved if the Local Plan intends to meet objectively assessed need for housing, which for the reasons set out in response to Policy H1, it does not achieve this at the present time.

Spatial Interpretation

- 3.35 As a matter of principle, the identification of deliverable or developable previously developed land should be a priority, however, it is widely understood that such opportunities do not exist to accommodate the scale of new housing and employment required in the Borough.
- 3.36 Accordingly, the allocation of greenfield sites for future development is both a legitimate and necessary measure.
- 3.37 The morphology of the Borough is comprised of three urbanised areas: Fareham, Portchester and the 'Western Wards', which are part of a coastal conurbation that extends from Portsmouth in the east to Southampton in the west. Fareham is the pre-eminent urban area within the Borough in terms of services and facilities and public transport. Portchester and the 'Western Wards' are characterised more as residential suburbs.
- 3.38 Interspersed to a greater and lesser degree between these settlements are areas of separation comprising Portsmouth Harbour, Alver Valley, Meon Valley and the River Hamble. These are strategically important corridors that separate the main urban areas, protect their identity and prevent settlements within the coastal conurbation from merging together.
- 3.39 To the north of the M27, the Borough is of a more rural character, noting of course the proposed new community at Welborne which will undoubtedly change the character of this area over a long period of time.
- 3.40 Stubbington, a residential suburb, lies south of and separate from Fareham's urban area along with the sub-regionally important employment and logistics node at Daedalus. The Borough Council have stated aspirations to maximise the potential of the airfield's land and infrastructure assets through new commercial development, providing clusters for aviation, non-aviation and skills/innovation activity. This will contribute positively to the creation of skilled jobs in the Solent Enterprise Zone.
- 3.41 These characteristics have led the Council, rightly in our opinion, to consider the designation of Valued Landscapes as part of the Local Plan and in this context we are aware that the 2017 Landscape Assessment acknowledges the intrinsic landscape character of the Meon, Hamble

and Hook valleys.

- 3.42 We agree that the Meon Valley is a distinctly valued landscape. In our 2019 response to the Issues and Options consultation we referred to various Appeal decisions that alight upon the value of the landscape in this location. Continuing to protect this area from development and formalising a landscape designation in the Meon Valley would be appropriate.
- 3.43 The extent to which land around the 'Western Wards' is capable of accommodating new development is constrained by the extent of nature conservation designations close to the existing urban area which limits development opportunities to small scale schemes at most.
- 3.44 On the basis of the above, it follows that **locations that adjoin Fareham town, as distinct from villages away from it located in the rural hinterland to the north and west of the Borough, are inherently more suitable in terms of reflecting the morphology of the Borough, preserving its natural environment and maximizing accessibility to services and facilities to achieve the most sustainable pattern of development.**
- 3.45 The extent to which new development opportunities in those locations can consolidate and enhance the accessibility advantages of Fareham Town Centre and Daedalus are consistent with the *Good Growth* principles set out in paras 3.5 and 3.6 above.

Development Strategy Policies

- 3.46 Para 3.2 of the consultation document defines the Development Strategy as providing the *"distribution, scale and form of development and supporting infrastructure, a set of proposals to deliver the strategy, policies against which to assess planning applications, and proposals for monitoring the success of the plan"*.
- 3.47 In addition to the narration of the Strategy, this Section of the Plan includes three policies; the first controlling new development in the countryside, the second in respect of the Strategic Gap and a third concerning Landscape. These policies do not set out a Settlement Hierarchy or Spatial Strategy for the Plan area and such policies do not appear elsewhere in the Plan either. The practical effect of this is that there is no policy that delivers the spatial objectives in so far as where new development should be located i.e. affording a priority to locations within and adjoining Fareham town as the most sustainable location in the Borough.
- 3.48 Given that para 3.2 suggests the role of the Development Strategy provides a set of policies that direct where and how new development should be located, the omission of what are usually commonplace policies is significant.

Strategic Policy DS1: Development in the Countryside

- 3.49 Policy DS1 seeks to control the use of land outside defined settlement boundaries i.e. in countryside locations.
- 3.50 In some circumstances it would be appropriate to grant planning permission for new development in such locations. In those instances, the benefits of a development proposal would need to be considered against the criteria in part two of the policy. In this context, we do not agree that Criterion 'v' is drafted correctly.

- 3.51 On certain occasions other considerations associated with a development proposal would merit planning permission being granted notwithstanding the agricultural classification of the land concerned. In this regard, whilst the NPPF affords a preference to development of lower quality agricultural land, it does not preclude the development of best and most versatile land (see footnote 53 of the NPPF).
- 3.52 As presently drafted Policy DS1 conflicts with the expression of this policy approach in the NPPF; as such criterion 'v' should be reworded as follows: "*avoid or minimise the loss of best and most versatile agricultural land*".

Strategic Policy DS2: Development in Strategic Gaps

- 3.53 In earlier representations we have identified that the evidence base provided by the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* does not justify the delineation of the Strategic Gap south of Fareham in the manner shown on the Key Diagram.
- 3.54 In particular, that Report identifies that the land south of Longfield Avenue and west of HMS Collingwood could accommodate new development without a significant adverse effect on the objectives of the Strategic Gap designation.
- 3.55 It follows that this land is not an integral part of the Fareham and Stubbington Gap.
- 3.56 As such the Strategic Gap should not extend across this land, as this would add a policy restriction that ought not apply on the basis of the published evidence. Put simply, such a designation should not include more land than is necessary to achieve its purpose.
- 3.57 For the Local Plan Key Diagram to be justified, and for the Local Plan to be sound, the delineation of the Strategic Gap south of Fareham should be amended accordingly.

Strategic Policy DS3: Landscape

- 3.58 The Local Plan intends to formalise Areas of Special Landscape Quality to reflect their valued status as determined through the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps*. As written, Policy DS3 does not however afford any particular level of protection to these areas beyond Policy DS1, which in any event requires development proposals in the Countryside to "*conserve and enhance landscapes*".
- 3.59 Policy DS3 also appears to permit major development proposals in these locations whereas the Development Strategy has sought to avoid new allocations in these locations because of their landscape sensitivity. The definition of major development is provided in the Glossary¹ and when applied to this Policy, could see large scale development proposals being advanced when this is what the Local Plan is seeking to avoid. As drafted, this Policy does little to enforce the Plan's Development Strategy.

¹ For residential schemes, major development includes those of 10 dwellings or more or on a site of 0.5 hectares or more. For other development, it includes building(s) with a floor area of 1000sq.m or more or on a site of 1 hectare or more.

4 Policy H1: Addressing housing needs by the end of the plan period in an appropriate and sustainable manner

- 4.1 In this Section we consider specifically Policy H1 and whether, as presently formed, the Borough Council's strategic housing requirement and housing supply strategy are sound.
- 4.2 The NPPF expects the planning system to significantly boost the supply of new housing by providing, in the first instance, a sufficient amount of development land where it is needed (para 59 refers).
- 4.3 It is clear that a Local Plan's housing requirement is to be calculated by reference to the Government's Standard Method, unless exceptional circumstances can be proven (para 60 refers).
- 4.4 In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.
- 4.5 As discussed in Section 2, the Plan's Vision and Strategic Priorities establish the intention to address the Borough housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.
- 4.6 For the Plan to address, and indeed meet, housing needs by the end of the plan period, it is important to have regard to the following considerations which are material to determining a sound strategy in the context of the Government's presumption in favour of sustainable development:
- context and the backdrop to this Local Plan;
 - an objective assessment of local housing need;
 - unmet need from neighbouring authorities;
 - the Plan's housing deliver strategy and whether this is sufficiently robust.
- 4.7 As will be shown, the consultation document will not achieve this, and when measured objectively, a shortfall in housing supply over the plan period will be inevitable, contrary to the stated Vision and Strategic Priority.

Context

- 4.8 The earlier Core Strategy set out a Development Strategy for the period to 2026 that has hitherto been achieved in part only. This partial achievement has had significant implications for housing delivery in the plan area.
- 4.9 In aggregate, the Core Strategy intended that some 9,000 new homes would be built in Fareham

in the 20 years between 2006 and 2026. This comprised:

- 5,350 at the North Fareham Strategic Development Area (Welborne) to meet sub-regional needs as identified in both the South East Plan and the South Hampshire Sub-Regional Strategy; and
- 3,729 elsewhere in the Borough²;

- 4.10 Over the 13 years since the start of the Core Strategy's plan period (2006/7 and 2018/19) only 4,200 new homes have been built. This is equivalent to 46% of the housing requirement in 68% of the plan period.
- 4.11 In comparison with the trajectory on page 21 of the Core Strategy, new housing has had to be accommodated in locations outside of allocated Strategic Development Area; in the four years from 2016, almost twice as many new homes have been provided elsewhere in the Borough than the 469 intended for the whole of that 5 year period 2016/21.
- 4.12 Following the Core Strategy, when the Welborne Plan was prepared in 2015, and to reflect the changed circumstances by then the Council re-calculated likely delivery at the Garden Village. Policy WEL3 identified approximately 6,000 new homes to be completed by 2036. First completions were to be achieved in 2015/16, 1,500 completions were to have been achieved by 2021 and 2,860 completions by 2026.
- 4.13 Plainly this hasn't been achieved and without question there has been a substantial shortfall in housing provision compared to the Core Strategy.
- 4.14 Manifestly, this shortfall is significant and cannot simply be put to one side. It is striking that Welborne was identified originally to meet sub-regional needs but because it hasn't delivered it now represents a source of housing to meet in a substantial part the Borough's own housing need and thus the Borough's contribution of the wider sub-regional need is much reduced.
- 4.15 Given the strategic objective defined by the Council, and in the context of the NPPF's presumption in favour of sustainable development, this has a clear implication for plan-making in Fareham. National Planning Policy invites Local Authorities to exceed the minimum housing requirement and to adopt a positive approach to planning for future housing. Plan-making should not be a simple mathematical exercise but a fundamental examination of how to best plan for the long-term future of the Borough. In this instance, and as the Local Plan Supplement was endeavoring to achieve, this enables the Council to develop a strategy for the longer term.
- 4.16 The change of direction in the Regulation 19 consultation document appears to be framed by precisely the opposite; planning for the minimum plan period and the least amount of new development plausible. Patently, that approach does not include the flexibility which a Local Plan should provide.
- 4.17 For example, had the Regulation 19 Plan retained the level of housing calculated by reference to the published Standard Method – 520 dwellings per annum – and had a lower housing requirement in fact materialized, the practical effect of this would merely have been a housing supply strategy that would endure beyond the end of the plan period. In simple terms, the

² Policies CS2 and CS15 refer

housing strategy would cater for an addition 5 years worth of housing. Given that it is beyond comprehension that housing need will not cease after 2037, this would have been a positive, adaptable, plan-led, longer term strategy.

- 4.18 The fact that the Council has alighted upon a potentially lower housing requirement without apparently considering the practical effect of retaining the existing housing requirement manifestly demonstrates a negative, rather than positive, approach to plan making.
- 4.19 Moreover, the Sustainability Appraisal has plainly not considered this as a reasonable alternative and, as such, is flawed. The Assessment of Alternatives in Section 5 of the Sustainability Appraisal relates to development locations rather than the overall quantum of development. The PPG advises that *"a sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted"*. The purpose of testing reasonable alternatives is to determine that a Local Plan promotes sustainable development when judged against reasonable alternatives, to achieve relevant environmental, economic and social objectives.
- 4.20 This negative approach is further evident when considering the components of the housing strategy which again illustrates a do-minimum approach.

Local Housing Need

- 4.21 Application of the Standard Method to calculate the Local Plan's local housing need would require 520 new homes to be provided each year, or 8,320 new homes in total between 2021-2037.
- 4.22 Alternatively, the Regulation 19 Plan is based on 403 new homes each year which is derived from the proposed revisions to the Standard Method published as a consultation document by the Government in the Summer. These proposed revisions carry no weight at the present time and do not provide any basis for the calculation of housing need for the purpose of this Local Plan at the present time.
- 4.23 Only if the proposed revisions are carried forward without alteration by Government would this serve as a basis to underpin the Plan and enable it to be submitted. Any change to the formula, as it relates to Fareham or any of its neighbouring authorities, would require reconsideration of the housing requirement in Policy H1. The Regulation 19 Plan is contingent therefore on the outcome of that entirely separate process, rather than being a Plan which the Council is able to submit for Examination. It is, for want of a better term, a "wait and see" plan.
- 4.24 As the Council appear to acknowledge themselves by the intention not to submit the Plan for Examination until the outcome of the Government's consultation is known, it is plainly not a sound approach at the present time.
- 4.25 Little more can be said about this, other than to draw attention to the obvious difficulties that have arisen in light of the Government's consultation, which have led to a significant level of opposition to the suggested changes. As recently as mid-November the Planning Minister referred to estimates of local housing need derived from its consultation exercise as *"entirely speculative"* and indicating that the revised formula was being re-evaluated.

- 4.26 It is also important to consider when the Standard Method was introduced and the practical effects of this which the Council don't appear to acknowledge.
- 4.27 The Standard Method was introduced in 2018 and the assessed level of local housing need was based on a period of 2016 onwards. The Council appear not to have grappled with the guidance in the Planning Practice Guidance in respect of this: "*Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate*". Plainly we are some way into the plan making process which commenced in 2017 and this requires the Council to have asked themselves how have housing completions compared with the level of local housing need from that point.
- 4.28 The published requirement was 520 dwelling per annum from 2016 onwards, whereas the highest number of completions was 349 in 2016/17 and less than half for the two years since where monitoring information is available.
- 4.29 The Standard Method takes account of backlog but only in so far as affordability will have increased in the years prior to the calculation and does not take account of underprovision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.
- 4.30 The following table illustrates this:

Year	Number of Completions	Level of Local Housing Need	Shortfall
2018/2019	290	520	230
2019/2020*	263	520	257
2020/2021**	132	520	388

*Projected housing supply April 2019

**Projected housing supply June 2020

- 4.31 This indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No account is taken of this in the current consultation document. Even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
- 4.32 In the circumstance where housing delivery in the Borough has been below both that anticipated by the Core Strategy and the measure of local housing need derived from the Standard Method, however calculated, the Council are plainly wrong to have selected a plan period that takes no account of this and a housing strategy that has no regard to that underprovision. This further undermines any notion of a positively prepared plan.

Unmet Need

- 4.33 Section 33A of the Planning and Compulsory Purchase Act 2004 requires a local planning authority to cooperate with, *inter alia*, other local planning authorities, and engage constructively, actively and on an ongoing basis in the preparation development plan documents, so far as relating to strategic matter. Paragraph 25 of the NPPF says 'strategic policy making authorities should collaborate to identify the relevant strategic matters which they need

to address in their plans'. Unlike problems associated with soundness, a failure to discharge the obligation in Section 33A cannot be remedied once the plan has been submitted for examination.³

- 4.34 It is clear from the work of the Partnership for Urban South Hampshire that housing provision is a strategic matter and thus there is a need for co-operation between constituent plan-making authorities. In this regard, the 'plan-making' section of the PPG provides guidance in relation to the duty to cooperate. Paragraph 022 states that strategic policy making authorities are expected to have addressed key strategic matters through effective joint working, and not deferred them while relying on an inspector to direct them. It states "[An] Authority will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any outcomes achieved; this will be thoroughly tested at the plan examination."
- 4.35 The consultation document makes an allowance of an additional 847 houses as a contribution to meeting unmet need from Fareham's Neighbouring Authorities. But as this is the Submission version of the Plan, this allowance should have regard to the co-operation referred to above. There is no evidence that this is anything other than an allowance made by Borough Council without reference to the joint working through PUSH; this is nothing else but a "cart before horse" approach.
- 4.36 The consultation document acknowledges that there is "a significant likelihood of a substantial level of unmet need in the sub-region" (para 4.4) and that over the plan period the level of unmet need in the sub-region could be circa 10,750 new homes. It is instructive that the references to unmet need in para 4.5 of the consultation document are in the context of the current Standard Method and not the higher sub-regional figure that the proposed Standard Revision indicates. In this regard, the plan appears to be "comparing apples and pears".
- 4.37 The following table compares the housing requirement from the current Standard Method and that indicated by the proposed revision.

LPA	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard Method	Proposed new Standard Method	Difference between current and proposed SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1025	+333
PUSH East	1804	1828	2802	3430	+628
Southampton	815	1148	1012	832	-180
Eastleigh		857	694	885	+191
New Forest	521	346	729	782	+53
Test Valley	588	834	550	813	+263
PUSH West	1924	3183	2977	3312	+335

- 4.38 The above illustrates that whilst the Fareham figure might decline, across the sub-region the

³ *Samuel Smith Old Brewery (Tadcaster) v Selby DC [2015] EWCA Civ 1104 paragraphs 38 and 40*

overall scale of housing is greater both in PUSH East and West.

- 4.39 Over a 16-year period, the difference between the proposed new Standard Method would require an additional 10,000 new homes to be built across PUSH East. Compared to average delivery over the past 3 years, almost twice as many new homes will need to be built. This is unquestionably a step change in housing delivery and each Local Authority area will need to contribute towards this and maximise its contribution to the sub-regional requirement.
- 4.40 In September 2020 the PUSH Report to its Joint Committee looked at the potential implications of housing supply relative to Local Housing Need, and using the proposed revision to the Standard Method this still identified a shortfall of over 6,500 across the PUSH East sub-region.⁴
- 4.41 At para 4.5 of the consultation document, the Borough Council put forward a contribution of 847 dwellings towards meeting unmet need. There is no evidence of how this figure has been derived. All that is evident from the earlier passages of that paragraph is the very unclear picture that exists and which is subject to additional work by PUSH. Consequently, the proposed contribution of 847 dwellings – 13% - to unmet need doesn't appear to have any basis in a full and proper assessment of future housing requirement and supply across the sub-region. This is significant because, historically, Welborne had been identified to provide housing supply for that sub-regional purpose whereas now its contribution almost entirely to meet Fareham's housing need.
- 4.42 Switching the role of Welborne in this fashion is taking away a supply of housing identified previously to meet sub-regional needs in the longer term, when plainly that need still exists, and elevating supply available to meet the Borough's need. This denies the original intention of Welbourne, and places a very heavy reliance on one source of housing to meet local needs; on the basis of the Council's strategy, some two thirds of the Borough's housing needs would be met at Welborne.
- 4.43 Again, this illustrates why preparing a Regulation 19 Plan on this basis isn't justified and does not contribute to effective planning across the sub-region.
- 4.44 Moreover, on this basis, the evidence to justify the Council having discharged its duty under Section 33A is not at all obvious; this is particularly significant as this is the Regulation 19 Plan to be submitted for Examination.

Plan Period

- 4.45 The current consultation document is based on the plan period 2021-2037. This is 16 years and would accord with the 'at least 15 years' in the NPPF, if the Local Plan were in fact adopted in 2021. Experience of Local Plan Examinations and the length of time between Regulation 19 and adoption suggests this is highly unlikely. But assuming the Plan is adopted in the 2022 this would provide the bare 15-year plan period.
- 4.46 It is in this context that one has to consider whether the plan is "*sufficiently flexible to adapt to rapid change*". For the reasons given later we say it does not meet this requirement.

⁴ Table 4 Comparison of Housing Need and Supply 2020-2036

Delivery at Welborne

- 4.47 The consultation document's housing strategy is heavily reliant on housing delivery at Welborne, which was previously identified to meet sub-regional requirements. Table 4.2 of the consultation indicates that over 4,000 new homes are to be built at Welborne by 2037 to meet Fareham Borough's local housing need.
- 4.48 This is not a realistic assumption.
- 4.49 It has been readily apparent for some time that past delivery assumptions at Welborne could not be achieved. Despite the Core Strategy and the Welborne Plan assuming a significant number of new homes would have been built at Welborne by the present time, there is still no outline planning permission some 14 months after the Borough Council's Planning Committee resolved in October 2019 to grant permission for the outline planning application (P/17/0266/OA).
- 4.50 In our response to the January 2020 Supplement, we noted that it wasn't surprising that by that time the Section 106 had not been signed given the particular scale of that development.
- 4.51 However, by the present time, the absence of an outline planning permission raises a more fundamental concern about delivery at Welborne.
- 4.52 Nowhere do the Council provide any evidence as to when they expect outline permission to be granted, the extent of any pre-commencement works and their associated timescale, when reserved matters applications are expected and when first completions will be achieved. The closest the Council gets to any justification is that the housing trajectory has been agreed with the developer Buckland.
- 4.53 We are aware that there will also need to be Highway Agreements relating to works to the M27 Junction 10 prior to those works being commenced; again, in our experience such highway agreements are complex and can take a long period of time to complete. The works to be undertaken to the M27 and A32 are substantial. The Planning Officer's Report highlights the estimated costs of these works as £80m-£90m and that funding gap exists in relation to these works. More recently, we understand the Council has had to seek additional funding from Government to cover earlier Local Enterprise Partnership funding that has since been lost. Hampshire County Council has recently confirmed that: "The J10 works are not fully committed at this stage and there is no defined timescale for delivery." This is clearly a major risk in overall terms but also in terms of when such works will be undertaken and the duration of such works.
- 4.54 This is germane to timescales as to when development at Welborne can be anticipated, notwithstanding the milestone it reached in 2019.
- 4.55 A number of housing trajectories have been proposed for Welborne at different stages. The Borough Council's January 2017 Background Paper concerning Welborne set out the Council's assumption at that time. This suggested that 4,090 new homes would be built at Welborne by 2036. Whilst this would align with the current assumption, this overlooks the fact that circumstances have already moved beyond the key dates suggested therein.
- 4.56 If the 2017 trajectory is simply rolled forward to the present day and it is assumed that outline planning permission is granted in 2021/2022 and development commences in 2023/24 then the

total number of completions would be 3,090 dwellings by 2037 – see *Appendix 1*.

- 4.57 This trajectory is clearly sensitive to assumptions. Any delay in commencing development beyond will 2023/24 will cause fewer completions in the plan period.
- 4.58 Moreover, the extent to which 250 dwellings can be built and sustained each year from 2026 onwards is also a highly sensitive assumption.
- 4.59 We note that more recent research from Lichfields⁵ suggests that for sites of more than 2000 dwellings, the average period of time from planning to delivery is 2.9 years. Moreover, that research indicates that for scheme the size of Welborne the number of houses built each year averaged 140 dwellings.
- 4.60 If a mid point between these two assumptions of 185 dwellings per annum were achieved and sustained as the peak output, this would only yield 2,360 dwellings in the plan period.
- 4.61 It is instructive to note that to achieve 4,020 completions in the plan period would require a build rate from 2024/25 onwards of 309 dwellings per annum. A build rate in excess of 300 dwellings per annum was rejected by the Council in 2017.
- 4.62 What is clear from the above is that Welborne’s contribution to housing supply during the plan period has been over-estimated. This component of housing supply is not justified and consequently the housing supply strategy is not effective.

Proposed Allocations

- 4.63 From our analysis of proposed allocations we have been able to identify that, whilst a number of subject to current planning applications, a significant number are subject to constraints that could delay their development. A number of Sites are owned by public bodies or are subject to multiple landownerships and with existing uses⁶. Moreover, a great many are Sites within the urban areas which are likely only suited to flatted schemes to achieve the capacity numbers and may not be suitable to developers.
- 4.64 Other Sites are subject to nitrates constraints⁷ which may require a strategic solution to enable their release.
- 4.65 Consequently, it is questionable whether they will all be developed and this supports not only the principle of a contingency allowance but also the importance that that allowance reflects the overall level of uncertainty associated with the housing supply strategy.

Windfall

- 4.66 Table 4.2 of the consultation document includes a windfall allowance of 1,224 new homes between 2021 and 2037.
- 4.67 The principle of including a windfall allowance is explained in the NPPF at para 70 in the

⁵ Start to Finish (2016), Driving Housing Delivery (2018)

⁶ FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13, HA22, HA24, HA31, HA36-39, HA42, HA44

⁷ HA1, HA12, HA34, HA40

following terms:

- Firstly, there should be compelling evidence that they will provide a reliable source of supply.
- Secondly, any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 4.68 It is evident that the above is much more than a consideration of historic windfall delivery and requires the plan-maker to actively consider future supply from this source.
- 4.69 The Council's Windfall Background Paper projects forward 51 windfall completions on small sites from 2024/25 and an additional 52 windfall completions from large sites from 2025/26. The only source of information that the Council has used to arrive at these figures is its breakdown of past windfall delivery from 2009 – 2019 which averaged 101 dwellings (51 for small sites and 52 for large sites).
- 4.70 Para 3.6 of the Background Papers states: *"The estimated rate of windfall development is based on past completion rates..."* (emphasis added)
- 4.71 Para 3.9 of the Background Paper states: *"To ensure that a cautious approach is taken and windfall projections are not overly optimistic, the projections have only taken account of windfall delivery since 2009/10"*.
- 4.72 The very next paragraphs states *"Based on the preceding analysis, the windfall projections for the Borough are 51 dwellings per year from small site delivery and 51 dwellings per year from large site delivery"*.
- 4.73 It is clear that the assumption in Table 4.2 of the consultation document is derived solely from past trends and it is claimed that this demonstrates *"a compelling case"*. However, nowhere in the analysis is there consideration of whether this is a reliable source of future supply, rather it is just a forward projection of what happened in the past. The analysis does not provide any consideration of expected future trends.
- 4.74 It is important to recognise that windfall opportunities are finite. Opportunities to redevelop vacant or redundant land will have largely been exhausted by the present time because of planning policies that have prioritised such sources of supply for the past decade and longer. Consequently, future windfall over the plan period will rely to a much greater extent on recycling of land (i.e. existing uses being changed). This is inevitable a less certain source of housing supply.
- 4.75 For the purpose of assessing whether the Plan's housing supply strategy is sound, we have adjusted the windfall contribution by 25% i.e. 918 completions over the plan period.

Revised Housing Strategy

- 4.76 In the preceding Sections we have considered both the level of local housing need and the housing supply strategy providing a reasoned justification why this Regulation 19 Plan is not sound. The following table illustrates the effect of this.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	8,320	520 dpa
Under-supply 2018-2020	875	Added to reflect actual housebuilding relative to LHN
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	10,050	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect roll-forward of 2017 Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 25% to reflect finite supply
Total Supply	7,150	Sum of Supply estimates
Shortfall	2,900	

*retained at 13% of unmet need for illustrative purposes absent any Statement of Common Ground

- 4.77 The above illustrates that with these alternative assumptions, additional land needs to be identified for some 3,000 new homes.
- 4.78 Even if the strategic housing requirement were calculated simply by reference to 403 dwellings per annum, there would be no contingency to take account of changing circumstances over the plan period, contrary to the assertion in the plan to this effect.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	6,448	403 dpa
Under-supply 2018-2020	nil	N/A
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	7,295	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect 2017 Housing Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 20% to reflect finite supply
Total Supply	7,153	Sum of Supply estimates
Shortfall	142	

- 4.79 The above analysis clearly shows that Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to assumptions about housing supply, additional housing land should be allocated for development.
- 4.80 In the following Section we submit that the Strategic Growth Area identified in the Local Plan Supplement 2020 should be allocated for housing development.

5 South Fareham Strategic Growth Area

- 5.1 In our previous representations we supported the inclusion of Strategic Growth Areas in the Local Plan. Hallam control a substantial tract of land to the South of Fareham, adjoining the Stubbington Bypass, the construction of which has recently commenced. This land, along with other parcels in this location, is identified in Figure 3.2 of the Local Plan Supplement Consultation Document as the Proposed Strategic Growth Area South of Fareham.
- 5.2 The justification for the allocation of a Strategic Growth Areas is evident from the preceding Section which identified a significant shortage in the amount of new housing to be provided in the Borough and the amount of future development land allocated for this purpose. Development South of Fareham could provide housing land over the plan period, both in the immediate term and continuity over the long term.

South of Fareham

- 5.3 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. The town is the largest in the Borough with a population of around 37,300. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town.
- 5.4 Fareham is also an important economic centre, which has developed further over recent years with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane and the Peel Common Roundabout.
- 5.5 A new, mixed use masterplanned development to the South of Fareham, contiguous with Longfield Avenue, benefits from its proximity to the town centre, Daedalus, the railway station and existing local services and amenities with good access to walking, cycling and public transport links. These are locational merits that align with *Good Growth*.
- 5.6 Stubbington and Hill Head form a single urban area and have a population of c.14,300. These settlements have a range of services with a local centre, doctors, dentists, two primary schools, a secondary school and a community centre.
- 5.7 Local employment has improved with the development at Daedalus, which lies to the south east of the settlement. Development in south Fareham would delivery homes close to this economic and employment zone, providing housing for the growing workforce.
- 5.8 The Stubbington Bypass is being constructed to connect Gosport Road, Peak Lane and Titchfield Road. This will inevitably create an urbanising influence through the centre of the existing Strategic Gap. Development to the south of Fareham would assist in assimilating the bypass into the landscape and soften the impact of the road on the gap, beyond what could be achieved from constructing the bypass alone.

Development Potential

- 5.9 Paragraph 3.24 of the consultation document identifies high-level development principles and

requirements. Hallam support these intended outcomes and these have underpinned their proposals for a mixed-use masterplanned development.

- 5.10 Work undertaken over a long period of time has identified the suitability of the land controlled by Hallam to accommodate new development, how development can be arranged and the extent of mitigation required.
- 5.11 In our response to the 2019 Issues and Options consultation, we identified potential areas for development in this location and for convenience we have attached this at *Appendix 1*. Whilst this considered only land which Hallam control, we recognise that there are other smaller scale development opportunities within the general location, and that the Borough Council intend to work with landowners and site promoters to develop a Council-led masterplan which will focus on the delivery of community benefits as part of Good Growth. In this context, Hallam are committed to working with the Council and others to develop these proposals further as part of a co-ordinated approach.
- 5.12 A development scheme could comprise the following:
- Approximately 1,200 units
 - a new healthcare facility
 - a primary school
 - a care home
 - community hub
 - local shops
 - sports hub and
 - Green Infrastructure to include public open space, equipped areas of play, Sustainable Drainage Systems (SuDS), tree, hedge and shrub planting, meadows, structural woodland planting, allotment gardens and permissive footpaths and cycleways.
- 5.13 Development would be accessed from a primary and secondary access from Longfield Avenue, along with associated improvements to the existing Long field Avenue/Bishopsfield Road junction and carriageway and a primary access from Peak Lane.
- 5.14 An outline planning application for such a proposed development was submitted in June 2020 and is presently undetermined.

Accessibility and Movement

- 5.15 The accessibility advantages of this location enables positive promotion of active travel. The proposed development will be served by an internal network of footways and access arrangements that can be utilised by both pedestrians and cyclists. The site is surrounded by Public Rights of Way (PRoW) that in turn can serve as cycle/walking connections from the site to other roads in the vicinity of the site. These will be maintained and improved in order to encourage more sustainable modes of travel as an alternative to the conventional car.
- 5.16 Bus based public transport is also a feasible means of sustainable travel from this location. Service provision on the route number X5 operated by First Group provides opportunity for peak commuter travel and also for off-peak travel. The scale of development proposed is

sufficient to deliver dedicated public transport coverage between the Site and key destinations that will have the frequency and reliability to attract patronage to secure long term viability. Any improvement will be discussed with the necessary stakeholders, but it is envisaged that the development will support the introduction of new services.

- 5.17 The Eclipse Busway - a Bus Rapid Transport scheme between Fareham and Gosport opened in 2012 providing a priority public transport route connecting the two towns. The BRT scheme provides a more efficient service using new, comfortable, low-emission buses that encourages bus travel through enhancing the bus travel experience. Using the new busway, buses are able to avoid congested parts of the highway network including A32 so that passengers can benefit from reliable journey times and can plan their onward travel connections.
- 5.18 A number of new highway improvements works have been implemented or are currently under construction which is intended to improve bus journey reliability, and encourage more people to switch from car travel to using the bus. This would have an effect of helping reduce traffic numbers and traffic congestion between Fareham and Gosport, including along Newgate Lane.

Nitrates

- 5.19 The land is located directly west of the edge of urban area that forms part of the designated Chichester, Langstone and Portsmouth Harbours Eutrophic NVZ (TraC) (Nitrate Vulnerable Zone). The land is currently predominantly arable farmland with a history of mixed crops such as wheat, barley, oats, rape etc. and break crops such as peas, winter oil seed rape and beans.
- 5.20 The above is recorded on a Nutrient plan detailing fertilizer types, tonnages and time applied for each individual field. The fertilizer applied during the period of record is a mix of pig and farm yard manures.
- 5.21 It is recognised that intense farming with fertilization with natural manures will lead to nitrate leaching into the surrounding surface water and ground water environment.
- 5.22 Through development of the land, the leaching of nitrates through farming activities will be curtailed. While there will be a new source of nitrate production and leachate associated with the new development, this is considered to be at worst a neutral impact and through further assessment a net reduction in nitrate leaching can be achievable.

Biodiversity

- 5.23 The Hallam land is divided into two areas by Peak Lane; the eastern area comprises largely of arable land with hedgerows and ditches forming the compartmentalisation typical of the surrounding arable tenure and has limited nature conservation value. The western compartment consists of a large area of set aside land, with areas of arable crops, which are bound by limited hedgerows and tree lines.
- 5.24 The most significant habitat is Oxleys Coppice which is designated as a SINC and an area of ancient and semi-ancient woodland (ASNW), which has been evaluated as county level conservation value. The Scheme can ensure that Oxleys Coppice is protected.
- 5.25 Hedgerows are mostly classified under the Hedgerow Evaluation Grade System (HEGS) as moderate and moderate/high value. Only two hedgerows are classified as 'important' under the

Hedgerow Regulations (REGS). Several drainage ditches are found through the Site but only have limited marginal and aquatic vegetation. These are classified as no more than local conservation value.

- 5.26 Surveys have identified the presence of a number of protected species, bats and breeding birds. Measures to safeguard these species and their habitats can readily be accommodated as part of the development proposed. The habitats created and the species which will benefit from the mitigation measures proposed in the Site will lead to an overall beneficial effect in the long term. Similarly, in accordance with the Solent Waders and Brent Goose Strategy, a financial contribution will be made to this, based on the classification of land's suitability for supporting such species.
- 5.27 The Solent & Southampton Water Ramsar/SPA, which also includes Titchfield Haven SSSI, is approximately 700m from the Site. Portsmouth Harbour Ramsar/SPA/SSSI is located approximately 1.3km to the east of the Site at its nearest point, which also support a variety of habitats and an assemblage of dark-bellied brent geese. The Solent Maritime SAC extends from the River Hamble mouth up to Botley in the west, this is approximately 4.7km west of the Site.
- 5.28 There is the potential for a Likely Significant Effect on the Solent SPAs from an increase in recreation from new housing development within a 5.6km zone of influence of the Solent. As a result, an Interim Solent Recreation Mitigation Strategy was published in 2014 to enable initial mitigation measures to be placed, so LAs could continue to grant permission for new homes. The strategy has been updated to form the basis for future new housing up to 2034, with the Bird Aware Solent Recreation Mitigation Strategy (2017).
- 5.29 As this Site falls within the established zone of likely significant effect (5.6km), a HRA/AA will be required by the LPA; however a site specific Test of Likely Significance will be provided to facilitate the LPA assessment. The mitigations measures required to facilitate the Proposed Development will see a financial contribution provided for the in-combination effects on the Solent SPA, with additional bespoke mitigation provided within the Site to mitigate for the alone effects.
- 5.30 The details of bespoke mitigation are to be discussed with Natural England. Current proposals will include an area of County Park/Green Infrastructure to the west of Peak Lane, measuring approximately 23ha, which will include a circular walk, car park and habitat features to provide point of interest, as well as safe areas for dogs to be exercised off the lead. Alternative areas of GI will be provided around the main residential areas to the east of Peak Lane, here approximately 32ha will be provided, which will incorporate recreational opportunities and areas of biodiversity net gain.
- 5.31 The mitigation measures provided within the Site will ensure that there are no likely significant effects on the Solent alone and in-combination with other schemes within Fareham.

Strategic Gap

- 5.32 The current Core Strategy designates land between Fareham and Stubbington as a Strategic Gap. This follows such a designation being contained within earlier Development Plans; Settlement Gap policies in Hampshire date back at least 30 years when they were included within the South and Mid Hampshire Structure Plans (1988 and 1989). They were carried forward into the Hampshire County Structure Plan 1994 and the Hampshire County Structure

Plan 1996-2011. Consequently, with each new development plan needing to make provision for current and future development needs, the role and function of gaps need to be considered having regard to up to date circumstances.

- 5.33 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. As described earlier, this new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. Such a conclusion is similar to the assessment undertaken by Hallam previously.

Summary

- 5.34 Hallam support the identification of the Strategic Growth Area to the South of Fareham and have identified a development scheme that achieves the high-level development principles and requirements set out in the consultation document.
- 5.35 Importantly, development in this location can be brought forward that provides new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.
- 5.36 The merits of this location are substantial, and carefully planned development will not result in the coalescence of Fareham and Stubbington and the separate identities of these settlements can be retained.
- 5.37 As such, the allocation of land at South Fareham in the Local Plan for future development is considered wholly appropriate.

6 Policy NE5 and Policies Map

- 6.1 The Policies Map includes designations relating to Waders and Brent Geese and are associated with Policy NE5. This designation covers four categories of land – Core and Primary Support Areas, Secondary Support Areas, Low Use Areas and Candidate Areas.
- 6.2 The extent to which the land concerned is used by Waders and Brent Geese, particularly beyond the Core Areas, is transitory and can differ from time to time as a consequence of changes in agricultural practices (for example, arable land with wintering cereals provides an optimal foraging resource, whereas when this is replaced / succeeded by grassland habitats its function can change, which could affect species assemblages and regularity it is used. Changes in land use also promote further recreational uses which is the case for areas west of Peak Lane) or changes to the extent of the built environment (for example newly built structures, such as the Stubbington Bypass, will change the suitability of a location in proximity to it as a receptor). Therefore, to delineate these areas in the manner shown on a Policies Map, which affords permanence to the designation, fails to take account of the potential changes in circumstance and is not sound as a matter of principle.
- 6.3 The practical effect of this is that Policy NE5 directs the decision-maker to consider development proposals against the criteria listed therein and the status of the land by reference to the designations shown on the proposals map, which may at that point in time no longer be up-to-date or relevant.
- 6.4 Through Hallam's work in respect of the land to the South of Fareham, and through discussion with Natural England, it has identified a different classification to that shown on the Policies Map for certain of those parcels of land, as shown on *Appendix 2*. This illustrates how the application of Policy NE5 could misdirect the decision maker.
- 6.5 On this basis, these designations should not be shown on the Policies Map in the manner they are presently.
- 6.6 A more generic designation such as Areas of Waders and Brent Geese Sensitivity, which does not classify individual land parcels, would be more appropriate.
- 6.7 It would follow that Policy NE5 would be amended to require planning applications to assess and determine the use of land subject to those development proposals and at that point, when an up to date classification has been determined, the criteria and mitigation in Policy NE5 would apply.

7 Summary

- 7.1 These Representations have been prepared on behalf of Hallam Land Management Limited (Hallam), who control a substantial tract of land to the South of Fareham, adjoining the existing urban area and Stubbington Bypass, the construction of which has recently commenced.
- 7.2 This land was identified in the Local Plan Supplement 2020 as a potential Strategic Growth Area. Whilst the Regulation 19 Plan does not propose to carry forward the South of Fareham Strategic Growth Area, as is evident from these representations the need for such an allocation has not diminished.
- 7.3 The consultation document rightly identifies the Borough Council's commitment to meet the Borough's housing need by the end of the plan-period. This is plainly aligned with the NPPF and the Government's objectives. What is notably absent from the Vision and Strategic Priorities, is the recognition that Fareham is important in a sub-regional context and was previously intended to provide significant development land at Welborne to meet wider needs.
- 7.4 Policy H1 is not founded on a sound basis. In preparing and publishing this Regulation 19 Plan, the Borough Council has afforded greater weight to a potential revision to the Government's Standard Method and has disregarded the published and established measure of local housing need which has underpinned its work to date. Unless and until the Government publish a revision to the Standard Method, this version of the Plan cannot be submitted for Examination as it is plainly unsound. The Borough Council recognise this from its Committee Papers.⁸ This is nothing other than a "wait and see" Plan.
- 7.5 Only if the Standard Method is published in the same final form will the Plan be able to proceed – there is no indication if or when the Government intend to complete this exercise given the significant scrutiny it has attracted.
- 7.6 A more positive approach would have been to retain the higher level of housing as the basis of the Plan to provide surety over a long term with policy measures to manage housing supply in the event the level of local housing need was reduced. Unfortunately, the Council hasn't considered this as an option or a reasonable alternative in the Sustainability Assessment.
- 7.7 Even in the event the proposed revision to the Standard Method were confirmed as the Plan assumes, there is little if any evidence of a cogent understanding of the level of unmet need across neighbouring authorities. There is no apparent evidence of effective co-operation to justify the contribution the Plan proposes to unmet need.
- 7.8 Moreover, the Council hasn't applied its mind to the level of housing that been achieved since the Standard Method was introduced at the start of the plan making process and the date the plan is to be adopted. Viewed objectively, housing completions over that three year period were below the level of local housing need and this shortfall, which is part of a much greater shortfall when compared to the Core Strategy's housing intentions, should be accounted for.
- 7.9 Turning to housing supply, the assumption that Welborne will provide 4000 new homes within the plan period is not founded upon evidence previously produced by the Council and the level

⁸ Executive Briefing Paper 12th October 2020, para 12

of housing output assumed is at a level the Council previously considered unrealistic.

- 7.10 The windfall assumption drawn simply from past trends has not justified why this is a source of future supply. Uncertainties also exist in relation to a number of the proposed allocated sites because of landownership, extent of existing uses and location.
- 7.11 For all of the above reasons, the Plan's approach to housing will fall short of its Vision and Strategic Priorities. Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to housing supply, additional housing land should be allocated for development.

South of Fareham

- 7.12 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town. Similarly, Fareham is an important economic centre, including the Solent Enterprise Zone at Daedalus to the south of the town.
- 7.13 It is considered that development to the south of Fareham would be in a sustainable location, with good access to walking, cycling and public transport links, as well as local services and amenities. This location adjacent to the existing urban area creates a good opportunity for a natural and sustainable extension to the urban area. Development in south Fareham would deliver homes close to an important source of new employment and jobs at Daedalus.

Strategic Gap

- 7.14 The current Core Strategy designated land between Fareham and Stubbington as a Strategic Gap.
- 7.15 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. This new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. The delineation of the Strategic Gap on the Policies Map should be amended accordingly.

Proposed Modifications

- 7.16 The following Modifications are considered necessary for the Local Plan to be sound:
 - 7.16.1 The minimum housing requirement in Policy H1 to be defined by reference to the existing Standard Method;
 - 7.16.2 The housing requirement be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;

- 7.16.3 The level of unmet need that is accommodated be based on constructive, active and on ongoing engagement with neighbouring authorities;
- 7.16.4 Assumptions about the delivery of new housing at Welborne be revisited and revised down;
- 7.16.5 The windfall allowance be revised down;
- 7.16.6 Alternatively, to 6.16.4 and 6.16.5 the level of contingency be increased;
- 7.16.7 Additional housing allocations be provided for;
- 7.16.8 Land South of Fareham is allocated for housing development; and
- 7.16.9 Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood is amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- 7.16.10 The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

LRM Planning Limited
15th December 2020

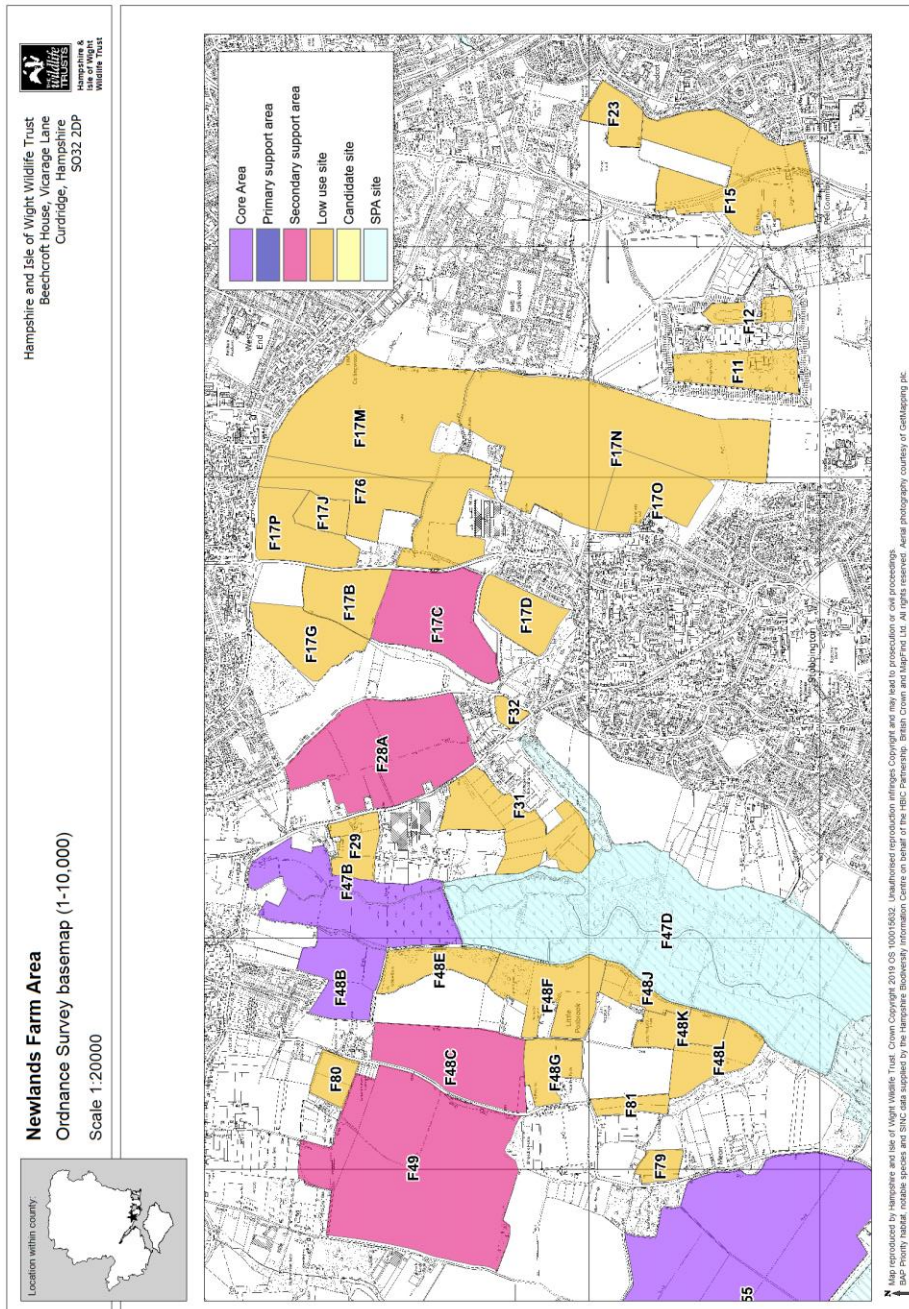

Appendix 1: Alternative Housing Delivery Trajectory at Welborne

Delivery Year	Year	Dwellings Per Annum	Cumulative Completions	Further Information
1	2016/17	0		Outline Planning Application submitted

21	2035/36	250	2840	
22	2036/37	250	3090	By 31st March 2037 3090 dwellings are expected to be completed

Based on assumptions in FBC Background Paper: updating the Welborne Plan (October 2017)

Appendix 2: Newlands Farm Wader and Brent Geese support habitat

	Legally compliant	Sound	Complies with the duty to co operate
Total	2	2	2
Yes	0 0%	0 0%	2 100%
No	2 100%	2 100%	0 0%

Respondent: Mrs Valerie Wyatt (1512-11057)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

I have copied the text of this paragraph below. It contains a false statement and therefore I consider it to be not legally compliant and unsound. A small block has been cut out of the Area of Special Landscape Quality in Figure 3.3 to the north of Warsash and the west of Locks Heath. This is in the area of the Hamble Valley referred to in the paragraph and is Housing Allocation Policy:HA32 Egmont Nursery. The detail is on page 98 of the Publication Plan. There is another falsehood on that page; its planning status as at 1 July 2020 says 'Outline planning permission granted (P/18/0592/OA). This is not true. The planning committee resolved to grant permission on 19th August 2020. The decision notice is dated 1st October 2020. It is now the subject of a Judicial Review as local residents believe that it was unlawful to grant permission for a number of reasons including a failure to follow policies in the extant plan. Recent planning appeal decisions in the Borough have highlighted the need to consider the designation of valued landscapes as part of the Local Plan. Previous Local Plans have included the demarcation of 'Areas of Special Landscape Quality' in the Borough which were used to help shape planning strategy and decisions on planning applications. These areas were the Meon, Hamble and Hook valleys, Portsdown Hill and the Forest of Bere. Both the Landscape Assessment (2017), and the more recent 'Technical Review of Areas of Special Landscape Quality and the Strategic Gaps' (2020) still recognise the intrinsic character and distinctiveness of these relatively undeveloped areas of the Borough and so their locations have been used to shape the development strategy. There is a presumption against major development in these areas, unless it can be demonstrated through a landscape assessment that the quality and distinctiveness of the landscape character can be conserved. For these reasons there remain no development allocations in these areas.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

They should either correct the information in the paragraph or, better still, remove this allocation from the plan completely.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be factually correct. I would think that a plan should be factually correct to be legally compliant and sound.

Your suggested revised wording of any policy or text:

If HA32 remains in the plan then the wording should be For these reasons there remain no development allocations in these areas except for HA32 in the Hamble Valley.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mrs Iris Grist (312-341014)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

In general terms this talks about development sites which should maximise development within the urban area, and away from the wilder countryside, respect the valued landscapes and spaces which contribute to settlement definition. No 3.9 says that there no development allocations in these areas, which includes Portsdown Hill. It goes on to say that planning should recognise the beauty of the countryside, and that Portsdown Hill is of special landscape quality. Land to the East of Down End Road, site HA4 is proposed for 350 houses, and this is definitely on Portsdown Hill. This site has already been turned down by FBC planning committee three times now, on the grounds of lack of safety of pedestrian and traffic over Down End Road Bridge. FBC is trying to say that site HA4 is not on Portsdown Hill, yet it is. Trying to have it both ways to suit their purposes. Latest application to be turned down was P/20/0912/OA

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Give everyone a paper copy of the plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Not to contradict facts

Your suggested revised wording of any policy or text:

Not to contradict facts

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Keely, Lauren

Subject: FBC Continued

Dear Katherine,

As discussed with you Friday 4 December I enclose the start of my comments on the consultation document which you said you would be able to put in the appropriate boxes as I am unable to as I found that I could not continue without logging on, each time which was not how the system should've worked.

When we spoke you said that you had not received the second paragraph that I submitted so I am hoping that I will start there, as you have already received my first submission.

As I am not able to view the pro forma I hope you will be able to put them into the correct boxes as obviously with only one iPad that I am using to work on and one for my notes which I have made, it would be too torturous.

So onto matters of legal compliance which I believe is paragraph 1.6

There is no mention of the 2017 unadopted draft plan although it has been confirmed that it was in the previous 2015 plan.

Although there was an overall reduction in the new housing it would appear that Warsash is actually going to take 20% more. HA1 has no joined up thinking. There should be an environmental impact on all of the sites proposed, so that each one is not seen in isolation.

Paragraph 4.19 states that many of the housing policies brackets HE256 811 1416 1820 2125 and no longer considered to be proposed allocations. I should like to know how objectively assessed housing need arrived at the fact that site HA1 was to take the bullet.

It would appear that the developers have taken advantage of the LPA's decision that proposing HA1 would mean that they have carte blanche to submit applications. I believe this is contrary to the publication plan. It would also appear that in order to fit in as many houses as possible into HA1 the boundaries have been adjusted to accommodate them. How does this not look as though the Developers have the upper hand and are actually driving this through.

So onto the Habitats directive which again comes under Matters of legal compliance.

Paragraph 9.10 is about nightrates neutrality strategic policy. I cannot see how the policy which requires designated sites to be protected and enhanced and improved is adhered to. I think the word I am looking for is there should be a net reduction the designated sites in unfavourable conditions. The LPA's way of adjudging is the exact opposite. It would appear that this is in direct contravention of both the habitats directive and the publication plan policies. The developments contemplated would be negatively impacting the SAC and RAMSAR sites. I cannot see that under these circumstances it would be a valid option.

I am calling it a day at present and wonder if you can reply to acknowledge receipt of this and that I am actually doing the right thing and making comments that you can import into the documentation,

Many thanks,

June Ward

Dear Katherine,

This next part of my document relates to the Test of Soundness

I am not at all happy with the settlement definition.

Policy HA1, which is supposedly a greenfield site is proposed to be changed to an urban area – via the redefinition of settlement boundaries reference WW 17. Greenfield sites are not particularly favourable for development as it says in the forward to the publication plan.

Paragraph 2.10 says that Fareham Borough aims to retain the identity of the amazing valuable landscape and settlement definition, protecting it's natural, built and historic assets. As someone who has lived in Warsash 45 years and been conversant with this area for nearly 10 years before that, ie the late 1960's, is a complete contradiction. What was once a very gentle countryside location seems to have been redesignated giving it up and status. And the change of the settlement boundary to enable this to happen is in my view completely unethical and beyond belief. I take exception to the fact that policy HP1 calls for the efficient use of existing buildings to meet such need on a 1 for 1 replacement dwelling basis. This is not applicable for HA1 and it would appear that FBC has managed to redraw the urban boundary.

My next comment on test of soundness is where infrastructure is concerned.

This concerns policy HP4 to be found paragraph 5.24; I think HA1 demonstrably fails to have any thing other than a detrimental effect on the environment, certainly the traffic(witness the two and a half hours to get off the motorway on Friday 4 th December, where all roads in and out of Warsash were snarled up, as we are a peninsula....or has this not occurred to anyone) and amenity has implications. Even now I feel that I cannot venture out too far from Warsash for fear of not getting back at a reasonable time due to the amount of traffic on the few roads in and out of Warsash. Warsash almost appears to be a prison! Don't go anywhere because you can't get back to your house!

This ties in with my next point policy HA1. Page 51 talks about traffic routes. As I have said earlier it almost feels that one is imprisoned in Warsash. I note that there was a recommendation that there should only be six dwellings and Greenaway Lane now I see that the plan proposes for 140 houses and that to enable this to be accessed the lane needs to be widened. I think the clue is in the word Lane. This is a delightful lane to walk through but with that amount of traffic proposed would be considerably dangerous. It is already "take your life in your hands to cross Warsash Road" let alone the impact of trying to walk within what was once considered countryside. As one gets older and appreciates the ability to be able to walk along country lanes. Page 54 suggests there should be seven new accesses onto an incredibly busy Brook lane and Lockswood Road as well as an additional iaccess at Brook Lane via three entry points from Greenaway Lane. I have already had to change my surgery where I was a patient for 40 odd years as it was impossible to get to the surgery on time due to the amount of traffic. My surgery is now in locks Heath Centre. I note that there was an occasion some time in the last few few weeks that the Air ambulance was unable to land; and ambulance was unable to get there because of the gridlock. My point is very much that the proximity of these access points and the position of such will cause even more gridlock. We are a peninsular we are hemmed in. More traffic will make us feel that we are even more in a cage.

Continuing with my other comments about infrastructure

Paragraph 10.15 where has that been an analysis of roads where the new houses are proposed. If we are considering 830 new dwellings what about the transport assessment for HA1. Although there could be an average of two cars per dwelling I know from experience that at one point, with our daughters coming and going from University, we had five cars in the driveway, which we could accommodate.....many of the new homes will not have this advantage, and extra cars will be accommodated on the roads.. how therefore is there no reference for the mitigation required to reduce congestion by 2037. Plan as presented failed the test of soundness by not being positively prepared in this respect. In this very Rural area one has to have access to a car to get anywhere, unless being confined to one's home is the way forward for FBC. I cannot see that paragraph 10.14 helps any of us.

I have had the pleasure of one of my family is moving closer to live with me in Warsash and the boys are very involved in outdoor activities so it was a joy that I saw there was provision of two junior football pitches however these appear to be missed off of the master plan?

Document 3 for FBC

Dear Katherine,

This relates to Test of soundness-

Housing need methodology

I think there is a disparity CE paragraph 3.27 figure 3.2. The map shows that there are eight possible growth areas when there are actually more than this. Could you confirm which is the correct one.

Again paragraph 3.37 does not align with paragraph 4.13 regarding the definition of small-scale development. In other words, is it sites of less than 1Ha or development of not more than four dwellings.

Again under the same heading; paragraph 4.2 of the publication plan is dubious as it bases housing numbers on the proposed new methodology for calculating need and there is some concern that this may not be adopted by the government. Also page 37 paragraphs 4.12, 4.16 and policy HP13 illustration says that the contingency barrier of 1094 has been made. I think the plan is very dependent that 4858 houses at Welbourne will be delivered.

Occupancy rates

Paragraph 5.41 states that a four or five bed house would have an average occupancy rate of 2.4 with regard to nitrate budget calculations. However it also states that the range of occupancy for affordable homes will be between 4-6 persons. This does not marry up with the claims in the publication plan for what the council needs and requires.

Carbon reduction

Paragraph 8.60 section 8 does not state what the target should be for the requirement of meeting CO2 emission targets. It simply refers to individual developments power generation. I would contend that the plan is not positively prepared.

Paragraph 11.34 does not state what the meeting of CO2 emission reduction targets should be. The plan just refers to individual developments power generation so again I contend that plan is not positively prepared.

Paragraph 11.36 no standards have been set for the developers to design for natural ventilation and green infrastructure. I cannot see how just meeting building regs, allies with the Governments needs to meet the promised carbon reduction. The council should lead by example by setting standards to ensure that developers are designing for sustainability. We need to look to the future using the new standards SA10.

Retail facilities

Paragraph 7.13 if Warsash is to have more houses then there will be additional retail facilities needed and with that will be the need for more parking spaces as many who have lived in this area for decades need to use their own transport for shopping, hairdressers, and many other facilities that this village has provided. It is already a job to cross the road from one side to the other and more cars to the area will make this even more impossible. There would need to be a crossing area to allow children to cross safely to get to the bus stop or to Brookfield School as well as the many elderly people who need to cross from one side to the other.

Paragraph 7.18 although out-of-town shopping is discussed it is not however defined. As one gets older one prefers to take ones custom to the local shops as driving is not so pleasurable. If we are to be encouraged to shop elsewhere this will increase the amount of traffic on our heavily congested roads.

Education

Paragraph 10.26 infrastructure delivery plan section 5.5. I note that education is planned with Hampshire county council however the period of any proposed extensions only covers to 2021. The plan however goes up to 2037. My grandchildren are already in three different schools within the area, two of which need cars. Offering houses to be developed but then not having school places it's not a sound approach to help to realise the dreams of future generations.

Paragraph 10.27 Infrastructure delivery plan table item 83 calls for section 106 provisions of additional early years foundation provision within the western wards. However H a one does not say if there is going to be a nursery or preschool within the proposed development area. There should be a child placement contribution to be allocated as there are over 1000 new houses being proposed for the Warsash area alone. Again If parents need childcare provision they would have to travel out of this immediate area in order to access provision; not at all ideal, adding to traffic chaos, length of time travelling to and from child care setting and not allowing children to make friendships with those who they might be at school with when they reach statutory age.

Healthcare

As regards Paragraph 10.26 the infrastructure delivery plan calls for the expansion of healthcare provision through further GP practices in the western wards. The document however only provides an historic timeline through dating the local plan. This is not a sound approach considering that HA1 will bring in additional 830 houses. It is already impossible to get an appointment at the nearest GP practice within a week.

Complies with duty to cooperate Housing need methodology

Paragraph 1.28 which agrees to take up the shortfall of homes from Portsmouth, numbering 847, would appear that FBC are taking a risk as the new methodology for calculating housing need has not been signed off by the Government. Also during this time of public consultation the housing delivery test will not be available

Paragraph 3.10 The rewilding of the Stubbington strategic gap was made without consultation with the council offices or elected members. It came via an announcement through a press release after the start of the full council meeting, which was in the process of debating this plan.

Respondent details:

Title:	
First Name:	Unknown3
Last Name:	Unknown3
Job Title: (where relevant)	
Organisation: (where relevant)	
Address:	
Postcode:	
Telephone Number:	
Email Address:	

1) Paragraph: 1.28

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 1.28 In agreeing to take up a shortfall in homes of 847 from Portsmouth, Fareham Council are taking a risk as the new methodology for calculating Housing Need has not been signed off by the Government and the Housing Delivery test will not be available during this public consultation period.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

State that the final figures for Housing need in the Borough, including adjacent councils will be available once the new government methodology has been confirmed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The basis for Housing numbers would be supported by an accepted methodology rather than a proposed one

Your suggested revised wording of any policy or text:

Only PROVISIONAL figures for Housing needs are available in this Plan. The LPA will be able to provide final figures once the new methodology for calculation of OAHN is confirmed by the Government

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Paragraph: 3.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 3.10 The decision to “rewild” the Stubbington Strategic Gap was made without consultation with council officers or elected Members. Instead, this announcement came via a press release issued after the start of the Full Council meeting which was in the process of debating this Plan?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full decision needs to be made regarding the Stubbington Gap status

How would the modification(s) you propose make the Local Plan legally compliant or sound?

To include a consultation with Council Officers in order to decide on whether or not to "rewild" the Stubbington Gap

Your suggested revised wording of any policy or text:

The Stubbington Strategic Gap will be the subject of a Consultation by Council Officers. A decision over how allocations may be allowed in this area versus a complete "rewild" exercise will be concluded.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Policy: CC2 - Managing Flood Risk and Sustainable Drainage Systems

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The Publication Plan does not consider the risk of Groundwater Flooding in the vicinity of HA1

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The Council needs to carry out a Groundwater Flooding assessment in the vicinity of HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

GroundWater Flooding (Different to Surface Water and Fluvial flooding) is an insidious threat which involves the gradual heightening of the water table until finally Ground Water seeps into properties and into the drainage system, causing major source of Flooding and Pollution. Including the threat of concentrated Nitrates leeching into the Solent.

Your suggested revised wording of any policy or text:

The LPA will conduct a thorough investigation of the potential for Groundwater flooding in the vicinity of HA1 and produce a mitigation plan to avoid any such instance from occurring due to the additional load created by the 830 Dwellings being proposed.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Executive Summary

Local Plans should be prepared to contribute to the achievement of sustainable development. They should be positively prepared and seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. As the starting point, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas. These requirements exist within the context of the Government's now longstanding objective to significantly boost the supply of homes.

The Regulation 19 Plan, which is meant to be the Plan the Council intends to submit for Examination, is not founded on the Government's published Standard Method as required by the NPPF and NPPG.

Rather, the Council has alighted upon the possible outcome of a Government consultation document and has based the Development Strategy, Policy H1 and the strategy to meet housing needs on this lower level of housing. This is manifestly unsound.

The fact that the Council do not intend to submit its plan until there is certainty as to a change to the Standard Method does not mitigate the cost of conducting this consultation to the public purse or unnecessary expenditure by other public and private bodies. Moreover, this approach plainly risks undermining public confidence in the plan-led system, if, as is possible, the housing requirement has to be increased. The Council has simply acted prematurely in seizing upon a consultation document that suggests a lower housing requirement; this may be expedient but is the antithesis of positive planning. Put simply, there is no basis for the Council to have formed this consultation document at the present time.

In the event that the Government decides not to proceed with its amendment to the Standard Method, or that such an amendment results in a different outcome for Fareham, the Council will need to further amend the plan. In that instance, a wholly new consultation exercise would be required given the likely magnitude of amendments that would be necessary, adding further delay to the plan-making process, and cost to the public purse and to interested parties, whilst, regrettably, undermining confidence in the Local Plan process.

Moreover, the Council has not recognised the context within which this Plan is being prepared. Housing delivery relative to the Core Strategy has resulted in a substantial shortfall in new housing over past years and this Plan provides an opportunity for positive and ambitious planning to ensure development needs are met and the principles of good growth are achieved. The Plan fails in this regard.

The Council purports to make a contribution towards meeting the unmet need of its neighboring authorities; however, this does not reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PFSH) of over 10,000 homes. It is not at all apparent that this Plan is founded on constructive, active and on an ongoing engagement as required by Section 33A.

It is instructive that whilst Welborne was identified to provide housing to meet sub-regional requirements, its role has now changed to meeting the Borough's housing needs first and foremost;

consequently this Plan makes a significantly lower contribution to the wider sub-regional needs which plainly have not diminished.

Furthermore, the Plan has exaggerated the likely housing supply from Welborne and other sources to such an extent that a shortfall in housing supply is inevitable.

The Plan overlooks the opportunity provided by the previously identified Strategic Growth Area at South Fareham which would make an important contribution to housing supply in the short term and providing surety of supply over the longer term. The suitability of this location is apparent from the Council's evidence base; it is accessible to the Borough's main urban area, it is not an area that is sensitive in landscape terms, development can be accommodated without undermining the principle of separation between Fareham and Stubbington, there are no environmental designations that preclude development and the transport modelling and its' conclusions has assumed development in this location. A development scheme in this location can also deliver nitrate neutrality and biodiversity net gain. Development to the South of Fareham can achieve *Good Growth*.

Unfortunately, the Sustainability Appraisal does not consider higher levels of growth consistent with the January 2020 Local Plan Supplement, and, as such, fails to consider a reasonable alternative.

The following Modifications are considered necessary for the Local Plan to be sound:

- The minimum housing requirement should be defined by reference to the existing Standard Method;
- The housing requirement should be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;
- The level of unmet need that is accommodated should be based on constructive, active and on ongoing engagement with neighbouring authorities;
- Assumptions about the delivery of new housing at Welborne should be revisited and revised down;
- The windfall allowance should be revised down;
- Alternatively, the level of contingency should be increased;
- Additional housing allocations should be provided for;
- Land South of Fareham should be allocated for housing development; and
- Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood should be amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1 Introduction

- 1.1 Hallam Land Management Limited ('Hallam') control a substantial tract of land to the South of Fareham, south of Longfield Avenue, west of HMS Collingwood and adjoining the Stubbington Bypass, the construction of which has recently commenced.
- 1.2 In successive representations to the Local Plan Review we have draw attention to the merits and advantages of locating development to the South of Fareham and how this would achieve the Borough Council's objective of *Good Growth*.
- 1.3 In the January 2020 Local Plan Supplement, this land, along with other parcels in this location, was identified by the Borough Council as a potential Strategic Growth Area.
- 1.4 In the current consultation document, such an allocation has not been carried forward.
- 1.5 On this occasion, the Borough Council's has alighted upon the possible revision to the Government's Standard Method for assessing local housing need, which suggests a lower level of housing for Fareham.
- 1.6 In our opinion, the Borough Council are wrong to have published this consultation document in this form given the status of this version of the Plan is afforded by the Local Plan Regulations; *the Plan a Local Planning Authority intends to submit for Examination*. To have based a Plan on the possible outcome of a Government consultation is plainly premature and, regrettably, the Plan's housing strategy is not positively prepared and is unsound.
- 1.7 The Plan's housing strategy is not an effective one. It has no regard to past performance relative to the objective assessment of housing need and the level of contingency is not sufficient when the likely delivery of Welbourne is viewed objectively. Over the plan period a significant shortfall in new housing is inevitable.
- 1.8 For the reasons given in this representation, additional housing land should be allocated in Policy H1.
- 1.9 Land South of Fareham is an eminently suitable and sustainable location for future development and should be identified accordingly. In the context of the Borough Council's *Good Growth* principles that underpin the Plan's Development Strategy, Hallam's development proposals achieve the high-level development principles and requirements set out in the Local Plan Supplement which remain entirely appropriate.
- 1.10 It is especially significant that the Borough Council's assessment of Strategic Gaps has drawn the conclusion that new development can be located south of Longfield Avenue without harming the integral purpose of this earlier designation. We agree with this conclusion, which accords with our previous submissions that carefully planned development will not result in the coalescence of Fareham and Stubbington and that the separate identities of these settlements can be retained.
- 1.11 Development at South Fareham can be brought forward to provide new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality

of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.

- 1.12 As such, and for the reasons given herein, the previous potential Strategic Growth Area at South Fareham should have been retained in the Local Plan for future development.
- 1.13 In our representations in the following Sections we set out that, whilst the Plan's Vision and Strategic Priorities are correct, absent amendments to Policy H1, this version of the Local Plan will not provide sufficient housing and this will run counter to its stated intention to address housing needs by the end of the plan period.

2 Vision and Strategic Priorities

- 2.1 In this Section of our representations we consider the consultation document's Vision and the Strategic Priorities that the Borough Council has identified. It is instructive to consider the extent to which the Plan's policies and proposals will, in practice, contribute towards this Vision being realised and the Strategic Priorities being met, in the context of what the NPPF's anticipates of a Local Plan.

National Planning Policy Framework

- 2.2 Para 15 of the NPPF requires that each Local Plan should provide a positive vision for the future of its area; a framework for addressing housing needs and other economic, social and environmental priorities. (emphasis added)
- 2.3 Para 17 requires that a Local Plan includes strategic policies to address the local authority's priorities for the development and the use of land in its area.
- 2.4 Para 20 states that strategic policies should set out the overall strategy for the pattern, scale and quality of development, and make provision for, *inter alia*, housing, employment, retail, leisure and other commercial development, infrastructure, community facilities and conservation and enhancement of the environment.
- 2.5 Para 22 states that strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure.
- 2.6 Para 23 states that strategic policies should provide a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development. This should include planning for and allocating sufficient sites to deliver the strategic priorities of the area.
- 2.7 In the context of plan making making, the NPPF's presumption in favour of sustainable development is framed in the following terms:
- a. *plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
 - b. *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:*
 - i. *the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - ii. *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.*
- 2.8 In this context, it is important to recognise the significance of the Regulation 19 stage in the plan-making process. This is the Plan the Borough Council intends to submit to the Secretary of

State for the purpose of Examination pursuant to Section 20 of the Act. This is explained in the NPPG *"The publication stage plan should be the document that the local authority considers ready for examination"*. Therefore, this is the Plan and the approach to meeting objectively assessed need that the Borough Council now consider appropriate.

- 2.9 But, as the Borough Council has suggested it won't decide whether or not to submit the Plan until it knows the outcome of the Government's review of the Standard Method, this is little more than a "wait and see" approach. This is plainly wrong given the importance of the plan-led system in overall terms, the alacrity with which an up-to-date Local Plan is needed in Fareham, and the need to maintain public confidence in the plan-making system generally.
- 2.10 As will be shown later, the practical difference between a housing strategy based of 520 dwellings per annum and 403 dwellings per annum is an 'end date' five years hence. When viewed in the context of providing surety over the longer term and the emphasis in the NPPF on exceeding the minimum requirement, adopting a higher growth level at this stage would have been the positive and responsible response to this circumstance.

The Vision

- 2.11 The Borough Council's Vision as set out in the consultation document intends that it:
- *"will accommodate development to address the need for new homes and employment space in Fareham Borough; and*
 - *new housing will address the particular needs in the Borough, such as our growing housing need and an ageing population and creating attractive places to live".*
- 2.12 The Vision is framed by reference to the Borough's needs, whereas Fareham is part of the established Partnership for Urban Southampton and has a role in contributing to meeting the housing needs of the sub-region. Indeed, there is no reference to Fareham's sub-regional role on any of the text associated with the Vision and Strategic Priorities in Section 2 of the Plan. In this context, the Vision should be drawn more widely.
- 2.13 Significantly, the allocation at Welborne in the Core Strategy was specifically for a sub-regional purpose, but its role by the present time appears to have been recast entirely; a matter we return to later.
- 2.14 Without prejudice to the above, achieving any Vision requires policies and proposals that are genuinely aligned with it. In respect of housing, the outcome of the Local Plan's policies and proposals should be that the Borough's housing needs are met.
- 2.15 As such, the Local Plan must, first, establish the correct strategic housing requirement in Policy H1 i.e. the overall number of new homes that need to be built by 2037 and, second, ensure a housing supply strategy that has the necessary surety that this can be achieved.
- 2.16 What experience both in Fareham and elsewhere has shown is that there must be an element of theoretical overprovision as part of the housing strategy to ensure that sufficient new housing is built.
- 2.17 To an extent the consultation document recognises this, but, as will be shown, it significantly

misjudges housing supply to such an extent that it undermines achievement of the Vision.

2.18 Conversely had a positive approach to plan-making been adopted, the Local Plan would have provided a robust planning strategy for the Borough.

Strategic Priorities

2.19 In the context of the Vision, the first Strategic Priority is to:

- *address the housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.*

2.20 Again, there is no reference to Fareham's wider sub-regional role. In the context of Section 33A of the Planning and Compulsory Purchase Act, which requires constructive and active engagement on strategic matters, this is a surprising omission.

2.21 Without prejudice to this point, as a matter of principle, such a strategic objective is soundly based and is aligned with the significant importance the Government attaches to housing provision. Such a Strategic Priority is universally found in Local Plans national-wide.

2.22 However, in this instance, the apparent driver to the Publication Draft has been an attempt to reduce the scale of housing provision despite the Vision and Strategic Priority. This is the only conclusion that can be drawn from the Council having based its Regulation 19 Plan on a consultation document concerning a potential revision to the Standard Method.

2.23 This approach is plainly not sound for the following reasons:

2.24 Firstly, it departs from the method of calculating local housing need set out in para 60 of the NPPF. No exceptional circumstance has been suggested other than a lower figure is derived from the potential revision to the Standard Method. In a recent comment the Planning Minister referred to outputs based on the consultation exercise as "*entirely speculative*".

2.25 Secondly, even if that figure is correct, it is in no way obvious how the wider needs of the sub-region are to be met; across the wider geographic area as a whole the level of local housing need is suggested to be greater than has hitherto been the case.

2.26 Thirdly, the approach to housing supply significantly overstates likely housing delivery and the scale of contingency is simply not sufficient to ensure future housing supply would meet identified need.

2.27 The inevitable conclusion is that this version of the Local Plan is not positively prepared, justified, effective or consistent with national policy. Therefore, whilst the Plan may have a clear strategic priority to address the need for new homes in the Borough, its subsequent policy to base the strategic housing requirement of 403 dwellings per annum means, when considered objectively, that it fails to do so. To consciously plan for 20% less housing than has been identified firstly as necessary, and secondly as capable of being accommodated, is not properly addressing the need for new homes in the Borough.

2.28 In short, the Plan provides for too few houses over the plan period. This in turn will give rise to

adverse effects. It will restrict the number of people who are able to purchase new housing from doing so and constrain the operation of the housing market. It will also reduce the amount of affordable housing that is built because that is a proportion of the overall amount of housing. Moreover, by restricting market housing it creates an additional and greater incidence of housing need as people who would otherwise have been able to buy a market home are prevented from and they fall into housing need. This will have harmful socio-economic effects and runs counter to the Vision to meet the Borough's housing need.

2.29 For these reasons, the consultation document is not soundly based.

3 Development Strategy

- 3.1 The preceding Section has considered the Regulation 19 Plan's Vision and Strategic Priorities as they relate to housing provision and has identified that, as a practical effect, its policies and proposal will not deliver the intended outcome in terms of meeting housing need by the end of the plan period. In this Section, we consider the proposed Development Strategy and the extent to which it could accommodate a greater level of development if necessary.
- 3.2 The Plan's Development Strategy, set out on pages 17 – 32, and its associated Key Diagram and more detailed Policies Map, are framed by the Borough Council's approach to housing provision. This is evident from comparing the direction of travel outlined in the January 2020 Local Plan Supplement based on the published Standard Method and which identified the need for Strategic Areas of Growth to be allocated for future development, and the present approach which includes very few new housing allocations.
- 3.3 In the event the Borough Council has to re-cast its approach to housing provision, it will also need to adjust its Development Strategy in order to be able to deliver the strategic objective to address housing need. In this regard, it is of note that para 3.5 of the consultation document acknowledges that *"the [Local Plan] Supplement consultation in early 2020 identified the Council's preferred approach to its Development Strategy which it proposes to use to guide the focus of development until at least 2037"*. This clearly illustrates the suitability of the Strategy at that time as the basis of plan-making presently.
- 3.4 In the following paragraphs we comment on the various elements of the Council's Development Strategy both as articulated presently but also in the context of a revised housing strategy which would require additional land to be identified for development in the plan period.

Good Growth

- 3.5 The 2019 Issues and Options consultation established the principle of **Good Growth** as the keystone for the Local Plan's Development Strategy.
- 3.6 *Good Growth* was defined in the 2020 Local Plan Supplement in the following terms:
- building homes and creating employment spaces in such a way as to improve the quality of life whilst protecting the most valued and natural historic environments.
 - respecting environmental protections and delivering opportunities for environmental gain, providing opportunities for reduced energy demand and waste production, whilst sensitively managing the countryside and valued landscapes.
 - providing open space and leisure opportunities to encourage healthy and active lifestyles and encouraging more of us to use active forms of travel rather than the car.
- 3.7 This definition has been retained in the Regulation 19 Plan.
- 3.8 These principles exist within an overarching scale of development that the Borough will need to provide for over the plan period. It is of paramount importance that, in the context of the Plan's Vision and Strategic Priorities, this scale of development is correctly defined at the outset; only then can it be said the Plan will address housing and employment needs adequately,

appropriately and sustainably. If the housing requirement is drawn too low, it will have negative social and economic effects.

- 3.9 It follows that, at the plan-making stage, the Local Plan is able to set out strategic and development management policies that have *Good Growth* principles at their core; both in terms of determining which locations in the Borough are to be allocated for new development and then the form and nature of such development.
- 3.10 The ensuing Land Use Strategy should prioritise locations that are able to achieve the principles of *Good Growth*, albeit there are instances where there are competing interest and, as with all planning decisions, balanced judgements will be necessary.

Development Strategy

- 3.11 This Section of the Regulation 19 Plan describes the factors that the Council has used to determine its Development Strategy. Because of the range of considerations that are inputted to, and then flow from this, what the Plan is actually describing is its land use strategy, namely where development is acceptable and conversely where factors determine new development would not be appropriate and other considerations are more important.

Landscape and countryside

- 3.12 We agree that there are parts of the Borough which have a fundamental importance in landscape terms and it is right that preservation of the landscape in those locations is the principal consideration. Figure 3.1 which illustrates the Key Diagram identifies "Areas of Special Landscape Quality" and we agree with the designation of the areas shown in this regard. Policy DS3, which we comment on later, should be worded to ensure that preserving the special landscape quality of these areas is given primacy.

Settlement boundaries

- 3.13 Settlement boundaries delineated in earlier development plans were drawn in the context of development needs as determined at that time.
- 3.14 Where the scale of development cannot be met on land within the Borough's urban area, development in the countryside adjoining main settlements is a wholly necessary and legitimate proposition.
- 3.15 As a consequence of allocating land for development to meet identified needs, settlement boundaries can and should be amended accordingly. In short, the existing settlement boundaries are not immutable.

The desire to respect settlement identity

- 3.16 Given that Areas of Special Landscape Quality have been assessed and delineated on the Key Diagram it is also necessary to consider whether land identified in the current Development Plan as Strategic Gap still requires such protection, whether its boundaries can justifiably be amended in light of up-to-date circumstances or whether any areas of land subject to that designation can be developed in order to contribute to a sustainable pattern of development.

- 3.17 The *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* considers existing Strategic Gaps in the adopted Local Plan and concludes that land south of Fareham, east of Peak Lane and west of HMS Collingwood does not perform the same function in terms of maintaining separation between Fareham and Stubbington as other land that is subject to this designation and is more integral to the purpose of preserving identity.
- 3.18 Chapter 4 of that Study, Paragraph 10 states that *"there exists some opportunities for development to be absorbed within the strategic gap subject to scale and future detailed design, without compromising its gap function combined with mitigation measures that can support green infrastructure enhancement"*.
- 3.19 It follows as a matter of principle that this land should not be designated as Strategic Gap in this Local Plan as this designation plainly cannot be justified in that location. Conversely, to continue to propose this land as Strategic Gap is not justified on the basis of the Council's own evidence.
- 3.20 It is highly material that the Local Plan Supplement had anticipated a Strategic Growth Area in this location, reflecting the broad conclusions of the earlier Options testing that this represents a sustainable and accessible location for new development and that such development can be accommodated without harm to the separation between Fareham and Stubbington. The significance of this is especially important in the context of the greater scale of development the Local Plan should accommodate and as such this represents an eminently suitable location for development. The fact this land is outside of the settlement boundary is in no way an overriding determinant that would preclude its allocation.

Climate change, flood zones and coastal management areas

- 3.21 We agree that the Local Plan should not direct major new development to areas identified as having a role in mitigating the impacts of flooding or coastal erosion. It is noteworthy that the areas of potential flood risk are associated with the River Hamble, River Meon, River Wallington and Lee-Solent estuary and are largely subject to nature conservation designations and landscape designations which limit the extent these locations would be suitable for development in any event.
- 3.22 In this context, the land identified as suitable for future development to the south of Fareham is not subject to flood risk and can be developed with Sustainable Urban Drainage measures that would not increase the risk of flooding elsewhere.

Protected areas for nature conservation

- 3.23 There are strategic nature conservation constraints that exist in the Borough in the form of International and Nationally designated sites. These overlap with other environmental designations and exert a significant constraint on where development can be located, limiting the extent of land absent a constraint. None of these constraints directly affect the land south of Fareham referred to in preceding paragraphs.

Transport corridors and opportunities to encourage more active travel modes

- 3.24 The NPPF advises that the planning system should actively manage patterns of growth to support sustainable travel. Significant development should be focused on locations which are

or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health.

- 3.25 In this regard, the Local Plan Strategic Transport Assessment states the following: *The proposed growth locations in the Local Plan to accommodate forecast population and economic growth, took a wide range of factors into consideration, including transport and access implications. Most of the Local Plan growth is located either within or on the edge of existing conurbations, providing good opportunities for trips to be made by modes of transport other than the private car. Consequently, the proposed growth in the Local Plan is generally in sustainable locations in terms of transport and access*”.
- 3.26 It is important to stress that this Transport Assessment in fact includes development at the Strategic Growth Areas, therefore, this conclusion reflects the suitability of new development in this location in these terms.
- 3.27 Whilst certain representations have previously raised concern about traffic impacts, the Transport Assessment concludes that the scale of development proposed (including the Strategic Growth Areas) and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective.

Need to encourage diversity in the housing market

- 3.28 We agree that there needs to a balance in the portfolio of housing sites. We comment later on the likely delivery of housing from Welborne, which can only represent a modest supply of housing in anything other than the longer term.
- 3.29 To meet the objective of providing sufficient housing, additional housing allocations are required for all of the reasons in this representation and in particular those in response to Policy H1. Whilst development to the south of Fareham will change the character of part of the undeveloped land between Fareham and Stubbington, this must be balanced with the material benefits of the scheme in terms of the new housing to increase housing supply in the short term and to provide a surety of supply over the longer term.
- 3.30 The opportunity to the south of Fareham is of a sufficient scale to meet the identified need for market housing, affordable housing, specialist accommodation and self-build and custom build housing, along with the co-location of local services and facilities to support a new neighbourhood.

Sustainability and accessibility to services

- 3.31 Fareham is identified in the Core Strategy as a ‘key growth point’ in the South Hampshire sub region and a ‘secondary regional centre’. The town is the largest in the Borough with a population of approximately 37,000 people. Fareham is also an important economic centre, which has developed further over recent years, with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane, Peel Common Roundabout and the construction of the Stubbington Bypass.
- 3.32 Amongst the advantages previously identified for the South Fareham Strategic Growth Area is

its proximity to the town centre, the Solent Enterprise Zone at Daedalus, the railway station and existing local services and amenities with good access to walking, cycling, and public transport links. Local facilities are situated along Bishopsfield Avenue and at Broadlaw Walk. Large-scale out-of-town retail facilities are located at Newgate Lane and Fareham Road to the east of Longfield Avenue.

- 3.33 Large-scale development to the south of Fareham, rather than a more dispersed pattern, would maximise opportunities to prioritise pedestrian and cycle links and extend public transport to maximise sustainable modes of travel.

The requirement to meet housing and employment needs

- 3.34 *Good Growth* can only be achieved if the Local Plan intends to meet objectively assessed need for housing, which for the reasons set out in response to Policy H1, it does not achieve this at the present time.

Spatial Interpretation

- 3.35 As a matter of principle, the identification of deliverable or developable previously developed land should be a priority, however, it is widely understood that such opportunities do not exist to accommodate the scale of new housing and employment required in the Borough.
- 3.36 Accordingly, the allocation of greenfield sites for future development is both a legitimate and necessary measure.
- 3.37 The morphology of the Borough is comprised of three urbanised areas: Fareham, Portchester and the 'Western Wards', which are part of a coastal conurbation that extends from Portsmouth in the east to Southampton in the west. Fareham is the pre-eminent urban area within the Borough in terms of services and facilities and public transport. Portchester and the 'Western Wards' are characterised more as residential suburbs.
- 3.38 Interspersed to a greater and lesser degree between these settlements are areas of separation comprising Portsmouth Harbour, Alver Valley, Meon Valley and the River Hamble. These are strategically important corridors that separate the main urban areas, protect their identity and prevent settlements within the coastal conurbation from merging together.
- 3.39 To the north of the M27, the Borough is of a more rural character, noting of course the proposed new community at Welborne which will undoubtedly change the character of this area over a long period of time.
- 3.40 Stubbington, a residential suburb, lies south of and separate from Fareham's urban area along with the sub-regionally important employment and logistics node at Daedalus. The Borough Council have stated aspirations to maximise the potential of the airfield's land and infrastructure assets through new commercial development, providing clusters for aviation, non-aviation and skills/innovation activity. This will contribute positively to the creation of skilled jobs in the Solent Enterprise Zone.
- 3.41 These characteristics have led the Council, rightly in our opinion, to consider the designation of Valued Landscapes as part of the Local Plan and in this context we are aware that the 2017 Landscape Assessment acknowledges the intrinsic landscape character of the Meon, Hamble

and Hook valleys.

- 3.42 We agree that the Meon Valley is a distinctly valued landscape. In our 2019 response to the Issues and Options consultation we referred to various Appeal decisions that alight upon the value of the landscape in this location. Continuing to protect this area from development and formalising a landscape designation in the Meon Valley would be appropriate.
- 3.43 The extent to which land around the 'Western Wards' is capable of accommodating new development is constrained by the extent of nature conservation designations close to the existing urban area which limits development opportunities to small scale schemes at most.
- 3.44 On the basis of the above, it follows that **locations that adjoin Fareham town, as distinct from villages away from it located in the rural hinterland to the north and west of the Borough, are inherently more suitable in terms of reflecting the morphology of the Borough, preserving its natural environment and maximizing accessibility to services and facilities to achieve the most sustainable pattern of development.**
- 3.45 The extent to which new development opportunities in those locations can consolidate and enhance the accessibility advantages of Fareham Town Centre and Daedalus are consistent with the *Good Growth* principles set out in paras 3.5 and 3.6 above.

Development Strategy Policies

- 3.46 Para 3.2 of the consultation document defines the Development Strategy as providing the *"distribution, scale and form of development and supporting infrastructure, a set of proposals to deliver the strategy, policies against which to assess planning applications, and proposals for monitoring the success of the plan"*.
- 3.47 In addition to the narration of the Strategy, this Section of the Plan includes three policies; the first controlling new development in the countryside, the second in respect of the Strategic Gap and a third concerning Landscape. These policies do not set out a Settlement Hierarchy or Spatial Strategy for the Plan area and such policies do not appear elsewhere in the Plan either. The practical effect of this is that there is no policy that delivers the spatial objectives in so far as where new development should be located i.e. affording a priority to locations within and adjoining Fareham town as the most sustainable location in the Borough.
- 3.48 Given that para 3.2 suggests the role of the Development Strategy provides a set of policies that direct where and how new development should be located, the omission of what are usually commonplace policies is significant.

Strategic Policy DS1: Development in the Countryside

- 3.49 Policy DS1 seeks to control the use of land outside defined settlement boundaries i.e. in countryside locations.
- 3.50 In some circumstances it would be appropriate to grant planning permission for new development in such locations. In those instances, the benefits of a development proposal would need to be considered against the criteria in part two of the policy. In this context, we do not agree that Criterion 'v' is drafted correctly.

- 3.51 On certain occasions other considerations associated with a development proposal would merit planning permission being granted notwithstanding the agricultural classification of the land concerned. In this regard, whilst the NPPF affords a preference to development of lower quality agricultural land, it does not preclude the development of best and most versatile land (see footnote 53 of the NPPF).
- 3.52 As presently drafted Policy DS1 conflicts with the expression of this policy approach in the NPPF; as such criterion 'v' should be reworded as follows: "*avoid or minimise the loss of best and most versatile agricultural land*".

Strategic Policy DS2: Development in Strategic Gaps

- 3.53 In earlier representations we have identified that the evidence base provided by the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* does not justify the delineation of the Strategic Gap south of Fareham in the manner shown on the Key Diagram.
- 3.54 In particular, that Report identifies that the land south of Longfield Avenue and west of HMS Collingwood could accommodate new development without a significant adverse effect on the objectives of the Strategic Gap designation.
- 3.55 It follows that this land is not an integral part of the Fareham and Stubbington Gap.
- 3.56 As such the Strategic Gap should not extend across this land, as this would add a policy restriction that ought not apply on the basis of the published evidence. Put simply, such a designation should not include more land than is necessary to achieve its purpose.
- 3.57 For the Local Plan Key Diagram to be justified, and for the Local Plan to be sound, the delineation of the Strategic Gap south of Fareham should be amended accordingly.

Strategic Policy DS3: Landscape

- 3.58 The Local Plan intends to formalise Areas of Special Landscape Quality to reflect their valued status as determined through the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps*. As written, Policy DS3 does not however afford any particular level of protection to these areas beyond Policy DS1, which in any event requires development proposals in the Countryside to "*conserve and enhance landscapes*".
- 3.59 Policy DS3 also appears to permit major development proposals in these locations whereas the Development Strategy has sought to avoid new allocations in these locations because of their landscape sensitivity. The definition of major development is provided in the Glossary¹ and when applied to this Policy, could see large scale development proposals being advanced when this is what the Local Plan is seeking to avoid. As drafted, this Policy does little to enforce the Plan's Development Strategy.

¹ For residential schemes, major development includes those of 10 dwellings or more or on a site of 0.5 hectares or more. For other development, it includes building(s) with a floor area of 1000sq.m or more or on a site of 1 hectare or more.

4 Policy H1: Addressing housing needs by the end of the plan period in an appropriate and sustainable manner

- 4.1 In this Section we consider specifically Policy H1 and whether, as presently formed, the Borough Council's strategic housing requirement and housing supply strategy are sound.
- 4.2 The NPPF expects the planning system to significantly boost the supply of new housing by providing, in the first instance, a sufficient amount of development land where it is needed (para 59 refers).
- 4.3 It is clear that a Local Plan's housing requirement is to be calculated by reference to the Government's Standard Method, unless exceptional circumstances can be proven (para 60 refers).
- 4.4 In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.
- 4.5 As discussed in Section 2, the Plan's Vision and Strategic Priorities establish the intention to address the Borough housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.
- 4.6 For the Plan to address, and indeed meet, housing needs by the end of the plan period, it is important to have regard to the following considerations which are material to determining a sound strategy in the context of the Government's presumption in favour of sustainable development:
- context and the backdrop to this Local Plan;
 - an objective assessment of local housing need;
 - unmet need from neighbouring authorities;
 - the Plan's housing deliver strategy and whether this is sufficiently robust.
- 4.7 As will be shown, the consultation document will not achieve this, and when measured objectively, a shortfall in housing supply over the plan period will be inevitable, contrary to the stated Vision and Strategic Priority.

Context

- 4.8 The earlier Core Strategy set out a Development Strategy for the period to 2026 that has hitherto been achieved in part only. This partial achievement has had significant implications for housing delivery in the plan area.
- 4.9 In aggregate, the Core Strategy intended that some 9,000 new homes would be built in Fareham

in the 20 years between 2006 and 2026. This comprised:

- 5,350 at the North Fareham Strategic Development Area (Welborne) to meet sub-regional needs as identified in both the South East Plan and the South Hampshire Sub-Regional Strategy; and
- 3,729 elsewhere in the Borough²;

- 4.10 Over the 13 years since the start of the Core Strategy's plan period (2006/7 and 2018/19) only 4,200 new homes have been built. This is equivalent to 46% of the housing requirement in 68% of the plan period.
- 4.11 In comparison with the trajectory on page 21 of the Core Strategy, new housing has had to be accommodated in locations outside of allocated Strategic Development Area; in the four years from 2016, almost twice as many new homes have been provided elsewhere in the Borough than the 469 intended for the whole of that 5 year period 2016/21.
- 4.12 Following the Core Strategy, when the Welborne Plan was prepared in 2015, and to reflect the changed circumstances by then the Council re-calculated likely delivery at the Garden Village. Policy WEL3 identified approximately 6,000 new homes to be completed by 2036. First completions were to be achieved in 2015/16, 1,500 completions were to have been achieved by 2021 and 2,860 completions by 2026.
- 4.13 Plainly this hasn't been achieved and without question there has been a substantial shortfall in housing provision compared to the Core Strategy.
- 4.14 Manifestly, this shortfall is significant and cannot simply be put to one side. It is striking that Welborne was identified originally to meet sub-regional needs but because it hasn't delivered it now represents a source of housing to meet in a substantial part the Borough's own housing need and thus the Borough's contribution of the wider sub-regional need is much reduced.
- 4.15 Given the strategic objective defined by the Council, and in the context of the NPPF's presumption in favour of sustainable development, this has a clear implication for plan-making in Fareham. National Planning Policy invites Local Authorities to exceed the minimum housing requirement and to adopt a positive approach to planning for future housing. Plan-making should not be a simple mathematical exercise but a fundamental examination of how to best plan for the long-term future of the Borough. In this instance, and as the Local Plan Supplement was endeavoring to achieve, this enables the Council to develop a strategy for the longer term.
- 4.16 The change of direction in the Regulation 19 consultation document appears to be framed by precisely the opposite; planning for the minimum plan period and the least amount of new development plausible. Patently, that approach does not include the flexibility which a Local Plan should provide.
- 4.17 For example, had the Regulation 19 Plan retained the level of housing calculated by reference to the published Standard Method – 520 dwellings per annum – and had a lower housing requirement in fact materialized, the practical effect of this would merely have been a housing supply strategy that would endure beyond the end of the plan period. In simple terms, the

² Policies CS2 and CS15 refer

housing strategy would cater for an addition 5 years worth of housing. Given that it is beyond comprehension that housing need will not cease after 2037, this would have been a positive, adaptable, plan-led, longer term strategy.

- 4.18 The fact that the Council has alighted upon a potentially lower housing requirement without apparently considering the practical effect of retaining the existing housing requirement manifestly demonstrates a negative, rather than positive, approach to plan making.
- 4.19 Moreover, the Sustainability Appraisal has plainly not considered this as a reasonable alternative and, as such, is flawed. The Assessment of Alternatives in Section 5 of the Sustainability Appraisal relates to development locations rather than the overall quantum of development. The PPG advises that *"a sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted"*. The purpose of testing reasonable alternatives is to determine that a Local Plan promotes sustainable development when judged against reasonable alternatives, to achieve relevant environmental, economic and social objectives.
- 4.20 This negative approach is further evident when considering the components of the housing strategy which again illustrates a do-minimum approach.

Local Housing Need

- 4.21 Application of the Standard Method to calculate the Local Plan's local housing need would require 520 new homes to be provided each year, or 8,320 new homes in total between 2021-2037.
- 4.22 Alternatively, the Regulation 19 Plan is based on 403 new homes each year which is derived from the proposed revisions to the Standard Method published as a consultation document by the Government in the Summer. These proposed revisions carry no weight at the present time and do not provide any basis for the calculation of housing need for the purpose of this Local Plan at the present time.
- 4.23 Only if the proposed revisions are carried forward without alteration by Government would this serve as a basis to underpin the Plan and enable it to be submitted. Any change to the formula, as it relates to Fareham or any of its neighbouring authorities, would require reconsideration of the housing requirement in Policy H1. The Regulation 19 Plan is contingent therefore on the outcome of that entirely separate process, rather than being a Plan which the Council is able to submit for Examination. It is, for want of a better term, a "wait and see" plan.
- 4.24 As the Council appear to acknowledge themselves by the intention not to submit the Plan for Examination until the outcome of the Government's consultation is known, it is plainly not a sound approach at the present time.
- 4.25 Little more can be said about this, other than to draw attention to the obvious difficulties that have arisen in light of the Government's consultation, which have led to a significant level of opposition to the suggested changes. As recently as mid-November the Planning Minister referred to estimates of local housing need derived from its consultation exercise as *"entirely speculative"* and indicating that the revised formula was being re-evaluated.

- 4.26 It is also important to consider when the Standard Method was introduced and the practical effects of this which the Council don't appear to acknowledge.
- 4.27 The Standard Method was introduced in 2018 and the assessed level of local housing need was based on a period of 2016 onwards. The Council appear not to have grappled with the guidance in the Planning Practice Guidance in respect of this: "*Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate*". Plainly we are some way into the plan making process which commenced in 2017 and this requires the Council to have asked themselves how have housing completions compared with the level of local housing need from that point.
- 4.28 The published requirement was 520 dwelling per annum from 2016 onwards, whereas the highest number of completions was 349 in 2016/17 and less than half for the two years since where monitoring information is available.
- 4.29 The Standard Method takes account of backlog but only in so far as affordability will have increased in the years prior to the calculation and does not take account of underprovision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.
- 4.30 The following table illustrates this:

Year	Number of Completions	Level of Local Housing Need	Shortfall
2018/2019	290	520	230
2019/2020*	263	520	257
2020/2021**	132	520	388

*Projected housing supply April 2019

**Projected housing supply June 2020

- 4.31 This indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No account is taken of this in the current consultation document. Even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
- 4.32 In the circumstance where housing delivery in the Borough has been below both that anticipated by the Core Strategy and the measure of local housing need derived from the Standard Method, however calculated, the Council are plainly wrong to have selected a plan period that takes no account of this and a housing strategy that has no regard to that underprovision. This further undermines any notion of a positively prepared plan.

Unmet Need

- 4.33 Section 33A of the Planning and Compulsory Purchase Act 2004 requires a local planning authority to cooperate with, *inter alia*, other local planning authorities, and engage constructively, actively and on an ongoing basis in the preparation development plan documents, so far as relating to strategic matter. Paragraph 25 of the NPPF says 'strategic policy making authorities should collaborate to identify the relevant strategic matters which they need

to address in their plans'. Unlike problems associated with soundness, a failure to discharge the obligation in Section 33A cannot be remedied once the plan has been submitted for examination.³

- 4.34 It is clear from the work of the Partnership for Urban South Hampshire that housing provision is a strategic matter and thus there is a need for co-operation between constituent plan-making authorities. In this regard, the 'plan-making' section of the PPG provides guidance in relation to the duty to cooperate. Paragraph 022 states that strategic policy making authorities are expected to have addressed key strategic matters through effective joint working, and not deferred them while relying on an inspector to direct them. It states "[An] Authority will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any outcomes achieved; this will be thoroughly tested at the plan examination."
- 4.35 The consultation document makes an allowance of an additional 847 houses as a contribution to meeting unmet need from Fareham's Neighbouring Authorities. But as this is the Submission version of the Plan, this allowance should have regard to the co-operation referred to above. There is no evidence that this is anything other than an allowance made by Borough Council without reference to the joint working through PUSH; this is nothing else but a "cart before horse" approach.
- 4.36 The consultation document acknowledges that there is "a significant likelihood of a substantial level of unmet need in the sub-region" (para 4.4) and that over the plan period the level of unmet need in the sub-region could be circa 10,750 new homes. It is instructive that the references to unmet need in para 4.5 of the consultation document are in the context of the current Standard Method and not the higher sub-regional figure that the proposed Standard Revision indicates. In this regard, the plan appears to be "comparing apples and pears".
- 4.37 The following table compares the housing requirement from the current Standard Method and that indicated by the proposed revision.

LPA	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard Method	Proposed new Standard Method	Difference between current and proposed SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459

- 4.38 The above illustrates that whilst the Fareham figure might decline, across the sub-region the

³ *Samuel Smith Old Brewery (Tadcaster) v Selby DC [2015] EWCA Civ 1104 paragraphs 38 and 40*

overall scale of housing is greater both in PUSH East and West.

- 4.39 Over a 16-year period, the difference between the proposed new Standard Method would require an additional 10,000 new homes to be built across PUSH East. Compared to average delivery over the past 3 years, almost twice as many new homes will need to be built. This is unquestionably a step change in housing delivery and each Local Authority area will need to contribute towards this and maximise its contribution to the sub-regional requirement.
- 4.40 In September 2020 the PUSH Report to its Joint Committee looked at the potential implications of housing supply relative to Local Housing Need, and using the proposed revision to the Standard Method this still identified a shortfall of over 6,500 across the PUSH East sub-region.⁴
- 4.41 At para 4.5 of the consultation document, the Borough Council put forward a contribution of 847 dwellings towards meeting unmet need. There is no evidence of how this figure has been derived. All that is evident from the earlier passages of that paragraph is the very unclear picture that exists and which is subject to additional work by PUSH. Consequently, the proposed contribution of 847 dwellings – 13% - to unmet need doesn't appear to have any basis in a full and proper assessment of future housing requirement and supply across the sub-region. This is significant because, historically, Welborne had been identified to provide housing supply for that sub-regional purpose whereas now its contribution almost entirely to meet Fareham's housing need.
- 4.42 Switching the role of Welborne in this fashion is taking away a supply of housing identified previously to meet sub-regional needs in the longer term, when plainly that need still exists, and elevating supply available to meet the Borough's need. This denies the original intention of Welbourne, and places a very heavy reliance on one source of housing to meet local needs; on the basis of the Council's strategy, some two thirds of the Borough's housing needs would be met at Welborne.
- 4.43 Again, this illustrates why preparing a Regulation 19 Plan on this basis isn't justified and does not contribute to effective planning across the sub-region.
- 4.44 Moreover, on this basis, the evidence to justify the Council having discharged its duty under Section 33A is not at all obvious; this is particularly significant as this is the Regulation 19 Plan to be submitted for Examination.

Plan Period

- 4.45 The current consultation document is based on the plan period 2021-2037. This is 16 years and would accord with the 'at least 15 years' in the NPPF, if the Local Plan were in fact adopted in 2021. Experience of Local Plan Examinations and the length of time between Regulation 19 and adoption suggests this is highly unlikely. But assuming the Plan is adopted in the 2022 this would provide the bare 15-year plan period.
- 4.46 It is in this context that one has to consider whether the plan is "*sufficiently flexible to adapt to rapid change*". For the reasons given later we say it does not meet this requirement.

⁴ Table 4 Comparison of Housing Need and Supply 2020-2036

Delivery at Welborne

- 4.47 The consultation document's housing strategy is heavily reliant on housing delivery at Welborne, which was previously identified to meet sub-regional requirements. Table 4.2 of the consultation indicates that over 4,000 new homes are to be built at Welborne by 2037 to meet Fareham Borough's local housing need.
- 4.48 This is not a realistic assumption.
- 4.49 It has been readily apparent for some time that past delivery assumptions at Welborne could not be achieved. Despite the Core Strategy and the Welborne Plan assuming a significant number of new homes would have been built at Welborne by the present time, there is still no outline planning permission some 14 months after the Borough Council's Planning Committee resolved in October 2019 to grant permission for the outline planning application (P/17/0266/OA).
- 4.50 In our response to the January 2020 Supplement, we noted that it wasn't surprising that by that time the Section 106 had not been signed given the particular scale of that development.
- 4.51 However, by the present time, the absence of an outline planning permission raises a more fundamental concern about delivery at Welborne.
- 4.52 Nowhere do the Council provide any evidence as to when they expect outline permission to be granted, the extent of any pre-commencement works and their associated timescale, when reserved matters applications are expected and when first completions will be achieved. The closest the Council gets to any justification is that the housing trajectory has been agreed with the developer Buckland.
- 4.53 We are aware that there will also need to be Highway Agreements relating to works to the M27 Junction 10 prior to those works being commenced; again, in our experience such highway agreements are complex and can take a long period of time to complete. The works to be undertaken to the M27 and A32 are substantial. The Planning Officer's Report highlights the estimated costs of these works as £80m-£90m and that funding gap exists in relation to these works. More recently, we understand the Council has had to seek additional funding from Government to cover earlier Local Enterprise Partnership funding that has since been lost. Hampshire County Council has recently confirmed that: "The J10 works are not fully committed at this stage and there is no defined timescale for delivery." This is clearly a major risk in overall terms but also in terms of when such works will be undertaken and the duration of such works.
- 4.54 This is germane to timescales as to when development at Welborne can be anticipated, notwithstanding the milestone it reached in 2019.
- 4.55 A number of housing trajectories have been proposed for Welborne at different stages. The Borough Council's January 2017 Background Paper concerning Welborne set out the Council's assumption at that time. This suggested that 4,090 new homes would be built at Welborne by 2036. Whilst this would align with the current assumption, this overlooks the fact that circumstances have already moved beyond the key dates suggested therein.
- 4.56 If the 2017 trajectory is simply rolled forward to the present day and it is assumed that outline planning permission is granted in 2021/2022 and development commences in 2023/24 then the

total number of completions would be 3,090 dwellings by 2037 – see *Appendix 1*.

- 4.57 This trajectory is clearly sensitive to assumptions. Any delay in commencing development beyond will 2023/24 will cause fewer completions in the plan period.
- 4.58 Moreover, the extent to which 250 dwellings can be built and sustained each year from 2026 onwards is also a highly sensitive assumption.
- 4.59 We note that more recent research from Lichfields⁵ suggests that for sites of more than 2000 dwellings, the average period of time from planning to delivery is 2.9 years. Moreover, that research indicates that for scheme the size of Welborne the number of houses built each year averaged 140 dwellings.
- 4.60 If a mid point between these two assumptions of 185 dwellings per annum were achieved and sustained as the peak output, this would only yield 2,360 dwellings in the plan period.
- 4.61 It is instructive to note that to achieve 4,020 completions in the plan period would require a build rate from 2024/25 onwards of 309 dwellings per annum. A build rate in excess of 300 dwellings per annum was rejected by the Council in 2017.
- 4.62 What is clear from the above is that Welborne’s contribution to housing supply during the plan period has been over-estimated. This component of housing supply is not justified and consequently the housing supply strategy is not effective.

Proposed Allocations

- 4.63 From our analysis of proposed allocations we have been able to identify that, whilst a number of subject to current planning applications, a significant number are subject to constraints that could delay their development. A number of Sites are owned by public bodies or are subject to multiple landownerships and with existing uses⁶. Moreover, a great many are Sites within the urban areas which are likely only suited to flatted schemes to achieve the capacity numbers and may not be suitable to developers.
- 4.64 Other Sites are subject to nitrates constraints⁷ which may require a strategic solution to enable their release.
- 4.65 Consequently, it is questionable whether they will all be developed and this supports not only the principle of a contingency allowance but also the importance that that allowance reflects the overall level of uncertainty associated with the housing supply strategy.

Windfall

- 4.66 Table 4.2 of the consultation document includes a windfall allowance of 1,224 new homes between 2021 and 2037.
- 4.67 The principle of including a windfall allowance is explained in the NPPF at para 70 in the

⁵ Start to Finish (2016), Driving Housing Delivery (2018)

⁶ FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13, HA22, HA24, HA31, HA36-39, HA42, HA44

⁷ HA1, HA12, HA34, HA40

following terms:

- Firstly, there should be compelling evidence that they will provide a reliable source of supply.
- Secondly, any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 4.68 It is evident that the above is much more than a consideration of historic windfall delivery and requires the plan-maker to actively consider future supply from this source.
- 4.69 The Council's Windfall Background Paper projects forward 51 windfall completions on small sites from 2024/25 and an additional 52 windfall completions from large sites from 2025/26. The only source of information that the Council has used to arrive at these figures is its breakdown of past windfall delivery from 2009 – 2019 which averaged 101 dwellings (51 for small sites and 52 for large sites).
- 4.70 Para 3.6 of the Background Papers states: *"The estimated rate of windfall development is based on past completion rates..."* (emphasis added)
- 4.71 Para 3.9 of the Background Paper states: *"To ensure that a cautious approach is taken and windfall projections are not overly optimistic, the projections have only taken account of windfall delivery since 2009/10"*.
- 4.72 The very next paragraphs states *"Based on the preceding analysis, the windfall projections for the Borough are 51 dwellings per year from small site delivery and 51 dwellings per year from large site delivery"*.
- 4.73 It is clear that the assumption in Table 4.2 of the consultation document is derived solely from past trends and it is claimed that this demonstrates *"a compelling case"*. However, nowhere in the analysis is there consideration of whether this is a reliable source of future supply, rather it is just a forward projection of what happened in the past. The analysis does not provide any consideration of expected future trends.
- 4.74 It is important to recognise that windfall opportunities are finite. Opportunities to redevelop vacant or redundant land will have largely been exhausted by the present time because of planning policies that have prioritised such sources of supply for the past decade and longer. Consequently, future windfall over the plan period will rely to a much greater extent on recycling of land (i.e. existing uses being changed). This is inevitable a less certain source of housing supply.
- 4.75 For the purpose of assessing whether the Plan's housing supply strategy is sound, we have adjusted the windfall contribution by 25% i.e. 918 completions over the plan period.

Revised Housing Strategy

- 4.76 In the preceding Sections we have considered both the level of local housing need and the housing supply strategy providing a reasoned justification why this Regulation 19 Plan is not sound. The following table illustrates the effect of this.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	8,320	520 dpa
Under-supply 2018-2020	875	Added to reflect actual housebuilding relative to LHN
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	10,050	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect roll-forward of 2017 Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 25% to reflect finite supply
Total Supply	7,150	Sum of Supply estimates
Shortfall	2,900	

*retained at 13% of unmet need for illustrative purposes absent any Statement of Common Ground

- 4.77 The above illustrates that with these alternative assumptions, additional land needs to be identified for some 3,000 new homes.
- 4.78 Even if the strategic housing requirement were calculated simply by reference to 403 dwellings per annum, there would be no contingency to take account of changing circumstances over the plan period, contrary to the assertion in the plan to this effect.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	6,448	403 dpa
Under-supply 2018-2020	nil	N/A
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	7,295	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect 2017 Housing Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 20% to reflect finite supply
Total Supply	7,153	Sum of Supply estimates
Shortfall	142	

- 4.79 The above analysis clearly shows that Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to assumptions about housing supply, additional housing land should be allocated for development.
- 4.80 In the following Section we submit that the Strategic Growth Area identified in the Local Plan Supplement 2020 should be allocated for housing development.

5 South Fareham Strategic Growth Area

- 5.1 In our previous representations we supported the inclusion of Strategic Growth Areas in the Local Plan. Hallam control a substantial tract of land to the South of Fareham, adjoining the Stubbington Bypass, the construction of which has recently commenced. This land, along with other parcels in this location, is identified in Figure 3.2 of the Local Plan Supplement Consultation Document as the Proposed Strategic Growth Area South of Fareham.
- 5.2 The justification for the allocation of a Strategic Growth Areas is evident from the preceding Section which identified a significant shortage in the amount of new housing to be provided in the Borough and the amount of future development land allocated for this purpose. Development South of Fareham could provide housing land over the plan period, both in the immediate term and continuity over the long term.

South of Fareham

- 5.3 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. The town is the largest in the Borough with a population of around 37,300. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town.
- 5.4 Fareham is also an important economic centre, which has developed further over recent years with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane and the Peel Common Roundabout.
- 5.5 A new, mixed use masterplanned development to the South of Fareham, contiguous with Longfield Avenue, benefits from its proximity to the town centre, Daedalus, the railway station and existing local services and amenities with good access to walking, cycling and public transport links. These are locational merits that align with *Good Growth*.
- 5.6 Stubbington and Hill Head form a single urban area and have a population of c.14,300. These settlements have a range of services with a local centre, doctors, dentists, two primary schools, a secondary school and a community centre.
- 5.7 Local employment has improved with the development at Daedalus, which lies to the south east of the settlement. Development in south Fareham would delivery homes close to this economic and employment zone, providing housing for the growing workforce.
- 5.8 The Stubbington Bypass is being constructed to connect Gosport Road, Peak Lane and Titchfield Road. This will inevitably create an urbanising influence through the centre of the existing Strategic Gap. Development to the south of Fareham would assist in assimilating the bypass into the landscape and soften the impact of the road on the gap, beyond what could be achieved from constructing the bypass alone.

Development Potential

- 5.9 Paragraph 3.24 of the consultation document identifies high-level development principles and

requirements. Hallam support these intended outcomes and these have underpinned their proposals for a mixed-use masterplanned development.

- 5.10 Work undertaken over a long period of time has identified the suitability of the land controlled by Hallam to accommodate new development, how development can be arranged and the extent of mitigation required.
- 5.11 In our response to the 2019 Issues and Options consultation, we identified potential areas for development in this location and for convenience we have attached this at *Appendix 1*. Whilst this considered only land which Hallam control, we recognise that there are other smaller scale development opportunities within the general location, and that the Borough Council intend to work with landowners and site promoters to develop a Council-led masterplan which will focus on the delivery of community benefits as part of Good Growth. In this context, Hallam are committed to working with the Council and others to develop these proposals further as part of a co-ordinated approach.
- 5.12 A development scheme could comprise the following:
- Approximately 1,200 units
 - a new healthcare facility
 - a primary school
 - a care home
 - community hub
 - local shops
 - sports hub and
 - Green Infrastructure to include public open space, equipped areas of play, Sustainable Drainage Systems (SuDS), tree, hedge and shrub planting, meadows, structural woodland planting, allotment gardens and permissive footpaths and cycleways.
- 5.13 Development would be accessed from a primary and secondary access from Longfield Avenue, along with associated improvements to the existing Long field Avenue/Bishopsfield Road junction and carriageway and a primary access from Peak Lane.
- 5.14 An outline planning application for such a proposed development was submitted in June 2020 and is presently undetermined.

Accessibility and Movement

- 5.15 The accessibility advantages of this location enables positive promotion of active travel. The proposed development will be served by an internal network of footways and access arrangements that can be utilised by both pedestrians and cyclists. The site is surrounded by Public Rights of Way (PRoW) that in turn can serve as cycle/walking connections from the site to other roads in the vicinity of the site. These will be maintained and improved in order to encourage more sustainable modes of travel as an alternative to the conventional car.
- 5.16 Bus based public transport is also a feasible means of sustainable travel from this location. Service provision on the route number X5 operated by First Group provides opportunity for peak commuter travel and also for off-peak travel. The scale of development proposed is

sufficient to deliver dedicated public transport coverage between the Site and key destinations that will have the frequency and reliability to attract patronage to secure long term viability. Any improvement will be discussed with the necessary stakeholders, but it is envisaged that the development will support the introduction of new services.

- 5.17 The Eclipse Busway - a Bus Rapid Transport scheme between Fareham and Gosport opened in 2012 providing a priority public transport route connecting the two towns. The BRT scheme provides a more efficient service using new, comfortable, low-emission buses that encourages bus travel through enhancing the bus travel experience. Using the new busway, buses are able to avoid congested parts of the highway network including A32 so that passengers can benefit from reliable journey times and can plan their onward travel connections.
- 5.18 A number of new highway improvements works have been implemented or are currently under construction which is intended to improve bus journey reliability, and encourage more people to switch from car travel to using the bus. This would have an effect of helping reduce traffic numbers and traffic congestion between Fareham and Gosport, including along Newgate Lane.

Nitrates

- 5.19 The land is located directly west of the edge of urban area that forms part of the designated Chichester, Langstone and Portsmouth Harbours Eutrophic NVZ (TraC) (Nitrate Vulnerable Zone). The land is currently predominantly arable farmland with a history of mixed crops such as wheat, barley, oats, rape etc. and break crops such as peas, winter oil seed rape and beans.
- 5.20 The above is recorded on a Nutrient plan detailing fertilizer types, tonnages and time applied for each individual field. The fertilizer applied during the period of record is a mix of pig and farm yard manures.
- 5.21 It is recognised that intense farming with fertilization with natural manures will lead to nitrate leaching into the surrounding surface water and ground water environment.
- 5.22 Through development of the land, the leaching of nitrates through farming activities will be curtailed. While there will be a new source of nitrate production and leachate associated with the new development, this is considered to be at worst a neutral impact and through further assessment a net reduction in nitrate leaching can be achievable.

Biodiversity

- 5.23 The Hallam land is divided into two areas by Peak Lane; the eastern area comprises largely of arable land with hedgerows and ditches forming the compartmentalisation typical of the surrounding arable tenure and has limited nature conservation value. The western compartment consists of a large area of set aside land, with areas of arable crops, which are bound by limited hedgerows and tree lines.
- 5.24 The most significant habitat is Oxleys Coppice which is designated as a SINC and an area of ancient and semi-ancient woodland (ASNW), which has been evaluated as county level conservation value. The Scheme can ensure that Oxleys Coppice is protected.
- 5.25 Hedgerows are mostly classified under the Hedgerow Evaluation Grade System (HEGS) as moderate and moderate/high value. Only two hedgerows are classified as 'important' under the

Hedgerow Regulations (REGS). Several drainage ditches are found through the Site but only have limited marginal and aquatic vegetation. These are classified as no more than local conservation value.

- 5.26 Surveys have identified the presence of a number of protected species, bats and breeding birds. Measures to safeguard these species and their habitats can readily be accommodated as part of the development proposed. The habitats created and the species which will benefit from the mitigation measures proposed in the Site will lead to an overall beneficial effect in the long term. Similarly, in accordance with the Solent Waders and Brent Goose Strategy, a financial contribution will be made to this, based on the classification of land's suitability for supporting such species.
- 5.27 The Solent & Southampton Water Ramsar/SPA, which also includes Titchfield Haven SSSI, is approximately 700m from the Site. Portsmouth Harbour Ramsar/SPA/SSSI is located approximately 1.3km to the east of the Site at its nearest point, which also support a variety of habitats and an assemblage of dark-bellied brent geese. The Solent Maritime SAC extends from the River Hamble mouth up to Botley in the west, this is approximately 4.7km west of the Site.
- 5.28 There is the potential for a Likely Significant Effect on the Solent SPAs from an increase in recreation from new housing development within a 5.6km zone of influence of the Solent. As a result, an Interim Solent Recreation Mitigation Strategy was published in 2014 to enable initial mitigation measures to be placed, so LAs could continue to grant permission for new homes. The strategy has been updated to form the basis for future new housing up to 2034, with the Bird Aware Solent Recreation Mitigation Strategy (2017).
- 5.29 As this Site falls within the established zone of likely significant effect (5.6km), a HRA/AA will be required by the LPA; however a site specific Test of Likely Significance will be provided to facilitate the LPA assessment. The mitigations measures required to facilitate the Proposed Development will see a financial contribution provided for the in-combination effects on the Solent SPA, with additional bespoke mitigation provided within the Site to mitigate for the alone effects.
- 5.30 The details of bespoke mitigation are to be discussed with Natural England. Current proposals will include an area of County Park/Green Infrastructure to the west of Peak Lane, measuring approximately 23ha, which will include a circular walk, car park and habitat features to provide point of interest, as well as safe areas for dogs to be exercised off the lead. Alternative areas of GI will be provided around the main residential areas to the east of Peak Lane, here approximately 32ha will be provided, which will incorporate recreational opportunities and areas of biodiversity net gain.
- 5.31 The mitigation measures provided within the Site will ensure that there are no likely significant effects on the Solent alone and in-combination with other schemes within Fareham.

Strategic Gap

- 5.32 The current Core Strategy designates land between Fareham and Stubbington as a Strategic Gap. This follows such a designation being contained within earlier Development Plans; Settlement Gap policies in Hampshire date back at least 30 years when they were included within the South and Mid Hampshire Structure Plans (1988 and 1989). They were carried forward into the Hampshire County Structure Plan 1994 and the Hampshire County Structure

Plan 1996-2011. Consequently, with each new development plan needing to make provision for current and future development needs, the role and function of gaps need to be considered having regard to up to date circumstances.

- 5.33 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. As described earlier, this new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. Such a conclusion is similar to the assessment undertaken by Hallam previously.

Summary

- 5.34 Hallam support the identification of the Strategic Growth Area to the South of Fareham and have identified a development scheme that achieves the high-level development principles and requirements set out in the consultation document.
- 5.35 Importantly, development in this location can be brought forward that provides new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.
- 5.36 The merits of this location are substantial, and carefully planned development will not result in the coalescence of Fareham and Stubbington and the separate identities of these settlements can be retained.
- 5.37 As such, the allocation of land at South Fareham in the Local Plan for future development is considered wholly appropriate.

6 Policy NE5 and Policies Map

- 6.1 The Policies Map includes designations relating to Waders and Brent Geese and are associated with Policy NE5. This designation covers four categories of land – Core and Primary Support Areas, Secondary Support Areas, Low Use Areas and Candidate Areas.
- 6.2 The extent to which the land concerned is used by Waders and Brent Geese, particularly beyond the Core Areas, is transitory and can differ from time to time as a consequence of changes in agricultural practices (for example, arable land with wintering cereals provides an optimal foraging resource, whereas when this is replaced / succeeded by grassland habitats its function can change, which could affect species assemblages and regularity it is used. Changes in land use also promote further recreational uses which is the case for areas west of Peak Lane) or changes to the extent of the built environment (for example newly built structures, such as the Stubbington Bypass, will change the suitability of a location in proximity to it as a receptor). Therefore, to delineate these areas in the manner shown on a Policies Map, which affords permanence to the designation, fails to take account of the potential changes in circumstance and is not sound as a matter of principle.
- 6.3 The practical effect of this is that Policy NE5 directs the decision-maker to consider development proposals against the criteria listed therein and the status of the land by reference to the designations shown on the proposals map, which may at that point in time no longer be up-to-date or relevant.
- 6.4 Through Hallam's work in respect of the land to the South of Fareham, and through discussion with Natural England, it has identified a different classification to that shown on the Policies Map for certain of those parcels of land, as shown on *Appendix 2*. This illustrates how the application of Policy NE5 could misdirect the decision maker.
- 6.5 On this basis, these designations should not be shown on the Policies Map in the manner they are presently.
- 6.6 A more generic designation such as Areas of Waders and Brent Geese Sensitivity, which does not classify individual land parcels, would be more appropriate.
- 6.7 It would follow that Policy NE5 would be amended to require planning applications to assess and determine the use of land subject to those development proposals and at that point, when an up to date classification has been determined, the criteria and mitigation in Policy NE5 would apply.

7 Summary

- 7.1 These Representations have been prepared on behalf of Hallam Land Management Limited (Hallam), who control a substantial tract of land to the South of Fareham, adjoining the existing urban area and Stubbington Bypass, the construction of which has recently commenced.
- 7.2 This land was identified in the Local Plan Supplement 2020 as a potential Strategic Growth Area. Whilst the Regulation 19 Plan does not propose to carry forward the South of Fareham Strategic Growth Area, as is evident from these representations the need for such an allocation has not diminished.
- 7.3 The consultation document rightly identifies the Borough Council's commitment to meet the Borough's housing need by the end of the plan-period. This is plainly aligned with the NPPF and the Government's objectives. What is notably absent from the Vision and Strategic Priorities, is the recognition that Fareham is important in a sub-regional context and was previously intended to provide significant development land at Welborne to meet wider needs.
- 7.4 Policy H1 is not founded on a sound basis. In preparing and publishing this Regulation 19 Plan, the Borough Council has afforded greater weight to a potential revision to the Government's Standard Method and has disregarded the published and established measure of local housing need which has underpinned its work to date. Unless and until the Government publish a revision to the Standard Method, this version of the Plan cannot be submitted for Examination as it is plainly unsound. The Borough Council recognise this from its Committee Papers.⁸ This is nothing other than a "wait and see" Plan.
- 7.5 Only if the Standard Method is published in the same final form will the Plan be able to proceed – there is no indication if or when the Government intend to complete this exercise given the significant scrutiny it has attracted.
- 7.6 A more positive approach would have been to retain the higher level of housing as the basis of the Plan to provide surety over a long term with policy measures to manage housing supply in the event the level of local housing need was reduced. Unfortunately, the Council hasn't considered this as an option or a reasonable alternative in the Sustainability Assessment.
- 7.7 Even in the event the proposed revision to the Standard Method were confirmed as the Plan assumes, there is little if any evidence of a cogent understanding of the level of unmet need across neighbouring authorities. There is no apparent evidence of effective co-operation to justify the contribution the Plan proposes to unmet need.
- 7.8 Moreover, the Council hasn't applied its mind to the level of housing that been achieved since the Standard Method was introduced at the start of the plan making process and the date the plan is to be adopted. Viewed objectively, housing completions over that three year period were below the level of local housing need and this shortfall, which is part of a much greater shortfall when compared to the Core Strategy's housing intentions, should be accounted for.
- 7.9 Turning to housing supply, the assumption that Welborne will provide 4000 new homes within the plan period is not founded upon evidence previously produced by the Council and the level

⁸ Executive Briefing Paper 12th October 2020, para 12

of housing output assumed is at a level the Council previously considered unrealistic.

- 7.10 The windfall assumption drawn simply from past trends has not justified why this is a source of future supply. Uncertainties also exist in relation to a number of the proposed allocated sites because of landownership, extent of existing uses and location.
- 7.11 For all of the above reasons, the Plan's approach to housing will fall short of its Vision and Strategic Priorities. Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to housing supply, additional housing land should be allocated for development.

South of Fareham

- 7.12 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town. Similarly, Fareham is an important economic centre, including the Solent Enterprise Zone at Daedalus to the south of the town.
- 7.13 It is considered that development to the south of Fareham would be in a sustainable location, with good access to walking, cycling and public transport links, as well as local services and amenities. This location adjacent to the existing urban area creates a good opportunity for a natural and sustainable extension to the urban area. Development in south Fareham would deliver homes close to an important source of new employment and jobs at Daedalus.

Strategic Gap

- 7.14 The current Core Strategy designated land between Fareham and Stubbington as a Strategic Gap.
- 7.15 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. This new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. The delineation of the Strategic Gap on the Policies Map should be amended accordingly.

Proposed Modifications

- 7.16 The following Modifications are considered necessary for the Local Plan to be sound:
 - 7.16.1 The minimum housing requirement in Policy H1 to be defined by reference to the existing Standard Method;
 - 7.16.2 The housing requirement be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;

- 7.16.3 The level of unmet need that is accommodated be based on constructive, active and on ongoing engagement with neighbouring authorities;
- 7.16.4 Assumptions about the delivery of new housing at Welborne be revisited and revised down;
- 7.16.5 The windfall allowance be revised down;
- 7.16.6 Alternatively, to 6.16.4 and 6.16.5 the level of contingency be increased;
- 7.16.7 Additional housing allocations be provided for;
- 7.16.8 Land South of Fareham is allocated for housing development; and
- 7.16.9 Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood is amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- 7.16.10 The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

Please provide details you have to support your answers above

The paragraph gives a green light to any developer wishing to build in the countryside areas of the borough using this as an excuse. They can divide up sites to fit the 1 ha pattern described here. I understand that this is known as salami slicing and is not sound. The terms used in the paragraph (copied below) are sufficiently vague, e.g. in keeping, to allow developers to lean on officers to recommend permission. 3.14 The National Planning Policy Framework (NPPF) recognises the need to ensure that there is diversity within the housing market and acknowledges the role that small to medium sites (of less than one hectare) can bring to any development strategy both in terms of ensuring a supply of deliverable sites that can be relied upon within the first few years of a Local Plan and the fact that small sites help to diversify the housing product, such as by encouraging people who wish to build their own homes. For this reason, the proposed Development Strategy provides a new policy tool to allow small-scale development in the countryside where it can be demonstrated that the location is sustainable in terms of access to local facilities and services, and that the development would be in keeping with the character and pattern of the existing settlement. While the policy applies to the whole Borough, its specific wording means that it can only be applied in certain areas where particular criteria are met. The new policy can be viewed in full in the housing chapter (Chapter 5) and will be subject to regular monitoring to ensure that it is achieving the desired effect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

This should be looked at again to close loopholes for salami slicing.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Tighter wording

Your suggested revised wording of any policy or text:

I am not qualified to do this.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Executive Summary

Local Plans should be prepared to contribute to the achievement of sustainable development. They should be positively prepared and seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. As the starting point, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas. These requirements exist within the context of the Government's now longstanding objective to significantly boost the supply of homes.

The Regulation 19 Plan, which is meant to be the Plan the Council intends to submit for Examination, is not founded on the Government's published Standard Method as required by the NPPF and NPPG.

Rather, the Council has alighted upon the possible outcome of a Government consultation document and has based the Development Strategy, Policy H1 and the strategy to meet housing needs on this lower level of housing. This is manifestly unsound.

The fact that the Council do not intend to submit its plan until there is certainty as to a change to the Standard Method does not mitigate the cost of conducting this consultation to the public purse or unnecessary expenditure by other public and private bodies. Moreover, this approach plainly risks undermining public confidence in the plan-led system, if, as is possible, the housing requirement has to be increased. The Council has simply acted prematurely in seizing upon a consultation document that suggests a lower housing requirement; this may be expedient but is the antithesis of positive planning. Put simply, there is no basis for the Council to have formed this consultation document at the present time.

In the event that the Government decides not to proceed with its amendment to the Standard Method, or that such an amendment results in a different outcome for Fareham, the Council will need to further amend the plan. In that instance, a wholly new consultation exercise would be required given the likely magnitude of amendments that would be necessary, adding further delay to the plan-making process, and cost to the public purse and to interested parties, whilst, regrettably, undermining confidence in the Local Plan process.

Moreover, the Council has not recognised the context within which this Plan is being prepared. Housing delivery relative to the Core Strategy has resulted in a substantial shortfall in new housing over past years and this Plan provides an opportunity for positive and ambitious planning to ensure development needs are met and the principles of good growth are achieved. The Plan fails in this regard.

The Council purports to make a contribution towards meeting the unmet need of its neighboring authorities; however, this does not reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PFSH) of over 10,000 homes. It is not at all apparent that this Plan is founded on constructive, active and on an ongoing engagement as required by Section 33A.

It is instructive that whilst Welborne was identified to provide housing to meet sub-regional requirements, its role has now changed to meeting the Borough's housing needs first and foremost;

consequently this Plan makes a significantly lower contribution to the wider sub-regional needs which plainly have not diminished.

Furthermore, the Plan has exaggerated the likely housing supply from Welborne and other sources to such an extent that a shortfall in housing supply is inevitable.

The Plan overlooks the opportunity provided by the previously identified Strategic Growth Area at South Fareham which would make an important contribution to housing supply in the short term and providing surety of supply over the longer term. The suitability of this location is apparent from the Council's evidence base; it is accessible to the Borough's main urban area, it is not an area that is sensitive in landscape terms, development can be accommodated without undermining the principle of separation between Fareham and Stubbington, there are no environmental designations that preclude development and the transport modelling and its' conclusions has assumed development in this location. A development scheme in this location can also deliver nitrate neutrality and biodiversity net gain. Development to the South of Fareham can achieve *Good Growth*.

Unfortunately, the Sustainability Appraisal does not consider higher levels of growth consistent with the January 2020 Local Plan Supplement, and, as such, fails to consider a reasonable alternative.

The following Modifications are considered necessary for the Local Plan to be sound:

- The minimum housing requirement should be defined by reference to the existing Standard Method;
- The housing requirement should be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;
- The level of unmet need that is accommodated should be based on constructive, active and on ongoing engagement with neighbouring authorities;
- Assumptions about the delivery of new housing at Welborne should be revisited and revised down;
- The windfall allowance should be revised down;
- Alternatively, the level of contingency should be increased;
- Additional housing allocations should be provided for;
- Land South of Fareham should be allocated for housing development; and
- Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood should be amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1 Introduction

- 1.1 Hallam Land Management Limited ('Hallam') control a substantial tract of land to the South of Fareham, south of Longfield Avenue, west of HMS Collingwood and adjoining the Stubbington Bypass, the construction of which has recently commenced.
- 1.2 In successive representations to the Local Plan Review we have draw attention to the merits and advantages of locating development to the South of Fareham and how this would achieve the Borough Council's objective of *Good Growth*.
- 1.3 In the January 2020 Local Plan Supplement, this land, along with other parcels in this location, was identified by the Borough Council as a potential Strategic Growth Area.
- 1.4 In the current consultation document, such an allocation has not been carried forward.
- 1.5 On this occasion, the Borough Council's has alighted upon the possible revision to the Government's Standard Method for assessing local housing need, which suggests a lower level of housing for Fareham.
- 1.6 In our opinion, the Borough Council are wrong to have published this consultation document in this form given the status of this version of the Plan is afforded by the Local Plan Regulations; *the Plan a Local Planning Authority intends to submit for Examination*. To have based a Plan on the possible outcome of a Government consultation is plainly premature and, regrettably, the Plan's housing strategy is not positively prepared and is unsound.
- 1.7 The Plan's housing strategy is not an effective one. It has no regard to past performance relative to the objective assessment of housing need and the level of contingency is not sufficient when the likely delivery of Welbourne is viewed objectively. Over the plan period a significant shortfall in new housing is inevitable.
- 1.8 For the reasons given in this representation, additional housing land should be allocated in Policy H1.
- 1.9 Land South of Fareham is an eminently suitable and sustainable location for future development and should be identified accordingly. In the context of the Borough Council's *Good Growth* principles that underpin the Plan's Development Strategy, Hallam's development proposals achieve the high-level development principles and requirements set out in the Local Plan Supplement which remain entirely appropriate.
- 1.10 It is especially significant that the Borough Council's assessment of Strategic Gaps has drawn the conclusion that new development can be located south of Longfield Avenue without harming the integral purpose of this earlier designation. We agree with this conclusion, which accords with our previous submissions that carefully planned development will not result in the coalescence of Fareham and Stubbington and that the separate identities of these settlements can be retained.
- 1.11 Development at South Fareham can be brought forward to provide new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality

of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.

- 1.12 As such, and for the reasons given herein, the previous potential Strategic Growth Area at South Fareham should have been retained in the Local Plan for future development.
- 1.13 In our representations in the following Sections we set out that, whilst the Plan's Vision and Strategic Priorities are correct, absent amendments to Policy H1, this version of the Local Plan will not provide sufficient housing and this will run counter to its stated intention to address housing needs by the end of the plan period.

2 Vision and Strategic Priorities

- 2.1 In this Section of our representations we consider the consultation document's Vision and the Strategic Priorities that the Borough Council has identified. It is instructive to consider the extent to which the Plan's policies and proposals will, in practice, contribute towards this Vision being realised and the Strategic Priorities being met, in the context of what the NPPF's anticipates of a Local Plan.

National Planning Policy Framework

- 2.2 Para 15 of the NPPF requires that each Local Plan should provide a positive vision for the future of its area; a framework for addressing housing needs and other economic, social and environmental priorities. (emphasis added)
- 2.3 Para 17 requires that a Local Plan includes strategic policies to address the local authority's priorities for the development and the use of land in its area.
- 2.4 Para 20 states that strategic policies should set out the overall strategy for the pattern, scale and quality of development, and make provision for, *inter alia*, housing, employment, retail, leisure and other commercial development, infrastructure, community facilities and conservation and enhancement of the environment.
- 2.5 Para 22 states that strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure.
- 2.6 Para 23 states that strategic policies should provide a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development. This should include planning for and allocating sufficient sites to deliver the strategic priorities of the area.
- 2.7 In the context of plan making making, the NPPF's presumption in favour of sustainable development is framed in the following terms:
- a. *plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
 - b. *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:*
 - i. *the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - ii. *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.*
- 2.8 In this context, it is important to recognise the significance of the Regulation 19 stage in the plan-making process. This is the Plan the Borough Council intends to submit to the Secretary of

State for the purpose of Examination pursuant to Section 20 of the Act. This is explained in the NPPG *"The publication stage plan should be the document that the local authority considers ready for examination"*. Therefore, this is the Plan and the approach to meeting objectively assessed need that the Borough Council now consider appropriate.

- 2.9 But, as the Borough Council has suggested it won't decide whether or not to submit the Plan until it knows the outcome of the Government's review of the Standard Method, this is little more than a "wait and see" approach. This is plainly wrong given the importance of the plan-led system in overall terms, the alacrity with which an up-to-date Local Plan is needed in Fareham, and the need to maintain public confidence in the plan-making system generally.
- 2.10 As will be shown later, the practical difference between a housing strategy based of 520 dwellings per annum and 403 dwellings per annum is an 'end date' five years hence. When viewed in the context of providing surety over the longer term and the emphasis in the NPPF on exceeding the minimum requirement, adopting a higher growth level at this stage would have been the positive and responsible response to this circumstance.

The Vision

- 2.11 The Borough Council's Vision as set out in the consultation document intends that it:
- *"will accommodate development to address the need for new homes and employment space in Fareham Borough; and*
 - *new housing will address the particular needs in the Borough, such as our growing housing need and an ageing population and creating attractive places to live".*
- 2.12 The Vision is framed by reference to the Borough's needs, whereas Fareham is part of the established Partnership for Urban Southampton and has a role in contributing to meeting the housing needs of the sub-region. Indeed, there is no reference to Fareham's sub-regional role on any of the text associated with the Vision and Strategic Priorities in Section 2 of the Plan. In this context, the Vision should be drawn more widely.
- 2.13 Significantly, the allocation at Welborne in the Core Strategy was specifically for a sub-regional purpose, but its role by the present time appears to have been recast entirely; a matter we return to later.
- 2.14 Without prejudice to the above, achieving any Vision requires policies and proposals that are genuinely aligned with it. In respect of housing, the outcome of the Local Plan's policies and proposals should be that the Borough's housing needs are met.
- 2.15 As such, the Local Plan must, first, establish the correct strategic housing requirement in Policy H1 i.e. the overall number of new homes that need to be built by 2037 and, second, ensure a housing supply strategy that has the necessary surety that this can be achieved.
- 2.16 What experience both in Fareham and elsewhere has shown is that there must be an element of theoretical overprovision as part of the housing strategy to ensure that sufficient new housing is built.
- 2.17 To an extent the consultation document recognises this, but, as will be shown, it significantly

misjudges housing supply to such an extent that it undermines achievement of the Vision.

2.18 Conversely had a positive approach to plan-making been adopted, the Local Plan would have provided a robust planning strategy for the Borough.

Strategic Priorities

2.19 In the context of the Vision, the first Strategic Priority is to:

- *address the housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.*

2.20 Again, there is no reference to Fareham's wider sub-regional role. In the context of Section 33A of the Planning and Compulsory Purchase Act, which requires constructive and active engagement on strategic matters, this is a surprising omission.

2.21 Without prejudice to this point, as a matter of principle, such a strategic objective is soundly based and is aligned with the significant importance the Government attaches to housing provision. Such a Strategic Priority is universally found in Local Plans national-wide.

2.22 However, in this instance, the apparent driver to the Publication Draft has been an attempt to reduce the scale of housing provision despite the Vision and Strategic Priority. This is the only conclusion that can be drawn from the Council having based its Regulation 19 Plan on a consultation document concerning a potential revision to the Standard Method.

2.23 This approach is plainly not sound for the following reasons:

2.24 Firstly, it departs from the method of calculating local housing need set out in para 60 of the NPPF. No exceptional circumstance has been suggested other than a lower figure is derived from the potential revision to the Standard Method. In a recent comment the Planning Minister referred to outputs based on the consultation exercise as "*entirely speculative*".

2.25 Secondly, even if that figure is correct, it is in no way obvious how the wider needs of the sub-region are to be met; across the wider geographic area as a whole the level of local housing need is suggested to be greater than has hitherto been the case.

2.26 Thirdly, the approach to housing supply significantly overstates likely housing delivery and the scale of contingency is simply not sufficient to ensure future housing supply would meet identified need.

2.27 The inevitable conclusion is that this version of the Local Plan is not positively prepared, justified, effective or consistent with national policy. Therefore, whilst the Plan may have a clear strategic priority to address the need for new homes in the Borough, its subsequent policy to base the strategic housing requirement of 403 dwellings per annum means, when considered objectively, that it fails to do so. To consciously plan for 20% less housing than has been identified firstly as necessary, and secondly as capable of being accommodated, is not properly addressing the need for new homes in the Borough.

2.28 In short, the Plan provides for too few houses over the plan period. This in turn will give rise to

adverse effects. It will restrict the number of people who are able to purchase new housing from doing so and constrain the operation of the housing market. It will also reduce the amount of affordable housing that is built because that is a proportion of the overall amount of housing. Moreover, by restricting market housing it creates an additional and greater incidence of housing need as people who would otherwise have been able to buy a market home are prevented from and they fall into housing need. This will have harmful socio-economic effects and runs counter to the Vision to meet the Borough's housing need.

2.29 For these reasons, the consultation document is not soundly based.

3 Development Strategy

- 3.1 The preceding Section has considered the Regulation 19 Plan's Vision and Strategic Priorities as they relate to housing provision and has identified that, as a practical effect, its policies and proposal will not deliver the intended outcome in terms of meeting housing need by the end of the plan period. In this Section, we consider the proposed Development Strategy and the extent to which it could accommodate a greater level of development if necessary.
- 3.2 The Plan's Development Strategy, set out on pages 17 – 32, and its associated Key Diagram and more detailed Policies Map, are framed by the Borough Council's approach to housing provision. This is evident from comparing the direction of travel outlined in the January 2020 Local Plan Supplement based on the published Standard Method and which identified the need for Strategic Areas of Growth to be allocated for future development, and the present approach which includes very few new housing allocations.
- 3.3 In the event the Borough Council has to re-cast its approach to housing provision, it will also need to adjust its Development Strategy in order to be able to deliver the strategic objective to address housing need. In this regard, it is of note that para 3.5 of the consultation document acknowledges that *"the [Local Plan] Supplement consultation in early 2020 identified the Council's preferred approach to its Development Strategy which it proposes to use to guide the focus of development until at least 2037"*. This clearly illustrates the suitability of the Strategy at that time as the basis of plan-making presently.
- 3.4 In the following paragraphs we comment on the various elements of the Council's Development Strategy both as articulated presently but also in the context of a revised housing strategy which would require additional land to be identified for development in the plan period.

Good Growth

- 3.5 The 2019 Issues and Options consultation established the principle of **Good Growth** as the keystone for the Local Plan's Development Strategy.
- 3.6 *Good Growth* was defined in the 2020 Local Plan Supplement in the following terms:
- building homes and creating employment spaces in such a way as to improve the quality of life whilst protecting the most valued and natural historic environments.
 - respecting environmental protections and delivering opportunities for environmental gain, providing opportunities for reduced energy demand and waste production, whilst sensitively managing the countryside and valued landscapes.
 - providing open space and leisure opportunities to encourage healthy and active lifestyles and encouraging more of us to use active forms of travel rather than the car.
- 3.7 This definition has been retained in the Regulation 19 Plan.
- 3.8 These principles exist within an overarching scale of development that the Borough will need to provide for over the plan period. It is of paramount importance that, in the context of the Plan's Vision and Strategic Priorities, this scale of development is correctly defined at the outset; only then can it be said the Plan will address housing and employment needs adequately,

appropriately and sustainably. If the housing requirement is drawn too low, it will have negative social and economic effects.

- 3.9 It follows that, at the plan-making stage, the Local Plan is able to set out strategic and development management policies that have *Good Growth* principles at their core; both in terms of determining which locations in the Borough are to be allocated for new development and then the form and nature of such development.
- 3.10 The ensuing Land Use Strategy should prioritise locations that are able to achieve the principles of *Good Growth*, albeit there are instances where there are competing interest and, as with all planning decisions, balanced judgements will be necessary.

Development Strategy

- 3.11 This Section of the Regulation 19 Plan describes the factors that the Council has used to determine its Development Strategy. Because of the range of considerations that are inputted to, and then flow from this, what the Plan is actually describing is its land use strategy, namely where development is acceptable and conversely where factors determine new development would not be appropriate and other considerations are more important.

Landscape and countryside

- 3.12 We agree that there are parts of the Borough which have a fundamental importance in landscape terms and it is right that preservation of the landscape in those locations is the principal consideration. Figure 3.1 which illustrates the Key Diagram identifies "Areas of Special Landscape Quality" and we agree with the designation of the areas shown in this regard. Policy DS3, which we comment on later, should be worded to ensure that preserving the special landscape quality of these areas is given primacy.

Settlement boundaries

- 3.13 Settlement boundaries delineated in earlier development plans were drawn in the context of development needs as determined at that time.
- 3.14 Where the scale of development cannot be met on land within the Borough's urban area, development in the countryside adjoining main settlements is a wholly necessary and legitimate proposition.
- 3.15 As a consequence of allocating land for development to meet identified needs, settlement boundaries can and should be amended accordingly. In short, the existing settlement boundaries are not immutable.

The desire to respect settlement identity

- 3.16 Given that Areas of Special Landscape Quality have been assessed and delineated on the Key Diagram it is also necessary to consider whether land identified in the current Development Plan as Strategic Gap still requires such protection, whether its boundaries can justifiably be amended in light of up-to-date circumstances or whether any areas of land subject to that designation can be developed in order to contribute to a sustainable pattern of development.

- 3.17 The *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* considers existing Strategic Gaps in the adopted Local Plan and concludes that land south of Fareham, east of Peak Lane and west of HMS Collingwood does not perform the same function in terms of maintaining separation between Fareham and Stubbington as other land that is subject to this designation and is more integral to the purpose of preserving identity.
- 3.18 Chapter 4 of that Study, Paragraph 10 states that *"there exists some opportunities for development to be absorbed within the strategic gap subject to scale and future detailed design, without compromising its gap function combined with mitigation measures that can support green infrastructure enhancement"*.
- 3.19 It follows as a matter of principle that this land should not be designated as Strategic Gap in this Local Plan as this designation plainly cannot be justified in that location. Conversely, to continue to propose this land as Strategic Gap is not justified on the basis of the Council's own evidence.
- 3.20 It is highly material that the Local Plan Supplement had anticipated a Strategic Growth Area in this location, reflecting the broad conclusions of the earlier Options testing that this represents a sustainable and accessible location for new development and that such development can be accommodated without harm to the separation between Fareham and Stubbington. The significance of this is especially important in the context of the greater scale of development the Local Plan should accommodate and as such this represents an eminently suitable location for development. The fact this land is outside of the settlement boundary is in no way an overriding determinant that would preclude its allocation.

Climate change, flood zones and coastal management areas

- 3.21 We agree that the Local Plan should not direct major new development to areas identified as having a role in mitigating the impacts of flooding or coastal erosion. It is noteworthy that the areas of potential flood risk are associated with the River Hamble, River Meon, River Wallington and Lee-Solent estuary and are largely subject to nature conservation designations and landscape designations which limit the extent these locations would be suitable for development in any event.
- 3.22 In this context, the land identified as suitable for future development to the south of Fareham is not subject to flood risk and can be developed with Sustainable Urban Drainage measures that would not increase the risk of flooding elsewhere.

Protected areas for nature conservation

- 3.23 There are strategic nature conservation constraints that exist in the Borough in the form of International and Nationally designated sites. These overlap with other environmental designations and exert a significant constraint on where development can be located, limiting the extent of land absent a constraint. None of these constraints directly affect the land south of Fareham referred to in preceding paragraphs.

Transport corridors and opportunities to encourage more active travel modes

- 3.24 The NPPF advises that the planning system should actively manage patterns of growth to support sustainable travel. Significant development should be focused on locations which are

or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health.

- 3.25 In this regard, the Local Plan Strategic Transport Assessment states the following: *The proposed growth locations in the Local Plan to accommodate forecast population and economic growth, took a wide range of factors into consideration, including transport and access implications. Most of the Local Plan growth is located either within or on the edge of existing conurbations, providing good opportunities for trips to be made by modes of transport other than the private car. Consequently, the proposed growth in the Local Plan is generally in sustainable locations in terms of transport and access*”.
- 3.26 It is important to stress that this Transport Assessment in fact includes development at the Strategic Growth Areas, therefore, this conclusion reflects the suitability of new development in this location in these terms.
- 3.27 Whilst certain representations have previously raised concern about traffic impacts, the Transport Assessment concludes that the scale of development proposed (including the Strategic Growth Areas) and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective.

Need to encourage diversity in the housing market

- 3.28 We agree that there needs to a balance in the portfolio of housing sites. We comment later on the likely delivery of housing from Welborne, which can only represent a modest supply of housing in anything other than the longer term.
- 3.29 To meet the objective of providing sufficient housing, additional housing allocations are required for all of the reasons in this representation and in particular those in response to Policy H1. Whilst development to the south of Fareham will change the character of part of the undeveloped land between Fareham and Stubbington, this must be balanced with the material benefits of the scheme in terms of the new housing to increase housing supply in the short term and to provide a surety of supply over the longer term.
- 3.30 The opportunity to the south of Fareham is of a sufficient scale to meet the identified need for market housing, affordable housing, specialist accommodation and self-build and custom build housing, along with the co-location of local services and facilities to support a new neighbourhood.

Sustainability and accessibility to services

- 3.31 Fareham is identified in the Core Strategy as a ‘key growth point’ in the South Hampshire sub region and a ‘secondary regional centre’. The town is the largest in the Borough with a population of approximately 37,000 people. Fareham is also an important economic centre, which has developed further over recent years, with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane, Peel Common Roundabout and the construction of the Stubbington Bypass.
- 3.32 Amongst the advantages previously identified for the South Fareham Strategic Growth Area is

its proximity to the town centre, the Solent Enterprise Zone at Daedalus, the railway station and existing local services and amenities with good access to walking, cycling, and public transport links. Local facilities are situated along Bishopsfield Avenue and at Broadlaw Walk. Large-scale out-of-town retail facilities are located at Newgate Lane and Fareham Road to the east of Longfield Avenue.

- 3.33 Large-scale development to the south of Fareham, rather than a more dispersed pattern, would maximise opportunities to prioritise pedestrian and cycle links and extend public transport to maximise sustainable modes of travel.

The requirement to meet housing and employment needs

- 3.34 *Good Growth* can only be achieved if the Local Plan intends to meet objectively assessed need for housing, which for the reasons set out in response to Policy H1, it does not achieve this at the present time.

Spatial Interpretation

- 3.35 As a matter of principle, the identification of deliverable or developable previously developed land should be a priority, however, it is widely understood that such opportunities do not exist to accommodate the scale of new housing and employment required in the Borough.
- 3.36 Accordingly, the allocation of greenfield sites for future development is both a legitimate and necessary measure.
- 3.37 The morphology of the Borough is comprised of three urbanised areas: Fareham, Portchester and the 'Western Wards', which are part of a coastal conurbation that extends from Portsmouth in the east to Southampton in the west. Fareham is the pre-eminent urban area within the Borough in terms of services and facilities and public transport. Portchester and the 'Western Wards' are characterised more as residential suburbs.
- 3.38 Interspersed to a greater and lesser degree between these settlements are areas of separation comprising Portsmouth Harbour, Alver Valley, Meon Valley and the River Hamble. These are strategically important corridors that separate the main urban areas, protect their identity and prevent settlements within the coastal conurbation from merging together.
- 3.39 To the north of the M27, the Borough is of a more rural character, noting of course the proposed new community at Welborne which will undoubtedly change the character of this area over a long period of time.
- 3.40 Stubbington, a residential suburb, lies south of and separate from Fareham's urban area along with the sub-regionally important employment and logistics node at Daedalus. The Borough Council have stated aspirations to maximise the potential of the airfield's land and infrastructure assets through new commercial development, providing clusters for aviation, non-aviation and skills/innovation activity. This will contribute positively to the creation of skilled jobs in the Solent Enterprise Zone.
- 3.41 These characteristics have led the Council, rightly in our opinion, to consider the designation of Valued Landscapes as part of the Local Plan and in this context we are aware that the 2017 Landscape Assessment acknowledges the intrinsic landscape character of the Meon, Hamble

and Hook valleys.

- 3.42 We agree that the Meon Valley is a distinctly valued landscape. In our 2019 response to the Issues and Options consultation we referred to various Appeal decisions that alight upon the value of the landscape in this location. Continuing to protect this area from development and formalising a landscape designation in the Meon Valley would be appropriate.
- 3.43 The extent to which land around the 'Western Wards' is capable of accommodating new development is constrained by the extent of nature conservation designations close to the existing urban area which limits development opportunities to small scale schemes at most.
- 3.44 On the basis of the above, it follows that **locations that adjoin Fareham town, as distinct from villages away from it located in the rural hinterland to the north and west of the Borough, are inherently more suitable in terms of reflecting the morphology of the Borough, preserving its natural environment and maximizing accessibility to services and facilities to achieve the most sustainable pattern of development.**
- 3.45 The extent to which new development opportunities in those locations can consolidate and enhance the accessibility advantages of Fareham Town Centre and Daedalus are consistent with the *Good Growth* principles set out in paras 3.5 and 3.6 above.

Development Strategy Policies

- 3.46 Para 3.2 of the consultation document defines the Development Strategy as providing the *"distribution, scale and form of development and supporting infrastructure, a set of proposals to deliver the strategy, policies against which to assess planning applications, and proposals for monitoring the success of the plan"*.
- 3.47 In addition to the narration of the Strategy, this Section of the Plan includes three policies; the first controlling new development in the countryside, the second in respect of the Strategic Gap and a third concerning Landscape. These policies do not set out a Settlement Hierarchy or Spatial Strategy for the Plan area and such policies do not appear elsewhere in the Plan either. The practical effect of this is that there is no policy that delivers the spatial objectives in so far as where new development should be located i.e. affording a priority to locations within and adjoining Fareham town as the most sustainable location in the Borough.
- 3.48 Given that para 3.2 suggests the role of the Development Strategy provides a set of policies that direct where and how new development should be located, the omission of what are usually commonplace policies is significant.

Strategic Policy DS1: Development in the Countryside

- 3.49 Policy DS1 seeks to control the use of land outside defined settlement boundaries i.e. in countryside locations.
- 3.50 In some circumstances it would be appropriate to grant planning permission for new development in such locations. In those instances, the benefits of a development proposal would need to be considered against the criteria in part two of the policy. In this context, we do not agree that Criterion 'v' is drafted correctly.

- 3.51 On certain occasions other considerations associated with a development proposal would merit planning permission being granted notwithstanding the agricultural classification of the land concerned. In this regard, whilst the NPPF affords a preference to development of lower quality agricultural land, it does not preclude the development of best and most versatile land (see footnote 53 of the NPPF).
- 3.52 As presently drafted Policy DS1 conflicts with the expression of this policy approach in the NPPF; as such criterion 'v' should be reworded as follows: "*avoid or minimise the loss of best and most versatile agricultural land*".

Strategic Policy DS2: Development in Strategic Gaps

- 3.53 In earlier representations we have identified that the evidence base provided by the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* does not justify the delineation of the Strategic Gap south of Fareham in the manner shown on the Key Diagram.
- 3.54 In particular, that Report identifies that the land south of Longfield Avenue and west of HMS Collingwood could accommodate new development without a significant adverse effect on the objectives of the Strategic Gap designation.
- 3.55 It follows that this land is not an integral part of the Fareham and Stubbington Gap.
- 3.56 As such the Strategic Gap should not extend across this land, as this would add a policy restriction that ought not apply on the basis of the published evidence. Put simply, such a designation should not include more land than is necessary to achieve its purpose.
- 3.57 For the Local Plan Key Diagram to be justified, and for the Local Plan to be sound, the delineation of the Strategic Gap south of Fareham should be amended accordingly.

Strategic Policy DS3: Landscape

- 3.58 The Local Plan intends to formalise Areas of Special Landscape Quality to reflect their valued status as determined through the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps*. As written, Policy DS3 does not however afford any particular level of protection to these areas beyond Policy DS1, which in any event requires development proposals in the Countryside to "*conserve and enhance landscapes*".
- 3.59 Policy DS3 also appears to permit major development proposals in these locations whereas the Development Strategy has sought to avoid new allocations in these locations because of their landscape sensitivity. The definition of major development is provided in the Glossary¹ and when applied to this Policy, could see large scale development proposals being advanced when this is what the Local Plan is seeking to avoid. As drafted, this Policy does little to enforce the Plan's Development Strategy.

¹ For residential schemes, major development includes those of 10 dwellings or more or on a site of 0.5 hectares or more. For other development, it includes building(s) with a floor area of 1000sq.m or more or on a site of 1 hectare or more.

4 Policy H1: Addressing housing needs by the end of the plan period in an appropriate and sustainable manner

- 4.1 In this Section we consider specifically Policy H1 and whether, as presently formed, the Borough Council's strategic housing requirement and housing supply strategy are sound.
- 4.2 The NPPF expects the planning system to significantly boost the supply of new housing by providing, in the first instance, a sufficient amount of development land where it is needed (para 59 refers).
- 4.3 It is clear that a Local Plan's housing requirement is to be calculated by reference to the Government's Standard Method, unless exceptional circumstances can be proven (para 60 refers).
- 4.4 In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.
- 4.5 As discussed in Section 2, the Plan's Vision and Strategic Priorities establish the intention to address the Borough housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.
- 4.6 For the Plan to address, and indeed meet, housing needs by the end of the plan period, it is important to have regard to the following considerations which are material to determining a sound strategy in the context of the Government's presumption in favour of sustainable development:
- context and the backdrop to this Local Plan;
 - an objective assessment of local housing need;
 - unmet need from neighbouring authorities;
 - the Plan's housing deliver strategy and whether this is sufficiently robust.
- 4.7 As will be shown, the consultation document will not achieve this, and when measured objectively, a shortfall in housing supply over the plan period will be inevitable, contrary to the stated Vision and Strategic Priority.

Context

- 4.8 The earlier Core Strategy set out a Development Strategy for the period to 2026 that has hitherto been achieved in part only. This partial achievement has had significant implications for housing delivery in the plan area.
- 4.9 In aggregate, the Core Strategy intended that some 9,000 new homes would be built in Fareham

in the 20 years between 2006 and 2026. This comprised:

- 5,350 at the North Fareham Strategic Development Area (Welborne) to meet sub-regional needs as identified in both the South East Plan and the South Hampshire Sub-Regional Strategy; and
- 3,729 elsewhere in the Borough²;

- 4.10 Over the 13 years since the start of the Core Strategy's plan period (2006/7 and 2018/19) only 4,200 new homes have been built. This is equivalent to 46% of the housing requirement in 68% of the plan period.
- 4.11 In comparison with the trajectory on page 21 of the Core Strategy, new housing has had to be accommodated in locations outside of allocated Strategic Development Area; in the four years from 2016, almost twice as many new homes have been provided elsewhere in the Borough than the 469 intended for the whole of that 5 year period 2016/21.
- 4.12 Following the Core Strategy, when the Welborne Plan was prepared in 2015, and to reflect the changed circumstances by then the Council re-calculated likely delivery at the Garden Village. Policy WEL3 identified approximately 6,000 new homes to be completed by 2036. First completions were to be achieved in 2015/16, 1,500 completions were to have been achieved by 2021 and 2,860 completions by 2026.
- 4.13 Plainly this hasn't been achieved and without question there has been a substantial shortfall in housing provision compared to the Core Strategy.
- 4.14 Manifestly, this shortfall is significant and cannot simply be put to one side. It is striking that Welborne was identified originally to meet sub-regional needs but because it hasn't delivered it now represents a source of housing to meet in a substantial part the Borough's own housing need and thus the Borough's contribution of the wider sub-regional need is much reduced.
- 4.15 Given the strategic objective defined by the Council, and in the context of the NPPF's presumption in favour of sustainable development, this has a clear implication for plan-making in Fareham. National Planning Policy invites Local Authorities to exceed the minimum housing requirement and to adopt a positive approach to planning for future housing. Plan-making should not be a simple mathematical exercise but a fundamental examination of how to best plan for the long-term future of the Borough. In this instance, and as the Local Plan Supplement was endeavoring to achieve, this enables the Council to develop a strategy for the longer term.
- 4.16 The change of direction in the Regulation 19 consultation document appears to be framed by precisely the opposite; planning for the minimum plan period and the least amount of new development plausible. Patently, that approach does not include the flexibility which a Local Plan should provide.
- 4.17 For example, had the Regulation 19 Plan retained the level of housing calculated by reference to the published Standard Method – 520 dwellings per annum – and had a lower housing requirement in fact materialized, the practical effect of this would merely have been a housing supply strategy that would endure beyond the end of the plan period. In simple terms, the

² Policies CS2 and CS15 refer

housing strategy would cater for an addition 5 years worth of housing. Given that it is beyond comprehension that housing need will not cease after 2037, this would have been a positive, adaptable, plan-led, longer term strategy.

- 4.18 The fact that the Council has alighted upon a potentially lower housing requirement without apparently considering the practical effect of retaining the existing housing requirement manifestly demonstrates a negative, rather than positive, approach to plan making.
- 4.19 Moreover, the Sustainability Appraisal has plainly not considered this as a reasonable alternative and, as such, is flawed. The Assessment of Alternatives in Section 5 of the Sustainability Appraisal relates to development locations rather than the overall quantum of development. The PPG advises that *"a sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted"*. The purpose of testing reasonable alternatives is to determine that a Local Plan promotes sustainable development when judged against reasonable alternatives, to achieve relevant environmental, economic and social objectives.
- 4.20 This negative approach is further evident when considering the components of the housing strategy which again illustrates a do-minimum approach.

Local Housing Need

- 4.21 Application of the Standard Method to calculate the Local Plan's local housing need would require 520 new homes to be provided each year, or 8,320 new homes in total between 2021-2037.
- 4.22 Alternatively, the Regulation 19 Plan is based on 403 new homes each year which is derived from the proposed revisions to the Standard Method published as a consultation document by the Government in the Summer. These proposed revisions carry no weight at the present time and do not provide any basis for the calculation of housing need for the purpose of this Local Plan at the present time.
- 4.23 Only if the proposed revisions are carried forward without alteration by Government would this serve as a basis to underpin the Plan and enable it to be submitted. Any change to the formula, as it relates to Fareham or any of its neighbouring authorities, would require reconsideration of the housing requirement in Policy H1. The Regulation 19 Plan is contingent therefore on the outcome of that entirely separate process, rather than being a Plan which the Council is able to submit for Examination. It is, for want of a better term, a "wait and see" plan.
- 4.24 As the Council appear to acknowledge themselves by the intention not to submit the Plan for Examination until the outcome of the Government's consultation is known, it is plainly not a sound approach at the present time.
- 4.25 Little more can be said about this, other than to draw attention to the obvious difficulties that have arisen in light of the Government's consultation, which have led to a significant level of opposition to the suggested changes. As recently as mid-November the Planning Minister referred to estimates of local housing need derived from its consultation exercise as *"entirely speculative"* and indicating that the revised formula was being re-evaluated.

- 4.26 It is also important to consider when the Standard Method was introduced and the practical effects of this which the Council don't appear to acknowledge.
- 4.27 The Standard Method was introduced in 2018 and the assessed level of local housing need was based on a period of 2016 onwards. The Council appear not to have grappled with the guidance in the Planning Practice Guidance in respect of this: "*Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate*". Plainly we are some way into the plan making process which commenced in 2017 and this requires the Council to have asked themselves how have housing completions compared with the level of local housing need from that point.
- 4.28 The published requirement was 520 dwelling per annum from 2016 onwards, whereas the highest number of completions was 349 in 2016/17 and less than half for the two years since where monitoring information is available.
- 4.29 The Standard Method takes account of backlog but only in so far as affordability will have increased in the years prior to the calculation and does not take account of underprovision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.
- 4.30 The following table illustrates this:

Year	Number of Completions	Level of Local Housing Need	Shortfall
2018/2019	290	520	230
2019/2020*	263	520	257
2020/2021**	132	520	388

*Projected housing supply April 2019

**Projected housing supply June 2020

- 4.31 This indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No account is taken of this in the current consultation document. Even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
- 4.32 In the circumstance where housing delivery in the Borough has been below both that anticipated by the Core Strategy and the measure of local housing need derived from the Standard Method, however calculated, the Council are plainly wrong to have selected a plan period that takes no account of this and a housing strategy that has no regard to that underprovision. This further undermines any notion of a positively prepared plan.

Unmet Need

- 4.33 Section 33A of the Planning and Compulsory Purchase Act 2004 requires a local planning authority to cooperate with, *inter alia*, other local planning authorities, and engage constructively, actively and on an ongoing basis in the preparation development plan documents, so far as relating to strategic matter. Paragraph 25 of the NPPF says 'strategic policy making authorities should collaborate to identify the relevant strategic matters which they need

to address in their plans'. Unlike problems associated with soundness, a failure to discharge the obligation in Section 33A cannot be remedied once the plan has been submitted for examination.³

- 4.34 It is clear from the work of the Partnership for Urban South Hampshire that housing provision is a strategic matter and thus there is a need for co-operation between constituent plan-making authorities. In this regard, the 'plan-making' section of the PPG provides guidance in relation to the duty to cooperate. Paragraph 022 states that strategic policy making authorities are expected to have addressed key strategic matters through effective joint working, and not deferred them while relying on an inspector to direct them. It states "[An] Authority will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any outcomes achieved; this will be thoroughly tested at the plan examination."
- 4.35 The consultation document makes an allowance of an additional 847 houses as a contribution to meeting unmet need from Fareham's Neighbouring Authorities. But as this is the Submission version of the Plan, this allowance should have regard to the co-operation referred to above. There is no evidence that this is anything other than an allowance made by Borough Council without reference to the joint working through PUSH; this is nothing else but a "cart before horse" approach.
- 4.36 The consultation document acknowledges that there is "a significant likelihood of a substantial level of unmet need in the sub-region" (para 4.4) and that over the plan period the level of unmet need in the sub-region could be circa 10,750 new homes. It is instructive that the references to unmet need in para 4.5 of the consultation document are in the context of the current Standard Method and not the higher sub-regional figure that the proposed Standard Revision indicates. In this regard, the plan appears to be "comparing apples and pears".
- 4.37 The following table compares the housing requirement from the current Standard Method and that indicated by the proposed revision.

LPA	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard Method	Proposed new Standard Method	Difference between current and proposed SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1025	+333
PUSH East	1804	1828	2802	3430	+628
Southampton	815	1148	1012	832	-180
Eastleigh		857	694	885	+191
New Forest	521	346	729	782	+53
Test Valley	588	834	550	813	+263
PUSH West	1924	3183	2977	3312	+335

- 4.38 The above illustrates that whilst the Fareham figure might decline, across the sub-region the

³ *Samuel Smith Old Brewery (Tadcaster) v Selby DC [2015] EWCA Civ 1104 paragraphs 38 and 40*

overall scale of housing is greater both in PUSH East and West.

- 4.39 Over a 16-year period, the difference between the proposed new Standard Method would require an additional 10,000 new homes to be built across PUSH East. Compared to average delivery over the past 3 years, almost twice as many new homes will need to be built. This is unquestionably a step change in housing delivery and each Local Authority area will need to contribute towards this and maximise its contribution to the sub-regional requirement.
- 4.40 In September 2020 the PUSH Report to its Joint Committee looked at the potential implications of housing supply relative to Local Housing Need, and using the proposed revision to the Standard Method this still identified a shortfall of over 6,500 across the PUSH East sub-region.⁴
- 4.41 At para 4.5 of the consultation document, the Borough Council put forward a contribution of 847 dwellings towards meeting unmet need. There is no evidence of how this figure has been derived. All that is evident from the earlier passages of that paragraph is the very unclear picture that exists and which is subject to additional work by PUSH. Consequently, the proposed contribution of 847 dwellings – 13% - to unmet need doesn't appear to have any basis in a full and proper assessment of future housing requirement and supply across the sub-region. This is significant because, historically, Welborne had been identified to provide housing supply for that sub-regional purpose whereas now its contribution almost entirely to meet Fareham's housing need.
- 4.42 Switching the role of Welborne in this fashion is taking away a supply of housing identified previously to meet sub-regional needs in the longer term, when plainly that need still exists, and elevating supply available to meet the Borough's need. This denies the original intention of Welbourne, and places a very heavy reliance on one source of housing to meet local needs; on the basis of the Council's strategy, some two thirds of the Borough's housing needs would be met at Welborne.
- 4.43 Again, this illustrates why preparing a Regulation 19 Plan on this basis isn't justified and does not contribute to effective planning across the sub-region.
- 4.44 Moreover, on this basis, the evidence to justify the Council having discharged its duty under Section 33A is not at all obvious; this is particularly significant as this is the Regulation 19 Plan to be submitted for Examination.

Plan Period

- 4.45 The current consultation document is based on the plan period 2021-2037. This is 16 years and would accord with the 'at least 15 years' in the NPPF, if the Local Plan were in fact adopted in 2021. Experience of Local Plan Examinations and the length of time between Regulation 19 and adoption suggests this is highly unlikely. But assuming the Plan is adopted in the 2022 this would provide the bare 15-year plan period.
- 4.46 It is in this context that one has to consider whether the plan is "*sufficiently flexible to adapt to rapid change*". For the reasons given later we say it does not meet this requirement.

⁴ Table 4 Comparison of Housing Need and Supply 2020-2036

Delivery at Welborne

- 4.47 The consultation document's housing strategy is heavily reliant on housing delivery at Welborne, which was previously identified to meet sub-regional requirements. Table 4.2 of the consultation indicates that over 4,000 new homes are to be built at Welborne by 2037 to meet Fareham Borough's local housing need.
- 4.48 This is not a realistic assumption.
- 4.49 It has been readily apparent for some time that past delivery assumptions at Welborne could not be achieved. Despite the Core Strategy and the Welborne Plan assuming a significant number of new homes would have been built at Welborne by the present time, there is still no outline planning permission some 14 months after the Borough Council's Planning Committee resolved in October 2019 to grant permission for the outline planning application (P/17/0266/OA).
- 4.50 In our response to the January 2020 Supplement, we noted that it wasn't surprising that by that time the Section 106 had not been signed given the particular scale of that development.
- 4.51 However, by the present time, the absence of an outline planning permission raises a more fundamental concern about delivery at Welborne.
- 4.52 Nowhere do the Council provide any evidence as to when they expect outline permission to be granted, the extent of any pre-commencement works and their associated timescale, when reserved matters applications are expected and when first completions will be achieved. The closest the Council gets to any justification is that the housing trajectory has been agreed with the developer Buckland.
- 4.53 We are aware that there will also need to be Highway Agreements relating to works to the M27 Junction 10 prior to those works being commenced; again, in our experience such highway agreements are complex and can take a long period of time to complete. The works to be undertaken to the M27 and A32 are substantial. The Planning Officer's Report highlights the estimated costs of these works as £80m-£90m and that funding gap exists in relation to these works. More recently, we understand the Council has had to seek additional funding from Government to cover earlier Local Enterprise Partnership funding that has since been lost. Hampshire County Council has recently confirmed that: "The J10 works are not fully committed at this stage and there is no defined timescale for delivery." This is clearly a major risk in overall terms but also in terms of when such works will be undertaken and the duration of such works.
- 4.54 This is germane to timescales as to when development at Welborne can be anticipated, notwithstanding the milestone it reached in 2019.
- 4.55 A number of housing trajectories have been proposed for Welborne at different stages. The Borough Council's January 2017 Background Paper concerning Welborne set out the Council's assumption at that time. This suggested that 4,090 new homes would be built at Welborne by 2036. Whilst this would align with the current assumption, this overlooks the fact that circumstances have already moved beyond the key dates suggested therein.
- 4.56 If the 2017 trajectory is simply rolled forward to the present day and it is assumed that outline planning permission is granted in 2021/2022 and development commences in 2023/24 then the

total number of completions would be 3,090 dwellings by 2037 – see *Appendix 1*.

- 4.57 This trajectory is clearly sensitive to assumptions. Any delay in commencing development beyond will 2023/24 will cause fewer completions in the plan period.
- 4.58 Moreover, the extent to which 250 dwellings can be built and sustained each year from 2026 onwards is also a highly sensitive assumption.
- 4.59 We note that more recent research from Lichfields⁵ suggests that for sites of more than 2000 dwellings, the average period of time from planning to delivery is 2.9 years. Moreover, that research indicates that for scheme the size of Welborne the number of houses built each year averaged 140 dwellings.
- 4.60 If a mid point between these two assumptions of 185 dwellings per annum were achieved and sustained as the peak output, this would only yield 2,360 dwellings in the plan period.
- 4.61 It is instructive to note that to achieve 4,020 completions in the plan period would require a build rate from 2024/25 onwards of 309 dwellings per annum. A build rate in excess of 300 dwellings per annum was rejected by the Council in 2017.
- 4.62 What is clear from the above is that Welborne's contribution to housing supply during the plan period has been over-estimated. This component of housing supply is not justified and consequently the housing supply strategy is not effective.

Proposed Allocations

- 4.63 From our analysis of proposed allocations we have been able to identify that, whilst a number of subject to current planning applications, a significant number are subject to constraints that could delay their development. A number of Sites are owned by public bodies or are subject to multiple landownerships and with existing uses⁶. Moreover, a great many are Sites within the urban areas which are likely only suited to flatted schemes to achieve the capacity numbers and may not be suitable to developers.
- 4.64 Other Sites are subject to nitrates constraints⁷ which may require a strategic solution to enable their release.
- 4.65 Consequently, it is questionable whether they will all be developed and this supports not only the principle of a contingency allowance but also the importance that that allowance reflects the overall level of uncertainty associated with the housing supply strategy.

Windfall

- 4.66 Table 4.2 of the consultation document includes a windfall allowance of 1,224 new homes between 2021 and 2037.
- 4.67 The principle of including a windfall allowance is explained in the NPPF at para 70 in the

⁵ Start to Finish (2016), Driving Housing Delivery (2018)

⁶ FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13, HA22, HA24, HA31, HA36-39, HA42, HA44

⁷ HA1, HA12, HA34, HA40

following terms:

- Firstly, there should be compelling evidence that they will provide a reliable source of supply.
- Secondly, any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 4.68 It is evident that the above is much more than a consideration of historic windfall delivery and requires the plan-maker to actively consider future supply from this source.
- 4.69 The Council's Windfall Background Paper projects forward 51 windfall completions on small sites from 2024/25 and an additional 52 windfall completions from large sites from 2025/26. The only source of information that the Council has used to arrive at these figures is its breakdown of past windfall delivery from 2009 – 2019 which averaged 101 dwellings (51 for small sites and 52 for large sites).
- 4.70 Para 3.6 of the Background Papers states: *"The estimated rate of windfall development is based on past completion rates..."* (emphasis added)
- 4.71 Para 3.9 of the Background Paper states: *"To ensure that a cautious approach is taken and windfall projections are not overly optimistic, the projections have only taken account of windfall delivery since 2009/10".*
- 4.72 The very next paragraphs states *"Based on the preceding analysis, the windfall projections for the Borough are 51 dwellings per year from small site delivery and 51 dwellings per year from large site delivery".*
- 4.73 It is clear that the assumption in Table 4.2 of the consultation document is derived solely from past trends and it is claimed that this demonstrates *"a compelling case"*. However, nowhere in the analysis is there consideration of whether this is a reliable source of future supply, rather it is just a forward projection of what happened in the past. The analysis does not provide any consideration of expected future trends.
- 4.74 It is important to recognise that windfall opportunities are finite. Opportunities to redevelop vacant or redundant land will have largely been exhausted by the present time because of planning policies that have prioritised such sources of supply for the past decade and longer. Consequently, future windfall over the plan period will rely to a much greater extent on recycling of land (i.e. existing uses being changed). This is inevitable a less certain source of housing supply.
- 4.75 For the purpose of assessing whether the Plan's housing supply strategy is sound, we have adjusted the windfall contribution by 25% i.e. 918 completions over the plan period.

Revised Housing Strategy

- 4.76 In the preceding Sections we have considered both the level of local housing need and the housing supply strategy providing a reasoned justification why this Regulation 19 Plan is not sound. The following table illustrates the effect of this.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	8,320	520 dpa
Under-supply 2018-2020	875	Added to reflect actual housebuilding relative to LHN
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	10,050	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect roll-forward of 2017 Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 25% to reflect finite supply
Total Supply	7,150	Sum of Supply estimates
Shortfall	2,900	

*retained at 13% of unmet need for illustrative purposes absent any Statement of Common Ground

- 4.77 The above illustrates that with these alternative assumptions, additional land needs to be identified for some 3,000 new homes.
- 4.78 Even if the strategic housing requirement were calculated simply by reference to 403 dwellings per annum, there would be no contingency to take account of changing circumstances over the plan period, contrary to the assertion in the plan to this effect.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	6,448	403 dpa
Under-supply 2018-2020	nil	N/A
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	7,295	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect 2017 Housing Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 20% to reflect finite supply
Total Supply	7,153	Sum of Supply estimates
Shortfall	142	

- 4.79 The above analysis clearly shows that Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to assumptions about housing supply, additional housing land should be allocated for development.
- 4.80 In the following Section we submit that the Strategic Growth Area identified in the Local Plan Supplement 2020 should be allocated for housing development.

5 South Fareham Strategic Growth Area

- 5.1 In our previous representations we supported the inclusion of Strategic Growth Areas in the Local Plan. Hallam control a substantial tract of land to the South of Fareham, adjoining the Stubbington Bypass, the construction of which has recently commenced. This land, along with other parcels in this location, is identified in Figure 3.2 of the Local Plan Supplement Consultation Document as the Proposed Strategic Growth Area South of Fareham.
- 5.2 The justification for the allocation of a Strategic Growth Areas is evident from the preceding Section which identified a significant shortage in the amount of new housing to be provided in the Borough and the amount of future development land allocated for this purpose. Development South of Fareham could provide housing land over the plan period, both in the immediate term and continuity over the long term.

South of Fareham

- 5.3 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. The town is the largest in the Borough with a population of around 37,300. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town.
- 5.4 Fareham is also an important economic centre, which has developed further over recent years with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane and the Peel Common Roundabout.
- 5.5 A new, mixed use masterplanned development to the South of Fareham, contiguous with Longfield Avenue, benefits from its proximity to the town centre, Daedalus, the railway station and existing local services and amenities with good access to walking, cycling and public transport links. These are locational merits that align with *Good Growth*.
- 5.6 Stubbington and Hill Head form a single urban area and have a population of c.14,300. These settlements have a range of services with a local centre, doctors, dentists, two primary schools, a secondary school and a community centre.
- 5.7 Local employment has improved with the development at Daedalus, which lies to the south east of the settlement. Development in south Fareham would delivery homes close to this economic and employment zone, providing housing for the growing workforce.
- 5.8 The Stubbington Bypass is being constructed to connect Gosport Road, Peak Lane and Titchfield Road. This will inevitably create an urbanising influence through the centre of the existing Strategic Gap. Development to the south of Fareham would assist in assimilating the bypass into the landscape and soften the impact of the road on the gap, beyond what could be achieved from constructing the bypass alone.

Development Potential

- 5.9 Paragraph 3.24 of the consultation document identifies high-level development principles and

requirements. Hallam support these intended outcomes and these have underpinned their proposals for a mixed-use masterplanned development.

- 5.10 Work undertaken over a long period of time has identified the suitability of the land controlled by Hallam to accommodate new development, how development can be arranged and the extent of mitigation required.
- 5.11 In our response to the 2019 Issues and Options consultation, we identified potential areas for development in this location and for convenience we have attached this at *Appendix 1*. Whilst this considered only land which Hallam control, we recognise that there are other smaller scale development opportunities within the general location, and that the Borough Council intend to work with landowners and site promoters to develop a Council-led masterplan which will focus on the delivery of community benefits as part of Good Growth. In this context, Hallam are committed to working with the Council and others to develop these proposals further as part of a co-ordinated approach.
- 5.12 A development scheme could comprise the following:
- Approximately 1,200 units
 - a new healthcare facility
 - a primary school
 - a care home
 - community hub
 - local shops
 - sports hub and
 - Green Infrastructure to include public open space, equipped areas of play, Sustainable Drainage Systems (SuDS), tree, hedge and shrub planting, meadows, structural woodland planting, allotment gardens and permissive footpaths and cycleways.
- 5.13 Development would be accessed from a primary and secondary access from Longfield Avenue, along with associated improvements to the existing Long field Avenue/Bishopsfield Road junction and carriageway and a primary access from Peak Lane.
- 5.14 An outline planning application for such a proposed development was submitted in June 2020 and is presently undetermined.

Accessibility and Movement

- 5.15 The accessibility advantages of this location enables positive promotion of active travel. The proposed development will be served by an internal network of footways and access arrangements that can be utilised by both pedestrians and cyclists. The site is surrounded by Public Rights of Way (PRoW) that in turn can serve as cycle/walking connections from the site to other roads in the vicinity of the site. These will be maintained and improved in order to encourage more sustainable modes of travel as an alternative to the conventional car.
- 5.16 Bus based public transport is also a feasible means of sustainable travel from this location. Service provision on the route number X5 operated by First Group provides opportunity for peak commuter travel and also for off-peak travel. The scale of development proposed is

sufficient to deliver dedicated public transport coverage between the Site and key destinations that will have the frequency and reliability to attract patronage to secure long term viability. Any improvement will be discussed with the necessary stakeholders, but it is envisaged that the development will support the introduction of new services.

- 5.17 The Eclipse Busway - a Bus Rapid Transport scheme between Fareham and Gosport opened in 2012 providing a priority public transport route connecting the two towns. The BRT scheme provides a more efficient service using new, comfortable, low-emission buses that encourages bus travel through enhancing the bus travel experience. Using the new busway, buses are able to avoid congested parts of the highway network including A32 so that passengers can benefit from reliable journey times and can plan their onward travel connections.
- 5.18 A number of new highway improvements works have been implemented or are currently under construction which is intended to improve bus journey reliability, and encourage more people to switch from car travel to using the bus. This would have an effect of helping reduce traffic numbers and traffic congestion between Fareham and Gosport, including along Newgate Lane.

Nitrates

- 5.19 The land is located directly west of the edge of urban area that forms part of the designated Chichester, Langstone and Portsmouth Harbours Eutrophic NVZ (TraC) (Nitrate Vulnerable Zone). The land is currently predominantly arable farmland with a history of mixed crops such as wheat, barley, oats, rape etc. and break crops such as peas, winter oil seed rape and beans.
- 5.20 The above is recorded on a Nutrient plan detailing fertilizer types, tonnages and time applied for each individual field. The fertilizer applied during the period of record is a mix of pig and farm yard manures.
- 5.21 It is recognised that intense farming with fertilization with natural manures will lead to nitrate leaching into the surrounding surface water and ground water environment.
- 5.22 Through development of the land, the leeching of nitrates through farming activities will be curtailed. While there will be a new source of nitrate production and leachate associated with the new development, this is considered to be at worst a neutral impact and through further assessment a net reduction in nitrate leaching can be achievable.

Biodiversity

- 5.23 The Hallam land is divided into two areas by Peak Lane; the eastern area comprises largely of arable land with hedgerows and ditches forming the compartmentalisation typical of the surrounding arable tenure and has limited nature conservation value. The western compartment consists of a large area of set aside land, with areas of arable crops, which are bound by limited hedgerows and tree lines.
- 5.24 The most significant habitat is Oxleys Coppice which is designated as a SINC and an area of ancient and semi-ancient woodland (ASNW), which has been evaluated as county level conservation value. The Scheme can ensure that Oxleys Coppice is protected.
- 5.25 Hedgerows are mostly classified under the Hedgerow Evaluation Grade System (HEGS) as moderate and moderate/high value. Only two hedgerows are classified as 'important' under the

Hedgerow Regulations (REGS). Several drainage ditches are found through the Site but only have limited marginal and aquatic vegetation. These are classified as no more than local conservation value.

- 5.26 Surveys have identified the presence of a number of protected species, bats and breeding birds. Measures to safeguard these species and their habitats can readily be accommodated as part of the development proposed. The habitats created and the species which will benefit from the mitigation measures proposed in the Site will lead to an overall beneficial effect in the long term. Similarly, in accordance with the Solent Waders and Brent Goose Strategy, a financial contribution will be made to this, based on the classification of land's suitability for supporting such species.
- 5.27 The Solent & Southampton Water Ramsar/SPA, which also includes Titchfield Haven SSSI, is approximately 700m from the Site. Portsmouth Harbour Ramsar/SPA/SSSI is located approximately 1.3km to the east of the Site at its nearest point, which also support a variety of habitats and an assemblage of dark-bellied brent geese. The Solent Maritime SAC extends from the River Hamble mouth up to Botley in the west, this is approximately 4.7km west of the Site.
- 5.28 There is the potential for a Likely Significant Effect on the Solent SPAs from an increase in recreation from new housing development within a 5.6km zone of influence of the Solent. As a result, an Interim Solent Recreation Mitigation Strategy was published in 2014 to enable initial mitigation measures to be placed, so LAs could continue to grant permission for new homes. The strategy has been updated to form the basis for future new housing up to 2034, with the Bird Aware Solent Recreation Mitigation Strategy (2017).
- 5.29 As this Site falls within the established zone of likely significant effect (5.6km), a HRA/AA will be required by the LPA; however a site specific Test of Likely Significance will be provided to facilitate the LPA assessment. The mitigations measures required to facilitate the Proposed Development will see a financial contribution provided for the in-combination effects on the Solent SPA, with additional bespoke mitigation provided within the Site to mitigate for the alone effects.
- 5.30 The details of bespoke mitigation are to be discussed with Natural England. Current proposals will include an area of County Park/Green Infrastructure to the west of Peak Lane, measuring approximately 23ha, which will include a circular walk, car park and habitat features to provide point of interest, as well as safe areas for dogs to be exercised off the lead. Alternative areas of GI will be provided around the main residential areas to the east of Peak Lane, here approximately 32ha will be provided, which will incorporate recreational opportunities and areas of biodiversity net gain.
- 5.31 The mitigation measures provided within the Site will ensure that there are no likely significant effects on the Solent alone and in-combination with other schemes within Fareham.

Strategic Gap

- 5.32 The current Core Strategy designates land between Fareham and Stubbington as a Strategic Gap. This follows such a designation being contained within earlier Development Plans; Settlement Gap policies in Hampshire date back at least 30 years when they were included within the South and Mid Hampshire Structure Plans (1988 and 1989). They were carried forward into the Hampshire County Structure Plan 1994 and the Hampshire County Structure

Plan 1996-2011. Consequently, with each new development plan needing to make provision for current and future development needs, the role and function of gaps need to be considered having regard to up to date circumstances.

- 5.33 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. As described earlier, this new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. Such a conclusion is similar to the assessment undertaken by Hallam previously.

Summary

- 5.34 Hallam support the identification of the Strategic Growth Area to the South of Fareham and have identified a development scheme that achieves the high-level development principles and requirements set out in the consultation document.
- 5.35 Importantly, development in this location can be brought forward that provides new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.
- 5.36 The merits of this location are substantial, and carefully planned development will not result in the coalescence of Fareham and Stubbington and the separate identities of these settlements can be retained.
- 5.37 As such, the allocation of land at South Fareham in the Local Plan for future development is considered wholly appropriate.

6 Policy NE5 and Policies Map

- 6.1 The Policies Map includes designations relating to Waders and Brent Geese and are associated with Policy NE5. This designation covers four categories of land – Core and Primary Support Areas, Secondary Support Areas, Low Use Areas and Candidate Areas.
- 6.2 The extent to which the land concerned is used by Waders and Brent Geese, particularly beyond the Core Areas, is transitory and can differ from time to time as a consequence of changes in agricultural practices (for example, arable land with wintering cereals provides an optimal foraging resource, whereas when this is replaced / succeeded by grassland habitats its function can change, which could affect species assemblages and regularity it is used. Changes in land use also promote further recreational uses which is the case for areas west of Peak Lane) or changes to the extent of the built environment (for example newly built structures, such as the Stubbington Bypass, will change the suitability of a location in proximity to it as a receptor). Therefore, to delineate these areas in the manner shown on a Policies Map, which affords permanence to the designation, fails to take account of the potential changes in circumstance and is not sound as a matter of principle.
- 6.3 The practical effect of this is that Policy NE5 directs the decision-maker to consider development proposals against the criteria listed therein and the status of the land by reference to the designations shown on the proposals map, which may at that point in time no longer be up-to-date or relevant.
- 6.4 Through Hallam's work in respect of the land to the South of Fareham, and through discussion with Natural England, it has identified a different classification to that shown on the Policies Map for certain of those parcels of land, as shown on *Appendix 2*. This illustrates how the application of Policy NE5 could misdirect the decision maker.
- 6.5 On this basis, these designations should not be shown on the Policies Map in the manner they are presently.
- 6.6 A more generic designation such as Areas of Waders and Brent Geese Sensitivity, which does not classify individual land parcels, would be more appropriate.
- 6.7 It would follow that Policy NE5 would be amended to require planning applications to assess and determine the use of land subject to those development proposals and at that point, when an up to date classification has been determined, the criteria and mitigation in Policy NE5 would apply.

7 Summary

- 7.1 These Representations have been prepared on behalf of Hallam Land Management Limited (Hallam), who control a substantial tract of land to the South of Fareham, adjoining the existing urban area and Stubbington Bypass, the construction of which has recently commenced.
- 7.2 This land was identified in the Local Plan Supplement 2020 as a potential Strategic Growth Area. Whilst the Regulation 19 Plan does not propose to carry forward the South of Fareham Strategic Growth Area, as is evident from these representations the need for such an allocation has not diminished.
- 7.3 The consultation document rightly identifies the Borough Council's commitment to meet the Borough's housing need by the end of the plan-period. This is plainly aligned with the NPPF and the Government's objectives. What is notably absent from the Vision and Strategic Priorities, is the recognition that Fareham is important in a sub-regional context and was previously intended to provide significant development land at Welborne to meet wider needs.
- 7.4 Policy H1 is not founded on a sound basis. In preparing and publishing this Regulation 19 Plan, the Borough Council has afforded greater weight to a potential revision to the Government's Standard Method and has disregarded the published and established measure of local housing need which has underpinned its work to date. Unless and until the Government publish a revision to the Standard Method, this version of the Plan cannot be submitted for Examination as it is plainly unsound. The Borough Council recognise this from its Committee Papers.⁸ This is nothing other than a "wait and see" Plan.
- 7.5 Only if the Standard Method is published in the same final form will the Plan be able to proceed – there is no indication if or when the Government intend to complete this exercise given the significant scrutiny it has attracted.
- 7.6 A more positive approach would have been to retain the higher level of housing as the basis of the Plan to provide surety over a long term with policy measures to manage housing supply in the event the level of local housing need was reduced. Unfortunately, the Council hasn't considered this as an option or a reasonable alternative in the Sustainability Assessment.
- 7.7 Even in the event the proposed revision to the Standard Method were confirmed as the Plan assumes, there is little if any evidence of a cogent understanding of the level of unmet need across neighbouring authorities. There is no apparent evidence of effective co-operation to justify the contribution the Plan proposes to unmet need.
- 7.8 Moreover, the Council hasn't applied its mind to the level of housing that been achieved since the Standard Method was introduced at the start of the plan making process and the date the plan is to be adopted. Viewed objectively, housing completions over that three year period were below the level of local housing need and this shortfall, which is part of a much greater shortfall when compared to the Core Strategy's housing intentions, should be accounted for.
- 7.9 Turning to housing supply, the assumption that Welborne will provide 4000 new homes within the plan period is not founded upon evidence previously produced by the Council and the level

⁸ Executive Briefing Paper 12th October 2020, para 12

of housing output assumed is at a level the Council previously considered unrealistic.

- 7.10 The windfall assumption drawn simply from past trends has not justified why this is a source of future supply. Uncertainties also exist in relation to a number of the proposed allocated sites because of landownership, extent of existing uses and location.
- 7.11 For all of the above reasons, the Plan's approach to housing will fall short of its Vision and Strategic Priorities. Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to housing supply, additional housing land should be allocated for development.

South of Fareham

- 7.12 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town. Similarly, Fareham is an important economic centre, including the Solent Enterprise Zone at Daedalus to the south of the town.
- 7.13 It is considered that development to the south of Fareham would be in a sustainable location, with good access to walking, cycling and public transport links, as well as local services and amenities. This location adjacent to the existing urban area creates a good opportunity for a natural and sustainable extension to the urban area. Development in south Fareham would deliver homes close to an important source of new employment and jobs at Daedalus.

Strategic Gap

- 7.14 The current Core Strategy designated land between Fareham and Stubbington as a Strategic Gap.
- 7.15 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. This new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. The delineation of the Strategic Gap on the Policies Map should be amended accordingly.

Proposed Modifications

- 7.16 The following Modifications are considered necessary for the Local Plan to be sound:
 - 7.16.1 The minimum housing requirement in Policy H1 to be defined by reference to the existing Standard Method;
 - 7.16.2 The housing requirement be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;

- 7.16.3 The level of unmet need that is accommodated be based on constructive, active and on ongoing engagement with neighbouring authorities;
- 7.16.4 Assumptions about the delivery of new housing at Welborne be revisited and revised down;
- 7.16.5 The windfall allowance be revised down;
- 7.16.6 Alternatively, to 6.16.4 and 6.16.5 the level of contingency be increased;
- 7.16.7 Additional housing allocations be provided for;
- 7.16.8 Land South of Fareham is allocated for housing development; and
- 7.16.9 Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood is amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- 7.16.10 The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

- 4) Rookery Farm: Phase II Geo-Environmental Site Assessment 2018

1.0 INTRODUCTION AND SUMMARY

1.1 Southern Planning Practice are instructed by Raymond Brown Minerals & Recycling Ltd (Raymond Brown), to submit representations to the Regulation 19 version of the Fareham Local Plan 2037. Raymond Brown is acting on behalf of the two landowners, Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd (please see attached land ownership plan).

1.2 Raymond Brown is part of the Raymond Brown Group, a leading recycling and waste management business and distributor of primary and recycled aggregates for use in construction applications. One of their sites is at Rookery Farm, Fareham. The land is located immediately north of the M27 motorway and to the west of Whiteley. Access is from Botley Road, approximately 100m north of the bridge over the M27.

1.3 The Local Plan, as drafted, is assessed to be UNSOUND and also fails to comply with the Duty to Co-Operate. These representations set out the reasons why: -

1. the Plan is considered to be UNSOUND and
2. fails to comply with the Duty to Co-Operate

and sets out the steps that require to be taken to make the Plan SOUND.

1.4 Separate representation forms have been submitted against each policy and paragraph which is considered to be UNSOUND, but the case to be made is set out in full in this document.

1.5 In summary, OBJECTION is raised to Strategic Policy H1 Housing Provision on the grounds that the figures promoted are not soundly based or justified. This is addressed in detail in Section 2.0. Objection is also raised to the allocation of a number of the housing sites in that they are not suitable, and /or available and/or achievable, particularly within the Local Plan period. This is addressed under Section 3.0.

1.6 Section 4.0 sets out why Land at Rookery Farm should be allocated as a Housing Site to start to address the issues identified in Sections 2.0 and 3.0. Section 5.0 draws these matters together with consideration of modifications that are required to be made to the Plan

to ensure that it is SOUND and will provide a sound planning framework to deliver the much needed housing over the Plan Period.

1.7 It is concluded that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.

1.8 Objections are therefore raised to Policies H1, FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13 and the omission of an allocation for housing for Rookery Farm, Botley Road, Fareham. Objections are also raised to paragraphs 3.19 (including Figure 3.1) as well as paragraphs 4.1 – 4.20 including Tables 4.1, 4.2 and 4.3.

2.0 OBJECTION to Strategic Policy H1 – Housing Provision

Overview

2.1 The objections to this Policy are several and are addressed individually below. The individual and cumulative failings render the policy UNSOUND and as Strategic Policy H1 forms the basis for the provision of much needed housing across the whole Borough, it follows that the whole Plan is rendered UNSOUND. It should be noted that although the issues have been subdivided into several sections, many of the issues interrelate and cumulatively exacerbate the conclusions drawn that the Council is failing to provide properly for its housing need.

2.2 The objections to this Policy include:

- (i) The Housing Numbers used and in particular the reliance on the draft Standard Method set out in the Changes to the Current Planning System in the Government’s White Paper;
- (ii) Duty to Co-Operate and Unmet Need – Fareham has not undertaken this Duty in a sound manner;
- (iii) Additional factors Contributing to the Shortfall, including the 5 year Housing Land Supply Position;
- (iv) Over-reliance on Welborne to provide a significant proportion of Fareham’s housing which is considered unachievable, resulting in a need for more sites to be allocated;
- (v) Inability to meet the identified Affordable Housing Provision;
- (vi) Over-reliance on Windfall allowance

2.3 Before analysing the approach adopted by Fareham, it is first worth reviewing the clear guidance on the approach to be followed as set out under the National Planning Policy Framework (NPPF) and the Planning Practice Guidance (PPG). It is important to note that the NPPF makes it clear that “*strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas*” (Paragraph 11).

2.4 Paragraph 60 builds on this and states that “*To determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional*

circumstances justify an alternative approach which also reflects current and future demographic trends and market signals. In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for." This clarifies how the housing numbers calculated by the standard method should be considered when preparing a Local Plan. Paragraph: 004 (Reference ID: 2a-004-20190220) of the Planning Practice Guidance confirms that the standard method should be used to calculate a **minimum** (emphasis added) housing need figure.

2.5 In addition to the Borough's own housing needs, as acknowledged by the draft Local Plan, its housing figure needs to incorporate the needs of neighbouring authorities. Paragraph 35 a) of the NPPF sets out that in order for a plan to be sound it must be positively prepared "*providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs (our emphasis); and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development*".

2.6 The following sections demonstrate how Fareham has failed to follow this clear guidance with the result that Strategic Policy H1 and the Plan is UNSOUND.

i) **Housing Numbers: Reliance on the Standard Method set out in the 'Changes to the Current Planning System' White Paper.**

2.7 The Publication Draft correctly points out at Para 4.2 that '*Local housing need should be determined by using the Standard Method set out in national Planning Practice Guidance (PPG). This Method currently combines 2014-based household projections with affordability data released in March 2020 to calculate the annual need. Using this method, the housing need for Fareham currently stands at a minimum of 514 dwellings per annum (dpa).*'

2.8 Fareham, however, has chosen to use the new Standard Method set out in the 'Changes to the Current Planning System' White Paper, which was published on 6th August 2020 with consultation closing on 1st October 2020.

2.9 Para 4.2 of the Publication Draft explains why the Council has 'jumped the gun' and used the draft new Method:

'The Council therefore considers it appropriate for this Publication Local Plan to plan for a scale of growth based on the proposed new Method, and not one based on out-of-date household projections. This reduces the housing need figure to 403 dpa, based on a base date of 2021. The new Method would be introduced with a change to the PPG and the timing of submission of this plan for examination will be determined by the precise wording of the government policy.'

- 2.10** ON 16 DECEMBER 2020, GOVERNMENT ANNOUNCED THEIR RESPONSE TO THE 'CHANGES TO THE CURRENT PLANNING SYSTEM' WHITE PAPER AND PUBLISHED REVISED PROPOSALS FOR ENABLING THE DELIVERY OF MORE HOMES ACROSS ENGLAND. IT IS UNDERSTOOD THAT GOVERNMENT WILL NOT NOW PROCEED WITH THE DRAFT NEW STANDARD METHODOLOGY ANNOUNCED EARLIER IN THE YEAR AND ON WHICH FAREHAM HAS BASED ITS HOUSING NUMBERS. INSTEAD, THE GOVERNMENT HAS ANNOUNCED THAT IT WILL CONTINUE TO RETAIN THE STANDARD METHOD IN ITS CURRENT FORM WITH THE ADDITION OF A 'TOP-UP' APPLICABLE TO ENGLAND'S 20 LARGEST CITIES. PLEASE SEE LINK:

<https://www.gov.uk/government/consultations/changes-to-the-current-planning-system/outcome/government-response-to-the-local-housing-need-proposals-in-changes-to-the-current-planning-system>

- 2.11** It follows that the only basis that Fareham can and should proceed at the current time is to use the existing Standard Method which would result in an uplift in its dwellings per annum (dpa) from 403 to at least 514.

ii) Duty to Co-Operate and Unmet Need from Neighbouring Authorities

- 2.12** Fareham Borough Council is a member of the Partnership for South Hampshire (PfSH). In September 2019, Fareham Borough Council and Havant Borough Council together with all the authorities of the PfSH published a Statement of Common Ground (SOCG). The SOCG sets out how the local authorities in South Hampshire have successfully worked together on strategic planning matters and how they continue to do so. As part of the Local Plan Review, a Statement of Compliance with the Duty to Cooperate has been produced. This is in accordance with Paragraph 24 of the NPPF. This confirms that the Council is proposing to

take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution (Paragraph 4.6).

- 2.13** Fareham Borough Council is identified as being within the Portsmouth Housing Market Area (HMA). The PfSH Strategic Housing Market Assessment (SHMA) indicates an overall objectively assessed need figure of 121,500 dwellings, over the whole PfSH area from 2014-2036. It should be noted that the SHMA was prepared in January 2014 and the identified housing need is not based on up to date figures, therefore its housing numbers are considered to be out-of-date. The SOCG acknowledges that the housing need figures within the PfSH Spatial Position Statement (SPS) (2016) are not in accordance with standard methodology set out in NPPF (2019). The SPS is being reviewed to bring it in line with updated development needs. However, there is no indicative timescale for the SPS review and given the recent Housing White Paper, such a statement is unlikely to come out ahead of the submission of the Fareham Local Plan.
- 2.14** One key issue arising for the PfSH Portsmouth HMA/PfSH East (Portsmouth, Havant, Fareham, Gosport, Winchester) is the challenge of delivering sufficient homes to meet the housing need of the area given the significant geographical constraints and nationally important environmental and landscape designations. It is acknowledged that some authorities within the PfSH East area are more constrained than others. Portsmouth, Havant and Gosport are all physically constrained as well as having coastal environmental designations, to varying degrees. Therefore, as Fareham Borough is less constrained and physically has the space to provide housing in addition to its own need, the Borough should look to accommodate unmet need from neighbouring authorities.
- 2.15** It is acknowledged that Portsmouth cannot meet its housing need and a key role of PfSH has been to consider the capacity of other local authorities in the PfSH area which could contribute to accommodating the unmet need arising from Portsmouth. As acknowledged, Fareham Borough has relatively few constraints compared to its neighbouring authorities, indeed Fareham Borough has been identified as an area which can help to accommodate the unmet need arising from Portsmouth. Paragraph 4.5 of the Publication Plan confirms that Portsmouth City Council have asked Fareham to contribute 1,000 dwellings to their unmet need. It also confirms that there is likely to be an unmet need arising from Gosport and Havant (this is now emphasised in Table 1, if the standard new method were applied). However, Fareham have only included 847 dwellings in the total housing requirement to

contribute to the unmet need of neighbouring authorities. This figure is alone not enough to provide for Portsmouth's unmet need, never mind the other authorities within the PfSH East area. It is evident therefore that the plan is not appropriately planning for unmet need arising from neighbouring authorities and has not been positively prepared in accordance with paragraph 35 a) of the NPPF. It is therefore unsound.

- 2.16** The following table looks at the housing need per annum for all the authorities within the PfSH East area. It sets out the current local plan requirement, the average delivery rate over the last 3 years, the housing figure under the current standard methodology and the housing figures under the proposed new standard method set out in the August 2020 consultation 'Planning for the Future' White Paper. It should again be noted that Fareham Borough Council are using the housing need figure calculated by the proposed new standard method set out in the White Paper, not the current standard method required by the NPPF.

PfSH East	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard method	Proposed new standard method (at August 2020)	Change in housing requirement under SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1,025	+333
Total	1,804	1,828	2,802	3,430	+628

Table 1 – Housing need per annum and delivery rates for authorities within PfSH East

- 2.17** It is also pertinent to note that whilst Fareham has chosen to adopt the draft new Standard Methodology for its own figures, it has not acknowledged the implications arising in terms of the Duty to Co-operate and that there is a significant uplift overall in the housing requirements, including for those authorities potentially already struggling, including Havant and Gosport.

2.18 In Summary:

- No Local Authority in the PfSH East area is currently planning for enough homes to meet their identified need.
- Whilst the housing need as calculated by the proposed new standard method (August 2020) for Portsmouth and Fareham has slightly reduced from the current standard method, the housing need for Gosport, Havant and Winchester has significantly increased. This has resulted in an increase of just over 600 dwellings per annum in the PfSH East area.
- No Local Authority in the PfSH East has been able to deliver their housing need as required by the current standard method in the last 3 years.
- The total housing need in the PfSH East area under the proposed new standard method is far higher than the previously identified housing need.

iii) Additional Factors affecting Fareham's Housing Numbers

2.19 Table 1 (Housing need per annum and delivery rates for authorities within PfSH East) confirms that no Local Authority in the PfSH East area has been able to deliver their housing need as required by the current standard method in the last 3 years. There could be several explanations for the authorities not meeting their housing need including reliance on large sites not coming forward or delivering at the rate they should, not appropriately planning for the homes they need and the recent Solent nitrate issue could all be contributing factors.

2.20 In June 2020, Fareham published their 5 year housing land supply position. At this time, Fareham had a supply of 2.72 years. This supply obviously falls substantially below the government's requirement of a 5 year supply, as set out in Paragraph 73 of the NPPF. After reviewing the housing supply, as set out in the 5 Year Housing Land Supply Report, it is apparent that the Council remains reliant on a few large housing sites coming forward to contribute to the housing land supply in future years.

2.21 As such, Fareham Borough Council should look to bolster their supply through the allocation of a range of sites as encouraged by the NPPF.

2.22 To be able to meet the increased housing needs in a sustainable manner, and to maintain a 5 year supply of deliverable housing sites across the Plan period, the Council must look to

all tier settlements in the hierarchy to deliver homes through a range of sites. However, it should be noted that strategic sites should not be solely relied on due to lengthy lead in times. Instead, a mix of housing sites should be sought and allocated to enable a 5 year supply to be achieved and maintained.

2.23 In addition to bolstering the supply going forward, Fareham need to seek to address the backlog of unmet need. In particular, the South Coast Nitrate crisis put thousands of homes on hold for some time to resolve the eutrophication issues of the Solent to reduce impact on the protected habitats and species. The Nitrate Neutrality Update Report to PfSH Joint Committee (14 October 2019) acknowledged that *“given that there is a severely reduced number of permissions being granted in the PfSH in the financial year 2019/20, it is not unnecessary to assume that the delivery of homes will be suppressed in the years 2020/21 and 2021/22.”*

2.24 The submission Local Plan is very conservative in its ambitions for growth in the Borough, especially considering it is under a Duty-to-Cooperate to meet neighbouring authorities’ unmet need. It does not allocate many new sites and instead relies heavily on sites that have been allocated previously. Strategic Policy H1 confirms this, as the provision for 8,389 homes comprises the following:

- 552 homes already with planning permission
- 4,858 homes on sites with resolution to grant permission (Welborne contributes the large majority of these homes)

2.25 Therefore, around 65% of the housing provision already has planning permission or resolution to grant, meaning the Local Plan only allocates sites for approximately 1,750 homes for development over the plan period despite only 2.72 years of housing land supply and a record of under delivery in the Borough. It is of note that nearly 50% of the housing provision is reliant on the Welborne allocation. If this allocation is not to come forward in the plan period due to funding issues, or be significantly delayed, Fareham’s housing provision will be significantly reduced and identified housing needs will not be met. As such, the emerging Local Plan MUST look to allocate further sites accordingly.

2.26 Reflecting the above the application of a 15% contingency as shown under Table 4.3 and explained at paragraph 4.12 of the Plan appears woefully inadequate.

iv) Over Reliance on Welborne Garden Village

- 2.27** Fareham is relying very heavily on one strategic site to deliver almost 50% of its housing provision, namely Welborne Garden Village. Of the supply identified in Table 4.2 relating to Strategic Policy H1, some 4,020 of the overall provision of 8,389 is to come from this one strategic site. This is flawed and potentially undeliverable. Following a resolution to grant planning permission in October 2019 for the outline planning application under Ref: P/17/0266/OA, the Section 106 agreement has still not been signed and therefore planning permission has not yet been issued. According to the Council's website and details held on the outline planning application, a decision is due by 8th January 2021.
- 2.28** The Delivery Report¹ on Welborne Garden City sets out that up to 750 homes will be delivered in the first 5 years. However, this figure appears highly unrealistic and unachievable as set out in more detail below; in addition, the site cannot be developed until funding is secured for Junction 10 of the M27.
- 2.29** On 14 January 2020, Hampshire County Council published an Executive Decision Record on the M27 Junction 10. It confirmed that the progression of work on the Full Business Case is at an impasse, and it is understood that HCC were terminating the role as scheme promoter to avoid abortive work or expenditure, pending resolution of funding and delivery arrangements of the scheme.
- 2.30** The delivery of the Garden City is suggested to be over a 20 year period, with on average 300 dwellings a year being completed. It would be expected higher delivery in early years, lower delivery in later years. As acknowledged, the submission Local Plan relies on approximately 4,000 homes from Welborne coming forward in the plan period.
- 2.31** With regards to the delivery of the site, a key point of note is in the Council's latest 5 year Housing Land Supply (HLS) Position Statement (June 2020). This statement sets out, at paragraph 29, that the site promoter anticipates commencements/completions at Welborne to occur approximately two years later than that set out within the information supporting the

¹ Page 83 of the Delivery Document <https://welbornegardenvillage.co.uk/delivery/>

planning application. It is acknowledged that the site promoter has advised the Council of the following anticipated delivery rate:

- 30 dwellings in 2022-23
- 180 dwellings in 2023-24
- 240 dwellings in 2024-25

2.32 The above figures indicate that Welborne can only deliver 450 homes in the next 5 years, up to 2025. This is already a significant drop from the figure set out in the original planning application which was suggesting the delivery of 750 homes within 5 years of commencement. If Welborne can only deliver 450 homes in the next 5 years, it seems an impossible task to deliver the remaining circa 3,550 over the remaining 12 years of the plan period.

2.33 In addition, given the current lack of funding for the access, the anticipated delivery seems highly unlikely and this will have a dramatic effect on Fareham's 5 year HLS and securing its overall housing provision. Therefore, it is considered that relying on one site to deliver a significant number of houses is a high risk strategy. As such, a greater range of sites should be considered.

v) Affordable Housing

2.34 Paragraph 4.3 of the draft Local Plan confirms that '*The need for affordable housing in the Borough is based on the number of existing and newly formed households who lack their own housing and cannot afford to meet their housing needs in the market*'. The Council goes on to state that it is confident that it will meet its affordable housing needs through the provision based on its Policy HP5 and it does not need to make any further adjustments to its overall housing figures.

2.35 However, paragraph 5.29 of the draft Local Plan indicates that one of the key issues facing residents in the Borough is the unaffordability of homes to buy or to rent, and that therefore the delivery of homes that are affordable is a priority. The Council's Affordable Housing Strategy 2019 – 2036 (2019), as referenced at paragraph 5.30 of the draft Local Plan, indicates that there is a need for some 3,500 affordable homes up until 2036. It is not clear how the housing number can and will meet the identified affordable housing demand.

2.36 Key concerns include:

- The reliance on the number of houses, including affordable housing, to be delivered by Welborne. The very real concerns over the deliverability of housing from Welborne has already been addressed; the issues identified have a consequential impact on the delivery of affordable housing;
- The heavy reliance in terms of the overall housing provision on windfall sites, many of which are likely to fall under the threshold of 10 or more dwellings and therefore not deliver any affordable housing;
- The reliance on a range of allocated sites (Section 3) which appear to be aspirational rather than realistic and therefore again the impact on the provision of affordable housing.

2.37 The Council fully recognises its substantial affordable housing need across the Borough over the Plan period but it is simply not at all clear that the numbers required can be met under the housing provision being made. It is therefore concluded that the very clear potential that the need for affordable housing in the Borough will not be met leads to a need to increase the overall housing requirement.

vi) **Windfall Allowance**

2.38 Part of the Housing Provision is to be met through unexpected (windfall) development. There is no issue in principle with including an allowance for windfall development, but that figure must be realistic and based on evidence.

2.39 The NPPF defines windfall sites as 'sites not specifically identified in the development plan'. Paragraph 70 of the NPPF sets out that where an allowance for windfall sites is to be made, there should be compelling evidence that they will provide a reliable source of supply, using the strategic housing land availability evidence, historic windfall delivery rates and expected future trends to support such an allowance.

2.40 In this case the Council is relying on 1,224 new homes to come through windfall development out of total of 8,389 new homes. Whilst it is appreciated that the methodology for calculating windfall allowances have changed over time, it is worth noting that in the current adopted Local Plan Part 2: Development Sites and Policies (2015), the average historic windfall

allowance was calculated to be 20 (Appendix F). In the 5 Year Housing Land Supply Position Paper to Planning Committee on 24 June 2020, the Council included a small site windfall allowance of 37 dwellings for each of 2 years (years 4-5).

- 2.41 In the draft Local Plan the reliance on windfall sites has jumped to 1224 which if crudely divided by the length of the Plan period (16 years) gives an annual figure of 76.5. There is no explanation to justify such an over reliance on windfall figures.

Conclusions in respect of Strategic Policy H1

- 2.42 It is clear that there are fundamental concerns over many aspects of the Council's housing provision which have been explored in this Section. There can only be one conclusion that the provision is woefully inadequate and is **UNSOUND**.

3.0 Analysis of Housing Allocations

- 3.1** The Council has allocated and is relying on a number of ‘development’ sites to assist in the delivery of and in meeting its housing provision. However, the suitability, availability and achievability of several of these sites needs to be questioned and whether they can and will deliver the number of units proposed. It is acknowledged that these sites are not proposed for delivery of housing numbers in the early years of the Plan but it must still be questioned whether there is sufficient confidence that these sites will be brought forward, that they should be included in the plan.
- 3.2** This analysis has only focussed on the medium to larger of the sites, most of them proposing to bring forward in excess of 50 units and there may well be serious issues of suitability, availability and achievability with some of the smaller sites. It is noted that at least 9 of the sites are indicated to make provision for less than 10 units. It is unusual for sites yielding such a small number of units to be included as specific allocations; it begs the question as to whether the Council has needed to bring in such small sites to secure its numbers.
- 3.3** The number of sites where there are serious concerns and questions over their suitability, availability and achievability total at least 6, which in total would provide some 400 – 500 residential units. These sites are addressed below, and the order selected simply follows the order in which they are listed on pages 39 – 40 of the draft Plan and then considered in further detail under site specific policies.

FTC1 Palmerston Car Park (Indicative Dwelling Yield: 20) (SHELAA ref: 3233)

- 3.4** This is a constrained town centre car park site and the development of housing will be constrained by issues of noise and disturbance from the surrounding roads as well as the service access to the Shopping Centre. The setting of the adjacent Osborn Road Conservation Area to the north will need to be preserved. The Council is keen, under other policies to safeguard and promote Fareham town centre as its principal town centre but there appears to be no co-ordinated car parking strategy to ensure that the loss of existing car parking sites will not compromise those objectives.

- 3.5** At the very minimum the proposal that this site can deliver up to 20 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC2 Market Quay (Indicative Dwelling Yield: 100)
(SHELAA ref: 1425)**

- 3.6** This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 60 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 100 units. The site is also expected to deliver approx. 4000 sqm of commercial leisure space together with a new multi storey car park and new town square. The future and viability of town centre strategies may need a comprehensive review in a post Covid era. The site specific requirements also make reference to the possibility of a hotel which presumably, if brought forward, would impact on the achievement of other elements of the proposal, including the residential. There is no indication that there is any real prospect of bringing the site forward over and above aspirational objectives.
- 3.7** At the very minimum the proposal that this site can deliver up to 100 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC3 Fareham Station East (Indicative Dwelling Yield: 120)
(SHELAA ref: 0211)**

- 3.8** There are fundamental questions about the suitability and achievability of this site for the intended development. This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 90 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 120 units. Such an ambitious scheme would appear to depend on a comprehensive approach, particularly given the limited access options. Yet, even the SHELAA assessment identifies that the site is in multiple commercial and industrial uses, including railway related uses which brings into question site assembly issues both in terms of achievability and timing.

- 3.9** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC4: Fareham Station West (Indicative Dwelling Yield: 94)
(SHELAA Ref: 0212)**

- 3.10** This is a long and very narrow site sandwiched between the railway to the east and protected trees to the west. The allocation and the SHELAA recognise the multiple constraints facing this site in terms of bringing it forward for development. These constraints include, amongst others, the multiple uses existing on the site, the access constraints including that the existing access crosses land in Flood Zone 2, noise, contamination and amenity issues.

- 3.11** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC5: Crofton Conservatories (Indicative Dwelling Yield 49)
SHELAA Ref: 1325**

- 3.12** This site continues to be in active retail use, following the expiry of a temporary permission for retail use and the potential availability of the site is questioned.

**HA7: Warsash Maritime Academy (Indicative Dwelling Yield 100)
SHELAA Ref: 3088**

- 3.13** This site has a long history and has been carried forward from the Local Plan Part 2. The site faces considerable issues in terms of bringing forward a suitable and viable housing development, not least of which is that the western part of the site must be excluded from development because of flooding issues and discussions with Natural England would potentially exclude further land to secure appropriate buffers to sites of international nature conservation significance. As a result, the majority of the development and residential units

would necessarily be brought forward through the conversion of the existing listed buildings on site, potentially impacting on viability.

- 3.14** The site lies in the countryside and is remote from shops and facilities. There are traffic problems along Newton Road which is the only access solution leading to Warsash Centre and up to Park Gate where permission exists for some 800 residential units.
- 3.15** The viability and achievability of this site for some 100 residential units must therefore be questioned.
- 3.16** Due to the ecological and highway issues the Council has determined that any planning application should be submitted with an EIA.

HA13 Hunts Pond Road (Indicative Dwelling Yield 38)

SHELAA Ref: 305

- 3.17** Under the Local Plan Part 2 this site was allocated under Policy DSP53 for Community Uses as part of a larger scheme to include education and open space. It is understood that the site is no longer required by Hampshire County Council for educational purposes, but there is no confirmation that a proper assessment has been undertaken of the continued need of this land for local community uses.

HA4 Downend (Indicative Dwelling Yield 350)

SHELAA Ref 3030

- 3.18** Site HA4 at Downend for some 350 residential units has been the subject of two planning applications both of which were refused against officer recommendation. The first planning application was dismissed at appeal justifying the council's reason for refusal. It is likely the second application which was refused in November 2020 will be appealed however, the committee's stance in terms of determining both applications on this site brings into question whether the council really support this housing allocation. It is therefore questioned whether the Council should be relying on the site as a housing allocation which the Council has found, in the form of the most recent applications, wholly unacceptable.

Other Sites

- 3.19** There are potential constraints with a number of the other sites, which may at the very least delay their delivery or even bring into question their achievability. Site FTC6, Magistrates Court at Fareham and allocated for some 45 units is held up by a complicated deal to resolve the nitrates issue, involving land within Winchester District.

Conclusions and Implications Arising

- 3.20** This analysis demonstrates that there are serious and substantial questions over the suitability, availability and achievability of a number of the allocated sites and whether they will be able to provide the housing figures, either in whole or in part which Fareham is seeking to rely upon. It is therefore contended that it is UNSOUND for Fareham to rely on each and all of these housing sites to deliver all of the dwelling units proposed
- 3.21** This adds to the strength of the argument, as set out under Section 2, that Fareham needs to bring forward additional sites for allocation to help meet its housing need. The next section focuses on why land at Rookery Farm should be included as a housing allocation in the Local Plan.

4.0 Rookery Farm

4.1 It is clear from Sections 2.0 and 3.0 that not only has Fareham under provided on the housing figures it requires to meet over the Local Plan period, but it is very unlikely that it will be able to deliver even the numbers it is proposing to provide. Fareham therefore needs to allocate further housing sites to improve housing deliverability; Rookery Farm should be allocated as a housing site. This was allocated in the draft Reg 18 Supplement in early 2020 under the Policy Reference HAX (SHELAA ref: 0046).

Site Location

4.2 The site is located immediately north of the M27 Motorway and west of Whiteley. Access is from Botley Road approximately 100m north of the bridge over the Motorway. Please see attached site plan showing the land forming part of the proposed development area. It is estimated at this early stage that the site could accommodate in the region of 150-200 residential units including an element of affordable housing and a mix of housing types to accord with Fareham's policies and approach to housing mix.

4.3 146 Botley Road (also known as Rookery Farm) lies to the north of the land and is in separate private ownership. The dwelling is listed. Residential development along Swanwick Lane lies further to the north.

4.4 The residential development of Whiteley is to the east. To the south are the local centre at Park Gate and the railway station at Swanwick, both within easy walking distance of the site.

4.5 Rookery Avenue is opposite the access to the site. At present this is a cul de sac however there is a safeguarded road extension to continue Rookery Avenue into Whiteley, linking Botley Road to the Parkway South roundabout.

4.6 To the south of the site is a vehicular and pedestrian bridge that provides access to residential properties at Bridge Road.

The Site

- 4.7** The site as a whole occupies approximately 20.05 Ha of land accessed from Botley Road just to the north of the M27 Motorway. The front part of the site is visible from Botley Road however the access road, which is between an earth bund to the north and embankment to the south, drops to a lower central area where aggregate recycling has, until recently, taken place.
- 4.8** Adjacent to the motorway is a large embankment created by historic land raising. The central part of the site comprises a relatively flat operational area where recycling materials have been stockpiled. To the north is the Orchard where the land gradually drops towards the rear of properties fronting onto Swanwick Lane.
- 4.9** At present due to the change in levels and the surrounding housing only the front part of the site adjacent to Botley Road is visible from outside the site.
- 4.10** The site at present has two principal landowners Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd, with Raymond Brown acting on their behalf

Site Planning History

- 4.11** Rookery Farm was originally a fruit farm and some evidence of this former use is still evident in an area of remnant orchard to the north-west of the site. Part of the site adjacent to the M27 has been land raised and restored to grazing land. This forms a large embankment which screens the central part of the site from the M27 and Botley Road.
- 4.12** Planning permission was first granted on appeal in 1987 (APP/Z1700/A/55/049143) for the infilling of agricultural land with c.1.3 million cubic metres of construction and demolition wastes with restoration to agricultural use. Tipping commenced in 1988 and temporary planning permission for waste recovery (recycling) was granted in 1995.
- 4.13** A further temporary planning permission for the inert waste recycling operation was granted in 2006 (P/06/0443/CC), time limited to expire in 2021. This permission introduced an expiry date for land raising operations of 31st December 2026.

- 4.14** In 2014, planning permission (P/14/0857/CC) was granted for the permanent retention of the aggregate recycling facility. In 2016 (P/15/1213/CC) and 2018 (P/18/0978/CC) planning permission was granted which, in effect, extended the validity of the development pursuant to planning permission P/14/0857/CC until 25 October 2020. This date has also since been extended by way of The Business and Planning Act 2020 to 1 May 2021.
- 4.15** Details pursuant to the remaining pre-commencement conditions are to be submitted to Hampshire County Council for approval in January 2021. Following discharge of these conditions and implementation of the permission, conditions relating to restoration associated with the earlier land raising permissions fall away leaving just the permanent recycling use. The site will subsequently, in planning terms, predominately formally become previously developed (brownfield) land.
- 4.16** Note there have been no minerals operations at the site and any changes to the landscape are as a result of land raising, not from extraction activities.
- 4.17** The main body of the site is currently safeguarded for aggregates recycling in the Hampshire Minerals & Waste Plan. Hampshire County Council have indicated that there is overcapacity for inert waste recycling at present. As such if the site was to be allocated for housing then the safeguarding status would be reviewed.
- 4.18** It should be noted that in its comments on the draft Plan 2020 (Regulation 18 Draft Local Plan 2036 Supplement) when the site was allocated for residential development, Hampshire County Council as Minerals and Waste Authority advised:

Hampshire County Council has concluded that sufficient aggregate recycling capacity is currently in place to deal with the additional waste and as such no objection to this allocation will be raised

Site Appraisal

- 4.19** It is noted that the site was found to be a developable housing site within the Fareham Local Plan 2036 Strategic Housing and Employment Land Availability Assessment (SHELAA) December 2019, but subsequently discounted as unsuitable in the Fareham Local Plan 2037

Strategic Housing and Employment Land Availability Assessment (SHELAA) September 2020.

- 4.20** In considering the site developable, the SHELAA (2019) makes the following comments regarding suitability of the site:

‘Overall suitable for housing development. Further work required to ascertain an appropriate development structure and net developable areas, having regard to site ground conditions, drainage, habitat surveys, movement connections and retention of existing cover of woodlands, trees and hedgerows. Eastern part of site has good pedestrian accessibility to existing local services. Potential scope to include a small convenience store to improve sustainability of main core of the site. Suitable highways improvements required, with linkages to surrounding movement networks. Potential impact of noise and air quality to be assessed and appropriately mitigated’.

- 4.21** In subsequently discounting the site, the SHELAA (2020) makes the following comment regarding reason for discounting the site as un-developable:

‘Site topography and boundary likely to create isolated cul de sac development. Main developable area of the site is not well related to existing settlement and is relatively isolated from local services’.

- 4.22** The reasoning behind the change in conclusion reached by the SHELAA (2020) is unclear as there has been no substantive change in circumstances or new information related to the site not previously provided to the Local Planning Authority. Furthermore, the SHELAA (2020) attributes the same 8 out of 10 score for accessibility to facilities from the site as the SHELAA (2019), recognising the inherently sustainable location adjacent the urban area of Swanwick, the proximity to Swanwick Railway Station and nearby shops/amenities. As identified in the SHELAA (2019) suitability summary, if necessary, sustainability of the main core of the site could further be improved via development of a small convenience store in-situ.

- 4.23** Paragraph 4.28 of the SHELAA (2020) states that *‘the information from the SHELAA forms an important part of the evidence base for the Local Plan 2037, providing a source of developable sites which are suitable for future development needs, available within the plan*

period and viably achievable. Developable sites which can be brought forward under the Council's development strategy will contribute to the housing and employment supply for the Local Plan 2037...'

4.24 Paragraph 3.21 of the Publication Version of the Fareham Local Plan 2037 states:

'3.21 The development strategy proposed by the Local Plan includes:

...Development allocations on previously developed land where available, and on greenfield land around the edges of existing urban areas in order to meet remaining housing and employment needs, but otherwise managing appropriate levels of development outside of urban areas'.

4.25 As the site should be considered to be previously developed/brownfield land, it is sequentially preferable for development based on the Council's Local Plan development strategy. Furthermore, paragraph 4.18 (Assessing Site Suitability) of the SHELAA (2020) states that 'sites outside the urban area will not necessarily be excluded as they could be considered alongside a review of urban area boundaries as part of Local Plan development...'

4.26 Paragraph 3.3 of the Background Paper: Settlement Boundary Review (September 2020) states that 'the reasons for establishing settlement boundaries include:

- *Directing development to more sustainable locations in terms of accessibility and proximity to public transport, and in terms of being well served by existing essential services and facilities'....*
- *'To assist in urban regeneration, by encouraging the re-use of brownfield land'.*

4.27 Considering the proximity of the existing Settlement Boundary to the site (approximately seven metres distance on the opposite (eastern) side of Botley Road), Rookery Farm site would represent an entirely reasonable and logical extension to the established urban area which would be in accordance with the development strategy contained within the Local Plan.

4.28 Cul de sac type development formats are well established and entirely functional residential layout present in the vicinity of the site. Such a development format would therefore reflect the prevailing development pattern and design vernacular and be sympathetic to existing

communities. Indeed a number of the sites put forward in the current draft plan would potentially result in cul de sac developments, including:

FTC3 – Fareham Station (120 dwellings)

FTC4 – Fareham Station West (90 dwellings)

HA3 Southampton Road (348 dwellings)

HA4 Downend Road (350 dwellings)

- 4.29** The site presently benefits from permanent planning permission for development and use for aggregate recycling. This is significant in terms of both vehicle movements and future development potential. Current planning permissions contain conditions limiting HGV movements to 240 per day, all of which utilise the current site access point on Botley Road. These authorised HGV movements would be replaced by domestic vehicle movements, substantially mitigating any perceived increase in road traffic on Botley Road. In addition, the imminent completion of the North Whiteley Link Road is anticipated to reduce vehicle movements on Botley Road. Without wanting to pre-empt the outcome of any Transport Feasibility Assessment, development of the site could also facilitate the development of the western end of the Rookery Avenue extension as there is space within the site to accommodate a roundabout.
- 4.30** Planning permission P/18/0978/CC includes for considerable earthworks to create extended and raised bunding to re-model the site and mitigate against noise impacts from the recycling use. A significant proportion of this re-modelling is on the south western boundary of the site. Such earthworks would be very similar in scale and form to those likely to be required to reduce noise levels from motorway traffic to appropriate levels for inhabitants of any future residential development on the site.
- 4.31** The Council has previously been furnished with a Phase 1 Contaminated Land Assessment and Slope Stability Assessment for the site, identifying that the embankment/land raise slope adjacent to the M27 is stable and that the site could be suitable for re-development in accordance with the indicative masterplan previously submitted.
- 4.32** Any future development scheme pursuant to an allocation would also include mitigation to address potential air quality concerns associated with proximity to the motorway. Such

issues can be effectively managed through building design and layout amongst other techniques.

4.33 The site comprises circa 20 hectares of land with a net developable area of circa 10 hectares. Significant land is therefore available within the land ownership for biodiversity enhancement, on-site nitrate mitigation and dedication to public open space.

4.34 The following points detail the benefits of residential development on the Rookery Farm site:

- Once the permanent recycling permission is implemented the site will become previously development land/brownfield and its development will reduce the need for more sensitive (greenfield) sites within the Borough;
- The site is in a highly sustainable location in proximity to a railway station and amenities, is deliverable and would provide necessary housing capacity within the Plan;
- It should be noted that in its response to the draft 2020 Plan (Regulation 18 Draft Local Plan 2036 Supplement) showing the inclusion of Rookery Farm, the County Council responded as follows:

This allocation is close to Swanwick railway station. The County Council supports the opportunity for this site to provide high quality walking and cycling routes to Swanwick station. This may include a new active modes bridge over the motorway and enhanced interchange at Swanwick Station with new local bus services. The development brief also needs to include provision for off-site improvements to address the inadequate bus, walking and cycling connections to the Segensworth business parks.

- Provision of Public Open Space on a former land raise site and access to it from existing footpath routes;
- Removal of a 'heavy industry' use from an otherwise residential setting;
- Would facilitate the Rookery Avenue extension. This would provide better access to the motorway, the industrial area of Whiteley and Whiteley District Centre;
- Opens up pedestrian links across the motorway to Addison Road;
- The site would not be visually prominent and would form a logical urban extension. Development could enable biodiversity enhancements associated with long-term habitat management plans and the re-instatement of a pre-existing stream across the site;
- The development would be offset by the loss of 240 HGV vehicle movements a day.

- 4.35** Were recycling operations to cease and land raising be completed, circa one million tonnes of waste material would need to be imported to the site before planning permission expiry in December 2026. This will impact the surrounding ambient environment through noise, dust and exhaust/plant emissions associated with operations and significant numbers of HGV movements.
- 4.36** Resumption and completion of land raising would also result in the site and location becoming permanently sterilised for future development. This is therefore a unique opportunity to re-develop the site to meet a real and urgent need to provide homes in the Borough.

5.0 **Modifications Required to the Plan to Make it Sound**

- 5.1. There is no need to revisit the arguments and issues which have been set out at length in the earlier sections and which demonstrate that the Plan as drafted is UNSOUND. The modifications required are set out below in bullet form. It will be immediately clear that the required work to ensure that the Plan is SOUND extends well beyond detailed amendments to drafted policy wording; a fundamental review of the Plan and the basis upon which it has been prepared is required.
- 5.2. The revised approach to the preparation of the Plan, with consequential implications for the redrafting of **Strategic Policy H1**, requires:
- a) A thorough reassessment of the Housing numbers using the Standard Method as set out under the PPG; it is premature to use the draft new Standard Method which Government has now formally abandoned. The only reason it has been used by Fareham is because it appears to provide a lower number of units required. This is clearly UNSOUND and for the plan to made SOUND, the current Standard Method must be re-used and those sites proposed for allocation in the Local Plan Supplement be included.
 - b) The Duty to Co-operate has not been undertaken properly and thoroughly; Fareham has underprovided in terms of meeting the needs of the adjoining authorities who are struggling to meet their housing needs, including Portsmouth, Gosport and Havant all of which are geographically very constrained. The exercise needs to be undertaken again to ensure that Fareham properly plans to accommodate the needs arising from surrounding authorities. It is worth noting that the under provision is made even worse if account were to be taken of the draft new Standard Methodology where the housing requirements of adjoining constrained authorities is increased; Fareham appears to have decided to ignore this implication arising from the new draft Standard Method.
 - c) The Council has a history of under delivery of housing figures and its 5 year housing land supply figure currently stands at under 3 years. On the basis that the NPPF and PPG are both clear that the housing provision numbers should be regarded as

minimum, and reflecting the above position, Fareham requires to be considerably more ambitious in terms of its overall housing provision figures.

- d) There is a very concerning over reliance on the achievability of so much of the housing provision from one site, namely Welborne Garden Village. This is even more of a significant issue given the fundamental difficulties that appear to be encountered over the funding and provision of the new motorway junction which is fundamental to the progress of the overall development. The amount of reliance that can properly be placed on the delivery of housing numbers from this one development needs to be reviewed and significantly reduced.
- e) There is also a potential over reliance on windfalls to deliver a significant proportion of the overall housing figures; this requires to be revisited with a downward adjustment.
- f) The Council is in very real danger of not being able to meet its affordable housing requirements, given all the constraints identified. The housing numbers and potential affordable housing provision requires to be recalculated with the need to increase the overall housing numbers if the affordable housing needs are to be met.

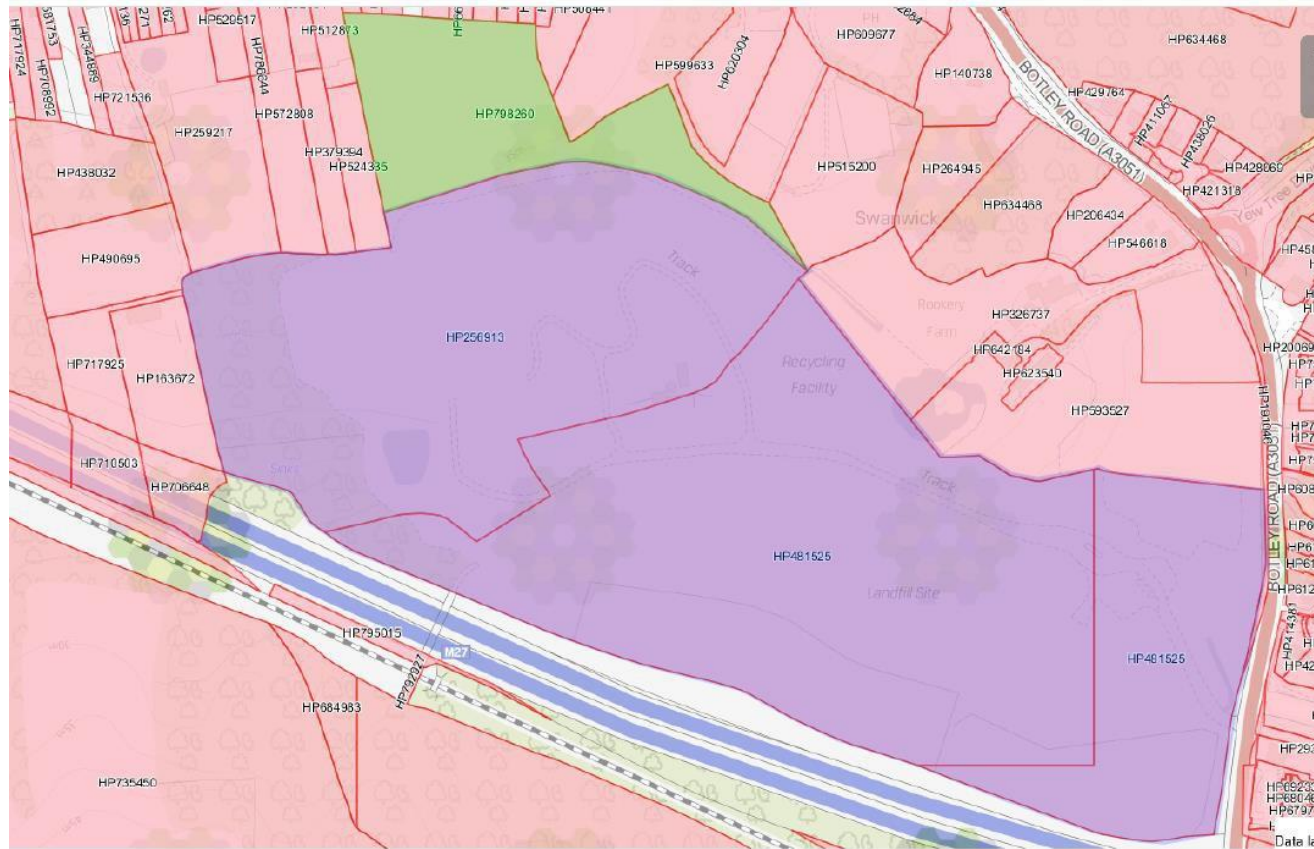

5.3 In addition to the above the Council also requires to re-address a number of its allocated housing sites, including at the very minimum **Sites FTC1, FTC2, FTC3, FTC4, FTC5, HA7 and HA13**. This reassessment in terms of suitability, achievability and availability is likely to reduce substantially the number of new dwelling units that can be achieved from these allocations.

5.4 The Council is clearly underproviding in terms of its overall housing numbers and the reliance it is placing on sites that face constraints and may not be achievable. The Council needs to make further allocations, and this should include Land at Rookery Farm which is suitable, available and achievable and subject to planning, deliverable within a 5 year period. The site has been considered suitable, available and achievable and was allocated in the Local Plan Supplement; the principal reason why it no longer appears as an allocation is because of the Council's unsound change in the methodology it is applying to calculate its housing numbers. **Rookery Farm should be reinstated as a housing allocation.**

- 5.5 It follows that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.

Yes	0 0%	0 0%	0 0%
No	1 100%	1 100%	1 100%

Respondent: Mr Russ Wright (1712-17936)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The LPA has relied on a recently-proposed (but not adopted) Central Government algorithm for deciding where houses should be located. As this has now been updated, with an emphasis on brownfield sites and sites in the North and the Midlands, the LPA needs to revise its methodology and calculations for Housing Needs in the Borough as a whole and in particular in strategic sites such as within Warsash and the Western Wards.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should use the latest methodology for calculating Objectively Assessed Housing Need in line with Central Government Policy

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Plan should implement the new algorithms for calculating Housing Need

Your suggested revised wording of any policy or text:

Not Applicable - The Local Plan needs to be completely revised to incorporate the Government's latest Standard methodology for calculating Housing Needs in the Borough

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Fareham Borough Council Local Plan (Reg.19) Proposed Submission Version Consultation

Hampshire County Council Response – 18 December 2020

Hampshire County Council does consider the local plan to be sound and legally compliant. The County Council welcomes the opportunity to respond on this consultation and sets out its comments firstly on the Transport Assessment and then on specific local plan policies in its capacity as the local highways authority, local education authority and in its role as an adult services provider with a focus on specialist care.

The County Council then sets out its comments on specific site allocations in its capacity as the local highway authority, local minerals and waste planning authority and also as the local education authority with responsibility for school place planning.

Policy HA2: Newgate Lane South (removal as a housing allocation)

Hampshire County Council is the Local Highway Authority (LHA) for all roads in Hampshire except for motorways and trunk roads and the LHA response is concerned with the potential highway and transportation impacts of the land use proposals set out by the borough council on the local road network. HCC's primary concern as highway authority is the efficient use, management and maintenance of the local highway network. Ensuring that all new development mitigates its impact on the Hampshire network is the function of the highway authority.

The LHA submitted comments in December 2017 and February 2020 in response to the draft local plan regulation 18 consultations. As part of both responses the LHA submitted an objection to policy HA2 (Newgate Lane South). This objection is not resubmitted due to the removal of policy HA2 as an allocated housing site from the revised development strategy in the Publication Plan.

Transport Assessment

At the time of the previous draft local plan consultation in January 2020 the evidence base did not include a completed Transport Assessment (TA) to replace the interim TA published in support of the 2017 draft local plan consultation therefore the local highway authority submitted a holding objection. The TA has now been finalised and forms part of the Publication Plan evidence base.

The LHA supports the methodology used by FBC in preparing a borough-wide TA and the use of the strategic model known as the Sub Regional Transport Model (SRTM) to assess the wider transport impacts of the strategic disposition of proposed development across the Borough.

The Fareham Local Plan - SRTM modelling report (2020) sets out the Baseline, the Do minimum (with local plan development) scenario and the Do Something (with mitigation) model runs and forms part of the transport evidence base. As part of the strategic transport modelling the LHA understands that a total of 2,150 dwellings was attributed to the proposed Strategic Growth Areas (SGAs) and included in the Do minimum scenario. This means that the strategic modelling was carried out using a higher housing number than is currently proposed in the Publication Plan. The LHA recognises that the strategic modelling with the higher housing number represents a worst-case scenario and that the limitations of the SRTM do not allow for localised impacts at junctions to be attributed to specific development sites. Consequently, it is not possible for the SRTM to isolate the transport impacts of the SGAs on the highway network. Therefore, the LHA accepts the outputs from the strategic modelling report and has not requested an additional model run of the SRTM to reflect the removal of the two SGAs and subsequent lower housing number.

The SRTM modelling report indicates that the incremental impact of all the site allocations including the SGAs is forecast to affect links and junctions across the highway network and particularly along the A27 corridor through Fareham borough. The future resilience of the A27 corridor is a concern for the LHA which is why the LHA is undertaking a transport study for the A27 corridor which the County Council will seek to adopt as future strategy. The strategy will seek to incorporate a multi modal approach that facilitates a modal shift away from private car use. Future transport assessments of development sites along the A27 corridor should take this into account and have regard to the emerging transport strategy.

A key aspect of the A27 corridor strategy will be the application of the 'Link and Place' approach to street planning and design. This approach recognises a street functions as both a link (that is movement by all modes of transport including pedestrians) and a place (destination in itself) and will help determine policy priorities between competing users with a greater emphasis on the function of places. This 'link and place' approach is being developed as a Hampshire County Council policy which will be fully imbedded in the next Local Transport Plan for Hampshire (Local Transport Plan 4).

The TA assessed the cumulative impacts of the site allocations and demonstrates that the significant transport impacts of the local plan development on the highway network can be mitigated through proposed highway interventions. The TA specifically highlights the junction at Parkway/Leafy lane which is north of the M27 junction 9 and serves the Whiteley business estate in the adjoining district of Winchester City Council. The Parkway/Leafy Lane junction is predicted to be significantly impacted by local plan development traffic (with long queues along Leafy Lane) and meets the criteria for requiring mitigation.

However, this junction does not warrant a Do Something mitigation scheme for increased junction capacity. This is because the Leafy Lane arm of the junction leads to a residential area with a 20mph zone reinforced by vertical speed reduction measures. The policy approach by the LHA is to reduce rat-running along Leafy Lane between

Fareham and Whiteley. Therefore, an alternative highway scheme which strengthens the current situation of suppressing flows along Leafy Lane should be the mitigation scheme to be taken forward. The LHA will need further discussions with both Fareham Borough Council and Winchester City Council to establish the form of any mitigation scheme if it is required.

The Do Something modelling for the TA proposed five mitigation schemes for increased junction capacity and modelled only the highway impacts of increased motorised vehicle traffic. There are other solutions for mitigating the transport impacts from local plan development which are more in line with the emerging policy agenda on decarbonising transport from Government and Hampshire County Council. These mitigation options would generally follow a sequential approach to assess their impact on the local road network and the role they can play in traffic reduction and reducing transport emissions starting with measures to avoid the need to travel, active travel measures, public transport (SE Hampshire rapid transit) and finally localised junction improvements. This wider and sequential approach to mitigation will need to be applied to all site-specific transport assessments.

Development Strategy

The LHA acknowledges that the Publication Plan proposes a lower housing number than in the previous draft local plans. This lower housing number is in response to a lower level of housing growth proposed by Government in its consultation in August 2020 on a new standard methodology for calculating the annual housing need. The LHA recognises that FBC need to await the outcome of the Government's consultation before the Publication Plan with the lower housing number can proceed to adoption in line with the FBC's revised Local Development Scheme (September 2020).

The consequence of a reduced housing number is a change to the development strategy and the removal of several housing sites. The LHA supports the removal of housing site HA2 Newgate Lane South. The LHA submitted an objection to policy HA2 in the previous draft local plan consultations.

The LHA also supports the removal of the Strategic Growth Area policy from the Publication Plan. The South of Fareham and North of Fareham Strategic Growth Areas were included in the draft local plan consultations and the LHA submitted a holding objection.

Climate Change

Fareham Borough Council as Local Planning Authority has a legal duty to help meet the requirements of the Climate Change Act 2008. The LHA wishes to be reassured that the borough Council has satisfied itself that the Publication Plan goes far enough in supporting the Government and Hampshire County Council policies on climate change that have emerged during the local plan preparation process. This is in view of the Hampshire County Council's recently adopted climate change strategy and targets to be

carbon neutral by 2050 and resilient to a two degree rise in temperature. For Hampshire to meet these targets, which are in line with Government legal requirements, land-use planning and transport policies at the local district level need to play a strong role and are likely to be most effective at the plan making stage.

The LHA acknowledges the transport evidence submitted in the Strategic Transport Assessment which shows how the traffic impact of the local plan development can be mitigated in traffic and transport terms. The LHA wishes to see demonstrated how the local plan proposals, in relation to transport and how we travel, will contribute to the longer-term goal of achieving carbon neutrality and building resilient networks and systems.

Strategic Policy CC1: Climate Change

The LHA supports the amended climate change chapter and strategic policy CC1 however the supporting text needs more detail with reference to the County Council's adopted Climate Change Strategy (2020) and targets including the resilience of the highway network.

Policy NE8: Air Quality

The local plan correctly identifies road transport emissions as the main source of air pollution which is relevant to the County Council's responsibilities as both highway and public health authority. The LHA supports the local plan commitments to reduce, minimise and mitigate road transport emissions and their impact. However, the Air Quality Policy NE8 needs to be more specific and should be amended to include the policy text 'development should deliver sustainable transport (public transport, walking and cycling) as part of improving air quality'.

Policy TIN1 Sustainable Transport

Given the connection between transport, local plan allocations, air quality and health, there is a lack of commentary or cross reference on air quality management within the Transport Chapter. For example, the supportive text needs to make clear how the transport policies (such as Sustainable Transport TIN1) contribute to both the climate change objectives of reducing CO2 emissions and to the air quality objectives of reducing air pollution.

The LHA recommend amending policy TIN1 on Sustainable Transport to make direct reference to the role of sustainable transport in improving air quality. The supporting policy text also needs to refer to the Air Quality Management Areas / Clean Air Zone designation (on sections of the A27 and A32) and the Air Quality Action Plans in place due to concerns over nitrogen dioxide levels caused by road traffic. Likewise, the Air Quality section needs to refer to the transport chapter and policies and the role they play in mitigating the transport impacts on air quality.

The Transport chapter needs to refer to the Strategic Transport Assessment and the impacts of the local plan traffic on air quality in particular air pollution from the M27, the A32 and A27. This should be cross-referenced with the air quality work carried out as part of the AQMAs and the local plan Sustainability Appraisal. The LHA supports transport mitigation measures of sustainable and active travel modes as an alternative to making private vehicle trips which help overall to reduce emissions harmful to human health and the environment. The LHA would not support any transport mitigation measures which threatened to undermine the success of the current Air Quality Management Areas.

The Transport chapter needs to strengthen the commitment to deliver high quality walking and cycling facilities with reference to the Government's new cycle infrastructure design guidance in Local Transport Note 1/20. Reference to cycle infrastructure design should also be included in the Design chapter.

To contribute to reducing car use, opportunities for enhancing and encouraging active travel to and from school should be encouraged and implemented working closely with Hampshire County Council Children's Services and Highways Departments. The County Council will require the provision of safe walking and cycle routes to schools and existing routes to be enhanced where necessary to improve walking and cycling numbers. Contributions from developers will be sought where necessary including for the production and monitoring of school travel plans (STP's).

Policy TIN3: Safeguarded Routes

The LHA supports the new policy TIN3 Safeguarded routes in relation to delivering bus rapid transit in Fareham and Portchester. However, the supporting text should refer to the future extensions of the SEHRT network to the west of Fareham towards Segensworth, Swanwick Station, Whiteley and the North Whiteley major development area and to serve the Solent Enterprise Zone at Daedalus and adjacent coastal settlements.

Strategic Policy R4 Community and Leisure Facilities

Hampshire County Council Children's Services consider that it is important that the impact of additional housing is assessed and where necessary developer contributions are provided to provide additional childcare places either through on-site facilities or the expansion of nearby provision. The impact will be assessed on a case-by-case basis.

The County Council also provides an Early Years guidance note on this issue for the Borough Council to consider in their plan making in relation to the future need and housing allocations.

Strategic Priority 8

Hampshire County Council Adult Services welcome the reference to affordable housing and the need to address the specific needs of different groups in the community, including the elderly and people with disabilities. However, it is recommended that reference is made to the need to meet a range of housing needs, including those in need of affordable housing and those in need of specialist housing including the elderly and people with disabilities in Strategic Policy H1: Housing Provision.

Consideration should also be given to whether opportunities are available to encourage specialist housing provision in specific site allocations.

Policy HP 5: Affordable Housing

The County Council recommend that Policy HP5 or the supporting text should encourage the provision of housing to meet a range of needs, including specialist housing to meet older persons' needs (such as extra care housing) and those with disabilities.

Policy HP7: Adaptable and Accessible Dwellings

The County Council notes that the Specialist Housing Topic Paper includes reference to the low cost of providing homes to above base accessibility standards. Although there is a correlation between age and mobility, people of all ages may have some mobility impairment, either permanently or temporarily.

The proposed percentages of housing the policy requires to be built to higher accessibility standards is modest and given the rate at which the stock is added to each year it will be a very long time before a significant supply of accessible housing is available in the Borough. With such modest levels of provision, the likelihood of a person who develops mobility impairment will find themselves in a home that can meet their needs is low. Adopting a requirement for a larger proportion of the stock to be built to Cat2 standards in particular would better meet individuals' changing needs and support the creation of sustainable communities by reducing the need to move to find suitable accommodation.

Policy HP 8: Older Persons and Specialist Housing Provision

The inclusion of an enabling policy is welcomed by the County Council; however it is recommended there is specific mention of specialist provision of affordable housing, including extra care housing and housing for those with disabilities. It is noted that specific housing allocations are made only in respect of sheltered accommodation (Policies HA42 / 43 /44). The County Council consider that these sites may also be suitable for other forms of specialist housing, including extra care housing and housing for those with disabilities. It is recommended those policies are amended to reflect this.

The County Council supports the opportunity for exception type development in specific circumstances in this policy and Policy HP6.

Housing Site Allocations

The County Council has considered the housing allocations in its capacity as the local highways authority, local education authority and local minerals and waste planning authority and provides the following commentary.

An initial assessment of the impact on school place planning has been considered based on the level of housing identified, and details are highlighted below for specific sites where there will be an impact on the supply of local school places at primary, secondary and education for pupils with Special Educational Needs and Disabilities (SEND).

The County Council as the local minerals and waste planning authority is pleased to see that some of the comments regarding mineral and waste safeguarding, from the Regulation 18 consultation, have been considered and included within the Regulation 19 proposed submission document. Within the County Council's Regulation 18 response a list of sites that were deemed to require a Mineral Resource Assessment as part of any potential application was provided. It is noted that all the allocated housing sites that the County Council made such comments on have been removed from the Proposed Submission Document as being no longer available or no longer suitable.

Housing Allocation Policy HA1 – North and south of Greenaway Lane – 824 dwellings

The development of 824 dwellings will create additional pressure for school places locally at primary, secondary and special schools. It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement j.

Housing Allocation Policy HA3 – Southampton Road – 384 dwellings

The identification of the need for developer contributions for education and ensuring safe walking/cycling routes to local schools are provided, is welcomed.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement k.

Housing Allocation Policy HA4 – Downend Road East, Portchester – 350 dwellings

It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirement j, that the site will require a Minerals Assessment prior to any development. The County Council would also like to bring to the Borough Council's attention that this allocated housing site sits within the safeguarded buffer zone of Warren Farm and Down End Quarry, a safeguarded waste site operated by Veolia Environmental Services (UK) Plc.

The safeguarded buffer zone is informed by the safeguarded sites list as defined through 'Policy 26: Safeguarding - waste infrastructure' of the adopted Hampshire Minerals and Waste Plan (2013) (HMWP). The purpose of this policy is to protect current and potential waste sites from pressures to be replaced by other forms of development, including through 'encroachment' where nearby land-uses impact their ability to continue operating.

It is often the case that appropriate buffers and mitigation measures can make potential nearby development compatible. Any mitigation measures would need to be undertaken by the proposed non-minerals or waste development (i.e. the allocated housing development) and reduce potential impacts to and from the safeguarded site to levels that would ensure the safeguarded site could continue its intended waste use.

Usually, the mitigation measures would need to focus on impacts such as noise, dust, visual impact, odour and traffic movements. They can take a variety of forms, including landscape design, tree planting, barriers, building design and orientation and use of different building materials.

The appropriate mitigation measures are best informed through direct discussions with the operator of the safeguarded site as they will be most be aware of operational requirements. However, the County Council is also available for further discussions, as well as facilitation, if required.

With regard to the above site, the County Council would therefore request further wording be added to the site-specific requirements of allocated housing site HA4 as set out below:

“the provision of evidence that the safeguarded site has been considered within any forthcoming planning application, how operator comments have been taken into account and what impacts these comments have had on the proposed development design. Details of any mitigation measures chosen as a result of the analysis should also be included with an application for the site”.

In the unlikely event that it is not possible to agree appropriate mitigation measures, the County Council would seek evidence that the waste management capacity can be relocated or provided elsewhere and delivered.

Housing Allocation Policy HA9 - Heath Road

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council’s data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement g.

Policy HA2: Newgate Lane South

The County Council as local highway authority supports the removal of policy HA2 Newgate Lane South.

Strategic Growth Area

The County Council as local highway authority supports the removal of the Strategic Growth Area policy.

Employment Allocations

The County Council has considered the employment site allocations in its capacity as local minerals and waste planning authority and provides the following commentary.

Policy E2 - Faraday Business Park

Whilst a number of the allocated housing sites have had site-specific requirements added to them for Minerals Assessments, allocated employment site E2 - Faraday Business Park has not had any added. In line with the County Council’s Regulation 18 response to the local plan consultation, the County Council again request that a site-specific requirement be added to this allocated site policy so that any forthcoming planning application would need to be accompanied by a Minerals Resource

Assessment. The County Council recommend adding the following site-specific wording: The site is within a Minerals Consultation Area. Minerals extraction may be appropriate, where environmentally suitable, subject to confirmation of the scale and quality of the resource.

The County Council would like to take this opportunity to reiterate that any development or significant redevelopments of land may impact mineral resources. As minerals can only be worked where they are found, it is important that viable mineral resources are 'safeguarded' (protected) from needless sterilisation by other development to help to secure a long-term future supply of minerals. Mineral resources are necessary for a vast array of construction activities and their availability is a prerequisite for any housing development. As such, the NPPF requires planning authorities to define Minerals Safeguarding Areas and adopt policies so that, 1) known locations of mineral resources of local and national importance are not needlessly sterilised by non-mineral development, 2) if it is necessary for non-mineral development to take place, the prior extraction of minerals, where practicable and environmentally feasible, is encouraged.

Email response to the 2020 Regulation 19 Consultation on the Fareham Publication Local Plan.

Dr Philip Raffaelli CB FRCP

Councillor for Anglesey Ward

Gosport Borough Council

Dear Sir/Madam

I wish to comment on the FBC Local Plan but the constrained format of the form makes that difficult so I have detailed my comments as below. I confirm I am commenting in my own right and am not acting as an Agent.

I was delighted to see the public announcements by the Leader of Fareham Borough Council that that the proposal to offer the Strategic Growth Areas (SGAs) as part of the new local plan will not now be taken forward and am pleased that that appears to have been reflected, to a degree, in the FBC Plan.

However, continuing to designate the SGAs as currently, I believe means there is still a risk of losing the Strategic Gaps in the future. This is especially concerning given the government's plan to give automatic planning permission in areas designated as Growth Areas if their proposed changes to the planning process are accepted. I can see nothing in this iteration of the FBC Plan that gives me the confidence that the SGAs no longer exist in some form or another.

I also note that Gosport Council continue to raise concerns about development in the Strategic Gap as indicated at paras 3.20 & 3.21 - I share that concern.

The main points in the Plan which I believe gives contradictory designation to Strategic Gap areas are at:

Appendix C-Sustainability Appraisal, Section 4.6, para 4.6.6 says "North of Downend and South of Fareham were taken forward as the subject of the Strategic Growth Area (SGA) policy in the Regulation 18 Supplement consultation document, setting out the Council's intention to work with landowners and site promoters in these areas to develop a Council-led masterplan which will focus on delivery of community benefits as part of good growth"

Para 4.7.5 says "In addition, the South of Fareham SGA and the western portion of the North of Downend SGA are also not proposed for allocation. Site ID 3030 Downend Road East, which forms

the eastern section of the North Downend SGA, is retained in the development strategy in place of the SGA in its entirety"

Section 5.3, para 5.3.1 says, "This assessment supported the selection of new site allocations and two SGAs to supplement the preferred development strategy identified at the Draft Plan stage. These eight areas are therefore considered reasonable alternatives to the Plan. A description of the eight areas is provided in Table 5.1"

Also of note are paras 5.3.4 and 5.3.5

Appendix G-Duty to Cooperate Statement, Section 3, para 3.13. "The Council advised WCC that it would be undertaking a further Landscape/Strategic Gap assessment as part of the evidence base."

Appendix G, Appendix 6- Homes England Teleconference Follow Up, the CCGs follow up letter on page 1505 and Appendix 9- Portsmouth City Council response to Regulation 18 consultation all mention the existence of the SGAs.

Appendix C, Section 14, Appendix G: Rationale for Site Selection or Rejection.

The following sites have been rejected for development:

1. 1040-Land East of Burnt House Lane, Stubbington
2. 3002-Land East of Newgate Lane South (A), Fareham
3. 3008-Land South of Longfield Avenue, Fareham
4. 3057-Land East of Newgate Lane, Fareham
5. 3075-Land at Bells Lane, Stubbington
6. 3098-Land West of Cuckoo Lane, Stubbington
7. 3129-Land West of Newgate Lane South, Stubbington
8. 3133-Newgate Lane South, Peel Common
9. 3153-Newlands Farm- Built Portion of Masterplan
10. 3198-Newlands Plus-Area A
11. 3199-Newlands Plus-Area B1
12. 3200-Newlands Plus Area B2
13. 3201-Newlands Plus-Area C

The reason given for refusal for the majority of those was because they lie within a strategic gap yet I can still find nothing that says the entire designation of SGA has been removed from those same Strategic Gaps.

In summary, I have a grave concern that unless the FBC Plan is clarified to formally remove those areas in the Strategic Gap from any suggestion that they lie within areas identified for Strategic Growth, then we will not be in a position to protect them from future development.

Yours Faithfully

Dr Philip Raffaelli CB FRCP
Councillor for Anglesey Ward
Gosport Borough Council

From: Andy Mooney <andrew.mooney@farehamlabour.org.uk>

To: Consultation <Consultation@fareham.gov.uk>

Subject: Fareham Local Plan Consultation

On behalf of Fareham Constituency Labour Party, I wish to submit the following in response to the consultation

Fareham Labour Party response to local plan consultation

Fareham Labour would wish to submit the following in response to the consultation on the Publication Local Plan.

We welcome the fact that the revised local plan reduces the number of houses to be built on greenfield sites as we believe that the bulk of the housing needs for Fareham should be accommodated through a combination of the Welborne development and through the use of brownfield sites elsewhere in the borough. We welcome the removal of sites in Portchester and Wallington and preservation of the strategic gap. We remain concerned at the level of development proposed for the Western Wards. We are disappointed that greenfield sites remain under threat. We support prioritising brownfield sites, including building higher density housing in existing town centres.

We do not agree that the provision for affordable homes in the plan is adequate. We question whether this plan is accounting for growth in demand over this period or even seeking to maintain a bare minimum in providing good living conditions for local families. We see town centres as one area that can provide much needed affordable housing.

Fareham Borough Council should not ignore the fact that many especially young people need affordable housing. The council should identify further brownfield sites for development.

The Fareham local plan should include a new railway station on the Western edge of the Welborne development, this is relevant for the whole of Fareham, not just for Welborne. Residents in existing housing in North Fareham would be able to use this new station at Welborne including by walking and cycling. The provision of such a railway station is essential to take sufficient traffic off the roads in Fareham to avoid severe traffic congestion. A bus service will not achieve the necessary modal shift to public transport. If people can walk to and from the railway station in Welborne and only have to buy a rail ticket they will take the train. If people have to spend time and money travelling by bus to Fareham Railway Station to take the train they will drive and we shall have severe road traffic congestion in Fareham.

Executive Summary

Local Plans should be prepared to contribute to the achievement of sustainable development. They should be positively prepared and seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. As the starting point, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas. These requirements exist within the context of the Government's now longstanding objective to significantly boost the supply of homes.

The Regulation 19 Plan, which is meant to be the Plan the Council intends to submit for Examination, is not founded on the Government's published Standard Method as required by the NPPF and NPPG.

Rather, the Council has alighted upon the possible outcome of a Government consultation document and has based the Development Strategy, Policy H1 and the strategy to meet housing needs on this lower level of housing. This is manifestly unsound.

The fact that the Council do not intend to submit its plan until there is certainty as to a change to the Standard Method does not mitigate the cost of conducting this consultation to the public purse or unnecessary expenditure by other public and private bodies. Moreover, this approach plainly risks undermining public confidence in the plan-led system, if, as is possible, the housing requirement has to be increased. The Council has simply acted prematurely in seizing upon a consultation document that suggests a lower housing requirement; this may be expedient but is the antithesis of positive planning. Put simply, there is no basis for the Council to have formed this consultation document at the present time.

In the event that the Government decides not to proceed with its amendment to the Standard Method, or that such an amendment results in a different outcome for Fareham, the Council will need to further amend the plan. In that instance, a wholly new consultation exercise would be required given the likely magnitude of amendments that would be necessary, adding further delay to the plan-making process, and cost to the public purse and to interested parties, whilst, regrettably, undermining confidence in the Local Plan process.

Moreover, the Council has not recognised the context within which this Plan is being prepared. Housing delivery relative to the Core Strategy has resulted in a substantial shortfall in new housing over past years and this Plan provides an opportunity for positive and ambitious planning to ensure development needs are met and the principles of good growth are achieved. The Plan fails in this regard.

The Council purports to make a contribution towards meeting the unmet need of its neighboring authorities; however, this does not reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PFSH) of over 10,000 homes. It is not at all apparent that this Plan is founded on constructive, active and on an ongoing engagement as required by Section 33A.

It is instructive that whilst Welborne was identified to provide housing to meet sub-regional requirements, its role has now changed to meeting the Borough's housing needs first and foremost;

consequently this Plan makes a significantly lower contribution to the wider sub-regional needs which plainly have not diminished.

Furthermore, the Plan has exaggerated the likely housing supply from Welborne and other sources to such an extent that a shortfall in housing supply is inevitable.

The Plan overlooks the opportunity provided by the previously identified Strategic Growth Area at South Fareham which would make an important contribution to housing supply in the short term and providing surety of supply over the longer term. The suitability of this location is apparent from the Council's evidence base; it is accessible to the Borough's main urban area, it is not an area that is sensitive in landscape terms, development can be accommodated without undermining the principle of separation between Fareham and Stubbington, there are no environmental designations that preclude development and the transport modelling and its' conclusions has assumed development in this location. A development scheme in this location can also deliver nitrate neutrality and biodiversity net gain. Development to the South of Fareham can achieve *Good Growth*.

Unfortunately, the Sustainability Appraisal does not consider higher levels of growth consistent with the January 2020 Local Plan Supplement, and, as such, fails to consider a reasonable alternative.

The following Modifications are considered necessary for the Local Plan to be sound:

- The minimum housing requirement should be defined by reference to the existing Standard Method;
- The housing requirement should be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;
- The level of unmet need that is accommodated should be based on constructive, active and on ongoing engagement with neighbouring authorities;
- Assumptions about the delivery of new housing at Welborne should be revisited and revised down;
- The windfall allowance should be revised down;
- Alternatively, the level of contingency should be increased;
- Additional housing allocations should be provided for;
- Land South of Fareham should be allocated for housing development; and
- Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood should be amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1 Introduction

- 1.1 Hallam Land Management Limited ('Hallam') control a substantial tract of land to the South of Fareham, south of Longfield Avenue, west of HMS Collingwood and adjoining the Stubbington Bypass, the construction of which has recently commenced.
- 1.2 In successive representations to the Local Plan Review we have draw attention to the merits and advantages of locating development to the South of Fareham and how this would achieve the Borough Council's objective of *Good Growth*.
- 1.3 In the January 2020 Local Plan Supplement, this land, along with other parcels in this location, was identified by the Borough Council as a potential Strategic Growth Area.
- 1.4 In the current consultation document, such an allocation has not been carried forward.
- 1.5 On this occasion, the Borough Council's has alighted upon the possible revision to the Government's Standard Method for assessing local housing need, which suggests a lower level of housing for Fareham.
- 1.6 In our opinion, the Borough Council are wrong to have published this consultation document in this form given the status of this version of the Plan is afforded by the Local Plan Regulations; *the Plan a Local Planning Authority intends to submit for Examination*. To have based a Plan on the possible outcome of a Government consultation is plainly premature and, regrettably, the Plan's housing strategy is not positively prepared and is unsound.
- 1.7 The Plan's housing strategy is not an effective one. It has no regard to past performance relative to the objective assessment of housing need and the level of contingency is not sufficient when the likely delivery of Welbourne is viewed objectively. Over the plan period a significant shortfall in new housing is inevitable.
- 1.8 For the reasons given in this representation, additional housing land should be allocated in Policy H1.
- 1.9 Land South of Fareham is an eminently suitable and sustainable location for future development and should be identified accordingly. In the context of the Borough Council's *Good Growth* principles that underpin the Plan's Development Strategy, Hallam's development proposals achieve the high-level development principles and requirements set out in the Local Plan Supplement which remain entirely appropriate.
- 1.10 It is especially significant that the Borough Council's assessment of Strategic Gaps has drawn the conclusion that new development can be located south of Longfield Avenue without harming the integral purpose of this earlier designation. We agree with this conclusion, which accords with our previous submissions that carefully planned development will not result in the coalescence of Fareham and Stubbington and that the separate identities of these settlements can be retained.
- 1.11 Development at South Fareham can be brought forward to provide new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality

of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.

- 1.12 As such, and for the reasons given herein, the previous potential Strategic Growth Area at South Fareham should have been retained in the Local Plan for future development.
- 1.13 In our representations in the following Sections we set out that, whilst the Plan's Vision and Strategic Priorities are correct, absent amendments to Policy H1, this version of the Local Plan will not provide sufficient housing and this will run counter to its stated intention to address housing needs by the end of the plan period.

2 Vision and Strategic Priorities

- 2.1 In this Section of our representations we consider the consultation document's Vision and the Strategic Priorities that the Borough Council has identified. It is instructive to consider the extent to which the Plan's policies and proposals will, in practice, contribute towards this Vision being realised and the Strategic Priorities being met, in the context of what the NPPF's anticipates of a Local Plan.

National Planning Policy Framework

- 2.2 Para 15 of the NPPF requires that each Local Plan should provide a positive vision for the future of its area; a framework for addressing housing needs and other economic, social and environmental priorities. (emphasis added)
- 2.3 Para 17 requires that a Local Plan includes strategic policies to address the local authority's priorities for the development and the use of land in its area.
- 2.4 Para 20 states that strategic policies should set out the overall strategy for the pattern, scale and quality of development, and make provision for, *inter alia*, housing, employment, retail, leisure and other commercial development, infrastructure, community facilities and conservation and enhancement of the environment.
- 2.5 Para 22 states that strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure.
- 2.6 Para 23 states that strategic policies should provide a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development. This should include planning for and allocating sufficient sites to deliver the strategic priorities of the area.
- 2.7 In the context of plan making making, the NPPF's presumption in favour of sustainable development is framed in the following terms:
- a. *plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
 - b. *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:*
 - i. *the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - ii. *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.*
- 2.8 In this context, it is important to recognise the significance of the Regulation 19 stage in the plan-making process. This is the Plan the Borough Council intends to submit to the Secretary of

State for the purpose of Examination pursuant to Section 20 of the Act. This is explained in the NPPG *"The publication stage plan should be the document that the local authority considers ready for examination"*. Therefore, this is the Plan and the approach to meeting objectively assessed need that the Borough Council now consider appropriate.

- 2.9 But, as the Borough Council has suggested it won't decide whether or not to submit the Plan until it knows the outcome of the Government's review of the Standard Method, this is little more than a "wait and see" approach. This is plainly wrong given the importance of the plan-led system in overall terms, the alacrity with which an up-to-date Local Plan is needed in Fareham, and the need to maintain public confidence in the plan-making system generally.
- 2.10 As will be shown later, the practical difference between a housing strategy based of 520 dwellings per annum and 403 dwellings per annum is an 'end date' five years hence. When viewed in the context of providing surety over the longer term and the emphasis in the NPPF on exceeding the minimum requirement, adopting a higher growth level at this stage would have been the positive and responsible response to this circumstance.

The Vision

- 2.11 The Borough Council's Vision as set out in the consultation document intends that it:
- *"will accommodate development to address the need for new homes and employment space in Fareham Borough; and*
 - *new housing will address the particular needs in the Borough, such as our growing housing need and an ageing population and creating attractive places to live".*
- 2.12 The Vision is framed by reference to the Borough's needs, whereas Fareham is part of the established Partnership for Urban Southampton and has a role in contributing to meeting the housing needs of the sub-region. Indeed, there is no reference to Fareham's sub-regional role on any of the text associated with the Vision and Strategic Priorities in Section 2 of the Plan. In this context, the Vision should be drawn more widely.
- 2.13 Significantly, the allocation at Welborne in the Core Strategy was specifically for a sub-regional purpose, but its role by the present time appears to have been recast entirely; a matter we return to later.
- 2.14 Without prejudice to the above, achieving any Vision requires policies and proposals that are genuinely aligned with it. In respect of housing, the outcome of the Local Plan's policies and proposals should be that the Borough's housing needs are met.
- 2.15 As such, the Local Plan must, first, establish the correct strategic housing requirement in Policy H1 i.e. the overall number of new homes that need to be built by 2037 and, second, ensure a housing supply strategy that has the necessary surety that this can be achieved.
- 2.16 What experience both in Fareham and elsewhere has shown is that there must be an element of theoretical overprovision as part of the housing strategy to ensure that sufficient new housing is built.
- 2.17 To an extent the consultation document recognises this, but, as will be shown, it significantly

misjudges housing supply to such an extent that it undermines achievement of the Vision.

2.18 Conversely had a positive approach to plan-making been adopted, the Local Plan would have provided a robust planning strategy for the Borough.

Strategic Priorities

2.19 In the context of the Vision, the first Strategic Priority is to:

- *address the housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.*

2.20 Again, there is no reference to Fareham's wider sub-regional role. In the context of Section 33A of the Planning and Compulsory Purchase Act, which requires constructive and active engagement on strategic matters, this is a surprising omission.

2.21 Without prejudice to this point, as a matter of principle, such a strategic objective is soundly based and is aligned with the significant importance the Government attaches to housing provision. Such a Strategic Priority is universally found in Local Plans national-wide.

2.22 However, in this instance, the apparent driver to the Publication Draft has been an attempt to reduce the scale of housing provision despite the Vision and Strategic Priority. This is the only conclusion that can be drawn from the Council having based its Regulation 19 Plan on a consultation document concerning a potential revision to the Standard Method.

2.23 This approach is plainly not sound for the following reasons:

2.24 Firstly, it departs from the method of calculating local housing need set out in para 60 of the NPPF. No exceptional circumstance has been suggested other than a lower figure is derived from the potential revision to the Standard Method. In a recent comment the Planning Minister referred to outputs based on the consultation exercise as "*entirely speculative*".

2.25 Secondly, even if that figure is correct, it is in no way obvious how the wider needs of the sub-region are to be met; across the wider geographic area as a whole the level of local housing need is suggested to be greater than has hitherto been the case.

2.26 Thirdly, the approach to housing supply significantly overstates likely housing delivery and the scale of contingency is simply not sufficient to ensure future housing supply would meet identified need.

2.27 The inevitable conclusion is that this version of the Local Plan is not positively prepared, justified, effective or consistent with national policy. Therefore, whilst the Plan may have a clear strategic priority to address the need for new homes in the Borough, its subsequent policy to base the strategic housing requirement of 403 dwellings per annum means, when considered objectively, that it fails to do so. To consciously plan for 20% less housing than has been identified firstly as necessary, and secondly as capable of being accommodated, is not properly addressing the need for new homes in the Borough.

2.28 In short, the Plan provides for too few houses over the plan period. This in turn will give rise to

adverse effects. It will restrict the number of people who are able to purchase new housing from doing so and constrain the operation of the housing market. It will also reduce the amount of affordable housing that is built because that is a proportion of the overall amount of housing. Moreover, by restricting market housing it creates an additional and greater incidence of housing need as people who would otherwise have been able to buy a market home are prevented from and they fall into housing need. This will have harmful socio-economic effects and runs counter to the Vision to meet the Borough's housing need.

2.29 For these reasons, the consultation document is not soundly based.

3 Development Strategy

- 3.1 The preceding Section has considered the Regulation 19 Plan's Vision and Strategic Priorities as they relate to housing provision and has identified that, as a practical effect, its policies and proposal will not deliver the intended outcome in terms of meeting housing need by the end of the plan period. In this Section, we consider the proposed Development Strategy and the extent to which it could accommodate a greater level of development if necessary.
- 3.2 The Plan's Development Strategy, set out on pages 17 – 32, and its associated Key Diagram and more detailed Policies Map, are framed by the Borough Council's approach to housing provision. This is evident from comparing the direction of travel outlined in the January 2020 Local Plan Supplement based on the published Standard Method and which identified the need for Strategic Areas of Growth to be allocated for future development, and the present approach which includes very few new housing allocations.
- 3.3 In the event the Borough Council has to re-cast its approach to housing provision, it will also need to adjust its Development Strategy in order to be able to deliver the strategic objective to address housing need. In this regard, it is of note that para 3.5 of the consultation document acknowledges that *"the [Local Plan] Supplement consultation in early 2020 identified the Council's preferred approach to its Development Strategy which it proposes to use to guide the focus of development until at least 2037"*. This clearly illustrates the suitability of the Strategy at that time as the basis of plan-making presently.
- 3.4 In the following paragraphs we comment on the various elements of the Council's Development Strategy both as articulated presently but also in the context of a revised housing strategy which would require additional land to be identified for development in the plan period.

Good Growth

- 3.5 The 2019 Issues and Options consultation established the principle of **Good Growth** as the keystone for the Local Plan's Development Strategy.
- 3.6 *Good Growth* was defined in the 2020 Local Plan Supplement in the following terms:
- building homes and creating employment spaces in such a way as to improve the quality of life whilst protecting the most valued and natural historic environments.
 - respecting environmental protections and delivering opportunities for environmental gain, providing opportunities for reduced energy demand and waste production, whilst sensitively managing the countryside and valued landscapes.
 - providing open space and leisure opportunities to encourage healthy and active lifestyles and encouraging more of us to use active forms of travel rather than the car.
- 3.7 This definition has been retained in the Regulation 19 Plan.
- 3.8 These principles exist within an overarching scale of development that the Borough will need to provide for over the plan period. It is of paramount importance that, in the context of the Plan's Vision and Strategic Priorities, this scale of development is correctly defined at the outset; only then can it be said the Plan will address housing and employment needs adequately,

appropriately and sustainably. If the housing requirement is drawn too low, it will have negative social and economic effects.

- 3.9 It follows that, at the plan-making stage, the Local Plan is able to set out strategic and development management policies that have *Good Growth* principles at their core; both in terms of determining which locations in the Borough are to be allocated for new development and then the form and nature of such development.
- 3.10 The ensuing Land Use Strategy should prioritise locations that are able to achieve the principles of *Good Growth*, albeit there are instances where there are competing interest and, as with all planning decisions, balanced judgements will be necessary.

Development Strategy

- 3.11 This Section of the Regulation 19 Plan describes the factors that the Council has used to determine its Development Strategy. Because of the range of considerations that are inputted to, and then flow from this, what the Plan is actually describing is its land use strategy, namely where development is acceptable and conversely where factors determine new development would not be appropriate and other considerations are more important.

Landscape and countryside

- 3.12 We agree that there are parts of the Borough which have a fundamental importance in landscape terms and it is right that preservation of the landscape in those locations is the principal consideration. Figure 3.1 which illustrates the Key Diagram identifies "Areas of Special Landscape Quality" and we agree with the designation of the areas shown in this regard. Policy DS3, which we comment on later, should be worded to ensure that preserving the special landscape quality of these areas is given primacy.

Settlement boundaries

- 3.13 Settlement boundaries delineated in earlier development plans were drawn in the context of development needs as determined at that time.
- 3.14 Where the scale of development cannot be met on land within the Borough's urban area, development in the countryside adjoining main settlements is a wholly necessary and legitimate proposition.
- 3.15 As a consequence of allocating land for development to meet identified needs, settlement boundaries can and should be amended accordingly. In short, the existing settlement boundaries are not immutable.

The desire to respect settlement identity

- 3.16 Given that Areas of Special Landscape Quality have been assessed and delineated on the Key Diagram it is also necessary to consider whether land identified in the current Development Plan as Strategic Gap still requires such protection, whether its boundaries can justifiably be amended in light of up-to-date circumstances or whether any areas of land subject to that designation can be developed in order to contribute to a sustainable pattern of development.

- 3.17 The *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* considers existing Strategic Gaps in the adopted Local Plan and concludes that land south of Fareham, east of Peak Lane and west of HMS Collingwood does not perform the same function in terms of maintaining separation between Fareham and Stubbington as other land that is subject to this designation and is more integral to the purpose of preserving identity.
- 3.18 Chapter 4 of that Study, Paragraph 10 states that *"there exists some opportunities for development to be absorbed within the strategic gap subject to scale and future detailed design, without compromising its gap function combined with mitigation measures that can support green infrastructure enhancement"*.
- 3.19 It follows as a matter of principle that this land should not be designated as Strategic Gap in this Local Plan as this designation plainly cannot be justified in that location. Conversely, to continue to propose this land as Strategic Gap is not justified on the basis of the Council's own evidence.
- 3.20 It is highly material that the Local Plan Supplement had anticipated a Strategic Growth Area in this location, reflecting the broad conclusions of the earlier Options testing that this represents a sustainable and accessible location for new development and that such development can be accommodated without harm to the separation between Fareham and Stubbington. The significance of this is especially important in the context of the greater scale of development the Local Plan should accommodate and as such this represents an eminently suitable location for development. The fact this land is outside of the settlement boundary is in no way an overriding determinant that would preclude its allocation.

Climate change, flood zones and coastal management areas

- 3.21 We agree that the Local Plan should not direct major new development to areas identified as having a role in mitigating the impacts of flooding or coastal erosion. It is noteworthy that the areas of potential flood risk are associated with the River Hamble, River Meon, River Wallington and Lee-Solent estuary and are largely subject to nature conservation designations and landscape designations which limit the extent these locations would be suitable for development in any event.
- 3.22 In this context, the land identified as suitable for future development to the south of Fareham is not subject to flood risk and can be developed with Sustainable Urban Drainage measures that would not increase the risk of flooding elsewhere.

Protected areas for nature conservation

- 3.23 There are strategic nature conservation constraints that exist in the Borough in the form of International and Nationally designated sites. These overlap with other environmental designations and exert a significant constraint on where development can be located, limiting the extent of land absent a constraint. None of these constraints directly affect the land south of Fareham referred to in preceding paragraphs.

Transport corridors and opportunities to encourage more active travel modes

- 3.24 The NPPF advises that the planning system should actively manage patterns of growth to support sustainable travel. Significant development should be focused on locations which are

or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health.

- 3.25 In this regard, the Local Plan Strategic Transport Assessment states the following: *The proposed growth locations in the Local Plan to accommodate forecast population and economic growth, took a wide range of factors into consideration, including transport and access implications. Most of the Local Plan growth is located either within or on the edge of existing conurbations, providing good opportunities for trips to be made by modes of transport other than the private car. Consequently, the proposed growth in the Local Plan is generally in sustainable locations in terms of transport and access*”.
- 3.26 It is important to stress that this Transport Assessment in fact includes development at the Strategic Growth Areas, therefore, this conclusion reflects the suitability of new development in this location in these terms.
- 3.27 Whilst certain representations have previously raised concern about traffic impacts, the Transport Assessment concludes that the scale of development proposed (including the Strategic Growth Areas) and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective.

Need to encourage diversity in the housing market

- 3.28 We agree that there needs to a balance in the portfolio of housing sites. We comment later on the likely delivery of housing from Welborne, which can only represent a modest supply of housing in anything other than the longer term.
- 3.29 To meet the objective of providing sufficient housing, additional housing allocations are required for all of the reasons in this representation and in particular those in response to Policy H1. Whilst development to the south of Fareham will change the character of part of the undeveloped land between Fareham and Stubbington, this must be balanced with the material benefits of the scheme in terms of the new housing to increase housing supply in the short term and to provide a surety of supply over the longer term.
- 3.30 The opportunity to the south of Fareham is of a sufficient scale to meet the identified need for market housing, affordable housing, specialist accommodation and self-build and custom build housing, along with the co-location of local services and facilities to support a new neighbourhood.

Sustainability and accessibility to services

- 3.31 Fareham is identified in the Core Strategy as a ‘key growth point’ in the South Hampshire sub region and a ‘secondary regional centre’. The town is the largest in the Borough with a population of approximately 37,000 people. Fareham is also an important economic centre, which has developed further over recent years, with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane, Peel Common Roundabout and the construction of the Stubbington Bypass.
- 3.32 Amongst the advantages previously identified for the South Fareham Strategic Growth Area is

its proximity to the town centre, the Solent Enterprise Zone at Daedalus, the railway station and existing local services and amenities with good access to walking, cycling, and public transport links. Local facilities are situated along Bishopsfield Avenue and at Broadlaw Walk. Large-scale out-of-town retail facilities are located at Newgate Lane and Fareham Road to the east of Longfield Avenue.

- 3.33 Large-scale development to the south of Fareham, rather than a more dispersed pattern, would maximise opportunities to prioritise pedestrian and cycle links and extend public transport to maximise sustainable modes of travel.

The requirement to meet housing and employment needs

- 3.34 *Good Growth* can only be achieved if the Local Plan intends to meet objectively assessed need for housing, which for the reasons set out in response to Policy H1, it does not achieve this at the present time.

Spatial Interpretation

- 3.35 As a matter of principle, the identification of deliverable or developable previously developed land should be a priority, however, it is widely understood that such opportunities do not exist to accommodate the scale of new housing and employment required in the Borough.
- 3.36 Accordingly, the allocation of greenfield sites for future development is both a legitimate and necessary measure.
- 3.37 The morphology of the Borough is comprised of three urbanised areas: Fareham, Portchester and the 'Western Wards', which are part of a coastal conurbation that extends from Portsmouth in the east to Southampton in the west. Fareham is the pre-eminent urban area within the Borough in terms of services and facilities and public transport. Portchester and the 'Western Wards' are characterised more as residential suburbs.
- 3.38 Interspersed to a greater and lesser degree between these settlements are areas of separation comprising Portsmouth Harbour, Alver Valley, Meon Valley and the River Hamble. These are strategically important corridors that separate the main urban areas, protect their identity and prevent settlements within the coastal conurbation from merging together.
- 3.39 To the north of the M27, the Borough is of a more rural character, noting of course the proposed new community at Welborne which will undoubtedly change the character of this area over a long period of time.
- 3.40 Stubbington, a residential suburb, lies south of and separate from Fareham's urban area along with the sub-regionally important employment and logistics node at Daedalus. The Borough Council have stated aspirations to maximise the potential of the airfield's land and infrastructure assets through new commercial development, providing clusters for aviation, non-aviation and skills/innovation activity. This will contribute positively to the creation of skilled jobs in the Solent Enterprise Zone.
- 3.41 These characteristics have led the Council, rightly in our opinion, to consider the designation of Valued Landscapes as part of the Local Plan and in this context we are aware that the 2017 Landscape Assessment acknowledges the intrinsic landscape character of the Meon, Hamble

and Hook valleys.

- 3.42 We agree that the Meon Valley is a distinctly valued landscape. In our 2019 response to the Issues and Options consultation we referred to various Appeal decisions that alight upon the value of the landscape in this location. Continuing to protect this area from development and formalising a landscape designation in the Meon Valley would be appropriate.
- 3.43 The extent to which land around the 'Western Wards' is capable of accommodating new development is constrained by the extent of nature conservation designations close to the existing urban area which limits development opportunities to small scale schemes at most.
- 3.44 On the basis of the above, it follows that **locations that adjoin Fareham town, as distinct from villages away from it located in the rural hinterland to the north and west of the Borough, are inherently more suitable in terms of reflecting the morphology of the Borough, preserving its natural environment and maximizing accessibility to services and facilities to achieve the most sustainable pattern of development.**
- 3.45 The extent to which new development opportunities in those locations can consolidate and enhance the accessibility advantages of Fareham Town Centre and Daedalus are consistent with the *Good Growth* principles set out in paras 3.5 and 3.6 above.

Development Strategy Policies

- 3.46 Para 3.2 of the consultation document defines the Development Strategy as providing the *"distribution, scale and form of development and supporting infrastructure, a set of proposals to deliver the strategy, policies against which to assess planning applications, and proposals for monitoring the success of the plan"*.
- 3.47 In addition to the narration of the Strategy, this Section of the Plan includes three policies; the first controlling new development in the countryside, the second in respect of the Strategic Gap and a third concerning Landscape. These policies do not set out a Settlement Hierarchy or Spatial Strategy for the Plan area and such policies do not appear elsewhere in the Plan either. The practical effect of this is that there is no policy that delivers the spatial objectives in so far as where new development should be located i.e. affording a priority to locations within and adjoining Fareham town as the most sustainable location in the Borough.
- 3.48 Given that para 3.2 suggests the role of the Development Strategy provides a set of policies that direct where and how new development should be located, the omission of what are usually commonplace policies is significant.

Strategic Policy DS1: Development in the Countryside

- 3.49 Policy DS1 seeks to control the use of land outside defined settlement boundaries i.e. in countryside locations.
- 3.50 In some circumstances it would be appropriate to grant planning permission for new development in such locations. In those instances, the benefits of a development proposal would need to be considered against the criteria in part two of the policy. In this context, we do not agree that Criterion 'v' is drafted correctly.

- 3.51 On certain occasions other considerations associated with a development proposal would merit planning permission being granted notwithstanding the agricultural classification of the land concerned. In this regard, whilst the NPPF affords a preference to development of lower quality agricultural land, it does not preclude the development of best and most versatile land (see footnote 53 of the NPPF).
- 3.52 As presently drafted Policy DS1 conflicts with the expression of this policy approach in the NPPF; as such criterion 'v' should be reworded as follows: "*avoid or minimise the loss of best and most versatile agricultural land*".

Strategic Policy DS2: Development in Strategic Gaps

- 3.53 In earlier representations we have identified that the evidence base provided by the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* does not justify the delineation of the Strategic Gap south of Fareham in the manner shown on the Key Diagram.
- 3.54 In particular, that Report identifies that the land south of Longfield Avenue and west of HMS Collingwood could accommodate new development without a significant adverse effect on the objectives of the Strategic Gap designation.
- 3.55 It follows that this land is not an integral part of the Fareham and Stubbington Gap.
- 3.56 As such the Strategic Gap should not extend across this land, as this would add a policy restriction that ought not apply on the basis of the published evidence. Put simply, such a designation should not include more land than is necessary to achieve its purpose.
- 3.57 For the Local Plan Key Diagram to be justified, and for the Local Plan to be sound, the delineation of the Strategic Gap south of Fareham should be amended accordingly.

Strategic Policy DS3: Landscape

- 3.58 The Local Plan intends to formalise Areas of Special Landscape Quality to reflect their valued status as determined through the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps*. As written, Policy DS3 does not however afford any particular level of protection to these areas beyond Policy DS1, which in any event requires development proposals in the Countryside to "*conserve and enhance landscapes*".
- 3.59 Policy DS3 also appears to permit major development proposals in these locations whereas the Development Strategy has sought to avoid new allocations in these locations because of their landscape sensitivity. The definition of major development is provided in the Glossary¹ and when applied to this Policy, could see large scale development proposals being advanced when this is what the Local Plan is seeking to avoid. As drafted, this Policy does little to enforce the Plan's Development Strategy.

¹ For residential schemes, major development includes those of 10 dwellings or more or on a site of 0.5 hectares or more. For other development, it includes building(s) with a floor area of 1000sq.m or more or on a site of 1 hectare or more.

4 Policy H1: Addressing housing needs by the end of the plan period in an appropriate and sustainable manner

- 4.1 In this Section we consider specifically Policy H1 and whether, as presently formed, the Borough Council's strategic housing requirement and housing supply strategy are sound.
- 4.2 The NPPF expects the planning system to significantly boost the supply of new housing by providing, in the first instance, a sufficient amount of development land where it is needed (para 59 refers).
- 4.3 It is clear that a Local Plan's housing requirement is to be calculated by reference to the Government's Standard Method, unless exceptional circumstances can be proven (para 60 refers).
- 4.4 In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.
- 4.5 As discussed in Section 2, the Plan's Vision and Strategic Priorities establish the intention to address the Borough housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.
- 4.6 For the Plan to address, and indeed meet, housing needs by the end of the plan period, it is important to have regard to the following considerations which are material to determining a sound strategy in the context of the Government's presumption in favour of sustainable development:
 - context and the backdrop to this Local Plan;
 - an objective assessment of local housing need;
 - unmet need from neighbouring authorities;
 - the Plan's housing deliver strategy and whether this is sufficiently robust.
- 4.7 As will be shown, the consultation document will not achieve this, and when measured objectively, a shortfall in housing supply over the plan period will be inevitable, contrary to the stated Vision and Strategic Priority.

Context

- 4.8 The earlier Core Strategy set out a Development Strategy for the period to 2026 that has hitherto been achieved in part only. This partial achievement has had significant implications for housing delivery in the plan area.
- 4.9 In aggregate, the Core Strategy intended that some 9,000 new homes would be built in Fareham

in the 20 years between 2006 and 2026. This comprised:

- 5,350 at the North Fareham Strategic Development Area (Welborne) to meet sub-regional needs as identified in both the South East Plan and the South Hampshire Sub-Regional Strategy; and
- 3,729 elsewhere in the Borough²;

- 4.10 Over the 13 years since the start of the Core Strategy's plan period (2006/7 and 2018/19) only 4,200 new homes have been built. This is equivalent to 46% of the housing requirement in 68% of the plan period.
- 4.11 In comparison with the trajectory on page 21 of the Core Strategy, new housing has had to be accommodated in locations outside of allocated Strategic Development Area; in the four years from 2016, almost twice as many new homes have been provided elsewhere in the Borough than the 469 intended for the whole of that 5 year period 2016/21.
- 4.12 Following the Core Strategy, when the Welborne Plan was prepared in 2015, and to reflect the changed circumstances by then the Council re-calculated likely delivery at the Garden Village. Policy WEL3 identified approximately 6,000 new homes to be completed by 2036. First completions were to be achieved in 2015/16, 1,500 completions were to have been achieved by 2021 and 2,860 completions by 2026.
- 4.13 Plainly this hasn't been achieved and without question there has been a substantial shortfall in housing provision compared to the Core Strategy.
- 4.14 Manifestly, this shortfall is significant and cannot simply be put to one side. It is striking that Welborne was identified originally to meet sub-regional needs but because it hasn't delivered it now represents a source of housing to meet in a substantial part the Borough's own housing need and thus the Borough's contribution of the wider sub-regional need is much reduced.
- 4.15 Given the strategic objective defined by the Council, and in the context of the NPPF's presumption in favour of sustainable development, this has a clear implication for plan-making in Fareham. National Planning Policy invites Local Authorities to exceed the minimum housing requirement and to adopt a positive approach to planning for future housing. Plan-making should not be a simple mathematical exercise but a fundamental examination of how to best plan for the long-term future of the Borough. In this instance, and as the Local Plan Supplement was endeavoring to achieve, this enables the Council to develop a strategy for the longer term.
- 4.16 The change of direction in the Regulation 19 consultation document appears to be framed by precisely the opposite; planning for the minimum plan period and the least amount of new development plausible. Patently, that approach does not include the flexibility which a Local Plan should provide.
- 4.17 For example, had the Regulation 19 Plan retained the level of housing calculated by reference to the published Standard Method – 520 dwellings per annum – and had a lower housing requirement in fact materialized, the practical effect of this would merely have been a housing supply strategy that would endure beyond the end of the plan period. In simple terms, the

² Policies CS2 and CS15 refer

housing strategy would cater for an addition 5 years worth of housing. Given that it is beyond comprehension that housing need will not cease after 2037, this would have been a positive, adaptable, plan-led, longer term strategy.

- 4.18 The fact that the Council has alighted upon a potentially lower housing requirement without apparently considering the practical effect of retaining the existing housing requirement manifestly demonstrates a negative, rather than positive, approach to plan making.
- 4.19 Moreover, the Sustainability Appraisal has plainly not considered this as a reasonable alternative and, as such, is flawed. The Assessment of Alternatives in Section 5 of the Sustainability Appraisal relates to development locations rather than the overall quantum of development. The PPG advises that *"a sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted"*. The purpose of testing reasonable alternatives is to determine that a Local Plan promotes sustainable development when judged against reasonable alternatives, to achieve relevant environmental, economic and social objectives.
- 4.20 This negative approach is further evident when considering the components of the housing strategy which again illustrates a do-minimum approach.

Local Housing Need

- 4.21 Application of the Standard Method to calculate the Local Plan's local housing need would require 520 new homes to be provided each year, or 8,320 new homes in total between 2021-2037.
- 4.22 Alternatively, the Regulation 19 Plan is based on 403 new homes each year which is derived from the proposed revisions to the Standard Method published as a consultation document by the Government in the Summer. These proposed revisions carry no weight at the present time and do not provide any basis for the calculation of housing need for the purpose of this Local Plan at the present time.
- 4.23 Only if the proposed revisions are carried forward without alteration by Government would this serve as a basis to underpin the Plan and enable it to be submitted. Any change to the formula, as it relates to Fareham or any of its neighbouring authorities, would require reconsideration of the housing requirement in Policy H1. The Regulation 19 Plan is contingent therefore on the outcome of that entirely separate process, rather than being a Plan which the Council is able to submit for Examination. It is, for want of a better term, a "wait and see" plan.
- 4.24 As the Council appear to acknowledge themselves by the intention not to submit the Plan for Examination until the outcome of the Government's consultation is known, it is plainly not a sound approach at the present time.
- 4.25 Little more can be said about this, other than to draw attention to the obvious difficulties that have arisen in light of the Government's consultation, which have led to a significant level of opposition to the suggested changes. As recently as mid-November the Planning Minister referred to estimates of local housing need derived from its consultation exercise as *"entirely speculative"* and indicating that the revised formula was being re-evaluated.

- 4.26 It is also important to consider when the Standard Method was introduced and the practical effects of this which the Council don't appear to acknowledge.
- 4.27 The Standard Method was introduced in 2018 and the assessed level of local housing need was based on a period of 2016 onwards. The Council appear not to have grappled with the guidance in the Planning Practice Guidance in respect of this: "*Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate*". Plainly we are some way into the plan making process which commenced in 2017 and this requires the Council to have asked themselves how have housing completions compared with the level of local housing need from that point.
- 4.28 The published requirement was 520 dwelling per annum from 2016 onwards, whereas the highest number of completions was 349 in 2016/17 and less than half for the two years since where monitoring information is available.
- 4.29 The Standard Method takes account of backlog but only in so far as affordability will have increased in the years prior to the calculation and does not take account of underprovision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.
- 4.30 The following table illustrates this:

Year	Number of Completions	Level of Local Housing Need	Shortfall
2018/2019	290	520	230
2019/2020*	263	520	257
2020/2021**	132	520	388

*Projected housing supply April 2019

**Projected housing supply June 2020

- 4.31 This indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No account is taken of this in the current consultation document. Even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
- 4.32 In the circumstance where housing delivery in the Borough has been below both that anticipated by the Core Strategy and the measure of local housing need derived from the Standard Method, however calculated, the Council are plainly wrong to have selected a plan period that takes no account of this and a housing strategy that has no regard to that underprovision. This further undermines any notion of a positively prepared plan.

Unmet Need

- 4.33 Section 33A of the Planning and Compulsory Purchase Act 2004 requires a local planning authority to cooperate with, *inter alia*, other local planning authorities, and engage constructively, actively and on an ongoing basis in the preparation development plan documents, so far as relating to strategic matter. Paragraph 25 of the NPPF says 'strategic policy making authorities should collaborate to identify the relevant strategic matters which they need

to address in their plans'. Unlike problems associated with soundness, a failure to discharge the obligation in Section 33A cannot be remedied once the plan has been submitted for examination.³

- 4.34 It is clear from the work of the Partnership for Urban South Hampshire that housing provision is a strategic matter and thus there is a need for co-operation between constituent plan-making authorities. In this regard, the 'plan-making' section of the PPG provides guidance in relation to the duty to cooperate. Paragraph 022 states that strategic policy making authorities are expected to have addressed key strategic matters through effective joint working, and not deferred them while relying on an inspector to direct them. It states "[An] Authority will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any outcomes achieved; this will be thoroughly tested at the plan examination."
- 4.35 The consultation document makes an allowance of an additional 847 houses as a contribution to meeting unmet need from Fareham's Neighbouring Authorities. But as this is the Submission version of the Plan, this allowance should have regard to the co-operation referred to above. There is no evidence that this is anything other than an allowance made by Borough Council without reference to the joint working through PUSH; this is nothing else but a "cart before horse" approach.
- 4.36 The consultation document acknowledges that there is "a significant likelihood of a substantial level of unmet need in the sub-region" (para 4.4) and that over the plan period the level of unmet need in the sub-region could be circa 10,750 new homes. It is instructive that the references to unmet need in para 4.5 of the consultation document are in the context of the current Standard Method and not the higher sub-regional figure that the proposed Standard Revision indicates. In this regard, the plan appears to be "comparing apples and pears".
- 4.37 The following table compares the housing requirement from the current Standard Method and that indicated by the proposed revision.

LPA	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard Method	Proposed new Standard Method	Difference between current and proposed SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1025	+333

- 4.38 The above illustrates that whilst the Fareham figure might decline, across the sub-region the

³ *Samuel Smith Old Brewery (Tadcaster) v Selby DC [2015] EWCA Civ 1104 paragraphs 38 and 40*

overall scale of housing is greater both in PUSH East and West.

- 4.39 Over a 16-year period, the difference between the proposed new Standard Method would require an additional 10,000 new homes to be built across PUSH East. Compared to average delivery over the past 3 years, almost twice as many new homes will need to be built. This is unquestionably a step change in housing delivery and each Local Authority area will need to contribute towards this and maximise its contribution to the sub-regional requirement.
- 4.40 In September 2020 the PUSH Report to its Joint Committee looked at the potential implications of housing supply relative to Local Housing Need, and using the proposed revision to the Standard Method this still identified a shortfall of over 6,500 across the PUSH East sub-region.⁴
- 4.41 At para 4.5 of the consultation document, the Borough Council put forward a contribution of 847 dwellings towards meeting unmet need. There is no evidence of how this figure has been derived. All that is evident from the earlier passages of that paragraph is the very unclear picture that exists and which is subject to additional work by PUSH. Consequently, the proposed contribution of 847 dwellings – 13% - to unmet need doesn't appear to have any basis in a full and proper assessment of future housing requirement and supply across the sub-region. This is significant because, historically, Welborne had been identified to provide housing supply for that sub-regional purpose whereas now its contribution almost entirely to meet Fareham's housing need.
- 4.42 Switching the role of Welborne in this fashion is taking away a supply of housing identified previously to meet sub-regional needs in the longer term, when plainly that need still exists, and elevating supply available to meet the Borough's need. This denies the original intention of Welbourne, and places a very heavy reliance on one source of housing to meet local needs; on the basis of the Council's strategy, some two thirds of the Borough's housing needs would be met at Welborne.
- 4.43 Again, this illustrates why preparing a Regulation 19 Plan on this basis isn't justified and does not contribute to effective planning across the sub-region.
- 4.44 Moreover, on this basis, the evidence to justify the Council having discharged its duty under Section 33A is not at all obvious; this is particularly significant as this is the Regulation 19 Plan to be submitted for Examination.

Plan Period

- 4.45 The current consultation document is based on the plan period 2021-2037. This is 16 years and would accord with the 'at least 15 years' in the NPPF, if the Local Plan were in fact adopted in 2021. Experience of Local Plan Examinations and the length of time between Regulation 19 and adoption suggests this is highly unlikely. But assuming the Plan is adopted in the 2022 this would provide the bare 15-year plan period.
- 4.46 It is in this context that one has to consider whether the plan is "*sufficiently flexible to adapt to rapid change*". For the reasons given later we say it does not meet this requirement.

⁴ Table 4 Comparison of Housing Need and Supply 2020-2036

Delivery at Welborne

- 4.47 The consultation document's housing strategy is heavily reliant on housing delivery at Welborne, which was previously identified to meet sub-regional requirements. Table 4.2 of the consultation indicates that over 4,000 new homes are to be built at Welborne by 2037 to meet Fareham Borough's local housing need.
- 4.48 This is not a realistic assumption.
- 4.49 It has been readily apparent for some time that past delivery assumptions at Welborne could not be achieved. Despite the Core Strategy and the Welborne Plan assuming a significant number of new homes would have been built at Welborne by the present time, there is still no outline planning permission some 14 months after the Borough Council's Planning Committee resolved in October 2019 to grant permission for the outline planning application (P/17/0266/OA).
- 4.50 In our response to the January 2020 Supplement, we noted that it wasn't surprising that by that time the Section 106 had not been signed given the particular scale of that development.
- 4.51 However, by the present time, the absence of an outline planning permission raises a more fundamental concern about delivery at Welborne.
- 4.52 Nowhere do the Council provide any evidence as to when they expect outline permission to be granted, the extent of any pre-commencement works and their associated timescale, when reserved matters applications are expected and when first completions will be achieved. The closest the Council gets to any justification is that the housing trajectory has been agreed with the developer Buckland.
- 4.53 We are aware that there will also need to be Highway Agreements relating to works to the M27 Junction 10 prior to those works being commenced; again, in our experience such highway agreements are complex and can take a long period of time to complete. The works to be undertaken to the M27 and A32 are substantial. The Planning Officer's Report highlights the estimated costs of these works as £80m-£90m and that funding gap exists in relation to these works. More recently, we understand the Council has had to seek additional funding from Government to cover earlier Local Enterprise Partnership funding that has since been lost. Hampshire County Council has recently confirmed that: "The J10 works are not fully committed at this stage and there is no defined timescale for delivery." This is clearly a major risk in overall terms but also in terms of when such works will be undertaken and the duration of such works.
- 4.54 This is germane to timescales as to when development at Welborne can be anticipated, notwithstanding the milestone it reached in 2019.
- 4.55 A number of housing trajectories have been proposed for Welborne at different stages. The Borough Council's January 2017 Background Paper concerning Welborne set out the Council's assumption at that time. This suggested that 4,090 new homes would be built at Welborne by 2036. Whilst this would align with the current assumption, this overlooks the fact that circumstances have already moved beyond the key dates suggested therein.
- 4.56 If the 2017 trajectory is simply rolled forward to the present day and it is assumed that outline planning permission is granted in 2021/2022 and development commences in 2023/24 then the

total number of completions would be 3,090 dwellings by 2037 – see *Appendix 1*.

- 4.57 This trajectory is clearly sensitive to assumptions. Any delay in commencing development beyond will 2023/24 will cause fewer completions in the plan period.
- 4.58 Moreover, the extent to which 250 dwellings can be built and sustained each year from 2026 onwards is also a highly sensitive assumption.
- 4.59 We note that more recent research from Lichfields⁵ suggests that for sites of more than 2000 dwellings, the average period of time from planning to delivery is 2.9 years. Moreover, that research indicates that for scheme the size of Welborne the number of houses built each year averaged 140 dwellings.
- 4.60 If a mid point between these two assumptions of 185 dwellings per annum were achieved and sustained as the peak output, this would only yield 2,360 dwellings in the plan period.
- 4.61 It is instructive to note that to achieve 4,020 completions in the plan period would require a build rate from 2024/25 onwards of 309 dwellings per annum. A build rate in excess of 300 dwellings per annum was rejected by the Council in 2017.
- 4.62 What is clear from the above is that Welborne’s contribution to housing supply during the plan period has been over-estimated. This component of housing supply is not justified and consequently the housing supply strategy is not effective.

Proposed Allocations

- 4.63 From our analysis of proposed allocations we have been able to identify that, whilst a number of subject to current planning applications, a significant number are subject to constraints that could delay their development. A number of Sites are owned by public bodies or are subject to multiple landownerships and with existing uses⁶. Moreover, a great many are Sites within the urban areas which are likely only suited to flatted schemes to achieve the capacity numbers and may not be suitable to developers.
- 4.64 Other Sites are subject to nitrates constraints⁷ which may require a strategic solution to enable their release.
- 4.65 Consequently, it is questionable whether they will all be developed and this supports not only the principle of a contingency allowance but also the importance that that allowance reflects the overall level of uncertainty associated with the housing supply strategy.

Windfall

- 4.66 Table 4.2 of the consultation document includes a windfall allowance of 1,224 new homes between 2021 and 2037.
- 4.67 The principle of including a windfall allowance is explained in the NPPF at para 70 in the

⁵ Start to Finish (2016), Driving Housing Delivery (2018)

⁶ FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13, HA22, HA24, HA31, HA36-39, HA42, HA44

⁷ HA1, HA12, HA34, HA40

following terms:

- Firstly, there should be compelling evidence that they will provide a reliable source of supply.
- Secondly, any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 4.68 It is evident that the above is much more than a consideration of historic windfall delivery and requires the plan-maker to actively consider future supply from this source.
- 4.69 The Council's Windfall Background Paper projects forward 51 windfall completions on small sites from 2024/25 and an additional 52 windfall completions from large sites from 2025/26. The only source of information that the Council has used to arrive at these figures is its breakdown of past windfall delivery from 2009 – 2019 which averaged 101 dwellings (51 for small sites and 52 for large sites).
- 4.70 Para 3.6 of the Background Papers states: *"The estimated rate of windfall development is based on past completion rates..."* (emphasis added)
- 4.71 Para 3.9 of the Background Paper states: *"To ensure that a cautious approach is taken and windfall projections are not overly optimistic, the projections have only taken account of windfall delivery since 2009/10"*.
- 4.72 The very next paragraphs states *"Based on the preceding analysis, the windfall projections for the Borough are 51 dwellings per year from small site delivery and 51 dwellings per year from large site delivery"*.
- 4.73 It is clear that the assumption in Table 4.2 of the consultation document is derived solely from past trends and it is claimed that this demonstrates *"a compelling case"*. However, nowhere in the analysis is there consideration of whether this is a reliable source of future supply, rather it is just a forward projection of what happened in the past. The analysis does not provide any consideration of expected future trends.
- 4.74 It is important to recognise that windfall opportunities are finite. Opportunities to redevelop vacant or redundant land will have largely been exhausted by the present time because of planning policies that have prioritised such sources of supply for the past decade and longer. Consequently, future windfall over the plan period will rely to a much greater extent on recycling of land (i.e. existing uses being changed). This is inevitable a less certain source of housing supply.
- 4.75 For the purpose of assessing whether the Plan's housing supply strategy is sound, we have adjusted the windfall contribution by 25% i.e. 918 completions over the plan period.

Revised Housing Strategy

- 4.76 In the preceding Sections we have considered both the level of local housing need and the housing supply strategy providing a reasoned justification why this Regulation 19 Plan is not sound. The following table illustrates the effect of this.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	8,320	520 dpa
Under-supply 2018-2020	875	Added to reflect actual housebuilding relative to LHN
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	10,050	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect roll-forward of 2017 Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 25% to reflect finite supply
Total Supply	7,150	Sum of Supply estimates
Shortfall	2,900	

*retained at 13% of unmet need for illustrative purposes absent any Statement of Common Ground

- 4.77 The above illustrates that with these alternative assumptions, additional land needs to be identified for some 3,000 new homes.
- 4.78 Even if the strategic housing requirement were calculated simply by reference to 403 dwellings per annum, there would be no contingency to take account of changing circumstances over the plan period, contrary to the assertion in the plan to this effect.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	6,448	403 dpa
Under-supply 2018-2020	nil	N/A
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	7,295	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect 2017 Housing Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 20% to reflect finite supply
Total Supply	7,153	Sum of Supply estimates
Shortfall	142	

- 4.79 The above analysis clearly shows that Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to assumptions about housing supply, additional housing land should be allocated for development.
- 4.80 In the following Section we submit that the Strategic Growth Area identified in the Local Plan Supplement 2020 should be allocated for housing development.

5 South Fareham Strategic Growth Area

- 5.1 In our previous representations we supported the inclusion of Strategic Growth Areas in the Local Plan. Hallam control a substantial tract of land to the South of Fareham, adjoining the Stubbington Bypass, the construction of which has recently commenced. This land, along with other parcels in this location, is identified in Figure 3.2 of the Local Plan Supplement Consultation Document as the Proposed Strategic Growth Area South of Fareham.
- 5.2 The justification for the allocation of a Strategic Growth Areas is evident from the preceding Section which identified a significant shortage in the amount of new housing to be provided in the Borough and the amount of future development land allocated for this purpose. Development South of Fareham could provide housing land over the plan period, both in the immediate term and continuity over the long term.

South of Fareham

- 5.3 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. The town is the largest in the Borough with a population of around 37,300. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town.
- 5.4 Fareham is also an important economic centre, which has developed further over recent years with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane and the Peel Common Roundabout.
- 5.5 A new, mixed use masterplanned development to the South of Fareham, contiguous with Longfield Avenue, benefits from its proximity to the town centre, Daedalus, the railway station and existing local services and amenities with good access to walking, cycling and public transport links. These are locational merits that align with *Good Growth*.
- 5.6 Stubbington and Hill Head form a single urban area and have a population of c.14,300. These settlements have a range of services with a local centre, doctors, dentists, two primary schools, a secondary school and a community centre.
- 5.7 Local employment has improved with the development at Daedalus, which lies to the south east of the settlement. Development in south Fareham would delivery homes close to this economic and employment zone, providing housing for the growing workforce.
- 5.8 The Stubbington Bypass is being constructed to connect Gosport Road, Peak Lane and Titchfield Road. This will inevitably create an urbanising influence through the centre of the existing Strategic Gap. Development to the south of Fareham would assist in assimilating the bypass into the landscape and soften the impact of the road on the gap, beyond what could be achieved from constructing the bypass alone.

Development Potential

- 5.9 Paragraph 3.24 of the consultation document identifies high-level development principles and

requirements. Hallam support these intended outcomes and these have underpinned their proposals for a mixed-use masterplanned development.

- 5.10 Work undertaken over a long period of time has identified the suitability of the land controlled by Hallam to accommodate new development, how development can be arranged and the extent of mitigation required.
- 5.11 In our response to the 2019 Issues and Options consultation, we identified potential areas for development in this location and for convenience we have attached this at *Appendix 1*. Whilst this considered only land which Hallam control, we recognise that there are other smaller scale development opportunities within the general location, and that the Borough Council intend to work with landowners and site promoters to develop a Council-led masterplan which will focus on the delivery of community benefits as part of Good Growth. In this context, Hallam are committed to working with the Council and others to develop these proposals further as part of a co-ordinated approach.
- 5.12 A development scheme could comprise the following:
- Approximately 1,200 units
 - a new healthcare facility
 - a primary school
 - a care home
 - community hub
 - local shops
 - sports hub and
 - Green Infrastructure to include public open space, equipped areas of play, Sustainable Drainage Systems (SuDS), tree, hedge and shrub planting, meadows, structural woodland planting, allotment gardens and permissive footpaths and cycleways.
- 5.13 Development would be accessed from a primary and secondary access from Longfield Avenue, along with associated improvements to the existing Long field Avenue/Bishopsfield Road junction and carriageway and a primary access from Peak Lane.
- 5.14 An outline planning application for such a proposed development was submitted in June 2020 and is presently undetermined.

Accessibility and Movement

- 5.15 The accessibility advantages of this location enables positive promotion of active travel. The proposed development will be served by an internal network of footways and access arrangements that can be utilised by both pedestrians and cyclists. The site is surrounded by Public Rights of Way (PRoW) that in turn can serve as cycle/walking connections from the site to other roads in the vicinity of the site. These will be maintained and improved in order to encourage more sustainable modes of travel as an alternative to the conventional car.
- 5.16 Bus based public transport is also a feasible means of sustainable travel from this location. Service provision on the route number X5 operated by First Group provides opportunity for peak commuter travel and also for off-peak travel. The scale of development proposed is

sufficient to deliver dedicated public transport coverage between the Site and key destinations that will have the frequency and reliability to attract patronage to secure long term viability. Any improvement will be discussed with the necessary stakeholders, but it is envisaged that the development will support the introduction of new services.

- 5.17 The Eclipse Busway - a Bus Rapid Transport scheme between Fareham and Gosport opened in 2012 providing a priority public transport route connecting the two towns. The BRT scheme provides a more efficient service using new, comfortable, low-emission buses that encourages bus travel through enhancing the bus travel experience. Using the new busway, buses are able to avoid congested parts of the highway network including A32 so that passengers can benefit from reliable journey times and can plan their onward travel connections.
- 5.18 A number of new highway improvements works have been implemented or are currently under construction which is intended to improve bus journey reliability, and encourage more people to switch from car travel to using the bus. This would have an effect of helping reduce traffic numbers and traffic congestion between Fareham and Gosport, including along Newgate Lane.

Nitrates

- 5.19 The land is located directly west of the edge of urban area that forms part of the designated Chichester, Langstone and Portsmouth Harbours Eutrophic NVZ (TraC) (Nitrate Vulnerable Zone). The land is currently predominantly arable farmland with a history of mixed crops such as wheat, barley, oats, rape etc. and break crops such as peas, winter oil seed rape and beans.
- 5.20 The above is recorded on a Nutrient plan detailing fertilizer types, tonnages and time applied for each individual field. The fertilizer applied during the period of record is a mix of pig and farm yard manures.
- 5.21 It is recognised that intense farming with fertilization with natural manures will lead to nitrate leaching into the surrounding surface water and ground water environment.
- 5.22 Through development of the land, the leeching of nitrates through farming activities will be curtailed. While there will be a new source of nitrate production and leachate associated with the new development, this is considered to be at worst a neutral impact and through further assessment a net reduction in nitrate leaching can be achievable.

Biodiversity

- 5.23 The Hallam land is divided into two areas by Peak Lane; the eastern area comprises largely of arable land with hedgerows and ditches forming the compartmentalisation typical of the surrounding arable tenure and has limited nature conservation value. The western compartment consists of a large area of set aside land, with areas of arable crops, which are bound by limited hedgerows and tree lines.
- 5.24 The most significant habitat is Oxleys Coppice which is designated as a SINC and an area of ancient and semi-ancient woodland (ASNW), which has been evaluated as county level conservation value. The Scheme can ensure that Oxleys Coppice is protected.
- 5.25 Hedgerows are mostly classified under the Hedgerow Evaluation Grade System (HEGS) as moderate and moderate/high value. Only two hedgerows are classified as 'important' under the

Hedgerow Regulations (REGS). Several drainage ditches are found through the Site but only have limited marginal and aquatic vegetation. These are classified as no more than local conservation value.

- 5.26 Surveys have identified the presence of a number of protected species, bats and breeding birds. Measures to safeguard these species and their habitats can readily be accommodated as part of the development proposed. The habitats created and the species which will benefit from the mitigation measures proposed in the Site will lead to an overall beneficial effect in the long term. Similarly, in accordance with the Solent Waders and Brent Goose Strategy, a financial contribution will be made to this, based on the classification of land's suitability for supporting such species.
- 5.27 The Solent & Southampton Water Ramsar/SPA, which also includes Titchfield Haven SSSI, is approximately 700m from the Site. Portsmouth Harbour Ramsar/SPA/SSSI is located approximately 1.3km to the east of the Site at its nearest point, which also support a variety of habitats and an assemblage of dark-bellied brent geese. The Solent Maritime SAC extends from the River Hamble mouth up to Botley in the west, this is approximately 4.7km west of the Site.
- 5.28 There is the potential for a Likely Significant Effect on the Solent SPAs from an increase in recreation from new housing development within a 5.6km zone of influence of the Solent. As a result, an Interim Solent Recreation Mitigation Strategy was published in 2014 to enable initial mitigation measures to be placed, so LAs could continue to grant permission for new homes. The strategy has been updated to form the basis for future new housing up to 2034, with the Bird Aware Solent Recreation Mitigation Strategy (2017).
- 5.29 As this Site falls within the established zone of likely significant effect (5.6km), a HRA/AA will be required by the LPA; however a site specific Test of Likely Significance will be provided to facilitate the LPA assessment. The mitigations measures required to facilitate the Proposed Development will see a financial contribution provided for the in-combination effects on the Solent SPA, with additional bespoke mitigation provided within the Site to mitigate for the alone effects.
- 5.30 The details of bespoke mitigation are to be discussed with Natural England. Current proposals will include an area of County Park/Green Infrastructure to the west of Peak Lane, measuring approximately 23ha, which will include a circular walk, car park and habitat features to provide point of interest, as well as safe areas for dogs to be exercised off the lead. Alternative areas of GI will be provided around the main residential areas to the east of Peak Lane, here approximately 32ha will be provided, which will incorporate recreational opportunities and areas of biodiversity net gain.
- 5.31 The mitigation measures provided within the Site will ensure that there are no likely significant effects on the Solent alone and in-combination with other schemes within Fareham.

Strategic Gap

- 5.32 The current Core Strategy designates land between Fareham and Stubbington as a Strategic Gap. This follows such a designation being contained within earlier Development Plans; Settlement Gap policies in Hampshire date back at least 30 years when they were included within the South and Mid Hampshire Structure Plans (1988 and 1989). They were carried forward into the Hampshire County Structure Plan 1994 and the Hampshire County Structure

Plan 1996-2011. Consequently, with each new development plan needing to make provision for current and future development needs, the role and function of gaps need to be considered having regard to up to date circumstances.

- 5.33 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. As described earlier, this new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. Such a conclusion is similar to the assessment undertaken by Hallam previously.

Summary

- 5.34 Hallam support the identification of the Strategic Growth Area to the South of Fareham and have identified a development scheme that achieves the high-level development principles and requirements set out in the consultation document.
- 5.35 Importantly, development in this location can be brought forward that provides new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.
- 5.36 The merits of this location are substantial, and carefully planned development will not result in the coalescence of Fareham and Stubbington and the separate identities of these settlements can be retained.
- 5.37 As such, the allocation of land at South Fareham in the Local Plan for future development is considered wholly appropriate.

6 Policy NE5 and Policies Map

- 6.1 The Policies Map includes designations relating to Waders and Brent Geese and are associated with Policy NE5. This designation covers four categories of land – Core and Primary Support Areas, Secondary Support Areas, Low Use Areas and Candidate Areas.
- 6.2 The extent to which the land concerned is used by Waders and Brent Geese, particularly beyond the Core Areas, is transitory and can differ from time to time as a consequence of changes in agricultural practices (for example, arable land with wintering cereals provides an optimal foraging resource, whereas when this is replaced / succeeded by grassland habitats its function can change, which could affect species assemblages and regularity it is used. Changes in land use also promote further recreational uses which is the case for areas west of Peak Lane) or changes to the extent of the built environment (for example newly built structures, such as the Stubbington Bypass, will change the suitability of a location in proximity to it as a receptor). Therefore, to delineate these areas in the manner shown on a Policies Map, which affords permanence to the designation, fails to take account of the potential changes in circumstance and is not sound as a matter of principle.
- 6.3 The practical effect of this is that Policy NE5 directs the decision-maker to consider development proposals against the criteria listed therein and the status of the land by reference to the designations shown on the proposals map, which may at that point in time no longer be up-to-date or relevant.
- 6.4 Through Hallam's work in respect of the land to the South of Fareham, and through discussion with Natural England, it has identified a different classification to that shown on the Policies Map for certain of those parcels of land, as shown on *Appendix 2*. This illustrates how the application of Policy NE5 could misdirect the decision maker.
- 6.5 On this basis, these designations should not be shown on the Policies Map in the manner they are presently.
- 6.6 A more generic designation such as Areas of Waders and Brent Geese Sensitivity, which does not classify individual land parcels, would be more appropriate.
- 6.7 It would follow that Policy NE5 would be amended to require planning applications to assess and determine the use of land subject to those development proposals and at that point, when an up to date classification has been determined, the criteria and mitigation in Policy NE5 would apply.

7 Summary

- 7.1 These Representations have been prepared on behalf of Hallam Land Management Limited (Hallam), who control a substantial tract of land to the South of Fareham, adjoining the existing urban area and Stubbington Bypass, the construction of which has recently commenced.
- 7.2 This land was identified in the Local Plan Supplement 2020 as a potential Strategic Growth Area. Whilst the Regulation 19 Plan does not propose to carry forward the South of Fareham Strategic Growth Area, as is evident from these representations the need for such an allocation has not diminished.
- 7.3 The consultation document rightly identifies the Borough Council's commitment to meet the Borough's housing need by the end of the plan-period. This is plainly aligned with the NPPF and the Government's objectives. What is notably absent from the Vision and Strategic Priorities, is the recognition that Fareham is important in a sub-regional context and was previously intended to provide significant development land at Welborne to meet wider needs.
- 7.4 Policy H1 is not founded on a sound basis. In preparing and publishing this Regulation 19 Plan, the Borough Council has afforded greater weight to a potential revision to the Government's Standard Method and has disregarded the published and established measure of local housing need which has underpinned its work to date. Unless and until the Government publish a revision to the Standard Method, this version of the Plan cannot be submitted for Examination as it is plainly unsound. The Borough Council recognise this from its Committee Papers.⁸ This is nothing other than a "wait and see" Plan.
- 7.5 Only if the Standard Method is published in the same final form will the Plan be able to proceed – there is no indication if or when the Government intend to complete this exercise given the significant scrutiny it has attracted.
- 7.6 A more positive approach would have been to retain the higher level of housing as the basis of the Plan to provide surety over a long term with policy measures to manage housing supply in the event the level of local housing need was reduced. Unfortunately, the Council hasn't considered this as an option or a reasonable alternative in the Sustainability Assessment.
- 7.7 Even in the event the proposed revision to the Standard Method were confirmed as the Plan assumes, there is little if any evidence of a cogent understanding of the level of unmet need across neighbouring authorities. There is no apparent evidence of effective co-operation to justify the contribution the Plan proposes to unmet need.
- 7.8 Moreover, the Council hasn't applied its mind to the level of housing that been achieved since the Standard Method was introduced at the start of the plan making process and the date the plan is to be adopted. Viewed objectively, housing completions over that three year period were below the level of local housing need and this shortfall, which is part of a much greater shortfall when compared to the Core Strategy's housing intentions, should be accounted for.
- 7.9 Turning to housing supply, the assumption that Welborne will provide 4000 new homes within the plan period is not founded upon evidence previously produced by the Council and the level

⁸ Executive Briefing Paper 12th October 2020, para 12

of housing output assumed is at a level the Council previously considered unrealistic.

- 7.10 The windfall assumption drawn simply from past trends has not justified why this is a source of future supply. Uncertainties also exist in relation to a number of the proposed allocated sites because of landownership, extent of existing uses and location.
- 7.11 For all of the above reasons, the Plan's approach to housing will fall short of its Vision and Strategic Priorities. Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to housing supply, additional housing land should be allocated for development.

South of Fareham

- 7.12 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town. Similarly, Fareham is an important economic centre, including the Solent Enterprise Zone at Daedalus to the south of the town.
- 7.13 It is considered that development to the south of Fareham would be in a sustainable location, with good access to walking, cycling and public transport links, as well as local services and amenities. This location adjacent to the existing urban area creates a good opportunity for a natural and sustainable extension to the urban area. Development in south Fareham would deliver homes close to an important source of new employment and jobs at Daedalus.

Strategic Gap

- 7.14 The current Core Strategy designated land between Fareham and Stubbington as a Strategic Gap.
- 7.15 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. This new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. The delineation of the Strategic Gap on the Policies Map should be amended accordingly.

Proposed Modifications

- 7.16 The following Modifications are considered necessary for the Local Plan to be sound:
 - 7.16.1 The minimum housing requirement in Policy H1 to be defined by reference to the existing Standard Method;
 - 7.16.2 The housing requirement be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;

- 7.16.3 The level of unmet need that is accommodated be based on constructive, active and on ongoing engagement with neighbouring authorities;
- 7.16.4 Assumptions about the delivery of new housing at Welborne be revisited and revised down;
- 7.16.5 The windfall allowance be revised down;
- 7.16.6 Alternatively, to 6.16.4 and 6.16.5 the level of contingency be increased;
- 7.16.7 Additional housing allocations be provided for;
- 7.16.8 Land South of Fareham is allocated for housing development; and
- 7.16.9 Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood is amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- 7.16.10 The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

Subject: FBC Continued

Dear Katherine,

As discussed with you Friday 4 December I enclose the start of my comments on the consultation document which you said you would be able to put in the appropriate boxes as I am unable to as I found that I could not continue without logging on, each time which was not how the system should've worked.

When we spoke you said that you had not received the second paragraph that I submitted so I am hoping that I will start there, as you have already received my first submission.

As I am not able to view the pro forma I hope you will be able to put them into the correct boxes as obviously with only one iPad that I am using to work on and one for my notes which I have made, it would be too torturous.

So onto matters of legal compliance which I believe is paragraph 1.6

There is no mention of the 2017 unadopted draft plan although it has been confirmed that it was in the previous 2015 plan.

Although there was an overall reduction in the new housing it would appear that Warsash is actually going to take 20% more. HA1 has no joined up thinking. There should be an environmental impact on all of the sites proposed, so that each one is not seen in isolation.

Paragraph 4.19 states that many of the housing policies brackets HE256 811 1416 1820 2125 and no longer considered to be proposed allocations. I should like to know how objectively assessed housing need arrived at the fact that site HA1 was to take the bullet.

It would appear that the developers have taken advantage of the LPA's decision that proposing HA1 would mean that they have carte blanche to submit applications. I believe this is contrary to the publication plan. It would also appear that in order to fit in as many houses as possible into HA1 the boundaries have been adjusted to accommodate them. How does this not look as though the Developers have the upper hand and are actually driving this through.

So onto the Habitats directive which again comes under Matters of legal compliance.

Paragraph 9.10 is about nightrates neutrality strategic policy. I cannot see how the policy which requires designated sites to be protected and enhanced and improved is adhered to. I think the word I am looking for is there should be a net reduction the designated sites in unfavourable conditions. The LPA's way of adjudging is the exact opposite. It would appear that this is in direct contravention of both the habitats directive and the publication plan policies. The developments contemplated would be negatively impacting the SAC and RAMSAR sites. I cannot see that under these circumstances it would be a valid option.

I am calling it a day at present and wonder if you can reply to acknowledge receipt of this and that I am actually doing the right thing and making comments that you can import into the documentation,

Many thanks,

June Ward

Dear Katherine,

This next part of my document relates to the Test of Soundness

I am not at all happy with the settlement definition.

Policy HA1, which is supposedly a greenfield site is proposed to be changed to an urban area – via the redefinition of settlement boundaries reference WW 17. Greenfield sites are not particularly favourable for development as it says in the forward to the publication plan.

Paragraph 2.10 says that Fareham Borough aims to retain the identity of the amazing valuable landscape and settlement definition, protecting it's natural, built and historic assets. As someone who has lived in Warsash 45 years and been conversant with this area for nearly 10 years before that, ie the late 1960's, is a complete contradiction. What was once a very gentle countryside location seems to have been redesignated giving it up and status. And the change of the settlement boundary to enable this to happen is in my view completely unethical and beyond belief. I take exception to the fact that policy HP1 calls for the efficient use of existing buildings to meet such need on a 1 for 1 replacement dwelling basis. This is not applicable for HA1 and it would appear that FBC has managed to redraw the urban boundary.

My next comment on test of soundness is where infrastructure is concerned.

This concerns policy HP4 to be found paragraph 5.24; I think HA1 demonstrably fails to have any thing other than a detrimental effect on the environment, certainly the traffic(witness the two and a half hours to get off the motorway on Friday 4 th December, where all roads in and out of Warsash were snarled up, as we are a peninsula....or has this not occurred to anyone) and amenity has implications. Even now I feel that I cannot venture out too far from Warsash for fear of not getting back at a reasonable time due to the amount of traffic on the few roads in and out of Warsash. Warsash almost appears to be a prison! Don't go anywhere because you can't get back to your house!

This ties in with my next point policy HA1. Page 51 talks about traffic routes. As I have said earlier it almost feels that one is imprisoned in Warsash. I note that there was a recommendation that there should only be six dwellings and Greenaway Lane now I see that the plan proposes for 140 houses and that to enable this to be accessed the lane needs to be widened. I think the clue is in the word Lane. This is a delightful lane to walk through but with that amount of traffic proposed would be considerably dangerous. It is already "take your life in your hands to cross Warsash Road "let alone the impact of trying to walk within what was once considered countryside. As one gets older and appreciates the ability to be able to walk along country lanes. Page 54 suggests there should be seven new accesses onto an incredibly busy Brook lane and Lockswood Road as well as an additional iaccess at Brook Lane via three entry points from Greenaway Lane. I have already had to change my surgery where I was a patient for 40 odd years as it was impossible to get to the surgery on time due to the amount of traffic. My surgery is now in locks Heath Centre. I note that there was an occasion some time in the last few few weeks that the Air ambulance was unable to land; and ambulance was unable to get there because of the gridlock. My point is very much that the proximity of these access points and the position of such will cause even more gridlock. We are a peninsular we are hemmed in. More traffic will make us feel that we are even more in a cage.

Continuing with my other comments about infrastructure

Paragraph 10.15 where has that been an analysis of roads where the new houses are proposed. If we are considering 830 new dwellings what about the transport assessment for HA1. Although there could be an average of two cars per dwelling I know from experience that at one point, with our daughters coming and going from University, we had five cars in the driveway, which we could accommodate.....many of the new homes will not have this advantage, and extra cars will be accommodated on the roads.. how therefore is there no reference for the mitigation required to reduce congestion by 2037. Plan as presented failed the test of soundness by not being positively prepared in this respect. In this very Rural area one has to have access to a car to get anywhere, unless being confined to one's home is the way forward for FBC. I cannot see that paragraph 10.14 helps any of us.

I have had the pleasure of one of my family is moving closer to live with me in Warsash and the boys are very involved in outdoor activities so it was a joy that I saw there was provision of two junior football pitches however these appear to be missed off of the master plan?

Document 3 for FBC

Dear Katherine,

This relates to Test of soundness-

Housing need methodology

I think there is a disparity CE paragraph 3.27 figure 3.2. The map shows that there are eight possible growth areas when there are actually more than this. Could you confirm which is the correct one.

Again paragraph 3.37 does not align with paragraph 4.13 regarding the definition of small-scale development. In other words, is it sites of less than 1Ha or development of not more than four dwellings.

Again under the same heading; paragraph 4.2 of the publication plan is dubious as it bases housing numbers on the proposed new methodology for calculating need and there is some concern that this may not be adopted by the government. Also page 37 paragraphs 4.12, 4.16 and policy HP13 illustration says that the contingency barrier of 1094 has been made. I think the plan is very dependent that 4858 houses at Welbourne will be delivered.

Occupancy rates

Paragraph 5.41 states that a four or five bed house would have an average occupancy rate of 2.4 with regard to nitrate budget calculations. However it also states that the range of occupancy for affordable homes will be between 4-6 persons. This does not marry up with the claims in the publication plan for what the council needs and requires.

Carbon reduction

Paragraph 8.60 section 8 does not state what the target should be for the requirement of meeting CO2 emission targets. It simply refers to individual developments power generation. I would contend that the plan is not positively prepared.

Paragraph 11.34 does not state what the meeting of CO2 emission reduction targets should be. The plan just refers to individual developments power generation so again I contend that plan is not positively prepared.

Paragraph 11.36 no standards have been set for the developers to design for natural ventilation and green infrastructure. I cannot see how just meeting building regs, allies with the Governments needs to meet the promised carbon reduction. The council should lead by example by setting standards to ensure that developers are designing for sustainability. We need to look to the future using the new standards SA10.

Retail facilities

Paragraph 7.13 if Warsash is to have more houses then there will be additional retail facilities needed and with that will be the need for more parking spaces as many who have lived in this area for decades need to use their own transport for shopping, hairdressers, and many other facilities that this village has provided. It is already a job to cross the road from one side to the other and more cars to the area will make this even more impossible. There would need to be a crossing area to allow children to cross safely to get to the bus stop or to Brookfield School as well as the many elderly people who need to cross from one side to the other.

Paragraph 7.18 although out-of-town shopping is discussed it is not however defined. As one gets older one prefers to take ones custom to the local shops as driving is not so pleasurable. If we are to be encouraged to shop elsewhere this will increase the amount of traffic on our heavily congested roads.

Education

Paragraph 10.26 infrastructure delivery plan section 5.5. I note that education is planned with Hampshire county council however the period of any proposed extensions only covers to 2021. The plan however goes up to 2037. My grandchildren are already in three different schools within the area, two of which need cars. Offering houses to be developed but then not having school places it's not a sound approach to help to realise the dreams of future generations.

Paragraph 10.27 Infrastructure delivery plan table item 83 calls for section 106 provisions of additional early years foundation provision within the western wards. However H a one does not say if there is going to be a nursery or preschool within the proposed development area. There should be a child placement contribution to be allocated as there are over 1000 new houses being proposed for the Warsash area alone. Again If parents need childcare provision they would have to travel out of this immediate area in order to access provision; not at all ideal, adding to traffic chaos, length of time travelling to and from child care setting and not allowing children to make friendships with those who they might be at school with when they reach statutory age.

Healthcare

As regards Paragraph 10.26 the infrastructure delivery plan calls for the expansion of healthcare provision through further GP practices in the western wards. The document however only provides an historic timeline through dating the local plan. This is not a sound approach considering that HA1 will bring in additional 830 houses. It is already impossible to get an appointment at the nearest GP practice within a week.

Complies with duty to cooperate Housing need methodology

Paragraph 1.28 which agrees to take up the shortfall of homes from Portsmouth, numbering 847, would appear that FBC are taking a risk as the new methodology for calculating housing need has not been signed off by the Government. Also during this time of public consultation the housing delivery test will not be available

Paragraph 3.10 The rewilding of the Stubbington strategic gap was made without consultation with the council offices or elected members. It came via an announcement through a press release after the start of the full council meeting, which was in the process of debating this plan.

	Legally compliant	Sound	Complies with the duty to co operate
Total	4	4	4
Yes	1 25%	0 0%	1 25%
No	3 75%	4 100%	3 75%

Respondent: Unknown1 Unknown1 (Unknown1)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.27 fig 3.2 There are actually more than the indicated 8 potential growth areas shown on the map (assuming that these are construed as being the proposed allocations). This needs correction.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Either change the number of potential growth areas or modify the Map to be consistent with the figure of 8

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Update the Map or change the number (8) mentioned in Para 3.27

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Russ Wright (1712-17936)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The LPA has relied on a recently-proposed (but not adopted) Central Government algorithm for deciding where houses should be located. As this has now been updated, with an emphasis on brownfield sites and sites in the North and the Midlands, the LPA needs to revise its methodology and calculations for Housing Needs in the Borough as a whole and in particular in strategic sites such as within Warsash and the Western Wards.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should use the latest methodology for calculating Objectively Assessed Housing Need in line with Central Government Policy

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Plan should implement the new algorithms for calculating Housing Need

Your suggested revised wording of any policy or text:

Not Applicable - The Local Plan needs to be completely revised to incorporate the Government's latest Standard methodology for calculating Housing Needs in the Borough

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mrs Jill Wren (1812-56810)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The LPA has relied on a recently-proposed (but not adopted) Central Government algorithm for deciding where houses should be located. As this has now been updated, with an emphasis on brownfield sites and sites in the North and the Midlands, the LPA needs to revise its methodology and calculations for Housing Needs in the Borough as a whole and in particular in strategic sites such as within Warsash and the Western Wards. The Publication Plan is invalidated as a result of implementing the wrong algorithms for Housing Needs.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should use the latest methodology for calculating Objectively Assessed Housing Need in line with Central Government Policy

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Plan should implement the new algorithms for calculating Housing Need

Your suggested revised wording of any policy or text:

Not Applicable - The Local Plan needs to be completely revised to incorporate the Government's latest Standard methodology for calculating Housing Needs in the Borough

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mrs Charlotte Varney (2011-171355)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 3.27 fig 3.2 There are actually more than the indicated 8 potential growth areas shown on the map (assuming that these are construed as being the proposed allocations). This needs correction. Housing Need Methodology Para 3.37 is in conflict with Para 4.13 over the definition of small-scale development – is it sites of less than 1 Ha or development of not more than 4 dwellings? Para 4.2 of the Publication Plan is unsound because it bases housing numbers on a proposed new methodology for calculating need and there is a tangible risk that it may not be adopted by the government. In addition Page 37 Paras 4.12, 4.16 and Policy HP1 Illustrates that whilst a contingency buffer of 1094 homes has been made, the Plan is heavily reliant on the certainty of delivery on 4858 houses at Welborne.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Para 3.27 fig 3.2 There are actually more than the indicated 8 potential growth areas shown on the map (assuming that these are construed as being the proposed allocations). This needs correction. Postcode:	
Telephone Number:	
Email Address:	

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 1.5 Introduction: Statement of Community Involvement and further Paragraph 2.1 says a “variety of methods” should be used to solicit comments from the public. Because paper-based documents failed to be employed across the borough, a large proportion of residents were deprived of sharing their opinion. This was exacerbated by Covid restrictions, limiting the access to libraries and the council office. The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents’ concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board. It is discriminatory that community-generated evidence carries less weight than that provided by Developers consultants. E.g. regarding previous use of land in Nitrate budget calculations similarly with traffic survey results captured by residents and Community Speedwatch teams.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should make another attempt to achieve a reasonable level of Community Involvement

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Allow for public opinion to be expressed through the appropriate channels and provide a mechanism for evidence collected by residents groups to be equally considered as that from Developer's consultants and associates

Your suggested revised wording of any policy or text:

The LPA will hold another Public Consultation on the Plan during the Summer of 2021 where their views and concerns can be properly considered

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number! There is no joined up "Masterplan" for HA1 (with developers working in complete isolation of one another). Therefore, another environmental impact assessment must be conducted showing the cumulative effect of HA1 in its entirety. Para 4.19 Housing policies HA(2,5,6,8,11,14,16,18,20,21,25) are no longer proposed allocations. So, why was HA1 singled out as an allocation and how was the Objectively Assessed Housing Need arrived at for this site? Developers have taken advantage of the LPA's decision to propose HA1 within (the now defunct) 2017 Plan and have submitted Applications that the LPA have resolved to grant permission on (many ahead of and likely contrary to) the Publication Plan. Others claiming their sites fit well with HA1 has now resulted in the boundaries of HA1 being adjusted to accommodate them. This seems to mark an inappropriate powershift toward the Developers.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

HA1 needs to be re-evaluated from the point of view of reducing overall number of dwellings (by conducting an OAN on the Warsash area alone). The Plan must also ensure a "joined up" approach is taken to the many Developers sites and the CUMULATIVE effects caused rather than the current piecemeal "Salami-Slicing" approach

How would the modification(s) you propose make the Local Plan legally compliant or sound?

HA1 would be properly re-assessed (starting from the point of the Extant 2015 Plan numbers and not the unadopted abandoned draft plan of 2017)

Your suggested revised wording of any policy or text:

HA1 will be re-assessed in the light of confirming the Objectively Assessed Housing Need in Warsash and the Western Wards and any Allocation sites will be considered both individually and as a whole to ensure the Cumulative effects on the infrastructure and environment are properly taken into account

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Paragraph: 9.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 9.10 Whereas the LPA is aspiring to Nitrate Neutrality, Strategic Policy NE1 requires designated sites be protected and ENHANCED Likewise Para 9.50 (Policy NE4) confirms permissions will be granted when the integrity of designated sites be maintained or IMPROVED. Finally, Page 199 Para 9.54 indicates that proposals for development should provide a net REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA’s approach therefore contravenes both the Habitats Directive and the Publication Plan in respect of these policies. Furthermore, a leading QC’s opinion is it is unclear how any development could be contemplated in the Western Wards without negatively impacting the SAC and RAMSAR sites and therefore based on proximity alone, this would invalidate the deliverability of these developments. As per advice from Natural England, it is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves beyond scientific doubt, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been mitigated (rather than compensated). There is doubt that the LPA is applying the Natural England advice correctly and lawfully in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA must ensure that mitigation of eutrophication complies with the directive to REDUCE overall Nitrate Levels and that inline with Natural England Advice that protected sites (SAC, SPA, RAMSAR) are not compromised because simple broader-region off-setting has been used as opposed to Local Mitigation of effects on those sites

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Plan would become consistent with Advice From Natural England and the Habitats Directive

Your suggested revised wording of any policy or text:

Sites will be allowed where Nitrate Reduction mitigation can be proven at a local area level

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 “Strategic Priorities” which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manœuvre by stealth of the council, to suit its own objectives.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Greenfield Sites will be assessed in their own right and Settlement Boundaries shall not be altered to include large proposed Housing Allocations until the Objectively Assessed Housing Need for the immediate vicinity have been considered. Similarly no redesignation of Greenfield sites to Urban status shall be allowed until OAHN can be proven to justify this.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Remove changes to Settlement Boundary as indicated in WW17 and apply Greenfield Site aspirations to HA1

Your suggested revised wording of any policy or text:

HA1 is in the Countryside and as such any consideration of Housing Allocation should conform with the Policies for Development in the Countryside and the Aspirations of the LPA to maintain such areas as a last resort for Development

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Policy: DS1 - Development in the Countryside

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Do not redraw the Settlement Boundary in WW17 and exclude HA1 as it does not meet requirements of DS1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Would then comply with DS1 and HP1

Your suggested revised wording of any policy or text:

HA1 is in the Countryside and outside Settlement Boundary. It does not meet the requirements of existing dwelling replacement in HP1 and therefore should not be considered for allocation without meeting the further requirements for development in the Countryside

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Policy: HP4 - Five-year Housing Land Supply

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Re-Assess HA1 in respect of being outside the Urban settlement and in terms of OAHN and Local Sustainability from an amenities and infrastructure perspective

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that Development in the Countryside is only considered with the requirements set forth in the relevant Policies and that any allocation proposed is locally sustainable through the addition of amenities and infrastructure to support the number of new dwellings proposed.

Your suggested revised wording of any policy or text:

HA1 Allocation needs to be re-evaluated to ensure the appropriate amount of infrastructure and amenities are delivered before any Development begins

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

7) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockwood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full Local Transport Assessment needs to be conducted for the routes serving HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that traffic and safety implications of an additional 830 dwellings in a relatively compact area have been properly considered

Your suggested revised wording of any policy or text:

The LPA will carry out a Full Local Transport Assessment for HA1 to determine the flow of traffic and congestion cause through the additional 1600 vehicular movements each day. In particular the safety of Brook Lane will be reviewed in the light of the "Pinch point" just beyond the School, which is on a blind corner and likely to result in injury or fatality, either from a head on collision or a vehicle striking a pedestrian from having to mount the kerb.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

8) Paragraph: 10.15

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full local Transport Assessment will be conducted for the routes serving HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure it was Positively prepared by taking into account the challenges of increased vehicular movements caused by HA1

Your suggested revised wording of any policy or text:

The LPA will conduct a full and thorough Local Transport Assessment to determine any traffic and safety issues created by HA1 and will ensure that the appropriate mitigation has been agreed before any allocation is approved.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

9) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 14.6 of Final Transport Assessment reads; "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area HA1, of the local plan with 830 homes and isn't assessed within the Transport Plan document.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The Transport Assessment has only been done at the Macro level (Strategic) and not local level - Need a detailed Transport Assessment for HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that the appropriate mitigation is in place for the additional traffic created by an extra 830 dwellings in the local area

Your suggested revised wording of any policy or text:

The LPA shall conduct a detailed Local Transport Assessment for HA1 before an allocation is approved

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

10) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: Page 52 indicates the need for the provision of "2 junior football pitches" Why are these not shown in the Masterplan?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include on the Masterplan where the two junior football pitches are proposed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Masterplan would be made consistent with Policy HA1

Your suggested revised wording of any policy or text:

Two Junior football pitches to be shown on the masterplan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

11) Paragraph: 3.27

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.27 fig 3.2 There are actually more than the indicated 8 potential growth areas shown on the map (assuming that these are construed as being the proposed allocations). This needs correction.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Either change the number of potential growth areas or modify the Map to be consistent with the figure of 8

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Update the Map or change the number (8) mentioned in Para 3.27

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

12) Paragraph: 3.37

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.37 is in conflict with Para 4.13 over the definition of small-scale development – is it sites of less than 1 Ha or development of not more than 4 dwellings?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Ensure the numbers are the same in both Paras

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Change either Para 3.37 or 4.13 to make them consistent

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

A1 Is an Agent Appointed?

Yes

No

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan. You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Chapter 3

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy DS1 : Development in the Countryside.

B1c Which part of the Policies Map?

Those relevant to DS1 d)

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input type="checkbox"/>	<input checked="" type="checkbox"/>

B3 Please provide details you have to support your answers above

Please see attached document – BJC Reps re policy DS1 d)

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The revision of Policy DS1 (d) as suggested in the attached document. And amended as set out below (B4c).

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would go some way towards recognising the wider need for education facilities, as required by the NPPF, albeit potentially short of meeting the requirement to plan positively for the provision of community needs as per paragraph 92.

B4c Your suggested revised wording of any policy or text:

New wording to say:-

d) is for a new or replacement building, conversion and/or extension either within an existing education facility or on a new site if suitable alternative sites cannot reasonably be accommodated within the urban area. Such facilities should not result in the loss of playing fields and/or sports pitches unless it can be demonstrated that these facilities are no longer required or they can be adequately replaced elsewhere on site.

The policy should not refer to sites on the Policies map unless all school/education sites are shown.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

i) To explain, if necessary, the current need for new education facilities by at least one provider who has a waiting list for places including places requested by the Local education Authority and whose students include those with a need for a non-urban location.

ii) to explain, if necessary, the current lottery in terms of when educational contributions might or might not be required and the lack of clarity in when that may arise and what facilities may or may not be provided by such contributions.

This may change depending on the response of the LPA to these suggestions.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Comments on FBLP Review with regard to Education Provision and Policy DS1

These comments set out in brief detail why it is considered that the Plan is **not sound** and **fails in its duty to co-operate** with other local authorities (specifically Hampshire County Council) as education authority.

1. The Plan is not sound.

- 1.1 For the Plan to be sound it needs to comply at least broadly with Government advice and specifically with Policy as set out in the NPPF.
- 1.2 Chapter 8 of the NPPF addresses the correct approach to promoting healthy and safe communities, with paragraph 92 advising on the correct approach to a broad range of community services and needs, and paragraph 94 specific advice about education/school places. The Plan fails to follow this advice in a broad sense, as a potential result of which Policy DS1 (specifically d)) is flawed and inadequate.

In a broad sense

- 1.3 Whilst chapter 3 of the Plan sets out the approach to identifying housing and employment needs, and the consideration to issues such as climate change, and transport, no consideration appears to have been given to assessing the future education (or health) needs of the borough, either as they currently exist or as these will change as new development (as proposed in the Plan) comes forward. It is noted that some allocations refer to the need for possible educational contributions, but these are not quantified, and no guidance is provided on how these needs will be met.
- 1.4 It is now common for many appeals relating to medium/large housing sites to seek a contribution to new educational facilities, but rare for details to be available of what facilities are needed and how these needs may be met/ a contribution used to assist. These details should be set out in the Plan, setting out how current needs will be met, plus the additional needs that will arise from new development (as proposed in the Plan)

Specific concerns re Policy DS1 d)

- 1.5 There is a known need for new school places for children with special educational needs, which cannot be met in mainstream schools, and for which HCC as education provider seeks to locate children with these needs into schools run by other providers. There is currently a waiting list for such places, meaning that some children are unable to be placed as required. The Plan does not recognise this need or make adequate/any provision for new provision to be made.
- 1.6 Many existing school sites within the urban area are already at or close to capacity, with limited or no space for extension. New sites for schools are difficult to locate within an existing urban area, especially if these will also need new playing fields to complement classroom facilities, unless specific sites are identified in a local plan. No sites are identified.
- 1.7 New schools may need to be located on the edge of an urban area, in the countryside, and some special needs are best provided on sites more remote from busy urban areas. This is not permitted by the Plan.
- 1.8 Policy DS1 d) only allows for the extension of educational facilities within existing school sites, where land may already be very limited. It does not allow for any new educational provision outside of the urban area. Hence the Plan not only fails to provide sites for an existing identified need, but also to allow for new sites to come forward, outside the urban

area, to meet future needs. BJC Planning represents one client urgently seeking new school facilities.

1.9 This lack of positive provision, and the restrictive nature of DS1, fails to satisfy the policy requirements set out in para 94 of the NPPF, specifically:-

- fails to ensure a choice of school places,
- fails to meet the existing educational needs, or to plan for future needs,
- fails to give any weight to the need to create new schools,
- fails to set out how the LPA has worked with HCC and other providers to identify needs and to ensure that these are provided.

1.10 It is noted that the Policies Map does not show all existing educational facilities facilities, so either all facilities need to be shown, or the reference to this deleted.

Changes needed to DS1 d)

1.11 As a minimum the Policy needs to recognise that new schools/educational facilities may be necessary that cannot be accommodated on existing school sites, and to allow for such facilities in the countryside, where a need can be demonstrated. This might be achieved by:-

-adding the word “either” after ‘extension’ and before ‘within’ and “ or on a new site if suitable alternative sites cannot reasonably be accommodated within the urban area Such facilities should” after ‘educational facility.

- Delete reference to sites identified on the Policies Map.

2. Duty to co-operate.

2.1 The Plan sets out in chapter 3 the discussions with other authorities to address housing and employment needs, but there is no indication of any collaborative working with the education authority (HCC) or indeed other service providers (such as health) to identify existing needs, the need likely to arise as a result of other proposed developments (specifically housing) or to include provision for this within the Plan (or elsewhere).

2.2 This lack of collaboration is currently evident in the difficulties set out in para 1.4 above, and needs to be improved so as to provide certainty to developers (and to planning officers considering an application) about what the educational needs arising from any development might be, how these are to be quantified, or what additional provision, or contribution, is justified to meet that need. In the absence of such details, and co-operation between the LPA and the education provider, there is no clarity for developers, and no certainty for the LPA that these needs will be addressed.

2.3 Given that the Plan identifies where all new housing (and employment) will be located, there is no reason that it should not also include details of any future education provision necessary to meet these needs, and policies setting out how these needs might be met. This should include not only mainstream education, but also special educational needs.

15th December 2020

FAO: planningpolicy@fareham.gov.uk

Fareham Local Plan 2037 Publication
Regulation 19 Consultation

Dear Sirs,

Please find attached comments from CPRE Hampshire regarding the Regulation 19 Fareham Local Plan 2037 consultation.

Firstly, a general point; CPRE Hampshire is extremely pleased to see that Fareham BC have approached their new Local Plan from a landscape-based perspective, a process which we wholly support. Furthermore, we fully endorse Fareham BC's inclusion of a Climate Change policy, which must underpin all other policies and spatial planning.

Furthermore, we are pleased to see that Fareham have adopted housing numbers based on the latest available housing projections from the ONS, the 2018-based projections, which show a considerable reduction in estimated local need.

However, we remain disappointed that there seems to be no mention of a potential new South Hampshire **Green Belt** in the Reg 19 consultation. In an earlier consultation by Fareham BC in July 2019, there were a number of mentions of this option, notably in Section 10c regarding the Meon Valley, where it said "The Council will also be working with PUSH to consider the potential for greenbelt land across local authority areas, and there could be scope for this area to become part of a South Hampshire greenbelt." As CPRE Hampshire has long campaigned for a sub-regional area of restraint in order to encourage urban regeneration and prevent sprawl, this was very much welcomed. Sadly, this does not seem to have been included in the Reg 19 document, and we consider its exclusion to be a significant wasted opportunity, as the NPPF allows local authorities to designate Green Belt as part of the Local Plan process. It has been agreed that the PFSH authorities are to consider a new Green Belt as part of their forthcoming Statement of Common Ground and we would have hoped to see Fareham BC leading the way.

CPRE Hampshire has completed Response forms for individual policies which are attached below this letter, but in summary our headline comments are as follows:

Development Strategy

Strategic Policy DS1 Development in the Countryside: CPRE Hampshire agrees with these principles but notes that a South Hampshire Green Belt could aid considerably in achieving these goals.

Strategic Policy DS2 Strategic Gaps: We note the decision to re-define strategic gaps (the Meon and Fareham-Stubbington gaps) and suggest that a new Green Belt could achieve this. An area could easily be defined to encompass the Meon Valley, which could link to an area of larger Green Belt to the north of the Borough in Winchester District.

Strategic Policy DS3 Areas of Special Landscape Quality: CPRE Hampshire agree with Fareham BC's analysis of the Borough's varied landscapes and supports any intention to define them as Areas of Special Landscape Quality, illustrated in Figure 3.3. However, CPRE Hampshire suggests that some of these could be further protected if they also formed part of a wider South Hampshire Green Belt, in particular the Upper Hamble Valley, the Meon Valley, the Forest of Bere and Portsdown Hill.

Climate Change

Strategic Policy CC1 Climate Change: CPRE Hampshire believes that one of the most fundamental ways of combating the likelihood of adverse climate change, is to plan development where it can use better public transport and be less reliant on the car. The aspirations in Policy CC1 are more about how development can respond to climate change, and rather less about how spatial planning of future development can help prevent it. We consider that this is a missed opportunity. However, we feel that Criterion a) does not go far enough. According to Camilla Ween, Harvard Loeb Fellow, speaking on behalf of Transport for New Homes “Transport is responsible for about 26% of greenhouse gas emissions, much arising from personal car journeys. Our society will not be able to achieve the UN goals if we do not change the way we travel; that means we need to create new communities that are NOT car dependent. That means careful consideration of where new development is located, as well as how we design new communities, for example, places that are well connected with high quality public realm and movement infrastructure that encourage people to want to move to a car-free lifestyle.” It must be a fundamental tenet of the Fareham Local Plan that NO development should be permitted that relies on the car as its main means of access.

Nothing less than a drastic change to spatial strategy and a move away from South Hampshire’s historic pattern of sprawling suburbs will enable any meaningful contribution to the fight against adverse climate change. We owe it to future generations to do our utmost to shift patterns of behaviour that have become entrenched with the use of the private car. Even electric cars will not solve many of these issues as they still leave residues from tyres and fluids and are unsustainable in terms of battery manufacture. The adoption of a South Hampshire Green Belt would assist this by encouraging urban redevelopment, and preventing sprawl into the countryside where modal change to walking, cycling and public transport is very much more difficult to achieve.

Housing

Policy H1 Housing: CPRE Hampshire recognises that the current guidance from MHCLG requires the calculation of local housing need (LHN) based on figures from the 2014-based household projections, although a recent MHCLG consultation suggested a new methodology. Whatever the methodology, CPRE Hampshire supports Fareham BC in using the most up-to-date household figures based on the 2018-based projections. We also welcome the removal of Policy HA2 from the Reg 19 Local Plan.

Policy HA1 Warsash: CPRE Hampshire does not believe that the proposed development around Warsash can be considered truly sustainable, reliant as it is on the car as the main means of transport. We are concerned about the lack of a masterplan and believe the proposed framework does not fulfil a place making function.

Policy HP4 Five-Year Housing Land Supply: CPRE Hampshire has significant concerns about the unintended consequences of this policy, specifically its linkage with DS1, and believe that it may lead to site selection looking outside the Urban Area in the first instance.

Policy HP6 Exception Sites: The potentially inadvertent use of the word OR in Criterion c) could allow significantly large exception sites to be allowed, as long as they remain below the threshold of 5% of the size of the adjacent settlement. There should be a fixed upper limit.

Natural Environment

Strategic Policy NE1 Protection of Nature Conservation, Biodiversity and the Local Ecological Network: CPRE Hampshire supports the use of ecological network mapping to conserve nature and protect biodiversity and as a tool for influencing spatial planning.

Policy NE2 Biodiversity Net Gain: CPRE Hampshire supports the requirements for 10% biodiversity net gain on all development.

Policy NE4 Water Quality effects on the SPAs, SACs and Ramsar sites of the Solent: CPRE Hampshire understands there is an outstanding judicial process underway regarding the effectiveness of Fareham BC’s proposals for mitigating nitrate and other pollutants on the Solent and other protected waterways. At this point, CPRE Hampshire is therefore unable to endorse the proposed policy until the legal issues have been resolved.

Policy NE6 Trees, Woodlands and Hedgerows: CPRE Hampshire agrees with any policy that supports the preservation or enhancement of trees, woodlands and hedgerows.

Policy NE8 Air Quality: CPRE Hampshire supports the requirements for air quality improvement but considers more could be achieved if development were only to be permitted in locations around mass public transport hubs, rather than being car dependent.

Policy NE9 Green Infrastructure: CPRE Hampshire agrees that green infrastructure is important to the wider ecological network and to the health and wellbeing of residents but suggests that it would be better protected in perpetuity were it to be formalised as part of a new Green Belt.

Transport and Other Infrastructure

Strategic Policy TIN1 Sustainable Transport: CPRE Hampshire recognises that Fareham BC aspire to have ‘good growth’ with existing and proposed transport corridors influencing choice of development, but we feel the policy does not go far enough. The Council should feel empowered to reject development which is not already located around, or can provide, public mass transit hubs, in particular the rail network.

The principles of development and transport as set out in the Transport for New Homes checklist should be followed - <https://www.transportfornewhomes.org.uk/the-project/checklist-for-new-housing-developments/>.

Design

Strategic Policy D1 High Quality Design and Placemaking: The design quality of future developments starts with overall masterplanning and landscape context as well as specific building details. Fareham has seen a proliferation of poorly designed car dependant nondescript developments over recent years, and it is critical that major improvements are made for the future.

Yours faithfully,

Caroline Dibden

Vice-President
CPRE Hampshire

Paragraphs 3.29 – 3.36

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy DS1: Development in the Countryside

B1c Which part of the Policies Map?

Areas of Special Landscape Quality and Strategic Gaps

- a) East of Welborne,**
- b) the Strategic Gap along the Meon, and**
- c) to the north-west of the borough.**

2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire STRONGLY SUPPORTS the overall approach taken by Fareham BC in the Fareham Local Plan 2037 for a spatial strategy based on countryside, which is justified as it is in accordance with the aspirations as set out in the NPPF for development to be brownfield first, and for countryside to be protected for its intrinsic value and beauty, and for protection of Best and Most Versatile agricultural land. It is also supported by the Government's 25-year Environment Plan and for the recommendations as set out by the Climate Change Committee.

Furthermore, CPRE Hampshire SUPPORTS the Vision for the Fareham Local Plan 2037 which states that Fareham BC seek to retain its identity, and the identity of individual settlements within the Borough, through measures that seek to retain the valued landscapes and settlement definition.

We also SUPPORT Strategic Priority 2 which seeks to maximise development in the urban area and away from the wider countryside, valued landscapes and those of special quality and spaces that contribute to settlement definition.

CPRE Hampshire believes that the Vision and Strategic Priority 2 would both be better achieved if a new Green Belt was designated, due to its permanence and effectiveness. We submitted to Fareham BC and to PFSH a report by NEF Consulting on the potential socio-economic and environmental benefits of a Green Belt: <https://www.cprehampshire.org.uk/our-campaigns/south-hampshire-green-belt/>. This demonstrates the considerable financial benefits as well as to health and wellbeing, climate change and natural capital of protecting the green space near to population centres, in perpetuity, something that only Green Belt is designed to achieve.

Looking at the specific policy wording, CPRE Hampshire believes that criterion (e) of **Policy DS1** is unsound, specifically in the way it permits development in the countryside that is compliant with Policies **HP4, HP5 and HP6**. Permissions that might be compliant with these policies appear to be in direct contradiction with the other criteria in **Policy DS1**, and the policy is therefore internally inconsistent.

HP4 relates to the Five Year Housing Supply (5YHLS) and allows residential development outside the urban area boundary where the Council is unable to demonstrate a 5YHLS. It is believed that the Government intends to remove 5YHLS test in the planning reforms, so this policy may be redundant and should be reworded to future proof its deletion. However, that notwithstanding, the main problem is that the wording of Policy HP4 and its linkage with **DS1** could unintentionally lead to countryside locations taking priority over alternative, more sustainable, urban or brownfield locations.

HP5 relates to the provision of affordable housing on sites of 10 or more, and its linkage to **DS1** could unintentionally suggest that Fareham BC accepts in principle the development of ANY affordable housing site outside the urban area boundary. The risk is that the linkage could potentially enable large scale housing development in the countryside as long as it could be demonstrated that 40% affordable housing would be achieved.

HP6 relates to small rural affordable housing exception sites, and whilst CPRE Hampshire supports the provision of rural affordable housing, the concern is that the linkage with **DS1** could inadvertently lead to a series of separate applications which in combination amount to significant levels of development in the countryside. The cumulative impact on the separation of settlements resulting from a number of sites each individually sub- 1 hectare or <5% of the adjacent settlement must be considered, but at the moment the policy has no mechanism for dealing with this potential eventuality. See separate comments on **Policy HP6** as regards the use of the word *OR*.

CPRE Hampshire SUPPORTS criteria i) to v) of **Policy DS1** and believe they provide a sound underpinning of the principles aspired to by Fareham BC.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Fareham BC should look at the areal extent of a possible South Hampshire Green Belt as part of this Local Plan, as it has been confirmed by Leader Cllr Woodward that they wish to see such a designation to protect the countryside and gaps.

Remove the linkage of **Policies HP4, HP5 and HP6** with **Policy DS1**.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Including a proposed South Hampshire Green Belt would be in accordance with the aspirations as set out by the Council in council meetings, PFSH meetings and in press releases.

Removing the linkage of **Policies HP4, HP5 and HP6** with **Policy DS1** would remove the internal inconsistency by removing the possibility of inadvertent development in the countryside.

B4c Your suggested revised wording of any policy or text:

Remove the linkage of **Policies HP4, HP5 and HP6** from Policy **S1 (e)**.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for Local Plans to take the countryside into account when devising spatial development strategy, and we would like to appear at the Hearings to support Fareham BC in choosing this approach. Our expertise lies in spatial strategy and reconciling development requirements with the environmental constraints of countryside, and its uses and purposes.

POLICY DS2: Development in Strategic Gaps

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 3.43 to 3.46, Para 3.10

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy DS2: Development in Strategic Gaps

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC to designate strategic gaps between Fareham / Stubbington and the Western Wards (Meon Gap) and between Fareham / Bridgemarky and Stubbington / Lee-on-the-Solent (Fareham- Stubbington Strategic Gap). However, a study carried out on behalf of CPRE Hampshire in January 2019, by consultants West Waddy, showed that historically strategic gaps in South Hampshire have failed to adequately prevent coalescence of settlements. This report was shared with Fareham BC as a member of the Partnership for South Hampshire, and can be submitted as part of our evidence on this matter to the examination hearings.

“An Assessment of the Effectiveness of Settlement Gap Policies in South Hampshire in preventing Urban Sprawl & the Coalescence of Settlements” – January 2019, West Waddy.

The conclusions show that through appeals and permissions the gaps designated in South Hampshire (including Fareham) have been significantly reduced over time, and are thus an ineffective policy and thus unsound. Para 3.10 confirms that this has been the case in Fareham.

The findings of this report show that “In the national context, South Hampshire is fairly unique among the large urban areas in England in having no designated Green Belt, with reliance instead being placed upon Gaps designated in Local Plans to prevent the coalescence of settlements.”

Furthermore “given the major urban extensions currently being proposed and the past history of erosion of Gaps through subsequent permissions being granted, a strong argument can be made that the current Gap policies across the sub-region are failing in their remit to prevent coalescence and sprawl, which is ultimately likely to lead to currently separate settlements forming one large South Hampshire conurbation and expanding out into the adjoining areas of countryside. The exceptional circumstances therefore exist to demonstrate that a new stronger policy backed by explicit Government advice is needed to prevent this happening and the tool for this is a Green Belt, which is already in use around most large urban areas in England. South Hampshire is the exception in having no such designation.”

CPRE Hampshire has submitted to Fareham BC and to PFSH a report by NEF Consulting on the potential socio-economic and environmental benefits of a Green Belt: <https://www.cprehampshire.org.uk/our-campaigns/south-hampshire-green-belt/>

Notwithstanding the above comments regarding a new Green Belt, CPRE Hampshire SUPPORTS the removal of the earlier proposed Strategic Growth Area SGA, previously entitled HA2 (in the Reg 18 consultation version) from the now proposed Fareham-Stubbington Strategic Gap. The previous inclusion of the SGA was clearly subject to objections by neighbouring Gosport BC, which would have undermined any Duty to Co-operate and thus soundness. It was also objected to by many CPRE members and is therefore of concern to us.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Fareham BC should look at the areal extent of a possible South Hampshire Green Belt as part of this Local Plan, as it has been confirmed by Leader Cllr Woodward that they wish to see such a designation to protect the gaps between settlements.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Including a proposed South Hampshire Green Belt would be in accordance with the aspirations as set out by the Council in council meetings, PFSH meetings and in press releases, and would lead to a much more rigorous policy to prevent coalescence which is Fareham BC’s stated aim.

A need for a South Hampshire Green Belt was confirmed by Cllr Woodward in the Fareham BC Executive Committee at 6pm on Monday 7th December 2020. Its omission from the Reg 19 Local Plan consultation is thus not in accordance from the council’s own publicly announced policy.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for a new South Hampshire Green Belt, and we would like to appear at the Hearings to further explain our justification and why Fareham merits the exceptional circumstances required to designate a new Green Belt. We have a petition which has been signed by nearly 15,000 people asking Fareham BC (alongside Eastleigh BC, Winchester CC and Test Valley BC) to designate a Green Belt as part of its Local Plan process.

POLICY DS3: Landscape

B1 Which part of the Local Plan is this representation about?

- | | | |
|-------------------------------------|------------------|-----------|
| <input checked="" type="checkbox"/> | A paragraph | Go to B1a |
| <input checked="" type="checkbox"/> | A policy | Go to B1b |

Paragraphs 3.48 to 3.58

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy DS3: Landscape

B1c Which part of the Policies Map?

All Areas of Special Landscape Quality

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE fully SUPPORTS the approach taken by Fareham BC in respect of analysing and including Areas of Special Landscape Quality as part of its development strategy and as Strategic Policy S3. This is in accordance with the aspirations outlined in the NPPF to value landscape for its intrinsic character and beauty of the countryside, as outlined in NPPF Para 170 a) and b).

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for Local Plans to take landscape into account when devising spatial development strategy, and we would like to appear at the Hearings to support Fareham BC in choosing this approach. Our expertise lies in spatial strategy and reconciling development requirements with the environmental constraints of, and impacts upon, the wider landscape.

POLICY H1: Housing Provision

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 4.1 to 4.20

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy H1: Housing Provision

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The approach taken by Fareham BC to calculating housing need for this Reg 19 version is based upon the MHCLG consultation on a new standard method in August 2020, which showed Fareham’s housing need to be lower (403 dpa) than using the previous standard method (514 dpa). CPRE Hampshire SUPPORTS the use of the latest base data on household projections (the 2018-based projections from the ONS) as it conforms with Para 31 of the NPPF “The preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be adequate and proportionate, focused tightly on supporting and justifying the policies concerned, and take into account relevant market signals.”

As can be seen from the graph below, the most up-to-date population projections (in 000’s) for Fareham evidences the trend towards a lower requirement, and this would translate into a lower household projection. The impact of Covid-19, and corresponding economic fallout, on migration patterns will remain unclear for some time, and it is therefore sensible to use a cautious approach to planning and development.

However, for Fareham to agree to take unmet need from Portsmouth is premature, predating as it does the revised statement of common ground from PFSH, and therefore Policy H1 is unsound.

It is also clear that there remains a significant reliance on delivery of housing at Welborne, which is subject to a separate plan. Delays to infrastructure finding at Welborne could have an impact on Fareham’s overall strategy for delivery of its housing needs in the plan period.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove the requirement to take housing from Portsmouth CC.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a recognised authoritative voice on Hampshire’s housing numbers, the standard methodology and has been involved in this aspect of Fareham’s Local Plans since the time of the South East Plan in 2005, and the formation of PfSH (Partnership for South Hampshire).

CPRE Hampshire is part of an expert group in the National CPRE network on housing numbers, and would like to appear at the hearing sessions to SUPPORT the use of the most up-to-date household projections.

POLICY HA1: North and South of Greenaway Lane, Warsash

B1 Which part of the Local Plan is this representation about?

- | | | |
|-------------------------------------|------------------|-----------|
| <input checked="" type="checkbox"/> | A paragraph | Go to B1a |
| <input checked="" type="checkbox"/> | A policy | Go to B1b |
| <input checked="" type="checkbox"/> | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Housing Allocation Policy: HA1 North and South of Greenaway Lane, Warsash

B1c Which part of the Policies Map?

Figure 4.1

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire has significant concerns about the piecemeal development already seen, and proposed, in the Warsash area. Population growth in the 10 years 2009-2019 has reached 9% in Warsash and the western wards, while Fareham itself has only grown by 4%. As Warsash has no access to the rail network, this pattern of development could not be considered sustainable. It therefore fails the soundness tests.

An indicative framework as shown in Figure 4.1, but this does not meet the requirements for a masterplan, and it is not adequate for long-term planning to integrate the various separate sites and applications by a series of different developers. Policy HA1 will fail to meet any government aspirations for placemaking as set out in the NPPF Chapter 12, Paras 124 to 130, and is therefore unsound.

Para 124 of the NPPF states “The creation of high quality buildings and places is fundamental to what the planning and development process should achieve. Good design is a key aspect of sustainable development, creates better places in which to live and work and helps make development acceptable to communities.”

Para 125 of the NPPF states “Design policies should be developed with local communities, so they reflect local aspirations, and are grounded in an understanding and evaluation of each area’s defining characteristics.” It is apparent from discussion with CPRE Hampshire members that there has not, to date, been any meaningful involvement of local communities.

It is clear that the settlement policy boundaries have been moved to accommodate the applications pending for Warsash. This is not consistent with a plan-led approach but is simply reactive to a developer-led situation, and takes no account of the area’s defining features.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

More analysis of the sustainability criteria for the overall development strategy, such as access to public transport is required before sites such as HA1 are confirmed. Has every opportunity for brownfield development around rail networks been ruled out?

Much more consultation with the local community is required before the proposed HA1 framework meets NPPF prerequisites.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has worked for some years with local campaign group Save Warsash and the Western Wards, and a number of our members will be affected by the proposals for such a large allocation of housing to one small settlement. We would like to take part in the hearing sessions to represent their concerns for initial choice of an unsustainable site, loss of countryside and open space in Warsash, and poor design due to lack of a masterplan.

POLICY HP4: Five-year housing land supply

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 5.22 to 5.28

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy HP4: Five-year housing land supply

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

Policy HP4 states “If the Council cannot demonstrate a five-year supply of land for housing against the housing requirement set out in Policy H1, additional housing sites, outside the Urban Area boundary, may be permitted where they meet all of the following criteria.....” The problem with this policy is that inadvertently it encourages the first choice of sites to be “outside the Urban Area”. CPRE Hampshire is sure that this is not what Fareham BC intends, and in any event it would not be in accordance with the councils own aspirations for a brownfield first approach, nor in accordance with the NPPF Para 137, and is therefore unsound. A sequential approach should be used, even in the event of a lack of a five-year housing land supply.

The problem is exacerbated by the linkage of **Policy HP4** with **Policy DS1**, particularly **DS1 Criterion (e)** as discussed above.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy HP4 should be rewritten to include a sequential approach, which “makes as much use as possible of suitable brownfield sites and underutilised land” as per Para 137 (a) of the NPPF.

The linkage of **Policy DS1 (e)** and **Policy HP4** should be removed.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be in accordance with the NPPF.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is part of an expert group in the National CPRE network on housing numbers, and the five-year housing land supply, and would like to appear at the hearing sessions to discuss its impact on the Fareham Reg 19 Local Plan.

POLICY HP6: Exception Sites

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 5.43 to 5.51

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy HP6: Exception sites

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The second part of **Policy HP6, Criterion (c)**, would allow exception sites with a limit of 1 hectare *OR* a proviso that the scheme does not exceed 5% of the size of the adjacent settlement. The problem is the word *OR*, as this could lead to large sites adjacent to large settlements being permitted as they would still be beneath the 5% cut-off. For example, Fareham town is a large settlement, of some 20,000 households, and so an exception site of up to 5% could itself number 1,000 dwellings. CPRE Hampshire is sure that this is not what was intended by Fareham BC as the aspiration is for small sites on urban boundaries.

The problem is exacerbated by the linkage of **Policy HP6, Criterion (c)**, with **Policy DS1**, particularly **DS1 Criterion (e)** as discussed above.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy HP6 should be rewritten to include a sequential approach, which “makes as much use as possible of suitable brownfield sites and underutilised land” as per Para 137 (a) of the NPPF.

Criterion c) should be reworded to remove the reference to *OR* 5% of the size of the adjacent settlement and have a fixed upper limit of what is meant by ‘small sites’ as identified in the justification text (Para 5.46).

The linkage of **Policy DS1 (e)** and **Policy HP6** should be removed.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Any ambiguity on what a “small site” means would be removed giving clarity for applicants and for FBC.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of affordable housing, such that it is located and designed appropriately, and would like to appear at the hearing sessions to discuss the impact of Policy HP6 on the Fareham Reg 19 Local Plan.

STRATEGIC POLICY CC1: Climate Change

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 8.1 to 8.10

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy CC1: Climate change

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant		NO
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire generally SUPPORTS the approach taken by Fareham BC to Climate Change. But we believe that **Policy CC1, Criterion (a)** does not go far enough to encourage/enforce a truly sustainable pattern of development and is unlikely to lead to a meaningful reduction of emissions from private car use.

Section 19(1A) of the Planning and Compulsory Purchase Act 2004 requires that a local authority's development plan documents must: (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority's area contribute to the mitigation of, and adaptation to, climate change.

The NPPF Para 148 further includes the requirement that “the planning system should support the transition to a low carbon future in a changing climate”, should “shape places in ways that contribute to radical reductions in greenhouse gas emissions” and Footnote 48 “in line with the objectives and provisions of the Climate Change Act 2008.”

CPRE Hampshire believes that one of the most fundamental ways of combating the likelihood of adverse climate change, is to plan development where it can use better public transport and be less reliant on the car. The aspirations in **Policy CC1** are more about how development can respond to climate change, and rather less about how spatial planning of future development can help prevent it. We consider that this is a missed opportunity. According to Camilla Ween, Harvard Loeb Fellow, speaking on behalf of Transport for New Homes “Transport is responsible for about 26% of greenhouse gas emissions, much arising from personal car journeys. Our society will not be able to achieve the UN goals if we do not change the way we travel; that means we need to create new communities that are NOT car dependent. That means careful consideration of where new development is located, as well as how we design new communities, for example, places that are well connected with high quality public realm and movement infrastructure that encourage people to want to move to a car-free lifestyle.” It must be a fundamental tenet of the Fareham Local Plan that NO development should be permitted that relies on the car as its main means of access.

Nothing less than a drastic change to spatial strategy and a move away from South Hampshire’s historic pattern of sprawling suburbs will enable any meaningful contribution to the fight against adverse climate change. We owe it to future generations to do our utmost to shift patterns of behaviour that have become entrenched with the use of the private car. Even electric cars will not solve many of these issues as they still leave residues from tyres and fluids and are unsustainable in terms of battery manufacture.

Policy CC1 is therefore not legally compliant unless the large part of Fareham’s spatial strategy is geared to development around mass public transport hubs and avoiding sites which are car-dependant. It is clear that sites such as Policy HA1 would fail to meet this condition.

CPRE Hampshire recommends the checklist provided by Transport for New Homes, which sets out an objective approach to planning new housing areas without dependence on cars:

<https://www.transportfornewhomes.org.uk/wp-content/uploads/2019/10/checklist.pdf>

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

CPRE Hampshire recommends strengthening **Policy CC1, Criterion (a)** to enable a spatial strategy more likely to meet the requirements set out in Section 19(1A) of the Planning and Compulsory Purchase Act 2004, and the NPPF, by including a requirement for mass public transport hubs to be the first approach for development, and to enable Fareham to refuse car-dependent applications.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be in accordance with Section 19(1A) of the Planning and Compulsory Purchase Act 2004, and the NPPF Para 148.

B4c Your suggested revised wording of any policy or text:

(a) A development strategy that minimises the need to travel by allocating sites and generally directing development to locations **near to mass public transport hubs**, with better services and facilities, or where they are capable of being improved.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning housing, such that it is located and designed appropriately around public transport hubs to minimise emissions and would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy CC1** in this regard.

POLICY NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| X | The policies map | Go to B1c |

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.50 to 9.54

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY NE4: Water quality effects on the SPAs, SACs and Ramsar sites of the Solent

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant		NO
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire understands there is an outstanding judicial process underway regarding the effectiveness of Fareham BC's proposals for mitigating nitrate and other pollutants on the Solent and other protected waterways. At this point, CPRE Hampshire is therefore unable to endorse the proposed policy until the legal issues have been resolved.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire's remit covers protection and enhancement of both land and seascape, including Hampshire's iconic chalk streams and rivers, and the Solent. In the absence of an outcome on the legal matters, the hearing session may be the first opportunity to evaluate the effectiveness and legality of the proposed policy.

POLICY NE6: Trees, woodland and hedgerows

B1 Which part of the Local Plan is this representation about?

X	A paragraph	Go to B1a
X	A policy	Go to B1b
	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.79 to 9.89

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY NE6: Trees, woodland and hedgerows

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy HE6** is sound. The Climate Change Committee has called for a 40% increase in the extent of hedgerows by 2050 to help tackle the climate emergency, and we would thus like to see more hedgerows planted and restored in Fareham BC.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

NO Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

POLICY NE8: Air quality

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.98 to 9.118

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy NE8: Air quality

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy HE8** is sound.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

NO Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

POLICY NE9: Green infrastructure

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.119 to 9.125

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy NE9: Green infrastructure

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy HE9** is sound. However, we believe that a link with **Policy HE1** should be included within **Policy HE9** itself, rather than just within the supporting text in **Para 9.122**. CPRE Hampshire further believes that much better Green Infrastructure provision could be safeguarded over the long term if it were to be incorporated within a South Hampshire Green Belt.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of green infrastructure alongside planning development, such that it is located and designed appropriately, in order to benefit biodiversity, natural capital, but also residents' health and wellbeing. We would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy NE9** in this regard, and to discuss whether a South Hampshire Green Belt could ensure green infrastructure is protected in perpetuity.

POLICY TIN1: Sustainable transport

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 10.1 to 10.11

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy TIN1: Sustainable transport

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy TIN1** to be a good starting point. CPRE Hampshire recognises that Fareham BC aspire to have ‘good growth’ with existing and proposed transport corridors influencing choice of development, however we feel **Policy TIN1** does not go far enough. The Council should feel empowered to reject development which is not already located around, or can provide, public mass transit hubs, in particular the rail network. The policy as it stands does not give Fareham BC a sufficiently robust mechanism for achieving this. It is therefore unlikely to comply with the aspirations to meet climate change objectives as set out in **Policy CC1** or for air quality in **Policy NE8**.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The principles of development and transport as set out in the Transport for New Homes checklist should be followed - <https://www.transportfornewhomes.org.uk/the-project/checklist-for-new-housing-developments/>.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The policy would then comply with climate change and air quality objectives.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning housing, such that it is located and designed appropriately around public transport hubs to minimise emissions and impacts on climate change. We would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy TIN1** in this regard.

POLICY D1: High quality design and place making

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 11.1 to 11.36

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY D1: High quality design and place making

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire welcomes the approach taken by Fareham BC towards high quality design in **Policy D1** but would like to see the inclusion of the words countryside and landscape into **Criterion (i)**. The omission of these words makes it inconsistent with **Strategic Policies DS1 and DS3** and therefore unsound.

The design quality of future developments starts with overall masterplanning and landscape context as well as specific building details. Fareham has seen a proliferation of poorly designed car dependant nondescript developments over recent years, and it is critical that major improvements are made for the future.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include the words countryside and landscape into **Criterion (i)**.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

This would then be in accordance with **Strategic Policies DS1 and DS3**.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire has many members in Fareham who are keenly interested in the design of future developments and would like to see major improvements over previous failures in design quality, which has historically resulted in large sprawling estates of car-dependant nondescript housing.

1) Policies map: URBAN AREA BOUNDARY (DS1)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Residential development stands on both sides of Botley Road, Burr ridge and the locality has all the characteristics of a low-density suburb rather than countryside. Indeed, the openness of countryside can only be appreciated beyond the ends of the gardens of the residences that stand to the west of Botley Road. The time has come to recognise that both sides of Botley Road now form part of the Urban Area of Burr ridge, by demarcating the Defined Urban Settlement Boundary in such a manner as to include the west side of Botley Road. [A drawing showing the suggested DUSB will be presented shortly under separate cover.]

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include both sides of Botley Road in the Defined Urban Settlement Boundary

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would recognise that Botley Road is a 'substantially built-up area' rather than countryside.

Your suggested revised wording of any policy or text:

n/a

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Fareham Borough Council has failed to recognise the 'substantially built-up' character of Burr ridge since 2012.

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Paper based document Fareham Today Local Plan Special edition Autumn 2020 was not delivered to all households in Fareham. I received mine 2 weeks after the consultation had started & only because I completed an online form to report it missing

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Public needs to be consulted again so they are aware the process is being carried out

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Completing this structured online form is beyond the time constraints and knowledge base of the layman. There are hundreds of pages of documents to absorb & comment upon

Your suggested revised wording of any policy or text:

Public needs to be consulted again so they are aware the process is being carried out

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: DS1 - Development in the Countryside

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Objects to the both the wording of Policy HP4 and the link to DS1 policy as it implies that if Fareham's five year housing supply is not met, the first area of search is outside of the urban area boundary.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should refer to sites within urban areas, brownfield land, underutilised employment sites, sites close to train stations, under-utilised town centre sites such as car parks and shopping precincts, consideration of using Council land assets and other public sector land, intensification of existing neighbourhoods. These types of sites should be clearly identified as being preferential before greenfield land outside the urban area

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Prevent building on the countryside

Your suggested revised wording of any policy or text:

No proposal to amend the wording of Policy HP5 only that the link included in DS1 is removed

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Policy: DS1 - Development in the Countryside

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HP6 is not robust enough to stop development in the countryside

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The development of Rural Exception sites will not be permitted in areas designated as 'Special Landscape character' and the development will only be permitted where all criteria a-e are met

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Prevent building in the countryside

Your suggested revised wording of any policy or text:

The development of Rural Exception sites will not be permitted in areas designated as 'Special Landscape character' and the development will only be permitted where all criteria a-e are met

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: HA32 - Egmont Nursery

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA32 Housing allocation is undeliverable, it is also in an area this plan designates as special landscape character countryside & therefore should not be included.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 housing allocation from the Draft plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The site is undeliverable as there is no established right of way to the public Highway, removing HA32 would prevent an undeliverable site being included in the development plan.

Your suggested revised wording of any policy or text:

Remove HA32 housing allocation from the Draft plan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The site is currently subject to the beginning of a Judicial review case, FBC have consistently ignored residents statements that the site is not deliverable for a number of reasons including: 1) Lack of road access. The red line of the approved outline planning permission does not reach a public Highway, therefore that planning application and its approval are unlawful. 2) Inaccurate Nitrate calculations for nitrate mitigation, occupancy figure of 2.4 people is being used for large 5 bedroom houses. The site applicants position as chair of the local Conservative Club has rendered decision making by FBC in relation to this site biased and residents need an impartial judgement to take place on the inclusion of this site in the local plan.

5) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Many Planning Applications for HA1 are already in place. The HA1 masterplan included in this plan is not being followed. The greenspaces are not being kept. This whole area was designated countryside in the last development plan. The supporting documents prove residents claims the areas roads, schools & healthcare can not accomodate additional population of this density

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reduce the housing allocation in the HA1 area to a level the local infrastructure can accomodate

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Create sustainable development

Your suggested revised wording of any policy or text:

HA1 be reduced to total of 500 houses

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1 INTRODUCTION

1.1 Introduction

- 1.1.1 These representations are submitted by Gladman in response to the current consultation held by Fareham Borough Council (FBC) on the proposed submission draft Fareham Local Plan (FLP). Gladman specialise in the promotion of strategic land for residential development and associated community infrastructure and has considerable experience in the development industry across a number of sectors, including residential and employment development. From that experience, we understand the need for the planning system to provide local communities with the homes and jobs that are needed to ensure residents have access to decent homes and employment opportunities.
- 1.1.2 Gladman has a wealth of experience in contributing to the Development Plan preparation process, having made representations on numerous local planning documents throughout the UK and having participated in many Local Plan public examinations. It is on the basis of this experience that the comments are made in this representation.
- 1.1.3 Prior to this consultation the Government published the Planning for the Future White Paper setting out proposals for how the Government wants to 'radically reform' the planning system. Central to the Government's proposals will be a simpler, more streamlined Local Plan making process. Consultation on the proposals ended on 29th October 2020. Subject to the outcomes of this process the Government has signalled its intent to make rapid progress toward this new planning system through the swift introduction of new legislation to implement the changes.
- 1.1.4 As the White Paper is only currently under consultation and there is currently uncertainty around timescales for moving towards a new Local Plan making process, this representation has been prepared against the backdrop of the current system. In progressing the FLP under the current system, the Council will need to carefully consider some of its policy choices and ensure that its evidence base is up-to-date and robust in light of changing circumstances and the changes brought about by the revised National Planning Policy Framework (2019).

2 NATIONAL PLANNING POLICY

2.1 National Planning Policy Framework

2.1.1 On 24th July 2018, the Ministry of Housing, Communities and Local Government (MHCLG) published the Revised National Planning Policy Framework which was subsequently updated in February 2019. These publications form the first revisions of the Framework since 2012 and implement changes that have been informed through the Housing White Paper, The Planning for the Right Homes in the Right Places consultation and the draft Revised Framework consultation.

2.1.2 The Framework (2019) introduces a number of major changes to national policy and provides further clarification to national planning policy as well as new measures on a range of matters. Crucially, the changes to national policy reaffirms the Government's commitment to ensuring up-to-date plans are in place which provide a positive vision for the areas which they are responsible for to address the housing, economic, social and environmental priorities to help shape future local communities for future generations. Paragraph 16 of the Framework (2019) states that Plans should:

- a) *Be prepared with the objective of contributing to the achievement of sustainable development;*
- b) *Be prepared positively, in a way that is aspirational but deliverable;*
- c) *Be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;*
- d) *Contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;*
- e) *Be accessible through the use of digital tools to assist public involvement and policy presentation; and*
- f) *Serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).*

2.1.3 To support the Government's continued objective of significantly boosting the supply of homes, it is important that the Local Plan provides a sufficient amount and variety of land that can come forward where it is needed, that the needs of groups with specific housing

requirements are addressed and that land with permission is developed without unnecessary delay¹.

- 2.1.4 To be considered sound at Examination the emerging Local Plan will need to meet all four of the soundness tests set out in paragraph 35 of the Framework (2019).

2.2 Planning Practice Guidance

- 2.2.1 The Government published updates to its Planning Practice Guidance (PPG) on 13th September 2018. The updated PPG provides further clarity on how specific elements of the revised Framework should be interpreted when preparing Local Plans.

2.3 Planning for the Future White Paper

- 2.3.1 On the 6th August, Government published the Planning for the Future White Paper setting out proposals for how it is seeking to 'radically reform' the planning system. The proposals are seeking to streamline and modernise the planning process.

- 2.3.2 Consultation recently closed on these proposals and it will be important that the Council keeps up to date with the implementation of these changes and the implications this will in turn have on the preparation of any subsequent Local Plan review. Timescales remain uncertain however subject to the outcomes of this process the Government has signalled its intent to make rapid progress toward this new planning system through the swift introduction of new legislation to implement the changes.

- 2.3.3 More importantly alongside this consultation, a consultation on immediate changes to the current planning system was also held, closing on the 1st October. Of significant note is a proposed revised standard method for calculating local housing need, which when implemented will be used as the basis for plans created prior to any changes outlined in the White Paper. Introduction of the revised methodology, which proposes to incorporate a percentage of existing stock as the baseline of the calculation, identifies an indicative housing figure of 403dpa for Fareham.

¹ NPPF – Paragraph 60

3 LEGAL REQUIREMENTS

3.1 Duty to Cooperate

- 3.1.1 The Duty to Cooperate (DtC) is a legal requirement established through section 33(A) of the Planning and Compulsory Purchase Act 2004, as amended by Section 110 of the Localism Act. The DtC requires local planning authorities to engage constructively, actively and on an ongoing basis with neighbouring authorities on cross-boundary strategic issues through the process of ongoing engagement and collaboration.²
- 3.1.1 As demonstrated through the outcome of the Coventry, Mid Sussex, Castle Point and St Albans examinations, if a Council fails to satisfactorily discharge its DtC a Planning Inspector must recommend non-adoption of the Plan. This cannot be rectified through modifications.
- 3.1.2 The NPPF(2019) has introduced a number of significant changes to how local planning authorities are expected to cooperate including the preparation of Statement(s) of Common Ground (SOCG) which are required to demonstrate that a plan is based on effective cooperation and has been based on agreements made by neighbouring authorities where cross boundary strategic issues are likely to exist. The NPPF(2019) sets out that local planning authorities should produce, maintain, and update one or more Statement(s) of Common Ground (SOCG), throughout the plan making process³. The SOCG(s) should provide a written record of the progress made by the strategic planning authorities during the process of planning for strategic cross-boundary matters and will need to demonstrate the measures local authorities have taken to ensure cross boundary matters have been considered and what actions are required to ensure issues are proactively dealt with e.g. unmet housing needs.
- 3.1.3 This issue is particularly crucial for the FLP given the work currently being undertaken through the Partnership for South Hampshire (PFSH) which is seeking to identify Strategic Development Opportunities to meet identified unmet needs across the sub-region.
- 3.1.4 The PFSH is currently working on a new SOCG between all constituent authorities and will effectively supersede the Spatial Position Statement (2016). Paragraph 3.17 of the submission Local Plan confirms that bilateral conversations with neighbouring authorities have been undertaken and the Council is aware of unmet needs arising across the region due to neighbouring borough's capacity to address any unmet need. The Council acknowledges at

² PPG Reference ID: 61-021-20180913

³ PPG Reference ID: 61-001-20180913

paragraph 4.4 that there is a significant likelihood of a substantial level of unmet housing needs in the sub-region with figures released in September 2020 suggesting unmet need in the sub-region of circa 10,750 dwellings. This figure is derived from 11 councils who are all at varying stages of plan preparation and based on the current standard methodology.

- 3.1.5 At the time of writing, it is noted that Portsmouth City Council (PCC) have written to the Council requesting a contribution of 1,000 dwellings to assist in meeting their unmet housing needs. Gosport Borough Council (GBC) is also likely to have an issue with unmet housing need, currently estimated to be in the region of 2,500 dwellings.
- 3.1.6 In principle, Gladman support the Council's decision to increase the housing target by 847 dwellings to contribute toward the unmet housing needs issue of the wider area. However, Gladman are concerned that without a signed SOCG between constituent authorities, it is difficult to consider whether this level of housing is sufficient to meet the wider needs of the area. Gladman recommend that a further consultation which considers the outcome of the work of the PFSH will be required so that the Local Plan can reflect the outcome of that process prior to the submission of the Local Plan to the Secretary of State for examination.
- 3.1.7 Since effective cooperation is an ongoing issue, Gladman reserve the right to provide further comments in relation to this matter once further evidence and signed statements become available.

3.2 Sustainability Appraisal

- 3.2.1 In accordance with Section 19 of the Planning and Compulsory Purchase Act 2004, policies set out in Local Plans must be subject to a Sustainability Appraisal (SA), and also incorporate the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 (the SEA Regulations).
- 3.2.2 The SA/SEA is a systematic process that should be undertaken at each stage of the Plan's preparation, assessing the effects of the FLP proposals on sustainable development when judged against all reasonable alternatives. The Council must ensure that the future results of the SA clearly justify its policy choices. In meeting development needs of the area, it should be clear from the results of the assessment why some policy options have been progressed and others have been rejected. This must be undertaken through a comparative and equal assessment of all reasonable alternatives, in the same level of detail for both chosen and rejected alternatives. The Council's decision making, and scoring should be robust, justified and transparent.

4 FAREHAM LOCAL PLAN

4.1 Vision and Objectives

4.1.1 In principle, Gladman support the Council's vision and objectives. In particular, we support the Plan's commitment to accommodating development to address the need for new homes and employment space in Fareham Borough and the commitment to ensuring a strong and diverse economy is delivered.

4.1.2 Notwithstanding this, it is considered the Plan could go further in its aims to support housing and economic growth of the wider sub-region with reference to assisting neighbouring authorities with any unmet housing needs. This is particularly important due to the ongoing work of the PFSH and outstanding evidence relating to unmet housing needs and how this will be redistributed across the PFSH area.

4.2 Strategic Policy DS1: Development in the Countryside

4.2.1 Strategic Policy DS1 states proposals for development in the countryside, which is defined as land outside the Urban Area boundary, will only be supported in a narrow set of circumstances.

4.2.2 Gladman are opposed to the use of settlement boundaries, as these are often used as an arbitrary tool to prevent otherwise sustainable proposals from going forward. The policy wording as currently drafted only allows for development in a narrow set of circumstances (i.e. replacement dwelling, previously developed land etc.) and does not allow for sufficient flexibility to respond to changes of circumstance such as a shortfall in housing supply. Gladman believe that this policy should be modified to a criteria-based policy which will provide a more appropriate mechanism for assessing the merits of individual development proposed, based on their specific circumstances and ability to deliver sustainable development rather than being discounted simply due to a sites location beyond an artificial boundary.

4.2.3 To achieve this; a criteria based approach would allow the plan to protect itself against unsustainable development whilst at the same time offering a flexible solution to the consideration of development opportunities outside these boundaries that are able to come forward to meet identified needs should the Council's housing land supply start to fail. Gladman refer to the submission version of the Harborough Local Plan, Policy GD2, which states:

“in addition to sites allocated by this Local Plan and neighbourhood plans, development within or contiguous with the existing or committed built up area of the Market Harborough, Key Centres, the Leicestershire Principal Urban Area (PUA), Rural Centres and Selected Rural Villages will be permitted where...”

A series of criteria follows.

4.2.4 Clearly the policy here would need to reflect the local circumstances of Fareham but it does provide an example of a local authority taking a proactive approach to guiding development and ensuring that it can meet its housing target as well as plan for approaches if and when problems arise over the course of a plan period with regard to the delivery of allocated sites. Accordingly, Gladman recommend the use of a criteria-based policy should be included within the FLP to ensure housing needs are met in full.

4.2.5 In addition, the second element of the policy requires proposals to demonstrate that if they require a location outside of the urban area, do not significantly affect the integrity of a Strategic Gap and are not located on Best and Most Versatile (BMV) agricultural land. Gladman are unclear with the necessity of including this additional criteria as these matters are dealt with elsewhere within the FLP and therefore their inclusion in Policy DS1 leads to unnecessary duplication and not in accordance with the NPPF2019. As such, this element of the policy should be deleted as the finer details of each of these issues are dealt with elsewhere within the draft Local Plan.

4.3 Strategic Policy DS2: Development in Strategic Gaps

4.3.1 The above policy identifies two Strategic Gaps whereby development proposals would not be permitted where they significantly affect the integrity of the gap and the physical and visual separation of settlements or the distinctive nature of settlement characters.

4.3.2 Gladman consider that new development can often be located in countryside gaps without leading to the physical or visual merging of settlements, eroding the sense of separation between them or resulting in the loss of openness and character. It is important that such designations are supported by robust evidence and that the policy wording allows for sites to be considered on their individual merits. In this regard, the policy is currently worded in a negative stance which may affect the consideration of development proposals. Gladman consider that the policy should be reconsidered in a positive manner and modified to allow for a balancing exercise to be undertaken which assesses any harm to the visual or functional

separation of settlements against the benefits of the proposal rather than seeking to apply a blanket restriction on development in these areas.

4.4 Strategic Policy H1: Housing Provision

Housing Need

- 4.4.1 Strategic Policy H1 makes provision for at least 8,389 net additional dwellings across the borough during the period 2021 – 2037. Whilst Gladman acknowledge that the housing requirement is set as a minimum, Policy H1 is not considered positively prepared as it does not provide a strategy which meets housing needs in full.
- 4.4.2 The level of housing required by the standard methodology as set in NPPF2019 requires provision for a minimum of 514dpa. It should be remembered that the housing need figure calculated using the Standard Method should be considered as a starting point as it does not take into account other factors which affect demographic behaviours (e.g. affordability, economic adjustments etc).
- 4.4.3 The Council has instead decided to use the Government’s proposed housing methodology as announced in the Planning for the Future White Paper which allows LPAs to use either a percentage of the Borough’s existing housing stock as the calculation’s starting point or the most up-to-date household projections, whichever is the highest before an affordability uplift is applied. The Council has decided it is appropriate to plan for a scale of growth based on the proposed methodology which reduces the housing need figure to 403dpa.
- 4.4.4 The proposed approach is not appropriate nor justified as it will not deliver the minimum housing required by national policy using the standard method. The Council must remember that the implementation of the White Paper is still subject to the outcome of consultation and may be subject to change. In addition, it is not appropriate to delay the progress of the Local Plan until the measures announced within the White Paper come into force.
- 4.4.5 Accordingly, the Council should amend the housing requirement back to 514dpa and allocate sufficient sites across a number of locations to meet housing needs in full.

Phasing

- 4.4.6 Policy H1 outlines the Council’s intention to phase the delivery of the housing requirement over the plan period. The housing requirement is phased as follows:
- Approximately 2,250 dwellings (450dpa) between 2021/22 and 2025/26

- Approximately 2,400 dwellings (480dpa) between 2026/27 and 2030/31
- Approximately 3,750 dwellings (625dpa) between 2031/32 and 2036/2037

4.4.7 The result of this element of the policy acts to artificially suppress the delivery of development in the early years of the plan due to strategic site issues given the majority of housing supply comprises of the Welborne Garden Village. Indeed, the Council has not achieved annual delivery figures in excess of 450 dwellings since 2007-08 so it is unclear how the Council expects to achieve these delivery rates especially towards the back end of the plan period without a sufficient supply and mix of housing sites.

4.4.8 The Framework is clear in its intention to boost significantly the supply of housing. This strategy is further underlined by the buffers applied by national policy and the PPG's approach that requires local authorities to meet housing shortfall within a five year period.

4.4.9 Gladman consider that the backloading of land supply will likely threaten the overall deliverability of the Plan. Should the Council fail to deliver these higher rates towards the end of the plan period, there is little flexibility or opportunity provided to ensure the housing requirement can be met in full. The phasing approach is therefore unsound and should be deleted and replaced with a flat annual requirement of 514dpa.

Buffer

4.4.10 In principle, Gladman support the inclusion of a 15% buffer to allow for contingency for under delivery associated with the reliance on large strategic sites within the housing supply. However, the buffer does not provide any sort of contingency due to the Council's decision to reduce housing requirement to 403dpa. In reality, it merely provides a level of housing comparable to the amount of housing needed to meet the annual requirement as identified under the Standard Method. Gladman reiterate that the housing requirement should be increased to 514dpa and a buffer applied to this figure.

4.4.11 Notwithstanding the above, Gladman would suggest that given the uncertainty surrounding both the delivery of strategic scale sites and the potential for unmet need within the wider sub-region, that this contingency should be increased to 20% above the Standard Method figure to ensure housing needs are met in full. This will also reflect HBF's advice following Central Government research on this issue.

Housing Provision

4.4.12 Strategic Policy H1 makes provision for at least 8,389 net dwellings across the borough during the period 2021 – 2037 and is comprised of:

- An estimated 552 homes that already have planning permission;
- An estimated 4,858 on sites with resolutions to grant permission as of 1st July 2020, including at Welborne Garden Village;
- Approximately 1,327 homes on sites allocated in the Publication Plan;
- Approximately 428 homes on brownfield sites/regeneration areas; and
- An estimated 1,224 homes delivered through windfall development.

4.4.13 To ensure the soundness of the Plan, Gladman submit that additional housing land is needed to ensure that the Council is able to demonstrate a robust supply of housing land should any of the sites within the Council's supply slip away. This is particularly important due to the reliance on sites with resolutions to grant planning permission and the vast majority of the Council's supply comprising of the Welborne Garden Village.

4.4.14 Whilst Gladman does not wish to comment on the suitability of sites selected, the Council will need to be able to demonstrate that sites will come forward as anticipated and take account of site specific issues and/or reflects the requirements and timescales of key infrastructure to be provided by sites selected. It is imperative that these assumptions are made in collaboration with landowners/land promoters to ensure these details are up-to-date at the point of submission. In this regard, it is difficult to assess the Council's consideration of sites as the Housing Trajectory at Appendix B only provides a cursory overview of expected delivery rates over the plan period and does not provide an individual break down of anticipated delivery rates on individual sites. As such, Gladman reserves the right to provide further detailed comments at the examination should further information be made available.

4.4.15 To ensure the effectiveness of the Plan in ensuring a supply of specific deliverable sites sufficient to maintain a five year housing requirement over the course of the plan period, additional allocations are considered necessary. Indeed, the planning committee has resolved to grant outline planning permission for Welborne Garden City in October 2019 to provide up to 6,000 dwellings over the plan period and beyond. There are a number of key factors that can affect the delivery of Garden Villages, Strategic Sites and smaller scale development opportunities such as the signing of s106 agreements, reserve matters applications and improvements to infrastructure prior to development commencing, discharge of planning conditions, marketing of development and so on, all of which can affect the delivery of homes. The Council will need to avoid a continued reliance associated with the Garden Village and large scale strategic allocations over the plan period and instead allocate additional housing land to ensure a competitive and responsive supply of housing is available to support housing delivery of the Council's large strategic allocations.

4.5 Policy HP1: New Residential Development

4.5.1 Policy HP1 states residential development within the urban area boundary will be supported in principle. Residential development in locations outside of the urban area boundary will only be permitted if it involves the conversion of an existing non-residential building or it is for a replacement dwelling which is of an appropriate character to the location.

4.5.2 Gladman do not consider the above policy to be positively prepared as it is restrictive and goes against the ethos of the Framework to significantly boost the supply of housing. The policy should be amended to be flexible in accordance with the approach outlined in section 4.2 of these representations.

4.6 Policy HP2: New Small-Scale Development Outside the Urban Areas

4.6.1 The above policy states new small-scale development outside the urban area boundary, as shown on the policies map, will be permitted where a site is located within or adjacent to existing areas of housing; or well related to settlement boundary and is within reasonable proximity to high frequency public transportation.

4.6.2 In principle, Gladman support the inclusion of this policy which allows for small scale development beyond the urban area. However, we would question the decision to limit development to no more than 4 units as this is contrary to the ethos of the Framework which seeks to significantly boost housing supply. Gladman consider such a policy should be included within the draft Local Plan without any limitations on size of development to ensure the Council are able to demonstrate a strong and robust housing land supply should sites identified slip away.

4.6.3 In addition, Gladman query how a decision maker is expected to apply this policy consistently and with ease as it contradicts the approach taken in Policy HP1 and reinforces the need for Policy HP1 to be deleted and the criteria listed to be amalgamated into Policy H2.

4.7 Policy HP4: Five-Year Housing Land Supply

4.7.1 Policy HP4 outlines the Council's approach to circumstances where it cannot demonstrate a five year housing land supply, a criteria then follows. In principle, Gladman support this approach but would suggest that the policy is modified to '~~may be~~ will be permitted where they meet the following criteria' as opposed to the current use of wording.

4.7.2 Criterion (a) of the proposed policy suggests that a site needs to be relative in scale to the demonstrated shortfall in the housing land supply. A proposal which comes forward which is

considered to be sustainable and in conformity with other policies of the Local Plan should be considered to be acceptable in planning terms regardless of whether it is relative to the scale and size of the housing land supply shortfall. Gladman consider that the reference to scale should be removed in order to allow for additional flexibility in the supply of housing as it will assist the Council in ensuring that a 5 year housing land supply can be maintained going forward.

- 4.7.3 In addition, Criterion (b) states that a site should be adjacent to the existing urban settlement boundaries to be considered sustainable. This criterion is too onerous as sites which are well related to, but not directly adjacent to existing settlements could, be considered to be sustainable when assessed against policies contained in the Local Plan as a whole. Again, Criterion (b) should be amended to reflect this.

4.8 Policy HP7: Adaptable and Accessible Dwellings

- 4.8.1 Policy HP7 requires at least 15% of all new dwellings to be built to optional building regulation M4(2) and on all schemes over 100 dwellings, at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible category M4(3) standard.

- 4.8.2 In this regard, Gladman refer to the PPG which provides additional guidance on the use of these optional standards. The Council need to ensure that this policy is in line with the guidance and that the justification and specific detail of the policy take account of the various factors which the PPG refers to:

“Based on their housing needs assessment and other available datasets it will be for the local planning authorities to set out how they intend to approach the need for Requirement M4(2) (accessible and adaptable dwellings), and / or M4(3) (wheelchair user dwellings), of the Building Regulations. There is a wide range of published official statistics and factors which local planning authorities can consider and take into account, including:

- *The likely future need for older and disabled people (including wheelchair user dwellings).*
- *Size, location, type and quality of dwellings needed to meet specifically evidenced needs (for example retirement homes, sheltered homes, or care homes).*
- *The accessibility and adaptability of existing stock.*
- *How needs vary across different tenures.*

- *The overall impact of viability.*⁴

4.8.3 Gladman note that these technical standards have deliberately been set as optional standards which, if to be included as a policy in the FLP, would need to be justified by robust evidence.

4.8.4 When considering this policy, the Council need to be aware of the impact that these requirements, particularly M4(3) have on scheme viability (due in part to size requirements) and the knock-on effects that this could have on the delivery of much needed housing. In order to be able to include such requirements in the Local Plan, the Council will need to be able to robustly justify the inclusion and demonstrate that consideration has been given to this requirement within the viability study. The provision of M4(3) wheelchair user dwellings, is far more onerous in terms of size requirements; therefore, it is crucial that the implications of the proposed policy requirement have been properly tested.

4.8.5 In addition to this, with regard to M4(3) Gladman refer to the PPG which states:

“Part M of the Building Regulations sets a distinction between wheelchair accessible (a home readily useable by a wheelchair user at the point of completion) and wheelchair adaptable (a home that can be easily adapted to meet the needs of a household including wheelchair users) dwellings.

*Local plan policies for wheelchair accessible homes should be applied only to those dwellings where the local authority is responsible for allocating or nominating a person to live in that dwelling.*⁵

4.8.6 This clearly demonstrates that M4(3) should only be applied to affordable homes within the Council’s control and therefore Policy HP7 should be updated to reflect this and reference to private homes deleted.

4.8.7 Gladman submit that the Council must be able to demonstrate through robust evidence the justification for these policy requirements within the Local Plan in order for them to be found sound at examination. The NPPF footnote 46 states:

“Planning policies for housing should make use of the Government’s optional technical standards for accessible and adaptable housing, where this would address an identified need for such properties...”

⁴ PPG ID: 56-007-20150327

⁵ PPG ID: 56-009-20150327

- 4.8.8 Gladman do not consider that a general reference to an ageing population to be sufficient justification for the inclusion of these policy requirements. In this regard, Gladman refer to the Inspector’s report for the Derby Local Plan (December 2016), which at paragraph 117 states

“Although there is general evidence of an ageing population in the SHMA, having regard to the PPG this does not amount to the justification required for the LP to include the optional standards and the specific proportion of Part M4(2) dwellings...”

4.9 Policy HP9: Self and Custom Build Homes

- 4.9.1 Whilst Gladman support the inclusion of a policy in relation to self-build and custom build units, as this is in line with Government aims and objectives, we raise concerns regarding the detail within this policy.

- 4.9.2 It is expected that on sites of 40 dwellings or more (gross), 10% of the overall dwellings shall be provided through the provision of plots for self and custom build homes. Gladman welcome the flexibility provided by this policy which recognises that plots which do not sell within 12 months of initial promotion, are able to be developed for housing other than self-build homes.

- 4.9.3 However, Gladman query the evidential justification for 40 dwellings (gross) being the trigger for the provision of self-build and custom build housing. The Council’s Self Build Register only identifies 180 residents which does not translate to demand for this form of housing. Gladman consider that this policy would benefit from re-wording to state that, rather than being required on all schemes of 40 or more dwellings, that if up-to-date evidence indicates that there is a demand in the particular location then schemes are encouraged to make provision. Such a modification would help ensure that market housing is not unnecessarily delayed for a period of 12 months if there is no interest in self-build housing on individual sites.

4.10 Policy NE2: Biodiversity Net Gain

- 4.10.1 Policy NE2 requires development of one more or more dwelling or new commercial/leisure buildings to provide at least 10% net gain for biodiversity for the lifetime of the development. Gladman do not consider this policy to be positively prepared as it goes above and beyond that which is required by the NPP2019. Gladman submit that the percentage requirement should be deleted and reference to ‘biodiversity net gains’ included in the policy wording to ensure compliance with national policy.

4.11 Policy D5: Internal Space Standards

4.11.1 Policy D5 requires all new dwellings, including subdivisions and conversions to meet the nationally described space standards (NDSS) or future equivalent as a minimum.

4.11.2 In this regard Gladman refer to the Written Ministerial Statement (WMS) dated 25th March 2015 which confirms that:

“The optional new national technical standards should only be required through any new Local Plan policies if they address a clearly evidenced need, and where their impact on viability has been considered, in accordance with the NPPG”.

4.11.3 Furthermore with particular reference to the NDSS the PPG⁶ confirms:

“where a need for internal space standards is identified, local planning authorities should provide justification for requiring internal space policies”.

4.11.4 If the Council wishes to adopt this standard it should be justified by meeting the criteria set out in the PPG, including need, viability and impact on affordability.

4.11.5 The Council will need to provide robust evidence to justify the inclusion of the space standards within a policy in the Local Plan. Similarly to the accessibility standards, if it had been the Government’s intention that all properties were built to these standards then these standards would have been made mandatory rather than optional.

4.11.6 Gladman’s concerns regarding the optional national space standards relates to the additional cost and the implications for affordability. Where, for example, a housebuilder would normally build a standard 2-bedroom unit at 72sqm, the national space standards would require the dwellings to have certain dimensions which would mean they could only be built at a minimum of 79sqm, which could add significantly to the cost of the property and in turn increase the cost of an entry level 2-bedroom house, further exacerbating the affordability issues in the area.

4.11.7 The Council need to take these factors into account and will need robust evidence on both need and viability to support the proposed policy requirements outlined in Policy D5.

⁶ ID: 56-020-20150327.

5 OVERALL CONCLUSIONS

5.1.1 These representations have been drafted with reference to the revised NPPF(2019) and the updated PPG. To be found sound at examination the FLP would need to meet the tests set out in paragraph 35 of the NPPF(2019):

- **“Positively prepared** – providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework.”

5.1.2 Having considered the FLP in this context, Gladman are concerned that a number of policies contained within this plan do not accord with national policy and require modification to ensure soundness with the tests set out above.

5.1.3 Gladman believe that further flexibility and contingency is required through the FLP and that, consequently, additional non-strategic housing allocations should be included in the plan.

5.1.4 Gladman welcome this opportunity to comment on the publication draft plan and would like to be kept updated on progress moving forwards with the FLP. Gladman request to participate at the relevant hearing sessions through the examination of the FLP to discuss the matters raised in this submission further.

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy DS1: Development In The Countryside

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Gosport Borough Council whilst supporting the overall intention of Policy DS1: Development in the Countryside it considers that amendments are required to the wording in order for the policy to be deemed **effective** to deliver cross-boundary strategic objectives.

Comments continued on next page

B3 Extension:

Policy DS1 relates to development in the countryside and the overall approach is to limit development in the countryside outside of the urban area boundaries as defined on the Policies Map. The policy sets out those circumstances where development will be supported outside the urban area boundary. In most instances these circumstances are limited in scope and scale. In addition the policy includes five criteria (i-v) which any of the identified exceptions need to adhere to. This includes requiring developers of any such exception to demonstrate that their proposal:

- requires a site outside of the urban area;
- would conserve and enhance landscapes;
- recognises the intrinsic character and beauty of the countryside;
- is not on Best and Most Versatile agricultural land; and
- if relevant the development does not significantly affect the integrity of a Strategic Gap.

Whilst many of these exceptions appear reasonable, particularly when assessed against the five criteria outlined above, there is concern relating to development cited in point e) in the policy which reads:

Proposals for development in the countryside, which is defined as land outside the Urban Area boundary, as shown on the Policies Map, will be supported where the proposal (inter alia)

e) is for housing development compliant with one of the following policies HP1, HP2, HP4, HP5 HP6 and HP11.

The Council does not have particular concerns with the link to Policies HP1, HP2 and HP11 nor the way these policies are worded. Policy HP1 is a standard 'housing in the countryside' policy relating to the conversion of existing buildings and replacement dwellings; Policy HP2 enables very small scale development of no more than 4 dwellings in scale with its surroundings; and HP11 is a standard criteria-based policy relating to sites for gypsies, travellers and travelling show.

However the Council has concerns over the following aspects:

- The link in Policy DS1 to Policy HP4 and the wording of Policy HP4;
- The link in Policy DS1 to Policy HP5, although the wording of HP5 is not a particular issue;
- The link in Policy DS1 to Policy HP6 and the wording of Policy HP6

Taking each in turn, Policy HP4 relates to the Five Year Housing Supply and where the Council cannot demonstrate a five year supply of land for residential development, additional housing sites outside the urban area boundary may be permitted where they meet all the following criteria:

- The proposal is relative in scale to the demonstrated five year housing land supply shortfall;

- The proposal is sustainably located adjacent to, and well related to, the existing urban area boundaries and can be well integrated with the neighbouring settlement;
- The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant does not affect the integrity of a Strategic Gap;
- It can be demonstrated that the proposal is deliverable in the short term; and
- The proposal would not have unacceptable environmental, amenity and traffic implications.

The Council objects to the both the wording of **Policy HP4** and the link to DS1 policy as it implies that if Fareham's five year housing supply is not met, the first area of search is outside of the urban area boundary. Instead the policy should refer to sites within urban areas, brownfield land, underutilised employment sites, sites close to train stations, under-utilised town centre sites such as car parks and shopping precincts, consideration of using Council land assets and other public sector land, intensification of existing neighbourhoods, as well as opportunities to increase densities on existing allocations such as Welborne. These types of sites should be clearly identified as being preferential before greenfield land outside the urban area, particularly within the Strategic Gap, are considered.

It is understandable why the FLP2037 has a policy relating to this matter as the Government's National Planning Policy Framework (NPPF) requires local planning authorities to have a five year housing supply and if this cannot be demonstrated the relevant allocation policies in an adopted Local Plan (even a recently adopted one) becomes out of date and consequently housing can take place on sites previously not identified for housing. Both Councils have made representations to the Government in the past regarding this matter and how it is detrimental to a plan-led system by creating uncertainty for local communities and undermining the effective provision of infrastructure to serve these new residents. This is particularly the case when such sites can proceed on a cumulative and speculative basis without a comprehensive assessment of impacts that would normally be undertaken at the local plan-making stage.

This policy is therefore aiming to set out criteria to assess any proposal that comes forward that is not allocated in an adopted Local Plan. However it is this Council's view that the presence of the policy seems to direct development towards greenfield sites quite readily before other urban and more sustainable sites are fully considered.

Policy HP5 relates to the provision of affordable housing on sites of 10 or more and the Council has no particular issue with the wording of HP5. However when it is linked with Policy DS1 it could be interpreted that FBC will accept in principle the development of any affordable housing site outside the urban area boundary. Whilst the criteria i-v exists there is concern that unsuitable developments in the Strategic Gap could be developed in a piecemeal fashion with a number of different speculative sites coming forward adjacent to each other of varying sizes. It is considered that the inclusion of a link to HP5 does not provide sufficient certainty of what development will take place over the plan period; nor does it ensure that the

environmental, transport and infrastructure implications of each affordable housing development has been fully assessed in combination with adopted allocations or other speculative proposals coming forward over the plan period.

Whilst it is not considered the intention of the policy it could potentially enable large scale housing development outside of the urban area boundary if it can be demonstrated that 40% affordable housing is being achieved.

In the light of this it is not proposed to amend the wording of Policy HP5 only that the link included in DS1 is removed. Instead if development does come forward in the countryside through other policy mechanisms this policy could still be used as each policy in the plan needs to be read in conjunction with all other relevant plans and consequently the affordable housing policy would still apply for developments over 10 dwellings. The removal of the reference in DS1 would remove this being cited as a primary reason for development in the Strategic Gap ahead of more suitable sites within the urban area in both Fareham and Gosport Boroughs.

Policy HP6 which is also linked to point e) of Policy DS1, relates to affordable housing exception sites and is a commonly used policy across England to allow small affordable housing sites adjacent to villages to be developed on land which would not normally be permitted to come forward. This would enable viable schemes to be implemented to meet very local needs. In principle the Council does not have an objection to such a policy nor its link to DS1 enabling such schemes to come forward outside the urban area. However the way in which the policy is worded could enable the development of significant schemes in the strategic gap. The policy includes the following text:

Policy HP6: Exception Sites

The development of Rural Exception Sites will be permitted where:

All dwellings are affordable (as defined in the NPPF); and

The affordable delivery is not meeting the affordable housing need and the development is relative in scale to the shortfall; and

The development is located adjacent to, and well related to, the existing urban area boundaries; and

The affordable rent products will be brought forward by, and will be managed by, a not for profit social housing provider who is regulated by Homes England; and

The affordable housing meets the local needs of the adjacent settlement.

The development of Entry-Level Exception Sites suitable for first time buyers (or those looking to rent their first home) will be permitted where:

The site is adjacent to existing settlements; and

All dwellings are affordable (as defined in the NPPF), and a range of affordable tenure types, including those that are suitable for first-time renters or buyers are provided; and

*The site is less than 1 hectare or relative in scale (does not exceed 5% of the size of the adjacent settlement); and
It can be demonstrated, based on an up to date local housing needs assessment, that the need for the housing proposed will not be met through the allocations in the Plan or development with extant planning permission.*

Whilst it appears from the accompanying justification text that the intention of the policy is to enable the development of small sites there is concern that the wording of the policy as shown above could be used to enable much larger scale development. For example the first part of the policy could potentially facilitate a single or a series of large scale affordable housing developments in the Strategic Gap. If such schemes are promoted speculatively in a number of locations in the Strategic Gap there would be no opportunity to assess the in-combination environmental, landscape or infrastructure implications for the Gosport Peninsula.

The second part of the policy would allow entry-level exception sites with a limit of 1 hectare and a proviso that the scheme does not exceed 5% of the size of the adjacent settlement. Potentially this could lead to a series of 1 hectare entry home exception sites to be developed adjacent to the Gosport Borough boundary and as the town is large the 5% restriction would be meaningless.

It is clear from the recent number of speculative applications in the Strategic Gap how both parts of the policy (together with HP4 and HP5) could be used by developers to argue a case for development in these locations with the detrimental implications as set out previously in the Council's objections to the Regulation 18 consultations. Whilst this does not appear to be the policy's intention the wording could encourage speculative development to come forward within the Strategic Gap.

The Council is particularly concerned that the proposed wording and links will undermine the effectiveness of the Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington including its function of separating the settlements, providing an effective transport corridor serving the Gosport Peninsula as well as its role for providing green infrastructure benefits for the area. This representation and the Council's concerns regarding the impact of development within the Strategic Gap should be read in conjunction with the Appendix submitted with the Council's representation relating to Policy DP2.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Link with HP4: If Policy DP1 is to be linked with Policy HP4 then Policy HP4 needs to be changed to reflect that sites in the countryside are not the first area of search for development if there is not a five year supply. Instead other sources of supply should be identified including sites within urban areas, brownfield land, under-utilised employment sites, sites close to train stations, under-utilised town centre sites such as car parks and shopping precincts, consideration of using Council land assets and other public sector land, intensification of existing neighbourhoods, as well as opportunities to increase densities on existing allocations such as Welborne. These types of sites should be clearly identified as being preferential before greenfield land outside the urban area, particularly within the Strategic Gap, are considered.

Link with HP5: To remove link to Policy HP5 in part e of Policy DP1 as the link implies that any affordable housing scheme will be accepted in the countryside in addition to the provisions of HP6. The link is not necessary, instead if an affordable housing came forward through a different policy mechanism Policy HP5 could still be applied as policies are read in conjunction with each other. It is not necessary to provide an explicit link in HP5 as it infers that any and all affordable housing schemes would be treated as acceptable outside the urban area (not just those exception sites referred to in Policy HP6).

Link with HP6: If Policy DP1 is to be linked with HP6, the wording of the policy HP6 c) needs to be amended to refer to, 'existing urban area boundaries for settlements that are within Fareham Borough only'. This would then provide clarity that development adjacent to Gosport Borough would not be considered under this policy. The policy also needs to set an upper limit of what is meant by 'small sites' as identified in the justification text (paragraph 5.46 of FLP) and this needs to be set out in the Policy itself. This will avoid unintended significant development south of Fareham in the Strategic Gap or east of Newgate Lane East. Finally there needs to be some explicit wording which resists successive one hectare parcels of land coming forward in the same vicinity.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

These suggested modifications would make the policy sound as it would become an effective policy by improving clarity by providing sufficient protection of the countryside and directing development to urban brownfield sites. It would meet cross-boundary objectives. Consequently this would be in accordance with the National Planning Policy Framework

B4c Your suggested revised wording of any policy or text:

Remove link to Policy HP5 in DP1

If wording as suggested above for policies HP4 and HP6 then it would be appropriate to retain the links in DP1

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The Council is prepared to attend any session regarding the future of the Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington including the proposed wording changes to Policy DP1 if the Inspector considers it will assist the examination.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

FAREHAM
BOROUGH COUNCIL

Ms Claire Burnett
Head of Planning Strategy and Regeneration
Fareham Borough Council
Civic Offices,
Civic Way,
Fareham,
Hampshire.

8th December 2017

By e-mail

Dear Ms Burnett

Draft Fareham Borough Local Plan 2036

Following Gosport Borough Council's consideration of the Draft Fareham Borough Local Plan 2036 (DFLP) at its Regulatory Board of 6th December 2017 the Council would like to make the following representations.

Summary of comments

- This Council considers that Fareham Borough Council (FBC) has not fully met its responsibility under the duty to cooperate as the Government expects joint working on areas of common interest to be diligently undertaken for the mutual benefit of neighbouring authorities.
- That in the light of the requirements of the PUSH Spatial Position Statement and the Government's potential new standard methodology for calculating housing requirements, FBC consider whether there is the potential for any additional housing sites which are suitable, available and achievable (Policy H1 and Policy DA1).
- That FBC considers whether there is any potential to increase the affordable housing requirement from 30% (Policy H2).
- That this Council strongly objects to the proposed residential allocation at Newgate Lane for the reasons set out later in this submission (Policy HA2) and summarised below:
 - The proposal would physically and visually diminish the long-established Strategic Gap between Gosport/Fareham and Lee-on-the-Solent/Stubbington;
 - The proposal has the potential to negate the benefits being provided by the new improvements to Newgate Lane with a negative impact on traffic flow and increased congestion to the detriment of Gosport residents and the

local economy including accessibility to the Solent Enterprise Zone at Daedalus;

- The proposal has the potential to significantly harm the amenities of local Gosport residents with the introduction of new access points to existing residential areas, which due to the scale of the proposal would potentially lead to a significant increase of traffic on residential roads;
 - The proposal, as described, is very car dependent with no provision for public transport. This would exacerbate the amount of trips using Newgate Lane;
 - Any additional traffic on Newgate Lane is likely to have an impact on the Air Quality Management Area (AQMA) at the north end of Newgate Lane and Gosport Road and this may be difficult to mitigate given the scale of the allocation and limited public transport choice;
 - There is insufficient information on supporting infrastructure required including education, medical and community facilities;
 - There is no provision in the policy to protect the amenities of existing residents in the vicinity.
- That this Council supports the additional employment allocation at Daedalus (Policy SP3) with further comments highlighted later in this submission.
 - That this Council supports the following policies:
 - Policy E5: Boatyards which aims to protect important marine sites for employment purposes;
 - Policy INF2: Sustainable Transport which aims to ensure the accessibility of existing highways networks are not harmed and provision is made for public transport and active travel;
 - Policy INF3: Road Network Improvements which safeguards the route of the Stubbington Bypass;
 - Policy D4: Coordination of Development and Piecemeal Proposals which aims to ensure a coordinated approach to development.

These matters and a number of other comments are further detailed in the following sections and are based on the Council's Regulatory Board Report and its subsequent resolution.

Duty to Cooperate

Local authorities are expected to demonstrate evidence of having effectively cooperated to plan for issues with cross-boundary impacts when their Local Plans are submitted for examination.

The national Planning Practice Guidance (PPG) states that local planning authorities and other public bodies need to work together from the outset at the plan scoping and evidence gathering stages before options for the planning strategy are identified. This will help to identify and assess the implications of any strategic cross boundary

issues on which they need to work together and maximise the effectiveness of Local Plans.

This Council is particularly concerned regarding the impacts of the proposed residential allocation of Newgate Lane on residents and businesses of Gosport Borough (as detailed later in this submission). The Council considers that FBC have not had any meaningful engagement with Gosport Borough Council (nor Hampshire County Council, as the highway authority) on the proposed allocation, particularly regarding key cross boundary matters such as the designation of the Strategic Gap, and key infrastructure issues including transport, education and health.

With regard to the duty to cooperate the PPG states that planning for infrastructure is a critical element of strategic planning. The National Planning Policy Framework (NPPF) (paragraph 162) makes clear that local planning authorities should work with other local planning authorities and providers to assess the quality and capacity of a range of infrastructure types. This will ensure that key infrastructure such as transport, telecommunications, energy, water, health, social care and education, is properly planned. Planning for infrastructure is therefore a key requirement of the effectiveness element of the test of Local Plan soundness, which requires plans to be deliverable and based on effective joint working on cross boundary strategic priorities.

Housing requirements

The DFLP makes it clear that providing new homes to address housing need is a critical part of any Local Plan and a key requirement of the NPPF. Its development strategy aims to use previously developed land where available and greenfield land around the edges of existing urban areas in order to meet remaining housing needs but otherwise it states that it aims to strictly control development outside urban areas.

The DFLP makes provision for 11,300 dwellings over the period 2011-2036 (452 dwellings per annum). This figure has been informed by the PUSH Strategic Housing Market Assessment (SHMA Jan 2014) with an Objectively Assessed Housing Need (OAHN) Update published in April 2016. Subsequently the PUSH authorities considered the potential distribution of most of the housing requirement to 2034 and included this in the PUSH Spatial Position Statement (H1) (June 2016).

The various requirements of the OAHN, the PUSH Spatial Position Statement and the dwelling figures included in the DFLP are summarised in the table below:

Table 1: FLP Dwelling Target in comparison with OAHN and PUSH Spatial Position figure

	Timeframe	Borough total	Annualised
PUSH SHMA and Objectively Assessed Housing Needs (OAHN) (April 2016)	2011-2036 (25 yrs)	10,500	420
PUSH Spatial Position Statement	2011-2034 (23 yrs)	10,460	455 ¹
Fareham Local Plan 2036	2011-2036	11,300	455 (2011-2034) 420 (2034-2036)

It is therefore recognised that the DFLP meets the April 2016 OAHN requirements

¹ Rounded

over the period to 2036 by over 7%. It also noted that the sources of housing supply identified in Table 2 below, is currently higher than the DFLP requirement of 11,300.

Table 2: Sources of supply

Housing supply source	Number of dwellings
Housing completions (2011/12-2016/17)	1,859
Planning permissions	1,136
Windfall	1,320
Welborne (up to 2036)	3,840
Fareham Town Centre housing allocations	577
New Housing allocations	2,827
Total	11,559

It is important to recognise that the PUSH Planning Position Statement (paragraph 5.30) identifies that across the mainland PUSH area there is a shortfall of 6,300 dwellings (or 6.5%) to 2034 and when the Portsmouth housing market area (HMA) is considered separately there is a 4,180 dwellings shortfall (or 9%). Fareham Borough is located with the Portsmouth and Southampton HMA's and the inter-relationship between the two areas is recognised.

The PUSH Position Statement states that, *"Local authorities should actively seek opportunities to identify additional potential for housing provision to address the shortfall against the objectively assessed need through the local plan process" (H1)*. It adds that, *"any such potential opportunities will be tested against the principles of sustainable development set out in the National Planning Policy Framework and this Position Statement."*

The proposed dwelling figure in the DFLP in effect reduces the overall shortfall of the PUSH mainland requirement by 800 dwellings². A significant question is whether there is sufficient capacity in the remaining parts of the Portsmouth HMA (Gosport, Havant, Portsmouth, Winchester (part) and East Hampshire (part)) to meet the remainder of this shortfall; if this cannot be demonstrated and if Fareham are unable to adequately justify why sites have or have not been allocated the Fareham Plan may be deemed to be unsound.

It is also important to recognise that the Government has recently consulted on a standard methodology to calculate housing need in a document entitled *'Planning for the right homes in the right places'*. Plans submitted to the Secretary of State after 31st March 2018 will need to use the new standard methodology. FBC are proposing to submit their plan in Autumn 2018. The latest calculated need figure included with the Government's consultation document highlights a figure of 531 per annum for Fareham Borough compared to the current figure for Fareham (420 per annum). This would result in an allocation requirement of 13,275 dwellings as opposed to 11,300 dwellings during a 25 year period.

The new methodology also requires a *'Statement of Common Ground'* to be produced between neighbouring local planning authorities which would form part of the statutory duty to cooperate. On this basis the PUSH authorities need to continue

² Based on the following calculation
 The OAHN figure for Fareham Borough between 2011-2036 is **10,500** (Table 1 of the PUSH Spatial Position Statement)
 The DFLP proposes **11,300** dwellings. 11,300- 10,500=**800**

to work collaboratively to meet the housing market shortfall and FBC needs to be satisfied (and be able to satisfy the Inspector) that it has explored all other opportunities which are suitable, available and achievable, and can be tested favourably against the relevant sustainability principles set out in the NPPF.

Affordable Housing

Policy H2 of the DFLP relates to affordable housing which requires that on sites of 11 or more (or residential proposals with a total floorspace exceeding 1,000m²) proposals shall provide 30% of dwellings as affordable housing or 20% within the Fareham town centre boundary. This is based on a viability assessment. This would include the requirement that 10% of the overall dwellings on site would be an affordable home ownership product.

The Gosport Borough Local Plan 2011-2029 (GBLP) requires 40% affordable housing on sites of 10 or more. The affordability of dwellings in Fareham Borough is an issue. For example, the ratio of median house price to median gross annual workplace earnings is 9.22 in Fareham compared to 7.01 in Gosport. In the light of this and the fact that Gosport Borough has been able to achieve 40% affordable housing on numerous sites, FBC may wish to consider seeking a higher proportion of affordable housing. This may require re-examination of the assumptions made as part of their housing viability work. If there are viability issues these can be addressed as part of the provisions of the policy which outlines an open book approach with a third party assessment of development viability.

Newgate Lane Housing Allocation

In order to meet its housing requirement the DFLP identifies a number of housing allocations across the Plan area. Of particular relevance to Gosport Borough is the allocation of land at Newgate Lane for between 370 and 475 dwellings (Policy HA2).

It is acknowledged that FBC needs to find sufficient land to meet its housing requirements and that dwellings at this site would also assist in meeting the needs of people living in Gosport. However, there are a number of significant issues raised by this allocation, which are outlined below, and which it will be necessary for FBC to fully consider.

Strategic Gap

In order to accommodate the Newgate Lane residential allocation the DFLP proposes to amend the Strategic Gap between '*Fareham/Bridgemarky and Stubbington/Lee-on-the-Solent*', which is identified in the GBLP (Policy LP3) and FBC's current Local Plan (Policy CS22 of the Core Strategy). GBC and FBC have worked collaboratively in the past to define the boundaries of the Strategic Gap and have been successful in maintaining a functional gap and visual separation between the settlements.

The sub-regional PUSH Spatial Position Statement states that Councils should identify in their Local Plans strategic countryside gaps of sub-regional importance and that these gaps are important in maintaining the sense of place, settlement identity and countryside setting for the sub region and local communities. It recognises that gaps can provide the space for necessary uses such as recreation areas, transport corridors and environmental mitigation.

FBC's current Policy CS22 states that '*development proposals will not be permitted*

either individually or cumulatively where it significantly affects the integrity of the gap and the physical and visual separation of the settlements’. The Policy recognises that maintaining separation will prevent coalescence of the settlements in this densely settled part of South Hampshire.

The justification text states that gaps between settlements help define and maintain the separate identity of individual settlements and have strong local support. It adds that Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, keeping individual settlements separate and providing opportunities for green infrastructure/green corridors. It acknowledges that continuing pressure for high levels of development mean that maintaining gaps continues to be justified.

It is considered that this remains relevant in the case of the Newgate Lane area. Indeed the current boundary has been supported by a Planning Inspector as recently as May 2015. In his report into the Examination in Public for the Fareham Local Plan Part 2, the Inspector refers to FBC’s evidence regarding the review of Strategic Gaps and states,

‘although the review did not specifically take into account the route of the Stubbington by-pass and the Newgate Lane improvements, there is no reason to conclude that these proposals would justify altering the boundary of the gap in those locations. Having visited the area I agree with the Council that the gap between Fareham and Stubbington is justified in order to retain visual separation and that the proposed road improvements would not justify a revision to the boundary. The Council’s approach is sound.’

The latest DFLP also includes a policy relating to Strategic Gaps (Policy SP6) which continues to prevent the coalescence of urban areas and to maintain the separate identity of settlements. It also identifies a Strategic Gap between *‘Fareham/Bridgemary and Stubbington/Lee-on-the-Solent’*. It states, *‘development proposals will not be permitted where they cause severe adverse harm to the physical and visual separation of settlements’*. The justification text acknowledges that, *‘retaining the open farmland gap between Fareham and Stubbington is critical in preventing the physical coalescence of these two settlements together with maintaining the sense of separation’*. It also clearly states in Paragraph 4.39 that, *‘further to the east, retaining the gap will help maintain the separation of Stubbington and Lee-on-the-Solent from Fareham and Bridgemary along with maintaining the separate identity of Peel Common.’* This therefore appears to contradict the removal of the Newgate Lane area from the Strategic Gap.

The proposed removal of this land from the Strategic Gap also appears to be at odds with FBC’s own supporting evidence. The Fareham Landscape Assessment (2017) incorporates a review of the Strategic Gap designation including the ‘Woodcot area’ which includes the land covered by the proposed Newgate Lane allocation. It concludes,

‘This is a cohesive area of undeveloped landscape which performs an important role in respect of the primary purposes of the Strategic Gap i.e. in defining the edges, separate identity and settings of Fareham and Gosport, preventing their coalescence. Even minor encroachment beyond existing settlement boundaries could have an adverse effect on these functions and the overall integrity of the landscape and Strategic Gap. It is recommended that the Gap boundaries remain unchanged.’

Gosport Borough Council agrees with these findings set out in the Fareham Landscape Assessment and considers that the Woodcot area should remain an integral part of the Strategic Gap.

Whilst it is recognised that the local plan process is the appropriate time to review such designations it is considered that the proposed change at Newgate Lane will affect the integrity of the remaining gap by significantly reducing its width. The residential proposal by its sheer scale will undoubtedly harm the integrity of the gap and will diminish the physical and visual separation of the settlements.

Transport and accessibility

The Council also objects to the proposed allocation due to the potential negative impacts on the new Newgate Lane route. The new route was designed to achieve the following:

- improving access to the Peninsula including the Solent Enterprise Zone at Daedalus;
- increasing capacity and easing existing congestion on the route;
- creating fewer interruptions to traffic flow caused by turning traffic, or on-road cyclists;
- improving the alignment for safety reasons.

These objectives would be undermined by the proposed development. It was not intended that the improvements would facilitate new housing development.

The DFLP is accompanied by an Interim Transport Assessment for the DFLP allocations (Oct 2017) which recognises that the current Volume over Capacity (v/c) exceed 100% in the PM peak on Newgate Lane and is approaching available practical capacity in the AM peak resulting in significant congestion. Consequently it is already recognised that traffic exceeds the available capacity on this strategic route. Table 3 summarises information from this document which highlights that this situation is predicted to worsen over the period to 2036 and consequently the report recognises that Newgate Lane will experience ‘more noticeable increases in traffic flow.’

Table 3: Road capacity on Newgate Lane

	Volume over Capacity (v/c) on Newgate Lane		
	2015	2036 Baseline: Existing adopted local plan commitments (S Hants) with planned transport improvements*1	2036 Baseline plus DFLP allocations*2
AM	83%	98%	100%
PM	102%	106%	107%

*1 including Stubbington Bypass and Newgate Lane improvements
 *2 this does not include any potential growth in Gosport Borough arising from the Gosport Borough Local Plan Review

At the present time this allocation has not been assessed by the Local Highway Authority to determine the implications on the highway capacity of Newgate Lane and no modelling work has been assessed to consider the trip generation from this level

of development, either in terms of numbers of additional vehicles or their likely distribution on the highway network or highway safety. Therefore the Council has no option but to object to the proposed allocation in the DFLP on this issue at this stage. Gosport Borough Council is very concerned that the proposed allocation will have a detrimental impact on the existing significant congestion problems on the Gosport Peninsula and detract from recent and proposed improvements that aim to improve traffic flow to, and from, the Peninsula. This is critical for the future economic prosperity of the Borough including achieving the full potential of the Enterprise Zone.

The north-south movements along Newgate Lane should not be hindered by any proposed new access arrangements for the proposed allocation and the Council objects to any proposals which will significantly hinder this flow. A new access off the proposed roundabout will introduce an interruption to traffic flow, particularly as it is envisaged to serve the whole development and that by its location and limited transport choice the proposed allocation would be very car-dependent. Indeed the supporting FBC Sustainability Appraisal concedes that the *'majority of sites [in the DFLP] are sustainably located which will improve accessibility and encourage travel by sustainable modes, although the urban fringe sites at Funtley Road and Newgate Lane South are less sustainably located.'*

Due to the lack of detailed available information it is not known what the likely impacts will be on the links and junctions further north e.g. the northern section of Newgate Lane, the Longfield Avenue roundabout, the northern section of the A32 and the Quay Street roundabouts and beyond to the M27 Junction 11. Additionally, vehicles travelling south from the site will also reduce the capacity of the recently improved Peel Common Roundabout, which may also have significant implications for traffic queuing on Rowner Road.

Given that the proposed allocation may well negate the benefits gained by the Newgate Lane road improvements it will also be necessary to consider whether this site together with other potential residential developments on the south side of Fareham could cumulatively have a detrimental impact on the function and objectives of the Stubbington Bypass. It is important to note that the DFLP states in paragraph 11.46 that the Stubbington Bypass is not being provided with an intention of serving or facilitating additional new homes. FBC is therefore not being consistent in its policy approach between the Stubbington Bypass and the Newgate Lane improvements.

The Newgate Lane allocation policy (HA2) includes a criterion that makes provision for off-site highway improvements and mitigation works, however, this Council requires further details of such measures, and questions whether the principle of any proposal at this site would be able to satisfactorily mitigate these impacts.

The Council is also concerned that the proposed allocation would not meet the requirements of the DFLP sustainable transport policy (Policy INF2). Amongst other things, this policy aims to ensure that development:

- does not demonstrate a severe cumulative impact (causing demonstrable harm) on the operation, safety or accessibility to the local or strategic highway networks; and
- mitigates impacts on the local or strategic highway networks arising from the development itself, or the cumulative effects of development on the network, through provision of improvements or enhancements to the existing network to accommodate additional traffic; or contributions towards necessary or relevant transport improvements.

In the light of the above policy it is considered that the proposed allocation may not be able to provide any meaningful improvements to satisfy these requirements given the current and ongoing access issues to and from the Gosport Peninsula.

The DFLP originally proposed two other vehicular accesses (in addition to Newgate Lane) which link the potential new allocation to the existing residential communities in Gosport. This includes Brookers Lane as a secondary access for a limited number of dwellings.

The other proposed access off Tukes Avenue has now been withdrawn following a recently issued addendum by FBC which reads, *'The site promoter has advised Fareham Borough Council that the potential access identified via the demolition of two houses on Tukes Avenue (165 and 167) is a factual error. The site promoter has confirmed that potential vehicle access via these properties is not being pursued'*

Notwithstanding that the residents of these and adjacent properties were most unfortunately not previously notified of these proposals, it is not clear from this statement whether the site promoter will be seeking an alternative access on the eastern boundary. It is considered that any such access points from housing areas within Gosport, will add to traffic on the local highway network within Gosport, which again has not yet been quantified in terms of number/distribution and junction/link capacity. The nature and scale of these access points will have a direct impact on their use/attractiveness, particularly if through routes are created. The creation of such accesses may create rat-runs through the existing residential areas within Gosport, due to perceived journey time savings compared with joining Rowner Road/Peel Common Roundabout. This could be exacerbated with the development of the Stubbington Bypass.

Despite the addendum significant concerns remain regarding any proposed access onto Tukes Avenue. These include:

- The amenities of neighbouring residents as an access road will serve a considerable number of dwellings;
- The capacity of Tukes Avenue and adjoining roads to take the additional traffic; and
- The proximity to facilities such as Woodcot Primary School and the impact on pedestrian safety.

There is no mention of improving public transport with regard to the proposed allocation. This needs further consideration to reduce the site's car dependency which would add further pressure on Newgate Lane. This will also have a detrimental impact on the existing Air Quality Management Areas within Fareham. It will be necessary to explore strategic transport options such as the potential for a new bus rapid transit link which could connect Lee-on-the-Solent, Daedalus, Newgate Lane, and the Busway through to Fareham.

Cycle and pedestrian links to the adjacent Bridgemaury and Peel Common are identified in Policy HA2.

Residential amenities and design

Any development of this scale on greenfield land will create significant concerns from existing residents particularly in areas immediately adjoining the site. It will be critical that their amenities are not harmed by any future proposals on this site and this

should be reflected in Policy HA2.

School provision

Provision is included in the policy to ensure improvements to local schools and early-years childcare (as identified by the Local Education Authority). However, there is insufficient detail of how local school places could be affected by the proposals. It will be necessary to understand the impact of the new housing development on local schools as any development on this site is likely to include a high proportion of households with children.

Community facilities

It will also be important to understand whether any new development at Newgate Lane can be sufficiently supported by other community facilities in the area including health facilities (such as GPs) and community hall provision and whether it is necessary to provide new community facilities as part of the development. Consequently without such information such proposals cannot be supported.

Policy CF1 of the DFLP recognises the need for community facilities as part of large residential developments and that these should be delivered to prescribed timescales to meet the needs of the community. The DFLP specifically mentions Bridgemary School as the primary location for community facilities (sport pitches, courts, hall and stage, and various meeting and conference rooms for hire). It states that these facilities are generally less than 1km from within the allocation and that it is not considered necessary for additional space to be provided with the allocation.

Policy LP32 of the GBLP requires the consideration of community facilities for new residential developments (normally for sites of 100 dwellings or more). It is therefore considered appropriate for FBC to further assess the community requirements of a development of this scale and include such provision within Policy HA2.

Open space

The proposals as set out in Policy HA2 include a number of open space requirements including:

- Neighbourhood Equipped Area of Play (NEAP) and a Multi-Use Games Area for older children on-site;
- Improvements to existing off-site sports facilities at Brookers Field and Tukes Avenue which are GBC-owned facilities.
- The potential to take a financial contribution to improve sports pitch provision and associated facilities at Tukes Avenue Open Space and/or Brookers Field Recreation Ground.

It will be necessary to ensure such provision meets the requirements of any new community without affecting that enjoyed by existing residents.

Air quality

Any additional traffic on Newgate Lane is likely to have an impact on the Air Quality Management Area (AQMA) at the north end of Newgate Lane and Gosport Road and therefore it would be necessary to include measures mentioned in Policy INF2 specifically to mitigate this impact for this development allocation. This may be difficult for a development of this scale with limited public transport choice. The issue of air quality is highlighted in the Interim Traffic Assessment which notes that in January 2017, Fareham and Gosport Environmental Health Partnership issued the Annual Status Report 2016, which concluded that both the existing AQMAs need to

be extended as locations outside of the AQMAs had exceeded the annual mean NO₂ objective for Fareham. The AQMA extensions were agreed in October 2017.

Drainage

The area includes a number of drainage ditches which are part of the River Alver catchment. The development allocation proposes to retain and enhance these drainage ditches as part of a Sustainable Drainage System (SuDS). It will be important to understand the impact of any development on potential for surface water flooding in the vicinity and the water quality of the River Alver.

Natural environment

It is recognised that the proposal aims to retain existing field and tree boundaries and to incorporate street trees and verges to reflect the character of Bridgemary.

Employment policies

Employment floorspace requirements

The Draft Plan is proposing 130,000m² of new employment floorspace for the whole of Fareham Borough (Policy E1) which is based on the figure included in the PUSH Spatial Position Statement with the additional two years included on a pro-rata basis (and then rounded to nearest '000 m²).

Daedalus

Of particular interest to Gosport Borough is the proposed extension to the employment allocation at Daedalus (Policy SP3) which will result in an additional 48,000 m² of employment floorspace with a total of 98,000m² of light industrial, general industrial and warehousing floorspace (B1c, B2 and B8 uses) with ancillary office accommodation (B1a) plus 4,000sq.m of retained floorspace. This extended area includes the 2nd runway on the Daedalus East part of the site.

The Policy makes provision for:

- an employment hub that contributes positively to the creation of aviation, non-aviation and skills/innovation employment clusters;
- ancillary service infrastructure and facilities to support the Solent Airport, and Faraday and Swordfish Business Parks;
- broad aviation uses which support the long term sustainability of the airfield;
- strategically important energy and communications infrastructure;
- skilled jobs that take advantage of and develop local skills; and
- accessible public open space and enhancements to the strategic green infrastructure network.

In principle, this additional area allocated for employment is strongly supported as it will bring additional jobs and investment to the Peninsula which will be accessible to Gosport residents and reduce out-commuting on the A32.

However, it is important to raise a number of concerns with FBC which are set out below.

- No mention is made of the Daedalus Waterfront area and the cross boundary issues. The Council consider that the policy and justification text needs to recognise the full context of the site and that part of the Daedalus site is within Gosport Borough. It is important to recognise the opportunities of the Waterfront and how these contribute to the success of the whole site. It will

also be important to consider issues across the boundary including those relating to the provision of infrastructure in order not to prejudice delivery of the Waterfront.

- It is important that the proposed additional employment allocation set out in Policy SP3, which is over and above that set out in the original Outline Planning Permission, is subject to additional evidence with regard to issues such as transport movements. This is necessary in order not to prejudice development on those parts of the site that already have Outline permission. These areas may come forward at a later date than the proposed allocation due to issues relating to contamination and the presence of important heritage assets that may affect the overall viability and speed of delivery.

The Strategic Gap covering Daedalus including the Airport and the extended employment allocation will remain in order to prevent coalescence of the Stubbington/Lee-on-the Solent with Fareham/Gosport. It is proposed that the additional development at Daedalus will be perceived as an 'isolated' campus style commercial development within the airfield site which has a separate identity rather than an extension of the surrounding urban area. There needs to be a specific criterion in Policy SP3 regarding this issue to ensure that the appearance and function of the Strategic Gap is sufficiently protected with more detailed guidance as part of the justification text.

Marine economy

The other main employment policy of particular relevance to the Gosport economy is Policy E5 which relates to boatyards. This policy aims to protect marine-related employment uses. This policy is supported as the availability of waterfront sites around the Solent is limited and the marine businesses they support contribute to one of the key sectors of the sub-regional economy.

Transport

The DFLP safeguards the land required for the Stubbington Bypass and associated junctions (Policy INF3). It recognises that this route forms part of Hampshire County Council's plan for improving access to Fareham and Gosport and seeks to ease congestion, improve safety and the area's economic prosperity by encouraging investment and regeneration, including at the Solent Enterprise Zone at Daedalus. The accompanying text acknowledges this will create a reliable route for traffic wishing to travel from the Gosport Peninsula westwards towards the M27 at Junction 9, in conjunction with recently completed works at St Margaret's Roundabout on the A27, and works underway to upgrade the A27 between the Titchfield Gyratory and Segensworth to two lanes in both directions. It states that the bypass is not being provided with an intention of serving or facilitating additional new homes. The safeguarding of the Stubbington Bypass route is supported.

There also appears to be a proposed improvement on the DFLP Policies Map at the Delme Roundabout (A27) but this is not mentioned in the Plan itself. Therefore clarification is sought on this proposal.

The DFLP also aims to encourage sustainable and active travel modes (Policy INF2) which is supported. This issue has become particularly important for FBC due to the requirements associated with the Air Quality Management Areas (AQMAs) associated with the northern end of Newgate Lane and Gosport Road, and Portland Street.

Consequently development will be required to support the use of alternative vehicle types and fuels such as the installation of Electric Vehicle charging equipment in residential properties and communal parking area.

Other policies

Retail

The Fareham Local Plan does not allocate any addition retail floorspace as it acknowledges that its Town Centre has seen a significant increase in vacant retail floorspace from 5,345 m² to 10,234m² between 2016 and 2017 (representing an increased vacancy rate from 6% to 11%). Its evidence suggests there will be a requirement beyond 2026 but it has been decided to consider this when the Plan is next reviewed, recognising that the Government is proposing a requirement to review Local Plans every five years.³

Proposals relating to out-of-town shopping areas such as Speedfields Park (Newgate Lane) will be subject to Policy R4 which requires an impact assessment in accordance with the NPPF for proposals of 500sq.m or over (both new units or extensions) in order to demonstrate that there is no significant adverse effect on the vitality and viability of existing or proposed centres. This approach is supported.

Community Facilities and Open Space

It is noted that the Plan includes a number of policies relating to community facilities and open space which seek to retain and improve existing facilities.

Natural Environment

The Plan includes a series of policies relating to biodiversity including commitment to the Solent Recreation Mitigation Partnership, of which GBC is also a partner. It also includes provision relating to coastal flood risk management including the provisions of the River Hamble to Portchester Coastal Strategy prepared by the East Solent Coastal Partnership.

Design

The Plan includes a number of design and heritage policies which aim to protect the local distinctiveness of the landscape and built environment, and create a sense of place.

Policy D4 aims to coordinate development and states where proposals come forward that are part of a wider development site, supporting information will be expected to demonstrate that the proposal will not prejudice the development of the adjoining site and that the proposal maximises place-making opportunities. It adds that development proposals will not be permitted that: prevent or limit the potential for developing an adjoining site; or which do not maximise connectivity and permeability opportunities; or address mitigation needs relating to the wider development potential.

The aims of Policy D4 are supported and may be applicable with regard to the development of sites such as Daedalus.

³ As proposed in the Government's Housing White Paper - Fixing our broken housing market (Feb 2017)

Concluding remarks

In the light of the above comments it would be useful if we could meet with you to discuss these issues further. In the meantime if you require any clarification on these matters please do not hesitate to contact me or Jayson Grygiel, the Deputy Head of Planning Services (Policy) for further assistance.

Yours sincerely

Dear Claire

Fareham Borough Local Plan 2036: Issues and Options

Thank you for consulting Gosport Borough Council (GBC) on the Issues and Options document for the Fareham Borough Local Plan 2036. I can advise that the document was considered at the Council's Regulatory Board of 23rd July 2019.

A summary of our representations, based on the Board's resolution, is set out below with more detailed comments attached (Appendix 1). These additional comments also form part of the Council's representations.

- Gosport Borough Council strongly opposes significant housing development in the current Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington as it does not represent 'good growth' and that it merits continued protection from any future development. The reasons for the objection, set out in Appendix 1, are summarised as follows:
 - There is an imperative requirement to safeguard effective strategic transport routes through the Strategic Gap to improve accessibility to, and from, the Gosport Peninsula to support the local economy. Further allocations will individually and cumulatively exacerbate accessibility constraints for reasons detailed in Appendix 1.
 - Further allocations will lead to the extensive erosion of the Strategic Gap, which is a long established planning principle in the South Hampshire area, as identified by the Partnership for South Hampshire's Spatial Position Statement that aims to prevent coalescence of settlements, maintain a sense of place and settlement identity, and provide a countryside setting for the sub region and local communities.

- More specifically this Council maintains its objection in full to the proposed residential allocation at Newgate Lane (referred to in the previous Draft Fareham Local Plan (DFLP) (2017) as HA2) for the reasons set out below:
 - The proposal would physically and visually diminish the long-established Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington;
 - The proposal would negate the benefits provided by the recent improvements to Newgate Lane with a negative impact on traffic flow and increased congestion to the detriment of Gosport residents and the local economy including accessibility to the Solent Enterprise Zone at Daedalus;
 - The proposal would significantly harm the amenities of local Gosport residents with the introduction of new access points to existing residential areas, which due to the scale of the proposal would lead to a significant increase of traffic on residential roads;
 - The proposal, as previously described in the DFLP is very car dependent with no provision for public transport. This would exacerbate the number of trips using Newgate Lane
 - There is insufficient information on supporting infrastructure required including education, medical and community facilities;
- Both Councils should proceed to publish the bilateral Statement of Common Ground as practicably as possible identifying major areas of agreement and non-agreement.
- Both Councils should consider producing an agreed strategy for the strategic gap as part of our Statement of Common Ground work which can be included in the respective Local Plans. This strategy should aim to provide multi-functional benefits to local communities as set out in detail within Appendix 1.
- FBC should consider opportunities to increase residential densities at the proposed Welborne development to reduce the need to develop in the Strategic Gap. It should also consider increasing densities in sustainable locations within Fareham Borough including within, and adjacent to, centres, and in close proximity to railway stations.

In the light of the above comments it will be important to maintain our ongoing dialogue as part of our bilateral Statement of Common Ground work as well as our continued involvement as part of the multilateral PUSH initiatives. In the meantime if you require any clarification on these matters please do not hesitate to contact me.

Yours sincerely

Jayson Grygiel
Manager of Planning Policy

Appendix 1: Gosport Borough Council's detailed representations to the Fareham Local Plan: Issues and Options Consultation- July 2019

The detailed comments summarised in the attached letter are detailed below.

1.0 Land in the Fareham, Gosport, Lee-on-the-Solent, Stubbington Strategic Gap including the HA2 allocation

1.1 Firstly it is recognised that the standardised methodology introduced by the National Planning Policy Framework has increased the required number of dwellings that Fareham Borough Council need to consider over the Plan period to 2036 and hence the need to assess additional sites for residential allocations. However Gosport Borough Council strongly opposes new residential development in the Fareham-Gosport- Lee-on-the Solent and Stubbington (FGLS) Strategic Gap for a number of reasons set out below.

1.2 The Issues and Options document recognises that, '*previous planning policies have designated the whole area as a strategic gap in order to prevent Fareham and Stubbington from merging and help to define distinctive communities,*' and that, '*given the additional housing requirement, the Council is having to look again at the purpose of this existing strategic gap and its characteristics.*'

1.3 The Issues and Option Consultation also continues to identify the land between the Newgate Lane improvements and the Borough boundary at Bridgemary and Peel Common as a housing allocation (previously referred to as HA2).

1.4 As this site remains identified as an allocation and there has been no additional evidence to address any of the Council's substantial concerns it is proposed that the Council reiterates the comments made previously on this matter. Similarly as many of the Council's objections to HA2 are relevant to other potential allocations in the Fareham, Gosport, Lee-on-the-Solent and Stubbington (FGLS) Strategic Gap, it is proposed to set out our representations relating to HA2 and any potential additional allocations as a number of themes:

- Transport and Accessibility
- Air quality
- The principle of maintaining a Strategic Gap to prevent coalescence and protect the identity of settlements.
- Protecting the Strategic Gap to deliver multi-functional benefits for local communities
- Community and open space infrastructure

1.5 **Transport and accessibility**
Why is a strategic transport corridor so important? One of the Council's

primary concerns is the impact of potential new development, including HA2 and any additional allocations, will have on the effectiveness of the strategic transport corridor through the existing Strategic Gap. It is considered that any allocations which have access directly onto the recently improved Newgate Lane and the proposed Stubbington Bypass will negate the benefits these proposals will deliver to improve accessibility to, and from, the Peninsula.

- 1.6 These improvements are aimed at addressing existing acute transport infrastructure deficiencies, not to enable development on greenfield sites directly adjacent to the routes. Instead this improved infrastructure can bring regeneration benefits to difficult brownfield sites in Gosport and make them more attractive to investors. The NPPF is very clear that policies should promote the development of under-utilised land and buildings especially if this would help to meet identified needs for housing where land supply is constrained.
- 1.7 The issue of maintaining an effective transport corridor is imperative for Gosport's future prosperity. The Stubbington Bypass route is the only opportunity to improve vehicular access to the Borough. If the benefits of the Stubbington Bypass are negated by significant development being built with access directly onto the Bypass, this last opportunity would be lost and there would be a real sense that Gosport has been 'blocked in'.
- 1.8 This would perhaps be less significant if Gosport had its own railway station and had a reasonable job density rate with limited out-commuting. However this is certainly not the case.
- 1.9 Gosport has the lowest job density in the South East of England and one of the lowest in England at only 0.51 jobs per resident person of working age. Such a low job density has significant implications for the Borough including the considerable scale of daily out-commuting which puts tremendous pressure on the existing road system resulting in acute traffic congestion and high levels of air pollution as evidenced in the air quality management areas identified within Fareham Borough at the north end of the Peninsula. This congestion results in the road network reaching full capacity and an extended peak time spreading on key routes. This actual congestion as well as the wider perception of congestion that exists can act as a disincentive for business and employment investment. Gosport has limited transport options with no fixed rail link and hence the effectiveness of the small number of road routes from Gosport is even more important.
- 1.10 **Specific accessibility issues relating to HA2 and other allocations having direct access onto Newgate Lane East:** The Council would wish to maintain its objection to the HA2 proposal which included access directly onto Newgate Lane East. The Council's specific concerns regarding HA2 are also likely to be applicable to any further allocations in this area.
- 1.11 It is important to recognise that Newgate Lane East and other associated improvements were designed to achieve the following:
 - improving access to the Peninsula including the Solent Enterprise Zone at Daedalus;
 - increasing capacity and easing existing congestion on the route;

- creating fewer interruptions to traffic flow caused by turning traffic, or on-road cyclists;
- improving the alignment for safety reasons.

1.12 These objectives would be undermined by the proposed development at HA2 and other similar allocations. It was not intended that the strategic highways improvements would facilitate new housing development. Gosport Borough Council is very concerned that the HA2 proposed allocation and additional ones will have a detrimental impact on the existing significant congestion problems on the Gosport Peninsula and detract from recent and proposed improvements that aim to improve traffic flow to, and from, the Peninsula. This is critical for the future economic prosperity of the Borough including achieving the full potential of the Enterprise Zone.

1.13 The earlier Draft Fareham Local Plan (2017) (DFLP) was accompanied by an Interim Transport Assessment for the DFLP allocations (Oct 2017) which recognised that the current Volume over Capacity (v/c) exceed 100% in the PM peak on Newgate Lane and is approaching available practical capacity in the AM peak resulting in significant congestion. Consequently it is already recognised that traffic exceeds the available capacity on this strategic route. Table 1 summarises information from this document which highlighted that this situation is predicted to worsen over the period to 2036 and consequently the report recognised that Newgate Lane will experience *'more noticeable increases in traffic flow.'*

Table 1: Road capacity on Newgate Lane

	Volume over Capacity (v/c) on Newgate Lane		
	2015	2036 Baseline: Existing adopted local plan commitments (S Hants) with planned transport improvements* 1	2036 Baseline plus DFLP allocations*2
AM	83%	98%	100%
PM	102%	106%	107%

*1 including Stubbington Bypass and Newgate Lane improvements

*2 this does not include any potential growth in Gosport Borough arising from the Gosport Borough Local Plan 2036

1.14 Additional allocations in the Strategic Gap would exacerbate the situation still further. It will also be necessary to take into account the additional allocations being put forward as part of the emerging work for the Gosport Borough Local Plan 2036.

1.15 The north-south movements along Newgate Lane should not be hindered by any new access arrangements for any proposed allocation, and consequently the Council objects to any proposals which will significantly hinder this flow. A new access off the proposed roundabout will introduce an interruption to traffic flow, particularly as it is envisaged to serve the whole development and that by its location and limited transport choice the proposed allocation would be very car-dependent. Indeed the supporting FBC Sustainability Appraisal for the previous DFLP concedes that the *'majority of sites [in the DFLP] are sustainably located which will improve*

accessibility and encourage travel by sustainable modes, although the urban fringe sites at Funtley Road and Newgate Lane South are less sustainably located.'

- 1.16 Due to the lack of detailed information available at the Issues and Options stage it is not known what the likely impacts will be on the links and junctions further north e.g. the northern section of Newgate Lane, the Longfield Avenue roundabout, the northern section of the A32 and the Quay Street roundabouts and beyond to the M27 Junction 11. Additionally, vehicles travelling south from the site will also reduce the capacity of the recently improved Peel Common Roundabout, which may also have significant implications for traffic queuing on Rowner Road.
- 1.17 **Potential impact on the effectiveness of the Stubbington Bypass:** Given that proposed allocations may well negate the benefits gained by the Newgate Lane road improvements it will also be necessary to consider whether the HA2 site together with other potential residential allocations could cumulatively have a detrimental impact on the function and objectives of the Stubbington Bypass. .
- 1.18 The DFLP recognised that this route forms part of Hampshire County Council's plan for improving access to Fareham and Gosport and seeks to ease congestion, improve safety and the area's economic prosperity by encouraging investment and regeneration, including at the Solent Enterprise Zone at Daedalus. The accompanying text in the DFLP acknowledged this will create a reliable route for traffic wishing to travel from the Gosport Peninsula westwards towards the M27 at Junction 9, in conjunction with recently completed works at St Margaret's Roundabout on the A27, and works underway to upgrade the A27 between the Titchfield Gyratory and Segensworth to two lanes in both directions. It is important to note that the DFLP stated in paragraph 11.46 that the Stubbington Bypass is **not** being provided with an intention of serving or facilitating additional new homes. GBC consider that FBC's position in the DFLP relating to the Stubbington Bypass is still valid and should be maintained.

Air quality

- 1.19 Any additional traffic on Newgate Lane is likely to have an impact on the Air Quality Management Area (AQMA) at the north end of Newgate Lane and Gosport Road and therefore it would be necessary to include measures mentioned in Policy INF2 of the DFLP which promotes sustainable transport to mitigate this impact. This is likely to be very difficult for allocations in the Strategic Gap of this scale with limited public transport choice.

The principle of maintaining a Strategic Gap to prevent coalescence and protect the identity of settlements

- 1.20 The Strategic Gap is identified in the Gosport Borough Local Plan 2011-2029 (GBLP) (Policy LP3) and FBC's current Local Plan (Policy CS22 of the Core Strategy). GBC and FBC have worked collaboratively in the past to define the boundaries of the Strategic Gap and have been successful in maintaining a functional gap and visual separation between the settlements.

- 1.21 In order to accommodate the HA2 residential allocation the DFLP proposed to amend the Strategic Gap and this would be the likely consequence of any further proposed allocations within this broad area.
- 1.22 The sub-regional PUSH Spatial Position Statement states that Councils should identify in their Local Plans strategic countryside gaps of sub-regional importance and that these gaps are important in maintaining the sense of place, settlement identity and countryside setting for the sub region and local communities. It recognises that gaps can provide the space for necessary uses such as recreation areas, transport corridors and environmental mitigation.
- 1.23 FBC's current Policy CS22 states that '*development proposals will not be permitted either individually or cumulatively where it significantly affects the integrity of the gap and the physical and visual separation of the settlements*'. The Policy recognises that maintaining separation will prevent coalescence of the settlements in this densely settled part of South Hampshire.
- 1.24 The justification text states that gaps between settlements help define and maintain the separate identity of individual settlements and have strong local support. It adds that Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, keeping individual settlements separate and providing opportunities for green infrastructure/green corridors. It acknowledges that continuing pressure for high levels of development mean that maintaining gaps continues to be justified.
- 1.25 The Issues and Options consultation appears to encourage a move from this position by suggesting that development in the Gap could be appropriate through 'careful planning'. This Council strongly opposes this change in approach and considers that the HA2 allocation and additional residential proposals will have a significant and detrimental impact on the current form and function of the Strategic Gap and no amount of 'careful planning' would be able to mitigate these impacts.
- 1.26 It is considered the text of Policy CS22 remains relevant in the specific case of the Newgate Lane area and much of the remainder of the strategic gap. Indeed the current boundary has been supported by a Planning Inspector as recently as May 2015. In his report into the Examination in Public for the Fareham Local Plan Part 2, the Inspector refers to FBC's evidence regarding the review of Strategic Gaps and states,
- 'although the review did not specifically take into account the route of the Stubbington by-pass and the Newgate Lane improvements, there is no reason to conclude that these proposals would justify altering the boundary of the gap in those locations. Having visited the area I agree with the Council that the gap between Fareham and Stubbington is justified in order to retain visual separation and that the proposed road improvements would not justify a revision to the boundary. The Council's approach is sound.'*
- 1.27 The DFLP (2017) also included a policy relating to Strategic Gaps (Policy

SP6) which continues to prevent the coalescence of urban areas and to maintain the separate identity of settlements. It also identified a Strategic Gap between 'Fareham/Bridgemarky and Stubbington/Lee-on-the-Solent'. It stated, 'development proposals will not be permitted where they cause severe adverse harm to the physical and visual separation of settlements'. The justification text acknowledged that, 'retaining the open farmland gap between Fareham and Stubbington is critical in preventing the physical coalescence of these two settlements together with maintaining the sense of separation'. It also clearly stated in Paragraph 4.39 that, 'further to the east, retaining the gap will help maintain the separation of Stubbington and Lee-on-the-Solent from Fareham and Bridgemarky along with maintaining the separate identify of Peel Common.' This Council agrees that this approach should be maintained.

- 1.28 Allocations in the Strategic Gap would also contradict FBC's own evidence which seeks to protect the strategic gap. By way of an example, the Fareham Landscape Assessment (2017) incorporates a review of the Strategic Gap designation including the 'Woodcot area' which includes the land covered by the proposed HA2 Newgate Lane allocation. It concludes, *'This is a cohesive area of undeveloped landscape which performs an important role in respect of the primary purposes of the Strategic Gap i.e. in defining the edges, separate identity and settings of Fareham and Gosport, preventing their coalescence. Even minor encroachment beyond existing settlement boundaries could have an adverse effect on these functions and the overall integrity of the landscape and Strategic Gap. It is recommended that the Gap boundaries remain unchanged.'*
- 1.29 Gosport Borough Council agrees with these findings set out in the Fareham Landscape Assessment and considers that the Woodcot area and other parts of this area should remain an integral part of the Strategic Gap.
- 1.30 Whilst recognising that circumstances have changed in terms of the need to accommodate additional housing numbers it is considered that there is an even stronger imperative to protect these important strips of land between settlements in the form of the Strategic Gap which certainly continue to perform the long-established planning function that both Councils have worked together to protect.
- 1.31 It is also recognised that the local plan process is the appropriate time to review such designations; however it is considered that the proposed change at the HA2 allocation and other potential changes will affect the integrity of the remaining gap by significantly reducing its width. This and other proposed residential allocations by their sheer scale will undoubtedly harm the character of the gap and will diminish the physical and visual separation of the settlements.

Protecting the Strategic Gap to deliver multi-functional benefits for local communities

- 1.32 This Council proposes that we work together with FBC bilaterally and as part of PUSH to find a long-term strategy for the strategic gaps which serve a number of existing functions and could be further diversified. These functions include:

- Strategic transport corridor for critical road infrastructure to, and from the Peninsula including the recent Newgate Lane improvements and proposed Stubbington Bypass.
- The Daedalus employment areas which have been designed to reflect the character of this part of the Gap
- Utilities including the Peel Common Waste Water Treatment Works
- Sustainable power - Solar farms and IFA2
- Recreational land to improve cycle and walking routes to facilitate countryside access between the communities and links with Titchfield and the Meon Valley.
- Land for environmental mitigation
 - Land required for nitrate mitigation
 - Land required to deflect recreational pressure from sensitive coastal habitats and/or create Brent Goose refuges to allow development to take place in more sustainable locations
 - Land required for biodiversity net gain
 - Land required for carbon storage
- Maintaining local food production

1.33 Therefore as part of this Issues and Options consultation this Council would request that FBC considers the option of establishing a multi-functional corridor which includes the various uses set out above. It is considered appropriate that the agreed joint long term strategy would include the whole strategic gap including areas within Gosport Borough to ensure that recreational and environmental benefits are taken together.

1.34 It is noted from the Issues and Options consultation that FBC are asking respondents whether there are any local areas of green space that the Council should protect. This relates to the NPPF's Local Green Space designation which states that this designation should only be used if it is:

- In reasonably close proximity to the community it serves;
- Demonstrably special to the local community and holds a particular significance for example because of its beauty, historic significance, recreational value (including as a playing field) tranquillity or richness in wildlife;
- Local in character and is not an extensive tract of land.

1.35 The NPPF adds that policies for managing development within a Local Green Space should be consistent with those for green belts. It is not clear what is meant by 'extensive' as this is a relative term and when compared to tracts of open countryside, the Strategic Gap is local and not particularly extensive. FBC may wish to explore opportunities to allocate areas of the

Gap as Local Green Space if it considers these meet the relevant criteria.

- 1.36 The Issues and Options consultation also states that it is proposed that the Meon Valley is included as part of the PUSH work to consider the potential for greenbelt land across the local authority area, as it recognises that there could be scope for this area to become part of a South Hampshire greenbelt. As part of any consideration of green belt it would also be necessary to consider the option of the FGLS Strategic Gap as well.
- 1.37 According to the NPPF greenbelts need to serve five purposes:
- To check the unrestricted sprawl of large built-up area
 - To prevent neighbouring towns merging into one another
 - To assist in safeguarding the countryside for encroachment
 - To preserve the setting and special character of historic towns;
 - To assist urban regeneration by encouraging the recycling of derelict land and other urban land.
- 1.38 In this instance a greenbelt in the FGLS Strategic Gap would prevent the Portsmouth-Fareham- Gosport conurbation merging with Lee-on-the Solent and Stubbington. The fifth reason outlined above is particularly applicable for Gosport's issues relating to brownfield sites.
- 1.39 It is important to recognise that there are substantial hurdles in establishing a new greenbelt and the NPPF states that these should only be established in 'exceptional circumstances' and that there are five very difficult criteria to meet. It is mentioned in this context as if the Meon Gap is being considered then it is reasonable that the FGLS Strategic Gap should be included as part of this process.
- 1.40 Overall it is considered that a joint Fareham/Gosport strategy for the Gap with PUSH support would be a significantly positive way forward which would deliver multi-functional benefits for local communities in both Boroughs. This could form part of our bilateral Statement of Common Ground and be included in the respective Local Plans.

Community and open space infrastructure

- 1.41 The Issues and Options consultation does not include detail on the facilities and services supporting potential allocations within each of the broad areas. Therefore it is considered necessary for the Council to maintain its earlier concerns raised as part of the DFLP consultation with regard to educational, community and open space facilities in relation to the HA2 allocation and acknowledge that depending on what is proposed at the next consultation Local Plan there may well be further concerns relating to these matters.
- 1.42 Issues raised previously included:

School provision- there is insufficient detail of how local school places

could be affected by the proposals. It will be necessary to understand the impact of the new housing development on local schools as any development on the HA2 or other unidentified allocations are likely to include a high proportion of households with children.

Community facilities- It will also be important to understand whether any new development at Newgate Lane or other allocations can be sufficiently supported by other community facilities in the area including health facilities (such as GPs) and community hall provision and whether it is necessary to provide new community facilities as part of the development. Consequently without such information such proposals cannot be supported.

Open space- It will be necessary to ensure such provision meets the requirements of any new community without affecting that enjoyed by existing residents.

Conclusion to Fareham, Gosport, Lee-on-the-Solent, Stubbington section of the Issues and Options Consultation

- 1.43 In the light of the above and in answer to the question posed in the Issues and Options consultation it is considered that development in the strategic gap including the HA2 consultation does not represent good growth for the residents and businesses of the Gosport peninsula. The Council does not support future growth in the Strategic Gap and instead considers that it merits continued protection from any future development.
- 2.0 **Housing density at Welborne**
- 2.1 The Issues and Options Report focusses on eight broad areas for the potential for finding land for new houses. In addition to the '*Land between Fareham and Stubbington*', FBC may wish to consider further options at Welborne.
- 2.2 The document itself only includes '*Land around Welborne Garden Village*' and not Welborne itself. This broad area of search is the area of land to the east of the A32 north of Junction 10 and close to Junction 11. The document states that '*with the exception of land close to junction 11 being promoted for commercial use; the Council has not received details of any land being promoted in this area, all of which is in private ownership. Additionally this area is considered to be valued landscape with limited scope to accommodate large-scale development.*' In the light of the above statement there may be difficulties for additional development in this area.
- 2.3 However there may be opportunities to increase the residential quantum at Welborne itself by increasing densities. It is recognised that there may be constraints to reviewing these options at this stage, particularly given that there is a planning application for the site currently under consideration
- 2.4 However even marginal density increases in areas where the current proposed densities are 'up to 30 dwelling per hectare' (dph) and 'up to 35 dph' could yield significant increases in the number of dwellings at this site.

- 2.5 By considering further options for a railway station at this site could also facilitate higher densities of development in proximity to any potential railway station site. Given the restricted supply of land in the South Hampshire sub-region building at exceptionally low densities would represent a missed opportunity as the PUSH authorities plan forward to 2036 and onto 2050.
- 2.6 It is clear from the NPPF that planning policies and decisions should support development that makes efficient use of land. It states that where there is an existing or anticipated shortage of land for meeting identified housing needs it is especially important that planning policies and decisions avoid homes being built at low densities and ensure the developments make optimal use of the potential for each site.
- 2.7 Such increases in densities would make public transport and other facilities more viable and would also reduce the need to develop in the FGLS Strategic Gap.

3.0 Other locations

- 3.1 FBC should also consider increasing densities in sustainable locations within Fareham Borough including within, and adjacent to centres, and in close proximity to railway stations. This would also ease pressure on the Strategic Gap.

END

GOSPORT
Borough Council

localplanconsultation@fareham.gov.uk

Dear Richard

Fareham Borough Local Plan 2036: Supplement

Thank you for consulting Gosport Borough Council (GBC) on the Supplement document for the Fareham Borough Local Plan 2036. I can advise that the document was considered at the Council's Regulatory Board of 26th February 2020.

A summary of our representations, based on the Board's resolution, is set out below with more detailed comments attached (Appendix 1). These additional comments also form part of the Council's representations.

- That this Council's previous comments to the Draft Fareham Local Plan 2036 (DFLP 2017) and the subsequent Issues and Options document are fully considered with these latest representations.
- That this Council objects to the overall Development Strategy including the plan that identifies the South Newgate Lane allocation and the Strategic Growth Area as it does not represent 'good growth'.
- That this Council objects to the proposed policy on the Five Year Housing Supply as it presumes in favour of development outside of the settlement boundaries prior to other types of land within urban area boundaries and within more sustainable locations.
- That this Council maintains its strong objection in full to the proposed residential allocation at Newgate Lane (referred to in the previous Draft Fareham Local Plan (DFLP) (2017) as HA2) for the reasons set out below:
 - The proposal would physically and visually diminish the long-established Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington;

- The proposal will negate the benefits provided by the recent improvements to Newgate Lane with a negative impact on traffic flow and increased congestion to the detriment of Gosport Borough and Stubbington residents and the local economy including accessibility to the Solent Enterprise Zone at Daedalus;
 - The proposal will significantly harm the amenities of local Gosport residents by the introduction of new access points to existing residential areas, which due to the scale of the proposal would lead to a significant increase of traffic on residential roads;
 - The proposal, as previously described in the DFLP is very car dependent with no provision for public transport. This would exacerbate the number of trips using Newgate Lane;
 - There is insufficient information on supporting infrastructure required including education, medical and community facilities.
- That this Council objects that the HA2 allocation was not subject to a second consultation as part of this Supplement given the problems that arose with the initial consultation in 2017 on the Draft Fareham Local Plan relating to the access arrangements to the site, particularly in relation to Tukes Avenue.
 - That this Council strongly objects to the designation of Strategic Growth Areas (SGAs) including the South of Fareham SGA within the current Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington for the following reasons:
 - The promotion of SGAs at this stage prejudices work being undertaken by local planning authorities at a multilateral level to ascertain the most appropriate sustainable broad locations for development over the period to 2036 and beyond to 2050, known as Strategic Development Opportunity Areas.
 - The South of Fareham SGA does not represent 'good growth' for the residents of Gosport, Lee-on-the-Solent, Stubbington, Hillhead and south Fareham and therefore is not considered to be sustainable development.
 - It is imperative to safeguard effective strategic transport routes through the Strategic Gap to improve accessibility to, and from, the Gosport Peninsula to support the local economy. Further housing allocations will individually and cumulatively exacerbate accessibility constraints for reasons detailed in Appendix 1.
 - Further housing allocations will lead to the extensive erosion of the Strategic Gap, the protection of which is a long established planning principle in the South Hampshire area, as identified by the Partnership for South Hampshire's Spatial Position Statement that aims to prevent coalescence of settlements, maintain a sense of place and settlement identity, and provide a countryside setting for the sub region and local communities.
 - That this Council expresses its concerns that Fareham Borough Council may not be fulfilling its duty to cooperate because it is not considering the outcome of the joint Partnership for South Hampshire work on Strategic Development Opportunity Areas as part of the sub-regional Statement of Common Ground

which will assess the most appropriate locations for development in the sub region.

- That Fareham Borough Council are urged to reconsider the proposals for HA2 and the SGA which are contrary to the objectives of the climate change and air quality policies.

In the light of the above comments it will be important to maintain our ongoing dialogue as part of our bilateral Statement of Common Ground work as well as our continued involvement as part of the multilateral PUSH initiatives. In the meantime if you require any clarification on these matters please do not hesitate to contact me.

Yours sincerely

Debbie Gore
**Head of Planning and Regeneration
and Assistant to the Chief Executive**

Appendix 1: Gosport Borough Council's detailed representations to the Fareham Local Plan: Supplement (February 2020)

The detailed comments, summarised in the attached letter, are set out below and form part of Gosport Borough Council's representation to the Fareham Local Plan 2036.

1 Development Strategy

- 1.1 Whilst the principles of good growth are supported it is considered that the proposed development strategy does not represent 'good growth' for the residents of Gosport Borough nor those of Fareham Borough particularly those in Stubbington and Hillhead and those living in Fareham itself, including those within or in close proximity to the Air Quality Management Areas.
- 1.2 The proposed HA2 allocation and the Strategic Growth Area, with limited transport choice, will exacerbate existing traffic congestion issues associated with the Gosport Peninsula and increase air pollution to the detriment of local residents. It will hamper economic opportunities and investment potential within Gosport Borough.
- 1.3 The plan fails to consider cross-boundary issues and should recognise the importance of the long-established Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington.
- 1.4 The Development Strategy does not acknowledge the issues relating to the transport issues on the Gosport Peninsula. The existing boundaries of the Strategic Gap should be retained in order to maintain an effective transport corridor through the gap. Additional development immediately adjacent and accessing the route will negate all the benefits of the recently improved and commenced road infrastructure. This investment has been implemented to address existing deficiencies not facilitate new development. These issues are expanded further in the following sections.

2 Housing

Unmet need

- 2.1 It is acknowledged that the Fareham Local Plan:*Supplement* recognises that it may likely have to address the unmet need from neighbouring authorities and consequently the overall housing figure will have to be confirmed.
- 2.2 It is considered that the issue of unmet need is a very important matter to address on a sub-regional basis as a number of local authorities, including Gosport Borough, have a dense urban character and collectively have a significant housing requirement when using the Government's standardised

methodology. It is important to recognise that in order to create sustainable communities across South Hampshire it is necessary to ensure that: there is sufficient land for employment to create local jobs and reduce out-commuting and congestion; there are genuine, affordable and convenient public transport choices; and there is sufficient quality open spaces to meet environmental, recreational and health needs. Consequently the Council supports the joint working initiative of the PfSH Statement of Common Ground and the evidence which will lead to a shared spatial strategy. This will identify the most appropriate locations within the sub-region for new growth to 2036 and ideally towards 2050 to ensure comprehensive long-term good planning for the sub region. As part of the evidence several broad areas across South Hampshire will be independently assessed regarding their suitability for large scale development considering environmental and infrastructure factors. These will be known as Strategic Development Opportunity Areas (SDOAs).

- 2.3 The Fareham Local Plan identifies two Strategic Growth Areas (SGAs) which could potentially meet sub-regional unmet need. These are: an Area north of Downend near Wallington; and the area South of Fareham. This Council objects to the SGAs particularly the South Fareham SGA on the basis that the sub regional work has yet to be completed on potential SDOAs. Further details are set out later within these representation.

Five year housing supply policy

- 2.4 The FLP:*Supplement* includes a five year housing land supply policy which states that where it can be demonstrated that the Council does not have a five year supply of land for housing against the requirements set out in the Local Plan, additional housing sites outside the urban area boundary may be permitted where they meet certain criteria including:
- The proposal is relative in scale to the demonstrated five year housing land supply shortfall;
 - It is sustainably located adjacent to, and well related to, the existing urban area boundaries and can be well integrated with the neighbouring settlement;
 - The proposal is sensitively designed to reflect the landscape character and setting of the settlement and to minimise any adverse impact on the countryside and, if relevant the Strategic Gaps.
- 2.5 The Council objects to this policy as it implies that if Fareham's five year housing supply is not met the first area of search is outside of the urban area boundary. Instead the policy should refer to sites within urban areas, brownfield land, underutilised employment sites, sites close to train stations, under-utilised town centre sites such as car parks and shopping precincts, consideration of using Council land assets and other public sector land, intensification of existing neighbourhoods, as well as opportunities to increase densities on existing allocations such as Welborne. These types of sites should be clearly identified as being preferential before greenfield land outside the urban area, particularly within the Strategic Gap, are considered.

2.6 The Council also objects to the criterion relating to strategic gaps which is also covered in more detail later in this representation.

3 Housing Allocations and maintaining an objection to the HA2 allocation

Newgate Lane South residential allocation (HA2)

3.1 The *Supplement* states it is not re-consulting on the proposed allocation in the DFLP (2017) which included the Newgate Lane South allocation known as HA2. However as this site remains identified as an allocation and there has been no additional evidence to address any of the Council's substantial concerns it is proposed that the Council reiterates the comments made previously on this matter.

3.2 The proposed allocation is located on the western boundary of the Borough, with Tukes Avenue and other residential roads (Heron Way, Pettycot Crescent) to the east; and the new route of Newgate Lane to the west. The HMS Collingwood playing fields are situated to the north and the Brookers Field recreation ground to the south. The key concerns are reiterated in Annex A and form part of this Council's representations to this latest document.

3.3 The Council would also like to make additional comments on this allocation. It is noted that the latest SHELAA provides the housing and employment land availability position within Fareham Borough as at 1st December 2019 and forms an integral part of the evidence base that underpins the Fareham Local Plan 2036.

3.4 The HA2 allocation is identified as three component parts in the document. With regard to the southern site it clearly recognises that the introduction of junctions along Newgate Lane South Relief Road would interfere with the free-flow of traffic which the Relief Road now provides. It adds that, '*as this and all other access would interfere with traffic flows, it is considered development of the site would be unsatisfactory. It would be feasible to develop the western part of the site from the existing Newgate Lane and incorporate measures to improve/relieve Woodcote Lane.*'

3.5 Similarly with regard to the middle site the potential for access to Newgate Lane South through the construction of a roundabout is considered unsatisfactory and a revised option would need to be explored and that the identification of a suitable highway access is pending.

3.6 With regard to the northern site it states that suitable highway access has been identified onto Tukes Avenue. This Council would like to understand where this access is located as this has not been identified in the FLP: *Supplement*. It is important to note that an erratum was issued to the DFLP (2017) which withdrew the original proposed access onto Tukes Avenue as local homeowners had not been informed or had given their permission for an access.

3.7 It is recognised that the SHELAA is an evidence study not a policy document however it is necessary to understand whether FBC are

proposing to amend the HA2 policy. There are no proposed changes identified in the FLP: *Supplement* and the policy included in the DFLP 2017 referred to access off Newgate Lane whereas the evidence in the SHELAA identifies significant problems with access off Newgate Lane. This Council and HCC objected to the proposed allocation being accessed off Newgate Lane due to the detrimental impact that 475 dwellings directly onto the recent road improvements would have on north-south movements on the strategic transport corridor.

3.8 The Council maintains an objection on highway and accessibility grounds due to the impact that 475 dwellings would have on the residential roads of Bridgemarky. No evidence is provided on the scale of this impact nor are there any details provided on the potential access routes.

3.9 In the light of this the Council maintains its objection to the HA2 allocation due to these accessibility issues (together with the other reasons set out in Annex A) and would also question whether the development is actually deliverable.

4 Strategic Growth Areas

4.1 The Development Strategy recognises that FBC has an obligation to work with neighbouring authorities in order to identify and address unmet need within the region. PfSH are working on a Statement of Common Ground to identify Strategic Development Opportunity Areas (SDOAs) that could be selected to meet the unmet needs in the sub-region. This work will continue through 2020 with a final presentation to PfSH Joint Committee in early 2021. FBC states that it will be an active partner in these discussions and that the Publication (Reg. 19) version will need to address unmet need.

4.2 The Council strongly objects to the Strategic Growth Area based on two principles which are set out fully in the rest of this section:

- 1) They pre-judge the work currently being undertaken by PfSH regarding the most appropriate Strategic Development Opportunity Areas and that this work should be concluded before any SGAs are identified.
- 2) That the South of Fareham SGA fails to acknowledge the previous concerns made by Gosport Borough Council regarding: the issues concerning HA2; the need to preserve a transport corridor to, and from, the Peninsula; and the need to maintain a strategic gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington and that any significant development would affect the long established integrity and function of the Strategic Gap.

1) PfSH work

4.3 The PfSH work on SDOAs is in the process of being procured in which an independent consultant will consider the appropriateness of a number of sites to deliver housing need in South Hampshire to 2036 and beyond. This includes a number of broad areas across South Hampshire as well as the potential to intensify development on currently identified major

development areas.

- 4.4 It is considered necessary for the findings of this work to be concluded and an approach agreed by PfSH Joint Committee before these Strategic Growth Areas are identified. The identification of SGAs could prejudice this work and fails to recognise this Council's significant concerns regarding the South Fareham SGA. Alternative sites may be more suitable and if the SGAs are already identified in an emerging Fareham Local Plan there may be reluctance to bring these sites forward in other parts of the sub region.
- 4.5 For example there may be opportunities to increase the residential quantum at Welborne itself by increasing densities. Even marginal density increases in areas where the current proposed densities are 'up to 30 dwelling per hectare' (dph) and 'up to 35 dph' could yield significant increases in the number of dwellings at this site.
- 4.6 By considering further options for a railway halt at Welborne would also facilitate higher densities. Given the restricted supply of land in the South Hampshire sub-region building at exceptionally low densities would represent a missed opportunity as the PfSH authorities plan forward to 2036 and onto 2050. Such increases in densities would make public transport and other facilities more viable and would also reduce the need to develop in the Fareham, Gosport, Lee-on-the-Solent, and Stubbington (FGLS) Strategic Gap.
- 4.7 It is clear from the NPPF that planning policies and decisions should support development that makes efficient use of land. It states that where there is an existing or anticipated shortage of land for meeting identified housing needs it is especially important that planning policies and decisions avoid homes being built at low densities and ensure the developments make optimal use of the potential for each site.

2) Specific issues regarding the South Fareham SGA

- 4.8 It is clear that the Fareham SGA policy will affect the function and integrity of the Strategic Gap which has previously been agreed by both Councils and undermines the sub regional objectives of maintaining a Strategic Gap. Such development will have a detrimental impact on existing residents in Gosport, Lee-on-the-Solent, Stubbington, Hillhead and southern Fareham.
- 4.9 There is currently no detailed evidence available regarding the scale of development proposed and consequently the likely impacts on traffic generation, infrastructure and the environment. Whilst it is recognised that this is difficult at this stage as the overall quantum is not yet known it would be useful to have an understanding of whether various environmental and infrastructure constraints have been considered.
- 4.10 Some of the Council's key concerns relating to the Strategic Growth Area relate to the principles of developing in the FGLS Strategic Gap and are detailed further below:
- Transport and Accessibility

- Air quality
- The principle of maintaining a Strategic Gap to prevent coalescence and protect the identity of settlements.
- Protecting the Strategic Gap to deliver multi-functional benefits for local communities

- 4.11 **Transport and accessibility:** One of the Council's primary concerns is the impact of potential new development, including any additional allocations in the SGA and the proposed HA2 allocation, will have on the effectiveness of the strategic transport corridor through the existing Strategic Gap. It is considered that any allocations which have access directly onto the recently improved Newgate Lane and the proposed Stubbington Bypass will negate the benefits these proposals will deliver to improve accessibility to, and from, the Peninsula.
- 4.12 These improvements are aimed at addressing existing acute transport infrastructure deficiencies, not to enable development on greenfield sites directly adjacent to the routes. Instead this improved infrastructure can bring regeneration benefits to difficult brownfield sites in Gosport and make them more attractive to investors. The NPPF is very clear that policies should promote the development of under-utilised land and buildings especially if this would help to meet identified needs for housing where land supply is constrained.
- 4.13 The issue of maintaining an effective transport corridor is imperative for Gosport's future prosperity. The Stubbington Bypass route is the only opportunity to improve vehicular access to the Borough. If the benefits of the Stubbington Bypass are negated by significant development being built with access directly onto the Bypass, this last opportunity would be lost and there would be a real sense that Gosport has been 'blocked in'.
- 4.14 This would perhaps be less significant if Gosport had its own railway station and had a reasonable job density rate with limited out-commuting. However this is certainly not the case.
- 4.15 Gosport has the lowest job density in the South East of England and one of the lowest in England at only 0.5 jobs per resident person of working age. Such a low job density has significant implications for the Borough including the considerable scale of daily out-commuting which puts tremendous pressure on the existing road system resulting in acute traffic congestion and high levels of air pollution as evidenced in the Air Quality Management Areas identified within Fareham Borough at the north end of the Peninsula. This congestion results in the road network reaching full capacity and an extended peak time spreading on key routes. This actual congestion as well as the wider perception of congestion that exists can act as a disincentive for business and employment investment. Gosport has limited transport options with no fixed rail link and hence the effectiveness of the small number of road routes from Gosport is even more important.
- 4.16 **Specific accessibility issues relating to the SGA and Newgate Lane East** It is likely that a significant proportion of traffic from any development in the SGA will require access along Newgate Lane towards Fareham Town

Centre. It is important to recognise that Newgate Lane East and other associated improvements were designed to achieve the following:

- improving access to the Peninsula including the Solent Enterprise Zone at Daedalus;
- increasing capacity and easing existing congestion on the route;
- creating fewer interruptions to traffic flow caused by turning traffic, or on-road cyclists;
- improving the alignment for safety reasons.

4.17 These objectives would be undermined by potential development within a SGA. It was not intended that the strategic highways improvements would facilitate new housing development. Gosport Borough Council is very concerned that development within the SGA, together with HA2, will have a detrimental impact on the existing significant congestion problems on the Gosport Peninsula and detract from recent and proposed improvements that aim to improve traffic flow to, and from, the Peninsula. This is critical for the future economic prosperity of the Borough including achieving the full potential of the Enterprise Zone.

4.18 The earlier DFLP was accompanied by an Interim Transport Assessment for the DFLP allocations (Oct 2017) which recognises that the current Volume over Capacity (v/c) exceed 100% in the PM peak on Newgate Lane and is approaching available practical capacity in the AM peak resulting in significant congestion. Consequently, it is already recognised that traffic exceeds the available capacity on this strategic route. Table 2 summarises information from this document which highlights that this situation is predicted to worsen over the period to 2036 and consequently the report recognises that Newgate Lane will experience ‘*more noticeable increases in traffic flow.*’

Table 2: Road capacity on Newgate Lane

	Volume over Capacity (v/c) on Newgate Lane		
	2015	2036 Baseline: Existing adopted local plan commitments (S Hants) with planned transport improvements*1	2036 Baseline plus DFLP allocations*2
AM	83%	98%	100%
PM	102%	106%	107%

*1 including Stubbington Bypass and Newgate Lane improvements

*2 this does not include any potential growth in Gosport Borough arising from the Gosport Borough Local Plan Review

4.19 With any further allocations within this area this situation would be exacerbated still further plus it will be necessary to take into account the additional allocations being put forward as part of the emerging work for the Gosport Borough Local Plan 2036.

4.20 The latest transport modelling work suggests numerous junctions in the area will suffer from severe or significant impacts over the period to 2036 when just taking into account existing permissions and adopted Local Plan

allocations. This work incorporates committed transport schemes (such as the Stubbington Bypass). This situation is further exacerbated by the proposed Fareham Local Plan allocations and does not appear to have included any proposed development in the SGA, as the potential quantum of development is not yet known. It is clear however that any development in the SGA would have a detrimental impact on an already severely congested network on the Peninsula. Further work is to be undertaken as part of a Transport Assessment which will consider if there are any appropriate mitigation measures. This strengthens the case that such a designation should await the outcome of the aforementioned PfSH work as there are likely to be more appropriate locations for major development which have genuine transport choices in less congested parts of the sub-region or beyond. The PfSH work will include transport modelling work.

- 4.21 **Potential impact on the effectiveness of the Stubbington Bypass:** It is important to note that the DFLP (2017) stated in paragraph 11.46 that the Stubbington Bypass is not being provided with an intention of serving or facilitating additional new homes.
- 4.22 The DFLP recognised that this route forms part of Hampshire County Council's plan for improving access to Fareham and Gosport and seeks to ease congestion, improve safety and the area's economic prosperity by encouraging investment and regeneration, including at the Solent Enterprise Zone at Daedalus. The accompanying text in the DFLP acknowledged this will create a reliable route for traffic wishing to travel from the Gosport Peninsula westwards towards the M27 at Junction 9, in conjunction with recently completed works at St Margaret's Roundabout on the A27, and works underway to upgrade the A27 between the Titchfield Gyratory and Segensworth to two lanes in both directions. It stated that the bypass is not being provided with an intention of serving or facilitating additional new homes. GBC consider that FBC's position in the DFLP is still valid and should be maintained. There is currently no information available regarding the impact that the SGA will have on the effectiveness of the Stubbington Bypass and how development will be accessed.
- 4.23 **Air quality:** Any additional traffic on Newgate Lane is likely to have an impact on the Air Quality Management Area (AQMA) at the north end of Newgate Lane and Gosport Road and therefore it would be necessary to include measures mentioned in Policy INF2 of the DFLP which promotes sustainable transport to mitigate this impact. This is likely to be difficult for allocations in the Strategic Gap of this scale with limited public transport choice.
- 4.24 **The principle of maintaining a Strategic Gap to prevent coalescence and protect the identity of settlements:** The Strategic Gap is identified in the GBLP (Policy LP3) and FBC's current Local Plan (Policy CS22 of the Core Strategy). GBC and FBC have worked collaboratively in the past to define the boundaries of the Strategic Gap and have been successful in maintaining a functional gap and visual separation between the settlements.
- 4.25 The *Supplement* consultation is a significant change in the long-established position as it appears to accept large-scale development in the Strategic

Gap. This Council strongly opposes this change in approach and considers that the additional residential proposals will have a significant and detrimental impact on the current form and function of the Strategic Gap and no amount of 'careful planning' would be able to mitigate these impacts.

4.26 The sub-regional PUSH Spatial Position Statement states that Councils should identify in their Local Plans strategic countryside gaps of sub-regional importance and that these gaps are important in maintaining the sense of place, settlement identity and countryside setting for the sub region and local communities. It recognises that gaps can provide the space for necessary uses such as recreation areas, transport corridors and environmental mitigation.

4.27 FBC's current Policy CS22 states that '*development proposals will not be permitted either individually or cumulatively where it significantly affects the integrity of the gap and the physical and visual separation of the settlements*'. The Policy recognises that maintaining separation will prevent coalescence of the settlements in this densely settled part of South Hampshire.

4.28 The justification text states that gaps between settlements help define and maintain the separate identity of individual settlements and have strong local support. It adds that Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, keeping individual settlements separate and providing opportunities for green infrastructure/green corridors. It acknowledges that continuing pressure for high levels of development mean that maintaining gaps continues to be justified.

4.29 It is considered the text of Policy CS22 remains relevant in relation to the strategic gap. Indeed the current boundary has been supported by a Planning Inspector as recently as May 2015. In his report into the Examination in Public for the Fareham Local Plan Part 2, the Inspector refers to FBC's evidence regarding the review of Strategic Gaps and states,

'although the review did not specifically take into account the route of the Stubbington by-pass and the Newgate Lane improvements, there is no reason to conclude that these proposals would justify altering the boundary of the gap in those locations. Having visited the area I agree with the Council that the gap between Fareham and Stubbington is justified in order to retain visual separation and that the proposed road improvements would not justify a revision to the boundary. The Council's approach is sound.'

4.30 The DFLP (2017) also included a policy relating to Strategic Gaps (Policy SP6) which continues to prevent the coalescence of urban areas and to maintain the separate identity of settlements. It also identified a Strategic Gap between '*Fareham/Bridgemarky and Stubbington/Lee-on-the-Solent*'. It stated, '*development proposals will not be permitted where they cause severe adverse harm to the physical and visual separation of settlements.*' The justification text acknowledged that, '*retaining the open farmland gap*

between Fareham and Stubbington is critical in preventing the physical coalescence of these two settlements together with maintaining the sense of separation'. It also clearly stated in Paragraph 4.39 that, 'further to the east, retaining the gap will help maintain the separation of Stubbington and Lee-on-the-Solent from Fareham and Bridgemary along with maintaining the separate identify of Peel Common.' This Council agrees that this gap should be maintained.

4.31 Allocations in the Strategic Gap would also contradict FBC's own evidence which seeks to protect the strategic gap as set out in the Fareham Landscape Assessment (2017) which incorporates a review of the Strategic Gap.

4.32 The Council's previously mentioned comments relating to the Woodcot area which includes the land covered by the proposed HA2 Newgate Lane allocation are re-iterated in Annex A of this representation. The study also includes a character area which relates to the gap between Fareham and Stubbington covered by the SGA. There is a specific section on the Review of the Strategic Gap Designation. It concludes,

'This area is a cohesive agricultural landscape which performs multiple roles in respect of the primary and secondary purposes and functions of the Strategic Gap. Even minor encroachment beyond the existing, strong settlement boundary along the southern edge of Fareham could potentially disrupt local settlement pattern and character and have an adverse effect on the Gap functions and the overall integrity of the agricultural landscape. There may be some scope for very modest 'rounding off' of Stubbington on its northern edges, within existing parcels of land where development could be integrated without unacceptable impacts. Overall, however, it is recommended that the Gap boundaries remain tightly drawn around the existing settlement edges, with allowance for development only in exceptional circumstances where the purposes and integrity of the Gap can be maintained and significant GI and other benefits would result.'

4.33 The Council agrees with the findings of the Study regarding the importance of the Fareham/Stubbington Gap area to be maintained. These findings also raise the question whether there may be preferable locations for very limited allocations here before the HA2 allocation is considered as the evidence on the Woodcot area concludes,

'Even minor encroachment beyond existing settlement boundaries could have an adverse effect on these functions and the overall integrity of the landscape and Strategic Gap. It is recommended that the Gap boundaries remain unchanged.'

4.34 Gosport Borough Council agrees with these findings set out in the Fareham Landscape Assessment and considers that these areas should remain an integral part of the Strategic Gap fulfilling their current function.

4.35 Whilst recognising that circumstances have changed in terms of the need to accommodate additional housing numbers it is considered that there is an even stronger imperative to protect these important strips of land

between settlements in the form of the Strategic Gap which certainly continue to perform the long-established planning function that both Councils have worked together to protect.

4.36 It is also recognised that the local plan process is the appropriate time to review such designations, however it is considered that the proposed changes will affect the integrity of the remaining gap by significantly reducing its width. This and other proposed residential allocations by their sheer scale will undoubtedly harm the character of the gap and will diminish the physical and visual separation of the settlements.

4.37 **Protecting the Strategic Gap to deliver multi-functional benefits for local communities:** This Council proposes that we work together with FBC bilaterally and as part of PfSH to find a long-term strategy for the strategic gaps which serve a number of existing functions that could be further diversified. These functions include:

- Strategic transport corridor for critical road infrastructure to, and from the Peninsula including the recent Newgate Lane improvements and the Stubbington Bypass.
- The Daedalus employment areas which have been designed to reflect the character of this part of the Gap
- Utilities including the Peel Common Waste Water Treatment Works
- Sustainable power - Solar farms and IFA2
- Recreational land to improve cycle and walking routes to facilitate countryside access between the communities and links with Titchfield and the Meon Valley.
- Land for environmental mitigation
 - Land required for nitrate mitigation
 - Land required to deflect recreational pressure from sensitive coastal habitats and/or create Brent Goose refuges to allow development to take place in more sustainable locations
 - Land required for biodiversity net gain
 - Land required for carbon storage
- Maintaining local food production

4.38 Therefore as part of resolving the outstanding issues, to be set out in the Statement of Common Ground, that FBC considers the option of establishing a multi-functional corridor which includes the various uses set out above. It is considered appropriate that the agreed joint long term strategy would include the whole strategic gap including areas within Gosport Borough to ensure that recreational and environmental benefits are taken together.

5 **The Natural Environment**

Climate Change Policy

- 5.1 The climate change policy promotes a mitigation and adaptation to climate change through amongst other things, a development strategy that minimises the need to travel by allocating sites and generally directing development to locations with better services and facilities, or where they are capable of being improved. This Council disputes that the overly flexible approach being promoted by the five year housing land policy, which presumes in favour of out of settlement sites when there is no five year housing supply, is consistent with this Policy. Similarly the proposed SGA policy will exacerbate travel by private car. It is considered that the PfSH work on SDOAs across South Hampshire needs to consider the most sustainable locations for development first.

Air quality policy

- 5.2 Similarly it is difficult at this stage to envisage how the proposals in the existing Strategic Gap including the HA2 allocation and the potential in Strategic Growth Area can meet the requirements of the proposed air quality policy. This states that development will be permitted if it positively contributes towards the delivery of the Council's Air Quality Action Plan by mitigating the effects of development on air quality within the Air Quality Management Areas and/or any Clean Air Zones. Given that the HA2 and any SGA sites will be largely car borne with a significant proportion of traffic using Newgate Lane it is difficult to understand how these will positively contribute to the air quality with in the AQMA at Quay Street.

Annex A: Re-iteration of comments made to the Draft Fareham Local Plan (2017) relating to the Newgate Lane South allocation

- That this Council maintains its objection in full to the proposed residential allocation at Newgate Lane (referred to in the previous Draft Fareham Local Plan (DFLP) (2017) as HA2) for the reasons set out below:
 - The proposal would physically and visually diminish the long-established Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington;
 - The proposal will negate the benefits provided by the recent improvements to Newgate Lane with a negative impact on traffic flow and increased congestion to the detriment of Gosport residents and the local economy including accessibility to the Solent Enterprise Zone at Daedalus;
 - The proposal will significantly harm the amenities of local Gosport residents with the introduction of new access points to existing residential areas, which due to the scale of the proposal would lead to a significant increase of traffic on residential roads;
 - The proposal, as previously described in the DFLP is very car dependent with no provision for public transport. This would exacerbate the number of trips using Newgate Lane;
 - There is insufficient information on supporting infrastructure required including education, medical and community facilities.

Further details are set out below:

- Strategic Gap*
- A1 In order to accommodate the Newgate Lane residential allocation the DFLP proposes to amend the Strategic Gap between '*Fareham/Bridgemarky and Stubbington/Lee-on-the-Solent*', which is identified in the GBLP (Policy LP3) and FBC's current Local Plan (Policy CS22 of the Core Strategy). GBC and FBC have worked collaboratively in the past to define the boundaries of the Strategic Gap and have been successful in maintaining a functional gap and visual separation between the settlements.
- A2 The sub-regional PUSH Spatial Position Statement states that Councils should identify in their Local Plans strategic countryside gaps of sub-regional importance and that these gaps are important in maintaining the sense of place, settlement identity and countryside setting for the sub region and local communities. It recognises that gaps can provide the space for necessary uses such as recreation areas, transport corridors and environmental mitigation.
- A3 FBC's current Policy CS22 states that '*development proposals will not be permitted either individually or cumulatively where it significantly affects the integrity of the gap and the physical and visual separation of the settlements*'. The Policy recognises that maintaining separation will prevent coalescence of the settlements in this densely settled part of South Hampshire.

A4 The justification text states that gaps between settlements help define and maintain the separate identity of individual settlements and have strong local support. It adds that Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, keeping individual settlements separate and providing opportunities for green infrastructure/green corridors. It acknowledges that continuing pressure for high levels of development mean that maintaining gaps continues to be justified.

A5 It is considered that this remains relevant in the case of the Newgate Lane area. Indeed the current boundary has been supported by a Planning Inspector as recently as May 2015. In his report into the Examination in Public for the Fareham Local Plan Part 2, the Inspector refers to FBC's evidence regarding the review of Strategic Gaps and states,

'although the review did not specifically take into account the route of the Stubbington by-pass and the Newgate Lane improvements, there is no reason to conclude that these proposals would justify altering the boundary of the gap in those locations. Having visited the area I agree with the Council that the gap between Fareham and Stubbington is justified in order to retain visual separation and that the proposed road improvements would not justify a revision to the boundary. The Council's approach is sound.'

A6 The latest DFLP also includes a policy relating to Strategic Gaps (Policy SP6) which continues to prevent the coalescence of urban areas and to maintain the separate identity of settlements. It also identifies a Strategic Gap between 'Fareham/Bridgemyr and Stubbington/Lee-on-the-Solent'. It states, 'development proposals will not be permitted where they cause severe adverse harm to the physical and visual separation of settlements'. The justification text acknowledges that, 'retaining the open farmland gap between Fareham and Stubbington is critical in preventing the physical coalescence of these two settlements together with maintaining the sense of separation'. It also clearly states in Paragraph 4.39 that, 'further to the east, retaining the gap will help maintain the separation of Stubbington and Lee-on-the-Solent from Fareham and Bridgemyr along with maintaining the separate identity of Peel Common.' This therefore appears to contradict the removal of the Newgate Lane area from the Strategic Gap.

A7 The proposed removal of this land from the Strategic Gap also appears to be at odds with FBC's own supporting evidence. The Fareham Landscape Assessment (2017) incorporates a review of the Strategic Gap designation including the 'Woodcot area' which includes the land covered by the proposed Newgate Lane allocation. It concludes,

'This is a cohesive area of undeveloped landscape which performs an important role in respect of the primary purposes of the Strategic Gap i.e. in defining the edges, separate identity and settings of Fareham and Gosport, preventing their coalescence. Even minor encroachment beyond existing settlement boundaries could have an adverse effect on these functions and the overall integrity of the landscape and Strategic Gap. It is recommended that the Gap boundaries remain unchanged.'

A8 Gosport Borough Council agrees with these findings set out in the Fareham Landscape Assessment and considers that the Woodcot area should remain an integral part of the Strategic Gap.

A9 Whilst it is recognised that the local plan process is the appropriate time to review such designations it is considered that the proposed change at Newgate Lane will affect the integrity of the remaining gap by significantly reducing its width. The residential proposal by its sheer scale will undoubtedly harm the integrity of the gap and will diminish the physical and visual separation of the settlements.

Transport and accessibility

A10 The Council also objects to the proposed allocation due to the potential negative impacts on the new Newgate Lane route. The new route was designed to achieve the following:

- improving access to the Peninsula including the Solent Enterprise Zone at Daedalus;
- increasing capacity and easing existing congestion on the route;
- creating fewer interruptions to traffic flow caused by turning traffic, or on-road cyclists;
- improving the alignment for safety reasons.

A11 These objectives would be undermined by the proposed development. It was not intended that the improvements would facilitate new housing development.

A12 The DFLP is accompanied by an Interim Transport Assessment for the DFLP allocations (Oct 2017) which recognises that the current Volume over Capacity (v/c) exceed 100% in the PM peak on Newgate Lane and is approaching available practical capacity in the AM peak resulting in significant congestion. Consequently it is already recognised that traffic exceeds the available capacity on this strategic route. Table 3 summarises information from this document which highlights that this situation is predicted to worsen over the period to 2036 and consequently the report recognises that Newgate Lane will experience ‘*more noticeable increases in traffic flow.*’

Table 3: Road capacity on Newgate Lane

	Volume over Capacity (v/c) on Newgate Lane		
	2015	2036 Baseline: Existing adopted local plan commitments (S Hants) with planned transport improvements*1	2036 Baseline plus DFLP allocations*2
AM	83%	98%	100%
PM	102%	106%	107%

*1 including Stubbington Bypass and Newgate Lane improvements
 *2 this does not include any potential growth in Gosport Borough arising from the Gosport Borough Local Plan Review

A13 At the present time this allocation has not been assessed by the Local

Highway Authority to determine the implications on the highway capacity of Newgate Lane and no modelling work has been assessed to consider the trip generation from this level of development, either in terms of numbers of additional vehicles or their likely distribution on the highway network or highway safety. Therefore the Council has no option but to object to the proposed allocation in the DFLP on this issue at this stage. Gosport Borough Council is very concerned that the proposed allocation will have a detrimental impact on the existing significant congestion problems on the Gosport Peninsula and detract from recent and proposed improvements that aim to improve traffic flow to, and from, the Peninsula. This is critical for the future economic prosperity of the Borough including achieving the full potential of the Enterprise Zone.

- A14 The north-south movements along Newgate Lane should not be hindered by any proposed new access arrangements for the proposed allocation and the Council objects to any proposals which will significantly hinder this flow. A new access off the proposed roundabout will introduce an interruption to traffic flow, particularly as it is envisaged to serve the whole development and that by its location and limited transport choice the proposed allocation would be very car-dependent. Indeed the supporting FBC Sustainability Appraisal concedes that the *'majority of sites [in the DFLP] are sustainably located which will improve accessibility and encourage travel by sustainable modes, although the urban fringe sites at Funtley Road and Newgate Lane South are less sustainably located.'*
- A15 Due to the lack of detailed available information it is not known what the likely impacts will be on the links and junctions further north e.g. the northern section of Newgate Lane, the Longfield Avenue roundabout, the northern section of the A32 and the Quay Street roundabouts and beyond to the M27 Junction 11. Additionally, vehicles travelling south from the site will also reduce the capacity of the recently improved Peel Common Roundabout, which may also have significant implications for traffic queuing on Rowner Road.
- A16 Given that the proposed allocation may well negate the benefits gained by the Newgate Lane road improvements it will also be necessary to consider whether this site together with other potential residential developments on the south side of Fareham could cumulatively have a detrimental impact on the function and objectives of the Stubbington Bypass. It is important to note that the DFLP states in paragraph 11.46 that the Stubbington Bypass is not being provided with an intention of serving or facilitating additional new homes. FBC is therefore not being consistent in its policy approach between the Stubbington Bypass and the Newgate Lane improvements.
- A17 The Newgate Lane allocation policy (HA2) includes a criterion that makes provision for off-site highway improvements and mitigation works, however, this Council requires further details of such measures, and questions whether the principle of any proposal at this site would be able to satisfactorily mitigate these impacts.
- A18 The Council is also concerned that the proposed allocation would not meet the requirements of the DFLP sustainable transport policy (Policy INF2). Amongst other things, this policy aims to ensure that development:

- does not demonstrate a severe cumulative impact (causing demonstrable harm) on the operation, safety or accessibility to the local or strategic highway networks; and
- mitigates impacts on the local or strategic highway networks arising from the development itself, or the cumulative effects of development on the network, through provision of improvements or enhancements to the existing network to accommodate additional traffic; or contributions towards necessary or relevant transport improvements.

A19 In the light of the above policy it is considered that the proposed allocation may not be able to provide any meaningful improvements to satisfy these requirements given the current and ongoing access issues to and from the Gosport Peninsula.

A20 The DFLP originally proposed two other vehicular accesses (in addition to Newgate Lane) which link the potential new allocation to the existing residential communities in Gosport. This includes Brookers Lane as a secondary access for a limited number of dwellings.

A21 The other proposed access off Tukes Avenue has now been withdrawn following a recently issued addendum by FBC which reads, *'The site promoter has advised Fareham Borough Council that the potential access identified via the demolition of two houses on Tukes Avenue (165 and 167) is a factual error. The site promoter has confirmed that potential vehicle access via these properties is not being pursued'*

A22 Notwithstanding that the residents of these and adjacent properties were most unfortunately not previously notified of these proposals, it is not clear from this statement whether the site promoter will be seeking an alternative access on the eastern boundary. It is considered that any such access points from housing areas within Gosport, will add to traffic on the local highway network within Gosport, which again has not yet been quantified in terms of number/distribution and junction/link capacity. The nature and scale of these access points will have a direct impact on their use/attractiveness, particularly if through routes are created. The creation of such accesses may create rat-runs through the existing residential areas within Gosport, due to perceived journey time savings compared with joining Rowner Road/Peel Common Roundabout. This could be exacerbated with the development of the Stubbington Bypass.

A23 Despite the addendum significant concerns remain regarding any proposed access onto Tukes Avenue. These include:

- The amenities of neighbouring residents as an access road will serve a considerable number of dwellings;
- The capacity of Tukes Avenue and adjoining roads to take the additional traffic; and
- The proximity to facilities such as Woodcot Primary School and the impact on pedestrian safety.

A24 There is no mention of improving public transport with regard to the proposed allocation. This needs further consideration to reduce the site's car dependency which would add further pressure on Newgate Lane. This will also have a detrimental impact on the existing Air Quality Management

Areas within Fareham. It will be necessary to explore strategic transport options such as the potential for a new bus rapid transit link which could connect Lee-on-the-Solent, Daedalus, Newgate Lane, and the Busway through to Fareham.

A25 Cycle and pedestrian links to the adjacent Bridgemary and Peel Common are identified in Policy HA2.

Residential amenities and design

A26 Any development of this scale on greenfield land will create significant concerns from existing residents particularly in areas immediately adjoining the site. It will be critical that their amenities are not harmed by any future proposals on this site and this should be reflected in Policy HA2.

School provision

A27 Provision is included in the policy to ensure improvements to local schools and early-years childcare (as identified by the Local Education Authority). However, there is insufficient detail of how local school places could be affected by the proposals. It will be necessary to understand the impact of the new housing development on local schools as any development on this site is likely to include a high proportion of households with children.

Community facilities

A28 It will also be important to understand whether any new development at Newgate Lane can be sufficiently supported by other community facilities in the area including health facilities (such as GPs) and community hall provision and whether it is necessary to provide new community facilities as part of the development. Consequently without such information such proposals cannot be supported.

A29 Policy CF1 of the DFLP recognises the need for community facilities as part of large residential developments and that these should be delivered to prescribed timescales to meet the needs of the community. The DFLP specifically mentions Bridgemary School as the primary location for community facilities (sport pitches, courts, hall and stage, and various meeting and conference rooms for hire). It states that these facilities are generally less than 1km from within the allocation and that it is not considered necessary for additional space to be provided with the allocation.

A30 Policy LP32 of the GBLP requires the consideration of community facilities for new residential developments (normally for sites of 100 dwellings or more). It is therefore considered appropriate for FBC to further assess the community requirements of a development of this scale and include such provision within Policy HA2.

Open space

- A31 The proposals as set out in Policy HA2 include a number of open space requirements including:
- Neighbourhood Equipped Area of Play (NEAP) and a Multi-Use Games Area for older children on-site;
 - Improvements to existing off-site sports facilities at Brookers Field and Tukes Avenue which are GBC-owned facilities.
 - The potential to take a financial contribution to improve sports pitch provision and associated facilities at Tukes Avenue Open Space and/or Brookers Field Recreation Ground.

- A32 It will be necessary to ensure such provision meets the requirements of any new community without affecting that enjoyed by existing residents.

Air quality

- A33 Any additional traffic on Newgate Lane is likely to have an impact on the Air Quality Management Area (AQMA) at the north end of Newgate Lane and Gosport Road and therefore it would be necessary to include measures mentioned in Policy INF2 specifically to mitigate this impact for this development allocation. This may be difficult for a development of this scale with limited public transport choice. The issue of air quality is highlighted in the Interim Traffic Assessment which notes that in January 2017, Fareham and Gosport Environmental Health Partnership issued the Annual Status Report 2016, which concluded that both the existing AQMAs need to be extended as locations outside of the AQMAs had exceeded the annual mean NO₂ objective for Fareham. The AQMA extensions were agreed in October 2017.

Drainage

- A34 The area includes a number of drainage ditches which are part of the River Alver catchment. The development allocation proposes to retain and enhance these drainage ditches as part of a Sustainable Drainage System (SuDS). It will be important to understand the impact of any development on potential for surface water flooding in the vicinity and the water quality of the River Alver.

Natural environment

- A35 The proposal aims to retain existing field and tree boundaries and to incorporate street trees and verges to reflect the character of Bridgemary.

END

1) Policy: DS1 - Development in the Countryside

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

We were promised that all houses in the borough would have a paper copy of the plan delivered. This has not happened. No one in our road has had one delivered, and I cannot find anyone in the local area who has had one delivered either, except for one road who complained about not getting any, and then they were delivered. If you do not have a computer, use one, or have access to one, then you are put at a disadvantage to find out what is going on. A few weeks ago, the leaflet for Christmas bin collections was delivered by hand to all houses, so the council can do this delivery, and that would have been an ideal time to deliver the new plan information at the same time. I believe that FBC is deliberately trying to keep people in the dark on this, to try and cut down on the number of objections which it could receive about the plan.

Today is the 18th December 2020, which is the last day for comments. No one in this area has yet had a paper copy of the plan delivered, except for the one road which requested it. How are the majority of the residents supposed to know what is proposed? Is the council trying to keep this quiet? Also this week the government has revised it's housing allocation plans, yet again. Is the number of proposed houses, still the same, or should FBC start again with a different number of houses to reflect the changes?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Not to talk about not building in the countryside, and than to propose to do just that.

Check facts

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Truth

Correct number of houses

Your suggested revised wording of any policy or text:

FBC says that there are no housing developments proposed for Portsdown Hill. No. 3.9 Yes, there is site HA4, land to the east of Down end Road. It cannot have it both ways. On the map, figure 3.1 it clearly shows that this site is in the countryside. It says that Portsdown Hill is an area of special landscape quality, so should not be built on. This area has already been turned down three times by the planning committee of FBC on the grounds of unsafe access into the site across Down end Bridge. Latest application being P/20/0912/OA. Section 3.29 says that we need to protect the countryside from large scale development. 350 houses is large scale. Again FBC cannot have it both ways. Section 3.52 says that chalklands are an important component in the landscape of the north east of the borough around the southerner scarp face of Portsdown Hill This is exactly where site HA4 is.

numbers

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

2) Paragraph: 3.9

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

In general terms this talks about development sites which should maximise development within the urban area, and away from the wilder countryside, respect the valued landscapes and spaces which contribute to settlement definition. No 3.9 says that there no development allocations in these areas, which includes Portsdown Hill. It goes on to say that planning should recognise the beauty of the countryside, and that Portsdown Hill is of special landscape quality. Land to the East of Down End Road, site HA4 is proposed for 350 houses, and this is definitely on Portsdown Hill. This site has already been turned down by FBC planning committee three times now, on the grounds of lack of safety of pedestrian and traffic over Down End Road Bridge. FBC is trying to say that site HA4 is not on Portsdown Hill, yet it is. Trying to have it both ways to suit their purposes. Latest application to be turned down was P/20/0912/OA

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Give everyone a paper copy of the plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Not to contradict facts

Your suggested revised wording of any policy or text:

Not to contradict facts

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Paragraph: 3.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Figure 3.1 quite clearly shows site HA4 to be in the countryside, yet the report says that there are no development allocations in these areas. Site HA4 is on the slopes of Porstdown Hill, and outside of the urban area and settlement boundaries. Council is trying to have it both ways, just to get their umbers up. The railway line is a very clear boundary.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Give everyone a paper copy

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Tell the truth about where the countryside starts

Your suggested revised wording of any policy or text:

Most of what is written about Portsdown Hill is misleading, as it talks a lot about the northern side, which is completely irrelevant, as most of that is in Winchester's area.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Comments to Fareham Borough Council's Publication Local Plan 2037

1. The Lee Residents Association (LRA) is broadly content with Fareham Borough Council's Publication Local Plan 2037, with a reservation outlined in paragraph 3. In particular we offer support for the changes that:
 - the land east of the relief road Newgate Lane East (formerly designated HA2) is no longer identified as a housing allocation
 - the removal of an identified Strategic Growth Area situated in the Fareham, Gosport, Lee on the Solent and Stubbington Strategic/Settlement Gap (Strategic Policy DS2)
2. The LRA also fully endorse the submission made by Gosport Borough Council drawn up in its capacity as an adjoining Local Planning Authority.
3. While broadly content as expressed in paragraph 1, the LRA has remaining concerns over the link in Policy DS1 to Housing Policy 4. We object to the wording in HP4c which is related to the 5-year housing supply requirement which has a contingency should the additional housing requirement extend beyond the capacity of brownfield and already identified development sites. The objection is that any further encroachment on the Fareham, Gosport, Lee on the Solent and Stubbington Strategic/Settlement Gap (Strategic Policy DS2) will be detrimental and significant. Despite the caveat that the development ***"is sensitively designed reflecting the landscape character with the proviso it does not significantly affect the integrity of a strategic gap"***.

If further housing is needed this should be provided within urban areas or the planned Welborne development.
4. Similarly, we would also object to any other development detailed in HP6 such as Affordable Housing being placed within the Strategic Gap. As identified previously any development, affordable or prestigious will still be counter to policy DS2 particularly if a series of large-scale affordable housing developments were authorised under this policy relaxation.
5. The LRA have consistently maintained objections to policies in other versions of the Local Plan and to recent speculative Planning Applications proposed by developers within the Strategic/Settlement Gap.
6. In summary, the objections are due to the detrimental impact it will have on Local Infrastructure, the economy of the Solent Enterprise Zone as well as Gosport Borough Council. It would negate any improvements to the local roads currently being provided to alleviate existing traffic congestion. In particular it would lower the quality of life for all residents that live south of the Strategic/Settlement Gap by exacerbating the existing transportation problem and adding further unavoidable pollution to the Air Quality Management areas.

We would like this communication to be presented to the Planning Inspectorate.

Dear Sir/Madam,

Regulation 19 Local Plan Consultation (6th November – 18th December 2020)

Thank you for your consultation dated 06 November 2020 which was received by Natural England on the same date.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Natural England welcomes the Council's approach to achieving sustainable development through its Local Plan, particularly through its suite of Natural Environment policies that include protection of internationally, nationally and locally designated sites, the enhancement of the local ecological network and the requirement for biodiversity net gain.

Our comments on the Regulation 19 Local Plan and supporting Habitats Regulations Assessment (HRA) and Sustainability Appraisal (SA) are made below.

Strategic Policy DS1: Development in the Countryside

It is recommended this Policy also requires proposals to ensure compliance with Natural Environment policies, in particular Strategic Policy NE1 and Policy NE2, to ensure impacts on nature conservation interests are properly considered and addressed, and biodiversity net gain is achieved (for applicable development).

With regards to soils, the local plan outlines that 'the benefits of protecting the Best and Most Versatile (BMV) agricultural land are considered against the need for development'. This Policy requires development proposals to demonstrate they 'Conserve and enhance landscapes, sites of biodiversity or geological value and soils'.

The National Planning Policy Framework sets out that:

'Plans should: distinguish between the hierarchy of international, national and locally designated sites; allocate land with the least environmental or amenity value, where consistent with other policies in this Framework¹; take a strategic approach to maintaining and enhancing networks of habitats and green infrastructure; and plan for the enhancement of natural capital at a catchment or landscape scale across local authority boundaries.'

1 Where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality.

It is recommended that this Policy is amended to give appropriate weight to the roles performed by the area's soils. These should be valued as a finite multi-functional resource which underpin our wellbeing and prosperity. Decisions about development should take full account of the impact on soils, their intrinsic character and the sustainability of the many ecosystem services they deliver. The plan should safeguard the long term capability of BMV agricultural land (Grades 1, 2 and 3a in the Agricultural Land Classification) as a resource for the future.

Where site allocations are sited on BMV land, the Plan should outline a requirement for the protection of soils during construction where possible, referencing the '[Defra Code of practice for the sustainable use of soils on construction sites](#)'.

Strategic Policy DS3: Landscape

Natural England welcomes the proposed designation of eight Areas of Special Landscape Quality within the Borough, and the requirement for development in these areas to meet stringent criteria that seek to protect and enhance landscape.

Strategic Policy CC1: Climate Change

Natural England advise all Local Plans consider climate change adaption and recognise the role of the natural environment to deliver measures to reduce the effects of climate change, for example tree planting to moderate heat island effects. In addition factors which may lead to exacerbate climate change (through more greenhouse gases) should be avoided (e.g. pollution, habitat fragmentation, loss of biodiversity) and the natural environment's resilience to change should be protected. Green Infrastructure and resilient ecological networks play an important role in aiding climate change adaptation.

Natural England welcomes Strategic Policy CC1: Climate Change that promotes mitigation and adaptation to climate change through various methods including the integration of green and blue infrastructure into the design of developments, adopting higher water efficiency standards, the integration of energy efficiency, renewable and low carbon technologies into all development, and reducing reliance on car travel.

Natural England supports the embedding of policy that will deliver measures to increase sustainability of development over the Plan period. This should also include reducing consumption of raw natural resources, sourcing more renewable or 'green' energy, and reducing waste. Consideration should be given to the collection of financial contributions from development to offset residual carbon emissions elsewhere in the Borough. Consideration can also be given to the retrofitting of existing development with technology that improves energy and water efficiency.

It is recommended that Local Plan policy also seeks measures that help natural habitats across the Borough adapt to the effects of climate change. We would encourage you to refer to the Natural England and RSPB [Climate Change Adaptation Manual](#) and look at the step by step approach to identifying the climate resilience of habitats that occur in the Borough. Consideration should be given to addressing issues on habitats and protected sites that will be exacerbated by climate change, such as flooding, drought, reduction of water resources etc.- the Manual can also help identify these.

Consideration can be given to delivering specific projects within the Borough. For example, to maximise climate change adaptation and mitigation through the establishment of a Nature Recovery Network (NRN), and the Local Nature Recovery Strategy in which the NRN would sit, to ensure climate change resilience at their core. Such projects could potentially benefit from carbon offsetting contributions from development over the local plan period.

Such an approach could link into other aspects of the Plan such as water and air quality, nutrient mitigation for Solent European designated sites, delivery of biodiversity net gain, natural flood management, and green infrastructure implementation among others. Natural England would be happy to advise further on this aspect.

Policy CC2: Managing Flood Risk and Sustainable Drainage Systems

Natural England welcome this Policy that requires development ensures flood and surface drainage are properly addressed, and that Sustainable Drainage Systems (SuDS) are designed in accordance with CIRIA C753 SuDs Manual, to be as 'natural' as possible.

It is advised that the policy makes clear that where a development drains to a protected site(s), an additional treatment component (i.e. over and above that required for standard discharges), or other equivalent protection may be required to ensure water quality impacts are avoided.

Where SuDS are proposed serving as mitigation for protected sites, development should ensure that appropriate resources are put in place to ensure their long-term (in perpetuity) monitoring, maintenance/replacement, and funding.

Policy CC3: Coastal Change Management Areas (CCMAs)

Sea level rise and coastal change are inevitable and bring both challenges and opportunities for people and nature. Sustainable coastal management needs to embrace long-term change and achieve positive outcomes for both.

Policy CC3 identifies that the North Solent Shoreline Management Plan (SMP) policy for the majority of Fareham Borough's coastline is 'Hold the Line', and identifies two CCMAs between Hook spit and Meon Shore, with an identified coastal management policy of 'No Active Intervention'. The Policy will ensure that development in these areas will appropriately consider coastal change. It also will ensure replacement coastal defence schemes 'are consistent with the relevant Shoreline Management Plan and that there will be no severe adverse impact on the environment, the English Coast Path, and the rights of way network'.

We would advise that the Local Plan should also help facilitate the relocation of valued environmental assets away from areas of risk.

Strategic Policy NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

Natural England welcomes this policy that sets out clearly the hierarchy of nature conservation and the requirement for development to 'demonstrate clearly that the mitigation hierarchy has been followed' in terms of avoiding, mitigating or compensating (as a last resort) impacts on biodiversity. Natural England welcomes the Local Ecological Network (LEN) approach that has been included in the local plan.

It is helpful that the LEN and the Council's Green Infrastructure Strategy have been suggested as tools to provide opportunity for enhancements across the Borough. Please read our comments below in relation to Policy NE2 that regards the choosing of suitable opportunities for biodiversity enhancement.

Policy NE2: Biodiversity Net Gain

Natural England is fully supportive of the inclusion in the local plan of a Policy for biodiversity net gain. It is welcomed that the policy refers to the benefits to Borough residents from the ecosystem services that being close to nature provides, and outlines an expectation that offsite net gain must be sought as close to the development as possible. However in some instances this may be difficult, and Natural England recommends that consideration is given to developing a suite of projects across the LEN that development within the Borough can contribute to thereby ensuring the biodiversity within the Borough is protected and enhanced. For example, partners that manage Local Nature Reserves and Sites of Importance for Natural Conservation in the Borough could submit projects to the local planning authority to enhance the ecological value of these sites. These projects could be funded by development that requires offsite compensation or additional enhancements to achieve biodiversity net gain. This approach can also be used by development with limited opportunities for biodiversity net gain on-site.

The Policy outlines that the Council may prepare and adopt a Supplementary Planning Document (SPD) for Biodiversity Net Gain. Due to the need to ensure net gain is delivered in a suitably

strategic way, and having regard to the timescales of the legislative requirement for net gain and further national guidance, Natural England would support the development of such an SPD and would encourage Policy NE2 to outline this as a clear intention of the Council, in order to provide further guidance and support to aid sustainable development across the borough. Natural England will be happy to advise further to aid the development of such an SPD.

- *Calculating net gain*

Please note that Biodiversity Metric 3.0 is due to be published early 2021, which will supersede [Biodiversity Metric 2.0](#). We advise that the Policy is updated accordingly and that this metric is used to measure gains and losses to biodiversity resulting from development, and implement development plan policies on biodiversity net gain.

Please note that although the Policy includes 'nesting and roosting features' as suggestions for achieving net gain, it is our advice that features such as bird and bat boxes, swift bricks, bee hotels etc should be classed as general biodiversity enhancements that should be included as part of a wider biodiversity enhancement and mitigation plan. Net gain specifically should derive strictly from habitat enhancement and creation, required as calculated using the metric.

- *Wider environmental gains*

The reference to seeking wider environmental gains, for example to address water/air quality, flooding, climate change etc. is welcomed. Opportunities for environmental gains, including nature based solutions to help adapt to climate change, might include:

- Identifying opportunities for new multi-functional green and blue infrastructure.
- Managing existing and new public spaces to be more wildlife friendly (e.g. by sowing wild flower strips, changing cutting regime of open spaces and road verges*) and climate resilient
- Planting trees, including street trees, characteristic to the local area to make a positive contribution to the local landscape.
- Improving access and links to existing greenspace, identifying improvements to the existing public right of way network or extending the network to create missing footpath or cycleway links.
- Restoring neglected environmental features (e.g. a hedgerow or stone wall or clearing away an eyesore)
- Designing a scheme to encourage wildlife, for example by ensuring lighting does not pollute areas of open space or existing habitats

*Please see this [paper](#) regarding cost-effective and low-maintenance management for species-rich grassland on road verges and the value it can contribute to biodiversity and ecosystem services.

Please note that Natural England and Defra are developing an Environmental Net Gain/metric for Natural Capital Net Gain that can be used in conjunction with the Biodiversity Metric (but not instead of). Further information will be available in 2021.

- *Monitoring of net gain*

Your plan should include requirements to monitor biodiversity net gain. This should include indicators to demonstrate the amount and type of gain provided through development. The indicators should be as specific as possible to help build an evidence base to take forward for future reviews of the plan, for example the total number and type of biodiversity units created, the number of developments achieving biodiversity net gains and a record of on-site and off-site contributions.

LPAs should work with local partners, including the Local Environmental Record Centre and wildlife trusts, to share data and consider requirements for long term habitat monitoring. Monitoring requirements should be clear on what is expected from landowners who may be delivering biodiversity net gains on behalf of developers. This will be particularly important for strategic housing allocations and providing as much up front information on monitoring will help to streamline the project stage.

Policy NE3: Recreational Disturbance on the Solent Special Protection Areas (SPAs)

Natural England welcome this policy that will require new residential development to address in-combination effects on the Solent SPAs via recreational disturbance. It is recommended the Policy also outlines that other types of development (such as new hotels, student accommodation, care homes etc.) may also need to address recreational disturbance impacts, both alone and in-combination. Such development should be assessed on a case by case basis.

Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

Natural England welcome this policy that will require new development that propose a net increase in overnight accommodation to address in-combination effects on the Solent designated sites via eutrophication from nutrients in wastewater.

Policy NE5: Solent Wader and Brent Goose Sites

Natural England welcome this policy that will require development to address effects on sites identified by the Solent Wader and Brent Goose Strategy (SWBGS) which serve as functionally linked land to the Solent SPAs.

It is recommended that the following wording within the Policy “*Sites which are used by Solent Waders and/or Brent Geese (as shown on the Policies map)*” is amended to read “*Sites which are used by Solent Waders and/or Brent Geese (as identified within the most up to date version of the Solent Wader and Brent Goose Strategy)*” to take account of any changes to sites and their distribution across the Borough, as these updates can be implemented at irregular times. Any further references to the Policies map should be similarly amended to refer to the SWBGS mapping.

Core Areas – due to their essential function within the SWBG network, it is advised these sites are identified for protection by the Policy. Any development that would result in impacts to a Core Area will need to be carefully assessed on a case-by-case basis. There are limited options where the function of a Core site can be fully replicated elsewhere in terms of its suitability and appropriate locality; where such land is available, an assessment of replicability will need to be undertaken through discussions with Natural England and the Local Planning Authority.

Financial contributions – it is welcomed that the Policy outlines that financial contributions proposed as mitigation will be used for the management and enhancement of an ‘agreed suitable identified site for Solent Waders and Brent Geese’. Such proposals should demonstrate how such funds will be used to enhance, manage and monitor sites within the wider Solent Waders and Brent Geese network, in perpetuity. It is suggested that the Council works with relevant partners/stakeholders, including cross-boundary partnerships, to develop a strategic project(s), such as a bird reserve, and/or list of projects to enhance, manage and monitor the wider Solent wader and brent goose ecological network, to which contributions can be directed.

Policy NE6: Trees, Woodland and Hedgerows

Natural England welcomes this Policy that seeks to protect and enhance trees, woodland and hedgerows within the Borough. It is recommended that this Policy requires development proposals that affect ancient woodland, ancient trees and veteran trees, to ensure they are in line with [standing advice](#) published by Natural England and the Forestry Commission.

Policy NE8: Air Quality

It is welcomed that the Policy recognises that ‘poor levels of air quality can also lead to environmental issues’. The Policy includes a need for planning applications to consider if they will have a ‘potential adverse effect on biodiversity, especially where it would affect sites designated for their biodiversity value’.

The Policy outlines that the Local Plan HRA concludes the Plan ‘would not have a likely significant effect on the internationally important habitats and species present in the area’. As this issue has

been considered within the HRA appropriate assessment, the wording here should be amended to use the correct terminology under the Habitats Regulations, i.e. the HRA concludes the Plan will not result in an 'adverse effect on integrity' (the term 'likely significant effect' is used at the screening stage of the HRA). See further comments on air quality below in regards to the Local Plan HRA.

Policy NE9: Green Infrastructure

Natural England welcomes this Policy that seeks to fully integrate green infrastructure (GI) into development and maximise opportunities to connect to the wider environment. The provision of enhanced green infrastructure and sites of nature conservation value can not only help address some of the mental and physical health problems that are experienced in the Borough's population, but can also benefit society in other ways including improvements to local air and water quality, reducing the risk of flooding, alleviating noise levels and aiding climate change adaptation.

Policy NE10: Protection and Provision of Open Space

This Policy references protection of public rights of way. Natural England advises that the Policy should also seek to secure enhancement of public rights of way and National Trails, as outlined in paragraph 98 of the NPPF. Recognition should be given to the value of rights of way and access to the natural environment in relation to health and wellbeing and links to the wider green infrastructure network. It is welcomed the plan seeks new access opportunities; it should seek to link existing rights of way where possible. The plan should avoid building on open space of public value as outlined in paragraph 97 of the NPPF.

It is welcomed that the Policy makes provision for appropriate quantity and quality of green space to meet identified local needs (as outlined in paragraph 96 of the NPPF) based on Natural England's work on [Accessible Natural Greenspace Standard \(ANGSt\)](#) in assessing the level of accessible natural greenspace; it is also welcomed that it recognises development may be required to 'provide more open space above what is required by the standards to make the development more acceptable'.

Policy D1: High Quality Design and Place Making

Natural England welcomes this Policy that requires the design of developments to integrate existing and new habitats and biodiversity within a coherent and well managed, connected structure. It is advised that landscaping of developments and open spaces seeks to use appropriate native and locally sourced species as far as possible to cater for local wildlife.

Policy D4: Water Quality and Resources

Natural England welcome this policy that seeks to conserve water and improve its quality.

Southern Water's Water Resources Management Plan (WRMP) 2019, that covers the planning period 2020-2070, projects a significant supply demand deficit during periods of drought in the Western Area, and commits to implementing a long term water resources scheme to restore the supply demand balance whilst avoiding and/or mitigating impacts on European sites, including the River Itchen SAC.

It is Natural England's advice that in advance of any permitting of such a suitable long term scheme, uncertainty remains with regards to water resources and the impacts of abstraction on protected sites.

Although it is welcomed that Policy D4 requires a water consumption for new dwellings of no more than 110 litres per person per day, Natural England strongly recommend all new development within the Southern Water supply area adopt a higher standard of water efficiency of 100 litres/per person/day, including external water use and re-use, in line with Southern Water's Target 100 demand reduction programme which is committed to within their WRMP19. Natural England also recommends that the Policy encourages the wise use of water in conjunction with the water companies, for example by developments incorporating grey water recycling systems and efficient appliances

Please see Natural England advice above in relation to Policies NE4 and Policy CC2 with regards to nutrients and surface water treatment via SuDS.

Neighbourhood Plans

Currently there are no Neighbourhood Plans in the Borough, but the Local Plan provides a 'strategic evidence base' which will inform any future Neighbourhood Plans.

It is recommended that any future Neighbourhood Plans which allocate housing should also identify spaces for environmental enhancement, for the purpose of offsetting environmental impacts, e.g. through the designation of Local Green Spaces. Such a local approach could give communities more ownership over such green spaces and provide a more strategic route to addressing common environmental impacts from development in that area, such as air and water pollution, habitat and species loss and increased carbon emissions, and could deliver biodiversity net gain and nutrient offsetting.

Such spaces could include the development of community orchards and play areas, woodlands and nature reserves, and serve a variety of functions that benefit both nature and the local community, for example providing benefits to health and wellbeing, offsetting nutrient discharges from allocated development and providing further scope for carbon sequestration.

Specific comments on Housing Allocation Policies

- HA9 - Heath Road (70 dwellings)

It is acknowledged this allocation site has resolution to grant permission for 70 dwellings. It is recommended this Policy includes the requirement to secure an appropriate level of offsite compensation to address the loss of secondary woodland on site which may in parts qualify as lowland mixed deciduous woodland habitat.

- HA29 - Land East of Church Road (20 dwellings)

Much of this site shows as Lowland Mixed Deciduous Woodland priority habitat on the Ecological Network mapping for Hampshire. Part of the site is designated as a Site of Importance for Nature Conservation (SINC) according to the Policy map. The Policy outlines a requirement for ecological mitigation for the site-specific construction and operational impacts of a development proposal. It is advised the Policy outlines a requirement to secure an appropriate level of offsite compensation to address any loss of priority habitat on site to ensure compliance with Policy NE1.

- HA31 - Hammond Industrial Estate (64 bed care home)

The Policy should ensure the impact of nutrients in wastewater is addressed to ensure compliance with Policy NE4.

- HA37 - Former Locks Heath Filling Station (30 dwellings)

This site is adjacent to an area of Lowland Mixed Deciduous Woodland priority habitat as shown on the Ecological Network mapping. The Policy should ensure that impacts on priority habitats and protected species are taken into account and appropriately addressed.

- HA38 – 68 Titchfield Park Road (9 dwellings)

The site is adjacent to Sylvan Glade SINC, much of which is ancient semi-natural woodland. The Policy should ensure compliance with standing advice on ancient woodland, ancient trees and veteran trees and that impacts on the SINC and protected species are appropriately addressed.

- HA42 - Land South of Cams Alders (60 sheltered housing)

This allocation site is located on 'Fort Fareham Grassland' SINC that supports woodland and meadow communities. It also lies adjacent to Fort Fareham SINC known for supporting wet woodland communities.

As previously advised in our response to the Supplement to the Reg 18 Local Plan (letter dated 23rd April 2020), allocations and development proposals should ensure they engage the mitigation

hierarchy, where impacts on designated ecological sites/features should first be avoided, and where not possible, adequately mitigated. Where this is not possible, any loss of priority habitat should be appropriately compensated. All residual ecological impacts will need to be addressed before any net gain for biodiversity can be achieved.

Natural England recommends that where loss of SINC habitat cannot be avoided, the policy should make clear how requirements set out within the NPPF, NERC Act 2006 and Local Plan Natural Environment policies will be met. It is advised an appropriate level of offsite compensation should be required to address any loss of priority habitat on site to ensure compliance with Policy NE1 .

- E4: Solent 2 (Employment - 23,500 sq. metres)

This employment allocation is located on Whiteley Meadow - Plot 2184 SINC and Ashley Wood, Fareham SINC. The Hampshire Ecological Network Mapping dataset shows much of this area as Lowland Mixed Deciduous Woodland, a priority habitat listed as required under Section 41 of the Natural Environmental and Rural Communities Act 2006. The site is also situated adjacent to the Gull Coppice (South-West Remnant) SINC which comprises ancient semi-natural woodland.

It is acknowledged that this site is an existing allocation within the adopted Fareham Local Plan Part 2 (2015). The current Policy outlines a requirement for this development to protect existing woodland and avoid habitat severance, and appropriate mitigation and compensation for any loss of protected trees. However, it is our view that a significant area of habitat, including mature woodland, is likely to be lost as a result of development. The Policy should ensure that it is compliant with Strategic Policy NE1 with regards to impacts on the local ecological network in this locality. In line with existing national and local policy and legislation, it is Natural England's advice that the mitigation hierarchy of avoid, mitigate and lastly compensate is employed where considering impacts on these habitats, particularly those designated as SINC. Measures should be sought to protect and enhance the local ecological network. Where impacts cannot be avoided or adequately mitigated, a comprehensive compensation package should be required that addresses the loss of all priority habitat on site (rather than just specifying protected trees), that seeks to enhance and connect habitat in the locality.

Comments on the HRA

Natural England notes that your authority, as competent authority, has undertaken an appropriate assessment of the Local Plan in accordance with regulation 63 of the Conservation of Species and Habitats Regulations 2017 (as amended). Natural England is a statutory consultee on the appropriate assessment stage of the Habitats Regulations Assessment process.

We have the following comments on the HRA:

- *Recreational disturbance – New Forest designated sites*

The Local Plan HRA screening assessment outlines that although the Borough falls within the 25km buffer of the New Forest designated sites (via a straight line), the minimum actual travel distance by car is of approximately 30km travel distance (via the M27). In comparison to the number of visits from residents closer to the New Forest, the assessment states 'visits to the New Forest SAC/SPA/Ramsar associated with increased housing development in Fareham Borough contribute a significantly lower proportion of overall visits to the designated sites and it is not considered likely that significant effects associated with recreational disturbance from Fareham housing development would arise'. The HRA screens this impact pathway out from an appropriate assessment on this basis.

It is understood Footprint Ecology are currently conducting further analysis on several aspects of their latest visitor surveys. This analysis will assist the definition of a robust catchment area for recreational impacts. It will help in the preparation of a strategic, cross-boundary approach with neighbouring competent authorities to deliver habitat mitigation for the New Forest SPA/SAC/Ramsar. This work is due to be completed shortly and will provide a useful update to the evidence base against which such impacts from new development from surrounding local authority areas can be assessed.

Therefore, whilst acknowledging that the level of additional impacts from new residents is known to significantly decrease with distance from the New Forest designated sites, Natural England consider at this time there remains some uncertainty with regard to the evidence confirming the level of additional impacts from new residents of Fareham local plan development. We therefore advise this issue is taken forward to the appropriate assessment stage where further work may be carried out to ascertain the level of impacts as accurately as possible.

Where impacts are identified, suitable and proportionate mitigation should be proposed; we recommend the Council works with the New Forest National Park Authority and the other partner authorities to develop a strategic approach to addressing recreational impacts from new development on the New Forest designated sites. Such an approach should include developer contributions towards the New Forest National Park Authority's Habitat Mitigation Scheme to enable the authority to deliver site specific mitigation measures on behalf of applicants.

Natural England will be happy to provide further advice to the Council on this aspect as the evidence base develops.

- *Air quality*

The Local Plan is supported by an Air Quality Habitats Regulations Assessment (Ricardo, Sept 2020). The conclusions drawn in the Local Plan HRA in regards to air quality impacts are based on those drawn within the Ricardo report. Natural England concurs with the conclusions drawn in the report.

The Ricardo report suggests that the Council regularly reviews the Defra airborne NOx forecast levels. This is welcomed as a way to ensure any changes in forecasting and potential consequential changes to conclusions drawn in the report for this pollutant can be appropriately reviewed and addressed during the local plan period.

- *Water quality – nutrients*

The HRA calculates a nitrogen budget for the local plan of 2536.99 kgTN/yr. Appendix III of the HRA outlines various mitigation schemes that can be utilised or progressed as a means to ensure nutrient neutrality can be delivered by new development.

The HRA states within its Summary of Findings that the sites Chichester and Langstone Harbours SPA/Ramsar, Portsmouth Harbour SPA/Ramsar and Solent and Dorset Coast SPA are screened out of an appropriate assessment in relation to water pollution impacts. Much of development within Fareham borough is served by Peel Common wastewater treatment works (WwTW), which is a coastal WwTW that discharges effluent several kilometres out into the Solent. It is our advice that long-shore outfall pipes are likely to have shifted and widened the distribution of nitrogen loading within the effluent across the Solent SAC and SPAs. It is important to recognise the loading from Peel Common WwTW contributes to a number of estuaries and catchments within the Solent (including Portsmouth Harbour, Langstone Harbour, Chichester Harbour, River Meon, Wootton Creek and the Medina Estuary catchments). It is therefore Natural England's view that, because of this wide distribution of nitrogen loading, all designated sites should be screened in.

- *Other comments on the HRA*

Section 7.7.3 – this paragraph refers to the 'SAC' although it is relating to Portsmouth Harbour SPA and Ramsar.

Comments on the SA

We are broadly satisfied that the objectives and indicators within the Sustainability Appraisal cover our key interests, and welcome the identification of the need to conserve and enhance biodiversity, landscape character, and to reduce pollution. We also welcome the need to address minimise the

effects of climate change, and to minimise impacts on best and most versatile agricultural land. Please see some more specific comments below.

- SA5: To Minimise Carbon Emissions and Promote Adaptation to Climate Change

This SA objective to address the effects of climate change is welcomed. It is suggested a further monitoring parameter(s) is included to monitor the implementation of new GI/habitat that can seek to alleviate the pressures of climate change on species and the ecological network whilst also providing other benefits as described further in our advice above; e.g. percentage of new GI/ extent of priority habitat within the ecological network.

- SA7: To Conserve and Enhance Biodiversity

We advise that this SA objective also seeks to conserve and enhance geodiversity within the Borough, in line with national planning policy.

The SA outlines the Plan 'is predicted to lead to negative impacts to ecological receptors in the short to medium term, but many of these impacts are capable of being mitigated. Long-term effects are likely to be both positive and negative, and highly site-specific'. It is acknowledged these effects can be avoided/mitigated by the implementation of several policies including NE1, NE3, NE4 and NE5. It is advised Local Plan Policy requires relevant development to carry out site-level Habitats Regulations Assessments in order to ensure impacts on European sites are suitably addressed.

It is also suggested that further monitoring parameters are incorporated to ensure impacts on internationally, nationally and locally designated sites are monitored throughout the Plan period, e.g. via the number, extent and condition of sites designated for nature conservation. We would advise the use of a green infrastructure standard as an indicator, such as Natural England's Accessible Natural Greenspace Standard (ANGSt). Parameters for measuring the implementation of net gain should be introduced, see further above for our advice on net gain monitoring.

We would be very happy to comment further as the plan process progresses. If you have any queries relating to the detail in this letter please contact me on 07787005505.

Yours faithfully

Rebecca Aziz
Sustainable Development Senior Advisor

Pegasus Group – Preliminary Landscape and Visual Appraisal

i-Transport – Transport Delivery Technical Note

WYG (part of Tetra Tech) – Ecology Technical Note

1.0 Introduction

- 1.1 The following representations are by Pegasus Group on behalf of our clients The Hammond Family, Miller Homes and Bargate Homes. Our clients have interests in land at Newgate Lane South, Fareham which was previously proposed to be allocated for about 475 dwellings in the Regulation 18 version of this plan. For the reasons set out in these representations, our clients are strongly of the view that this allocation should be reinstated in the local plan.
- 1.2 Our clients are important stakeholders within Fareham and are keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.3 The following representations utilise the same format as the Council’s response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

	Agent	Client
Title	Mr	The Hammond
First Name	Jeremy	Family, Miller
Last Name	Gardiner	Homes and Bargate

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 – 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Former Policy HA2 allocation site Newgate Lane South, Employment allocations Policies E2 and E3.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020.

The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes

in the borough in any event, but the Council chose not to follow this national guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

- 2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:
- 1. It has not been "positively prepared":**
- 2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of

the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground –

as such it's preparation is premature.

- 2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.
- 2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PFSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits.

The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not Effective:

- 2.28 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

- 2.29 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

- 2.30 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.
- 2.31 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PFSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the

achievement of sustainable development.

4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.32 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including reinstating the allocation of the former Policy HA2 site, Newgate Lane South.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.33 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.34 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1 Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2 Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3 Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4 Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5 Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the re-instatement of HA2 Newgate Lane South for about 500 dwellings.
- 3.6 Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7 Policy H1 seeks to 'phase' this supply identifying the following:
 - Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.
- 3.11 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.
- 3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

- 3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:
- a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".
- 3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

- 3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

- 3.16 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.17 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS2: Development in Strategic Gaps

- 3.18 Strategic Gap 2 "Fareham / Bridgemy and Stubbington / Lee-on-the-Solent" should be redefined to exclude all land to the east of Newgate Lane, between Newgate Lane and the urban settlement boundary of Bridgemy.
- 3.19 Paragraph 3.46 states:
- "Further to the east, retaining the gap will help maintain the separation of Stubbington and Lee-on-the-Solent from Fareham and Bridgemy along with maintaining the separate identity of Peel Common." (our underlining)*
- 3.20 Peel Common is not an urban settlement with a separate identity which merits protection. It has resulted from an evolution of wayside development into ribbon development and even now is, in landscape terms, non-descript as a settlement. The purpose of the gap should be to maintain the separation of Stubbington from Fareham and Lee-on-the-Solent; and the separation of Lee-on-the-Solent from Rowner.
- 3.21 Paragraph 3.43 refers to "The need to respect settlement boundaries and protect the identity of our key settlements". Peel Common is not a key settlement and it does not have a settlement boundary. The deletion of housing allocation Policy HA2 Newgate Lane South from this version of the local plan has been accompanied by the extension of the Strategic Gap designation across the HA2 site to the settlement boundary of Bridgemy on the Proposals Map. It is suspected that the reference to Peel Common having a "separate identity" in the supporting text has been inserted to attempt to justify the extension of the gap designation over land which has previously been assessed as being suitable for development.

3.22 Paragraph 3.46 states that *"Although no boundary changes are proposed at this time, evidence has shown (that the) boundary of this strategic gap could be redrawn whilst retaining its important function of preventing settlement coalescence."* This is a key failure of the process at this stage. The Council has a quite recent landscape character assessment as part of the evidence base (2017) and a very recent gap study. There are also two strategic road schemes (one complete, one in construction) that affect the landscape character of this gap. This is surely the time for the Council to redraw the boundaries of this strategic gap and strategically plan for growth.

3.23 In this regard, these representations are accompanied by a Preliminary Landscape and Visual Appraisal prepared by Pegasus Group of the former Policy HA2 site, Newgate Lane South. The Summary and Conclusions of this Appraisal include the following:

"7.7. In summary the site sits within a variable pocket of landscape. In isolation the site comprises remnant agricultural enclosures however it cannot be separated from the extensive urbanising influences which surround and frame it, particularly in the context of the more recent severance of the agricultural land that has arisen from the route of the bypass (Newgate Lane East East)...."

7.16. In terms of the Fareham and Stubbington strategic gap, the site (along with its local landscape context), is well placed to accommodate some form of development without undue consequences or impacts on the role and function of the Strategic Gap as a whole. This is on the basis that:

- A substantial distance will be retained across the wider gap, between the site and Stubbington;*
- In terms of visibility, the site is physically and visually well contained, placed as the area is within a strong framework of green infrastructure and the settlement edge – furthermore, the site (and potential development) will not be visible across the gap from Stubbington;*
- The surrounding context and urbanising influences, including the residential areas of Peel Common, Bridgemarky and Woodcot which reduce the degree of change as they provide a relevant settlement edge context;*

- *The opportunity to contribute to, and maintain, a strong green infrastructure network and facilitate a strategic green infrastructure connection through the area that will reinforce and connect the linear routes which cross broadly north to south through this area; and*
- *In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.*

3.24 These conclusions are consistent with the evidence base in relation to the Strategic Gap which acknowledges that the gap designation does not relate to landscape quality, value or condition; that development can be accommodated within gaps without undermining their function; and that urban influences can detract from the functioning of the gap, to the extent that they present a clear justification for amending the boundaries of the gap. The study concludes that the part of the gap between Peel Common and Bridgemary is weak and under development pressure, particularly with the recently constructed Newgate Lane East now forming such a strong urbanising feature in the local landscape context. The Policy HA2 site is not considered to form part of a priority area which is required to maintain the integrity and function of the Fareham / Stubbington Strategic Gap and it is concluded that the site is well placed to accommodate development that could come forward as a well-connected urban extension without significantly affecting the integrity of the gap and the physical and visual separation of settlements. Indeed, this was the Council's previous conclusion when it proposed to allocate the Policy HA2 site. Its December 2019 SHELAA included commentary on the three land parcels (SHELAA sites 3002, 3028 and 3057) which together make up the Policy HA2 site. The Suitability Comment for sites 3002 and 3028 (the smaller northern and southern parcels) were:

"The site is considered suitable for development as part of the proposed housing allocation. Development could be accommodated without significant effects on the landscape character of the wider area."

3.25 For site 3057 (the larger central parcel) the Suitability Comment was:

"Development could be accommodated without significant effects on the landscape character of the wider area (following construction of Newgate Lane South) or the integrity of the Strategic Gap..."

- 3.26 All three component parcels of the HA2 site were described as Suitable, Available and Achievable. Nothing has changed in this regard.

Policy DS3: Landscape

- 3.27 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.28 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event.
- 3.29 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.30 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.31 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of LVIA and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HP1: New Residential Development

3.32 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.

3.33 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.34 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.35 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.36 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.37 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However,

if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.38 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.39 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.40 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.41 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.42 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and

b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.43 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.44 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.45 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.46 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.47 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

- 3.48 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy E2: Faraday Business Park

- 3.49 This draft policy proposes the allocation of land for 65,000 sq. metres of employment development (in addition to the 22,000 sq. metres already consented). The site is designated as a Low Use site for Brent Geese and Waders.

- 3.50 Criterion e) of the policy states:

"e) Proposals shall meet the requirements of Policy NE5 given the site's Low Use status for Solent Waders and Brent Geese..."

- 3.51 The two site-specific reasons for the deletion of housing allocation HA2 Newgate Lane South given in the Fareham SHLAA (in the context of the Council planning for a reduced housing requirement in the PLP) are that the site lies within a Strategic Gap and that the site is designated as a Low Use site for Brent Geese and Waders. Given the proposed allocation at the Faraday Business Park, a site's designation as of Low Use status for Solent Waders and Brent Geese clearly does not prevent a site from being allocated for development.

Policy E3: Swordfish Business Park

- 3.52 This draft policy proposes the allocation of land for 12,100 sq. metres of employment development (in addition to the 28,000 sq. metres already consented). The site is designated as a Low Use site for Brent Geese and Waders.

- 3.53 Criterion f) of the policy states:

"f) Proposals shall meet the requirements of Policy NE5 given the site's Low Use status for Solent Waders and Brent Geese..."

- 3.54 The two site-specific reasons for the deletion of housing allocation HA2 Newgate Lane South given in the Fareham SHLAA (in the context of the Council planning for a reduced housing requirement in the PLP) are that the site lies within a

Strategic Gap and that the site is designated as a Low Use site for Brent Geese and Waders. Given the proposed allocation at the Swordfish Business Park, a site's designation as of Low Use status for Solent Waders and Brent Geese clearly does not prevent a site from being allocated for development.

Policy NE5: Solent Wader and Brent Goose Sites

- 3.55 Accompanying these representations is a WYG Technical Note in relation to Ecology and the former Policy HA2 Newgate Lane South housing allocation. This addresses the two proposed options for mitigating the impact of development of Low Use SWBG sites. Policy NE5 limits mitigation solutions to either on-site provision or a financial contribution towards mitigation on a suitable identified site. However, as reported in the Technical Note, an off-site solution has been proposed as part of outline application P/19/1260/OA Land East of Newgate Lane East (that application site being the southern part of the former HA2 allocation), and that solution has been reviewed by the Council's Ecologist and found to be acceptable. This therefore represents a compliant solution which can be replicated for other developments in similar circumstances. Policy NE5 should be amended to include this additional option.

Policy D1: High Quality Design and Place Making

- 3.56 This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.57 This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Appendix C:

- 3.58 The purpose of the inclusion of the Local Ecological Network Map at Appendix C is not understood. It includes the identification of land as "Network Opportunities". This does not appear to have a basis in the policies of the PLP. The former Policy HA2 Newgate Lane South site is identified as a Network Opportunity on this plan. This is not explained. This appendix should be deleted, as happened to a similar plan appended to the Regulation 19 Chichester District Local Plan.

Reinstatement of the Policy HA2: Newgate Lane South housing allocation

- 3.59 The Council omitted a number of previous housing allocation sites for the Regulation 19 PLP on the basis that the PLP plans for the reduced housing requirement of 403 hpa. We have asserted that this approach fails to comply with legal requirements and is unsound. It is foreseeable that the Council's housing requirement may increase and in such circumstances Policy HA2 should be reintroduced and updated to allocate the site for about 500 dwellings.

- 3.60 The Policy HA2 site is comprised of three SHELAA sites:

- Cops Field, Newgate Lane, Peel Common (3028);
- Land East of Newgate Lane, Peel Common (3057); and
- Land East of Newgate Lane East, Peel Common (3002).

- 3.61 In the Council's SHELAA of December 2019, the commentary on each of these sites concluded with a "Suitability" (for allocation for development) Comment. For sites 3002 and 3028 (the smaller northern and southern parcels) the Suitability Comments were:

"The site is considered suitable for development as part of the proposed housing allocation. Development could be accommodated without significant effects on the landscape character of the wider area."

- 3.62 For site 3057 (the larger central parcel) the Suitability Comment was:

"Development could be accommodated without significant effects on the landscape character of the wider area (following construction of Newgate Lane South) or the integrity of the Strategic Gap..."

- 3.63 All three component parcels of the HA2 site were described as Suitable, Available and Achievable. Nothing has changed in this regard.
- 3.64 In omitting Policy HA2 from the PLP, the Council also updated its SHELAA for consistency with the PLP and justified the omission of the HA2 allocation due to the impact of development on the strategic gap, and the fact that the site is a low use SWBG site. Gosport Borough Council also previously objected to the HA2 allocation due to its alleged traffic impact on Newgate Lane East. Taking each of these matters in turn:

Strategic Gap:

- 3.65 These representations are accompanied by a Preliminary Landscape and Visual Appraisal prepared by Pegasus Group of the former Policy HA2 site, Newgate Lane South. This study concludes that the part of the gap between Peel Common and Bridgemary is weak and under development pressure, particularly with the recently constructed Newgate Lane East now forming such a strong urbanising feature in the local landscape context. The Policy HA2 site is not considered to form part of a priority area which is required to maintain the integrity and function of the Fareham / Stubbington Strategic Gap and it is concluded that the site is well placed to accommodate development that could come forward without significantly affecting the integrity of the gap and the physical and visual separation of settlements. This was the Council's previous conclusion when it proposed to allocate the Policy HA2 site, as evidenced by the quotations from the December 2019 SHELAA above.

Low Use SWBG site:

- 3.66 It is noted that Employment allocations E2 and E3 are similarly designated. These representations are accompanied by an Ecology Technical Note prepared by WYG which describes the off-site mitigation solution already advanced and agreed by the Council's ecologist in relation to a planning application for housing on the southern part of the HA2 site. Demonstrably, this is not an issue which would prevent development coming forward in principle on this site.

Transport impact:

-
- 3.67 These representations are accompanied by a Transport Technical Note prepared by i-Transport. This reports that the Council's transport evidence base was substantially prepared before the Council amended its spatial strategy in response to the draft revised Standard Methodology housing target so it included assessments of the Policy HA2 site, together with other housing allocations since omitted including the two Strategic Growth Areas (SGAs). On this basis the Council's Strategic Transport Assessment concludes that the plan is deliverable and sound from a transport perspective.
- 3.68 The Transport TN reviews the sustainable transport credentials of the HA2 site. The site is very well served by public transport – it is within a 5-10 minute walk of the South East Hampshire Rapid Transit system, and is close to local bus routes. HCC and its partners have recently submitted funding bids to Government for later stages of the SEHRT which includes a potential extension of the SEHRT to the site and the Solent Enterprise Zone. This will further improve the accessibility of the site to public transport services.
- 3.69 The site lies in close proximity (comfortable walk or short cycle trip) to major employment areas (Fareham Business Park, Newgate Lane Industrial Estate, Solent EZ) and supermarkets (such as Asda next to the site) for convenience shopping.
- 3.70 The primary vehicular access to the site will be from a new roundabout on Newgate Lane South. This has been designed to minimise interruptions to traffic flows on Newgate Lane South. The operation of this junction has been modelled, and this confirmed that the greatest queueing delay on any arm during peak periods is about 8 seconds. Thus the roundabout will operate wholly within capacity with a "Level of Service" rating of "A", classified as "Free Flow", such that it will not prejudice the benefits of the recent road project.
- 3.71 Hampshire County Council has not raised any in principle design or safety concerns with the junction and following substantial dialogue has accepted the junction modelling as a basis to consider the operation of the junction but required consideration of the corridor effects of the junction within the Local Plan evidence base.
- 3.72 This wider corridor assessment has now been completed with the release of the FBC SRTM Assessment, summarised in Section 4 of the accompanying Transport

TN. In summary this demonstrates that there are no material impacts on the wider Newgate Lane corridor that result from the delivery of an access to the HA2 site from Newgate Lane. Any objection to the allocation of the HA2 site on this basis is therefore not sustainable.

- 3.73 For all of these reasons, the Council is encouraged to reinstate the Policy HA2 housing allocation for about 500 dwellings. The site is controlled by two highly reputable housing developers – Miller Homes and Bargate Homes – who have a strong local track record of delivery and who are keen to bring it forward for development immediately, such that the site can make a significant contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND ADJACENT TO 75 HOLLY HILL LANE, SARISBURY

**ON BEHALF OF
BARGATE HOMES**

Pegasus Group

Birmingham | Bracknell | Bristol | Cambridge | Cirencester | Dublin | East Midlands | Leeds | Liverpool | London | Manchester | Newcastle | Peterborough

APPENDICES:

- 1.0 Landscape Response prepared by Terra Firma Consultancy including Opportunities and Constraints Plan**
-

1.0 Introduction

- 1.1** The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in Land adjacent to 75 Holly Hill Lane in Sarisbury.
- 1.2** The site is irregular in shape and extends to approximately 2.6 hectares. It is accessed via Holly Hill Lane, which adjoins the south-western boundary of the site, and the majority of the site lies to the east (rear) of the properties which front Holly Hill Lane. The southern boundary of the site adjoins Holly Hill Woodland Park and the eastern boundary extends as far as the boundaries of the properties on Mulberry Lane (accessed from Barnes Lane). The site has previously been promoted through Fareham Borough Council's (FBC) Strategic Housing and Employment Land Availability Assessment (SHELAA) – Site ID 1005.
- 1.3** For the reasons set out in these representations, our client is strongly of the view that this site should be allocated for residential development in the Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan). It is estimated that the site could accommodate approximately 30 dwellings. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).
- 1.4** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.5** The following representations utilise the same format as the Council's response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.4 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.5 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in

"Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

- 2.6 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.
- 2.7 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

-
- 2.8 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.
- 2.9 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.10 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.11 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.12 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's

announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

2.13 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.

2.14 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.

2.15 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.16 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require

that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

- 2.17 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.
- 2.18 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.19 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.20 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies

that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be “ratified” by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.21 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be “circa 10,750 dwellings”. At paragraph 4.5, Fareham’s “immediate neighbours” are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is “likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...”. The Council’s ‘Duty to Co-operate Statement of Compliance’ identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: “...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution.” It is not clear how this “general contribution” has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport’s unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.22 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the “South East

Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

- 2.23 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

- 2.24 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.25 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.26 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.27 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.28 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and

Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.29 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of our client's interest at Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.30 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and

Compulsory Purchase Act 2004).

- 2.31 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;

- Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31; and
- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

3.15 Paragraph 3.9 of the PLP states:

"Recent planning appeal decisions in the Borough have highlighted the need to consider the designation of valued landscapes as part of the Local Plan. Previous Local Plans have included the demarcation of 'Areas of Special Landscape Quality' in the Borough which were used to help shape planning strategy and decisions on planning applications. These areas were the Meon, Hamble and Hook valleys, Portsdown Hill and the Forest of Bere. Both the Landscape Assessment (2017), and the more recent 'Technical Review of Areas of Special Landscape Quality and the Strategic Gaps' (2020) still recognise the intrinsic character and distinctiveness of these relatively undeveloped areas of the Borough and so their locations have been used to shape the development strategy. There is a presumption against major development in these areas, unless it can be demonstrated through a landscape assessment that the quality

and distinctiveness of the landscape character can be conserved. For these reasons there remain no development allocations in these areas." (our underlining)

Our client objects to the identification of the Areas of Special Landscape Quality (ASLQ) in the borough, and particularly to the presumption against development in ASLQ and against allocation any sites for development within these areas. This is discussed in detail in the section relating to Policy DS3: Landscape below.

Policy DS1: Development in the Countryside

3.16 For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.17 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.18 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

- 3.19** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.20** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non-designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.21** However, if it is held that Policy DS3 should not be deleted, the following comments apply.
- 3.22** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.23** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA3 is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.24** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and

several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.25 Having specific regard to our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury, the site has previously been promoted through FBC's SHELAA dated September 2020 (Site ID 1005) and was discounted solely because it is located within an ASLQ. Consequently, our client has appointed Terra Firma Consultancy to review this matter and a Landscape Response is attached to these representations at Appendix 1, together with an Opportunities and Constraints Plan for the site.

3.26 In summary, it is considered that if Policy DS3 is not deleted, it should better allow for flexibility when it can be proven that parcels of land within the ASLQ, when taken in isolation and studied in depth, can accommodate sensitive small-scale development. It is considered that our client's site has capacity for development without detriment to the wider Landscape Character Area and would also create opportunities for landscape enhancement and protection. Further site-specific details for Land adjacent to 75 Hilly Hill Lane are provided at the end of this section.

Policy HP1: New Residential Development

3.27 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.28 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.29 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.30 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.31 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.32 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.33 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.34 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.35 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.36 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.37 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.38 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.39 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.40 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.41 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.42 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.43 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.44** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.45** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury

- 3.46** Our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury has previously been promoted through the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA) dated September 2020. The site is discounted solely for the reason that it is located within a SLQA and our client's objection to this is set out above.
- 3.47** Otherwise, the SHELAA confirms that the principle of highway access to the site is acceptable, subject to allowing for the turning of refuse vehicles within the design of the access road, which could be addressed. It is confirmed that there are no known conservation constraints or noise/air quality constraints, and that the site is not within an identified area of archaeological potential. The SHELAA suggests that there is the potential for moderate to high quality

habitats and ecological interest within the woodland areas, but this could be assessed and appropriately mitigated.

- 3.48** In terms of its accessibility and sustainability, the SHELAA confirms that the site is located within 800m of accessible green space or play space, within 800m of a community/leisure facility, within 1,200m of a Primary School and within 1,600m of a Secondary School. It is also noted that the site is located 0.5 miles (by road) to the south of the A27 and its associated local facilities and services. There are also bus routes that run along Barnes Lane to the east, and the A27.
- 3.49** The SHELAA concludes that the site is both available and achievable but that it is not suitable due to its location within an ASLQ.
- 3.50** The Landscape Response prepared by Terra Firma Consultancy, enclosed at Appendix A, includes an Opportunities and Constraints Plan for the site which identifies an indicative developable area extending to approximately 0.93 hectares. On the basis of a development density of 30-35 dph, this would equate to the provision of between 28-33 dwellings on the site.
- 3.51** On the basis of the above, the Council is encouraged to allocate Land adjacent to 75 Holly Hill Lane in Sarisbury for approximately 30 dwellings. This site is controlled by a highly reputable local housing developer – Bargate Homes – who has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five-year housing land supply.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDIX 1

Landscape Response prepared by Terra Firma Consultancy and associated Opportunities and Constrains Plan

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND WEST OF OLD STREET, STUBBINGTON

ON BEHALF OF BARGATE HOMES

TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED) PLANNING AND COMPULSORY PURCHASE ACT 2004

Prepared by: Jeremy Gardiner & Trevor Moody

3.0 Specific Proposed Changes	12
4.0 Participation at the examination hearing sessions	26

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our client, Bargate Homes. These representations are consistent with and build upon the previous representations submitted to the Council by WYG in relation to this site in response to the Fareham Draft Local Plan 2036 Supplement in February 2020, and we ask that those previous representations are also considered alongside this submission because their content is not repeated here.
- 1.2** Our client has an interest in **land to the west of Old Street, Stubbington** which was previously the subject of development proposals for up to 160 (reduced to 150) new homes (planning application P/17/1451/OA refused on 23 March 2018, and appeal ref. APP/A1720/W/18/3200409 dismissed on 22 January 2019 refer). Since this appeal decision, and in the light of the Inspector's reasoning, extensive belts of strategic woodland planting have been undertaken at the site which will have the effect of visually detaching part of the site from the Meon Valley and creating a more modest sustainably located site for about 75 new homes on the edge of the urban area of Stubbington. Our client is strongly of the view that these material changes of circumstances at the site, coupled with the need for the Council to meet its local housing target of a minimum of 514 homes per annum, justify the allocation of the site for about 75 dwellings in the local plan.
- 1.3** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 – 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Remove Strategic Gap designation from Land West of Old Street, Stubbington.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local

housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national

guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature

and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

- 2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

- 2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed

need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham

to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such it's preparation is premature.

2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities

for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading (as confirmed by the Government's announcement on 16 December 2020 that the Council's annual housing target is to remain at 514 homes per annum).

3. It is not Effective:

- 2.28 The Council has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.29 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.30 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be

included as additional housing to the minimum 514 hpa.

3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
 4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.31 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.32 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.33 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – the spatial extent of 'landscapes' should be defined here to avoid ambiguity. While the landscape as a whole could be enhanced by carefully designed development proposals, the principle of landscape change within the site itself should be established. If this requirement to 'conserve and enhance landscapes' is applied to the landscape features and character of a potential development site, then this requirement is excessive and unachievable once the landscape 'change' from an undeveloped site to a developed site is taken into account. Either the spatial extent of 'landscapes' should be defined or the requirement to 'enhance landscapes' be removed from the policy.

3.16 Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.17 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.18 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS2: Development in Strategic Gaps

3.19 Under the heading 'Why we need this policy', Paragraph 3.43 of the Publication Local Plan states that "Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities". The introduction of 'settlement character' into the policy wording is not consistent with the evidence base which confirms at paragraph 2 in Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps that the "primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities".

3.20 Strategic Policy DS2: Development in Strategic Gaps should only apply to land which provides a spatial function to maintain separation of settlements and define settlement pattern rather than defining settlement character. Land west of Old Street, Stubbington does not contribute to the spatial separation of settlements, therefore Strategic Policy DS2 should not be applied to this land.

3.21 This view is supported by the Inspector for the appeal relating to Land west of Old Street, Stubbington APP/A1720/W/18/3200409 who stated that:

"The Meon Gap lies between Fareham/ Stubbington and the Western Wards/Whiteley. Policy CS22 requires the integrity of the gap to be maintained and the physical and visual separation of settlements to be respected. In terms of separation of settlements there is no dispute that there would be no diminution either in physical or visual terms if the development were to go ahead. The policy indicates that the gap boundaries will be reviewed to ensure that no more land than necessary is included in order to maintain gap function". (our underlining)

3.22 The Inspector goes on to state:

"It should be remembered that gap policy is a spatial tool. The Council referred to the role of the gap in maintaining the character or setting of Stubbington. This is considered in the 2017 LCA where the strategic gap designation is reviewed. However, the document makes clear that its purpose is to consider what role the landscape plays within the strategic gaps. It is not intended to examine the designation criteria, or the broad areas identified. This is important to note because it is landscape rather than spatial considerations that are key to settlement character and setting. The character and setting of Stubbington is not pertinent to gap designation or function in policy CS22".

3.23 The Inspector concluded:

"I appreciate that a review of gap boundaries was undertaken in 2012 and that no changes were recommended in relation to the land immediately adjacent to Stubbington. However, for the reasons I have given I do not consider that the proposed development of the appeal site would adversely affect the integrity of the Meon Gap". (our underlining)

3.24 For this reason, Strategic Policy DS2 should not apply to Land west of Old Street, Stubbington, because it has been confirmed that this land does not contribute to the function of the Strategic Gap. The Meon Valley is protected by many environmental designations which prevent development into this area from the Fareham side of the valley. The designated valley floor of the Meon Valley maintains separation of settlements to an extent that an adequate gap is maintained without the inclusion of Land west of Old Street, Stubbington within the Strategic Gap. Fareham Policy CS: 22: Strategic Gaps, states that "In

defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation." It is therefore unnecessary for Strategic Policy DS2 to apply Land west of Old Street, Stubbington.

3.25 At paragraph 7 of Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps states that "Where it is considered that there is capacity to absorb more development within the Fareham-Stubbington Strategic Gap, GI mitigation will be required, to a greater or lesser extent depending on the scale and nature of any development". Again, at paragraph 11 of the chapter 4 summary the Technical Review states "The ability to absorb development into the landscape exists, without compromising the integrity of the Gap function, again on the understanding that the settlement edges must include appropriate Green Infrastructure".

3.26 We submit that there is similar potential within the Meon Gap where the Gap is significantly wider than is the case for the Fareham-Stubbington Strategic Gap. This is particularly the case for Land west of Old Street, Stubbington where advance planting and green infrastructure has already been implemented during 2019 and is establishing well. This will continue to develop and establish a wooded edge to the Meon Valley, providing separation between the Meon Valley and Land west of Old Street, Stubbington. This would reinforce the wooded edge characteristics of settlements which are a feature throughout Fareham Borough, as referred to within the Fareham Borough Gap Review 2012, which states "The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap". In the case of Land west of Old Street, Stubbington the advance planting will create a wooded edge, providing a strong boundary between the site and the Meon Valley (stronger than is the case for the older housing at Hill Head where rear garden boundaries are visible from the Meon Valley) and in so doing it would be more consistent with the character of the settlement edges of the Borough. These green infrastructure enhancements already implemented will bring benefits to the biodiversity of the Meon Valley through enhanced planting and management of the existing farmland.

Policy DS3: Landscape

- 3.27** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.28** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council has created a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.29** However, if it is held that Policy DS3 should not be deleted, the following comments apply:
- 3.30** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.31** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.32** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.33 The local plan evidence at page 50 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not include the requirement for the landscape to be “protected and enhanced”. The requirement to “protect and enhance” the landscape is ambiguous because it is not clear whether it is intended to refer to the landscape of the ASLQ as a whole or if it would apply to a potential development site, within which the requirement to enhance is excessive and unachievable once the landscape ‘change’ from an undeveloped site to a developed site is taken into account. As an example, a development could provide enhancement to the ASLQ landscape through restoration of landscape features or new green infrastructure, but at a site scale the landscape ‘change’ from an undeveloped site to a developed site is unlikely to result in ‘enhancement’.

3.34 Each of the Candidate Areas of Special Landscape Quality have been assessed against the GLVIA3 Box 5.1 criteria, which is an accepted tool to assess landscape value. Land west of Old Street, Stubbington is located within ASLQ 4: Meon Valley and in LLCA 6.1c which is described as within the Landscape Assessment (2017) as:

“On the eastern side of the valley floor, area 6.1c is occupied by similar land uses but with greater variation in field pattern and enclosure. The area comprises a mosaic of smaller-scale pastures bounded by strong hedgerows and trees (particularly within the northern and southern ends of the area), two small-scale enclosed tributary valleys and some larger fields with a more open, denuded character within the central section around the Crofton Manor Equestrian Centre. Together with the adjacent horticultural glasshouses and other commercial operations, this lends a localised fringe character to the landscape but does not detract significantly from the essentially rural characteristics of the overall area”.

3.35 At Figure 3.3 each of the LCA within Fareham is assessed against the GLVIA3 ‘valued landscape’ criteria. Figure 1.3 explains the criteria in more detail, defining a ‘High match’, ‘Good match’, ‘Fair match’ and ‘Partial match’.

3.36 Land west of Old Street, Stubbington is located within LLCA 6.1c which is assessed as a ‘good match’ for all criteria, except ‘Associations’ which is a ‘partial match’. Figure 3.2 defines a ‘Good match’ as *“The area’s scenic quality and condition are both relatively high. It has a generally unspoilt, intact and coherent character with a good level of topographic and visual unity. It has several*

features of note, including natural and cultural designations, and is valued for its recreational opportunities. There are some detracting influences, but these do not generally intrude”.

3.37 We submit that the assessment of LLCA 6.1c has attributed a higher value for the ‘Recreational value’ criteria than can be justified. The southern half of LLCA 6.1c does not have any means of public access so can not be described as being ‘valued for its recreational opportunities’. In the northern half there are infrequent public footpaths and the Crofton Manor Equestrian Centre, neither of which justify the area being defined as ‘valued for its recreational opportunities’. Instead, the term ‘Recreational value is relatively limited’ is a fair reflection of the recreation provision within LLCA 6.1c as a whole, which is the definition applicable to a ‘Partial Match’.

3.38 Landscape quality (condition) is also assessed as a ‘Good Match’, despite the Landscape Assessment (2017) acknowledging its ‘denuded character’ and ‘fringe character’. This character is a feature of LLCA 6.1c, and for this reason the ‘Good Match’ definition as ‘generally unspoilt, intact and coherent character’ is not justifiable. A ‘Fair Match’ is most applicable to LLCA 6.1c, defined as “condition is moderate to good. It is generally intact and coherent with some unspoilt characteristics”.

3.39 The criteria of ‘Conservation interests’ is also assessed as a ‘Good Match’, defined as “It has a number of features of note, including natural and cultural designations”. We submit that ‘Fair Match’ is a more balanced description of LLCA 6.1c, defined as “some features of note which may include natural or cultural designations”.

Policy HP1: New Residential Development

3.40 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.

3.41 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.42 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.43 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.44 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.45 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.46 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and

- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.47 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.48 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.49 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.50 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.51 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.52 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.53 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.54 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the level of need for such units in the Borough – in the absence of this it is not clear whether the level of provision sought by this policy is appropriate.

Policy HP9: Self and Custom Build Homes

3.55 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.56 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). The total number of homes to be delivered by Welborne has reduced considerably over the last five years so this level of requirement should be reviewed as it will not yield the number of self or custom build homes as was anticipated at the time the Welborne Plan was prepared. Strategic allocations

such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.57** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.58** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Proposed housing allocation of Land West of Old Street, Stubbington for about 75 dwellings

- 3.59** In 2019 the appeal Inspector concluded that the development of the site would not adversely affect the integrity of the Meon Valley Strategic Gap. Clearly, therefore, the site should be excluded from the Strategic Gap boundary. The boundaries of the strategic gap were defined in relation to Core Strategy Policy CS22 and they were drawn in the context of the understanding of development needs at that time – an understanding which no longer reflects current reality, that being a very substantial shortfall in housing land supply and the preparation of the PLP by the Council which plans to under-provide housing against the Council's annual housing requirement of 514 homes per annum. Strategic Gap boundaries must be reviewed as part of the process of allocating additional sites for housing in this local plan, and our client's site west of Old Street, Stubbington should be removed from the Strategic Gap.

- 3.60** The 2019 appeal Inspector found that the West of Old Street, Stubbington site lay in an area of valued landscape. In this context, the value of the site's landscape has been re-assessed as part of our commentary on Policy DS3 above, against the GLVIA3 'valued landscape' criteria. As described, the site performs no better than as a Fair or Partial match against these criteria. When account is taken of the effect of the structural woodland planting undertaken over time, it is clear that development of the eastern part of the site will only have a minor impact on the wider landscape at most. Lying adjacent to the existing settlement of Stubbington, the introduction of development will appear entirely characteristic within the receiving landscape, while providing a strong, vegetated edge to the countryside in perpetuity. There is no doubt that the character of the developed part of the site would change, but that is no different for any greenfield development. There is no reason to assume that the site's development will be anything other than an attractive extension to Stubbington and one which is entirely congruous with its surroundings. The site's landscape containment has been enhanced through woodland planting which will both screen it from the Meon Valley and enhance its biodiversity.
- 3.61** Moreover, the western part of the site, beyond the woodland planting belt, is being used to provide mitigation habitat for Solent Waders and Brent Geese, offsetting development impact on low use SWBG sites elsewhere in borough. The segregation of this part of the site acknowledges this function and avoids its disturbance.
- 3.62** The West of Old Street site is also sustainably located for access to services and facilities and to sustainable transport modes (walking, cycling and public transport).
- 3.63** For all of these reasons, the Council is encouraged to allocate Land West of Old Street, Stubbington for about 75 dwellings. The site is controlled by a highly reputable local housing developer – Bargate Homes – which has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing session

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDICES:

Appendix 1 - Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

1.0 Introduction

- 1.1** The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash, identified within the emerging Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan).
- 1.2** The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road (our client controls all but the easternmost part of this site); and 3. Land East of Brook Lane and North of Warsash Road. A Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1) is attached at Appendix 1.
- 1.3** At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).
- 1.4** For the reasons set out in these representations, our client strongly supports the allocation of their three land interests as part of Policy HA1. However, their view is that amendments are required to the specific wording of this policy. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).
- 1.5** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.

1.6 The following representations utilise the same format as the Council’s response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HA1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B1c Which part of the Policies Map

2.4 Policy HA1 allocation site – Land North and South of Greenaway Lane, Warsash.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard

Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning

Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

2.9 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.

2.10 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.

2.11 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:

"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination." (PPG ID 2a-015-20190220).

2.12 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.

-
- 2.13 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.
- 2.14 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.15 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.16 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.17 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

2.18 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

2.19 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.

2.20 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a

significant matter.

2.21 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.22 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.23 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

2.24 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

2.25 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's

case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.26 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.27 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.28 As stated at B3.1 above, it is unclear whether the PLP has planned to

adequately accommodate unmet need from other authorities.

2.29 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.30 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.31 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.32 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum)

between 2026/27 and 2030/31; and

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8** This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9** The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10** The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.
- 3.11** The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can

be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.16 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.17 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

3.18 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).

3.19 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**

3.20 However, if it is held that Policy DS3 should not be deleted, the following comments apply.

3.21 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

3.22 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.

3.23 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HA1: Land North and South of Greenaway Lane

3.24 As set out in the Introduction to these representations, our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash. Our client therefore strongly supports Policy HA1 and the identification of their three land interests within this proposed residential allocation.

3.25 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road; and 3. Land East of Brook Lane and North of Warsash Road.

3.26 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

3.27 The outstanding matters relating to the outline planning applications are all close to being resolved, especially now that a solution has been agreed in relation to nitrogen deposition into the Solent. It is therefore anticipated that outline planning permission can be granted for all three sites in the near future. Our client then intends to proceed to detailed planning followed by construction stages in a phased but timely manner, such that all three sites are deliverable and can therefore contribute towards the Council's housing land supply position in the short-term.

3.28 Whilst our client supports Policy HA1 and the allocation of their land interests for residential development in principle, in their view the wording of the site-specific requirements contained within the policy requires some amendments, as explained below.

a) The quantum of housing proposed shall be broadly consistent with the indicative site capacity

3.29 Policy HA1 sets out an indicative yield for the allocation as a whole of 824 dwellings. This is supported and no changes are suggested to this site-specific requirement. Our client's three land interests could provide up to 366 dwellings when combined. This includes up to 100 dwellings on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); approximately 126 dwellings on Land East of Brook Lane and East of Lockwood Road (considering our client does not control the easternmost part of the site so cannot deliver all of the 'up to 157 dwellings' approved at the outline stage); and up to 140 dwellings on Land East of Brook Lane and North of Warsash Road. This represents almost 45% of the indicative yield.

b) Primary highway access should be focused on Brook Lane and Lockwood Road with limited access via Greenaway Lane where necessary, subject to consideration of the impact on the character of Greenaway Lane

3.30 This is not supported, particularly having regard to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane). The wording of this site-specific requirement, including the use of 'limited' and 'where necessary', could be

considered to preclude the provision of a primary vehicular access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane.

- 3.31** The wording of site-specific requirement b) is inconsistent with Figure 4.1 – Policy HA1 Indicative Framework Plan contained with the PLP. Figure 4.1 identifies 'Indicative Principal Vehicular Access' points into the HA1 allocation, which are indicated by purple arrows and includes the identification of a principal access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane, located in the north-west corner of the site. Figure 4.1 also identifies two further principal accesses further east along Greenaway Lane associated with other parts of the HA1 allocation (outside of our client's control).
- 3.32** The wording of site-specific requirement b) is also inconsistent with the Illustrative Masterplan that has been approved by the Council as part of the resolution to grant outline planning permission for Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) under Ref. No. P/19/0402/OA. The approved Illustrative Masterplan includes the provision of a primary vehicular access point from Greenaway Lane, located in the north-west corner of the site (in a similar location to the purple arrow shown on Figure 4.1 of the PLP).
- 3.33** The Committee Report relating to the outline application (dated 16 December 2020), discusses highways matters at paragraphs 8.46 to 8.51. It confirms that from a highway safety perspective, the proposed access from Greenaway Lane is acceptable subject to the imposition of planning conditions (requiring the construction of the access junctions and visibility splays in accordance with the approved plans) and financial contributions towards off-site highways works and a Travel Plan.
- 3.34** The Committee Report confirms that the Highway Authority is satisfied that a safe means of access can be provided and identifies this as *"...a significant material planning consideration."* In terms of the impact on Greenaway Lane as a result of the physical alterations proposed as part of the development, the Committee Report states that these *"...are not of a level that would adversely detract from the character of Greenaway Lane or justify refusal of outline*

planning permission." The Committee Report then makes reference to the decision of the Planning Inspectorate in relation to a previous scheme for the site (Ref. No. APP/A1720/W/19/3225866 dated 11 December 2019), in which the Inspector confirms at paragraph 42 that *"...it would be possible to secure complementary development of the Greenaway Lane frontage within the scope of the reserved matters. Furthermore, highways works, and any additional traffic generated by the development, would affect only a very short section of the lane which lacks the more rural character seen towards the east."* At paragraph 38 of the Inspector's decision, it is concluded that *"...no necessity for an alternative access has been demonstrated on highways grounds."*

3.35 On the above basis, it is considered that the wording of site-specific requirement b) is inappropriate and misleading in potentially precluding the provision of a primary vehicular access to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane. This would be inconsistent with the provisions of Figure 4.1 of the PLP, as well as the Council's recent resolution to grant outline planning permission and conclusions of the previous appeal Inspector.

3.36 Accordingly, the wording of site-specific requirement b) should be amended to state:

"b) Primary highways access should be in accordance with the broad locations of the 'Indicative Principal Vehicular Access' points shown on Figure 4.1."

c) The provision of vehicular highway access between development parcels without prejudice to adjacent land in accordance with Policy D3

3.37 This is supported and no changes are suggested to this site-specific requirement. Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative secondary vehicular link roads' which are identified by dotted grey arrows. Our client agrees with the indicative location of these secondary access points within the Policy HA1 allocation, insofar as they relate to their three land interests, although it should be noted some of these connections may be bought forwards as pedestrian/cycle links only at

the detailed planning application stage to avoid more than 100 units having direct access onto Greenaway Lane.

d) The provision of a continuous north-south Green Infrastructure Corridor between the northern and southern site boundaries that is of an appropriate scale to accommodate public open space, connected foot and cycle paths, natural greenspace and wildlife habitats that link the two badger setts and other species, and east-west wildlife corridors. Highway cross-over points shall be limited in number and width and include wildlife tunnels where necessary, in accordance with the Framework Plan

3.38 The provisions of this site-specific requirement are supported in principle. The outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.39 Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative wildlife link tunnels'. This includes one running north-south on Land East of Brook Lane and North of Warsash Road which is accepted.

3.40 Figure 4.1 also shows two tunnels on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane), both of which are shown running north-south. Whilst it is acknowledged that these tunnels are only shown indicatively on Figure 4.1, it is noted that the southernmost tunnel on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) should in fact be shown running east-west, so that it crosses and runs perpendicular (not parallel to) the 'indicative secondary vehicular link road' in this location, and so that it reflects the line of the green corridor running along the southern boundary of the land parcel. Otherwise, the provision of two tunnels within this part of the allocation is accepted, as is the indicative location and orientation of the northernmost tunnel.

e) The provision of pedestrian and cycle connectivity between adjoining land parcels, as well as providing connectivity with Warsash Road and nearby facilities and services

3.41 This site-specific requirement is supported in principle and the outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.42 It is noted that it is not possible to provide direct connectivity between the land within the HA1 allocation and Warsash Road to the south, as the boundaries do not immediately adjoin the road. However, the outline illustrative masterplans provide pedestrian and cycle linkages to Brook Lane, which in turn leads to Warsash Road and nearby facilities and services.

3.43 In relation to the development proposals for Land East of Brook Lane and North of Warsash Road, it has previously been proposed to provide a pedestrian/cycle link from the southern boundary of the site into the rear car park of The Victory Hall which fronts on to Warsash Road. However, this proposal was not supported by the relevant stakeholders and so has not been carried forward into the illustrative outline masterplan for the site.

f) Building heights should be limited to a maximum of 2.5 storeys, except for buildings which front onto Greenaway Lane and Brook Lane where building heights shall be limited to a maximum of 2 storeys

3.44 The first part of this site-specific requirement is not supported. It is considered that some elements of 3 storey development are appropriate on the allocation site, provided they are located sensitively in the central parts of the site and setback from the site boundaries, allowing them to be appropriately screened and for a buffer to be provided to existing adjoining land uses. This is consistent with the requirement for the efficient use of land as set out in the NPPF.

3.45 The second part of this site-specific requirement for buildings fronting Greenaway Lane and Brook Lane to be limited to a maximum of 2 storeys is accepted.

g) Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does

not impact on living conditions

3.46 This is not supported. The wording of this site-specific requirement suggests that any tree that is subject to a Tree Preservation Order (TPO) cannot be removed. This is not appropriate and is not justified, particularly in light of the vehicular link required through TPO woodland in the southern most portion of the allocation. It is possible that cases may arise where it is necessary to remove a tree even if it is subject to a TPO, for example if the tree is no longer in a good condition or if it poses a health and safety risk in the future.

3.47 The wording of this site-specific requirement should be amended to provide greater flexibility and should state:

"Where possible, existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living conditions, unless agreed in writing with the Local Authority."

h) A Construction Environmental Management Plan to avoid adverse impacts of construction on the Solent designated sites shall be provided

3.48 This is supported and no changes are suggested to this site-specific requirement.

i) Provide future access to the existing underground water and wastewater infrastructure for maintenance and upsizing purposes (included at the request of Southern Water)

3.49 This is supported and no changes are suggested to this site-specific requirement. These measures can be incorporated into the detailed design for the three land parcels controlled by our client to ensure that future access is provided.

j) The site is identified as a mineral safeguarded site (sand and gravel are likely to underlay site). A Minerals Assessment will be required prior to any

development in accordance with the Hampshire Minerals and Waste Plan (2013)

3.50 The justification and evidence in support of this site-specific requirement are unclear. From our review of the information available on Hampshire County Council's (HCC) website, including the HCC Minerals and Waste Plan (adopted 2013) and its associated online Proposals Map, the HCC Minerals and Waste Safeguarding in Hampshire Supplementary Planning Document (adopted February 2016) and the HCC Minerals and Waste Plan Minerals Consultation Area (2015), the land within the Policy HA1 allocation does not appear to be identified as a minerals safeguarded site or as having any potential to be underlain by any mineral resources.

3.51 Furthermore, this matter has not been raised during the outline planning stages for our client's land interests.

3.52 This site-specific requirement is therefore not supported and should be deleted in relation to the Policy HA1 allocation.

k) Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4 and NE3. In addition, the following site-specific infrastructure will be required:

i) Two junior football pitches on-site; and

ii) Off-site improvements to existing sports facilities

3.53 The wording of site-specific requirement k) implies that financial contributions will definitely be required. This wording should be amended to provide more flexibility, in the event that it is agreed between the relevant parties that contributions are not in fact required in relation to one or more of the matters referred to.

3.54 The provision of reasonable financial contributions towards education and transport are accepted in principle where a specific need is identified and at an appropriate level to be agreed between the relevant parties.

3.55 In terms of our client's three land interests, financial contributions towards

education and transport have been agreed in principle through the resolutions to grant outline planning permission, with Section 106 Agreements to secure these being agreed prior to the outline planning permission for each site being issued.

3.56 The reference in site-specific requirement k) to providing contributions towards health is not supported. The Committee Report relating to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) (Ref. No. P/19/0402/OA dated 16 December 2020) discusses this matter with regard to a request from the University Hospital Southampton NHS Foundation Trust for a financial contribution to provide services needed by the occupants of the proposed new dwellings. The Officer's comments at paragraphs 8.64-8.68 of the Committee Report are as follows:

"In considering the requests it is noted that the construction of houses does not itself lead to population growth. Officers consider that the need for housing is a consequence of population growth. Furthermore, there is no account in the representations, it seems, for the potential for the residents of the new development to be moving locally around the Borough or adjoining boroughs such that their residence locally is already accounted for by the current services and funding commissioned by the hospital...

...The length of time between sites being identified, planning permission being granted, and the houses actually being constructed and subsequently occupied is many years. The amount of residential development coming forward in the Borough which has not been reasonably foreseeable for a period of year is therefore very limited.

In January 2019 the NHS launched its new 10-year plan. This plan sets out how the NHS thinks it can overcome the challenges that the NHS faces, such as staff shortages and growing demand for services. This is to be achieved essentially by doing things differently and at no point does it refer to the need for new developments to provide for healthcare services by means of financial contribution such as that requested by the Trust.

For the reasons set out above, Officers do not consider that the contribution

sought by the Trust is necessary to make the development acceptable in planning terms and thus the tests for planning obligations as set out above are not considered to have been met. Furthermore, given the adopted policy framework it is considered that in the absence of the contribution, the application does not fail as a consequence as this issue alone would not justify a reason for refusal, which it must do in order to make the contribution necessary to make the development acceptable in planning terms and meet the test for a planning obligation."

- 3.57** The same conclusions should be made in terms of site-specific requirement k) and the reference to health should therefore be deleted.
- 3.58** Finally, the requirement to provide two junior football pitches on-site is not supported. During the time that developers in the 'Warsash Cluster' have been in discussion with FBC in relation to their land interests, the Council has not been able to justify why on-site provision is needed and appears to have been an aspiration which has not been properly considered. The provision of sports pitches in this location is not appropriate, particularly having regard to the likely noise and traffic implications associated with this use, as well as the presumed need for a complementary pavilion. Site-specific requirement k) i) should therefore be deleted.
- 3.59** In terms of the requirement to provide off-site improvements to existing sports facilities, this is inconsistent with the financial contributions that have been agreed as part of the resolutions to grant outline planning permission for our client's three land interests and this requirement has not been raised by FBC as part of this process. The wording of site-specific requirement k) should therefore be amended to provide more flexibility, so that it cannot be interpreted that an off-site financial contribution towards sports facilities is required in relation to all land parcels within the Policy HA1 allocation (such as our client's three sites), but so that this can be sought in relation to the other parcels of land if justified and agreed between the relevant parties.
- 3.60** Taking into account all of the above, the wording of site-specific requirement k) should be amended to state:

"Infrastructure provision or contributions including but not limited to education and transport may be necessary in line with Policy TIN4 and NE3. In addition, contributions towards off-site improvements to existing sports facilities may be required."

Figure 4.1 – Policy HA1 Indicative Framework Plan

3.61 Figure 4.1 includes the identification of areas referred to as 'open space or development options. Development not on both', which are marked by a light green diagonal hatching. The only areas annotated as such on Figure 4.1 relate to our client's interest at Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) – one is shown at the western end of the site frontage with Greenaway Lane and the other running north-south in the centre of the site.

3.62 These annotations are not necessary and should be deleted as their intended purpose is unclear. The agreed illustrative outline masterplan for this site shows that development will be set back from Greenaway Lane with a linear area of public open shown across the entire site frontage, which in turn connects with further public open space shown running north-south through the centre of the site.

Policy HP1: New Residential Development

3.63 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.64 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.65 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.66 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.67 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.68 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.69 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.70 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.71 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.72 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.73 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.74 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.75 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.76 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.77 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.78 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.79 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.80** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.81** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDIX 1
Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND AT BROOK AVENUE, WARSASH

**ON BEHALF OF
ANTHONY AND LISA KING AND ANDREW AND MELANIE NORRIS**

**TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED)
PLANNING AND COMPULSORY PURCHASE ACT 2004**

Prepared by: Jeremy Gardiner & Trevor Moody

3.0 Specific Proposed Changes **11**

4.0 Participation at the examination hearing sessions **27**

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our clients, Anthony and Lisa King, and Andrew and Melanie Norris, who own a potential housing site at Brook Avenue, Warsash. For the reasons set out in these representations, our clients are strongly of the view that their land should be allocated for housing development in the local plan.
- 1.2** These representations are consistent with, and build on, the previous representations which were submitted on behalf of Anthony and Lisa King by WYG in relation to the Fareham Draft Local Plan 2036 Supplement in February, 2020. Those previous representations are re-submitted with this representation for ease of reference.
- 1.3** The following representations utilise the same format as the Council’s response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

	Agent	Client
Title	Mr	Anthony and Lisa
First Name	Jeremy	King and Andrew
Last Name	Gardiner	and Melanie Norris
Job Title	Senior Director	c/o Agent
Organisation	Pegasus Group

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 - 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Former Policy HA2 allocation site Newgate Lane South, Employment allocations Policies E2 and E3.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020.

The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes

in the borough in any event, but the Council chose not to follow this national guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

- 2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

- 2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of

the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground –

as such it's preparation is premature.

- 2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.
- 2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PFSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits.

The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not Effective:

- 2.28 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

- 2.29 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

- 2.30 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.
- 2.31 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PFSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the

achievement of sustainable development.

4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.32 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of our clients' site at Brook Avenue, Warsash.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.33 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.34 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of our clients' land at Brook Avenue, Warsash.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8** This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9** The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10** The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.
- 3.11** The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.
- 3.12** Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.16 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.17 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

3.27 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (ASLQ) as shown on Figure 3.3 of the plan. This proposed designation affects our clients' site at Brook Lane, Warsash and all immediately surrounding land except (curiously) the Egmont Nursery site, Brook Avenue, which is a proposed allocation in the PLP and which has outline planning permission for 8 dwellings.

3.28 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. In our view, **this creation of a potentially irrelevant layer of policy is unnecessary and Policy DS3 should be deleted.**

However, if it is held that Policy DS3 should be retained in the plan, then the following comments apply:

3.29 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

-
- 3.30 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.31 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HP1: New Residential Development

- 3.32 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.
- 3.33 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

- 3.34 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.35 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.36 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.37 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.38 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.39 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.40 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.41 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.42 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.43 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.44 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.45 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

- 3.46 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on many of the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

- 3.47 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.
- 3.48 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.56 This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged

"to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.57 This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Appendix C:

- 3.58 The purpose of the inclusion of the Local Ecological Network Map at Appendix C is not understood. It includes the identification of land as "Network Opportunities". This does not appear to have a basis in the policies of the PLP. The plan is difficult to interpret given its scale but all or part of our clients' site may be identified as a Network Opportunity on this plan. This is not explained. This appendix should be deleted, as happened to a similar plan appended to the Regulation 19 Chichester District Local Plan.

Proposed housing allocation – land at Brook Avenue, Warsash

- 3.59 Our clients' site is identified at Appendix A of the accompanying February 2020 representations. It is SHELAA Site ID 3050 which is assessed as a "Discounted Housing Site" on page 161 of the Council's most recent SHELAA dated September 2020. Here it is confirmed that the site has a gross area of 2.04ha and an estimated yield of 55 dwellings. The site's "Suitability" (for development) was assessed as follows:

"Constraints: Agricultural Land Grade 3b, Within 500m of SPA, Within 500m of SAC, Within 500m of Ramsar, Within 500m of SSSI, Countryside.

Highways / Pedestrian access: Access from the south would be unacceptable as the link to Brook Lane is narrow. Access from the north onto Brook Avenue is considered feasible. Footway provision along Brook Avenue would be required to Brook Lane.

Conservation Comments: No known constraints.

Noise / Air Quality Assessment: No issues.

Archaeology: Site not within identified area of archaeological potential.

Ecology Comment: The site contains an improved grassland field with boundary vegetation, which could be utilised by foraging and commuting bats, reptiles, dormice and breeding birds. Issues arising from increased recreation within the SINC will need to be considered. Protection and enhancement of the boundary vegetation is required.

Accessible Facility Types 6/10: Within 1600m of a Secondary School, within 800m of a Convenience Store or Supermarket, within 400m of a High Frequency Bus Stops, within 800m of a Accessible Green or Play Space, within 1200m of a Primary School, within 1600m of a Town/District or Local Centre.

Reason for Discounting: Development of scale promoted would not be in keeping with the settlement pattern.

Is the site suitable? No

Is the site available? Yes

Is the site considered achievable? Yes"

Our comments:

The site is considered to be available and achievable for housing, but not suitable. This appears to be an illogical conclusion from the assessment

provided, particularly when account is taken of other planning permissions and allocations in the immediate area.

Proximity to the SPA/SAC/Ramsar and SSSI are not objections in principle to development in this location – as evidenced by the planning permission for housing at Egmont Nursery to the west of our clients' land (so closer to European designated sites) and the allocation of the "Warsash cluster" of housing sites north and south of Greenaway Lane a short distance to the east.

Access is available from Brook Avenue to the north.

There are no conservation, archaeology, noise or air quality constraints.

The site offers some ecological potential but this can be mitigated.

The site is sustainably located within walking distances of secondary and primary schools, local services and facilities including convenience shopping and a high frequency bus route.

Therefore, it appears that the only reason it was not allocated for housing was because the estimated yield of 55 dwellings was held to be not *"in keeping with the settlement pattern"*. The site's area is 2.04ha, so a scheme of 55 dwellings would be at a density of about 27 dwellings per hectare, a relatively low density.

To the east of the site are consolidated frontages of suburban housing fronting Brook Lane and Brook Avenue, but to the west housing along Brook Avenue is of lower density and is more sporadic.

In this context, it is suggested that the density of housing development should reduce east to west across the site, that the site should be allocated for "about 25 dwellings", but that its capacity should be confirmed through a detailed assessment of its constraints and the preparation of a feasibility layout.

For these reasons, the Council is encouraged to allocate our clients' site at Brook Avenue, Warsash for about 25 dwellings. Our clients have received many expressions of interest in their land from housing

developers, such that the site is deliverable in the short term and can make a modest though important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

**Representations towards the Fareham
Borough Draft Local Plan 2036 Publication
Draft (Regulation 19) Consultation on Behalf
of Persimmon Homes (South Coast)**

December 2020

1. Introduction

Persimmon welcomes the opportunity to comment on the Fareham Draft Local Plan 2036 (DLP) Publication (Regulation 19) consultation.

This letter is set out in sections as summarised below:

- Section 2 sets out our response to Duty to Cooperate issues
- Section 3 sets out our policy specific responses
- Section 4 sets out our response in relation to Omission Sites

2. Duty to Cooperate

The Duty to Cooperate places a legal duty on local planning authorities to engage constructively, actively and on an ongoing basis to maximise the effectiveness of Local Plan preparation in the context of strategic cross boundary matters, including housing.

Planning Practice Guidance recommends that authorities should produce, maintain, and update one or more Statement(s) of Common Ground, throughout the plan-making process. The Council has unilaterally produced a 'Statement of Compliance with the Duty to Co-operate' which sets out how the Council claims to have addressed the duty to cooperate, including in relation to addressing the unmet housing need of its neighbouring authorities. This is not an agreed Statement. It is noted that there is little to no explanation within the Statement as to what cross boundary discussions have taken place since the Council has significantly altered its approach with regards to housing need (as detailed below). In Persimmon's view, this information is absent because neighbouring authorities, in particular Portsmouth and Gosport, will not be supportive of Fareham's approach.

As mentioned above, the Council's Regulation 19 consultation document is significantly different from the Regulation 18 draft in terms of its approach to housing. This is largely as a result of it applying the lower Local Housing Need (LHN) as derived from the Government's proposed new Standard Methodology, which has not been approved. The Regulation 18 version of the Plan included a number of Strategic Growth Areas that were identified, in part, to meet the housing needs of neighbouring authorities of Gosport and Portsmouth. These Areas have now been deleted, and do not feature in the Publication Plan.

The Council's decision to use the new Standard Methodology LHN in order to take advantage of lower housing numbers is premature, and is at odds with the approach being taken by nearly all other Local Planning Authorities developing Local Plans in the sub-region, including Gosport and Portsmouth.

It is understood that the SGAs would meet at least 1,000 dwellings from Portsmouth's unmet needs, alongside a proportion of Gosport's (quantum not published). However, the Publication Plan suggests that unmet need accommodated by the Plan will only equate to 847 dwellings. By Fareham choosing to use the draft new Standard Methodology and reducing its housing site allocations as well, the scope for the Plan to pick up the housing needs of these neighbouring council areas has been significantly curtailed.

It is Persimmon's view therefore that, given the significant change in approach by Fareham Council, the joint working that it has undertaken on housing issues to date has been fundamentally undermined to a point where it can only be concluded that Council has failed the duty to cooperate.

2. Policy Specific Comments

DEVELOPMENT STRATEGY

Strategic Policy DS1 Development in the Countryside

Policy DS1 provides the policy basis for the delineation of settlement boundaries. In the context of our comments below, notably in relation to not meeting housing need, omission sites and the delineation of Strategic Gaps, the Council should amend the settlement boundaries to allow additional development to come forward.

With regards to the criterion d) of Policy DS1, an allowance for new or replacement building, conversion and/or extension of a school is welcomed. However, the Policy appears to limit re-provision to existing sites shown on the Policies Map. As set out in greater detail in the our response to Policy DS2 and the Omission Site section, discussions are on-going with the Meoncross school to facilitate expansion of the car park and/or playing fields in the short term. The potential relocation of the school to other land within Persimmon's interest at Cuckoo Lane over the longer-term is also being explored. As currently drafted, by strictly limiting development to within an existing educational facility, the Policy would prevent such future improvements and the possible relocation of Meoncross School.

Strategic Policy DS2 Development in Gaps

The Council has commissioned Hampshire County Council to review its Strategic Gaps. The County's methodology for this review is set out in the Technical Review of Areas of Special Landscape Quality and Strategic Gaps (September 2020). This applies 'Primary Measures' (i.e. physical and visual separation) and 'Secondary Measures' (i.e. Green Infrastructure Provision) to define the gaps. We support the inclusion of physical and visual separation as a means of determining the gap boundary, but we see no justification for including the secondary measures as this is outside of the scope of the role of a gap. In any case, Green Infrastructure is an issue that is dealt with separately under Policy NE9 of the draft Plan.

The following commentary on this policy considers each of the Strategic Gaps before comments are made on the content of Policy DS2 itself.

The Fareham-Stubbington Gap

As set out in the recommendations of the Gap Review paper (Chapter 4: Conclusions and Recommendations, Paragraph 10): *'there exists some opportunities for development to be absorbed within the Stubbington-Fareham Strategic Gap, subject to scale and future detailed design, without compromising its Gap function...'* It is surprising then that the Council has not examined this potential in greater details as part of its Publication draft Local Plan, particularly given that the most recent Regulation 18 Local Plan consultation proposed a Strategic Growth Area (SGA) within this gap as a means of accommodating growth.

It is also surprising that the Gap Review Paper does not adequately consider the influence of the Stubbington by-pass on the Fareham-Stubbington Gap. Paragraph 3 of Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap states that: *'As the Bypass is currently under construction and its alignment marked out, it is possible to see how it might affect the sense of separation between Fareham and Stubbington.'* The report also states that it is too early to understand the full impact that Stubbington Bypass will have on the landscape character and development pressures of the Gap. This second assertion is contested. Given that the by-pass construction has progressed significantly, and that by-pass proposal has been subject to landscape assessment (including through the ES associated with the application), there is sufficient information available to allow for a robust assessment of the impact of the by-pass on the gap and the landscape to be carried out. A review of the landscape and gap evidence should be carried out prior to submission of the Plan for examination.

There can be no doubt that the by-pass will have a considerable influence on the Fareham-Stubbington Strategic Gap - effectively splitting it two. Once the by-pass is complete, it will form a strong defensible boundary, which will make the difference in the character between areas north and south even more apparent than it is already. This difference in the character requires considered in the Local Plan and its evidence base.

Land to the north of the bypass route is considerably more open in character, with large open fields with limited boundary planting providing prominent views north from the bypass toward the southern urban edge of Fareham, which is well defined by Rowan Way. This area is characterised by a strong sense of tranquillity, and is a much more sensitive landscape that is more befitting of Gap designation in accordance with the Council's own methodology. Land to the south of the bypass, however, comprises considerably more urban influences as demonstrated by existing development along Ranvilles Lane / Titchfield Road, the cemetery south of Oakcroft Land and development around May's Lane / Peak land (including where the urban area of Stubbington protrudes into the gap). This observation is supported by the detailed analysis of gap study area 7a (see Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap, para 8) which states that:

*'There exists the potential to **make modifications to the settlement boundary of North Stubbington: to extend the boundary to run along Oakcroft Lane**, as the isolated field that sits aside Crofton Cemetery, does not protrude into the landscape beyond the current Northern and Western edges of Stubbington. Largely sitting behind a mature line of Poplars also helps this isolated field absorb some development (subject to detail design), **without risking the integrity of the Gap, as a whole.**'*
(Persimmon's emphasis)

Paragraph 11, Bullet 2 of Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap of the Gap Review evidence reconfirms the limited role that the area to the north west of Stubbington, south of Oakcroft Lane and east of Ranvilles Lane plays as a gap. The Gap study states that this area has *'the ability to absorb development into the landscape exists, without compromising the integrity of the Gap function'*. The Council will be aware of the planning application within this part of the gap (LPA Application Reference: P/20/0522/FP). This application comprises 209 new homes a considerable area of land to the north of the housing and to the south of the by-pass for ecological purposes. The Site Plan is attached to these representations at Appendix 1. The application is a resubmission of a planning application that addresses technical and design issues raised by the Council previously. It is understood that the application is due to be considered by planning committee in January 2021.

One key consideration when reviewing the boundary of a gap is the consideration that no more land should be included in the gap than is necessary (see adopted Core Strategy Policy CS22, Fareham Borough Council Gap Review 2012 and South Hampshire Strategy 2012). This concept is reiterated in the Gap Review Paper as 'minimum land take'. In light of the above, it is Persimmon's view that the gap evidence should be reconsidered with areas north and south of the by-pass assessed separately to take account of the by-pass. For reasons set out above, and in accordance with the Gap Review methodology, it is considered that a review of the evidence would indicate that the land north of the by-pass should be retained as gap and land to the south should be deleted from the gap designation. Retaining a gap to the north would preserve a c. 800m gap between the by-pass and the southern urban edge of Fareham, which is described in the Gap Review Paper as being *'moderate-large gap'* of a *'good distance'* that *'gives the traveller time to experience the countryside after leaving one settlement before joining another.'* Retaining a gap of adequate width in this location is particularly important given the role Peak Lane plays in providing a well utilised north-south link between Stubbington and Fareham.

With regards to land to the east of Stubbington, Paragraph 11, of Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap of the Gap Review indicates that there is very little opportunity to absorb development in this corridor but that advanced planting along the eastern edge of the settlement would be beneficial. Persimmon Homes have interests in this area (as discussed in detail later in these representations). In summary, the proposals include new residential development, significant new strategic planting and open space along the eastern edge of the site. Discussion are on-going with the

Meoncross School to facilitate expansion of the car park and playing fields in the short term and the potential relocation of the school to other land within Persimmon's interests over the longer-term.

In light of the our comments set out above It is considered that the Fareham-Stubbington Strategic Gap should be redrawn so that land to the south and west of the by-pass is removed from the gap.

Whilst not a gap issue per se, the emerging and previous Local Plans, have tended to avoid allocating any significant growth on the periphery of Stubbington. Sensitively redrawing the gap boundary as suggested above will allow for much needed sustainable development housing to come forward to support the housing aspirations of those wish to live in or remain living in Stubbington.

The Meon Strategic Gap

As touched upon above, the function of a Strategic Gap is to prevent the coalescence of separate settlements. Land to the west of Stubbington is identified as a gap but there is no settlement to the west of the Stubbington that requires protection from coalescence. With regards to Strategic Gap Study Area 6, it is noted that the Gap Review study states that this gap is provided to ensure there is no coalescence between Stubbington and Titchfield along Titchfield Road. Whilst this northern most extent of this study area may serve this purpose, the central and southern parts of the Study Area 6 play no role whatsoever in preventing coalescence. This is recognised in Paragraph 13 of Chapter 4: Strategic Gaps SG 1: The Meon Gap of the Gap Review Study. Nonetheless, the Study recommends that the Gap is retained in this area due to: high levels of tranquillity, its role in providing separation of Portsmouth and Southampton, and to recognise the potential longer-term settlement expansion southwards from Titchfield and South Westwards from Hook. Based on the Council's Gap Review methodology, these are not adequate reasons to include this land within the gap.

A more logical delineation of the gap, which would ensure that no more land than necessary is included within it, could be to end its southernmost extent at Crofton Manor Equestrian Centre where the transition from countryside to urban (as part of Stubbington) becomes apparent. As recognised in the Gap review study, much of the land to the south of the Equestrian Centre is subject to protection under draft Policy DS3 (as discussed below), and ecological constraints which provide adequate protection against inappropriate development in this area. A gap is therefore not necessary.

General Comments on Policy DS2

Notwithstanding our comments above, in our considered view, Policy DS2 is too restrictive. There may be a point within the plan period, for example where the Council is unable to demonstrate a sufficient five year housing land supply, where additional housing may be required over and above those sites identified in the Plan. The Council has persistently struggled to demonstrate a sufficient five year housing land supply in recent years so flexibility in the Policy is required.

As demonstrated through the Council's Regulation 18 draft Plan, a sustainable location for such development may be in the Strategic Gap between Stubbington and Fareham. As such, the Policy should include additional wording to allow for appropriate and sustainable development in the Strategic Gap in such circumstances where housing supply needs to be increased.

The Policy also seeks to prevent development in Strategic Gaps that may significantly affect its 'integrity' and the 'distinctive nature of settlement characters'. This is a highly subjective policy criteria that will be challenging to interpret by decision-makers and applicants alike. The reference to 'integrity' and the 'distinctive nature of settlement characters' should be deleted from the Policy. The function of a Strategic Gap is to prevent the coalescence of separate settlements, which can be achieved through assessment of the impact of a proposed development on the physical and visual separation of settlements. The other policy criteria are superfluous.

In light of the above, it is considered that the Strategic Policy DS2 - Development in gaps and delineation of the Gap as shown on the draft Policies Map, should be redrawn as set out above. If this is not the case the Policy cannot be said to either justified or effective and is therefore unsound.

Strategic Policy DS3: Landscape

Policy DS3: Landscape identifies a number of Areas of Special Landscape Quality (ASLQ), including the Meon Valley. This is new Policy that does not form part of the adopted Local Plan. The first part of this Policy seeks to significantly restrict development in the Meon valley area. However, considering that the Council has successfully defended the Meon Valley area from a number of hostile planning applications in the recent past without this Policy in place, the justification for it is questionable. Given the prohibitive nature of Policy DS3, the development potential of Site 5 (Cuckoo Lane) for housing and new school provision, will unlikely be realised unless the site is allocated for development in the Local Plan and/or the site is excluded from the Meon Valley ASLQ designation.

HOUSING POLICIES

Strategic Policy H1 Housing Provision

As mentioned in the Duty to Co-operate section above, the Council is applying the Government's former draft Standard Methodology to arrive at its LHN (403 dpa) as opposed to the current Standard Methodology (514 dpa). The draft Standard Methodology is not Government Policy, it is only a consultation draft. The Government has recently (16th December 2020) released revised LHN figures that indicate that the Council's baseline LHN will increase to 514dpa. This increase LHN to exactly the same figure as per the current Standard Methodology. This newly published data clearly undermines the Council's premature decision to use the lower LHN figure. It is also noted that when the current and new LHN figures for Gosport and Southampton are considered both Councils are facing an increase in LHN of 106 dpa and 315 dpa, respectively. This is significant as both of these Authorities may need to look to Fareham to accommodate unmet housing needs. This will place even greater pressure on Fareham Borough Council to increase its housing requirement set out in Policy H1. For completeness, Portsmouth's LHN remains unchanged between the two data sets.

Notwithstanding, our concerns that the Council has failed the legal test with regards to the duty to cooperate, Policy H1 cannot be assumed to be sound as undershoots current and emerging LHN. The Plan cannot therefore be considered consistent with national policy and it is not positively prepared. Should the Council seek to amend its housing requirement (for example using the current Standard Methodology) and make consequential changes to its supply sites, re-consultation on a revised Regulation 19 Plan will be necessary.

Policy H1 includes an estimated 1,224 windfall dwellings. The Council's Housing Windfall Projections Background Paper (June 2020) does not provide a detailed breakdown of which sites are being considered as windfall. The Council's figures cannot therefore be scrutinised. Until such time as the Council publishes this detail underpinning the windfall allowance, this element of the supply should not be counted towards the Council's housing requirement.

The Policy also looks to implement a stepped housing requirement, which backloads housing delivery towards the latter part of the Plan period. This approach is at odds with the NPPF's objective to boost the supply of housing and appears not be justified by the expected rate of delivery of sites as set out in the summary housing trajectory in Appendix B of the Plan. For example, in the first period (2021/22 and 2025/26) the Council proposes a requirement of 2,250 dwellings (averaging 450 dwellings per annum). However its housing trajectory suggests that 3,085 dwellings will be delivered, which is equivalent to 617dpa. As such, Policy H1 should be expressed as an average requirement; it should not be stepped.

The Policy also sets out that approximately 428 homes will be delivered on specified brownfield sites and/or regeneration opportunities in Fareham Town Centre. In some cases deliverability, viability availability (i.e. in existing use) is not assured (notably sites FTC2-5). Whilst Local Plans should be aspiration, they should also be deliverable. Allied to above, a further 1,327 homes are identified on Housing Allocation sites (i.e. allocation prefixed with a HA reference). However, a number of these sites are rolled forward allocations from the current adopted Local Plan, and in some cases (i.e. HA29 and HA30) are sites that formed part of the Western Wards growth area that were originally identified

in the 1970's, but have failed to be delivered. As such, it is questionable whether the Council has properly assessed deliverability / developability of some of the sites comprising its supply. It is advisable therefore that the quantum of housing expected from some of the questionable supply sites should not be counted against the housing requirement in the Plan, and alternative sites (such as those set out in the Omission Sites section) should be identified to ensure the Council's housing requirements are met. In addition to the above, the deliverability issues associated with Welborne are well documented. Recently it is understood that due to delays in the site coming forward, the Council has lost external funding to deliver critical highway improvement works. This further underscores the challenges associated with this site. The Council would be well advised to take a highly cautious approach when seeking to include housing supply from Welborne. The draft Plan currently includes 4,020 dwellings as part of the housing supply. In light of the above, this figure is considered to be highly optimistic and should be revised downwards.

Notwithstanding, our concerns regarding the Council's choice of LHN, this figure should be regarded as the starting point for developing the Plan's housing requirement. Councils are advised through national planning policy/ guidance to consider whether any adjustments should be made to the LHN figure to account for other factors such as economic growth (which appears to be absent from the Plan) and unmet need from neighbouring authorities (as discussed above). With regards to affordable housing, the Council commissioned a Housing Needs Survey as part of its previous Regulation 18consultation draft Plan in 2017. At the time, the Survey suggested that there is a net affordable housing need of 302 dpa (i.e. nearly ¼ of the overall annual requirement). Whilst the Standard Methodology accounts for affordability (or lack thereof in Fareham's case), actual affordable housing need indicates that a further uplift to its LHN may be necessary.

Policy HP4 Five-Year Housing Land Supply

Policy HP4 states that development 'may be' permitted where a development meet all the criteria in policy HP4. The Policy should be reworded to positively state that a development 'will be' permitted if it meets the policy criteria. When determining planning applications, the decision maker is required to read the Local Plan as a whole; there is no reason for the Policy to be equivocal on this matter.

With regards to criterion (b) the policy states that a development should be '...integrated with the neighbouring settlement'. Does this mean a physical link between the development and the adjoining settlement or that a development should be integrated in design terms? This needs to be clarified.

Criterion c) seeks to prevent development in strategic gaps that may significantly affect its integrity. As per our comments in respect of Policy DS2, this is a highly subjective policy criteria that will be challenging to interpret by decision-makers and applicants alike. It is also noted that Policy DS2 sets out different policy requirement with regards to the protection of Strategic Gap (i.e. proposals should not affect the physical and visual separation of settlements). This has the potential to create an internal conflict within the Plan as it is unclear which policy requirements (either HP4 or DS2) would take precedent where the Council unable to demonstrate adequate five year supply. It is suggested therefore that the wording for Criterion c) is deleted or replaced with a cross reference to Policy DS2 (including Permission's suggested amendment to this DS2).

Policy HP5 Provision of Affordable Housing

With respect to the percentages of affordable housing sought at sites, Policy HP5 should include a viability review mechanism to provide flexibility. This will assist with the viability of schemes should there be a fall in market over the lifetime of the Plan and/or in circumstance where unknown development costs are introduced (nitrate mitigation costs associated with the HRA requirements are a case in point having seriously affected the viability of schemes over the past year or so).

As set out in the supporting text to this Policy (paragraph 5.32), the Council publishes on its website the identified affordable housing need by area of the Borough. The Council's website shows considerably different housing need for each area. The affordable tenure mix is therefore too prescriptive and does not reflect the Council's own evidence base. It is advisable therefore that the

Council replaces criteria i-ii with a statement confirming that affordable housing mix and tenure will be negotiated with the Council evidence base set out its webpage used as the starting point.

Further underscoring our concerns with the nature of the tenure mix, the Council should be aware of the potential practical challenges associated such a small percentage of Affordable Home Ownership. The Policy could be interpreted by officer so that Affordable Home Ownership is provided at 10%, which would be a challenge for reasons set out below. Registered Providers are becoming ever specialised with some only dealing with the shared ownership side and others the rented side. Requiring such a small percentage of Affordable Home Ownership products through this Policy may create challenges in terms the viability of tender bids for this type of unit. In addition, Affordable Home Ownership, including shared ownership schemes, have been shown to be an effective means of getting people on the property ladder. As the Council's own evidence shows 10% is considerably below what is actually needed.

The final element of Policy HP5 addresses the market rent of Affordable Rented units, which will be judged as 80% of market rent or the relevant Local Housing Allowance (LHA), whichever is lower. The NPPF only make provision for rent to be set at 80% of market. It does not state that market rents should be benchmarked against LHA. The reference to LHA should be deleted to ensure that HP5 is in conformity with national policy.

It is also noted in Paragraph 5.42 of the supporting text to HP5 that the Council may need review the Affordable Housing Supplementary Planning Document (SPD) to address changes to the affordable housing and mix. SPDs should not be used to review issues that have a direct impact on viability. This should be tested through the Local Plan review process.

Policy HP7 Adaptable and Accessible Dwellings

The PPG sets out a number of tests against which Councils should consider when seeking to introduce M4(2) and M4(3) policies into its Local Plans. The Council's Specialist Housing Background Paper (September 2020) has been produced which shows how the Council claims to have met these tests.

In terms of need, the Background Paper sets out the population with Long Term Health Problem or Disability based on census data. However, this measures population, not households, so should not be assumed to an accurate proxy for need. It should also be noted that some people who state that they may have a Long Term Health Problem or Disability as part of a Census response may not have an illness that would affect mobility and would not therefore not necessarily require M4(2) or M4(3) dwellings. The evidence base should be updated to reflect the above.

With regards to the provision of Category 3 specifically, the Council's evidence of need is weak being based on a national wheelchair usage that may not reflect the level of need in Fareham Borough. Furthermore, with regards to Category 3 affordable housing, from a practical point of view, Registered Providers are less willing to take on wheelchair dwellings as they can be difficult to occupy. If there is no suitable occupier then the unit could be sat empty for a significant period while a suitable occupier is found. During this time the unit is not generating any income, and could have been used to house a family that is in need at the time.

As the Council correctly identifies, a large proportion of older homeowners will seek to remain within their own homes with care provided in situ. Should these owner occupiers need to downsize or relocate they will be able to utilise the equity built up within their dwellings to access products which meet their specific. This may be sheltered or extra care accommodation. Within recent years, as this market has developed, the industry has responded with a number of private sheltered accommodation schemes approved within Fareham. In this context, the Local Plan also looks to facilitate the delivery of specialist housing through Policy HP8 and through specific housing allocations made in the Plan (HA42 – HA43). The Background Paper does not appear to have factored in the supply of specialist homes that may come forward be on allocated sites and windfall sites permissible under Policy HP8.

With regards to the second test relating to location of specialist housing, as set out HP8, this type of accommodation is best located in accessible locations. Given the mobility challenges which some older people face, town and district centres, with their conveniently located services such as shops and health facilities, are ideal locations for older persons housing. Fareham town centre is a highly accessible location where a significant quantum of flatted housing is proposed with the benefit of a reduced affordable housing policy requirement. District Centres are also highly accessible locations where there is a potential for older persons housing could be delivered. The Council should therefore consider restricting this Policy requirement to areas of high accessibility.

Policy HP9 Self Build and Custom Homes

Policy HP9 sets out a policy requirement for 10% of all units on sites over 40 dwellings to provide plots for sale to address local self or custom build need. It is noted, however, that at Paragraph 5.8 of the Council's Self and Custom Build Housing Background Paper (September 2020) it is stated that the Council has met its past and future self-build requirements – this has been achieved without the need for a specific policy. It is also noted that the adopted Welborne Plan requires some 1% of its housing to be for self / custom build. Set against the current identified need of 35 net plots it would seem excessive to require a policy to further increase self / custom build supply. This could result in significant over provision of a product for which there is no clear market demand. In light of the above, the justification for Policy HP9 is therefore questionable. The policy does include provision for plot to be developed for non-self-build ,should they not be taken up, however, this Local Plan has made no assessment about the extent to which this would affect cash flow and the viability of developments. It is Persimmon's view therefore that this Policy should be deleted.

Notwithstanding our overarching concerns regarding the justification for this policy, there are a number of practical considerations that the Plan fails to adequately acknowledge. Criterion a) for example, sets out that self or custom build plots should be serviced. The Policy needs to clarify what is meant by 'serviced'. Does serviced this relate highway access, gas, water, electricity and/or broadband, and to which point should the plots be serviced? Turning to criterion c) it is not clear who would be responsible for setting out the design parameters. Placing a requirement to conform to set parameters could put off some prospective self / custom builders. The requirement to provide self and custom build plots may also have a number of practical and management issue, such as:

- Phasing and completion of the wider site.
- Section 106 contributions due to the exemption that applies to self-build housing.
- Delivery of housing in accordance with paragraph 59 of the NPPF to boost significantly housing supply, where supply on an ad hoc basis by self-builders is likely to be slow compared with the remainder of the site or even not take place at all.
- The reserve matters period running out and needing to be extended.
- Ad-hoc builders turning up outside specified hours of work.
- Storage of materials as there is limited room on plot and storage spills onto the market housing part of the site.
- Purchasers having to stop building due to unemployment/lack of funds.
- Purchaser dissatisfaction where building continues on a site which was expected to finish when they moved in.

CLIMATE CHANGE

Strategic Policy CC1 Climate Change

This Policy states that the 'Council will promote mitigation and adaptation to climate change through...' It is unclear whether the criteria will be sought as part of development proposals, or whether the criteria relate to development delivered by the Council. This requires clarification. If it is the former, the Policy should make clear that the criteria are not requirements but should only be met where it is possible to do so.

Policy CC2 Managing Flood Risk and Sustainable Drainage Systems

Policy CC2 requires all developments to be designed in accordance with the CIRIA C753 SuDS Manual or equivalent national or local guidance. The SuDS manual is, however, only guidance. In Persimmon's experience, strict adherence to the guidance can be problematic as the design of a SUDS system also need to consider design, aesthetics, engineering etc. It is recommended therefore that the wording for this bullet point is prefixed with 'Where possible,' to provide the necessary flexibility.

NATURAL ENVIRONMENT

Policy NE2 Biodiversity Net Gain

Policy NE2 sets out a requirement for site to deliver 10% net gain for biodiversity. The Local Plan viability assessment assumes a cost of £500 per dwelling. This development cost is based on limited evidence and seems low, particularly for greenfield sites (as opposed to brownfield equivalents) which are likely to require significant more extensive measures to achieve a 10% net gain. In many cases, the requirement to achieve BNG is likely to negatively impact on the developable area, resulting in a loss of revenue that negatively impacts on viability, rather than be a cost associated with each individual units per se. In Persimmon's view, the viability evidence to support the introduction of this Policy is inadequate. As mentioned above, meeting BNG at 10% can require considerable land take; on some sites Persimmon has been involved in, BNG has required around 50% of the gross site area. It is not clear whether or to what extent the Council has factored in this 'land hungry' BNG requirement as part of its housing allocations capacity estimates. It is also noted that BNG should be achieved across a site, it is not a requirement to be met at the individual plot level (although this might form part of the BNG solution). As such, supporting text Paragraph 32 is misleading and should be deleted.

Policy NE4 Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

This is new Policy which sets out Fareham's policy approach to dealing with excessive nutrient (nitrate) loading on protected European sites of ecological importance. However, the Policy is light on detail with insufficient guidance as to how applicants will be able to demonstrate conformity. Given Persimmon's significant experience in dealing with such matters, the Company is aware of how this Policy can be implemented in practice, but for less informed developers/applicants this may be more challenging.

Notwithstanding the above, the Company is aware that the primary means of determining whether a development proposal will be able to demonstrate nutrient neutrality is by producing a nutrient budget using the Natural England Methodology. Given that the Natural England Methodology provides a key evidence base and is fundamental to the implementation of Policy NE4, it is critical that this document is examined in detailed alongside the Local Plan. Of particular concern is that Natural England's Methodology includes a number of onerous stages that result in significantly more mitigation being required than is actually necessary. These provisions include, but are not limited to, housing occupancy rates, internal migration (particularly those households that are occupying new affordable housing) and default permit levels. Furthermore, despite many of steps set out Natural England Methodology taking a precautionary approach to nitrate assessment, an arbitrary buffer of 20% increase in nitrate loading is added at the end of the calculator. This buffer is not required and will further exacerbate the issue of overproviding mitigation land that is not necessary. Lastly, it is noted that the Partnership for South Hampshire has updated the Integrated Water Management Study (IWMS). The IWMS provides a key evidence base underpinning the nitrate assessment work, but the Natural England Methodology does not take into account this new evidence.

Policy NE5 Solent Wader and Goose Sites

Policy NE5 sets out the Council approach to protecting area which are used by Solent Waders and/or Brent Geese. The Policy makes reference to such area as shown on the Policies Map. These

designations are, however, informed by an interactive GIS map provided on the Solent Bird Aware website, which forms a critical evidence base to the development of Policy NE5. It is therefore concerning that, on the same webpage as the bird habitat GIS mapping, members of the public can download a form to report bird sightings. It is not clear whether or to what extent these reported sightings are authenticated / scrutinised by a qualified ecologist. There appears to be wide scope for land to be incorrectly identified as a bird site leading to unnecessary cost being expended to mitigate site, and in the worst cases complete sterilisation of that land. This is certainly the case with a number of sites that are with Persimmon Homes' interests (as detailed later in these representations). There is a concern therefore that the mapping evidence base underpinning Policy NE5 is flawed.

The Policy also does not set provision with regards to bird surveys. The methodology for bird sites allows sites to be identified as habitat even if they are not actually being used by birds. It would seem logical that the policy makes provision for applicant to undertake ecology survey and assessment of bird sites in order to demonstrate the absence or presence of a species. We would recommend that one year's survey data should be sufficient, with further surveys only required if the some activity has been identified at a site.

The Council will also be aware that it is the Solent Bird Aware mapping (not the Policies Map) that is used by consultees (Natural England and the Council's own in-house ecologist), to determine whether a development will impact on any protected bird habitat areas, to avoid any confusion in the future, and to ensure the Policies Map remains in date, it is suggested the Policy Map deletes these designations.

With regards to the criterion a) 'Core and Primary Support Areas' the Policy requires that development on such sites should result in an overall net gain to the Solent Wader and Brent Geese Network. BNG is a requirement of Policy NE2; the concept for which is established in the NPPF. However, Persimmon are unaware of any such requirement in national policy or the evidence base underpinning this policy, for a net gain for specific species, including protected birds.

Policy NE6 Trees, Woodland and Hedgerows

Point a) of this Policy advises that the 'unnecessary loss' of non-protected trees, hedgerow and woodland should be avoided. It is unclear what 'unnecessary loss' means in practice.

Point b) of the Policy should be a new sentence, and what is meant by the term 'unavoidable' in this context should be clarified.

Policy NE8 Air Quality

Criteria a) of this policy requires electricity charging infrastructure to be provided as part of new development (excluding Welborne). It is unclear why this Policy is not to be applied to Welborne. Presumably this is because of the impact of such provision on viability. Viability issues associated with EV charging provision are, however, not limited to Welborne.

The Local Plan Viability study includes development cost associated with EV charging as part of £10,000 per plot contingency. Paragraph 5.3.8 of the Study states that, '*it is unclear at stage of writing if or when any of these measures will be required, so [the study takes] a very cautious and conservative approach....*' With regards to the EV charging, Policy NE8 requires such provision; there is no uncertainty as to what is expected of a development proposal. As such, the Viability Study should consider this issue in greater detail and not combine this policy requirement with other unknown cost demands on development. Combining these 'unknowns' a single contingency means that is not possible to scrutinise in detail whether the assumptions made with respect to EV is reliable.

We would highlight that the cost for providing EV charging points is around £500-£600 but this does not include additional costs associated with providing additional sub-stations on larger development sites so that all charging points are capable of being used concurrently (alongside all other energy

demands on a development), and the potential to provide enhanced electricity supply (i.e. off-site upgrades) over and above that required for the units that could challenge a scheme's viability.

As current drafted, this element of the Policy is not justified.

TRANSPORT AND OTHER INFRASTRUCTURE

Strategic Policy TIN1 Transport Infrastructure, Policy TIN2 Highway Safety and Road Network and Strategic Policy TIN4: Infrastructure Delivery

These policies concern development contributions to the delivery of new infrastructure. However, it is considered the funding for such infrastructure may, in many instances, be a matter for CIL.

Notwithstanding, the above, if such Infrastructure is a requirement to make the development acceptable in planning terms, then such contribution need to meet the relevant tests set out in the CIL Regulations. It is no longer appropriate for blanket contribution to be sought by planning authorities. The Policy should be clear on this matter.

With specific reference to TIN2 it is unclear why the Council has chosen not to show the alignment of the Stubbington by-pass on the Policies Map given its strategic importance. This Policies map should be updated to show this route.

DESIGN

Policy D1 High Quality Design and Place Making

Policy D1 makes reference to a number of principles of policy and urban design, but also makes reference to guidance contained in the supporting text. For clarity and avoid any confusion over what is policy and what is supporting, text, it is suggested that this cross reference to the supporting text contained in the policy wording is deleted.

The Council should also review the policy to remove any duplication with other policies in the Plan, for example the section relating nature.

Consideration should also be given as whether the policy needs to be so detailed given that the Council has comprehensive guidance on design set out in its adopted Design SPD.

Policy D3: Coordination of Development and Piecemeal Proposal

This Policy seeks to avoid ransom situations. However, The Council will be aware of case law that prevents it from interfering on private property rights with regard to depressing or prevent returns to a landowners.

Policy D4: Water Quality and Resource

The second part of this policy requires developers to meet the Optional Technical Housing Standard for Water Efficiently (i.e. 110L/person/day). Meeting these Standards should be optional, not required. Whilst the Natural England Nutrient Methodology for the Solent area requires development to meet these standards as a means of addressing nitrate loading, there may be instances where nutrient neutrality can be achieved without doing so. The justification for requiring proposals to meet this standard are inadequate.

D5 Space Standards

The housing standards review introduced the optional space standards which local authorities could adopt by way of reference in their local plans. However, a prerequisite to the adoption of the space standards are the following tests set out in the planning practice guidance (Paragraph: 020 Reference ID: 56-020-20150327).

“Where a need for internal space standards is identified, local planning authorities should provide justification for requiring internal space policies. Local planning authorities should take account of the following areas:

- **need** – evidence should be provided on the size and type of dwellings currently being built in the area, to ensure the impacts of adopting space standards can be properly assessed, for example, to consider any potential impact on meeting demand for starter homes.
- **viability** – the impact of adopting the space standard should be considered as part of a plan’s viability assessment with account taken of the impact of potentially larger dwellings on land supply. Local planning authorities will also need to consider impacts on affordability where a space standard is to be adopted.
- **timing** – there may need to be a reasonable transitional period following adoption of a new policy on space standards to enable developers to factor the cost of space standards into future land acquisitions.’

In order to meet the policy test for the inclusion of the space standards there is a requirement for the council to establish the need for the adoption of the national space standard. To this end, the Council has published a Specialist Housing Background Paper (September 2020). Para 6.7 of Background Paper states most dwellings that have been consented or are awaiting determination are consistent with the 2015 Technical housing standards – nationally described space standard. The Background paper, makes references to the larger plots not meeting this standard, with an example being made of site ref 14/19. However, on the whole most dwellings considered in the Council’s Background Paper, including large units, are meeting the Optional standards. From a need perspective, it would seem as though there is little justification for the introduction of this Policy.

In terms of first part of the viability test, the Council’s Local Plan Viability Study indicates that development viability would not be negatively impacted by the introduction of the standards. This Study, however, is completed at a relatively high level, which makes it difficult to conclude whether this part of the test has been complied with. With regards to the second part of the test, no assessment has been carried out by the Council to demonstrate that the requirement for new development will not negatively impact affordability within the market.

As set out in paragraph 6.10 of the Background Paper, the Council has decided not to set a transition period for the adoption of the national space standards as it is of the view its introduction would not affect viability. For reasons set out above, we do not concur with this assessment, and suggest that a three year grace period is introduced to allow sites that are under a fixed contract to be brought forward. It is also noted that, the Council are looking to apply the draft policies in this Plan, including the requirement for national space standards prior to the examination or adoption of the plan. This contrary to the approach set out in the planning practice guidance. It is not practical to expect development proposals that are currently being considered to suddenly meet space standards.

In light of the above, Policy DS5 is not justified and should be deleted for reasons of soundness.

Local Plan Appendices

Appendix B set out a summary housing trajectory for the sites identified in the Plan. This is inadequate to properly assess the delivery expectation made by the Council with respect to individual sites. To enable proper scrutiny of the trajectory, the Council’s housing trajectory should be broken down by individual sites. This is particularly important because the Council has consistently over-estimated the delivery timescales for key sites. For example, Welborne, which was originally identified in the Core Strategy (2011), was expected to commence delivery in 2014/15. The site has still not achieved an implementable planning permission, and commenced development is still some way off.

4. Omission Sites

The following section provides an overview of the sites in Fareham Borough that are in Persimmon's interests, but have not been identified for allocation. These sites are largely located on the periphery of Stubbington and are within the ownership of the Dunley Estate. The Table below summarises the Dunley land holdings including capacity. The sites are shown on the enclosed Location Plans provided at Appendix 2.

Site Number	Address	Gross Area Acres (Hectares)	Site Capacity Estimate*
1	Land East of Burnt House Lane	23.53 (9.52)	240 - 320
2	Land West of Peak Lane	46.25 (18.72)	TBC
3	Land North of Titchfield Road	4.83 (1.95)	40 - 50
4	Land South of Titchfield Road	2.78 (1.12)	10 - 30
5	Land West of Cuckoo Lane	52.76 (21.35)	150-200
6	Land at Oakcroft Lane	41.04 (16.20)	209
Total		171.19 (69.28)	649 - 809

*Based on net developable area, not gross area.

Sites 1-3 and Site 6 fall within the South of Fareham SGA that was identified as part of the most recent Regulation 18 draft Plan. The remaining sites (Sites 4 and 5) are located outside of the SGA. The following section addresses each site in turn.

In support of the Draft Local Plan Regulation 19 Plan, the Council updated its Strategic Housing and Employment Land Availability Assessment (SHELAA) in September 2020. This replaces the previous study which published in December 2019. The conclusion of the SHELAA as related to each of the sites shown in the Table above are considered.

Site 1: Land East of Burnt House Lane

This site is located to the eastern edge of the Stubbington. Persimmon has undertaken some initial capacity testing in relation to Site 1, including an initial highways assessment and masterplanning. The outcome of this work indicates that the site is capable of delivering around 240 to 320 new homes. This accounts for on-site constraints including the provision of a noise attenuation bund, and strategic planting to the eastern and northern boundaries of the site. Adjacent to this site is the Meoncross School, which is seeking alternative arrangements for playing pitches close to the school (the existing pitches are currently leased and do not adjoin the school) and additional car parking to avoid parents parking on the nearby residential streets. Persimmon is in discussion with the school about how development at the Burnt House Lane may assist in addressing the school's immediate needs. In the longer term, however, given that the school is unable to expand within its existing site, consideration is being given as to whether the facility could be relocated to the Cuckoo Lane site (Site 5) to the west of Stubbington. The Council is strongly of the view that the site is sustainable and suitable for development and it is capable of being brought forward as a standalone allocation site, or as part of a wider masterplan with the South of Fareham SGA, should the Council seek to revisit this project.

The SHELAA 2019 concluded that Site 1 (SHELAA Ref: 1040) was deliverable housing site. However, in the Council SHELAA 2020 the Council considers the site to be undeliverable due a) to a significant visual impact undermining the integrity of the Strategic Gap, and b) the site being classified as a Low Use Brent Geese and Solent Waders site with no evidence of a strategy compliant solution. The

Council ascribes a capacity of 125 dwellings to the site. It is unclear how the Council has reached the conclusions in the new SHELAA given its assessment of the 2019 SHELAA undertaken just nine months prior. Notwithstanding this, as set in these representations, it is Persimmon's view that the Strategic Gap should be redrawn to exclude this site. With regards to the identification of the site as bird habitat, we have raised concerns in these representations regarding the robustness of the evidence underpinning this designation. Nonetheless, by improving the suitability of other sites in the area for bird use (i.e. Site 2 or 5) under the terms of the Council's Policy NE5, a policy compliant strategy to address the loss of the bird site to development is not unachievable. A strategy of improving habitat off-site is being taken in respect of the Oakcroft Lane site, which is also a low use site, and has the support of Natural England and the Council's ecologist.

Site 2: Land West of Peak Lane

This site is located to the north of the by-pass and extends across much of the gap towards the urban edge of Fareham in the north. Given its location and context, the development potential of this site is considered to be limited. However, the land could be an effective nitrate mitigation and/or bird protected habitat site that mitigation solution that could be used to address the potential impact development on other sites within Permission interests and/or other sites in the Borough the require mitigation solutions.

Site 3: Land North of Titchfield Road

This site is located to the north-west of Stubbington. Whilst this site formed part of the previous SGA, it is clearly distinct from and separate from it. This site is small scale that is well-contained in landscape terms, surrounded by existing built development and is deliverable in the short-term as stand-alone site that can be brought forward either as part of outside of the SGA masterplanning process should the Council seek to revisit this project. Initial capacity assessments of Site 3 indicates that it is capable of delivering around 40-50 new homes.

The SHELAA 2019 concluded that Site 3 (SHELAA Ref: 3190) was a deliverable housing site. However, in the SHELAA 2020 considers the site to be undeliverable due it being classified as a Low Use Brent Geese and Solent Waders site with no evidence of a strategy compliant solution. The Council ascribes a capacity of 20 dwellings to the site. It is unclear how the Council has reached these conclusions regarding the suitability of the site given its assessment of the site undertaken just nine months prior. With regards to the identification of the site as bird habitat, we have raised concerns in these representations regarding the robustness of the evidence underpinning this designation. Nonetheless, by improving the suitability of other sites in the area for bird use (i.e. Site 2 or 5) under the terms of the Council's Policy NE5, a policy compliant strategy to address the loss of the site to development is not unachievable. This approach to improving habitat off-site is being taken in respect of the Oakcroft Lane site, which is also a low use site, and has the support of Natural England and the Council's ecologist.

Site 4: Land South of Titchfield Road

This small site is located to the north-west of Stubbington. It bounded to the north-east and north-west by existing housing fronting Titchfield Road and the Crofton Equestrian Centre. The site's relationship with the wider Meon Valley landscape is limited by the woodland to the south of the site. The woodland to the south and its associated watercourse (which is also within Dunley Estate ownership) is recognised as an important ecological resource. Sensitive site design, however, could provide a means of ensuring the ecological interests at this adjoining site are protected and enhanced. Initial site capacity assessment indicated that the site is capable of delivering between c. 10-30 new homes. Were the Council minded to allocate the site for residential development, it could provide an important contribution towards its small-medium site housing allowance as required by Paragraph 68 of the NPPF.

Site 5: Land West of Cuckoo Lane

This site adjoins the settlement boundary of Stubbington to its north-eastern boundary. It is characterised by a substantial arable field that is well-contained in the north by the built form of Stubbington and substantial woodland. Initial capacity testing of this site, which has allowed for a substantial ecological buffer to the woodland, strategic planting to contain the site from the wider Meon Valley, land for a new school and new parkland further south, indicates that it is capable of delivering around 150-200 new homes.

This site is assessed in the SHELAA as being undeliverable due to being located within a *'highly sensitive landscape (based on the Fareham Landscape Assessment) and within an Area of Special Landscape Quality. Significant ecological constraints associated with the adjacent SPA/SSSI affect the suitability of the site.'* The SHELAA ascribes a capacity of 240 dwellings to the site. Whilst the ecological and landscape challenges associated with this site are recognised, they are not insurmountable. Although not a consideration for the SHELAA per se, the site provides the opportunity to deliver substantial ecological and recreation benefits, alongside community benefits, including new education provision and allotments.

Site 6: Land at Oakcroft Lane

Similar to Sites 1 and 3, the Oakcroft Lane site can be delivered outside of or as part of the SGA process (should the Council revisit this project). However, as demonstrated through the planning application, the site is deliverable now as a standalone development site. Technical issues associated with the development have been resolved and Persimmon are currently awaiting determination of the application by the Council. The site is capable of delivering 209 new homes alongside a considerable area of space to the north of the housing and to the south of the by-pass for ecological purposes. The Site Plan is attached to these representations at Appendix 1.

The SHELAA 2019 concluded that Site 3 (SHELAA Ref: 3141) was a deliverable housing site. However, in the SHELAA 2020 the Council considers the site to be undeliverable due to the site to be undeliverable due to the site being classified as a Low Use Brent Geese and Solent Waders site with no evidence of a strategy compliant solution. The Council ascribes a capacity of 200 dwellings to the site. It is unclear how the Council has reached these conclusions given its assessment of the site undertaken just nine months prior, and considering the site-specific mitigation strategy for protected birds has the support of Natural England and the Council's ecologist via the planning application process.

In the southeast corner of Portchester, Inset 12 of LPP2 shows Wicor Path linking Bayly Avenue with Castle Street. The western boundary of the Portchester (Castle Street) Conservation Area follows the line of mature trees to the west of Portchester House. Land to the north of Wicor Path is shown within the DUSB, together with houses and an office on the south side but the boundary arbitrarily passes east-west through the rectangular parcel of land that lies to the west of Anchor House- the parcel is just 28 metres deep but the northern part is shown within the DUSB, the southern part is not. In formulating the boundary, it is apparent that Fareham Borough Council recognised that development on (at least) the northern part would reinforce and reiterate a key characteristic of Wicor Path (ie residential development along its south side). Approaching the 'Land west of Anchor House' from the east, Wicor Path is characterised by brick/flint boundary walls, outbuildings, offices and houses; indeed, its built-up character has increased with the erection of a two-storey house ('Wicor Oak'). To its west, Anchor House is a chalet-bungalow that also faces north to the Path, behind a two-metre wall. Approaching from the west, one passes the long wall-with-railings of the Roman Grove Cemetery. The line of mature trees that define the west boundary of the Conservation Area turn east along the south boundary of the objection site but the DUSB does not follow it. It is submitted that the DUSB boundary should follow the tree-lined boundary along the south side of the 'Land west of Anchor House' site, not the north side of Wicor Path, as now proposed. [A drawing is being prepared for presentation under separate cover, to show the amendment to the DUSB that is requested in this submission. We would welcome confirmation of the safe and timely receipt of this written submission and the drawing. Thank you.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Show the DUSB boundary along the south boundary of the 'Land west of Anchor House', to include the land within the Urban Area..

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would reiterate the recognition of the site's development potential without the ambiguity of the existing boundary.

Your suggested revised wording of any policy or text:

n/a

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Fareham Borough Council has consistently resisted the call to review the DUSB boundary in this locality with an open mind.

Respondent: Ms Mary Dwyer-Parker (1712-12927)

Agent: Mr Robert Tutton | Robert Tutton Town Planning Consultants Ltd

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Residential development stands on both sides of Botley Road, Burridge and the locality has all the characteristics of a low-density suburb rather than countryside. Indeed, the openness of countryside can only be appreciated beyond the ends of the gardens of the residences that stand to the west of Botley Road. The time has come to recognise that both sides of Botley Road now form part of the Urban Area of Burridge, by demarcating the Defined Urban Settlement Boundary in such a manner as to include the west side of Botley Road. [A drawing showing the suggested DUSB will be presented shortly under separate cover.]

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include both sides of Botley Road in the Defined Urban Settlement Boundary

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would recognise that Botley Road is a 'substantially built-up area' rather than countryside.

Your suggested revised wording of any policy or text:

n/a

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Fareham Borough Council has failed to recognise the 'substantially built-up' character of Burridge since 2012.

Respondent: Mr James Morgan (1812-381913)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

I believe the urban area boundary on Brook Avenue needs adjusting to include Yorkdale, Cawtes Reach and all the parcels of land in-between this. The area no longer fits in with DS3 and should be adjusted accordingly.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Adjust plan as previously suggested on Brook Avenue, Warsash.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would encompass areas already developed along with areas which already have outline planning and those sites in-between.

Your suggested revised wording of any policy or text:

None

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

It is indeed very important to protect our countryside from unplanned and large-scale development. Sites of biological or geological value must be conserved and enhanced. This is also true for agricultural land and undeveloped coastlines.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Tobin Ricketts (1712-162036)

O&H's land lies predominantly to the south of Hook Park Road and immediately to the east of the settlement identified as an Urban Area on FBC's Development Strategy drawing. It is simply identified as Countryside. O&H's development concept for the land south of Hook Park Road is to bring forward a landscape-led scheme which identifies a series of self-build plots interconnected by an enhanced green infrastructure network. This would effectively extend the existing Urban Area eastwards and create an opportunity to strengthen the landscape structure in this area. The scale of development would be circa 50 dwellings, making a modest contribution to FBC's housing land supply over the plan period. This would also have the effect of continuing the sparse pattern of development that characterises the Hook Valley. Design controls could be employed that would ensure that the built development comes forward within a set of parameters. These would ensure that excellent design criteria are met but would draw on locally distinctive characteristics. There would also be an opportunity through the design control to demand the highest environmental standards. The reason for seeking its inclusion in the Local Plan is so that the site can be comprehensively planned and ensure that sustainability benefits are delivered for both the new and existing community. FBC's approach to delivering self-build housing in the Local Plan is inflexible and will not meet market demand for this type of tenure. The proposed policy limits self-build opportunities to predominantly being delivered via a percentage target on larger sites. As master developer, O&H have delivered many complex, large-scale sustainable urban extensions and, in their experience, the delivery of self-build dwelling on these sites is neither a reliable source of supply nor what the self-build market is seeking. Paragraph 61 of the NPPF states, "...the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including, but not limited to, those who require affordable housing, families with children, older people, students, people with disabilities, service families, travellers, people who rent their homes and people wishing to commission or build their own homes)." The footnote that supports this paragraph states, "Under section 1 of the Self Build and Custom Housebuilding Act 2015, local authorities are required to keep a register of those seeking to acquire serviced plots in the area for their own self-build and custom house building. They are also subject to duties under sections 2 and 2A of the Act to have regard to this and to give enough suitable development permissions to meet the identified demand." It is suggested that the demand for self-build housing will not be met by supplying land in urban areas and on sustainable urban extensions. Part of the attraction of self-build is the opportunity to test the boundaries of innovative and exceptional design and to do so in small clusters on larger plots than would be made available on strategic sites. In order to meet a variety of self-build demand, it is contended that flexibility should be built into policies DS1, DS3 and HP9. The Council would be able to ensure that unsustainable development was resisted by invoking other Local Plan policies.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The addition of a criterion to Policy DS1 and the inclusion of Policy HP9 under criterion e (new criterion 'f').

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Flexibility in where self-build housing can be located will meet the requirements of paragraph 61 of the NPPF and the requirements of the Self Build and Custom Housebuilding Act 2015.

Your suggested revised wording of any policy or text:

Strategic Policy DS1: Development in the Countryside Proposals for development in the countryside, which is defined as land outside the Urban Area boundary as shown on the Policies map, will be supported where the proposal: a) Is for development associated with an existing lawful dwelling, or b) Is proposed on previously developed land and appropriate for the proposed use, or c) Is for self-build housing of high design quality, or d) Is for retail, community and leisure facilities, tourism or specialist housing where it can be demonstrated that there is a local need for the facility that cannot be met by existing facilities elsewhere; or e) Is for a new or replacement building, conversion and/or extension within an existing educational facility (as identified on the Policies map) and would not result in the loss of playing fields and/or sports pitches unless it can be demonstrated that these facilities are no longer required or they can be adequately replaced elsewhere on site or, f) Is for housing development compliant with one of the following policies; HP1, HP2, HP4, HP5, HP6, HP9 or HP11, or g) Is for employment development compliant with one of the following policies: E1 or E5, or h) Is for a new small-scale employment development to convert or extend an existing building, or replace a redundant or derelict structure, or i) Provides infrastructure that meets an overriding public need. In addition, proposals will need to demonstrate that they; i. Require a location outside of the urban area, and ii. Conserve and enhance landscapes, sites of biodiversity or geological value and soils, and iii. Recognise the intrinsic character and beauty of the countryside and, if relevant, do not significantly affect the integrity of a Strategic Gap, and iv. Maintain the character of the undeveloped coast, and v. Are not on Best and Most Versatile agricultural land.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The landowner has experience of delivering land for self-build housing in other parts of the country and would be able to offer an insight into market demand and the difficulties surrounding the reliance of delivering self-building housing on strategic sites or sustainable urban extensions.

Respondent: Unknown1 Unknown1 (Unknown1)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the “convenient” alternative was for FBC to redraw the urban boundary!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Do not redraw the Settlement Boundary in WW17 and exclude HA1 as it does not meet requirements of DS1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Would then comply with DS1 and HP1

Your suggested revised wording of any policy or text:

HA1 is in the Countryside and outside Settlement Boundary. It does not meet the requirements of existing dwelling replacement in HP1 and therefore should not be considered for allocation without meeting the further requirements for development in the Countryside

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Tim Haynes (1712-251420)

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The 2037 plan is sound in many respects. More so than its predecessor. However, I have some reservations. Firstly, the plan includes in Paragraph 1.14 an assertion that it is prepared predicated on reduced identified housing need suggested by the Standard Method calculation in the Government's proposed "Changes to the Planning System" document. This is still under review, and since it has not been finalised yet, and has generated considerable interest and even opposition among local authorities as well as the public, it seems unwise to base such a crucial calculation on an as-yet uncertain process. This would have a bearing on Fareham Borough Council's ability to fulfil its Five-Year Housing Land Supply obligations, it also has a bearing on some of the policies in the plan that seem to be linked and would have implications for the retention of the Strategic Gaps within the borough. Policy DS1 reinstates the strategic Gaps as that not Strategic Growth Areas. To this extent, the plan is sound. However, paragraph 3.46 goes on to suggest that there is "evidence" that the boundary of the Fareham / Stubbington Gap could be redrawn "... whilst retaining its important function of preventing settlement coalescence." That evidence is the opinion of a Hampshire County Council Planning official as part of their Technical Review of Areas of Special Landscape Quality and Strategic Gaps: Chapter 4: Strategic Gaps Conclusions and Recommendations paragraph 10. The author states: • "The Fareham-Stubbington Strategic Gap is also proposed for continued designation, also having strong sub-regional support, and a clear and continued role, but there exists (sic.) some opportunities for development to be absorbed within the Strategic Gap, subject to scale and future detailed design, without compromising its Gap function combined with mitigation measures that can support GI enhancement." This constitutes an opinion, albeit possibly an informed one, not evidence. This uncertainty about the borders of this particular Gap reduces the soundness in my mind, when taken together with Policy DS1 which outlines the conditions for any development in the Strategic Gaps. On its own Policy DS1 is innocuous enough, but it seems to be linked in Section e to a set of policies (HP1, HP2, HP4, HP5, HP6 and HP11) three of which might allow for exactly the development policy DS1 seeks to exclude. Policy HS4, which allows for the possibility that the Council may not meet the Five-Year Housing Supply criteria, seems to provide that the first place the Council will look to make good the deficit by looking outside Fareham's urban areas. Surely, the first look should be at brownfield sites in the borough. Policies HS5 and HS6 seem, prima facie, to offer the possibility of development of affordable housing within strict criteria. However, they are both included in the policy DS1 description. This linking offers the possibility that opportunistic developers may try to use the Affordable Housing gambit to build at just the right size to meet the conditions, but, with the link to the Five-Year Housing Supply as a primary consideration, develop in a way that incrementally aggregates to a more sizeable encroachment on the Strategic Gap. I believe these three Policies should be reconsidered, or at least their link to Policy DS1 before the plan is approved. If not, there is a considerable risk that developers may be able to take advantage of the poor drafting to pursue their aims in the Strategic Gap with the Council unable to constrain, or unaware of, the actual effects. Policy E1 / E2 / E3 / E4 / E5 / E6 These policies while in themselves, sound, seem to pursue an agenda that is not active in promoting either the government's Green agenda, nor common sense when it comes to climate change. While it is appreciated that any Production Plan shall be as anodyne as possible in order to pass the inspection, it is notable that none of the above policies does anything to suggest that there should be any preference for types of employment. With the UK government's recent suggestion that it wishes to pursue a Green Industrial Revolution, albeit this hasn't yet been put into legislation, the Fareham Plan includes nothing that points to sustainability in environmental terms not supports any environmental agenda or attempt to address climate change. It would have been encouraging to see any of the identified sites, including Daedalus, being suggested as a potential home for green industry, whether manufacture of energy generating technology, environmental remediation, R & D or just green-related consumer business. There is also no mention of Gosport Borough and any collaboration or consultation with them, which I would have thought was a necessity given the effect that any increased employment and movement of people would definitely have on shared infrastructure; transport links, roads etc. While Fareham and Gosport Boroughs' connections via the Solent LEP and PfSH indicate that they may confer, there is nothing in the plan that acknowledged the close interest in Fareham as a means of getting off the Gosport peninsula Policy E7: Solent Airport This policy Focusses exclusively on aviation business, with the relatively unrealistic aim of making what is plainly an airfield into an "airport"; "The airfield at Daedalus, herein called Solent Airport". That this seems to be earmarked for growth, not in the plan, explicitly, it a matter of great regret. The government has clearly indicated that it does not wish to see expansion of runways in the south East except for at Heathrow. And even that will require a reduction elsewhere. Fareham Borough Council is mistaken if it thinks that opening the airfield to potentially to jet flights is an acceptable development. It is contrary to the Government view on tackling Climate change; in inviting extra traffic in to the airport it also adds to the general level of traffic on the existing roads in the area, potentially negating the advantages that we are promised from the Stubbington by-pass.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

While I appreciate that Fareham Borough Council may read some of the attached, I am not certain that they will act on any of it. I'd like to be sure that it is considered.

Respondent: Mrs Iris Grist (312-341014)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Today is the 18th December 2020, which is the last day for comments. No one in this area has yet had a paper copy of the plan delivered, except for the one road which requested it. How are the majority of the residents supposed to know what is proposed? Is the council trying to keep this quiet? Also this week the government has revised it's housing allocation plans, yet again. Is the number of proposed houses, still the same, or should FBC start again with a different number of houses to reflect the changes?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Check facts

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Correct number of houses

Your suggested revised wording of any policy or text:

numbers

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Ms Fiona Earle (1612-391050)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Objects to the both the wording of Policy HP4 and the link to DS1 policy as it implies that if Fareham's five year housing supply is not met, the first area of search is outside of the urban area boundary.

Policy HP6 is not robust enough to stop development in the countryside

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should refer to sites within urban areas, brownfield land, underutilised employment sites, sites close to train stations, under-utilised town centre sites such as car parks and shopping precincts, consideration of using Council land assets and other public sector land, intensification of existing neighbourhoods. These types of sites should be clearly identified as being preferential before greenfield land outside the urban area

The development of Rural Exception sites will not be permitted in areas designated as 'Special Landscape character' and the development will only be permitted where all criteria a-e are met

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Prevent building on the countryside

Prevent building in the countryside

Your suggested revised wording of any policy or text:

No proposal to amend the wording of Policy HP5 only that the link included in DS1 is removed

The developemnt of Rural Exception sites will not be permitted in areas designated as 'Special Landscape character' and the developement will only be permitted where all criteria a-e are met

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

Regulation 19 – Submission Draft

Project:	Land west of Downend Rd, Portchester	Date:	17 December 2020
Subject:	Fareham Local Plan	Reference:	249501F

Representation made to Fareham's Draft Local Plan 2037

Formal submission of representation will be made on 18 December via email to Fareham Borough Council.

B1. Which part of the Local Plan is this representation about?

- Paragraph (B1a)
- DS1 Policy (B1b)
- Policies map (B1c)

B1a Which paragraph?

n/a

B1b Which policy?

DS1 Development in the countryside

B1c Which part of the policies map?

n/a

B2. Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input type="checkbox"/>	<input checked="" type="checkbox"/>

B3. Please provide detail you have to support your answers above

The wording of policy DS1 is not consistent with National Policy. The policy outlines criteria where development outside the urban area will be support, but requires proposals in these instances to demonstrate that they are not the best and most versatile agricultural land.

The NPPF is clear that whist planning policies need to recognise the best and most versatile agricultural land (paragraph 170), footnote 53 is clear that “*where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of higher quality*”. The National Policy stance is not to prevent the use of the best and most versatile agricultural land but to support a preference for lower quality land and this only applies to ‘*significant developments*’. The policy text should be amended to be consistent with this approach.

B4a. What modifications(s) is necessary to make the Local Plan legally compliant and or sound?

The policy text should be consistent with National Policy and not seek to prevent development on the best and most versatile agricultural land but to demonstrate a preference for low quality land. It should be noted that other factors need to be taken into consideration, for instance, the lowest quality agricultural land may not be in the most accessible locations or suitable for development.

B4b. How would the modification(s) you propose make the Local Plan legally compliant or sound?

Providing consistency with National Planning Policy would make this part of the policy sound, the text for criterion V can be deleted as this aspect is covered by National Policy.

B4c. Your suggested revised working of any policy or text:

Delete criterion v, this aspect is covered by National Planning Policy.

B5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes:

No:

B5a. Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Miller Homes should be provided with an opportunity to participate at the hearing part of the examination. The issues raised in regard to the soundness of the Draft Local Plan, in the submitted representation, require detailed examination before an independent inspector.

Keely, Lauren

From: Mike Townson [REDACTED]
Sent: 14 December 2020 19:59
To: Local Plan Consultation; Consultation
Subject: Draft Local Plan comments

Please include my comments in the local plan consultation.

Response to local plan

Comments on Development Strategy section starting p17

1. Specific comment p25 ref Strategic Policy DS1 Development in the Countryside. Strongly support statement within the policy p24-27 additional statement : Proposals will need to demonstrate that they v. Are not on Best and Most Versatile agricultural land.
2. Specific comment Strategic Policy DS2 p27-28. Development in Strategic Gaps. My comment is that strategic gaps create false and unnecessary boundaries and these areas should be judged by other development policy criteria that can be evidenced. Many settlements in the borough have not received such protection and it would be inconsistent to make a policy that would be controversial and divisive for residents. The Meon Gap has environmental and Landscape policies that would exclude development however the Stubbington gap has no such policies and none should be created just to protect this false boundary.
3. Specific Comment on Landscape policy DS3 p28-32. Para 3.52 refers to open landscapes of the coastal plain such as at Wicor and in the Chilling area. I strongly recommend that as these two areas are compared they should be done so equally ie on the map on p30 the areas identified as being of Special Landscape Quality at Chilling include both coastal area and adjacent farmland both because of its agricultural BMV quality and as a Solent Strategic primary Support Area for Waders and Brent Geese. Therefore the area surrounding Wicor Coastal area should include the adjacent farmland which is similarly the highest quality BMV agricultural land and the same primary support areas for Solent waders and geese. Natural England in their letter of objection to FBC on development of a large section of this farmland describe it as "part of a wider countryside gap of around 40 hectares. The farmland area is a supporting habitat to the Portsmouth Harbour Special Protection Area. European sites are afforded protection under The Conservation of Habitat and Species Regulations 2017. Portsmouth Harbour is also a SSI and this farmland forms one of the last remaining agricultural areas adjacent to Portsmouth Harbour SPA." The open aspect of this farmland affords unspoiled views from the coastal path to Portsdown Hill and the Nelson Monument. Therefore please extend the current boundary for areas of special landscape quality on p30 to include the existing farmland to the north of Wicor Recreation Ground which would be fair, appropriate and equitable with the Chilling area.

Michael Townson
[REDACTED]

The Development Strategy p28 identifies the needs and benefits of identifying Areas of Special Landscape Quality as recommended by the NPPF. Two examples are given where appeal decisions have been successful associated with landscape quality challenges. It is noted that this is not an exhaustive list and I would make a strong case to extend the Cams-Wicor strip to include the farmland that wraps around this area. Areas of Landscape Quality are shown in fig 3.3 on p35 and the Wicor area could easily and appropriately be extended to include the adjacent farmland and be included within Strategic Policy DS3 – Landscape.

Natural England commented recently that this farmland (immediately north and adjacent to Wicor Recreation Ground) forms part of a wider countryside gap of around 40 hectares. The farmland area is a supporting habitat to the Portsmouth Harbour Special Protection Area. European sites are afforded protection under *The Conservation of Habitat and Species Regulations 2017*, as amended (the 'Habitats Regulations'). Portsmouth Harbour is also notified at a national level as the Portsmouth Harbour Site of Special Scientific Interest (SSSI).

It forms part of one of the last remaining agricultural areas adjacent to the Portsmouth Harbour SPA. The farmland is of the Best & Most Versatile quality being grade 1&2, The central farm land is a Primary Support Area as defined by the Solent Waders and Brent Goose Strategy. The open nature of this farmland allows good views from the coastal path to Potrtdown Hill and the Nelson Monument. Similarly the open nature of this coastal zone allows good views of the Portsmouth Harbour SPA/SSSI without the burden of development.

Many of the areas currently identified for landscape quality have no stronger case for inclusion than this farmland and matches similar areas such as Chilling Farm being a Primary Support Area and agricultural land adjacent to the coast.

Please give strong consideration to including the farmland surrounding Wicor Recreation Ground within this policy.

Mike Townson

J11 M27 – Down Barn Farm, Fareham

Representations on the Fareham Borough Local
Plan to 2037

Submitted on behalf of Graham Moyse

December 2020

Contents

1.	Introduction	1
2.	Representations	3
3.	Land at J11 of the M27 (inc Down Barn Farm)	10
Appendix 1: Land at J11 of the M27 (inc Down Barn Farm).		11

Stuart Irvine

Client

Graham Moyse

December 2020

1. Introduction

- 1.1 Turley are instructed by Graham Moyle to prepare representations in respect of the Fareham Local Plan 2037 – Regulation 19 Submission Draft.
- 1.2 Graham Moyle owns land in the vicinity of Junction 11 of the M27 (known as Down Barn Farm) and as a local farmer and entrepreneur, oversees a number of valued local businesses.
- 1.3 The primary purpose of the representations is to shape the policies of the Local Plan to support the aspirations of Graham Moyle in respect of the potential that exists at Down Barn Farm.
- 1.4 The representations have been set out in Section 2 of this report and have also been submitted individually on the relevant representation forms.
- 1.5 Section 3 sets out some initial details of the potential that exists on the land at J11 of the M27 (including Down Barn Farm). Whilst these proposals are still at a formative stage, that they offer an exciting and unique opportunity to address two key development concepts, namely:
 - A dedicated electric vehicle service station and associated facilities
 - A location to accommodate business / infrastructure users that require proximity to the strategic road network
- 1.6 The location of the site at Junction 11 of the M27 is well suited to respond to such uses given its accessibility to the motorway network and its proximity to key urban areas.
- 1.7 Whilst the broad principles of the emerging Local Plan are supported, it is our view that there are two substantive omissions in terms of its content, namely:
 - Insufficient recognition is given to the need to provide infrastructure to support the growth of electric vehicle usage (including specific allocations for such facilities); and
 - There has been a failure to recognise the need for specific employment provision to accommodate users who need a high level of accessibility and are of form that is not well suited to being within the built up environment.
- 1.8 These principles are drawn out through the representation in Section 2.0, with the conclusions that:
 - The wording of several policies should be amended to more fully recognise the importance of electric vehicles and to provide support to the delivery of infrastructure that is necessary to support the establishment and growth of the electric vehicle network over the lifetime of the Local Plan.

- Greater recognition should be given within the relevant employment policies, to supporting growth in locations, such as the land at J11 of the M27, where they respond to the specific needs of users.

2. Representations

2.1 Representations have been made in respect of the following chapters, paragraphs and policies of the plan.

- Paragraph 2.10 – Fareham Local Plan 2037 Vision
- Paragraph 2.12 – Strategic Priorities
- Paragraphs 3.4 / 3.5 – Good Growth
- Policy DS1 – Development in the Countryside
- Policy DS3 – Landscape
- Chapter 6 – Employment
- Policy E1 – Employment Land Provision
- Chapter 8 – Climate Change
- Policy CC1 – Climate Change
- Policy CC4 – Renewable and Low Carbon Energy
- Policy NE8 – Air Quality
- Policy TIN1 – Sustainable Transport
- Policy TIN4 – Infrastructure Delivery

2.2 Each representation is by its nature an objection and consideration has been given in respect of each as to how the plan could be amended to overcome the objection.

2.3 In addition to the representations being set out below, each has also been submitted on an individual objection form.

Paragraph 2.10 - Fareham Local Plan 2037 Vision

Representation

2.4 The vision is supported in general terms. However, its failure to include reference to supporting measures to address climate change is a significant oversight. Making provision for the necessary infrastructure within the Borough to support changing technologies is fundamental to addressing climate change. There are substantive changes, such as the transition of petrol to electric vehicles, which will take effect over the plan period, and the vision should reflect the need to deliver appropriate infrastructure to support that change.

Amendment

- 2.5 Add an additional statement to confirm that the Local Plan will promote the delivery of infrastructure to support infrastructure delivery that is relevant to address the climate change agenda.

Paragraph 2.12 – Strategic Priorities

Representation

- 2.6 Whilst there is a strategic priority relating the climate change, it fails to recognise the need for and importance of infrastructure delivery to support key aspects such as the transition from a road network that is dominated by petrol based vehicles to one where electric vehicles are the primary vehicle mode. This transition will take place over the life of the plan period and there is a need to promote both home and network based facilities to enable this to take place. A failure to specifically reference this as a strategic priority is a clear oversight.

Amendment

- 2.7 Amend strategic priority number 11 to make specific reference to the provision of infrastructure to supports electric vehicles changing, both at home and across the highway network.

Paragraphs 3.4 / 3.5 – Good Growth

Representation

- 2.8 The concept of good growth should be extended to make specific reference to highway network related infrastructure that promotes electric vehicles. Over the plan period the sale of petrol / diesel vehicles will end (2030) and the transition toward alternatives, principally electric vehicles will require the delivery of necessary infrastructure, both in homes and across the network. The promotion of good growth should include a clear and proactive intent to deliver such infrastructure.

Amendment

- 2.9 Include reference within the supporting text to the delivery of electric vehicle related infrastructure as part of measures to address climate change.

Policy DS1 – Development in the Countryside

Representation

- 2.10 The policy should include an additional bullet that allows for employment related development that has a specific locational requirement, such as accessibility to the strategic road network.

- 2.11 In addition there should also be a wording amendment to bullet h), to recognise that certain infrastructure can have specific location requirements, which means that delivery is required within a countryside location.
- 2.12 Examples of such provision include facilities to serve the strategic road network (including electric vehicle charging stations) and to those forms of business where there are specific sustainable advantages to being close to roads (for example waste related activities).
- 2.13 The policy should provide sufficient flexibility to allow for due consideration to be given to infrastructure and commercial requirements and the way in which key climate change and wider sustainability can be achieved by accommodating appropriate development in the countryside. It is recognised that such uses may be limited in form, but the policy should acknowledge that such uses should be supported.

Amendment

- 2.14 Amend the policy to include reference to commercial and infrastructure based uses that have key locational requirements, such as proximity and accessibility to the strategic road network.

Policy DS3 - Landscape

Representation

- 2.15 The policy is well formed, but would benefit from specific recognition that there will be forms of development that have specific locational requirements. This may include growth in locations where change in the landscape is more sensitive to change. In such circumstances, there will be means through which impacts can be appropriately mitigated. To support this, the policy should include reference to supporting development where landscape impacts are being addressed through appropriately formed landscape strategies.

Amendment

- 2.16 Amend the policy to reflect that where there are landscape impacts associated with development, growth can still be supported provided an appropriate landscape strategy (including mitigation where required) is set out.

Chapter 6 - Employment

Representation

- 2.17 The approach to employment provision set out within Chapter 6 serves to faces adequately into the quantitative employment needs of the Borough over the plan period. However, there is a lack of recognition to key qualitative matters, including the need to support the demands of business that have specific location requirements and to those uses that may be displaced to accommodate other uses (particularly residential).
- 2.18 There will be businesses that demand locations that are well related to the strategic road network for example, or are for forms of development that are not well suited to

either residential areas or B1 based business locations. There does not appear to be a cogent evidence base to demonstrate how the needs of such users are to be accommodated.

- 2.19 By its nature, the quantitative approach to employment provision does not factor this in, with new employment provision being on a restricted number of sites, which are either distant from the strategic network or are focussed on office based uses. On existing sites, there has been a significant reduction of available provision as a consequence of redevelopment for other uses, particularly residential. This implication of these changes has not been addressed, with the needs of displaced uses being particularly acute.
- 2.20 To address this, the employment strategy should make specific allowance for the broad needs of business, with a positive and proactive approach to accommodating the genuine needs of economic development, with a presumption in favour of investment in employment generating development and associated infrastructure.

Amendment

- 2.21 Expand the employment section to include a policy that supports employment generating development (by way of presumption in favour) and recognises the specific location requirements of certain commercial uses, including those that have been displaced by the redevelopment of existing employment sites.

Policy E1 – Employment Land Provision

Representation

- 2.22 The policy is wholly focussed on a numerical approach to employment provision, with no reference to qualitative employment needs. In addition, the new employment allocations are highly restrictive in locational terms and provide limited scope for new growth in other parts of the Borough.
- 2.23 The policy should recognise the broader employment needs that will exist within the Borough across the plan period, to ensure that opportunities for new investment are not missed, or that the qualitative and location needs of businesses can be met.
- 2.24 In this regard, the policy should be expanded to recognise that the employment requirements should not be viewed as a maximum provision and that other opportunities for employment growth should not be frustrated unnecessarily. This should take the form of a general presumption in favour of employment generating development in suitable and sustainable locations.
- 2.25 In specific terms, consideration should be given to identifying land at J11 of the M27 (including Down Barn Farm) as an employment allocation. This site is well related to the strategic road network and provides a unique opportunity to accommodate users who are dependent upon such a location. The site is also well suited to accommodate users who are also ill suited to either a residential environment or a more traditional business park location. This is reflected by its current use by the Highways Agency as a

processing facility to support the implementation of the smart motorway improvements on the M27.

- 2.26 The merits of this location are not driven by the quantitative needs as set out within the plan, but the qualitative considerations described above. The site would be of particular interest to a number of existing business who are being displaced by other major developments in the wider South Hampshire context. This is a unique opportunity that the Local Plan should embrace either by way of a specific allocation, or by creating policies that allow due consideration to be given to such development should it come forward via a planning application.

Amendment

- 2.27 Amend the policy to reflect the comments above.

Chapter 8 – Climate Change

Representation

- 2.28 The climate change chapter has not been drafted with a full recognition of key consideration that are relevant to the promotion of climate change objectives. In particular, the failure to adequately reference the transition of petrol to electric vehicle based travel and its associated infrastructure needs is a major oversight.
- 2.29 The Government has committed to ending the sale of petrol and diesel vehicles by 2030, with all vehicles to be zero emission based by 2035. Both of these events are within the plan period and will require the delivery of appropriate home based and network based infrastructure.
- 2.30 It is noted that the broader plan includes policies that reference the need to integrate electric vehicle charging into new development, however, it is entirely silent on the needs to delivery supporting infrastructure across the wider transport network. This should be addressed by the provision of a specific policy within Chapter 8 that promotes the provision of key infrastructure that will support the transition of the highway network to net zero. This would include support for electric changing facilities in appropriate locations that are well related to the strategic road network.

Amendment

- 2.31 Include specific reference within the Chapter to the need to support the transition to a net zero highway network, with a specific policy that promotes the delivery of related infrastructure, including electric vehicle changing.

Policy CC1 – Climate Change

Representation

- 2.32 This policy is inadequate as it fails to recognise the importance of supporting the transition of road vehicles towards net zero, which will be a key consideration over the plan period if wider Government objectives are to be achieved.

Amendment

- 2.33 Amend the policy to include a bullet point that recognises the importance of infrastructure delivery associated with the transition of the road vehicles to net zero, including appropriate supporting infrastructure.

Policy CC4 – Renewable and Low Carbon Energy

Representation

- 2.34 This policy focuses exclusively on energy generating development. This is unnecessarily narrow, and indeed has been drafted in an overly negative way that fails to recognise the fundamental benefits associated with delivering such valuable forms of energy generation.
- 2.35 The policy should recognise that there will be infrastructure that serves to promote net zero, such as electric vehicles, which should be supported. This may sit in a policy of its own, but failing that, CC4 should be expanded to include the consideration of development proposals that deliver such infrastructure, but with a more generous presumption in favour of such development, rather than the overly restrictive approach that is currently cast within the policy.
- 2.36 This restrictive approach has been driven by the perception that uses such as solar farms and wind farms imply significant impacts (particularly visual). This is not the case of all forms of net zero and progressive technologies and the policy should make a clear distinction in that regard.

Amendment

- 2.37 Unless addressed in a policy of its own right, CC4 should be amended to include reference to other forms of infrastructure that promote net zero related technologies, such as electric vehicle charging. In making these amendments, the policy text should be recast to recognise that these technologies are different to those energy generating uses that are perceived to have significant visual impacts. This should be reflected by a general presumption in favour of the delivery of lower impact infrastructure.

Policy NE8 – Air Quality

Representation

- 2.38 The references within this policy to the promotion of electric vehicle charging infrastructure is welcomed. However, this is focussed exclusively on provision within new developments. This is insufficient to meet the infrastructure needs required to service the transition of petrol / diesel vehicles to net zero emissions based vehicles over the period to 2025.
- 2.39 Whilst home based infrastructure is appropriate, it does not address the key consideration of charging facilities within the wider highway network, particularly in terms of users who are travelling across the strategic road network where there is a substantive issue regarding the ability to recharge when on longer journeys or where access to home based infrastructure is not available.

- 2.40 In this respect, unless addressed elsewhere in the plan, policy NE8 should include provisions that support the delivery of electric vehicle charging infrastructure to serve the wider strategic road network.

Amendment

- 2.41 Amend the policy as suggested above.

Policy TIN1 – Sustainable Transport

Representation

- 2.42 This policy is premised on the basis of the promotion of non-car based means of travel. This is commendable but does not adequately recognise that the transition towards net zero emissions based vehicles will also make a valuable contribution towards more sustainable transport patterns. Given the timescales associated with this transition (over the period to 2035), there should be strong support within TIN1 to the delivery of infrastructure that enables this transition.

Amendment

- 2.43 Amend to include reference to the role of electric vehicles as a sustainable mode of transport and to provide support for appropriate infrastructure to facilitate their delivery.

Policy TIN4 – Infrastructure Delivery

Representation

- 2.44 This policy focuses wholly on ensuring that infrastructure that supports new development is delivered in a timely manner. This is supported but it fails to address the need for the delivery of wider infrastructure, particularly that which stems from the objectives set out within the Climate Change chapter (and also reflecting our representations on the policies in that chapter).
- 2.45 The policy should be broadened in its intent to incorporate a focus on ensuring that this wider infrastructure is delivered alongside new development to ensure that core climate change objectives are capable of being met. This implies an imperative to support the early delivery of such infrastructure within the early parts of the plan period.

Amendment

- 2.46 Amend to include reference to the timely delivery of wider infrastructure, particularly that which is crucial to supporting climate change related objectives.

3. Land at J11 of the M27 (inc Down Barn Farm)

- 3.1 The land at J 11 of the M27 comprises the land immediately adjacent to the motorway junction (to the north and north east) extending up to Boarhunt Road. The site currently accommodates a number of users, including a park & ride and strategic base for the Highways England in undertaking the smart motorway improvements that are currently underway.
- 3.2 A plan showing the location of the site is attached at Appendix One.
- 3.3 This site offers a unique opportunity to respond to a range of development needs, including those that require a location that is directly related to the strategic road network, or to accommodate users that are not well suited to either a residential environment or a business park.
- 3.4 A number of potential forms of development are appropriate for this location, including:
- Service facilities to serve the M27, including scope for an electric vehicle charging station.
 - Uses of a similar form to those that are currently in place to meet the needs of Highways England – such as processing of building / waste materials.
 - Displaced users who require relocation away from other sites that are being redeveloped for other uses or are allocated for such development. This is particularly relevant to locations such as Tipner where the sites development will require a number of business to relocate to alternative sites that meet their needs.
 - Other uses that require accessibility to the strategic road network.
- 3.5 The site can be developed in an appropriate manner, incorporating a strong landscape framework and measure to promote biodiversity gain. The ability of the site to accommodate significant development without giving rise to undue impacts is currently being demonstrated by the scale of existing activity on site.
- 3.6 Further details to support the promotion of the site in the manner outlined above are currently in preparation and we would welcome the opportunity to consider how the Local Plan can support its delivery.

Appendix 1: Land at J11 of the M27 (inc Down Barn Farm).

Subject: FBC Continued

Dear Katherine,

As discussed with you Friday 4 December I enclose the start of my comments on the consultation document which you said you would be able to put in the appropriate boxes as I am unable to as I found that I could not continue without logging on, each time which was not how the system should've worked.

When we spoke you said that you had not received the second paragraph that I submitted so I am hoping that I will start there, as you have already received my first submission.

As I am not able to view the pro forma I hope you will be able to put them into the correct boxes as obviously with only one iPad that I am using to work on and one for my notes which I have made, it would be too torturous.

So onto matters of legal compliance which I believe is paragraph 1.6

There is no mention of the 2017 unadopted draft plan although it has been confirmed that it was in the previous 2015 plan.

Although there was an overall reduction in the new housing it would appear that Warsash is actually going to take 20% more. HA1 has no joined up thinking. There should be an environmental impact on all of the sites proposed , so that each one is not seen in isolation.

Paragraph 4.19 states that many of the housing policies brackets HE256 811 1416 1820 2125 and no longer considered to be proposed allocations. I should like to know how objectively assessed housing need arrived at the fact that site HA1 was to take the bullet.

It would appear that the developers have taken advantage of the LPA's decision that proposing HA1 would mean that they have carte blanche to submit applications. I believe this is contrary to the publication plan. It would also appear that in order to fit in as many houses as possible into HA1 the boundaries have been adjusted to accommodate them. How does this not look as though the Developers have the upper hand and are actually driving this through.

So onto the Habitats directive which again comes under Matters of legal compliance.

Paragraph 9.10 is about nightrates neutrality strategic policy. I cannot see how the policy which requires designated sites to be protected and enhanced and improved is adhered too. I think the word I am looking for is there should be a net reduction the designated sites in unfavourable conditions. The LPA's way of adjudging is the exact opposite. It would appear that this is in direct contravention of both the habitats directive and the publication plan policies. The developments contemplated would be negatively impacting the SAC and RAMSAR sites. I cannot see that under these circumstances it would be a valid option.

I am calling it a day at present and wonder if you can reply to acknowledge receipt of this and that I am actually doing the right thing and making comments that you can import into the documentation,

Many thanks,

June Ward

Dear Katherine,

This next part of my document relates to the Test of Soundness

I am not at all happy with the settlement definition.

Policy HA1, which is supposedly a greenfield site is proposed to be changed to an urban area – via the redefinition of settlement boundaries reference WW 17. Greenfield sites are not particularly favourable for development as it says in the forward to the publication plan.

Paragraph 2.10 says that Fareham Borough aims to retain the identity of the amazing valuable landscape and settlement definition, protecting it's natural, built and historic assets. As someone who has lived in Warsash 45 years and been conversant with this area for nearly 10 years before that, ie the late 1960's, is a complete contradiction. What was once a very gentle countryside location seems to have been redesignated giving it up and status. And the change of the settlement boundary to enable this to happen is in my view completely unethical and beyond belief. I take exception to the fact that policy HP1 calls for the efficient use of existing buildings to meet such need on a 1 for 1 replacement dwelling basis. This is not applicable for HA1 and it would appear that FBC has managed to redraw the urban boundary.

My next comment on test of soundness is where infrastructure is concerned.

This concerns policy HP4 to be found paragraph 5.24; I think HA1 demonstrably fails to have any thing other than a detrimental effect on the environment, certainly the traffic(witness the two and a half hours to get off the motorway on Friday 4 th December, where all roads in and out of Warsash were snarled up, as we are a peninsula....or has this not occurred to anyone) and amenity has implications. Even now I feel that I cannot venture out too far from Warsash for fear of not getting back at a reasonable time due to the amount of traffic on the few roads in and out of Warsash. Warsash almost appears to be a prison! Don't go anywhere because you can't get back to your house!

This ties in with my next point policy HA1. Page 51 talks about traffic routes. As I have said earlier it almost feels that one is imprisoned in Warsash. I note that there was a recommendation that there should only be six dwellings and Greenaway Lane now I see that the plan proposes for 140 houses and that to enable this to be accessed the lane needs to be widened. I think the clue is in the word Lane. This is a delightful lane to walk through but with that amount of traffic proposed would be considerably dangerous. It is already "take your life in your hands to cross Warsash Road "let alone the impact of trying to walk within what was once considered countryside. As one gets older and appreciates the ability to be able to walk along country lanes. Page 54 suggests there should be seven new accesses onto an incredibly busy Brook lane and Lockswood Road as well as an additional iaccess at Brook Lane via three entry points from Greenaway Lane. I have already had to change my surgery where I was a patient for 40 odd years as it was impossible to get to the surgery on time due to the amount of traffic. My surgery is now in locks Heath Centre. I note that there was an occasion some time in the last few few weeks that the Air ambulance was unable to land; and ambulance was unable to get there because of the gridlock. My point is very much that the proximity of these access points and the position of such will cause even more gridlock. We are a peninsular we are hemmed in. More traffic will make us feel that we are even more in a cage.

Continuing with my other comments about infrastructure

Paragraph 10.15 where has that been an analysis of roads where the new houses are proposed. If we are considering 830 new dwellings what about the transport assessment for HA1. Although there could be an average of two cars per dwelling I know from experience that at one point, with our daughters coming and going from University, we had five cars in the driveway, which we could accommodate.....many of the new homes will not have this advantage, and extra cars will be accommodated on the roads.. how therefore is there no reference for the mitigation required to reduce congestion by 2037. Plan as presented failed the test of soundness by not being positively prepared in this respect. In this very Rural area one has to have access to a car to get anywhere, unless being confined to one's home is the way forward for FBC. I cannot see that paragraph 10.14 helps any of us.

I have had the pleasure of one of my family is moving closer to live with me in Warsash and the boys are very involved in outdoor activities so it was a joy that I saw there was provision of two junior football pitches however these appear to be missed off of the master plan?

Document 3 for FBC

Dear Katherine,

This relates to Test of soundness-

Housing need methodology

I think there is a disparity CE paragraph 3.27 figure 3.2. The map shows that there are eight possible growth areas when there are actually more than this. Could you confirm which is the correct one.

Again paragraph 3.37 does not align with paragraph 4.13 regarding the definition of small-scale development. In other words, is it sites of less than 1Ha or development of not more than four dwellings.

Again under the same heading; paragraph 4.2 of the publication plan is dubious as it bases housing numbers on the proposed new methodology for calculating need and there is some concern that this may not be adopted by the government. Also page 37 paragraphs 4.12, 4.16 and policy HP13 illustration says that the contingency barrier of 1094 has been made. I think the plan is very dependent that 4858 houses at Welbourne will be delivered.

Occupancy rates

Paragraph 5.41 states that a four or five bed house would have an average occupancy rate of 2.4 with regard to nitrate budget calculations. However it also states that the range of occupancy for affordable homes will be between 4-6 persons. This does not marry up with the claims in the publication plan for what the council needs and requires.

Carbon reduction

Paragraph 8.60 section 8 does not state what the target should be for the requirement of meeting CO2 emission targets. It simply refers to individual developments power generation. I would contend that the plan is not positively prepared.

Paragraph 11.34 does not state what the meeting of CO2 emission reduction targets should be. The plan just refers to individual developments power generation so again I contend that plan is not positively prepared.

Paragraph 11.36 no standards have been set for the developers to design for natural ventilation and green infrastructure. I cannot see how just meeting building regs, allies with the Governments needs to meet the promised carbon reduction. The council should lead by example by setting standards to ensure that developers are designing for sustainability. We need to look to the future using the new standards SA10.

Retail facilities

Paragraph 7.13 if Warsash is to have more houses then there will be additional retail facilities needed and with that will be the need for more parking spaces as many who have lived in this area for decades need to use their own transport for shopping, hairdressers, and many other facilities that this village has provided. It is already a job to cross the road from one side to the other and more cars to the area will make this even more impossible. There would need to be a crossing area to allow children to cross safely to get to the bus stop or to Brookfield School as well as the many elderly people who need to cross from one side to the other.

Paragraph 7.18 although out-of-town shopping is discussed it is not however defined. As one gets older one prefers to take ones custom to the local shops as driving is not so pleasurable. If we are to be encouraged to shop elsewhere this will increase the amount of traffic on our heavily congested roads.

Education

Paragraph 10.26 infrastructure delivery plan section 5.5. I note that education is planned with Hampshire county council however the period of any proposed extensions only covers to 2021. The plan however goes up to 2037. My grandchildren are already in three different schools within the area, two of which need cars. Offering houses to be developed but then not having school places it's not a sound approach to help to realise the dreams of future generations.

Paragraph 10.27 Infrastructure delivery plan table item 83 calls for section 106 provisions of additional early years foundation provision within the western wards. However H a one does not say if there is going to be a nursery or preschool within the proposed development area. There should be a child placement contribution to be allocated as there are over 1000 new houses being proposed for the Warsash area alone. Again If parents need childcare provision they would have to travel out of this immediate area in order to access provision; not at all ideal, adding to traffic chaos, length of time travelling to and from child care setting and not allowing children to make friendships with those who they might be at school with when they reach statutory age.

Healthcare

As regards Paragraph 10.26 the infrastructure delivery plan calls for the expansion of healthcare provision through further GP practices in the western wards. The document however only provides an historic timeline through dating the local plan. This is not a sound approach considering that HA1 will bring in additional 830 houses. It is already impossible to get an appointment at the nearest GP practice within a week.

Complies with duty to cooperate Housing need methodology

Paragraph 1.28 which agrees to take up the shortfall of homes from Portsmouth, numbering 847, would appear that FBC are taking a risk as the new methodology for calculating housing need has not been signed off by the Government. Also during this time of public consultation the housing delivery test will not be available

Paragraph 3.10 The rewilding of the Stubbington strategic gap was made without consultation with the council offices or elected members. It came via an announcement through a press release after the start of the full council meeting, which was in the process of debating this plan.

Paragraph | 3.37

1 Representations

	Legally compliant	Sound	Complies with the duty to co operate
Total	1	1	1
Yes	1 100%	0 0%	1 100%
No	0 0%	1 100%	0 0%

Respondent: Unknown1 Unknown1 (Unknown1)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.37 is in conflict with Para 4.13 over the definition of small-scale development – is it sites of less than 1 Ha or development of not more than 4 dwellings?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Ensure the numbers are the same in both Paras

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Change either Para 3.37 or 4.13 to make them consistent

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent details:

Postcode:	
Telephone Number:	
Email Address:	

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 1.5 Introduction: Statement of Community Involvement and further Paragraph 2.1 says a “variety of methods” should be used to solicit comments from the public. Because paper-based documents failed to be employed across the borough, a large proportion of residents were deprived of sharing their opinion. This was exacerbated by Covid restrictions, limiting the access to libraries and the council office. The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents’ concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board. It is discriminatory that community-generated evidence carries less weight than that provided by Developers consultants. E.g. regarding previous use of land in Nitrate budget calculations similarly with traffic survey results captured by residents and Community Speedwatch teams.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should make another attempt to achieve a reasonable level of Community Involvement

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Allow for public opinion to be expressed through the appropriate channels and provide a mechanism for evidence collected by residents groups to be equally considered as that from Developer's consultants and associates

Your suggested revised wording of any policy or text:

The LPA will hold another Public Consultation on the Plan during the Summer of 2021 where their views and concerns can be properly considered

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number! There is no joined up "Masterplan" for HA1 (with developers working in complete isolation of one another). Therefore, another environmental impact assessment must be conducted showing the cumulative effect of HA1 in its entirety. Para 4.19 Housing policies HA(2,5,6,8,11,14,16,18,20,21,25) are no longer proposed allocations. So, why was HA1 singled out as an allocation and how was the Objectively Assessed Housing Need arrived at for this site? Developers have taken advantage of the LPA's decision to propose HA1 within (the now defunct) 2017 Plan and have submitted Applications that the LPA have resolved to grant permission on (many ahead of and likely contrary to) the Publication Plan. Others claiming their sites fit well with HA1 has now resulted in the boundaries of HA1 being adjusted to accommodate them. This seems to mark an inappropriate powershift toward the Developers.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

HA1 needs to be re-evaluated from the point of view of reducing overall number of dwellings (by conducting an OAN on the Warsash area alone). The Plan must also ensure a "joined up" approach is taken to the many Developers sites and the CUMULATIVE effects caused rather than the current piecemeal "Salami-Slicing" approach

How would the modification(s) you propose make the Local Plan legally compliant or sound?

HA1 would be properly re-assessed (starting from the point of the Extant 2015 Plan numbers and not the unadopted abandoned draft plan of 2017)

Your suggested revised wording of any policy or text:

HA1 will be re-assessed in the light of confirming the Objectively Assessed Housing Need in Warsash and the Western Wards and any Allocation sites will be considered both individually and as a whole to ensure the Cumulative effects on the infrastructure and environment are properly taken into account

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Paragraph: 9.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 9.10 Whereas the LPA is aspiring to Nitrate Neutrality, Strategic Policy NE1 requires designated sites be protected and ENHANCED Likewise Para 9.50 (Policy NE4) confirms permissions will be granted when the integrity of designated sites be maintained or IMPROVED. Finally, Page 199 Para 9.54 indicates that proposals for development should provide a net REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA’s approach therefore contravenes both the Habitats Directive and the Publication Plan in respect of these policies. Furthermore, a leading QC’s opinion is it is unclear how any development could be contemplated in the Western Wards without negatively impacting the SAC and RAMSAR sites and therefore based on proximity alone, this would invalidate the deliverability of these developments. As per advice from Natural England, it is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves beyond scientific doubt, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been mitigated (rather than compensated). There is doubt that the LPA is applying the Natural England advice correctly and lawfully in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA must ensure that mitigation of eutrophication complies with the directive to REDUCE overall Nitrate Levels and that inline with Natural England Advice that protected sites (SAC, SPA, RAMSAR) are not compromised because simple broader-region off-setting has been used as opposed to Local Mitigation of effects on those sites

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Plan would become consistent with Advice From Natural England and the Habitats Directive

Your suggested revised wording of any policy or text:

Sites will be allowed where Nitrate Reduction mitigation can be proven at a local area level

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 “Strategic Priorities” which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manœuvre by stealth of the council, to suit its own objectives.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Greenfield Sites will be assessed in their own right and Settlement Boundaries shall not be altered to include large proposed Housing Allocations until the Objectively Assessed Housing Need for the immediate vicinity have been considered. Similarly no redesignation of Greenfield sites to Urban status shall be allowed until OAHN can be proven to justify this.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Remove changes to Settlement Boundary as indicated in WW17 and apply Greenfield Site aspirations to HA1

Your suggested revised wording of any policy or text:

HA1 is in the Countryside and as such any consideration of Housing Allocation should conform with the Policies for Development in the Countryside and the Aspirations of the LPA to maintain such areas as a last resort for Development

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Policy: DS1 - Development in the Countryside

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Do not redraw the Settlement Boundary in WW17 and exclude HA1 as it does not meet requirements of DS1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Would then comply with DS1 and HP1

Your suggested revised wording of any policy or text:

HA1 is in the Countryside and outside Settlement Boundary. It does not meet the requirements of existing dwelling replacement in HP1 and therefore should not be considered for allocation without meeting the further requirements for development in the Countryside

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Policy: HP4 - Five-year Housing Land Supply

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Re-Assess HA1 in respect of being outside the Urban settlement and in terms of OAHN and Local Sustainability from an amenities and infrastructure perspective

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that Development in the Countryside is only considered with the requirements set forth in the relevant Policies and that any allocation proposed is locally sustainable through the addition of amenities and infrastructure to support the number of new dwellings proposed.

Your suggested revised wording of any policy or text:

HA1 Allocation needs to be re-evaluated to ensure the appropriate amount of infrastructure and amenities are delivered before any Development begins

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

7) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockwood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full Local Transport Assessment needs to be conducted for the routes serving HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that traffic and safety implications of an additional 830 dwellings in a relatively compact area have been properly considered

Your suggested revised wording of any policy or text:

The LPA will carry out a Full Local Transport Assessment for HA1 to determine the flow of traffic and congestion cause through the additional 1600 vehicular movements each day. In particular the safety of Brook Lane will be reviewed in the light of the "Pinch point" just beyond the School, which is on a blind corner and likely to result in injury or fatality, either from a head on collision or a vehicle striking a pedestrian from having to mount the kerb.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

8) Paragraph: 10.15

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full local Transport Assessment will be conducted for the routes serving HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure it was Positively prepared by taking into account the challenges of increased vehicular movements caused by HA1

Your suggested revised wording of any policy or text:

The LPA will conduct a full and thorough Local Transport Assessment to determine any traffic and safety issues created by HA1 and will ensure that the appropriate mitigation has been agreed before any allocation is approved.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

9) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 14.6 of Final Transport Assessment reads; "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area HA1, of the local plan with 830 homes and isn't assessed within the Transport Plan document.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The Transport Assessment has only been done at the Macro level (Strategic) and not local level - Need a detailed Transport Assessment for HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that the appropriate mitigation is in place for the additional traffic created by an extra 830 dwellings in the local area

Your suggested revised wording of any policy or text:

The LPA shall conduct a detailed Local Transport Assessment for HA1 before an allocation is approved

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

10) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: Page 52 indicates the need for the provision of "2 junior football pitches" Why are these not shown in the Masterplan?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include on the Masterplan where the two junior football pitches are proposed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Masterplan would be made consistent with Policy HA1

Your suggested revised wording of any policy or text:

Two Junior football pitches to be shown on the masterplan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

11) Paragraph: 3.27

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.27 fig 3.2 There are actually more than the indicated 8 potential growth areas shown on the map (assuming that these are construed as being the proposed allocations). This needs correction.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Either change the number of potential growth areas or modify the Map to be consistent with the figure of 8

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Update the Map or change the number (8) mentioned in Para 3.27

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

12) Paragraph: 3.37

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.37 is in conflict with Para 4.13 over the definition of small-scale development – is it sites of less than 1 Ha or development of not more than 4 dwellings?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Ensure the numbers are the same in both Paras

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Change either Para 3.37 or 4.13 to make them consistent

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1.0 Introduction

- 1.1** The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in Land adjacent to 75 Holly Hill Lane in Sarisbury.
- 1.2** The site is irregular in shape and extends to approximately 2.6 hectares. It is accessed via Holly Hill Lane, which adjoins the south-western boundary of the site, and the majority of the site lies to the east (rear) of the properties which front Holly Hill Lane. The southern boundary of the site adjoins Holly Hill Woodland Park and the eastern boundary extends as far as the boundaries of the properties on Mulberry Lane (accessed from Barnes Lane). The site has previously been promoted through Fareham Borough Council's (FBC) Strategic Housing and Employment Land Availability Assessment (SHELAA) – Site ID 1005.
- 1.3** For the reasons set out in these representations, our client is strongly of the view that this site should be allocated for residential development in the Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan). It is estimated that the site could accommodate approximately 30 dwellings. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).
- 1.4** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.5** The following representations utilise the same format as the Council's response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.4 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.5 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in

"Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

- 2.6 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.
- 2.7 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

-
- 2.8 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.
- 2.9 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.10 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.11 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.12 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's

announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

2.13 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.

2.14 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.

2.15 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.16 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require

that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

- 2.17 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.
- 2.18 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.19 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.20 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies

that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be “ratified” by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.21 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be “circa 10,750 dwellings”. At paragraph 4.5, Fareham’s “immediate neighbours” are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is “likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...”. The Council’s ‘Duty to Co-operate Statement of Compliance’ identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: “...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution.” It is not clear how this “general contribution” has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport’s unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.22 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the “South East

Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

- 2.23 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

- 2.24 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.25 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.26 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.27 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.28 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and

Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.29 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of our client's interest at Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.30 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and

Compulsory Purchase Act 2004).

- 2.31 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;

- Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31; and
- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

3.15 Paragraph 3.9 of the PLP states:

"Recent planning appeal decisions in the Borough have highlighted the need to consider the designation of valued landscapes as part of the Local Plan. Previous Local Plans have included the demarcation of 'Areas of Special Landscape Quality' in the Borough which were used to help shape planning strategy and decisions on planning applications. These areas were the Meon, Hamble and Hook valleys, Portsdown Hill and the Forest of Bere. Both the Landscape Assessment (2017), and the more recent 'Technical Review of Areas of Special Landscape Quality and the Strategic Gaps' (2020) still recognise the intrinsic character and distinctiveness of these relatively undeveloped areas of the Borough and so their locations have been used to shape the development strategy. There is a presumption against major development in these areas, unless it can be demonstrated through a landscape assessment that the quality

and distinctiveness of the landscape character can be conserved. For these reasons there remain no development allocations in these areas." (our underlining)

Our client objects to the identification of the Areas of Special Landscape Quality (ASLQ) in the borough, and particularly to the presumption against development in ASLQ and against allocation any sites for development within these areas. This is discussed in detail in the section relating to Policy DS3: Landscape below.

Policy DS1: Development in the Countryside

3.16 For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.17 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.18 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

- 3.19** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.20** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non-designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.21** However, if it is held that Policy DS3 should not be deleted, the following comments apply.
- 3.22** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.23** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA3 is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.24** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and

several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.25 Having specific regard to our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury, the site has previously been promoted through FBC's SHELAA dated September 2020 (Site ID 1005) and was discounted solely because it is located within an ASLQ. Consequently, our client has appointed Terra Firma Consultancy to review this matter and a Landscape Response is attached to these representations at Appendix 1, together with an Opportunities and Constraints Plan for the site.

3.26 In summary, it is considered that if Policy DS3 is not deleted, it should better allow for flexibility when it can be proven that parcels of land within the ASLQ, when taken in isolation and studied in depth, can accommodate sensitive small-scale development. It is considered that our client's site has capacity for development without detriment to the wider Landscape Character Area and would also create opportunities for landscape enhancement and protection. Further site-specific details for Land adjacent to 75 Hilly Hill Lane are provided at the end of this section.

Policy HP1: New Residential Development

3.27 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.28 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.29 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.30 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.31 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.32 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.33 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.34 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.35 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.36 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.37 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.38 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.39 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.40 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.41 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.42 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.43 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.44** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.45** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury

- 3.46** Our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury has previously been promoted through the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA) dated September 2020. The site is discounted solely for the reason that it is located within a SLQA and our client's objection to this is set out above.
- 3.47** Otherwise, the SHELAA confirms that the principle of highway access to the site is acceptable, subject to allowing for the turning of refuse vehicles within the design of the access road, which could be addressed. It is confirmed that there are no known conservation constraints or noise/air quality constraints, and that the site is not within an identified area of archaeological potential. The SHELAA suggests that there is the potential for moderate to high quality

habitats and ecological interest within the woodland areas, but this could be assessed and appropriately mitigated.

- 3.48** In terms of its accessibility and sustainability, the SHELAA confirms that the site is located within 800m of accessible green space or play space, within 800m of a community/leisure facility, within 1,200m of a Primary School and within 1,600m of a Secondary School. It is also noted that the site is located 0.5 miles (by road) to the south of the A27 and its associated local facilities and services. There are also bus routes that run along Barnes Lane to the east, and the A27.
- 3.49** The SHELAA concludes that the site is both available and achievable but that it is not suitable due to its location within an ASLQ.
- 3.50** The Landscape Response prepared by Terra Firma Consultancy, enclosed at Appendix A, includes an Opportunities and Constraints Plan for the site which identifies an indicative developable area extending to approximately 0.93 hectares. On the basis of a development density of 30-35 dph, this would equate to the provision of between 28-33 dwellings on the site.
- 3.51** On the basis of the above, the Council is encouraged to allocate Land adjacent to 75 Holly Hill Lane in Sarisbury for approximately 30 dwellings. This site is controlled by a highly reputable local housing developer – Bargate Homes – who has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five-year housing land supply.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDIX 1

Landscape Response prepared by Terra Firma Consultancy and associated Opportunities and Constrains Plan

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND WEST OF OLD STREET, STUBBINGTON

ON BEHALF OF BARGATE HOMES

TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED) PLANNING AND COMPULSORY PURCHASE ACT 2004

3.0 Specific Proposed Changes **12**

4.0 Participation at the examination hearing sessions **26**

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our client, Bargate Homes. These representations are consistent with and build upon the previous representations submitted to the Council by WYG in relation to this site in response to the Fareham Draft Local Plan 2036 Supplement in February 2020, and we ask that those previous representations are also considered alongside this submission because their content is not repeated here.
- 1.2** Our client has an interest in **land to the west of Old Street, Stubbington** which was previously the subject of development proposals for up to 160 (reduced to 150) new homes (planning application P/17/1451/OA refused on 23 March 2018, and appeal ref. APP/A1720/W/18/3200409 dismissed on 22 January 2019 refer). Since this appeal decision, and in the light of the Inspector's reasoning, extensive belts of strategic woodland planting have been undertaken at the site which will have the effect of visually detaching part of the site from the Meon Valley and creating a more modest sustainably located site for about 75 new homes on the edge of the urban area of Stubbington. Our client is strongly of the view that these material changes of circumstances at the site, coupled with the need for the Council to meet its local housing target of a minimum of 514 homes per annum, justify the allocation of the site for about 75 dwellings in the local plan.
- 1.3** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 – 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Remove Strategic Gap designation from Land West of Old Street, Stubbington.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local

housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national

guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature

and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

- 2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

- 2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed

need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham

to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such it's preparation is premature.

2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities

for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading (as confirmed by the Government's announcement on 16 December 2020 that the Council's annual housing target is to remain at 514 homes per annum).

3. It is not Effective:

- 2.28 The Council has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.29 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.30 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be

included as additional housing to the minimum 514 hpa.

3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
 4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.31 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.32 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.33 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – the spatial extent of 'landscapes' should be defined here to avoid ambiguity. While the landscape as a whole could be enhanced by carefully designed development proposals, the principle of landscape change within the site itself should be established. If this requirement to 'conserve and enhance landscapes' is applied to the landscape features and character of a potential development site, then this requirement is excessive and unachievable once the landscape 'change' from an undeveloped site to a developed site is taken into account. Either the spatial extent of 'landscapes' should be defined or the requirement to 'enhance landscapes' be removed from the policy.

- 3.16** Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".
- 3.17** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.18** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS2: Development in Strategic Gaps

- 3.19** Under the heading 'Why we need this policy', Paragraph 3.43 of the Publication Local Plan states that "Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities". The introduction of 'settlement character' into the policy wording is not consistent with the evidence base which confirms at paragraph 2 in Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps that the "primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities".
- 3.20** Strategic Policy DS2: Development in Strategic Gaps should only apply to land which provides a spatial function to maintain separation of settlements and define settlement pattern rather than defining settlement character. Land west of Old Street, Stubbington does not contribute to the spatial separation of settlements, therefore Strategic Policy DS2 should not be applied to this land.
- 3.21** This view is supported by the Inspector for the appeal relating to Land west of Old Street, Stubbington APP/A1720/W/18/3200409 who stated that:

"The Meon Gap lies between Fareham/ Stubbington and the Western Wards/Whiteley. Policy CS22 requires the integrity of the gap to be maintained and the physical and visual separation of settlements to be respected. In terms of separation of settlements there is no dispute that there would be no diminution either in physical or visual terms if the development were to go ahead. The policy indicates that the gap boundaries will be reviewed to ensure that no more land than necessary is included in order to maintain gap function". (our underlining)

3.22 The Inspector goes on to state:

"It should be remembered that gap policy is a spatial tool. The Council referred to the role of the gap in maintaining the character or setting of Stubbington. This is considered in the 2017 LCA where the strategic gap designation is reviewed. However, the document makes clear that its purpose is to consider what role the landscape plays within the strategic gaps. It is not intended to examine the designation criteria, or the broad areas identified. This is important to note because it is landscape rather than spatial considerations that are key to settlement character and setting. The character and setting of Stubbington is not pertinent to gap designation or function in policy CS22".

3.23 The Inspector concluded:

"I appreciate that a review of gap boundaries was undertaken in 2012 and that no changes were recommended in relation to the land immediately adjacent to Stubbington. However, for the reasons I have given I do not consider that the proposed development of the appeal site would adversely affect the integrity of the Meon Gap". (our underlining)

3.24 For this reason, Strategic Policy DS2 should not apply to Land west of Old Street, Stubbington, because it has been confirmed that this land does not contribute to the function of the Strategic Gap. The Meon Valley is protected by many environmental designations which prevent development into this area from the Fareham side of the valley. The designated valley floor of the Meon Valley maintains separation of settlements to an extent that an adequate gap is maintained without the inclusion of Land west of Old Street, Stubbington within the Strategic Gap. Fareham Policy CS: 22: Strategic Gaps, states that "In

defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation." It is therefore unnecessary for Strategic Policy DS2 to apply Land west of Old Street, Stubbington.

3.25 At paragraph 7 of Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps states that "Where it is considered that there is capacity to absorb more development within the Fareham-Stubbington Strategic Gap, GI mitigation will be required, to a greater or lesser extent depending on the scale and nature of any development". Again, at paragraph 11 of the chapter 4 summary the Technical Review states "The ability to absorb development into the landscape exists, without compromising the integrity of the Gap function, again on the understanding that the settlement edges must include appropriate Green Infrastructure".

3.26 We submit that there is similar potential within the Meon Gap where the Gap is significantly wider than is the case for the Fareham-Stubbington Strategic Gap. This is particularly the case for Land west of Old Street, Stubbington where advance planting and green infrastructure has already been implemented during 2019 and is establishing well. This will continue to develop and establish a wooded edge to the Meon Valley, providing separation between the Meon Valley and Land west of Old Street, Stubbington. This would reinforce the wooded edge characteristics of settlements which are a feature throughout Fareham Borough, as referred to within the Fareham Borough Gap Review 2012, which states "The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap". In the case of Land west of Old Street, Stubbington the advance planting will create a wooded edge, providing a strong boundary between the site and the Meon Valley (stronger than is the case for the older housing at Hill Head where rear garden boundaries are visible from the Meon Valley) and in so doing it would be more consistent with the character of the settlement edges of the Borough. These green infrastructure enhancements already implemented will bring benefits to the biodiversity of the Meon Valley through enhanced planting and management of the existing farmland.

Policy DS3: Landscape

- 3.27** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.28** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council has created a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.29** However, if it is held that Policy DS3 should not be deleted, the following comments apply:
- 3.30** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.31** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.32** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.33 The local plan evidence at page 50 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not include the requirement for the landscape to be “protected and enhanced”. The requirement to “protect and enhance” the landscape is ambiguous because it is not clear whether it is intended to refer to the landscape of the ASLQ as a whole or if it would apply to a potential development site, within which the requirement to enhance is excessive and unachievable once the landscape ‘change’ from an undeveloped site to a developed site is taken into account. As an example, a development could provide enhancement to the ASLQ landscape through restoration of landscape features or new green infrastructure, but at a site scale the landscape ‘change’ from an undeveloped site to a developed site is unlikely to result in ‘enhancement’.

3.34 Each of the Candidate Areas of Special Landscape Quality have been assessed against the GLVIA3 Box 5.1 criteria, which is an accepted tool to assess landscape value. Land west of Old Street, Stubbington is located within ASLQ 4: Meon Valley and in LLCA 6.1c which is described as within the Landscape Assessment (2017) as:

“On the eastern side of the valley floor, area 6.1c is occupied by similar land uses but with greater variation in field pattern and enclosure. The area comprises a mosaic of smaller-scale pastures bounded by strong hedgerows and trees (particularly within the northern and southern ends of the area), two small-scale enclosed tributary valleys and some larger fields with a more open, denuded character within the central section around the Crofton Manor Equestrian Centre. Together with the adjacent horticultural glasshouses and other commercial operations, this lends a localised fringe character to the landscape but does not detract significantly from the essentially rural characteristics of the overall area”.

3.35 At Figure 3.3 each of the LCA within Fareham is assessed against the GLVIA3 ‘valued landscape’ criteria. Figure 1.3 explains the criteria in more detail, defining a ‘High match’, ‘Good match’, ‘Fair match’ and ‘Partial match’.

3.36 Land west of Old Street, Stubbington is located within LLCA 6.1c which is assessed as a ‘good match’ for all criteria, except ‘Associations’ which is a ‘partial match’. Figure 3.2 defines a ‘Good match’ as *“The area’s scenic quality and condition are both relatively high. It has a generally unspoilt, intact and coherent character with a good level of topographic and visual unity. It has several*

features of note, including natural and cultural designations, and is valued for its recreational opportunities. There are some detracting influences, but these do not generally intrude”.

3.37 We submit that the assessment of LLCA 6.1c has attributed a higher value for the ‘Recreational value’ criteria than can be justified. The southern half of LLCA 6.1c does not have any means of public access so can not be described as being ‘valued for its recreational opportunities’. In the northern half there are infrequent public footpaths and the Crofton Manor Equestrian Centre, neither of which justify the area being defined as ‘valued for its recreational opportunities’. Instead, the term ‘Recreational value is relatively limited’ is a fair reflection of the recreation provision within LLCA 6.1c as a whole, which is the definition applicable to a ‘Partial Match’.

3.38 Landscape quality (condition) is also assessed as a ‘Good Match’, despite the Landscape Assessment (2017) acknowledging its ‘denuded character’ and ‘fringe character’. This character is a feature of LLCA 6.1c, and for this reason the ‘Good Match’ definition as ‘generally unspoilt, intact and coherent character’ is not justifiable. A ‘Fair Match’ is most applicable to LLCA 6.1c, defined as “condition is moderate to good. It is generally intact and coherent with some unspoilt characteristics”.

3.39 The criteria of ‘Conservation interests’ is also assessed as a ‘Good Match’, defined as “It has a number of features of note, including natural and cultural designations”. We submit that ‘Fair Match’ is a more balanced description of LLCA 6.1c, defined as “some features of note which may include natural or cultural designations”.

Policy HP1: New Residential Development

3.40 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.

3.41 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.42 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.43 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.44 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.45 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.46 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and

- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.47 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.48 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.49 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.50 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.51 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.52 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.53 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.54 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the level of need for such units in the Borough – in the absence of this it is not clear whether the level of provision sought by this policy is appropriate.

Policy HP9: Self and Custom Build Homes

3.55 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.56 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). The total number of homes to be delivered by Welborne has reduced considerably over the last five years so this level of requirement should be reviewed as it will not yield the number of self or custom build homes as was anticipated at the time the Welborne Plan was prepared. Strategic allocations

such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.57** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.58** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Proposed housing allocation of Land West of Old Street, Stubbington for about 75 dwellings

- 3.59** In 2019 the appeal Inspector concluded that the development of the site would not adversely affect the integrity of the Meon Valley Strategic Gap. Clearly, therefore, the site should be excluded from the Strategic Gap boundary. The boundaries of the strategic gap were defined in relation to Core Strategy Policy CS22 and they were drawn in the context of the understanding of development needs at that time – an understanding which no longer reflects current reality, that being a very substantial shortfall in housing land supply and the preparation of the PLP by the Council which plans to under-provide housing against the Council's annual housing requirement of 514 homes per annum. Strategic Gap boundaries must be reviewed as part of the process of allocating additional sites for housing in this local plan, and our client's site west of Old Street, Stubbington should be removed from the Strategic Gap.

-
- 3.60** The 2019 appeal Inspector found that the West of Old Street, Stubbington site lay in an area of valued landscape. In this context, the value of the site's landscape has been re-assessed as part of our commentary on Policy DS3 above, against the GLVIA3 'valued landscape' criteria. As described, the site performs no better than as a Fair or Partial match against these criteria. When account is taken of the effect of the structural woodland planting undertaken over time, it is clear that development of the eastern part of the site will only have a minor impact on the wider landscape at most. Lying adjacent to the existing settlement of Stubbington, the introduction of development will appear entirely characteristic within the receiving landscape, while providing a strong, vegetated edge to the countryside in perpetuity. There is no doubt that the character of the developed part of the site would change, but that is no different for any greenfield development. There is no reason to assume that the site's development will be anything other than an attractive extension to Stubbington and one which is entirely congruous with its surroundings. The site's landscape containment has been enhanced through woodland planting which will both screen it from the Meon Valley and enhance its biodiversity.
- 3.61** Moreover, the western part of the site, beyond the woodland planting belt, is being used to provide mitigation habitat for Solent Waders and Brent Geese, offsetting development impact on low use SWBG sites elsewhere in borough. The segregation of this part of the site acknowledges this function and avoids its disturbance.
- 3.62** The West of Old Street site is also sustainably located for access to services and facilities and to sustainable transport modes (walking, cycling and public transport).
- 3.63** For all of these reasons, the Council is encouraged to allocate Land West of Old Street, Stubbington for about 75 dwellings. The site is controlled by a highly reputable local housing developer – Bargate Homes – which has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing session

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

POLICY HA1 HOUSING ALLOCATION – LAND NORTH AND SOUTH OF GREENAWAY LANE, WARSASH

**ON BEHALF OF
BARGATE HOMES**

APPENDICES:

Appendix 1 - Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

1.0 Introduction

1.1 The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash, identified within the emerging Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan).

1.2 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road (our client controls all but the easternmost part of this site); and 3. Land East of Brook Lane and North of Warsash Road. A Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1) is attached at Appendix 1.

1.3 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

1.4 For the reasons set out in these representations, our client strongly supports the allocation of their three land interests as part of Policy HA1. However, their view is that amendments are required to the specific wording of this policy. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).

1.5 Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.

1.6 The following representations utilise the same format as the Council’s response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HA1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B1c Which part of the Policies Map

2.4 Policy HA1 allocation site – Land North and South of Greenaway Lane, Warsash.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard

Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning

Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

- 2.9 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.
- 2.10 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.11 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.12 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.

-
- 2.13 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.
- 2.14 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.15 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.16 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.17 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

2.18 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

2.19 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.

2.20 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a

significant matter.

2.21 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.22 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.23 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

2.24 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

2.25 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's

case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.26 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.27 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.28 As stated at B3.1 above, it is unclear whether the PLP has planned to

adequately accommodate unmet need from other authorities.

2.29 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.30 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.31 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.32 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum)

between 2026/27 and 2030/31; and

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8** This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9** The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10** The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.
- 3.11** The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can

be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.16 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.17 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

3.18 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).

3.19 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**

3.20 However, if it is held that Policy DS3 should not be deleted, the following comments apply.

3.21 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

3.22 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.

3.23 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HA1: Land North and South of Greenaway Lane

3.24 As set out in the Introduction to these representations, our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash. Our client therefore strongly supports Policy HA1 and the identification of their three land interests within this proposed residential allocation.

3.25 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road; and 3. Land East of Brook Lane and North of Warsash Road.

3.26 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

3.27 The outstanding matters relating to the outline planning applications are all close to being resolved, especially now that a solution has been agreed in relation to nitrogen deposition into the Solent. It is therefore anticipated that outline planning permission can be granted for all three sites in the near future. Our client then intends to proceed to detailed planning followed by construction stages in a phased but timely manner, such that all three sites are deliverable and can therefore contribute towards the Council's housing land supply position in the short-term.

3.28 Whilst our client supports Policy HA1 and the allocation of their land interests for residential development in principle, in their view the wording of the site-specific requirements contained within the policy requires some amendments, as explained below.

a) The quantum of housing proposed shall be broadly consistent with the indicative site capacity

3.29 Policy HA1 sets out an indicative yield for the allocation as a whole of 824 dwellings. This is supported and no changes are suggested to this site-specific requirement. Our client's three land interests could provide up to 366 dwellings when combined. This includes up to 100 dwellings on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); approximately 126 dwellings on Land East of Brook Lane and East of Lockwood Road (considering our client does not control the easternmost part of the site so cannot deliver all of the 'up to 157 dwellings' approved at the outline stage); and up to 140 dwellings on Land East of Brook Lane and North of Warsash Road. This represents almost 45% of the indicative yield.

b) Primary highway access should be focused on Brook Lane and Lockwood Road with limited access via Greenaway Lane where necessary, subject to consideration of the impact on the character of Greenaway Lane

3.30 This is not supported, particularly having regard to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane). The wording of this site-specific requirement, including the use of 'limited' and 'where necessary', could be

considered to preclude the provision of a primary vehicular access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane.

- 3.31** The wording of site-specific requirement b) is inconsistent with Figure 4.1 – Policy HA1 Indicative Framework Plan contained with the PLP. Figure 4.1 identifies 'Indicative Principal Vehicular Access' points into the HA1 allocation, which are indicated by purple arrows and includes the identification of a principal access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane, located in the north-west corner of the site. Figure 4.1 also identifies two further principal accesses further east along Greenaway Lane associated with other parts of the HA1 allocation (outside of our client's control).
- 3.32** The wording of site-specific requirement b) is also inconsistent with the Illustrative Masterplan that has been approved by the Council as part of the resolution to grant outline planning permission for Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) under Ref. No. P/19/0402/OA. The approved Illustrative Masterplan includes the provision of a primary vehicular access point from Greenaway Lane, located in the north-west corner of the site (in a similar location to the purple arrow shown on Figure 4.1 of the PLP).
- 3.33** The Committee Report relating to the outline application (dated 16 December 2020), discusses highways matters at paragraphs 8.46 to 8.51. It confirms that from a highway safety perspective, the proposed access from Greenaway Lane is acceptable subject to the imposition of planning conditions (requiring the construction of the access junctions and visibility splays in accordance with the approved plans) and financial contributions towards off-site highways works and a Travel Plan.
- 3.34** The Committee Report confirms that the Highway Authority is satisfied that a safe means of access can be provided and identifies this as *"...a significant material planning consideration."* In terms of the impact on Greenaway Lane as a result of the physical alterations proposed as part of the development, the Committee Report states that these *"...are not of a level that would adversely detract from the character of Greenaway Lane or justify refusal of outline*

planning permission." The Committee Report then makes reference to the decision of the Planning Inspectorate in relation to a previous scheme for the site (Ref. No. APP/A1720/W/19/3225866 dated 11 December 2019), in which the Inspector confirms at paragraph 42 that *"...it would be possible to secure complementary development of the Greenaway Lane frontage within the scope of the reserved matters. Furthermore, highways works, and any additional traffic generated by the development, would affect only a very short section of the lane which lacks the more rural character seen towards the east."* At paragraph 38 of the Inspector's decision, it is concluded that *"...no necessity for an alternative access has been demonstrated on highways grounds."*

3.35 On the above basis, it is considered that the wording of site-specific requirement b) is inappropriate and misleading in potentially precluding the provision of a primary vehicular access to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane. This would be inconsistent with the provisions of Figure 4.1 of the PLP, as well as the Council's recent resolution to grant outline planning permission and conclusions of the previous appeal Inspector.

3.36 Accordingly, the wording of site-specific requirement b) should be amended to state:

"b) Primary highways access should be in accordance with the broad locations of the 'Indicative Principal Vehicular Access' points shown on Figure 4.1."

c) The provision of vehicular highway access between development parcels without prejudice to adjacent land in accordance with Policy D3

3.37 This is supported and no changes are suggested to this site-specific requirement. Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative secondary vehicular link roads' which are identified by dotted grey arrows. Our client agrees with the indicative location of these secondary access points within the Policy HA1 allocation, insofar as they relate to their three land interests, although it should be noted some of these connections may be bought forwards as pedestrian/cycle links only at

the detailed planning application stage to avoid more than 100 units having direct access onto Greenaway Lane.

d) The provision of a continuous north-south Green Infrastructure Corridor between the northern and southern site boundaries that is of an appropriate scale to accommodate public open space, connected foot and cycle paths, natural greenspace and wildlife habitats that link the two badger setts and other species, and east-west wildlife corridors. Highway cross-over points shall be limited in number and width and include wildlife tunnels where necessary, in accordance with the Framework Plan

3.38 The provisions of this site-specific requirement are supported in principle. The outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.39 Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative wildlife link tunnels'. This includes one running north-south on Land East of Brook Lane and North of Warsash Road which is accepted.

3.40 Figure 4.1 also shows two tunnels on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane), both of which are shown running north-south. Whilst it is acknowledged that these tunnels are only shown indicatively on Figure 4.1, it is noted that the southernmost tunnel on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) should in fact be shown running east-west, so that it crosses and runs perpendicular (not parallel to) the 'indicative secondary vehicular link road' in this location, and so that it reflects the line of the green corridor running along the southern boundary of the land parcel. Otherwise, the provision of two tunnels within this part of the allocation is accepted, as is the indicative location and orientation of the northernmost tunnel.

e) The provision of pedestrian and cycle connectivity between adjoining land parcels, as well as providing connectivity with Warsash Road and nearby facilities and services

3.41 This site-specific requirement is supported in principle and the outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.42 It is noted that it is not possible to provide direct connectivity between the land within the HA1 allocation and Warsash Road to the south, as the boundaries do not immediately adjoin the road. However, the outline illustrative masterplans provide pedestrian and cycle linkages to Brook Lane, which in turn leads to Warsash Road and nearby facilities and services.

3.43 In relation to the development proposals for Land East of Brook Lane and North of Warsash Road, it has previously been proposed to provide a pedestrian/cycle link from the southern boundary of the site into the rear car park of The Victory Hall which fronts on to Warsash Road. However, this proposal was not supported by the relevant stakeholders and so has not been carried forward into the illustrative outline masterplan for the site.

f) Building heights should be limited to a maximum of 2.5 storeys, except for buildings which front onto Greenaway Lane and Brook Lane where building heights shall be limited to a maximum of 2 storeys

3.44 The first part of this site-specific requirement is not supported. It is considered that some elements of 3 storey development are appropriate on the allocation site, provided they are located sensitively in the central parts of the site and setback from the site boundaries, allowing them to be appropriately screened and for a buffer to be provided to existing adjoining land uses. This is consistent with the requirement for the efficient use of land as set out in the NPPF.

3.45 The second part of this site-specific requirement for buildings fronting Greenaway Lane and Brook Lane to be limited to a maximum of 2 storeys is accepted.

g) Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does

not impact on living conditions

3.46 This is not supported. The wording of this site-specific requirement suggests that any tree that is subject to a Tree Preservation Order (TPO) cannot be removed. This is not appropriate and is not justified, particularly in light of the vehicular link required through TPO woodland in the southern most portion of the allocation. It is possible that cases may arise where it is necessary to remove a tree even if it is subject to a TPO, for example if the tree is no longer in a good condition or if it poses a health and safety risk in the future.

3.47 The wording of this site-specific requirement should be amended to provide greater flexibility and should state:

"Where possible, existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living conditions, unless agreed in writing with the Local Authority."

h) A Construction Environmental Management Plan to avoid adverse impacts of construction on the Solent designated sites shall be provided

3.48 This is supported and no changes are suggested to this site-specific requirement.

i) Provide future access to the existing underground water and wastewater infrastructure for maintenance and upsizing purposes (included at the request of Southern Water)

3.49 This is supported and no changes are suggested to this site-specific requirement. These measures can be incorporated into the detailed design for the three land parcels controlled by our client to ensure that future access is provided.

j) The site is identified as a mineral safeguarded site (sand and gravel are likely to underlay site). A Minerals Assessment will be required prior to any

development in accordance with the Hampshire Minerals and Waste Plan (2013)

3.50 The justification and evidence in support of this site-specific requirement are unclear. From our review of the information available on Hampshire County Council's (HCC) website, including the HCC Minerals and Waste Plan (adopted 2013) and its associated online Proposals Map, the HCC Minerals and Waste Safeguarding in Hampshire Supplementary Planning Document (adopted February 2016) and the HCC Minerals and Waste Plan Minerals Consultation Area (2015), the land within the Policy HA1 allocation does not appear to be identified as a minerals safeguarded site or as having any potential to be underlain by any mineral resources.

3.51 Furthermore, this matter has not been raised during the outline planning stages for our client's land interests.

3.52 This site-specific requirement is therefore not supported and should be deleted in relation to the Policy HA1 allocation.

k) Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4 and NE3. In addition, the following site-specific infrastructure will be required:

i) Two junior football pitches on-site; and

ii) Off-site improvements to existing sports facilities

3.53 The wording of site-specific requirement k) implies that financial contributions will definitely be required. This wording should be amended to provide more flexibility, in the event that it is agreed between the relevant parties that contributions are not in fact required in relation to one or more of the matters referred to.

3.54 The provision of reasonable financial contributions towards education and transport are accepted in principle where a specific need is identified and at an appropriate level to be agreed between the relevant parties.

3.55 In terms of our client's three land interests, financial contributions towards

education and transport have been agreed in principle through the resolutions to grant outline planning permission, with Section 106 Agreements to secure these being agreed prior to the outline planning permission for each site being issued.

3.56 The reference in site-specific requirement k) to providing contributions towards health is not supported. The Committee Report relating to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) (Ref. No. P/19/0402/OA dated 16 December 2020) discusses this matter with regard to a request from the University Hospital Southampton NHS Foundation Trust for a financial contribution to provide services needed by the occupants of the proposed new dwellings. The Officer's comments at paragraphs 8.64-8.68 of the Committee Report are as follows:

"In considering the requests it is noted that the construction of houses does not itself lead to population growth. Officers consider that the need for housing is a consequence of population growth. Furthermore, there is no account in the representations, it seems, for the potential for the residents of the new development to be moving locally around the Borough or adjoining boroughs such that their residence locally is already accounted for by the current services and funding commissioned by the hospital..."

...The length of time between sites being identified, planning permission being granted, and the houses actually being constructed and subsequently occupied is many years. The amount of residential development coming forward in the Borough which has not been reasonably foreseeable for a period of year is therefore very limited.

In January 2019 the NHS launched its new 10-year plan. This plan sets out how the NHS thinks it can overcome the challenges that the NHS faces, such as staff shortages and growing demand for services. This is to be achieved essentially by doing things differently and at no point does it refer to the need for new developments to provide for healthcare services by means of financial contribution such as that requested by the Trust.

For the reasons set out above, Officers do not consider that the contribution

sought by the Trust is necessary to make the development acceptable in planning terms and thus the tests for planning obligations as set out above are not considered to have been met. Furthermore, given the adopted policy framework it is considered that in the absence of the contribution, the application does not fail as a consequence as this issue alone would not justify a reason for refusal, which it must do in order to make the contribution necessary to make the development acceptable in planning terms and meet the test for a planning obligation."

- 3.57** The same conclusions should be made in terms of site-specific requirement k) and the reference to health should therefore be deleted.
- 3.58** Finally, the requirement to provide two junior football pitches on-site is not supported. During the time that developers in the 'Warsash Cluster' have been in discussion with FBC in relation to their land interests, the Council has not been able to justify why on-site provision is needed and appears to have been an aspiration which has not been properly considered. The provision of sports pitches in this location is not appropriate, particularly having regard to the likely noise and traffic implications associated with this use, as well as the presumed need for a complementary pavilion. Site-specific requirement k) i) should therefore be deleted.
- 3.59** In terms of the requirement to provide off-site improvements to existing sports facilities, this is inconsistent with the financial contributions that have been agreed as part of the resolutions to grant outline planning permission for our client's three land interests and this requirement has not been raised by FBC as part of this process. The wording of site-specific requirement k) should therefore be amended to provide more flexibility, so that it cannot be interpreted that an off-site financial contribution towards sports facilities is required in relation to all land parcels within the Policy HA1 allocation (such as our client's three sites), but so that this can be sought in relation to the other parcels of land if justified and agreed between the relevant parties.
- 3.60** Taking into account all of the above, the wording of site-specific requirement k) should be amended to state:

"Infrastructure provision or contributions including but not limited to education and transport may be necessary in line with Policy TIN4 and NE3. In addition, contributions towards off-site improvements to existing sports facilities may be required."

Figure 4.1 – Policy HA1 Indicative Framework Plan

3.61 Figure 4.1 includes the identification of areas referred to as 'open space or development options. Development not on both', which are marked by a light green diagonal hatching. The only areas annotated as such on Figure 4.1 relate to our client's interest at Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) – one is shown at the western end of the site frontage with Greenaway Lane and the other running north-south in the centre of the site.

3.62 These annotations are not necessary and should be deleted as their intended purpose is unclear. The agreed illustrative outline masterplan for this site shows that development will be set back from Greenaway Lane with a linear area of public open shown across the entire site frontage, which in turn connects with further public open space shown running north-south through the centre of the site.

Policy HP1: New Residential Development

3.63 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.64 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.65 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.66 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.67 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.68 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.69 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.70 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.71 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.72 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.73 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.74 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.75 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.76 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.77 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.78 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.79 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.80** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.81** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDICES:

APPENDIX 1:	LANDSCAPE EVIDENCE
-------------	--------------------

1.0 Introduction / Details

- 1.1** The following representations are made by Pegasus Group on behalf of our clients Bargate Homes Ltd and Sustainable Land. Our clients have interests in an area of land between Newgate Lane and Newgate Lane East (the new relief road) in Peel Common. Applications for outline planning permission (refs. P/18/1118/OA and P/19/0460/OA) have been made at 'Land at Newgate Lane' which together will provide for the development of up to 190 homes. Both applications are currently the subject of undetermined appeals.
- 1.2** Representations have been made in respect of the sites in response to the Regulation 18 consultation on the original version of the draft Local Plan in December 2017, and again in July 2019 and in February 2020 on subsequent consultations for the new Local Plan. The site continues to be promoted through the Local Plan process as it represents a sustainable and deliverable option to deliver much needed housing in this authority.
- 1.3** Our clients are important stakeholders within Fareham and are keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF).
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. The exceptions are questions A (1,2 & 3) and B5 (parts a & b) where a single response at the beginning and end of the representations is provided, respectively. This is because these responses are common to all questions and our representations.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.2 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

2.3 The NPPF (paragraph 33) states that plans should be reviewed every 5 years and updated as necessary. Previously the local planning authority indicated that this local plan review would amalgamate the adopted Local Plan Parts 1, 2 and 3 into a single new plan. Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. Recently, serious doubts have been expressed over whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. Certainly, the development is not currently "deliverable" in NPPF terms.

Taking all of this into account, the Welborne Plan should be reviewed, which it has not (PLP paragraph 4.9). It is also clear that at this stage the Council suggests that it is not intending to review the Welbourne Plan (Local Development Scheme (LDS), paragraph 1.5). Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

2.4 Include a review of the Welborne Plan in this Local Plan review.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.5 Compliance with the NPPF requirement to review plans and provide an up to date framework to ensure housing delivery.

B4c Your suggested revised wording of any policy or text

2.6 Not applicable.

3.0 Strategic Policy DS2: Development in Strategic Gaps

B1 Which part of the Local Plan is this representation about?

3.1 The following comments relate to the Policy DS2, the supporting text and the inclusion of our clients' land between Newgate Lane and Newgate Lane East (the new relief road) in Peel Common within this designation.

B2 Do you think the Publication Local Plan is:

Legally compliant – N/A

Sound - No

Complies with the duty to co-operate – N/A

3.2 The Fareham Local Plan is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

3.3 The PLP, paragraph 3.43, identifies that the:

"...primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities."

3.4 The proposed policy seeks to strengthen the current Core Strategy policy position, contained within Policy CS22 with regards to preventing settlement coalescence. It is stated in the PLP this has been undertaken in response to the NPPF and recent planning decisions (paragraph 3.44). The Council's evidence in relation to this policy is contained within the September 2020 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' document. Chapter 2, section 4.2, seeks to apply the NPPF to this policy.

3.5 The interpretation of the NPPF in this section is selective and as such misleading. For example in referencing paragraph 20 of the NPPF it states:

"Strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for... conservation and enhancement of the natural, built and historic environment, including landscapes."

3.6 This fails to recognise that strategic policies should also set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for housing (including affordable housing), employment, retail, leisure and other commercial development. The Council's evidence also refers to paragraph 170 of the NPPF noting:

"planning policies and decisions should contribute to and enhance the natural and local environment by... protecting and enhancing valued landscapes... (in a manner commensurate with their statutory status or identified quality in the development plan)".

3.7 It must, however, be recognised that the strategic gaps do not have any statutory status therefore shouldn't be unduly restrictive. A tightening of restrictions would be contrary to the NPPF. The policy does identify that development can be accommodated within the Strategic Gap. Indeed, the previous iteration of the plan identified site HA2 and Strategic Growth Areas within the Fareham – Stubbington Strategic Gap. Thus, suggesting that development in the gap is not prohibitive per se.

3.8 Within our representations on the draft Local Plan Supplement we argued the evidence base lacks robustness and has been applied without justification. The updated evidence does not overcome these concerns. Our clients site is situated within parcel 8c of the updated evidence. The study suggests that despite the proximity of Fareham and Gosport in the north part, the gap is currently still effective in providing a 'sense of separation', but it is at risk. It is further noted at point 15 that;

"Whilst the recently completed Newgate Lane South road development does not alter the experience of entering the urban area of Gosport beyond the Peel Common Roundabout, it does reduce tranquillity and bring more built features

(such as noise attenuation barriers) into this part of the gap.”

- 3.9** Despite this significant development, the ‘Technical Review of Areas of Special Landscape Quality and Strategic Gaps’ simply re-iterates previous conclusions from earlier analysis undertaken by LDA and described in the Fareham Borough Landscape Character Assessment, 2017. There is no consideration as to how the development of Newgate Lane South has altered the area. Clearly, the new highway has added a substantial urbanising influence upon the gap, this should be assessed. The blanket approach taken within the policy does not recognise these substantial changes.
- 3.10** Within our client’s appeal evidence in relation to applications P/18/1118/OA and P/19/0460/OA we provide evidence in relation to landscape and visual matters. This evidence takes full consideration of the strategic gap and identifies that Peel Common is not well defined as a coherent area of settlement character due to the fact the settlement appears to be based on the progression of wayside and ribbon development since the early twentieth century. It also notes that the amenity value of the area has altered since the completion of Newgate Lane East. It was concluded that this parcel makes a limited contribution to the wider context of the strategic gap.
- 3.11** The protection of the Strategic Gap is currently governed by policy CS22 of the Core Strategy, which does not permit development where it significantly affects the integrity of the gap. The policy provides a useful starting point for considering the purpose of strategic gaps. It states:
- 3.12** *“Their boundaries will be reviewed in accordance with the following criteria:*
- a) The open nature/sense of separation between settlements cannot be retained by other policy designations;*
 - b) The land to be included within the gap performs an important role in defining the settlement character of the area and separating settlements at risk of coalescence;*
 - c) In defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation.”*

3.13 Taking each of these key criteria in turn:

Openness and sense separation

3.14 Although the proposed development site is a greenfield site within the countryside, it would not represent isolated development. The site is located to the west of the settlement of Bridgemarky. The development will become a cohesive part of the Bridgemarky neighbourhood through the provision of key pedestrian links and local facilities (open space and children's play areas) for the benefit of the wider community.

3.15 The site is bounded by Newgate Lane East to the east. To the west it is bounded by Newgate Lane, which is the focus of ribbon development, and beyond this the Peel Common Waste Water Treatment Works and solar farm. If the site is not developed, then it will be an open pocket of land between the two roads within an otherwise urbanized landscape, which in our view is of inherently less value in terms of its contribution to the strategic gap.

3.16 It is notable that the Council's evidence 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' identifies the Peel Common Waste Water Treatment Works to provide a strong physical and visual gap between Gosport and Stubbington (Area 8b), and to a lesser extent so does the Solar Farm. This physical and visual gap would not be affected by development on our clients' sites.

3.17 The Council's evidence also identifies that a Green Infrastructure (GI) Strategy or Framework would be beneficial to enhance the GI value of the current gap and potentially help determine an appropriate GI framework for moderately scaled development. Our clients' proposals would enhance the provision of GI through the provision of on-site open space and pedestrian linkages. It should be noted that due to the site being within private ownership there is currently no public right of way connectivity, such that it has no real functional value as GI other than its contribution to a wider landscape setting.

3.18 As such, although the development of the site would necessarily have an urbanizing effect on the existing open land, good growth could be achieved without compromising the gap between the existing urban edge of Fareham/Bridgemarky and Stubbington.

Defining the Settlement Character and Preventing Coalescence

- 3.19** The character of the site and surrounding area is defined by both the natural and built environment, having regard to the landscape setting in which it sits.
- 3.20** The development of the site, by extending the boundary of the Fareham/Gosport built-up area would not have the effect of coalescence with Stubbington. The settlement character of Bridgemary is distinct from that of Stubbington. Whilst both are characterized by large areas of low-rise, medium-density development from the late-20th century (and in the case of Bridgemary also from the pre-war era), the development of Bridgemary as a suburban extension of Fareham/Gosport lends it a different character compared with Stubbington's growth as a distinct village with a more extensive local centre.
- 3.21** The remaining Strategic Gap will still achieve a 'green' gap between the two settlements such that the distinct identities of the two settlements are reinforced by their physical and visual separation.

Extent of Gap Required

- 3.22** Most obviously, the development of the Land at Newgate Lane would retain a 'green' gap between the two settlements. The extent of this gap remaining is sufficient to prevent coalescence in line with the policy consideration in Core Strategy Policy 22.
- 3.23** This green gap will also help to retain the physical and visual separation of the settlements, an effect which will be further enhanced by the introduction of the Stubbington By-Pass which will serve to sever them further. The location of Land at Newgate Lane is not within the 'pinch point' between Fareham and Stubbington. Further north, the Strategic Gap between the two settlements narrows, and an extension to Fareham in this location would reduce the gap to a much greater degree or eliminate it. This makes Land at Newgate Lane a preferable development location than sites north of Peel Common/West of Fareham in terms of impact on coalescence.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

- 3.24** The policy and proposals map should be amended to either exclude our client's site from the strategic gap or it should be identified as a location which could accommodate sensitive development.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 3.25** It would be justified by the evidence and would assist the Council in achieving an appropriate housing requirement.

B4c Your suggested revised wording of any policy or text

- 3.26** See response to B4a above.

4.0 Policy H1: Housing Provision (including supporting text)

B1 Which part of the Local Plan is this representation about?

4.1 Policy H1: Housing Provision and all supporting text.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

4.2 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective, positively prepared or justified.

B3 Please provide details you have to support your answers above.

4.3 The PLP has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in the "Changes to the Current Planning System"; but instead has published a revised approach to the standard method, which retains the method in its current form except for London and 19 of the most populated cities and urban centres.

4.4 The key change is to apply a 35% uplift to the standard method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

- 4.5** The National Planning Policy Framework (NPPF) states (paragraph 16 a) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on a consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 4.6** The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives.
- 4.7** The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the extant local housing need target is 514 homes per annum (hpa). Instead, the PLP plans for 403hpa, thereby failing to plan for the area's objectively assessed need and failing to contribute to the achievement of sustainable development.
- 4.8** The PPG (ID 2a-003-20190220) is clear that the current standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).

-
- 4.9** As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current standard method must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 4.10** The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure. However, given that there is no change for Fareham this is irrelevant.. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on a figure of 403hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.
- 4.11** It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities, as set out in a statement of common ground, is one reason why local housing need calculated using the current standard should be exceeded.
- 4.12** Paragraph 4.4 of the PLP states that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". However, in response, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. This produces an overall plan requirement of 7,295 dwellings, equivalent to 456hpa. The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "*...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution.*" It is not clear how this "general contribution" has been calculated but it appears inadequate.

4.13 Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no statements of common ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather, the Council speculates that this contribution would be “ratified” by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented suggests a higher requirement of 1,000 dwellings from a single authority.

4.14 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, which fundamentally means that the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4.15 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification.

Phased Provision

4.16 In addition to the issues with the overall requirement, Policy H1 also seeks to identify a ‘phased’ requirement. The overall supply is at least 8,389 dwellings this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required. Policy H1 seeks to ‘phase’ this supply identifying the following:

- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
- Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,
- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

4.17 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

4.18 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

4.19 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now and to do otherwise is not justified or effective.

Housing Supply

4.20 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27

junction 10.

4.21 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4-years¹. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

4.22 Our client's sites, SHLAA references 3129 and 3161, should be considered for allocation. Both sites are sustainable being well located in terms of accessibility to services, facilities and employment. They also have good access to public transport opportunities. Furthermore, whilst the sites are located within the Fareham – Stubbington Gap, there are no unsurmountable specific statutory or non-statutory landscape related planning designations.

4.23 The SHLAA identifies that both sites are discounted because:

"Development in this location would not be in keeping with the settlement pattern and would change the settlement character of Peel Common. The site is therefore considered unsuitable for residential development."

4.24 Our clients fundamentally disagree with these points. This is discussed in greater detail within our response to Policy DS2 above. However, in summary the sites are well located in relation to the settlement of Bridgemary and our evidence identifies that development in this location would have a limited impact due to the recent completion of the Newgate Lane East site. The proposals could also enhance the strategic gap through the provision of appropriate Green Infrastructure.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

4.25 The following amendments are necessary to ensure that the plan is legally compliant and sound.

¹ APP/A1720/W/19/3230015

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Undertake SA of all reasonable alternative housing requirements.
5. Provide a housing requirement which is not phased and meets needs now.
6. Provide additional allocations, including our clients, which can deliver in the short-term.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 4.26** Compliance with the NPPF requirement for the housing requirement to be based upon current local housing need standard method as a minimum. To comply with relevant legal and procedural requirements.

B4c Your suggested revised wording of any policy or text

- 4.27** Not applicable, as this will be dependent upon the outcome of the work identified in response to question B3.

5.0 Policy HP4: Five-Year Housing Land Supply

B1 Which part of the Local Plan is this representation about?

5.1 The following comments relate to Policy HP4 and all supporting text.

B2 Do you think the Publication Local Plan is:

Legally compliant – N/A

Sound - No

Complies with the duty to co-operate – N/A

5.2 The Fareham Local Plan is unsound as it is not effective or justified.

B3 Please provide details you have to support your answers above.

5.3 Whilst the principle of the policy is supported the current wording is considered contrary to its stated purpose. The supporting text identifies that this policy is required to provide flexibility if a five-year housing land supply cannot be demonstrated. However, in accordance with the NPPF, paragraph 11d, in such cases the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply.

5.4 It is therefore not justified to seek to apply additional requirements upon developments should a five-year supply not be demonstrable. For example, the requirement for the scale of the site to be relative to the shortfall is not only unclear but could be prohibitive of sustainable sites being brought forward. Furthermore, many of the criteria are replicated from other policies and as such are superfluous.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

5.5 A more positive policy is justified. Parts a, c, d and e should be deleted to avoid repetition and conflict with the NPPF.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

5.6 See above.

B4c Your suggested revised wording of any policy or text

5.7 See above.

6.0 Participation at the examination hearing sessions

B5a If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

6.1 Yes, I want to take part in the hearing sessions.

B5b Please outline why you consider it necessary to take part in the hearing session(s):

6.2 There are several detailed and complex points made within our representations which would benefit from further debate and consideration. It is also important that our clients can respond orally to hearing statements made by the Council and other participants to ensure that the Inspector has a full understanding of our case.

APPENDIX FL&BH 1.2.4	Landscape Analysis of the Strategic Gap

1. INTRODUCTION

Qualifications and Experience

- 1.1. My name is James Atkin. I hold the position of Director (Landscape) in the Birmingham Office of the Pegasus Group. The Company undertakes all aspects of planning, urban and landscape design and environmental planning. I have a Bachelor of Science Degree in Landscape Design and Plant Science and a Diploma in Landscape Management, both from the University of Sheffield. I am also a Chartered Member of the Landscape Institute (2005).
- 1.2. I have over 19 years professional experience specialising in the application of landscape and visual assessment and the use of best practice guidance. I have authored landscape and visual impact appraisals, assessments and evidence, both in the UK and in the international context.
- 1.3. Prior to joining the Pegasus Group I have worked in multidisciplinary consultancies, including Wardell Armstrong LLP and Atkins, advising on landscape and visual matters across a range of sectors including power, highways, rail, housing, waste, land reclamation and restoration, mineral extraction, commercial developments and renewable energy.
- 1.4. Since joining the Pegasus Group I have completed a number of detailed LVIA's for sites across the UK, including residential development and mixed use development schemes, care home developments, solar installations and commercial development. As an inherent part of this work I apply an iterative process of landscape and visual appraisal and assessment to inform masterplanning principles which avoid or respond to landscape and visual constraints and opportunities.
- 1.5. In this context I have produced technical documents on landscape and visual matters for use in the emerging design process, for planning applications and at appeal. I am currently involved in a variety of projects for mixed use and residential masterplans, of varying scales between 10 and 1000 units, in both urban and urban fringe environments, where matters of sensitive and designated landscapes are key considerations. The diversity of these different project types has enabled me to develop a strong understanding as to how different landscapes can respond to different types of development.

Terms of Reference

- 1.6. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 1.7. The outline application for 'Land at Newgate Lane (North) (Fareham Land LP; LPA ref. P/18/1118/OA) sought permission for:
- The demolition of existing buildings and development of up to 75 dwellings, open space, vehicular access point from Newgate Lane and associated and ancillary infrastructure, with all matters except access to be reserved.
- 1.8. The outline application for 'Land at Newgate Lane (South) (Bargate Homes Limited; LPA ref. P/19/0460/OA) sought permission for:
- The demolition of existing buildings and development of up to 115 dwellings, open space, vehicular access point from Newgate Lane and associated and ancillary infrastructure, with all matters except access to be reserved.
- 1.9. These are referred to as the 'northern' site and the 'southern' site respectively.
- 1.10. Whilst the two sites are subject of separate applications, it is important to note that the proposals have always been conceived as a cohesive development, together addressing the constraints and opportunities in respect of the local landscape context and providing a cohesive and complementary strategy for development and mitigation.
- 1.11. The evidence presented herein applies to both appeals, unless specifically stated otherwise.
- 1.12. Each application was supported by a Landscape and Visual Impact Assessment (LVIA), prepared by Pegasus Group on behalf of the appellants. Reference is made to the content and findings of these where relevant, supplemented by additional professional judgement as necessary.

Evidence Structure

- 1.13. The evidence is structured as follows, including this introduction (section 1):
- At section 2, I give a brief description of the appeal sites in their context, and the appeal scheme, including an analysis of constraints and opportunities and development potential (based on my own observations and judgement);
 - At section 3, I present a brief background to the appeal, including a summary of the Council's reasons for refusal where these are relevant to landscape and visual matters;
 - At section 4, I address the key issues in the reason for refusal in respect of landscape and visual matters, and present additional analysis of these;
 - At section 5, I address policies relevant to landscape and visual matters; and
 - At section 6, I provide a summary and conclusions.
- 1.14. Principles and good practice for undertaking landscape and visual impact assessment (LVIA) and/or applying the principles of LVIA are set out in the Landscape Institute (LI) and the Institute of Environmental Management (IEMA) Guidelines for Landscape and Visual Impact Assessment, Third Edition (2013)¹ (GLVIA3). The concepts and procedures set out in this guidance have been adopted where appropriate.
- 1.15. The professional judgements which are presented in this evidence for this appeal (reference LPA reference P/18/1118/OA and P/19/0460/OA) have been prepared in accordance with the guidance of my professional institution. I confirm that the opinions expressed are my true and professional opinions.

¹ Landscape Institute and Institute of Environmental Management and Assessment, Guidelines for Landscape and Visual Impact Assessment 3rd Edition (April, 2013)

2. THE APPEAL SITES

2.1. This section sets out an overview of the appeal sites and their context.

Overview

- 2.2. Together, the appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham and Gosport and within a discreet parcel of land that is bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east (with Newgate Lane and Newgate Lane East framing the northern edge of the sites also).
- 2.3. Hambrook Lodge (accessed from the west, off Newgate Lane) Lodge and its curtilage is located between the two sites, but the property (and the access to the property) is not included in the red line boundary for the sites.
- 2.4. The appeal sites are located outside the defined settlement boundary identified in the Local Plan policies map, in a 'Strategic Gap' known as the Fareham/Gosport to Stubbington/Lee on Solent Gap (or simply the Fareham - Stubbington Gap).
- 2.5. They are not subject to specific statutory or non-statutory landscape related planning designations.

Description and Context

- 2.6. The sites are located between Fareham and Gosport, adjacent to the suburbs of Woodcot and Bridgemary which are located to the east and adjacent to Peel Common which is located to the west.
- 2.7. The northern site comprises three enclosures, the largest of which is currently in arable production, the smaller two are in pastoral use. These cover an area that surrounds the northern extent of Hambrook Lodge which itself includes a number of related buildings (some dilapidated) and is generally enclosed by mature vegetation.
- 2.8. The southern site comprises four mixed use agricultural enclosures, the fields to the east are currently in arable production, whilst the field to the west, adjacent to Peel Common and Newgate Lane are in use as pastoral and equestrian paddocks. A small watercourse and drainage ditch bisects the southern site and reinforces the differentiation between the land uses of the eastern and western areas.

- 2.9. Newgate Lane is located immediately to the west of the sites and forms a connection with the southern edge of Fareham and, further south Gosport Road (noting that this is closed to traffic but retains a link for pedestrians and cyclists). Immediately to the east is the route of the new relief road, Newgate Lane East. Newgate Lane East is accessed from Newgate Lane by a T-junction, situated just north of the northern parcel.
- 2.10. The wider landscape context is set within the low-lying ground of the coastal plain landscapes and characterised by abrupt transitions between the open landscapes of the coastal plain and the urban environments which abut these. These urban areas include Fareham, Gosport and Woodcot and Bridgemary to the north and east. The settlement area of Stubbington, a medium scale, predominantly residential area is located to the west. The settlement edge of Stubbington forms the western extent of the Fareham to Stubbington strategic gap. In this context the strategic gap comprises an area of open landscape that extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.

Recent Landscape Change

- 2.11. The LVIA reports submitted in support of the planning applications were prepared and finalised in late 2018. These included reference to the published landscape character study for the Borough (The Fareham Landscape Assessment, 2017) which was prepared by LUC on behalf of Fareham Borough Council (FBC) and forms part of the evidence base to the current Local Plan.
- 2.12. The appeal sites are located in an area defined by the LUC study as 'LCA 8, Woodcot-Alver Valley' (including sub areas 08.1a and 08.2b). In relation to 'LCA 8, Woodcot-Alver Valley', the LUC study acknowledges the emerging proposals of the Fareham bypass (Newgate Lane East) and potential strategic housing development on the edge of Woodcot/Bridgemary (parcel HA2) and the landscape change that these may bring.
- 2.13. Since the publication of the LUC study (and submission of the Pegasus Group LVIA work) the proposals for Newgate Lane East have been constructed and the route has been open to traffic since April 2018; the majority of landscape works were completed in the 2018/19 season.
- 2.14. Although both the LUC study and the assessment of impacts undertaken in the submitted Pegasus Group LVIA make reference to the potential bypass and how it will

influence the local landscape, there is now scope to consider the actual and current baseline situation.

3. BACKGROUND TO THE APPEAL

3.1. The background to the proposal is set out in full, in the main Statement of Case, prepared by Pegasus Group on behalf of the appellant. This section provides a brief overview of the background relevant to landscape and visual matters.

Application

3.2. The applications were submitted in September 2018 (north) and April 2019 (south), with each supported by a separate Landscape and Visual Impact Assessment, prepared by Pegasus Group (**CDA.48** and **CDA.106**).

3.3. In respect of both appeal sites, landscape and visual matters formed part of an iterative design process that guided the evolution of the masterplans and integration of mitigation measures into the schemes.

3.4. For both sites, the submitted LVIA work demonstrated a limited effect on landscape character, whereby impacts are restricted to a local level.

3.5. The work also demonstrated that the proposed developments would not detract from the function of the wider strategic gap, both due to the inherent character of the landscape itself, and also due to the physical and visual separation that is present between the sites and the more obvious and open part of the strategic gap between Peel Common and the eastern edge of Stubbington.

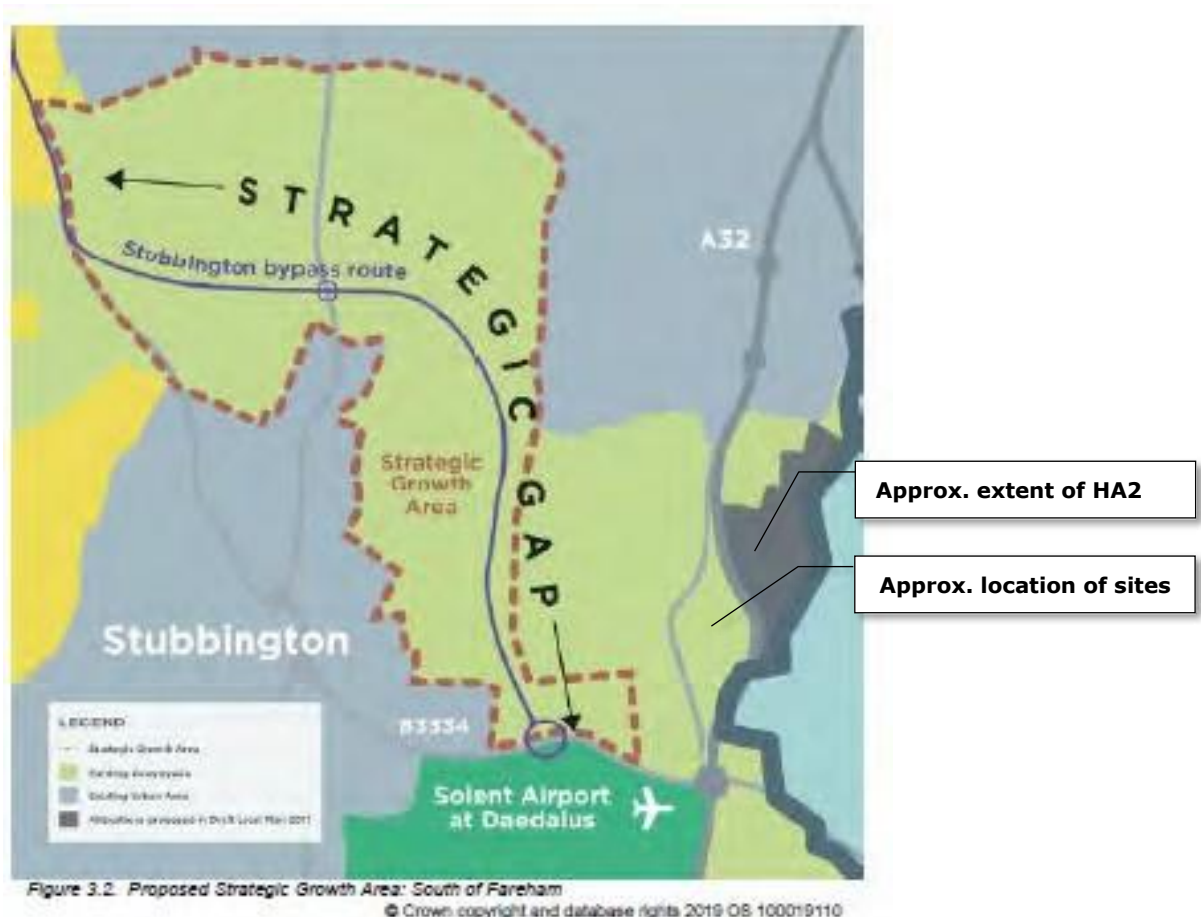

3.6. For views and visual amenity, the submitted LVIA work also demonstrated that the sites (and proposed developments) would be generally screened by existing development and existing mature vegetation, the influence of both being augmented by the low lying and relatively flat nature of the landform. Prominent views of the sites would only be available from its immediate context along Newgate Lane and Woodcote Lane with the greatest degree of visual effect from locations immediately adjacent to the sites, and from a small number of existing individual residential properties, again, located close to (or adjacent to) the site. Together, and in the balance of landscaped and visual matters overall, these impacts and effects are were not considered significant in landscape and visual terms.

3.7. During the process of the application, further design changes have occurred; these either maintain or improve the proposed mitigation which forms an inherent part of the schemes.

Further Landscape and Visual Studies

- 3.8. Since the submission of the planning applications, the LPA has continued with the development and review of the Local Plan.
- 3.9. In previous iterations, notwithstanding the continued adoption of 'Strategic Gap' policies in this part of the Borough, the emerging local plan proposals had identified a 'Strategic Growth Area' situated across the landscape between Stubbington and Fareham, overlapping with a large part of the retained Strategic Gap. This had also indicated the inclusion of a housing allocation (HA2) on the southern edge of Fareham.

Plate 1: Extract from Fareham Draft Local Plan 2036 Supplement

- 3.10. In that previous iteration, the boundary of the Strategic Gap had been drawn to extend up to the settlement edge of Bridgemary (whilst incorporating the proposed housing allocation of HA2 and the recently constructed New Newgate Lane). In contrast, the Strategic Growth Area had been drawn to an eastern limit up to the existing waste water treatment works and the solar farm that are present to the south-west of the edge of

Fareham, noting that the extent of that boundary would exclude both appeal sites and exclude the emerging HA2 allocation.

- 3.11. Notwithstanding that the Fareham Landscape Assessment (LUC, 2017) forms part of the evidence base for the policy proposals, it was necessary to address the purpose and function of the gap and the proposed area of strategic growth.
- 3.12. In order to address this issue, Pegasus Group undertook a strategic level study of the Fareham-Stubbington Strategic Gap, including the area up to the Gosport boundary (**CDA.54**).
- 3.13. The aim of that study was to identify the core areas of Strategic Gap which were considered more fundamental to the function of the Strategic Gap in terms of preventing coalescence between settlements and maintaining of settlement identities. The study identified 'Priority Areas' that should be maintained as Strategic Gap, with areas outside of these considered further for growth.
- 3.14. The study concluded that areas on the northern and western edges of Stubbington and at Fareham (along Longfield Avenue and between Peel Common and Woodcot/Bridgemary) can accommodate growth and that development in these areas would not fundamentally undermine the physical separation, nor the sense of separation between Stubbington and Fareham.
- 3.15. During the course of the appeal FBC continued to progress their Local Plan. The evidence base to the latest draft Local Plan 2036 included a 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' (2020) undertaken by Hampshire County Council on behalf of FBC (**CDG.7**). The content and findings of this study are considered later in my evidence.

Consultation Responses

- 3.16. A summary of the main relevant consultation responses to the application are set out in the following section.

Urban Design, Fareham Borough Council

- 3.17. The response from FBC on landscape and visual matters was prepared by the Urban Design officer (4th February 2019) (**CDB.5a**). These comments were limited to the northern site and broadly suggested that the proposed development would have an

'unacceptable negative impact upon the integrity of the existing open, predominantly rural agricultural character', of the landscape'.

- 3.18. However, it was felt that the conclusions of the consultation response did not sufficiently consider the (then) emerging baseline of Newgate Lane East and potential strategic development site (HA2), consequently the response overemphasised the degree of impact arising from the scheme.
- 3.19. In this context Pegasus Group prepared a comprehensive response to address the points raised (refer to **CDA.41**).
- 3.20. In a separate, later, response, the Urban Design officer requested that the layout be reworked to make a 'less formal block structure' (**CDB.5b**). These comments were addressed in revisions to the LVIA and ILMP, which were resubmitted as LVIA Rev D (**CDA.48**).

Principal Tree Officer, Fareham Borough Council

- 3.21. No objection is raised in response to trees, with the tree officer noting that 'the illustrative masterplan shows the developable area with the majority of the existing field boundary trees and hedges retained and incorporated into public green space' and concluding that 'the principle of development within the area shown is broadly acceptable in arboricultural terms'.

Gosport Borough Council

- 3.22. Gosport Borough Council (GBC) have objected to the applications, noting issues of the strategic gap and green infrastructure.
- 3.23. In relation to the first point, GBC suggest that the 'scale and location will undoubtedly harm the integrity of the gap and will diminish the physical and visual separation of the settlements.
- 3.24. GBC go on to suggest that the sites would diminish the opportunities to make the 'optimum use' of green infrastructure, and particularly in providing green linkages from Fareham to the coast via the Alver Valley Country Park.

Natural England

- 3.25. The response from Natural England refers to green infrastructure provision, noting that the development is within in area that could benefit from enhanced green infrastructure provision.
- 3.26. In relation to landscape, the Natural England response notes that the proposal does not appear to be within, or within the setting of, any nationally designated landscape but also notes that proposals should complement, and where possible enhance, local distinctiveness, as guided by relevant landscape character assessment for the Borough.

Environment Agency

- 3.27. Further design changes to the masterplan were implemented in response to consultation comments from the Environment Agency and their provision of up to date flood map data.
- 3.28. This resulted in amendments to the southern appeal site and removal of a parcel of proposed development from an area to the west of the watercourse.
- 3.29. An LVIA addendum (**CDA.119**) was prepared that addressed the minor design change, along with the iteration of the Illustrative Landscape Masterplan.

Officers Reports to Committee

- 3.30. Appeals against the non-determination of the applications were submitted to the Planning Inspectorate, and the Council were notified in June 2020 as to the validity of these.
- 3.31. A report was prepared for Members which confirmed the position of the Council in respect of the case that would be presented at a forthcoming appeal, and inviting Members to confirm the decision that they would have made, had they been able to determine the planning application.
- 3.32. In both instances (north and south sites) the reports confirm that they would have refused the application.
- 3.33. The reports to committee set out a brief summary of the consultation responses received under several sub-headings (**CDC.1** and **CDC.2**). Those relevant to landscape and visual matters are summarised as follows:

Principle/location/policy issues

- Located in strategic gap;
- Loss of countryside;
- Impact on character of the 'new' Newgate Lane and the 'old' Newgate Lane;
- Impact on "green belt" (notwithstanding that the site is not in fact in an area defined as green belt);
- The site is not 'well integrated' contrary to policy DSP40;
- Loss of green land and linkages; and
- Impact on landscape.

Strategic Gap

- Impact on the strategic gap;
- Coalescence of Fareham and Gosport;
- The proposed development will not strengthen the strategic gap; and
- Development in the strategic gap will set a precedent for further development.

Environment

- Loss of green/open space and loss of agricultural land; and
- Impact on ability to make optimum use of green infrastructure, including providing green linkages from Fareham to the coast.

3.34. The report includes reference to a petition entitled 'Stop building in the Fareham/Gosport Strategic Gap' that was published in August 2020 and refers to several points in respect of landscape and visual matters and the strategic gap.

3.35. The main issues raised in respect of landscape and visual matters are set in the context of Local Plan Policy DSP 40 (paragraphs 8.32 to 8.61 of the North committee report and 8.31 to 8.6 of the South committee report).

3.36. The applications were subsequently refused (24th June 2020) (**CDC.4**) with the reasons for refusal as listed in the reports to committee. The overarching reason for refusal state that:

3.37. *"The development is contrary to Policies CS2, CS4, CS5, CS6, CS14, CS15, CS16, CS17 and CS22 of the Adopted Fareham Borough Core Strategy 2011 and Policies DSP6, DSP13 & DSP40 of the Adopted Local Plan Part 2: Development Site and Policies Plan, paragraphs 103, 109 and 110 of the NPPF and is unacceptable in that:*

- 3.38. For the southern site this is identical, save for the omission of reference to Policy CS16.
- 3.39. *"The development is contrary to Policies CS2, CS4, CS5, CS6, CS14, CS15, CS17 and CS22 of the Adopted Fareham Borough Core Strategy 2011 and Policies DSP6, DSP13 & DSP40 of the Adopted Local Plan Part 2: Development Site and Policies Plan, paragraphs 103, 109 and 110 of the NPPF and is unacceptable..."*
- 3.40. More specific reference to landscape and visual matters is made in the following reasons for refusal (noting that these are repeated for both the north and south sites):

b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;

c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;

d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;

- 3.41. On review of the consultation responses, reports to committee and relevant reasons for refusal, several common themes are apparent in respect of landscape and visual matters. These are summarised as follows:
- Issue 1A: What are the key characteristics of the site and its immediate context and how have the schemes responded to these in terms of mitigation?
 - Issue 1B: The degree of impact on the key characteristics of the site and its immediate context and the extent to which these can be considered as harmful.
- 3.42. These matters are effectively addressed in the submitted landscape and visual impact assessments which set out a comprehensive baseline for the site and the local landscape context, including an assessment of the impact and approach to mitigation. I will return to these documents in later sections of my evidence.
- Issue 2: The purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap.

-
- 3.43. During the course of the application a 'strategic landscape and visual appraisal' of the strategic gap was prepared to identify the role and function of the strategic gap, variations therein, the core areas and also how the strategic gap could be maintained whilst accommodating the strategic growth in the area. I will return to the gap study in later sections of my evidence.
- Issue 3: The context of the application sites in relation to the existing urban settlement edges/boundaries.
- 3.44. This issue is also touched upon in the submitted landscape and visual impact assessments in terms of the local landscape context to the appeal sites. I will return to the relevant findings of the LVIA reports in later sections of my evidence.
- 3.45. I consider these issues in the following sections, along with the different parts of the reason for refusal, thereafter drawing my conclusions.

4. ANALYSIS OF LANDSCAPE AND VISUAL MATTERS

4.1. In this section I set out an analysis of landscape and visual matters. I have presented the analysis under the broad topics raised in the reason for refusal, with reference to the key issues identified in the previous section of my evidence.

Reason for refusal b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside.

Landscape character and key characteristics

4.2. The reasons for refusal suggest that the proposed development fails to respond positively to, and be respectful of, the key characteristics of the area. In this section I set out the key characteristics relevant to the local landscape character, including reference to published guidance, but also with reference to recent landscape change that has resulted from the relatively recent completion of the new bypass, Newgate Lane East.

4.3. Landscape character for the area is defined by the 'Fareham Landscape Assessment', with the sites being located in the 'Woodcot/Alver Valley landscape character area, sub areas 08.1a for the northern site, and 08.1 and a small part of 08.1b for the southern site (relevant extracts are included in **Appendix FL&BH 1.2.1**). Peel Common, along with adjacent residential areas and remnant parts of the landscape up to the edge of Gosport, are also included in the same LCA; by contrast, the landscape between Fareham and Stubbington (including the wastewater treatment plant and solar farms) are located within the adjacent area of LCA 7, the Fareham/Stubbington Gap. There is a clear difference in the character between these areas that is based on the scale and pattern of the landscape, land use, enclosure landscape, and the degree of influence of the settlement edge along with urbanising influences.

4.4. The key characteristics of the relevant LCAs are considered in the baseline of the submitted LVIA (para 4.34, **CDA.48 and CDA.106**) and consequently informed the analysis, constraints and opportunities, and ultimately the landscape strategy for the mitigation that is included as an integrated part of the two masterplans for northern and southern schemes.

4.5. Greenfield development retains an inherent impact on the physical landscape, but it is possible to bring development forward in a positive manner that addresses landscape and visual constraints. The appeal schemes do so. Where this positive approach is

adopted, the perception of those physical impacts in terms of landscape character are also minimised, also something that the schemes achieve.

- 4.6. In respect of the key characteristics the Fareham Landscape Assessment (FLA) notes that 'key characteristics aim to improve understanding of the how places are distinctive and different from one another, rather than being an appraisal for areas that are 'better or worse'. It is the second and third sections of the FLA that address Landscape Sensitivity and the designations review that address matters of value, sensitivity and designations.
- 4.7. Key characteristics are defined in the 'Landscape Character Assessment' section of the FLA. For the Woodcot/Alver Valley (LCA8) the FLA notes that (FLA, page 62):
- 4.8. *"The Alver Valley also forms part of the strategic gap separating Fareham and Gosport but it is very different in character and scale from the open farmed landscape to the west. It comprises a mixed pattern of wooded common, small-scale pasture and ribbon development along the corridors of the River Alver and Newgate Lane and is bounded to the east by the urban edge of Gosport and to the north by the outskirts of Fareham."*
- 4.9. This sets out a clear distinction between the landscape context of the site, and the wider strategic gap area to the west and north-west, between Fareham and Stubbington. The description of the LCA also establishes the influence of the urban fringe; from the edge of Gosport, edge of Fareham, but also from ribbon development in the LCA (as reflected by the character of Peel Common). These influences should be considered in the appraisal of the appeal sites in the context of the local landscape.
- 4.10. The LCA defines several 'essential characteristics'. These are set out in the following table, set against a brief description as to how the appeal schemes would influence these or has responded to these.

Table 1: Summary of essential characteristics of the Woodcot/Alver Valley and anticipated change

Essential characteristics of the Woodcot/Alver Valley	Influence on landscape and design response
A mosaic of small and medium scale fields at Woodcot, forming a mixture of small horse-grazed pasture and larger arable fields divided by fences, ditches and gappy hedgerows;	<p>The scale and pattern of fields contribute to a more enclosed landscape.</p> <p>Grazed pasture, equestrian uses are not always positive aspects of the landscape and can be seen as detracting components of a landscape, driving needs for enhancement.</p> <p>Development and landscape strategy generally works within the scale of the existing field pattern aiming to</p>

	<p>limit overall 'massing' by working within the existing enclosures.</p> <p>This has an added benefit that vegetation is retained and subsequently enhanced through programmes of supplementary planting and longer term management.</p> <p>As part of the overall green infrastructure strategy for the appeal schemes, the sites can provide additional and reinforcement planting to hedgerows with additional tree planting also.</p>
<p>Although this area forms the upper part of the Alver Valley it lacks a distinct valley character;</p>	<p>A 'valley' landform is not pronounced here, reinforcing that this part of the landscape is a transition between the more distinct valley to the south-east and the flatter, slightly undulating plain to the west.</p> <p>This reinforces the nature of boundaries between character areas that they are rarely fixed along a defined alignment and instead tend to form a 'merging' or transition.</p>
<p>The hedgerow pattern is gradually replaced by scrubby woodland to the south, enclosing Chark Common and the golf course;</p>	<p>The hedgerow network is a stronger characteristic of the appeal sites and their context, with this network forming much of the green infrastructure framework.</p> <p>Newgate Lane East has impacted on the network to a degree, severing the hedgerows and field patterns in some parts of the landscape, particularly in proximity to the eastern edge of the appeal sites.</p> <p>The appeal schemes incorporate the hedgerow network as part of the overall masterplan, using this landscape component to guide the scale and form of the development envelope. There are likely to be some limited losses in parts of the appeal sites but retention, management and additional planting can mitigate these losses.</p>
<p>The character is influenced by the busy road corridor and the urban characteristics of Peel Common and Solent Enterprise Zone at HMS Daedalus on one side and the urban edge of Bridgemary on the other.</p>	<p>In the local landscape context of the appeal sites, urban influences and the settlement fringes are generally a prominent feature and, given the appeal sites and the surrounding undeveloped landscape areas do not exist in isolation, these urban edges do have an influence on the local landscape character.</p> <p>Newgate Lane East and its associated infrastructure (including prominent acoustic fencing, road junctions and crossings) have further influenced local landscape character, drawing the urban influence into the landscape between Peel Common and Gosport (at Bridgemary).</p> <p>The acknowledge landscape impact largely relates to the introduction of residential development into the appeal sites. However this will be congruent with the settlement pattern of Peel Common due to the placement and relationship between the appeal sites to Peel Common (along Newgate Lane) and the contained to the east and north by the alignment of Newgate Lane East.</p> <p>There also remains the existing connection between Peel Common and the edge of Gosport at Bridgemary, whereby the settlement pattern is connected by</p>

	existing properties along Woodcote Lane and the amenity land use of Brookers Field Recreation Ground (which is suburban in its character and contrasts to the agricultural land uses).
--	--

- 4.11. Overall, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement. Further details are described in the following sections.
- 4.12. In relation to the scale of the field patterns (and scale of the landscape), this has been used to guide the scale and pattern of the development areas on site. Field boundaries and parcels of development have been formed within the field patterns and their boundaries consequently breaking down the massing of proposed development. Notwithstanding the change in land use from agricultural fields to residential development, this approach to mitigation does draw on and reflect the key characteristics. Furthermore, the scale of development is consistent with the types of existing residential area that are present in the surrounding context, the appeal sites being subservient to the stronger and larger scale residential edges of Fareham and Gosport and also being compatible with the adjacent settlement area of Peel Common.
- 4.13. In respect of the landform, the proposed development will not unduly influence this characteristic; a characteristic which is not necessarily distinctive in any respect. The landform of the site in its context is not reflective of the broader Alver Valley and, I consider, shows part of a transitional area of topography that emerges from the valley and up toward the undulating plain to the north-west. Man made features such as the earth banks around the waste water treatment works are also a feature in the local landscape, maintaining a distinction between the landscape to the west and east of Peel Common.
- 4.14. As with the scale of the landscape, the proposed development has intentionally incorporated the field boundary hedgerows into the layout as far as possible, retaining the existing framework of vegetation. Notwithstanding that this will be set in the framework of a residential development and its open spaces, the hedgerow field pattern is retained, whereas elsewhere in the LCA (such as the golf courses) it would appear to have been eroded). Disruption to the hedgerow network is also apparent as a

consequence of the new bypass, Newgate Lane East, which has severed several of the local field patterns and hedgerows; the replacement of these with highways green infrastructure is acknowledged, but this does not respond to the pattern of the landscape in this locality. Vegetation and hedgerows retained within the layout are proposed to be augmented with new additional planting, supplemented by added diversity and landscape management, and where lost the additional planning will replace these.

- 4.15. In relation to urban influences, the landscape impact of introducing residential development into the site is acknowledged, and the impacts are clearly set out in the submitted LVIA. However in response to landscape character, and the existing influences of the urban edge that are noted in the FLA, the site has responded by avoiding and minimising this influence. This includes the provision of 'buffers' to form an offset to the edge of the proposed development and the adjacent landscape context. This will also help to create a partial screen, presenting a scheme that is not entirely defensive in terms of how it integrates with the adjacent landscape, but instead adopts a more positive approach of presenting a 'fair face' and more attractive, softer settlement edge.
- 4.16. More detail on landscape character is set out in section 2 of the FLA, relating to local landscape character areas and the sensitivity assessment. This divides LCA8 into five sub-areas, with areas 08.1a, 08.1b and 08.2a most relevant to the sites given they sit adjacent to each other and include the site. 08.2b and 08.2c provide some context to the local landscape but sit further afield and are slightly separate from the site context.

Plate 2: FLA extract (page 151) showing landscape types for LCAS

- 4.17. The structure of the landscape of 08.1a and 08.2a is defined predominantly as 'weak structure' or 'fringe character' with just a small part of 08.1a that is defined as 'strong structure' which is concurrent with parts of the southern site (refer to **Plate 2**).
- 4.18. In relation to the appeal sites, I agree with the definition of the structure as broadly 'weak' or 'fringe' character. This is because it is reflective of the various suburban influences that are prominent in this part of the landscape and contribute to the suburban continuity in the landscape that draws Peel Common, Bridgemary, Woodcot and the edge of Fareham together. Physical influences include the prominent residential edges of Gosport and Fareham, cycleway connections and the alignment of Newgate

Lane East (and substantial pieces of highways infrastructure that accompany this), but also the pocket of amenity land use situated to the north and south of these areas.

- 4.19. The more detailed sections of the LCA do not set out 'key characteristics' (over and above the 'essential characteristics' defined for the wider LCA) but instead include a more detailed descriptions (refer to **Appendix FL&BH 1.2.1**). These are presented for each sub-area in relation to:
- the landscape resource (landscape character and quality);
 - the visual environment (views, visual features and viewers);
 - setting of the urban area (contribution to setting and settlement character); and
 - green infrastructure (contribution to green infrastructure).
- 4.20. Each also includes descriptions of sensitivity and development potential.
- 4.21. The descriptions are extensive, but a summary is presented in the format of addressing 'development criteria and enhancement opportunities'. This section states that the area is of 'high sensitivity' and refers to matters of coalescence and it's 'generally unspoilt rural character'.
- 4.22. In itself this is a characteristic, but this part of the landscape does not exist in isolation, nor is it experienced in isolation and the sense of the rural character is equally influenced by the settlement fringe and amenity land uses that are presented by the residential areas and nearby sports and playing fields.
- 4.23. Furthermore, the FLA goes on to state that:
- 4.24. *"The situation is further complicated by the proposed new road which will have some effect on the integrity and character of the landscape resource and undeveloped gap."*
- 4.25. Newgate Lane East is now constructed and in use. The route includes additional road junctions as well as some prominent fencing along the route, visible from the road but also from the local rights of way and settlement fringes. I consider the road has effectively severed this part of the landscape, and provided a very urbanised corridor that connects previously suburban fringes, linking as it does such features as the urban edge of Fareham (with the solar installation and sports facilities also on this edge), the waste water treatment works, Peel Common itself and the amenity landscapes of Brookers Field recreation ground.

- 4.26. Consequently, this part of the landscape is no longer representative of the 'unspoilt' landscape described in the 2017 LA, nor does it fulfil its role of preventing coalescence between these edges of the settlement.
- 4.27. The FLA does acknowledge that, in relation to sub-area 8.2 there is some potential for development, stating that (page 167):
- 4.28. *"The only opportunities may lie within areas that are closely associated with existing development (e.g. at Peel Common or in the SW corner of area 8.2c) and can be integrated within the landscape without any physical or perceived encroachment within the gap."*
- 4.29. This part of the landscape does (and will), however, remain distinct from the wider strategic gap between Fareham and Stubbington which, in landscape character terms, is a clearly distinct part of the landscape from the suburban fringes of Fareham and Peel Common.
- 4.30. Turning back to the reason for refusal in respect of the key characteristics of the landscape, there are several development criteria and enhancement opportunities defined by the FLA which the proposed developments positively respond to. The relevant issues are set out in the following table, accompanied by a brief response as to how/why the proposed development responds positively. Although the two appeal schemes are separate applications, I include a plan of a composite landscape strategy that illustrates how the landscape strategy forms a comprehensive and connected mitigation strategy (refer to **Appendix FL&BH 1.2.2**).

Table 2: Summary of LCA8 sub-area development criteria/enhancement opportunity and design response of the appeal schemes

Relevant FLA development criteria and enhancement opportunity	Proposed development design response
Sub area 8.1 Woodcot	
Maintain and strengthen the existing structure of trees, hedgerows and other mature vegetation, to maximise its landscape and wildlife value and to minimise impacts on the rural character of the landscape	<p>The appeal schemes reference the scale and pattern of the landscape by placing a limit on the development envelope for built form and retaining hedgerow (and other) vegetation as far as possible. Losses will be mitigated by additional planting.</p> <p>The landscape strategy includes for a diverse range of tree, hedgerow and grassland areas, contributing to biodiversity potential.</p> <p>Being contained between Peel Common and Newgate Lane East, other than the 'on site' impact, impacts on the 'rural character' will be contained and limited.</p>

<p>Maintain the essentially open, undeveloped character of the public open space, playing fields and sports facilities within area 8.1b, and be designed to relate closely to the existing structure of trees hedgerows and existing characteristic built features within the area</p>	<p>Brookers Field Recreation ground is located immediately to the south-east of the appeal sites with additional playing fields and formal play areas located on the edge of Fareham to the north of the appeal sites. Notwithstanding the connections to these areas by the settlement pattern and roads/footpaths, the appeal schemes are physically contained and will not influence the openness of these areas.</p>
<p>Avoid any major incursion of the urban area into the countryside beyond existing well defined boundaries, or create significant new pockets of urban or urbanising development within open farmland</p>	<p>The presence of the solar farm, waste water treatment works and Peel Common itself all form a physical and perceptual barrier to the west; these are further reinforced for much of the western edge by various tree and woodland cover. To the east, Newgate Lane East has severed the agricultural landscape and now broadly forms an eastern limit to the appeal schemes, however there remains a perception and some physical connection to Bridgemary. Overall this does not represent a 'major incursion; into the countryside as in either respect, the appeal schemes will form an appropriate fit with the existing settlement patterns.</p>
<p>Protect the area's role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development strung out along road corridors (e.g. along the existing and proposed new alignment of Newgate Lane) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap</p>	<p>As noted, Peel Common and its immediate environs form a distinct edge to the settlement pattern associated with the edge of Fareham and Gosport. The appeal schemes will not breach this and will not have an impact on the overall strategic gap to the edge of Stubbington.</p> <p>In terms of ribbon development, together the appeal schemes will present an area of development that dovetails with the existing settlement pattern of Peel Common which in itself is partly comprised of ribbon development along Newgate Lane. The appeal schemes will alter this and consolidate the settlement pattern of Peel Common as a small core settlement area within the broader strategic gap (much in the way that Titchfield, to the north, exists between Titchfield Common and Fareham).</p>
<p>Maintain significant distance and separation from the corridor of the new road to minimise its urbanising effects upon the rural character of the area</p>	<p>The appeal schemes include a landscape buffer along their eastern edge which will integrate with the linear landscape proposals that have been implemented to mitigate the urbanising influence of the new road.</p>
<p>Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the open, flat landscape</p>	<p>The appeal sites are physically well contained by the combination of existing built form and green infrastructure and consequently it is not considered that residential development on the appeal sites will be particularly visible or prominent.</p>
<p>Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area</p>	<p>The appeal schemes will not unduly affect any of the open spaces in the area, not are they prominent or visible from the open spaces or prominent from the local PROW network.</p> <p>Furthermore, green infrastructure and open space is included on the western edges of the appeal sites which makes further provision for accessible green space and green links.</p>

<p>Provide substantial new investment in the landscape through extensive tree, hedgerow and woodland planting using native broadleaved species appropriate to the locality and soil conditions and habitat creation to diversify the intensively farmed landscape</p>	<p>The appeal schemes include for a range of landscape and habitat types as part of the landscape strategy. Use of native and locally prevalent species would be an inherent part of the proposals and this element of detailed design can be controlled by condition.</p>
<p>Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context</p>	<p>The detailed LVIA, along with additional analysis in this evidence, illustrates that mitigation measures will be successful in minimising impacts in respect of both landscape and visual matters.</p>
<p>Sub-area 8.2 – Peel Common and Alver Valley</p>	
<p>Safeguard the area’s vital role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development along road corridors (e.g. Broom Way, Shoot Lane and Gosport Road) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;</p>	<p>The appeal schemes will consolidate the settlement pattern of Peel Common and can be integrated into the landscape with very limited influence on the adjacent landscape areas, particularly due to the considerable degree of enclosure from existing green infrastructure.</p> <p>The integrity of the overall strategic gap will be retained; where this is narrowed between</p>
<p>Maintain the distinctly ‘isolated’ nature of settlement at Peel Common and ensure that any potential small-scale infill development within this area effectively ‘rounds off’ rather than extends the settlement boundary, to avoid the risk of physical or perceived coalescence with other built areas;</p>	<p>The appeal schemes will consolidate the settlement of Peel Common being limited as they are by the alignment of Newgate Lane East. The appeal sites represent an opportunity to round off this edge of the settlement, up to the existing junction, without overly diminishing the remaining countryside to the east of Newgate Lane East. Further south, the perception of separation between the existing edges of Peel Common and Bridgemary is already limited due to the presence of residential development along Woodcote Lane and also the amenity character of Brookers Field Recreation Ground which influences character at a local level.</p>
<p>Protect the semi-rural, undeveloped character of areas 8.2b and c;</p>	<p>The appeal sites are separated and distinct from these areas due to distance and the alignment of the Gosport Road.</p>
<p>Maintain and strengthen the existing structure of woodland, trees, hedgerows and other mature vegetation in all parts of the area, to maximise its landscape and wildlife value;</p>	<p>As previously noted, the comprehensive landscape strategy would deliver this.</p>
<p>In particular, maintain and enhance the mosaic of woodland, heathland, grassland and wetland habitats of value within the Lee-on-the-Solent golf course at Chark Common and</p>	<p>As previously noted, the comprehensive landscape strategy would deliver this – the strategy includes for diversity of habitats and landscape components.</p>

encourage further habitat creation and diversification within intensively managed areas to maximise wildlife and landscape value;	
Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the landscape;	As noted, the appeal schemes will not be unduly prominent in the landscape and are both physically and visually well contained.
Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area, particularly along the River Alver corridor and with the Country Park to the south;	The appeal schemes include areas of green infrastructure and open space which will make a positive contribution to the network of green infrastructure in the area. Connections to the River Alver corridor and Country Park will not be impacted.
Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.	As noted, the detailed LVIA, along with additional analysis in this evidence, illustrates that mitigation measures will be successful in minimising impacts in respect of both landscape and visual matters.
Use native broadleaved species appropriate to the locality and soil conditions in new tree and hedgerow planting.	Also as noted, the use of native and locally prevalent species would be an inherent part of the proposals and this element of detailed design can be controlled by condition.

Interim summary on landscape character

4.31. In this section so far, I have considered the first part of the reason for refusal (b), namely that the proposed development fails to respond positively to and be respectful of the key characteristics. This includes:

- A description of the characteristics with reference to the published guidance, reiterating that this baseline position was fully considered and acknowledged in the submitted LVIA;
- That there is a distinction in landscape character between this area (the site and its context) and the wider part of the strategic gap between Fareham and Stubbington;
- That the published baseline makes clear reference to the suburban nature and influences in this part of the landscape and that it gives give some context to the scope for potential development in this area;
- That this baseline is slightly out of date by virtue of Newgate Lane East, which is now constructed and in operation;
- Having set out this baseline position on the key characteristics, I have also described clearly, again reiterating that this was addressed in the submitted LVIA,

how the proposed development responds to these characteristics through the landscape strategy that forms the basis for the proposed development.

- 4.32. The mitigation strategy is largely integrated into the proposed development as a whole, with landscape and visual matters addressed in the layout, extent of developable area, green infrastructure strategy and areas of open space.
- 4.33. In summary, the appeal schemes can clearly demonstrate how they have responded positively to the local landscape character and is respectful of this through the restrictions placed on built form and provision of green infrastructure and open space (with associated landscape proposals) as an integral and positive component of the masterplan for the two appeal sites.
- 4.34. Not only is the landscape strategy consistent with the local landscape character, it also plays an important role in terms of lessening the predicted impacts of the 'built' component of the developments (as does the baseline context of the suburban edges of the settlement).
- 4.35. This leads me to the second part of the reason for refusal (b) where it suggests that the proposed development would be 'harmful' to the character and appearance of the countryside.

Impacts on the character and appearance on the countryside

- 4.36. In respect of landscape and visual matters, it is typical for landscape character to be discussed first, with views/visual receptors and appearance following. However, I will address the visibility and perception of the site (and proposed development) up front as it sets a very useful context in respect of landscape character.
- 4.37. It is important to note that a comprehensive landscape and visual impact assessment was prepared in support of the applications. These present a technical assessment of the baseline scenario, judgements on landscape value, susceptibility and overall landscape sensitivity as well as consideration of visual impacts from a range of visual receptors in the local area.
- 4.38. The technical assessment and professional judgements therein are based on a transparent approach and can be referred to for specific points. Overall, notwithstanding that there is an inevitable landscape impact on the appeal sites and that for locations directly adjacent to or close to the appeal sites might be of a higher significance of

effect, the overall balance of judgments found that, this degree of impact was acceptable and that mitigation had been successful in avoiding or minimising the impact and effect.

4.39. The overall visibility of the appeal sites is defined as follows:

- To the north, the visibility of the appeal sites is restricted to a short section of Newgate Lane and the junction/short section of Newgate Lane East. Views from the more northern section of Newgate Lane, and also the route of the public footpath between Newgate Lane and Woodcot, are generally screened by intervening vegetation and the route of Newgate Lane East;
- To the east, the visibility of the appeal sites is restricted to locations on the very edge of Woodcot and Bridgemary. This is generally restricted to the upper storeys of residential properties situated on the very edge of the settlement, views from ground floor levels and the street scene being generally screened by intervening vegetation. Newgate Lane East is highly visible from the east, large sections of the route being defined by tall acoustic fencing panels. In the future, views from the east of the appeal schemes is likely to be further screened and contained by the highways mitigation planting along Newgate Lane East, which will form a linear belt of green infrastructure in views from this direction;
- To the south, the visibility of the site is limited to a small number of properties located off Woodcote Lane, with filtered views from the road itself. Some views from Newgate Lane East and Newgate Lane will also be available, albeit limited in duration. In the longer term, highways mitigation planting will screen such views; and
- To the west, the visibility of the site is limited to the route of Newgate Lane with views from locations further west (including public footpaths) being screened by various sections of green infrastructure.

4.40. On balance, the potential visibility of the appeal schemes is very restricted and highly localised. Higher sensitivity receptors such as PROW have very few views. Views from receptors across the strategic gap between Stubbington and Peel Common (including PROW) will have no views.

4.41. Views from Bridgemary, although partially available now, are influenced by highways infrastructure of Newgate Lane East and in the longer term will potentially be fully screened by the mitigation planting along that route.

4.42. What remains is a small number of private dwellings in relatively close proximity to the appeal sites and some public vantage points from the local road network that have views

of the proposed developments. Such locations include a short section of Newgate Lane, the passing traffic (and receptors) along Newgate Lane East, and a short section of Woodcote Lane.

- 4.43. I raise the matter of views/visibility in the first instance, not just to demonstrate how limited the potential views and visual impacts are in their extent, but also to demonstrate that any perception of the change to landscape character is equally limited. In turn, this influences the extent to which any impact could be judged as 'harmful' to the character and appearance of the landscape.
- 4.44. In respect of character and appearance of the landscape, the limited 'scale of change' is just one consideration in the balance of judgement, other matters that are accounted for in the LVIA process include the nature of change. In this case, the appeal sites are not located in a landscape context where residential development, or other urbanising influences, are absent.
- 4.45. The settlement edges at Bridgemary and Fareham are prominent and influential on the local character; the appeal sites sit adjacent to Peel Common and the appeal schemes will complement this settlement pattern, particularly given its containment by the route of Newgate Lane East. Amenity landscapes are present in the form of Brookers Field Recreation Ground and the open spaces and sports fields to the north of the appeal sites.
- 4.46. The agricultural components of the landscape are noted and included in the consideration of landscape impacts, however the peri-urban influences described above are also a relevant part of the baseline consideration against which impacts are judged.
- 4.47. Impacts are also judged on the basis of avoiding or minimising the type and extent of any impact and the positive design approach, reflective of the local landscape context, is successful in avoiding and reducing such impacts. Previous sections of my evidence have clearly demonstrated the positive approach to mitigation.
- 4.48. Overall, an inevitable impact on the landscape will be generated, largely due to the loss of agricultural land to built development. This is addressed by the LVIA which, in reference to the relevant character area of the 'Woodcot/Alver Valley LLCA - Sub area 08.1a' concluded that the magnitude of impact within the study area will be medium which, assessed alongside the low to medium sensitivity, would result in a minor to moderate adverse effect.

4.49. In terms of landscape and visual impact assessment, this is at the lower end of the scale for the assessment of significance (which general range across a scale of negligible, minor, moderate and major). At this level of significance, at the lower end of the threshold, these impacts are considered to be acceptable in landscape terms and do not constitute an overall 'harm' to the landscape.

c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;

4.50. In this section I consider the purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap.

4.51. During the course of the application a 'strategic landscape and visual appraisal' of the gap was prepared and submitted and this addresses issues in respect of function of the gap, core areas and how the strategic gap can be maintained whilst accommodating the strategic growth in the area.

4.52. The overarching aim was to establish which areas of the gap were a priority to maintain its function and separation between settlements, and which parts of the gap could, subject to further detailed assessment, accommodate some form of built development that would be integrated, not highly visible and ensuring that it would not erode the physical, visual and perceived gap.

4.53. Albeit undertaken at a high level, the study found that the appeal sites (and landscape generally between Peel Common and Fareham/Gosport) were not a priority area required to maintain the integrity and function of the wider Fareham to Stubbington Strategic Gap.

4.54. In September 2020, in support of the emerging Local Plan, the evidence base was updated to include a recent study of strategic gaps across the Borough.

4.55. This document, a 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' was undertaken by Hampshire County Council on behalf of FBC and published in September 2020 (**CDG.7**). The study undertook a technical review of the six proposed 'Areas of Special Landscape Quality' and two proposed strategic countryside gaps (including the Meon Gap and the Fareham and Stubbington Gap).

4.56. The study reiterates the Fareham Draft Local Plan 2036, stating that (page 5, **CDG.7**):

- 4.57. "...Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities (page 27, Fareham Draft Local Plan 2036)"
- 4.58. Study states that the approach and methodology established a set of criteria for determining strategic gap characteristics and boundaries
- 4.59. The executive summary makes two observations in respect of the Fareham to Stubbington Strategic Gap, stating that (following extracts from pages 6 and 7 of the study, **CDG.7**):

"The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence through continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there are some opportunities for development to be accommodated within the landscape, without compromising the Strategic Gaps function..."

Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:

- *An area to the South of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function...*

It is also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past."

- 4.60. The study goes on to 'test' a series of areas against defined criteria, including primary and secondary measures (described on page 19 of the study, **CDG.7**). These are summarised in the following table.

Table 3: Summary of primary and secondary measures for strategic gap criteria

Principles of primary measures	Principles of secondary measures
<i>Physical and visual separation:</i> - absence of urban land uses	<i>Green infrastructure provision:</i> - role and purpose of green infrastructure

<ul style="list-style-type: none"> - primarily an absence of residential development - feeling relatively tranquil - have dark night skies - retain a sense of leaving a settlement, passing through a distinct tract of countryside before entering another - maximum and minimum distances are a 'rule of thumb' 	<ul style="list-style-type: none"> - influence appropriate gap distances
---	---

- 4.61. Further detail of these measures is set out in the detailed methodology to the study. Also in relation to the approach and methodology of the study, it notes that (page 20, para 45, **CDG.7**):
- 4.62. *"Whilst it has been stated earlier that Strategic Gaps, do not necessarily have an intrinsic landscape value, landscape character and it's quality does have a role to play in helping to understand and determine the extent of a gap and it's sensitivity to development..."*
- 4.63. Chapter 4 of the study sets out an overview of the Strategic Gaps, it states that (page 84, para 8, **CDG.7**):
- 4.64. *"The aim of the Fareham-Stubbington Gap is to avoid coalescence between the settlements of: Fareham and Bridgemary, with Stubbington and Lee-on-the-Solent."*
- 4.65. The study goes on to define a series of 'key features' within the Fareham to Stubbington Gap (page 96, **CDG.7**). I summarise these in the following table, along with a brief analysis as to whether these key features are reflected by the appeal sites and their immediate context.

Table 4: Summary of the defined 'Fareham-Stubbington Gap' key characteristics

Key feature as defined by the study	Relevance to the appeal sites and context
Open, predominantly arable farmland and horticulture with some glasshouses, a weak hedgerow structure and few trees	This is reflective of the core part of the gap, whereas the appeal sites are contained within a smaller scale arable landscape contained by a strong framework of hedgerows and hedgerow tree. This distinction is acknowledged by the defined landscape character guidance. Consequently, given the fundamental difference in landscape character here, the appeal schemes will not unduly influence this particular key feature.
The settlement edges are for the most part well screened by mature tree canopy, but there is some	The landscape context to the appeal sites also include the settlement edge of Gosport at Bridgemary, which is also visually apparent from the local landscape. Closer

<p>minor visual intrusion from Fareham, Stubbington and HMS Collingwood</p>	<p>to the appeal sites, Peel Common forms an incidental 'satellite' of the settlement pattern which has grown out of ribbon development along Newgate Lane and this is more prominent in the local landscape context.</p> <p>Given the existing context of the residential edges, particularly Peel Common, the appeal schemes are not considered to unduly influence this key feature of the Strategic Gap, particularly given the urbanising influence (and associated infrastructure of Newgate Lane East) along with mitigation in the appeal schemes which includes landscape buffers and additional landscape planting.</p>
<p>A few scattered farmsteads/horticultural holdings and a mosaic of small fragments of open farmland and horse grazed pastures sandwiched between.</p>	<p>This is more reflective of the appeal site and their local context, however it is useful to contrast this with similar farmsteads and horticultural buildings set within the more open arable landscape to the west. Fragmentation of the arable landscape in this area has also occurred through the implementation of Newgate Lane East which has severed several field parcels and hedgerows through the area.</p> <p>The appeal schemes have taken an approach of minimising impacts through reference to the scale and field pattern within the landscape which has defined the development envelopes for built form. Notwithstanding this positive approach, there is an acknowledged loss of agricultural land.</p>
<p>Large scale non-agricultural uses of business and airfield development at Solent Airport in Daedalus to the south.</p>	<p>There is limited physical and visual connections between the appeal sites and these features.</p> <p>The appeal schemes will not increase the prominence or extent of these uses in the landscape.</p>
<p>Utilities of: Peel Common Water Treatment Works enclosed from views by an earth bund and mature tree belt Peel Common Solar Farm</p>	<p>Both utilities are in close proximity to the appeal sites, the former acting as one of the main features that enclosure the appeal site physical and visually and restrict the potential visibility of the appeal schemes in terms of visual effects.</p> <p>These features effectively contain the appeal scheme and prevent any perception (physically or visually) of them from the west, and in particular from the context of the arable landscape across to Stubbington.</p>
<p>Construction site of Stubbington Bypass, which will provide an east-west route through the gap that has not previously existed.</p>	<p>This feature is physically and visually separate from the appeal schemes, but will likely introduce a detracting feature into the landscape, much in the same way Newgate Lane East has in the locality of the appeal sites.</p>
<p>Urban fringe character of Peel Common residential area</p>	<p>The appeal sites are located adjacent to the 'satellite' residential area of Peel Common and will consolidate this area of the settlement.</p> <p>In terms of the gap, notwithstanding the extension of the settlement (albeit limited by the alignment of Newgate Lane East, the gap will continue to function much in the same way that the strategic gap in the north continues to function, with the consolidated</p>

	settlement area of Titchfield situated between the two more pronounced settlement edges.
Recently completed highway works to Newgate Lane and Peel Common Roundabout, with associated noise attenuation fencing and bus and cycle infrastructure.	Overall these key features reflect the independent judgements in the LVIA and earlier in this evidence as to the impact of Newgate Lane East on the landscape. In term of the gap, these features conflict with some of the primary measures in relation to tranquillity and drawing a distinction between settlements along major routes.

4.66. In respect of the Fareham-Stubbington Gap, the study draws together key conclusions in respect of the primary and secondary measures. Several key conclusions are summarised as follows (I include the full extract of the conclusions at **Appendix FL&BH 1.2.3** of my evidence):

- Minimum and maximum distances of ca. 300m to 1.8m [sic] (assumed km);
- That Peel Common represents a 'false' settlement edge;
- Two areas of the gap have distances of 350m and 300m but that these distances are still perceived as a sense of separation between neighbouring settlements, partly due to presence of mature vegetation;
- These represent 'minimum' gaps (within the 'rule of thumb') but are not appropriate to become a standard dimension as they would be weak and at risk of being lost (i.e. they are acceptable, but not ideal) – furthermore they function due to the context of linking to wider sections of the gap either side;
- Moderate to large gap distances of ca. 600m to 1.8km are 'good' distances;
- Presence of urban land uses can correspond to loss of tranquillity and dark night skies as urban fringe characteristics 'creep into the gap';
- In terms of land uses, sports fields and recreation grounds on the fringes of urban settlements have the potential to bring urbanising influence;
- In comparison to the Meon Gap there is not the same level of GI resource, however measures could be taken to increase these through positive environmental management; and
- Mitigation will be required where there is considered to be capacity to absorb development.

4.67. These conclusions are illustrated in the study by analysis diagrams of legibility/visibility and key distances (refer to extracts at **Plates 3 and 4**).

Plate 3: Extract illustrating the analysis of legibility/visibility

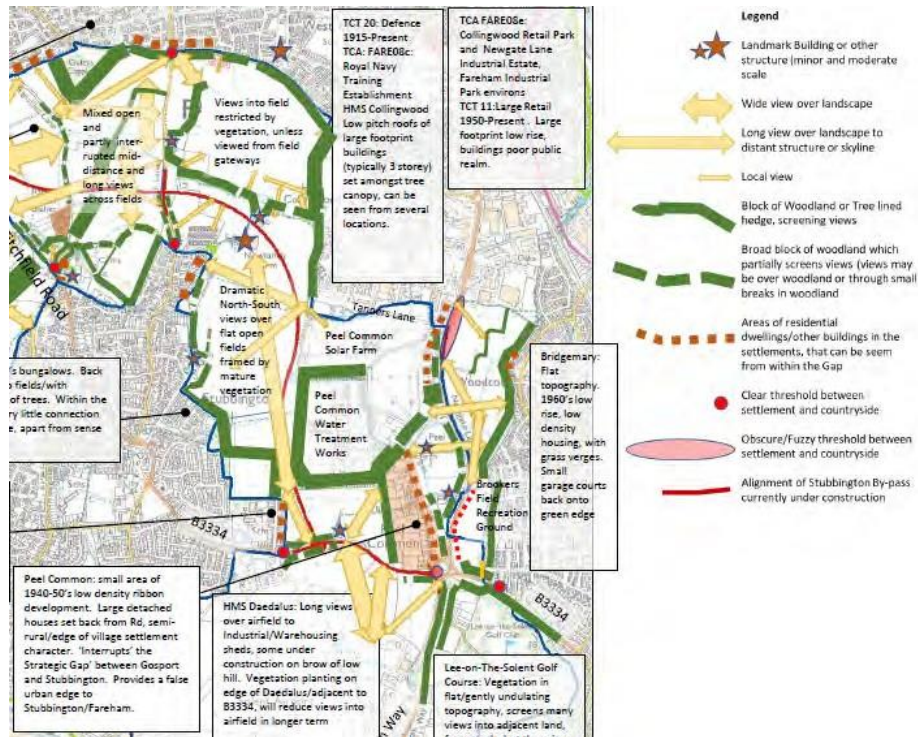

Plate 4: Extract illustrating key distances across the strategic gap

- 4.68. Having considered the analysis of the gap study, I refer back to the executive summary of the gap study where it notes that there exists some opportunities for development to be absorbed within the strategic gap without compromising its function. Further to illustrative extracts (**Plates 3 and 4**) I include some additional analysis of the gap in the context of the appeal sites (refer to **Appendix 1.2.4, Landscape Analysis of the Strategic Gap**).
- 4.69. The study suggest that an area south of Fareham and west of HMS Collingwood be considered, however this would place development in a more open and exposed part of the landscape, at a point where the existing gap (between HMS Collingwood and Newlands Farm/Stubbington) is only between ca. 325m and 550m. This would seem to contradict some of the principles set out in the analysis and conclusions.
- 4.70. I don't intend to critique the approach of the strategic gap study or its analysis, however I do think it is necessary to interrogate the robustness of the overall conclusions. The aims of the study include a review of the function of the strategic gaps in the Borough, but also to consider their boundaries. The study includes the necessary analysis to present a clear evidence base for amending boundaries in parts of the strategic gap. In relation to the edges of Fareham and Gosport, there is no recommendation to adjust the boundaries in this area, despite the findings of the study that:
- Some physical coalescence has already occurred;
 - These are some of the narrowest parts of the gap, resulting in a 'minimum functioning gap, that is weak';
 - Suburban edges and influences are often prominent, which reduces the effectiveness of the gap, including loss of tranquillity and presence of lighting;
 - Recreational land uses are present in the form of several sports and recreation grounds and these are noted as an issue in terms of their 'visual appropriateness'; and
 - The road network is such that there is no genuinely clear experience of a break between the settlement areas, particularly between Peel Common, Bridgemary and the southern edge of Fareham.
- 4.71. In relation to the landscape around the appeal sites, and particularly between Peel Common and Bridgemary, I cannot see how these trends would be reversed nor how the strategic gap could be strengthened, particularly with Newgate Lane East now forming such a strong urbanising feature in the local landscape context. The result is now the continued inclusion of a part of the gap that is weak and under pressure in the long term.

- 4.72. In that context I would think a logical and appropriate conclusion for the study would be to amend the boundary to omit this part of the landscape from the strategic gap, creating capacity for appropriate forms of development that could come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the importance of the core, priority areas of the gap, between Fareham and Stubbington where the gap clearly delivers its role and function in full. However, I do appreciate that this is not the conclusion of the published study.
- 4.73. Returning to the conclusions of the study, it notes that development coincidental with LCA8 (Woodcot-Alver Valley) would be inappropriate. However, it goes on to state that Gosport and Fareham have already partly coalesced (along the A32) and that urban characteristics are present throughout the study area 8C (which is coincidental with the appeal sites).
- 4.74. Given the urbanising influences, along with the considerable green infrastructure which provide appropriate visual qualities and separation thresholds, I consider that development in this area would not be inappropriate, particularly given that the inherent mitigation would also contribute substantially to the green infrastructure network (as illustrated on the Composite Landscape Strategy (refer to **Appendix FL&BH 1.2.2**))
- 4.75. Having considered the analysis within the study analysis of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the strategic gap. This is on the basis that (refer also to **Appendix FL&BH 1.2.4**):
- In relation to distances, the appeal schemes will reduce the gap between Bridgemary and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances;
 - In terms of visibility, the appeal schemes will be physically and visually well contained – they site within the strong green infrastructure framework that is evident by blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the strategic gap from Stubbington;
 - Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, also along Newgate Lane and within the merging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;

- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area;
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

4.76. I also note that, notwithstanding differences in the technical approaches, the Pegasus group and Hampshire County strategic gap studies both independently acknowledge that the strategic gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site /project basis.

4.77. For the appeal schemes, this more detailed site analysis has been completed in the form of the submitted landscape and visual impact assessments. This iterative approach to design, based on the impact assessment, has informed the inherent mitigation to the masterplan and concludes that the proposed developments would be acceptable.

4.78. On this basis, I consider that the appeal schemes can come forward without a significant effect on the integrity and function of the strategic gap and without conflict to the aim of the Fareham to Stubbington Gap which is to avoid coalescence between Fareham and Bridgemarky with Stubbington and Lee-on-the-Solent.

d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries.

4.79. The final issue raised buy the reason for refusal in respect of landscape and visual matters related to the settlement boundaries and relationship between the sites and the urban edge.

4.80. Notwithstanding that this is more generally a planning matter related to the definition of settlement boundaries, I consider it useful to briefly consider the existing urban and suburban areas from a landscape and visual perspective; including how these relate to the site. This includes reference to Newgate Lane East and the potential 'future baseline' that could include emerging development of the former HA2 allocation.

- 4.81. In the context of the appeal sites, the current settlement pattern is defined by the edges of Fareham and Bridgemary which are generally defined by residential development, including some green infrastructure. Other settlement areas are that of Peel Common, which would appear to be a small 'satellite' of predominantly residential development, historically small scale ribbon development along Woodcote Lane and Newgate Lane. There is a mix of dwellings in terms of age, appearance and scale, and no one aspects really binds the settlement character together or delivers a unique sense of place.
- 4.82. The strategic gap study describes Peel Common as a 'false urban edge' and this is likely due to the visibility of dwellings on the approach from Stubbington, which briefly gives way to the open space of Brookers Field Recreation Ground before entering Gosport.
- 4.83. The surrounding landscape context to Peel Common is influenced equally by the agricultural landscape along with several areas of recreational open space and sports pitches. Newgate Lane East, Peel Common Roundabout and the utilities of Peel Common solar farm and the waste-water treatment works are all notable features that influence the character and pattern of the satellite settlement.
- 4.84. In terms of the more extensive urban areas that are located nearby, there is some connectivity close to Gosport Road a partial connection between Peel Common to Gosport in the form of Woodcote Lane (and its associated residential dwellings) and the amenity open space of Brookers Field Recreation Ground.
- 4.85. The reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries.
- 4.86. However, the appeal sites are located immediate to the east of Newgate Lane, and are physical contained by the alignment of Newgate Lane East; they sit immediately adjacent to the existing residential dwellings off Woodcote Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane. Together the appeal schemes will consolidate the pattern of Peel Common within a clearly prescribed and defined limit.
- 4.87. Furthermore, the proposals for green infrastructure and open space that form an integral part of the masterplans will set the proposed developments in a landscape framework that reflects some of the characteristics of Peel Common where tree belts and hedgerows are present to a greater or lesser degree across parts of the satellite. This includes proposals for an area of green space directly adjacent to Newgate Lane

that will form a green corridor that runs broadly through the centre of the emerging pattern.

- 4.88. Green infrastructure and open space on the eastern edge will integrate with the highways landscape planting along Newgate Lane East and together this will add to the containment of this pocket of settlement.
- 4.89. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 4.90. As previously noted, there exists some physical connections between Peel Common and Bridgemary. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemary, focused along the green route into Bridgemary (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 4.91. Whilst forming a consistent part of the overall settlement edge, these would be characterised by a softer transition than the current settlement edge, incorporating a strong network of green infrastructure which links the wider countryside to the west of HMS Collingwood, through the green infrastructure of the solar and waste water facilities, along the open spaces of the appeal schemes and Newgate Lane East, connection to the recreation ground and the wider extent of the Alver Valley further south.
- 4.92. At the time of writing the direction of the Local Plan had altered slightly and the former emerging allocation of HA2 had been removed. However, were HA2 to come forward this broader allocation would form a logical connection between Peel Common (including the appeal sites) and the edge of Fareham. This would represent a clear connection to the settlement edge of Fareham and a logical pattern of the settlement in this area. Furthermore, given the opportunities for including and extending the green infrastructure network, that larger extent of the settlement can come forward with a suitable mitigation strategy.
- 4.93. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.

5. RESPONSE TO POLICY

- 5.1. In the context of the analysis of effects identified in the previous section, I now go on to address the policy context, addressing these in respect of landscape and visual matters.
- 5.2. There are also several other saved and emerging policies relevant to landscape and visual matters which are not referenced in the reason for refusal but against which the appeal scheme will potentially make a positive contribution.

National Planning Policy Framework

- 5.3. The National Planning Policy Framework (NPPF) has a presumption in favour of sustainable development. Reference to the NPPF in the reason for refusal generally relate to sustainability and transport (noting paras 103, 109 and 110). Notwithstanding that landscape is not addressed at this level, there are other parts of the NPPF that are relevant.
- 5.4. NPPF paragraph 8 defines three overarching objectives to sustainable development, economic, social and environmental. The environmental objective (c) is explained in the following terms:
- 5.5. *"To contribute to protecting and enhancing our natural, built and historic environment; including making effective use of land, helping to improve biodiversity, using natural resources prudently, minimising waste and pollution, and mitigating and adapting to climate change, including moving to a low carbon economy."*
- 5.6. Section 15 of the NPPF is concerned specifically with conserving and enhancing the natural environment. Paragraph 170 notes that the planning policies and decisions should contribute to and enhance the natural and local environment by (a) protecting and enhancing 'Valued Landscapes' in a manner commensurate with their statutory status or identified quality in the Development Plan.
- 5.7. It is common ground that The site is not a 'valued landscape' for the purposes of Paragraph 170 of the NPPF.
- 5.8. The NPPF paragraph 170 also notes in sub section (b) that (my own emphasis):
- 5.9. *"Recognises the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and eco system services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland."*

- 5.10. To satisfactorily address policy at a national level it is necessary to undertake an appraisal of landscape character making reference to published guidance, but also looking more specifically at the local landscape character. This establishes a detailed baseline position for the landscape character of a site or area in question and presents and understanding of its sensitivity.
- 5.11. The submitted landscape and visual assessments that were prepared in support of the applications were undertaken using a methodology which accords with current best practice guidance for landscape and visual impact assessment (i.e. GLVIA3).
- 5.12. The submitted LVIA's make reference to published landscape character assessment prepared at a national, regional and district level and also addresses local character by reference to the description of the appeal site and its immediate context. The subsequent design of the proposed development reflects the relevant aspects of the local landscape character to ensure that impacts are minimised, that the proposals can be assimilated into the landscape and that mitigation forms an inherent part of the proposed development. Consequently, the LVIA responds fully to the requirement of the NPPF.

Adopted Fareham Borough Core Strategy 2011

- 5.13. The following section responds to policies included in the reason for refusal that are relevant to landscape and visual matters.

Policy CS4: Green Infrastructure, Biodiversity and Geological Conservation

- 5.14. This policy relates habitats and biodiversity and also ecologically focussed designations, however it also refers to the protection of trees and woodland. There is some relevance to landscape and visual matters by virtue of the parts of the policy that refer to green infrastructure. The policy refers to networks of accessible multi-functional green infrastructure to be planned around existing green spaces in urban, urban fringe and rural areas.
- 5.15. The appeal schemes incorporate a landscape strategy that forms an integrated part of the development proposals and sets a green framework for the masterplan. Notwithstanding the two applications are administratively separate, the landscape and green infrastructure strategies work together to provide a comprehensive framework of retained vegetation, proposed open space and augmentation of these through additional landscape works (refer to **Appendix FL&BH 1.2.2**).

- 5.16. Furthermore the green infrastructure network across the appeal sites dovetails with the wider green infrastructure network as it extends from the landscape to the west of Fareham, through the network of vegetation and open spaces to the north of Peel Common and along New Newgate Lane, and down toward the Alver Valley in the south.
- 5.17. Overall, the appeal schemes are considered to be consistent with and positively contribute to the policy in landscape and visual terms.

Policy CS14: Development Outside Settlements

- 5.18. This policy states that, for land outside the defined settlements, development will be strictly controlled to protect the countryside and coastline from development which would adversely affect its landscape character, appearance and function.
- 5.19. Both applications have been supported by comprehensive LVIAs which have found the proposals to be acceptable in landscape and visual terms. These documents also demonstrate the physical and visual containment of the appeal sites in relation to both the local landscape character and visual receptors.
- 5.20. In my evidence I have presented additional analysis that demonstrates the appeal schemes respond positively to the local landscape character and that this approach integrates mitigation that aims to avoid or minimise potential impacts. Some degree of residual impact is acknowledged at a site level, however in the context of the urban fringe context in this part of the landscape, the degree of impact is not considered to be at a level that would adversely affect the overall character of this part of the landscape.

Policy CS17: High Quality Design

- 5.21. This policy requires that proposed developments be of a high quality of design. This includes the need to, amongst other criteria:
- respond positively to and be respectful of the key characteristics of the area, including landscape
 - provide continuity of built form
 - provide green infrastructure, including landscaping, open spaces, greenways and trees

Policy CS22: Development in Strategic Gaps

- 5.22. This policy relates to land within a Strategic Gap and states that development proposals will not be permitted where it 'significantly' affects the integrity of the gap and the physical and visual separation of settlements.
- 5.23. The submitted LVIAs demonstrate that the appeal sites are physically and visually well contained. Landscape and visual impacts are limited to a highly localised area and the appeal sites together are contained in a strong framework of the existing settlement area of Peel Common, infrastructure (with associated vegetation) and the alignment of Newgate Lane East. This containment will be strengthened over time as mitigation within the schemes – and along Newgate Lane East – becomes established.
- 5.24. Additional analysis presented in my evidence also demonstrates several points in relation to the Strategic Gap, including that the key area for separation is between Stubbington and Fareham (including up to the western extent of Peel Common) and that the strategic gap in the area around Peel Common has been undermined to the point where it is no longer fulfils its role effectively.
- 5.25. Together, the containment of the site along with the strength of the gap between Stubbington and Fareham (at Peel Common) means that there will not be a significant effect on the integrity of the gap and consequently I do not see any conflict with this policy.

Adopted Fareham Borough Local Plan Part 2: Development Site and Policies Plan (June 2015)

Policy DSP40: Housing Allocations

- 5.26. This policy notes that, in the scenario where the Council does not have a five year supply of land for housing, additional housing sites, outside the urban area boundary, may be permitted. The policy sets out several criteria of which the following is relevant to landscape and visual matters:
- ii. The proposal is sustainably located adjacent to, and well related to, the existing urban settlement boundaries, and can be well integrated with the neighbouring settlement;
- Response: My evidence demonstrates the relationship between the appeal schemes and Peel Common and how this area, already party connected to the

edge of Gosport, would be consolidated as an area of settlement and present a well defined edge to the eastern edge of the Strategic Gap.

- iii. The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;

Response: My evidence has also demonstrated, in addition to the submitted LVIA, how the appeal schemes reflect local landscape character and a limit landscape and visual effects overall. My evidence also demonstrates that there will be no significant effect on the integrity of the strategic gap between Stubbington and Fareham.

- 5.27. Overall, in respect of landscape and visual matters, I do not consider there to be a conflict with this policy.

Other Matters

- 5.28. Matters raised in objection to the proposed scheme were summarised in the report to committee, including comments from the statutory consultees and several public comments. These include reference to matters of the countryside, strategic gap landscape and landscape character impacts and
- 5.29. I have dealt with these issues throughout my evidence in respect of several of the related points, including with reference to the submitted LVIAs, additional landscape and visual analysis in this evidence and the subsequent response to policy.

6. SUMMARY AND CONCLUSION

- 6.1. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 6.2. Together, the appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham and Gosport, that is bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east (with Newgate Lane and Newgate Lane East framing the northern edge of the sites also).
- 6.3. The wider landscape context of the appeal sites includes the low-lying ground of the coastal plain, characterised by abrupt the transition between the open landscapes and the adjacent urban environments of Fareham, Gosport (with Woodcot and Bridgemary). The settlement area of Stubbington forms the western extent of the Strategic Gap, extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.
- 6.4. Both applications were submitted with a detailed LVIA. These not only set out a comprehensive baseline and robust assessment of predicted impacts, but include details as to how landscape and visual matters have influenced the design of the masterplan, with mitigation measures consequently forming an inherent part of the proposals, both independently but also in respect of the complementary approach of the two schemes.
- 6.5. The reasons for refusal raises three main issues in respect of landscape and visual matters, stating that:
- b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;
 - c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;
 - d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;
- 6.6. This evidence considers the reasons for refusal against various information, including the submitted Landscape and Visual Impact Assessments, various consultation

responses, report to committee and other relevant baseline and evidence base material related to landscape and visual matters.

- 6.7. The submitted LVIAs address the key characteristics of the appeal sites and their immediate context. The submitted LVIAs also set out an assessment of the impact and approach to mitigation. This comprehensive process also enables judgements to be drawn in respect of the context of the appeal sites in relation to the existing urban settlement edges/boundaries.
- 6.8. The purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap has been addressed the a 'strategic landscape and visual appraisal' (prepared by Pegasus Group) and also by reference to the updated Technical Review of Areas of Special Landscape Quality and Strategic Gaps, prepared by Hampshire County Council on behalf of FBC.
- 6.9. With reference to this material, and supported by my own additional analysis where necessary, I conclude that the appeal schemes will not be harmful to the character and appearance of the countryside, will not significantly affect the integrity of the Strategic Gap and will relate well to the existing patterns of settlement.
- 6.10. This is on the basis the relevant key landscape characteristics of the area have been considered through the process of LVIA, consequently informing the analysis of constraints and opportunities, and ultimately the landscape strategy for the mitigation. This forms an integrated part of the two masterplans for northern and southern schemes.
- 6.11. Consequently, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms.
- 6.12. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement.
- 6.13. I consider that the subsequent residual impacts of the appeal schemes will be acceptable in landscape and visual terms.

6.14. In terms of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the Strategic Gap. This is on the basis that:

- In relation to distances, the appeal schemes will reduce the gap between Bridgemarky and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances set out in the FBC study;
- In terms of visibility, the appeal schemes will be physically and visually well contained – they sit within the strong green infrastructure framework that is evident in the form of blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the Strategic Gap from Stubbington;
- Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, along Newgate Lane and within the emerging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;
- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area; and
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

6.15. I also note that, notwithstanding differences in the technical approaches, the Pegasus Group and FBC Strategic Gap studies both independently acknowledge that the Strategic Gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site/project basis.

6.16. In respect of the conclusions of the FBC Strategic Gap study (where these note the relatively poor state of the gap at this point), I would think a logical and appropriate conclusion would be to amend the boundary to omit this part of the landscape from the Strategic Gap, creating capacity for development to come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the

importance of the core areas that are located further west, between Fareham and Stubbington where the Strategic Gap clearly delivers its role and function in full.

- 6.17. Finally, the reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries. However, my evidence demonstrates that the appeal sites are well related to Peel Common, being located to the east of Newgate Lane, physical contained by the alignment of Newgate Lane East and situated immediately adjacent to the existing residential dwellings off Woodcote Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane.
- 6.18. With existing and proposed green infrastructure in place, the appeal schemes will consolidate the pattern of Peel Common within a clearly defined limit. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 6.19. Furthermore, there are some existing physical connections between Peel Common and Bridgemark. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemark, focused along the green route into Bridgemark (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 6.20. If the previous emerging allocation of HA2 were to come forward, this broader area of development would reinforce the connection between Peel Common (including the appeal sites) and the edge of Fareham. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.
- 6.21. In all respects, considering Peel Common in itself, connections to Gosport, and with the potential for HA2 to come forward, development in this area will maintain a robust gap between Fareham (aligned with the western edge of Peel Common) and Stubbington.
- 6.22. Overall, in the context of these limited issues, and with the appeal schemes in place, landscape and visual issues are not sufficient to support a prospective reason for refusal.

PREFACE

The National Planning Policy Framework makes a clear commitment to conserving the natural environment in the planning system and recognises that it has a key role to play in the achievement of sustainable development. The Framework principles and policies make clear that planning should take account of the different roles and character of different areas, recognising the intrinsic character and beauty of the countryside and promoting local distinctiveness. Planning policies and decisions should be based upon up-to-date and relevant evidence about the landscape characteristics of the area and the primary tools for achieving this are landscape character assessments and, where appropriate, assessments of landscape sensitivity.

Fareham Borough Council is currently undertaking a review of its adopted Local Plan and commissioned *LDA Design* to up-date and expand upon the previous Fareham Landscape Assessment, undertaken in 1996, to provide robust evidence to inform Local Plan policy and planning decisions. The study brief included three main components:

- ▣ Landscape character assessment - a review of the baseline 'audit' of the character of the Borough landscape provided by the 1996 Landscape Character assessment, updated as necessary. The aim is to improve understanding of the key characteristics of the landscape that make places distinctive and different from one another, rather than better or worse;
- ▣ Landscape Sensitivity Assessment - detailed analysis and judgements regarding the value of the landscape and its sensitivity to change. The aim is to assist the Council in the evaluation of possible development options/alternatives to meet housing needs in the Local Plan Review and to inform the assessment of potential impacts on the landscape when determining planning applications;
- ▣ Designations Review - a review of landscape designations within the Borough, with specific reference to 'Strategic Gaps' and 'Areas of Special Landscape Character', but also 'other areas of protected or valued landscape designations'. The aim is to assist the Council in framing policy related to landscape protection, strategic gaps and settlement boundaries within the review of the Local Plan.

These components are presented in three separate 'parts', supported by appendices, and together form the 2017 Fareham Landscape Assessment. It should be emphasised that the assessment findings are based upon the professional judgement of the qualified landscape architects/planners within the consultant team and have not been influenced by, nor tested against, the opinions of the Council or the public.

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

LANDSCAPE CHARACTER, QUALITY AND VALUE

This area forms part of the easternmost extent of the Stubbington–Fareham Strategic Gap. It is bounded by Newgate Lane to the west, beyond which lie the Newlands Solar Farm and Peel Common Waste Water Treatment Works. Out-of-town retail uses border the area to the north, while the eastern boundary is shared with the western edge of the Bridgemary area of neighbouring Gosport district. The southern boundary is formed by Woodcote Lane.

The LLCA is divided into two sub-areas, reflecting different land uses and their effects on intrinsic landscape character and quality. **Area 8.1a** comprises the land between Woodcote Lane in the south and Speedfield Park Playing Fields in the north. This area shares the typically flat, low-lying character of the coastal plain landscape that extends south and westwards to the Solent, but lacks the very expansive and denuded character of these areas. It is characterised by medium-scale, regular shaped fields, mostly under arable cultivation, bounded by a network of drainage ditches and a relatively intact structure of hedgerows, albeit heavily trimmed with some gappy sections and few mature hedgerow trees. Internally, the area has an open character but tree belts form taller, denser boundaries around the periphery of the area, especially to the north, east and south, which give the area a sense of enclosure from surrounding urban areas. The western boundary along Newgate Lane is more open and allows some intrusion from passing traffic but the area is devoid of built development (apart from farm buildings at Peel Farm) and retains a predominantly unspoilt, rural, agricultural character with limited intrusion from surrounding urban influences.

Area 8.1b is comparatively small and comprises two separate areas of recreation land and playing fields collectively referred to as Speedfields Park, connected by a surfaced pedestrian and cycle route. Both areas comprise amenity grassland and are enclosed by well-treed boundaries. The larger field adjacent to Newgate Lane contains a pavilion building and small car park along its northern boundary, with a variety of rugby posts, football goalposts and tall flood lights located in the centre of the field. The smaller field to the north east contains a single sports pitch and a children's play area in the south west corner. Despite retaining some of the characteristics of the adjacent landscape type (e.g. flat landform, well-defined hedgerow and tree boundaries and a regular field pattern) the introduction of built elements, car parking and management for sports use give the area a suburban, rather than rural agricultural, character.

The landscape of area 8.1 is not covered by any current national or local landscape designation. Scenic quality is not exceptional and is affected by some localised intrusion of urban features around its periphery and within area 8.1b. It does not contain any features of recognised conservation interest and it lacks the sense of remoteness and natural qualities that are found in other parts of the coastal plain. It has the sense of a 'landlocked' piece of countryside and the area's urban context is perceptible even if not dominating. However, area 8.1a does retain a predominantly rural, agricultural character and has a reasonably intact structure of hedgerows and significant tree cover around its periphery that contributes to its aesthetic appeal. The landscape is generally well-managed as agricultural land and in good condition, with limited evidence of 'fringe' uses or influences (e.g. horse paddocks, vacant land, unkempt fencing, fly tipping etc.). Overall, landscape value in area 8.1a is judged as moderate to high while in area 8.1b it is moderate, although the well-treed boundaries are valuable landscape features.

LLCA 8.1 - WOODCOT

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area lacks the very open, expansive character of other parts of the coastal plain (including adjacent land within the strategic gap to the west) but it nevertheless has a relatively open and large-scale character which makes it susceptible to change.

The distinctive character of **area 8.1a** relies on this openness, its rural agricultural character and the absence of prominent urban features, and it would be difficult to accommodate significant new development without affecting these characteristics or altering the balance between a predominantly rural or predominantly urban landscape. So, overall, the sensitivity of the landscape resource within area 8.1a is judged to be high (moderate to high value and high susceptibility to change), with very limited capacity to accommodate development without a significant impact on the integrity of the area's rural, agricultural character.

The existing balance will be affected, however, with the approved construction of the new southern section of Newgate Lane, which will provide a new connection from Newgate Lane to Peel Common Roundabout and a junction and link road to access the existing route of Newgate Lane. The road alignment just clips the extreme south-western corner of area 8.1b but cuts right through the middle of the southern half of area 8.1a and will inevitably introduce further activity, noise and urbanising features into the agricultural landscape, as well as resulting in physical disturbance to land and tree/vegetation cover.

However, the road corridor is relatively narrow and unaffected land within the rest of the area should be of a sufficient scale to remain viable as farmland and to maintain its essentially rural character. Mitigation proposals include new hedgerow and tree planting along the route to reduce its visibility and impact on the landscape and, if this is effective, the road itself may not have an overwhelming urbanising effect across the area as a whole in the longer term. However, significant further development in addition to the road scheme would almost certainly have this effect, potentially tipping the balance towards a predominantly urban character.

The sensitivity of the landscape resource within **area 8.1b** is slightly lower, as its rural character is already influenced by the proximity to built up areas/roads and the development of sports facilities and amenity uses within the area. Despite its more urbanised character, the area nevertheless has some value as part of the Borough's amenity landscape resource (as well as a role in the strategic gap and local GI network, see below) and its essentially open, undeveloped character would be significantly altered by further encroachment of built development. However, strong boundary vegetation would help to limit the influence of development within this area on the more rural landscape of area 8.1a to the south, particularly if located within the smaller northern field which is contained within very strong, well-treed boundaries.

LLCA 8.1 - WOODCOT

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

VIEWS, VISUAL FEATURES AND VIEWERS

Long distance visibility towards the area is low due to the typically low-lying and flat topography of the Borough (including the area itself), and the screening effects of boundary vegetation and surrounding built form. The area may be visible from some local elevated viewpoints (e.g. tall buildings in Fareham) and from higher ground at Portsdown, but from this distant location it forms an insignificant part of a wide panorama of the urban and coastal plain landscape.

Shorter-distance views into the area from built up areas to the north and east are largely filtered through established trees and boundary vegetation or interrupted by built form. Short distance visibility from the east is limited to private views from the rear of properties that back onto the area within the residential suburb of Bridgemary (e.g. Tuke's Avenue, Pettycot Crescent and around Heron Way). Short-distance visibility from the north is also significantly restricted by planting along the southern edge of the retail park, but there are open views through fencing into area 8.1b from the footpath that runs along the northern edge of the sports ground from Newgate Lane. Views of area 8.1a are largely screened from this direction by intervening vegetation.

Views from roads and public places to the south of the area are also very limited but there are some occasional views into the southern end of area 8.1a over or through the hedgerow that runs along Woodcote Lane/Brookers Lane at the far south of the area. Private properties along Woodcote Lane will experience similar views from upstairs windows.

The most significant views are from Newgate Lane which runs along the western side of the area, and from a number of properties along the roadside. Open views across large parts of areas 8.1a and b are possible from much of this length of road, where the roadside hedgerow is absent, gappy or trimmed to a low level. Land further to the east is less visible because of some intervening hedgerows or tree cover within the area.

Most of the available views are across open, undeveloped and relatively attractive countryside, with a strong backdrop of mature trees and limited evidence of built development or other urbanising features. The exceptions to this are views from the southern section of Newgate Lane between Peel Farm and Woodcote Lane, where a foreground of small-scale horse-grazed paddocks with wire fencing, shelters etc lends a fringe character to the view, and views into the sports fields in area 8.1b which have a more suburban character.

Currently, the main viewers are local residents within properties around the immediate periphery of the area, motorists and pedestrians on Newgate Lane and users of the sports facilities, public open space and footpath within area 8.1b. In future, the new alignment of Newgate Lane will increase the extent of the views available to road users, opening up most of area 8.1a to potential views from the road. Roadside planting will mitigate some of these effects but will take time to become effective.

LLCA 8.1 - WOODCOT

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Overall, visual sensitivity in this area is moderate to high. Although it is screened from longer-distance views, a large proportion of **area 8.1a** is highly visible from short distance views from Newgate Lane to the west, and it is overlooked by a number of properties around its periphery through or over boundary vegetation. The high intervisibility within the area means that these views are quite extensive across the area and they generally have an attractive, unspoilt rural character.

The extent of visibility will be exacerbated, at least over the short term, by the introduction of the new alignment proposed for Newgate Lane. This will open up additional views across the area from the new road and will affect the character of rural views across the area for a period of time. Roadside planting will mitigate some of these effects but will take time to become effective and visual sensitivity of the remaining undeveloped area will remain high.

While road users are only moderately susceptible to change, because of their focus on the road and fleeting nature of views, local residents are likely to be more focussed on the landscape and their surroundings and will be highly susceptible to change. The introduction of further development into the agricultural landscape is likely to have a significant impact on the character and quality of existing predominantly rural views, unless it can be successfully integrated within a substantial framework of new vegetation.

Area 8.1b is slightly less visually sensitive, partly because it benefits from more extensive tree cover around its boundaries, and also because the existing character of the views is already affected by some urbanising influences. Nevertheless, local residents and recreational users of the public open space and PRow network are highly susceptible to change and will value the existing open, essentially undeveloped character of this recreational landscape. Their visual amenity would be significantly affected by the introduction of built development within this area.

LLCA 8.1 - WOODCOT

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

CONTRIBUTION TO SETTING AND SETTLEMENT CHARACTER

The area lies within the lower-lying parts of the Borough, forming part of the coastal plain that slopes gently up to the foot of Portsdown Hill in the far north. While the area does not play a significant role in the topographic setting of the urban area, together with LCA7 to the west it forms part of a swathe of largely undeveloped agricultural landscape that lies between the urban areas of Fareham in the north, Stubbington in the west and Gosport in the east, providing clear visual and physical separation of these settlements. The significant role of the area in separating and preventing coalescence of these settlements is enshrined in policy, with the area designated a Strategic Gap in the Fareham Borough Local Plan.

The visual separation between settlements is apparent in all short distance views into the area from the edge of Fareham to the north, Newgate Lane to the west, Woodcote Lane to the south and in private views from Bridgemary (residential suburb of Gosport) in the east. The substantial vegetation along the northern and eastern boundaries provides strong definition of the edges of the urban areas of Fareham and Bridgemary and marks a clear distinction between town and country (albeit slightly blurred by the amenity uses in the north). This helps to reinforce the separate identity of each settlement and also provides the urban areas with an attractive, essentially rural setting.

The alignment of the approved Newgate Lane South encroaches within the Gap but, in itself, should not fundamentally alter the sense of separation, indeed it may in some ways strengthen it. The lack of roadside development along the new route will reinforce the experience of moving out of Fareham, passing through an area of undeveloped countryside and entering the urban area of Gosport beyond the Peel Common roundabout. Similarly the physical and visual gap across the area between the edge of Bridgemary and Peel Common may be more readily appreciated in views from the road as it passes through the middle of the gap between these two settlements.

The role of the area in separating Stubbington and Gosport is less easily perceived because of intervening development and other features that interrupt views, and occupy land, between the two areas. These include the Newlands Solar Farm, the waste water treatment plant and housing development along the western side of the Newgate Lane corridor at Peel Common. Nonetheless, the area does have a critical role in preventing the coalescence of these areas and this is likely to become more significant with the future redevelopment of land at MCA Daedalus and construction of the Stubbington Bypass to the west, within the existing gap between built areas.

The area does not play a significant gateway role for the Borough as a whole, being some way to south of the M27 and main railway line and therefore not visible from the main approach routes. However, it does provide a strong rural backdrop along Newgate Lane which forms part of a key approach into the Borough from Gosport District to the south via the B3334. This reinforces the sense of moving between settlements and districts.

Overall, **area 8.1** plays an important role in defining the edges, separate identity and settings of Fareham and Gosport and a critical role in preventing their coalescence. It also makes an important contribution to the swathe of landscape that currently separates Stubbington from Gosport, a role that may become more critical to maintain with the redevelopment of the MCA Daedalus site in future years.

LLCA 8.1 - WOODCOT

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Given the area's designation as part of the Strategic Gap and the role it plays in preventing coalescence between the settlements of Fareham, Stubbington and Gosport, the area is highly sensitive to change. The landscape lacks any strong landform feature (e.g. ridges or valleys) or a mature framework of woodland that could potentially contain and provide a strong landscape edge to any major extension of built form into this area. Intrusive development within the area would inevitably erode the visual and physical separation that currently exists and potentially alter the character of the landscape settings of the two settlements from predominantly agricultural to predominantly urban. Ultimately, the function and integrity of the area as farmland could be significantly eroded to the point where the gap becomes a corridor of greenspace between urban areas, or an 'urban park', rather than a functioning area of agricultural landscape with a distinct character and identity.

The proposed new bypass could potentially erode the integrity of the existing gap if it is regarded as forming a potential new edge for development. If the rural, undeveloped and open character of this area is to be maintained, it will be crucial to keep the urban boundaries as tightly drawn as possible and avoid infilling the land between the existing urban edges and the new road. Overall, therefore, there is very limited scope to accommodate development without a significant impact on the integrity of the area's rural, agricultural character and the role it performs in maintaining the separate identity and character of the settlements and their landscape settings.

LLCA 8.1 - WOODCOT

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

CONTRIBUTION TO
GREEN INFRASTRUCTURE NETWORK

This area does not support a wide range of GI assets in terms of biodiversity or landscape features (there are no designated features) but the area as a whole does make a contribution to the local GI network as an extensive area of undeveloped greenspace between the urban areas of Fareham and Gosport, albeit with limited public access. The tree lined boundaries and reasonably intact structure of hedgerows provide a valuable framework of vegetation within this large-scale, intensively managed landscape and the playing fields, public open space and footpath within area 8.1b are valuable recreational assets for local people. The footpath along the northern edge of the area and Woodcote Lane/Brookers Lane in the south provide east-west access links between the residential suburbs of Gosport across the strategic gap to Stubbington and beyond to the Meon Valley. There are no other PRow or access routes across or within area 8.1a.

The PUSHGI strategy identifies a sub-regional scale blue corridor following the drainage network that runs through the western side of the area southwards to join the River Alver (within Gosport District). The strategy includes a project (C7) to strengthen wildlife corridors connected to the River Alver but this is focused on the Alver Valley outside of the Borough. The Fareham GI strategy does not identify any specific projects within the boundary of this area.

LLCA 8.1 - WOODCOT

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area's GI value lies in its largely open, undeveloped nature, the public open space at Speedfields Park and the functional connections between Newgate Lane and Bridgemary provided by the public footpath to the north and Woodcote Lane to the south. The area is moderately sensitive to change. Any development that compromised the PRoW network or the sense of openness and being 'in the countryside' would have an adverse effect on the GI network.

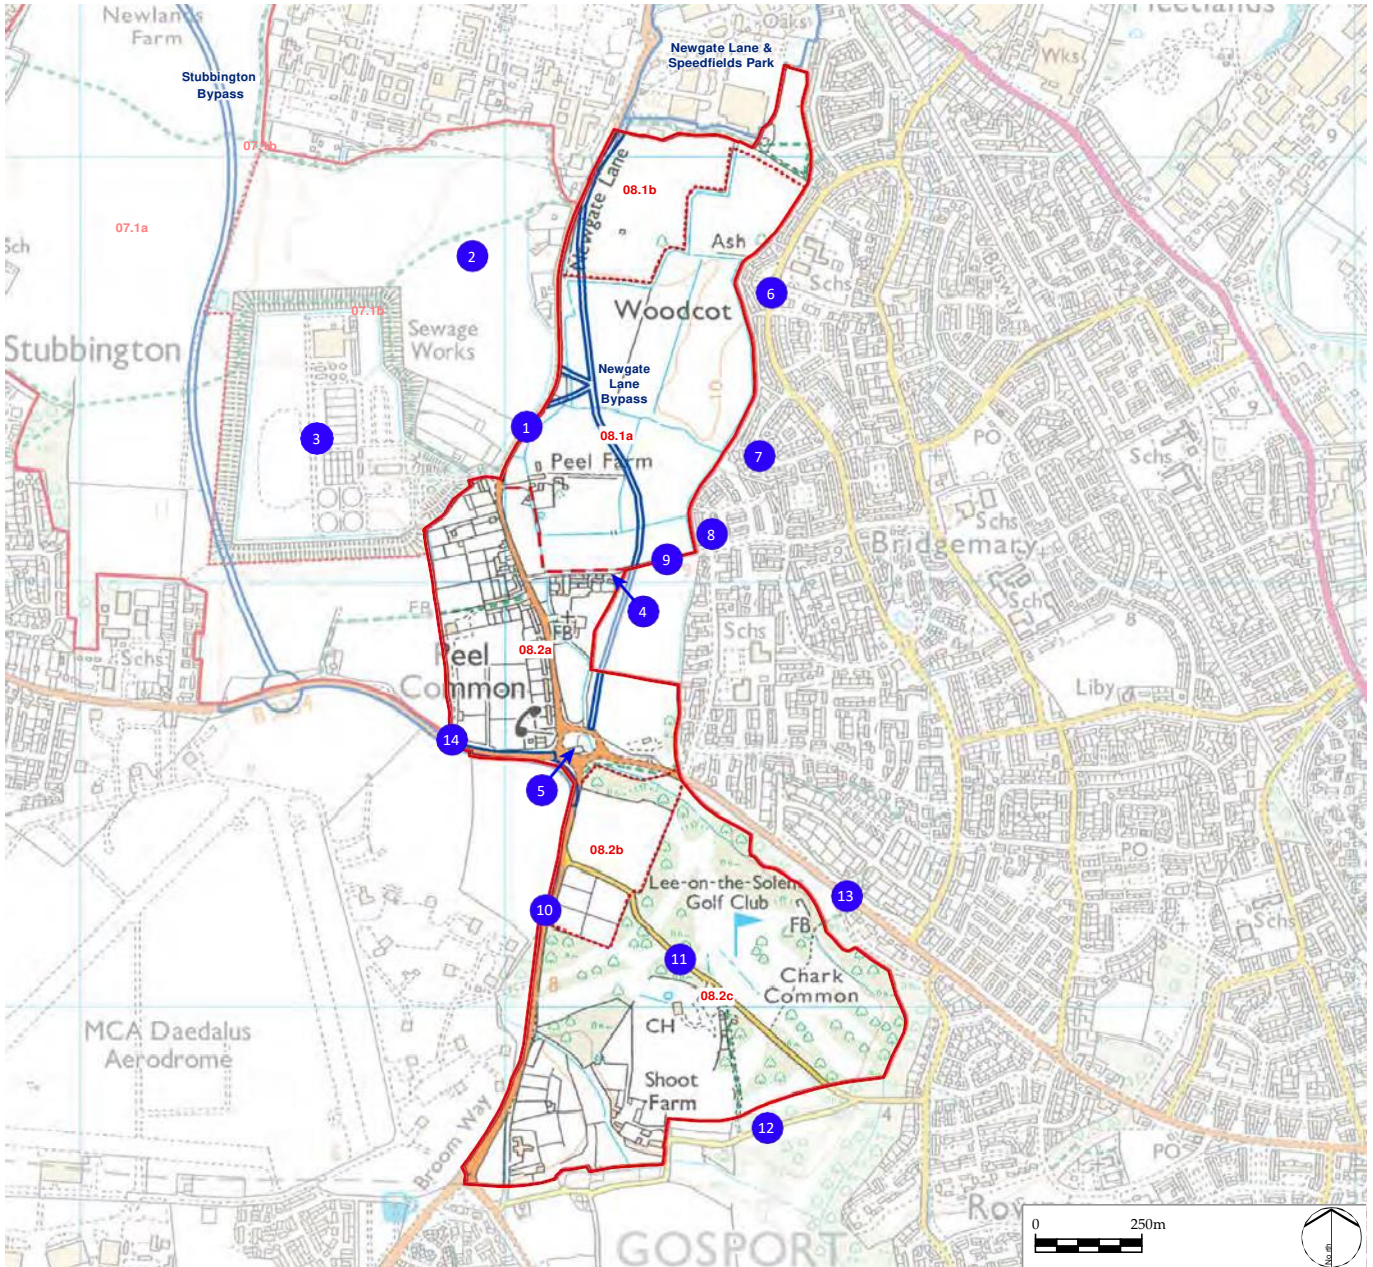

This area would benefit from improvements and extension of the local GI network, through major investment in the reinstatement or creation of hedgerows, woodlands and other habitats that have been lost or damaged by agricultural intensification, and through the extension of public open space or access connections through the area.

The main impacts of new road on GI resources are its potential interference with the east-west footpath link between Bridgemary and Peel Common that crosses the area along Woodcote/Brookers Lane, the loss of small areas of amenity space within the Speedfields Park and Brookers Field Recreation Grounds and the loss of some trees and hedgerow vegetation along the road alignment. Mitigation proposals will offset much of this impact.

LLCA 8.1 - WOODCOT

DEVELOPMENT CRITERIA AND ENHANCEMENT OPPORTUNITIES

As a whole, this area is of high sensitivity primarily on account of its critical role in preventing the coalescence of the urban areas of Fareham, Bridgemary and, to a lesser extent, Stubbington, and in defining the edges, setting and separate identity of these settlements. The relatively small size of the area, the high degree of intervisibility and its generally unspoilt, rural character make it particularly vulnerable to change. The generally open nature of the landscape means that it is difficult to integrate development without it being highly visible and potentially affecting the rural undeveloped character across a wide area, as well as eroding the physical, visual and perceived gap between settlements. The situation is further complicated by the proposed new road which will have some effect on the integrity and character of the landscape resource and undeveloped gap. Even a small amount of encroachment of further built development within the area could exacerbate these effects to the point at which the character of the whole area may be fundamentally altered.

There may be potential for some modest, small scale development associated with existing recreational land uses and built form within area 8.1b, as long as it is closely related to existing features and can be successfully integrated within the existing structure of hedgerows and trees without altering the essentially ‘undeveloped’ character of the amenity landscape or the wider agricultural landscape of area 8.1a.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban setting and green infrastructure, development proposals will need to:

- ▣ Protect the open, predominantly agricultural and undeveloped, rural character of area 8.1a;
- ▣ Maintain and strengthen the existing structure of trees, hedgerows and other mature vegetation, to maximise its landscape and wildlife value and to minimise impacts on the rural character of the landscape;
- ▣ Maintain the essentially open, undeveloped character of the public open space, playing fields and sports facilities within area 8.1b, and be designed to relate closely to the existing structure of trees hedgerows and existing characteristic built features within the area;
- ▣ Avoid any major incursion of the urban ~~aa~~ into the countryside beyond existing well-defined boundaries, or create significant new pockets of urban or urbanising development within open farmland;
- ▣ Protect the area’s role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development strung out along road corridors (e.g. along the existing and proposed new alignment of Newgate Lane) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;
- ▣ Maintain significant distance and separation from the corridor of the new road to minimise its urbanising effects upon the rural character of the area;
- ▣ Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the open, flat landscape;
- ▣ Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area;
- ▣ Provide substantial new investment in the landscape through extensive tree, hedgerow and woodland planting using native broadleaved species appropriate to the locality and soil conditions and habitat creation to diversify the intensively farmed landscape;
- ▣ Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

LANDSCAPE CHARACTER, QUALITY AND VALUE

Landscape character, quality and value

This area forms the southern part of the Woodcot-Alver Valley LCA and the south-eastern part of the wider Stubbington–Fareham Strategic Gap. The area forms part of the flat, low-lying coastal plain but is very different in character and scale from the open agricultural landscape to the north and west. It is characterised by a mixed pattern of wooded common, small-scale pasture and ribbon development along the corridors of the River Alver and Newgate Lane and is bounded to the east by the urban edge of Gosport, to the west by the Daedalus airbase, to the north by the Peel Common Waste Water Treatment Works and arable farmland, and to the south by the open amenity land of the Alver Valley.

Area 8.2a comprises a strip of land on either side of Newgate Lane, extending from Peel Farm in the north to the Peel Common roundabout in the south. To the west of the road, the area is occupied by residential ribbon development backed by gardens and a small-scale pattern of fields, paddocks and other plots of land, contained by strong boundary vegetation to the rear. The eastern side of the road is characterised by a similar patchwork of small-scale, horse grazed pastures, built development south of Woodcote Lane (including housing, church and care home), gardens and small parcels of land enclosed by woodland, trees and hedgerows. In the far south-east corner is an area of public open space, including sports pitches and associated buildings. The character of this corridor is significantly affected by the influence of busy roads, street lighting, built development and other urban land uses, while the management of the small-scale pastures and plots of land - with their associated rather ramshackle fencing and structures - lends a distinct fringe character to the remaining unbuilt landscape. This situation will be exacerbated by the construction of the proposed new Newgate Lane-Peel Common bypass which will further fragment and intrude upon areas of undeveloped landscape. Overall landscape quality is therefore substantially degraded although the strong structure of vegetation that encloses this area is of some landscape value.

On the southern side of the Peel Common Roundabout lies Chark Common, which marks a distinct change in character from the open arable landscape of the northern part of the Woodcot-Alver Valley LCA, to a landscape which is strongly enclosed by extensive cover of woodland and trees, within which small-scale fields or open spaces are seemingly ‘carved out’ from the woodland cover. Within the overall area, **area 8.2b** is distinctive in that it forms a relatively large, regularly shaped parcel of open land, divided into smaller horse-grazed paddocks by fencing. This area shares some of the fringe characteristics of the roadside paddocks further north (e.g. fencing, land management, structures etc) but has a less urbanised context and is framed by a strong, attractive backdrop of woodland, mature trees and hedgerows. Its quality is less degraded and it retains a semi-rural character.

The remainder of the Chark Common area (**area 8.2c**) is dominated by the Lee-on-Solent Golf Course, which extends across the majority of the area, excluding the far south-west corner (comprising fields in use for horse-grazing along with former farm buildings converted for residential use). The landscape is characterised by open areas of grassland, heathland and wetland habitats (associated with the River Alver) contained within a strong structure of woodland belts, copses, mature trees and scrub. Parts of the land are intensively managed as part of the golf course (e.g. greens, fairways, bunkers etc.) and there are associated buildings and structures, which have an amenity character that somewhat detracts from the rural character of the landscape. However, most of the area is designated as a SINC (for its woodland, heathland and wetland habitats) and retains an attractive, enclosed and well-treed character with some ‘semi-natural’ qualities. The strong tree cover also provides an effective buffer to the influence of surrounding roads and neighbouring development within Gosport. The area is generally unspoilt and of relatively high landscape quality although it is not covered by any current national or local landscape designation.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The sensitivity of the landscape resource varies within this overall area. **Area 8.2a** is already substantially degraded by urban influences and has a predominantly ‘fringe’ character which reduces its sensitivity to change. This will be exacerbated by the construction of the proposed bypass. Further development within this area would further erode the extent of surviving ‘undeveloped’ land but would not have a significant effect upon the overall character and quality of the landscape resource. Notwithstanding its value as part of the strategic gap or other roles, in landscape resource terms alone this area has relatively low sensitivity and high development potential.

Area 8.2b also has fringe qualities but has not been degraded in the same way. It retains an essentially rural, pastoral character that is susceptible to change and would be significantly affected by the introduction of permanent built development. The area is physically and visually detached from other built form by the strong surrounding woodland framework and significant development would appear as an isolated area of built land within open countryside. A section of the western boundary along Broom Way is open and there is a visual relationship between the area and currently undeveloped land within the Daedalus site to the west which would also be affected by development within this area. Redevelopment proposals for the Daedalus site may change the situation but current indications suggest that the undeveloped ‘green’ character of this corner of the site is to be maintained. Overall, therefore, landscape sensitivity is judged as moderate to high and the potential for development is low.

Area 8.2c is highly sensitive to change. Although its use as a golf course has altered the underlying character of the landscape it nevertheless has an attractive wooded and enclosed character and supports a mosaic of other habitats and features of landscape and ecological value. Built development would undoubtedly intrude upon its quiet, semi-rural and secluded character. There may be some modest potential for accommodating small-scale development (i.e. individual buildings) within the south west corner of the area, where it is associated with existing built form and can be more successfully integrated within the existing vegetation structure, but otherwise there is very limited potential for development within the area.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

VIEWS, VISUAL FEATURES AND VIEWERS

The area's low lying position within the coastal plain means that there are few long distance views. The area may be perceived as one part of a much wider panorama taking in the urban and coastal landscapes in views from higher ground to the north of the Borough. However, its small size and lack of landmark features means the area is generally indistinguishable from the wider landscape within long-distance views.

More locally, large parts of **area 8.2a** are visible from roads, adjacent dwellings, lanes, public rights of way and open spaces within the area itself, although there are some small pockets of land enclosed behind built form and strong boundary vegetation that are less visible from public areas. The character and quality of the available views is already heavily influenced by urban characteristics and would not be fundamentally altered by additional built development.

Area 8.2b is largely enclosed within a strong wooded framework which restricts its visibility from surrounding areas but it is open along parts of its western boundary, allowing some direct views from adjacent Broom Way. There are also occasional filtered glimpses through the roadside trees along Brune Lane, which cuts through the middle of this area. Given that the main viewers will be road users, the visual sensitivity of this area is moderate and could be reduced further by mitigation planting to close the gap along the western boundary, although this will take time to become effective.

Area 8.2c is generally of low visual sensitivity. The extensive cover of trees and woodland around and within the area prevent all but glimpsed views from surrounding roads, through trees and gaps in the boundary vegetation. There are no views from neighbouring urban areas to the east. There is a public footpath that cuts through the golf course, linking Shoot Lane with Brune Lane, and another sort section of footpath into the area off Rowner Lane on the northern side of the area, otherwise there are no other publicly accessible viewpoints in this area.

The main viewers of this area are therefore local residents within Peel Common (area 8.2a), users of the main road network (Newgate Lane, Broom Way) and minor local lanes (Brune Lane, Shoot Lane), users of the limited network of PRow and open spaces, and golf course members. Apart from some attractive views within area 8.2c, the value of the landscape as a visual resource for these receptors lies primarily in its character as undeveloped land rather than its intrinsic scenic quality.

© Barry Shimmion

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Visual sensitivity is relatively low within this area. Area 8.2a is highly visible but the character of the views is such that further development is unlikely to have a major impact on visual amenity. Area 8.2b is visually well-contained apart from a section of its western boundary, but this visual exposure could be mitigated by additional planting to close the gap. Likewise, area 8.2c is also highly visually contained by the extensive cover of trees and woodland within and around the area, with very limited publicly accessible views. However, balanced against this is the relatively unspoilt character of the views in the Chark Common area which are highly susceptible to change, and the high level of sensitivity of people using the PRow network (albeit very restricted) and otherwise accessing the area for recreational purposes, who appreciate their surroundings and will be very aware of changes.

Across much of the area, therefore, there are limited opportunities to integrate development into the visual environment without unacceptable adverse effects on the character and quality of existing views and on the visual amenity of sensitive viewers. However, there may be some modest scope for accommodating small-scale development (i.e. individual buildings) within less visible, well-contained pockets of land within areas 8.2a and in the south-western corner of area 8.2c, where the existing vegetation structure has the potential to limit effects on high quality views and visual amenity.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

CONTRIBUTION TO SETTING AND SETTLEMENT CHARACTER

The area lies within the lower-lying parts of the Borough, forming part of the coastal plain that slopes gently up to the foot of Portsdown Hill in the far north. While the area does not play a significant role in the topographic setting of the urban area, together with LCA7 to the west (and area 8.1 to the north) it forms part of a swathe of largely undeveloped landscape that lies between the urban areas of Fareham in the north, Stubbington in the west and Gosport in the east, providing clear visual and physical separation of these settlements. The significant role of the area in separating and preventing coalescence of these settlements is enshrined in policy, with the area designated a Strategic Gap in the Fareham Borough Local Plan.

The role of **area 8.2a** as part of the gap is evident to the east of Newgate Lane, where the strip of roadside paddocks forms part of a wider corridor of undeveloped landscape between the road and the western edge of Bridgemary. However, the role of this area in maintaining the gap westwards towards Stubbington is less easy to perceive from the Newgate Lane corridor as views in this direction are blocked by built development along the roadside at Peel Common. Nevertheless, when viewed from the west (from the Gosport Road) it becomes apparent that Peel Common is an isolated small settlement that lies within the wider gap, rather than defining its western boundary or connecting to a larger urban area. It will be vital to maintain this ‘isolation’ of development at Peel Common if the physical and visual integrity of the wider gap is to be maintained.

The Peel Common Roundabout is a critical ‘pinch point’ within the gap between Peel Common and the edge of Bridgemary where there is a real risk of the two areas coalescing. This will be further exacerbated by the new bypass which eats into the remaining undeveloped land to the north of the roundabout and also, potentially, by redevelopment of the Daedalus site to the south. It will be vital to protect the undeveloped landscape within the public open space to the east of the roundabout in order to maintain a physical, visual and perceptual gap between the built areas.

Areas 8.2b and c also play a pivotal role in maintaining separation of urban areas and as a link between the upper and lower parts of the Alver Valley corridor. This triangle of semi-rural, heavily wooded landscape is important not only in physically and visually separating built areas at Peel Common and Bridgemary but also in separating Bridgemary from the northern edge of Lee-on-the-Solent. The redevelopment of MCA Daedalus may potentially exacerbate the perceived closing of the gap between Lee-on-the-Solent and Peel Common. It will be essential, therefore, to maintain the undeveloped character of all sides of this triangle, avoiding encroachment of development along Broom Way, Shoot Lane and Gosport Road.

This southern area also forms a vital link in the wider Alver Valley landscape corridor which extends southwards into Gosport District to the coast, providing a distinct edge and landscape setting to the urban areas to the south. It will be very important to maintain the integrity of this continuous corridor of undeveloped landscape and avoid the encroachment of development within and across it.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Given the area's designation as part of the Strategic Gap and the role it plays in preventing coalescence between the settlements of Fareham, Stubbington, Bridgemarky and Lee-on-the-Solent, the area is highly sensitive to change. The area also contributes to the perceived sense of separation between Gosport District and Fareham Borough. Any development that reduced the physical or visual separation between these settlements would have an adverse effect on the integrity of the gap and on the area's contribution to the distinct identity and settings of the surrounding urban areas. Consequently, the area offers very limited development potential in respect of its role in maintaining the separation and setting of settlements. The only opportunities may lie within areas that are closely associated with existing development (e.g. at Peel Common or in the SW corner of area 8.2c) and can be integrated within the landscape without any physical or perceived encroachment within the gap.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

CONTRIBUTION TO GREEN INFRASTRUCTURE NETWORK

The area's main contribution to the GI network is through its role as an extensive area of undeveloped land between the urban areas of Fareham and Gosport and, in particular, as part of the wider corridor of greenspace and habitats that follow the course of the River Alver, identified within the PUSH GI strategy as a 'sub-regional scale blue corridor'. The strategy includes a project (C7) to strengthen wildlife corridors connected to the River Alver but this is focused on the Alver Valley outside of the Borough.

The northern part of the area (8.2a) does not support a wide range of designated GI assets but the framework of mature hedgerows and trees and the playing fields to the east of the Peel Common Roundabout are all valuable GI resources in this urbanised area. Woodcote Lane and the footpath linking Newgate Lane with Gosport Road also provide a valuable access link connecting Bridgemary with Stubbington across the middle of this area.

The southern part of the area (**areas 8.2b and c**) contains significant biodiversity assets in the extensive woodland, grassland, heathland and wetland habitats (designated as a SINC) within the golf course and surrounding area but is relatively inaccessible to the public, with only three short lengths of public footpath and no public open space. An extension of public access in this area, particularly along the river corridor to link with the Alver Valley Country Park to the south (in Gosport District) would be desirable. The Fareham GI strategy identifies project BW14 which aims to create 'cross boundary links from South Fareham Gap and Daedalus to the Alver valley Country Park' and 'to provide a linear corridor between Stubbington, Lee-on-the-Solent and Gosport'.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area's primary GI value lies in its largely undeveloped nature and the extensive network of woodland, grassland, heathland and wetland habitats within the corridor of the River Alver and within Chark Common in the south of the area. These assets are particularly scarce and valuable within the heavily urbanised and pressured context of this part of the Borough and are therefore very sensitive to change.

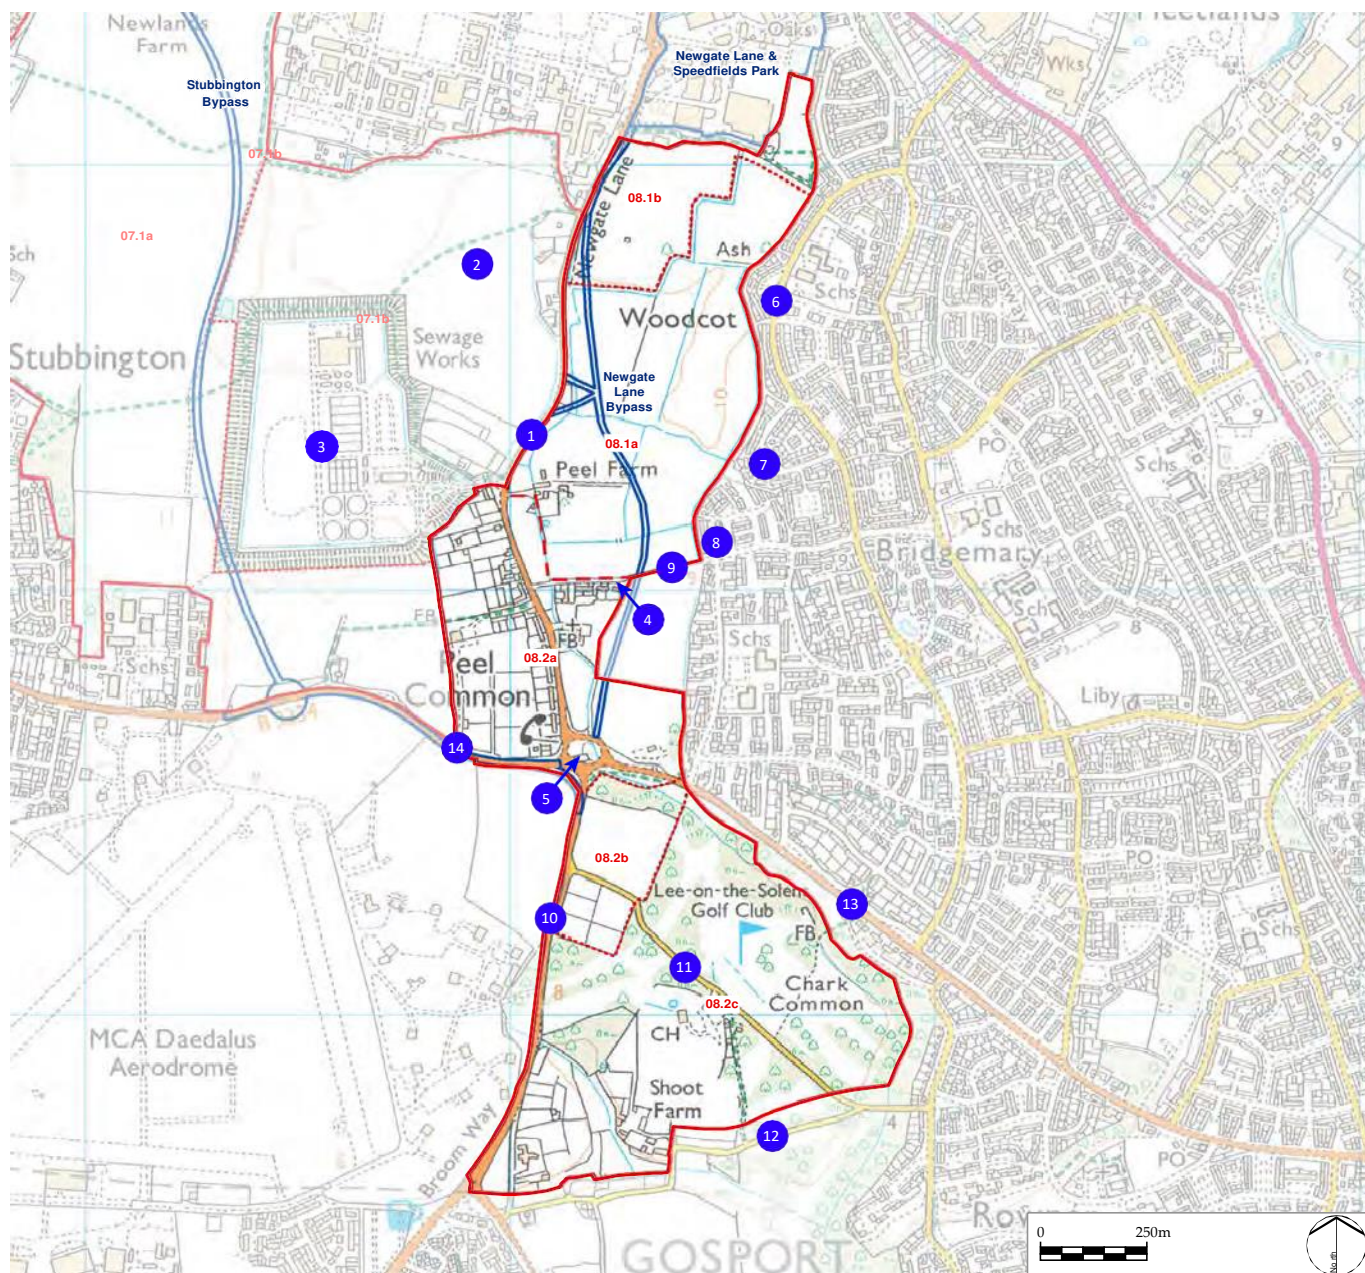

The existing network of public access an open space is fairly sparse within the area and existing features need to be protected and their function and quality enhanced. The area would benefit from improvements to the local access network to provide improved east-west links between urban areas and the wider access network of the coastal plain, and north- south links to connect the northern part of the river corridor with the Alver Valley Country Park and the coast.

Any new development would need to maintain the largely 'undeveloped' character of the area, ensure the protection of features of landscape or biodiversity value, and maintain and extend the provision of access and public open space opportunities. There is very limited scope for this to be achieved in this highly constrained area.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

DEVELOPMENT CRITERIA AND ENHANCEMENT OPPORTUNITIES

As a whole, this area is of high sensitivity primarily on account of its critical role in preventing the coalescence of the urban areas of Fareham, Bridgemary, Lee-on-the-Solent and, to a lesser extent, Stubbington, and in defining the edges, setting and separate identity of these settlements. The narrowness of the gap between development at Peel Common and the edge of Bridgemary means that this area has a particularly vital role in maintaining physical, visual and perceived separation and even a limited amount of development in the ‘wrong’ place, particularly along the main roads that enclose the southern part of the area, could threaten the integrity of the gap. The situation is further complicated by the proposed new bypass which will inevitably have some effect on the integrity and character of the landscape resource and undeveloped gap and further ‘squeeze’ the gap at its narrowest point.

Other key sensitivities include the important range of habitats within the Chark Common area and the area’s contribution to the corridor of undeveloped greenspace (albeit largely inaccessible) along the course of the River Alver, from Fareham to the Alver Valley Country Park and beyond to the coast.

There may be potential for some modest, small scale development associated with existing built form at Peel Common or in the far south-west of the area, as long as it is closely related to existing features and can be successfully integrated within the existing structure of hedgerows and trees without altering the essentially ‘undeveloped’ character of the landscape or threatening the integrity of the gap.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban setting and green infrastructure, development proposals will need to:

- ▣ Safeguard the area’s vital role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development along road corridors (e.g. Broom Way, Shoot Lane and Gosport Road) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;
- ▣ In particular, protect and strengthen the undeveloped character of the public open space to the east of the Peel Common roundabout;
- ▣ Maintain the distinctly ‘isolated’ nature of settlement at Peel Common and ensure that any potential small-scale infill development within this area effectively ‘rounds off’ rather than extends the settlement boundary, to avoid the risk of physical or perceived coalescence with other built areas;
- ▣ Protect the semi-rural, undeveloped character of areas 8.2b and c;
- ▣ Maintain and strengthen the existing structure of woodland, trees, hedgerows and other mature vegetation in all parts of the area, to maximise its landscape and wildlife value;
- ▣ In particular, maintain and enhance the mosaic of woodland, heathland, grassland and wetland habitats of value within the Lee-on-the-Solent golf course at Chark Common and encourage further habitat creation and diversification within intensively managed areas to maximise wildlife and landscape value;
- ▣ Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the landscape;
- ▣ Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area, particularly along the River Alver corridor and with the Country Park to the south;
- ▣ Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.
- ▣ Use native broadleaved species appropriate to the locality and soil conditions in new tree and hedgerow planting.

APPENDIX FL&BH 1.2.2
COMPOSITE LANDSCAPE STRATEGY

- KEY**
- Site boundary
 - Existing trees/vegetation to be retained
 - Existing drainage
 - Existing public rights of way
 - Newgate Lane relief road Southern Section (Currently under construction)
 - Proposed development cells and units
 - Proposed key frontages
 - Proposed secondary frontages
 - Proposed buffer planting to eastern and southern boundaries
 - Proposed tree planting
 - Proposed feature tree planting
 - Proposed hedgerows
 - Proposed footpaths
 - Proposed attenuation area
 - Proposed play areas
 - Continuity of green infrastructure connections to the Alker Valley
 - Direct connection to existing settlement pattern

Eastern boundary vegetation (existing and proposed) will form a partial screen and help assimilate the developments

Open spaces and landscape planting reinforce the defined edge along Newgate Lane

Existing vegetation (including hedgerows) retained where possible and used to define development parcels, reflecting scale and pattern of the local landscape

Retained sense of openness along 'old' Newgate Lane giving focus of open space within the settlement pattern

Land at Newgate Lane, (North) and Land at Newgate Lane (South) Fareham, Hampshire
 Fareham Land Partnership and Bargate Homes LP

Executive Summary

Fareham Borough Council is in the process of producing a new Local Plan to address housing, employment and retail development requirements across the Borough up to 2037. Once adopted, the new Local Plan will replace the adopted Local Plan Part 1 (Core Strategy) and Local Plan Part 2 (Development Sites & Policies).

To support Local Plan development, Fareham Borough Council commissioned the Landscape Team, in Hampshire County Council, to undertake a technical review of:

- six proposed Areas of Special Landscape Quality (ASLQ).
- two proposed Strategic Countryside Gaps: Meon Gap and between Fareham and Stubbington.

Fareham Borough Council's recent past experience in the determining of two planning applications, identified the need to address the 'valued landscapes' of Fareham.

"Two recent planning appeal decisions demonstrated how the argument of valued landscapes could help to determine planning decisions. Both decisions were on sites located in the Lower Meon Valley (Land west of Old Street, Stubbington and Land east of Posbrook Lane, Titchfield) and the Inspectors recognised the high-quality landscape concluding that the Lower Meon is a valued landscape.

...with this in mind, the Council proposed the designation of valued landscapes as part of the Draft Local Plan Update consultation in the summer of 2019."(page 27, Fareham Draft Local Plan 2036)

There was also the need to clarify the role that Strategic Gap designation plays within planning policies in the Countryside, and establish the clear difference between a policy that addresses landscape quality and a policy that addresses the prevention of coalescence of settlements with separate identities, as:

"...Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities." (page 27, Fareham Draft Local Plan 2036)

This technical review is published at the Regulation 19 stage to support the proposed designations.

The technical review undertaken during March to July 2020, reviewed recent relevant documents and developed an appropriate and concise methodology for determining Areas of Special Landscape Quality (or ASLQ), based primarily on criteria from the Guidelines for Landscape and Visual Impact Assessment (GLIVIA) 3rd Edition, Box. 5.1, supported by other examples of good practice and case law.

As there is no standard national guidance on Strategic Gap determination, a methodology and set of criteria were established for determining Strategic Gap characteristics and boundaries through review and analysis of pertinent recent Strategic Gap proposals developed for other Local Plans and through Fareham Borough Council's own Strategic Gap history.

Executive Summary

The resultant analysis and site surveys of all Fareham Borough's Landscape Character Areas concludes that:

- The six proposed ASLQ put forward for designation in the Fareham Local Plan Supplement (Reg 18 consultation document, Jan-March 2020), can be considered as 'valued landscapes' as they scored highly against the assessment criteria and therefore should be identified for ASLQ designation in the Fareham Local Plan 2037, with some modifications made to boundaries, to bring them into line with the current Fareham Borough Landscape Character Assessment 2017, but also;
- Through this process, two further landscape character areas in Fareham Borough were identified as having equivalently 'valued landscape' characteristics and so it is recommended that Chilling-Brownwich Coastal Plain and parts of the Cams to Portchester Coast should also be designated.
- Conservation Areas where they sit in or adjacent to a proposed ASLQ should be included as part of the ASLQ because of their mutually supportive relationship.

The resultant analysis and site surveys of the two Strategic Gaps, conclude that:

- The Meon Strategic Gap is proposed for continued designation, having both strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence, that could result from continued pressure for expansion of the Western Parishes; North and West Fareham, and from pressure for the expansion of Stubbington.
- One moderate amendment is proposed to the North Eastern corner of the Meon Gap; that is an extension to the Gap around Funtley to prevent Funtley from coalescing with North and West Fareham.
- The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence through continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there are some opportunities for development to be accommodated within the landscape, without compromising the Strategic Gaps function.

Executive Summary

Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:

- An area to the South of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function.
- An area to the north west of Stubbington south of Oakcroft Lane and east of Ranvilles Lane, as some development could be visually and physically absorbed into the Gap without compromising the Gap function.

It is also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past.

In order to develop appropriate Green Infrastructure mitigation and enhancement associated with the areas of recent and future change described above, in the Fareham-Stubbington Gap, Green Infrastructure Frameworks or Strategies are required for each area.

Chapter 4: Strategic Gaps

Figure 4.1. Photograph taken from road that leads to The Great Barn, near Titchfield Abbey, looking East towards edge of Fareham, in The Meon Gap. Beyond the tree line is Fareham. Photograph: Charlotte Webb June 2020

Chapter 4: Strategic Gaps Overview

1. This chapter describes the application of methodology to determine the extent of the two Strategic Gaps in the draft Fareham Local Plan 2036 and gives specific recommendations for each Gap:

1. Fareham/Stubbington and the Western Wards (the Meon Gap)
2. Fareham/Bridgemary and Stubbington / Lee-on-the-Solent (the Fareham-Stubbington Strategic Gap)

Role and purpose of the Strategic Gap

2. As a reminder of the previously stated purpose of the Strategic Gap:

“The primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities.”
(Fareham Publication Local Plan 2037)

First Filter to establish Study Area Extents

3. The Strategic Gap Study Area extents are shown in Figure 4.1. and detailed site analysis sheets can be found in Appendix 5. The study areas were established to show specific tracts of land between the settlement boundaries of nearest neighbour settlements.

Strategic Policy DS2: Development in Strategic Gaps

“In order to prevent the coalescence of urban areas and to maintain the separate identity of settlements, Strategic Gaps are identified as shown on the Policies map between the following areas:

- 1) Fareham / Stubbington and the Western Wards (Meon Gap)
- 2) Fareham / Bridgemary and Stubbington / Lee-on-the-Solent (Fareham- Stubbington Strategic Gap)

Development proposals will not be permitted where they significantly affect the integrity of the gap and the physical and visual separation of settlements or the distinctive nature of settlement characters.”

4. Both the Meon Gap and Fareham-Stubbington Gap are identified as ‘Cross-authority’ Gaps, with the Meon Gap running north into Winchester City Council Local Plan Area and the Fareham-Stubbington Gap running South-East into Gosport Borough Council Local Plan Area. Identified through PFSH Position Statement 2016.
5. Within the sub-region of South Hampshire, the purpose of the Meon Gap *“is of particular significance as it demarks the boundary of the Portsmouth and Southampton Housing Market Areas”* .(PFSH Position Statement 2016)

Chapter 4: Strategic Gaps Overview

-
5. Within Fareham Borough the aim of the Meon Gap is to prevent coalescence of Fareham and Stubbington with the Western Wards, but also important is the avoidance of coalescence with the settlement of Titchfield, that lies within the middle of the Gap. As stated earlier, the Meon Gap runs northwards following the River Valley across the borough boundary into Winchester City Council Local Authority Area, where Winchester Local Plan Policy CP18 - Settlement Gaps' includes the 'Meon Gap' (Whiteley – Fareham/Fareham Western Wards), with a local gap between North Fareham SDA and Knowle and Wickham designated under Policy SH4: North Fareham SDA.
6. The aim of the Fareham- Stubbington Gap is to avoid coalescence between the settlements of: Fareham and , Bridgemary, with Stubbington and Lee-on-the-Solent. Gosport Local Plan also supports P/SH Position Statement 2016 and has designated a Strategic Gap which runs from the Borough border through the Alver Valley, but also Brookers Field Recreation Ground on the border with Fareham, is designated as Strategic Gap. The settlement boundary for Bridgemary, Gosport, lies on the Borough boundary with Fareham. The Strategic Gap designation is contained within Gosport Local Plan 2011-2029 adopted October 2015.
7. As stated in Chapter 1, a key demonstration of pressure for development comes from the potential site allocations assessed in the Strategic Housing and Employment Land Availability Study, December 2019. The pressure for development in the Fareham-Stubbington Gap, is very significant to the risk for complete loss of countryside gap. The pressure in the Meon Gap is more moderate, with a 'squeezing' of the central area around Titchfield, but with a significant pressure to develop pockets of land along the west side of Titchfield Road, between Titchfield and Stubbington. There is moderate pressure for development on the Western edge of Fareham and between Titchfield and Titchfield Common and Southwards pressure from Titchfield along Posbrook Lane. The indication of development pressure Southwards from Titchfield Common to Hook, is also of note, with the potential to put pressure on Chilling-Brownwich Coastal Plain.
8. In addition to the two Appeal Sites at Posbrook Lane, Titchfield, and Old Street, Stubbington, which highlighted 'valued landscapes' in the Meon Valley, recent noteworthy planning applications which also highlight development pressures, within the Strategic Gaps are:
- P/14/0841/FP: Land of Cartwright Drive, Titchfield
 - P/19/0301/FP: Land East of Crofton Cemetery and West of Peak Lane, Fareham
 - P/14/0222/OA: Longfield Avenue, Land to the South – Fareham

Potential Development Impact

7. As stated in Chapter 1, a key demonstration of pressure for development comes from the potential site allocations assessed in the Strategic

Chapter 4: Strategic Gaps Overview

11. In the Meon Gap: P/14/0841/FP: Land of Cartwright Drive, Titchfield: Proposals for an 86 unit Care Homes, with associating landscape and car parking and a 15.4ha Country Park (with car parking), was approved though it was contrary to the current Policy C22: Strategic Gaps and within the setting of Titchfield Abbey Conservation Area. Construction on site was recently completed and is included in the site analysis.
12. P/19/0301/FP: Land East of Crofton Cemetery and West of Peak Lane, Fareham: refused for several reasons, such as design in relation to the setting of the Cemetery, but not for it's siting in the Fareham-Stubbington Gap.
13. P/14/0222/OA: Longfield Avenue, Land to the South – Fareham, an outline application for up to 1550 dwelling and associated infrastructure was withdrawn.

Key Routes for experiencing the Strategic Gaps

14. Key routes for the primary purpose of experiencing the physical and visual separation of settlements have been identified and are shown in Figure 4.2. This work ties in closely with the previous analysis carried out by LDA and described in Chapter 3 of the Adopted Fareham Borough Landscape Character Assessment 2017. As much as is possible, the key routes (or 'paths') pass between the settlement edges identified in the first filter, so that a significant number of drivers and walkers should experience the sense of leaving one settlement, passing

through a distinctly different space, i.e. countryside between settlements before reaching another distinctly different settlement. This was tested out as part of the site analysis and is described in Appendix 5.

Settlement Edge Characteristics

15. This study builds upon the work previously carried out by David Hares Associates in the Fareham Borough Gap Review 2012. There have been negligible changes in the settlement edges since 2012 and the summary of settlement types shown in illustration 4 of the Fareham Borough Gap Review 2012 is still relevant:

“The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap” (page 19, Fareham Borough Gap Review. David Hares, 2012)

16. A key feature of many of Fareham's settlement edges is that of Woodland screening. Detailed findings are described in Appendix 5. The Spatial Visibility/Legibility maps A5.8-A5.10 show key long views and views towards settlement edges where dwellings or other landmark buildings can either be seen or are hidden or partially hidden from view by woodland, tree canopies or hedgerows. Primary measure 10 gives descriptions of the impact of the settlement edges on users from multiple vantage points.

Chapter 4: Strategic Gaps Overview

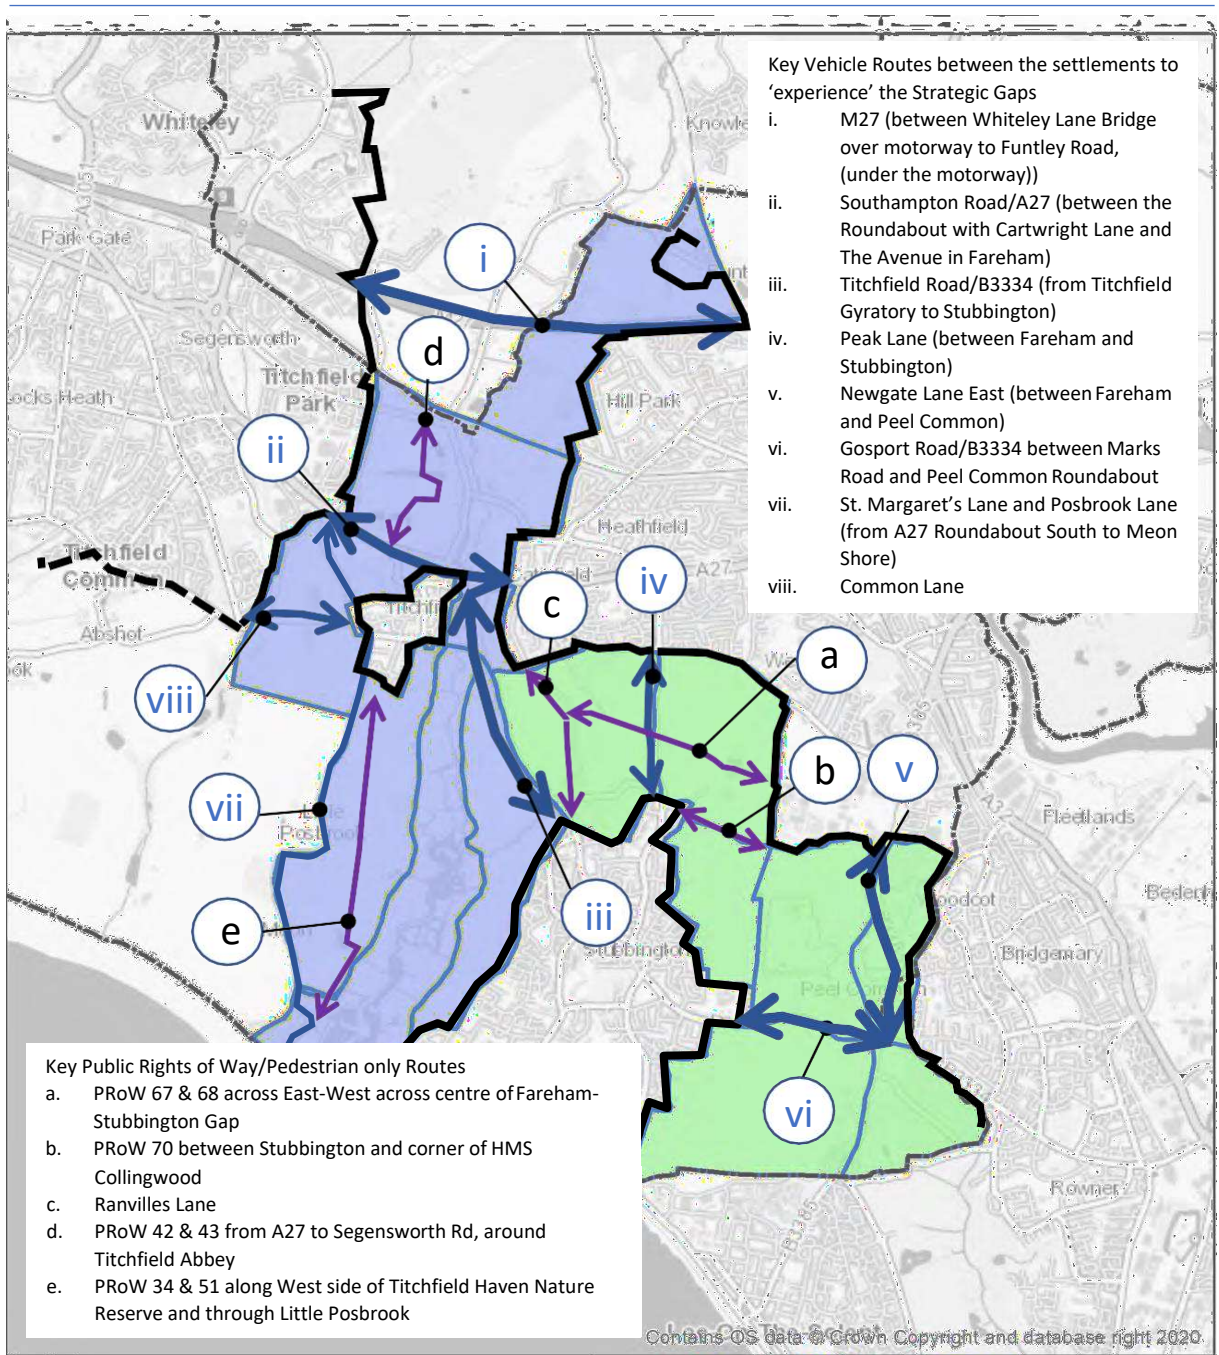

Figure 4.2. Plan showing key experiential routes through the Strategic Gaps

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

Key features of the Strategic Gap

1. Key Features of the Fareham-Stubbington Strategic Gap are:

- Open, predominantly arable farmland and horticulture with some glasshouses, a weak hedgerow structure and few trees
- The settlement edges are for the most part well screened by mature tree canopy, but there is some minor visual intrusion from Fareham, Stubbington and HMS Collingwood
- a few scattered farmsteads/horticultural holdings and a mosaic of small fragments of open farmland and horse-grazed pastures sandwiched between:
- large-scale non-agricultural uses of Business and airfield development at Solent Airport in Daedalus to the South and the utilities of:
 - Peel Common Water Treatment Works enclosed from views by an earth bund and mature tree belt
 - Peel Common Solar Farm
- Construction site of Stubbington-bypass, which will provide an East-West and South route through the Gap that has not previously existed
- Urban fringe character of Peel Common residential area

- Recently completed highway works to Newgate Lane, and Peel Common Roundabout, with associated noise attenuation fencing and bus and cycle infrastructure.

Potential Development Impact

2. As stated earlier, the potential impact of development is high within the Fareham-Stubbington Gap, with the potential to develop large tracts of farmland.
3. It is too early to determine the full impact that Stubbington Bypass will have on the landscape character and development pressures of the Gap. As the Bypass is currently under construction and its alignment marked out, it is possible to see how it might affect the sense of separation between Fareham and Stubbington. In some respects it strengthens the sense of separation because it will be a physical demarcation and partial interruption to cross-movement. It also becomes another key route from which to experience the Gap, but it will bring more noise and activity and may exert a suburbanising influence on the landscape. It is strongly recommended that once the construction works have been completed and the road is fully operational a review of the Landscape Character Assessment for LCA 7: Fareham-Stubbington Gap is carried out.

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

Other Environmental and Planning Designations

4. Unlike the Meon Gap, the Fareham-Stubbington Gap does not have a significant number of environmental designations. The only are two areas of Ancient/Semi-Ancient Woodland: Oxleys Coppice, which is also a SINC (Southern edge of Fareham) and Tips Copse, (East edge of Stubbington, North of Crofton Secondary School). The Strategic Gap designation would be the key designation in this area.

Summary findings of the Study Area Assessments:

5. The descriptions run from West to East and then South. More detailed analysis of each area can be found in Appendix 5.

Area East of Titchfield Road and West of Peak Lane (Strategic Gap Study Area 7a):

6. Due to the significant number of viewpoints from long stretches of the key roads that run through the area: Titchfield Road and Peak Lane (and from the Stubbington Bypass, when it is completed) and from the numerous footpaths that run through the middle of this area, it is strongly recommended that the vast majority of this section of Strategic Gap remains intact. It provides a useful informal recreational resource, within a distinctive

landscape character, that is of good quality, where residents can walk in relative tranquility away from roads and enjoy long and varied views. Due to its moderate to large gap dimensions (800-1.2km) it has been able to retain a relatively high level of tranquility and dark nights skies, compared to other parts of Fareham and it would be a significant loss to local residents if they were not able to continue to enjoy this informal recreational resource.

7. For this section of the Gap, this analysis agrees with the summary findings of LDA in Chapter 3 of the Fareham Borough Landscape Character Assessment 2017 - *“The landscape performs a highly effective role in providing a 'sense' of separation and the experience of moving between one settlement and the other.....Edges of Fareham and Stubbington are clearly defined by strong boundary vegetation and there is a clear distinction between 'town and country' there is a strong sense of leaving one urban area and moving through open countryside before entering another. Scale of the gap allows the time to appreciate sense of being in open countryside. Being able to see far across the gap and identify the edges, also strengthens the sense of separation.”* (page 41) .

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

8. However there exists the potential to make modifications to the settlement boundary of North Stubbington: to extend the boundary to run along Oakcroft Lane, as the isolated field that sits aside Crofton Cemetery, does not protrude into the landscape beyond the current Northern and Western edges of Stubbington. Largely sitting behind a mature line of Poplars also helps this isolated field absorb some development (subject to detail design), without risking the integrity of the Gap, as a whole. Retention and enhancement of GI will be required, within the site. **Development of a GI Framework or Strategy is recommended** for the site in its context.

Area East of Peak Lane and West of HMS Collingwood (Strategic Gap Study Area 7b):

9. Whilst this area comes under the same Landscape Character Area as Strategic Gap Study Area 7a, the terrain is much flatter, and the blocks of vegetation are less varied. Vegetation around the main large field screens the field from view from many vantage points. There are much fewer opportunities to see across this land, unless close to the field gates. From within the main field there are more visual detractors in the form of MOD buildings in HMS Collingwood, a low-rise tower in the

adjacent estate off Longfield Drive and a long view to the Fareham Borough Council Office Tower Block. Subject to detailed design, scale and functions, it is considered possible for the main field to absorb some development without a significant impact on visual quality of the Strategic Gap. If managed appropriately, development could have beneficial effect on the GI network (recreational and environmental) that exists around the periphery of the field subject to appropriate attention being paid to GI provision and design. Therefore a change in Strategic Gap boundary could potentially be accommodated without undermining the principal purpose of the gap to prevent coalescence of settlements. However, such adjustment would be driven by more detailed testing of development forms, scale, landscape and GI interventions. Such work would also need to consider the potential reduction of tranquility and dark night skies ratings in the area. **Establishing a GI Framework or Strategy is recommended.**

10. The experience of driving along Peak Lane is currently pleasant and it is recommended that with any potential boundary change that a GI zone of around 150m width between Peak Lane and any development, be established. This is to maintain the experience of

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

‘leaving’ Fareham driving through Countryside and arriving at the separate settlement of Stubbington.

The Open Coastal Plain between Stubbington and the Peel Common Water Treatment Works, (Strategic Gap Study Area 8a)

11. There are two key PRoW across this Landscape, that connect Stubbington and Fareham through a narrow gap of around 600m. The paths cross a dramatic flat landscape which has strong linear North-South views between Daedalus and Newgate Lane Farm, framed by blocks of woodland vegetation, on the boundary bund around the Peel Common Water Treatment Works and the east side of Stubbington, including Tips Copse Ancient Woodland. These views should be valued and retained, providing a great sense of space in an otherwise narrow corridor.
12. There is very little opportunity to absorb development in this corridor. Visual intrusion of buildings would be unwelcome, as it would reduce tranquility. Some of the tree belts are thin, and a substantial belt of woodland would strengthen the landscape structure and provide an attractive edge to frame North South Views and views towards the eastern edge of Stubbington. Advance planting of this

belt would be advised. A **GI Framework or Strategy is recommended.**

Section of Fareham-Stubbington that provides a three-way Gap between Stubbington, Fareham and Gosport (Bridgemary) (Strategic Gap Study Area 8b)

13. There are no proposed changes to the Strategic Gap in this area. The strong screening around the Peel Common Water Treatment works provides an effective visual and physical barrier between all three settlements.
14. There is pressure for development along Gosport Road (A334) between the Southern edge of Stubbington and Peel Common. It is strongly recommended that development pressure is resisted in this area as it would risk visual and physical coalescence between Stubbington and Gosport.

Newgate Lane and Peel Common Area (Strategic Gap Study Area 8c)

15. Despite the proximity of Fareham and Gosport in the north part, the gap is currently still effective in providing a ‘sense of separation’, but it is at risk. Substantial vegetation around boundaries currently prevents visual coalescence. There is a defined boundary along settlement edges and a gap of sufficient scale and

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

and coherence of character. Whilst the recently completed Newgate Lane South road development does not alter the experience of entering the urban area of Gosport beyond the Peel Common Roundabout, it does reduce tranquility and bring more built features (such as noise attenuation barriers) into this part of the gap. Further development within the gap in addition to the road scheme, together with existing urban fringe activity, is likely to cause visual, or even physical, coalescence of settlements on either side of the new road corridor.

16. Even with the development of Newgate Lane South, the previous analysis carried out by LDA and described in Chapter 3 of the Fareham Borough Landscape Character Assessment 2017, is still relevant: *“A cohesive area of undeveloped landscape which performs an important role in respect of the primary purposes of the Strategic Gap, i.e. in defining the edges, separate identity and settings of Fareham and Gosport, preventing their coalescence. Even minor encroachment beyond existing settlement boundaries could have an adverse effect on these functions and the overall integrity of the landscape and Strategic Gap.”* (page 43)

17. It is recommended that a **GI Framework or Strategy for the Strategic Gap Study Area 8c** would be beneficial to enhance the GI value of the current gap and potentially help determine an appropriate GI framework for moderately scaled development. The planting associated with the Newgate Lane Highway works will exert a stronger woodland/hedgerow edge as it establishes, and this should be factored into a GI Strategy. The GI Strategy or Framework should reassess the Open Coastal Plain Landscape Type: with a view to creating stronger GI structure throughout, but highlighting and retaining long North-South views, and largely undeveloped views eastward from old Newgate Lane, to retain a sense of space and ‘big skies’.

Daedalus and Lee-on-the-Solent Golf Course (Strategic Gap Study Area 9a and 9b)

18. This study does not suggest alterations to the Strategic Gap around the Airfield and Lee-on-the-Solent Golf Course. Current development within the Airfield is highly visible, but in keeping with current land uses/character of the area. Some further development could be accommodated in the Airfield but would depend on where within the site; scale and; what mitigation is delivered.

Photograph: Charlotte Webb June 2020

Chapter 5: Summary Conclusions and Recommendations

-
1. The resultant analysis and site surveys of all Fareham Borough's Landscape Character Areas recommends that:
 - The six proposed ASLQ put forward for designation in the Fareham Local Plan Supplement (Reg 18 consultation document, Jan-March 2020), can be considered as 'valued landscapes' as they scored highly against the assessment criteria and therefore should be identified for ASLQ designation in the Fareham Local Plan 2037, with some modifications made to boundaries, to bring them into line with the current Fareham Borough Landscape Character Assessment 2017, but also;
 - Through this process, two further landscape character areas in Fareham were identified as having equivalently 'valued landscape' characteristics and so it is recommended that Chilling-Brownwich Coastal Plain and parts of the Cams to Portchester Coast should also be designated.
 - Conservation Areas where they sit in or adjacent to a proposed ASLQ should be included as part of the ASLQ because of their mutually supportive relationship.
 2. It is considered that there is a clear difference between the ASLQ designation, where the landscape value is the key reason for designation, in the context of Strategic Gaps, landscape character and its quality are a 'part of the picture' sitting amongst a broader range of criteria.
 3. The resultant analysis and site surveys of the two Strategic Gaps, conclude that the Meon Strategic Gap:
 - is proposed for continued designation, having both strong sub-regional justification for its designation, and a clear and continued role in preventing settlement coalescence, that could result from pressure for expansion of the Western Parishes; North and West Fareham, and from pressure for the expansion of Stubbington with;
 - one moderate amendment proposed to the North Eastern corner of the Meon Gap; that is an extension to the Gap around Funtley to prevent Funtley from coalescing with North and West Fareham.
 4. The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional justification for its designation, with an important role in preventing settlement coalescence from continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there may be potential for some development to be accommodated within the landscape, without compromising its Strategic Gap function.

Chapter 5: Summary Conclusions and Recommendations

5. Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:
 - An area to the south of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function.
 - An area to the north west of Stubbington, south of Oakcroft Lane and east of Ranvilles Lane.
6. It also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past.
7. In order to develop appropriate Green Infrastructure mitigation and enhancement associated with the areas of recent and future change described above, in the Fareham-Stubbington Gap, Green Infrastructure Frameworks or Strategies are required for each area.

CONTENTS

1. INTRODUCTION	2
2. BACKGROUND	3
3. SUMMARY	4

1. INTRODUCTION

Qualifications and Experience

- 1.1. My name is James Atkin, Director (Landscape) in the Birmingham Office of the Pegasus Group and a Chartered Member of the Landscape Institute (2005). I have over 19 years experience specialising in the application of LVIA across a range of sectors including power, highways, rail, housing, waste, land reclamation and restoration, mineral extraction, commercial developments and renewable energy.
- 1.2. Since joining the Pegasus Group I have completed detailed LVIA's for sites across the UK, including schemes for residential, mixed use, care home, solar and commercial development. As an inherent part of this work I apply an iterative process of LVIA to inform masterplanning principles that respond appropriately to landscape and visual constraints and opportunities.

Terms of Reference

- 1.3. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 1.4. Principles and good practice for undertaking landscape and visual impact assessment (LVIA) and/or applying the principles of LVIA are set out in the Landscape Institute (LI) and the Institute of Environmental Management (IEMA) Guidelines for Landscape and Visual Impact Assessment, Third Edition (2013)¹ (GLVIA3). The concepts and procedures set out in this guidance have been adopted where appropriate.
- 1.5. The evidence included in this supporting statement for this appeal (LPA reference: P/18/1118/OA - AND - P/19/0460/OA) is true and has been prepared in accordance with the guidance of my professional institution. I confirm that the opinions expressed are my true and professional opinions.

¹ Landscape Institute and Institute of Environmental Management and Assessment, Guidelines for Landscape and Visual Impact Assessment 3rd Edition (April, 2013)

2. BACKGROUND

- 2.1. The appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham. The appeal sites are bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east.
- 2.2. The wider landscape context of the appeal sites includes the low-lying ground of the coastal plain and the adjacent urban environments of Fareham, Gosport (with Woodcot and Bridgemary). The settlement area of Stubbington forms the western extent of the Strategic Gap which extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.
- 2.3. The applications were submitted with a detailed LVIA which set out a comprehensive baseline and robust assessment of predicted impacts. These included details as to how landscape and visual matters have influenced the design of the masterplan, with mitigation measures consequently forming an inherent part of the proposals.
- 2.4. The reasons for refusal raises three main issues in respect of landscape and visual matters, stating that:
 - b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;
 - c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;
 - d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;
- 2.5. This evidence considers these issues against various information, including the submitted LVIA's, consultation responses, report to committee and other relevant baseline and evidence base documents related to landscape and visual matters.

3. SUMMARY

- 3.1. The submitted LVIAs address the key characteristics of the appeal sites and their context. The submitted LVIAs also set out an assessment of the impact and approach to mitigation. This process also enables judgements to be drawn in respect of the context of the appeal sites in relation to the existing urban settlement edges/boundaries.
- 3.2. With reference to this material, and supported by my own additional analysis where necessary, I conclude that the appeal schemes will not be harmful to the character and appearance of the countryside, will not significantly affect the integrity of the Strategic Gap and will relate well to the existing patterns of settlement.
- 3.3. This is on the basis the relevant key landscape characteristics of the area have been considered through the process of LVIA, consequently informing the analysis of constraints and opportunities, and ultimately the landscape strategy for the mitigation. This forms an integrated part of the two masterplans for northern and southern schemes.
- 3.4. Consequently, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms.
- 3.5. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement.
- 3.6. I consider that the subsequent residual impacts of the appeal schemes will be acceptable in landscape and visual terms.
- 3.7. In terms of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the Strategic Gap. This is on the basis that:
 - In relation to distances, the appeal schemes will reduce the gap between Bridgemary and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances set out in the FBC study;

- In terms of visibility, the appeal schemes will be physically and visually well contained – they sit within the strong green infrastructure framework that is evident in the form of blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the Strategic Gap from Stubbington;
- Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, along Newgate Lane and within the emerging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;
- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area; and
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

3.8. I also note that, notwithstanding differences in the technical approaches, the Pegasus Group and FBC Strategic Gap studies both independently acknowledge that the Strategic Gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site/project basis.

3.9. In respect of the conclusions of the FBC Strategic Gap study (where these note the relatively poor state of the gap at this point), I would think a logical and appropriate conclusion would be to amend the boundary to omit this part of the landscape from the Strategic Gap, creating capacity for development to come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the importance of the core areas that are located further west, between Fareham and Stubbington where the Strategic Gap clearly delivers its role and function in full.

3.10. Finally, the reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries. However, my evidence demonstrates that the appeal sites are well related to Peel Common, being located to the east of Newgate Lane, physical contained by the alignment of Newgate Lane East and situated immediately adjacent to the existing residential dwellings off Woodcote

Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane.

- 3.11. With existing and proposed green infrastructure in place, the appeal schemes will consolidate the pattern of Peel Common within a clearly defined limit. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 3.12. Furthermore, there are some existing physical connections between Peel Common and Bridgemarky. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemarky, focused along the green route into Bridgemarky (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 3.13. If the previous emerging allocation of HA2 were to come forward, this broader area of development would reinforce the connection between Peel Common (including the appeal sites) and the edge of Fareham. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.
- 3.14. In all respects, considering Peel Common in itself, connections to Gosport, and with the potential for HA2 to come forward, development in this area will maintain a robust gap between Fareham (aligned with the western edge of Peel Common) and Stubbington.
- 3.15. Overall, in the context of these limited issues, and with the appeal schemes in place, landscape and visual issues are not sufficient to support a prospective reason for refusal.

Executive Summary

Local Plans should be prepared to contribute to the achievement of sustainable development. They should be positively prepared and seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. As the starting point, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas. These requirements exist within the context of the Government's now longstanding objective to significantly boost the supply of homes.

The Regulation 19 Plan, which is meant to be the Plan the Council intends to submit for Examination, is not founded on the Government's published Standard Method as required by the NPPF and NPPG.

Rather, the Council has alighted upon the possible outcome of a Government consultation document and has based the Development Strategy, Policy H1 and the strategy to meet housing needs on this lower level of housing. This is manifestly unsound.

The fact that the Council do not intend to submit its plan until there is certainty as to a change to the Standard Method does not mitigate the cost of conducting this consultation to the public purse or unnecessary expenditure by other public and private bodies. Moreover, this approach plainly risks undermining public confidence in the plan-led system, if, as is possible, the housing requirement has to be increased. The Council has simply acted prematurely in seizing upon a consultation document that suggests a lower housing requirement; this may be expedient but is the antithesis of positive planning. Put simply, there is no basis for the Council to have formed this consultation document at the present time.

In the event that the Government decides not to proceed with its amendment to the Standard Method, or that such an amendment results in a different outcome for Fareham, the Council will need to further amend the plan. In that instance, a wholly new consultation exercise would be required given the likely magnitude of amendments that would be necessary, adding further delay to the plan-making process, and cost to the public purse and to interested parties, whilst, regrettably, undermining confidence in the Local Plan process.

Moreover, the Council has not recognised the context within which this Plan is being prepared. Housing delivery relative to the Core Strategy has resulted in a substantial shortfall in new housing over past years and this Plan provides an opportunity for positive and ambitious planning to ensure development needs are met and the principles of good growth are achieved. The Plan fails in this regard.

The Council purports to make a contribution towards meeting the unmet need of its neighboring authorities; however, this does not reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PFSH) of over 10,000 homes. It is not at all apparent that this Plan is founded on constructive, active and on an ongoing engagement as required by Section 33A.

It is instructive that whilst Welborne was identified to provide housing to meet sub-regional requirements, its role has now changed to meeting the Borough's housing needs first and foremost;

consequently this Plan makes a significantly lower contribution to the wider sub-regional needs which plainly have not diminished.

Furthermore, the Plan has exaggerated the likely housing supply from Welborne and other sources to such an extent that a shortfall in housing supply is inevitable.

The Plan overlooks the opportunity provided by the previously identified Strategic Growth Area at South Fareham which would make an important contribution to housing supply in the short term and providing surety of supply over the longer term. The suitability of this location is apparent from the Council's evidence base; it is accessible to the Borough's main urban area, it is not an area that is sensitive in landscape terms, development can be accommodated without undermining the principle of separation between Fareham and Stubbington, there are no environmental designations that preclude development and the transport modelling and its' conclusions has assumed development in this location. A development scheme in this location can also deliver nitrate neutrality and biodiversity net gain. Development to the South of Fareham can achieve *Good Growth*.

Unfortunately, the Sustainability Appraisal does not consider higher levels of growth consistent with the January 2020 Local Plan Supplement, and, as such, fails to consider a reasonable alternative.

The following Modifications are considered necessary for the Local Plan to be sound:

- The minimum housing requirement should be defined by reference to the existing Standard Method;
- The housing requirement should be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;
- The level of unmet need that is accommodated should be based on constructive, active and on ongoing engagement with neighbouring authorities;
- Assumptions about the delivery of new housing at Welborne should be revisited and revised down;
- The windfall allowance should be revised down;
- Alternatively, the level of contingency should be increased;
- Additional housing allocations should be provided for;
- Land South of Fareham should be allocated for housing development; and
- Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood should be amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1 Introduction

- 1.1 Hallam Land Management Limited ('Hallam') control a substantial tract of land to the South of Fareham, south of Longfield Avenue, west of HMS Collingwood and adjoining the Stubbington Bypass, the construction of which has recently commenced.
- 1.2 In successive representations to the Local Plan Review we have draw attention to the merits and advantages of locating development to the South of Fareham and how this would achieve the Borough Council's objective of *Good Growth*.
- 1.3 In the January 2020 Local Plan Supplement, this land, along with other parcels in this location, was identified by the Borough Council as a potential Strategic Growth Area.
- 1.4 In the current consultation document, such an allocation has not been carried forward.
- 1.5 On this occasion, the Borough Council's has alighted upon the possible revision to the Government's Standard Method for assessing local housing need, which suggests a lower level of housing for Fareham.
- 1.6 In our opinion, the Borough Council are wrong to have published this consultation document in this form given the status of this version of the Plan is afforded by the Local Plan Regulations; *the Plan a Local Planning Authority intends to submit for Examination*. To have based a Plan on the possible outcome of a Government consultation is plainly premature and, regrettably, the Plan's housing strategy is not positively prepared and is unsound.
- 1.7 The Plan's housing strategy is not an effective one. It has no regard to past performance relative to the objective assessment of housing need and the level of contingency is not sufficient when the likely delivery of Welbourne is viewed objectively. Over the plan period a significant shortfall in new housing is inevitable.
- 1.8 For the reasons given in this representation, additional housing land should be allocated in Policy H1.
- 1.9 Land South of Fareham is an eminently suitable and sustainable location for future development and should be identified accordingly. In the context of the Borough Council's *Good Growth* principles that underpin the Plan's Development Strategy, Hallam's development proposals achieve the high-level development principles and requirements set out in the Local Plan Supplement which remain entirely appropriate.
- 1.10 It is especially significant that the Borough Council's assessment of Strategic Gaps has drawn the conclusion that new development can be located south of Longfield Avenue without harming the integral purpose of this earlier designation. We agree with this conclusion, which accords with our previous submissions that carefully planned development will not result in the coalescence of Fareham and Stubbington and that the separate identities of these settlements can be retained.
- 1.11 Development at South Fareham can be brought forward to provide new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality

of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.

- 1.12 As such, and for the reasons given herein, the previous potential Strategic Growth Area at South Fareham should have been retained in the Local Plan for future development.
- 1.13 In our representations in the following Sections we set out that, whilst the Plan's Vision and Strategic Priorities are correct, absent amendments to Policy H1, this version of the Local Plan will not provide sufficient housing and this will run counter to its stated intention to address housing needs by the end of the plan period.

2 Vision and Strategic Priorities

- 2.1 In this Section of our representations we consider the consultation document's Vision and the Strategic Priorities that the Borough Council has identified. It is instructive to consider the extent to which the Plan's policies and proposals will, in practice, contribute towards this Vision being realised and the Strategic Priorities being met, in the context of what the NPPF's anticipates of a Local Plan.

National Planning Policy Framework

- 2.2 Para 15 of the NPPF requires that each Local Plan should provide a positive vision for the future of its area; a framework for addressing housing needs and other economic, social and environmental priorities. (emphasis added)
- 2.3 Para 17 requires that a Local Plan includes strategic policies to address the local authority's priorities for the development and the use of land in its area.
- 2.4 Para 20 states that strategic policies should set out the overall strategy for the pattern, scale and quality of development, and make provision for, *inter alia*, housing, employment, retail, leisure and other commercial development, infrastructure, community facilities and conservation and enhancement of the environment.
- 2.5 Para 22 states that strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure.
- 2.6 Para 23 states that strategic policies should provide a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development. This should include planning for and allocating sufficient sites to deliver the strategic priorities of the area.
- 2.7 In the context of plan making making, the NPPF's presumption in favour of sustainable development is framed in the following terms:
- a. *plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
 - b. *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:*
 - i. *the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - ii. *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.*
- 2.8 In this context, it is important to recognise the significance of the Regulation 19 stage in the plan-making process. This is the Plan the Borough Council intends to submit to the Secretary of

State for the purpose of Examination pursuant to Section 20 of the Act. This is explained in the NPPG *"The publication stage plan should be the document that the local authority considers ready for examination"*. Therefore, this is the Plan and the approach to meeting objectively assessed need that the Borough Council now consider appropriate.

- 2.9 But, as the Borough Council has suggested it won't decide whether or not to submit the Plan until it knows the outcome of the Government's review of the Standard Method, this is little more than a "wait and see" approach. This is plainly wrong given the importance of the plan-led system in overall terms, the alacrity with which an up-to-date Local Plan is needed in Fareham, and the need to maintain public confidence in the plan-making system generally.
- 2.10 As will be shown later, the practical difference between a housing strategy based of 520 dwellings per annum and 403 dwellings per annum is an 'end date' five years hence. When viewed in the context of providing surety over the longer term and the emphasis in the NPPF on exceeding the minimum requirement, adopting a higher growth level at this stage would have been the positive and responsible response to this circumstance.

The Vision

- 2.11 The Borough Council's Vision as set out in the consultation document intends that it:
- *"will accommodate development to address the need for new homes and employment space in Fareham Borough; and*
 - *new housing will address the particular needs in the Borough, such as our growing housing need and an ageing population and creating attractive places to live".*
- 2.12 The Vision is framed by reference to the Borough's needs, whereas Fareham is part of the established Partnership for Urban Southampton and has a role in contributing to meeting the housing needs of the sub-region. Indeed, there is no reference to Fareham's sub-regional role on any of the text associated with the Vision and Strategic Priorities in Section 2 of the Plan. In this context, the Vision should be drawn more widely.
- 2.13 Significantly, the allocation at Welborne in the Core Strategy was specifically for a sub-regional purpose, but its role by the present time appears to have been recast entirely; a matter we return to later.
- 2.14 Without prejudice to the above, achieving any Vision requires policies and proposals that are genuinely aligned with it. In respect of housing, the outcome of the Local Plan's policies and proposals should be that the Borough's housing needs are met.
- 2.15 As such, the Local Plan must, first, establish the correct strategic housing requirement in Policy H1 i.e. the overall number of new homes that need to be built by 2037 and, second, ensure a housing supply strategy that has the necessary surety that this can be achieved.
- 2.16 What experience both in Fareham and elsewhere has shown is that there must be an element of theoretical overprovision as part of the housing strategy to ensure that sufficient new housing is built.
- 2.17 To an extent the consultation document recognises this, but, as will be shown, it significantly

misjudges housing supply to such an extent that it undermines achievement of the Vision.

2.18 Conversely had a positive approach to plan-making been adopted, the Local Plan would have provided a robust planning strategy for the Borough.

Strategic Priorities

2.19 In the context of the Vision, the first Strategic Priority is to:

- *address the housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.*

2.20 Again, there is no reference to Fareham's wider sub-regional role. In the context of Section 33A of the Planning and Compulsory Purchase Act, which requires constructive and active engagement on strategic matters, this is a surprising omission.

2.21 Without prejudice to this point, as a matter of principle, such a strategic objective is soundly based and is aligned with the significant importance the Government attaches to housing provision. Such a Strategic Priority is universally found in Local Plans national-wide.

2.22 However, in this instance, the apparent driver to the Publication Draft has been an attempt to reduce the scale of housing provision despite the Vision and Strategic Priority. This is the only conclusion that can be drawn from the Council having based its Regulation 19 Plan on a consultation document concerning a potential revision to the Standard Method.

2.23 This approach is plainly not sound for the following reasons:

2.24 Firstly, it departs from the method of calculating local housing need set out in para 60 of the NPPF. No exceptional circumstance has been suggested other than a lower figure is derived from the potential revision to the Standard Method. In a recent comment the Planning Minister referred to outputs based on the consultation exercise as "*entirely speculative*".

2.25 Secondly, even if that figure is correct, it is in no way obvious how the wider needs of the sub-region are to be met; across the wider geographic area as a whole the level of local housing need is suggested to be greater than has hitherto been the case.

2.26 Thirdly, the approach to housing supply significantly overstates likely housing delivery and the scale of contingency is simply not sufficient to ensure future housing supply would meet identified need.

2.27 The inevitable conclusion is that this version of the Local Plan is not positively prepared, justified, effective or consistent with national policy. Therefore, whilst the Plan may have a clear strategic priority to address the need for new homes in the Borough, its subsequent policy to base the strategic housing requirement of 403 dwellings per annum means, when considered objectively, that it fails to do so. To consciously plan for 20% less housing than has been identified firstly as necessary, and secondly as capable of being accommodated, is not properly addressing the need for new homes in the Borough.

2.28 In short, the Plan provides for too few houses over the plan period. This in turn will give rise to

adverse effects. It will restrict the number of people who are able to purchase new housing from doing so and constrain the operation of the housing market. It will also reduce the amount of affordable housing that is built because that is a proportion of the overall amount of housing. Moreover, by restricting market housing it creates an additional and greater incidence of housing need as people who would otherwise have been able to buy a market home are prevented from and they fall into housing need. This will have harmful socio-economic effects and runs counter to the Vision to meet the Borough's housing need.

2.29 For these reasons, the consultation document is not soundly based.

3 Development Strategy

- 3.1 The preceding Section has considered the Regulation 19 Plan's Vision and Strategic Priorities as they relate to housing provision and has identified that, as a practical effect, its policies and proposal will not deliver the intended outcome in terms of meeting housing need by the end of the plan period. In this Section, we consider the proposed Development Strategy and the extent to which it could accommodate a greater level of development if necessary.
- 3.2 The Plan's Development Strategy, set out on pages 17 – 32, and its associated Key Diagram and more detailed Policies Map, are framed by the Borough Council's approach to housing provision. This is evident from comparing the direction of travel outlined in the January 2020 Local Plan Supplement based on the published Standard Method and which identified the need for Strategic Areas of Growth to be allocated for future development, and the present approach which includes very few new housing allocations.
- 3.3 In the event the Borough Council has to re-cast its approach to housing provision, it will also need to adjust its Development Strategy in order to be able to deliver the strategic objective to address housing need. In this regard, it is of note that para 3.5 of the consultation document acknowledges that *"the [Local Plan] Supplement consultation in early 2020 identified the Council's preferred approach to its Development Strategy which it proposes to use to guide the focus of development until at least 2037"*. This clearly illustrates the suitability of the Strategy at that time as the basis of plan-making presently.
- 3.4 In the following paragraphs we comment on the various elements of the Council's Development Strategy both as articulated presently but also in the context of a revised housing strategy which would require additional land to be identified for development in the plan period.

Good Growth

- 3.5 The 2019 Issues and Options consultation established the principle of **Good Growth** as the keystone for the Local Plan's Development Strategy.
- 3.6 *Good Growth* was defined in the 2020 Local Plan Supplement in the following terms:
- building homes and creating employment spaces in such a way as to improve the quality of life whilst protecting the most valued and natural historic environments.
 - respecting environmental protections and delivering opportunities for environmental gain, providing opportunities for reduced energy demand and waste production, whilst sensitively managing the countryside and valued landscapes.
 - providing open space and leisure opportunities to encourage healthy and active lifestyles and encouraging more of us to use active forms of travel rather than the car.
- 3.7 This definition has been retained in the Regulation 19 Plan.
- 3.8 These principles exist within an overarching scale of development that the Borough will need to provide for over the plan period. It is of paramount importance that, in the context of the Plan's Vision and Strategic Priorities, this scale of development is correctly defined at the outset; only then can it be said the Plan will address housing and employment needs adequately,

appropriately and sustainably. If the housing requirement is drawn too low, it will have negative social and economic effects.

- 3.9 It follows that, at the plan-making stage, the Local Plan is able to set out strategic and development management policies that have *Good Growth* principles at their core; both in terms of determining which locations in the Borough are to be allocated for new development and then the form and nature of such development.
- 3.10 The ensuing Land Use Strategy should prioritise locations that are able to achieve the principles of *Good Growth*, albeit there are instances where there are competing interest and, as with all planning decisions, balanced judgements will be necessary.

Development Strategy

- 3.11 This Section of the Regulation 19 Plan describes the factors that the Council has used to determine its Development Strategy. Because of the range of considerations that are inputted to, and then flow from this, what the Plan is actually describing is its land use strategy, namely where development is acceptable and conversely where factors determine new development would not be appropriate and other considerations are more important.

Landscape and countryside

- 3.12 We agree that there are parts of the Borough which have a fundamental importance in landscape terms and it is right that preservation of the landscape in those locations is the principal consideration. Figure 3.1 which illustrates the Key Diagram identifies "Areas of Special Landscape Quality" and we agree with the designation of the areas shown in this regard. Policy DS3, which we comment on later, should be worded to ensure that preserving the special landscape quality of these areas is given primacy.

Settlement boundaries

- 3.13 Settlement boundaries delineated in earlier development plans were drawn in the context of development needs as determined at that time.
- 3.14 Where the scale of development cannot be met on land within the Borough's urban area, development in the countryside adjoining main settlements is a wholly necessary and legitimate proposition.
- 3.15 As a consequence of allocating land for development to meet identified needs, settlement boundaries can and should be amended accordingly. In short, the existing settlement boundaries are not immutable.

The desire to respect settlement identity

- 3.16 Given that Areas of Special Landscape Quality have been assessed and delineated on the Key Diagram it is also necessary to consider whether land identified in the current Development Plan as Strategic Gap still requires such protection, whether its boundaries can justifiably be amended in light of up-to-date circumstances or whether any areas of land subject to that designation can be developed in order to contribute to a sustainable pattern of development.

- 3.17 The *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* considers existing Strategic Gaps in the adopted Local Plan and concludes that land south of Fareham, east of Peak Lane and west of HMS Collingwood does not perform the same function in terms of maintaining separation between Fareham and Stubbington as other land that is subject to this designation and is more integral to the purpose of preserving identity.
- 3.18 Chapter 4 of that Study, Paragraph 10 states that *"there exists some opportunities for development to be absorbed within the strategic gap subject to scale and future detailed design, without compromising its gap function combined with mitigation measures that can support green infrastructure enhancement"*.
- 3.19 It follows as a matter of principle that this land should not be designated as Strategic Gap in this Local Plan as this designation plainly cannot be justified in that location. Conversely, to continue to propose this land as Strategic Gap is not justified on the basis of the Council's own evidence.
- 3.20 It is highly material that the Local Plan Supplement had anticipated a Strategic Growth Area in this location, reflecting the broad conclusions of the earlier Options testing that this represents a sustainable and accessible location for new development and that such development can be accommodated without harm to the separation between Fareham and Stubbington. The significance of this is especially important in the context of the greater scale of development the Local Plan should accommodate and as such this represents an eminently suitable location for development. The fact this land is outside of the settlement boundary is in no way an overriding determinant that would preclude its allocation.

Climate change, flood zones and coastal management areas

- 3.21 We agree that the Local Plan should not direct major new development to areas identified as having a role in mitigating the impacts of flooding or coastal erosion. It is noteworthy that the areas of potential flood risk are associated with the River Hamble, River Meon, River Wallington and Lee-Solent estuary and are largely subject to nature conservation designations and landscape designations which limit the extent these locations would be suitable for development in any event.
- 3.22 In this context, the land identified as suitable for future development to the south of Fareham is not subject to flood risk and can be developed with Sustainable Urban Drainage measures that would not increase the risk of flooding elsewhere.

Protected areas for nature conservation

- 3.23 There are strategic nature conservation constraints that exist in the Borough in the form of International and Nationally designated sites. These overlap with other environmental designations and exert a significant constraint on where development can be located, limiting the extent of land absent a constraint. None of these constraints directly affect the land south of Fareham referred to in preceding paragraphs.

Transport corridors and opportunities to encourage more active travel modes

- 3.24 The NPPF advises that the planning system should actively manage patterns of growth to support sustainable travel. Significant development should be focused on locations which are

or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health.

- 3.25 In this regard, the Local Plan Strategic Transport Assessment states the following: *The proposed growth locations in the Local Plan to accommodate forecast population and economic growth, took a wide range of factors into consideration, including transport and access implications. Most of the Local Plan growth is located either within or on the edge of existing conurbations, providing good opportunities for trips to be made by modes of transport other than the private car. Consequently, the proposed growth in the Local Plan is generally in sustainable locations in terms of transport and access*”.
- 3.26 It is important to stress that this Transport Assessment in fact includes development at the Strategic Growth Areas, therefore, this conclusion reflects the suitability of new development in this location in these terms.
- 3.27 Whilst certain representations have previously raised concern about traffic impacts, the Transport Assessment concludes that the scale of development proposed (including the Strategic Growth Areas) and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective.

Need to encourage diversity in the housing market

- 3.28 We agree that there needs to a balance in the portfolio of housing sites. We comment later on the likely delivery of housing from Welborne, which can only represent a modest supply of housing in anything other than the longer term.
- 3.29 To meet the objective of providing sufficient housing, additional housing allocations are required for all of the reasons in this representation and in particular those in response to Policy H1. Whilst development to the south of Fareham will change the character of part of the undeveloped land between Fareham and Stubbington, this must be balanced with the material benefits of the scheme in terms of the new housing to increase housing supply in the short term and to provide a surety of supply over the longer term.
- 3.30 The opportunity to the south of Fareham is of a sufficient scale to meet the identified need for market housing, affordable housing, specialist accommodation and self-build and custom build housing, along with the co-location of local services and facilities to support a new neighbourhood.

Sustainability and accessibility to services

- 3.31 Fareham is identified in the Core Strategy as a ‘key growth point’ in the South Hampshire sub region and a ‘secondary regional centre’. The town is the largest in the Borough with a population of approximately 37,000 people. Fareham is also an important economic centre, which has developed further over recent years, with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane, Peel Common Roundabout and the construction of the Stubbington Bypass.
- 3.32 Amongst the advantages previously identified for the South Fareham Strategic Growth Area is

its proximity to the town centre, the Solent Enterprise Zone at Daedalus, the railway station and existing local services and amenities with good access to walking, cycling, and public transport links. Local facilities are situated along Bishopsfield Avenue and at Broadlaw Walk. Large-scale out-of-town retail facilities are located at Newgate Lane and Fareham Road to the east of Longfield Avenue.

- 3.33 Large-scale development to the south of Fareham, rather than a more dispersed pattern, would maximise opportunities to prioritise pedestrian and cycle links and extend public transport to maximise sustainable modes of travel.

The requirement to meet housing and employment needs

- 3.34 *Good Growth* can only be achieved if the Local Plan intends to meet objectively assessed need for housing, which for the reasons set out in response to Policy H1, it does not achieve this at the present time.

Spatial Interpretation

- 3.35 As a matter of principle, the identification of deliverable or developable previously developed land should be a priority, however, it is widely understood that such opportunities do not exist to accommodate the scale of new housing and employment required in the Borough.
- 3.36 Accordingly, the allocation of greenfield sites for future development is both a legitimate and necessary measure.
- 3.37 The morphology of the Borough is comprised of three urbanised areas: Fareham, Portchester and the 'Western Wards', which are part of a coastal conurbation that extends from Portsmouth in the east to Southampton in the west. Fareham is the pre-eminent urban area within the Borough in terms of services and facilities and public transport. Portchester and the 'Western Wards' are characterised more as residential suburbs.
- 3.38 Interspersed to a greater and lesser degree between these settlements are areas of separation comprising Portsmouth Harbour, Alver Valley, Meon Valley and the River Hamble. These are strategically important corridors that separate the main urban areas, protect their identity and prevent settlements within the coastal conurbation from merging together.
- 3.39 To the north of the M27, the Borough is of a more rural character, noting of course the proposed new community at Welborne which will undoubtedly change the character of this area over a long period of time.
- 3.40 Stubbington, a residential suburb, lies south of and separate from Fareham's urban area along with the sub-regionally important employment and logistics node at Daedalus. The Borough Council have stated aspirations to maximise the potential of the airfield's land and infrastructure assets through new commercial development, providing clusters for aviation, non-aviation and skills/innovation activity. This will contribute positively to the creation of skilled jobs in the Solent Enterprise Zone.
- 3.41 These characteristics have led the Council, rightly in our opinion, to consider the designation of Valued Landscapes as part of the Local Plan and in this context we are aware that the 2017 Landscape Assessment acknowledges the intrinsic landscape character of the Meon, Hamble

and Hook valleys.

- 3.42 We agree that the Meon Valley is a distinctly valued landscape. In our 2019 response to the Issues and Options consultation we referred to various Appeal decisions that alight upon the value of the landscape in this location. Continuing to protect this area from development and formalising a landscape designation in the Meon Valley would be appropriate.
- 3.43 The extent to which land around the 'Western Wards' is capable of accommodating new development is constrained by the extent of nature conservation designations close to the existing urban area which limits development opportunities to small scale schemes at most.
- 3.44 On the basis of the above, it follows that **locations that adjoin Fareham town, as distinct from villages away from it located in the rural hinterland to the north and west of the Borough, are inherently more suitable in terms of reflecting the morphology of the Borough, preserving its natural environment and maximizing accessibility to services and facilities to achieve the most sustainable pattern of development.**
- 3.45 The extent to which new development opportunities in those locations can consolidate and enhance the accessibility advantages of Fareham Town Centre and Daedalus are consistent with the *Good Growth* principles set out in paras 3.5 and 3.6 above.

Development Strategy Policies

- 3.46 Para 3.2 of the consultation document defines the Development Strategy as providing the *"distribution, scale and form of development and supporting infrastructure, a set of proposals to deliver the strategy, policies against which to assess planning applications, and proposals for monitoring the success of the plan"*.
- 3.47 In addition to the narration of the Strategy, this Section of the Plan includes three policies; the first controlling new development in the countryside, the second in respect of the Strategic Gap and a third concerning Landscape. These policies do not set out a Settlement Hierarchy or Spatial Strategy for the Plan area and such policies do not appear elsewhere in the Plan either. The practical effect of this is that there is no policy that delivers the spatial objectives in so far as where new development should be located i.e. affording a priority to locations within and adjoining Fareham town as the most sustainable location in the Borough.
- 3.48 Given that para 3.2 suggests the role of the Development Strategy provides a set of policies that direct where and how new development should be located, the omission of what are usually commonplace policies is significant.

Strategic Policy DS1: Development in the Countryside

- 3.49 Policy DS1 seeks to control the use of land outside defined settlement boundaries i.e. in countryside locations.
- 3.50 In some circumstances it would be appropriate to grant planning permission for new development in such locations. In those instances, the benefits of a development proposal would need to be considered against the criteria in part two of the policy. In this context, we do not agree that Criterion 'v' is drafted correctly.

- 3.51 On certain occasions other considerations associated with a development proposal would merit planning permission being granted notwithstanding the agricultural classification of the land concerned. In this regard, whilst the NPPF affords a preference to development of lower quality agricultural land, it does not preclude the development of best and most versatile land (see footnote 53 of the NPPF).
- 3.52 As presently drafted Policy DS1 conflicts with the expression of this policy approach in the NPPF; as such criterion 'v' should be reworded as follows: "*avoid or minimise the loss of best and most versatile agricultural land*".

Strategic Policy DS2: Development in Strategic Gaps

- 3.53 In earlier representations we have identified that the evidence base provided by the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* does not justify the delineation of the Strategic Gap south of Fareham in the manner shown on the Key Diagram.
- 3.54 In particular, that Report identifies that the land south of Longfield Avenue and west of HMS Collingwood could accommodate new development without a significant adverse effect on the objectives of the Strategic Gap designation.
- 3.55 It follows that this land is not an integral part of the Fareham and Stubbington Gap.
- 3.56 As such the Strategic Gap should not extend across this land, as this would add a policy restriction that ought not apply on the basis of the published evidence. Put simply, such a designation should not include more land than is necessary to achieve its purpose.
- 3.57 For the Local Plan Key Diagram to be justified, and for the Local Plan to be sound, the delineation of the Strategic Gap south of Fareham should be amended accordingly.

Strategic Policy DS3: Landscape

- 3.58 The Local Plan intends to formalise Areas of Special Landscape Quality to reflect their valued status as determined through the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps*. As written, Policy DS3 does not however afford any particular level of protection to these areas beyond Policy DS1, which in any event requires development proposals in the Countryside to "*conserve and enhance landscapes*".
- 3.59 Policy DS3 also appears to permit major development proposals in these locations whereas the Development Strategy has sought to avoid new allocations in these locations because of their landscape sensitivity. The definition of major development is provided in the Glossary¹ and when applied to this Policy, could see large scale development proposals being advanced when this is what the Local Plan is seeking to avoid. As drafted, this Policy does little to enforce the Plan's Development Strategy.

¹ For residential schemes, major development includes those of 10 dwellings or more or on a site of 0.5 hectares or more. For other development, it includes building(s) with a floor area of 1000sq.m or more or on a site of 1 hectare or more.

4 Policy H1: Addressing housing needs by the end of the plan period in an appropriate and sustainable manner

- 4.1 In this Section we consider specifically Policy H1 and whether, as presently formed, the Borough Council's strategic housing requirement and housing supply strategy are sound.
- 4.2 The NPPF expects the planning system to significantly boost the supply of new housing by providing, in the first instance, a sufficient amount of development land where it is needed (para 59 refers).
- 4.3 It is clear that a Local Plan's housing requirement is to be calculated by reference to the Government's Standard Method, unless exceptional circumstances can be proven (para 60 refers).
- 4.4 In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.
- 4.5 As discussed in Section 2, the Plan's Vision and Strategic Priorities establish the intention to address the Borough housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.
- 4.6 For the Plan to address, and indeed meet, housing needs by the end of the plan period, it is important to have regard to the following considerations which are material to determining a sound strategy in the context of the Government's presumption in favour of sustainable development:
 - context and the backdrop to this Local Plan;
 - an objective assessment of local housing need;
 - unmet need from neighbouring authorities;
 - the Plan's housing deliver strategy and whether this is sufficiently robust.
- 4.7 As will be shown, the consultation document will not achieve this, and when measured objectively, a shortfall in housing supply over the plan period will be inevitable, contrary to the stated Vision and Strategic Priority.

Context

- 4.8 The earlier Core Strategy set out a Development Strategy for the period to 2026 that has hitherto been achieved in part only. This partial achievement has had significant implications for housing delivery in the plan area.
- 4.9 In aggregate, the Core Strategy intended that some 9,000 new homes would be built in Fareham

in the 20 years between 2006 and 2026. This comprised:

- 5,350 at the North Fareham Strategic Development Area (Welborne) to meet sub-regional needs as identified in both the South East Plan and the South Hampshire Sub-Regional Strategy; and
- 3,729 elsewhere in the Borough²;

- 4.10 Over the 13 years since the start of the Core Strategy's plan period (2006/7 and 2018/19) only 4,200 new homes have been built. This is equivalent to 46% of the housing requirement in 68% of the plan period.
- 4.11 In comparison with the trajectory on page 21 of the Core Strategy, new housing has had to be accommodated in locations outside of allocated Strategic Development Area; in the four years from 2016, almost twice as many new homes have been provided elsewhere in the Borough than the 469 intended for the whole of that 5 year period 2016/21.
- 4.12 Following the Core Strategy, when the Welborne Plan was prepared in 2015, and to reflect the changed circumstances by then the Council re-calculated likely delivery at the Garden Village. Policy WEL3 identified approximately 6,000 new homes to be completed by 2036. First completions were to be achieved in 2015/16, 1,500 completions were to have been achieved by 2021 and 2,860 completions by 2026.
- 4.13 Plainly this hasn't been achieved and without question there has been a substantial shortfall in housing provision compared to the Core Strategy.
- 4.14 Manifestly, this shortfall is significant and cannot simply be put to one side. It is striking that Welborne was identified originally to meet sub-regional needs but because it hasn't delivered it now represents a source of housing to meet in a substantial part the Borough's own housing need and thus the Borough's contribution of the wider sub-regional need is much reduced.
- 4.15 Given the strategic objective defined by the Council, and in the context of the NPPF's presumption in favour of sustainable development, this has a clear implication for plan-making in Fareham. National Planning Policy invites Local Authorities to exceed the minimum housing requirement and to adopt a positive approach to planning for future housing. Plan-making should not be a simple mathematical exercise but a fundamental examination of how to best plan for the long-term future of the Borough. In this instance, and as the Local Plan Supplement was endeavoring to achieve, this enables the Council to develop a strategy for the longer term.
- 4.16 The change of direction in the Regulation 19 consultation document appears to be framed by precisely the opposite; planning for the minimum plan period and the least amount of new development plausible. Patently, that approach does not include the flexibility which a Local Plan should provide.
- 4.17 For example, had the Regulation 19 Plan retained the level of housing calculated by reference to the published Standard Method – 520 dwellings per annum – and had a lower housing requirement in fact materialized, the practical effect of this would merely have been a housing supply strategy that would endure beyond the end of the plan period. In simple terms, the

² Policies CS2 and CS15 refer

housing strategy would cater for an addition 5 years worth of housing. Given that it is beyond comprehension that housing need will not cease after 2037, this would have been a positive, adaptable, plan-led, longer term strategy.

- 4.18 The fact that the Council has alighted upon a potentially lower housing requirement without apparently considering the practical effect of retaining the existing housing requirement manifestly demonstrates a negative, rather than positive, approach to plan making.
- 4.19 Moreover, the Sustainability Appraisal has plainly not considered this as a reasonable alternative and, as such, is flawed. The Assessment of Alternatives in Section 5 of the Sustainability Appraisal relates to development locations rather than the overall quantum of development. The PPG advises that *"a sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted"*. The purpose of testing reasonable alternatives is to determine that a Local Plan promotes sustainable development when judged against reasonable alternatives, to achieve relevant environmental, economic and social objectives.
- 4.20 This negative approach is further evident when considering the components of the housing strategy which again illustrates a do-minimum approach.

Local Housing Need

- 4.21 Application of the Standard Method to calculate the Local Plan's local housing need would require 520 new homes to be provided each year, or 8,320 new homes in total between 2021-2037.
- 4.22 Alternatively, the Regulation 19 Plan is based on 403 new homes each year which is derived from the proposed revisions to the Standard Method published as a consultation document by the Government in the Summer. These proposed revisions carry no weight at the present time and do not provide any basis for the calculation of housing need for the purpose of this Local Plan at the present time.
- 4.23 Only if the proposed revisions are carried forward without alteration by Government would this serve as a basis to underpin the Plan and enable it to be submitted. Any change to the formula, as it relates to Fareham or any of its neighbouring authorities, would require reconsideration of the housing requirement in Policy H1. The Regulation 19 Plan is contingent therefore on the outcome of that entirely separate process, rather than being a Plan which the Council is able to submit for Examination. It is, for want of a better term, a "wait and see" plan.
- 4.24 As the Council appear to acknowledge themselves by the intention not to submit the Plan for Examination until the outcome of the Government's consultation is known, it is plainly not a sound approach at the present time.
- 4.25 Little more can be said about this, other than to draw attention to the obvious difficulties that have arisen in light of the Government's consultation, which have led to a significant level of opposition to the suggested changes. As recently as mid-November the Planning Minister referred to estimates of local housing need derived from its consultation exercise as *"entirely speculative"* and indicating that the revised formula was being re-evaluated.

- 4.26 It is also important to consider when the Standard Method was introduced and the practical effects of this which the Council don't appear to acknowledge.
- 4.27 The Standard Method was introduced in 2018 and the assessed level of local housing need was based on a period of 2016 onwards. The Council appear not to have grappled with the guidance in the Planning Practice Guidance in respect of this: "*Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate*". Plainly we are some way into the plan making process which commenced in 2017 and this requires the Council to have asked themselves how have housing completions compared with the level of local housing need from that point.
- 4.28 The published requirement was 520 dwelling per annum from 2016 onwards, whereas the highest number of completions was 349 in 2016/17 and less than half for the two years since where monitoring information is available.
- 4.29 The Standard Method takes account of backlog but only in so far as affordability will have increased in the years prior to the calculation and does not take account of underprovision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.
- 4.30 The following table illustrates this:

Year	Number of Completions	Level of Local Housing Need	Shortfall
2018/2019	290	520	230
2019/2020*	263	520	257
2020/2021**	132	520	388

*Projected housing supply April 2019

**Projected housing supply June 2020

- 4.31 This indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No account is taken of this in the current consultation document. Even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
- 4.32 In the circumstance where housing delivery in the Borough has been below both that anticipated by the Core Strategy and the measure of local housing need derived from the Standard Method, however calculated, the Council are plainly wrong to have selected a plan period that takes no account of this and a housing strategy that has no regard to that underprovision. This further undermines any notion of a positively prepared plan.

Unmet Need

- 4.33 Section 33A of the Planning and Compulsory Purchase Act 2004 requires a local planning authority to cooperate with, *inter alia*, other local planning authorities, and engage constructively, actively and on an ongoing basis in the preparation development plan documents, so far as relating to strategic matter. Paragraph 25 of the NPPF says 'strategic policy making authorities should collaborate to identify the relevant strategic matters which they need

to address in their plans'. Unlike problems associated with soundness, a failure to discharge the obligation in Section 33A cannot be remedied once the plan has been submitted for examination.³

- 4.34 It is clear from the work of the Partnership for Urban South Hampshire that housing provision is a strategic matter and thus there is a need for co-operation between constituent plan-making authorities. In this regard, the 'plan-making' section of the PPG provides guidance in relation to the duty to cooperate. Paragraph 022 states that strategic policy making authorities are expected to have addressed key strategic matters through effective joint working, and not deferred them while relying on an inspector to direct them. It states "[An] Authority will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any outcomes achieved; this will be thoroughly tested at the plan examination."
- 4.35 The consultation document makes an allowance of an additional 847 houses as a contribution to meeting unmet need from Fareham's Neighbouring Authorities. But as this is the Submission version of the Plan, this allowance should have regard to the co-operation referred to above. There is no evidence that this is anything other than an allowance made by Borough Council without reference to the joint working through PUSH; this is nothing else but a "cart before horse" approach.
- 4.36 The consultation document acknowledges that there is "*a significant likelihood of a substantial level of unmet need in the sub-region*" (para 4.4) and that over the plan period the level of unmet need in the sub-region could be circa 10,750 new homes. It is instructive that the references to unmet need in para 4.5 of the consultation document are in the context of the current Standard Method and not the higher sub-regional figure that the proposed Standard Revision indicates. In this regard, the plan appears to be "comparing apples and pears".
- 4.37 The following table compares the housing requirement from the current Standard Method and that indicated by the proposed revision.

LPA	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard Method	Proposed new Standard Method	Difference between current and proposed SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1025	+333
PUSH East	1804	1828	2802	3430	+628
Southampton	815	1148	1012	832	-180
Eastleigh		857	694	885	+191
New Forest	521	346	729	782	+53
Test Valley	588	834	550	813	+263
PUSH West	1924	3183	2977	3312	+335

- 4.38 The above illustrates that whilst the Fareham figure might decline, across the sub-region the

³ *Samuel Smith Old Brewery (Tadcaster) v Selby DC [2015] EWCA Civ 1104 paragraphs 38 and 40*

overall scale of housing is greater both in PUSH East and West.

- 4.39 Over a 16-year period, the difference between the proposed new Standard Method would require an additional 10,000 new homes to be built across PUSH East. Compared to average delivery over the past 3 years, almost twice as many new homes will need to be built. This is unquestionably a step change in housing delivery and each Local Authority area will need to contribute towards this and maximise its contribution to the sub-regional requirement.
- 4.40 In September 2020 the PUSH Report to its Joint Committee looked at the potential implications of housing supply relative to Local Housing Need, and using the proposed revision to the Standard Method this still identified a shortfall of over 6,500 across the PUSH East sub-region.⁴
- 4.41 At para 4.5 of the consultation document, the Borough Council put forward a contribution of 847 dwellings towards meeting unmet need. There is no evidence of how this figure has been derived. All that is evident from the earlier passages of that paragraph is the very unclear picture that exists and which is subject to additional work by PUSH. Consequently, the proposed contribution of 847 dwellings – 13% - to unmet need doesn't appear to have any basis in a full and proper assessment of future housing requirement and supply across the sub-region. This is significant because, historically, Welborne had been identified to provide housing supply for that sub-regional purpose whereas now its contribution almost entirely to meet Fareham's housing need.
- 4.42 Switching the role of Welborne in this fashion is taking away a supply of housing identified previously to meet sub-regional needs in the longer term, when plainly that need still exists, and elevating supply available to meet the Borough's need. This denies the original intention of Welbourne, and places a very heavy reliance on one source of housing to meet local needs; on the basis of the Council's strategy, some two thirds of the Borough's housing needs would be met at Welborne.
- 4.43 Again, this illustrates why preparing a Regulation 19 Plan on this basis isn't justified and does not contribute to effective planning across the sub-region.
- 4.44 Moreover, on this basis, the evidence to justify the Council having discharged its duty under Section 33A is not at all obvious; this is particularly significant as this is the Regulation 19 Plan to be submitted for Examination.

Plan Period

- 4.45 The current consultation document is based on the plan period 2021-2037. This is 16 years and would accord with the 'at least 15 years' in the NPPF, if the Local Plan were in fact adopted in 2021. Experience of Local Plan Examinations and the length of time between Regulation 19 and adoption suggests this is highly unlikely. But assuming the Plan is adopted in the 2022 this would provide the bare 15-year plan period.
- 4.46 It is in this context that one has to consider whether the plan is "*sufficiently flexible to adapt to rapid change*". For the reasons given later we say it does not meet this requirement.

⁴ Table 4 Comparison of Housing Need and Supply 2020-2036

Delivery at Welborne

- 4.47 The consultation document's housing strategy is heavily reliant on housing delivery at Welborne, which was previously identified to meet sub-regional requirements. Table 4.2 of the consultation indicates that over 4,000 new homes are to be built at Welborne by 2037 to meet Fareham Borough's local housing need.
- 4.48 This is not a realistic assumption.
- 4.49 It has been readily apparent for some time that past delivery assumptions at Welborne could not be achieved. Despite the Core Strategy and the Welborne Plan assuming a significant number of new homes would have been built at Welborne by the present time, there is still no outline planning permission some 14 months after the Borough Council's Planning Committee resolved in October 2019 to grant permission for the outline planning application (P/17/0266/OA).
- 4.50 In our response to the January 2020 Supplement, we noted that it wasn't surprising that by that time the Section 106 had not been signed given the particular scale of that development.
- 4.51 However, by the present time, the absence of an outline planning permission raises a more fundamental concern about delivery at Welborne.
- 4.52 Nowhere do the Council provide any evidence as to when they expect outline permission to be granted, the extent of any pre-commencement works and their associated timescale, when reserved matters applications are expected and when first completions will be achieved. The closest the Council gets to any justification is that the housing trajectory has been agreed with the developer Buckland.
- 4.53 We are aware that there will also need to be Highway Agreements relating to works to the M27 Junction 10 prior to those works being commenced; again, in our experience such highway agreements are complex and can take a long period of time to complete. The works to be undertaken to the M27 and A32 are substantial. The Planning Officer's Report highlights the estimated costs of these works as £80m-£90m and that funding gap exists in relation to these works. More recently, we understand the Council has had to seek additional funding from Government to cover earlier Local Enterprise Partnership funding that has since been lost. Hampshire County Council has recently confirmed that: "The J10 works are not fully committed at this stage and there is no defined timescale for delivery." This is clearly a major risk in overall terms but also in terms of when such works will be undertaken and the duration of such works.
- 4.54 This is germane to timescales as to when development at Welborne can be anticipated, notwithstanding the milestone it reached in 2019.
- 4.55 A number of housing trajectories have been proposed for Welborne at different stages. The Borough Council's January 2017 Background Paper concerning Welborne set out the Council's assumption at that time. This suggested that 4,090 new homes would be built at Welborne by 2036. Whilst this would align with the current assumption, this overlooks the fact that circumstances have already moved beyond the key dates suggested therein.
- 4.56 If the 2017 trajectory is simply rolled forward to the present day and it is assumed that outline planning permission is granted in 2021/2022 and development commences in 2023/24 then the

total number of completions would be 3,090 dwellings by 2037 – see *Appendix 1*.

- 4.57 This trajectory is clearly sensitive to assumptions. Any delay in commencing development beyond will 2023/24 will cause fewer completions in the plan period.
- 4.58 Moreover, the extent to which 250 dwellings can be built and sustained each year from 2026 onwards is also a highly sensitive assumption.
- 4.59 We note that more recent research from Lichfields⁵ suggests that for sites of more than 2000 dwellings, the average period of time from planning to delivery is 2.9 years. Moreover, that research indicates that for scheme the size of Welborne the number of houses built each year averaged 140 dwellings.
- 4.60 If a mid point between these two assumptions of 185 dwellings per annum were achieved and sustained as the peak output, this would only yield 2,360 dwellings in the plan period.
- 4.61 It is instructive to note that to achieve 4,020 completions in the plan period would require a build rate from 2024/25 onwards of 309 dwellings per annum. A build rate in excess of 300 dwellings per annum was rejected by the Council in 2017.
- 4.62 What is clear from the above is that Welborne's contribution to housing supply during the plan period has been over-estimated. This component of housing supply is not justified and consequently the housing supply strategy is not effective.

Proposed Allocations

- 4.63 From our analysis of proposed allocations we have been able to identify that, whilst a number of subject to current planning applications, a significant number are subject to constraints that could delay their development. A number of Sites are owned by public bodies or are subject to multiple landownerships and with existing uses⁶. Moreover, a great many are Sites within the urban areas which are likely only suited to flatted schemes to achieve the capacity numbers and may not be suitable to developers.
- 4.64 Other Sites are subject to nitrates constraints⁷ which may require a strategic solution to enable their release.
- 4.65 Consequently, it is questionable whether they will all be developed and this supports not only the principle of a contingency allowance but also the importance that that allowance reflects the overall level of uncertainty associated with the housing supply strategy.

Windfall

- 4.66 Table 4.2 of the consultation document includes a windfall allowance of 1,224 new homes between 2021 and 2037.
- 4.67 The principle of including a windfall allowance is explained in the NPPF at para 70 in the

⁵ Start to Finish (2016), Driving Housing Delivery (2018)

⁶ FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13, HA22, HA24, HA31, HA36-39, HA42, HA44

⁷ HA1, HA12, HA34, HA40

following terms:

- Firstly, there should be compelling evidence that they will provide a reliable source of supply.
- Secondly, any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 4.68 It is evident that the above is much more than a consideration of historic windfall delivery and requires the plan-maker to actively consider future supply from this source.
- 4.69 The Council's Windfall Background Paper projects forward 51 windfall completions on small sites from 2024/25 and an additional 52 windfall completions from large sites from 2025/26. The only source of information that the Council has used to arrive at these figures is its breakdown of past windfall delivery from 2009 – 2019 which averaged 101 dwellings (51 for small sites and 52 for large sites).
- 4.70 Para 3.6 of the Background Papers states: *"The estimated rate of windfall development is based on past completion rates..."* (emphasis added)
- 4.71 Para 3.9 of the Background Paper states: *"To ensure that a cautious approach is taken and windfall projections are not overly optimistic, the projections have only taken account of windfall delivery since 2009/10"*.
- 4.72 The very next paragraphs states *"Based on the preceding analysis, the windfall projections for the Borough are 51 dwellings per year from small site delivery and 51 dwellings per year from large site delivery"*.
- 4.73 It is clear that the assumption in Table 4.2 of the consultation document is derived solely from past trends and it is claimed that this demonstrates *"a compelling case"*. However, nowhere in the analysis is there consideration of whether this is a reliable source of future supply, rather it is just a forward projection of what happened in the past. The analysis does not provide any consideration of expected future trends.
- 4.74 It is important to recognise that windfall opportunities are finite. Opportunities to redevelop vacant or redundant land will have largely been exhausted by the present time because of planning policies that have prioritised such sources of supply for the past decade and longer. Consequently, future windfall over the plan period will rely to a much greater extent on recycling of land (i.e. existing uses being changed). This is inevitable a less certain source of housing supply.
- 4.75 For the purpose of assessing whether the Plan's housing supply strategy is sound, we have adjusted the windfall contribution by 25% i.e. 918 completions over the plan period.

Revised Housing Strategy

- 4.76 In the preceding Sections we have considered both the level of local housing need and the housing supply strategy providing a reasoned justification why this Regulation 19 Plan is not sound. The following table illustrates the effect of this.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	8,320	520 dpa
Under-supply 2018-2020	875	Added to reflect actual housebuilding relative to LHN
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	10,050	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect roll-forward of 2017 Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 25% to reflect finite supply
Total Supply	7,150	Sum of Supply estimates
Shortfall	2,900	

*retained at 13% of unmet need for illustrative purposes absent any Statement of Common Ground

- 4.77 The above illustrates that with these alternative assumptions, additional land needs to be identified for some 3,000 new homes.
- 4.78 Even if the strategic housing requirement were calculated simply by reference to 403 dwellings per annum, there would be no contingency to take account of changing circumstances over the plan period, contrary to the assertion in the plan to this effect.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	6,448	403 dpa
Under-supply 2018-2020	nil	N/A
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	7,295	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect 2017 Housing Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 20% to reflect finite supply
Total Supply	7,153	Sum of Supply estimates
Shortfall	142	

- 4.79 The above analysis clearly shows that Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to assumptions about housing supply, additional housing land should be allocated for development.
- 4.80 In the following Section we submit that the Strategic Growth Area identified in the Local Plan Supplement 2020 should be allocated for housing development.

5 South Fareham Strategic Growth Area

- 5.1 In our previous representations we supported the inclusion of Strategic Growth Areas in the Local Plan. Hallam control a substantial tract of land to the South of Fareham, adjoining the Stubbington Bypass, the construction of which has recently commenced. This land, along with other parcels in this location, is identified in Figure 3.2 of the Local Plan Supplement Consultation Document as the Proposed Strategic Growth Area South of Fareham.
- 5.2 The justification for the allocation of a Strategic Growth Areas is evident from the preceding Section which identified a significant shortage in the amount of new housing to be provided in the Borough and the amount of future development land allocated for this purpose. Development South of Fareham could provide housing land over the plan period, both in the immediate term and continuity over the long term.

South of Fareham

- 5.3 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. The town is the largest in the Borough with a population of around 37,300. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town.
- 5.4 Fareham is also an important economic centre, which has developed further over recent years with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane and the Peel Common Roundabout.
- 5.5 A new, mixed use masterplanned development to the South of Fareham, contiguous with Longfield Avenue, benefits from its proximity to the town centre, Daedalus, the railway station and existing local services and amenities with good access to walking, cycling and public transport links. These are locational merits that align with *Good Growth*.
- 5.6 Stubbington and Hill Head form a single urban area and have a population of c.14,300. These settlements have a range of services with a local centre, doctors, dentists, two primary schools, a secondary school and a community centre.
- 5.7 Local employment has improved with the development at Daedalus, which lies to the south east of the settlement. Development in south Fareham would delivery homes close to this economic and employment zone, providing housing for the growing workforce.
- 5.8 The Stubbington Bypass is being constructed to connect Gosport Road, Peak Lane and Titchfield Road. This will inevitably create an urbanising influence through the centre of the existing Strategic Gap. Development to the south of Fareham would assist in assimilating the bypass into the landscape and soften the impact of the road on the gap, beyond what could be achieved from constructing the bypass alone.

Development Potential

- 5.9 Paragraph 3.24 of the consultation document identifies high-level development principles and

requirements. Hallam support these intended outcomes and these have underpinned their proposals for a mixed-use masterplanned development.

- 5.10 Work undertaken over a long period of time has identified the suitability of the land controlled by Hallam to accommodate new development, how development can be arranged and the extent of mitigation required.
- 5.11 In our response to the 2019 Issues and Options consultation, we identified potential areas for development in this location and for convenience we have attached this at *Appendix 1*. Whilst this considered only land which Hallam control, we recognise that there are other smaller scale development opportunities within the general location, and that the Borough Council intend to work with landowners and site promoters to develop a Council-led masterplan which will focus on the delivery of community benefits as part of Good Growth. In this context, Hallam are committed to working with the Council and others to develop these proposals further as part of a co-ordinated approach.
- 5.12 A development scheme could comprise the following:
- Approximately 1,200 units
 - a new healthcare facility
 - a primary school
 - a care home
 - community hub
 - local shops
 - sports hub and
 - Green Infrastructure to include public open space, equipped areas of play, Sustainable Drainage Systems (SuDS), tree, hedge and shrub planting, meadows, structural woodland planting, allotment gardens and permissive footpaths and cycleways.
- 5.13 Development would be accessed from a primary and secondary access from Longfield Avenue, along with associated improvements to the existing Long field Avenue/Bishopsfield Road junction and carriageway and a primary access from Peak Lane.
- 5.14 An outline planning application for such a proposed development was submitted in June 2020 and is presently undetermined.

Accessibility and Movement

- 5.15 The accessibility advantages of this location enables positive promotion of active travel. The proposed development will be served by an internal network of footways and access arrangements that can be utilised by both pedestrians and cyclists. The site is surrounded by Public Rights of Way (PRoW) that in turn can serve as cycle/walking connections from the site to other roads in the vicinity of the site. These will be maintained and improved in order to encourage more sustainable modes of travel as an alternative to the conventional car.
- 5.16 Bus based public transport is also a feasible means of sustainable travel from this location. Service provision on the route number X5 operated by First Group provides opportunity for peak commuter travel and also for off-peak travel. The scale of development proposed is

sufficient to deliver dedicated public transport coverage between the Site and key destinations that will have the frequency and reliability to attract patronage to secure long term viability. Any improvement will be discussed with the necessary stakeholders, but it is envisaged that the development will support the introduction of new services.

- 5.17 The Eclipse Busway - a Bus Rapid Transport scheme between Fareham and Gosport opened in 2012 providing a priority public transport route connecting the two towns. The BRT scheme provides a more efficient service using new, comfortable, low-emission buses that encourages bus travel through enhancing the bus travel experience. Using the new busway, buses are able to avoid congested parts of the highway network including A32 so that passengers can benefit from reliable journey times and can plan their onward travel connections.
- 5.18 A number of new highway improvements works have been implemented or are currently under construction which is intended to improve bus journey reliability, and encourage more people to switch from car travel to using the bus. This would have an effect of helping reduce traffic numbers and traffic congestion between Fareham and Gosport, including along Newgate Lane.

Nitrates

- 5.19 The land is located directly west of the edge of urban area that forms part of the designated Chichester, Langstone and Portsmouth Harbours Eutrophic NVZ (TraC) (Nitrate Vulnerable Zone). The land is currently predominantly arable farmland with a history of mixed crops such as wheat, barley, oats, rape etc. and break crops such as peas, winter oil seed rape and beans.
- 5.20 The above is recorded on a Nutrient plan detailing fertilizer types, tonnages and time applied for each individual field. The fertilizer applied during the period of record is a mix of pig and farm yard manures.
- 5.21 It is recognised that intense farming with fertilization with natural manures will lead to nitrate leaching into the surrounding surface water and ground water environment.
- 5.22 Through development of the land, the leeching of nitrates through farming activities will be curtailed. While there will be a new source of nitrate production and leachate associated with the new development, this is considered to be at worst a neutral impact and through further assessment a net reduction in nitrate leaching can be achievable.

Biodiversity

- 5.23 The Hallam land is divided into two areas by Peak Lane; the eastern area comprises largely of arable land with hedgerows and ditches forming the compartmentalisation typical of the surrounding arable tenure and has limited nature conservation value. The western compartment consists of a large area of set aside land, with areas of arable crops, which are bound by limited hedgerows and tree lines.
- 5.24 The most significant habitat is Oxleys Coppice which is designated as a SINC and an area of ancient and semi-ancient woodland (ASNW), which has been evaluated as county level conservation value. The Scheme can ensure that Oxleys Coppice is protected.
- 5.25 Hedgerows are mostly classified under the Hedgerow Evaluation Grade System (HEGS) as moderate and moderate/high value. Only two hedgerows are classified as 'important' under the

Hedgerow Regulations (REGS). Several drainage ditches are found through the Site but only have limited marginal and aquatic vegetation. These are classified as no more than local conservation value.

- 5.26 Surveys have identified the presence of a number of protected species, bats and breeding birds. Measures to safeguard these species and their habitats can readily be accommodated as part of the development proposed. The habitats created and the species which will benefit from the mitigation measures proposed in the Site will lead to an overall beneficial effect in the long term. Similarly, in accordance with the Solent Waders and Brent Goose Strategy, a financial contribution will be made to this, based on the classification of land's suitability for supporting such species.
- 5.27 The Solent & Southampton Water Ramsar/SPA, which also includes Titchfield Haven SSSI, is approximately 700m from the Site. Portsmouth Harbour Ramsar/SPA/SSSI is located approximately 1.3km to the east of the Site at its nearest point, which also support a variety of habitats and an assemblage of dark-bellied brent geese. The Solent Maritime SAC extends from the River Hamble mouth up to Botley in the west, this is approximately 4.7km west of the Site.
- 5.28 There is the potential for a Likely Significant Effect on the Solent SPAs from an increase in recreation from new housing development within a 5.6km zone of influence of the Solent. As a result, an Interim Solent Recreation Mitigation Strategy was published in 2014 to enable initial mitigation measures to be placed, so LAs could continue to grant permission for new homes. The strategy has been updated to form the basis for future new housing up to 2034, with the Bird Aware Solent Recreation Mitigation Strategy (2017).
- 5.29 As this Site falls within the established zone of likely significant effect (5.6km), a HRA/AA will be required by the LPA; however a site specific Test of Likely Significance will be provided to facilitate the LPA assessment. The mitigations measures required to facilitate the Proposed Development will see a financial contribution provided for the in-combination effects on the Solent SPA, with additional bespoke mitigation provided within the Site to mitigate for the alone effects.
- 5.30 The details of bespoke mitigation are to be discussed with Natural England. Current proposals will include an area of County Park/Green Infrastructure to the west of Peak Lane, measuring approximately 23ha, which will include a circular walk, car park and habitat features to provide point of interest, as well as safe areas for dogs to be exercised off the lead. Alternative areas of GI will be provided around the main residential areas to the east of Peak Lane, here approximately 32ha will be provided, which will incorporate recreational opportunities and areas of biodiversity net gain.
- 5.31 The mitigation measures provided within the Site will ensure that there are no likely significant effects on the Solent alone and in-combination with other schemes within Fareham.

Strategic Gap

- 5.32 The current Core Strategy designates land between Fareham and Stubbington as a Strategic Gap. This follows such a designation being contained within earlier Development Plans; Settlement Gap policies in Hampshire date back at least 30 years when they were included within the South and Mid Hampshire Structure Plans (1988 and 1989). They were carried forward into the Hampshire County Structure Plan 1994 and the Hampshire County Structure

Plan 1996-2011. Consequently, with each new development plan needing to make provision for current and future development needs, the role and function of gaps need to be considered having regard to up to date circumstances.

- 5.33 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. As described earlier, this new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. Such a conclusion is similar to the assessment undertaken by Hallam previously.

Summary

- 5.34 Hallam support the identification of the Strategic Growth Area to the South of Fareham and have identified a development scheme that achieves the high-level development principles and requirements set out in the consultation document.
- 5.35 Importantly, development in this location can be brought forward that provides new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.
- 5.36 The merits of this location are substantial, and carefully planned development will not result in the coalescence of Fareham and Stubbington and the separate identities of these settlements can be retained.
- 5.37 As such, the allocation of land at South Fareham in the Local Plan for future development is considered wholly appropriate.

6 Policy NE5 and Policies Map

- 6.1 The Policies Map includes designations relating to Waders and Brent Geese and are associated with Policy NE5. This designation covers four categories of land – Core and Primary Support Areas, Secondary Support Areas, Low Use Areas and Candidate Areas.
- 6.2 The extent to which the land concerned is used by Waders and Brent Geese, particularly beyond the Core Areas, is transitory and can differ from time to time as a consequence of changes in agricultural practices (for example, arable land with wintering cereals provides an optimal foraging resource, whereas when this is replaced / succeeded by grassland habitats its function can change, which could affect species assemblages and regularity it is used. Changes in land use also promote further recreational uses which is the case for areas west of Peak Lane) or changes to the extent of the built environment (for example newly built structures, such as the Stubbington Bypass, will change the suitability of a location in proximity to it as a receptor). Therefore, to delineate these areas in the manner shown on a Policies Map, which affords permanence to the designation, fails to take account of the potential changes in circumstance and is not sound as a matter of principle.
- 6.3 The practical effect of this is that Policy NE5 directs the decision-maker to consider development proposals against the criteria listed therein and the status of the land by reference to the designations shown on the proposals map, which may at that point in time no longer be up-to-date or relevant.
- 6.4 Through Hallam's work in respect of the land to the South of Fareham, and through discussion with Natural England, it has identified a different classification to that shown on the Policies Map for certain of those parcels of land, as shown on *Appendix 2*. This illustrates how the application of Policy NE5 could misdirect the decision maker.
- 6.5 On this basis, these designations should not be shown on the Policies Map in the manner they are presently.
- 6.6 A more generic designation such as Areas of Waders and Brent Geese Sensitivity, which does not classify individual land parcels, would be more appropriate.
- 6.7 It would follow that Policy NE5 would be amended to require planning applications to assess and determine the use of land subject to those development proposals and at that point, when an up to date classification has been determined, the criteria and mitigation in Policy NE5 would apply.

7 Summary

- 7.1 These Representations have been prepared on behalf of Hallam Land Management Limited (Hallam), who control a substantial tract of land to the South of Fareham, adjoining the existing urban area and Stubbington Bypass, the construction of which has recently commenced.
- 7.2 This land was identified in the Local Plan Supplement 2020 as a potential Strategic Growth Area. Whilst the Regulation 19 Plan does not propose to carry forward the South of Fareham Strategic Growth Area, as is evident from these representations the need for such an allocation has not diminished.
- 7.3 The consultation document rightly identifies the Borough Council's commitment to meet the Borough's housing need by the end of the plan-period. This is plainly aligned with the NPPF and the Government's objectives. What is notably absent from the Vision and Strategic Priorities, is the recognition that Fareham is important in a sub-regional context and was previously intended to provide significant development land at Welborne to meet wider needs.
- 7.4 Policy H1 is not founded on a sound basis. In preparing and publishing this Regulation 19 Plan, the Borough Council has afforded greater weight to a potential revision to the Government's Standard Method and has disregarded the published and established measure of local housing need which has underpinned its work to date. Unless and until the Government publish a revision to the Standard Method, this version of the Plan cannot be submitted for Examination as it is plainly unsound. The Borough Council recognise this from its Committee Papers.⁸ This is nothing other than a "wait and see" Plan.
- 7.5 Only if the Standard Method is published in the same final form will the Plan be able to proceed – there is no indication if or when the Government intend to complete this exercise given the significant scrutiny it has attracted.
- 7.6 A more positive approach would have been to retain the higher level of housing as the basis of the Plan to provide surety over a long term with policy measures to manage housing supply in the event the level of local housing need was reduced. Unfortunately, the Council hasn't considered this as an option or a reasonable alternative in the Sustainability Assessment.
- 7.7 Even in the event the proposed revision to the Standard Method were confirmed as the Plan assumes, there is little if any evidence of a cogent understanding of the level of unmet need across neighbouring authorities. There is no apparent evidence of effective co-operation to justify the contribution the Plan proposes to unmet need.
- 7.8 Moreover, the Council hasn't applied its mind to the level of housing that been achieved since the Standard Method was introduced at the start of the plan making process and the date the plan is to be adopted. Viewed objectively, housing completions over that three year period were below the level of local housing need and this shortfall, which is part of a much greater shortfall when compared to the Core Strategy's housing intentions, should be accounted for.
- 7.9 Turning to housing supply, the assumption that Welborne will provide 4000 new homes within the plan period is not founded upon evidence previously produced by the Council and the level

⁸ Executive Briefing Paper 12th October 2020, para 12

of housing output assumed is at a level the Council previously considered unrealistic.

- 7.10 The windfall assumption drawn simply from past trends has not justified why this is a source of future supply. Uncertainties also exist in relation to a number of the proposed allocated sites because of landownership, extent of existing uses and location.
- 7.11 For all of the above reasons, the Plan's approach to housing will fall short of its Vision and Strategic Priorities. Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to housing supply, additional housing land should be allocated for development.

South of Fareham

- 7.12 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town. Similarly, Fareham is an important economic centre, including the Solent Enterprise Zone at Daedalus to the south of the town.
- 7.13 It is considered that development to the south of Fareham would be in a sustainable location, with good access to walking, cycling and public transport links, as well as local services and amenities. This location adjacent to the existing urban area creates a good opportunity for a natural and sustainable extension to the urban area. Development in south Fareham would deliver homes close to an important source of new employment and jobs at Daedalus.

Strategic Gap

- 7.14 The current Core Strategy designated land between Fareham and Stubbington as a Strategic Gap.
- 7.15 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. This new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. The delineation of the Strategic Gap on the Policies Map should be amended accordingly.

Proposed Modifications

- 7.16 The following Modifications are considered necessary for the Local Plan to be sound:
 - 7.16.1 The minimum housing requirement in Policy H1 to be defined by reference to the existing Standard Method;
 - 7.16.2 The housing requirement be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;

- 7.16.3 The level of unmet need that is accommodated be based on constructive, active and on ongoing engagement with neighbouring authorities;
- 7.16.4 Assumptions about the delivery of new housing at Welborne be revisited and revised down;
- 7.16.5 The windfall allowance be revised down;
- 7.16.6 Alternatively, to 6.16.4 and 6.16.5 the level of contingency be increased;
- 7.16.7 Additional housing allocations be provided for;
- 7.16.8 Land South of Fareham is allocated for housing development; and
- 7.16.9 Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood is amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- 7.16.10 The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1) Paragraph: 5.5

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Whilst the plan may be compliant i am concerned about the matter of the protection of the Stubbington Strategic gap

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

WYG (part of Tetra Tech) – Ecology Technical Note

1.0 Introduction

- 1.1 The following representations are by Pegasus Group on behalf of our clients The Hammond Family, Miller Homes and Bargate Homes. Our clients have interests in land at Newgate Lane South, Fareham which was previously proposed to be allocated for about 475 dwellings in the Regulation 18 version of this plan. For the reasons set out in these representations, our clients are strongly of the view that this allocation should be reinstated in the local plan.
- 1.2 Our clients are important stakeholders within Fareham and are keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.3 The following representations utilise the same format as the Council’s response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 – 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Former Policy HA2 allocation site Newgate Lane South, Employment allocations Policies E2 and E3.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020.

The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes

in the borough in any event, but the Council chose not to follow this national guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

- 2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:
- 1. It has not been "positively prepared":**
- 2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of

the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground –

as such it's preparation is premature.

- 2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.
- 2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PFSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits.

The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not Effective:

- 2.28 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

- 2.29 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

- 2.30 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.
- 2.31 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PFSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the

achievement of sustainable development.

4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.32 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including reinstating the allocation of the former Policy HA2 site, Newgate Lane South.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.33 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.34 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1 Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2 Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3 Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4 Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5 Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the re-instatement of HA2 Newgate Lane South for about 500 dwellings.
- 3.6 Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7 Policy H1 seeks to 'phase' this supply identifying the following:
 - Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.
- 3.11 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.
- 3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

- 3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:
- a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".
- 3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

- 3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

- 3.16 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.17 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS2: Development in Strategic Gaps

- 3.18 Strategic Gap 2 "Fareham / Bridgemyary and Stubbington / Lee-on-the-Solent" should be redefined to exclude all land to the east of Newgate Lane, between Newgate Lane and the urban settlement boundary of Bridgemyary.
- 3.19 Paragraph 3.46 states:
- "Further to the east, retaining the gap will help maintain the separation of Stubbington and Lee-on-the-Solent from Fareham and Bridgemyary along with maintaining the separate identity of Peel Common."* (our underlining)
- 3.20 Peel Common is not an urban settlement with a separate identity which merits protection. It has resulted from an evolution of wayside development into ribbon development and even now is, in landscape terms, non-descript as a settlement. The purpose of the gap should be to maintain the separation of Stubbington from Fareham and Lee-on-the-Solent; and the separation of Lee-on-the-Solent from Rowner.
- 3.21 Paragraph 3.43 refers to "The need to respect settlement boundaries and protect the identity of our key settlements". Peel Common is not a key settlement and it does not have a settlement boundary. The deletion of housing allocation Policy HA2 Newgate Lane South from this version of the local plan has been accompanied by the extension of the Strategic Gap designation across the HA2 site to the settlement boundary of Bridgemyary on the Proposals Map. It is suspected that the reference to Peel Common having a "separate identity" in the supporting text has been inserted to attempt to justify the extension of the gap designation over land which has previously been assessed as being suitable for development.

3.22 Paragraph 3.46 states that *"Although no boundary changes are proposed at this time, evidence has shown (that the) boundary of this strategic gap could be redrawn whilst retaining its important function of preventing settlement coalescence."* This is a key failure of the process at this stage. The Council has a quite recent landscape character assessment as part of the evidence base (2017) and a very recent gap study. There are also two strategic road schemes (one complete, one in construction) that affect the landscape character of this gap. This is surely the time for the Council to redraw the boundaries of this strategic gap and strategically plan for growth.

3.23 In this regard, these representations are accompanied by a Preliminary Landscape and Visual Appraisal prepared by Pegasus Group of the former Policy HA2 site, Newgate Lane South. The Summary and Conclusions of this Appraisal include the following:

"7.7. In summary the site sits within a variable pocket of landscape. In isolation the site comprises remnant agricultural enclosures however it cannot be separated from the extensive urbanising influences which surround and frame it, particularly in the context of the more recent severance of the agricultural land that has arisen from the route of the bypass (Newgate Lane East East)...."

7.16. In terms of the Fareham and Stubbington strategic gap, the site (along with its local landscape context), is well placed to accommodate some form of development without undue consequences or impacts on the role and function of the Strategic Gap as a whole. This is on the basis that:

- *A substantial distance will be retained across the wider gap, between the site and Stubbington;*
- *In terms of visibility, the site is physically and visually well contained, placed as the area is within a strong framework of green infrastructure and the settlement edge – furthermore, the site (and potential development) will not be visible across the gap from Stubbington;*
- *The surrounding context and urbanising influences, including the residential areas of Peel Common, Bridgemary and Woodcot which reduce the degree of change as they provide a relevant settlement edge context;*

- *The opportunity to contribute to, and maintain, a strong green infrastructure network and facilitate a strategic green infrastructure connection through the area that will reinforce and connect the linear routes which cross broadly north to south through this area; and*
- *In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.*

3.24 These conclusions are consistent with the evidence base in relation to the Strategic Gap which acknowledges that the gap designation does not relate to landscape quality, value or condition; that development can be accommodated within gaps without undermining their function; and that urban influences can detract from the functioning of the gap, to the extent that they present a clear justification for amending the boundaries of the gap. The study concludes that the part of the gap between Peel Common and Bridgemary is weak and under development pressure, particularly with the recently constructed Newgate Lane East now forming such a strong urbanising feature in the local landscape context. The Policy HA2 site is not considered to form part of a priority area which is required to maintain the integrity and function of the Fareham / Stubbington Strategic Gap and it is concluded that the site is well placed to accommodate development that could come forward as a well-connected urban extension without significantly affecting the integrity of the gap and the physical and visual separation of settlements. Indeed, this was the Council's previous conclusion when it proposed to allocate the Policy HA2 site. Its December 2019 SHELAA included commentary on the three land parcels (SHELAA sites 3002, 3028 and 3057) which together make up the Policy HA2 site. The Suitability Comment for sites 3002 and 3028 (the smaller northern and southern parcels) were:

"The site is considered suitable for development as part of the proposed housing allocation. Development could be accommodated without significant effects on the landscape character of the wider area."

3.25 For site 3057 (the larger central parcel) the Suitability Comment was:

"Development could be accommodated without significant effects on the landscape character of the wider area (following construction of Newgate Lane South) or the integrity of the Strategic Gap..."

- 3.26 All three component parcels of the HA2 site were described as Suitable, Available and Achievable. Nothing has changed in this regard.

Policy DS3: Landscape

- 3.27 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.28 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event.
- 3.29 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.30 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.31 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of LVIA and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HP1: New Residential Development

3.32 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.

3.33 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.34 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.35 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.36 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.37 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However,

if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.38 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.39 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.40 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.41 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.42 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and

b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.43 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.44 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.45 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.46 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.47 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

- 3.48 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy E2: Faraday Business Park

- 3.49 This draft policy proposes the allocation of land for 65,000 sq. metres of employment development (in addition to the 22,000 sq. metres already consented). The site is designated as a Low Use site for Brent Geese and Waders.

- 3.50 Criterion e) of the policy states:

"e) Proposals shall meet the requirements of Policy NE5 given the site's Low Use status for Solent Waders and Brent Geese..."

- 3.51 The two site-specific reasons for the deletion of housing allocation HA2 Newgate Lane South given in the Fareham SHLAA (in the context of the Council planning for a reduced housing requirement in the PLP) are that the site lies within a Strategic Gap and that the site is designated as a Low Use site for Brent Geese and Waders. Given the proposed allocation at the Faraday Business Park, a site's designation as of Low Use status for Solent Waders and Brent Geese clearly does not prevent a site from being allocated for development.

Policy E3: Swordfish Business Park

- 3.52 This draft policy proposes the allocation of land for 12,100 sq. metres of employment development (in addition to the 28,000 sq. metres already consented). The site is designated as a Low Use site for Brent Geese and Waders.

- 3.53 Criterion f) of the policy states:

"f) Proposals shall meet the requirements of Policy NE5 given the site's Low Use status for Solent Waders and Brent Geese..."

- 3.54 The two site-specific reasons for the deletion of housing allocation HA2 Newgate Lane South given in the Fareham SHLAA (in the context of the Council planning for a reduced housing requirement in the PLP) are that the site lies within a

Strategic Gap and that the site is designated as a Low Use site for Brent Geese and Waders. Given the proposed allocation at the Swordfish Business Park, a site's designation as of Low Use status for Solent Waders and Brent Geese clearly does not prevent a site from being allocated for development.

Policy NE5: Solent Wader and Brent Goose Sites

- 3.55 Accompanying these representations is a WYG Technical Note in relation to Ecology and the former Policy HA2 Newgate Lane South housing allocation. This addresses the two proposed options for mitigating the impact of development of Low Use SWBG sites. Policy NE5 limits mitigation solutions to either on-site provision or a financial contribution towards mitigation on a suitable identified site. However, as reported in the Technical Note, an off-site solution has been proposed as part of outline application P/19/1260/OA Land East of Newgate Lane East (that application site being the southern part of the former HA2 allocation), and that solution has been reviewed by the Council's Ecologist and found to be acceptable. This therefore represents a compliant solution which can be replicated for other developments in similar circumstances. Policy NE5 should be amended to include this additional option.

Policy D1: High Quality Design and Place Making

- 3.56 This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.57 This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Appendix C:

3.58 The purpose of the inclusion of the Local Ecological Network Map at Appendix C is not understood. It includes the identification of land as "Network Opportunities". This does not appear to have a basis in the policies of the PLP. The former Policy HA2 Newgate Lane South site is identified as a Network Opportunity on this plan. This is not explained. This appendix should be deleted, as happened to a similar plan appended to the Regulation 19 Chichester District Local Plan.

Reinstatement of the Policy HA2: Newgate Lane South housing allocation

3.59 The Council omitted a number of previous housing allocation sites for the Regulation 19 PLP on the basis that the PLP plans for the reduced housing requirement of 403 hpa. We have asserted that this approach fails to comply with legal requirements and is unsound. It is foreseeable that the Council's housing requirement may increase and in such circumstances Policy HA2 should be reintroduced and updated to allocate the site for about 500 dwellings.

3.60 The Policy HA2 site is comprised of three SHELAA sites:

- Cops Field, Newgate Lane, Peel Common (3028);
- Land East of Newgate Lane, Peel Common (3057); and
- Land East of Newgate Lane East, Peel Common (3002).

3.61 In the Council's SHELAA of December 2019, the commentary on each of these sites concluded with a "Suitability" (for allocation for development) Comment. For sites 3002 and 3028 (the smaller northern and southern parcels) the Suitability Comments were:

"The site is considered suitable for development as part of the proposed housing allocation. Development could be accommodated without significant effects on the landscape character of the wider area."

3.62 For site 3057 (the larger central parcel) the Suitability Comment was:

"Development could be accommodated without significant effects on the landscape character of the wider area (following construction of Newgate Lane South) or the integrity of the Strategic Gap..."

- 3.63 All three component parcels of the HA2 site were described as Suitable, Available and Achievable. Nothing has changed in this regard.
- 3.64 In omitting Policy HA2 from the PLP, the Council also updated its SHELAA for consistency with the PLP and justified the omission of the HA2 allocation due to the impact of development on the strategic gap, and the fact that the site is a low use SWBG site. Gosport Borough Council also previously objected to the HA2 allocation due to its alleged traffic impact on Newgate Lane East. Taking each of these matters in turn:

Strategic Gap:

- 3.65 These representations are accompanied by a Preliminary Landscape and Visual Appraisal prepared by Pegasus Group of the former Policy HA2 site, Newgate Lane South. This study concludes that the part of the gap between Peel Common and Bridgemary is weak and under development pressure, particularly with the recently constructed Newgate Lane East now forming such a strong urbanising feature in the local landscape context. The Policy HA2 site is not considered to form part of a priority area which is required to maintain the integrity and function of the Fareham / Stubbington Strategic Gap and it is concluded that the site is well placed to accommodate development that could come forward without significantly affecting the integrity of the gap and the physical and visual separation of settlements. This was the Council's previous conclusion when it proposed to allocate the Policy HA2 site, as evidenced by the quotations from the December 2019 SHELAA above.

Low Use SWBG site:

- 3.66 It is noted that Employment allocations E2 and E3 are similarly designated. These representations are accompanied by an Ecology Technical Note prepared by WYG which describes the off-site mitigation solution already advanced and agreed by the Council's ecologist in relation to a planning application for housing on the southern part of the HA2 site. Demonstrably, this is not an issue which would prevent development coming forward in principle on this site.

Transport impact:

-
- 3.67 These representations are accompanied by a Transport Technical Note prepared by i-Transport. This reports that the Council's transport evidence base was substantially prepared before the Council amended its spatial strategy in response to the draft revised Standard Methodology housing target so it included assessments of the Policy HA2 site, together with other housing allocations since omitted including the two Strategic Growth Areas (SGAs). On this basis the Council's Strategic Transport Assessment concludes that the plan is deliverable and sound from a transport perspective.
- 3.68 The Transport TN reviews the sustainable transport credentials of the HA2 site. The site is very well served by public transport – it is within a 5-10 minute walk of the South East Hampshire Rapid Transit system, and is close to local bus routes. HCC and its partners have recently submitted funding bids to Government for later stages of the SEHRT which includes a potential extension of the SEHRT to the site and the Solent Enterprise Zone. This will further improve the accessibility of the site to public transport services.
- 3.69 The site lies in close proximity (comfortable walk or short cycle trip) to major employment areas (Fareham Business Park, Newgate Lane Industrial Estate, Solent EZ) and supermarkets (such as Asda next to the site) for convenience shopping.
- 3.70 The primary vehicular access to the site will be from a new roundabout on Newgate Lane South. This has been designed to minimise interruptions to traffic flows on Newgate Lane South. The operation of this junction has been modelled, and this confirmed that the greatest queueing delay on any arm during peak periods is about 8 seconds. Thus the roundabout will operate wholly within capacity with a "Level of Service" rating of "A", classified as "Free Flow", such that it will not prejudice the benefits of the recent road project.
- 3.71 Hampshire County Council has not raised any in principle design or safety concerns with the junction and following substantial dialogue has accepted the junction modelling as a basis to consider the operation of the junction but required consideration of the corridor effects of the junction within the Local Plan evidence base.
- 3.72 This wider corridor assessment has now been completed with the release of the FBC SRTM Assessment, summarised in Section 4 of the accompanying Transport

TN. In summary this demonstrates that there are no material impacts on the wider Newgate Lane corridor that result from the delivery of an access to the HA2 site from Newgate Lane. Any objection to the allocation of the HA2 site on this basis is therefore not sustainable.

- 3.73 For all of these reasons, the Council is encouraged to reinstate the Policy HA2 housing allocation for about 500 dwellings. The site is controlled by two highly reputable housing developers – Miller Homes and Bargate Homes – who have a strong local track record of delivery and who are keen to bring it forward for development immediately, such that the site can make a significant contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

Respondent details:

Title:	Ms
First Name:	Pamela
Last Name:	Charlwood
Job Title: (where relevant)	Co Chair
Organisation: (where relevant)	Hill Head Residents' Association
Address:	
Postcode:	
Telephone Number:	
Email Address:	

1) Paragraph: 4.2

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The lower number of houses required is based on a yet to be confirmed government change of mind. In parallel with that, there has been considerable debate nationally over the policy approach set out in the government's consultation which ended in October, with many MPs objecting. Other than the 847 contingency, we see no recognition of the uncertain ground upon which the current numbers in this plan are based. The Plan (para 3.20) implies that the so called Strategic Growth Area in South Fareham is discounted from this new version of the Plan but is that land still designated as such? If so, in the event of any substantial increase in the housing numbers currently assumed as a basis for the Plan, would that retained designation cause it to be immediately vulnerable?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

More contingency plans should higher housing numbers be needed, together with transparency as to where they would be located.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would build in scope for national variation in housing numbers required so that the Local Plan was based on consultation which was valid even in the light of that variation

Your suggested revised wording of any policy or text:

I cannot suggest appropriate wording other than the approach have set out above, with a realistic margin of housing numbers, greater than is currently allowed for

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I speak on behalf of a substantial number of residents of Hill head and -particularly with the limitations set upon public consultation during the COVID period, I would welcome the opportunity to put formally the points I am raising

2) Paragraph: 4.9

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 4.9 (together with paras 1.17 and 1.18) declare the current Welborne plan 'fit for purpose' but evidence is needed: no information is given on funding and project dates for work to Junction 10 of the M27, which is an essential precursor to work commencing on Welborne. Far more confirmed detail is required before this can be accepted as credible.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Timescales and confirmed funding sources for Welborne, together with contingency plans in respect of annual housing numbers in the event of Welborne slipping further or failing altogether

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would render more robust and credible the housing numbers which are the basis of the Local Plan and would mean that contingency plans and their would be clearly set out and their implications would be transparent to local people

Your suggested revised wording of any policy or text:

See two paras above, please - with the numbers requested

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

See previous submission - I wish to speak on behalf of a substantial number of residents of Hill Head

3) Paragraph: 4.4

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Is Fareham now certain about the scale of any possible additional requirements likely to be received under our duty to cooperate with neighbouring authorities, principally Portsmouth and Gosport? We note (para 3.17) the joint approach which will be taken by PfSH to achieve a statement of common ground and the bilateral discussions with neighbouring authorities, but we see no reference to evidence set out in the CPRE Hampshire report showing the amount of brownfield land which could be considered as available in both Gosport and Portsmouth (CPRE report published 2 November 2020). That report estimated that in Portsmouth 119 hectares of brownfield land could be considered available and in Gosport 115.5 hectares. We also note the comments of the Prime Minister emphasising the priority which should be given to brownfield development before building on greenfield sites is considered. Whilst we recognise the importance of the Duty to Co-operate, we believe this should be on a basis that feels credible to local people.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

An approach which demonstrates to local people that neighbouring authorities are seriously assessing all brownfield site possibilities within their own areas before requesting assistance from Fareham Borough Council

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would demonstrate that FBC is not being asked to do more than its share to meet the national housing need

Your suggested revised wording of any policy or text:

Evidence of the response of Portsmouth CC's and Gosport BC's serious assessment of brownfield site potential

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

As stated in previous submissions -to speak on behalf of a substantial number of Hill Head residents

4) Policy: DS2 - Development in the Strategic Gaps

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Whilst we wholeheartedly support the policy regarding the Strategic Gaps D2 and paras 3.9 and 3.44) we note with concern the comments at 3.46 regarding the Fareham/Stubbington strategic gap and the caveat about its current boundaries. We urge FBC to adopt a coherent and transparent approach to land management, resisting erosion around the edge of current Strategic Gaps, together with a coherent and consistent approach to mitigation bids. In the area of Stubbington and Newgate Lane, this will be particularly important when the impact of the new bypass becomes evident in 2021/22.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Openness and clarity about what is really intended in respect of the boundaries of Strategic Gaps, together with a clear policy on use of land for 'mitigation'

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would provide detailed information which would clarify important issues - ie the boundaries of the Strategic Gaps - which is currently vague

Your suggested revised wording of any policy or text:

Para 3.46 must be clarified

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

As stated in previous submissions -to speak on behalf of a substantial number of residents of Hill Head

5) Policy: D4 - Water Quality and Resources

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy D4 on Water Quality and Resources and subsequent paragraphs do not address sufficiently the seriousness of the need to improve water quality: Southern Water is the worst performing water company regarding water quality (see EPA report released October 2020). More detailed actions should be set out, with more coherent policies on mitigation which are currently left largely to individual developers(see also paras 4.17 and 11.52)

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Much more rigorous approach with Southern Water, with clear targets for improvement of water quality. An open and coherent policy from FBC on mitigation, particularly in respect of nitrates.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By showing how FBC intends to meet ecological targets which are of concern nationally as well as locally, through its Design policies

Your suggested revised wording of any policy or text:

See two paras above for what needs to be covered

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

See previous submissions: I wish to speak on behalf of a substantial number of residents of Hill Head

6) Policy: NE5 - Solent Wader and Brent Goose Sites

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 9.78 (policy NE5) refers to candidate sites for Brent Geese and other waders, but gives little detail. This is consistent with the frustrating lack of a coherent policy in respect of mitigation (eg for Brent Geese and other waders, as well as for nitrates): the fields west of Old Street, Hill Head could be considered for this purpose, having previously been frequented by Brent Geese when subject to appropriate cultivation. This site was the subject of an unsuccessful development application and appeal in 2018, and has since put forward by developers as a candidate site for mitigation, first for nitrates and latterly for Brent Geese.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A clear strategic approach and policy in respect of mitigation, together with greater clarity about potential sites

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that FBC is in the driving seat rather than allowing individual developers to put forward ad hoc proposals.

Your suggested revised wording of any policy or text:

See above for issues that need to be covered

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

See previous submissions - I wish to speak on behalf of a substantial number of residents of Hill Head

15th December 2020

Fareham Local Plan 2037 Publication
Regulation 19 Consultation

Dear Sirs,

Please find attached comments from CPRE Hampshire regarding the Regulation 19 Fareham Local Plan 2037 consultation.

Firstly, a general point; CPRE Hampshire is extremely pleased to see that Fareham BC have approached their new Local Plan from a landscape-based perspective, a process which we wholly support. Furthermore, we fully endorse Fareham BC's inclusion of a Climate Change policy, which must underpin all other policies and spatial planning.

Furthermore, we are pleased to see that Fareham have adopted housing numbers based on the latest available housing projections from the ONS, the 2018-based projections, which show a considerable reduction in estimated local need.

However, we remain disappointed that there seems to be no mention of a potential new South Hampshire **Green Belt** in the Reg 19 consultation. In an earlier consultation by Fareham BC in July 2019, there were a number of mentions of this option, notably in Section 10c regarding the Meon Valley, where it said "The Council will also be working with PUSH to consider the potential for greenbelt land across local authority areas, and there could be scope for this area to become part of a South Hampshire greenbelt." As CPRE Hampshire has long campaigned for a sub-regional area of restraint in order to encourage urban regeneration and prevent sprawl, this was very much welcomed. Sadly, this does not seem to have been included in the Reg 19 document, and we consider its exclusion to be a significant wasted opportunity, as the NPPF allows local authorities to designate Green Belt as part of the Local Plan process. It has been agreed that the PfSH authorities are to consider a new Green Belt as part of their forthcoming Statement of Common Ground and we would have hoped to see Fareham BC leading the way.

CPRE Hampshire has completed Response forms for individual policies which are attached below this letter, but in summary our headline comments are as follows:

Development Strategy

Strategic Policy DS1 Development in the Countryside: CPRE Hampshire agrees with these principles but notes that a South Hampshire Green Belt could aid considerably in achieving these goals.

Strategic Policy DS2 Strategic Gaps: We note the decision to re-define strategic gaps (the Meon and Fareham-Stubbington gaps) and suggest that a new Green Belt could achieve this. An area could easily be defined to encompass the Meon Valley, which could link to an area of larger Green Belt to the north of the Borough in Winchester District.

Strategic Policy DS3 Areas of Special Landscape Quality: CPRE Hampshire agree with Fareham BC's analysis of the Borough's varied landscapes and supports any intention to define them as Areas of Special Landscape Quality, illustrated in Figure 3.3. However, CPRE Hampshire suggests that some of these could be further protected if they also formed part of a wider South Hampshire Green Belt, in particular the Upper Hamble Valley, the Meon Valley, the Forest of Bere and Portsdown Hill.

Climate Change

Strategic Policy CC1 Climate Change: CPRE Hampshire believes that one of the most fundamental ways of combating the likelihood of adverse climate change, is to plan development where it can use better public transport and be less reliant on the car. The aspirations in Policy CC1 are more about how development can respond to climate change, and rather less about how spatial planning of future development can help prevent it. We consider that this is a missed opportunity. However, we feel that Criterion a) does not go far enough. According to Camilla Ween, Harvard Loeb Fellow, speaking on behalf of Transport for New Homes “Transport is responsible for about 26% of greenhouse gas emissions, much arising from personal car journeys. Our society will not be able to achieve the UN goals if we do not change the way we travel; that means we need to create new communities that are NOT car dependent. That means careful consideration of where new development is located, as well as how we design new communities, for example, places that are well connected with high quality public realm and movement infrastructure that encourage people to want to move to a car-free lifestyle.” It must be a fundamental tenet of the Fareham Local Plan that NO development should be permitted that relies on the car as its main means of access.

Nothing less than a drastic change to spatial strategy and a move away from South Hampshire’s historic pattern of sprawling suburbs will enable any meaningful contribution to the fight against adverse climate change. We owe it to future generations to do our utmost to shift patterns of behaviour that have become entrenched with the use of the private car. Even electric cars will not solve many of these issues as they still leave residues from tyres and fluids and are unsustainable in terms of battery manufacture. The adoption of a South Hampshire Green Belt would assist this by encouraging urban redevelopment, and preventing sprawl into the countryside where modal change to walking, cycling and public transport is very much more difficult to achieve.

Housing

Policy H1 Housing: CPRE Hampshire recognises that the current guidance from MHCLG requires the calculation of local housing need (LHN) based on figures from the 2014-based household projections, although a recent MHCLG consultation suggested a new methodology. Whatever the methodology, CPRE Hampshire supports Fareham BC in using the most up-to-date household figures based on the 2018-based projections. We also welcome the removal of Policy HA2 from the Reg 19 Local Plan.

Policy HA1 Warsash: CPRE Hampshire does not believe that the proposed development around Warsash can be considered truly sustainable, reliant as it is on the car as the main means of transport. We are concerned about the lack of a masterplan and believe the proposed framework does not fulfil a place making function.

Policy HP4 Five-Year Housing Land Supply: CPRE Hampshire has significant concerns about the unintended consequences of this policy, specifically its linkage with DS1, and believe that it may lead to site selection looking outside the Urban Area in the first instance.

Policy HP6 Exception Sites: The potentially inadvertent use of the word OR in Criterion c) could allow significantly large exception sites to be allowed, as long as they remain below the threshold of 5% of the size of the adjacent settlement. There should be a fixed upper limit.

Natural Environment

Strategic Policy NE1 Protection of Nature Conservation, Biodiversity and the Local Ecological Network: CPRE Hampshire supports the use of ecological network mapping to conserve nature and protect biodiversity and as a tool for influencing spatial planning.

Policy NE2 Biodiversity Net Gain: CPRE Hampshire supports the requirements for 10% biodiversity net gain on all development.

Policy NE4 Water Quality effects on the SPAs, SACs and Ramsar sites of the Solent: CPRE Hampshire understands there is an outstanding judicial process underway regarding the effectiveness of Fareham BC’s proposals for mitigating nitrate and other pollutants on the Solent and other protected waterways. At this point, CPRE Hampshire is therefore unable to endorse the proposed policy until the legal issues have been resolved.

Policy NE6 Trees, Woodlands and Hedgerows: CPRE Hampshire agrees with any policy that supports the preservation or enhancement of trees, woodlands and hedgerows.

Policy NE8 Air Quality: CPRE Hampshire supports the requirements for air quality improvement but considers more could be achieved if development were only to be permitted in locations around mass public transport hubs, rather than being car dependent.

Policy NE9 Green Infrastructure: CPRE Hampshire agrees that green infrastructure is important to the wider ecological network and to the health and wellbeing of residents but suggests that it would be better protected in perpetuity were it to be formalised as part of a new Green Belt.

Transport and Other Infrastructure

Strategic Policy TIN1 Sustainable Transport: CPRE Hampshire recognises that Fareham BC aspire to have ‘good growth’ with existing and proposed transport corridors influencing choice of development, but we feel the policy does not go far enough. The Council should feel empowered to reject development which is not already located around, or can provide, public mass transit hubs, in particular the rail network.

The principles of development and transport as set out in the Transport for New Homes checklist should be followed - <https://www.transportfornewhomes.org.uk/the-project/checklist-for-new-housing-developments/>.

Design

Strategic Policy D1 High Quality Design and Placemaking: The design quality of future developments starts with overall masterplanning and landscape context as well as specific building details. Fareham has seen a proliferation of poorly designed car dependant nondescript developments over recent years, and it is critical that major improvements are made for the future.

Yours faithfully,

Caroline Dibden

Vice-President
CPRE Hampshire

POLICY DS1: Development in the Countryside

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| X | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 3.29 – 3.36

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy DS1: Development in the Countryside

B1c Which part of the Policies Map?

Areas of Special Landscape Quality and Strategic Gaps

- a) East of Welborne,**
- b) the Strategic Gap along the Meon, and**
- c) to the north-west of the borough.**

2	Do you think the Publication Local Plan is:	Yes	No
	Legally compliant	YES	
	Sound		NO
	Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire STRONGLY SUPPORTS the overall approach taken by Fareham BC in the Fareham Local Plan 2037 for a spatial strategy based on countryside, which is justified as it is in accordance with the aspirations as set out in the NPPF for development to be brownfield first, and for countryside to be protected for its intrinsic value and beauty, and for protection of Best and Most Versatile agricultural land. It is also supported by the Government's 25-year Environment Plan and for the recommendations as set out by the Climate Change Committee.

Furthermore, CPRE Hampshire SUPPORTS the Vision for the Fareham Local Plan 2037 which states that Fareham BC seek to retain its identity, and the identity of individual settlements within the Borough, through measures that seek to retain the valued landscapes and settlement definition.

We also SUPPORT Strategic Priority 2 which seeks to maximise development in the urban area and away from the wider countryside, valued landscapes and those of special quality and spaces that contribute to settlement definition.

CPRE Hampshire believes that the Vision and Strategic Priority 2 would both be better achieved if a new Green Belt was designated, due to its permanence and effectiveness. We submitted to Fareham BC and to PFSH a report by NEF Consulting on the potential socio-economic and environmental benefits of a Green Belt: <https://www.cprehampshire.org.uk/our-campaigns/south-hampshire-green-belt/>. This demonstrates the considerable financial benefits as well as to health and wellbeing, climate change and natural capital of protecting the green space near to population centres, in perpetuity, something that only Green Belt is designed to achieve.

Looking at the specific policy wording, CPRE Hampshire believes that criterion (e) of **Policy DS1** is unsound, specifically in the way it permits development in the countryside that is compliant with Policies **HP4, HP5 and HP6**. Permissions that might be compliant with these policies appear to be in direct contradiction with the other criteria in **Policy DS1**, and the policy is therefore internally inconsistent.

HP4 relates to the Five Year Housing Supply (5YHLS) and allows residential development outside the urban area boundary where the Council is unable to demonstrate a 5YHLS. It is believed that the Government intends to remove 5YHLS test in the planning reforms, so this policy may be redundant and should be reworded to future proof its deletion. However, that notwithstanding, the main problem is that the wording of Policy HP4 and its linkage with **DS1** could unintentionally lead to countryside locations taking priority over alternative, more sustainable, urban or brownfield locations.

HP5 relates to the provision of affordable housing on sites of 10 or more, and its linkage to **DS1** could unintentionally suggest that Fareham BC accepts in principle the development of ANY affordable housing site outside the urban area boundary. The risk is that the linkage could potentially enable large scale housing development in the countryside as long as it could be demonstrated that 40% affordable housing would be achieved.

HP6 relates to small rural affordable housing exception sites, and whilst CPRE Hampshire supports the provision of rural affordable housing, the concern is that the linkage with **DS1** could inadvertently lead to a series of separate applications which in combination amount to significant levels of development in the countryside. The cumulative impact on the separation of settlements resulting from a number of sites each individually sub- 1 hectare or <5% of the adjacent settlement must be considered, but at the moment the policy has no mechanism for dealing with this potential eventuality. See separate comments on **Policy HP6** as regards the use of the word *OR*.

CPRE Hampshire SUPPORTS criteria i) to v) of **Policy DS1** and believe they provide a sound underpinning of the principles aspired to by Fareham BC.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Fareham BC should look at the areal extent of a possible South Hampshire Green Belt as part of this Local Plan, as it has been confirmed by Leader Cllr Woodward that they wish to see such a designation to protect the countryside and gaps.

Remove the linkage of **Policies HP4, HP5 and HP6** with **Policy DS1**.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Including a proposed South Hampshire Green Belt would be in accordance with the aspirations as set out by the Council in council meetings, PFSH meetings and in press releases.

Removing the linkage of **Policies HP4, HP5 and HP6** with **Policy DS1** would remove the internal inconsistency by removing the possibility of inadvertent development in the countryside.

B4c Your suggested revised wording of any policy or text:

Remove the linkage of **Policies HP4, HP5 and HP6** from Policy **S1 (e)**.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for Local Plans to take the countryside into account when devising spatial development strategy, and we would like to appear at the Hearings to support Fareham BC in choosing this approach. Our expertise lies in spatial strategy and reconciling development requirements with the environmental constraints of countryside, and its uses and purposes.

POLICY DS2: Development in Strategic Gaps

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 3.43 to 3.46, Para 3.10

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy DS2: Development in Strategic Gaps

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC to designate strategic gaps between Fareham / Stubbington and the Western Wards (Meon Gap) and between Fareham / Bridgemary and Stubbington / Lee-on-the-Solent (Fareham- Stubbington Strategic Gap). However, a study carried out on behalf of CPRE Hampshire in January 2019, by consultants West Waddy, showed that historically strategic gaps in South Hampshire have failed to adequately prevent coalescence of settlements. This report was shared with Fareham BC as a member of the Partnership for South Hampshire, and can be submitted as part of our evidence on this matter to the examination hearings.

“An Assessment of the Effectiveness of Settlement Gap Policies in South Hampshire in preventing Urban Sprawl & the Coalescence of Settlements” – January 2019, West Waddy.

The conclusions show that through appeals and permissions the gaps designated in South Hampshire (including Fareham) have been significantly reduced over time, and are thus an ineffective policy and thus unsound. Para 3.10 confirms that this has been the case in Fareham.

The findings of this report show that “In the national context, South Hampshire is fairly unique among the large urban areas in England in having no designated Green Belt, with reliance instead being placed upon Gaps designated in Local Plans to prevent the coalescence of settlements.”

Furthermore “given the major urban extensions currently being proposed and the past history of erosion of Gaps through subsequent permissions being granted, a strong argument can be made that the current Gap policies across the sub-region are failing in their remit to prevent coalescence and sprawl, which is ultimately likely to lead to currently separate settlements forming one large South Hampshire conurbation and expanding out into the adjoining areas of countryside. The exceptional circumstances therefore exist to demonstrate that a new stronger policy backed by explicit Government advice is needed to prevent this happening and the tool for this is a Green Belt, which is already in use around most large urban areas in England. South Hampshire is the exception in having no such designation.”

CPRE Hampshire has submitted to Fareham BC and to PFSH a report by NEF Consulting on the potential socio-economic and environmental benefits of a Green Belt: <https://www.cprehampshire.org.uk/our-campaigns/south-hampshire-green-belt/>

Notwithstanding the above comments regarding a new Green Belt, CPRE Hampshire SUPPORTS the removal of the earlier proposed Strategic Growth Area SGA, previously entitled HA2 (in the Reg 18 consultation version) from the now proposed Fareham-Stubbington Strategic Gap. The previous inclusion of the SGA was clearly subject to objections by neighbouring Gosport BC, which would have undermined any Duty to Co-operate and thus soundness. It was also objected to by many CPRE members and is therefore of concern to us.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Fareham BC should look at the areal extent of a possible South Hampshire Green Belt as part of this Local Plan, as it has been confirmed by Leader Cllr Woodward that they wish to see such a designation to protect the gaps between settlements.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Including a proposed South Hampshire Green Belt would be in accordance with the aspirations as set out by the Council in council meetings, PFSH meetings and in press releases, and would lead to a much more rigorous policy to prevent coalescence which is Fareham BC’s stated aim.

A need for a South Hampshire Green Belt was confirmed by Cllr Woodward in the Fareham BC Executive Committee at 6pm on Monday 7th December 2020. Its omission from the Reg 19 Local Plan consultation is thus not in accordance from the council’s own publicly announced policy.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for a new South Hampshire Green Belt, and we would like to appear at the Hearings to further explain our justification and why Fareham merits the exceptional circumstances required to designate a new Green Belt. We have a petition which has been signed by nearly 15,000 people asking Fareham BC (alongside Eastleigh BC, Winchester CC and Test Valley BC) to designate a Green Belt as part of its Local Plan process.

POLICY DS3: Landscape

B1 Which part of the Local Plan is this representation about?

- | | | |
|-------------------------------------|------------------|-----------|
| <input checked="" type="checkbox"/> | A paragraph | Go to B1a |
| <input checked="" type="checkbox"/> | A policy | Go to B1b |
| <input checked="" type="checkbox"/> | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 3.48 to 3.58

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy DS3: Landscape

B1c Which part of the Policies Map?

All Areas of Special Landscape Quality

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE fully SUPPORTS the approach taken by Fareham BC in respect of analysing and including Areas of Special Landscape Quality as part of its development strategy and as Strategic Policy S3. This is in accordance with the aspirations outlined in the NPPF to value landscape for its intrinsic character and beauty of the countryside, as outlined in NPPF Para 170 a) and b).

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for Local Plans to take landscape into account when devising spatial development strategy, and we would like to appear at the Hearings to support Fareham BC in choosing this approach. Our expertise lies in spatial strategy and reconciling development requirements with the environmental constraints of, and impacts upon, the wider landscape.

POLICY H1: Housing Provision

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 4.1 to 4.20

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy H1: Housing Provision

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The approach taken by Fareham BC to calculating housing need for this Reg 19 version is based upon the MHCLG consultation on a new standard method in August 2020, which showed Fareham’s housing need to be lower (403 dpa) than using the previous standard method (514 dpa). CPRE Hampshire SUPPORTS the use of the latest base data on household projections (the 2018-based projections from the ONS) as it conforms with Para 31 of the NPPF “The preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be adequate and proportionate, focused tightly on supporting and justifying the policies concerned, and take into account relevant market signals.”

As can be seen from the graph below, the most up-to-date population projections (in 000’s) for Fareham evidences the trend towards a lower requirement, and this would translate into a lower household projection. The impact of Covid-19, and corresponding economic fallout, on migration patterns will remain unclear for some time, and it is therefore sensible to use a cautious approach to planning and development.

However, for Fareham to agree to take unmet need from Portsmouth is premature, predating as it does the revised statement of common ground from PFSH, and therefore Policy H1 is unsound.

It is also clear that there remains a significant reliance on delivery of housing at Welborne, which is subject to a separate plan. Delays to infrastructure finding at Welborne could have an impact on Fareham’s overall strategy for delivery of its housing needs in the plan period.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove the requirement to take housing from Portsmouth CC.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a recognised authoritative voice on Hampshire’s housing numbers, the standard methodology and has been involved in this aspect of Fareham’s Local Plans since the time of the South East Plan in 2005, and the formation of PfSH (Partnership for South Hampshire).

CPRE Hampshire is part of an expert group in the National CPRE network on housing numbers, and would like to appear at the hearing sessions to SUPPORT the use of the most up-to-date household projections.

POLICY HA1: North and South of Greenaway Lane, Warsash

B1 Which part of the Local Plan is this representation about?

- | | | |
|-------------------------------------|------------------|-----------|
| <input checked="" type="checkbox"/> | A paragraph | Go to B1a |
| <input checked="" type="checkbox"/> | A policy | Go to B1b |
| <input checked="" type="checkbox"/> | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Housing Allocation Policy: HA1 North and South of Greenaway Lane, Warsash

B1c Which part of the Policies Map?

Figure 4.1

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire has significant concerns about the piecemeal development already seen, and proposed, in the Warsash area. Population growth in the 10 years 2009-2019 has reached 9% in Warsash and the western wards, while Fareham itself has only grown by 4%. As Warsash has no access to the rail network, this pattern of development could not be considered sustainable. It therefore fails the soundness tests.

An indicative framework as shown in Figure 4.1, but this does not meet the requirements for a masterplan, and it is not adequate for long-term planning to integrate the various separate sites and applications by a series of different developers. Policy HA1 will fail to meet any government aspirations for placemaking as set out in the NPPF Chapter 12, Paras 124 to 130, and is therefore unsound.

Para 124 of the NPPF states “The creation of high quality buildings and places is fundamental to what the planning and development process should achieve. Good design is a key aspect of sustainable development, creates better places in which to live and work and helps make development acceptable to communities.”

Para 125 of the NPPF states “Design policies should be developed with local communities, so they reflect local aspirations, and are grounded in an understanding and evaluation of each area’s defining characteristics.” It is apparent from discussion with CPRE Hampshire members that there has not, to date, been any meaningful involvement of local communities.

It is clear that the settlement policy boundaries have been moved to accommodate the applications pending for Warsash. This is not consistent with a plan-led approach but is simply reactive to a developer-led situation, and takes no account of the area’s defining features.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

More analysis of the sustainability criteria for the overall development strategy, such as access to public transport is required before sites such as HA1 are confirmed. Has every opportunity for brownfield development around rail networks been ruled out?

Much more consultation with the local community is required before the proposed HA1 framework meets NPPF prerequisites.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has worked for some years with local campaign group Save Warsash and the Western Wards, and a number of our members will be affected by the proposals for such a large allocation of housing to one small settlement. We would like to take part in the hearing sessions to represent their concerns for initial choice of an unsustainable site, loss of countryside and open space in Warsash, and poor design due to lack of a masterplan.

POLICY HP4: Five-year housing land supply

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 5.22 to 5.28

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy HP4: Five-year housing land supply

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

Policy HP4 states “If the Council cannot demonstrate a five-year supply of land for housing against the housing requirement set out in Policy H1, additional housing sites, outside the Urban Area boundary, may be permitted where they meet all of the following criteria.....” The problem with this policy is that inadvertently it encourages the first choice of sites to be “outside the Urban Area”. CPRE Hampshire is sure that this is not what Fareham BC intends, and in any event it would not be in accordance with the councils own aspirations for a brownfield first approach, nor in accordance with the NPPF Para 137, and is therefore unsound. A sequential approach should be used, even in the event of a lack of a five-year housing land supply.

The problem is exacerbated by the linkage of **Policy HP4** with **Policy DS1**, particularly **DS1 Criterion (e)** as discussed above.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy HP4 should be rewritten to include a sequential approach, which “makes as much use as possible of suitable brownfield sites and underutilised land” as per Para 137 (a) of the NPPF.

The linkage of **Policy DS1 (e)** and **Policy HP4** should be removed.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be in accordance with the NPPF.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is part of an expert group in the National CPRE network on housing numbers, and the five-year housing land supply, and would like to appear at the hearing sessions to discuss its impact on the Fareham Reg 19 Local Plan.

POLICY HP6: Exception Sites

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 5.43 to 5.51

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy HP6: Exception sites

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The second part of **Policy HP6, Criterion (c)**, would allow exception sites with a limit of 1 hectare *OR* a proviso that the scheme does not exceed 5% of the size of the adjacent settlement. The problem is the word *OR*, as this could lead to large sites adjacent to large settlements being permitted as they would still be beneath the 5% cut-off. For example, Fareham town is a large settlement, of some 20,000 households, and so an exception site of up to 5% could itself number 1,000 dwellings. CPRE Hampshire is sure that this is not what was intended by Fareham BC as the aspiration is for small sites on urban boundaries.

The problem is exacerbated by the linkage of **Policy HP6, Criterion (c)**, with **Policy DS1**, particularly **DS1 Criterion (e)** as discussed above.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy HP6 should be rewritten to include a sequential approach, which “makes as much use as possible of suitable brownfield sites and underutilised land” as per Para 137 (a) of the NPPF.

Criterion c) should be reworded to remove the reference to *OR* 5% of the size of the adjacent settlement and have a fixed upper limit of what is meant by ‘small sites’ as identified in the justification text (Para 5.46).

The linkage of **Policy DS1 (e)** and **Policy HP6** should be removed.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Any ambiguity on what a “small site” means would be removed giving clarity for applicants and for FBC.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of affordable housing, such that it is located and designed appropriately, and would like to appear at the hearing sessions to discuss the impact of Policy HP6 on the Fareham Reg 19 Local Plan.

STRATEGIC POLICY CC1: Climate Change

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 8.1 to 8.10

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy CC1: Climate change

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant		NO
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire generally SUPPORTS the approach taken by Fareham BC to Climate Change. But we believe that **Policy CC1, Criterion (a)** does not go far enough to encourage/enforce a truly sustainable pattern of development and is unlikely to lead to a meaningful reduction of emissions from private car use.

Section 19(1A) of the Planning and Compulsory Purchase Act 2004 requires that a local authority's development plan documents must: (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority's area contribute to the mitigation of, and adaptation to, climate change.

The NPPF Para 148 further includes the requirement that “the planning system should support the transition to a low carbon future in a changing climate”, should “shape places in ways that contribute to radical reductions in greenhouse gas emissions” and Footnote 48 “in line with the objectives and provisions of the Climate Change Act 2008.”

CPRE Hampshire believes that one of the most fundamental ways of combating the likelihood of adverse climate change, is to plan development where it can use better public transport and be less reliant on the car. The aspirations in **Policy CC1** are more about how development can respond to climate change, and rather less about how spatial planning of future development can help prevent it. We consider that this is a missed opportunity. According to Camilla Ween, Harvard Loeb Fellow, speaking on behalf of Transport for New Homes “Transport is responsible for about 26% of greenhouse gas emissions, much arising from personal car journeys. Our society will not be able to achieve the UN goals if we do not change the way we travel; that means we need to create new communities that are NOT car dependent. That means careful consideration of where new development is located, as well as how we design new communities, for example, places that are well connected with high quality public realm and movement infrastructure that encourage people to want to move to a car-free lifestyle.” It must be a fundamental tenet of the Fareham Local Plan that NO development should be permitted that relies on the car as its main means of access.

Nothing less than a drastic change to spatial strategy and a move away from South Hampshire’s historic pattern of sprawling suburbs will enable any meaningful contribution to the fight against adverse climate change. We owe it to future generations to do our utmost to shift patterns of behaviour that have become entrenched with the use of the private car. Even electric cars will not solve many of these issues as they still leave residues from tyres and fluids and are unsustainable in terms of battery manufacture.

Policy CC1 is therefore not legally compliant unless the large part of Fareham’s spatial strategy is geared to development around mass public transport hubs and avoiding sites which are car-dependant. It is clear that sites such as Policy HA1 would fail to meet this condition.

CPRE Hampshire recommends the checklist provided by Transport for New Homes, which sets out an objective approach to planning new housing areas without dependence on cars:

<https://www.transportfornewhomes.org.uk/wp-content/uploads/2019/10/checklist.pdf>

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

CPRE Hampshire recommends strengthening **Policy CC1, Criterion (a)** to enable a spatial strategy more likely to meet the requirements set out in Section 19(1A) of the Planning and Compulsory Purchase Act 2004, and the NPPF, by including a requirement for mass public transport hubs to be the first approach for development, and to enable Fareham to refuse car-dependent applications.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be in accordance with Section 19(1A) of the Planning and Compulsory Purchase Act 2004, and the NPPF Para 148.

B4c Your suggested revised wording of any policy or text:

(a) A development strategy that minimises the need to travel by allocating sites and generally directing development to locations **near to mass public transport hubs**, with better services and facilities, or where they are capable of being improved.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning housing, such that it is located and designed appropriately around public transport hubs to minimise emissions and would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy CC1** in this regard.

POLICY NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| X | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.5 to 9.27

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

B1c Which part of the Policies Map?

The Local Ecological Network map in Appendix C

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The approach taken by Fareham BC is sound, and CPRE Hampshire SUPPORTS the requirement for nature to be conserved and ecological networks to be protected as per the forthcoming Environment Act.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning development, such that it is located and designed appropriately to conserve and enhance the biodiversity of the area and would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy NE1** in this regard.

POLICY NE2: Biodiversity net gain

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| X | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.28 to 9.44

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy NE2: Biodiversity net gain

B1c Which part of the Policies Map?

The Local Ecological Network map in Appendix C

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The approach taken by Fareham BC is sound, and CPRE Hampshire SUPPORTS the requirement for biodiversity net gain as per the forthcoming Environment Act.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning development, such that it is located and designed appropriately to see a net gain in biodiversity of the area, and would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy NE2** in this regard.

POLICY NE4: Water quality effects on the SPAs, SACs and Ramsar sites of the Solent

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.50 to 9.54

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY NE4: Water quality effects on the SPAs, SACs and Ramsar sites of the Solent

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant		NO
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire understands there is an outstanding judicial process underway regarding the effectiveness of Fareham BC's proposals for mitigating nitrate and other pollutants on the Solent and other protected waterways. At this point, CPRE Hampshire is therefore unable to endorse the proposed policy until the legal issues have been resolved.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire's remit covers protection and enhancement of both land and seascape, including Hampshire's iconic chalk streams and rivers, and the Solent. In the absence of an outcome on the legal matters, the hearing session may be the first opportunity to evaluate the effectiveness and legality of the proposed policy.

POLICY NE6: Trees, woodland and hedgerows

B1 Which part of the Local Plan is this representation about?

X	A paragraph	Go to B1a
X	A policy	Go to B1b
	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.79 to 9.89

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY NE6: Trees, woodland and hedgerows

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy HE6** is sound. The Climate Change Committee has called for a 40% increase in the extent of hedgerows by 2050 to help tackle the climate emergency, and we would thus like to see more hedgerows planted and restored in Fareham BC.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

NO Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

POLICY NE8: Air quality

B1 Which part of the Local Plan is this representation about?

X	A paragraph	Go to B1a
X	A policy	Go to B1b
	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.98 to 9.118

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy NE8: Air quality

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy HE8** is sound.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

NO Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

POLICY NE9: Green infrastructure

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.119 to 9.125

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy NE9: Green infrastructure

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy HE9** is sound. However, we believe that a link with **Policy HE1** should be included within **Policy HE9** itself, rather than just within the supporting text in **Para 9.122**. CPRE Hampshire further believes that much better Green Infrastructure provision could be safeguarded over the long term if it were to be incorporated within a South Hampshire Green Belt.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of green infrastructure alongside planning development, such that it is located and designed appropriately, in order to benefit biodiversity, natural capital, but also residents' health and wellbeing. We would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy NE9** in this regard, and to discuss whether a South Hampshire Green Belt could ensure green infrastructure is protected in perpetuity.

POLICY TIN1: Sustainable transport

B1 Which part of the Local Plan is this representation about?

- | | | |
|-------------------------------------|------------------|-----------|
| <input checked="" type="checkbox"/> | A paragraph | Go to B1a |
| <input checked="" type="checkbox"/> | A policy | Go to B1b |
| <input type="checkbox"/> | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 10.1 to 10.11

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy TIN1: Sustainable transport

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy TIN1** to be a good starting point. CPRE Hampshire recognises that Fareham BC aspire to have ‘good growth’ with existing and proposed transport corridors influencing choice of development, however we feel **Policy TIN1** does not go far enough. The Council should feel empowered to reject development which is not already located around, or can provide, public mass transit hubs, in particular the rail network. The policy as it stands does not give Fareham BC a sufficiently robust mechanism for achieving this. It is therefore unlikely to comply with the aspirations to meet climate change objectives as set out in **Policy CC1** or for air quality in **Policy NE8**.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The principles of development and transport as set out in the Transport for New Homes checklist should be followed - <https://www.transportfornewhomes.org.uk/the-project/checklist-for-new-housing-developments/>.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The policy would then comply with climate change and air quality objectives.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning housing, such that it is located and designed appropriately around public transport hubs to minimise emissions and impacts on climate change. We would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy TIN1** in this regard.

POLICY D1: High quality design and place making

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 11.1 to 11.36

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY D1: High quality design and place making

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire welcomes the approach taken by Fareham BC towards high quality design in **Policy D1** but would like to see the inclusion of the words countryside and landscape into **Criterion (i)**. The omission of these words makes it inconsistent with **Strategic Policies DS1 and DS3** and therefore unsound.

The design quality of future developments starts with overall masterplanning and landscape context as well as specific building details. Fareham has seen a proliferation of poorly designed car dependant nondescript developments over recent years, and it is critical that major improvements are made for the future.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include the words countryside and landscape into **Criterion (i)**.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

This would then be in accordance with **Strategic Policies DS1 and DS3**.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire has many members in Fareham who are keenly interested in the design of future developments and would like to see major improvements over previous failures in design quality, which has historically resulted in large sprawling estates of car-dependant nondescript housing.

1 INTRODUCTION

1.1 Introduction

- 1.1.1 These representations are submitted by Gladman in response to the current consultation held by Fareham Borough Council (FBC) on the proposed submission draft Fareham Local Plan (FLP). Gladman specialise in the promotion of strategic land for residential development and associated community infrastructure and has considerable experience in the development industry across a number of sectors, including residential and employment development. From that experience, we understand the need for the planning system to provide local communities with the homes and jobs that are needed to ensure residents have access to decent homes and employment opportunities.
- 1.1.2 Gladman has a wealth of experience in contributing to the Development Plan preparation process, having made representations on numerous local planning documents throughout the UK and having participated in many Local Plan public examinations. It is on the basis of this experience that the comments are made in this representation.
- 1.1.3 Prior to this consultation the Government published the Planning for the Future White Paper setting out proposals for how the Government wants to 'radically reform' the planning system. Central to the Government's proposals will be a simpler, more streamlined Local Plan making process. Consultation on the proposals ended on 29th October 2020. Subject to the outcomes of this process the Government has signalled its intent to make rapid progress toward this new planning system through the swift introduction of new legislation to implement the changes.
- 1.1.4 As the White Paper is only currently under consultation and there is currently uncertainty around timescales for moving towards a new Local Plan making process, this representation has been prepared against the backdrop of the current system. In progressing the FLP under the current system, the Council will need to carefully consider some of its policy choices and ensure that its evidence base is up-to-date and robust in light of changing circumstances and the changes brought about by the revised National Planning Policy Framework (2019).

2 NATIONAL PLANNING POLICY

2.1 National Planning Policy Framework

2.1.1 On 24th July 2018, the Ministry of Housing, Communities and Local Government (MHCLG) published the Revised National Planning Policy Framework which was subsequently updated in February 2019. These publications form the first revisions of the Framework since 2012 and implement changes that have been informed through the Housing White Paper, The Planning for the Right Homes in the Right Places consultation and the draft Revised Framework consultation.

2.1.2 The Framework (2019) introduces a number of major changes to national policy and provides further clarification to national planning policy as well as new measures on a range of matters. Crucially, the changes to national policy reaffirms the Government's commitment to ensuring up-to-date plans are in place which provide a positive vision for the areas which they are responsible for to address the housing, economic, social and environmental priorities to help shape future local communities for future generations. Paragraph 16 of the Framework (2019) states that Plans should:

- a) *Be prepared with the objective of contributing to the achievement of sustainable development;*
- b) *Be prepared positively, in a way that is aspirational but deliverable;*
- c) *Be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;*
- d) *Contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;*
- e) *Be accessible through the use of digital tools to assist public involvement and policy presentation; and*
- f) *Serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).*

2.1.3 To support the Government's continued objective of significantly boosting the supply of homes, it is important that the Local Plan provides a sufficient amount and variety of land that can come forward where it is needed, that the needs of groups with specific housing

requirements are addressed and that land with permission is developed without unnecessary delay¹.

- 2.1.4 To be considered sound at Examination the emerging Local Plan will need to meet all four of the soundness tests set out in paragraph 35 of the Framework (2019).

2.2 Planning Practice Guidance

- 2.2.1 The Government published updates to its Planning Practice Guidance (PPG) on 13th September 2018. The updated PPG provides further clarity on how specific elements of the revised Framework should be interpreted when preparing Local Plans.

2.3 Planning for the Future White Paper

- 2.3.1 On the 6th August, Government published the Planning for the Future White Paper setting out proposals for how it is seeking to 'radically reform' the planning system. The proposals are seeking to streamline and modernise the planning process.

- 2.3.2 Consultation recently closed on these proposals and it will be important that the Council keeps up to date with the implementation of these changes and the implications this will in turn have on the preparation of any subsequent Local Plan review. Timescales remain uncertain however subject to the outcomes of this process the Government has signalled its intent to make rapid progress toward this new planning system through the swift introduction of new legislation to implement the changes.

- 2.3.3 More importantly alongside this consultation, a consultation on immediate changes to the current planning system was also held, closing on the 1st October. Of significant note is a proposed revised standard method for calculating local housing need, which when implemented will be used as the basis for plans created prior to any changes outlined in the White Paper. Introduction of the revised methodology, which proposes to incorporate a percentage of existing stock as the baseline of the calculation, identifies an indicative housing figure of 403dpa for Fareham.

¹ NPPF – Paragraph 60

3 LEGAL REQUIREMENTS

3.1 Duty to Cooperate

3.1.1 The Duty to Cooperate (DtC) is a legal requirement established through section 33(A) of the Planning and Compulsory Purchase Act 2004, as amended by Section 110 of the Localism Act. The DtC requires local planning authorities to engage constructively, actively and on an ongoing basis with neighbouring authorities on cross-boundary strategic issues through the process of ongoing engagement and collaboration.²

3.1.1 As demonstrated through the outcome of the Coventry, Mid Sussex, Castle Point and St Albans examinations, if a Council fails to satisfactorily discharge its DtC a Planning Inspector must recommend non-adoption of the Plan. This cannot be rectified through modifications.

3.1.2 The NPPF(2019) has introduced a number of significant changes to how local planning authorities are expected to cooperate including the preparation of Statement(s) of Common Ground (SOCG) which are required to demonstrate that a plan is based on effective cooperation and has been based on agreements made by neighbouring authorities where cross boundary strategic issues are likely to exist. The NPPF(2019) sets out that local planning authorities should produce, maintain, and update one or more Statement(s) of Common Ground (SOCG), throughout the plan making process³. The SOCG(s) should provide a written record of the progress made by the strategic planning authorities during the process of planning for strategic cross-boundary matters and will need to demonstrate the measures local authorities have taken to ensure cross boundary matters have been considered and what actions are required to ensure issues are proactively dealt with e.g. unmet housing needs.

3.1.3 This issue is particularly crucial for the FLP given the work currently being undertaken through the Partnership for South Hampshire (PFSH) which is seeking to identify Strategic Development Opportunities to meet identified unmet needs across the sub-region.

3.1.4 The PFSH is currently working on a new SOCG between all constituent authorities and will effectively supersede the Spatial Position Statement (2016). Paragraph 3.17 of the submission Local Plan confirms that bilateral conversations with neighbouring authorities have been undertaken and the Council is aware of unmet needs arising across the region due to neighbouring borough's capacity to address any unmet need. The Council acknowledges at

² PPG Reference ID: 61-021-20180913

³ PPG Reference ID: 61-001-20180913

paragraph 4.4 that there is a significant likelihood of a substantial level of unmet housing needs in the sub-region with figures released in September 2020 suggesting unmet need in the sub-region of circa 10,750 dwellings. This figure is derived from 11 councils who are all at varying stages of plan preparation and based on the current standard methodology.

- 3.1.5 At the time of writing, it is noted that Portsmouth City Council (PCC) have written to the Council requesting a contribution of 1,000 dwellings to assist in meeting their unmet housing needs. Gosport Borough Council (GBC) is also likely to have an issue with unmet housing need, currently estimated to be in the region of 2,500 dwellings.
- 3.1.6 In principle, Gladman support the Council's decision to increase the housing target by 847 dwellings to contribute toward the unmet housing needs issue of the wider area. However, Gladman are concerned that without a signed SOCG between constituent authorities, it is difficult to consider whether this level of housing is sufficient to meet the wider needs of the area. Gladman recommend that a further consultation which considers the outcome of the work of the PFSH will be required so that the Local Plan can reflect the outcome of that process prior to the submission of the Local Plan to the Secretary of State for examination.
- 3.1.7 Since effective cooperation is an ongoing issue, Gladman reserve the right to provide further comments in relation to this matter once further evidence and signed statements become available.

3.2 Sustainability Appraisal

- 3.2.1 In accordance with Section 19 of the Planning and Compulsory Purchase Act 2004, policies set out in Local Plans must be subject to a Sustainability Appraisal (SA), and also incorporate the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 (the SEA Regulations).
- 3.2.2 The SA/SEA is a systematic process that should be undertaken at each stage of the Plan's preparation, assessing the effects of the FLP proposals on sustainable development when judged against all reasonable alternatives. The Council must ensure that the future results of the SA clearly justify its policy choices. In meeting development needs of the area, it should be clear from the results of the assessment why some policy options have been progressed and others have been rejected. This must be undertaken through a comparative and equal assessment of all reasonable alternatives, in the same level of detail for both chosen and rejected alternatives. The Council's decision making, and scoring should be robust, justified and transparent.

4 FAREHAM LOCAL PLAN

4.1 Vision and Objectives

4.1.1 In principle, Gladman support the Council's vision and objectives. In particular, we support the Plan's commitment to accommodating development to address the need for new homes and employment space in Fareham Borough and the commitment to ensuring a strong and diverse economy is delivered.

4.1.2 Notwithstanding this, it is considered the Plan could go further in its aims to support housing and economic growth of the wider sub-region with reference to assisting neighbouring authorities with any unmet housing needs. This is particularly important due to the ongoing work of the PFSH and outstanding evidence relating to unmet housing needs and how this will be redistributed across the PFSH area.

4.2 Strategic Policy DS1: Development in the Countryside

4.2.1 Strategic Policy DS1 states proposals for development in the countryside, which is defined as land outside the Urban Area boundary, will only be supported in a narrow set of circumstances.

4.2.2 Gladman are opposed to the use of settlement boundaries, as these are often used as an arbitrary tool to prevent otherwise sustainable proposals from going forward. The policy wording as currently drafted only allows for development in a narrow set of circumstances (i.e. replacement dwelling, previously developed land etc.) and does not allow for sufficient flexibility to respond to changes of circumstance such as a shortfall in housing supply. Gladman believe that this policy should be modified to a criteria-based policy which will provide a more appropriate mechanism for assessing the merits of individual development proposed, based on their specific circumstances and ability to deliver sustainable development rather than being discounted simply due to a sites location beyond an artificial boundary.

4.2.3 To achieve this; a criteria based approach would allow the plan to protect itself against unsustainable development whilst at the same time offering a flexible solution to the consideration of development opportunities outside these boundaries that are able to come forward to meet identified needs should the Council's housing land supply start to fail. Gladman refer to the submission version of the Harborough Local Plan, Policy GD2, which states:

“in addition to sites allocated by this Local Plan and neighbourhood plans, development within or contiguous with the existing or committed built up area of the Market Harbour, Key Centres, the Leicestershire Principal Urban Area (PUA), Rural Centres and Selected Rural Villages will be permitted where...”

A series of criteria follows.

- 4.2.4 Clearly the policy here would need to reflect the local circumstances of Fareham but it does provide an example of a local authority taking a proactive approach to guiding development and ensuring that it can meet its housing target as well as plan for approaches if and when problems arise over the course of a plan period with regard to the delivery of allocated sites. Accordingly, Gladman recommend the use of a criteria-based policy should be included within the FLP to ensure housing needs are met in full.
- 4.2.5 In addition, the second element of the policy requires proposals to demonstrate that if they require a location outside of the urban area, do not significantly affect the integrity of a Strategic Gap and are not located on Best and Most Versatile (BMV) agricultural land. Gladman are unclear with the necessity of including this additional criteria as these matters are dealt with elsewhere within the FLP and therefore their inclusion in Policy DS1 leads to unnecessary duplication and not in accordance with the NPPF2019. As such, this element of the policy should be deleted as the finer details of each of these issues are dealt with elsewhere within the draft Local Plan.

4.3 Strategic Policy DS2: Development in Strategic Gaps

- 4.3.1 The above policy identifies two Strategic Gaps whereby development proposals would not be permitted where they significantly affect the integrity of the gap and the physical and visual separation of settlements or the distinctive nature of settlement characters.
- 4.3.2 Gladman consider that new development can often be located in countryside gaps without leading to the physical or visual merging of settlements, eroding the sense of separation between them or resulting in the loss of openness and character. It is important that such designations are supported by robust evidence and that the policy wording allows for sites to be considered on their individual merits. In this regard, the policy is currently worded in a negative stance which may affect the consideration of development proposals. Gladman consider that the policy should be reconsidered in a positive manner and modified to allow for a balancing exercise to be undertaken which assesses any harm to the visual or functional

separation of settlements against the benefits of the proposal rather than seeking to apply a blanket restriction on development in these areas.

4.4 Strategic Policy H1: Housing Provision

Housing Need

- 4.4.1 Strategic Policy H1 makes provision for at least 8,389 net additional dwellings across the borough during the period 2021 – 2037. Whilst Gladman acknowledge that the housing requirement is set as a minimum, Policy H1 is not considered positively prepared as it does not provide a strategy which meets housing needs in full.
- 4.4.2 The level of housing required by the standard methodology as set in NPPF2019 requires provision for a minimum of 514dpa. It should be remembered that the housing need figure calculated using the Standard Method should be considered as a starting point as it does not take into account other factors which affect demographic behaviours (e.g. affordability, economic adjustments etc).
- 4.4.3 The Council has instead decided to use the Government’s proposed housing methodology as announced in the Planning for the Future White Paper which allows LPAs to use either a percentage of the Borough’s existing housing stock as the calculation’s starting point or the most up-to-date household projections, whichever is the highest before an affordability uplift is applied. The Council has decided it is appropriate to plan for a scale of growth based on the proposed methodology which reduces the housing need figure to 403dpa.
- 4.4.4 The proposed approach is not appropriate nor justified as it will not deliver the minimum housing required by national policy using the standard method. The Council must remember that the implementation of the White Paper is still subject to the outcome of consultation and may be subject to change. In addition, it is not appropriate to delay the progress of the Local Plan until the measures announced within the White Paper come into force.
- 4.4.5 Accordingly, the Council should amend the housing requirement back to 514dpa and allocate sufficient sites across a number of locations to meet housing needs in full.

Phasing

- 4.4.6 Policy H1 outlines the Council’s intention to phase the delivery of the housing requirement over the plan period. The housing requirement is phased as follows:
- Approximately 2,250 dwellings (450dpa) between 2021/22 and 2025/26

- Approximately 2,400 dwellings (480dpa) between 2026/27 and 2030/31
- Approximately 3,750 dwellings (625dpa) between 2031/32 and 2036/2037

4.4.7 The result of this element of the policy acts to artificially suppress the delivery of development in the early years of the plan due to strategic site issues given the majority of housing supply comprises of the Welborne Garden Village. Indeed, the Council has not achieved annual delivery figures in excess of 450 dwellings since 2007-08 so it is unclear how the Council expects to achieve these delivery rates especially towards the back end of the plan period without a sufficient supply and mix of housing sites.

4.4.8 The Framework is clear in its intention to boost significantly the supply of housing. This strategy is further underlined by the buffers applied by national policy and the PPG's approach that requires local authorities to meet housing shortfall within a five year period.

4.4.9 Gladman consider that the backloading of land supply will likely threaten the overall deliverability of the Plan. Should the Council fail to deliver these higher rates towards the end of the plan period, there is little flexibility or opportunity provided to ensure the housing requirement can be met in full. The phasing approach is therefore unsound and should be deleted and replaced with a flat annual requirement of 514dpa.

Buffer

4.4.10 In principle, Gladman support the inclusion of a 15% buffer to allow for contingency for under delivery associated with the reliance on large strategic sites within the housing supply. However, the buffer does not provide any sort of contingency due to the Council's decision to reduce housing requirement to 403dpa. In reality, it merely provides a level of housing comparable to the amount of housing needed to meet the annual requirement as identified under the Standard Method. Gladman reiterate that the housing requirement should be increased to 514dpa and a buffer applied to this figure.

4.4.11 Notwithstanding the above, Gladman would suggest that given the uncertainty surrounding both the delivery of strategic scale sites and the potential for unmet need within the wider sub-region, that this contingency should be increased to 20% above the Standard Method figure to ensure housing needs are met in full. This will also reflect HBF's advice following Central Government research on this issue.

Housing Provision

4.4.12 Strategic Policy H1 makes provision for at least 8,389 net dwellings across the borough during the period 2021 – 2037 and is comprised of:

- An estimated 552 homes that already have planning permission;
- An estimated 4,858 on sites with resolutions to grant permission as of 1st July 2020, including at Welborne Garden Village;
- Approximately 1,327 homes on sites allocated in the Publication Plan;
- Approximately 428 homes on brownfield sites/regeneration areas; and
- An estimated 1,224 homes delivered through windfall development.

4.4.13 To ensure the soundness of the Plan, Gladman submit that additional housing land is needed to ensure that the Council is able to demonstrate a robust supply of housing land should any of the sites within the Council's supply slip away. This is particularly important due to the reliance on sites with resolutions to grant planning permission and the vast majority of the Council's supply comprising of the Welborne Garden Village.

4.4.14 Whilst Gladman does not wish to comment on the suitability of sites selected, the Council will need to be able to demonstrate that sites will come forward as anticipated and take account of site specific issues and/or reflects the requirements and timescales of key infrastructure to be provided by sites selected. It is imperative that these assumptions are made in collaboration with landowners/land promoters to ensure these details are up-to-date at the point of submission. In this regard, it is difficult to assess the Council's consideration of sites as the Housing Trajectory at Appendix B only provides a cursory overview of expected delivery rates over the plan period and does not provide an individual break down of anticipated delivery rates on individual sites. As such, Gladman reserves the right to provide further detailed comments at the examination should further information be made available.

4.4.15 To ensure the effectiveness of the Plan in ensuring a supply of specific deliverable sites sufficient to maintain a five year housing requirement over the course of the plan period, additional allocations are considered necessary. Indeed, the planning committee has resolved to grant outline planning permission for Welborne Garden City in October 2019 to provide up to 6,000 dwellings over the plan period and beyond. There are a number of key factors that can affect the delivery of Garden Villages, Strategic Sites and smaller scale development opportunities such as the signing of s106 agreements, reserve matters applications and improvements to infrastructure prior to development commencing, discharge of planning conditions, marketing of development and so on, all of which can affect the delivery of homes. The Council will need to avoid a continued reliance associated with the Garden Village and large scale strategic allocations over the plan period and instead allocate additional housing land to ensure a competitive and responsive supply of housing is available to support housing delivery of the Council's large strategic allocations.

4.5 Policy HP1: New Residential Development

4.5.1 Policy HP1 states residential development within the urban area boundary will be supported in principle. Residential development in locations outside of the urban area boundary will only be permitted if it involves the conversion of an existing non-residential building or it is for a replacement dwelling which is of an appropriate character to the location.

4.5.2 Gladman do not consider the above policy to be positively prepared as it is restrictive and goes against the ethos of the Framework to significantly boost the supply of housing. The policy should be amended to be flexible in accordance with the approach outlined in section 4.2 of these representations.

4.6 Policy HP2: New Small-Scale Development Outside the Urban Areas

4.6.1 The above policy states new small-scale development outside the urban area boundary, as shown on the policies map, will be permitted where a site is located within or adjacent to existing areas of housing; or well related to settlement boundary and is within reasonable proximity to high frequency public transportation.

4.6.2 In principle, Gladman support the inclusion of this policy which allows for small scale development beyond the urban area. However, we would question the decision to limit development to no more than 4 units as this is contrary to the ethos of the Framework which seeks to significantly boost housing supply. Gladman consider such a policy should be included within the draft Local Plan without any limitations on size of development to ensure the Council are able to demonstrate a strong and robust housing land supply should sites identified slip away.

4.6.3 In addition, Gladman query how a decision maker is expected to apply this policy consistently and with ease as it contradicts the approach taken in Policy HP1 and reinforces the need for Policy HP1 to be deleted and the criteria listed to be amalgamated into Policy H2.

4.7 Policy HP4: Five-Year Housing Land Supply

4.7.1 Policy HP4 outlines the Council's approach to circumstances where it cannot demonstrate a five year housing land supply, a criteria then follows. In principle, Gladman support this approach but would suggest that the policy is modified to '~~may be~~ will be permitted where they meet the following criteria' as opposed to the current use of wording.

4.7.2 Criterion (a) of the proposed policy suggests that a site needs to be relative in scale to the demonstrated shortfall in the housing land supply. A proposal which comes forward which is

considered to be sustainable and in conformity with other policies of the Local Plan should be considered to be acceptable in planning terms regardless of whether it is relative to the scale and size of the housing land supply shortfall. Gladman consider that the reference to scale should be removed in order to allow for additional flexibility in the supply of housing as it will assist the Council in ensuring that a 5 year housing land supply can be maintained going forward.

- 4.7.3 In addition, Criterion (b) states that a site should be adjacent to the existing urban settlement boundaries to be considered sustainable. This criterion is too onerous as sites which are well related to, but not directly adjacent to existing settlements could, be considered to be sustainable when assessed against policies contained in the Local Plan as a whole. Again, Criterion (b) should be amended to reflect this.

4.8 Policy HP7: Adaptable and Accessible Dwellings

- 4.8.1 Policy HP7 requires at least 15% of all new dwellings to be built to optional building regulation M4(2) and on all schemes over 100 dwellings, at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible category M4(3) standard.

- 4.8.2 In this regard, Gladman refer to the PPG which provides additional guidance on the use of these optional standards. The Council need to ensure that this policy is in line with the guidance and that the justification and specific detail of the policy take account of the various factors which the PPG refers to:

“Based on their housing needs assessment and other available datasets it will be for the local planning authorities to set out how they intend to approach the need for Requirement M4(2) (accessible and adaptable dwellings), and / or M4(3) (wheelchair user dwellings), of the Building Regulations. There is a wide range of published official statistics and factors which local planning authorities can consider and take into account, including:

- *The likely future need for older and disabled people (including wheelchair user dwellings).*
- *Size, location, type and quality of dwellings needed to meet specifically evidenced needs (for example retirement homes, sheltered homes, or care homes).*
- *The accessibility and adaptability of existing stock.*
- *How needs vary across different tenures.*

- *The overall impact of viability.*⁴

4.8.3 Gladman note that these technical standards have deliberately been set as optional standards which, if to be included as a policy in the FLP, would need to be justified by robust evidence.

4.8.4 When considering this policy, the Council need to be aware of the impact that these requirements, particularly M4(3) have on scheme viability (due in part to size requirements) and the knock-on effects that this could have on the delivery of much needed housing. In order to be able to include such requirements in the Local Plan, the Council will need to be able to robustly justify the inclusion and demonstrate that consideration has been given to this requirement within the viability study. The provision of M4(3) wheelchair user dwellings, is far more onerous in terms of size requirements; therefore, it is crucial that the implications of the proposed policy requirement have been properly tested.

4.8.5 In addition to this, with regard to M4(3) Gladman refer to the PPG which states:

“Part M of the Building Regulations sets a distinction between wheelchair accessible (a home readily useable by a wheelchair user at the point of completion) and wheelchair adaptable (a home that can be easily adapted to meet the needs of a household including wheelchair users) dwellings.

*Local plan policies for wheelchair accessible homes should be applied only to those dwellings where the local authority is responsible for allocating or nominating a person to live in that dwelling.*⁵

4.8.6 This clearly demonstrates that M4(3) should only be applied to affordable homes within the Council’s control and therefore Policy HP7 should be updated to reflect this and reference to private homes deleted.

4.8.7 Gladman submit that the Council must be able to demonstrate through robust evidence the justification for these policy requirements within the Local Plan in order for them to be found sound at examination. The NPPF footnote 46 states:

“Planning policies for housing should make use of the Government’s optional technical standards for accessible and adaptable housing, where this would address an identified need for such properties...”

⁴ PPG ID: 56-007-20150327

⁵ PPG ID: 56-009-20150327

- 4.8.8 Gladman do not consider that a general reference to an ageing population to be sufficient justification for the inclusion of these policy requirements. In this regard, Gladman refer to the Inspector’s report for the Derby Local Plan (December 2016), which at paragraph 117 states

“Although there is general evidence of an ageing population in the SHMA, having regard to the PPG this does not amount to the justification required for the LP to include the optional standards and the specific proportion of Part M4(2) dwellings...”

4.9 Policy HP9: Self and Custom Build Homes

- 4.9.1 Whilst Gladman support the inclusion of a policy in relation to self-build and custom build units, as this is in line with Government aims and objectives, we raise concerns regarding the detail within this policy.

- 4.9.2 It is expected that on sites of 40 dwellings or more (gross), 10% of the overall dwellings shall be provided through the provision of plots for self and custom build homes. Gladman welcome the flexibility provided by this policy which recognises that plots which do not sell within 12 months of initial promotion, are able to be developed for housing other than self-build homes.

- 4.9.3 However, Gladman query the evidential justification for 40 dwellings (gross) being the trigger for the provision of self-build and custom build housing. The Council’s Self Build Register only identifies 180 residents which does not translate to demand for this form of housing. Gladman consider that this policy would benefit from re-wording to state that, rather than being required on all schemes of 40 or more dwellings, that if up-to-date evidence indicates that there is a demand in the particular location then schemes are encouraged to make provision. Such a modification would help ensure that market housing is not unnecessarily delayed for a period of 12 months if there is no interest in self-build housing on individual sites.

4.10 Policy NE2: Biodiversity Net Gain

- 4.10.1 Policy NE2 requires development of one more or more dwelling or new commercial/leisure buildings to provide at least 10% net gain for biodiversity for the lifetime of the development. Gladman do not consider this policy to be positively prepared as it goes above and beyond that which is required by the NPP2019. Gladman submit that the percentage requirement should be deleted and reference to ‘biodiversity net gains’ included in the policy wording to ensure compliance with national policy.

4.11 Policy D5: Internal Space Standards

4.11.1 Policy D5 requires all new dwellings, including subdivisions and conversions to meet the nationally described space standards (NDSS) or future equivalent as a minimum.

4.11.2 In this regard Gladman refer to the Written Ministerial Statement (WMS) dated 25th March 2015 which confirms that:

“The optional new national technical standards should only be required through any new Local Plan policies if they address a clearly evidenced need, and where their impact on viability has been considered, in accordance with the NPPG”.

4.11.3 Furthermore with particular reference to the NDSS the PPG⁶ confirms:

“where a need for internal space standards is identified, local planning authorities should provide justification for requiring internal space policies”.

4.11.4 If the Council wishes to adopt this standard it should be justified by meeting the criteria set out in the PPG, including need, viability and impact on affordability.

4.11.5 The Council will need to provide robust evidence to justify the inclusion of the space standards within a policy in the Local Plan. Similarly to the accessibility standards, if it had been the Government’s intention that all properties were built to these standards then these standards would have been made mandatory rather than optional.

4.11.6 Gladman’s concerns regarding the optional national space standards relates to the additional cost and the implications for affordability. Where, for example, a housebuilder would normally build a standard 2-bedroom unit at 72sqm, the national space standards would require the dwellings to have certain dimensions which would mean they could only be built at a minimum of 79sqm, which could add significantly to the cost of the property and in turn increase the cost of an entry level 2-bedroom house, further exacerbating the affordability issues in the area.

4.11.7 The Council need to take these factors into account and will need robust evidence on both need and viability to support the proposed policy requirements outlined in Policy D5.

⁶ ID: 56-020-20150327.

5 OVERALL CONCLUSIONS

5.1.1 These representations have been drafted with reference to the revised NPPF(2019) and the updated PPG. To be found sound at examination the FLP would need to meet the tests set out in paragraph 35 of the NPPF(2019):

- **“Positively prepared** – providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework.”

5.1.2 Having considered the FLP in this context, Gladman are concerned that a number of policies contained within this plan do not accord with national policy and require modification to ensure soundness with the tests set out above.

5.1.3 Gladman believe that further flexibility and contingency is required through the FLP and that, consequently, additional non-strategic housing allocations should be included in the plan.

5.1.4 Gladman welcome this opportunity to comment on the publication draft plan and would like to be kept updated on progress moving forwards with the FLP. Gladman request to participate at the relevant hearing sessions through the examination of the FLP to discuss the matters raised in this submission further.

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

A paragraph Go to B1a

A policy Go to B1b

The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

DS2: Development in the Strategic Gaps

B1c Which part of the Policies Map?

The Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Gosport Borough Council supports:

- the extent of the Strategic Gap as shown on the latest Policies Map which now includes the land east of Newgate Lane East
- that the land east of Newgate Lane East (formerly known as HA2) is no longer identified as a housing allocation in the FLP2037
- that the FLP2037 does not include the formerly identified Strategic Growth Area in the Fareham, Gosport, Lee-on-the-Solent and Stubbington Strategic Gap

Comments continued on next page

B3 Extension:

Gosport Borough Council had previously objected to major development proposals in the long-established Strategic Gap between the settlements of Fareham, Gosport, Lee-on-the-Solent and Stubbington including land east of Newgate Lane East (known as HA2) and the potential for a larger scale Strategic Growth Area.

Key reasons for objections included :

- The proposal would physically and visually diminish the long-established Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington;
- The proposals would negate the benefits being provided by the new improvements to Newgate Lane and the Stubbington Bypass with a negative impact on traffic flow and increased congestion to the detriment of Gosport residents and the local economy including accessibility to the Solent Enterprise Zone at Daedalus;
- The proposal would significantly harm the amenities of local Gosport residents with the introduction of new access points to existing residential areas, which due to the scale of the proposal would potentially lead to a significant increase of traffic on residential roads;
- The proposal, as described, would be very car dependent with no provision for public transport. This would increase the amount of trips using Newgate Lane and exacerbate existing congestion and air quality issues;
- There is insufficient information on supporting infrastructure required including education, medical and community facilities;

The Council therefore strongly fully supports Fareham Borough Council's position on this matter in the Publication Draft (Regulation 19) version of the Fareham Local Plan.

It is however recognised that reverting to the original and current position of protecting the Strategic Gap will lead to a number of other objections from landowners and developers. Consequently to assist the Inspector with understanding Gosport Borough Council's position on the need to protect the Strategic Gap the Council has attached its three previous representations to the previous Regulation 18 consultations (listed below)(Appendix 1a, 1b and 1c respectively):

- The Consultation Draft Fareham Local Plan (DFLP) which was reported to the Regulatory Board on 6th December 2017
- The Fareham Borough Local Plan 2036: Issues and Options which was reported to the Regulatory Board on 25th July 2019
- The Fareham Borough Local Plan 2036: Supplement which was reported to the Regulatory Board on 28th February 2020

The objection to the third consultation (Feb 2020) covers all the Council's objections to the proposed development in the Strategic Gap. This includes the Council's original objection to the Newgate Lane allocation (HA2), which whilst was not subject to the third consultation the Council considered that it was necessary to append our comments in order that our concerns for the whole Strategic Gap could be read together.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

No modifications required for this particular matter

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

N/A

B4c Your suggested revised wording of any policy or text:

N/A

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Gosport Borough Council supports Fareham Borough Council's position. However the Council is prepared to attend any session regarding the future of the Strategic Gap between Fareham, Gosport, Lee-on-the-Solent and Stubbington if the Inspector considers it will assist the examination.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Lee Residents Planning

Sent from [Mail](#) for Windows 10

Comments to Fareham Borough Council's Publication Local Plan 2037

1. The Lee Residents Association (LRA) is broadly content with Fareham Borough Council's Publication Local Plan 2037, with a reservation outlined in paragraph 3. In particular we offer support for the changes that:
 - the land east of the relief road Newgate Lane East (formerly designated HA2) is no longer identified as a housing allocation
 - the removal of an identified Strategic Growth Area situated in the Fareham, Gosport, Lee on the Solent and Stubbington Strategic/Settlement Gap (Strategic Policy DS2)
2. The LRA also fully endorse the submission made by Gosport Borough Council drawn up in its capacity as an adjoining Local Planning Authority.
3. While broadly content as expressed in paragraph 1, the LRA has remaining concerns over the link in Policy DS1 to Housing Policy 4. We object to the wording in HP4c which is related to the 5-year housing supply requirement which has a contingency should the additional housing requirement extend beyond the capacity of brownfield and already identified development sites. The objection is that any further encroachment on the Fareham, Gosport, Lee on the Solent and Stubbington Strategic/Settlement Gap (Strategic Policy DS2) will be detrimental and significant. Despite the caveat that the development ***"is sensitively designed reflecting the landscape character with the proviso it does not significantly affect the integrity of a strategic gap"***.

If further housing is needed this should be provided within urban areas or the planned Welborne development.
4. Similarly, we would also object to any other development detailed in HP6 such as Affordable Housing being placed within the Strategic Gap. As identified previously any development, affordable or prestigious will still be counter to policy DS2 particularly if a series of large-scale affordable housing developments were authorised under this policy relaxation.
5. The LRA have consistently maintained objections to policies in other versions of the Local Plan and to recent speculative Planning Applications proposed by developers within the Strategic/Settlement Gap.
6. In summary, the objections are due to the detrimental impact it will have on Local Infrastructure, the economy of the Solent Enterprise Zone as well as Gosport Borough Council. It would negate any improvements to the local roads currently being provided to alleviate existing traffic congestion. In particular it would lower the quality of life for all residents that live south of the Strategic/Settlement Gap by exacerbating the existing transportation problem and adding further unavoidable pollution to the Air Quality Management areas.

We would like this communication to be presented to the Planning Inspectorate.

Follow Up Flag: Follow up
Flag Status: Flagged

For Fareham Planning Department.

I must first recognise how much thought and work has gone into the Plan, and it reads well. Congratulations to the authors, who know their subject in such detail. Most of it I agree with, without reading every word, but comments have been invited.

Strategic Priorities. Para 2.21 (5). I think a vibrant future for the town centre might be positive with increased housing, ie FTC1, FTC2 and FTC6, but all these developments remove some existing parking space, or add to a car parking problem. If there is no new parking, where will out of town shoppers park their cars? Perhaps hidden within the text is an assumption that FBC can do nothing to halt changes to the retail trade: from increased IT shopping, click and collect, and the demise or closure of retail chains and local businesses. This was happening before the Covid19 outbreak, but has become much worse. So will people come from outlying communities like Stubbington, as they will not be able to buy what they want in Fareham anyway. I believe FBC will have to consider lowering business rates to counter balance lower footfall, or give help with high rents to encourage more local shops and businesses. Maybe entertainment options might bring some life to the centre. Whiteley is the main shopping centre for Fareham now, which unfortunately comes under Winchester. I would suggest that para 2.21 needs greater vision if the town centre is to survive, albeit in a different form than today.

Strategic Gap. Para 3.9 and 3.10. Para 3.9 reads positively, but 3.10 says 'a redefinition' does not preserve the size or shape of the existing. This is reinforced when read in conjunction with para 3.44 'spatial definition tightened', and 'redrawing boundaries' in para 3.46. I fear for the future of Strategic Gaps when referring back to Strategic Growth Areas in para 3.20: are these potential new SGAs, or a yet again redefinition of Strategic Gaps? My confidence in the existing SGs being retained is seriously diminished, and these conflicting phrases do not create trust in the FBC future decision making on this topic.

On this same topic of the boundaries of the Meon SG, I would greatly appreciate having or seeing a map of the Meon SG area, as my house backs on to open fields looking west to the river. This would help me to comment on any future development submission which involves land on the east side of the river along Old St and further north to Titchfield Road. Thank you.

Housing Allocation Policy HA3. What will happen to the existing business within this development outline?

Housing Allocation Policy HA41. I read this with interest, as it is local to me. A very interesting development, original thinking. But where will the residents park their cars without denying existing shoppers? And how will they be able to recharge batteries as there is no parking at the back of the existing building?

Employment. Two development sites are on Solent airfield, and the third at Whiteley. None of these is served by any form of public transport, so private transport will be essential. Does this fit with climate change? Or is it assumed e-vehicles of one sort or another will be commonplace after 2037? But in the meantime? Any thought about discussing new or revised bus routes with the bus companies?

Air Quality and Transport. Reading these as a current and topical issue worldwide, the policies read well, yet I feel quite strongly that there is something the FBC can do (other than address the issue for future planning applications) to reduce existing levels of pollution. Why not plan for the Strategic Gap between Fareham and Stubbington/Hill Head/Lee to be heavily planted with trees in the spaces between the new by-pass and existing dwellings to lower Co2 levels? This would help the environment, nature, keep communities separate, provide recreation space for good mental health, and improve air quality, all in the one exercise. More trees throughout the borough is already being studied, I understand. Central government will set the pace for reducing fossil fuel emissions, phasing out petrol and diesel. I feel the cost of e-vehicles will be prohibitive compared with existing cars, so the number of vehicles may fall. This will drive the need for better public transport. Locally, this should be a much better bus service, not just a

trunk route service as we have today in Stubbington. But I doubt that any bus service could meet the needs of the elderly, handicapped, young and old, and be available throughout the day, or be affordable. Nevertheless I would like to have found more sense of action or need in words on this under either of these two headings, and also something about car charging ports in the Housing Policy section. FBC has to lead on this last point, I believe.

Having struggled to page 244, I'm done for. But again, a very exhaustive Plan with many specialisations, and an eye opener for the uninitiated, which is me!

Thank you for your patience in reading this.

APPENDICES:

APPENDIX 1:	LANDSCAPE EVIDENCE
-------------	--------------------

1.0 Introduction / Details

- 1.1** The following representations are made by Pegasus Group on behalf of our clients Bargate Homes Ltd and Sustainable Land. Our clients have interests in an area of land between Newgate Lane and Newgate Lane East (the new relief road) in Peel Common. Applications for outline planning permission (refs. P/18/1118/OA and P/19/0460/OA) have been made at 'Land at Newgate Lane' which together will provide for the development of up to 190 homes. Both applications are currently the subject of undetermined appeals.
- 1.2** Representations have been made in respect of the sites in response to the Regulation 18 consultation on the original version of the draft Local Plan in December 2017, and again in July 2019 and in February 2020 on subsequent consultations for the new Local Plan. The site continues to be promoted through the Local Plan process as it represents a sustainable and deliverable option to deliver much needed housing in this authority.
- 1.3** Our clients are important stakeholders within Fareham and are keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF).
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. The exceptions are questions A (1,2 & 3) and B5 (parts a & b) where a single response at the beginning and end of the representations is provided, respectively. This is because these responses are common to all questions and our representations.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.2 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

2.3 The NPPF (paragraph 33) states that plans should be reviewed every 5 years and updated as necessary. Previously the local planning authority indicated that this local plan review would amalgamate the adopted Local Plan Parts 1, 2 and 3 into a single new plan. Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. Recently, serious doubts have been expressed over whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. Certainly, the development is not currently "deliverable" in NPPF terms.

Taking all of this into account, the Welborne Plan should be reviewed, which it has not (PLP paragraph 4.9). It is also clear that at this stage the Council suggests that it is not intending to review the Welbourne Plan (Local Development Scheme (LDS), paragraph 1.5). Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

2.4 Include a review of the Welborne Plan in this Local Plan review.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.5 Compliance with the NPPF requirement to review plans and provide an up to date framework to ensure housing delivery.

B4c Your suggested revised wording of any policy or text

2.6 Not applicable.

3.0 Strategic Policy DS2: Development in Strategic Gaps

B1 Which part of the Local Plan is this representation about?

3.1 The following comments relate to the Policy DS2, the supporting text and the inclusion of our clients' land between Newgate Lane and Newgate Lane East (the new relief road) in Peel Common within this designation.

B2 Do you think the Publication Local Plan is:

Legally compliant – N/A

Sound - No

Complies with the duty to co-operate – N/A

3.2 The Fareham Local Plan is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

3.3 The PLP, paragraph 3.43, identifies that the:

"...primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities."

3.4 The proposed policy seeks to strengthen the current Core Strategy policy position, contained within Policy CS22 with regards to preventing settlement coalescence. It is stated in the PLP this has been undertaken in response to the NPPF and recent planning decisions (paragraph 3.44). The Council's evidence in relation to this policy is contained within the September 2020 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' document. Chapter 2, section 4.2, seeks to apply the NPPF to this policy.

3.5 The interpretation of the NPPF in this section is selective and as such misleading. For example in referencing paragraph 20 of the NPPF it states:

"Strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for... conservation and enhancement of the natural, built and historic environment, including landscapes."

3.6 This fails to recognise that strategic policies should also set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for housing (including affordable housing), employment, retail, leisure and other commercial development. The Council's evidence also refers to paragraph 170 of the NPPF noting:

"planning policies and decisions should contribute to and enhance the natural and local environment by... protecting and enhancing valued landscapes... (in a manner commensurate with their statutory status or identified quality in the development plan)".

3.7 It must, however, be recognised that the strategic gaps do not have any statutory status therefore shouldn't be unduly restrictive. A tightening of restrictions would be contrary to the NPPF. The policy does identify that development can be accommodated within the Strategic Gap. Indeed, the previous iteration of the plan identified site HA2 and Strategic Growth Areas within the Fareham – Stubbington Strategic Gap. Thus, suggesting that development in the gap is not prohibitive per se.

3.8 Within our representations on the draft Local Plan Supplement we argued the evidence base lacks robustness and has been applied without justification. The updated evidence does not overcome these concerns. Our clients site is situated within parcel 8c of the updated evidence. The study suggests that despite the proximity of Fareham and Gosport in the north part, the gap is currently still effective in providing a 'sense of separation', but it is at risk. It is further noted at point 15 that:

"Whilst the recently completed Newgate Lane South road development does not alter the experience of entering the urban area of Gosport beyond the Peel Common Roundabout, it does reduce tranquillity and bring more built features

(such as noise attenuation barriers) into this part of the gap.”

3.9 Despite this significant development, the ‘Technical Review of Areas of Special Landscape Quality and Strategic Gaps’ simply re-iterates previous conclusions from earlier analysis undertaken by LDA and described in the Fareham Borough Landscape Character Assessment, 2017. There is no consideration as to how the development of Newgate Lane South has altered the area. Clearly, the new highway has added a substantial urbanising influence upon the gap, this should be assessed. The blanket approach taken within the policy does not recognise these substantial changes.

3.10 Within our client’s appeal evidence in relation to applications P/18/1118/OA and P/19/0460/OA we provide evidence in relation to landscape and visual matters. This evidence takes full consideration of the strategic gap and identifies that Peel Common is not well defined as a coherent area of settlement character due to the fact the settlement appears to be based on the progression of wayside and ribbon development since the early twentieth century. It also notes that the amenity value of the area has altered since the completion of Newgate Lane East. It was concluded that this parcel makes a limited contribution to the wider context of the strategic gap.

3.11 The protection of the Strategic Gap is currently governed by policy CS22 of the Core Strategy, which does not permit development where it significantly affects the integrity of the gap. The policy provides a useful starting point for considering the purpose of strategic gaps. It states:

3.12 *“Their boundaries will be reviewed in accordance with the following criteria:*

- a) The open nature/sense of separation between settlements cannot be retained by other policy designations;*
- b) The land to be included within the gap performs an important role in defining the settlement character of the area and separating settlements at risk of coalescence;*
- c) In defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation.”*

3.13 Taking each of these key criteria in turn:

Openness and sense separation

3.14 Although the proposed development site is a greenfield site within the countryside, it would not represent isolated development. The site is located to the west of the settlement of Bridgemarky. The development will become a cohesive part of the Bridgemarky neighbourhood through the provision of key pedestrian links and local facilities (open space and children's play areas) for the benefit of the wider community.

3.15 The site is bounded by Newgate Lane East to the east. To the west it is bounded by Newgate Lane, which is the focus of ribbon development, and beyond this the Peel Common Waste Water Treatment Works and solar farm. If the site is not developed, then it will be an open pocket of land between the two roads within an otherwise urbanized landscape, which in our view is of inherently less value in terms of its contribution to the strategic gap.

3.16 It is notable that the Council's evidence 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' identifies the Peel Common Waste Water Treatment Works to provide a strong physical and visual gap between Gosport and Stubbington (Area 8b), and to a lesser extent so does the Solar Farm. This physical and visual gap would not be affected by development on our clients' sites.

3.17 The Council's evidence also identifies that a Green Infrastructure (GI) Strategy or Framework would be beneficial to enhance the GI value of the current gap and potentially help determine an appropriate GI framework for moderately scaled development. Our clients' proposals would enhance the provision of GI through the provision of on-site open space and pedestrian linkages. It should be noted that due to the site being within private ownership there is currently no public right of way connectivity, such that it has no real functional value as GI other than its contribution to a wider landscape setting.

3.18 As such, although the development of the site would necessarily have an urbanizing effect on the existing open land, good growth could be achieved without compromising the gap between the existing urban edge of Fareham/Bridgemarky and Stubbington.

Defining the Settlement Character and Preventing Coalescence

- 3.19** The character of the site and surrounding area is defined by both the natural and built environment, having regard to the landscape setting in which it sits.
- 3.20** The development of the site, by extending the boundary of the Fareham/Gosport built-up area would not have the effect of coalescence with Stubbington. The settlement character of Bridgemary is distinct from that of Stubbington. Whilst both are characterized by large areas of low-rise, medium-density development from the late-20th century (and in the case of Bridgemary also from the pre-war era), the development of Bridgemary as a suburban extension of Fareham/Gosport lends it a different character compared with Stubbington's growth as a distinct village with a more extensive local centre.
- 3.21** The remaining Strategic Gap will still achieve a 'green' gap between the two settlements such that the distinct identities of the two settlements are reinforced by their physical and visual separation.

Extent of Gap Required

- 3.22** Most obviously, the development of the Land at Newgate Lane would retain a 'green' gap between the two settlements. The extent of this gap remaining is sufficient to prevent coalescence in line with the policy consideration in Core Strategy Policy 22.
- 3.23** This green gap will also help to retain the physical and visual separation of the settlements, an effect which will be further enhanced by the introduction of the Stubbington By-Pass which will serve to sever them further. The location of Land at Newgate Lane is not within the 'pinch point' between Fareham and Stubbington. Further north, the Strategic Gap between the two settlements narrows, and an extension to Fareham in this location would reduce the gap to a much greater degree or eliminate it. This makes Land at Newgate Lane a preferable development location than sites north of Peel Common/West of Fareham in terms of impact on coalescence.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

3.24 The policy and proposals map should be amended to either exclude our client's site from the strategic gap or it should be identified as a location which could accommodate sensitive development.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

3.25 It would be justified by the evidence and would assist the Council in achieving an appropriate housing requirement.

B4c Your suggested revised wording of any policy or text

3.26 See response to B4a above.

4.0 Policy H1: Housing Provision (including supporting text)

B1 Which part of the Local Plan is this representation about?

4.1 Policy H1: Housing Provision and all supporting text.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

4.2 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective, positively prepared or justified.

B3 Please provide details you have to support your answers above.

4.3 The PLP has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in the "Changes to the Current Planning System"; but instead has published a revised approach to the standard method, which retains the method in its current form except for London and 19 of the most populated cities and urban centres.

4.4 The key change is to apply a 35% uplift to the standard method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

- 4.5** The National Planning Policy Framework (NPPF) states (paragraph 16 a) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on a consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 4.6** The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives.
- 4.7** The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the extant local housing need target is 514 homes per annum (hpa). Instead, the PLP plans for 403hpa, thereby failing to plan for the area's objectively assessed need and failing to contribute to the achievement of sustainable development.
- 4.8** The PPG (ID 2a-003-20190220) is clear that the current standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).

-
- 4.9** As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current standard method must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 4.10** The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure. However, given that there is no change for Fareham this is irrelevant.. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on a figure of 403hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.
- 4.11** It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities, as set out in a statement of common ground, is one reason why local housing need calculated using the current standard should be exceeded.
- 4.12** Paragraph 4.4 of the PLP states that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". However, in response, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. This produces an overall plan requirement of 7,295 dwellings, equivalent to 456hpa. The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "*...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution.*" It is not clear how this "general contribution" has been calculated but it appears inadequate.

4.13 Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no statements of common ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather, the Council speculates that this contribution would be “ratified” by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented suggests a higher requirement of 1,000 dwellings from a single authority.

4.14 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, which fundamentally means that the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4.15 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification.

Phased Provision

4.16 In addition to the issues with the overall requirement, Policy H1 also seeks to identify a ‘phased’ requirement. The overall supply is at least 8,389 dwellings this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required. Policy H1 seeks to ‘phase’ this supply identifying the following:

- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
- Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,
- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

4.17 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

4.18 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

4.19 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now and to do otherwise is not justified or effective.

Housing Supply

4.20 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27

junction 10.

4.21 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4-years¹. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

4.22 Our client's sites, SHLAA references 3129 and 3161, should be considered for allocation. Both sites are sustainable being well located in terms of accessibility to services, facilities and employment. They also have good access to public transport opportunities. Furthermore, whilst the sites are located within the Fareham – Stubbington Gap, there are no unsurmountable specific statutory or non-statutory landscape related planning designations.

4.23 The SHLAA identifies that both sites are discounted because:

"Development in this location would not be in keeping with the settlement pattern and would change the settlement character of Peel Common. The site is therefore considered unsuitable for residential development."

4.24 Our clients fundamentally disagree with these points. This is discussed in greater detail within our response to Policy DS2 above. However, in summary the sites are well located in relation to the settlement of Bridgemary and our evidence identifies that development in this location would have a limited impact due to the recent completion of the Newgate Lane East site. The proposals could also enhance the strategic gap through the provision of appropriate Green Infrastructure.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

4.25 The following amendments are necessary to ensure that the plan is legally compliant and sound.

¹ APP/A1720/W/19/3230015

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Undertake SA of all reasonable alternative housing requirements.
5. Provide a housing requirement which is not phased and meets needs now.
6. Provide additional allocations, including our clients, which can deliver in the short-term.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 4.26** Compliance with the NPPF requirement for the housing requirement to be based upon current local housing need standard method as a minimum. To comply with relevant legal and procedural requirements.

B4c Your suggested revised wording of any policy or text

- 4.27** Not applicable, as this will be dependent upon the outcome of the work identified in response to question B3.

5.0 Policy HP4: Five-Year Housing Land Supply

B1 Which part of the Local Plan is this representation about?

5.1 The following comments relate to Policy HP4 and all supporting text.

B2 Do you think the Publication Local Plan is:

Legally compliant – N/A

Sound - No

Complies with the duty to co-operate – N/A

5.2 The Fareham Local Plan is unsound as it is not effective or justified.

B3 Please provide details you have to support your answers above.

5.3 Whilst the principle of the policy is supported the current wording is considered contrary to its stated purpose. The supporting text identifies that this policy is required to provide flexibility if a five-year housing land supply cannot be demonstrated. However, in accordance with the NPPF, paragraph 11d, in such cases the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply.

5.4 It is therefore not justified to seek to apply additional requirements upon developments should a five-year supply not be demonstrable. For example, the requirement for the scale of the site to be relative to the shortfall is not only unclear but could be prohibitive of sustainable sites being brought forward. Furthermore, many of the criteria are replicated from other policies and as such are superfluous.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

5.5 A more positive policy is justified. Parts a, c, d and e should be deleted to avoid repetition and conflict with the NPPF.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

5.6 See above.

B4c Your suggested revised wording of any policy or text

5.7 See above.

6.0 Participation at the examination hearing sessions

B5a If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

6.1 Yes, I want to take part in the hearing sessions.

B5b Please outline why you consider it necessary to take part in the hearing session(s):

6.2 There are several detailed and complex points made within our representations which would benefit from further debate and consideration. It is also important that our clients can respond orally to hearing statements made by the Council and other participants to ensure that the Inspector has a full understanding of our case.

APPENDIX FL&HB 1.2.3	Extract from the 'Technical Review of AoSLQ and Strategic Gaps'
APPENDIX FL&BH 1.2.4	Landscape Analysis of the Strategic Gap

1. INTRODUCTION

Qualifications and Experience

- 1.1. My name is James Atkin. I hold the position of Director (Landscape) in the Birmingham Office of the Pegasus Group. The Company undertakes all aspects of planning, urban and landscape design and environmental planning. I have a Bachelor of Science Degree in Landscape Design and Plant Science and a Diploma in Landscape Management, both from the University of Sheffield. I am also a Chartered Member of the Landscape Institute (2005).
- 1.2. I have over 19 years professional experience specialising in the application of landscape and visual assessment and the use of best practice guidance. I have authored landscape and visual impact appraisals, assessments and evidence, both in the UK and in the international context.
- 1.3. Prior to joining the Pegasus Group I have worked in multidisciplinary consultancies, including Wardell Armstrong LLP and Atkins, advising on landscape and visual matters across a range of sectors including power, highways, rail, housing, waste, land reclamation and restoration, mineral extraction, commercial developments and renewable energy.
- 1.4. Since joining the Pegasus Group I have completed a number of detailed LVIA's for sites across the UK, including residential development and mixed use development schemes, care home developments, solar installations and commercial development. As an inherent part of this work I apply an iterative process of landscape and visual appraisal and assessment to inform masterplanning principles which avoid or respond to landscape and visual constraints and opportunities.
- 1.5. In this context I have produced technical documents on landscape and visual matters for use in the emerging design process, for planning applications and at appeal. I am currently involved in a variety of projects for mixed use and residential masterplans, of varying scales between 10 and 1000 units, in both urban and urban fringe environments, where matters of sensitive and designated landscapes are key considerations. The diversity of these different project types has enabled me to develop a strong understanding as to how different landscapes can respond to different types of development.

Terms of Reference

- 1.6. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 1.7. The outline application for 'Land at Newgate Lane (North) (Fareham Land LP; LPA ref. P/18/1118/OA) sought permission for:
- The demolition of existing buildings and development of up to 75 dwellings, open space, vehicular access point from Newgate Lane and associated and ancillary infrastructure, with all matters except access to be reserved.
- 1.8. The outline application for 'Land at Newgate Lane (South) (Bargate Homes Limited; LPA ref. P/19/0460/OA) sought permission for:
- The demolition of existing buildings and development of up to 115 dwellings, open space, vehicular access point from Newgate Lane and associated and ancillary infrastructure, with all matters except access to be reserved.
- 1.9. These are referred to as the 'northern' site and the 'southern' site respectively.
- 1.10. Whilst the two sites are subject of separate applications, it is important to note that the proposals have always been conceived as a cohesive development, together addressing the constraints and opportunities in respect of the local landscape context and providing a cohesive and complementary strategy for development and mitigation.
- 1.11. The evidence presented herein applies to both appeals, unless specifically stated otherwise.
- 1.12. Each application was supported by a Landscape and Visual Impact Assessment (LVIA), prepared by Pegasus Group on behalf of the appellants. Reference is made to the content and findings of these where relevant, supplemented by additional professional judgement as necessary.

Evidence Structure

- 1.13. The evidence is structured as follows, including this introduction (section 1):
- At section 2, I give a brief description of the appeal sites in their context, and the appeal scheme, including an analysis of constraints and opportunities and development potential (based on my own observations and judgement);
 - At section 3, I present a brief background to the appeal, including a summary of the Council's reasons for refusal where these are relevant to landscape and visual matters;
 - At section 4, I address the key issues in the reason for refusal in respect of landscape and visual matters, and present additional analysis of these;
 - At section 5, I address policies relevant to landscape and visual matters; and
 - At section 6, I provide a summary and conclusions.
- 1.14. Principles and good practice for undertaking landscape and visual impact assessment (LVIA) and/or applying the principles of LVIA are set out in the Landscape Institute (LI) and the Institute of Environmental Management (IEMA) Guidelines for Landscape and Visual Impact Assessment, Third Edition (2013)¹ (GLVIA3). The concepts and procedures set out in this guidance have been adopted where appropriate.
- 1.15. The professional judgements which are presented in this evidence for this appeal (reference LPA reference P/18/1118/OA and P/19/0460/OA) have been prepared in accordance with the guidance of my professional institution. I confirm that the opinions expressed are my true and professional opinions.

¹ Landscape Institute and Institute of Environmental Management and Assessment, Guidelines for Landscape and Visual Impact Assessment 3rd Edition (April, 2013)

2. THE APPEAL SITES

2.1. This section sets out an overview of the appeal sites and their context.

Overview

- 2.2. Together, the appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham and Gosport and within a discreet parcel of land that is bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east (with Newgate Lane and Newgate Lane East framing the northern edge of the sites also).
- 2.3. Hambrook Lodge (accessed from the west, off Newgate Lane) Lodge and its curtilage is located between the two sites, but the property (and the access to the property) is not included in the red line boundary for the sites.
- 2.4. The appeal sites are located outside the defined settlement boundary identified in the Local Plan policies map, in a 'Strategic Gap' known as the Fareham/Gosport to Stubbington/Lee on Solent Gap (or simply the Fareham - Stubbington Gap).
- 2.5. They are not subject to specific statutory or non-statutory landscape related planning designations.

Description and Context

- 2.6. The sites are located between Fareham and Gosport, adjacent to the suburbs of Woodcot and Bridgemary which are located to the east and adjacent to Peel Common which is located to the west.
- 2.7. The northern site comprises three enclosures, the largest of which is currently in arable production, the smaller two are in pastoral use. These cover an area that surrounds the northern extent of Hambrook Lodge which itself includes a number of related buildings (some dilapidated) and is generally enclosed by mature vegetation.
- 2.8. The southern site comprises four mixed use agricultural enclosures, the fields to the east are currently in arable production, whilst the field to the west, adjacent to Peel Common and Newgate Lane are in use as pastoral and equestrian paddocks. A small watercourse and drainage ditch bisects the southern site and reinforces the differentiation between the land uses of the eastern and western areas.

- 2.9. Newgate Lane is located immediately to the west of the sites and forms a connection with the southern edge of Fareham and, further south Gosport Road (noting that this is closed to traffic but retains a link for pedestrians and cyclists). Immediately to the east is the route of the new relief road, Newgate Lane East. Newgate Lane East is accessed from Newgate Lane by a T-junction, situated just north of the northern parcel.
- 2.10. The wider landscape context is set within the low-lying ground of the coastal plain landscapes and characterised by abrupt transitions between the open landscapes of the coastal plain and the urban environments which abut these. These urban areas include Fareham, Gosport and Woodcot and Bridgemary to the north and east. The settlement area of Stubbington, a medium scale, predominantly residential area is located to the west. The settlement edge of Stubbington forms the western extent of the Fareham to Stubbington strategic gap. In this context the strategic gap comprises an area of open landscape that extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.

Recent Landscape Change

- 2.11. The LVIA reports submitted in support of the planning applications were prepared and finalised in late 2018. These included reference to the published landscape character study for the Borough (The Fareham Landscape Assessment, 2017) which was prepared by LUC on behalf of Fareham Borough Council (FBC) and forms part of the evidence base to the current Local Plan.
- 2.12. The appeal sites are located in an area defined by the LUC study as 'LCA 8, Woodcot-Alver Valley' (including sub areas 08.1a and 08.2b). In relation to 'LCA 8, Woodcot-Alver Valley', the LUC study acknowledges the emerging proposals of the Fareham bypass (Newgate Lane East) and potential strategic housing development on the edge of Woodcot/Bridgemary (parcel HA2) and the landscape change that these may bring.
- 2.13. Since the publication of the LUC study (and submission of the Pegasus Group LVIA work) the proposals for Newgate Lane East have been constructed and the route has been open to traffic since April 2018; the majority of landscape works were completed in the 2018/19 season.
- 2.14. Although both the LUC study and the assessment of impacts undertaken in the submitted Pegasus Group LVIA make reference to the potential bypass and how it will

influence the local landscape, there is now scope to consider the actual and current baseline situation.

3. BACKGROUND TO THE APPEAL

3.1. The background to the proposal is set out in full, in the main Statement of Case, prepared by Pegasus Group on behalf of the appellant. This section provides a brief overview of the background relevant to landscape and visual matters.

Application

3.2. The applications were submitted in September 2018 (north) and April 2019 (south), with each supported by a separate Landscape and Visual Impact Assessment, prepared by Pegasus Group (**CDA.48** and **CDA.106**).

3.3. In respect of both appeal sites, landscape and visual matters formed part of an iterative design process that guided the evolution of the masterplans and integration of mitigation measures into the schemes.

3.4. For both sites, the submitted LVIA work demonstrated a limited effect on landscape character, whereby impacts are restricted to a local level.

3.5. The work also demonstrated that the proposed developments would not detract from the function of the wider strategic gap, both due to the inherent character of the landscape itself, and also due to the physical and visual separation that is present between the sites and the more obvious and open part of the strategic gap between Peel Common and the eastern edge of Stubbington.

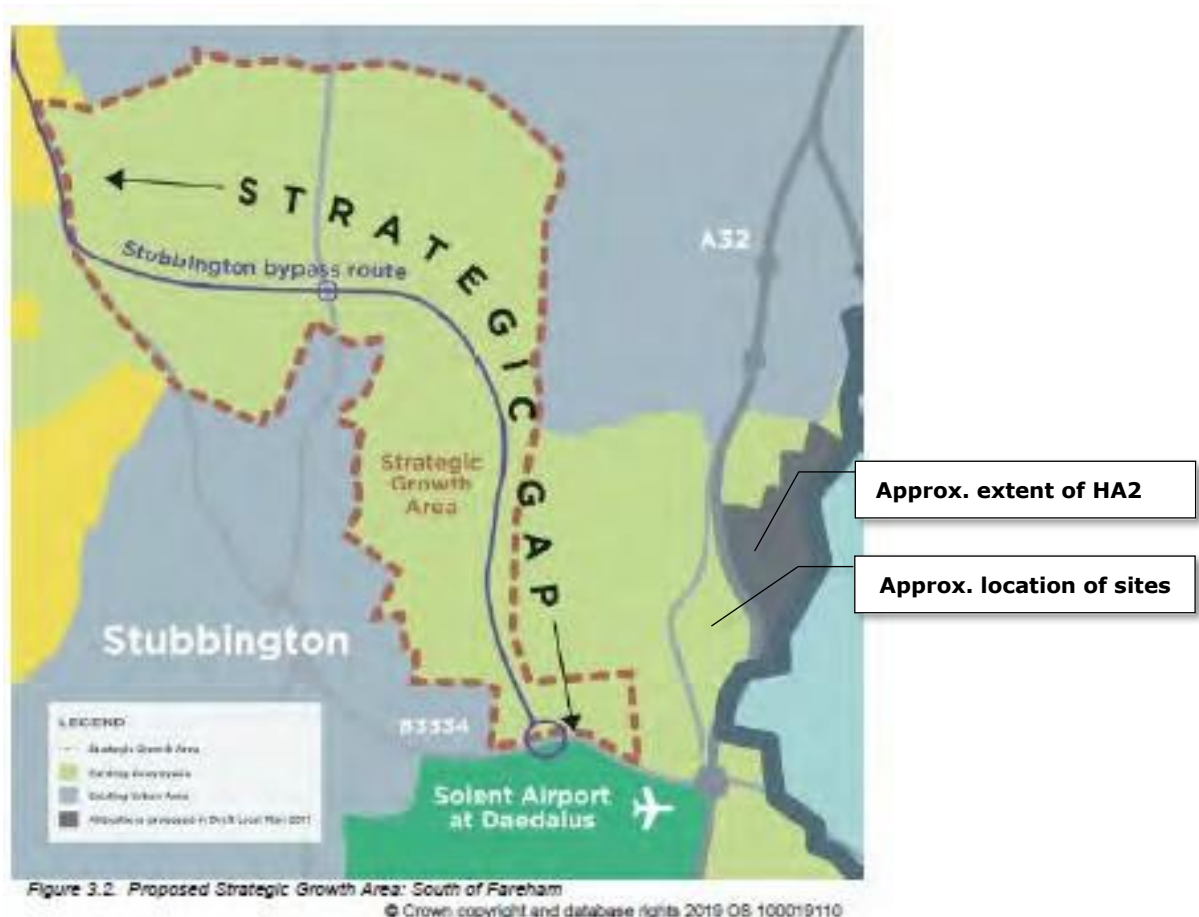

3.6. For views and visual amenity, the submitted LVIA work also demonstrated that the sites (and proposed developments) would be generally screened by existing development and existing mature vegetation, the influence of both being augmented by the low lying and relatively flat nature of the landform. Prominent views of the sites would only be available from its immediate context along Newgate Lane and Woodcote Lane with the greatest degree of visual effect from locations immediately adjacent to the sites, and from a small number of existing individual residential properties, again, located close to (or adjacent to) the site. Together, and in the balance of landscaped and visual matters overall, these impacts and effects are were not considered significant in landscape and visual terms.

3.7. During the process of the application, further design changes have occurred; these either maintain or improve the proposed mitigation which forms an inherent part of the schemes.

Further Landscape and Visual Studies

- 3.8. Since the submission of the planning applications, the LPA has continued with the development and review of the Local Plan.
- 3.9. In previous iterations, notwithstanding the continued adoption of 'Strategic Gap' policies in this part of the Borough, the emerging local plan proposals had identified a 'Strategic Growth Area' situated across the landscape between Stubbington and Fareham, overlapping with a large part of the retained Strategic Gap. This had also indicated the inclusion of a housing allocation (HA2) on the southern edge of Fareham.

Plate 1: Extract from Fareham Draft Local Plan 2036 Supplement

- 3.10. In that previous iteration, the boundary of the Strategic Gap had been drawn to extend up to the settlement edge of Bridgemary (whilst incorporating the proposed housing allocation of HA2 and the recently constructed New Newgate Lane). In contrast, the Strategic Growth Area had been drawn to an eastern limit up to the existing waste water treatment works and the solar farm that are present to the south-west of the edge of

Fareham, noting that the extent of that boundary would exclude both appeal sites and exclude the emerging HA2 allocation.

- 3.11. Notwithstanding that the Fareham Landscape Assessment (LUC, 2017) forms part of the evidence base for the policy proposals, it was necessary to address the purpose and function of the gap and the proposed area of strategic growth.
- 3.12. In order to address this issue, Pegasus Group undertook a strategic level study of the Fareham-Stubbington Strategic Gap, including the area up to the Gosport boundary (**CDA.54**).
- 3.13. The aim of that study was to identify the core areas of Strategic Gap which were considered more fundamental to the function of the Strategic Gap in terms of preventing coalescence between settlements and maintaining of settlement identities. The study identified 'Priority Areas' that should be maintained as Strategic Gap, with areas outside of these considered further for growth.
- 3.14. The study concluded that areas on the northern and western edges of Stubbington and at Fareham (along Longfield Avenue and between Peel Common and Woodcot/Bridgemary) can accommodate growth and that development in these areas would not fundamentally undermine the physical separation, nor the sense of separation between Stubbington and Fareham.
- 3.15. During the course of the appeal FBC continued to progress their Local Plan. The evidence base to the latest draft Local Plan 2036 included a 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' (2020) undertaken by Hampshire County Council on behalf of FBC (**CDG.7**). The content and findings of this study are considered later in my evidence.

Consultation Responses

- 3.16. A summary of the main relevant consultation responses to the application are set out in the following section.

Urban Design, Fareham Borough Council

- 3.17. The response from FBC on landscape and visual matters was prepared by the Urban Design officer (4th February 2019) (**CDB.5a**). These comments were limited to the northern site and broadly suggested that the proposed development would have an

'unacceptable negative impact upon the integrity of the existing open, predominantly rural agricultural character', of the landscape'.

- 3.18. However, it was felt that the conclusions of the consultation response did not sufficiently consider the (then) emerging baseline of Newgate Lane East and potential strategic development site (HA2), consequently the response overemphasised the degree of impact arising from the scheme.
- 3.19. In this context Pegasus Group prepared a comprehensive response to address the points raised (refer to **CDA.41**).
- 3.20. In a separate, later, response, the Urban Design officer requested that the layout be reworked to make a 'less formal block structure' (**CDB.5b**). These comments were addressed in revisions to the LVIA and ILMP, which were resubmitted as LVIA Rev D (**CDA.48**).

Principal Tree Officer, Fareham Borough Council

- 3.21. No objection is raised in response to trees, with the tree officer noting that 'the illustrative masterplan shows the developable area with the majority of the existing field boundary trees and hedges retained and incorporated into public green space' and concluding that 'the principle of development within the area shown is broadly acceptable in arboricultural terms'.

Gosport Borough Council

- 3.22. Gosport Borough Council (GBC) have objected to the applications, noting issues of the strategic gap and green infrastructure.
- 3.23. In relation to the first point, GBC suggest that the 'scale and location will undoubtedly harm the integrity of the gap and will diminish the physical and visual separation of the settlements.
- 3.24. GBC go on to suggest that the sites would diminish the opportunities to make the 'optimum use' of green infrastructure, and particularly in providing green linkages from Fareham to the coast via the Alver Valley Country Park.

Natural England

- 3.25. The response from Natural England refers to green infrastructure provision, noting that the development is within in area that could benefit from enhanced green infrastructure provision.
- 3.26. In relation to landscape, the Natural England response notes that the proposal does not appear to be within, or within the setting of, any nationally designated landscape but also notes that proposals should complement, and where possible enhance, local distinctiveness, as guided by relevant landscape character assessment for the Borough.

Environment Agency

- 3.27. Further design changes to the masterplan were implemented in response to consultation comments from the Environment Agency and their provision of up to date flood map data.
- 3.28. This resulted in amendments to the southern appeal site and removal of a parcel of proposed development from an area to the west of the watercourse.
- 3.29. An LVIA addendum (**CDA.119**) was prepared that addressed the minor design change, along with the iteration of the Illustrative Landscape Masterplan.

Officers Reports to Committee

- 3.30. Appeals against the non-determination of the applications were submitted to the Planning Inspectorate, and the Council were notified in June 2020 as to the validity of these.
- 3.31. A report was prepared for Members which confirmed the position of the Council in respect of the case that would be presented at a forthcoming appeal, and inviting Members to confirm the decision that they would have made, had they been able to determine the planning application.
- 3.32. In both instances (north and south sites) the reports confirm that they would have refused the application.
- 3.33. The reports to committee set out a brief summary of the consultation responses received under several sub-headings (**CDC.1** and **CDC.2**). Those relevant to landscape and visual matters are summarised as follows:

Principle/location/policy issues

- Located in strategic gap;
- Loss of countryside;
- Impact on character of the 'new' Newgate Lane and the 'old' Newgate Lane;
- Impact on "green belt" (notwithstanding that the site is not in fact in an area defined as green belt);
- The site is not 'well integrated' contrary to policy DSP40;
- Loss of green land and linkages; and
- Impact on landscape.

Strategic Gap

- Impact on the strategic gap;
- Coalescence of Fareham and Gosport;
- The proposed development will not strengthen the strategic gap; and
- Development in the strategic gap will set a precedent for further development.

Environment

- Loss of green/open space and loss of agricultural land; and
- Impact on ability to make optimum use of green infrastructure, including providing green linkages from Fareham to the coast.

3.34. The report includes reference to a petition entitled 'Stop building in the Fareham/Gosport Strategic Gap' that was published in August 2020 and refers to several points in respect of landscape and visual matters and the strategic gap.

3.35. The main issues raised in respect of landscape and visual matters are set in the context of Local Plan Policy DSP 40 (paragraphs 8.32 to 8.61 of the North committee report and 8.31 to 8.6 of the South committee report).

3.36. The applications were subsequently refused (24th June 2020) (**CDC.4**) with the reasons for refusal as listed in the reports to committee. The overarching reason for refusal state that:

3.37. *"The development is contrary to Policies CS2, CS4, CS5, CS6, CS14, CS15, CS16, CS17 and CS22 of the Adopted Fareham Borough Core Strategy 2011 and Policies DSP6, DSP13 & DSP40 of the Adopted Local Plan Part 2: Development Site and Policies Plan, paragraphs 103, 109 and 110 of the NPPF and is unacceptable in that:*

- 3.38. For the southern site this is identical, save for the omission of reference to Policy CS16.
- 3.39. *"The development is contrary to Policies CS2, CS4, CS5, CS6, CS14, CS15, CS17 and CS22 of the Adopted Fareham Borough Core Strategy 2011 and Policies DSP6, DSP13 & DSP40 of the Adopted Local Plan Part 2: Development Site and Policies Plan, paragraphs 103, 109 and 110 of the NPPF and is unacceptable..."*
- 3.40. More specific reference to landscape and visual matters is made in the following reasons for refusal (noting that these are repeated for both the north and south sites):

b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;

c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;

d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;

- 3.41. On review of the consultation responses, reports to committee and relevant reasons for refusal, several common themes are apparent in respect of landscape and visual matters. These are summarised as follows:
- Issue 1A: What are the key characteristics of the site and its immediate context and how have the schemes responded to these in terms of mitigation?
 - Issue 1B: The degree of impact on the key characteristics of the site and its immediate context and the extent to which these can be considered as harmful.
- 3.42. These matters are effectively addressed in the submitted landscape and visual impact assessments which set out a comprehensive baseline for the site and the local landscape context, including an assessment of the impact and approach to mitigation. I will return to these documents in later sections of my evidence.
- Issue 2: The purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap.

-
- 3.43. During the course of the application a 'strategic landscape and visual appraisal' of the strategic gap was prepared to identify the role and function of the strategic gap, variations therein, the core areas and also how the strategic gap could be maintained whilst accommodating the strategic growth in the area. I will return to the gap study in later sections of my evidence.
- Issue 3: The context of the application sites in relation to the existing urban settlement edges/boundaries.
- 3.44. This issue is also touched upon in the submitted landscape and visual impact assessments in terms of the local landscape context to the appeal sites. I will return to the relevant findings of the LVIA reports in later sections of my evidence.
- 3.45. I consider these issues in the following sections, along with the different parts of the reason for refusal, thereafter drawing my conclusions.

4. ANALYSIS OF LANDSCAPE AND VISUAL MATTERS

4.1. In this section I set out an analysis of landscape and visual matters. I have presented the analysis under the broad topics raised in the reason for refusal, with reference to the key issues identified in the previous section of my evidence.

Reason for refusal b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside.

Landscape character and key characteristics

4.2. The reasons for refusal suggest that the proposed development fails to respond positively to, and be respectful of, the key characteristics of the area. In this section I set out the key characteristics relevant to the local landscape character, including reference to published guidance, but also with reference to recent landscape change that has resulted from the relatively recent completion of the new bypass, Newgate Lane East.

4.3. Landscape character for the area is defined by the 'Fareham Landscape Assessment', with the sites being located in the 'Woodcot/Alver Valley landscape character area, sub areas 08.1a for the northern site, and 08.1 and a small part of 08.1b for the southern site (relevant extracts are included in **Appendix FL&BH 1.2.1**). Peel Common, along with adjacent residential areas and remnant parts of the landscape up to the edge of Gosport, are also included in the same LCA; by contrast, the landscape between Fareham and Stubbington (including the wastewater treatment plant and solar farms) are located within the adjacent area of LCA 7, the Fareham/Stubbington Gap. There is a clear difference in the character between these areas that is based on the scale and pattern of the landscape, land use, enclosure landscape, and the degree of influence of the settlement edge along with urbanising influences.

4.4. The key characteristics of the relevant LCAs are considered in the baseline of the submitted LVIA (para 4.34, **CDA.48 and CDA.106**) and consequently informed the analysis, constraints and opportunities, and ultimately the landscape strategy for the mitigation that is included as an integrated part of the two masterplans for northern and southern schemes.

4.5. Greenfield development retains an inherent impact on the physical landscape, but it is possible to bring development forward in a positive manner that addresses landscape and visual constraints. The appeal schemes do so. Where this positive approach is

adopted, the perception of those physical impacts in terms of landscape character are also minimised, also something that the schemes achieve.

- 4.6. In respect of the key characteristics the Fareham Landscape Assessment (FLA) notes that 'key characteristics aim to improve understanding of the how places are distinctive and different from one another, rather than being an appraisal for areas that are 'better or worse'. It is the second and third sections of the FLA that address Landscape Sensitivity and the designations review that address matters of value, sensitivity and designations.
- 4.7. Key characteristics are defined in the 'Landscape Character Assessment' section of the FLA. For the Woodcot/Alver Valley (LCA8) the FLA notes that (FLA, page 62):
- 4.8. *"The Alver Valley also forms part of the strategic gap separating Fareham and Gosport but it is very different in character and scale from the open farmed landscape to the west. It comprises a mixed pattern of wooded common, small-scale pasture and ribbon development along the corridors of the River Alver and Newgate Lane and is bounded to the east by the urban edge of Gosport and to the north by the outskirts of Fareham."*
- 4.9. This sets out a clear distinction between the landscape context of the site, and the wider strategic gap area to the west and north-west, between Fareham and Stubbington. The description of the LCA also establishes the influence of the urban fringe; from the edge of Gosport, edge of Fareham, but also from ribbon development in the LCA (as reflected by the character of Peel Common). These influences should be considered in the appraisal of the appeal sites in the context of the local landscape.
- 4.10. The LCA defines several 'essential characteristics'. These are set out in the following table, set against a brief description as to how the appeal schemes would influence these or has responded to these.

Table 1: Summary of essential characteristics of the Woodcot/Alver Valley and anticipated change

Essential characteristics of the Woodcot/Alver Valley	Influence on landscape and design response
A mosaic of small and medium scale fields at Woodcot, forming a mixture of small horse-grazed pasture and larger arable fields divided by fences, ditches and gappy hedgerows;	<p>The scale and pattern of fields contribute to a more enclosed landscape.</p> <p>Grazed pasture, equestrian uses are not always positive aspects of the landscape and can be seen as detracting components of a landscape, driving needs for enhancement.</p> <p>Development and landscape strategy generally works within the scale of the existing field pattern aiming to</p>

	<p>limit overall 'massing' by working within the existing enclosures.</p> <p>This has an added benefit that vegetation is retained and subsequently enhanced through programmes of supplementary planting and longer term management.</p> <p>As part of the overall green infrastructure strategy for the appeal schemes, the sites can provide additional and reinforcement planting to hedgerows with additional tree planting also.</p>
<p>Although this area forms the upper part of the Alver Valley it lacks a distinct valley character;</p>	<p>A 'valley' landform is not pronounced here, reinforcing that this part of the landscape is a transition between the more distinct valley to the south-east and the flatter, slightly undulating plain to the west.</p> <p>This reinforces the nature of boundaries between character areas that they are rarely fixed along a defined alignment and instead tend to form a 'merging' or transition.</p>
<p>The hedgerow pattern is gradually replaced by scrubby woodland to the south, enclosing Chark Common and the golf course;</p>	<p>The hedgerow network is a stronger characteristic of the appeal sites and their context, with this network forming much of the green infrastructure framework.</p> <p>Newgate Lane East has impacted on the network to a degree, severing the hedgerows and field patterns in some parts of the landscape, particularly in proximity to the eastern edge of the appeal sites.</p> <p>The appeal schemes incorporate the hedgerow network as part of the overall masterplan, using this landscape component to guide the scale and form of the development envelope. There are likely to be some limited losses in parts of the appeal sites but retention, management and additional planting can mitigate these losses.</p>
<p>The character is influenced by the busy road corridor and the urban characteristics of Peel Common and Solent Enterprise Zone at HMS Daedalus on one side and the urban edge of Bridgemary on the other.</p>	<p>In the local landscape context of the appeal sites, urban influences and the settlement fringes are generally a prominent feature and, given the appeal sites and the surrounding undeveloped landscape areas do not exist in isolation, these urban edges do have an influence on the local landscape character.</p> <p>Newgate Lane East and its associated infrastructure (including prominent acoustic fencing, road junctions and crossings) have further influenced local landscape character, drawing the urban influence into the landscape between Peel Common and Gosport (at Bridgemary).</p> <p>The acknowledge landscape impact largely relates to the introduction of residential development into the appeal sites. However this will be congruent with the settlement pattern of Peel Common due to the placement and relationship between the appeal sites to Peel Common (along Newgate Lane) and the contained to the east and north by the alignment of Newgate Lane East.</p> <p>There also remains the existing connection between Peel Common and the edge of Gosport at Bridgemary, whereby the settlement pattern is connected by</p>

	existing properties along Woodcote Lane and the amenity land use of Brookers Field Recreation Ground (which is suburban in its character and contrasts to the agricultural land uses).
--	--

- 4.11. Overall, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement. Further details are described in the following sections.
- 4.12. In relation to the scale of the field patterns (and scale of the landscape), this has been used to guide the scale and pattern of the development areas on site. Field boundaries and parcels of development have been formed within the field patterns and their boundaries consequently breaking down the massing of proposed development. Notwithstanding the change in land use from agricultural fields to residential development, this approach to mitigation does draw on and reflect the key characteristics. Furthermore, the scale of development is consistent with the types of existing residential area that are present in the surrounding context, the appeal sites being subservient to the stronger and larger scale residential edges of Fareham and Gosport and also being compatible with the adjacent settlement area of Peel Common.
- 4.13. In respect of the landform, the proposed development will not unduly influence this characteristic; a characteristic which is not necessarily distinctive in any respect. The landform of the site in its context is not reflective of the broader Alver Valley and, I consider, shows part of a transitional area of topography that emerges from the valley and up toward the undulating plain to the north-west. Man made features such as the earth banks around the waste water treatment works are also a feature in the local landscape, maintaining a distinction between the landscape to the west and east of Peel Common.
- 4.14. As with the scale of the landscape, the proposed development has intentionally incorporated the field boundary hedgerows into the layout as far as possible, retaining the existing framework of vegetation. Notwithstanding that this will be set in the framework of a residential development and its open spaces, the hedgerow field pattern is retained, whereas elsewhere in the LCA (such as the golf courses) it would appear to have been eroded). Disruption to the hedgerow network is also apparent as a

consequence of the new bypass, Newgate Lane East, which has severed several of the local field patterns and hedgerows; the replacement of these with highways green infrastructure is acknowledged, but this does not respond to the pattern of the landscape in this locality. Vegetation and hedgerows retained within the layout are proposed to be augmented with new additional planting, supplemented by added diversity and landscape management, and where lost the additional planning will replace these.

- 4.15. In relation to urban influences, the landscape impact of introducing residential development into the site is acknowledged, and the impacts are clearly set out in the submitted LVIA. However in response to landscape character, and the existing influences of the urban edge that are noted in the FLA, the site has responded by avoiding and minimising this influence. This includes the provision of 'buffers' to form an offset to the edge of the proposed development and the adjacent landscape context. This will also help to create a partial screen, presenting a scheme that is not entirely defensive in terms of how it integrates with the adjacent landscape, but instead adopts a more positive approach of presenting a 'fair face' and more attractive, softer settlement edge.
- 4.16. More detail on landscape character is set out in section 2 of the FLA, relating to local landscape character areas and the sensitivity assessment. This divides LCA8 into five sub-areas, with areas 08.1a, 08.1b and 08.2a most relevant to the sites given they sit adjacent to each other and include the site. 08.2b and 08.2c provide some context to the local landscape but sit further afield and are slightly separate from the site context.

Plate 2: FLA extract (page 151) showing landscape types for LCAS

4.17. The structure of the landscape of 08.1a and 08.2a is defined predominantly as 'weak structure' or 'fringe character' with just a small part of 08.1a that is defined as 'strong structure' which is concurrent with parts of the southern site (refer to **Plate 2**).

4.18. In relation to the appeal sites, I agree with the definition of the structure as broadly 'weak' or 'fringe' character. This is because it is reflective of the various suburban influences that are prominent in this part of the landscape and contribute to the suburban continuity in the landscape that draws Peel Common, Bridgemary, Woodcot and the edge of Fareham together. Physical influences include the prominent residential edges of Gosport and Fareham, cycleway connections and the alignment of Newgate

Lane East (and substantial pieces of highways infrastructure that accompany this), but also the pocket of amenity land use situated to the north and south of these areas.

- 4.19. The more detailed sections of the LCA do not set out 'key characteristics' (over and above the 'essential characteristics' defined for the wider LCA) but instead include a more detailed descriptions (refer to **Appendix FL&BH 1.2.1**). These are presented for each sub-area in relation to:
- the landscape resource (landscape character and quality);
 - the visual environment (views, visual features and viewers);
 - setting of the urban area (contribution to setting and settlement character); and
 - green infrastructure (contribution to green infrastructure).
- 4.20. Each also includes descriptions of sensitivity and development potential.
- 4.21. The descriptions are extensive, but a summary is presented in the format of addressing 'development criteria and enhancement opportunities'. This section states that the area is of 'high sensitivity' and refers to matters of coalescence and it's 'generally unspoilt rural character'.
- 4.22. In itself this is a characteristic, but this part of the landscape does not exist in isolation, nor is it experienced in isolation and the sense of the rural character is equally influenced by the settlement fringe and amenity land uses that are presented by the residential areas and nearby sports and playing fields.
- 4.23. Furthermore, the FLA goes on to state that:
- 4.24. *"The situation is further complicated by the proposed new road which will have some effect on the integrity and character of the landscape resource and undeveloped gap."*
- 4.25. Newgate Lane East is now constructed and in use. The route includes additional road junctions as well as some prominent fencing along the route, visible from the road but also from the local rights of way and settlement fringes. I consider the road has effectively severed this part of the landscape, and provided a very urbanised corridor that connects previously suburban fringes, linking as it does such features as the urban edge of Fareham (with the solar installation and sports facilities also on this edge), the waste water treatment works, Peel Common itself and the amenity landscapes of Brookers Field recreation ground.

- 4.26. Consequently, this part of the landscape is no longer representative of the 'unspoilt' landscape described in the 2017 LA, nor does it fulfil its role of preventing coalescence between these edges of the settlement.
- 4.27. The FLA does acknowledge that, in relation to sub-area 8.2 there is some potential for development, stating that (page 167):
- 4.28. *"The only opportunities may lie within areas that are closely associated with existing development (e.g. at Peel Common or in the SW corner of area 8.2c) and can be integrated within the landscape without any physical or perceived encroachment within the gap."*
- 4.29. This part of the landscape does (and will), however, remain distinct from the wider strategic gap between Fareham and Stubbington which, in landscape character terms, is a clearly distinct part of the landscape from the suburban fringes of Fareham and Peel Common.
- 4.30. Turning back to the reason for refusal in respect of the key characteristics of the landscape, there are several development criteria and enhancement opportunities defined by the FLA which the proposed developments positively respond to. The relevant issues are set out in the following table, accompanied by a brief response as to how/why the proposed development responds positively. Although the two appeal schemes are separate applications, I include a plan of a composite landscape strategy that illustrates how the landscape strategy forms a comprehensive and connected mitigation strategy (refer to **Appendix FL&BH 1.2.2**).

Table 2: Summary of LCA8 sub-area development criteria/enhancement opportunity and design response of the appeal schemes

Relevant FLA development criteria and enhancement opportunity	Proposed development design response
Sub area 8.1 Woodcot	
Maintain and strengthen the existing structure of trees, hedgerows and other mature vegetation, to maximise its landscape and wildlife value and to minimise impacts on the rural character of the landscape	<p>The appeal schemes reference the scale and pattern of the landscape by placing a limit on the development envelope for built form and retaining hedgerow (and other) vegetation as far as possible. Losses will be mitigated by additional planting.</p> <p>The landscape strategy includes for a diverse range of tree, hedgerow and grassland areas, contributing to biodiversity potential.</p> <p>Being contained between Peel Common and Newgate Lane East, other than the 'on site' impact, impacts on the 'rural character' will be contained and limited.</p>

<p>Maintain the essentially open, undeveloped character of the public open space, playing fields and sports facilities within area 8.1b, and be designed to relate closely to the existing structure of trees hedgerows and existing characteristic built features within the area</p>	<p>Brookers Field Recreation ground is located immediately to the south-east of the appeal sites with additional playing fields and formal play areas located on the edge of Fareham to the north of the appeal sites. Notwithstanding the connections to these areas by the settlement pattern and roads/footpaths, the appeal schemes are physically contained and will not influence the openness of these areas.</p>
<p>Avoid any major incursion of the urban area into the countryside beyond existing well defined boundaries, or create significant new pockets of urban or urbanising development within open farmland</p>	<p>The presence of the solar farm, waste water treatment works and Peel Common itself all form a physical and perceptual barrier to the west; these are further reinforced for much of the western edge by various tree and woodland cover. To the east, Newgate Lane East has severed the agricultural landscape and now broadly forms an eastern limit to the appeal schemes, however there remains a perception and some physical connection to Bridgemary. Overall this does not represent a 'major incursion; into the countryside as in either respect, the appeal schemes will form an appropriate fit with the existing settlement patterns.</p>
<p>Protect the area's role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development strung out along road corridors (e.g. along the existing and proposed new alignment of Newgate Lane) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap</p>	<p>As noted, Peel Common and its immediate environs form a distinct edge to the settlement pattern associated with the edge of Fareham and Gosport. The appeal schemes will not breach this and will not have an impact on the overall strategic gap to the edge of Stubbington.</p> <p>In terms of ribbon development, together the appeal schemes will present an area of development that dovetails with the existing settlement pattern of Peel Common which in itself is partly comprised of ribbon development along Newgate Lane. The appeal schemes will alter this and consolidate the settlement pattern of Peel Common as a small core settlement area within the broader strategic gap (much in the way that Titchfield, to the north, exists between Titchfield Common and Fareham).</p>
<p>Maintain significant distance and separation from the corridor of the new road to minimise its urbanising effects upon the rural character of the area</p>	<p>The appeal schemes include a landscape buffer along their eastern edge which will integrate with the linear landscape proposals that have been implemented to mitigate the urbanising influence of the new road.</p>
<p>Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the open, flat landscape</p>	<p>The appeal sites are physically well contained by the combination of existing built form and green infrastructure and consequently it is not considered that residential development on the appeal sites will be particularly visible or prominent.</p>
<p>Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area</p>	<p>The appeal schemes will not unduly affect any of the open spaces in the area, not are they prominent or visible from the open spaces or prominent from the local PROW network.</p> <p>Furthermore, green infrastructure and open space is included on the western edges of the appeal sites which makes further provision for accessible green space and green links.</p>

<p>Provide substantial new investment in the landscape through extensive tree, hedgerow and woodland planting using native broadleaved species appropriate to the locality and soil conditions and habitat creation to diversify the intensively farmed landscape</p>	<p>The appeal schemes include for a range of landscape and habitat types as part of the landscape strategy. Use of native and locally prevalent species would be an inherent part of the proposals and this element of detailed design can be controlled by condition.</p>
<p>Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context</p>	<p>The detailed LVIA, along with additional analysis in this evidence, illustrates that mitigation measures will be successful in minimising impacts in respect of both landscape and visual matters.</p>
<p>Sub-area 8.2 – Peel Common and Alver Valley</p>	
<p>Safeguard the area’s vital role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development along road corridors (e.g. Broom Way, Shoot Lane and Gosport Road) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;</p>	<p>The appeal schemes will consolidate the settlement pattern of Peel Common and can be integrated into the landscape with very limited influence on the adjacent landscape areas, particularly due to the considerable degree of enclosure from existing green infrastructure.</p> <p>The integrity of the overall strategic gap will be retained; where this is narrowed between</p>
<p>Maintain the distinctly ‘isolated’ nature of settlement at Peel Common and ensure that any potential small-scale infill development within this area effectively ‘rounds off’ rather than extends the settlement boundary, to avoid the risk of physical or perceived coalescence with other built areas;</p>	<p>The appeal schemes will consolidate the settlement of Peel Common being limited as they are by the alignment of Newgate Lane East. The appeal sites represent an opportunity to round off this edge of the settlement, up to the existing junction, without overly diminishing the remaining countryside to the east of Newgate Lane East. Further south, the perception of separation between the existing edges of Peel Common and Bridgemary is already limited due to the presence of residential development along Woodcote Lane and also the amenity character of Brookers Field Recreation Ground which influences character at a local level.</p>
<p>Protect the semi-rural, undeveloped character of areas 8.2b and c;</p>	<p>The appeal sites are separated and distinct from these areas due to distance and the alignment of the Gosport Road.</p>
<p>Maintain and strengthen the existing structure of woodland, trees, hedgerows and other mature vegetation in all parts of the area, to maximise its landscape and wildlife value;</p>	<p>As previously noted, the comprehensive landscape strategy would deliver this.</p>
<p>In particular, maintain and enhance the mosaic of woodland, heathland, grassland and wetland habitats of value within the Lee-on-the-Solent golf course at Chark Common and</p>	<p>As previously noted, the comprehensive landscape strategy would deliver this – the strategy includes for diversity of habitats and landscape components.</p>

encourage further habitat creation and diversification within intensively managed areas to maximise wildlife and landscape value;	
Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the landscape;	As noted, the appeal schemes will not be unduly prominent in the landscape and are both physically and visually well contained.
Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area, particularly along the River Alver corridor and with the Country Park to the south;	The appeal schemes include areas of green infrastructure and open space which will make a positive contribution to the network of green infrastructure in the area. Connections to the River Alver corridor and Country Park will not be impacted.
Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.	As noted, the detailed LVIA, along with additional analysis in this evidence, illustrates that mitigation measures will be successful in minimising impacts in respect of both landscape and visual matters.
Use native broadleaved species appropriate to the locality and soil conditions in new tree and hedgerow planting.	Also as noted, the use of native and locally prevalent species would be an inherent part of the proposals and this element of detailed design can be controlled by condition.

Interim summary on landscape character

4.31. In this section so far, I have considered the first part of the reason for refusal (b), namely that the proposed development fails to respond positively to and be respectful of the key characteristics. This includes:

- A description of the characteristics with reference to the published guidance, reiterating that this baseline position was fully considered and acknowledged in the submitted LVIA;
- That there is a distinction in landscape character between this area (the site and its context) and the wider part of the strategic gap between Fareham and Stubbington;
- That the published baseline makes clear reference to the suburban nature and influences in this part of the landscape and that it gives give some context to the scope for potential development in this area;
- That this baseline is slightly out of date by virtue of Newgate Lane East, which is now constructed and in operation;
- Having set out this baseline position on the key characteristics, I have also described clearly, again reiterating that this was addressed in the submitted LVIA,

how the proposed development responds to these characteristics through the landscape strategy that forms the basis for the proposed development.

- 4.32. The mitigation strategy is largely integrated into the proposed development as a whole, with landscape and visual matters addressed in the layout, extent of developable area, green infrastructure strategy and areas of open space.
- 4.33. In summary, the appeal schemes can clearly demonstrate how they have responded positively to the local landscape character and is respectful of this through the restrictions placed on built form and provision of green infrastructure and open space (with associated landscape proposals) as an integral and positive component of the masterplan for the two appeal sites.
- 4.34. Not only is the landscape strategy consistent with the local landscape character, it also plays an important role in terms of lessening the predicted impacts of the 'built' component of the developments (as does the baseline context of the suburban edges of the settlement).
- 4.35. This leads me to the second part of the reason for refusal (b) where it suggests that the proposed development would be 'harmful' to the character and appearance of the countryside.

Impacts on the character and appearance on the countryside

- 4.36. In respect of landscape and visual matters, it is typical for landscape character to be discussed first, with views/visual receptors and appearance following. However, I will address the visibility and perception of the site (and proposed development) up front as it sets a very useful context in respect of landscape character.
- 4.37. It is important to note that a comprehensive landscape and visual impact assessment was prepared in support of the applications. These present a technical assessment of the baseline scenario, judgements on landscape value, susceptibility and overall landscape sensitivity as well as consideration of visual impacts from a range of visual receptors in the local area.
- 4.38. The technical assessment and professional judgements therein are based on a transparent approach and can be referred to for specific points. Overall, notwithstanding that there is an inevitable landscape impact on the appeal sites and that for locations directly adjacent to or close to the appeal sites might be of a higher significance of

effect, the overall balance of judgments found that, this degree of impact was acceptable and that mitigation had been successful in avoiding or minimising the impact and effect.

4.39. The overall visibility of the appeal sites is defined as follows:

- To the north, the visibility of the appeal sites is restricted to a short section of Newgate Lane and the junction/short section of Newgate Lane East. Views from the more northern section of Newgate Lane, and also the route of the public footpath between Newgate Lane and Woodcot, are generally screened by intervening vegetation and the route of Newgate Lane East;
- To the east, the visibility of the appeal sites is restricted to locations on the very edge of Woodcot and Bridgemary. This is generally restricted to the upper storeys of residential properties situated on the very edge of the settlement, views from ground floor levels and the street scene being generally screened by intervening vegetation. Newgate Lane East is highly visible from the east, large sections of the route being defined by tall acoustic fencing panels. In the future, views from the east of the appeal schemes is likely to be further screened and contained by the highways mitigation planting along Newgate Lane East, which will form a linear belt of green infrastructure in views from this direction;
- To the south, the visibility of the site is limited to a small number of properties located off Woodcote Lane, with filtered views from the road itself. Some views from Newgate Lane East and Newgate Lane will also be available, albeit limited in duration. In the longer term, highways mitigation planting will screen such views; and
- To the west, the visibility of the site is limited to the route of Newgate Lane with views from locations further west (including public footpaths) being screened by various sections of green infrastructure.

4.40. On balance, the potential visibility of the appeal schemes is very restricted and highly localised. Higher sensitivity receptors such as PROW have very few views. Views from receptors across the strategic gap between Stubbington and Peel Common (including PROW) will have no views.

4.41. Views from Bridgemary, although partially available now, are influenced by highways infrastructure of Newgate Lane East and in the longer term will potentially be fully screened by the mitigation planting along that route.

4.42. What remains is a small number of private dwellings in relatively close proximity to the appeal sites and some public vantage points from the local road network that have views

of the proposed developments. Such locations include a short section of Newgate Lane, the passing traffic (and receptors) along Newgate Lane East, and a short section of Woodcote Lane.

- 4.43. I raise the matter of views/visibility in the first instance, not just to demonstrate how limited the potential views and visual impacts are in their extent, but also to demonstrate that any perception of the change to landscape character is equally limited. In turn, this influences the extent to which any impact could be judged as 'harmful' to the character and appearance of the landscape.
- 4.44. In respect of character and appearance of the landscape, the limited 'scale of change' is just one consideration in the balance of judgement, other matters that are accounted for in the LVIA process include the nature of change. In this case, the appeal sites are not located in a landscape context where residential development, or other urbanising influences, are absent.
- 4.45. The settlement edges at Bridgemary and Fareham are prominent and influential on the local character; the appeal sites sit adjacent to Peel Common and the appeal schemes will complement this settlement pattern, particularly given its containment by the route of Newgate Lane East. Amenity landscapes are present in the form of Brookers Field Recreation Ground and the open spaces and sports fields to the north of the appeal sites.
- 4.46. The agricultural components of the landscape are noted and included in the consideration of landscape impacts, however the peri-urban influences described above are also a relevant part of the baseline consideration against which impacts are judged.
- 4.47. Impacts are also judged on the basis of avoiding or minimising the type and extent of any impact and the positive design approach, reflective of the local landscape context, is successful in avoiding and reducing such impacts. Previous sections of my evidence have clearly demonstrated the positive approach to mitigation.
- 4.48. Overall, an inevitable impact on the landscape will be generated, largely due to the loss of agricultural land to built development. This is addressed by the LVIA which, in reference to the relevant character area of the 'Woodcot/Alver Valley LLCA - Sub area 08.1a' concluded that the magnitude of impact within the study area will be medium which, assessed alongside the low to medium sensitivity, would result in a minor to moderate adverse effect.

4.49. In terms of landscape and visual impact assessment, this is at the lower end of the scale for the assessment of significance (which general range across a scale of negligible, minor, moderate and major). At this level of significance, at the lower end of the threshold, these impacts are considered to be acceptable in landscape terms and do not constitute an overall 'harm' to the landscape.

c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;

4.50. In this section I consider the purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap.

4.51. During the course of the application a 'strategic landscape and visual appraisal' of the gap was prepared and submitted and this addresses issues in respect of function of the gap, core areas and how the strategic gap can be maintained whilst accommodating the strategic growth in the area.

4.52. The overarching aim was to establish which areas of the gap were a priority to maintain its function and separation between settlements, and which parts of the gap could, subject to further detailed assessment, accommodate some form of built development that would be integrated, not highly visible and ensuring that it would not erode the physical, visual and perceived gap.

4.53. Albeit undertaken at a high level, the study found that the appeal sites (and landscape generally between Peel Common and Fareham/Gosport) were not a priority area required to maintain the integrity and function of the wider Fareham to Stubbington Strategic Gap.

4.54. In September 2020, in support of the emerging Local Plan, the evidence base was updated to include a recent study of strategic gaps across the Borough.

4.55. This document, a 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' was undertaken by Hampshire County Council on behalf of FBC and published in September 2020 (**CDG.7**). The study undertook a technical review of the six proposed 'Areas of Special Landscape Quality' and two proposed strategic countryside gaps (including the Meon Gap and the Fareham and Stubbington Gap).

4.56. The study reiterates the Fareham Draft Local Plan 2036, stating that (page 5, **CDG.7**):

- 4.57. "...Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities (page 27, Fareham Draft Local Plan 2036)"
- 4.58. Study states that the approach and methodology established a set of criteria for determining strategic gap characteristics and boundaries
- 4.59. The executive summary makes two observations in respect of the Fareham to Stubbington Strategic Gap, stating that (following extracts from pages 6 and 7 of the study, **CDG.7**):

"The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence through continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there are some opportunities for development to be accommodated within the landscape, without compromising the Strategic Gaps function..."

Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:

- *An area to the South of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function...*

It is also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past."

- 4.60. The study goes on to 'test' a series of areas against defined criteria, including primary and secondary measures (described on page 19 of the study, **CDG.7**). These are summarised in the following table.

Table 3: Summary of primary and secondary measures for strategic gap criteria

Principles of primary measures	Principles of secondary measures
<i>Physical and visual separation:</i> - absence of urban land uses	<i>Green infrastructure provision:</i> - role and purpose of green infrastructure

<ul style="list-style-type: none"> - primarily an absence of residential development - feeling relatively tranquil - have dark night skies - retain a sense of leaving a settlement, passing through a distinct tract of countryside before entering another - maximum and minimum distances are a 'rule of thumb' 	<ul style="list-style-type: none"> - influence appropriate gap distances
---	---

- 4.61. Further detail of these measures is set out in the detailed methodology to the study. Also in relation to the approach and methodology of the study, it notes that (page 20, para 45, **CDG.7**):
- 4.62. *"Whilst it has been stated earlier that Strategic Gaps, do not necessarily have an intrinsic landscape value, landscape character and it's quality does have a role to play in helping to understand and determine the extent of a gap and it's sensitivity to development..."*
- 4.63. Chapter 4 of the study sets out an overview of the Strategic Gaps, it states that (page 84, para 8, **CDG.7**):
- 4.64. *"The aim of the Fareham-Stubbington Gap is to avoid coalescence between the settlements of: Fareham and Bridgemary, with Stubbington and Lee-on-the-Solent."*
- 4.65. The study goes on to define a series of 'key features' within the Fareham to Stubbington Gap (page 96, **CDG.7**). I summarise these in the following table, along with a brief analysis as to whether these key features are reflected by the appeal sites and their immediate context.

Table 4: Summary of the defined 'Fareham-Stubbington Gap' key characteristics

Key feature as defined by the study	Relevance to the appeal sites and context
Open, predominantly arable farmland and horticulture with some glasshouses, a weak hedgerow structure and few trees	This is reflective of the core part of the gap, whereas the appeal sites are contained within a smaller scale arable landscape contained by a strong framework of hedgerows and hedgerow tree. This distinction is acknowledged by the defined landscape character guidance. Consequently, given the fundamental difference in landscape character here, the appeal schemes will not unduly influence this particular key feature.
The settlement edges are for the most part well screened by mature tree canopy, but there is some	The landscape context to the appeal sites also include the settlement edge of Gosport at Bridgemary, which is also visually apparent from the local landscape. Closer

<p>minor visual intrusion from Fareham, Stubbington and HMS Collingwood</p>	<p>to the appeal sites, Peel Common forms an incidental 'satellite' of the settlement pattern which has grown out of ribbon development along Newgate Lane and this is more prominent in the local landscape context.</p> <p>Given the existing context of the residential edges, particularly Peel Common, the appeal schemes are not considered to unduly influence this key feature of the Strategic Gap, particularly given the urbanising influence (and associated infrastructure of Newgate Lane East) along with mitigation in the appeal schemes which includes landscape buffers and additional landscape planting.</p>
<p>A few scattered farmsteads/horticultural holdings and a mosaic of small fragments of open farmland and horse grazed pastures sandwiched between.</p>	<p>This is more reflective of the appeal site and their local context, however it is useful to contrast this with similar farmsteads and horticultural buildings set within the more open arable landscape to the west. Fragmentation of the arable landscape in this area has also occurred through the implementation of Newgate Lane East which has severed several field parcels and hedgerows through the area.</p> <p>The appeal schemes have taken an approach of minimising impacts through reference to the scale and field pattern within the landscape which has defined the development envelopes for built form. Notwithstanding this positive approach, there is an acknowledged loss of agricultural land.</p>
<p>Large scale non-agricultural uses of business and airfield development at Solent Airport in Daedalus to the south.</p>	<p>There is limited physical and visual connections between the appeal sites and these features.</p> <p>The appeal schemes will not increase the prominence or extent of these uses in the landscape.</p>
<p>Utilities of: Peel Common Water Treatment Works enclosed from views by an earth bund and mature tree belt Peel Common Solar Farm</p>	<p>Both utilities are in close proximity to the appeal sites, the former acting as one of the main features that enclosure the appeal site physical and visually and restrict the potential visibility of the appeal schemes in terms of visual effects.</p> <p>These features effectively contain the appeal scheme and prevent any perception (physically or visually) of them from the west, and in particular from the context of the arable landscape across to Stubbington.</p>
<p>Construction site of Stubbington Bypass, which will provide an east-west route through the gap that has not previously existed.</p>	<p>This feature is physically and visually separate from the appeal schemes, but will likely introduce a detracting feature into the landscape, much in the same way Newgate Lane East has in the locality of the appeal sites.</p>
<p>Urban fringe character of Peel Common residential area</p>	<p>The appeal sites are located adjacent to the 'satellite' residential area of Peel Common and will consolidate this area of the settlement.</p> <p>In terms of the gap, notwithstanding the extension of the settlement (albeit limited by the alignment of Newgate Lane East, the gap will continue to function much in the same way that the strategic gap in the north continues to function, with the consolidated</p>

	settlement area of Titchfield situated between the two more pronounced settlement edges.
Recently completed highway works to Newgate Lane and Peel Common Roundabout, with associated noise attenuation fencing and bus and cycle infrastructure.	Overall these key features reflect the independent judgements in the LVIA and earlier in this evidence as to the impact of Newgate Lane East on the landscape. In term of the gap, these features conflict with some of the primary measures in relation to tranquillity and drawing a distinction between settlements along major routes.

4.66. In respect of the Fareham-Stubbington Gap, the study draws together key conclusions in respect of the primary and secondary measures. Several key conclusions are summarised as follows (I include the full extract of the conclusions at **Appendix FL&BH 1.2.3** of my evidence):

- Minimum and maximum distances of ca. 300m to 1.8m [sic] (assumed km);
- That Peel Common represents a 'false' settlement edge;
- Two areas of the gap have distances of 350m and 300m but that these distances are still perceived as a sense of separation between neighbouring settlements, partly due to presence of mature vegetation;
- These represent 'minimum' gaps (within the 'rule of thumb') but are not appropriate to become a standard dimension as they would be weak and at risk of being lost (i.e. they are acceptable, but not ideal) – furthermore they function due to the context of linking to wider sections of the gap either side;
- Moderate to large gap distances of ca. 600m to 1.8km are 'good' distances;
- Presence of urban land uses can correspond to loss of tranquillity and dark night skies as urban fringe characteristics 'creep into the gap';
- In terms of land uses, sports fields and recreation grounds on the fringes of urban settlements have the potential to bring urbanising influence;
- In comparison to the Meon Gap there is not the same level of GI resource, however measures could be taken to increase these through positive environmental management; and
- Mitigation will be required where there is considered to be capacity to absorb development.

4.67. These conclusions are illustrated in the study by analysis diagrams of legibility/visibility and key distances (refer to extracts at **Plates 3 and 4**).

Plate 3: Extract illustrating the analysis of legibility/visibility

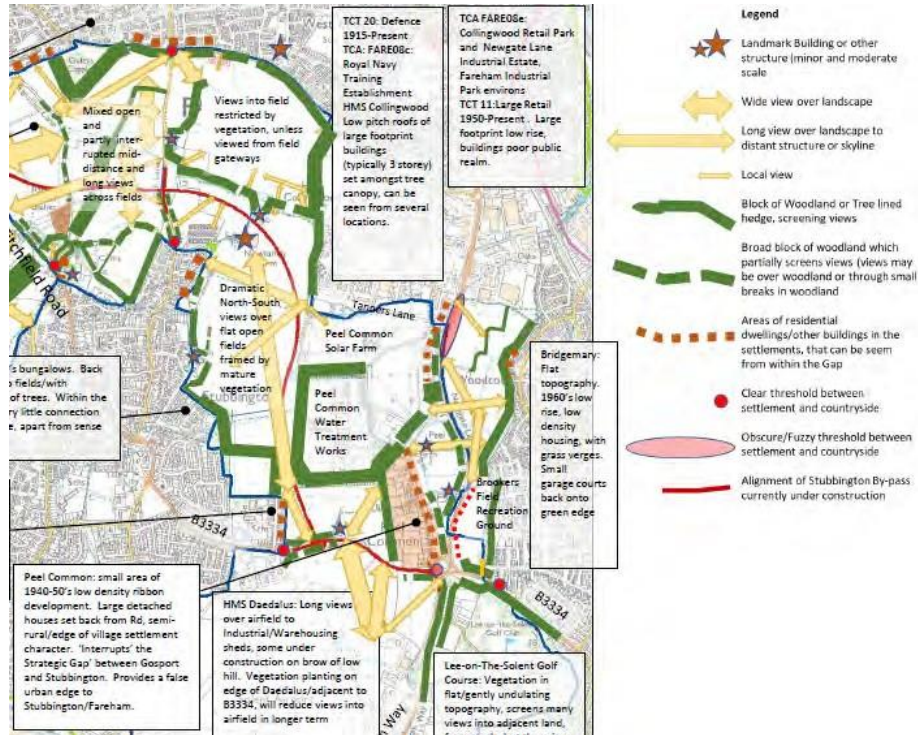

Plate 4: Extract illustrating key distances across the strategic gap

- 4.68. Having considered the analysis of the gap study, I refer back to the executive summary of the gap study where it notes that there exists some opportunities for development to be absorbed within the strategic gap without compromising its function. Further to illustrative extracts (**Plates 3 and 4**) I include some additional analysis of the gap in the context of the appeal sites (refer to **Appendix 1.2.4, Landscape Analysis of the Strategic Gap**).
- 4.69. The study suggest that an area south of Fareham and west of HMS Collingwood be considered, however this would place development in a more open and exposed part of the landscape, at a point where the existing gap (between HMS Collingwood and Newlands Farm/Stubbington) is only between ca. 325m and 550m. This would seem to contradict some of the principles set out in the analysis and conclusions.
- 4.70. I don't intend to critique the approach of the strategic gap study or its analysis, however I do think it is necessary to interrogate the robustness of the overall conclusions. The aims of the study include a review of the function of the strategic gaps in the Borough, but also to consider their boundaries. The study includes the necessary analysis to present a clear evidence base for amending boundaries in parts of the strategic gap. In relation to the edges of Fareham and Gosport, there is no recommendation to adjust the boundaries in this area, despite the findings of the study that:
- Some physical coalescence has already occurred;
 - These are some of the narrowest parts of the gap, resulting in a 'minimum functioning gap, that is weak';
 - Suburban edges and influences are often prominent, which reduces the effectiveness of the gap, including loss of tranquillity and presence of lighting;
 - Recreational land uses are present in the form of several sports and recreation grounds and these are noted as an issue in terms of their 'visual appropriateness'; and
 - The road network is such that there is no genuinely clear experience of a break between the settlement areas, particularly between Peel Common, Bridgemary and the southern edge of Fareham.
- 4.71. In relation to the landscape around the appeal sites, and particularly between Peel Common and Bridgemary, I cannot see how these trends would be reversed nor how the strategic gap could be strengthened, particularly with Newgate Lane East now forming such a strong urbanising feature in the local landscape context. The result is now the continued inclusion of a part of the gap that is weak and under pressure in the long term.

- 4.72. In that context I would think a logical and appropriate conclusion for the study would be to amend the boundary to omit this part of the landscape from the strategic gap, creating capacity for appropriate forms of development that could come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the importance of the core, priority areas of the gap, between Fareham and Stubbington where the gap clearly delivers its role and function in full. However, I do appreciate that this is not the conclusion of the published study.
- 4.73. Returning to the conclusions of the study, it notes that development coincidental with LCA8 (Woodcot-Alver Valley) would be inappropriate. However, it goes on to state that Gosport and Fareham have already partly coalesced (along the A32) and that urban characteristics are present throughout the study area 8C (which is coincidental with the appeal sites).
- 4.74. Given the urbanising influences, along with the considerable green infrastructure which provide appropriate visual qualities and separation thresholds, I consider that development in this area would not be inappropriate, particularly given that the inherent mitigation would also contribute substantially to the green infrastructure network (as illustrated on the Composite Landscape Strategy (refer to **Appendix FL&BH 1.2.2**))
- 4.75. Having considered the analysis within the study analysis of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the strategic gap. This is on the basis that (refer also to **Appendix FL&BH 1.2.4**):
- In relation to distances, the appeal schemes will reduce the gap between Bridgemaury and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances;
 - In terms of visibility, the appeal schemes will be physically and visually well contained – they site within the strong green infrastructure framework that is evident by blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the strategic gap from Stubbington;
 - Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, also along Newgate Lane and within the merging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;

- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area;
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

4.76. I also note that, notwithstanding differences in the technical approaches, the Pegasus group and Hampshire County strategic gap studies both independently acknowledge that the strategic gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site /project basis.

4.77. For the appeal schemes, this more detailed site analysis has been completed in the form of the submitted landscape and visual impact assessments. This iterative approach to design, based on the impact assessment, has informed the inherent mitigation to the masterplan and concludes that the proposed developments would be acceptable.

4.78. On this basis, I consider that the appeal schemes can come forward without a significant effect on the integrity and function of the strategic gap and without conflict to the aim of the Fareham to Stubbington Gap which is to avoid coalescence between Fareham and Bridgemarky with Stubbington and Lee-on-the-Solent.

d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries.

4.79. The final issue raised buy the reason for refusal in respect of landscape and visual matters related to the settlement boundaries and relationship between the sites and the urban edge.

4.80. Notwithstanding that this is more generally a planning matter related to the definition of settlement boundaries, I consider it useful to briefly consider the existing urban and suburban areas from a landscape and visual perspective; including how these relate to the site. This includes reference to Newgate Lane East and the potential 'future baseline' that could include emerging development of the former HA2 allocation.

- 4.81. In the context of the appeal sites, the current settlement pattern is defined by the edges of Fareham and Bridgemary which are generally defined by residential development, including some green infrastructure. Other settlement areas are that of Peel Common, which would appear to be a small 'satellite' of predominantly residential development, historically small scale ribbon development along Woodcote Lane and Newgate Lane. There is a mix of dwellings in terms of age, appearance and scale, and no one aspects really binds the settlement character together or delivers a unique sense of place.
- 4.82. The strategic gap study describes Peel Common as a 'false urban edge' and this is likely due to the visibility of dwellings on the approach from Stubbington, which briefly gives way to the open space of Brookers Field Recreation Ground before entering Gosport.
- 4.83. The surrounding landscape context to Peel Common is influenced equally by the agricultural landscape along with several areas of recreational open space and sports pitches. Newgate Lane East, Peel Common Roundabout and the utilities of Peel Common solar farm and the waste-water treatment works are all notable features that influence the character and pattern of the satellite settlement.
- 4.84. In terms of the more extensive urban areas that are located nearby, there is some connectivity close to Gosport Road a partial connection between Peel Common to Gosport in the form of Woodcote Lane (and its associated residential dwellings) and the amenity open space of Brookers Field Recreation Ground.
- 4.85. The reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries.
- 4.86. However, the appeal sites are located immediate to the east of Newgate Lane, and are physical contained by the alignment of Newgate Lane East; they sit immediately adjacent to the existing residential dwellings off Woodcote Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane. Together the appeal schemes will consolidate the pattern of Peel Common within a clearly prescribed and defined limit.
- 4.87. Furthermore, the proposals for green infrastructure and open space that form an integral part of the masterplans will set the proposed developments in a landscape framework that reflects some of the characteristics of Peel Common where tree belts and hedgerows are present to a greater or lesser degree across parts of the satellite. This includes proposals for an area of green space directly adjacent to Newgate Lane

that will form a green corridor that runs broadly through the centre of the emerging pattern.

- 4.88. Green infrastructure and open space on the eastern edge will integrate with the highways landscape planting along Newgate Lane East and together this will add to the containment of this pocket of settlement.
- 4.89. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 4.90. As previously noted, there exists some physical connections between Peel Common and Bridgemary. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemary, focused along the green route into Bridgemary (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 4.91. Whilst forming a consistent part of the overall settlement edge, these would be characterised by a softer transition than the current settlement edge, incorporating a strong network of green infrastructure which links the wider countryside to the west of HMS Collingwood, through the green infrastructure of the solar and waste water facilities, along the open spaces of the appeal schemes and Newgate Lane East, connection to the recreation ground and the wider extent of the Alver Valley further south.
- 4.92. At the time of writing the direction of the Local Plan had altered slightly and the former emerging allocation of HA2 had been removed. However, were HA2 to come forward this broader allocation would form a logical connection between Peel Common (including the appeal sites) and the edge of Fareham. This would represent a clear connection to the settlement edge of Fareham and a logical pattern of the settlement in this area. Furthermore, given the opportunities for including and extending the green infrastructure network, that larger extent of the settlement can come forward with a suitable mitigation strategy.
- 4.93. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.

5. RESPONSE TO POLICY

- 5.1. In the context of the analysis of effects identified in the previous section, I now go on to address the policy context, addressing these in respect of landscape and visual matters.
- 5.2. There are also several other saved and emerging policies relevant to landscape and visual matters which are not referenced in the reason for refusal but against which the appeal scheme will potentially make a positive contribution.

National Planning Policy Framework

- 5.3. The National Planning Policy Framework (NPPF) has a presumption in favour of sustainable development. Reference to the NPPF in the reason for refusal generally relate to sustainability and transport (noting paras 103, 109 and 110). Notwithstanding that landscape is not addressed at this level, there are other parts of the NPPF that are relevant.
- 5.4. NPPF paragraph 8 defines three overarching objectives to sustainable development, economic, social and environmental. The environmental objective (c) is explained in the following terms:
- 5.5. *"To contribute to protecting and enhancing our natural, built and historic environment; including making effective use of land, helping to improve biodiversity, using natural resources prudently, minimising waste and pollution, and mitigating and adapting to climate change, including moving to a low carbon economy."*
- 5.6. Section 15 of the NPPF is concerned specifically with conserving and enhancing the natural environment. Paragraph 170 notes that the planning policies and decisions should contribute to and enhance the natural and local environment by (a) protecting and enhancing 'Valued Landscapes' in a manner commensurate with their statutory status or identified quality in the Development Plan.
- 5.7. It is common ground that The site is not a 'valued landscape' for the purposes of Paragraph 170 of the NPPF.
- 5.8. The NPPF paragraph 170 also notes in sub section (b) that (my own emphasis):
- 5.9. *"Recognises the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and eco system services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland."*

- 5.10. To satisfactorily address policy at a national level it is necessary to undertake an appraisal of landscape character making reference to published guidance, but also looking more specifically at the local landscape character. This establishes a detailed baseline position for the landscape character of a site or area in question and presents and understanding of its sensitivity.
- 5.11. The submitted landscape and visual assessments that were prepared in support of the applications were undertaken using a methodology which accords with current best practice guidance for landscape and visual impact assessment (i.e. GLVIA3).
- 5.12. The submitted LVIA's make reference to published landscape character assessment prepared at a national, regional and district level and also addresses local character by reference to the description of the appeal site and its immediate context. The subsequent design of the proposed development reflects the relevant aspects of the local landscape character to ensure that impacts are minimised, that the proposals can be assimilated into the landscape and that mitigation forms an inherent part of the proposed development. Consequently, the LVIA responds fully to the requirement of the NPPF.

Adopted Fareham Borough Core Strategy 2011

- 5.13. The following section responds to policies included in the reason for refusal that are relevant to landscape and visual matters.

Policy CS4: Green Infrastructure, Biodiversity and Geological Conservation

- 5.14. This policy relates habitats and biodiversity and also ecologically focussed designations, however it also refers to the protection of trees and woodland. There is some relevance to landscape and visual matters by virtue of the parts of the policy that refer to green infrastructure. The policy refers to networks of accessible multi-functional green infrastructure to be planned around existing green spaces in urban, urban fringe and rural areas.
- 5.15. The appeal schemes incorporate a landscape strategy that forms an integrated part of the development proposals and sets a green framework for the masterplan. Notwithstanding the two applications are administratively separate, the landscape and green infrastructure strategies work together to provide a comprehensive framework of retained vegetation, proposed open space and augmentation of these through additional landscape works (refer to **Appendix FL&BH 1.2.2**).

- 5.16. Furthermore the green infrastructure network across the appeal sites dovetails with the wider green infrastructure network as it extends from the landscape to the west of Fareham, through the network of vegetation and open spaces to the north of Peel Common and along New Newgate Lane, and down toward the Alver Valley in the south.
- 5.17. Overall, the appeal schemes are considered to be consistent with and positively contribute to the policy in landscape and visual terms.

Policy CS14: Development Outside Settlements

- 5.18. This policy states that, for land outside the defined settlements, development will be strictly controlled to protect the countryside and coastline from development which would adversely affect its landscape character, appearance and function.
- 5.19. Both applications have been supported by comprehensive LVIAs which have found the proposals to be acceptable in landscape and visual terms. These documents also demonstrate the physical and visual containment of the appeal sites in relation to both the local landscape character and visual receptors.
- 5.20. In my evidence I have presented additional analysis that demonstrates the appeal schemes respond positively to the local landscape character and that this approach integrates mitigation that aims to avoid or minimise potential impacts. Some degree of residual impact is acknowledged at a site level, however in the context of the urban fringe context in this part of the landscape, the degree of impact is not considered to be at a level that would adversely affect the overall character of this part of the landscape.

Policy CS17: High Quality Design

- 5.21. This policy requires that proposed developments be of a high quality of design. This includes the need to, amongst other criteria:
- respond positively to and be respectful of the key characteristics of the area, including landscape
 - provide continuity of built form
 - provide green infrastructure, including landscaping, open spaces, greenways and trees

Policy CS22: Development in Strategic Gaps

- 5.22. This policy relates to land within a Strategic Gap and states that development proposals will not be permitted where it 'significantly' affects the integrity of the gap and the physical and visual separation of settlements.
- 5.23. The submitted LVIAs demonstrate that the appeal sites are physically and visually well contained. Landscape and visual impacts are limited to a highly localised area and the appeal sites together are contained in a strong framework of the existing settlement area of Peel Common, infrastructure (with associated vegetation) and the alignment of Newgate Lane East. This containment will be strengthened over time as mitigation within the schemes – and along Newgate Lane East – becomes established.
- 5.24. Additional analysis presented in my evidence also demonstrates several points in relation to the Strategic Gap, including that the key area for separation is between Stubbington and Fareham (including up to the western extent of Peel Common) and that the strategic gap in the area around Peel Common has been undermined to the point where it is no longer fulfils its role effectively.
- 5.25. Together, the containment of the site along with the strength of the gap between Stubbington and Fareham (at Peel Common) means that there will not be a significant effect on the integrity of the gap and consequently I do not see any conflict with this policy.

Adopted Fareham Borough Local Plan Part 2: Development Site and Policies Plan (June 2015)

Policy DSP40: Housing Allocations

- 5.26. This policy notes that, in the scenario where the Council does not have a five year supply of land for housing, additional housing sites, outside the urban area boundary, may be permitted. The policy sets out several criteria of which the following is relevant to landscape and visual matters:
- ii. The proposal is sustainably located adjacent to, and well related to, the existing urban settlement boundaries, and can be well integrated with the neighbouring settlement;
- Response: My evidence demonstrates the relationship between the appeal schemes and Peel Common and how this area, already party connected to the

edge of Gosport, would be consolidated as an area of settlement and present a well defined edge to the eastern edge of the Strategic Gap.

- iii. The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;

Response: My evidence has also demonstrated, in addition to the submitted LVIA, how the appeal schemes reflect local landscape character and a limit landscape and visual effects overall. My evidence also demonstrates that there will be no significant effect on the integrity of the strategic gap between Stubbington and Fareham.

- 5.27. Overall, in respect of landscape and visual matters, I do not consider there to be a conflict with this policy.

Other Matters

- 5.28. Matters raised in objection to the proposed scheme were summarised in the report to committee, including comments from the statutory consultees and several public comments. These include reference to matters of the countryside, strategic gap landscape and landscape character impacts and
- 5.29. I have dealt with these issues throughout my evidence in respect of several of the related points, including with reference to the submitted LVIAs, additional landscape and visual analysis in this evidence and the subsequent response to policy.

6. SUMMARY AND CONCLUSION

- 6.1. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 6.2. Together, the appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham and Gosport, that is bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east (with Newgate Lane and Newgate Lane East framing the northern edge of the sites also).
- 6.3. The wider landscape context of the appeal sites includes the low-lying ground of the coastal plain, characterised by abrupt the transition between the open landscapes and the adjacent urban environments of Fareham, Gosport (with Woodcot and Bridgemary). The settlement area of Stubbington forms the western extent of the Strategic Gap, extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.
- 6.4. Both applications were submitted with a detailed LVIA. These not only set out a comprehensive baseline and robust assessment of predicted impacts, but include details as to how landscape and visual matters have influenced the design of the masterplan, with mitigation measures consequently forming an inherent part of the proposals, both independently but also in respect of the complementary approach of the two schemes.
- 6.5. The reasons for refusal raises three main issues in respect of landscape and visual matters, stating that:
- b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;
 - c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;
 - d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;
- 6.6. This evidence considers the reasons for refusal against various information, including the submitted Landscape and Visual Impact Assessments, various consultation

responses, report to committee and other relevant baseline and evidence base material related to landscape and visual matters.

- 6.7. The submitted LVIAs address the key characteristics of the appeal sites and their immediate context. The submitted LVIAs also set out an assessment of the impact and approach to mitigation. This comprehensive process also enables judgements to be drawn in respect of the context of the appeal sites in relation to the existing urban settlement edges/boundaries.
- 6.8. The purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap has been addressed the a 'strategic landscape and visual appraisal' (prepared by Pegasus Group) and also by reference to the updated Technical Review of Areas of Special Landscape Quality and Strategic Gaps, prepared by Hampshire County Council on behalf of FBC.
- 6.9. With reference to this material, and supported by my own additional analysis where necessary, I conclude that the appeal schemes will not be harmful to the character and appearance of the countryside, will not significantly affect the integrity of the Strategic Gap and will relate well to the existing patterns of settlement.
- 6.10. This is on the basis the relevant key landscape characteristics of the area have been considered through the process of LVIA, consequently informing the analysis of constraints and opportunities, and ultimately the landscape strategy for the mitigation. This forms an integrated part of the two masterplans for northern and southern schemes.
- 6.11. Consequently, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms.
- 6.12. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement.
- 6.13. I consider that the subsequent residual impacts of the appeal schemes will be acceptable in landscape and visual terms.

6.14. In terms of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the Strategic Gap. This is on the basis that:

- In relation to distances, the appeal schemes will reduce the gap between Bridgemarky and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances set out in the FBC study;
- In terms of visibility, the appeal schemes will be physically and visually well contained – they sit within the strong green infrastructure framework that is evident in the form of blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the Strategic Gap from Stubbington;
- Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, along Newgate Lane and within the emerging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;
- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area; and
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

6.15. I also note that, notwithstanding differences in the technical approaches, the Pegasus Group and FBC Strategic Gap studies both independently acknowledge that the Strategic Gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site/project basis.

6.16. In respect of the conclusions of the FBC Strategic Gap study (where these note the relatively poor state of the gap at this point), I would think a logical and appropriate conclusion would be to amend the boundary to omit this part of the landscape from the Strategic Gap, creating capacity for development to come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the

importance of the core areas that are located further west, between Fareham and Stubbington where the Strategic Gap clearly delivers its role and function in full.

- 6.17. Finally, the reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries. However, my evidence demonstrates that the appeal sites are well related to Peel Common, being located to the east of Newgate Lane, physical contained by the alignment of Newgate Lane East and situated immediately adjacent to the existing residential dwellings off Woodcote Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane.
- 6.18. With existing and proposed green infrastructure in place, the appeal schemes will consolidate the pattern of Peel Common within a clearly defined limit. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 6.19. Furthermore, there are some existing physical connections between Peel Common and Bridgemary. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemary, focused along the green route into Bridgemary (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 6.20. If the previous emerging allocation of HA2 were to come forward, this broader area of development would reinforce the connection between Peel Common (including the appeal sites) and the edge of Fareham. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.
- 6.21. In all respects, considering Peel Common in itself, connections to Gosport, and with the potential for HA2 to come forward, development in this area will maintain a robust gap between Fareham (aligned with the western edge of Peel Common) and Stubbington.
- 6.22. Overall, in the context of these limited issues, and with the appeal schemes in place, landscape and visual issues are not sufficient to support a prospective reason for refusal.

PREFACE

The National Planning Policy Framework makes a clear commitment to conserving the natural environment in the planning system and recognises that it has a key role to play in the achievement of sustainable development. The Framework principles and policies make clear that planning should take account of the different roles and character of different areas, recognising the intrinsic character and beauty of the countryside and promoting local distinctiveness. Planning policies and decisions should be based upon up-to-date and relevant evidence about the landscape characteristics of the area and the primary tools for achieving this are landscape character assessments and, where appropriate, assessments of landscape sensitivity.

Fareham Borough Council is currently undertaking a review of its adopted Local Plan and commissioned *LDA Design* to up-date and expand upon the previous Fareham Landscape Assessment, undertaken in 1996, to provide robust evidence to inform Local Plan policy and planning decisions. The study brief included three main components:

▣ Landscape character assessment - a review of the baseline 'audit' of the character of the Borough landscape provided by the 1996 Landscape Character assessment, updated as necessary. The aim is to improve understanding of the key characteristics of the landscape that make places distinctive and different from one another, rather than better or worse;

- ▣ Landscape Sensitivity Assessment - detailed analysis and judgements regarding the value of the landscape and its sensitivity to change. The aim is to assist the Council in the evaluation of possible development options/alternatives to meet housing needs in the Local Plan Review and to inform the assessment of potential impacts on the landscape when determining planning applications;
- ▣ Designations Review - a review of landscape designations within the Borough, with specific reference to 'Strategic Gaps' and 'Areas of Special Landscape Character', but also 'other areas of protected or valued landscape designations'. The aim is to assist the Council in framing policy related to landscape protection, strategic gaps and settlement boundaries within the review of the Local Plan.

These components are presented in three separate 'parts', supported by appendices, and together form the 2017 Fareham Landscape Assessment. It should be emphasised that the assessment findings are based upon the professional judgement of the qualified landscape architects/planners within the consultant team and have not been influenced by, nor tested against, the opinions of the Council or the public.

LLCA 8.1 - WOODCOT

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

LANDSCAPE CHARACTER, QUALITY AND VALUE

This area forms part of the easternmost extent of the Stubbington–Fareham Strategic Gap. It is bounded by Newgate Lane to the west, beyond which lie the Newlands Solar Farm and Peel Common Waste Water Treatment Works. Out-of-town retail uses border the area to the north, while the eastern boundary is shared with the western edge of the Bridgemary area of neighbouring Gosport district. The southern boundary is formed by Woodcote Lane.

The LLCA is divided into two sub-areas, reflecting different land uses and their effects on intrinsic landscape character and quality. **Area 8.1a** comprises the land between Woodcote Lane in the south and Speedfield Park Playing Fields in the north. This area shares the typically flat, low-lying character of the coastal plain landscape that extends south and westwards to the Solent, but lacks the very expansive and denuded character of these areas. It is characterised by medium-scale, regular shaped fields, mostly under arable cultivation, bounded by a network of drainage ditches and a relatively intact structure of hedgerows, albeit heavily trimmed with some gappy sections and few mature hedgerow trees. Internally, the area has an open character but tree belts form taller, denser boundaries around the periphery of the area, especially to the north, east and south, which give the area a sense of enclosure from surrounding urban areas. The western boundary along Newgate Lane is more open and allows some intrusion from passing traffic but the area is devoid of built development (apart from farm buildings at Peel Farm) and retains a predominantly unspoilt, rural, agricultural character with limited intrusion from surrounding urban influences.

Area 8.1b is comparatively small and comprises two separate areas of recreation land and playing fields collectively referred to as Speedfields Park, connected by a surfaced pedestrian and cycle route. Both areas comprise amenity grassland and are enclosed by well-treed boundaries. The larger field adjacent to Newgate Lane contains a pavilion building and small car park along its northern boundary, with a variety of rugby posts, football goalposts and tall flood lights located in the centre of the field. The smaller field to the north east contains a single sports pitch and a children's play area in the south west corner. Despite retaining some of the characteristics of the adjacent landscape type (e.g. flat landform, well-defined hedgerow and tree boundaries and a regular field pattern) the introduction of built elements, car parking and management for sports use give the area a suburban, rather than rural agricultural, character.

The landscape of area 8.1 is not covered by any current national or local landscape designation. Scenic quality is not exceptional and is affected by some localised intrusion of urban features around its periphery and within area 8.1b. It does not contain any features of recognised conservation interest and it lacks the sense of remoteness and natural qualities that are found in other parts of the coastal plain. It has the sense of a 'landlocked' piece of countryside and the area's urban context is perceptible even if not dominating. However, area 8.1a does retain a predominantly rural, agricultural character and has a reasonably intact structure of hedgerows and significant tree cover around its periphery that contributes to its aesthetic appeal. The landscape is generally well-managed as agricultural land and in good condition, with limited evidence of 'fringe' uses or influences (e.g. horse paddocks, vacant land, unkempt fencing, fly tipping etc.). Overall, landscape value in area 8.1a is judged as moderate to high while in area 8.1b it is moderate, although the well-treed boundaries are valuable landscape features.

LLCA 8.1 - WOODCOT

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area lacks the very open, expansive character of other parts of the coastal plain (including adjacent land within the strategic gap to the west) but it nevertheless has a relatively open and large-scale character which makes it susceptible to change.

The distinctive character of **area 8.1a** relies on this openness, its rural agricultural character and the absence of prominent urban features, and it would be difficult to accommodate significant new development without affecting these characteristics or altering the balance between a predominantly rural or predominantly urban landscape. So, overall, the sensitivity of the landscape resource within area 8.1a is judged to be high (moderate to high value and high susceptibility to change), with very limited capacity to accommodate development without a significant impact on the integrity of the area's rural, agricultural character.

The existing balance will be affected, however, with the approved construction of the new southern section of Newgate Lane, which will provide a new connection from Newgate Lane to Peel Common Roundabout and a junction and link road to access the existing route of Newgate Lane. The road alignment just clips the extreme south-western corner of area 8.1b but cuts right through the middle of the southern half of area 8.1a and will inevitably introduce further activity, noise and urbanising features into the agricultural landscape, as well as resulting in physical disturbance to land and tree/vegetation cover.

However, the road corridor is relatively narrow and unaffected land within the rest of the area should be of a sufficient scale to remain viable as farmland and to maintain its essentially rural character. Mitigation proposals include new hedgerow and tree planting along the route to reduce its visibility and impact on the landscape and, if this is effective, the road itself may not have an overwhelming urbanising effect across the area as a whole in the longer term. However, significant further development in addition to the road scheme would almost certainly have this effect, potentially tipping the balance towards a predominantly urban character.

The sensitivity of the landscape resource within **area 8.1b** is slightly lower, as its rural character is already influenced by the proximity to built up areas/roads and the development of sports facilities and amenity uses within the area. Despite its more urbanised character, the area nevertheless has some value as part of the Borough's amenity landscape resource (as well as a role in the strategic gap and local GI network, see below) and its essentially open, undeveloped character would be significantly altered by further encroachment of built development. However, strong boundary vegetation would help to limit the influence of development within this area on the more rural landscape of area 8.1a to the south, particularly if located within the smaller northern field which is contained within very strong, well-treed boundaries.

LLCA 8.1 - WOODCOT

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

VIEWS, VISUAL FEATURES AND VIEWERS

Long distance visibility towards the area is low due to the typically low-lying and flat topography of the Borough (including the area itself), and the screening effects of boundary vegetation and surrounding built form. The area may be visible from some local elevated viewpoints (e.g. tall buildings in Fareham) and from higher ground at Portsdown, but from this distant location it forms an insignificant part of a wide panorama of the urban and coastal plain landscape.

Shorter-distance views into the area from built up areas to the north and east are largely filtered through established trees and boundary vegetation or interrupted by built form. Short distance visibility from the east is limited to private views from the rear of properties that back onto the area within the residential suburb of Bridgemary (e.g. Tuke's Avenue, Pettycot Crescent and around Heron Way). Short-distance visibility from the north is also significantly restricted by planting along the southern edge of the retail park, but there are open views through fencing into area 8.1b from the footpath that runs along the northern edge of the sports ground from Newgate Lane. Views of area 8.1a are largely screened from this direction by intervening vegetation.

Views from roads and public places to the south of the area are also very limited but there are some occasional views into the southern end of area 8.1a over or through the hedgerow that runs along Woodcote Lane/Brookers Lane at the far south of the area. Private properties along Woodcote Lane will experience similar views from upstairs windows.

The most significant views are from Newgate Lane which runs along the western side of the area, and from a number of properties along the roadside. Open views across large parts of areas 8.1a and b are possible from much of this length of road, where the roadside hedgerow is absent, gappy or trimmed to a low level. Land further to the east is less visible because of some intervening hedgerows or tree cover within the area.

Most of the available views are across open, undeveloped and relatively attractive countryside, with a strong backdrop of mature trees and limited evidence of built development or other urbanising features. The exceptions to this are views from the southern section of Newgate Lane between Peel Farm and Woodcote Lane, where a foreground of small-scale horse-grazed paddocks with wire fencing, shelters etc lends a fringe character to the view, and views into the sports fields in area 8.1b which have a more suburban character.

Currently, the main viewers are local residents within properties around the immediate periphery of the area, motorists and pedestrians on Newgate Lane and users of the sports facilities, public open space and footpath within area 8.1b. In future, the new alignment of Newgate Lane will increase the extent of the views available to road users, opening up most of area 8.1a to potential views from the road. Roadside planting will mitigate some of these effects but will take time to become effective.

LLCA 8.1 - WOODCOT

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Overall, visual sensitivity in this area is moderate to high. Although it is screened from longer-distance views, a large proportion of **area 8.1a** is highly visible from short distance views from Newgate Lane to the west, and it is overlooked by a number of properties around its periphery through or over boundary vegetation. The high intervisibility within the area means that these views are quite extensive across the area and they generally have an attractive, unspoilt rural character.

The extent of visibility will be exacerbated, at least over the short term, by the introduction of the new alignment proposed for Newgate Lane. This will open up additional views across the area from the new road and will affect the character of rural views across the area for a period of time. Roadside planting will mitigate some of these effects but will take time to become effective and visual sensitivity of the remaining undeveloped area will remain high.

While road users are only moderately susceptible to change, because of their focus on the road and fleeting nature of views, local residents are likely to be more focussed on the landscape and their surroundings and will be highly susceptible to change. The introduction of further development into the agricultural landscape is likely to have a significant impact on the character and quality of existing predominantly rural views, unless it can be successfully integrated within a substantial framework of new vegetation.

Area 8.1b is slightly less visually sensitive, partly because it benefits from more extensive tree cover around its boundaries, and also because the existing character of the views is already affected by some urbanising influences. Nevertheless, local residents and recreational users of the public open space and PRow network are highly susceptible to change and will value the existing open, essentially undeveloped character of this recreational landscape. Their visual amenity would be significantly affected by the introduction of built development within this area.

LLCA 8.1 - WOODCOT

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

CONTRIBUTION TO SETTING AND SETTLEMENT CHARACTER

The area lies within the lower-lying parts of the Borough, forming part of the coastal plain that slopes gently up to the foot of Portsdown Hill in the far north. While the area does not play a significant role in the topographic setting of the urban area, together with LCA7 to the west it forms part of a swathe of largely undeveloped agricultural landscape that lies between the urban areas of Fareham in the north, Stubbington in the west and Gosport in the east, providing clear visual and physical separation of these settlements. The significant role of the area in separating and preventing coalescence of these settlements is enshrined in policy, with the area designated a Strategic Gap in the Fareham Borough Local Plan.

The visual separation between settlements is apparent in all short distance views into the area from the edge of Fareham to the north, Newgate Lane to the west, Woodcote Lane to the south and in private views from Bridgemary (residential suburb of Gosport) in the east. The substantial vegetation along the northern and eastern boundaries provides strong definition of the edges of the urban areas of Fareham and Bridgemary and marks a clear distinction between town and country (albeit slightly blurred by the amenity uses in the north). This helps to reinforce the separate identity of each settlement and also provides the urban areas with an attractive, essentially rural setting.

The alignment of the approved Newgate Lane South encroaches within the Gap but, in itself, should not fundamentally alter the sense of separation, indeed it may in some ways strengthen it. The lack of roadside development along the new route will reinforce the experience of moving out of Fareham, passing through an area of undeveloped countryside and entering the urban area of Gosport beyond the Peel Common roundabout. Similarly the physical and visual gap across the area between the edge of Bridgemary and Peel Common may be more readily appreciated in views from the road as it passes through the middle of the gap between these two settlements.

The role of the area in separating Stubbington and Gosport is less easily perceived because of intervening development and other features that interrupt views, and occupy land, between the two areas. These include the Newlands Solar Farm, the waste water treatment plant and housing development along the western side of the Newgate Lane corridor at Peel Common. Nonetheless, the area does have a critical role in preventing the coalescence of these areas and this is likely to become more significant with the future redevelopment of land at MCA Daedalus and construction of the Stubbington Bypass to the west, within the existing gap between built areas.

The area does not play a significant gateway role for the Borough as a whole, being some way to south of the M27 and main railway line and therefore not visible from the main approach routes. However, it does provide a strong rural backdrop along Newgate Lane which forms part of a key approach into the Borough from Gosport District to the south via the B3334. This reinforces the sense of moving between settlements and districts.

Overall, **area 8.1** plays an important role in defining the edges, separate identity and settings of Fareham and Gosport and a critical role in preventing their coalescence. It also makes an important contribution to the swathe of landscape that currently separates Stubbington from Gosport, a role that may become more critical to maintain with the redevelopment of the MCA Daedalus site in future years.

LLCA 8.1 - WOODCOT

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Given the area's designation as part of the Strategic Gap and the role it plays in preventing coalescence between the settlements of Fareham, Stubbington and Gosport, the area is highly sensitive to change. The landscape lacks any strong landform feature (e.g. ridges or valleys) or a mature framework of woodland that could potentially contain and provide a strong landscape edge to any major extension of built form into this area. Intrusive development within the area would inevitably erode the visual and physical separation that currently exists and potentially alter the character of the landscape settings of the two settlements from predominantly agricultural to predominantly urban. Ultimately, the function and integrity of the area as farmland could be significantly eroded to the point where the gap becomes a corridor of greenspace between urban areas, or an 'urban park', rather than a functioning area of agricultural landscape with a distinct character and identity.

The proposed new bypass could potentially erode the integrity of the existing gap if it is regarded as forming a potential new edge for development. If the rural, undeveloped and open character of this area is to be maintained, it will be crucial to keep the urban boundaries as tightly drawn as possible and avoid infilling the land between the existing urban edges and the new road. Overall, therefore, there is very limited scope to accommodate development without a significant impact on the integrity of the area's rural, agricultural character and the role it performs in maintaining the separate identity and character of the settlements and their landscape settings.

LLCA 8.1 - WOODCOT

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

CONTRIBUTION TO
GREEN INFRASTRUCTURE NETWORK

This area does not support a wide range of GI assets in terms of biodiversity or landscape features (there are no designated features) but the area as a whole does make a contribution to the local GI network as an extensive area of undeveloped greenspace between the urban areas of Fareham and Gosport, albeit with limited public access. The tree lined boundaries and reasonably intact structure of hedgerows provide a valuable framework of vegetation within this large-scale, intensively managed landscape and the playing fields, public open space and footpath within area 8.1b are valuable recreational assets for local people. The footpath along the northern edge of the area and Woodcote Lane/Brookers Lane in the south provide east-west access links between the residential suburbs of Gosport across the strategic gap to Stubbington and beyond to the Meon Valley. There are no other PRow or access routes across or within area 8.1a.

The PUSHGI strategy identifies a sub-regional scale blue corridor following the drainage network that runs through the western side of the area southwards to join the River Alver (within Gosport District). The strategy includes a project (C7) to strengthen wildlife corridors connected to the River Alver but this is focused on the Alver Valley outside of the Borough. The Fareham GI strategy does not identify any specific projects within the boundary of this area.

LLCA 8.1 - WOODCOT

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area's GI value lies in its largely open, undeveloped nature, the public open space at Speedfields Park and the functional connections between Newgate Lane and Bridgemary provided by the public footpath to the north and Woodcote Lane to the south. The area is moderately sensitive to change. Any development that compromised the PRoW network or the sense of openness and being 'in the countryside' would have an adverse effect on the GI network.

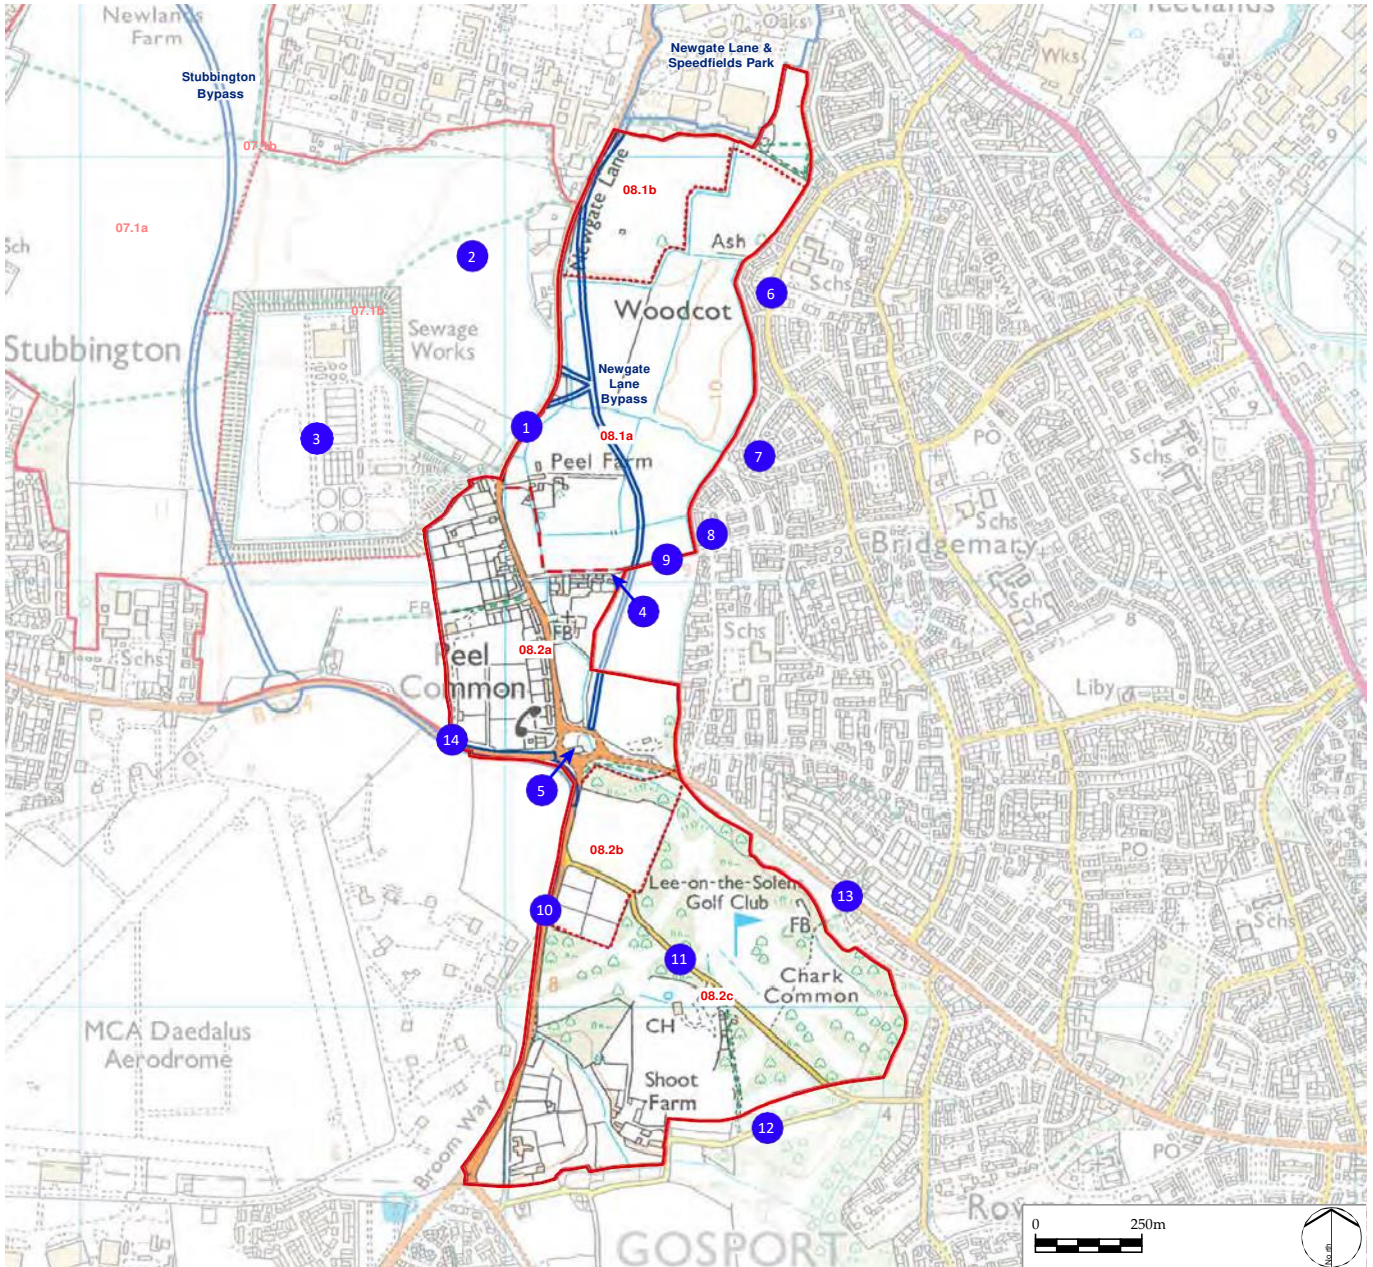

This area would benefit from improvements and extension of the local GI network, through major investment in the reinstatement or creation of hedgerows, woodlands and other habitats that have been lost or damaged by agricultural intensification, and through the extension of public open space or access connections through the area.

The main impacts of new road on GI resources are its potential interference with the east-west footpath link between Bridgemary and Peel Common that crosses the area along Woodcote/Brookers Lane, the loss of small areas of amenity space within the Speedfields Park and Brookers Field Recreation Grounds and the loss of some trees and hedgerow vegetation along the road alignment. Mitigation proposals will offset much of this impact.

LLCA 8.1 - WOODCOT

DEVELOPMENT CRITERIA AND ENHANCEMENT OPPORTUNITIES

As a whole, this area is of high sensitivity primarily on account of its critical role in preventing the coalescence of the urban areas of Fareham, Bridgemary and, to a lesser extent, Stubbington, and in defining the edges, setting and separate identity of these settlements. The relatively small size of the area, the high degree of intervisibility and its generally unspoilt, rural character make it particularly vulnerable to change. The generally open nature of the landscape means that it is difficult to integrate development without it being highly visible and potentially affecting the rural undeveloped character across a wide area, as well as eroding the physical, visual and perceived gap between settlements. The situation is further complicated by the proposed new road which will have some effect on the integrity and character of the landscape resource and undeveloped gap. Even a small amount of encroachment of further built development within the area could exacerbate these effects to the point at which the character of the whole area may be fundamentally altered.

There may be potential for some modest, small scale development associated with existing recreational land uses and built form within area 8.1b, as long as it is closely related to existing features and can be successfully integrated within the existing structure of hedgerows and trees without altering the essentially ‘undeveloped’ character of the amenity landscape or the wider agricultural landscape of area 8.1a.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban setting and green infrastructure, development proposals will need to:

- ▣ Protect the open, predominantly agricultural and undeveloped, rural character of area 8.1a;
- ▣ Maintain and strengthen the existing structure of trees, hedgerows and other mature vegetation, to maximise its landscape and wildlife value and to minimise impacts on the rural character of the landscape;
- ▣ Maintain the essentially open, undeveloped character of the public open space, playing fields and sports facilities within area 8.1b, and be designed to relate closely to the existing structure of trees hedgerows and existing characteristic built features within the area;
- ▣ Avoid any major incursion of the urban ~~aa~~ into the countryside beyond existing well-defined boundaries, or create significant new pockets of urban or urbanising development within open farmland;
- ▣ Protect the area’s role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development strung out along road corridors (e.g. along the existing and proposed new alignment of Newgate Lane) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;
- ▣ Maintain significant distance and separation from the corridor of the new road to minimise its urbanising effects upon the rural character of the area;
- ▣ Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the open, flat landscape;
- ▣ Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area;
- ▣ Provide substantial new investment in the landscape through extensive tree, hedgerow and woodland planting using native broadleaved species appropriate to the locality and soil conditions and habitat creation to diversify the intensively farmed landscape;
- ▣ Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

LANDSCAPE CHARACTER, QUALITY AND VALUE

Landscape character, quality and value

This area forms the southern part of the Woodcot-Alver Valley LCA and the south-eastern part of the wider Stubbington–Fareham Strategic Gap. The area forms part of the flat, low-lying coastal plain but is very different in character and scale from the open agricultural landscape to the north and west. It is characterised by a mixed pattern of wooded common, small-scale pasture and ribbon development along the corridors of the River Alver and Newgate Lane and is bounded to the east by the urban edge of Gosport, to the west by the Daedalus airbase, to the north by the Peel Common Waste Water Treatment Works and arable farmland, and to the south by the open amenity land of the Alver Valley.

Area 8.2a comprises a strip of land on either side of Newgate Lane, extending from Peel Farm in the north to the Peel Common roundabout in the south. To the west of the road, the area is occupied by residential ribbon development backed by gardens and a small-scale pattern of fields, paddocks and other plots of land, contained by strong boundary vegetation to the rear. The eastern side of the road is characterised by a similar patchwork of small-scale, horse grazed pastures, built development south of Woodcote Lane (including housing, church and care home), gardens and small parcels of land enclosed by woodland, trees and hedgerows. In the far south-east corner is an area of public open space, including sports pitches and associated buildings. The character of this corridor is significantly affected by the influence of busy roads, street lighting, built development and other urban land uses, while the management of the small-scale pastures and plots of land - with their associated rather ramshackle fencing and structures - lends a distinct fringe character to the remaining unbuilt landscape. This situation will be exacerbated by the construction of the proposed new Newgate Lane-Peel Common bypass which will further fragment and intrude upon areas of undeveloped landscape. Overall landscape quality is therefore substantially degraded although the strong structure of vegetation that encloses this area is of some landscape value.

On the southern side of the Peel Common Roundabout lies Chark Common, which marks a distinct change in character from the open arable landscape of the northern part of the Woodcot-Alver Valley LCA, to a landscape which is strongly enclosed by extensive cover of woodland and trees, within which small-scale fields or open spaces are seemingly ‘carved out’ from the woodland cover. Within the overall area, **area 8.2b** is distinctive in that it forms a relatively large, regularly shaped parcel of open land, divided into smaller horse-grazed paddocks by fencing. This area shares some of the fringe characteristics of the roadside paddocks further north (e.g. fencing, land management, structures etc) but has a less urbanised context and is framed by a strong, attractive backdrop of woodland, mature trees and hedgerows. Its quality is less degraded and it retains a semi-rural character.

The remainder of the Chark Common area (**area 8.2c**) is dominated by the Lee-on-Solent Golf Course, which extends across the majority of the area, excluding the far south-west corner (comprising fields in use for horse-grazing along with former farm buildings converted for residential use). The landscape is characterised by open areas of grassland, heathland and wetland habitats (associated with the River Alver) contained within a strong structure of woodland belts, copses, mature trees and scrub. Parts of the land are intensively managed as part of the golf course (e.g. greens, fairways, bunkers etc.) and there are associated buildings and structures, which have an amenity character that somewhat detracts from the rural character of the landscape. However, most of the area is designated as a SINC (for its woodland, heathland and wetland habitats) and retains an attractive, enclosed and well-treed character with some ‘semi-natural’ qualities. The strong tree cover also provides an effective buffer to the influence of surrounding roads and neighbouring development within Gosport. The area is generally unspoilt and of relatively high landscape quality although it is not covered by any current national or local landscape designation.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The sensitivity of the landscape resource varies within this overall area. **Area 8.2a** is already substantially degraded by urban influences and has a predominantly 'fringe' character which reduces its sensitivity to change. This will be exacerbated by the construction of the proposed bypass. Further development within this area would further erode the extent of surviving 'undeveloped' land but would not have a significant effect upon the overall character and quality of the landscape resource. Notwithstanding its value as part of the strategic gap or other roles, in landscape resource terms alone this area has relatively low sensitivity and high development potential.

Area 8.2b also has fringe qualities but has not been degraded in the same way. It retains an essentially rural, pastoral character that is susceptible to change and would be significantly affected by the introduction of permanent built development. The area is physically and visually detached from other built form by the strong surrounding woodland framework and significant development would appear as an isolated area of built land within open countryside. A section of the western boundary along Broom Way is open and there is a visual relationship between the area and currently undeveloped land within the Daedalus site to the west which would also be affected by development within this area. Redevelopment proposals for the Daedalus site may change the situation but current indications suggest that the undeveloped 'green' character of this corner of the site is to be maintained. Overall, therefore, landscape sensitivity is judged as moderate to high and the potential for development is low.

Area 8.2c is highly sensitive to change. Although its use as a golf course has altered the underlying character of the landscape it nevertheless has an attractive wooded and enclosed character and supports a mosaic of other habitats and features of landscape and ecological value. Built development would undoubtedly intrude upon its quiet, semi-rural and secluded character. There may be some modest potential for accommodating small-scale development (i.e. individual buildings) within the south west corner of the area, where it is associated with existing built form and can be more successfully integrated within the existing vegetation structure, but otherwise there is very limited potential for development within the area.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

VIEWS, VISUAL FEATURES AND VIEWERS

The area's low lying position within the coastal plain means that there are few long distance views. The area may be perceived as one part of a much wider panorama taking in the urban and coastal landscapes in views from higher ground to the north of the Borough. However, its small size and lack of landmark features means the area is generally indistinguishable from the wider landscape within long-distance views.

More locally, large parts of **area 8.2a** are visible from roads, adjacent dwellings, lanes, public rights of way and open spaces within the area itself, although there are some small pockets of land enclosed behind built form and strong boundary vegetation that are less visible from public areas. The character and quality of the available views is already heavily influenced by urban characteristics and would not be fundamentally altered by additional built development.

Area 8.2b is largely enclosed within a strong wooded framework which restricts its visibility from surrounding areas but it is open along parts of its western boundary, allowing some direct views from adjacent Broom Way. There are also occasional filtered glimpses through the roadside trees along Brune Lane, which cuts through the middle of this area. Given that the main viewers will be road users, the visual sensitivity of this area is moderate and could be reduced further by mitigation planting to close the gap along the western boundary, although this will take time to become effective.

Area 8.2c is generally of low visual sensitivity. The extensive cover of trees and woodland around and within the area prevent all but glimpsed views from surrounding roads, through trees and gaps in the boundary vegetation. There are no views from neighbouring urban areas to the east. There is a public footpath that cuts through the golf course, linking Shoot Lane with Brune Lane, and another sort section of footpath into the area off Rowner Lane on the northern side of the area, otherwise there are no other publicly accessible viewpoints in this area.

The main viewers of this area are therefore local residents within Peel Common (area 8.2a), users of the main road network (Newgate Lane, Broom Way) and minor local lanes (Brune Lane, Shoot Lane), users of the limited network of PRow and open spaces, and golf course members. Apart from some attractive views within area 8.2c, the value of the landscape as a visual resource for these receptors lies primarily in its character as undeveloped land rather than its intrinsic scenic quality.

© Barry Shimmion

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Visual sensitivity is relatively low within this area. Area 8.2a is highly visible but the character of the views is such that further development is unlikely to have a major impact on visual amenity. Area 8.2b is visually well-contained apart from a section of its western boundary, but this visual exposure could be mitigated by additional planting to close the gap. Likewise, area 8.2c is also highly visually contained by the extensive cover of trees and woodland within and around the area, with very limited publicly accessible views. However, balanced against this is the relatively unspoilt character of the views in the Chark Common area which are highly susceptible to change, and the high level of sensitivity of people using the PRow network (albeit very restricted) and otherwise accessing the area for recreational purposes, who appreciate their surroundings and will be very aware of changes.

Across much of the area, therefore, there are limited opportunities to integrate development into the visual environment without unacceptable adverse effects on the character and quality of existing views and on the visual amenity of sensitive viewers. However, there may be some modest scope for accommodating small-scale development (i.e. individual buildings) within less visible, well-contained pockets of land within areas 8.2a and in the south-western corner of area 8.2c, where the existing vegetation structure has the potential to limit effects on high quality views and visual amenity.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

CONTRIBUTION TO SETTING AND SETTLEMENT CHARACTER

The area lies within the lower-lying parts of the Borough, forming part of the coastal plain that slopes gently up to the foot of Portsdown Hill in the far north. While the area does not play a significant role in the topographic setting of the urban area, together with LCA7 to the west (and area 8.1 to the north) it forms part of a swathe of largely undeveloped landscape that lies between the urban areas of Fareham in the north, Stubbington in the west and Gosport in the east, providing clear visual and physical separation of these settlements. The significant role of the area in separating and preventing coalescence of these settlements is enshrined in policy, with the area designated a Strategic Gap in the Fareham Borough Local Plan.

The role of **area 8.2a** as part of the gap is evident to the east of Newgate Lane, where the strip of roadside paddocks forms part of a wider corridor of undeveloped landscape between the road and the western edge of Bridgemary. However, the role of this area in maintaining the gap westwards towards Stubbington is less easy to perceive from the Newgate Lane corridor as views in this direction are blocked by built development along the roadside at Peel Common. Nevertheless, when viewed from the west (from the Gosport Road) it becomes apparent that Peel Common is an isolated small settlement that lies within the wider gap, rather than defining its western boundary or connecting to a larger urban area. It will be vital to maintain this ‘isolation’ of development at Peel Common if the physical and visual integrity of the wider gap is to be maintained.

The Peel Common Roundabout is a critical ‘pinch point’ within the gap between Peel Common and the edge of Bridgemary where there is a real risk of the two areas coalescing. This will be further exacerbated by the new bypass which eats into the remaining undeveloped land to the north of the roundabout and also, potentially, by redevelopment of the Daedalus site to the south. It will be vital to protect the undeveloped landscape within the public open space to the east of the roundabout in order to maintain a physical, visual and perceptual gap between the built areas.

Areas 8.2b and c also play a pivotal role in maintaining separation of urban areas and as a link between the upper and lower parts of the Alver Valley corridor. This triangle of semi-rural, heavily wooded landscape is important not only in physically and visually separating built areas at Peel Common and Bridgemary but also in separating Bridgemary from the northern edge of Lee-on-the-Solent. The redevelopment of MCA Daedalus may potentially exacerbate the perceived closing of the gap between Lee-on-the-Solent and Peel Common. It will be essential, therefore, to maintain the undeveloped character of all sides of this triangle, avoiding encroachment of development along Broom Way, Shoot Lane and Gosport Road.

This southern area also forms a vital link in the wider Alver Valley landscape corridor which extends southwards into Gosport District to the coast, providing a distinct edge and landscape setting to the urban areas to the south. It will be very important to maintain the integrity of this continuous corridor of undeveloped landscape and avoid the encroachment of development within and across it.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Given the area's designation as part of the Strategic Gap and the role it plays in preventing coalescence between the settlements of Fareham, Stubbington, Bridgemarky and Lee-on-the-Solent, the area is highly sensitive to change. The area also contributes to the perceived sense of separation between Gosport District and Fareham Borough. Any development that reduced the physical or visual separation between these settlements would have an adverse effect on the integrity of the gap and on the area's contribution to the distinct identity and settings of the surrounding urban areas. Consequently, the area offers very limited development potential in respect of its role in maintaining the separation and setting of settlements. The only opportunities may lie within areas that are closely associated with existing development (e.g. at Peel Common or in the SW corner of area 8.2c) and can be integrated within the landscape without any physical or perceived encroachment within the gap.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

CONTRIBUTION TO GREEN INFRASTRUCTURE NETWORK

The area's main contribution to the GI network is through its role as an extensive area of undeveloped land between the urban areas of Fareham and Gosport and, in particular, as part of the wider corridor of greenspace and habitats that follow the course of the River Alver, identified within the PUSH GI strategy as a 'sub-regional scale blue corridor'. The strategy includes a project (C7) to strengthen wildlife corridors connected to the River Alver but this is focused on the Alver Valley outside of the Borough.

The northern part of the area (8.2a) does not support a wide range of designated GI assets but the framework of mature hedgerows and trees and the playing fields to the east of the Peel Common Roundabout are all valuable GI resources in this urbanised area. Woodcote Lane and the footpath linking Newgate Lane with Gosport Road also provide a valuable access link connecting Bridgemary with Stubbington across the middle of this area.

The southern part of the area (**areas 8.2b and c**) contains significant biodiversity assets in the extensive woodland, grassland, heathland and wetland habitats (designated as a SINC) within the golf course and surrounding area but is relatively inaccessible to the public, with only three short lengths of public footpath and no public open space. An extension of public access in this area, particularly along the river corridor to link with the Alver Valley Country Park to the south (in Gosport District) would be desirable. The Fareham GI strategy identifies project BW14 which aims to create 'cross boundary links from South Fareham Gap and Daedalus to the Alver valley Country Park' and 'to provide a linear corridor between Stubbington, Lee-on-the-Solent and Gosport'.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area's primary GI value lies in its largely undeveloped nature and the extensive network of woodland, grassland, heathland and wetland habitats within the corridor of the River Alver and within Chark Common in the south of the area. These assets are particularly scarce and valuable within the heavily urbanised and pressured context of this part of the Borough and are therefore very sensitive to change.

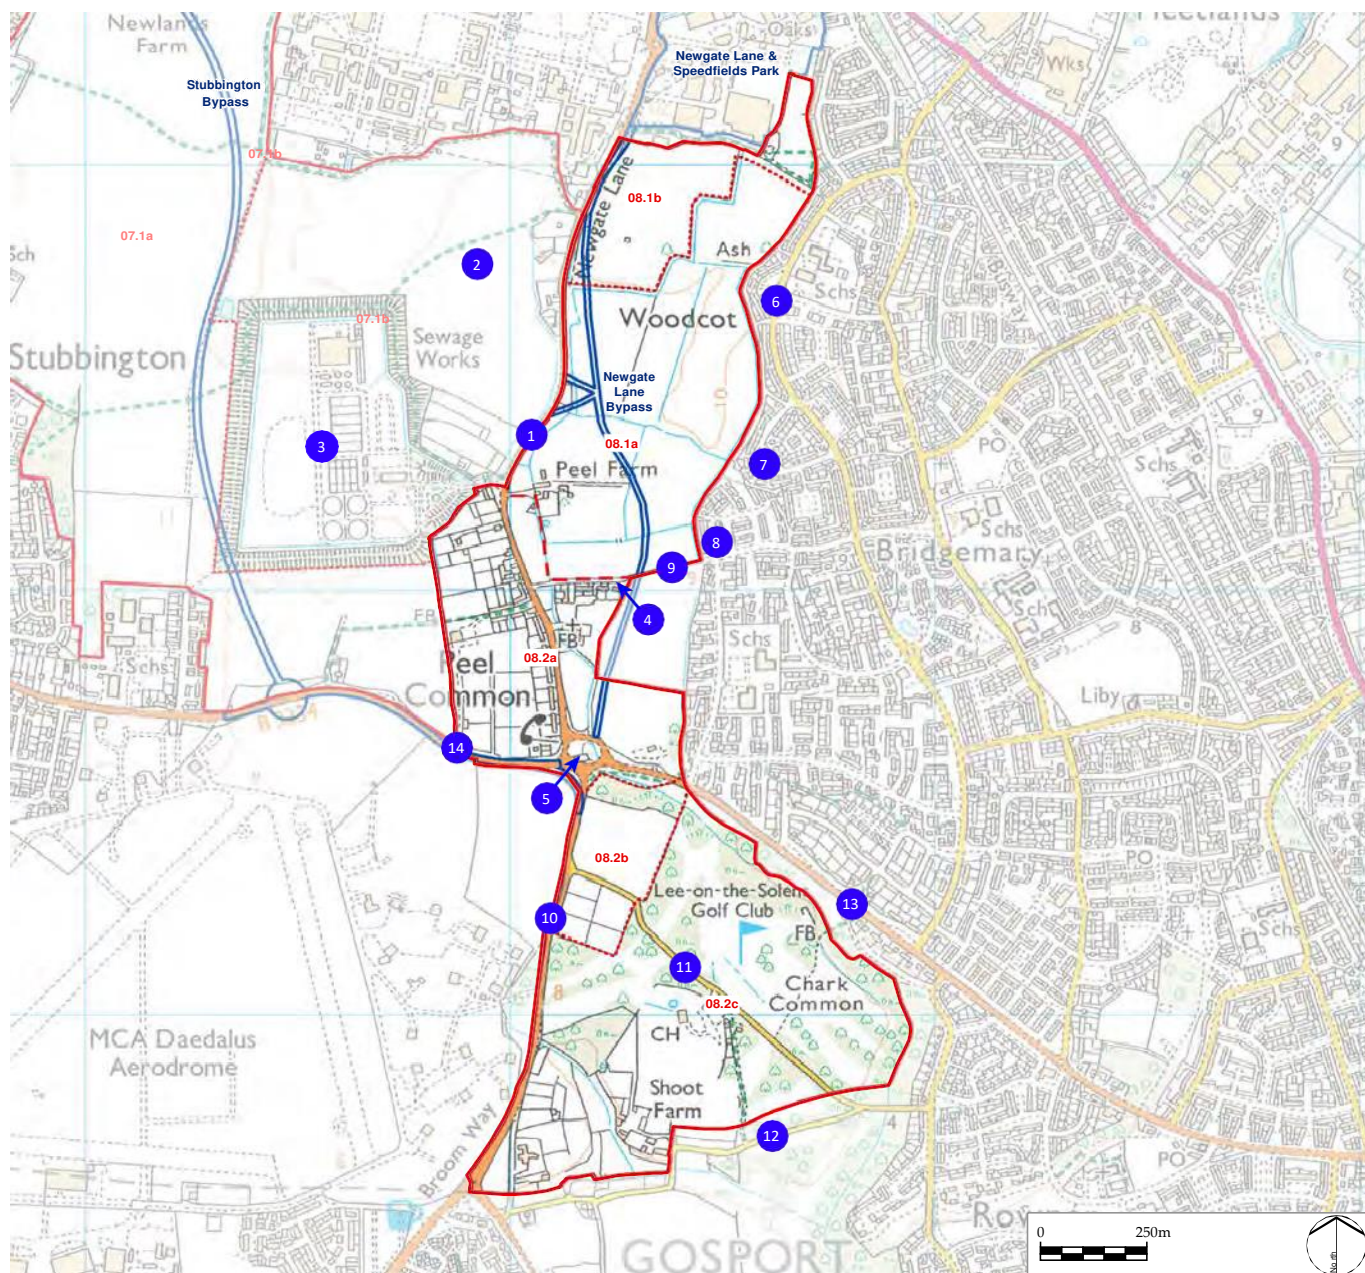

The existing network of public access an open space is fairly sparse within the area and existing features need to be protected and their function and quality enhanced. The area would benefit from improvements to the local access network to provide improved east-west links between urban areas and the wider access network of the coastal plain, and north- south links to connect the northern part of the river corridor with the Alver Valley Country Park and the coast.

Any new development would need to maintain the largely 'undeveloped' character of the area, ensure the protection of features of landscape or biodiversity value, and maintain and extend the provision of access and public open space opportunities. There is very limited scope for this to be achieved in this highly constrained area.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

DEVELOPMENT CRITERIA AND ENHANCEMENT OPPORTUNITIES

As a whole, this area is of high sensitivity primarily on account of its critical role in preventing the coalescence of the urban areas of Fareham, Bridgemary, Lee-on-the-Solent and, to a lesser extent, Stubbington, and in defining the edges, setting and separate identity of these settlements. The narrowness of the gap between development at Peel Common and the edge of Bridgemary means that this area has a particularly vital role in maintaining physical, visual and perceived separation and even a limited amount of development in the ‘wrong’ place, particularly along the main roads that enclose the southern part of the area, could threaten the integrity of the gap. The situation is further complicated by the proposed new bypass which will inevitably have some effect on the integrity and character of the landscape resource and undeveloped gap and further ‘squeeze’ the gap at its narrowest point.

Other key sensitivities include the important range of habitats within the Chark Common area and the area’s contribution to the corridor of undeveloped greenspace (albeit largely inaccessible) along the course of the River Alver, from Fareham to the Alver Valley Country Park and beyond to the coast.

There may be potential for some modest, small scale development associated with existing built form at Peel Common or in the far south-west of the area, as long as it is closely related to existing features and can be successfully integrated within the existing structure of hedgerows and trees without altering the essentially ‘undeveloped’ character of the landscape or threatening the integrity of the gap.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban setting and green infrastructure, development proposals will need to:

- ▣ Safeguard the area’s vital role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development along road corridors (e.g. Broom Way, Shoot Lane and Gosport Road) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;
- ▣ In particular, protect and strengthen the undeveloped character of the public open space to the east of the Peel Common roundabout;
- ▣ Maintain the distinctly ‘isolated’ nature of settlement at Peel Common and ensure that any potential small-scale infill development within this area effectively ‘rounds off’ rather than extends the settlement boundary, to avoid the risk of physical or perceived coalescence with other built areas;
- ▣ Protect the semi-rural, undeveloped character of areas 8.2b and c;
- ▣ Maintain and strengthen the existing structure of woodland, trees, hedgerows and other mature vegetation in all parts of the area, to maximise its landscape and wildlife value;
- ▣ In particular, maintain and enhance the mosaic of woodland, heathland, grassland and wetland habitats of value within the Lee-on-the-Solent golf course at Chark Common and encourage further habitat creation and diversification within intensively managed areas to maximise wildlife and landscape value;
- ▣ Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the landscape;
- ▣ Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area, particularly along the River Alver corridor and with the Country Park to the south;
- ▣ Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.
- ▣ Use native broadleaved species appropriate to the locality and soil conditions in new tree and hedgerow planting.

 -  Continuity of green infrastructure connections to the Alker Valley
 -  Direct connection to existing settlement pattern

Eastern boundary vegetation (existing and proposed) will form a partial screen and help assimilate the development into the local landscape

Open spaces and landscape planting reinforce the defined edge along Newgate Lane

Existing vegetation (including hedgerows) retained where possible and used to define development parcels, reflecting scale and pattern of the local landscape

Retained sense of openness along 'old' Newgate Lane giving focus of open space within the settlement pattern

Executive Summary

Fareham Borough Council is in the process of producing a new Local Plan to address housing, employment and retail development requirements across the Borough up to 2037. Once adopted, the new Local Plan will replace the adopted Local Plan Part 1 (Core Strategy) and Local Plan Part 2 (Development Sites & Policies).

To support Local Plan development, Fareham Borough Council commissioned the Landscape Team, in Hampshire County Council, to undertake a technical review of:

- six proposed Areas of Special Landscape Quality (ASLQ).
- two proposed Strategic Countryside Gaps: Meon Gap and between Fareham and Stubbington.

Fareham Borough Council's recent past experience in the determining of two planning applications, identified the need to address the 'valued landscapes' of Fareham.

"Two recent planning appeal decisions demonstrated how the argument of valued landscapes could help to determine planning decisions. Both decisions were on sites located in the Lower Meon Valley (Land west of Old Street, Stubbington and Land east of Posbrook Lane, Titchfield) and the Inspectors recognised the high-quality landscape concluding that the Lower Meon is a valued landscape.

...with this in mind, the Council proposed the designation of valued landscapes as part of the Draft Local Plan Update consultation in the summer of 2019."(page 27, Fareham Draft Local Plan 2036)

There was also the need to clarify the role that Strategic Gap designation plays within planning policies in the Countryside, and establish the clear difference between a policy that addresses landscape quality and a policy that addresses the prevention of coalescence of settlements with separate identities, as:

"...Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities." (page 27, Fareham Draft Local Plan 2036)

This technical review is published at the Regulation 19 stage to support the proposed designations.

The technical review undertaken during March to July 2020, reviewed recent relevant documents and developed an appropriate and concise methodology for determining Areas of Special Landscape Quality (or ASLQ), based primarily on criteria from the Guidelines for Landscape and Visual Impact Assessment (GLIVIA) 3rd Edition, Box. 5.1, supported by other examples of good practice and case law.

As there is no standard national guidance on Strategic Gap determination, a methodology and set of criteria were established for determining Strategic Gap characteristics and boundaries through review and analysis of pertinent recent Strategic Gap proposals developed for other Local Plans and through Fareham Borough Council's own Strategic Gap history.

Executive Summary

The resultant analysis and site surveys of all Fareham Borough's Landscape Character Areas concludes that:

- The six proposed ASLQ put forward for designation in the Fareham Local Plan Supplement (Reg 18 consultation document, Jan-March 2020), can be considered as 'valued landscapes' as they scored highly against the assessment criteria and therefore should be identified for ASLQ designation in the Fareham Local Plan 2037, with some modifications made to boundaries, to bring them into line with the current Fareham Borough Landscape Character Assessment 2017, but also;
- Through this process, two further landscape character areas in Fareham Borough were identified as having equivalently 'valued landscape' characteristics and so it is recommended that Chilling-Brownwich Coastal Plain and parts of the Cams to Portchester Coast should also be designated.
- Conservation Areas where they sit in or adjacent to a proposed ASLQ should be included as part of the ASLQ because of their mutually supportive relationship.

The resultant analysis and site surveys of the two Strategic Gaps, conclude that:

- The Meon Strategic Gap is proposed for continued designation, having both strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence, that could result from continued pressure for expansion of the Western Parishes; North and West Fareham, and from pressure for the expansion of Stubbington.
- One moderate amendment is proposed to the North Eastern corner of the Meon Gap; that is an extension to the Gap around Funtley to prevent Funtley from coalescing with North and West Fareham.
- The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence through continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there are some opportunities for development to be accommodated within the landscape, without compromising the Strategic Gaps function.

Executive Summary

Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:

- An area to the South of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function.
- An area to the north west of Stubbington south of Oakcroft Lane and east of Ranvilles Lane, as some development could be visually and physically absorbed into the Gap without compromising the Gap function.

It is also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past.

In order to develop appropriate Green Infrastructure mitigation and enhancement associated with the areas of recent and future change described above, in the Fareham-Stubbington Gap, Green Infrastructure Frameworks or Strategies are required for each area.

Chapter 4: Strategic Gaps

Figure 4.1. Photograph taken from road that leads to The Great Barn, near Titchfield Abbey, looking East towards edge of Fareham, in The Meon Gap. Beyond the tree line is Fareham. Photograph: Charlotte Webb June 2020

Chapter 4: Strategic Gaps Overview

1. This chapter describes the application of methodology to determine the extent of the two Strategic Gaps in the draft Fareham Local Plan 2036 and gives specific recommendations for each Gap:

1. Fareham/Stubbington and the Western Wards (the Meon Gap)
2. Fareham/Bridgemary and Stubbington / Lee-on-the-Solent (the Fareham-Stubbington Strategic Gap)

Role and purpose of the Strategic Gap

2. As a reminder of the previously stated purpose of the Strategic Gap:

“The primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities.”
(Fareham Publication Local Plan 2037)

First Filter to establish Study Area Extents

3. The Strategic Gap Study Area extents are shown in Figure 4.1. and detailed site analysis sheets can be found in Appendix 5. The study areas were established to show specific tracts of land between the settlement boundaries of nearest neighbour settlements.

Strategic Policy DS2: Development in Strategic Gaps

“In order to prevent the coalescence of urban areas and to maintain the separate identity of settlements, Strategic Gaps are identified as shown on the Policies map between the following areas:

- 1) Fareham / Stubbington and the Western Wards (Meon Gap)
- 2) Fareham / Bridgemary and Stubbington / Lee-on-the-Solent (Fareham- Stubbington Strategic Gap)

Development proposals will not be permitted where they significantly affect the integrity of the gap and the physical and visual separation of settlements or the distinctive nature of settlement characters.”

4. Both the Meon Gap and Fareham-Stubbington Gap are identified as ‘Cross-authority’ Gaps, with the Meon Gap running north into Winchester City Council Local Plan Area and the Fareham-Stubbington Gap running South-East into Gosport Borough Council Local Plan Area. Identified through PFSH Position Statement 2016.
5. Within the sub-region of South Hampshire, the purpose of the Meon Gap *“is of particular significance as it demarks the boundary of the Portsmouth and Southampton Housing Market Areas”* .(PFSH Position Statement 2016)

Chapter 4: Strategic Gaps Overview

-
5. Within Fareham Borough the aim of the Meon Gap is to prevent coalescence of Fareham and Stubbington with the Western Wards, but also important is the avoidance of coalescence with the settlement of Titchfield, that lies within the middle of the Gap. As stated earlier, the Meon Gap runs northwards following the River Valley across the borough boundary into Winchester City Council Local Authority Area, where Winchester Local Plan Policy CP18 - Settlement Gaps' includes the 'Meon Gap' (Whiteley – Fareham/Fareham Western Wards), with a local gap between North Fareham SDA and Knowle and Wickham designated under Policy SH4: North Fareham SDA.
6. The aim of the Fareham- Stubbington Gap is to avoid coalescence between the settlements of: Fareham and , Bridgemary, with Stubbington and Lee-on-the-Solent. Gosport Local Plan also supports P/SH Position Statement 2016 and has designated a Strategic Gap which runs from the Borough border through the Alver Valley, but also Brookers Field Recreation Ground on the border with Fareham, is designated as Strategic Gap. The settlement boundary for Bridgemary, Gosport, lies on the Borough boundary with Fareham. The Strategic Gap designation is contained within Gosport Local Plan 2011-2029 adopted October 2015.
8. In addition to the two Appeal Sites at Posbrook Lane, Titchfield, and Old Street, Stubbington, which highlighted 'valued landscapes' in the Meon Valley, recent noteworthy planning applications which also highlight development pressures, within the Strategic Gaps are:
- P/14/0841/FP: Land of Cartwright Drive, Titchfield
 - P/19/0301/FP: Land East of Crofton Cemetery and West of Peak Lane, Fareham
 - P/14/0222/OA: Longfield Avenue, Land to the South – Fareham
- Housing and Employment Land Availability Study, December 2019. The pressure for development in the Fareham-Stubbington Gap, is very significant to the risk for complete loss of countryside gap. The pressure in the Meon Gap is more moderate, with a 'squeezing' of the central area around Titchfield, but with a significant pressure to develop pockets of land along the west side of Titchfield Road, between Titchfield and Stubbington. There is moderate pressure for development on the Western edge of Fareham and between Titchfield and Titchfield Common and Southwards pressure from Titchfield along Posbrook Lane. The indication of development pressure Southwards from Titchfield Common to Hook, is also of note, with the potential to put pressure on Chilling-Brownwich Coastal Plain.

Potential Development Impact

7. As stated in Chapter 1, a key demonstration of pressure for development comes from the potential site allocations assessed in the Strategic

Chapter 4: Strategic Gaps Overview

11. In the Meon Gap: P/14/0841/FP: Land of Cartwright Drive, Titchfield: Proposals for an 86 unit Care Homes, with associating landscape and car parking and a 15.4ha Country Park (with car parking), was approved though it was contrary to the current Policy C22: Strategic Gaps and within the setting of Titchfield Abbey Conservation Area. Construction on site was recently completed and is included in the site analysis.
12. P/19/0301/FP: Land East of Crofton Cemetery and West of Peak Lane, Fareham: refused for several reasons, such as design in relation to the setting of the Cemetery, but not for it's siting in the Fareham-Stubbington Gap.
13. P/14/0222/OA: Longfield Avenue, Land to the South – Fareham, an outline application for up to 1550 dwelling and associated infrastructure was withdrawn.

Key Routes for experiencing the Strategic Gaps

14. Key routes for the primary purpose of experiencing the physical and visual separation of settlements have been identified and are shown in Figure 4.2. This work ties in closely with the previous analysis carried out by LDA and described in Chapter 3 of the Adopted Fareham Borough Landscape Character Assessment 2017. As much as is possible, the key routes (or 'paths') pass between the settlement edges identified in the first filter, so that a significant number of drivers and walkers should experience the sense of leaving one settlement, passing through a distinctly different space, i.e. countryside between settlements before reaching another distinctly different settlement. This was tested out as part of the site analysis and is described in Appendix 5.

Settlement Edge Characteristics

15. This study builds upon the work previously carried out by David Hares Associates in the Fareham Borough Gap Review 2012. There have been negligible changes in the settlement edges since 2012 and the summary of settlement types shown in illustration 4 of the Fareham Borough Gap Review 2012 is still relevant:

“The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap” (page 19, Fareham Borough Gap Review. David Hares, 2012)

16. A key feature of many of Fareham's settlement edges is that of Woodland screening. Detailed findings are described in Appendix 5. The Spatial Visibility/Legibility maps A5.8-A5.10 show key long views and views towards settlement edges where dwellings or other landmark buildings can either be seen or are hidden or partially hidden from view by woodland, tree canopies or hedgerows. Primary measure 10 gives descriptions of the impact of the settlement edges on users from multiple vantage points.

Chapter 4: Strategic Gaps Overview

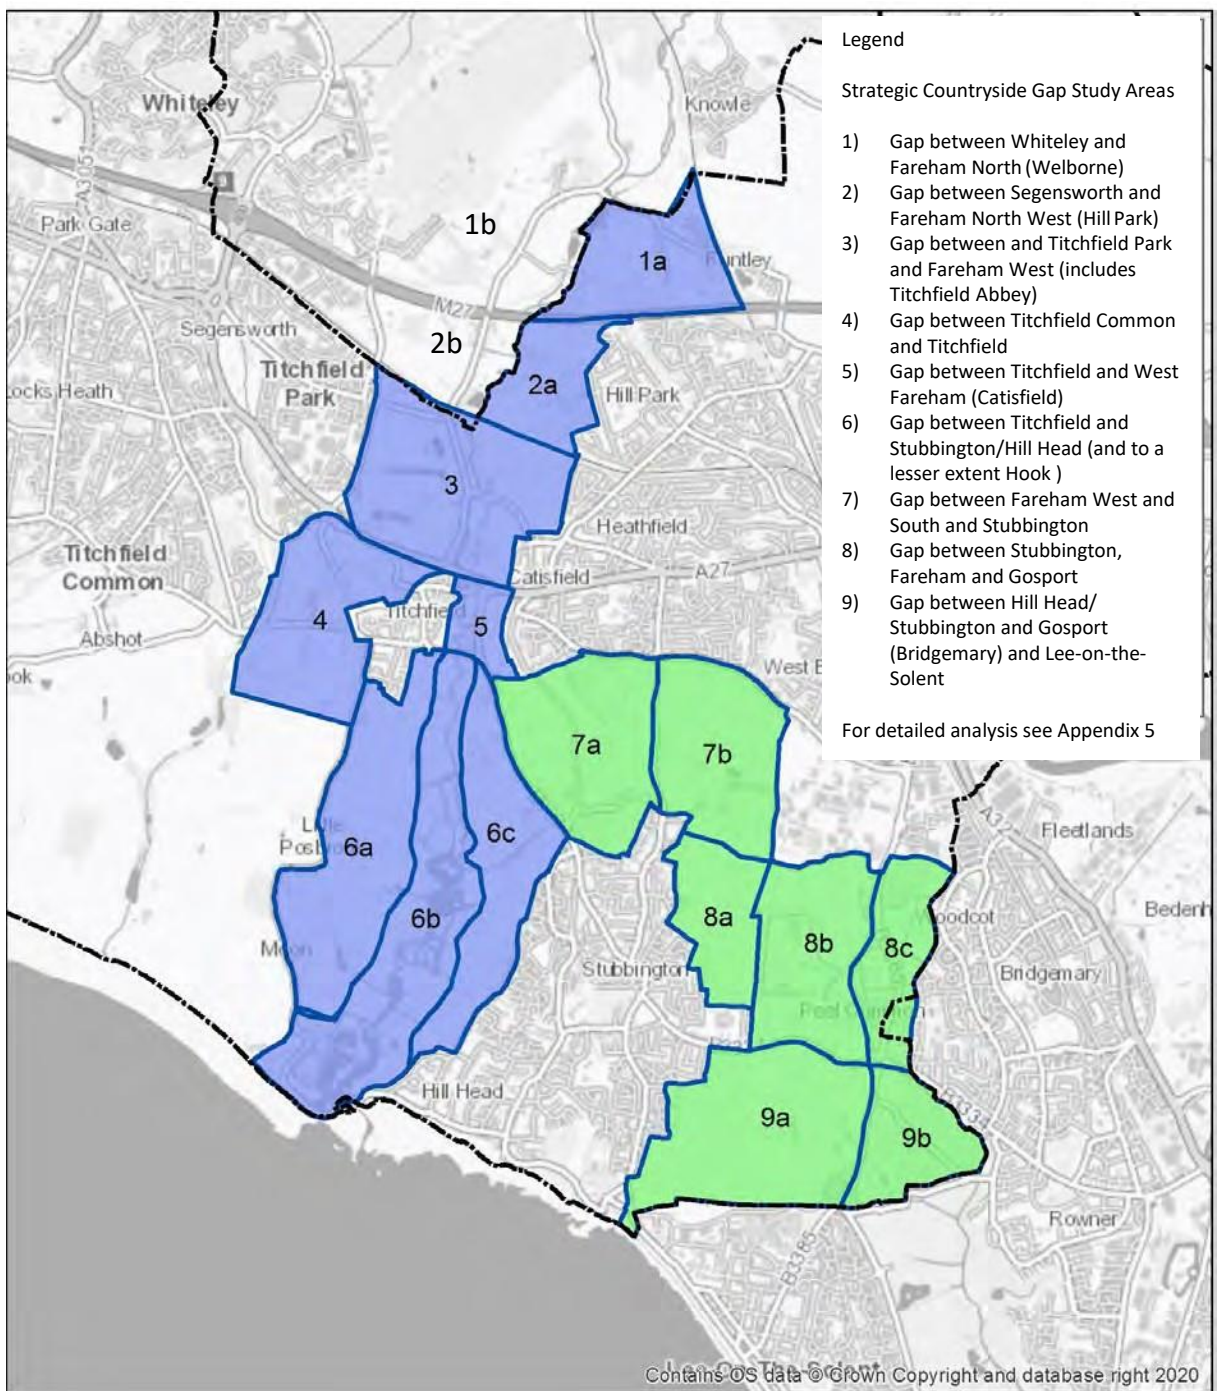

Figure 4.1. Plan showing Strategic Gap Study Area Extents

Chapter 4: Strategic Gaps Overview

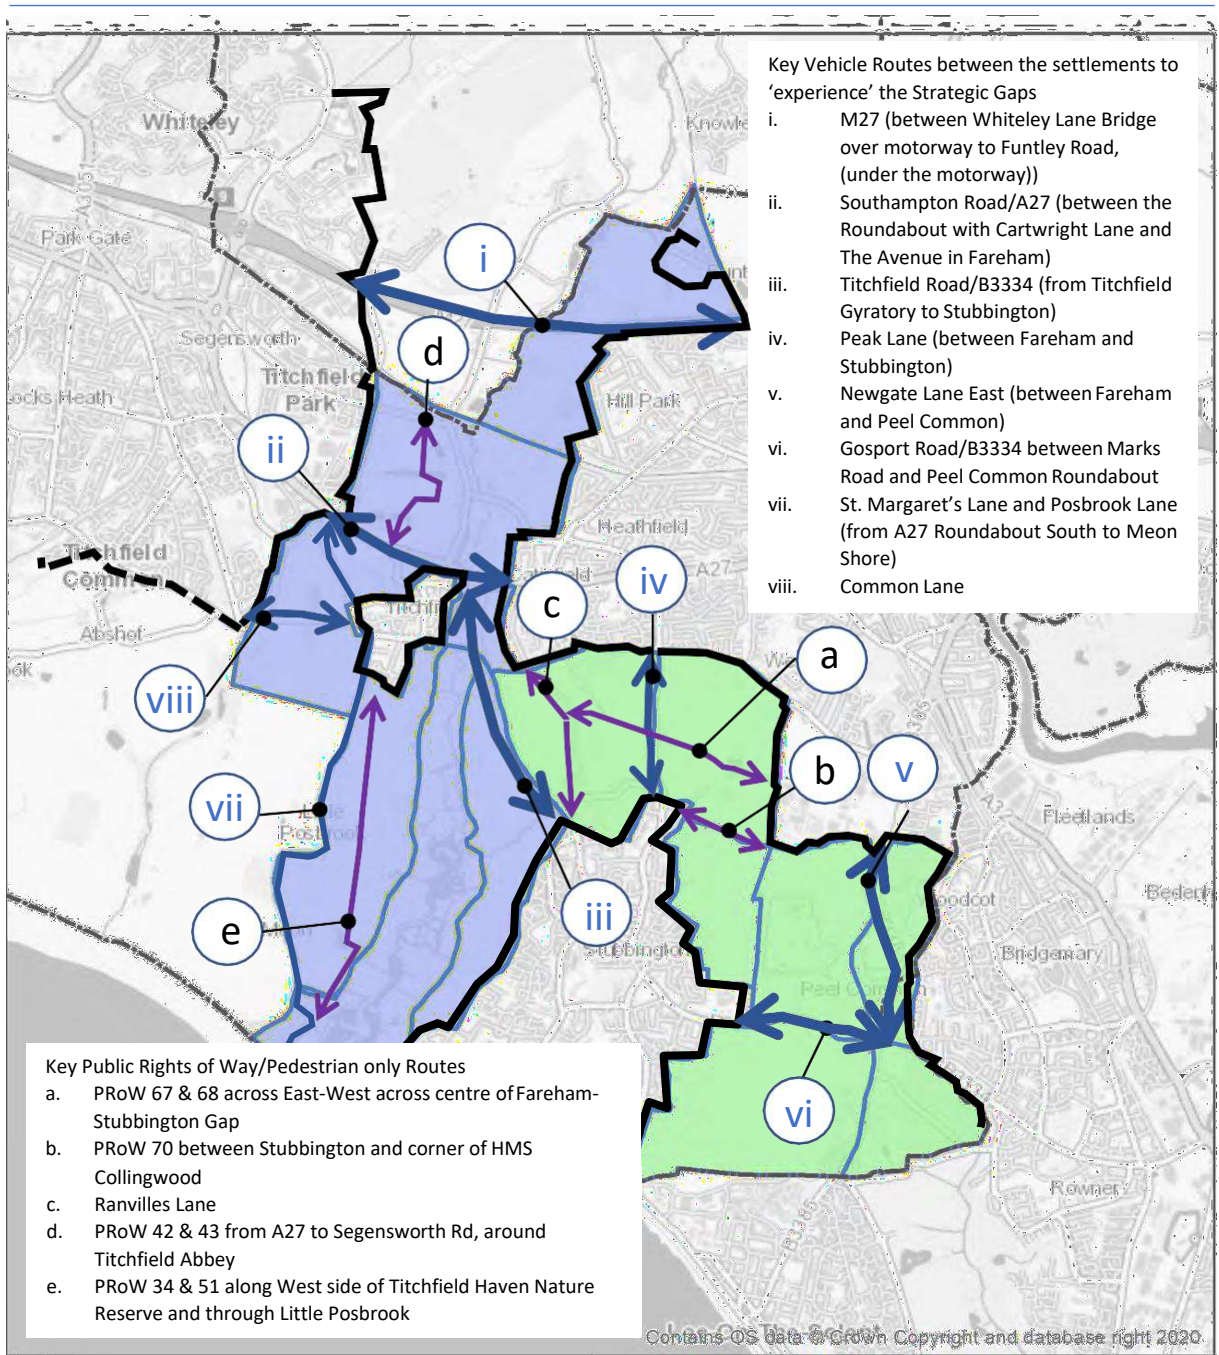

Figure 4.2. Plan showing key experiential routes through the Strategic Gaps

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

Key features of the Strategic Gap

1. Key Features of the Fareham-Stubbington Strategic Gap are:

- Open, predominantly arable farmland and horticulture with some glasshouses, a weak hedgerow structure and few trees
- The settlement edges are for the most part well screened by mature tree canopy, but there is some minor visual intrusion from Fareham, Stubbington and HMS Collingwood
- a few scattered farmsteads/horticultural holdings and a mosaic of small fragments of open farmland and horse-grazed pastures sandwiched between:
- large-scale non-agricultural uses of Business and airfield development at Solent Airport in Daedalus to the South and the utilities of:
 - Peel Common Water Treatment Works enclosed from views by an earth bund and mature tree belt
 - Peel Common Solar Farm
- Construction site of Stubbington-bypass, which will provide an East-West and South route through the Gap that has not previously existed
- Urban fringe character of Peel Common residential area

- Recently completed highway works to Newgate Lane, and Peel Common Roundabout, with associated noise attenuation fencing and bus and cycle infrastructure.

Potential Development Impact

2. As stated earlier, the potential impact of development is high within the Fareham-Stubbington Gap, with the potential to develop large tracts of farmland.
3. It is too early to determine the full impact that Stubbington Bypass will have on the landscape character and development pressures of the Gap. As the Bypass is currently under construction and its alignment marked out, it is possible to see how it might affect the sense of separation between Fareham and Stubbington. In some respects it strengthens the sense of separation because it will be a physical demarcation and partial interruption to cross-movement. It also becomes another key route from which to experience the Gap, but it will bring more noise and activity and may exert a suburbanising influence on the landscape. It is strongly recommended that once the construction works have been completed and the road is fully operational a review of the Landscape Character Assessment for LCA 7: Fareham-Stubbington Gap is carried out.

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

Other Environmental and Planning Designations

4. Unlike the Meon Gap, the Fareham-Stubbington Gap does not have a significant number of environmental designations. The only are two areas of Ancient/Semi-Ancient Woodland: Oxleys Coppice, which is also a SINC (Southern edge of Fareham) and Tips Copse, (East edge of Stubbington, North of Crofton Secondary School). The Strategic Gap designation would be the key designation in this area.

Summary findings of the Study Area Assessments:

5. The descriptions run from West to East and then South. More detailed analysis of each area can be found in Appendix 5.

Area East of Titchfield Road and West of Peak Lane (Strategic Gap Study Area 7a):

6. Due to the significant number of viewpoints from long stretches of the key roads that run through the area: Titchfield Road and Peak Lane (and from the Stubbington Bypass, when it is completed) and from the numerous footpaths that run through the middle of this area, it is strongly recommended that the vast majority of this section of Strategic Gap remains intact. It provides a useful informal recreational resource, within a distinctive

landscape character, that is of good quality, where residents can walk in relative tranquility away from roads and enjoy long and varied views. Due to its moderate to large gap dimensions (800-1.2km) it has been able to retain a relatively high level of tranquility and dark nights skies, compared to other parts of Fareham and it would be a significant loss to local residents if they were not able to continue to enjoy this informal recreational resource.

7. For this section of the Gap, this analysis agrees with the summary findings of LDA in Chapter 3 of the Fareham Borough Landscape Character Assessment 2017 - *“The landscape performs a highly effective role in providing a 'sense' of separation and the experience of moving between one settlement and the other.....Edges of Fareham and Stubbington are clearly defined by strong boundary vegetation and there is a clear distinction between 'town and country' there is a strong sense of leaving one urban area and moving through open countryside before entering another. Scale of the gap allows the time to appreciate sense of being in open countryside. Being able to see far across the gap and identify the edges, also strengthens the sense of separation.”* (page 41) .

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

8. However there exists the potential to make modifications to the settlement boundary of North Stubbington: to extend the boundary to run along Oakcroft Lane, as the isolated field that sits aside Crofton Cemetery, does not protrude into the landscape beyond the current Northern and Western edges of Stubbington. Largely sitting behind a mature line of Poplars also helps this isolated field absorb some development (subject to detail design), without risking the integrity of the Gap, as a whole. Retention and enhancement of GI will be required, within the site. **Development of a GI Framework or Strategy is recommended** for the site in its context.

Area East of Peak Lane and West of HMS Collingwood (Strategic Gap Study Area 7b):

9. Whilst this area comes under the same Landscape Character Area as Strategic Gap Study Area 7a, the terrain is much flatter, and the blocks of vegetation are less varied. Vegetation around the main large field screens the field from view from many vantage points. There are much fewer opportunities to see across this land, unless close to the field gates. From within the main field there are more visual detractors in the form of MOD buildings in HMS Collingwood, a low-rise tower in the

adjacent estate off Longfield Drive and a long view to the Fareham Borough Council Office Tower Block. Subject to detailed design, scale and functions, it is considered possible for the main field to absorb some development without a significant impact on visual quality of the Strategic Gap. If managed appropriately, development could have beneficial effect on the GI network (recreational and environmental) that exists around the periphery of the field subject to appropriate attention being paid to GI provision and design. Therefore a change in Strategic Gap boundary could potentially be accommodated without undermining the principal purpose of the gap to prevent coalescence of settlements. However, such adjustment would be driven by more detailed testing of development forms, scale, landscape and GI interventions. Such work would also need to consider the potential reduction of tranquility and dark night skies ratings in the area. **Establishing a GI Framework or Strategy is recommended.**

10. The experience of driving along Peak Lane is currently pleasant and it is recommended that with any potential boundary change that a GI zone of around 150m width between Peak Lane and any development, be established. This is to maintain the experience of

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

‘leaving’ Fareham driving through Countryside and arriving at the separate settlement of Stubbington.

The Open Coastal Plain between Stubbington and the Peel Common Water Treatment Works, (Strategic Gap Study Area 8a)

11. There are two key PRoW across this Landscape, that connect Stubbington and Fareham through a narrow gap of around 600m. The paths cross a dramatic flat landscape which has strong linear North-South views between Daedalus and Newgate Lane Farm, framed by blocks of woodland vegetation, on the boundary bund around the Peel Common Water Treatment Works and the east side of Stubbington, including Tips Copse Ancient Woodland. These views should be valued and retained, providing a great sense of space in an otherwise narrow corridor.
12. There is very little opportunity to absorb development in this corridor. Visual intrusion of buildings would be unwelcome, as it would reduce tranquility. Some of the tree belts are thin, and a substantial belt of woodland would strengthen the landscape structure and provide an attractive edge to frame North South Views and views towards the eastern edge of Stubbington. Advance planting of this

belt would be advised. A **GI Framework or Strategy is recommended.**

Section of Fareham-Stubbington that provides a three-way Gap between Stubbington, Fareham and Gosport (Bridgemary) (Strategic Gap Study Area 8b)

13. There are no proposed changes to the Strategic Gap in this area. The strong screening around the Peel Common Water Treatment works provides an effective visual and physical barrier between all three settlements.
14. There is pressure for development along Gosport Road (A334) between the Southern edge of Stubbington and Peel Common. It is strongly recommended that development pressure is resisted in this area as it would risk visual and physical coalescence between Stubbington and Gosport.

Newgate Lane and Peel Common Area (Strategic Gap Study Area 8c)

15. Despite the proximity of Fareham and Gosport in the north part, the gap is currently still effective in providing a ‘sense of separation’, but it is at risk. Substantial vegetation around boundaries currently prevents visual coalescence. There is a defined boundary along settlement edges and a gap of sufficient scale and

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

and coherence of character. Whilst the recently completed Newgate Lane South road development does not alter the experience of entering the urban area of Gosport beyond the Peel Common Roundabout, it does reduce tranquility and bring more built features (such as noise attenuation barriers) into this part of the gap. Further development within the gap in addition to the road scheme, together with existing urban fringe activity, is likely to cause visual, or even physical, coalescence of settlements on either side of the new road corridor.

16. Even with the development of Newgate Lane South, the previous analysis carried out by LDA and described in Chapter 3 of the Fareham Borough Landscape Character Assessment 2017, is still relevant: *“A cohesive area of undeveloped landscape which performs an important role in respect of the primary purposes of the Strategic Gap, i.e. in defining the edges, separate identity and settings of Fareham and Gosport, preventing their coalescence. Even minor encroachment beyond existing settlement boundaries could have an adverse effect on these functions and the overall integrity of the landscape and Strategic Gap.”* (page 43)

17. It is recommended that a **GI Framework or Strategy for the Strategic Gap Study Area 8c** would be beneficial to enhance the GI value of the current gap and potentially help determine an appropriate GI framework for moderately scaled development. The planting associated with the Newgate Lane Highway works will exert a stronger woodland/hedgerow edge as it establishes, and this should be factored into a GI Strategy. The GI Strategy or Framework should reassess the Open Coastal Plain Landscape Type: with a view to creating stronger GI structure throughout, but highlighting and retaining long North-South views, and largely undeveloped views eastward from old Newgate Lane, to retain a sense of space and ‘big skies’.

Daedalus and Lee-on-the-Solent Golf Course (Strategic Gap Study Area 9a and 9b)

18. This study does not suggest alterations to the Strategic Gap around the Airfield and Lee-on-the-Solent Golf Course. Current development within the Airfield is highly visible, but in keeping with current land uses/character of the area. Some further development could be accommodated in the Airfield but would depend on where within the site; scale and; what mitigation is delivered.

Photograph: Charlotte Webb June 2020

Chapter 5: Summary Conclusions and Recommendations

-
1. The resultant analysis and site surveys of all Fareham Borough's Landscape Character Areas recommends that:
 - The six proposed ASLQ put forward for designation in the Fareham Local Plan Supplement (Reg 18 consultation document, Jan-March 2020), can be considered as 'valued landscapes' as they scored highly against the assessment criteria and therefore should be identified for ASLQ designation in the Fareham Local Plan 2037, with some modifications made to boundaries, to bring them into line with the current Fareham Borough Landscape Character Assessment 2017, but also;
 - Through this process, two further landscape character areas in Fareham were identified as having equivalently 'valued landscape' characteristics and so it is recommended that Chilling-Brownwich Coastal Plain and parts of the Cams to Portchester Coast should also be designated.
 - Conservation Areas where they sit in or adjacent to a proposed ASLQ should be included as part of the ASLQ because of their mutually supportive relationship.
 2. It is considered that there is a clear difference between the ASLQ designation, where the landscape value is the key reason for designation, in the context of Strategic Gaps, landscape character and its quality are a 'part of the picture' sitting amongst a broader range of criteria.
 3. The resultant analysis and site surveys of the two Strategic Gaps, conclude that the Meon Strategic Gap:
 - is proposed for continued designation, having both strong sub-regional justification for its designation, and a clear and continued role in preventing settlement coalescence, that could result from pressure for expansion of the Western Parishes; North and West Fareham, and from pressure for the expansion of Stubbington with;
 - one moderate amendment proposed to the North Eastern corner of the Meon Gap; that is an extension to the Gap around Funtley to prevent Funtley from coalescing with North and West Fareham.
 4. The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional justification for its designation, with an important role in preventing settlement coalescence from continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there may be potential for some development to be accommodated within the landscape, without compromising its Strategic Gap function.

Chapter 5: Summary Conclusions and Recommendations

5. Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:
 - An area to the south of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function.
 - An area to the north west of Stubbington, south of Oakcroft Lane and east of Ranvilles Lane.
6. It also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past.
7. In order to develop appropriate Green Infrastructure mitigation and enhancement associated with the areas of recent and future change described above, in the Fareham-Stubbington Gap, Green Infrastructure Frameworks or Strategies are required for each area.

1. INTRODUCTION	2
2. BACKGROUND	3
3. SUMMARY	4

1. INTRODUCTION

Qualifications and Experience

- 1.1. My name is James Atkin, Director (Landscape) in the Birmingham Office of the Pegasus Group and a Chartered Member of the Landscape Institute (2005). I have over 19 years experience specialising in the application of LVIA across a range of sectors including power, highways, rail, housing, waste, land reclamation and restoration, mineral extraction, commercial developments and renewable energy.
- 1.2. Since joining the Pegasus Group I have completed detailed LVIA's for sites across the UK, including schemes for residential, mixed use, care home, solar and commercial development. As an inherent part of this work I apply an iterative process of LVIA to inform masterplanning principles that respond appropriately to landscape and visual constraints and opportunities.

Terms of Reference

- 1.3. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 1.4. Principles and good practice for undertaking landscape and visual impact assessment (LVIA) and/or applying the principles of LVIA are set out in the Landscape Institute (LI) and the Institute of Environmental Management (IEMA) Guidelines for Landscape and Visual Impact Assessment, Third Edition (2013)¹ (GLVIA3). The concepts and procedures set out in this guidance have been adopted where appropriate.
- 1.5. The evidence included in this supporting statement for this appeal (LPA reference: P/18/1118/OA - AND - P/19/0460/OA) is true and has been prepared in accordance with the guidance of my professional institution. I confirm that the opinions expressed are my true and professional opinions.

¹ Landscape Institute and Institute of Environmental Management and Assessment, Guidelines for Landscape and Visual Impact Assessment 3rd Edition (April, 2013)

2. BACKGROUND

- 2.1. The appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham. The appeal sites are bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east.
- 2.2. The wider landscape context of the appeal sites includes the low-lying ground of the coastal plain and the adjacent urban environments of Fareham, Gosport (with Woodcot and Bridgemary). The settlement area of Stubbington forms the western extent of the Strategic Gap which extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.
- 2.3. The applications were submitted with a detailed LVIA which set out a comprehensive baseline and robust assessment of predicted impacts. These included details as to how landscape and visual matters have influenced the design of the masterplan, with mitigation measures consequently forming an inherent part of the proposals.
- 2.4. The reasons for refusal raises three main issues in respect of landscape and visual matters, stating that:
 - b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;
 - c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;
 - d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;
- 2.5. This evidence considers these issues against various information, including the submitted LVIA's, consultation responses, report to committee and other relevant baseline and evidence base documents related to landscape and visual matters.

3. SUMMARY

- 3.1. The submitted LVIAs address the key characteristics of the appeal sites and their context. The submitted LVIAs also set out an assessment of the impact and approach to mitigation. This process also enables judgements to be drawn in respect of the context of the appeal sites in relation to the existing urban settlement edges/boundaries.
- 3.2. With reference to this material, and supported by my own additional analysis where necessary, I conclude that the appeal schemes will not be harmful to the character and appearance of the countryside, will not significantly affect the integrity of the Strategic Gap and will relate well to the existing patterns of settlement.
- 3.3. This is on the basis the relevant key landscape characteristics of the area have been considered through the process of LVIA, consequently informing the analysis of constraints and opportunities, and ultimately the landscape strategy for the mitigation. This forms an integrated part of the two masterplans for northern and southern schemes.
- 3.4. Consequently, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms.
- 3.5. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement.
- 3.6. I consider that the subsequent residual impacts of the appeal schemes will be acceptable in landscape and visual terms.
- 3.7. In terms of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the Strategic Gap. This is on the basis that:
 - In relation to distances, the appeal schemes will reduce the gap between Bridgemary and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances set out in the FBC study;

- In terms of visibility, the appeal schemes will be physically and visually well contained – they sit within the strong green infrastructure framework that is evident in the form of blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the Strategic Gap from Stubbington;
- Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, along Newgate Lane and within the emerging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;
- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area; and
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

3.8. I also note that, notwithstanding differences in the technical approaches, the Pegasus Group and FBC Strategic Gap studies both independently acknowledge that the Strategic Gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site/project basis.

3.9. In respect of the conclusions of the FBC Strategic Gap study (where these note the relatively poor state of the gap at this point), I would think a logical and appropriate conclusion would be to amend the boundary to omit this part of the landscape from the Strategic Gap, creating capacity for development to come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the importance of the core areas that are located further west, between Fareham and Stubbington where the Strategic Gap clearly delivers its role and function in full.

3.10. Finally, the reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries. However, my evidence demonstrates that the appeal sites are well related to Peel Common, being located to the east of Newgate Lane, physical contained by the alignment of Newgate Lane East and situated immediately adjacent to the existing residential dwellings off Woodcote

Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane.

- 3.11. With existing and proposed green infrastructure in place, the appeal schemes will consolidate the pattern of Peel Common within a clearly defined limit. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 3.12. Furthermore, there are some existing physical connections between Peel Common and Bridgemarky. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemarky, focused along the green route into Bridgemarky (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 3.13. If the previous emerging allocation of HA2 were to come forward, this broader area of development would reinforce the connection between Peel Common (including the appeal sites) and the edge of Fareham. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.
- 3.14. In all respects, considering Peel Common in itself, connections to Gosport, and with the potential for HA2 to come forward, development in this area will maintain a robust gap between Fareham (aligned with the western edge of Peel Common) and Stubbington.
- 3.15. Overall, in the context of these limited issues, and with the appeal schemes in place, landscape and visual issues are not sufficient to support a prospective reason for refusal.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND WEST OF OLD STREET, STUBBINGTON

ON BEHALF OF BARGATE HOMES

TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED) PLANNING AND COMPULSORY PURCHASE ACT 2004

Prepared by: Jeremy Gardiner & Trevor Moody

2.0 Plan Overall **3**

3.0 Specific Proposed Changes **12**

4.0 Participation at the examination hearing sessions **26**

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our client, Bargate Homes. These representations are consistent with and build upon the previous representations submitted to the Council by WYG in relation to this site in response to the Fareham Draft Local Plan 2036 Supplement in February 2020, and we ask that those previous representations are also considered alongside this submission because their content is not repeated here.
- 1.2** Our client has an interest in **land to the west of Old Street, Stubbington** which was previously the subject of development proposals for up to 160 (reduced to 150) new homes (planning application P/17/1451/OA refused on 23 March 2018, and appeal ref. APP/A1720/W/18/3200409 dismissed on 22 January 2019 refer). Since this appeal decision, and in the light of the Inspector's reasoning, extensive belts of strategic woodland planting have been undertaken at the site which will have the effect of visually detaching part of the site from the Meon Valley and creating a more modest sustainably located site for about 75 new homes on the edge of the urban area of Stubbington. Our client is strongly of the view that these material changes of circumstances at the site, coupled with the need for the Council to meet its local housing target of a minimum of 514 homes per annum, justify the allocation of the site for about 75 dwellings in the local plan.
- 1.3** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 – 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Remove Strategic Gap designation from Land West of Old Street, Stubbington.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local

housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national

guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature

and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

- 2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

- 2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed

need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham

to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such it's preparation is premature.

2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities

for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading (as confirmed by the Government's announcement on 16 December 2020 that the Council's annual housing target is to remain at 514 homes per annum).

3. It is not Effective:

- 2.28 The Council has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.29 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.30 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be

included as additional housing to the minimum 514 hpa.

3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
 4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.31 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.32 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.33 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – the spatial extent of 'landscapes' should be defined here to avoid ambiguity. While the landscape as a whole could be enhanced by carefully designed development proposals, the principle of landscape change within the site itself should be established. If this requirement to 'conserve and enhance landscapes' is applied to the landscape features and character of a potential development site, then this requirement is excessive and unachievable once the landscape 'change' from an undeveloped site to a developed site is taken into account. Either the spatial extent of 'landscapes' should be defined or the requirement to 'enhance landscapes' be removed from the policy.

- 3.16** Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".
- 3.17** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.18** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS2: Development in Strategic Gaps

- 3.19** Under the heading 'Why we need this policy', Paragraph 3.43 of the Publication Local Plan states that "Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities". The introduction of 'settlement character' into the policy wording is not consistent with the evidence base which confirms at paragraph 2 in Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps that the "primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities".
- 3.20** Strategic Policy DS2: Development in Strategic Gaps should only apply to land which provides a spatial function to maintain separation of settlements and define settlement pattern rather than defining settlement character. Land west of Old Street, Stubbington does not contribute to the spatial separation of settlements, therefore Strategic Policy DS2 should not be applied to this land.
- 3.21** This view is supported by the Inspector for the appeal relating to Land west of Old Street, Stubbington APP/A1720/W/18/3200409 who stated that:

"The Meon Gap lies between Fareham/ Stubbington and the Western Wards/Whiteley. Policy CS22 requires the integrity of the gap to be maintained and the physical and visual separation of settlements to be respected. In terms of separation of settlements there is no dispute that there would be no diminution either in physical or visual terms if the development were to go ahead. The policy indicates that the gap boundaries will be reviewed to ensure that no more land than necessary is included in order to maintain gap function". (our underlining)

3.22 The Inspector goes on to state:

"It should be remembered that gap policy is a spatial tool. The Council referred to the role of the gap in maintaining the character or setting of Stubbington. This is considered in the 2017 LCA where the strategic gap designation is reviewed. However, the document makes clear that its purpose is to consider what role the landscape plays within the strategic gaps. It is not intended to examine the designation criteria, or the broad areas identified. This is important to note because it is landscape rather than spatial considerations that are key to settlement character and setting. The character and setting of Stubbington is not pertinent to gap designation or function in policy CS22".

3.23 The Inspector concluded:

"I appreciate that a review of gap boundaries was undertaken in 2012 and that no changes were recommended in relation to the land immediately adjacent to Stubbington. However, for the reasons I have given I do not consider that the proposed development of the appeal site would adversely affect the integrity of the Meon Gap". (our underlining)

3.24 For this reason, Strategic Policy DS2 should not apply to Land west of Old Street, Stubbington, because it has been confirmed that this land does not contribute to the function of the Strategic Gap. The Meon Valley is protected by many environmental designations which prevent development into this area from the Fareham side of the valley. The designated valley floor of the Meon Valley maintains separation of settlements to an extent that an adequate gap is maintained without the inclusion of Land west of Old Street, Stubbington within the Strategic Gap. Fareham Policy CS: 22: Strategic Gaps, states that "In

defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation." It is therefore unnecessary for Strategic Policy DS2 to apply Land west of Old Street, Stubbington.

3.25 At paragraph 7 of Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps states that "Where it is considered that there is capacity to absorb more development within the Fareham-Stubbington Strategic Gap, GI mitigation will be required, to a greater or lesser extent depending on the scale and nature of any development". Again, at paragraph 11 of the chapter 4 summary the Technical Review states "The ability to absorb development into the landscape exists, without compromising the integrity of the Gap function, again on the understanding that the settlement edges must include appropriate Green Infrastructure".

3.26 We submit that there is similar potential within the Meon Gap where the Gap is significantly wider than is the case for the Fareham-Stubbington Strategic Gap. This is particularly the case for Land west of Old Street, Stubbington where advance planting and green infrastructure has already been implemented during 2019 and is establishing well. This will continue to develop and establish a wooded edge to the Meon Valley, providing separation between the Meon Valley and Land west of Old Street, Stubbington. This would reinforce the wooded edge characteristics of settlements which are a feature throughout Fareham Borough, as referred to within the Fareham Borough Gap Review 2012, which states "The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap". In the case of Land west of Old Street, Stubbington the advance planting will create a wooded edge, providing a strong boundary between the site and the Meon Valley (stronger than is the case for the older housing at Hill Head where rear garden boundaries are visible from the Meon Valley) and in so doing it would be more consistent with the character of the settlement edges of the Borough. These green infrastructure enhancements already implemented will bring benefits to the biodiversity of the Meon Valley through enhanced planting and management of the existing farmland.

Policy DS3: Landscape

- 3.27** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.28** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council has created a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.29** However, if it is held that Policy DS3 should not be deleted, the following comments apply:
- 3.30** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.31** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.32** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.33 The local plan evidence at page 50 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not include the requirement for the landscape to be “protected and enhanced”. The requirement to “protect and enhance” the landscape is ambiguous because it is not clear whether it is intended to refer to the landscape of the ASLQ as a whole or if it would apply to a potential development site, within which the requirement to enhance is excessive and unachievable once the landscape ‘change’ from an undeveloped site to a developed site is taken into account. As an example, a development could provide enhancement to the ASLQ landscape through restoration of landscape features or new green infrastructure, but at a site scale the landscape ‘change’ from an undeveloped site to a developed site is unlikely to result in ‘enhancement’.

3.34 Each of the Candidate Areas of Special Landscape Quality have been assessed against the GLVIA3 Box 5.1 criteria, which is an accepted tool to assess landscape value. Land west of Old Street, Stubbington is located within ASLQ 4: Meon Valley and in LLCA 6.1c which is described as within the Landscape Assessment (2017) as:

“On the eastern side of the valley floor, area 6.1c is occupied by similar land uses but with greater variation in field pattern and enclosure. The area comprises a mosaic of smaller-scale pastures bounded by strong hedgerows and trees (particularly within the northern and southern ends of the area), two small-scale enclosed tributary valleys and some larger fields with a more open, denuded character within the central section around the Crofton Manor Equestrian Centre. Together with the adjacent horticultural glasshouses and other commercial operations, this lends a localised fringe character to the landscape but does not detract significantly from the essentially rural characteristics of the overall area”.

3.35 At Figure 3.3 each of the LCA within Fareham is assessed against the GLVIA3 ‘valued landscape’ criteria. Figure 1.3 explains the criteria in more detail, defining a ‘High match’, ‘Good match’, ‘Fair match’ and ‘Partial match’.

3.36 Land west of Old Street, Stubbington is located within LLCA 6.1c which is assessed as a ‘good match’ for all criteria, except ‘Associations’ which is a ‘partial match’. Figure 3.2 defines a ‘Good match’ as *“The area’s scenic quality and condition are both relatively high. It has a generally unspoilt, intact and coherent character with a good level of topographic and visual unity. It has several*

features of note, including natural and cultural designations, and is valued for its recreational opportunities. There are some detracting influences, but these do not generally intrude”.

3.37 We submit that the assessment of LLCA 6.1c has attributed a higher value for the ‘Recreational value’ criteria than can be justified. The southern half of LLCA 6.1c does not have any means of public access so can not be described as being ‘valued for its recreational opportunities’. In the northern half there are infrequent public footpaths and the Crofton Manor Equestrian Centre, neither of which justify the area being defined as ‘valued for its recreational opportunities’. Instead, the term ‘Recreational value is relatively limited’ is a fair reflection of the recreation provision within LLCA 6.1c as a whole, which is the definition applicable to a ‘Partial Match’.

3.38 Landscape quality (condition) is also assessed as a ‘Good Match’, despite the Landscape Assessment (2017) acknowledging its ‘denuded character’ and ‘fringe character’. This character is a feature of LLCA 6.1c, and for this reason the ‘Good Match’ definition as ‘generally unspoilt, intact and coherent character’ is not justifiable. A ‘Fair Match’ is most applicable to LLCA 6.1c, defined as “condition is moderate to good. It is generally intact and coherent with some unspoilt characteristics”.

3.39 The criteria of ‘Conservation interests’ is also assessed as a ‘Good Match’, defined as “It has a number of features of note, including natural and cultural designations”. We submit that ‘Fair Match’ is a more balanced description of LLCA 6.1c, defined as “some features of note which may include natural or cultural designations”.

Policy HP1: New Residential Development

3.40 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.

3.41 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.42 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.43 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.44 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.45 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.46 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and

- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.47 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.48 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.49 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.50 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.51 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.52 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.53 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.54 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the level of need for such units in the Borough – in the absence of this it is not clear whether the level of provision sought by this policy is appropriate.

Policy HP9: Self and Custom Build Homes

3.55 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.56 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). The total number of homes to be delivered by Welborne has reduced considerably over the last five years so this level of requirement should be reviewed as it will not yield the number of self or custom build homes as was anticipated at the time the Welborne Plan was prepared. Strategic allocations

such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.57** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.58** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Proposed housing allocation of Land West of Old Street, Stubbington for about 75 dwellings

- 3.59** In 2019 the appeal Inspector concluded that the development of the site would not adversely affect the integrity of the Meon Valley Strategic Gap. Clearly, therefore, the site should be excluded from the Strategic Gap boundary. The boundaries of the strategic gap were defined in relation to Core Strategy Policy CS22 and they were drawn in the context of the understanding of development needs at that time – an understanding which no longer reflects current reality, that being a very substantial shortfall in housing land supply and the preparation of the PLP by the Council which plans to under-provide housing against the Council's annual housing requirement of 514 homes per annum. Strategic Gap boundaries must be reviewed as part of the process of allocating additional sites for housing in this local plan, and our client's site west of Old Street, Stubbington should be removed from the Strategic Gap.

- 3.60** The 2019 appeal Inspector found that the West of Old Street, Stubbington site lay in an area of valued landscape. In this context, the value of the site's landscape has been re-assessed as part of our commentary on Policy DS3 above, against the GLVIA3 'valued landscape' criteria. As described, the site performs no better than as a Fair or Partial match against these criteria. When account is taken of the effect of the structural woodland planting undertaken over time, it is clear that development of the eastern part of the site will only have a minor impact on the wider landscape at most. Lying adjacent to the existing settlement of Stubbington, the introduction of development will appear entirely characteristic within the receiving landscape, while providing a strong, vegetated edge to the countryside in perpetuity. There is no doubt that the character of the developed part of the site would change, but that is no different for any greenfield development. There is no reason to assume that the site's development will be anything other than an attractive extension to Stubbington and one which is entirely congruous with its surroundings. The site's landscape containment has been enhanced through woodland planting which will both screen it from the Meon Valley and enhance its biodiversity.
- 3.61** Moreover, the western part of the site, beyond the woodland planting belt, is being used to provide mitigation habitat for Solent Waders and Brent Geese, offsetting development impact on low use SWBG sites elsewhere in borough. The segregation of this part of the site acknowledges this function and avoids its disturbance.
- 3.62** The West of Old Street site is also sustainably located for access to services and facilities and to sustainable transport modes (walking, cycling and public transport).
- 3.63** For all of these reasons, the Council is encouraged to allocate Land West of Old Street, Stubbington for about 75 dwellings. The site is controlled by a highly reputable local housing developer – Bargate Homes – which has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing session

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

**Representations towards the Fareham
Borough Draft Local Plan 2036 Publication
Draft (Regulation 19) Consultation on Behalf
of Persimmon Homes (South Coast)**

December 2020

1. Introduction

Persimmon welcomes the opportunity to comment on the Fareham Draft Local Plan 2036 (DLP) Publication (Regulation 19) consultation.

This letter is set out in sections as summarised below:

- Section 2 sets out our response to Duty to Cooperate issues
- Section 3 sets out our policy specific responses
- Section 4 sets out our response in relation to Omission Sites

2. Duty to Cooperate

The Duty to Cooperate places a legal duty on local planning authorities to engage constructively, actively and on an ongoing basis to maximise the effectiveness of Local Plan preparation in the context of strategic cross boundary matters, including housing.

Planning Practice Guidance recommends that authorities should produce, maintain, and update one or more Statement(s) of Common Ground, throughout the plan-making process. The Council has unilaterally produced a 'Statement of Compliance with the Duty to Co-operate' which sets out how the Council claims to have addressed the duty to cooperate, including in relation to addressing the unmet housing need of its neighbouring authorities. This is not an agreed Statement. It is noted that there is little to no explanation within the Statement as to what cross boundary discussions have taken place since the Council has significantly altered its approach with regards to housing need (as detailed below). In Persimmon's view, this information is absent because neighbouring authorities, in particular Portsmouth and Gosport, will not be supportive of Fareham's approach.

As mentioned above, the Council's Regulation 19 consultation document is significantly different from the Regulation 18 draft in terms of its approach to housing. This is largely as a result of it applying the lower Local Housing Need (LHN) as derived from the Government's proposed new Standard Methodology, which has not been approved. The Regulation 18 version of the Plan included a number of Strategic Growth Areas that were identified, in part, to meet the housing needs of neighbouring authorities of Gosport and Portsmouth. These Areas have now been deleted, and do not feature in the Publication Plan.

The Council's decision to use the new Standard Methodology LHN in order to take advantage of lower housing numbers is premature, and is at odds with the approach being taken by nearly all other Local Planning Authorities developing Local Plans in the sub-region, including Gosport and Portsmouth.

It is understood that the SGAs would meet at least 1,000 dwellings from Portsmouth's unmet needs, alongside a proportion of Gosport's (quantum not published). However, the Publication Plan suggests that unmet need accommodated by the Plan will only equate to 847 dwellings. By Fareham choosing to use the draft new Standard Methodology and reducing its housing site allocations as well, the scope for the Plan to pick up the housing needs of these neighbouring council areas has been significantly curtailed.

It is Persimmon's view therefore that, given the significant change in approach by Fareham Council, the joint working that it has undertaken on housing issues to date has been fundamentally undermined to a point where it can only be concluded that Council has failed the duty to cooperate.

2. Policy Specific Comments

DEVELOPMENT STRATEGY

Strategic Policy DS1 Development in the Countryside

Policy DS1 provides the policy basis for the delineation of settlement boundaries. In the context of our comments below, notably in relation to not meeting housing need, omission sites and the delineation of Strategic Gaps, the Council should amend the settlement boundaries to allow additional development to come forward.

With regards to the criterion d) of Policy DS1, an allowance for new or replacement building, conversion and/or extension of a school is welcomed. However, the Policy appears to limit re-provision to existing sites shown on the Policies Map. As set out in greater detail in the our response to Policy DS2 and the Omission Site section, discussions are on-going with the Meoncross school to facilitate expansion of the car park and/or playing fields in the short term. The potential relocation of the school to other land within Persimmon's interest at Cuckoo Lane over the longer-term is also being explored. As currently drafted, by strictly limiting development to within an existing educational facility, the Policy would prevent such future improvements and the possible relocation of Meoncross School.

Strategic Policy DS2 Development in Gaps

The Council has commissioned Hampshire County Council to review its Strategic Gaps. The County's methodology for this review is set out in the Technical Review of Areas of Special Landscape Quality and Strategic Gaps (September 2020). This applies 'Primary Measures' (i.e. physical and visual separation) and 'Secondary Measures' (i.e. Green Infrastructure Provision) to define the gaps. We support the inclusion of physical and visual separation as a means of determining the gap boundary, but we see no justification for including the secondary measures as this is outside of the scope of the role of a gap. In any case, Green Infrastructure is an issue that is dealt with separately under Policy NE9 of the draft Plan.

The following commentary on this policy considers each of the Strategic Gaps before comments are made on the content of Policy DS2 itself.

The Fareham-Stubbington Gap

As set out in the recommendations of the Gap Review paper (Chapter 4: Conclusions and Recommendations, Paragraph 10): *'there exists some opportunities for development to be absorbed within the Stubbington-Fareham Strategic Gap, subject to scale and future detailed design, without compromising its Gap function...'* It is surprising then that the Council has not examined this potential in greater details as part of its Publication draft Local Plan, particularly given that the most recent Regulation 18 Local Plan consultation proposed a Strategic Growth Area (SGA) within this gap as a means of accommodating growth.

It is also surprising that the Gap Review Paper does not adequately consider the influence of the Stubbington by-pass on the Fareham-Stubbington Gap. Paragraph 3 of Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap states that: *'As the Bypass is currently under construction and its alignment marked out, it is possible to see how it might affect the sense of separation between Fareham and Stubbington.'* The report also states that it is too early to understand the full impact that Stubbington Bypass will have on the landscape character and development pressures of the Gap. This second assertion is contested. Given that the by-pass construction has progressed significantly, and that by-pass proposal has been subject to landscape assessment (including through the ES associated with the application), there is sufficient information available to allow for a robust assessment of the impact of the by-pass on the gap and the landscape to be carried out. A review of the landscape and gap evidence should be carried out prior to submission of the Plan for examination.

There can be no doubt that the by-pass will have a considerable influence on the Fareham-Stubbington Strategic Gap - effectively splitting it two. Once the by-pass is complete, it will form a strong defensible boundary, which will make the difference in the character between areas north and south even more apparent than it is already. This difference in the character requires considered in the Local Plan and its evidence base.

Land to the north of the bypass route is considerably more open in character, with large open fields with limited boundary planting providing prominent views north from the bypass toward the southern urban edge of Fareham, which is well defined by Rowan Way. This area is characterised by a strong sense of tranquillity, and is a much more sensitive landscape that is more befitting of Gap designation in accordance with the Council's own methodology. Land to the south of the bypass, however, comprises considerably more urban influences as demonstrated by existing development along Ranvilles Lane / Titchfield Road, the cemetery south of Oakcroft Land and development around May's Lane / Peak land (including where the urban area of Stubbington protrudes into the gap). This observation is supported by the detailed analysis of gap study area 7a (see Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap, para 8) which states that:

*'There exists the potential to **make modifications to the settlement boundary of North Stubbington: to extend the boundary to run along Oakcroft Lane**, as the isolated field that sits aside Crofton Cemetery, does not protrude into the landscape beyond the current Northern and Western edges of Stubbington. Largely sitting behind a mature line of Poplars also helps this isolated field absorb some development (subject to detail design), **without risking the integrity of the Gap, as a whole.**'*
(Persimmon's emphasis)

Paragraph 11, Bullet 2 of Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap of the Gap Review evidence reconfirms the limited role that the area to the north west of Stubbington, south of Oakcroft Lane and east of Ranvilles Lane plays as a gap. The Gap study states that this area has *'the ability to absorb development into the landscape exists, without compromising the integrity of the Gap function'*. The Council will be aware of the planning application within this part of the gap (LPA Application Reference: P/20/0522/FP). This application comprises 209 new homes a considerable area of land to the north of the housing and to the south of the by-pass for ecological purposes. The Site Plan is attached to these representations at Appendix 1. The application is a resubmission of a planning application that addresses technical and design issues raised by the Council previously. It is understood that the application is due to be considered by planning committee in January 2021.

One key consideration when reviewing the boundary of a gap is the consideration that no more land should be included in the gap than is necessary (see adopted Core Strategy Policy CS22, Fareham Borough Council Gap Review 2012 and South Hampshire Strategy 2012). This concept is reiterated in the Gap Review Paper as 'minimum land take'. In light of the above, it is Persimmon's view that the gap evidence should be reconsidered with areas north and south of the by-pass assessed separately to take account of the by-pass. For reasons set out above, and in accordance with the Gap Review methodology, it is considered that a review of the evidence would indicate that the land north of the by-pass should be retained as gap and land to the south should be deleted from the gap designation. Retaining a gap to the north would preserve a c. 800m gap between the by-pass and the southern urban edge of Fareham, which is described in the Gap Review Paper as being *'moderate-large gap'* of a 'good distance' that *'gives the traveller time to experience the countryside after leaving one settlement before joining another.'* Retaining a gap of adequate width in this location is particularly important given the role Peak Lane plays in providing a well utilised north-south link between Stubbington and Fareham.

With regards to land to the east of Stubbington, Paragraph 11, of Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap of the Gap Review indicates that there is very little opportunity to absorb development in this corridor but that advanced planting along the eastern edge of the settlement would be beneficial. Persimmon Homes have interests in this area (as discussed in detail later in these representations). In summary, the proposals include new residential development, significant new strategic planting and open space along the eastern edge of the site. Discussion are on-going with the

Meoncross School to facilitate expansion of the car park and playing fields in the short term and the potential relocation of the school to other land within Persimmon's interests over the longer-term.

In light of the our comments set out above It is considered that the Fareham-Stubbington Strategic Gap should be redrawn so that land to the south and west of the by-pass is removed from the gap.

Whilst not a gap issue per se, the emerging and previous Local Plans, have tended to avoid allocating any significant growth on the periphery of Stubbington. Sensitively redrawing the gap boundary as suggested above will allow for much needed sustainable development housing to come forward to support the housing aspirations of those wish to live in or remain living in Stubbington.

The Meon Strategic Gap

As touched upon above, the function of a Strategic Gap is to prevent the coalescence of separate settlements. Land to the west of Stubbington is identified as a gap but there is no settlement to the west of the Stubbington that requires protection from coalescence. With regards to Strategic Gap Study Area 6, it is noted that the Gap Review study states that this gap is provided to ensure there is no coalescence between Stubbington and Titchfield along Titchfield Road. Whilst this northern most extent of this study area may serve this purpose, the central and southern parts of the Study Area 6 play no role whatsoever in preventing coalescence. This is recognised in Paragraph 13 of Chapter 4: Strategic Gaps SG 1: The Meon Gap of the Gap Review Study. Nonetheless, the Study recommends that the Gap is retained in this area due to: high levels of tranquillity, its role in providing separation of Portsmouth and Southampton, and to recognise the potential longer-term settlement expansion southwards from Titchfield and South Westwards from Hook. Based on the Council's Gap Review methodology, these are not adequate reasons to include this land within the gap.

A more logical delineation of the gap, which would ensure that no more land than necessary is included within it, could be to end its southernmost extent at Crofton Manor Equestrian Centre where the transition from countryside to urban (as part of Stubbington) becomes apparent. As recognised in the Gap review study, much of the land to the south of the Equestrian Centre is subject to protection under draft Policy DS3 (as discussed below), and ecological constraints which provide adequate protection against inappropriate development in this area. A gap is therefore not necessary.

General Comments on Policy DS2

Notwithstanding our comments above, in our considered view, Policy DS2 is too restrictive. There may be a point within the plan period, for example where the Council is unable to demonstrate a sufficient five year housing land supply, where additional housing may be required over and above those sites identified in the Plan. The Council has persistently struggled to demonstrate a sufficient five year housing land supply in recent years so flexibility in the Policy is required.

As demonstrated through the Council's Regulation 18 draft Plan, a sustainable location for such development may be in the Strategic Gap between Stubbington and Fareham. As such, the Policy should include additional wording to allow for appropriate and sustainable development in the Strategic Gap in such circumstances where housing supply needs to be increased.

The Policy also seeks to prevent development in Strategic Gaps that may significantly affect its 'integrity' and the 'distinctive nature of settlement characters'. This is a highly subjective policy criteria that will be challenging to interpret by decision-makers and applicants alike. The reference to 'integrity' and the 'distinctive nature of settlement characters' should be deleted from the Policy. The function of a Strategic Gap is to prevent the coalescence of separate settlements, which can be achieved through assessment of the impact of a proposed development on the physical and visual separation of settlements. The other policy criteria are superfluous.

In light of the above, it is considered that the Strategic Policy DS2 - Development in gaps and delineation of the Gap as shown on the draft Policies Map, should be redrawn as set out above. If this is not the case the Policy cannot be said to either justified or effective and is therefore unsound.

Strategic Policy DS3: Landscape

Policy DS3: Landscape identifies a number of Areas of Special Landscape Quality (ASLQ), including the Meon Valley. This is new Policy that does not form part of the adopted Local Plan. The first part of this Policy seeks to significantly restrict development in the Meon valley area. However, considering that the Council has successfully defended the Meon Valley area from a number of hostile planning applications in the recent past without this Policy in place, the justification for it is questionable. Given the prohibitive nature of Policy DS3, the development potential of Site 5 (Cuckoo Lane) for housing and new school provision, will unlikely be realised unless the site is allocated for development in the Local Plan and/or the site is excluded from the Meon Valley ASLQ designation.

HOUSING POLICIES

Strategic Policy H1 Housing Provision

As mentioned in the Duty to Co-operate section above, the Council is applying the Government's former draft Standard Methodology to arrive at its LHN (403 dpa) as opposed to the current Standard Methodology (514 dpa). The draft Standard Methodology is not Government Policy, it is only a consultation draft. The Government has recently (16th December 2020) released revised LHN figures that indicate that the Council's baseline LHN will increase to 514dpa. This increase LHN to exactly the same figure as per the current Standard Methodology. This newly published data clearly undermines the Council's premature decision to use the lower LHN figure. It is also noted that when the current and new LHN figures for Gosport and Southampton are considered both Councils are facing an increase in LHN of 106 dpa and 315 dpa, respectively. This is significant as both of these Authorities may need to look to Fareham to accommodate unmet housing needs. This will place even greater pressure on Fareham Borough Council to increase its housing requirement set out in Policy H1. For completeness, Portsmouth's LHN remains unchanged between the two data sets.

Notwithstanding, our concerns that the Council has failed the legal test with regards to the duty to cooperate, Policy H1 cannot be assumed to be sound as undershoots current and emerging LHN. The Plan cannot therefore be considered consistent with national policy and it is not positively prepared. Should the Council seek to amend its housing requirement (for example using the current Standard Methodology) and make consequential changes to its supply sites, re-consultation on a revised Regulation 19 Plan will be necessary.

Policy H1 includes an estimated 1,224 windfall dwellings. The Council's Housing Windfall Projections Background Paper (June 2020) does not provide a detailed breakdown of which sites are being considered as windfall. The Council's figures cannot therefore be scrutinised. Until such time as the Council publishes this detail underpinning the windfall allowance, this element of the supply should not be counted towards the Council's housing requirement.

The Policy also looks to implement a stepped housing requirement, which backloads housing delivery towards the latter part of the Plan period. This approach is at odds with the NPPF's objective to boost the supply of housing and appears not be justified by the expected rate of delivery of sites as set out in the summary housing trajectory in Appendix B of the Plan. For example, in the first period (2021/22 and 2025/26) the Council proposes a requirement of 2,250 dwellings (averaging 450 dwellings per annum). However its housing trajectory suggests that 3,085 dwellings will be delivered, which is equivalent to 617dpa. As such, Policy H1 should be expressed as an average requirement; it should not be stepped.

The Policy also sets out that approximately 428 homes will be delivered on specified brownfield sites and/or regeneration opportunities in Fareham Town Centre. In some cases deliverability, viability availability (i.e. in existing use) is not assured (notably sites FTC2-5). Whilst Local Plans should be aspiration, they should also be deliverable. Allied to above, a further 1,327 homes are identified on Housing Allocation sites (i.e. allocation prefixed with a HA reference). However, a number of these sites are rolled forward allocations from the current adopted Local Plan, and in some cases (i.e. HA29 and HA30) are sites that formed part of the Western Wards growth area that were originally identified

in the 1970's, but have failed to be delivered. As such, it is questionable whether the Council has properly assessed deliverability / developability of some of the sites comprising its supply. It is advisable therefore that the quantum of housing expected from some of the questionable supply sites should not be counted against the housing requirement in the Plan, and alternative sites (such as those set out in the Omission Sites section) should be identified to ensure the Council's housing requirements are met. In addition to the above, the deliverability issues associated with Welborne are well documented. Recently it is understood that due to delays in the site coming forward, the Council has lost external funding to deliver critical highway improvement works. This further underscores the challenges associated with this site. The Council would be well advised to take a highly cautious approach when seeking to include housing supply from Welborne. The draft Plan currently includes 4,020 dwellings as part of the housing supply. In light of the above, this figure is considered to be highly optimistic and should be revised downwards.

Notwithstanding, our concerns regarding the Council's choice of LHN, this figure should be regarded as the starting point for developing the Plan's housing requirement. Councils are advised through national planning policy/ guidance to consider whether any adjustments should be made to the LHN figure to account for other factors such as economic growth (which appears to be absent from the Plan) and unmet need from neighbouring authorities (as discussed above). With regards to affordable housing, the Council commissioned a Housing Needs Survey as part of its previous Regulation 18consultation draft Plan in 2017. At the time, the Survey suggested that there is a net affordable housing need of 302 dpa (i.e. nearly ¼ of the overall annual requirement). Whilst the Standard Methodology accounts for affordability (or lack thereof in Fareham's case), actual affordable housing need indicates that a further uplift to its LHN may be necessary.

Policy HP4 Five-Year Housing Land Supply

Policy HP4 states that development 'may be' permitted where a development meet all the criteria in policy HP4. The Policy should be reworded to positively state that a development 'will be' permitted if it meets the policy criteria. When determining planning applications, the decision maker is required to read the Local Plan as a whole; there is no reason for the Policy to be equivocal on this matter.

With regards to criterion (b) the policy states that a development should be '...integrated with the neighbouring settlement'. Does this mean a physical link between the development and the adjoining settlement or that a development should be integrated in design terms? This needs to be clarified.

Criterion c) seeks to prevent development in strategic gaps that may significantly affect its integrity. As per our comments in respect of Policy DS2, this is a highly subjective policy criteria that will be challenging to interpret by decision-makers and applicants alike. It is also noted that Policy DS2 sets out different policy requirement with regards to the protection of Strategic Gap (i.e. proposals should not affect the physical and visual separation of settlements). This has the potential to create an internal conflict within the Plan as it is unclear which policy requirements (either HP4 or DS2) would take precedent where the Council unable to demonstrate adequate five year supply. It is suggested therefore that the wording for Criterion c) is deleted or replaced with a cross reference to Policy DS2 (including Permission's suggested amendment to this DS2).

Policy HP5 Provision of Affordable Housing

With respect to the percentages of affordable housing sought at sites, Policy HP5 should include a viability review mechanism to provide flexibility. This will assist with the viability of schemes should there be a fall in market over the lifetime of the Plan and/or in circumstance where unknown development costs are introduced (nitrate mitigation costs associated with the HRA requirements are a case in point having seriously affected the viability of schemes over the past year or so).

As set out in the supporting text to this Policy (paragraph 5.32), the Council publishes on its website the identified affordable housing need by area of the Borough. The Council's website shows considerably different housing need for each area. The affordable tenure mix is therefore too prescriptive and does not reflect the Council's own evidence base. It is advisable therefore that the

Council replaces criteria i-ii with a statement confirming that affordable housing mix and tenure will be negotiated with the Council evidence base set out its webpage used as the starting point.

Further underscoring our concerns with the nature of the tenure mix, the Council should be aware of the potential practical challenges associated such a small percentage of Affordable Home Ownership. The Policy could be interpreted by officer so that Affordable Home Ownership is provided at 10%, which would be a challenge for reasons set out below. Registered Providers are becoming ever specialised with some only dealing with the shared ownership side and others the rented side. Requiring such a small percentage of Affordable Home Ownership products through this Policy may create challenges in terms the viability of tender bids for this type of unit. In addition, Affordable Home Ownership, including shared ownership schemes, have been shown to be an effective means of getting people on the property ladder. As the Council's own evidence shows 10% is considerably below what is actually needed.

The final element of Policy HP5 addresses the market rent of Affordable Rented units, which will be judged as 80% of market rent or the relevant Local Housing Allowance (LHA), whichever is lower. The NPPF only make provision for rent to be set at 80% of market. It does not state that market rents should be benchmarked against LHA. The reference to LHA should be deleted to ensure that HP5 is in conformity with national policy.

It is also noted in Paragraph 5.42 of the supporting text to HP5 that the Council may need review the Affordable Housing Supplementary Planning Document (SPD) to address changes to the affordable housing and mix. SPDs should not be used to review issues that have a direct impact on viability. This should be tested through the Local Plan review process.

Policy HP7 Adaptable and Accessible Dwellings

The PPG sets out a number of tests against which Councils should consider when seeking to introduce M4(2) and M4(3) policies into its Local Plans. The Council's Specialist Housing Background Paper (September 2020) has been produced which shows how the Council claims to have met these tests.

In terms of need, the Background Paper sets out the population with Long Term Health Problem or Disability based on census data. However, this measures population, not households, so should not be assumed to an accurate proxy for need. It should also be noted that some people who state that they may have a Long Term Health Problem or Disability as part of a Census response may not have an illness that would affect mobility and would not therefore not necessarily require M4(2) or M4(3) dwellings. The evidence base should be updated to reflect the above.

With regards to the provision of Category 3 specifically, the Council's evidence of need is weak being based on a national wheelchair usage that may not reflect the level of need in Fareham Borough. Furthermore, with regards to Category 3 affordable housing, from a practical point of view, Registered Providers are less willing to take on wheelchair dwellings as they can be difficult to occupy. If there is no suitable occupier then the unit could be sat empty for a significant period while a suitable occupier is found. During this time the unit is not generating any income, and could have been used to house a family that is in need at the time.

As the Council correctly identifies, a large proportion of older homeowners will seek to remain within their own homes with care provided in situ. Should these owner occupiers need to downsize or relocate they will be able to utilise the equity built up within their dwellings to access products which meet their specific. This may be sheltered or extra care accommodation. Within recent years, as this market has developed, the industry has responded with a number of private sheltered accommodation schemes approved within Fareham. In this context, the Local Plan also looks to facilitate the delivery of specialist housing through Policy HP8 and through specific housing allocations made in the Plan (HA42 – HA43). The Background Paper does not appear to have factored in the supply of specialist homes that may come forward be on allocated sites and windfall sites permissible under Policy HP8.

With regards to the second test relating to location of specialist housing, as set out HP8, this type of accommodation is best located in accessible locations. Given the mobility challenges which some older people face, town and district centres, with their conveniently located services such as shops and health facilities, are ideal locations for older persons housing. Fareham town centre is a highly accessible location where a significant quantum of flatted housing is proposed with the benefit of a reduced affordable housing policy requirement. District Centres are also highly accessible locations where there is a potential for older persons housing could be delivered. The Council should therefore consider restricting this Policy requirement to areas of high accessibility.

Policy HP9 Self Build and Custom Homes

Policy HP9 sets out a policy requirement for 10% of all units on sites over 40 dwellings to provide plots for sale to address local self or custom build need. It is noted, however, that at Paragraph 5.8 of the Council's Self and Custom Build Housing Background Paper (September 2020) it is stated that the Council has met its past and future self-build requirements – this has been achieved without the need for a specific policy. It is also noted that the adopted Welborne Plan requires some 1% of its housing to be for self / custom build. Set against the current identified need of 35 net plots it would seem excessive to require a policy to further increase self / custom build supply. This could result in significant over provision of a product for which there is no clear market demand. In light of the above, the justification for Policy HP9 is therefore questionable. The policy does include provision for plot to be developed for non-self-build ,should they not be taken up, however, this Local Plan has made no assessment about the extent to which this would affect cash flow and the viability of developments. It is Persimmon's view therefore that this Policy should be deleted.

Notwithstanding our overarching concerns regarding the justification for this policy, there are a number of practical considerations that the Plan fails to adequately acknowledge. Criterion a) for example, sets out that self or custom build plots should be serviced. The Policy needs to clarify what is meant by 'serviced'. Does serviced this relate highway access, gas, water, electricity and/or broadband, and to which point should the plots be serviced? Turning to criterion c) it is not clear who would be responsible for setting out the design parameters. Placing a requirement to conform to set parameters could put off some prospective self / custom builders. The requirement to provide self and custom build plots may also have a number of practical and management issue, such as:

- Phasing and completion of the wider site.
- Section 106 contributions due to the exemption that applies to self-build housing.
- Delivery of housing in accordance with paragraph 59 of the NPPF to boost significantly housing supply, where supply on an ad hoc basis by self-builders is likely to be slow compared with the remainder of the site or even not take place at all.
- The reserve matters period running out and needing to be extended.
- Ad-hoc builders turning up outside specified hours of work.
- Storage of materials as there is limited room on plot and storage spills onto the market housing part of the site.
- Purchasers having to stop building due to unemployment/lack of funds.
- Purchaser dissatisfaction where building continues on a site which was expected to finish when they moved in.

CLIMATE CHANGE

Strategic Policy CC1 Climate Change

This Policy states that the 'Council will promote mitigation and adaptation to climate change through...' It is unclear whether the criteria will be sought as part of development proposals, or whether the criteria relate to development delivered by the Council. This requires clarification. If it is the former, the Policy should make clear that the criteria are not requirements but should only be met where it is possible to do so.

Policy CC2 Managing Flood Risk and Sustainable Drainage Systems

Policy CC2 requires all developments to be designed in accordance with the CIRIA C753 SuDS Manual or equivalent national or local guidance. The SuDS manual is, however, only guidance. In Persimmon's experience, strict adherence to the guidance can be problematic as the design of a SUDS system also need to consider design, aesthetics, engineering etc. It is recommended therefore that the wording for this bullet point is prefixed with 'Where possible,' to provide the necessary flexibility.

NATURAL ENVIRONMENT

Policy NE2 Biodiversity Net Gain

Policy NE2 sets out a requirement for site to deliver 10% net gain for biodiversity. The Local Plan viability assessment assumes a cost of £500 per dwelling. This development cost is based on limited evidence and seems low, particularly for greenfield sites (as opposed to brownfield equivalents) which are likely to require significant more extensive measures to achieve a 10% net gain. In many cases, the requirement to achieve BNG is likely to negatively impact on the developable area, resulting in a loss of revenue that negatively impacts on viability, rather than be a cost associated with each individual units per se. In Persimmon's view, the viability evidence to support the introduction of this Policy is inadequate. As mentioned above, meeting BNG at 10% can require considerable land take; on some sites Persimmon has been involved in, BNG has required around 50% of the gross site area. It is not clear whether or to what extent the Council has factored in this 'land hungry' BNG requirement as part of its housing allocations capacity estimates. It is also noted that BNG should be achieved across a site, it is not a requirement to be met at the individual plot level (although this might form part of the BNG solution). As such, supporting text Paragraph 32 is misleading and should be deleted.

Policy NE4 Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

This is new Policy which sets out Fareham's policy approach to dealing with excessive nutrient (nitrate) loading on protected European sites of ecological importance. However, the Policy is light on detail with insufficient guidance as to how applicants will be able to demonstrate conformity. Given Persimmon's significant experience in dealing with such matters, the Company is aware of how this Policy can be implemented in practice, but for less informed developers/applicants this may be more challenging.

Notwithstanding the above, the Company is aware that the primary means of determining whether a development proposal will be able to demonstrate nutrient neutrality is by producing a nutrient budget using the Natural England Methodology. Given that the Natural England Methodology provides a key evidence base and is fundamental to the implementation of Policy NE4, it is critical that this document is examined in detailed alongside the Local Plan. Of particular concern is that Natural England's Methodology includes a number of onerous stages that result in significantly more mitigation being required than is actually necessary. These provisions include, but are not limited to, housing occupancy rates, internal migration (particularly those households that are occupying new affordable housing) and default permit levels. Furthermore, despite many of steps set out Natural England Methodology taking a precautionary approach to nitrate assessment, an arbitrary buffer of 20% increase in nitrate loading is added at the end of the calculator. This buffer is not required and will further exacerbate the issue of overproviding mitigation land that is not necessary. Lastly, it is noted that the Partnership for South Hampshire has updated the Integrated Water Management Study (IWMS). The IWMS provides a key evidence base underpinning the nitrate assessment work, but the Natural England Methodology does not take into account this new evidence.

Policy NE5 Solent Wader and Goose Sites

Policy NE5 sets out the Council approach to protecting area which are used by Solent Waders and/or Brent Geese. The Policy makes reference to such area as shown on the Policies Map. These

designations are, however, informed by an interactive GIS map provided on the Solent Bird Aware website, which forms a critical evidence base to the development of Policy NE5. It is therefore concerning that, on the same webpage as the bird habitat GIS mapping, members of the public can download a form to report bird sightings. It is not clear whether or to what extent these reported sightings are authenticated / scrutinised by a qualified ecologist. There appears to be wide scope for land to be incorrectly identified as a bird site leading to unnecessary cost being expended to mitigate site, and in the worst cases complete sterilisation of that land. This is certainly the case with a number of sites that are with Persimmon Homes' interests (as detailed later in these representations). There is a concern therefore that the mapping evidence base underpinning Policy NE5 is flawed.

The Policy also does not set provision with regards to bird surveys. The methodology for bird sites allows sites to be identified as habitat even if they are not actually being used by birds. It would seem logical that the policy makes provision for applicant to undertake ecology survey and assessment of bird sites in order to demonstrate the absence or presence of a species. We would recommend that one year's survey data should be sufficient, with further surveys only required if the some activity has been identified at a site.

The Council will also be aware that it is the Solent Bird Aware mapping (not the Policies Map) that is used by consultees (Natural England and the Council's own in-house ecologist), to determine whether a development will impact on any protected bird habitat areas, to avoid any confusion in the future, and to ensure the Policies Map remains in date, it is suggested the Policy Map deletes these designations.

With regards to the criterion a) 'Core and Primary Support Areas' the Policy requires that development on such sites should result in an overall net gain to the Solent Wader and Brent Geese Network. BNG is a requirement of Policy NE2; the concept for which is established in the NPPF. However, Persimmon are unaware of any such requirement in national policy or the evidence base underpinning this policy, for a net gain for specific species, including protected birds.

Policy NE6 Trees, Woodland and Hedgerows

Point a) of this Policy advises that the 'unnecessary loss' of non-protected trees, hedgerow and woodland should be avoided. It is unclear what 'unnecessary loss' means in practice.

Point b) of the Policy should be a new sentence, and what is meant by the term 'unavoidable' in this context should be clarified.

Policy NE8 Air Quality

Criteria a) of this policy requires electricity charging infrastructure to be provided as part of new development (excluding Welborne). It is unclear why this Policy is not to be applied to Welborne. Presumably this is because of the impact of such provision on viability. Viability issues associated with EV charging provision are, however, not limited to Welborne.

The Local Plan Viability study includes development cost associated with EV charging as part of £10,000 per plot contingency. Paragraph 5.3.8 of the Study states that, '*it is unclear at stage of writing if or when any of these measures will be required, so [the study takes] a very cautious and conservative approach....*' With regards to the EV charging, Policy NE8 requires such provision; there is no uncertainty as to what is expected of a development proposal. As such, the Viability Study should consider this issue in greater detail and not combine this policy requirement with other unknown cost demands on development. Combining these 'unknowns' a single contingency means that it is not possible to scrutinise in detail whether the assumptions made with respect to EV is reliable.

We would highlight that the cost for providing EV charging points is around £500-£600 but this does not include additional costs associated with providing additional sub-stations on larger development sites so that all charging points are capable of being used concurrently (alongside all other energy

demands on a development), and the potential to provide enhanced electricity supply (i.e. off-site upgrades) over and above that required for the units that could challenge a scheme's viability.

As current drafted, this element of the Policy is not justified.

TRANSPORT AND OTHER INFRASTRUCTURE

Strategic Policy TIN1 Transport Infrastructure, Policy TIN2 Highway Safety and Road Network and Strategic Policy TIN4: Infrastructure Delivery

These policies concern development contributions to the delivery of new infrastructure. However, it is considered the funding for such infrastructure may, in many instances, be a matter for CIL.

Notwithstanding, the above, if such Infrastructure is a requirement to make the development acceptable in planning terms, then such contribution need to meet the relevant tests set out in the CIL Regulations. It is no longer appropriate for blanket contribution to be sought by planning authorities. The Policy should be clear on this matter.

With specific reference to TIN2 it is unclear why the Council has chosen not to show the alignment of the Stubbington by-pass on the Policies Map given its strategic importance. This Policies map should be updated to show this route.

DESIGN

Policy D1 High Quality Design and Place Making

Policy D1 makes reference to a number of principles of policy and urban design, but also makes reference to guidance contained in the supporting text. For clarity and avoid any confusion over what is policy and what is supporting, text, it is suggested that this cross reference to the supporting text contained in the policy wording is deleted.

The Council should also review the policy to remove any duplication with other policies in the Plan, for example the section relating nature.

Consideration should also be given as whether the policy needs to be so detailed given that the Council has comprehensive guidance on design set out in its adopted Design SPD.

Policy D3: Coordination of Development and Piecemeal Proposal

This Policy seeks to avoid ransom situations. However, The Council will be aware of case law that prevents it from interfering on private property rights with regard to depressing or prevent returns to a landowners.

Policy D4: Water Quality and Resource

The second part of this policy requires developers to meet the Optional Technical Housing Standard for Water Efficiently (i.e. 110L/person/day). Meeting these Standards should be optional, not required. Whilst the Natural England Nutrient Methodology for the Solent area requires development to meet these standards as a means of addressing nitrate loading, there may be instances where nutrient neutrality can be achieved without doing so. The justification for requiring proposals to meet this standard are inadequate.

D5 Space Standards

The housing standards review introduced the optional space standards which local authorities could adopt by way of reference in their local plans. However, a prerequisite to the adoption of the space standards are the following tests set out in the planning practice guidance (Paragraph: 020 Reference ID: 56-020-20150327).

“Where a need for internal space standards is identified, local planning authorities should provide justification for requiring internal space policies. Local planning authorities should take account of the following areas:

- **need** – evidence should be provided on the size and type of dwellings currently being built in the area, to ensure the impacts of adopting space standards can be properly assessed, for example, to consider any potential impact on meeting demand for starter homes.
- **viability** – the impact of adopting the space standard should be considered as part of a plan’s viability assessment with account taken of the impact of potentially larger dwellings on land supply. Local planning authorities will also need to consider impacts on affordability where a space standard is to be adopted.
- **timing** – there may need to be a reasonable transitional period following adoption of a new policy on space standards to enable developers to factor the cost of space standards into future land acquisitions.’

In order to meet the policy test for the inclusion of the space standards there is a requirement for the council to establish the need for the adoption of the national space standard. To this end, the Council has published a Specialist Housing Background Paper (September 2020). Para 6.7 of Background Paper states most dwellings that have been consented or are awaiting determination are consistent with the 2015 Technical housing standards – nationally described space standard. The Background paper, makes references to the larger plots not meeting this standard, with an example being made of site ref 14/19. However, on the whole most dwellings considered in the Council’s Background Paper, including large units, are meeting the Optional standards. From a need perspective, it would seem as though there is little justification for the introduction of this Policy.

In terms of first part of the viability test, the Council’s Local Plan Viability Study indicates that development viability would not be negatively impacted by the introduction of the standards. This Study, however, is completed at a relatively high level, which makes it difficult to conclude whether this part of the test has been complied with. With regards to the second part of the test, no assessment has been carried out by the Council to demonstrate that the requirement for new development will not negatively impact affordability within the market.

As set out in paragraph 6.10 of the Background Paper, the Council has decided not to set a transition period for the adoption of the national space standards as it is of the view its introduction would not affect viability. For reasons set out above, we do not concur with this assessment, and suggest that a three year grace period is introduced to allow sites that are under a fixed contract to be brought forward. It is also noted that, the Council are looking to apply the draft policies in this Plan, including the requirement for national space standards prior to the examination or adoption of the plan. This contrary to the approach set out in the planning practice guidance. It is not practical to expect development proposals that are currently being considered to suddenly meet space standards.

In light of the above, Policy DS5 is not justified and should be deleted for reasons of soundness.

Local Plan Appendices

Appendix B set out a summary housing trajectory for the sites identified in the Plan. This is inadequate to properly assess the delivery expectation made by the Council with respect to individual sites. To enable proper scrutiny of the trajectory, the Council’s housing trajectory should be broken down by individual sites. This is particularly important because the Council has consistently over-estimated the delivery timescales for key sites. For example, Welborne, which was originally identified in the Core Strategy (2011), was expected to commence delivery in 2014/15. The site has still not achieved an implementable planning permission, and commenced development is still some way off.

4. Omission Sites

The following section provides an overview of the sites in Fareham Borough that are in Persimmon's interests, but have not been identified for allocation. These sites are largely located on the periphery of Stubbington and are within the ownership of the Dunley Estate. The Table below summarises the Dunley land holdings including capacity. The sites are shown on the enclosed Location Plans provided at Appendix 2.

Site Number	Address	Gross Area Acres (Hectares)	Site Capacity Estimate*
1	Land East of Burnt House Lane	23.53 (9.52)	240 - 320
2	Land West of Peak Lane	46.25 (18.72)	TBC
3	Land North of Titchfield Road	4.83 (1.95)	40 - 50
4	Land South of Titchfield Road	2.78 (1.12)	10 - 30
5	Land West of Cuckoo Lane	52.76 (21.35)	150-200
6	Land at Oakcroft Lane	41.04 (16.20)	209
Total		171.19 (69.28)	649 - 809

*Based on net developable area, not gross area.

Sites 1-3 and Site 6 fall within the South of Fareham SGA that was identified as part of the most recent Regulation 18 draft Plan. The remaining sites (Sites 4 and 5) are located outside of the SGA. The following section addresses each site in turn.

In support of the Draft Local Plan Regulation 19 Plan, the Council updated its Strategic Housing and Employment Land Availability Assessment (SHELAA) in September 2020. This replaces the previous study which published in December 2019. The conclusion of the SHELAA as related to each of the sites shown in the Table above are considered.

Site 1: Land East of Burnt House Lane

This site is located to the eastern edge of the Stubbington. Persimmon has undertaken some initial capacity testing in relation to Site 1, including an initial highways assessment and masterplanning. The outcome of this work indicates that the site is capable of delivering around 240 to 320 new homes. This accounts for on-site constraints including the provision of a noise attenuation bund, and strategic planting to the eastern and northern boundaries of the site. Adjacent to this site is the Meoncross School, which is seeking alternative arrangements for playing pitches close to the school (the existing pitches are currently leased and do not adjoin the school) and additional car parking to avoid parents parking on the nearby residential streets. Persimmon is in discussion with the school about how development at the Burnt House Lane may assist in addressing the school's immediate needs. In the longer term, however, given that the school is unable to expand within its existing site, consideration is being given as to whether the facility could be relocated to the Cuckoo Lane site (Site 5) to the west of Stubbington. The Council is strongly of the view that the site is sustainable and suitable for development and it is capable of being brought forward as a standalone allocation site, or as part of a wider masterplan with the South of Fareham SGA, should the Council seek to revisit this project.

The SHELAA 2019 concluded that Site 1 (SHELAA Ref: 1040) was deliverable housing site. However, in the Council SHELAA 2020 the Council considers the site to be undeliverable due a) to a significant visual impact undermining the integrity of the Strategic Gap, and b) the site being classified as a Low Use Brent Geese and Solent Waders site with no evidence of a strategy compliant solution. The

Council ascribes a capacity of 125 dwellings to the site. It is unclear how the Council has reached the conclusions in the new SHELAA given its assessment of the 2019 SHELAA undertaken just nine months prior. Notwithstanding this, as set in these representations, it is Persimmon's view that the Strategic Gap should be redrawn to exclude this site. With regards to the identification of the site as bird habitat, we have raised concerns in these representations regarding the robustness of the evidence underpinning this designation. Nonetheless, by improving the suitability of other sites in the area for bird use (i.e. Site 2 or 5) under the terms of the Council's Policy NE5, a policy compliant strategy to address the loss of the bird site to development is not unachievable. A strategy of improving habitat off-site is being taken in respect of the Oakcroft Lane site, which is also a low use site, and has the support of Natural England and the Council's ecologist.

Site 2: Land West of Peak Lane

This site is located to the north of the by-pass and extends across much of the gap towards the urban edge of Fareham in the north. Given its location and context, the development potential of this site is considered to be limited. However, the land could be an effective nitrate mitigation and/or bird protected habitat site that mitigation solution that could be used to address the potential impact development on other sites within Permission interests and/or other sites in the Borough the require mitigation solutions.

Site 3: Land North of Titchfield Road

This site is located to the north-west of Stubbington. Whilst this site formed part of the previous SGA, it is clearly distinct from and separate from it. This site is small scale that is well-contained in landscape terms, surrounded by existing built development and is deliverable in the short-term as stand-alone site that can be brought forward either as part of outside of the SGA masterplanning process should the Council seek to revisit this project. Initial capacity assessments of Site 3 indicates that it is capable of delivering around 40-50 new homes.

The SHELAA 2019 concluded that Site 3 (SHELAA Ref: 3190) was a deliverable housing site. However, in the SHELAA 2020 considers the site to be undeliverable due it being classified as a Low Use Brent Geese and Solent Waders site with no evidence of a strategy compliant solution. The Council ascribes a capacity of 20 dwellings to the site. It is unclear how the Council has reached these conclusions regarding the suitability of the site given its assessment of the site undertaken just nine months prior. With regards to the identification of the site as bird habitat, we have raised concerns in these representations regarding the robustness of the evidence underpinning this designation. Nonetheless, by improving the suitability of other sites in the area for bird use (i.e. Site 2 or 5) under the terms of the Council's Policy NE5, a policy compliant strategy to address the loss of the site to development is not unachievable. This approach to improving habitat off-site is being taken in respect of the Oakcroft Lane site, which is also a low use site, and has the support of Natural England and the Council's ecologist.

Site 4: Land South of Titchfield Road

This small site is located to the north-west of Stubbington. It bounded to the north-east and north-west by existing housing fronting Titchfield Road and the Crofton Equestrian Centre. The site's relationship with the wider Meon Valley landscape is limited by the woodland to the south of the site. The woodland to the south and its associated watercourse (which is also within Dunley Estate ownership) is recognised as an important ecological resource. Sensitive site design, however, could provide a means of ensuring the ecological interests at this adjoining site are protected and enhanced. Initial site capacity assessment indicated that the site is capable of delivering between c. 10-30 new homes. Were the Council minded to allocate the site for residential development, it could provide an important contribution towards its small-medium site housing allowance as required by Paragraph 68 of the NPPF.

Site 5: Land West of Cuckoo Lane

This site adjoins the settlement boundary of Stubbington to its north-eastern boundary. It is characterised by a substantial arable field that is well-contained in the north by the built form of Stubbington and substantial woodland. Initial capacity testing of this site, which has allowed for a substantial ecological buffer to the woodland, strategic planting to contain the site from the wider Meon Valley, land for a new school and new parkland further south, indicates that it is capable of delivering around 150-200 new homes.

This site is assessed in the SHELAA as being undeliverable due to being located within a *'highly sensitive landscape (based on the Fareham Landscape Assessment) and within an Area of Special Landscape Quality. Significant ecological constraints associated with the adjacent SPA/SSSI affect the suitability of the site.'* The SHELAA ascribes a capacity of 240 dwellings to the site. Whilst the ecological and landscape challenges associated with this site are recognised, they are not insurmountable. Although not a consideration for the SHELAA per se, the site provides the opportunity to deliver substantial ecological and recreation benefits, alongside community benefits, including new education provision and allotments.

Site 6: Land at Oakcroft Lane

Similar to Sites 1 and 3, the Oakcroft Lane site can be delivered outside of or as part of the SGA process (should the Council revisit this project). However, as demonstrated through the planning application, the site is deliverable now as a standalone development site. Technical issues associated with the development have been resolved and Persimmon are currently awaiting determination of the application by the Council. The site is capable of delivering 209 new homes alongside a considerable area of space to the north of the housing and to the south of the by-pass for ecological purposes. The Site Plan is attached to these representations at Appendix 1.

The SHELAA 2019 concluded that Site 3 (SHELAA Ref: 3141) was a deliverable housing site. However, in the SHELAA 2020 the Council considers the site to be undeliverable due to the site to be undeliverable due to the site being classified as a Low Use Brent Geese and Solent Waders site with no evidence of a strategy compliant solution. The Council ascribes a capacity of 200 dwellings to the site. It is unclear how the Council has reached these conclusions given its assessment of the site undertaken just nine months prior, and considering the site-specific mitigation strategy for protected birds has the support of Natural England and the Council's ecologist via the planning application process.

Policy | DS2 - Development in the Strategic Gaps

3 Representations

	Legally compliant	Sound	Complies with the duty to co operate
Total	3	3	3
Yes	3 100%	1 33%	2 67%
No	0 0%	2 67%	1 33%

Respondent: Mrs Wendy Ball (2311-221619)

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Strategic Gap DS2: The Strategic Gaps, as currently defined, preventing the coalescence of urban areas and separating the identities of settlements are essential.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Ms Pamela Charlwood (1012-13157)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Whilst we wholeheartedly support the policy regarding the Strategic Gaps D2 and paras 3.9 and 3.44) we note with concern the comments at 3.46 regarding the Fareham/Stubbington strategic gap and the caveat about its current boundaries. We urge FBC to adopt a coherent and transparent approach to land management, resisting erosion around the edge of current Strategic Gaps, together with a coherent and consistent approach to mitigation bids. In the area of Stubbington and Newgate Lane, this will be particularly important when the impact of the new bypass becomes evident in 2021/22.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Openness and clarity about what is really intended in respect of the boundaries of Strategic Gaps, together with a clear policy on use of land for 'mitigation'

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would provide detailed information which would clarify important issues - ie the boundaries of the Strategic Gaps - which is currently vague

Your suggested revised wording of any policy or text:

Para 3.46 must be clarified

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

As stated in previous submissions -to speak on behalf of a substantial number of residents of Hill Head

Respondent: Mr Jason Cullingham (1412-271354)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

I believe Fareham Borough Council Plan 2037 does meet the legal requirements for plan making as the law stands, and would also appear to be mainly soundly prepared, in particular the maintenance of the existing Strategic Gaps within the Borough which supports the Prime Minister's September commitment to restore nature to 30% of the UK's land. I do not, however, think the plan is totally sound nor does it comply with any Duty to Cooperate with neighbouring Borough, eg: a) the Plan fails to be self-consistent in that, the it states (paragraph 3.4.6 refers), that there is "evidence" showing that the boundary of the Stubbington / Fareham Gap could change with little effect on the residents. On reading the evidential data provided that "evidence" would, however, appear merely to be opinion (of a planner at Hampshire County Council) and fails therefore to constitute evidence. A stronger commitment not to change the boundary or, better still, a way to positively protect it would be preferable. b) whilst the Plan appears to indicate a willingness on the part of FBC, to comply with the duty to cooperate with neighbouring Boroughs (through the Partnership for South Hampshire and other means), it should be noted that; change to the boundary of the Stubbington/Fareham Local Gap (para c) above refers), and any consequent development would also increase traffic levels in the area of the Stubbington Bypass which would negate the benefit that this roadway is planned to bring to the residents of the Gosport peninsula - an area of the country that is already recognised as one of the most deprived in the South of England. This has previously been noted by; the MP for the area, Gosport Council and a large number of the residents of both Gosport and Fareham. Continuing with development in this area would, therefore, be contrary to Fareham Borough Council's Duty to Cooperate with neighbouring councils (primarily Gosport). It is also not clear within the Plan as it currently stands that the Council would not in future allow incremental changes to the boundary of the Stubbington/Fareham Local Gap which, once commenced, would allow property developers their use as precedent to allow further, larger, building schemes. I would suggest that stronger, more positive assurances should be provided within the Plan to the effect that changes will not be made to the boundaries of the Stubbington/Fareham Local Gap without the consent of, as a minimum, Gosport Borough Council and the MP for that area. c) Although FBCs proposed increase to employment at Solent Airport (Daedalus) is to be welcomed, it is noted that the Council is primarily proposing to increase aviation based employment inclusive of an increase to the number of flights making use of the runway. It should be noted that, by continuing to target aviation related employment (inclusive of the storage and sale of Avgas fuel), the council would appear to be encouraging one of the least Green and most polluting forms of transportation. This is directly contrary to current Government policy to promote the development and use of Green Energy sources (e.g. wind power and hydrogen) and also achieve zero carbon production by 2050. It might also be noted that the Solent Airport site is currently failing to provide a positive return on the resident's investment. Rather than continuing down the) path of attempting to increase aviation related employment and the number of flights utilising the runway, FBC would better serve its residents by championing more environmentally-based employment opportunities in support of Government Climate Change policies."

What modification(s) is necessary to make the Local Plan legally compliant or sound?

a) the Plan fails to be self-consistent in that, the it states (paragraph 3.4.6 refers), that there is “evidence” showing that the boundary of the Stubbington / Fareham Gap could change with little effect on the residents. On reading the evidential data provided that “evidence” would, however, appear merely to be opinion (of a planner at Hampshire County Council) and fails therefore to constitute evidence. A stronger commitment not to change the boundary or, better still, a way to positively protect it would be preferable. b) whilst the Plan appears to indicate a willingness on the part of FBC, to comply with the duty to cooperate with neighbouring Boroughs (through the Partnership for South Hampshire and other means), it should be noted that; change to the boundary of the Stubbington/Fareham Local Gap (para c) above refers), and any consequent development would also increase traffic levels in the area of the Stubbington Bypass which would negate the benefit that this roadway is planned to bring to the residents of the Gosport peninsula - an area of the country that is already recognised as one of the most deprived in the South of England. This has previously been noted by; the MP for the area, Gosport Council and a large number of the residents of both Gosport and Fareham. Continuing with development in this area would, therefore, be contrary to Fareham Borough Council’s Duty to Cooperate with neighbouring councils (primarily Gosport). It is also not clear within the Plan as it currently stands that the Council would not in future allow incremental changes to the boundary of the Stubbington/Fareham Local Gap which, once commenced, would allow property developers their use as precedent to allow further, larger, building schemes. I would suggest that stronger, more positive assurances should be provided within the Plan to the effect that changes will not be made to the boundaries of the Stubbington/Fareham Local Gap without the consent of, as a minimum, Gosport Borough Council and the MP for that area. c) Although FBCs proposed increase to employment at Solent Airport (Daedalus) is to be welcomed, it is noted that the Council is primarily proposing to increase aviation based employment inclusive of an increase to the number of flights making use of the runway. It should be noted that, by continuing to target aviation related employment (inclusive of the storage and sale of Avgas fuel), the council would appear to be encouraging one of the least Green and most polluting forms of transportation. This is directly contrary to current Government policy to promote the development and use of Green Energy sources (e.g. wind power and hydrogen) and also achieve zero carbon production by 2050. It might also be noted that the Solent Airport site is currently failing to provide a positive return on the resident’s investment. Rather than continuing down the) path of attempting to increase aviation related employment and the number of flights utilising the runway, FBC would better serve its residents by championing more environmentally-based employment opportunities in support of Government Climate Change policies.”

How would the modification(s) you propose make the Local Plan legally compliant or sound?

a) the Plan fails to be self-consistent in that, the it states (paragraph 3.4.6 refers), that there is “evidence” showing that the boundary of the Stubbington / Fareham Gap could change with little effect on the residents. On reading the evidential data provided that “evidence” would, however, appear merely to be opinion (of a planner at Hampshire County Council) and fails therefore to constitute evidence. A stronger commitment not to change the boundary or, better still, a way to positively protect it would be preferable. b) whilst the Plan appears to indicate a willingness on the part of FBC, to comply with the duty to cooperate with neighbouring Boroughs (through the Partnership for South Hampshire and other means), it should be noted that; change to the boundary of the Stubbington/Fareham Local Gap (para c) above refers), and any consequent development would also increase traffic levels in the area of the Stubbington Bypass which would negate the benefit that this roadway is planned to bring to the residents of the Gosport peninsula - an area of the country that is already recognised as one of the most deprived in the South of England. This has previously been noted by; the MP for the area, Gosport Council and a large number of the residents of both Gosport and Fareham. Continuing with development in this area would, therefore, be contrary to Fareham Borough Council’s Duty to Cooperate with neighbouring councils (primarily Gosport). It is also not clear within the Plan as it currently stands that the Council would not in future allow incremental changes to the boundary of the Stubbington/Fareham Local Gap which, once commenced, would allow property developers their use as precedent to allow further, larger, building schemes. I would suggest that stronger, more positive assurances should be provided within the Plan to the effect that changes will not be made to the boundaries of the Stubbington/Fareham Local Gap without the consent of, as a minimum, Gosport Borough Council and the MP for that area. c) Although FBCs proposed increase to employment at Solent Airport (Daedalus) is to be welcomed, it is noted that the Council is primarily proposing to increase aviation based employment inclusive of an increase to the number of flights making use of the runway. It should be noted that, by continuing to target aviation related employment (inclusive of the storage and sale of Avgas fuel), the council would appear to be encouraging one of the least Green and most polluting forms of transportation. This is directly contrary to current Government policy to promote the development and use of Green Energy sources (e.g. wind power and hydrogen) and also achieve zero carbon production by 2050. It might also be noted that the Solent Airport site is currently failing to provide a positive return on the resident’s investment. Rather than continuing down the) path of attempting to increase aviation related employment and the number of flights utilising the runway, FBC would better serve its residents by championing more environmentally-based employment opportunities in support of Government Climate Change policies.”

Your suggested revised wording of any policy or text:

a) the Plan fails to be self-consistent in that, the it states (paragraph 3.4.6 refers), that there is “evidence” showing that the boundary of the Stubbington / Fareham Gap could change with little effect on the residents. On reading the evidential data provided that “evidence” would, however, appear merely to be opinion (of a planner at Hampshire County Council) and fails therefore to constitute evidence. A stronger commitment not to change the boundary or, better still, a way to positively protect it would be preferable. b) whilst the Plan appears to indicate a willingness on the part of FBC, to comply with the duty to cooperate with neighbouring Boroughs (through the Partnership for South Hampshire and other means), it should be noted that; change to the boundary of the Stubbington/Fareham Local Gap (para c) above refers), and any consequent development would also increase traffic levels in the area of the Stubbington Bypass which would negate the benefit that this roadway is planned to bring to the residents of the Gosport peninsula - an area of the country that is already recognised as one of the most deprived in the South of England. This has previously been noted by; the MP for the area, Gosport Council and a large number of the residents of both Gosport and Fareham. Continuing with development in this area would, therefore, be contrary to Fareham Borough Council’s Duty to Cooperate with neighbouring councils (primarily Gosport). It might also be noted that the Solent Airport site is currently failing to provide a positive return on the resident’s investment. Rather than continuing down the) path of attempting to increase aviation related employment and the number of flights utilising the runway, FBC would better serve its residents by championing more environmentally-based employment opportunities in support of Government Climate Change policies.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I am currently not convinced that, without attending, my comments would be properly taken into consideration

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policies H1, DS2, HP1, HP2

B1c Which part of the Policies Map?

The strategic gap and settlement policy boundaries in the vicinity of Southampton Road Titchfield should both be amended as suggested in the attached comments

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Please see attached comments with reference to the 'positively prepared' and 'justified' tests of soundness

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Please see attached comments

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Please see attached comments

B4c Your suggested revised wording of any policy or text:

Please see attached comments and proposed changes to policy HP2

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

N/A

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Fareham Local Plan 2037 - Consultation on the Local Plan in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012 – For Elberry Properties Ltd

These representations to the Fareham Local Plan Regulation 19 Consultation have been prepared on behalf of Elberry Properties Ltd. The company has a land interest in land on the south side of Southampton Road in Tichfield.

These comments deal with the 'tests of soundness' for Local Plan preparation which are set out in paragraph 35 of the NPPF. They require the Fareham Local Plan 2037 to have been:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

Our headline comments on the draft Fareham Local Plan cover the following policies and are made in connection with land at the rear of 320 Southampton Road, Tichfield. In our view, the inclusion of the land within the north part of the Meon strategic gap has not been properly justified (test 2) and would conflict with other policies of the plan which deal with housing delivery. The settlement policy boundary for this part of Tichfield has not been properly justified either, and changes to the wording of draft policy HP2 is proposed.

The overall housing requirement proposed in policy H1 of the plan as explained at paragraph 4.2 of the plan says it was prepared using a draft methodology outlined in a government consultation of August 2020. However, in a DCLG press release dated 16 December 2020 it has confirmed that an updated method will be introduced to help councils to enable the delivery of 300,000 homes a year by the mid-2020s, while prioritising brownfield sites and urban areas. Until the new updated method has been clarified, the housing need assumptions on which the Fareham Local Plan 2037 has been prepared therefore cannot be relied on. In this regard, the Local Plan therefore also runs the risk of failing the positively prepared test 1 as well.

We illustrate the shortcomings of the Local Plan in these tests of soundness with reference to **policies DS2 – Strategic Gaps, policy H1 – Housing Provision, policy HP1 – New Residential Development and policy HP2 – Small Scale Development outside defined Urban Areas.**

In making these comments we have reviewed the relevant background documents in the evidence base for the local plan and national policy in the NPPF.

Test 1 – Has the Plan been Positively Prepared?

Paragraph 4.2 of the draft Plan explains how the plan makes provision for Objectively Assessed Housing Need (OAHN) in **policy H1**. It says housing need is determined using the standard methodology set out in national Planning Practice Guidance (PPG). It says using this method, the housing need for Fareham is a minimum of 514 dwellings per annum (dpa). However, in August 2020, the Government released a consultation on a new standard methodology which affords councils the option of using either a percentage of the Borough's

existing housing stock as the calculation's starting point or the most up-to-date household projections, whichever is the higher, before an affordability uplift is applied. The Council says it considers it appropriate for the draft Local Plan to plan for a scale of growth based on the proposed new methodology, and not one based on out-of-date household projections. This reduces the housing need figure to 403 dpa, based on a base date of 2021.

However, as explained above, the DCLG press release dated 16 December 2020 indicates a new updated method will be used while prioritising brownfield sites and urban areas. No information is provided on the updated method but if substantially different to the method consulted on in August 2020 then the Plan runs the risk it will not have made sufficient land allocations and windfall allowances to provide for OAHN.

Currently policy H1 provides for an estimated 1,224 homes on unexpected (windfall) development. Should the overall need figure increase in line with the updated methodology, then we suggest the future contribution of windfall sites as one of the land supply components could be increased to meet any shortfall. To ensure the Plan as drafted meets the positively prepared test, we therefore suggest that an additional windfall contingency is allowed for in **policy H1** taking account of the likely capacity of brownfield sites and other under utilised land within urban areas.

Test 2 – Is the Plan Justified?

i) The development strategy

In line with the Council's 'brownfield first' development strategy for meeting housing need (Local Plan paragraph 3.38) and the anticipated approach of national policy in prioritising brownfield sites and urban areas we propose more emphasis is placed on using brownfield land and underused land in urban areas in the Fareham Local Plan.

This approach will however require a reconsideration of proposed settlement policy boundaries in **policy HP1** and strategic gap boundaries in **policy DS2**.

What is Brownfield Land?

In *Dartford Borough Council v The Secretary of State for Communities and Local Government & Ors* [2017] EWCA Civ 141 (14 March 2017) a Court of Appeal judge ruled on the definition of previously developed land. The case involved development in a private residential garden in a rural area outside a settlement boundary.

The glossary of the NPPF defines previously developed land to include **land in built-up areas such as residential gardens**, parks, recreation grounds and allotments. The judge said that on this definition it could not include all private residential gardens in rural and urban areas but only that within a built-up area. He said:

"As a matter of ordinary English, I cannot see that any other meaning can be given to this sentence. "Land in built-up areas" cannot mean land not in built-up areas".

In our view therefore, taking the council's 'brownfield first' development strategy to meet housing need we suggest the Fareham Plan should take a more permissive attitude towards the redevelopment of sustainably located residential garden land outside currently drawn built up area boundaries and make better use of these sites in **policy HP2**. Alternatively, the settlement policy boundaries in **policy HP1** could be drawn more generously to include more of this type of land within the actual urban area.

Land at Tichfield

In our view and as an example, land to the south of Southampton Road at Tichfield is a good candidate area for residential redevelopment. The area enjoys a sustainable location and, on the Council's, own admission

in the 2020 Strategic Housing and Economic Land Availability Assessment (SHELAA) land in this part of the settlement is suitable in principle for new housing development.

Accompanying these Local Plan representations is a site proforma (Ref 3064) for land to the south of 320 Southampton Road. The site is described as having a sustainable location close to shops and local facilities with no biodiversity, heritage, highway access or other technical constraint to its immediate delivery for development. The site extending to 1.06 ha was proposed at the time for 25 dwellings but was discounted by the Council as a deliverable opportunity because it exceeded the site capacity what was thought to be in character with the wider area.

It concluded that the development of the scale promoted would not be in keeping with the settlement pattern but a smaller scale development of fewer than 5 dwellings may be in line with the character of the area and could therefore be acceptable.

In our view, this part of Tichfield could be included within an extended settlement policy boundary in **policy HP1** using St Margaret's Lane as the boundary. The land falls within the definition of previously developed land because it comprises residential garden land outside the current settlement boundary. It is plainly already within the urban envelope of this part of Tichfield and enjoys a sustainable location. A development of more than 5 dwellings (and we would suggest a figure of around 10 dwellings) could come forward without harming the wider character because the site is already contained by woodland planting and a modest in-depth development would be concealed in principal views from the main road. It would comply with the 'brownfield first' strategy and provide a useful land contingency should the housing requirements for Fareham need to be increased in **policy H1**.

Alternatively, the site could come forward in accordance with draft **policy HP2** which already allows for small scale housing development outside urban areas. The policy is welcomed in principle as it does reflect the national policy imperative in the NPPF of making better use of smaller sites of around 1ha (NPPF paragraph 68a). In emphasising the use of land within or adjacent to existing areas of housing or well related to a settlement boundary also makes sense from a sustainability point of view.

However as currently drafted **policy HP2** sets a site size limit of up to 4 dwellings and this would result in an inefficient use of land for sites of around 1ha in size. Test 4 is also too prescriptive and the principles of urban form it seeks to manage is already covered by **Policy D1** on High Quality Design and Place Making.

We therefore propose **policy HP2** is amended to state:

'New small-scale housing development outside the Urban Area boundary, as shown on the Policies map, will be permitted where:

- 1. The site is within or adjacent to existing areas of housing; or**
- 2. The site is well related to the settlement boundary; and**
- 3. The site is within reasonable proximity to a high frequency bus route or a train station as well as safe walking and cycling routes that connect to a local, district or town centre; and**
- 4. It comprises development:**
 - a. of not more than 10 units; and**
 - b. does not extend the settlement frontage.**

ii) **Strategic Gap policy**

The Technical Review of Areas of Special Landscape Quality and Strategic Gaps forms part of the evidence base for the local plan. It includes land at Tichfield south of Southampton Road within the north part of the Meon Strategic Gap. In our view however, the strategic gap boundaries have been drawn too tightly around existing urban areas and the operation of **policy DS2** will conflict with the objectives of **policy HP2** and prevent land coming forward for residential development where it is adjacent to existing areas of housing or is well located to a settlement boundary even at the scale suggested in the SHELAA pro forma Ref 3064.

We therefore propose that the strategic gap boundary in the vicinity of land south of Southampton Road, Tichfield is redrawn to follow St Margaret's Lane. This would release land on the east side of the road within the urban envelope of Tichfield for development in accordance with **policy HP2**. Alternatively, as suggested above, this part of Tichfield being within the urban envelope could be included within an extended settlement policy boundary in **policy HP1** using St Margaret's Lane as the boundary.

In our view these simple boundary changes would ensure additional land could come forward as a windfall contingency should the updated methodology for calculating housing need require it. This would benefit the Plan in terms of the '**positively prepared**' test.

The changes would also improve the Plans performance in terms of the '**justified**' test and allow the redevelopment of sustainably located residential garden land outside currently drawn built up area boundaries in accordance with the 'brownfield first' development strategy of the Plan.

If the proposed changes are accepted, an illustrative plan showing how it would benefit land on the south side of Southampton Road and secure a development of 10 dwellings is attached for information.

Name: Paul White for Elberry Properties Ltd

Date: 17 December 2020

SITE DETAILS

Discounted Housing Site

Titchfield

ID: **3064** Site Name: **320 Southampton Road, Titchfield**
 Current Land Use: **C3 Class/ garden land/ paddock**
 Surrounding Land Use: **Residential, open area to South , A27 to the North**
 Gross Site Area (ha): **1.06** Housing Yield (estimate): **25**
 Employment Yield (estimate): **0** Gypsy and Traveller Pitches (estimate): **0**

SUITABILITY

Constraints: **Countryside**
 Highways/ Pedestrian Access: **Site acceptable in highway terms subject to planned A27 duelling works will have been completed. Access should be created at the eastern end of the frontage.**
 Conservation Comments: **No known constraints**
 Noise/Air Quality Assessment: **No known issues**
 Archaeology: **Site not within identified area of archaeological potential**
 Ecology Comment: **The site contains improved grassland with boundary vegetation comprising hedgerows. Adjacent to SINC and Priority Habitat woodland. The boundaries are connected to the wider landscape and will be of some importance to species such as bats, reptiles and possibly dormice.**
 Accessible Facility Types: **8 /10** **Within 800m of a Convenience Store or Supermarket, within 1200m of a GP Surgery, within 400m of a High Frequency Bus Stops, within 1600m of a Major Employment Areas, within 800m of a Accessible Green or Play Space, within 1200m of a Primary School, within 1600m of a Town/District or Local Centre, within 800m of a Community/Leisure Facility**
 Reason for Discounting: **Development of scale promoted would not be in keeping with the settlement pattern and does not accord with the development strategy. Small scale development of fewer than 5 may be in line with the character of the area and could therefore be acceptable.**

Is the site suitable? **No** Is the site available? **Yes** Is the site considered achievable? **Yes**

V = VISITOR SPACE
 ALL BINS AND BIKES STORED WITHIN GARAGES (MIN 3 X 6M)
 PLOTS 1, 2 & 10 - SINGLE DETACHED GARAGES
 PLOTS 3 - 9 - SINGLE INTEGRAL GARAGE

1) Policy: DS1 - Development in the Countryside

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The 2037 plan is sound in many respects. More so than its predecessor. However, I have some reservations. Firstly, the plan includes in Paragraph 1.14 an assertion that it is prepared predicated on reduced identified housing need suggested by the Standard Method calculation in the Government's proposed "Changes to the Planning System" document. This is still under review, and since it has not been finalised yet, and has generated considerable interest and even opposition among local authorities as well as the public, it seems unwise to base such a crucial calculation on an as-yet uncertain process. This would have a bearing on Fareham Borough Council's ability to fulfil its Five-Year Housing Land Supply obligations, it also has a bearing on some of the policies in the plan that seem to be linked and would have implications for the retention of the Strategic Gaps within the borough. Policy DS1 reinstates the strategic Gaps as that not Strategic Growth Areas. To this extent, the plan is sound. However, paragraph 3.46 goes on to suggest that there is "evidence" that the boundary of the Fareham / Stubbington Gap could be redrawn "... whilst retaining its important function of preventing settlement coalescence." That evidence is the opinion of a Hampshire County Council Planning official as part of their Technical Review of Areas of Special Landscape Quality and Strategic Gaps: Chapter 4: Strategic Gaps Conclusions and Recommendations paragraph 10. The author states: • "The Fareham-Stubbington Strategic Gap is also proposed for continued designation, also having strong sub-regional support, and a clear and continued role, but there exists (sic.) some opportunities for development to be absorbed within the Strategic Gap, subject to scale and future detailed design, without compromising its Gap function combined with mitigation measures that can support GI enhancement." This constitutes an opinion, albeit possibly an informed one, not evidence. This uncertainty about the borders of this particular Gap reduces the soundness in my mind, when taken together with Policy DS1 which outlines the conditions for any development in the Strategic Gaps. On its own Policy DS1 is innocuous enough, but it seems to be linked in Section e to a set of policies (HP1, HP2, HP4, HP5, HP6 and HP11) three of which might allow for exactly the development policy DS1 seeks to exclude. Policy HS4, which allows for the possibility that the Council may not meet the Five-Year Housing Supply criteria, seems to provide that the first place the Council will look to make good the deficit by looking outside Fareham's urban areas. Surely, the first look should be at brownfield sites in the borough. Policies HS5 and HS6 seem, prima facie, to offer the possibility of development of affordable housing within strict criteria. However, they are both included in the policy DS1 description. This linking offers the possibility that opportunistic developers may try to use the Affordable Housing gambit to build at just the right size to meet the conditions, but, with the link to the Five-Year Housing Supply as a primary consideration, develop in a way that incrementally aggregates to a more sizeable encroachment on the Strategic Gap. I believe these three Policies should be reconsidered, or at least their link to Policy DS1 before the plan is approved. If not, there is a considerable risk that developers may be able to take advantage of the poor drafting to pursue their aims in the Strategic Gap with the Council unable to constrain, or unaware of, the actual effects. Policy E1 / E2 / E3 / E4 / E5 / E6 These policies while in themselves, sound, seem to pursue an agenda that is not active in promoting either the government's Green agenda, nor common sense when it comes to climate change. While it is appreciated that any Production Plan shall be as anodyne as possible in order to pass the inspection, it is notable that none of the above policies does anything to suggest that there should be any preference for types of employment. With the UK government's recent suggestion that it wishes to pursue a Green Industrial Revolution, albeit this hasn't yet been put into legislation, the Fareham Plan includes nothing that points to sustainability in environmental terms not supports any environmental agenda or attempt to address climate change. It would have been encouraging to see any of the identified sites, including Daedalus, being suggested as a potential home for green industry, whether manufacture of energy generating technology, environmental remediation, R & D or just green-related consumer business. There is also no mention of Gosport Borough and any collaboration or consultation with them, which I would have thought was a necessity given the effect that any increased employment and movement of people would definitely have on shared infrastructure; transport links, roads etc. While Fareham and Gosport Boroughs' connections via the Solent LEP and PFSH indicate that they may confer, there is nothing in the plan that acknowledged the close interest in Fareham as a means of getting off the Gosport peninsula Policy E7: Solent Airport This policy Focusses exclusively on aviation business, with the relatively unrealistic aim of making what is plainly an airfield into an "airport"; "The airfield at Daedalus, herein called Solent Airport". That this seems to be earmarked for growth, not in the plan, explicitly, it a matter of great regret. The government has clearly indicated that it does not wish to see expansion of runways in the south East except for at Heathrow. And even that will require a reduction elsewhere. Fareham Borough Council is mistaken if it thinks that opening the airfield to potentially to jet flights is an acceptable development. It is contrary to the Government view on tackling Climate change; in inviting extra traffic in to the airport it also adds to the general level of traffic on the existing roads in the area, potentially negating the advantages that we are promised from the Stubbington by-pass.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

While I appreciate that Fareham Borough Council may read some of the attached, I am not certain that they will act on any of it. I'd like to be sure that it is considered.

2) Policy: HP4 - Five-year Housing Land Supply

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Uncertainty about the borders of the Fareham - Stubbington Strategic Gap reduces the soundness of the plan in my mind, when taken together with Policy DS1 which outlines the conditions for any development in the Strategic Gaps. On its own Policy DS1 is innocuous enough, but it seems to be linked in Section e to a set of policies (HP1, HP2, HP4, HP5, HP6 and HP11) three of which might allow for exactly the development policy DS1 seeks to exclude. Policy HS4, which allows for the possibility that the Council may not meet the Five-Year Housing Supply criteria, seems to provide that the first place the Council will look to make good the deficit by looking outside Fareham's urban areas. Surely, the first look should be at brownfield sites in the borough. Failure to do so puts non-urban land; countryside, at risk.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I am not sure Fareham Borough Council will fully consider the effects of the policies they have proposed against the comments made by myself and others. I'd like to be able to make sure they do.

3) Policy: HP5 - Provision of Affordable Housing

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policies HS5 and HS6 seem, prima facie, to offer the possibility of development of affordable housing within strict criteria. However, they are both included in the policy DS1 description. This linking offers the possibility that opportunistic developers may try to use the Affordable Housing gambit to build at just the right size to meet the conditions, but, with the link to the Five-Year Housing Supply as a primary consideration, develop in a way that incrementally aggregates to a more sizeable encroachment on the Strategic Gap. I believe these three Policies should be reconsidered, or at least their link to Policy DS1 before the plan is approved. If not, there is a considerable risk that developers may be able to take advantage of the poor drafting to pursue their aims in the Strategic Gap with the Council unable to constrain, or unaware of, the actual effects.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

I would urge the removal of reference to HP5 from Policy DS1 section e.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By removing HP5, which is aimed at promoting the construction of affordable housing on sites of 10 properties or more and which could, as linked to Policy DS1, be used to allow for development outside urban Fareham in pursuit of reaching the affordable housing target, the possibility of unscrupulous developers effecting incremental large scale development in the Fareham - Stubbington Strategic Gap is reduced.

Your suggested revised wording of any policy or text:

.... e) Is for housing development compliant with one of the following policies; HP1, HP2 or HP11, or ...

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I don't expect the drafters of the current version of the policy to see the subtleties of the problem it potentially creates. I would like to be there to explain it to them.

4) Policy: HP6 - Exception Sites

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

At present HP6 is explicitly linked to policy DS1 allow for development of small scale sites to comply with Affordable Housing targets using the policy as an exception to the presumption against development in rural areas. As drafted, it could allow for developers a) to use the Affordable description to build multiple small dwellings, where "all" are affordable or b) build multiple dwellings for "first -time buyers" where the development is less than 1 hectare or less than 5% of the adjacent settlement. As Gosport Borough Council has pointed out, if such developments are near or on the border with Gosport Borough, given the size of Gosport, the 5% provision is meaning less. The inclusion of a link to this policy within DS1 section e allows for the building of multiple small developments in a rural area, with no overall need to comply with a bigger plan, potentially allowing for incremental aggregation of much larger developments in the Fareham - Stubbington Strategic Gap, contrary to the stated aim of Fareham Borough Council

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Removal of the reference to HP6 from Policy DS1 section e as well as rewording of the policy explicitly to make any development affected by it a Fareham Borough development only.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Removing any ambiguity about the location of developments subject to policy HP6, this should protect the Fareham - Stubbington Strategic Gap from the potential for multiple small developments at the borders that may over time aggregate to a significant reduction on undeveloped land there.

Your suggested revised wording of any policy or text:

Policy DS1e) Is for housing development compliant with one of the following policies; HP1, HP2,HP11, or Policy HP6 ... a) The site is adjacent to existing settlements within Fareham Borough; and ...

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I would like to be sure that Fareham Borough Council is fully aware of the subtleties of the policies they have drafted.

5) Policy: E1- Employment Land Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy E1, while in itself, bordering on sound, seems to pursue an agenda that is not active in promoting either the government’s Green agenda, nor common sense when it comes to climate change. While it is appreciated that any Production Plan shall be as anodyne as possible in order to pass the inspection, it is notable that none of the above policies does anything to suggest that there should be any preference for types of employment that acknowledges the government’s Green Agenda and true sustainability. With the UK government’s recent suggestion that it wishes to pursue a Green Industrial Revolution, albeit this hasn’t yet been put into legislation, the Fareham Plan includes nothing that points to sustainability in environmental terms not supports any environmental agenda or attempt to address climate change. It would have been encouraging to see any of the identified sites, including Daedalus, being suggested as a potential home for green industry, whether manufacture of energy generating technology, environmental remediation, R & D or just green-related consumer business. There is also no mention of Gosport Borough and any collaboration or consultation with them, which I would have though was a necessity given the effect that any increased employment and movement of people would definitely have on shared infrastructure; transport links, roads etc. While Fareham and Gosport Boroughs’ connections via the Solent LEP and PfSH indicate that they may confer, there is nothing in the plan that acknowledged the close interest in Fareham as a means of getting off the Gosport peninsula

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The inclusion of reference to green industry, sustainability or anything that indicates that the Council has a view on Climate change and the need to prepare for it and encourage the developmet of appropriate technologies and solutions.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would correct the overall, complacent tenor of the policy that advocated "business as usual".

Your suggested revised wording of any policy or text:

The Council’s evidence base for the Borough’s employment growth highlights the need to provide a range of modern good quality floorspace to meet employment forecasts in the Borough. The Council is keen to encourage a diverse range of economic growth, especially in the fields of "green technology and innovation", and this policy will ensure that the needs of new and growing businesses are met, and the Council will work with businesses and other partners to ensure the sufficient supply of quality employment floorspace.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I don't believe the Council will wish to step away from the conventional employment polices that they think have served them up to now. I'd like the opportunity to correct their perception.

6) Policy: E5 - Existing Employment Areas

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

I selected Policy E5 because it is present on the drop-down. I actually wanted to select Policy E7 which Fareham Borough Council has omitted from the drop-down. I hope this omission is not deliberate as I do think Policy E7 needs a challenge.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The removal of the nonsensical reference to an "airport". It is at present an airfield that handles a bearable (for nearby residents) amount of traffic. Fareham Borough Council and the operators of the airfield have applied for up to 40,000 aircraft movements per day; that is approximately 110 per day over 365 days. They also include in their plans the possibility of jet aircraft using the airfield. This presents an unacceptable level of activity on a small airfield bordered closely by residential areas and in a part of the country which the UK government has made clear is not appropriate for further expansion of runway availability.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By retaining the airfield as just that - an airfield with no idiotic aspirations for be an airport (this area is pretty well served by Southampton, Bournemouth and not so far away London Gatwick) and as an area for economic development that supported a green agenda, usign employment space there for procustion adn services that do not involve the use of greater quantities fo Jet fuel.

Your suggested revised wording of any policy or text:

The area defined as Daedalus, including the Solent Enterprise Zone, (as shown on the Policies map) will be retained for aviation related uses and employment opportunities including technology and innovation related to the correction of Climate Change and environmental management. It will also continue to support the present level of aviation activities, unless it can be demonstrated that such uses are no longer financially viable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The Fareham Borough Council Production plan incudes only vestigial references to environmental concerns and climate change remediation and then only in a passive sense. I would like to be able to suggest to the council that as a borough with a coastline they take the environment mmore seriously to avoid future problems not only for residents, but for neighbours.

Keely, Lauren

Please include my comments in the local plan consultation.

Response to local plan

Comments on Development Strategy section starting p17

1. Specific comment p25 ref Strategic Policy DS1 Development in the Countryside. Strongly support statement within the policy p24-27 additional statement : Proposals will need to demonstrate that they v. Are not on Best and Most Versatile agricultural land.
2. Specific comment Strategic Policy DS2 p27-28. Development in Strategic Gaps. My comment is that strategic gaps create false and unnecessary boundaries and these areas should be judged by other development policy criteria that can be evidenced. Many settlements in the borough have not received such protection and it would be inconsistent to make a policy that would be controversial and divisive for residents. The Meon Gap has environmental and Landscape policies that would exclude development however the Stubbington gap has no such policies and none should be created just to protect this false boundary.
3. Specific Comment on Landscape policy DS3 p28-32. Para 3.52 refers to open landscapes of the coastal plain such as at Wicor and in the Chilling area. I strongly recommend that as these two areas are compared they should be done so equally ie on the map on p30 the areas identified as being of Special Landscape Quality at Chilling include both coastal area and adjacent farmland both because of its agricultural BMV quality and as a Solent Strategic primary Support Area for Waders and Brent Geese. Therefore the area surrounding Wicor Coastal area should include the adjacent farmland which is similarly the highest quality BMV agricultural land and the same primary support areas for Solent waders and geese. Natural England in their letter of objection to FBC on development of a large section of this farmland describe it as "part of a wider countryside gap of around 40 hectares. The farmland area is a supporting habitat to the Portsmouth Harbour Special Protection Area. European sites are afforded protection under The Conservation of Habitat and Species Regulations 2017. Portsmouth Harbour is also a SSI and this farmland forms one of the last remaining agricultural areas adjacent to Portsmouth Harbour SPA." The open aspect of this farmland affords unspoiled views from the coastal path to Portsdown Hill and the Nelson Monument. Therefore please extend the current boundary for areas of special landscape quality on p30 to include the existing farmland to the north of Wicor Recreation Ground which would be fair, appropriate and equitable with the Chilling area.

Michael Townson
[REDACTED]

The Development Strategy p28 identifies the needs and benefits of identifying Areas of Special Landscape Quality as recommended by the NPPF. Two examples are given where appeal decisions have been successful associated with landscape quality challenges. It is noted that this is not an exhaustive list and I would make a strong case to extend the Cams-Wicor strip to include the farmland that wraps around this area. Areas of Landscape Quality are shown in fig 3.3 on p35 and the Wicor area could easily and appropriately be extended to include the adjacent farmland and be included within Strategic Policy DS3 – Landscape.

Natural England commented recently that this farmland (immediately north and adjacent to Wicor Recreation Ground) forms part of a wider countryside gap of around 40 hectares. The farmland area is a supporting habitat to the Portsmouth Harbour Special Protection Area. European sites are afforded protection under *The Conservation of Habitat and Species Regulations 2017*, as amended (the 'Habitats Regulations'). Portsmouth Harbour is also notified at a national level as the Portsmouth Harbour Site of Special Scientific Interest (SSSI).

It forms part of one of the last remaining agricultural areas adjacent to the Portsmouth Harbour SPA. The farmland is of the Best & Most Versatile quality being grade 1&2, The central farm land is a Primary Support Area as defined by the Solent Waders and Brent Goose Strategy. The open nature of this farmland allows good views from the coastal path to Potrtdown Hill and the Nelson Monument. Similarly the open nature of this coastal zone allows good views of the Portsmouth Harbour SPA/SSSI without the burden of development.

Many of the areas currently identified for landscape quality have no stronger case for inclusion than this farmland and matches similar areas such as Chilling Farm being a Primary Support Area and agricultural land adjacent to the coast.

Please give strong consideration to including the farmland surrounding Wicor Recreation Ground within this policy.

Dear Sir / Madam

REPRESENTATIONS TO FAREHAM LOCAL PLAN 2037

These representations to the Publication Version of the Fareham Local Plan 2037 are made on behalf of Reside Developments Ltd ('Reside') in relation to the land they control at Funtley. This includes the site to the south of Funtley Road ('Funtley South') which is the focus of these representations and is identified as a proposed allocation under policy HA10.

Background

The Funtley South site was initially proposed as an allocation with an indicative capacity of 55 dwellings within the Draft Local Plan during the consultation held in 2017. In addition to residential development, Policy HA10 also showed a substantial area of new open space to the south of the site between the developable area and the M27 motorway.

Since then, a number of planning applications have been made in relation to this site, (detailed in full at Appendix 1); notably:

- Outline planning permission being granted in September 2020 (ref. P/18/0067/OA) for residential Development of up To 55 Dwellings (Including 3 Custom-Build Homes) (Use Class C3), Community Building Incorporating a Local Shop 250 Sqm (Use Classes A1, A3, D1 & D2), Accesses And Associated Landscaping, Infrastructure And Development Works.
- Full planning permission granted in October 2018 (ref. P/18/0066/CU) for a change of use of an area of land containing the Public Open Space Allocation and an additional parcel of land to the east to form a new Community Park.

Since these approvals, two further applications were submitted on 6th October 2020, both of which are currently under consideration:

6th Floor North
2 Charlotte Place
Southampton
SO14 0TB

T 023 8072 4888 turley.co.uk

- Outline application to provide up to 125 one, two, three and four-bedroom dwellings including 6 self or custom build plots, community building or local shop (use class E & F.2) with associated infrastructure, new community park, landscaping and access, following demolition of existing buildings. (Ref: P/20/1168/OA)
- Change of use of land from equestrian/paddock to community park following demolition of existing buildings. (Ref: P/20/1166/CU)

The thrust of our representation is that the Publication Version Local Plan does not plan to meet the council's minimum local housing need as required by national planning policy. We set out how land south of Funtley Road can assist in delivering a higher number of dwellings on-site, by appropriately increasing the density of the proposal and extending the site boundary slightly further to the south, while still providing a significant benefit in the form of a community park. This proposal is detailed in the two live planning applications - P/20/1168/OA and P/20/1166/CU.

We have previously submitted representations on behalf of Reside to the Local Plan Supplement in February 2020, the Local Plan Issues and Options consultation in the summer of 2019, as well as earlier consultation on the Draft Local Plan in 2017. In these representations we were supportive of the council's acknowledgement that the Borough has an increased housing need but noted that additional housing, including on existing sites and proposed allocations, would need to be identified to meet this higher need.

The continual identification of this site has been supported, and evidence provided by Reside in response to these consultations showed that the Funtley South site was capable of accommodating additional dwellings to meet the housing need without any adverse impacts to character or landscape. It is disappointing that the Publication Version has not reflected these previous submissions and it remains unclear if they have informed this current consultation.

REPRESENTATIONS

Strategic Policy DS2: Development in Strategic Gaps

DS2 seeks to prevent development which will significantly affect the integrity of the gap and the physical and visual separation of settlements. This policy seeks to introduce a new strategic gap in the vicinity of our clients' interests, without justification. The Policies Map illustrates that the proposed allocation lies outside of the strategic gap, however this does not fully reflect the boundary of Reside's proposal as per the live planning application P/20/1168/OA, where the application site's southern edge falls within the area proposed as Strategic Gap under policy DS2.

The Council's Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not provide justification for this boundary and merely states that "*Wrapping the gap boundary tightly around the settlement (and future approved development), would allow Funtley to expand moderately, but still retain its separate identity and not become contiguous with North Fareham.*" The evidence base appears to entirely ignore the detailed submission made in our previous representations. We therefore resubmit these with this submission at Appendix 3.

We submit that there is no need for the identification of a new strategic gap in this locality. The evidence base does not support it, and having considered the site against the adopted Landscape Character Assessment and policy context, there is no reason to conclude that the site has any elevated landscape status or importance above the rest of the surrounding landscape within the proposed Strategic Gap. Moreover, there is no extant designation such as public open space that would elevate the status in terms of local community association.

The site's intrinsic character in a landscape sense does not preclude development, the nature of which could incorporate elements of the landscape into a sensitively designed scheme.

Were the Council to continue to seek to impose a new Strategic Gap in this location, and notwithstanding our submissions against this approach, we would request amending the Strategic Gap boundary to reflect the site boundary of the live application P/20/1168/OA, as illustrated at Appendix 2. This would ensure that the aims of policy DS2 are achieved as it would allow Funtley to expand moderately, but also retain its own identity and it would not coalesce with North Fareham. This would be guaranteed by the provision of the community park proposed through application P/20/1166/CU. This will be transferred to the council, so there is no need to designate that area as Strategic Gap.

Strategic Policy DS3: Landscape

DS3 allows for development in areas of special landscape quality only where the landscape will be protected and enhanced. The Policies Map shows the proposed area of special landscape quality as following the boundary of the proposed allocation, and in the same way as the strategic gap designation, this does not correspond with the boundary of our client's site as per the live planning application P/20/1168/OA. The site's southern edge falls within the proposed Area of Special Landscape Quality 4 (ASLQ 4) Meon Valley under policy DS3.

We submitted a Technical Note in relation to the proposed Meon Valley ASLQ alongside our representations to the Fareham Local Plan Supplement in February 2020. This is reattached at Appendix 3. It supports our objection to the boundary of ASLQ 4 Meon Valley taking in land to the east of the disused railway known as the Deviation Line.

The council's Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not provide justification for inclusion of this land in ASLQ 4. In describing the special landscape qualities of the Meon Valley, the report emphasises the southern part of the proposed designation; *"The area has high scenic quality and topographic and visual unity, particularly in the lower reaches."* The report notes that the *"Major road and rail corridors pass through the upper section, but much of the area retains a sense of seclusion."* This area has its tranquillity impacted by the M27 to the south and the active Eastleigh to Fareham Railway line to the east.

It is important the ASLQ boundaries do not incorporate areas that could form allocations, as it could unduly restrict developable areas and affect housing supply numbers. ASLQ 4 around Funtley does not seem to relate to those in the LDA 2017 report, nor the current Local Plan. The boundary for the Meon Valley ASLQ should be delineated by the Deviation Line to the west of Funtley, rather than cross over it.

The area affected is largely proposed for a community park under application P/20/1166/CU and therefore can make a significant contribution to the landscape throughout the plan period; however, there is no justification for it being included within the ASLQ boundary as it stands. Any such designation must be robust, clearly defined and supported by evidence. As currently drafted, it is not, and therefore it is unsound as it is not justified.

Strategic Policy H1: Housing Provision

Policy H1 does not make provision for sufficient housing to meet local needs. The policy is based on delivering a level of housing set out in the consultation draft revised standard methodology (August 2020), of 403 dpa. This was never adopted policy and should not have been used as the basis for the Regulation 19 Draft Local Plan. The National Planning Practice Guidance sets out the current standard methodology and produces a minimum need of 514 dpa for Fareham Borough.

On 16th December 2020, the Government published the response to the consultation on the standard method for assessing local housing need. In a statement, the Secretary of State for the Ministry of Housing Communities and Local Government said, *“we plan to leave the standard method as it was created in 2017 for the majority of the country.”* The Government’s published response to the consultation indeed confirms that Fareham’s local housing need is 514 dpa.

Therefore, policy H1 is unsound as it is not positively prepared, providing a strategy which, as minimum seeks to meet the areas objectively assessed needs and it is not in accordance with national policy, NPPF paragraph 60.

Furthermore, policy H1 does not fully address the duty to co-operate in terms of meeting the unmet of needs of more constrained local authorities within the housing market area. H1 is therefore not effective on cross-boundary strategic matters.

In the Local Plan Supplement (January 2020), FBC set out a strategy to deliver 520 dpa, and it is considered that the Local Plan 2037 which is the subject of this Regulation 19 consultation, rows back significantly from the ambitions for sustainable growth that were outlined in the earlier strategy.

The implications of not planning for sufficient housing are significant and will no doubt be debated at the Examination hearings. We set out below how land at Funtley South could assist in helping to deliver a higher level of housing.

Housing Allocation Policy HA10: proposes to allocate 5.74ha of land at Funtley Road South for 55 dwellings.

Paragraph 117 of the NPPF requires planning policies to encourage the effective use of land in meeting the need for homes and other uses while safeguarding and improving the environment and ensuring safe and healthy living conditions. Paragraphs 122 and 123 set out policy on achieving appropriate densities. They state that *“Planning policies and decisions should support development that makes efficient use of land,”* and *“Where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site.”*

Policy HA10 is not consistent with national policy in this regard as it does not make most efficient use of land. As stated in our representations to previous Local Plan consultations, we consider the council is missing an opportunity by not making additional use of proposed allocation at Funtley Road South to address the Borough’s housing need. In addition, it is missing an opportunity to protect sensitive areas of the borough from potential development.

By proposing to allocate the site and the recent grant of planning permission for 55 dwellings, the council has indicated it considers the site to be sustainable, and this is supported by the Sustainability Appraisal. We contend that the indicative yield should be amended to 125 dwellings and the site boundary should be realigned, as illustrated in Appendix 2, to incorporate some additional land to the south. This would result in a site size of 6.23 hectares. The live planning application P/20/1168/OA provides evidence to justify this.

Specifically, in relation to the live planning application for 125 dwellings on the larger site area:

- The Illustrative Masterplan demonstrates how the development of up to 125 dwellings, community building or local shop with associated infrastructure, new community park,

landscaping and access, could be accommodated on the proposed larger site in a sustainable way (Appendix 4)

- The Landscape and Visual Appraisal (Appendix 5) concludes that an appropriate development can be provided without substantial harm to landscape or views, but which provides a number of community and landscape benefits.
- The Ecological Assessment demonstrates that there are no adverse effects on any designated sites or protected species resulting from a development of 125 dwellings on a larger site area and also sets out appropriate mitigation and enhancement measures.
- The Transport Assessment concludes that the proposed development is considered to be acceptable in transport policy terms and meets with national and local policy criteria. The assessment work undertaken has indicated that there would be no demonstrable harm arising from the proposed scheme and there are no identifiable severe impacts. The Travel Plan includes a range of measures to maximise sustainable transport opportunities.
- All other reports and supporting documentation, including in relation to trees, flood risk, contamination, noise, sustainability, utilities, and archaeology demonstrate that the site can accommodate 125 dwellings.

Policy HA10 sets out 11 site-specific requirements (a-k). A number of these criteria are not sound and we have explained why in the table below.

a) The quantum of housing proposed should be broadly consistent with the indicative site capacity; and	Unsound, for the reasons set out above.
b) Primary highway access should be from Funtley Road; and	Sound. In accordance with consented development and live application.
c) Building heights are limited to a maximum of 2 storeys; and	Unsound as this is not justified by evidence. This is better determined at the detailed planning application (reserved matters) stage. Policy D1 will provide an adequate framework to ensure building heights are acceptable. This criterion should be deleted.
d) Safe pedestrian and cycle crossing points across Funtley Road and connectivity with the existing footpath/bridleway network in the vicinity of the site and eastwards towards the centre of Funtley village in order to maximising connectivity to nearby facilities and services; and	Sound. In accordance with consented development and live application.
e) The creation of a vehicular loop road on the site, allowing for pedestrian and cycle permeability across the site; and	Unsound as this is not justified or effective. It is not clear what is meant by a vehicular loop road. The requirement for pedestrian and cycle permeability across and through the site is supported.

<p>f) Proposals shall take account of the site’s landscape context by incorporating view corridors from Funtley Road through to the public open space allocation to the south of the residential allocation. The view corridors should form part of the on-site open space and should incorporate pedestrian and cycle links, whilst vehicular crossing of links should be limited; and</p>	<p>Sound. In accordance with consented development and live application.</p>
<p>g) The existing woodland on-site shall be retained and incorporated within the design and layout of proposals in a manner that does not impact on living conditions or prevent damage to any nearby dwellings, roads, footpaths or other infrastructure; and</p>	<p>Sound. In accordance with consented development and live application.</p>
<p>h) A landscape buffer shall be incorporated between development and the Great Beamond Coppice SINC to the east of the site; and</p>	<p>Sound. In accordance with consented development and live application.</p>
<p>i) The provision of a building/ buildings for community uses, located in an accessible location to enable a range of uses for both existing and new residents; and</p>	<p>Sound. In accordance with consented development and live application.</p>
<p>j) The site is identified as a mineral safeguarded site (brick clay is likely to underlay site). A Minerals Assessment will be required prior to any development in accordance with the Hampshire Minerals and Waste Plan (2013); and</p>	<p>The site benefits from an extant outline permission. No such conditions are required under that consent, or were requested during the determination. This requirement is therefore not considered necessary or reasonable, and should be deleted.</p>
<p>k) Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4 and NE3.</p>	<p>Sound, although it should be recognised that contributions towards some forms of infrastructure are provided for by CIL.</p>

We would very much welcome the opportunity to work with the council to address these concerns and amend the criteria where possible, and therefore would wish to attend the Examination hearings.

HP1: New Residential Development

This policy allows for new residential development within the urban area boundary as shown on the Policies Map. Our representation relates to the proposed urban area boundary at Funtley South, which should be amended to incorporate the site boundary proposed under application P/20/1168/OA. Evidence submitted with this application demonstrates that this would result in sustainable development. Furthermore, it would enable the site to contribute a greater level of housing to meet Fareham’s housing land supply.

HP4: Five Year Housing Land Supply

This policy is supported, however, we would urge the council to consider increasing the number of homes proposed for allocation at Funtley South through Policy HA10 as a way of contributing to addressing the current deficit in five-year housing land supply within the Borough. The Publication Version Local Plan could do more to address the shortfall in the short term.

HP5: Provision of affordable housing

The policy requirement at criterion **iii** is unsound as it is not consistent with national policy. Paragraph 64 of the NPPF expects 10% of all homes on major development involving housing provision to be available for affordable home ownership. Footnote 29 then confirms that these homes are then included as part of the overall affordable housing contribution. The draft policy only requires 10% of all affordable housing to be available for affordable home ownership.

HP9: Self and Custom Build Homes

The Self and Custom Build Housing Background Paper (FBC, 2020) indicated that only 56 people wished to remain on the council's register. 40 of those said they would consider a plot on a larger self-build development and only 25 said they would consider a serviced plot on a standard development. This evidence indicates that demand for self and custom build often arises on smaller sites, so focusing delivery of self/custom build on sites of over 40 homes, may not respond to demand. As such we are concerned that there is not a significant demand for plots on larger housing being developed by housebuilders and that the 10% requirement in HP9 is unjustified.

We would suggest that 5% is a more reasonable level to apply to larger sites, as this would allow for self and custom build to come forward on these sites, but also for self and custom build homes to be delivered on smaller sites too. Reside have proposed to deliver six self-build units on land south of Funtley Road, which will assist the council in meeting its obligation with regard to those who wish to develop their own homes.

NE2: Biodiversity Net Gain

The council have included the Government's suggestion that new development should improve the biodiversity on their site to show a 10% net gain over the pre-development baseline within this policy. Whilst we recognise that this is the Government's current favoured position it is likely that there will be transition period to allow the development industry to adapt to the proposed changes. As such we would suggest that the council remains consistent with paragraph 170 of national policy to seek net gains in biodiversity and not include the requirement to show a 10% net gain. A policy without a specific percentage requirement would be consistent with current policy and should the relevant legislation be enacted as currently proposed such a policy would be sufficiently flexible to support a 10% requirement and any transition period.

NE8: Air Quality

The policy requires one EV Charge Point per dwelling. The Government has made a commitment to end the sale of new petrol and diesel cars in the UK by 2030. With this in mind, we would suggest that the council consider a phased introduction of the EV Charge Point requirement, gradually ramping up to 100% provision, given that there is currently not the demand.

CONCLUSION

At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, for the following reasons:

- The Plan is not positively prepared or consistent with national policy as it does not seek to meet the areas' objectively assessed needs
- The boundaries of the proposed Strategic Gap and Area of Special Landscape Quality are not justified
- The proposed allocation policy HA10 is not fully justified because it does not take into account the reasonable alternative of a delivering a higher number of dwellings
- A number of the specific policy requirements are not justified or effective

Funtley South is a sustainable and deliverable site in its own right, but also has synergy with the key strategic site at Welborne, were this to come forward. The Funtley South site was previously identified in the Draft Local Plan as having an indicative capacity of 55 dwellings. The allocation of the site and its recent planning permission clearly demonstrates the residential proposals for the site represents sustainable development, there are no constraints that would preclude this development at the higher number of dwellings and the site is deliverable in the short term.

Evidence provided by Reside demonstrates the site is capable of comfortably accommodating more dwellings without any adverse impacts to character or landscape. This can be achieved through a combination of a 0.4ha increase in the developable area and an increase in density (to match that surrounding the site). Funtley South can therefore do even more to help the Council meet its increased housing requirements and we would of course be pleased to provide any further information to the Council, if so required, with regards to this matter.

We would like to participate in the Examination hearings so that a full discussion can be held on these matters.

We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and Examination.

Yours faithfully

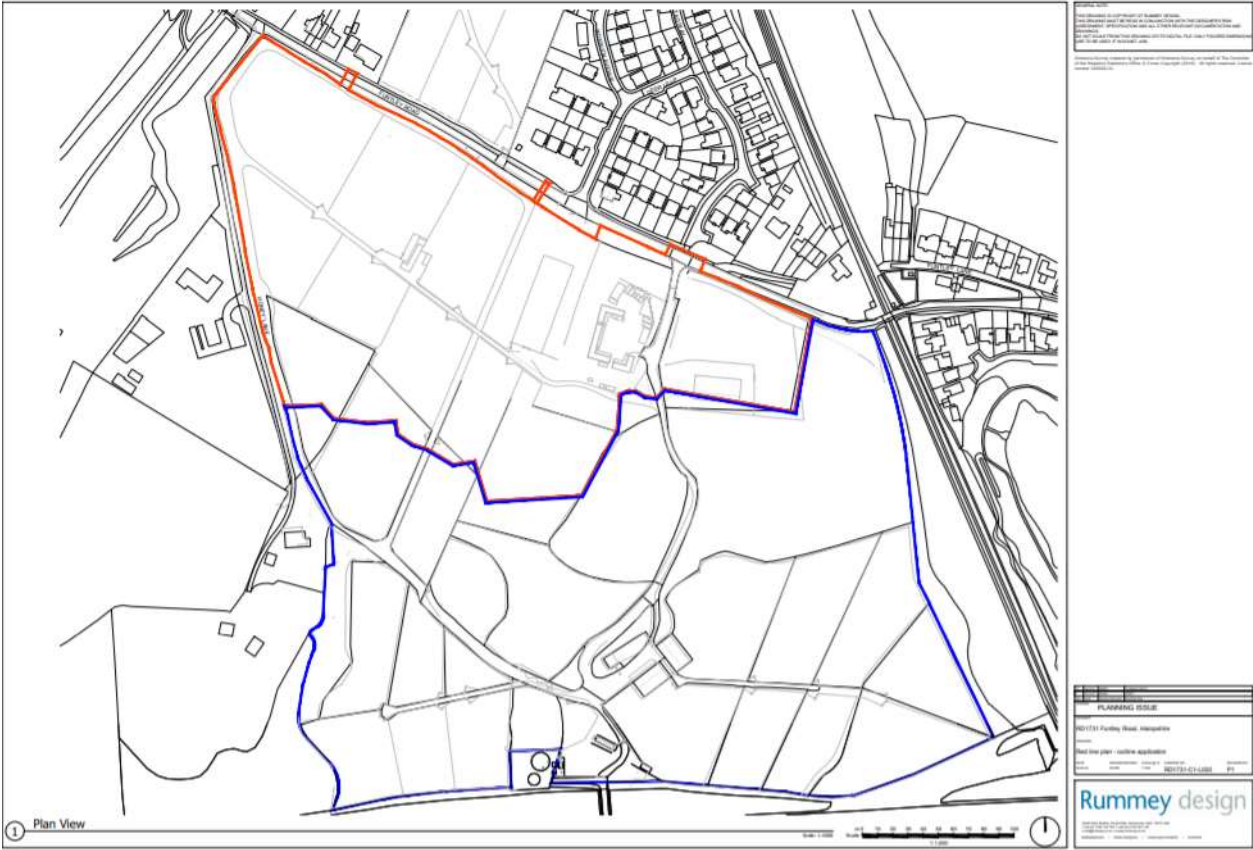

Alison Young
Senior Planner

Appendix 1: Planning Applications on Land South of Funtley Road

Application Reference	Description	Status
P/20/1168/OA	Outline Application To Provide Up To 125 One, Two, Three And Four-Bedroom Dwellings Including 6 Self Or Custom Build Plots, Community Building Or Local Shop (Use Class E & F.2) With Associated Infrastructure, New Community Park, Landscaping And Access, Following Demolition Of Existing Buildings.	Submitted 6 th October 2020 Under consideration

Introduction

This Technical Note is prepared in support of representations to the Fareham Local Plan 2036 Supplement consultation and is made on behalf of Reside Developments Ltd (Reside) in relation to the land they control at Funtley. This includes the site to the south of Funtley Road (Funtley South) which is the focus of these representations and is identified as a proposed allocation.

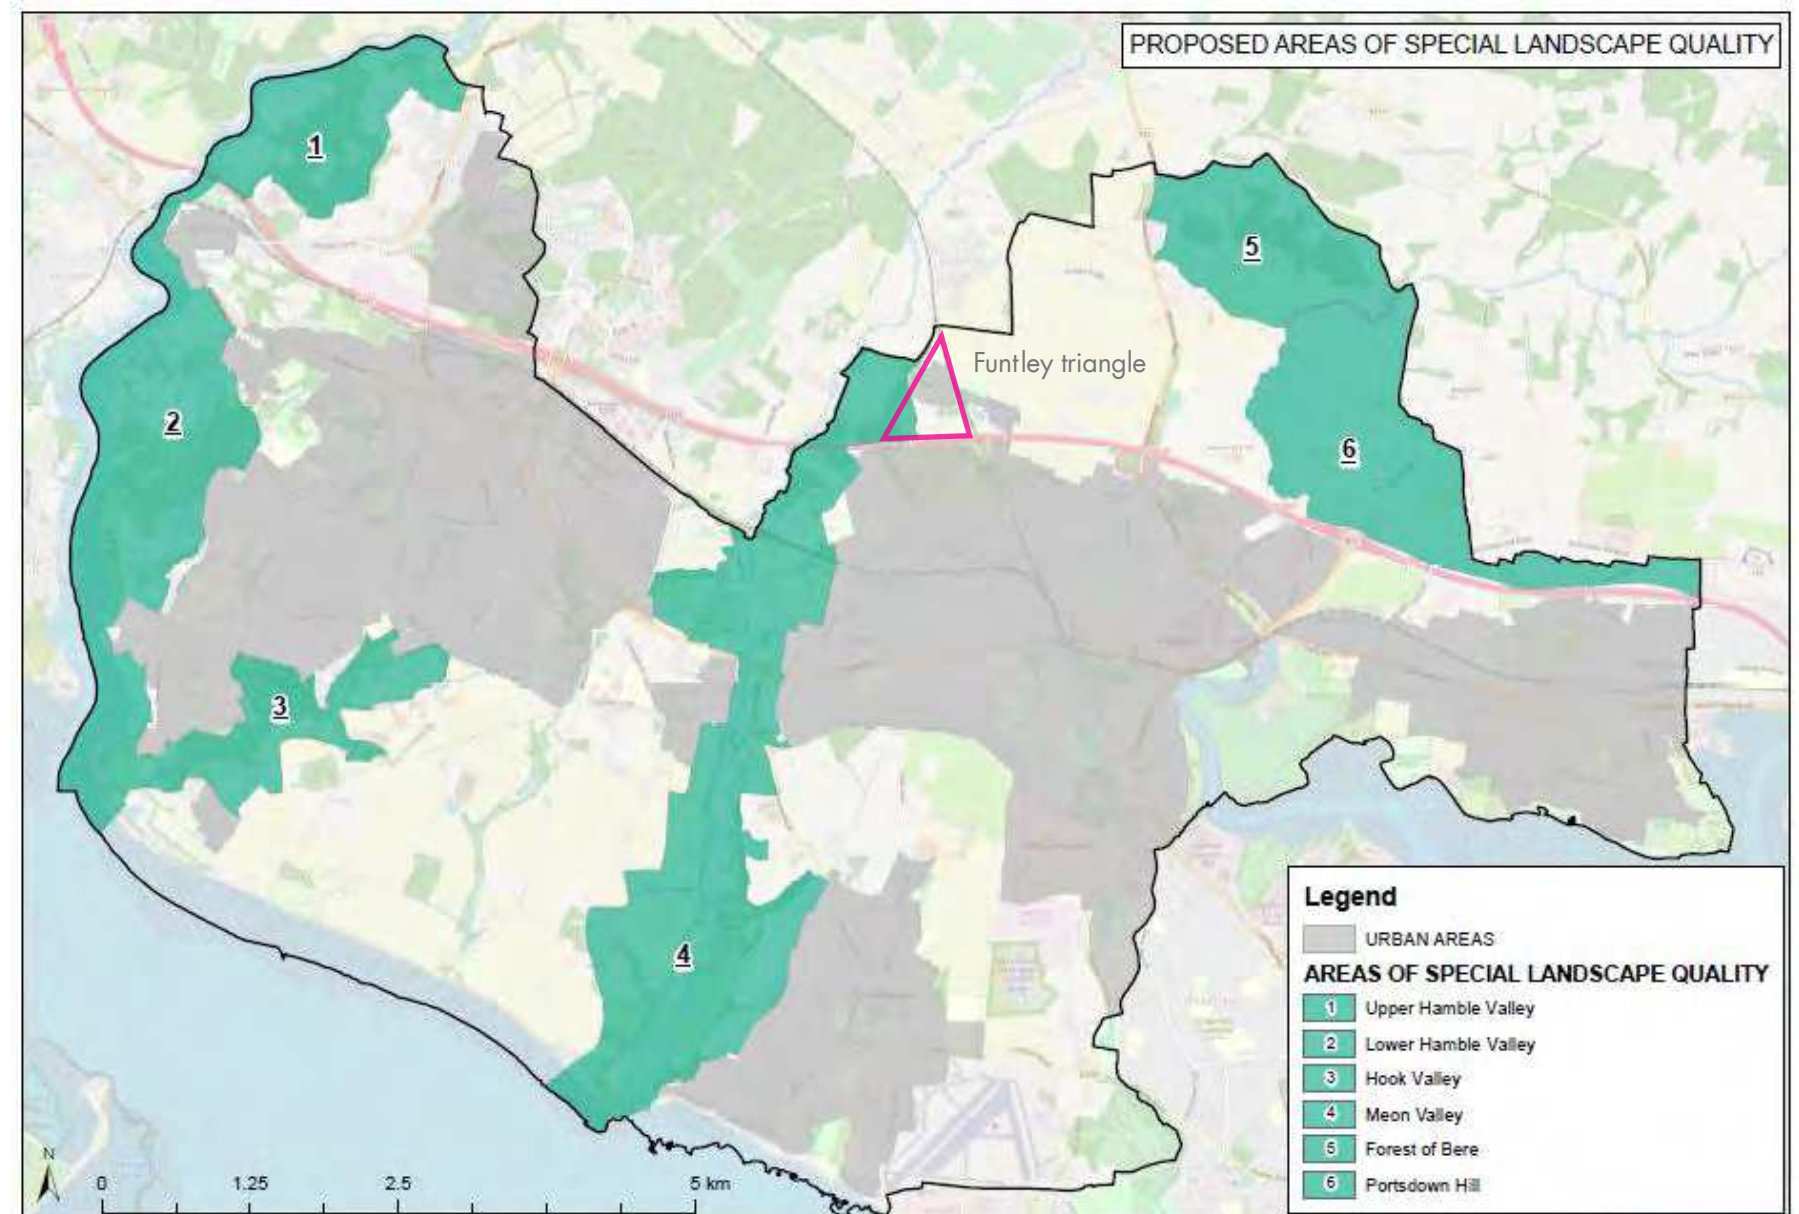

Fareham Borough Local Plan to 2036 proposes an Area of Special Landscape Quality (ASLQ) in the Meon Valley, along with other river valleys and Portsdown Hill. The policy states that there will be a presumption against major development in such areas unless it can be demonstrated that the quality and distinctiveness of the landscape will be conserved. The Meon Valley is also a Strategic Gap and the ASLQ will offer an additional level of protection, although the policies would now differentiate between the need to retain settlement identity and conserve landscape character.

Figure 4.2 in the FBC consultation document identifies indicative proposed Areas of Special Landscape Quality to be protected through Policy NEXX: Landscape. However, whilst this proposed policy is intended to guide development in such areas, there is no definition on what merits an area being included in an ASLQ, other than that it has been identified as a 'valued landscape' in consultation. It would be reasonable to assume that the ASLQ would be underpinned by Landscape Character Assessment evidence, the latest version of which is LDA Design's Fareham Landscape Assessment, 2017.

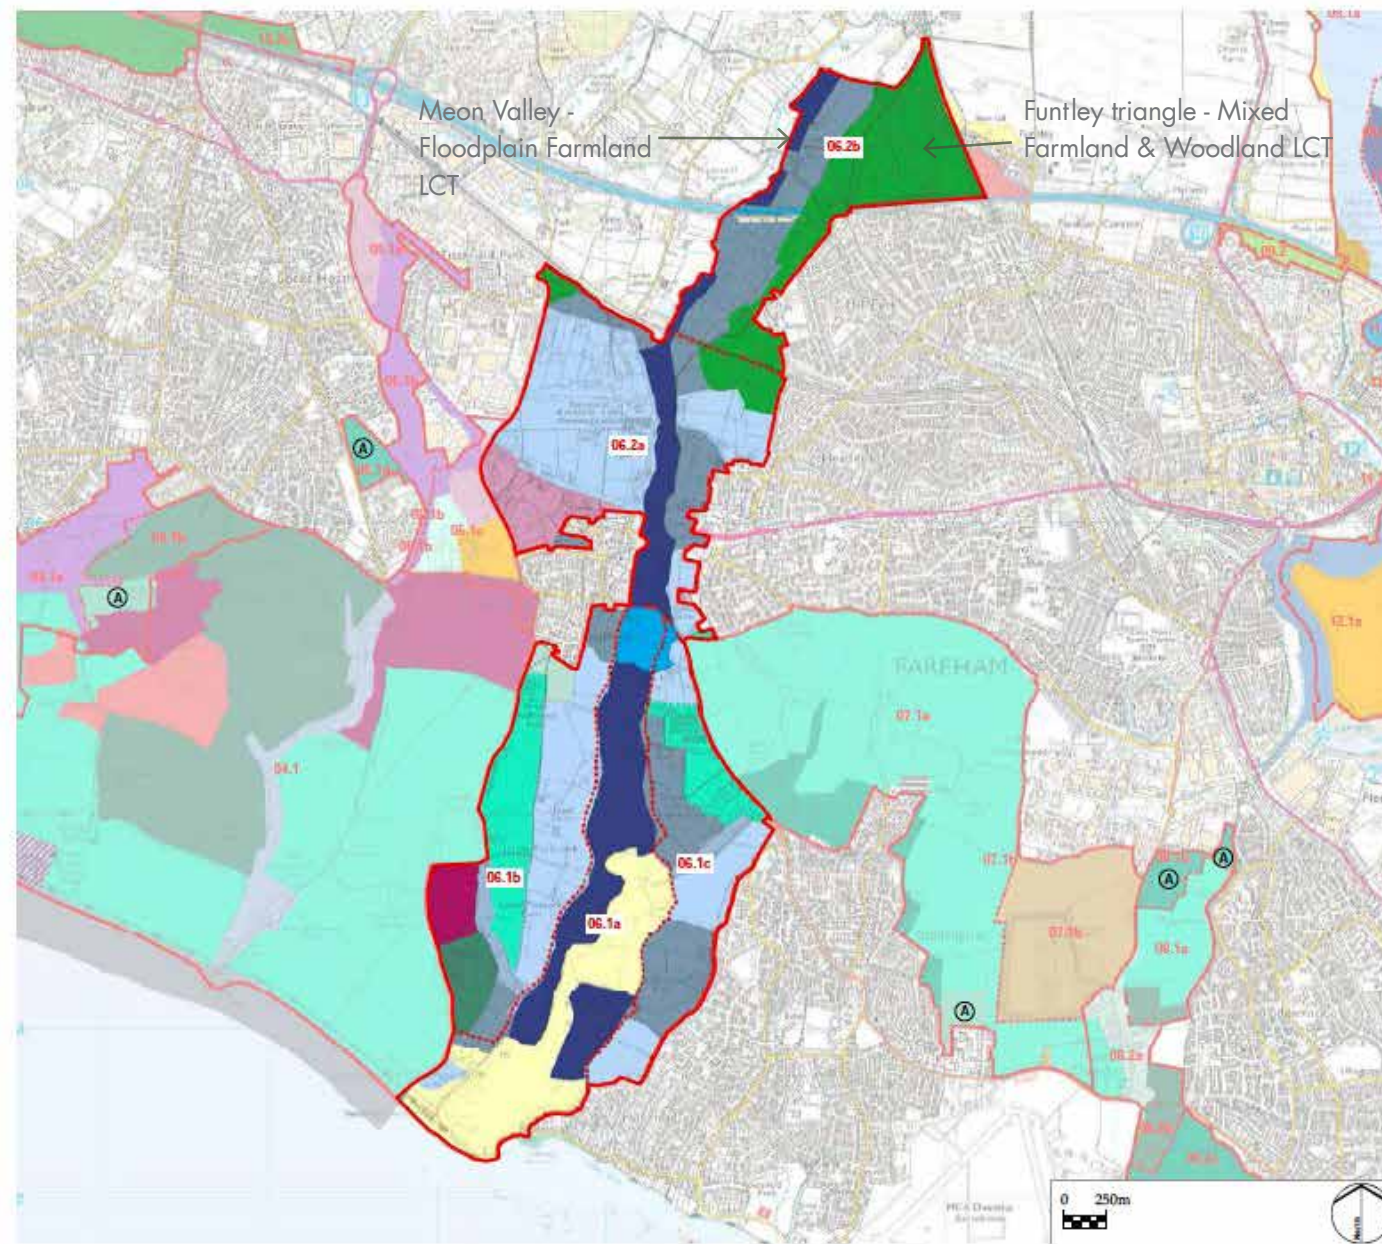

The assessment notes that in Fareham Borough it is the chalklands, coastal plains, river valleys and coast that provide the broad framework for the complex and distinctive landscape character within the Borough. We would agree that these broad 'framework' landscapes shape the character of the Borough and that, where they have special qualities and high sensitivity, these should be conserved. However it is important to define the extent of these areas in a robust manner.

The mapping of the Upper Meon Valley ASLQ in relation to the Funtley triangle, which lies at the northern end of the Borough is however unclear, due to the low resolution of the indicative map. The ASLQ appears to include some land to the east of the disused railway (known as the Deviation Line) in the area south of Funtley Road, an area already proposed for housing allocation. We propose that the ASLQ should extend only to the Deviation Line for the reasons set out below.

Figure 4.2. Proposed Areas of Special Landscape Quality

Area 4 represents the indicative proposed Meon valley ASLQ (reproduced from FBC Local plan 2036 supplement). The proposed Meon Valley ASLQ appears to extend into the Funtley 'triangle' which is a fringe landscape and does not share the special landscape qualities or character of the Meon Valley to the west

LCA6 Meon Valley Landscape Character Area (LCA) and detailed Landscape Character Types (reproduced from LDA Landscape Assessment report). This map clearly distinguishes between the Meon Valley Floodplain Farmland LCTs and the Mixed Farmland and Woodland LCT that includes the Funtley triangle, to the east. The character transition appears to be to the west of the railway line and includes the woodland associated with the railway within the Mixed Farmland & Woodland LCT. The railway also physically and visually separates the valley from the fringe land to the east.

Fareham Borough Council's evidence

The Borough of Fareham has a complex landscape consisting of mixed rural valleys, coastal plain, farmland and woodland and extensive built-up areas, as well as the M27 motorway and railway lines which cross the Borough. The most recent Landscape Assessment undertaken by LDA Design, and published in 2017, recognises the intrinsic character and distinctiveness of the relatively undeveloped areas of the Borough. It would be expected that this would be the evidence base for the proposed ASLQs, since these are based on landscape character and its key qualities and sensitivity. It is stated that the ASLQs will not include any development allocations.

The proposed extent of the Meon Valley ASLQ, the upper reaches of which lie to the west of the Funtley Road triangle, is stated to be based on the landscape types (LCT) defined within the original county-wide landscape assessment produced by Hampshire County Council in 1993. The assessment identified ten detailed, rural landscape types within Fareham Borough and this formed the basis for the initial landscape characterisation and the subsequent update in the LDA Design 2017 Fareham Landscape Assessment.

This assessment clearly differentiates between the 'Mixed Farmland and Woodland: small scale' LCT, which includes the Funtley 'triangle' up to and including the wooded Deviation Line to the west, and the landscape types in the Meon valley which include both 'Open and Enclosed Floodplain Farmland' LCTs. The Borough Landscape Assessment notes that the Mixed Farmland and Woodland LCTs vary in scale from large to small scale and describes the 'fringe' character of the Mixed Farmland and Woodland along the M27 corridor (p40). The M27 corridor defines the southern edge of the Funtley triangle.

The Fareham Landscape Assessment further defines a number of Landscape Character Areas (LCAs), which consist of several landscape types to produce identifiable areas of landscape of consistent character. The Meon Valley (LCA6) is further subdivided into Lower and Upper Meon Valley since its characteristics, influences and function vary significantly between the upper, more tightly contained, inland reaches and the wider, lower, river valley which traverses the coastal plain.

The proposed Meon Valley ASLQ boundary appears to include only selected areas of LCA6 consisting of all or parts of a number of different landscape character types. This is presumably based on a recognition that the landscape quality varies significantly within the LCA, although how the ASLQ boundary has been defined is not explained.

The character variance is highlighted in the Fareham Landscape Assessment. Whilst including the area around Funtley within the Meon Valley LCA6 it specifically notes that part of the Upper Meon valley (LCA 06.2b) on the eastern valley sides are 'typically subdivided into paddocks for horse grazing, bounded by open fences and containing various shelters and small-scale structures. In themselves these have a somewhat scruffy, fringe character'. The assessment also recognises the role that extensive woodland plays in integrating these fringe uses.

The assessment also specifically refers to the existing housing along Funtley Road as a 'rather anomalous area of recent residential development off the Funtley Road in the northern tip of Area 06.2b. Lying on the opposite side of the railway this has little visual connection to the settlement of Funtley and is out of character with the surrounding landscape'.

In summarising the development opportunities in the LCA it also notes that there is an opportunity to develop pockets of residential development, such as off Funtley Road, as long as these can be sensitively integrated into the landscape.

FBCs own evidence base clearly implies that the Funtley triangle is suitable for sensitive development and does not exhibit the landscape qualities or visual connection to the Meon Valley that might warrant its inclusion in the ASLQ.

The proposed indicative boundary, on this basis appears to be arbitrary and does not reflect Fareham's Landscape Character and sensitivity assessment.

Landscape of the Meon Valley

In considering the special qualities of the Meon Valley its northern extents within the Borough consists of a tightly enclosed valley landscape of open and enclosed floodplain farmland, contained by well-wooded margins and topography, as detailed in the Fareham Landscape Assessment, 2017.

The photos below show the qualities of the Meon Valley floodplain landscape in its upper reaches in Fareham. It is clear that these riverine landscapes which help to shape the Borough are of high sensitivity and have the qualities that would support their inclusion in an 'Area of Special Landscape Quality' as well as providing an important separating element between settlements.

The enclosure and separation of the Meon Valley, to the west of Funtley, is reinforced by the man-made,embanked Deviation Line, which visually and physically separates the two distinctly different character types.

photo reproduced from Fareham Landscape Assessment, 2017 (LDA Design)

Landscape of the Funtley Triangle

In contrast to the Meon Valley, the Funtley Triangle, as confirmed in the Fareham Landscape Assessment, is strongly influenced by the loss of landscape features, with hedgerows being replaced by horse paddock fencing, the presence of stables, sheds, hardstanding and catteries etc. In addition the housing development along Funtley Road and in the west of the area, as well as the railway and M27 corridor have given this landscape an 'urban fringe' character with lower sensitivity to further change. These are not the qualities that would merit inclusion in an 'Area of Special Landscape Quality'.

The Funtley triangle is entirely separate from the Meon Valley to the west of the Deviation Line as illustrated by the bottom photograph.

Paddock fencing, stables, sheds, hardstanding, housing development, noise, street lighting etc. all contribute to the urban fringe character of the Funtley triangle

Supporting evidence

The Landscape and Visual Appraisal (LVA) prepared by Fabrik in 2018 and submitted with Reside's Funtley South planning application (which has a resolution to approve, subject to completion of a S106 agreement) also supports the view that the landscape character sensitivity of the area in the Funtley triangle has been influenced by a number of detractors including adjacent urban development, road and railway noise and its land use for paddocks, resulting in loss of landscape features. The LVA assessed the local landscape character as having low to medium sensitivity for this reason.

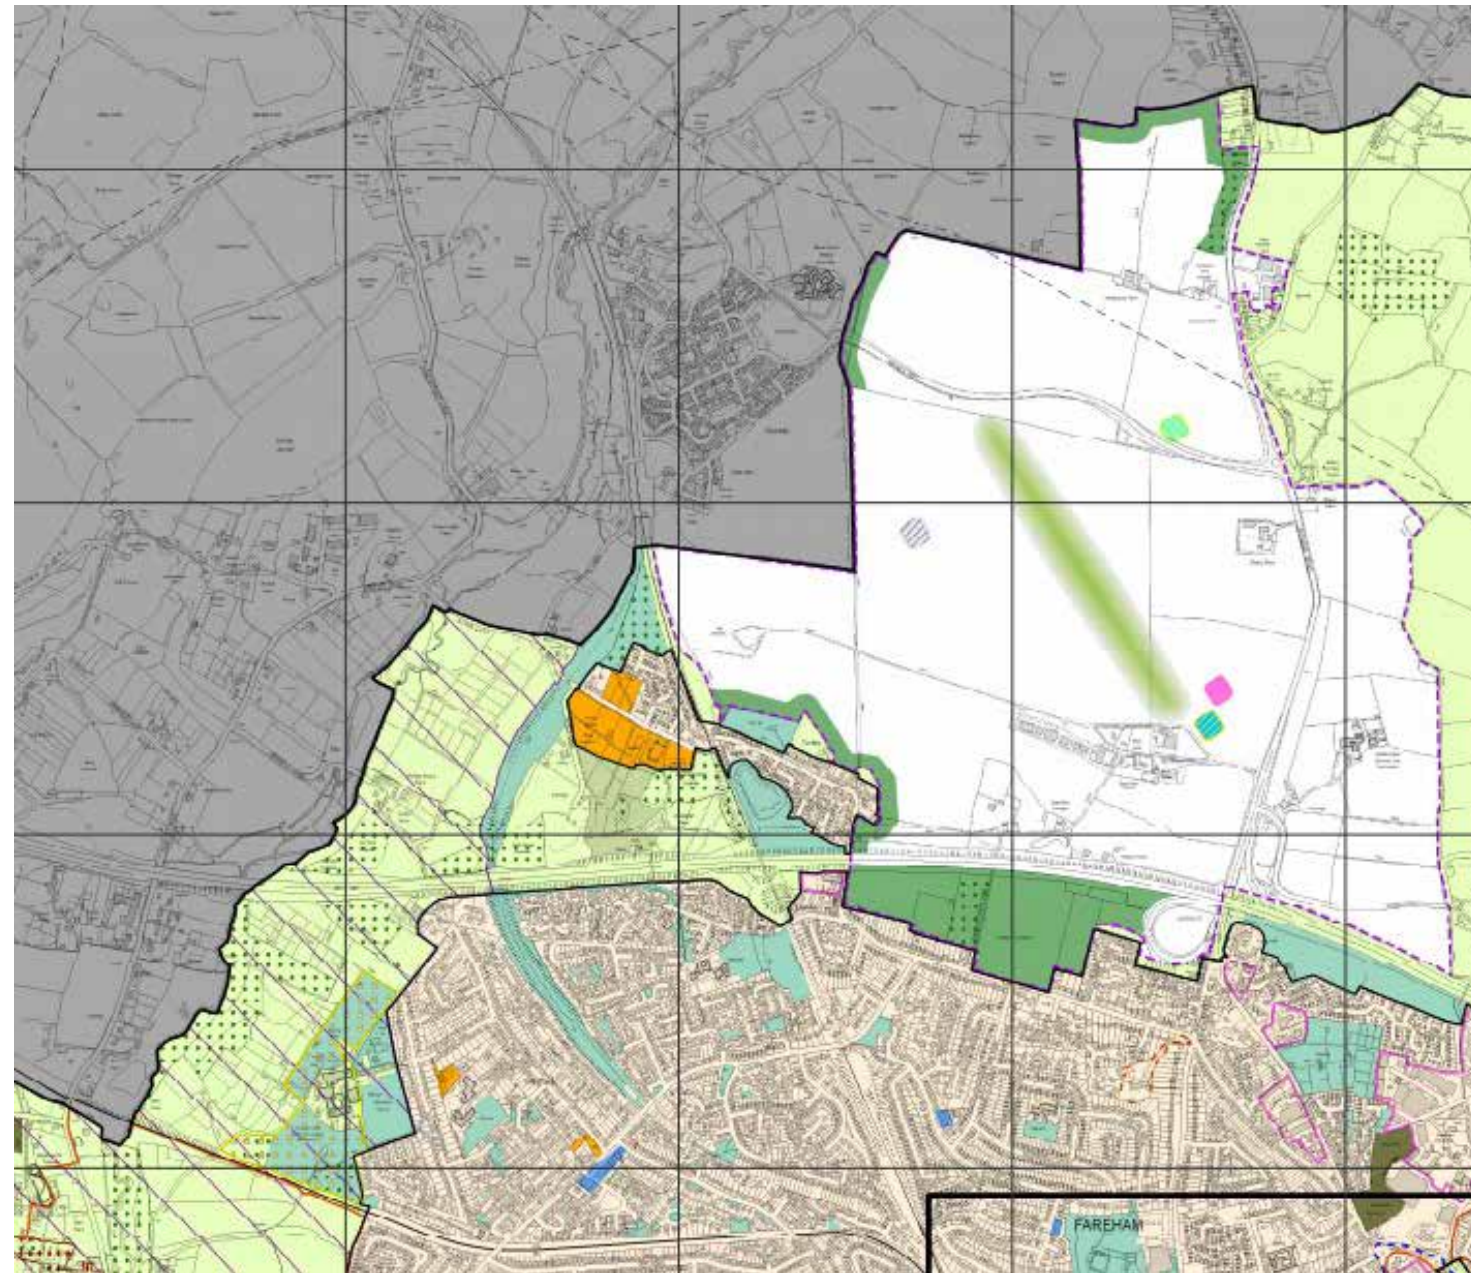

The LVA visual assessment also assessed a range of public viewpoints, both short and long distance, including several within the Meon Valley to the west. The LVA concluded that there is no visual connection between the site and the Meon Valley, due to the Deviation Line and its wooded margins, which provide significant physical and visual screening and separation.

Conclusion

In defining the Meon Valley ASLQ it is important for unambiguous policy that there is a defensible boundary, based on robust evidence. Hampshire County Council and FBC's more recent detailed assessment of landscape character types shows that the embanked Deviation Line encloses the Meon Valley and marks the landscape character transition from the low lying river valley farmland associated with the course of the Meon river, to the small scale wooded farmland to the east, with its 'urban fringe' influences. In the Funtley triangle, character is particularly compromised by a number of suburban, horticulture and perceptual influences (primarily noise arising from the railway and M27). Visually the embanked railway and the associated woodland, which separates the character types, also forms the edge of the Meon Valley to the west preventing intervisibility and so reinforcing the Meon valley's function as a Strategic Gap. The Deviation Line and associated woodland is covered by an open space designation on the draft policies map protecting its recreational and landscape value.

FBC's own evidence base, together with other studies carried out in relation to the Funtley South planning application by Reside's landscape consultants, show that the eastern boundary of the Meon valley ASLQ should be defined by the Deviation Line and that there is no logical reason, based on landscape and visual evidence, that this should be breached and include land within the Funtley triangle.

Therefore we propose that the boundary of the Meon Valley ASLQ should be defined by the Deviation line, as shown on the plan opposite, coinciding with the Strategic Gap, rather extending to an arbitrary location within the Funtley triangle to the east. This is readily defensible with respect to its landscape character and qualities and the visual enclosure that the man-made Deviation line affords to the Meon Valley.

FBC Local Plan draft policies map in the northern extent of the Borough showing allocations at Funtley North and South and the Deviation Line included as an open space designation. The Meon Valley Strategic Gap lies to the west of the Deviation Line

The proposed limit of the Meon Valley ASLQ lies at the character transition between character types and open space designation along the disused Deviation Line (now a bridleway), west of the Funtley triangle

Development proposal	8
Landscape and visual implications of development proposal	10
Appendix i Landscape and Visual Appraisal prepared by Fabrik, January 2018	

Funtley triangle is enclosed by substantial treebelts and topography so is visually discrete. The landscape character has been eroded by suburban development and urban fringe uses including horse paddocks and associated structures, lighting and motorway noise....

Introduction

Funtley South lies within the Funtley triangle north of Fareham and the M27 motorway and is contained by the well-wooded Deviation Line to the west, which separates it physically and visually from the Meon Valley. The main railway contains the eastern edge and separates Funtley North and South from the historic heart of Funtley village and the consented Welborne Garden Village (c.6000 homes) to the north-east of Funtley Village.

In September 2020, Fareham Borough Council granted outline consent for demolition of the existing buildings and construction of 55 dwellings (including 3 custom-build homes) community building incorporating a local shop, access and associated landscaping, infrastructure and development works at the site. The principle of housing on this site has therefore been established.

The application was supported by a Landscape and Visual Appraisal (LVA) prepared by Fabrik Chartered Landscape Architects dated January 2018. The LVA prepared by Fabrik in 2018 and referred to in this Addendum document is found at Appendix i. The comprehensive LVA assessed the potential landscape and visual impacts of the previously approved scheme.

This addendum report analyses where the proposed scheme for up to 125 houses and a Community Park has changed, the landscape-led rationale for the revised scheme, (which is more fully described in the DAS), and then assesses how this has affected the conclusions of the Landscape and Visual Appraisal. This report draws conclusions as to the likely landscape and visual implications associated with the revised development proposals and any mitigation measures that might be required to minimise impacts or optimise the benefits with respect to landscape character and visual amenity.

The existing LVA prepared by Fabrik Ltd (Jan 2018), which was submitted with the consented planning application P/18/0067/OA, sets out the landscape policies relevant to the site and describes the baseline conditions of the site and its surrounding context. The LVA also provides a comprehensive visual study identifying potential visual receptors both within the Funtley triangle and areas beyond this, including public footpaths and roads.

The baseline conditions have not changed from that described in this report except that detailed permission has been granted for housing at Funtley North (23 dwellings) opposite the site and Funtley South has outline consent for up to 55 houses. In addition Welborne Garden Village has also received Resolution to grant by Members for c.6000 dwellings, currently negotiating S106 Agreement.

Representations were made in February 2020, as part of the consultation process on the emerging Local Plan to 2035, concerning the potential inclusion of a small area of the Funtley triangle within the Meon valley Area of Special Landscape Quality (ASLQ). These representations are contained within Rummey Design's Technical Note re proposed Meon Valley ASLQ (Rummey Design Feb 2020) and clearly sets out the reasons why the ASLQ should be defined by the Deviation Line, which lies to the west of Funtley triangle, and exclude any areas within Funtley triangle.

Landscape character

The landscape character baseline, as outlined within the LVA, recognises the existing urban influences within the Funtley triangle that affect landscape character. The LVA also recognises that the equestrian uses on site have changed and degraded the character of the farmland landscape, concluding that the landscape character sensitivity and value is Low to Medium.

Visual receptors

The LVA identified and assessed visual amenity and views from a wide range of visual receptors both within the Funtley triangle and across the wider area from publicly accessible locations. The viewpoints clearly illustrate the range of potential views towards the site and show that it is well-contained within the immediate vegetation cover and topography that encloses the triangle. Notably the rising topography to the south encloses the site and prevents any views southwards. The Deviation Line to the west is embanked separating the site from any views from the Meon valley, whilst vegetation along the main railway encloses views to the north and east.

The visual impact assessment informed the development proposals confirming that development should be confined to the lower, less visible slopes, that landscape features should be retained and that the higher, southern parts of the site should be retained to provide public open space.

Assessment of landscape and visual effects

The assessment concludes that the proposed development would not noticeably alter the landscape character at National, County or Borough level.

At worst it assesses a Moderate-major negative effect on the landscape character at site level, where development is proposed due to the change of use from equestrian fields to residential development. It predicts that there are potential benefits to landscape character in the long term.

With respect to visual effects the assessment predicts that the only negative effects on views are likely to be experienced by residents along Funtley Road/Stage Way/Roebuck Avenue and Honey Lane but that these can be mitigated through planting. It is worth noting that there is only one property that has views into the site on Honey Lane due to a gap in vegetation and that many properties within the residential development areas to the north have vegetation or built form screening views from ground floor windows. These are considered, in best practice guidance, to be to be more important than those from upstairs bedrooms.

No notable effects are predicted on views and visual amenity from public footpaths except for a short section of bridleway on the Deviation Line where there could be glimpsed views into the site in winter. However the appraisal acknowledges that planting on the western edge of the site would mitigate this change.

Overall no widespread landscape and visual effects are predicted and those negative effects that are predicted on the immediate context and at site level are assessed as being able to be effectively mitigated.

The LVA recognises that the development would be well contained within the existing landscape framework and that all important landscape features are retained.

The LVA also concludes that there is an opportunity to secure the long term management of the site, Ancient Woodland and Green Infrastructure as well as providing publicly accessible open space where none exists at present.

The existing LVA does not specifically analyse historic pattern through mapping, which helps to understand the evolution of the landscape and how, by taking this into account, development can more effectively be integrated into the landscape and bring about greater landscape benefits.

Mapping shows the former brickworks and clay pits in the area which, together with the railway, have shaped its character. The 1963 map shows that the Deviation Line has added to the enclosure and isolation of the triangle with the claypits north of Funtley Road becoming the site of an abattoir. Residential areas now occupy this site together with much of the other land north of Funtley Road. The M27 has also had a significant impact cutting an east-west swathe across the landscape, severing the triangle from Fareham North and further isolating it.

Extensive areas of coppice woodland are evident in late Victorian times with a notable field pattern of hedgerows linking the wooded horizons on the upper slopes to the valley bottom. These compartmentalised the landscape and connected landscape features.

The hedgerows have been lost in the latter part of the 20th century and are now only marked by a few isolated trees. The coppice woodland has been lost and fragmented since Victorian times, although the remaining woodland areas and tree groups still give the impression of wooded horizons.

Small paddocks are now defined by a proliferation of post and rail fencing, which, together with hard surfaced areas, stables, large barns and other clutter have eroded the rural character.

Restoring the historic pattern in green fingers to integrate development and reconnect the valley landscape with the wooded horizons has been one of the key landscape drivers for the revised layout reflected, on the illustrative masterplan by green links and rural edge treatments, which structure the neighbourhoods and provide significant amenity value.

1859 The hamlet of Funtley is next to the railway line with adjacent rectangular field patterns and extensive coppice woodland in the surrounding areas.

1898 coppice woodland is a dominant feature with smaller fields on Funtley South. Brickworks and claypits occupy part of Funtley north

1963 coppice woodland is now fragmented, an abattoir lies north of Funtley Road & the Deviation Line severs the triangle from the Meon valley

2020 the M27 cuts an east-west swathe across the ridge so that Funtley triangle is now isolated on all sides.

development proposal

development proposal

The development is to provide for up to 125 dwellings, community building incorporating a local shop with associated infrastructure, new Community Park, landscaping and access as shown on the Illustrative Masterplan opposite.

The site is set within an undulating landscape where the dominant feature is the topography and its wooded horizons which are characteristic. This mature landscape effectively unifies the landscape and helps contain development, where it has occurred. The site itself contributes to the wooded horizons with remnant coppice woodland on the higher ground in the south.

Other significant landscape features on the site include areas of ancient replanted woodland in Great Beamond Coppice, treebelts and mature trees. The proposed development ensures that these key landscape features are retained and enhanced. The smaller scale field pattern that once compartmentalised the site (now only indicated by a few remnant trees) once linked the wooded horizons to the valley floor.

This pattern will be reinstated through the proposed north-south green links which will incorporate the remaining trees and provide access routes, SuDS, biodiversity corridors and new native tree and shrub planting, as well as species-diverse grasslands.

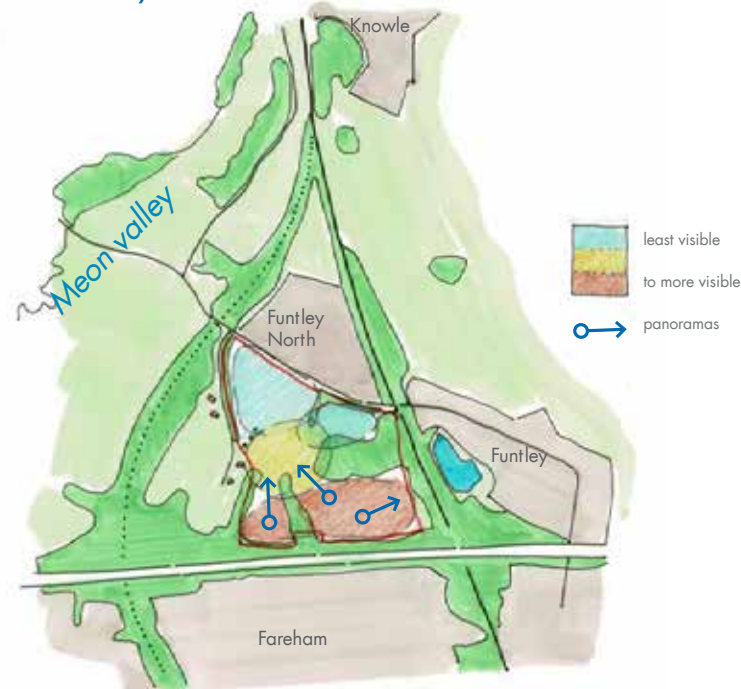

An interconnected network of footpath and cycle routes will link the site to Fareham North to the south and the Meon valley trail and wider countryside to the north, also allowing existing and new communities to access the Community Park located on the higher slopes south of the residential development. This area benefits from panoramic views northwards towards the South Downs and Meon Valley, which will now become accessible to the community.

The Community Park will provide significant areas of open space for informal recreation, with habitats enhanced through management and planting.

The landscape will be managed as part of the development adding to its amenity, biodiversity, recreational, educational and landscape value. Management regimes that might be considered could include traditional methods such as coppicing of woodland and diversification of meadows through green haying or grazing.

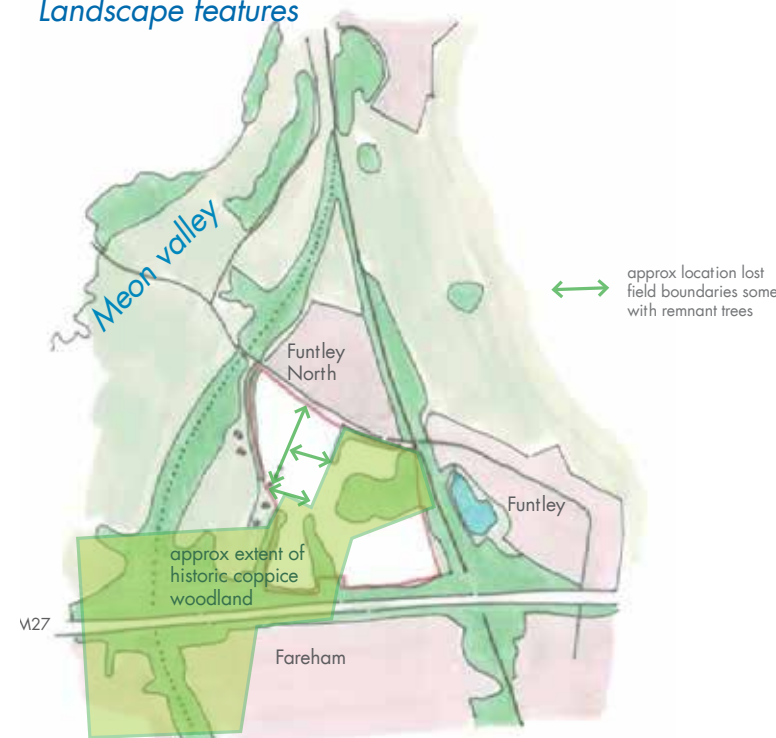

The character of Funtley Road frontage will be designed to reflect the essence of other Meon valley village frontages helping to connect the existing and new communities but also providing a locally distinctive setting within which to integrate development.

Visibility & Views

concentrate development in less visible areas on lower slopes, in valley and areas contained by vegetation. Community open space in areas with wider views maintaining and celebrating key panoramas to wooded horizons ...

Landscape features

historic features such as the north-south hedgerows and interconnected coppice woodland were present into the 20th century but have now been significantly reduced in area or lost. These connected the upper slopes to the valley floor. The repaired landscape structure can bring back some of these features and provide context and sense of place for development, integrating it into its setting ...

Landscape character

reconnect the site with the wider landscape and Meon valley reinforcing the wooded horizons; soften character transition of built development through density gradients within a repaired landscape pattern ...

landscape & visual implications of development proposal

preliminary aerial view from the north looking towards Fareham

— — — — —> wooded horizon reinforced

• • • —> multifunctional green links reinstate smaller scale historic field pattern

landscape & visual implications of development proposal

The landscape character of Funtley South, which has been affected by adjacent residential development and uses such as a cattery, equestrian activities, stables, vehicle parking, noise from the M27, etc is best described as urban fringe. The urban influences will increase when Welborne Garden village is constructed, to the north-east.

The landscape led approach to the scheme is based on the retention of key landscape features including the replanted Ancient Woodland, the habitats of value within the site and the need to effect landscape restoration to restore the landscape pattern and character which has been eroded. The enhanced landscape will also provide the setting for the proposed development so that it integrates into the site. The enhanced setting will also help mitigate any impacts on visual amenity for local residents that face the site at present from the residential area to the north. Additional benefits are likely to include enhanced recreational opportunities including those provided by the proposed Community Park as well as better connectivity both with Fareham North and the footpath network, including the Meon Trail within the wider countryside.

Landscape impacts

The potential landscape effects have been assessed at site level, at Borough level LCA and also at County and National character area level. Landscape effects are also assessed on landscape features.

The arboricultural impact assessment confirms that all significant trees are to be retained and protected. The proposal allows for replanting within the greenlinks, reinstating smaller scale landscape compartments for development, based on historic pattern. These also physically and visually connect the wooded slopes and horizons with the valley floor. Additional planting around the rural edge of the site will enhance the existing landscape structure. New and existing vegetation will be managed as part of the development. The effect on landscape features is assessed as beneficial.

The landscape character of the site has been eroded through past uses. The proposed development, although over a slightly increased area compared to the previous proposal, is still located on the lower, less visible slopes and its edges have been carefully defined to relate to the topography and slopes for reasons of visibility and landscape character. The form of development also responds more closely to the landscape pattern, based on studies of its historic evolution.

The effect on landscape character of the proposed development at site level was previously assessed as a Moderate-Major negative effect on the landscape character at site level, where development is proposed due to the change of use from equestrian fields to residential development.

Whilst we would agree that this is a significant change we reiterate that the character of the site and indeed the entire Funtley triangle has been affected by changing uses over a long period with the effect that coppice woodland and field boundaries have been lost and replaced with fencing, sheds, and other buildings. Non-native planting has also been introduced, especially around the existing buildings near the entrance and the general visual amenity that the site provides has declined. In addition there has been little management of the key landscape features such as the woodlands and remaining field trees, which can be expected to decline further without intervention.

The site has been deemed suitable for limited residential development in both published landscape characterisation studies and by the Council, in granting planning permission for 55 houses. A well-designed, landscape-led residential development which respects the character and restores lost features is not necessarily negative, and in this case is positive, particularly in the longer term. Whilst the short term effects on landscape character may be Moderate adverse, the long term effect on landscape character is likely to be Minor adverse at worst with the potential to be beneficial. This could stop the century long decline in landscape structure and produce an appropriate and enhanced setting leading to a stronger landscape framework maturing into the 21st and 22nd centuries.

Visual impacts

We agree with the previous LVA assessment that the site is well enclosed so that the visual effects are likely to be restricted to receptors within the residential areas in Funtley North and road users along Funtley Road.

The proposed development, whilst over a slightly increased area, is still located on the lower, less visible parts of the site and the landscape structure throughout the site is to be enhanced. In addition, rather than cutting the site off from Funtley Road the proposals seek to create a positive, locally distinctive Meon valley village ambience where built form, water and vegetation provide the frontage along Funtley Road. This will enhance the character on both sides of Funtley Road.

Whilst there will be a discernible change in views for residents to the north of Funtley Road, it is assessed that the impacts are likely to be minor to moderate adverse in the short term (mainly related to construction impacts) with the potential for long term benefits as the landscape matures and development is integrated.

Landscape improvements in the Community Park, including the removal of buildings on the upper slopes, new tree planting and enhanced management of both the existing and new vegetation and grasslands are assessed as beneficial to views and visual amenity. This change of use will also give public access so that the panoramic views from the upper parts of the site, which are currently not available to the general public, will be available to all users.

The effects of this renewed landscape structure, combined with the enhanced public footpath access, will produce an enhanced landscape for the public and wildlife alike well into the 21st and even 22nd centuries. This will arrest the continuing decline and fragmentation of the landscape and produce the opportunity for improved landscape management; this new landscape structure will be 're-purposed' as part of the shift from agricultural to residential and leisure landscapes with changing social, economic and environmental circumstances.

1. Introduction

1.1 Introduction

fabrik Chartered Landscape Architects have been appointed by Reside Developments Ltd to carry out a Landscape and Visual Appraisal (LVA) of the land to the south of Funtley Road, Funtley, Hampshire (the Application Site, refer to **Figure 1.1**) and its environs, in order to consider the likely physical and visual impacts arising as a result of the proposed development.

This LVA forms one of the suite of documents provided with the outline application. It sets out landscape policy and then goes on to describe the existing topography, land cover, vegetation, landscape features, landscape character and visual receptors of the local area in order to assess the landscape and visual effects of the proposed development which together inform the landscape character. The LVA also describes the baseline character and amenity of the identified visual receptors (considering the visual envelope, the different groups of people, places affected, the nature of the view and the visual amenity). This document describes the development proposals and then sets out a statement of landscape and visual effects.

This LVA should be read in conjunction with the suite of documents submitted with the outline application (all matters reserved except for access).

The methodology for the LVA is based on the 'Guidelines for Landscape and Visual Impact Assessment' (third edition) by the Landscape Institute and Institute of Environmental Management and Assessment (Routledge, 2013) and is set out at Appendix 1.

Where the terms 'Site' and 'Application Site' are used in this LVIA, these both refer to the land defined by the red line boundary shown in Figure 1.1; which is the subject of two separate planning applications:

1) Outline Application

Following demolition of existing buildings residential development of up to 55 dwellings (including 3 self-build homes) (Use Class C3), community building incorporating a local shop 250 sqm (Use Classes A1, A3, D1 & D2), accesses and associated landscaping, infrastructure and development works.

2) Change of Use

Change of use of land from equestrian/grazing to community park following demolition of existing buildings

1.2 Overview of Proposed Development

The proposed development comprises of 55 dwellings, a community building incorporating a local shop, with associated infrastructure, new community park, landscape planting and access. The Site area is 16.18 hectares (ha) and the Site is a proposed development allocation (ref. HA10) in the emerging Fareham Local Plan 2036.

1.3 Desktop Research and Study Area

The desktop survey carried out as part of the LVA included the review of previous proposals, Ordnance Survey maps, interactive maps, aerial photography, published landscape character assessment documents and planning policy. This was further verified through field work, to determine the potential zone of landscape and visual influence of the site and proposed development, including views requested by the Principal Planner of Fareham Borough Council on 25/05/2017.

The study area was found to generally extend to around 2.0km from the centre of the Site. Beyond this the landscape is visually divorced from the area by the intervening topography, vegetation and in places, built form. The LVA nevertheless considers the wider landscape, planning and designations context to the land within the Site.

1.4 Field Work

The field work was initially carried out on 07/06/17 and recorded the existing landscape elements within the Site; the contextual landscape elements; and identified a series of key visual receptors. The visual assessment element includes a photographic survey of the land within the Site taken from a series of representative key views, chosen to represent a range of public views, distances and directions within the study area. The photographic survey was updated to reflect winter views on 05/01/2018.

Viewpoints 15-19 were omitted from the winter photographic survey, since the summer views demonstrated such an extent of screening of the views (by vegetation and/or landform in the intervening areas), that it was considered that no significant visual change would occur in winter.

However, additional winter views were taken from the bridleway following the disused railway line west of the Site, since the lack of leaf cover in winter revealed glimpsed views to parts of the Site and nearby existing dwellings. Summer viewpoint 4 is represented by a viewpoint taken from within the Site, but standing very close to the low hedge at the boundary with the adjacent property (containing a dwelling at the southern end of Honey Lane).

While the summer and winter views show slight differences in the position of the viewpoint and focal lengths of camera lens used, there are otherwise, no material differences in the view.

1. Introduction

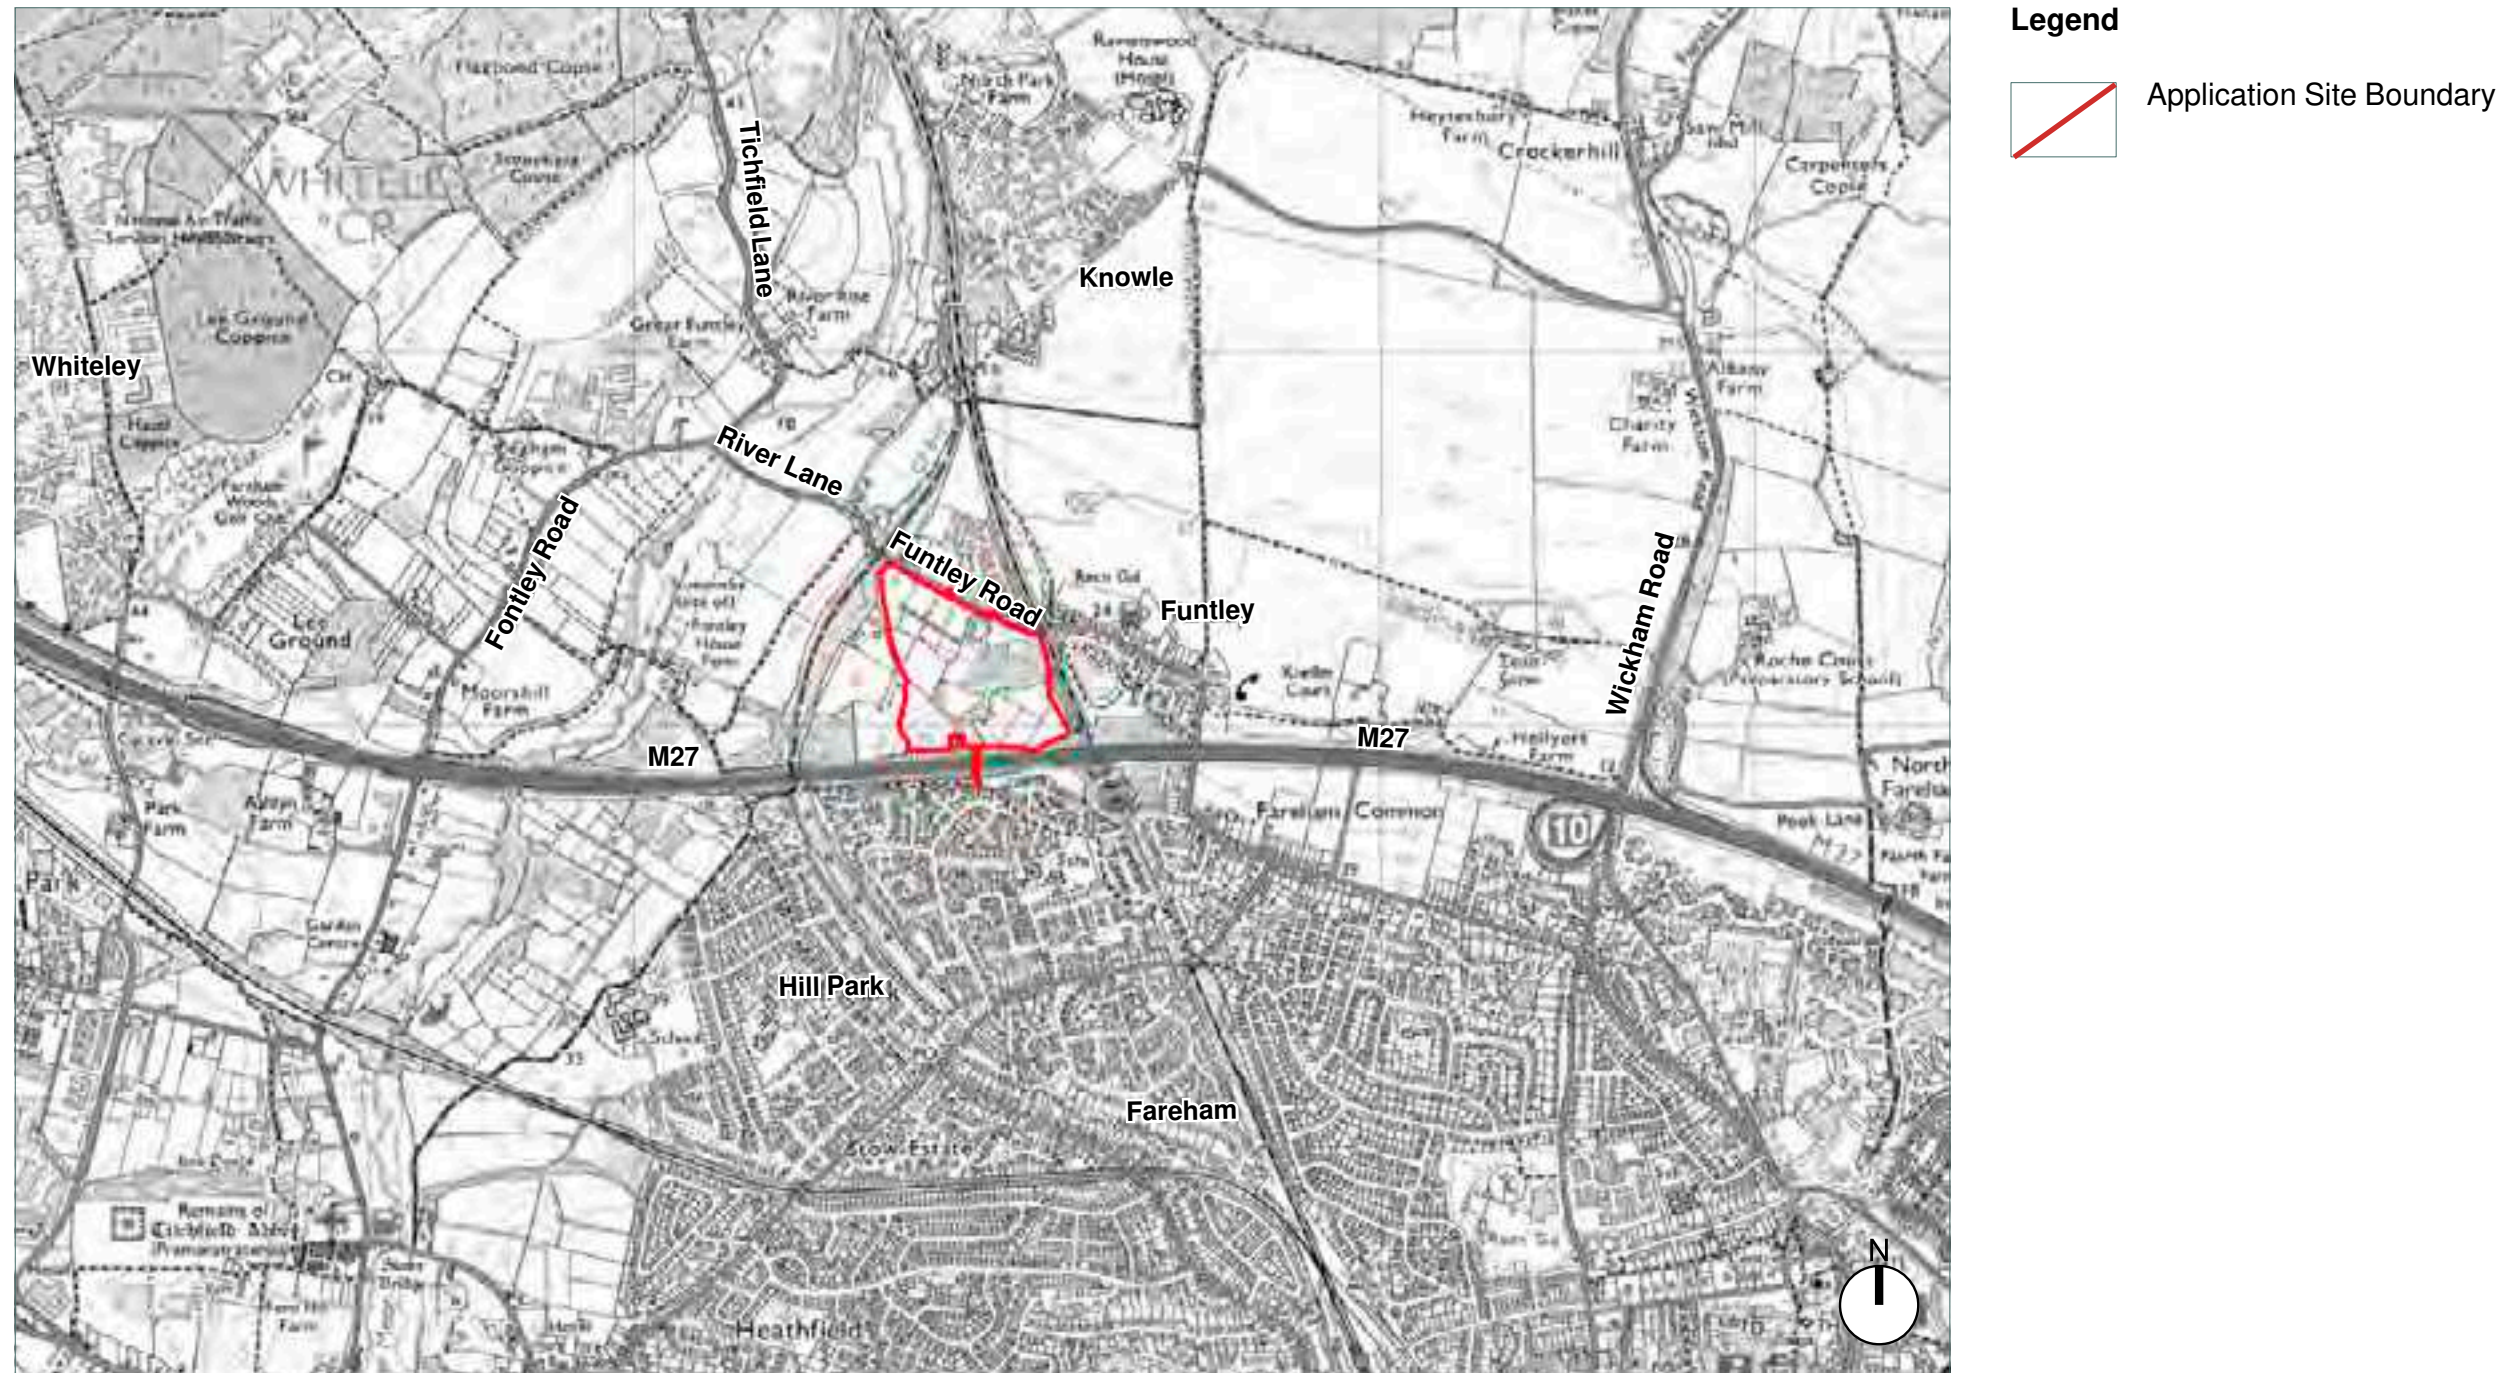

Figure 1.1 – Extract from Ordnance Survey Plan showing the Application Site location and boundary (fabrik, 2018)

2. Baseline Conditions

2.1 Landscape and Heritage Designation

The land within the Site lies wholly within the jurisdiction of Fareham Borough Council and is located within the landscape designation of Area Outside of Defined Urban Settlement Boundary. The area within the north-western part of the Site is designated as Existing Open Space in the Fareham Core Strategy (Adopted August 2011).

Within the Study Area, there are a number of Listed Buildings, Scheduled Ancient Monuments, Ancient Woodlands and Historic Parks and Gardens. The Scheduled Ancient Monument of Tichfield Abbey and Fishponds with a group of Grade II Listed Building of Abbey Cottage, Fisherman's Arms, Place House Cottage and Garden are situated along Mill Lane to the south west of the Application Site. There are no Listed Buildings which abut the Application Site or which have intervisibility with the Application Site.

The South Downs National Park (SDNP) is located approximately 3.7km to north east of the Application Site (and therefore outside of the 3km radius of the study area). This was further verified through field survey work to determine that views of the Application Site are truncated from the SDNP due to intervening topography, built form and vegetation (refer to the visual baseline on Pages 45 and 47).

The Grade II Listed buildings of Church of St Francis is located approximately 510m along Funtley Road to the east of the Application Site. A Scheduled Ancient Monument (the Site of Funtley Iron Works) together with a group of Grade II Listed buildings (including Ironmaster's House and Funtley House) are situated approximately 500m to the south west of Application Site along Ironmill Lane.

The Application Site contains Great Beamond Coppice, an Ancient Re-planted Woodland. This woodland, together with the tree blocks within central northern and south-western sections of the Application Site, are designated as a Site of Importance of Nature Conservation (SINC) and are also covered by a Tree preservation Order (TPO). Another Ancient Woodland of Hookhouse Coppice is also located approximately 200m to the south west of Application Site.

There are no other landscape or heritage designations within nor adjacent to the Application Site.

The above designations are shown on **Figures 2.1 and 2.2** on the following pages.

Land to the east of Funtley is designated for a new settlement known as Welborne. Settlement buffers are proposed in key locations, including along the eastern edge of Funtley.

2.2 National Landscape Policy

The National Planning Policy Framework (NPPF) (March 2012) seeks the presumption in favour of sustainable development. The following issues and policies are pertinent to this LVA.

Section 7 sets out the requirements of good design. Paragraph 56 states that: *"The Government attaches great importance to the design of the built environment. Good design is a key aspect of sustainable development, is indivisible from good planning and should contribute positively to making places better for people."*

Paragraph 57 goes on to state that: *"It is important to plan positively for the achievement of high quality and inclusive design for all development, including individual buildings, public and private spaces..."*

Paragraph 58 looks to ensure that developments:

- *"will function well and add to the overall quality of the area, not just for the short term, but over the lifetime of the development;*
- *establish a strong sense of place, using streetscapes and buildings to create attractive and comfortable places to live, work and visit;*
- *optimise the potential of the site to accommodate development, create and sustain an appropriate mix of uses (including incorporation of green and other public space as part of developments) and support local facilities and transport networks;*
- *respond to local character and history, and reflect the identity of local surroundings and materials, while not preventing or discouraging appropriate innovation;*

- *create safe and accessible environments...; and*
- *are visually attractive as a result of good architecture and appropriate landscaping."*

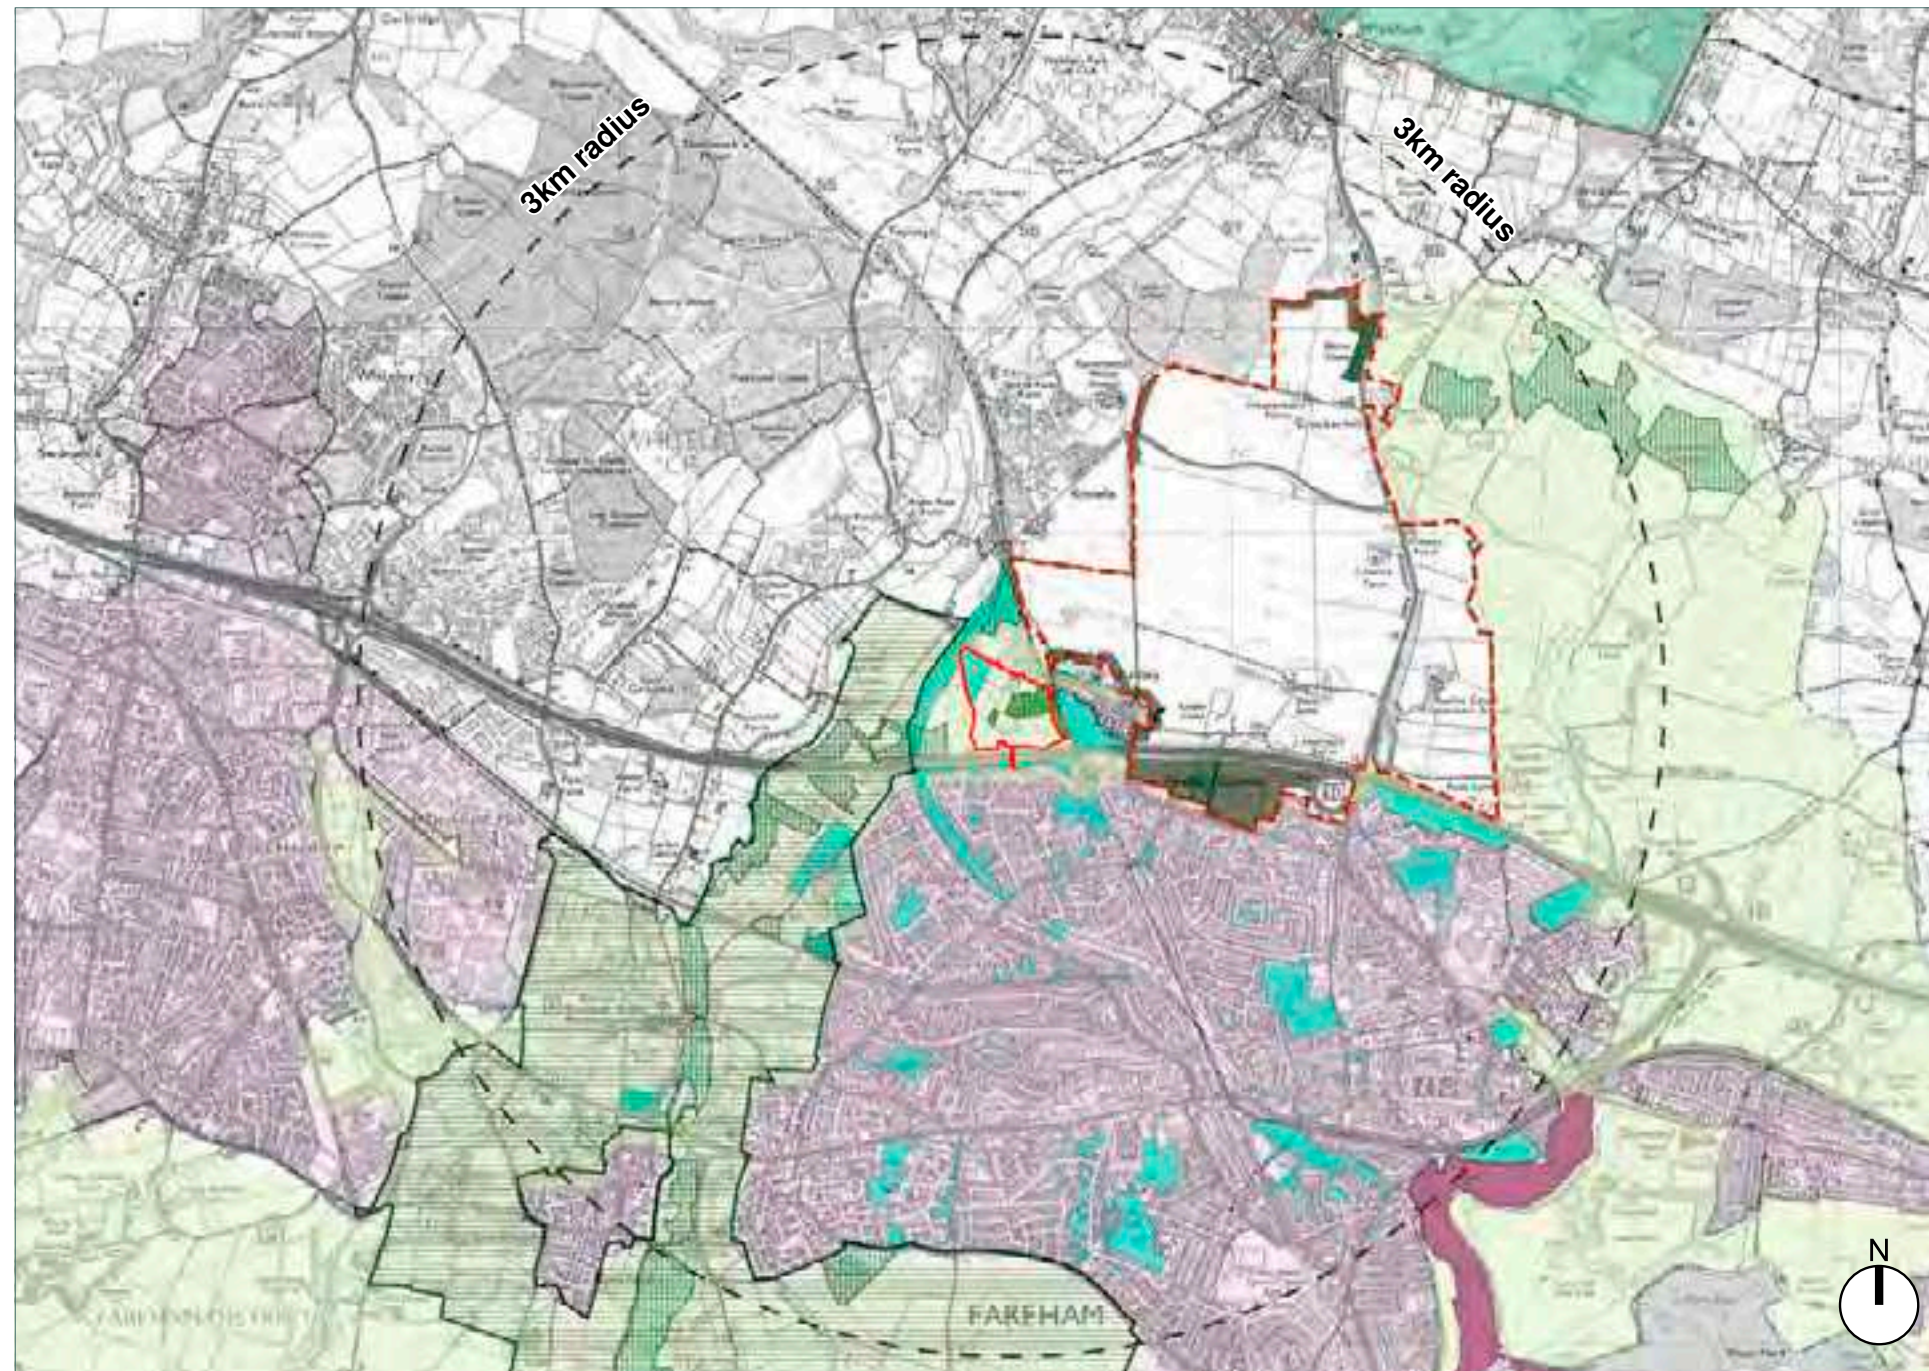

Furthermore, Paragraph 65 states that: *"Local planning authorities should not refuse planning permission for buildings or infrastructure which promote high levels of sustainability because of concerns about incompatibility with an existing townscape, if those concerns have been mitigated by good design (unless the concern relates to a designated heritage asset and the impact would cause material harm to the asset or its setting which is not outweighed by the proposal's economic, social and environmental benefits)."*

Section 8 of the NPPF deals with 'Promoting healthy communities' and seeks to achieve:

- *"Opportunities for meetings between members of the community who might not otherwise come into contact with each other, including through mix-use developments, strong neighbourhood centres and active street frontages which bring together those who work, live and play in the vicinity;*
- *Safe and accessible environments where crime and disorder, and the fear of crime, do not undermine quality of life or community cohesion; and*
- *Safe and accessible developments, containing clear and legible pedestrian routes, and high quality public space, which encourage the active and continual use of public areas."*

Section 10 deals with climate change. Paragraph 96 sets out that development should take into account the landform, layout, building orientation, massing and landscaping to minimise energy consumption. Furthermore, Paragraph 99 states that: *"... When new development is brought forward in areas which are vulnerable, care should be taken to ensure that risks can be managed through suitable adaptation measures, including through the planning of green infrastructure."*

2. Baseline Conditions

2.2 National Landscape Policy (continued)

Conserving and enhancing the natural environment is the topic of Section 11. Paragraph 109 states that: *“The planning system should contribute to and enhance the natural and local environment by:*

- *protecting and enhancing valued landscapes, geological conservation interests and soils;*
- *recognising the wider benefits of ecosystem services;*
- *minimising impacts on biodiversity and providing net gains in biodiversity.”*

Paragraph 115 goes on to state that: *“Great weight should be given to conserving landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty.”*

The Application Site does not lie within or form part of the setting to a valued landscape.

National Planning Practice Guidance - NPPG (March 14)

The NPPG is now supported by the on-line resource Planning Policy Guidance (PPG). There are a number of sections that relate to this LVA as set out below.

The PPG sets out guidance on Design at section ID 26 (updated on 6 March 2014) and the elements to be considered to achieve good design. Paragraph 001 under this section states that: *“The National Planning Policy Framework recognises that design quality matters and that planning should drive up standards across all forms of development. As a core planning principle, plan-makers and decision takers should always seek to secure high quality design.*

Achieving good design is about creating places, buildings, or spaces that work well for everyone, look good, last well, and will adapt to the needs of future generations.

Good design responds in a practical and creative way to both the function and identity of a place. It puts land, water, drainage, energy, community, economic, infrastructure and other such resources to the best possible use - over the long as well as the short term.”

Paragraph 002 states that: *“Good design should:*

- *ensure that development can deliver a wide range of planning objectives*
- *enhance the quality buildings and spaces, by considering amongst other things form and function; efficiency and effectiveness and their impact on well being address the need for different uses sympathetically.”*

Paragraph 004 goes on to state that: *“Development proposals should reflect the requirement for good design set out in national and local policy. Local planning authorities will assess the design quality of planning proposals against their Local Plan policies, national policies and other material considerations.”*

Paragraph 007 states that planning should promote local character (including landscape setting) - states:

“Development should seek to promote character in townscape and landscape by responding to and reinforcing locally distinctive patterns of development, local man-made and natural heritage and culture, while not preventing or discouraging appropriate innovation.

The successful integration of all forms of new development with their surrounding context is an important design objective, irrespective of whether a site lies on the urban fringe or at the heart of a town centre.

When thinking about new development the site’s land form should be taken into account. Natural features and local heritage resources can help give shape to a development and integrate it into the wider area, reinforce and sustain local distinctiveness, reduce its impact on nature and contribute to a sense of place. Views into and out of larger sites should also be carefully considered from the start of the design process.

Paragraph 009 relative to greenspaces and public places - includes the following:

“Development should promote public spaces and routes that are attractive, accessible, safe, uncluttered and work effectively for all users – including families, disabled people and elderly people. A system of open and green spaces that respect natural features and are easily accessible can be a valuable local resource and helps create successful places. A high quality landscape, including trees and semi-natural habitats where appropriate, makes an important contribution to the quality of an area.”

Landscape is a sub section under Section ID 8 on the Natural Environment (updated on 6 March 2014). Paragraph 001 on landscape character states that: *“One of the core principles in the National Planning Policy Framework is that planning should recognise the intrinsic character and beauty of the countryside. Local plans should include strategic policies for the conservation and enhancement of the natural environment, including landscape. This includes designated landscapes, but also the wider countryside.*

Where appropriate, landscape character assessments should be prepared to complement Natural England’s National Character Area profiles. Landscape Character Assessment is a tool to help understand the character and local distinctiveness of the landscape and identify the features that give it a sense of place. It can help to inform, plan and manage change and may be undertaken at a scale appropriate to local and neighbourhood plan-making.”

Under the biodiversity, ecosystems and green infrastructure section, paragraph 015 on green infrastructure defined this as: *“... a network of multi-functional green space, urban and rural, which is capable of delivering a wide range of environmental and quality of life benefits for local communities. Green infrastructure includes parks, open spaces, playing fields, woodlands, street trees, allotments and private gardens.”*

2. Baseline Conditions

2.3 Local Landscape Policy

Introduction

The Fareham Borough Council is undergoing the process of producing a new Local Plan to reflect new housing and employment needs within the borough up to 2036. Before the emerging local plan is adopted by the Council, the policies within the Fareham Local Development Framework, Core Strategy (Adopted August 2011) form the principal documents within the Local Plan.

Current Policy: Fareham Local Development Framework, Core Strategy (Adopted August 2011)

Within the Adopted Core Strategy, the Council has set out strategic objectives to reflect the national policies, as well as to monitor and deliver a sustainable community within the borough.

The following objectives are pertinent to this LVA.

Strategic Objective SO1 aims to: *“To deliver the South Hampshire Strategy in a sustainable way, focussing development in Fareham, the Strategic Development Area north of Fareham and the Western Wards.”*

Strategic Objective SO8 aims to: *“To deliver a new sustainable settlement to the north of Fareham, creating 6,500-7,500 homes, up to 90,750 sq.m employment floorspace, a new district centre and other supporting retail and community provision.”* This relates to the Welborne settlement proposed to the east of Funtley.

SO10 states that the Local Authority wishes to: *“...manage, maintain and improve the built and natural environment to deliver quality places, through high quality design sustainability and maintenance standards, taking into account the character and setting of existing settlements and neighbourhoods and seeking safe environments which help to reduce crime and the fear of crime.”*

Whilst SO11 is concerned with green infrastructure, aiming to: *“... protect and enhance access to green infrastructure, the countryside,*

coast and historic environment whilst protecting sensitive habitats or historic features from recreational pressure, and protect the separate identity of settlements, including through the designation of strategic gaps.”

In terms of development proposals and designations, the following policies are pertinent to this LVA.

Policy CS4 relates to the green infrastructure within the borough and states: *“Habitats important to the biodiversity of the Borough, including Sites of Special Scientific Interest, Sites of Importance for Nature Conservation, areas of woodland, the coast and trees will be protected ...”* The policy goes on and states: *“Development Proposals will be permitted where Green Infrastructure provision in accordance with the Green Infrastructure Strategy has been integrated within the development where this is appropriate. Development proposals will provide for appropriate access to green space for informal recreation to avoid adverse impacts from recreation and other impacts on European 31 and Ramsar sites and on nationally and locally important sites.”*

Within the Core Strategy and the proposal map, the Welborne Policy Boundary is within the close distance to the Application Site to the north-east (refer to Figure 2.1). This future development allocates up to 6,000 dwellings with associated transportation links, green infrastructure and open spaces. The relevant Policy is CS13 North of Fareham Strategic Development Area and states that: *“Permission will be granted for the development of a Strategic Development Area to the north of Fareham following the adoption of an Area Action Plan and the preparation of a comprehensive masterplan for the development. The development will include provision for between 6,500- 7,500 dwellings, unless it is found that this level of housing cannot be delivered without adversely affecting the integrity of protected European conservation sites. If any potential adverse effects cannot be avoided or adequately mitigated, the level and scale of development would need to be reduced accordingly to ensure that there are no adverse effects on the integrity of any European sites. The development will also provide supporting environmental, social and physical infrastructure, retail and employment floorspace to both support the development and to contribute towards meeting*

the development objectives of the South Hampshire Sub-Region. The new community will aim to be as self-contained as possible, whilst complementing and supporting the established town centre of Fareham and adjoining settlements.”

Policy CS14 refers to Development outside the defined settlement boundary, stating: *“Built development on land outside the defined settlements will be strictly controlled to protect the countryside and coastline from development which would adversely affect its landscape character, appearance and function.”*

Policy CS17 is concerned with High Quality Design, with focus on landscape and stating: *“All development, buildings and spaces will be of a high quality of design and be safe and easily accessed by all members of the community. Proposals will need to demonstrate adherence to the principles of urban design and sustainability to help create quality places. In particular development will be designed to:*

- *respond positively to and be respectful of the key characteristics of the area, including heritage assets, landscape, scale, form, spaciousness and use of external materials;*
- *provide continuity of built form, a sense of enclosure with active frontages to the street and safety of the public realm;*
- *provide green infrastructure, including landscaping, open spaces, greenways and trees within the public realm...”*

The policy relating to the Protection and Provision of Open Spaces, CS21 states: *“The Borough Council will safeguard and enhance existing open spaces and establish networks of Green Infrastructure to add value to their wildlife and recreational functions. Development which would result in the loss of or reduce the recreational value of open space, including public and private playing fields, allotments and informal open space will not be permitted, unless it is of poor quality, under-used, or has low potential for open space and a better quality replacement site is provided which is equivalent in terms of accessibility and size.”*

Policy CS22 deals with developments within Strategic Gaps and states: *“Land within a Strategic Gap will be treated as countryside. Development proposals will not be permitted either individually or*

2. Baseline Conditions

2.3 Local Landscape Policy (continued)

cumulatively where it significantly affects the integrity of the gap and the physical and visual separation of settlements.

Strategic Gaps have been identified between Fareham/Stubbington and Western Wards/Whiteley (the Meon gap)...

Fareham Borough Local Plan Part 2: Development Sites and Policies (Adopted June 2015)

The Local Plan Part 2 reinforces the Core Strategy's policies relating to the natural environment. Paragraph 4.1 summarises: *"The Natural Environment is a key asset of the Borough, which provides a significant contribution to the quality of life of residents and visitors. It not only provides a natural, green setting for the Borough's settlement, but is also important for recreation and leisure uses as well as supporting the Borough's biodiversity including internationally important habitats for wildlife. The Plan is important in establishing the right balance between planning for growth and protecting the natural environment."*

Policy DSP40 Housing Allocations includes the following, which is of relevance to the proposed development site:

"Where it can be demonstrated that the Council does not have a five year supply of land for housing against the requirements of the Core Strategy (excluding Welborne) additional housing sites, outside the urban area boundary, may be permitted where they meet all of the following criteria:

- i. The proposal is relative in scale to the demonstrated 5 year housing and supply shortfall;*
- ii. The proposal is sustainably located adjacent to, and well related to, the existing urban settlement boundaries, and can be well integrated with the neighbouring settlement;*
- iii. The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;*

iv. It can be demonstrated that the proposal is deliverable in the short term; and

v. The proposal would not have any unacceptable environmental, amenity or traffic implications."

Policy DSP2 concerns with any environmental impact of new developments to the existing development and wider landscape, and go on stating: *"Development proposals should not, individually, or cumulatively, have a significant adverse impact, either on neighbouring development, adjoining land, or the wider environment, by reason of noise, heat, liquids, vibration, light or air pollution (including dust, smoke, fumes or odour)...."*

Policy DSP5 relates to any developments affecting the setting of historical assets and states: *"Designated and non-designated heritage assets are an irreplaceable resource that will be conserved in a manner appropriate to their significance, to be enjoyed for their contribution to the quality of life of this and future generations. The wider social, cultural, economic and environmental benefits of their conservation will also be taken into account in decision making...."* The policy goes on and state: *"...The Council will conserve Scheduled Monuments, and archaeological sites that are demonstrably of national significance, by supporting proposals that sustain and where appropriate enhance their heritage significance. Proposals that unacceptably harm their heritage significance, including their setting, will not be permitted."*

Non-designated heritage assets including locally listed buildings, historic parks and gardens, and sites of archaeological importance will be protected from development that would unacceptably harm their Architectural and historic interest, and/or setting taking account of their significance.

Policy DSP6 relates to the Core Strategy CS14 on Development Outside of the Defined Urban Settlement Boundaries and states: *"There will be a presumption against new residential development outside of the defined urban settlement boundaries (as identified on the Policies Map)....A change of use of land outside of the defined urban settlement boundary to residential garden will only be permitted where:*

i. It is in keeping with the character, scale and appearance of the surrounding area; and

ii. It will not detract from the existing landscape; and

iii. It respects views into and out of the site."

Policy DSP13 relates to the impact of new development on the nature conservation areas within the borough and states: *"Development may be permitted where it can be demonstrated that;*

i. designated sites and sites of nature conservation value are protected and where appropriate enhanced;

ii. protected and priority species populations and their associated habitats, breeding areas, foraging areas are protected and, where appropriate, enhanced;

iii. where appropriate, opportunities to provide a net gain in biodiversity have been explored and biodiversity enhancements incorporated; and

iv. The proposal would not prejudice or result in the fragmentation of the biodiversity network.

Proposals resulting in detrimental impacts to the above shall only be granted where the planning authority is satisfied that (this section of the policy should not be applied to impacts on SPA designated sites which are subject to stricter protection tests as set out in The Conservation of Species and Habitats Regulations (as amended) 2010);

i. Impacts are outweighed by the need for, and benefits of, the development; and

ii. Adverse impacts can be minimised and provision is made for mitigation and, where necessary, compensation for those impacts is provided.

Enhancements that contribute to local habitat restoration and creation initiatives as set out in the Hampshire Biodiversity Action Plan (or other similar relevant document) will be supported."

2. Baseline Conditions

Supplementary Planning Documents

Planning Obligations Supplementary Planning Document for the Borough of Fareham (Excluding Welborne) Adopted April 2016

In terms of public open space, outdoor sport and children's play equipment, Appendix B sets out that for developments of between 50-299 dwellings, 1.5ha per 1000 population is to be provided for parks and amenity open space. No sport provision is required for this scale of development. In terms of play provision, for developments between 50-199 dwellings, a LEAP is required.

Emerging Policy: Fareham Local Plan 2036 (Draft, Consultation Version)

Figure 2.3 on the following page illustrates the proposed amendments to the policies map. **Figure 2.4** shows the development allocation plan from Appendix G of the emerging local plan. The Application Site is proposed for residential development and new open space. Land to the north is also proposed as a residential allocation. Extracts of the policies relative to landscape matters are set out below:

Policy HA10 sets out the requirements of the proposed allocation, with a capacity for 55 dwellings and states that: "Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- a) The quantum of housing proposed shall be broadly consistent with the indicative site capacity; and
- b) Primary highway access shall be from Funtley Road; and
- c) Building heights are limited to a maximum of 2 storeys; and
- d) Safe pedestrian and cycle crossing points across Funtley Road and connectivity with the existing footpath/bridleway network in the vicinity of the site and eastwards towards the centre of Funtley village in order to maximise connectivity to nearby facilities and services; and

- e) The creation of a vehicular loop road on the site, allowing for pedestrians and cycle permeability across the site; and
- f) Proposals shall take account of the site's landscape context by incorporating view corridors from Funtley Road through to the public open space allocation to the south of the residential allocation (as illustratively shown in Appendix G). The view corridors should form part of the on-site open space and should incorporate pedestrian and cycle links, whilst vehicular crossing links should be limited; and
- g) A 15m buffer shall be incorporated between development and the Great Beamond Coppice SINC to the east of the site; and
- i) The provision of a building / buildings for community uses, located in an accessible location to enable a range of uses for both existing and new residents; and
- j) Proposals shall either provide directly, or provide financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Public open space on and off-site (as illustratively shown in Appendix G) (in line with the Council's Planning Obligations SPD); and
 - a Local Area of Play (LEAP) on-site (in line with the Council's Planning Obligations SPD).

In light of the landscape setting, this development allocation is required to take a looser, less dense approach, applying a density of around 20 dwellings per hectare (dph). In light of the rural setting, significant natural landscaping should be incorporated, so that proposals are assimilated into the landscape. Part of this assimilation includes the incorporation of view corridors, between Funtley Road and the open space south of the site, which are required to maintain visual and physical connections through the site.

Additionally, the delivery of the community uses building and public open space are critical elements in making the development

acceptable, by providing additional assets for both the existing and new community. The community building envisaged is one that is multi-functional and flexible to allow for a range of small-scale community uses, whilst the proposed public open space should be more informal in nature, to take account of and strengthen the landscape setting.

Appendix F is a visual demonstration of the suggested approach to development in this location, taking account of the approach detailed above."

The other pertinent policies of the Local Plan, relative to landscape and visual matters are:

Policy CF6: Provision and Protection of Open Space, which states that: "Proposals for new residential development will be required to provide open space to meet the needs of new residents in accordance with the thresholds and requirements set out in the Council's Planning Obligations SPD.

Proposals seeking to develop on open space will not be permitted unless it can be clearly demonstrated that:

- a) The open space is surplus to local requirements and will not be needed in the long-term following a robust assessment; and
- b) Replacement provision will be at least equivalent or better in terms of quantity, quality and accessibility and there will be no overall negative impact on the provision of open space; or
- c) The development is for alternative recreational provision, which meets locally identified needs and clearly outweighs the loss of the original open space; or
- d) The loss of open space is replaced by a scheme which delivers high quality community, educational or health benefits and clearly outweighs the scale of the net loss of open space."

2. Baseline Conditions

Figure 2.3 – Plan extract from the emerging Fareham Borough Council Local Plan 2036 Proposals Map (Draft, Consultation Version)

2. Baseline Conditions

Emerging Policy: Fareham Local Plan 2036 (Draft, Consultation Version) Continued

Policy NE1 deals with Landscape and states that: *“Development for all major applications will be permitted only where it can be demonstrated, through a robust landscape assessment that the proposals satisfy the specific development criteria contained within the Council’s Landscape Sensitivity Assessment for the character area in which the development is located.*

Development proposals must respect, enhance and not have severe adverse impacts on the character or function of the landscape that may be affected, with particular regard to:

- a) Intrinsic landscape character, quality and important features;*
- b) Visual setting, including to/from key views;*
- c) The landscape as a setting for settlements, including important views to, across, within and out of settlements;*
- d) The landscape’s role as part of the existing Green Infrastructure network;*
- e) The local character and setting of buildings and settlements;*
- f) Natural landscape features, such as trees, ancient woodland, hedgerows, water features and their function as ecological networks; and*
- g) The character of the Borough’s rivers and coastline, which should be safeguarded.*

Major development proposals shall include a comprehensive landscaping mitigation and enhancement scheme to ensure that the development is able to successfully integrate with the landscape and surroundings. The landscaping scheme shall be proportionate to the scale and nature of the development proposed and shall be in accordance with the enhancement opportunities specified in the

Council’s Landscape Sensitivity Assessment.”

Policy D1 is the topic for High Quality Design, setting out that all development proposals and spaces are to be of high quality, based on principles of urban design and sustainability to help create quality places. It includes the following:

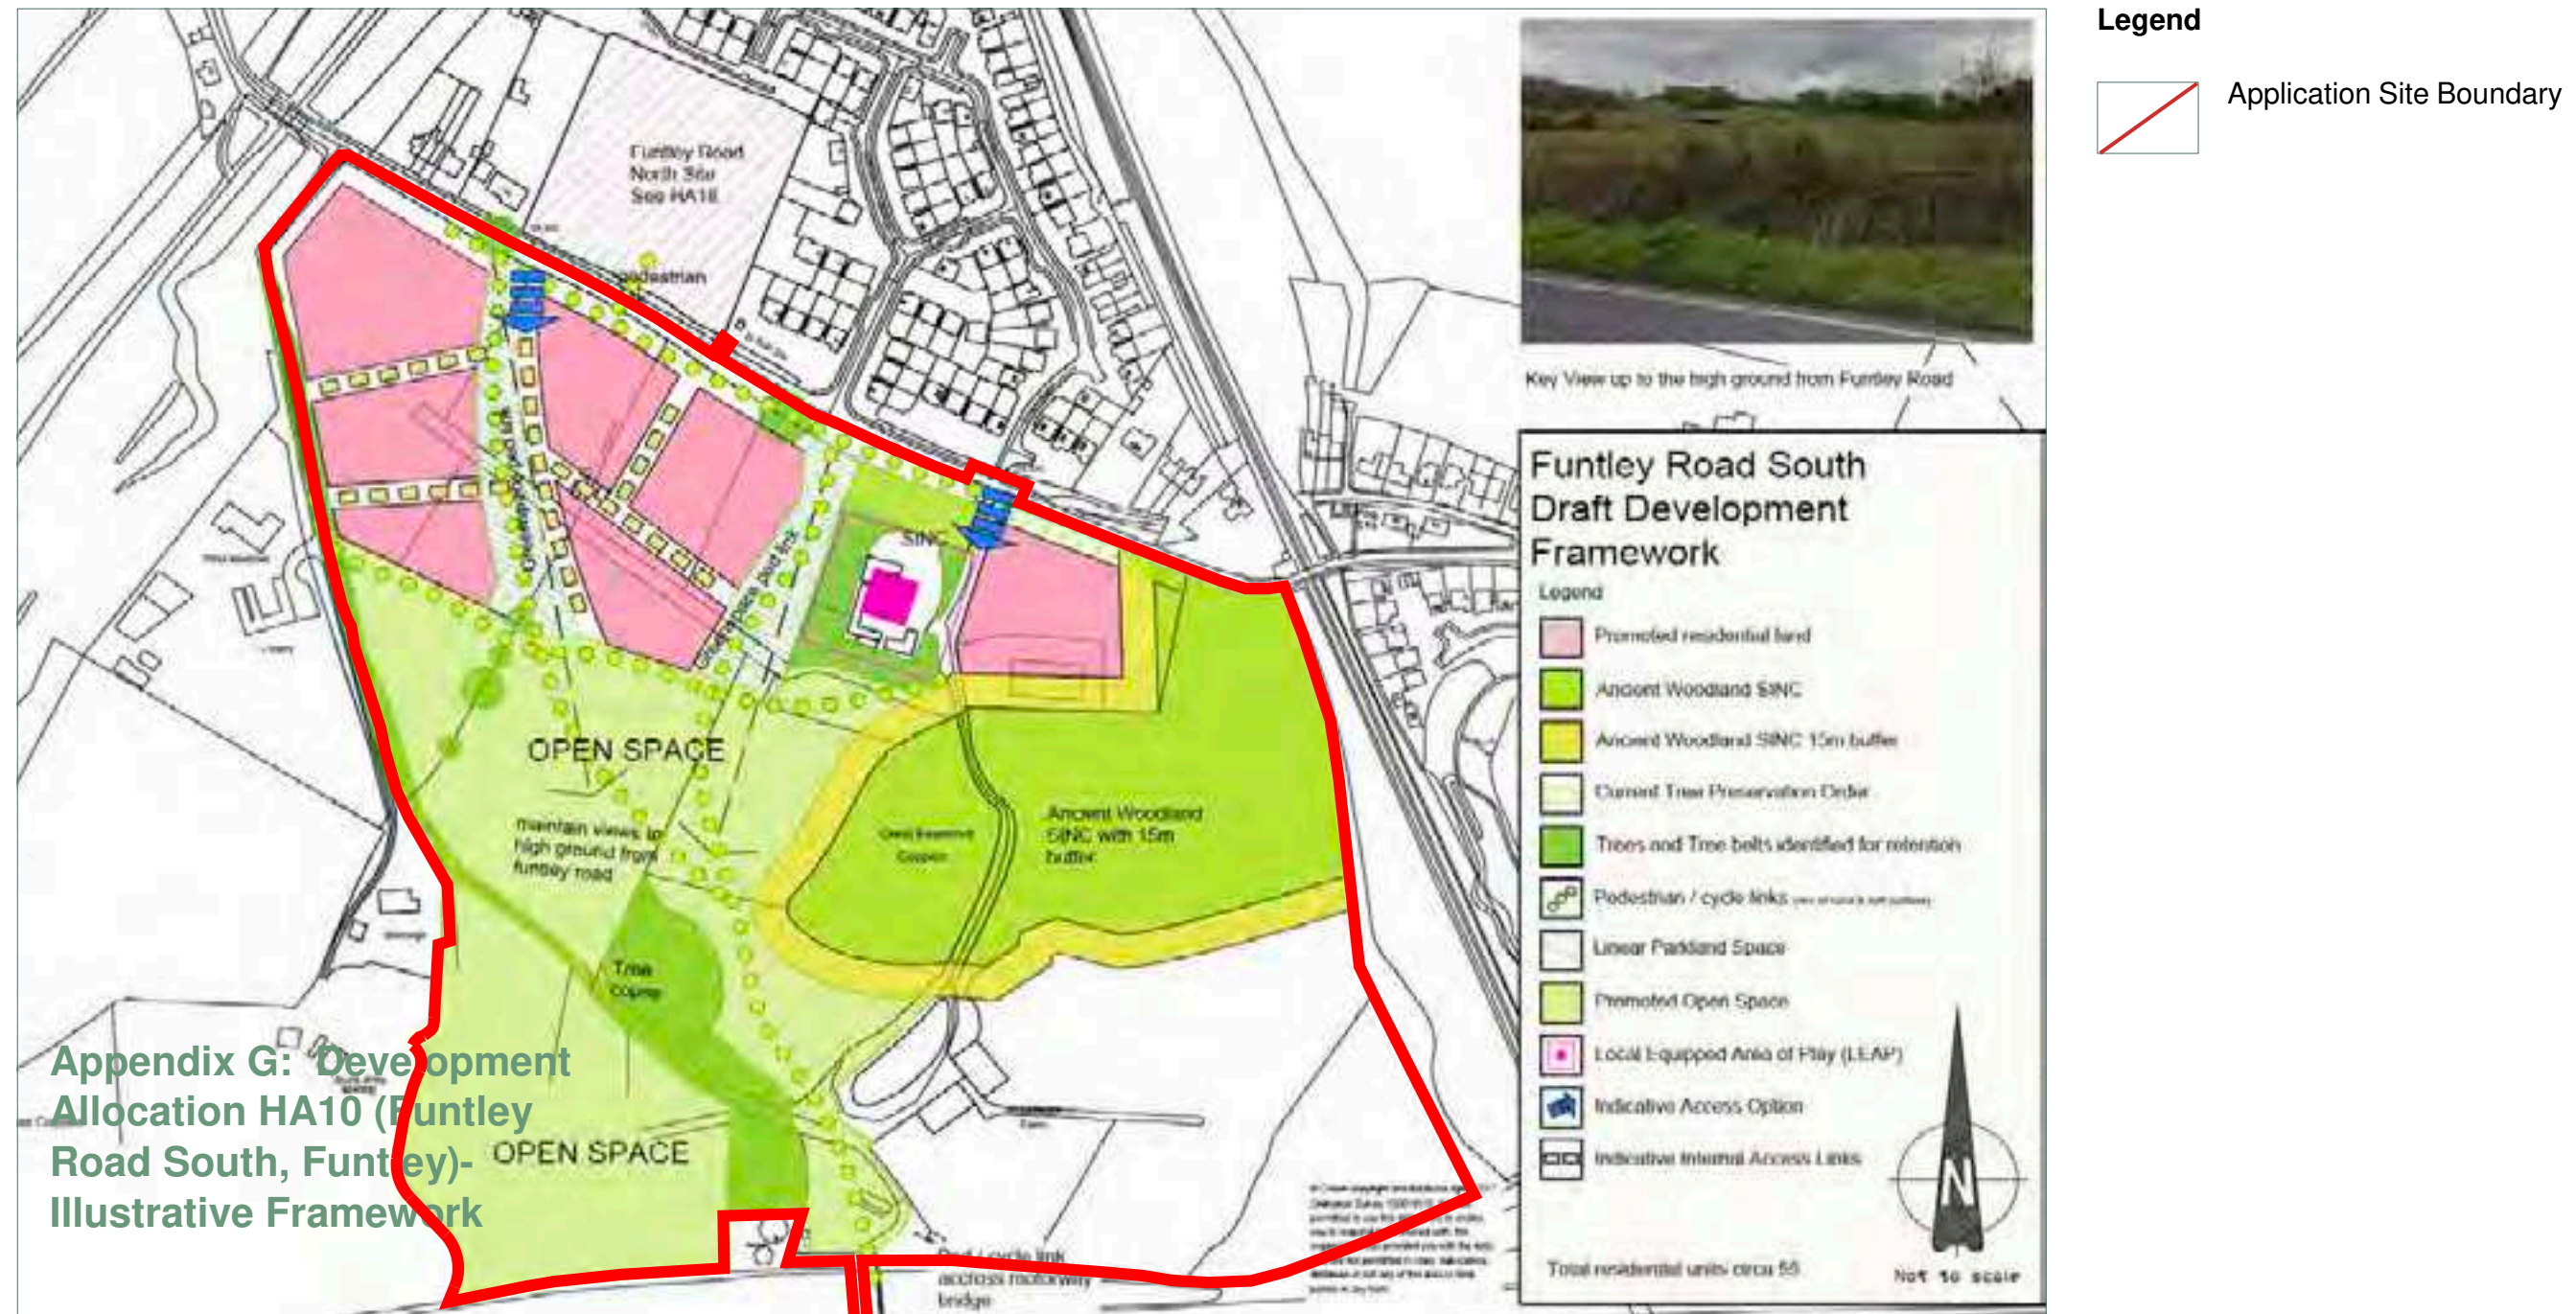

“Development proposals will be permitted where they:

- a) Respond positively to and be respectful of key characteristics of the area, including heritage assets, landscape, trees and landscape features, scale, spaciousness, form and the use of external materials;...*

In all instances proposals shall have regard to the adopted Borough Design Guidance SPD.”

In addition to the allocation pertaining to the Site, land to the north of Funtley Road (Funtley Road North Site HA18) is subject to an allocation for around 23 dwellings on land around 0.96ha in size (see Figure 2.4).

2. Baseline Conditions

Appendix G: Development Allocation HA10 (Funtley Road South, Funtley)- Illustrative Framework

Figure 2.4 – Plan illustrating Development Allocation HA10 from the emerging Fareham Borough Council Local Plan 2036 (Draft Consultation Version)

2. Baseline Conditions

2.4 Introduction

The following paragraphs describe the landscape receptors firstly at contextual level and secondly at Application Site level.

2.5 Topographic Context

The topography of the study area is illustrated on the plan opposite in **Figure 2.5**.

Within the northern part of the study area, two major ridgelines predominately run in a broadly east to west orientation and stretch across the northern and north-eastern section of the study area. The heights are varied and reach approximately 50m AOD to Sager's Down located to the north west of the village of Knowle.

The River Meon runs in a north-east to south-west direction across the central part of the study area. It creates a large area of valley floor between the major settlement of Fareham and smaller suburb communities and villages to the west of the study area. To the east of the study area, the eastern section of the M27 motorway with the easternmost part of Fareham sits on the valley floor, which is formed by the Wallington River to the east of the study area.

The Application Site sits on the south-western fringe of Funtley village. The southern part of the Application Site lies on a ridgeline reaching approximately 55m AOD. The topography then falls towards Honey Lane to the west and Funtley Road to the north.

The value of this landscape receptor is assessed as ranging from **Low - Medium**.

2. Baseline Conditions

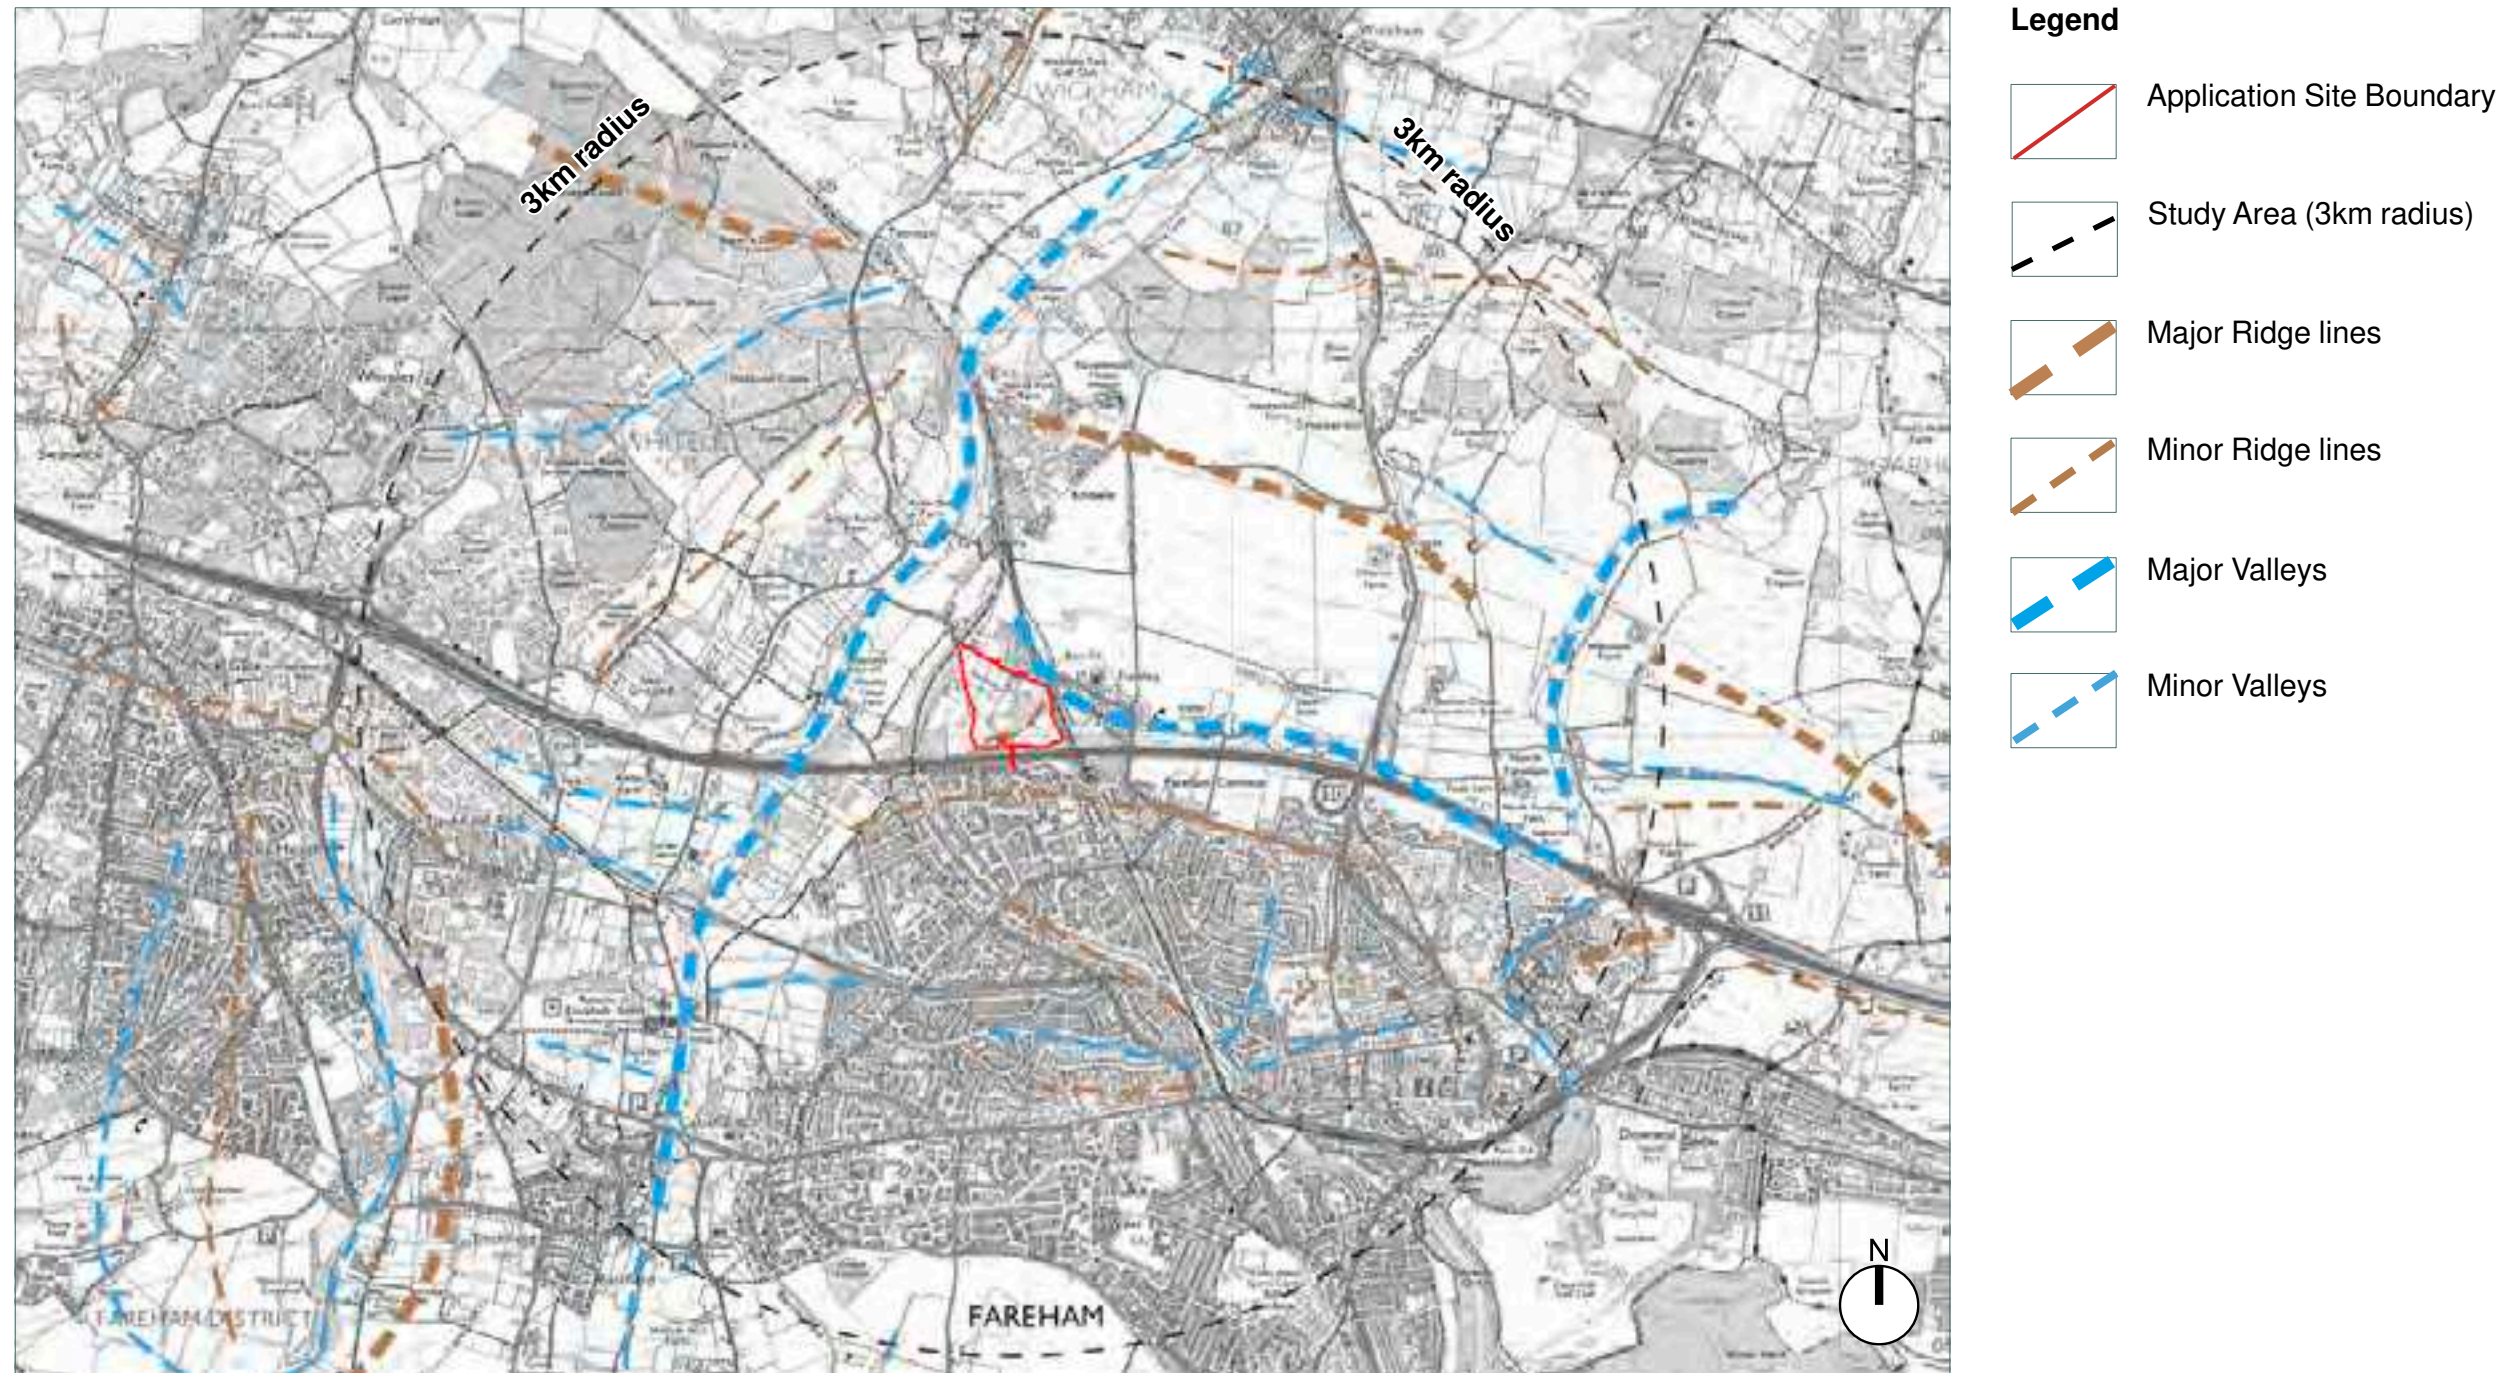

Figure 2.5 – Plan illustrating Topography and Drainage (fabrik, 2018)

2. Baseline Conditions

2.6 Contextual Landscape Elements

Broad Land Use and Land Cover:

Land cover across the northern part of study area is predominantly agricultural. A number of woodlands within the study area are either Ancient or Re-planted Woodlands. The Ancient Re-planted Woodland of Great Beamond Coppice is located within the north-eastern section of the Application Site.

The Great Beamond Coppice and the tree blocks within central northern and south-western section of the Application Site are also designated as Site of Importance for Nature Conservation (SINC) and are covered by a Tree Preservation Order (TPO).

Field patterns within the study area are predominantly of small to medium scale and bounded by dense hedgerows, trees and enclosed rural lanes. The settlement of Fareham and its associated suburban areas dominates the southern part of the study area, whilst the village of Knowle is located to the north east of the Application Site. A number of smaller settlements and farmsteads are also scattered across the study area.

There are a series of locally designated Historic Park and Gardens present within the study area. Uplands is located approximately 1.5km to the south east of the Application Site, whilst the Bishopswood is located approximately 1.9km to the south east.

Additionally, the Scheduled Ancient Monument of Funtley Iron Works, with a group of Grade II Listed buildings including Ironmaster's House and Funtley House, are situated approximately 500m to the south west of the Application Site along the Ironmill Lane.

The value of this landscape receptor are assessed as ranging from **Low - Medium**.

2. Baseline Conditions

Figure 2.6 – Plan illustrating land use within the study area (fabrik, 2018).

2. Baseline Conditions

2.7 Contextual Public Rights of Way

A series of public footpaths, bridleways with long distance trails are present across the study area.

Public footpaths 85, 513a, 513b, 513c and 513d traverse the landscape to the north east of the Application Site and provide connectivity between Lakeside, Funtley Road and Totsome Cottage to the north. Bridleway 515 to the north west of the Application Site connects Funtley Road and Mayles Lane to the north-west, over the M27 to the south west. To the south of the Application Site footpath 91 runs in a north west - south east direction along the M27 and creates the connection between bridleway 82 to the west, Red Barn Lane and Highlands Road to the south east.

The long distance walk of Allan King Way is located at the south-eastern edge of the study area, approximately 3.63km to the south east of the Application Site. This route provides the connection between the eastern fringe of Fareham to the wider landscape via Paradise Lane to the north east and Downend Road to the south east.

The value of these landscape receptors are assessed as ranging from **Medium - High**.

2. Baseline Conditions

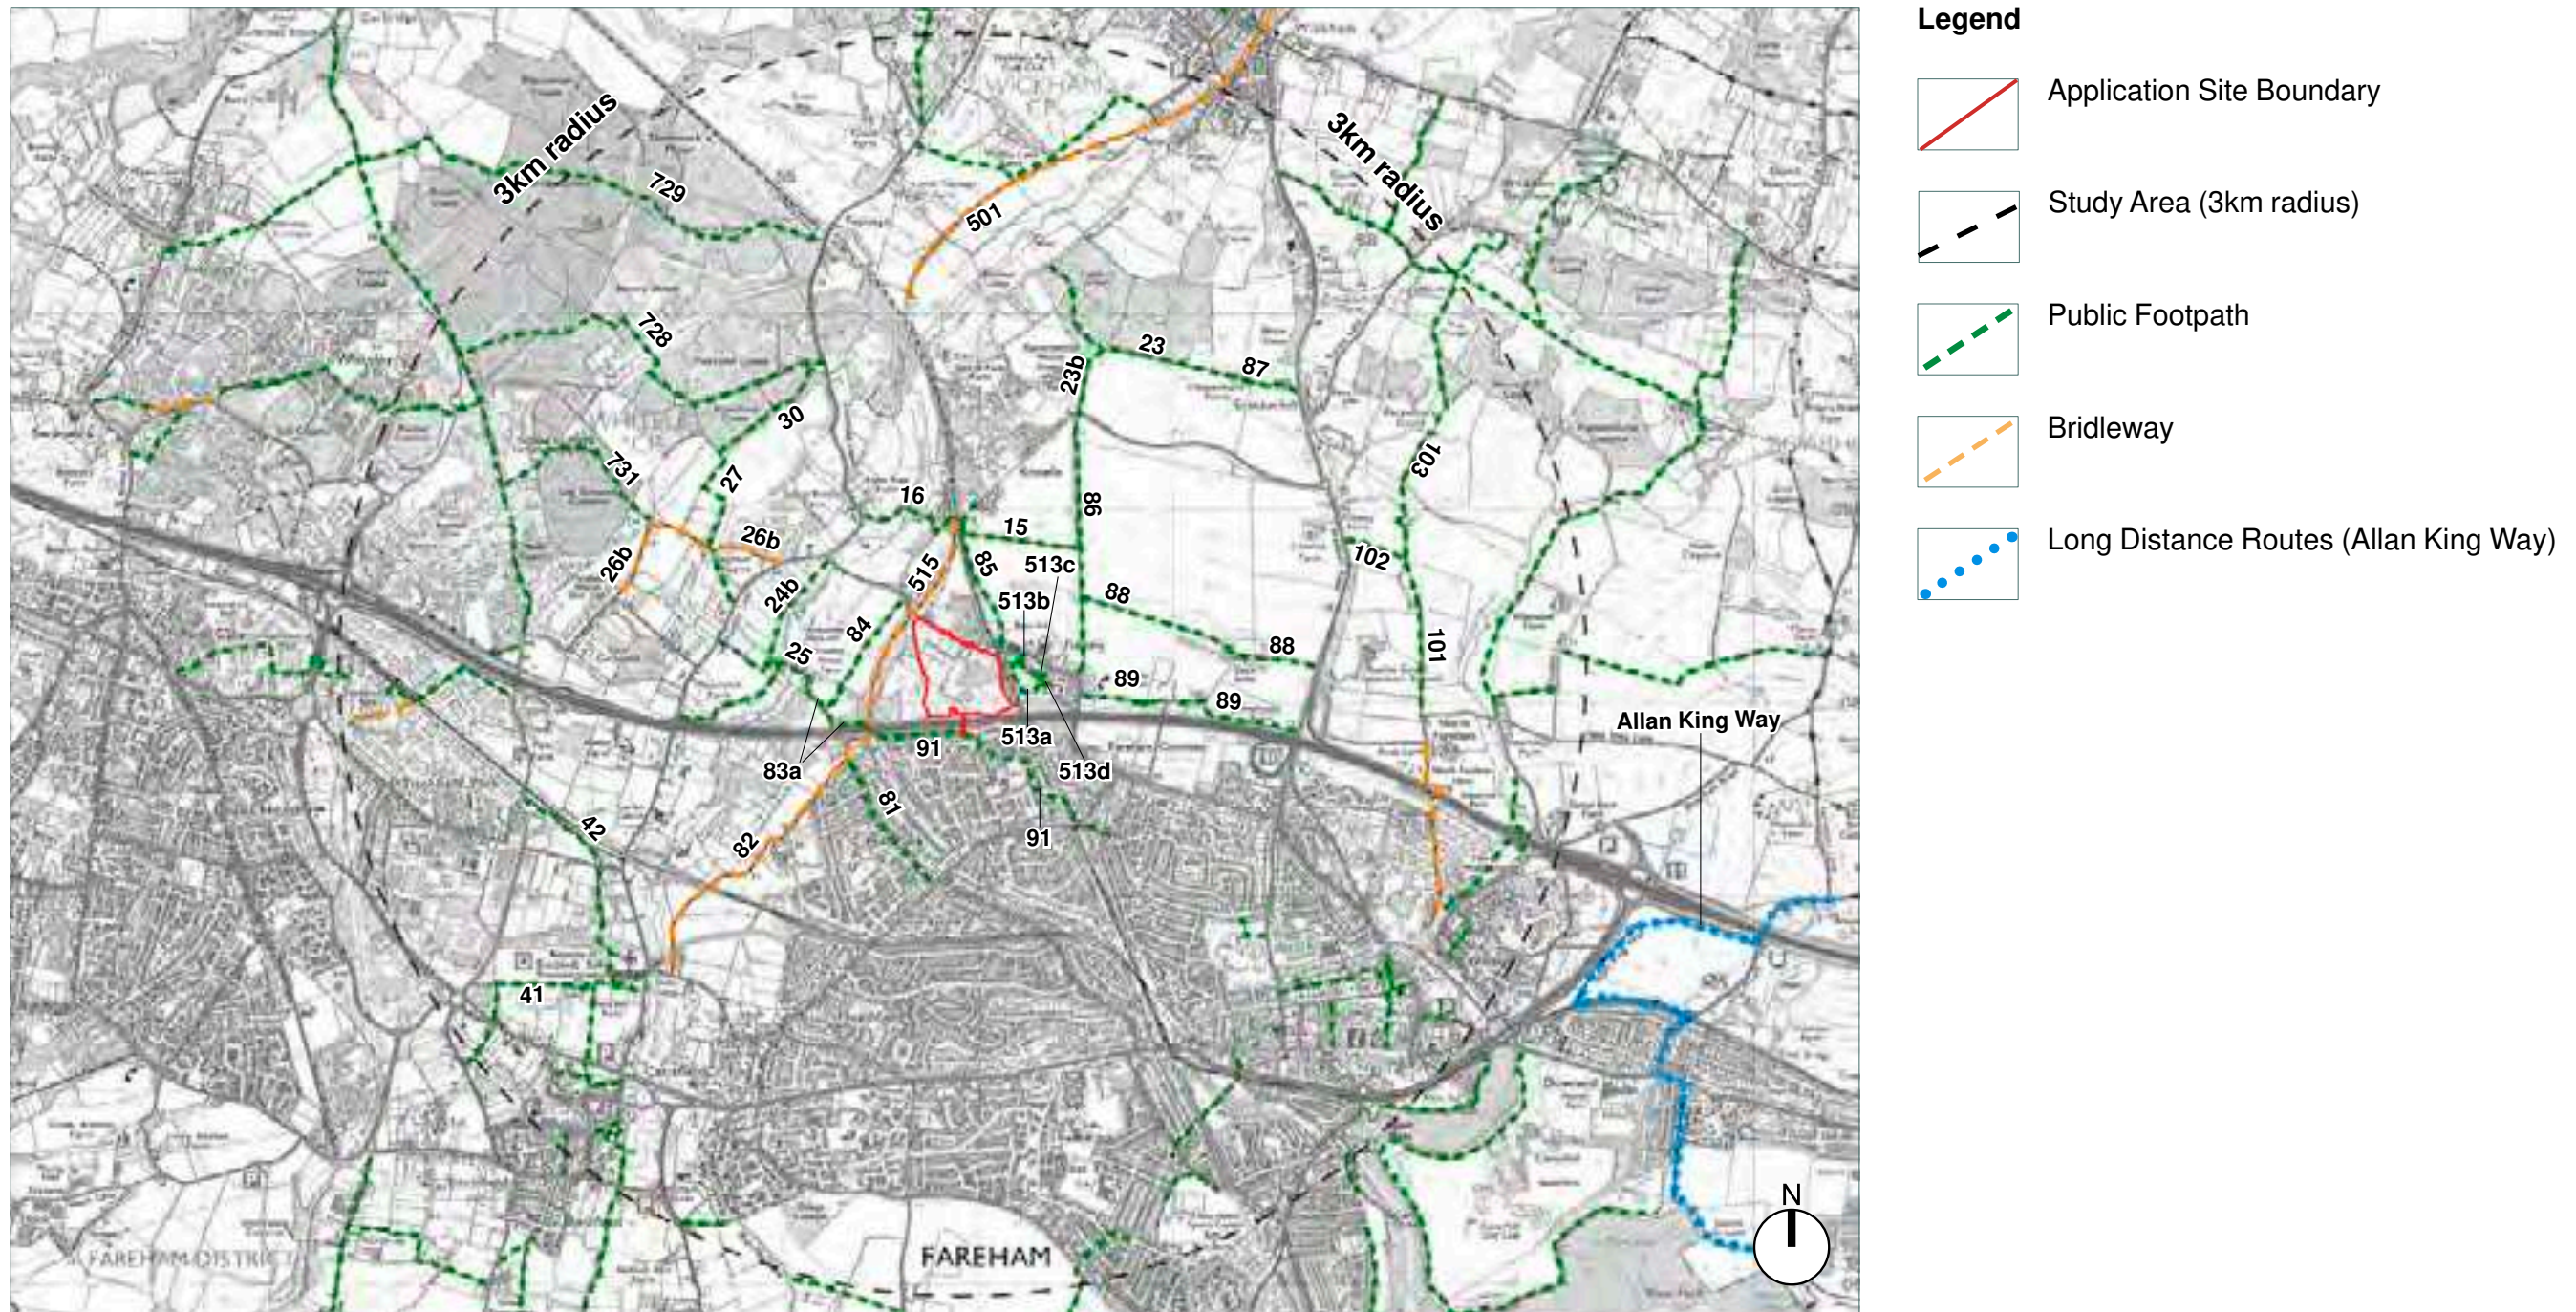

Figure 2.7 – Plan illustrating public rights of way and long distant routes within the study area (fabrik, 2018).

2. Baseline Conditions

2.8 Contextual Movement Corridors

The M27 motorway is the major transport link crossing the study area in an east - west orientation immediately south of the Application Site. The A32 (Wickham Road) and A27 are the primary links from the M27 into Wickham to the north and Portchester to the east.

The secondary and tertiary roads provide connections between Fareham and smaller villages such as Funtley and Knowle. Within the immediate setting of the Application Site, Funtley Road runs along the northern boundary and connects to Tichfield Lane to the north and Kiln Road to the south.

The nearest mainline railway station to the Site is approximately 2km away in Fareham to the south-east. It provides train connections to London Waterloo, Portsmouth and Southampton.

The value of the movement corridors as a receptor are assessed as ranging from **Low - Medium**.

2. Baseline Conditions

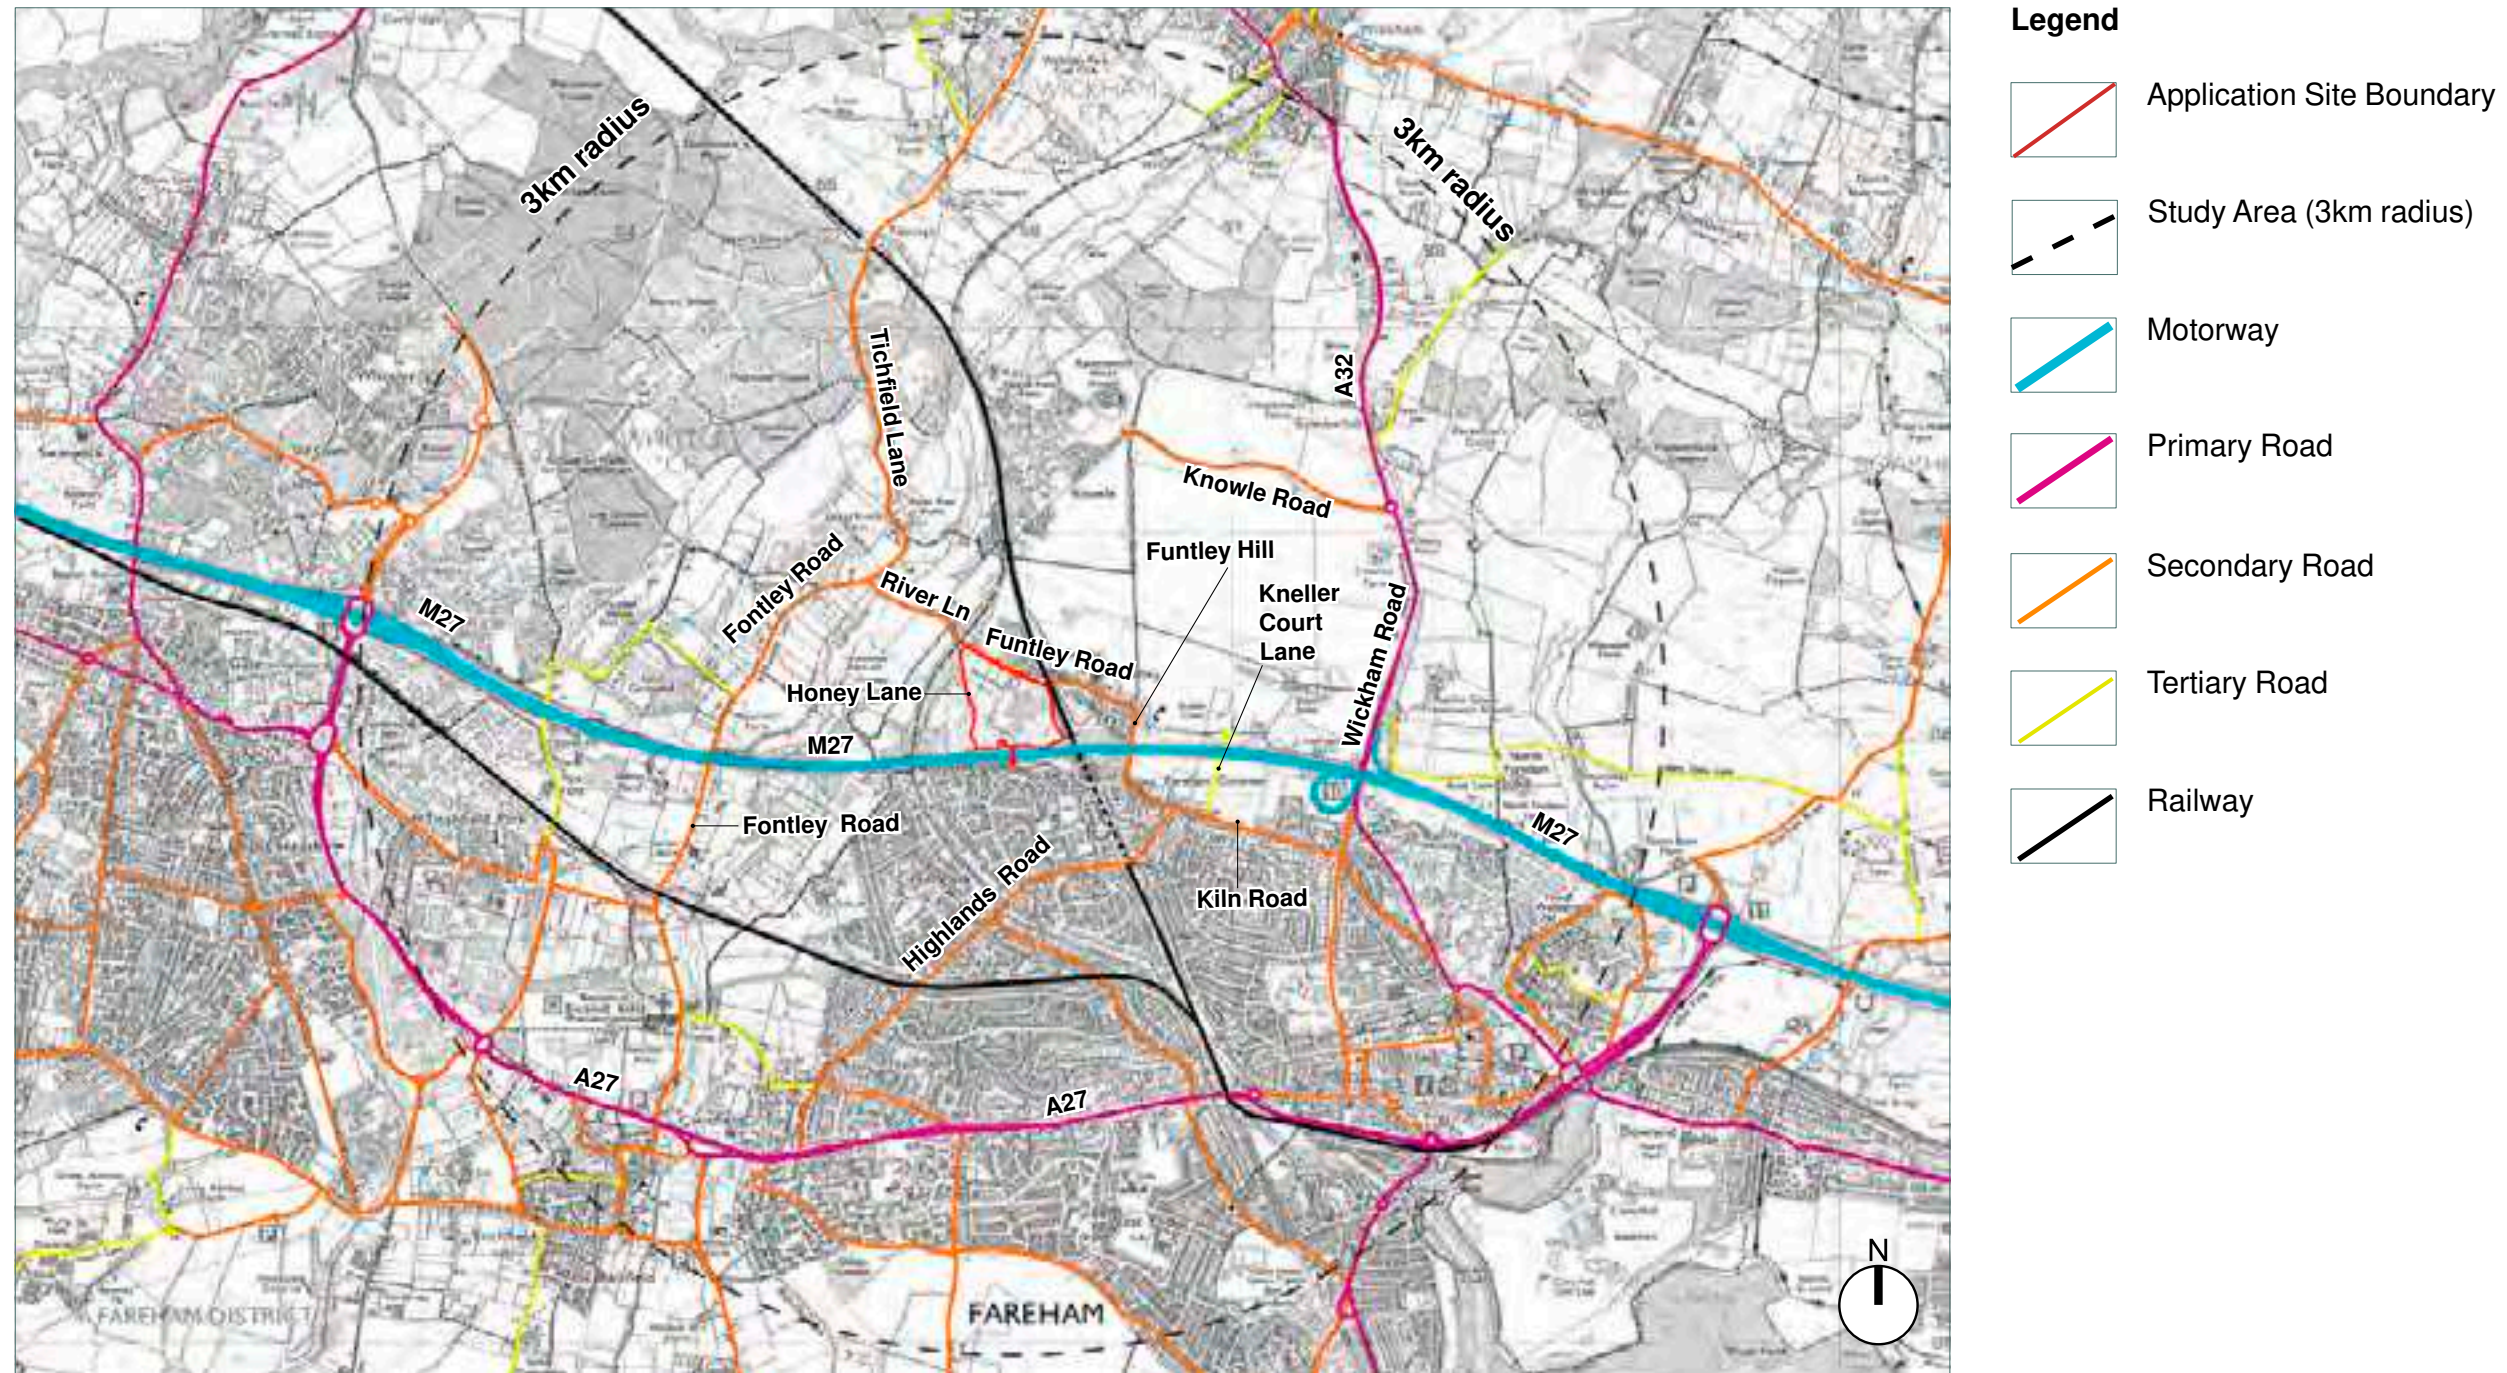

Figure 2.8 – Plan showing transportation links and road network within the study area (fabrik, 2018).

2. Baseline Conditions

2.9 Landscape Character Context

Introduction

The term 'landscape' commonly refers to the view or appearance of the land as perceived by people. Landscape applies to any natural, rural, urban, peri-urban areas, in land, water and seascape areas.

Landscape character is the combination of both natural / physical, cultural / social and perceptual / aesthetic influences, which give rise to a distinct, recognisable and consistent pattern of elements in the landscape that makes one landscape different from another, rather than better or worse and which define the 'sense of place'. The landscape is not therefore simply a visual phenomenon.

The following sections set out the landscape character framework of the study area from the national and regional level through to county and district scale based upon existing character assessments undertaken by Natural England, Hampshire County Council and Fareham Borough Council.

National Landscape Character Assessment

The general character of the English countryside has been described at a national level in the Natural England publications 'National Character Area Profiles'. The Application Site is located in National Character Area 128: South Hampshire Lowlands (2014). Refer to **Figure 2.9**.

The summary of the landscape character related to the study area is described below:

"The South Hampshire Lowlands National Character Area (NCA) is a low lying plain between the chalk hills of the Hampshire and South Downs and Southampton Water. Its highest point is an outlying chalk ridge – Portsdown Hill – but the bedrock geology is mostly open marine, estuarine and freshwater Tertiary deposits. The NCA

is dominated by the city and port of Southampton and its adjoining towns and suburbs – 29 per cent of the area is urban. In the more rural areas, it is a mixture of farmland, particularly pasture, and woodland.

Some 18 per cent of the land cover of the NCA is woodland, of which almost half is designated ancient woodland, a legacy of the Forest of Bere, a Royal Hunting Forest that once covered the area. Today the most significant blocks of woodland are West Walk near Wickham, Botley Wood at Swanwick and Ampfield Wood near Romsey.

The NCA is drained by several rivers: the lower reaches of the Test and Itchen, the source and headwaters of the Hamble and the middle section of the Meon....."

The key characteristics pertinent to the study area are described as:

- *"Low-lying, undulating plain abutting the chalk downs to the north... Soils over much of the area are heavy and clayey with localised pockets of more freely draining soils on higher land.*
- *Fast-flowing chalk rivers in wide, open valleys with watermeadows and riparian vegetation that provide valuable wildlife habitats...*
- *Well-wooded farmed landscape (particularly to the east of Southampton), characterised by ancient woodland such as Botley Wood and West Walk.....*
- *Mixed agricultural landscape dominated by pasture with small pockets of horticulture and arable.*
- *An intimate and enclosed field pattern with many small and irregular fields generally bounded by mixed-species hedgerows or woodland.*
- *In parts, a very urban NCA dominated by the city and port of Southampton and other large towns such as Waterlooville and*

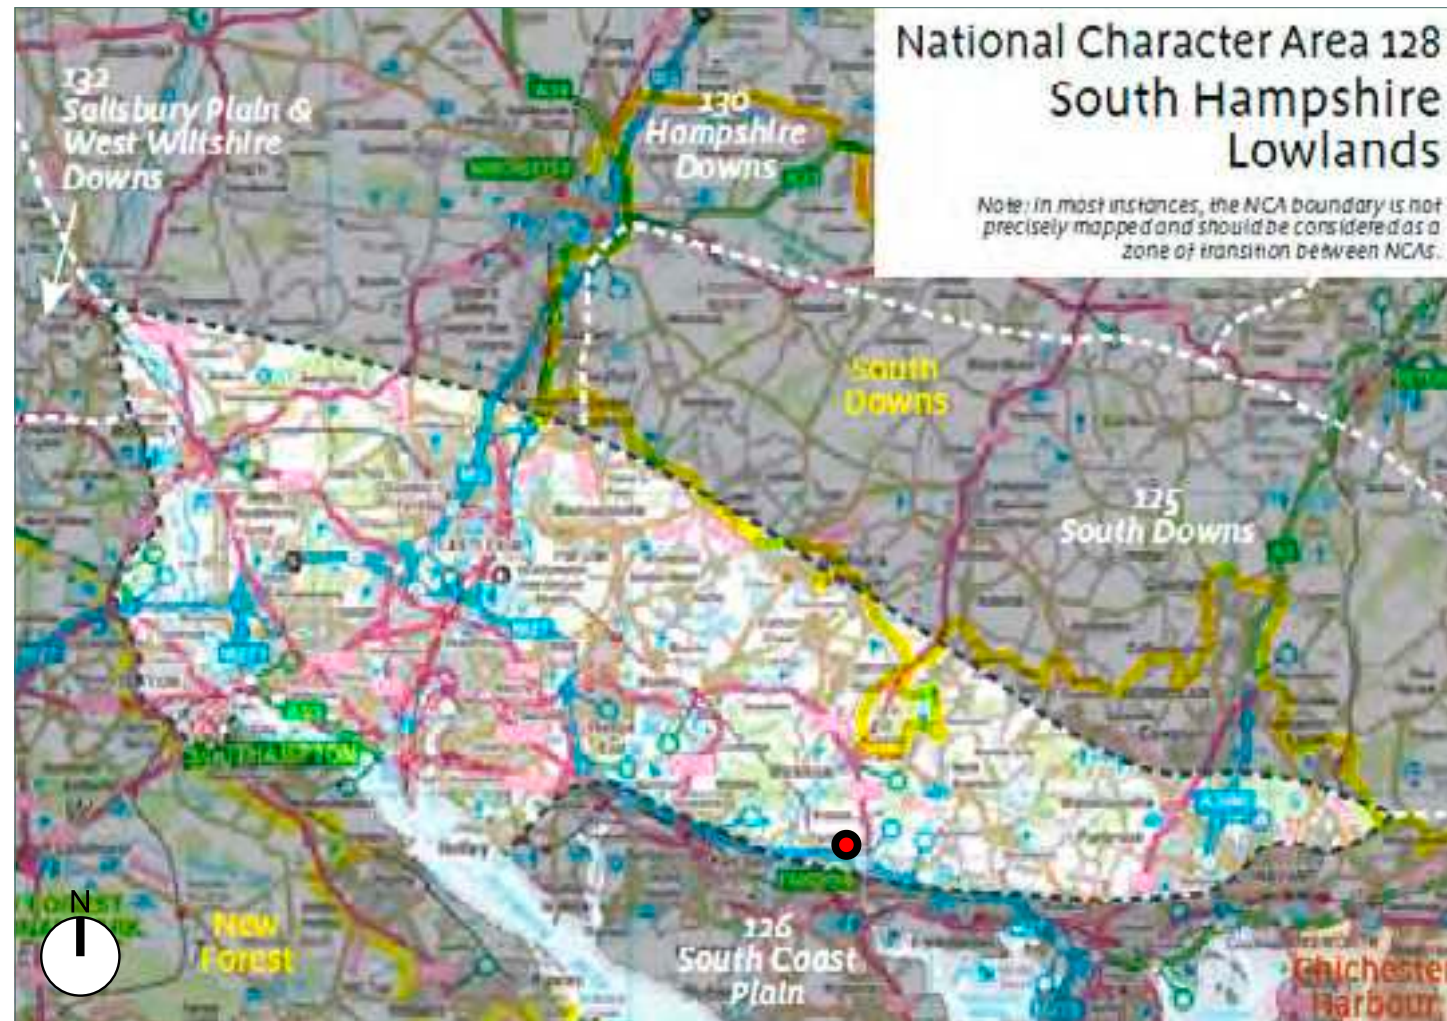

Havant. The more rural hinterland is characterised by small, loosely clustered or dispersed settlements, intermixed with isolated farmsteads.

- *Fragmented by major transport links, including the M3 to London and the M27 to Portsmouth which cross the NCA.*

The Site is partly typical of the description for the NCA, forming part of farmland at the fringe of a major urban area. The context to the Site also includes major transport links, as well as dispersed settlements and a wider more rural agricultural landscape.

The value of this landscape receptor is assessed as ranging from **Low - High**.

2. Baseline Conditions

**Legend**

Approximate Location of the Application Site

Figure 2.9 – Extract from National Landscape Character Area Map (Natural England, 2014)

2. Baseline Conditions

2.9 Landscape Character Context (continued)

County Landscape Character Assessment - 3E: Meon Valley

Within the Hampshire County Council Integrated Landscape Character Assessment (May 2012), the Application Site falls within LCA 3E: Meon Valley character area. Refer to **Figures 2.10 and 2.11**. The key characteristics pertinent to the study area as described as:

- *“A fairly narrow major river valley with a relatively narrow valley floor, which passes through downland, lowland mosaic and coastal plain landscapes.*
- *Southern valley sides are indented by dry valleys and scarp faces in the downland section.*
- *Increasing proportion of grazing and improved grassland land on the valley sides from the downland to the lowland landscapes.*
- *Woodland is common on the steeper slopes and is a particular feature where the Meon passes through the lowland mosaic and coastal plain landscapes.*
- *Major communication links follow close above the valley floor, eg A32, B3334 and the disused Meon Valley railway (now a recreational route).*
- *Extensive informal enclosure field patterns and significant water meadow (fairly simple layout) survive in the downs section while assarts and formal parliamentary enclosures dominate the lowland mosaic section.*
- *Strong pattern of nucleated settlements within the valley at strategic river crossing points with relatively little 20th century expansion.*

The physical character and land use related to the study area sets out that:

“... The Meon Valley can be divided into upper, middle and lower reaches associated with changing geology and landform of the downs, lowland clay and coastal plain respectively...”

The middle section (Soberton Heath to just north of Titchfield Abbey) is characterised by the presence of waterlogged soils associated with London clay. Sandier lighter soils do occur in association with the Wittering formation either side of the Meon around Wickham. The valley sides are generally a shallower gradient than in the downland setting and the valley width is narrower. Improved grassland and dairying predominate and there is a greater presence of semi and unimproved grassland on the valley bottom and woodland cover on the sides...”

The experience and perceptual character related to the study area is summarised as one where: *“The Meon Valley is full of contrasts and diversity. The downland section and lower reaches of the coastal section tend to be open landscapes whilst the opposite is true of the section in the lowland mosaic landscape. The course of the Meon valley is very distinct when viewed from the surrounding downland, appearing deceptively wooded in comparison to the surrounding chalk landscape. The river valley channel is rarely glimpsed amongst the heavily wooded landscapes in the lowland mosaic landscape.*

There are numerous opportunities for public access along and through the Meon Valley, including sections of several long distance routes such as the Wayfarer’s Walk, Monarch’s Way, South Downs Way and Solent Way. There is also a disused single rail track which linked Fareham, Wickham and Alton which today provides a popular, relatively flat multi user route.

The valley landscape has largely resisted expansion from adjoining urban areas and has remained relatively unchanged in recent times. As a result there is a strong sense of ruralness, seclusion, and

intimate landscape character and lack of development where the valley cuts through the south Hampshire clay lowlands. In the section where the A32 runs through the valley it is generally less tranquil than the surrounding downland landscape....”

The ‘Biodiversity Character’ is summarised as: *“... Beyond specific designations this landscape character area comprises improved grassland and arable land with patches of unimproved and semi-improved grassland (neutral or calcareous) and are often associated with the river, suggestive of water meadows. Woodlands form discrete patches within this landscape, ranging in size and type there are broadleaved woodlands, mixed plantations and parkland, some limited coniferous plantation and active coppice with standards. Ancient woodland is very limited in this landscape...”*

The Site is partly typical of the description for the county LCA, forming part of a valley that contains grazing land and woodland, with a nearby disused railway and public rights of way. The immediate Site context includes areas of relatively recent development and this and the Site is subject to some noise intrusion from the M27.

The value of this landscape receptor is assessed as ranging from **Low - High**.

2. Baseline Conditions

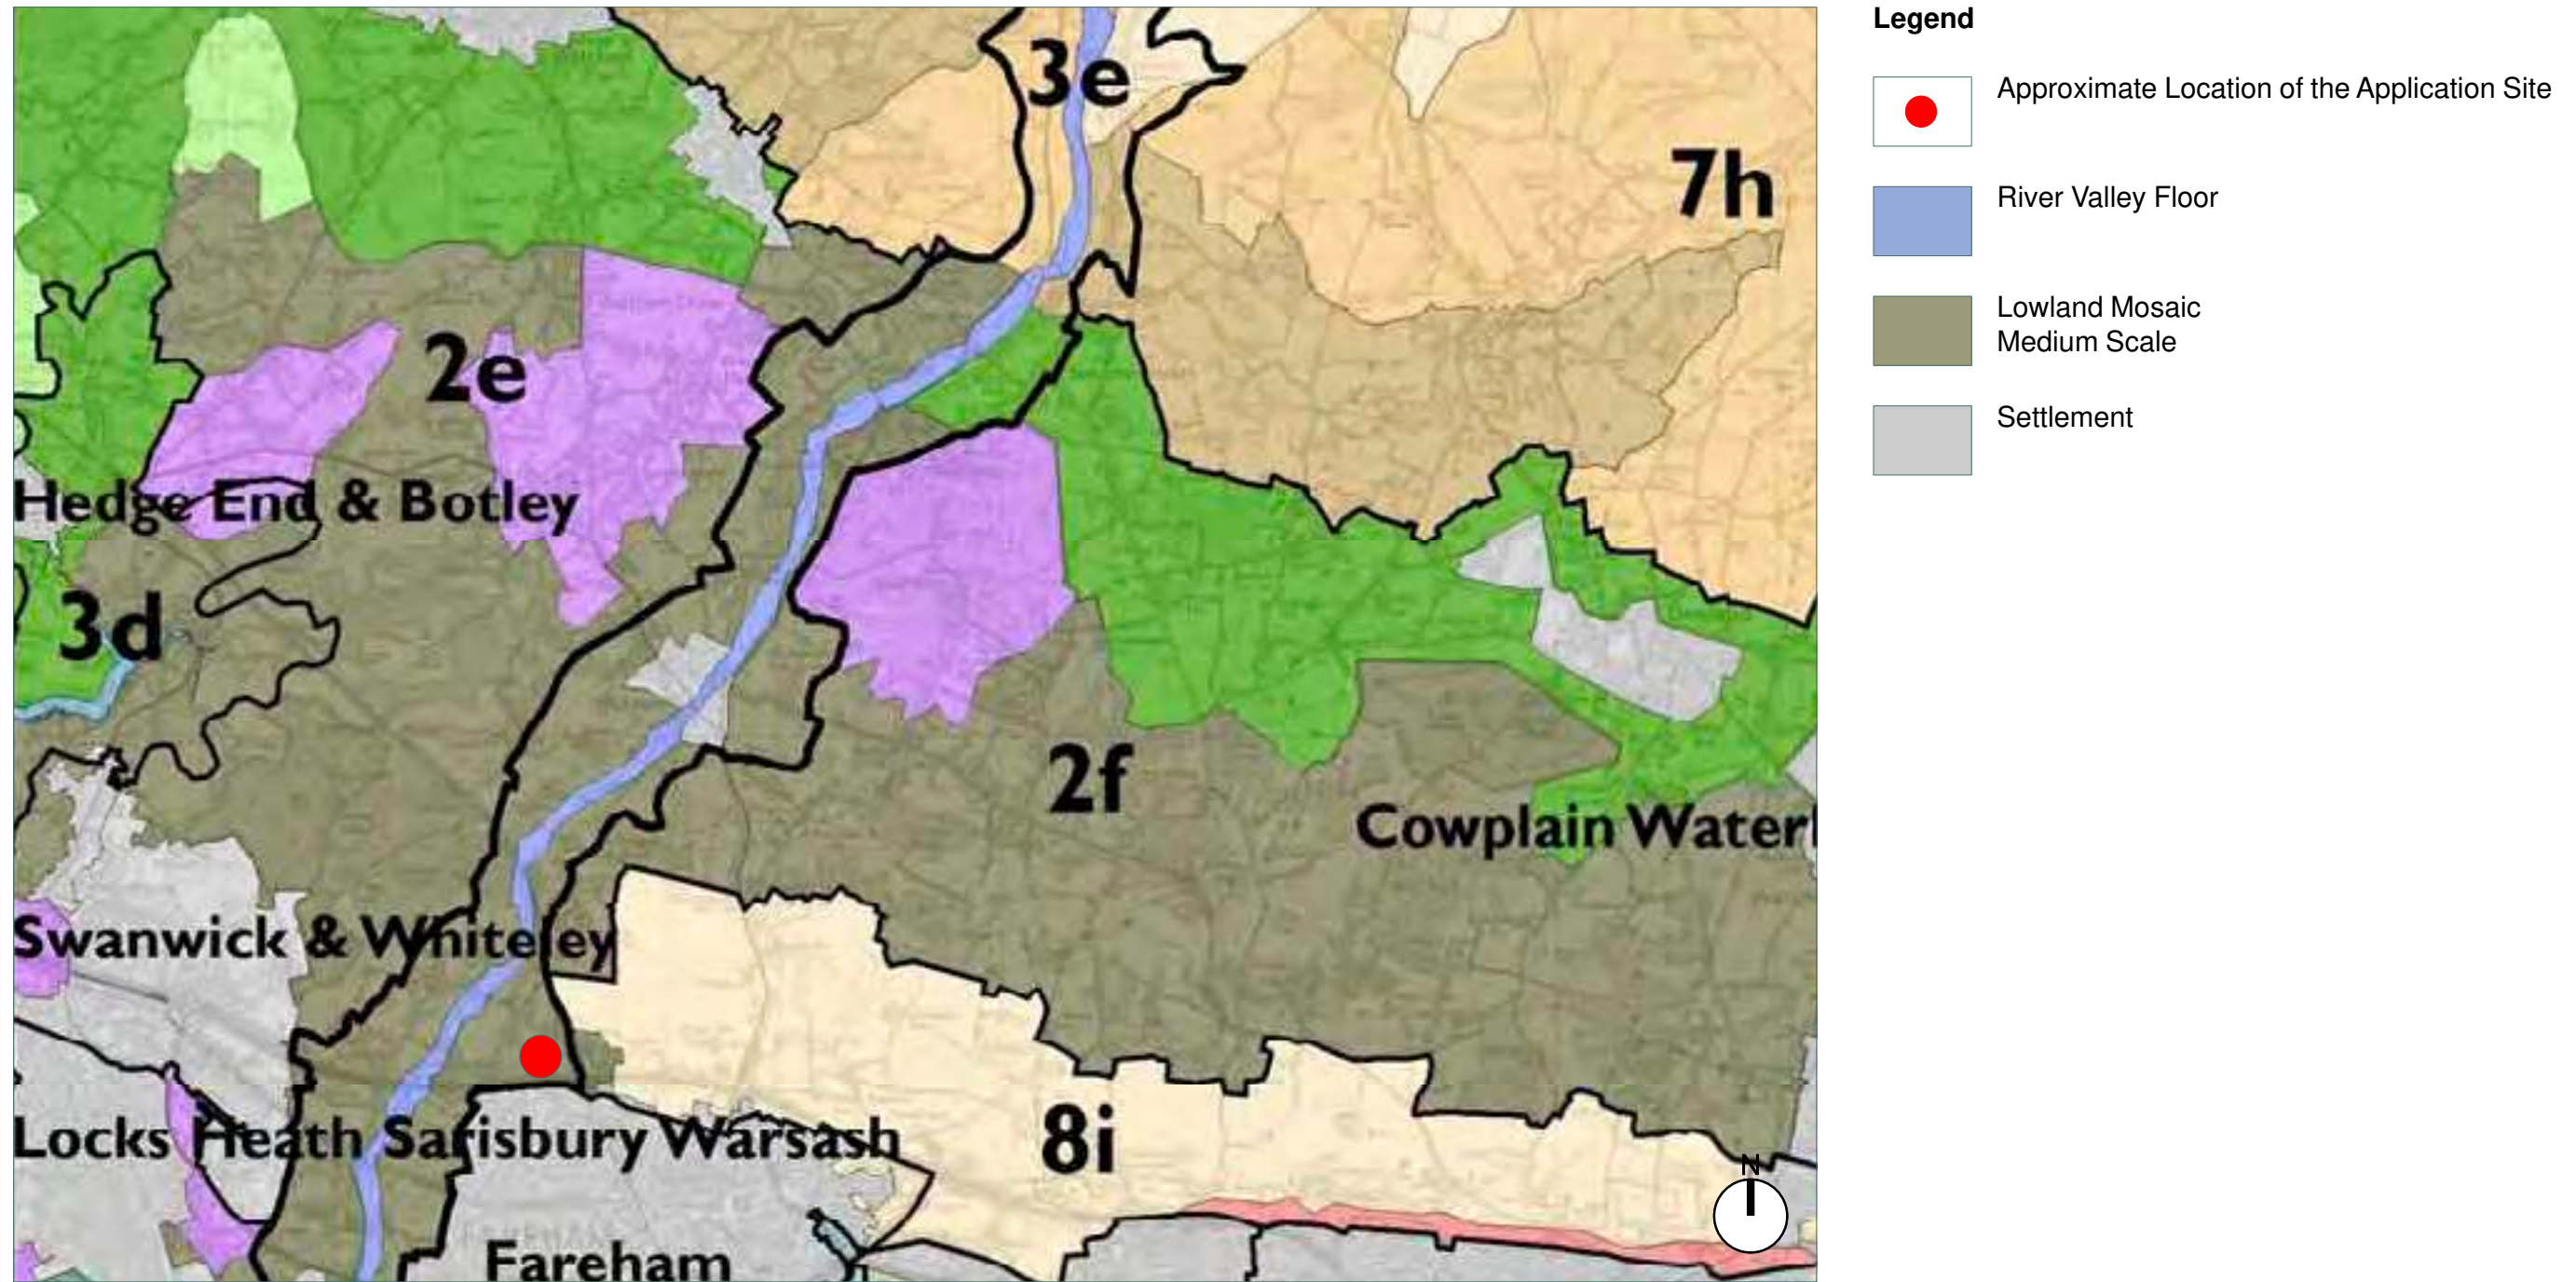

Figure 2.11 – Extract from Hampshire County Council Integrated Character Assessment Map (May 2012) showing the landscape character areas.

2. Baseline Conditions

2.9 Landscape Character Context (continued)

Local Level

Current Fareham Borough Landscape Assessment (May 1997)

This borough wide landscape character Assessment was carried out by Scott Wilson Resource Consultants for Fareham Borough Council in 1996 and covers both rural and urban areas.

Landscape Characters

Within Fareham Borough the assessment subdivides the landscape into 35 character areas (refer to **Figure 2.12**).

The Application Site is located entirely within the Landscape Character Area 6: Meon Valley. The character area is summarised as an area where:

“The Meon Valley character area embraces the whole length of the valley within the Borough, from Funtley in the north to the coast at Titchfield Haven. Although the immediate floor and valley sides are quite narrow in places, the character area embraces a wider swathe of landscape on either side of the valley that broadly defines the extent of open countryside within the corridor between the urban edges of Stubbington, Hill Head and Fareham to the east and Titchfield Village and Titchfield Park to the west.”

The following key characteristics are pertinent to the Application Site and its environs:

- *“a relatively gentle but distinctive valley landform, running through the Borough from Funtley in the north to the coast at Hill Head; Frequent woodland blocks;*
- *distinct valley floor characterised by small-scale pasture and variable cover of trees (typically willow and alder) in the narrower, upper reaches and broadening into open floodplain pasture and*

complex of wetland communities to the south at Titchfield Haven, where the natural qualities of the valley and maritime influences are most strongly evident; Small copses add to wooded character;

- *restricted vehicular access to the valley floor resulting in a generally quiet and intimate character in the northern and southern sections of the valley, making it attractive for quiet recreation and for wildlife;*
- *a mosaic of open farmland (part of the wider coastal plain farmland), minor wooded valleys and smaller, enclosed pastures bordering the valley to the south of Titchfield, the latter helping to buffer the intrusion of adjacent urban development and fringe farmland to the east on the setting of Titchfield Haven;*
- *a more fragmented character and stronger influences of urban development and roads within the central section of the valley, resulting in some damage to the integrity of the valley form and a more suburban character;*
- *garden centre and horticultural activity around Titchfield Abbey which detract from the setting of the historic Abbey and associated buildings (a Conservation Area);*
- *dense mosaic of wooded farmland mainly to the north of the railway which provides an intimate, rural context for the river valley, but with localised intrusion of the M27 motorway bridge.”*

In terms of enhancement opportunities, the assessment at para 4.27 states that: “... the Meon Valley is comparatively unspoilt and of a high quality but it is affected by roads, commercial horticultural activities and urban intrusions, particularly the central section. The emphasis should be to protect the important landscape and ecological resources of the river corridor, mitigate the effects of intrusive activities and undertake measures to reinforce the river valley character and strengthen its overall integrity.”

The priorities for enhancement, relative to the Application Site include:

- *“to protect the important landscape, ecological and historical resources... the pastoral character and features of the valley floor, the complex of wooded farmland...”*
- *to protect the overall integrity of the valley system from further fragmentation;*
- *to resist changes that would have an adverse impact on the rural character of the valley;*
- *to reduce the impact of roads, urban edges and horticultural development, possibly through new planting.”*

2. Baseline Conditions

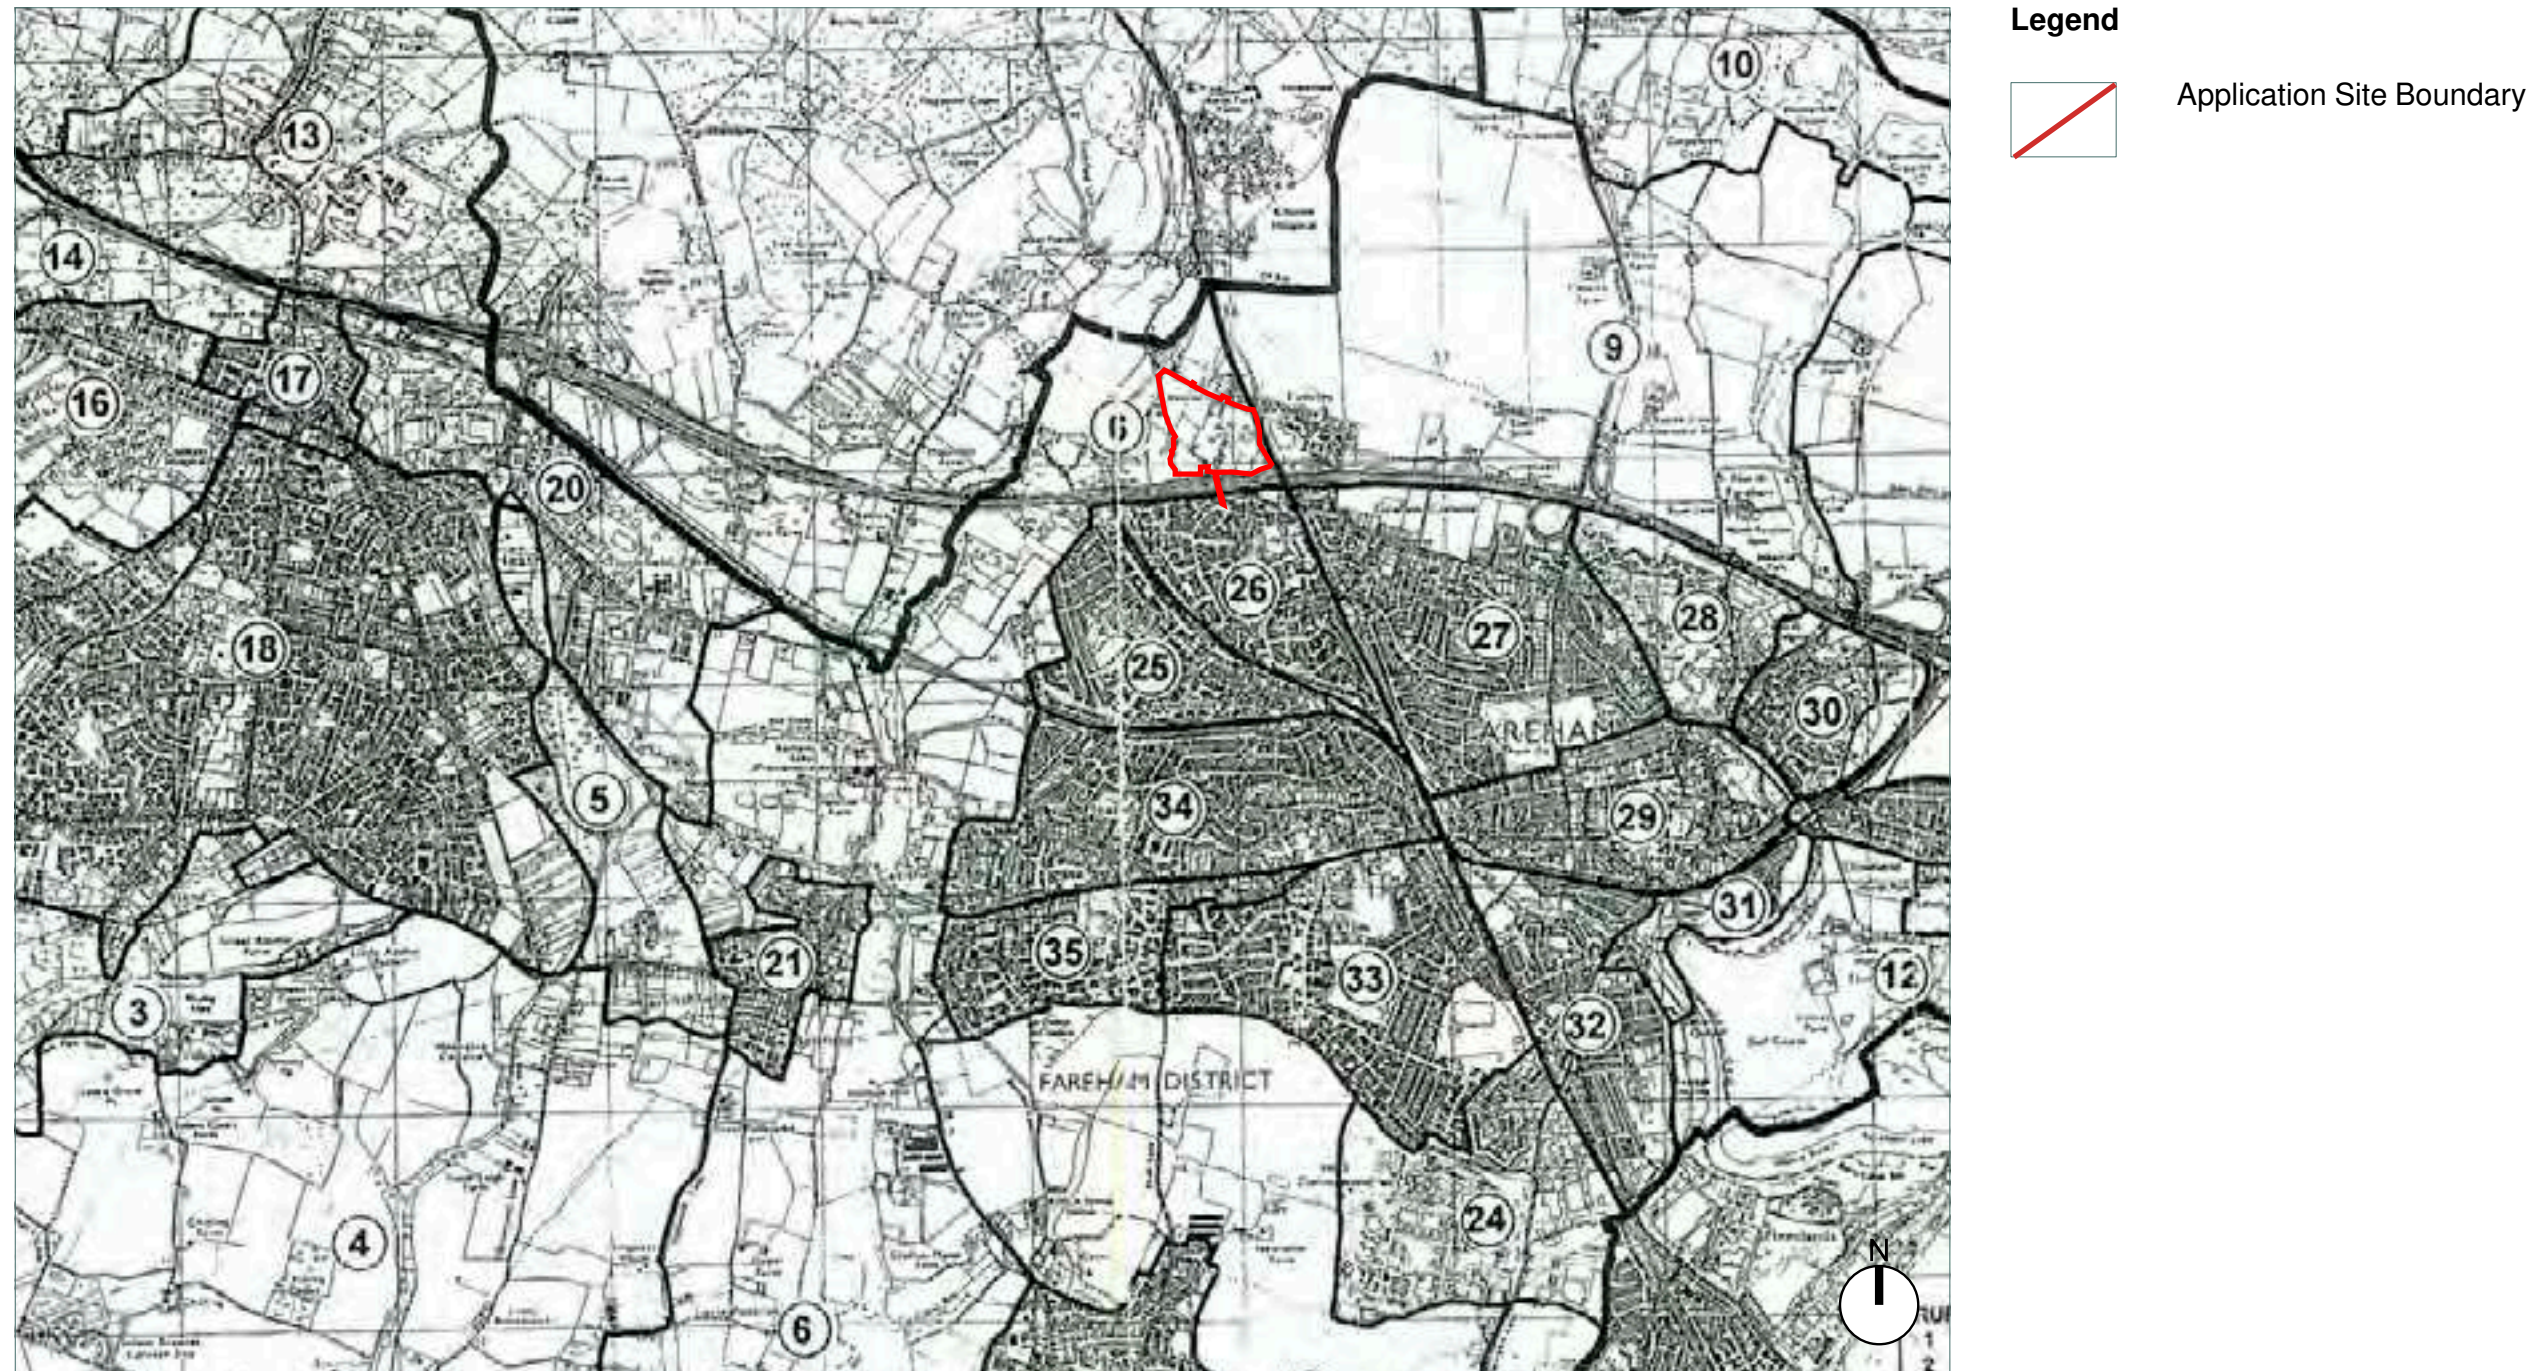

Figure 2.12 – Extract from Fareham Borough Landscape Character Assessment (May 1996) illustrating character areas.

2. Baseline Conditions

2.9 Landscape Character Context (continued)

Landscape Assessment (August 2017) Evidence Base to the Fareham Borough Council Local Plan 2036

As part of the evidence base to the emerging Local Plan, the Landscape Character Assessment has been updated. Part 1 includes the character assessment, with a landscape Sensitivity Assessment at Part 2.

In the updated assessment, the Application Site continues to be located in LCA 6: Meon Valley and within the Mixed Farmland and Woodland: Small Scale landscape type. The following extract is pertinent to the Application Site:

“The Meon Valley character area embraces the whole length of the valley within the Borough, from Funtley in the north to the coast at Titchfield Haven. Although the immediate floor and valley sides are quite narrow in places, the character area embraces a wider swathe of landscape on either side of the valley that broadly defines the extent of open countryside within the corridor between the urban edges of Stubbington, Hill Head and Fareham to the east and Titchfield Village and Titchfield Park to the west.

The Meon Valley is characterised by:

- A relatively gentle but distinctive valley landform, running through the Borough from Funtley in the north to the coast at Hill Head;
- Distinct valley floor characterised by small-scale pasture and variable cover of trees (typically willow and alder) in the narrower, upper reaches and broadening into open floodplain pasture and complex of wetland communities to the south at Titchfield Haven...;
- A mosaic of open farmland (part of the wider coastal plain farmland), minor wooded valleys and smaller, enclosed pastures...;

- A more fragmented character and stronger influences of urban development and roads within the central section of the valley, resulting in some damage to the integrity of the valley form and a more suburban character;
- Dense mosaic of wooded farmland mainly to the north of the railway which provides an intimate, rural context for the river valley, but with localised intrusion of the M27 motorway bridge.”

In Part 2 of the LCA, in the Sensitivity Assessment, the Application Site lies within Area 6.2 and sub section b, which is described as where: *“...built development also screens public views in from the edge of the Fareham urban boundary to the east.... The motorway cutting and railway corridors prevent views into the northern part of this area from the edge of Fareham and from the main village of Funtley. Wider views from the countryside areas to the north-west of this area are also screened by extensive vegetation cover and intervening landform, road and rail corridors etc...*

Within the area, there are no views from the motorway or rail corridors that cross the valley, and views from much of the road network within the area (including Southampton Road, Segensworth Road and Titchfield Road), are also substantially screened by roadside vegetation or buildings, with only very occasional glimpses. There are, however, some more open views through or over the roadside hedgerows into the river floodplain from Mill Lane, the lower part of Fishers Hill and from Bridge Street, which forms the southern boundary, and from Funtley Road and River Lane in the north.

The main views of the area are obtained from the extensive public rights of way network that runs through the valley landscape... Further routes run parallel to the railway embankment that divides areas 6.2a and 6.2b, and along the valley sides and disused railway line in the vicinity of Funtley to the north. These routes are generally well connected, and offer an appreciation of the various landscape, ecological and historic features within the valley and an opportunity to experience its unspoilt qualities and underlying sense of seclusion. Overall the quality and value of the available views and visual amenity is high, although affected in places by the influence of built

development or unsightly land uses....

The main people who could potentially be affected by changes in views would therefore be local residents, users of the PRow network within the valley... and users of the local road network within the area itself.”

In terms of Visual Sensitivity and Development Potential, the assessment identifies that: *“There are a few small pockets of land which are enclosed by strong hedgerows or vegetation an less visible, and/or lie within areas where views are already affected by built development or intrusive/ unsightly land uses (e.g. small pockets of undeveloped land within existing residential areas off the Funtley Road...) In all cases, any development would need to be small scale and sensitively integrated within the existing or new vegetation structure to avoid adverse visual impacts. Measures to improve the quality of views through the removal of intrusive or unsightly features... should be encouraged.”*

The assessment identifies the following relative to the Contribution to Green Infrastructure Network: *“This area makes a significant contribution to green infrastructure, particularly in respect of the riparian habitats and extensive areas of semi-natural woodland and tree cover within the river corridor (designated as SINC)s which are valuable ecological and landscape features. It also makes a significant contribution through the network of public rights of way that provide access for quiet recreation and appreciation of landscape, ecological and heritage assets... Crucially, this network provides both cross-valley links with the surrounding urban areas and links along the valley to the north and south. In addition to the PRow network, the area includes a few areas of publicly accessible open space, including a recreation ground to the north of the Southampton Road near Titchfield and playing fields, woodlands and the corridor of a disused railway line in the northern part of the area. The Meon Valley*

2.9 Landscape Character Context (continued)

Landscape Assessment (August 2017) Evidence Base to the

2. Baseline Conditions

Fareham Borough Council Local Plan 2036

is identified in the PUSH GI strategy as a 'sub-regional scale blue corridor' and project C6 of the strategy applies to the Upper Meon Valley and seeks "to conserve and enhance this area to ensure continued contribution to sense of place, climate change adaptation, providing open space close to urban areas for recreation and tourism".

The Fareham GI Strategy 2014 proposes a number of GI enhancement projects across the area, the majority of which form part of larger "borough wide" projects that will enhance the area's contribution to the wider GI network. These include:" (relevant to the local area and the Application Site)

"BW6 – General programme for the improvement/ repair of bridges within the rights of way network to ensure the continuation of high quality access to the countryside.

BW10 – Project to create a circular walking route encompassing the Meon Valley Trail, Shipwright's Way and South Down's Way, linking these existing routes together while enhancing their connectivity with the settlements of Fareham and Titchfield and the wider PRow network.

BW13 – Same as the PUSH Project C6 which applies to the whole of the Meon Valley LCA.

In terms of Sensitivity and Development Potential relative to GI the assessment states that: "Existing GI assets (e.g. the mosaic of riparian, grassland and woodland habitats as well as existing PRow and areas with public access) should be protected and, where possible, enhanced to maximise their ecological, landscape and amenity value, and development that would adversely affect them should be avoided. The emphasis in this area is more on making further improvements to the existing access and habitat links along the valley to the north and south, and the GI infrastructure within the urban areas to the east and west."

The conclusions of the study for the 6.2 area are set out under a sub-section, Development Criteria and Enhancement Opportunities. Those aspects pertinent to the Application Site state that: "This is an

area of high overall sensitivity, particularly in respect of the character and quality of the landscape resource, the abundance of valued landscape, ecological and heritage features across a large proportion of the area, its role in preventing the coalescence of settlements and maintaining their distinctive separate identities and landscape settings, and its significant contribution to green infrastructure, particularly in respect of ecological and landscape assets and the extensive network of public rights of way and access routes within the area.

This wide range of sensitivities mean that development potential is highly constrained across the entire valley landscape and any significant development is likely to have unacceptable impacts upon one or more of the area's important attributes. The only opportunity may be to accommodate development within small pockets of undeveloped land within existing residential areas, e.g. off the Funtley Road..., as long as it is of a similar character and scale to other dwellings within the locality and can be sensitively integrated within the landscape to avoid adverse impacts.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban character and green infrastructure, development proposals would need to:

- Protect and enhance features of recognised landscape, ecological, heritage or amenity value within the area as a whole, and the extensive network of public rights of way and other access routes within the valley...
- Protect and enhance the existing cover of woodland, trees, hedgerows and other mature vegetation along field boundaries, watercourses and roadsides, to maximise its screening, landscape and wildlife potential;
- Maintain the essentially secluded, rural and unspoilt countryside character of the valley landscape, and the local lanes and access routes within the area, avoiding intrusive or inappropriate urban styles of lighting, signage, paving etc. and other intrusive features;
- Be of a small-scale and located only in places where it can be carefully integrated within well-treed, strongly enclosed plots

of land in association with existing development, fits within the existing field pattern and is of a similar character and scale to similar built development within the locality;

- Maintain and enhance the function and quality of the existing GI network (in accordance with the PUSH and Fareham GI strategies) and take advantage of opportunities to strengthen and extend access and habitat links within the area, in particular with other parts of the Meon Valley and the urban areas on either side of the valley;
- Provide enhancement of the valley landscape... through removal or mitigation of intrusive or unsightly features, and restoration of field boundaries and other landscape features within 'denuded' or degraded landscapes (e.g. areas used for horse grazing or horticulture with a weak hedgerow structure and 'fringe' characteristics)."

The Site is largely typical of the description for the borough LCA, forming part of a valley with pasture, open farmland, urban development and areas of woodland. The M27 motorway results in some intrusion, and this, and the woodland and landform limit views. As described by the LCA, the Site forms a pocket of land that is enclosed by vegetation and is already somewhat affected by existing residential areas off Funtley Road. Vegetation within the Site is also important to the green infrastructure network of the character area. Significant development is inappropriate but small pockets of development such as off Funtley Road may be accommodated if of a similar scale or character to other dwellings.

The value of the landscape character area are assessed as being Low - **Medium**.

2. Baseline Conditions

2.10 Existing Landscape Conditions at Site Level

Figure 2.14 illustrates the existing landscape elements within the Application Site.

Landscape Designations

The Application Site lies wholly in an Area Outside of the Defined Urban Settlement. The north-western section of the Application Site is designated as Existing Open Space. However, the emerging local plan proposes deletion of this existing open space and the incorporation of the site within the Funtley settlement boundary.

Great Beamond Coppice in the eastern part of the Application Site is an Ancient Re-planted Woodland, which together with the tree blocks within central northern and south-western sections of the Application Site are also designated as a SINC and are covered by a TPO.

Heritage Assets

There are no heritage designations on or adjacent to the Application Site, nor does it sit within or adjoin a Conversation Area.

Within the context to the Site is the Grade II Listed buildings of the Church of St Francis (to the east on Funtley Road). A Scheduled Ancient Monument, the site of Funtley Iron Works together with a group of Grade II Listed buildings including Ironmaster's House and Funtley House are situated approximately 500m to the south west of Application Site, along the Ironmill Lane.

As such, at the site level, the value of this receptor is **Low**.

Topography

The Application Site lies on a north east facing slope with the localised steep ridgeline forming the southern boundary. The landform reaches approximately 52.98m AOD in the south west corner and falls towards a low point of approximately 18.77m AOD to the north-western corner of the Site.

The landform around the existing stables and built form within the north-eastern and southern part of the Application Site have been modified and where there is a level change of approximately 2m.

The value of this landscape receptor is assessed as **Medium** overall.

Land Use and Vegetation

The Application Site lies on the south-western fringe of the village of Funtley and is bound by Funtley Road to the north, Honey Lane to the west (and the elevated disused railway beyond) and the M27 to the south. There is currently no public access into the Site from the M27 and the footbridge. The Application Site is currently accessed from Funtley Road (opposite Stag Way).

The land use within the Application Site is predominantly pasture land (at the time of the assessment used as horse paddocks) bound by in the main by fencing comprising of timber post and rail, with additional wire in places. Woodland or hedgerows form some external and all external boundaries. There are also fences at the outer boundaries, within the vegetation. Access to the paddock is provided via a series of informal, mainly grassed private routes with the Site. Some hard surfacing occurs along the main access drive and parts of two tracks running west of this.

Small areas within the Application Site have been historically used as brick pit and brick yard. These have been restored back to agricultural use with imported clean soil and proposed planting following by the approval of the reinstatement scheme in April 2003 (Application Reference: P/03/0253/MW).

Great Beamond Coppice, alongside the other informal tree groups and treebelts form significant landscape features of the Application Site.

The value of this landscape receptor is assessed as **Medium** overall.

Landscape Character

The landscape character of the Application Site is described as consisting predominantly of a series of pasture fields with agricultural built form and associated hardstanding. The mature boundary vegetation and Great Beamond Coppice frames the fields and together with the landform, provides significant visual enclosure to the Application Site from the wider landscape.

The immediate setting to the Application Site comprises the predominantly two storey dwellings of Funtley to the north; the M27 motorway and the urban fringe of Fareham to the south; a combination of fields and dwellings to the west which is contained from the wider landscape by the mature tree belt associated with the elevated disused railway line; and to the east by the railway line in cutting and associated vegetation.

The northern section of the Application Site is therefore already influenced by the existing residential edges and is of a typical semi-enclosed character, consistent with the western edge of Funtley.

As set out under the published landscape character assessment section above, the Site is largely typical of the defined borough character area within which it lies.

The value of this landscape receptor is assessed as **Medium**.

Public Rights of Way

There are no public rights of ways located within or along the Site. However, the bridleway 515 (former railway line) is located in close proximity (approximately 38m) to the north-western part of the Site.

The value of this landscape receptor is therefore assessed as **Low**.

2. Baseline Conditions

2.11 Internal Visual Survey

A visual inspection of the Application Site was conducted on 7th June 2017. A winter visual appraisal was carried out on 5th January 2018.

Figure 2.15 on the following page illustrates the location of the internal photographic viewpoints to the Site. Photos 1- 15 which follow, illustrate the existing Application Site conditions. Photos 14A and 15A are taken from slightly different positions to the summer photos. Photo 13A is taken from inside the Site, adjacent to the boundary, representing a winter view that is similar to summer external viewpoint 4.

While the summer and winter views show slight differences in the position of the viewpoint and focal lengths of camera lens used, there are otherwise, no material differences in the view.

2. Baseline Conditions

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site

Summer Views

Photograph – Viewpoint S1

View looking south from Funtley Road towards the northern portion of the Application Site. The existing tarmac access road is visible centrally within this view. The access road is lined by mature trees and established vegetation, which largely obscures views into the internal ground plane of the Site.

Photograph – Viewpoint S3

View looking north towards the northern Site boundary from the north-eastern part of the Application Site. The existing pasture grassland dominates this view with topography sloping towards the northern boundary. The mature tree belt lines along the north-eastern boundary obscure views out of the Application Site from this location.

Photograph – Viewpoint S2

View looking south west across the eastern portion of the Application Site from north-eastern corner. The existing pasture land dominates the foreground with topography rising towards the south. The existing built form is apparent in the middle distance with the Ancient Re-planted Woodland of Great Beamond Coppice evident in the distance. Views out to the east, west and south are obscured by the intervening mature boundary vegetation and landform.

Photograph – Viewpoint S4

View looking west towards the western boundary of the Application Site. The existing hardstanding forms the foreground of this view, interspersed with existing stable units in the middle distance. The existing mature trees and vegetation are apparent behind the existing stable blocks and obscure views out to the west from this location.

2. Baseline Conditions

Winter Views

Photograph – Viewpoint S5 - Winter View
 Visibility across the Site remains largely the same in winter.

Photograph – Viewpoint S6 - Winter View
 Visibility across the Site remains largely the same in winter, albeit there is slightly increased visibility of the property along Honey Lane. The landform prevents significant views beyond the Site boundary despite reduced leaf cover.

Photograph – Viewpoint S7 - Winter View
 Visibility across the Site remains largely the same in winter. There is however, slightly increased visibility of existing dwellings south of the M27, without leaf cover to vegetation.

Photograph – Viewpoint S8 - Winter View
 Visibility across the Site remains largely the same in winter. The landform prevents significant views beyond the Site boundary despite reduced leaf cover.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Summer Views

Photograph – Viewpoint S9

View looking east across paddocks within the south-western section of the Application Site. The existing pasture grassland dominates the foreground with the landform falling towards the mature tree line in the middle distance. The existing mature vegetation along the south east section of the Application Site is apparent in the distance and obscures the majority of views out to the east and south. However, glimpsed views of rooflines of the existing residential built form within Funtley beyond the site, are apparent in the distance.

Photograph – Viewpoint S10

View looking north east within the central part of the Application Site. The existing understorey vegetation dominates the foreground with mature trees along the internal field boundaries. The existing topography slopes towards the north with views of Great Beamond Coppice apparent in the middle distance. Due to the existing landform, the roofline of existing residential built form along Funtley Road and Roebuck Avenue are apparent in the distance. Glimpsed views of an existing 3 storey built form within neighbouring village of Knowle are also evident in the far distance, through gaps within the existing boundary vegetation and landform.

Photograph – Viewpoint S11

View looking north across paddocks within the south-western section of the Application Site. The existing pasture grassland dominates this view with topography rising to meet the field boundary. Existing vegetation along the western boundary and trees to the east are apparent and with landform, limits views out to the west and east. However, glimpsed views of a wider elevated landscape are evident in the distance to the north.

Photograph – Viewpoint S12

View looking north across paddocks within the south-western section of the Application Site. The existing pasture grassland dominates this view with the existing topography falling steeply towards the north. An existing tree line to the east is evident in the distance and obscures views out to the east from this location. However, views of wider landscape to the north are evident with existing built form along Funtley Road visible due to existing landform.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Winter Views

Photograph – Viewpoint S9 - Winter View
There is slightly increased visibility beyond the Site, including of dwellings within Funtley, in winter.

Photograph – Viewpoint S10 - Winter View
The photo is taken standing slightly closer to the fenceline than in summer. The lack of leaf cover allows increased visibility across the Site and to existing dwellings within Funtley and within Knowle village.

Photograph – Viewpoint S11 - Winter View
The viewing position is from a slightly higher point, allowing views across the Application Site as it slopes down to the north, and of existing properties just north of the Site, the disused railway line to the west, and wider elevated landscape beyond the built form at Funtley. Parts of built form at Knowle village and pylons form part of the scene to the north.

Photograph – Viewpoint S12 - Winter View
There is slightly increased visibility within the Site in winter, with glimpses of the barns in the south-eastern part area. The glimpses of Funtley and Knowle village (to left, beyond edge of photo) remain in winter.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Summer Views

Photograph – Viewpoint S13

View looking north east across paddocks within the western part of the Application Site. The existing pasture grassland dominates this view with topography falling steeply towards the northern boundary. Partial views of hardstanding within the northern part of the Application Site are evident in the distance to the north east. Due to the existing topography, views of wider landscape beyond the Application Site are evident with existing built form along Funtley Road and Roebuck Avenue apparent from this location.

Photograph – Viewpoint S14

View looking east across paddocks within the north-western part of the Application Site. The existing pasture dominates this view with existing undulating topography rising towards to east and south west. The existing vegetation along northern boundary of the Application Site is visible with views of Great Beamond Coppice evident in the distance. Views out to east and south are obscured by the dense vegetation within Application Site. However, views of roof and upper storey of existing two storey built form along western part of Funtley Road are apparent through gaps within vegetation and landform.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Winter Views

Photograph – Viewpoint S13 Winter View
In winter, the reduced leaf cover reveals more of the existing built form to the north of the Site.

Photograph – Viewpoint S14A Winter View
The viewpoint is taken from the access path south of the paddock from which summer view 14 was taken. In winter, there is slightly increased visibility of existing built form at Funtley to the north of the Site.

Photograph – Viewpoint S13A additional Winter View
View looking north to north-east from the south-western edge of the Site, by the boundary hedge which separates the Site from the existing property at the southern end of Honey Lane. This photo also provides a winter equivalent of external viewpoint 4. Existing built form at Funtley and further north of the village is visible beyond the Site. Existing outbuildings and part of Great Beamond Coppice are visible to the right in the photo.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Summer and Winter Views

Photograph – Viewpoint S15

View looking south east across paddocks from the north-western part of the Application Site. The existing pasture dominates this view with existing undulating topography rising towards the south. The existing vegetation along the western Application Site boundary is visible with views of Great Beamond Coppice evident in the distance. The dense vegetation within the Application Site obscures views out to the west and south.

Photograph – Viewpoint S15A Winter View

The viewpoint is taken from the access path north of the paddock from which summer view 15 was taken. The landform and dense vegetation within the Site and at its boundaries mean that visibility beyond the Site remains similar in winter. There is a very limited glimpse of the roof of the building at the south end of Honey Lane (adjacent to the Site) and of the roof of a vehicle parked within its curtilage.

3. Visual Baseline Conditions and Sensitivities

3.1 Introduction

The extent to which the internal ground plane and vegetation associated with the Application Site are visible from the surrounding landscape is based on grading degrees of visibility. It is determined from a visual inspection of the land within the Site and its context from roads, public rights of way and properties.

Seasonal change in existing evergreen and deciduous plant material will affect the available views. Typically views will be different through the seasons with a greater sense of enclosure in the summer months when deciduous trees are in leaf.

The plans that follow show the actual visual summary of the Application Site from the immediate environs. The photographs 1-19 then describe each of these views.

No winter views were taken for photo viewpoints 15-19 due to the significant level of visual screening by vegetation and in places, by landform.

3.2 Visual Appraisal

The plans on the following pages (Figures 3.1 and 3.2) illustrate the visual summary of the land within the Application Site from the surrounding landscape.

Views of the internal ground plane and vegetation of the Application Site are limited to the immediate local landscape due to the undulating topography and intervening layers of vegetation and built form.

Residential Receptors

Views from residential receptors are limited to those located in close proximity to the Site along the Funtley Road, Roebuck Avenue, Stag Way and Honey Lane. Refer to photographs 4 - 8.

There is slightly increased visibility of the Site in winter, in particular for properties along the south sides of Funtley Road which have windows facing in the direction of the Site.

The value of the residential receptors is judged to be **medium**.

Historic Receptors

There are no views from the Listed Buildings and Scheduled Ancient Monument located in the study area - along the Ironmill Lane and Skylark Meadows within Skylark Golf and Country Club. Refer to photographs 11 and 19. There is no significant change in the visibility in winter, and these receptors are not considered as part of the visual impact appraisal.

Transport Corridors

There are open and partial views of the internal ground plane and landscape features of the Application Site from Funtley Road, Roebuck Avenue and southern section of Honey Lane. Views are only from those parts of these roads in close proximity to the Site. Views from the wider road network are truncated. Refer to photographs 4 - 8.

There are slightly increased views into the Site in winter from Funtley Road and Roebuck Avenue, without leaf cover. Views from Honey Lane remain largely obscured except for two sections to the north and south where there is a gap in the vegetation (north) and a low hedge (south) at the boundary with the Site.

The value of the transport corridors is judged to be **low**.

Public Rights of Way

The majority of receptors from the public rights of ways within the local, middle distance and wider landscape are truncated due to intervening topography, vegetation and built form. Refer to photographs 1, 2, 11 - 19.

In winter, from viewpoint 2 (path around the lake by Lakeside) within Funtley, there are increased glimpses through the vegetation along the railway embankments. As the ground plane of the Site is not discernible, it is not possible to distinguish any vegetation within the Site from the general dense vegetation visible around the railway line from this location.

Reduced leaf cover to vegetation along the disused railway line to the west of the Site (Bridleway 515) allows glimpses through to the ground plane of the Site, but only from positions in close proximity to the crossing over Funtley Road (photographs 12A and 14A). In these views, existing built form at Funtley is also visible.

The highest part of the Site to the south, around the existing telecommunications mast is visible as a part of panoramic views looking back to Funtley village from two Public Rights of Way to the east - see photographs 9 and 10 (from Footpaths 88 and 89 respectively).

From viewpoint 9 in winter, the ground plane of a small part of the south-eastern part of the Site, the telecomms mast and nearby existing barns are visible, together with Great Beamond Coppice and other boundary vegetation within the south eastern area of the Site.

From viewpoint 10 in winter, the upper part of the mast, barns and small part of the Copse are visible above existing dwellings and vegetation at the edge of Funtley. The ground plane of the Site is obscured, even in winter.

No extensive views across the ground plane of the Site are available from these locations.

The existing southern boundary vegetation is visible from the M27 footbridge to the immediate south (photograph 3) however, this vegetation in turn obscures internal views of the land within the Application Site.

The value of the users of the public rights of way is judged to be **medium**.

Page intentionally left blank

3. Visual Baseline Conditions and Sensitivities

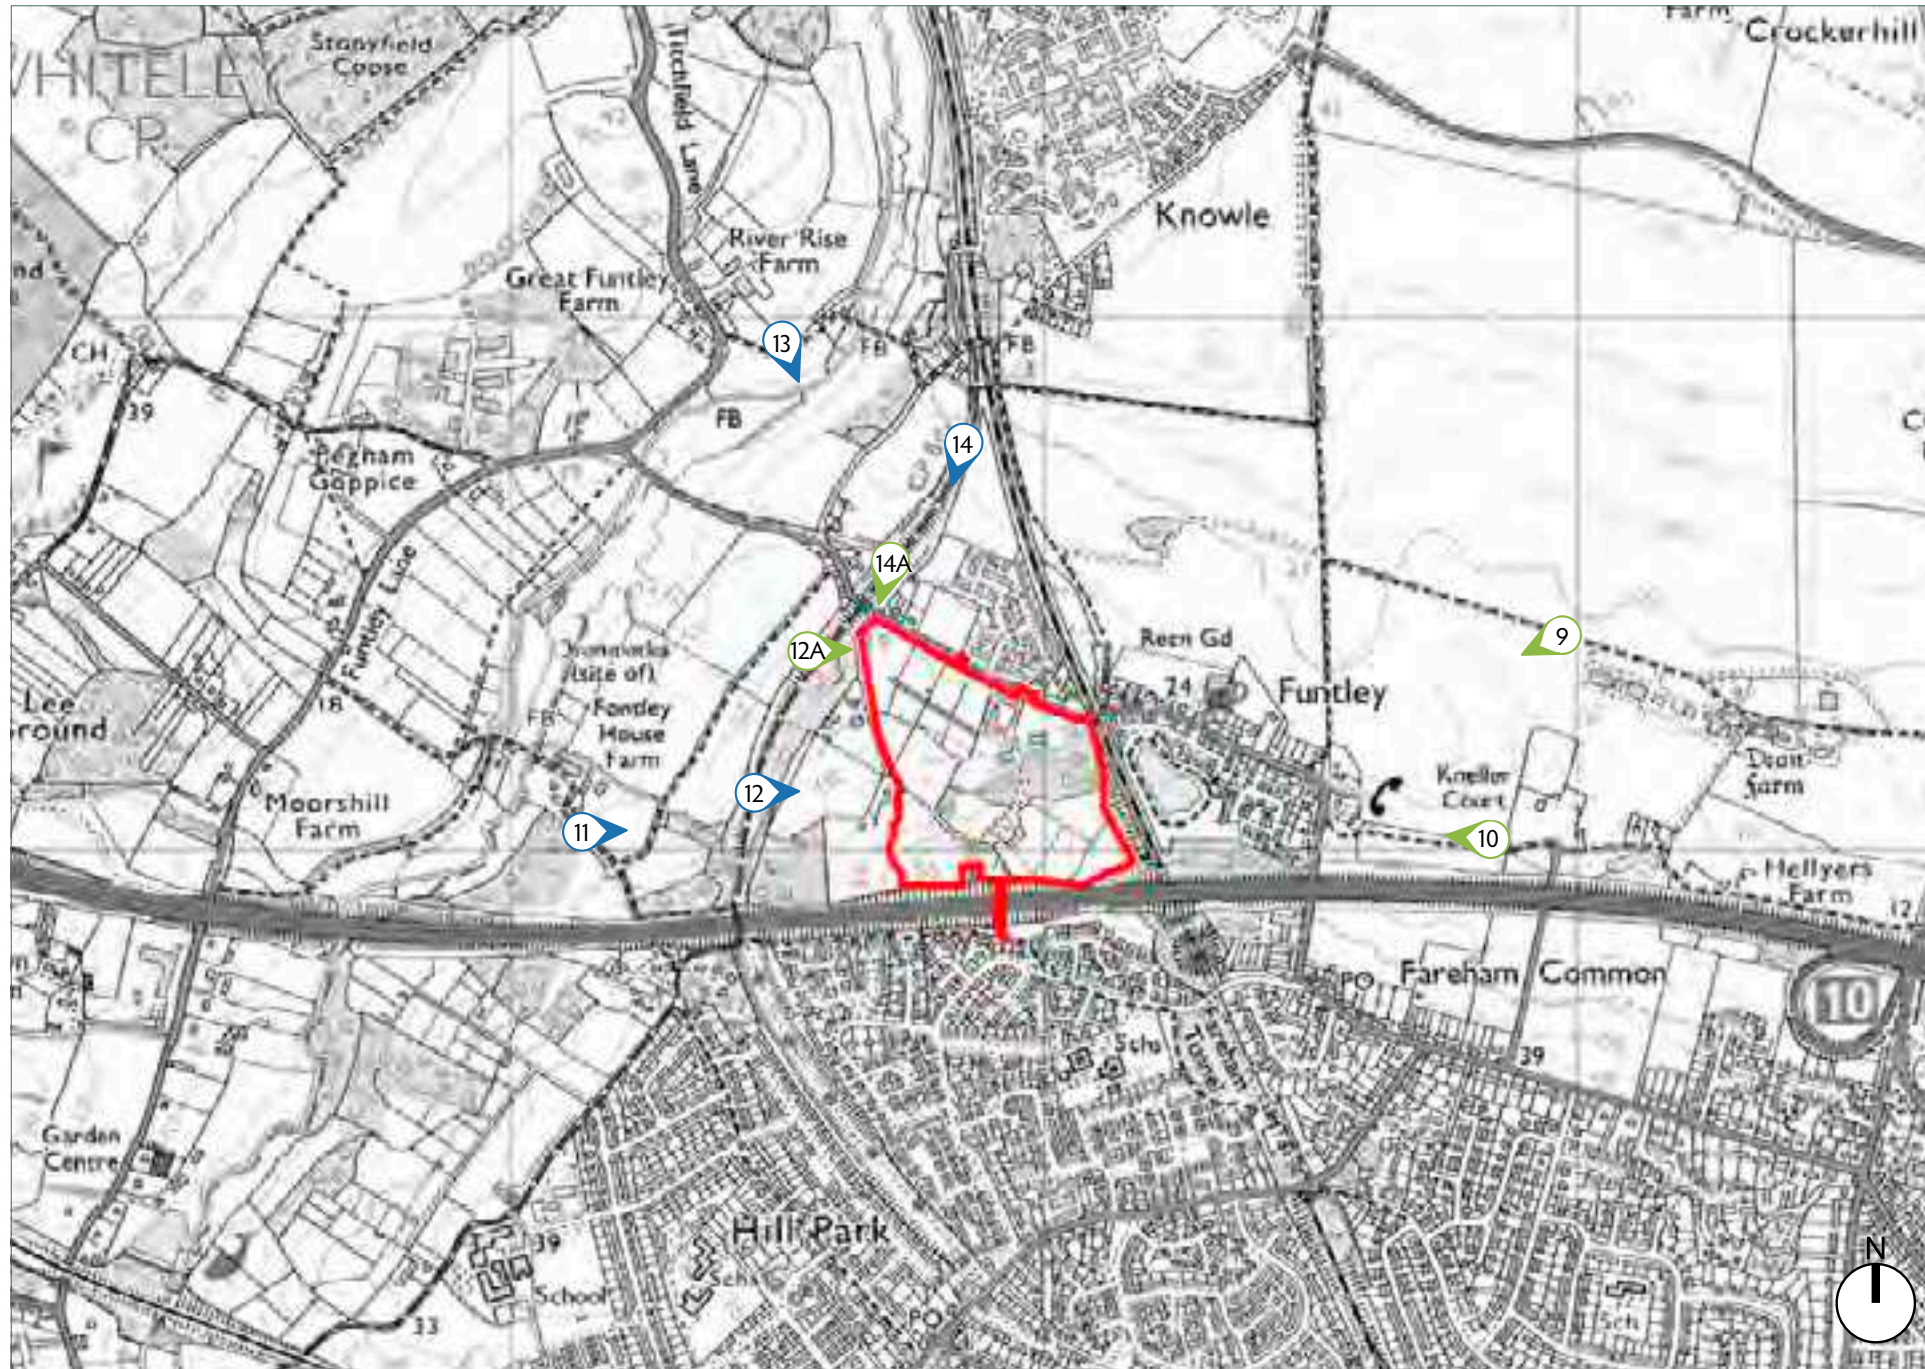

Figure 3.1 – Location Plan showing Visual Summary from the local area (fabrik, 2018)

Legend

-  Application Site Boundary
-  Location of Photographic viewpoint – Open View (An open view of the whole of the Site or open view of part of the Site).
-  Location of Photographic viewpoint – Partial View (A view of the Site which forms a small part of the wider panorama, or where views are filtered between intervening built form or vegetation).
-  Location of Photographic viewpoint – Truncated View (Views of the Site are obscured by the intervening built form and / or vegetation, or is difficult to perceive).

Figure 3.2 – Location Plan showing Visual Summary in close proximity to the Site (fabrik, 2017)

3. Visual Baseline Conditions and Sensitivities

3.3 Visual Appraisal from the Local Area

Summer Views

Photograph – Viewpoint 1

View looking south west towards the Application Site from the eastern section of Funtley Lane (Footpath 85). The existing residential built form along Funtley Lane dominates this view with mature hedgerow forming a vegetated edge along this part of the lane. Glimpsed views of the top section of Great Beamond Coppice along the north-eastern edge of the Application Site is apparent. Views of the internal ground plane within the Application Site are truncated.

Photograph – Viewpoint 2

View looking west towards the Application Site from an informal footpath at the edge of the lake to the south west of Lakeside (south of Funtley Road). Mature trees and vegetation dominate this view and forms a green corridor along the path. The intervening vegetation, which includes that alongside the live railway (right, truncates any views of the internal ground plane within the Application Site from this location).

Photograph – Viewpoint 3

View looking north towards the Application Site from the footbridge to the south of the Application Site over the M27. The footbridge and the mature tree belt planted along the motorway edge dominates this view. Partial views of the existing mature trees and vegetation along the southern Application Site are evident behind the existing vegetation that lines the motorway. Views into other areas across the Application Site are truncated by the intervening vegetation and topography from this location.

3. Visual Baseline Conditions and Sensitivities

3.3 Visual Appraisal from the Local Area

Winter Views

Photograph – Viewpoint 1 Winter View

The photo is taken from a position standing slightly further west along Funtley Lane (due to the presence of a large vehicle on the road). However, in winter, there is no significant change in the visibility of the Site in winter from any section of this lane.

Photograph – Viewpoint 2 Winter View

There is no significant change in the visibility of the Site in winter.

Photograph – Viewpoint 3 Winter View

There is no significant change in the visibility of the Site in winter.

3. Visual Baseline Conditions and Sensitivities

3.3 Visual Appraisal from the Local Area

Summer Views

Photograph – Viewpoint 4
View looking east towards the Application Site from the existing hardstanding area associated with the private dwelling ‘Bramleigh’ located on Honey Lane. The existing boundary vegetation and pasture grassland within the Application Site dominates the view. Open view of the internal plane, boundary vegetation and the Great Beamond Coppice are apparent from this location.

Photograph – Viewpoint 5
View looking south east towards the Application Site from Funtley Road (by properties just east of the disused railway bridge). Views of existing residential built form along Funtley Road dominate the foreground with mature trees and vegetation along the northern Application Site boundary apparent. Views of the internal ground plane within the Site are truncated due to intervening boundary vegetation.

Photograph – Viewpoint 6
View looking south east towards the Application Site from the junction of Roebuck Avenue and Funtley Road. Views of existing residential built form around the entrance of Roebuck Avenue and mature trees and vegetation along the northern Site are apparent. Views of the internal ground plane within the Application Site are truncated due to intervening boundary vegetation.

Photograph – Viewpoint 6b
View looking south east towards the Application Site from Roebuck Avenue. The residential built form with its associated private garden along Roebuck Avenue dominates this view with the topography within the Application Site rising towards the local ridgeline. Open views of the central part within the Application Site occur, funnelled along the road with mature vegetation evident in the distance. Views into other areas within the Application Site are truncated by intervening vegetation, topography and built form from this location.

3. Visual Baseline Conditions and Sensitivities

3.3 Visual Appraisal from the Local Area
Winter Views

Note: For the winter photo relating to Viewpoint 4 (taken from curtilage to Bramleigh), refer to internal winter viewpoint 13A (above) which is taken from the Site-side of the hedge at the boundary with the property Bramleigh.

Photograph – Viewpoint 5 Winter View
In winter, the ground plane of the Site becomes apparent without leaf cover to the northern boundary vegetation.

Photograph – Viewpoint 6 Winter View
There is little change in the visibility of the Site in winter.

Photograph – Viewpoint 6b Winter View
There is slightly increased visibility of the Site in winter.

3. Visual Baseline Conditions and Sensitivities

3.3 Visual Appraisal from the Local Area

Summer Views

Photograph – Viewpoint 7
View looking south west towards the Application Site from the junction of Stag Way and Funtley Road. Views of mature trees and boundary vegetation along the northern Site boundary dominate this view and form a green corridor along Funtley Road. Views of the existing access road and entrance gate within the Application Site are apparent. Views of the ground plane within the Application Site are, however, truncated by the intervening vegetation.

Photograph – Viewpoint 8
View looking south west towards the Application Site from Funtley Road. Views of mature boundary vegetation and tree planting along the northern boundary of the Application Site dominate this view and form a green corridor along Funtley Road. Views of the internal ground plane of the Application Site are in turn truncated due to intervening boundary vegetation.

Photograph – Viewpoint 9
View looking south west towards the Application Site from Footpath 88. Open views of arable land dominate the foreground. The existing settlement of Funtley is evident in the distance with the topography rising sharply towards the ridgeline to the south west. Partial views of the mature vegetation along the southern boundary of the Application Site are evident. Glimpsed views of small sections of existing pasture grassland and the roof section of the existing built form within the southern section of the Application Site are also apparent in the far distance. Views of other parts within the Application Site are truncated due to intervening vegetation and landform.

Photograph – Viewpoint 10
View looking west towards the Application Site from Footpath 89. Open views of grassland dominates this view with mature trees and vegetation that define localised field boundaries in the middle distance. Glimpsed views of the top section of an existing mobile communication mast helps to identify the location of the Application Site in the wider landscape. Due to intervening vegetation and landform, views of the Application Site are truncated from this location.

3. Visual Baseline Conditions and Sensitivities

3.3 Visual Appraisal from the Local Area

Winter Views

Photograph – Viewpoint 7 Winter View
There is slightly increased visibility into the Site in winter.

Photograph – Viewpoint 8 Winter View
There are glimpses of the ground plane of the Site in winter without leaf cover.

Photograph – Viewpoint 9 Winter View
There is slightly increased visibility of the south-eastern part of the Site in winter - existing vegetation (including Great Beamond Coppice), small part of the ground plane, southern barns and telecommunications mast. Existing built form at Funtley is also more apparent.

Photograph – Viewpoint 10 Winter View
There is very slightly increased visibility of the south-eastern part of the Site in winter, the existing vegetation, southern barns and telecommunications mast. Existing built form at Funtley is also more apparent.

3. Visual Baseline Conditions and Sensitivities

3.3 Visual Appraisal from the Local Area

Summer Views

Photograph – Viewpoint 11
View looking east towards the Application Site from Footpath 83a near a group of Listed Buildings (Ironmaster’s House and Funtley House) and the Scheduled Monument (Site of Funtley Iron Works). Views of pasture land with existing mature boundary vegetation dominate the foreground of this view. Views of the Application Site are truncated due to intervening vegetation and land form.

Photograph – Viewpoint 12
View looking east towards the Application Site from the southern section of Bridleway 515. Views of existing mature trees and vegetation dominate this view and form a green corridor along the footpath. Due to intervening vegetation, views of the Application Site are truncated from this location.

Photograph – Viewpoint 13
View looking south east towards the Application Site from footpath 16. Views of pasture land dominate the foreground with topography gently falling to meet the River Meon in the distance. Views of the existing tree belt along Mayles Lane and River Lane are apparent in the distance and obscure any views of the Application Site from this location.

Photograph – Viewpoint 14
View looking south towards the Application Site from the northern section of Bridleway 515. Views of existing mature trees and vegetation dominate this view and form a green corridor along the footpath. Due to intervening vegetation, views of the Application Site are truncated.

3.4 Visual Appraisal from the Wider Study Area

Summer Views

Photograph – Viewpoint 15

View looking south west towards the Application Site from Footpath 11 adjacent to Wickham Road (southern boundary of South Downs National Park). Views of existing mature vegetation along either side of the footpath dominates this view and obscures any views towards the Application Site from this location.

Photograph – Viewpoint 16

View looking south west towards the Application Site from the junction of Footpath 10 (Castle Farm Lane) and Forest Lane. Mature trees and vegetation along the lane dominate this view and create a green corridor along the lane. Views of the Application Site are wholly truncated by the intervening vegetation and topography.

Photograph – Viewpoint 17

View looking south west towards the Application Site from the cycle and footpath along the eastern section of Knowle Road. The cycle / footpath is apparent centrally within this view with mature hedgerows and vegetation evident on either side of the path. Due to intervening vegetation, views of the Application Site are wholly truncated from this location.

Photograph – Viewpoint 18

View looking south west towards the Application Site from Footpath 23b located along the southern part of Aylesbury Copse. Views of arable fields dominate this view with topography gently sloping towards the west. The existing tree belt to the south of Knowle Road is apparent in the distance from this location. Any views of the Application Site are truncated due to intervening topography and vegetation.

3. Visual Baseline Conditions and Sensitivities

3.4 Visual Appraisal from the Wider Study Area

Summer Views

Photograph – Viewpoint 19

View looking south east towards the Application Site from Bridleway 26b located in close proximity to a barn 20 metres south of Lee Ground (Grade II Listed Building) and Skylark Golf and Country Club. Mature trees and vegetation define the localised field boundaries and create a green corridor along the bridleway. Views of the Application Site are wholly truncated by the intervening vegetation and land form.

3. Visual Baseline Conditions and Sensitivities

Table 3.1 – Summary of Visual Receptors

Representative Visual Receptor Viewpoint No.	Landscape Designation	Receptors	Extent of the land visible within the Application Site	Character and Amenity of the View	Elevation	Distance to Site	Value
1	Public footpath 85	Residential; Transient receptors on foot and bike and vehicle.	The internal ground plane within the Application Site is truncated from this location. However, the glimpsed view of top section of Great Beamond Coppice along the north-eastern is evident from this location.	View looking south west towards the Application Site from the eastern section of Funtley Lane (Footpath 85). The existing residential built form along Funtley Lane dominates this view with mature hedgerow forming a vegetated edge along this part of the lane. Glimpsed views of the top section of Great Beamond Coppice along the north-eastern edge of the Application Site is apparent. Views of the internal ground plane within the Application Site are truncated. There is no significant change in the visibility of the Site in winter.	Approximately 20m AOD	Approximately 174m	Medium - Low
2	Existing Open Space	Transient receptors on foot	The internal ground plane and the existing vegetation within the Application Site are truncated from this location.	View looking west towards the Application Site from an informal footpath at the edge of the lake to the south west of Lakeside (south of Funtley Road). Mature trees and vegetation dominate this view and forms a green corridor along the path. The intervening vegetation, which includes that alongside the live railway (right, truncates any views of the internal ground plane within the Application Site from this location. There is no significant change in the visibility of the Site in winter.	Approximately 20m AOD	Approximately 122m	Medium
3	Area Outside of Defined Urban Settlement Boundary	Transient receptors on foot	The internal ground plane within the Application Site is truncated from this location. However, partial views of the existing tree and vegetation across the southern section of the Application Site are evident from this location.	View looking north towards the Application Site from the footbridge to the south of the Application Site over the M27. The footbridge and the mature tree belt planted along the motorway edge dominates this view. Partial views of the existing mature trees and vegetation along the southern Application Site are evident behind the existing vegetation that lines the motorway. Views into other areas across the Application Site are truncated by the intervening vegetation and topography from this location. There is no significant change in the visibility of the Site in winter.	Approximately 50m AOD	Approximately 285m	Medium - Low

3. Visual Baseline Conditions and Sensitivities

Table 3.1 – Summary of Visual Receptors

Representative Visual Receptor Viewpoint No.	Landscape Designation	Receptors	Extent of the land visible within the Application Site	Character and Amenity of the View	Elevation	Distance to Site	Value
4	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot and vehicle.	Open views of existing vegetation and built form within the Application Site occur from this location. Open views of existing boundary vegetation, built form and ground plane of the Application Site are visible from this location	View looking east towards the Application Site from the existing hardstanding area associated with the private dwelling 'Bramleigh' located on Honey Lane. The existing boundary vegetation and pasture grassland within the Application Site dominates the view. Open view of the internal plane, boundary vegetation and the Great Beamond Coppice are apparent from this location. For the winter view see Site Internal Viewpoint 13A, which is taken from the Site-side of the hedge at the boundary with the property. Existing built form at Funtley and further north of the village is visible beyond the Site. Existing outbuildings and part of Great Beamond Coppice are visible to the right in the photo.	Approximately 35m AOD	Approximately 176m	Medium
5	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot and bike and vehicle.	Open views of existing boundary vegetation associated the Application Site occur from this location.	View looking south east towards the Application Site from Funtley Road (by properties just east of the disused railway bridge). Views of existing residential built form along Funtley Road dominate the foreground with mature trees and vegetation along the northern Application Site boundary apparent. Views of the internal ground plane within the Site are truncated due to intervening boundary vegetation. In winter, the ground plane of the Site becomes apparent without leaf cover to the northern boundary vegetation.	Approximately 18m AOD	Approximately 230m	Medium
6	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot and bike and vehicle.	Open views of existing mature tree and vegetation along the northern boundary of the Application Site occur from this location.	View looking south east towards the Application Site from the junction of Roebuck Avenue and Funtley Road. Views of existing residential built form around the entrance of Roebuck Avenue and mature trees and vegetation along the northern Site are apparent. Views of the internal ground plane within the Application Site are truncated due to intervening boundary vegetation. There is little change in the visibility of the Site in winter.	Approximately 19m AOD	Approximately 22m	Medium

3. Visual Baseline Conditions and Sensitivities

Table 3.1 – Summary of Visual Receptors

Representative Visual Receptor Viewpoint No.	Landscape Designation	Receptors	Extent of the land visible within the Application Site	Character and Amenity of the View	Elevation	Distance to Site	Value
6b	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot and bike and vehicle.	Open views of central part of internal ground plane within the Application Site occur with mature vegetation evident in the distance.	View looking south east towards the Application Site from Roebuck Avenue. The residential built form with its associated private garden along Roebuck Avenue dominates this view with the topography within the Application Site rising towards the local ridgeline. Open views of the central part within the Application Site occur, funnelled along the road with mature vegetation evident in the distance. Views into other areas within the Application Site are truncated by intervening vegetation, topography and built form from this location. There is slightly increased visibility of the Site in winter.	Approximately 20m AOD	Approximately 59m	Medium
7	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot, bike and vehicle.	Open views of existing mature tree and vegetation and the entrance access road along northern boundary of the Application Site occur. A small section of the existing northern boundary vegetation within the Application Site occur, evident in the middle distance.	View looking south west towards the Application Site from the junction of Stag Way and Funtley Road. Views of mature trees and boundary vegetation along the northern Site boundary dominate this view and form a green corridor along Funtley Road. Views of the existing access road and entrance gate within the Application Site are apparent. Views of the ground plane within the Application Site are, however, truncated by the intervening vegetation. There is slightly increased visibility into the Site in winter.	Approximately 20m AOD	Approximately 8m	Medium
8	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot, bike and vehicle.	Open views of existing mature tree and vegetation along north-eastern boundary of the Application Site occur from this location.	View looking south west towards the Application Site from Funtley Road. Views of mature boundary vegetation and tree planting along the northern boundary of the Application Site dominate this view and form a green corridor along Funtley Road. Views of the internal ground plane of the Application Site are in turn truncated due to intervening boundary vegetation. There are glimpses of the ground plane of the Site in winter without leaf cover.	Approximately 23m AOD	Approximately 60m	Medium

3. Visual Baseline Conditions and Sensitivities

Due to intervening vegetation, views of the Application Site are truncated, including in winter.</p> <p>From 14A (winter view) located near to the bridge crossing over Funtley Road, there are glimpses into the westerns part of the Site. Existing dwellings within the village are also glimpsed beyond vegetation along the disused railway line / Bridleway 515.</p>	Approximately 25m AOD	Approximately 488m	High
15	Outside of Fareham Borough Council's local boundary, but is adjacent southern boundary of South Downs National (along Wickham Road)	Transient receptors on foot and bike and vehicle.	Views of the internal ground plane and the existing vegetation within the Application Site are truncated from this location.	View looking south west towards the Application Site from Footpath 11 adjacent to Wickham Road (southern boundary of South Downs National Park). Views of existing mature vegetation along either side of the footpath dominates this view and obscures any views towards the Application Site from this location.	Approximately 45m AOD	Approximately 3.74km m	Medium - High

3. Visual Baseline Conditions and Sensitivities

Table 3.1 – Summary of Visual Receptors

Representative Visual Receptor Viewpoint No.	Landscape Designation	Receptors	Extent of the land visible within Application Site	Character and Amenity of the View	Elevation	Distance to Site	Value
16	Area Outside of Defined Urban Settlement Boundary; Public footpath 10	Transient receptors on foot and bike and vehicle.	Views of the internal ground plane and the existing vegetation within the Application Site are truncated from this location.	View looking south west towards the Application Site from the junction of Footpath 10 (Castle Farm Lane) and Forest Lane. Mature trees and vegetation along the lane dominate this view and create a green corridor along the lane. Views of the Application Site are wholly truncated by the intervening vegetation and topography.	Approximately 55m AOD	Approximately 3km	Medium - High
17	Welborne Policy Boundary	Transient receptors on foot and bike.	Views of the internal ground plane and the existing vegetation within the Application Site are truncated from this location.	View looking south west towards the Application Site from the cycle and footpath along the eastern section of Knowle Road. The cycle / footpath is apparent centrally within this view with mature hedgerows and vegetation evident on either side of the path. Due to intervening vegetation, views of the Application Site are wholly truncated from this location.	Approximately 45m AOD	Approximately 1.62km	Medium
18	Welborne Policy Boundary	Transient receptors on foot.	Views of the internal ground plane and the existing vegetation within the Application Site truncated from this location.	View looking south west towards the Application Site from Footpath 23b located along the southern part of Aylesbury Copse. Views of arable fields dominate this view with topography gently sloping towards the west. The existing tree belt to the south of Knowle Road is apparent in the distance from this location. Any views of the Application Site are truncated due to intervening topography and vegetation.	Approximately 42m AOD	Approximately 1.74km	Medium - High
19	Public bridleway 26b; in close proximity of Barn 20m south of Lee Ground (Grade II Listed Building) and Skylark Golf & Country Club	Transient receptors on foot and horseback.	Views of the internal ground plane and the existing vegetation within the Application Site are truncated from this location.	View looking south east towards the Application Site from Bridleway 26b located in close proximity to a barn 20 metres south of Lee Ground (Grade II Listed Building) and Skylark Golf and Country Club. Mature trees and vegetation define the localised field boundaries and create a green corridor along the bridleway. Views of the Application Site are wholly truncated by the intervening vegetation and land form.	Approximately 35m AOD	Approximately 1.72km	Medium - High

4. Landscape Constraints and Opportunities

4.1 Introduction

The following landscape elements form a series of constraints and opportunities that will inform future development proposals:

4.2 Constraints

- The Ancient Woodland is to be retained and protected by a 15m buffer, with no development within this zone.
- Existing tree groups designed as SINC and TPO within the Site are to be retained and protected.
- Retention of the majority of the existing hedgerows along the ownership boundaries, with limited removal required to facilitate safe access into and out of the Site.
- The rooting zones and canopies of existing trees and hedges to be retained would be protected during construction works in accordance with the recommendations of the project arboriculturist and ecologist.
- While land within north-eastern part of the Site is designated as open space within the Core Strategy (adopted August 2011) in fact this is privately owned pasture land used for horse keeping and is not currently accessible to the public. The area is also proposed for deletion in the emerging local plan. The proposed development explores options to relocate this elsewhere within the Site, so that development within this less sensitive location near to the road and existing settlement may be developed.
- The existing topography within the northern section of the ownership is gently sloping towards Funtley Road. However, the undulating topography then rises sharply from the central part of the Site to meet the southern western boundary, and then falls again towards the south-eastern boundary. This restricts development to the area of land in the vicinity of Funtley Road.
- Timber pylons carrying overhead wires within the north-western part of the Site may be undergrounded where practicable.

- Due to the existing land form and close proximity to the neighbouring residential built form, there are a number of open views of the boundary vegetation, or views of the internal ground plane within the Site evident from neighbouring houses and the transient receptors in vehicles / on foot using Funtley Road and Honey Lane.

4.3 Opportunities

- Existing access into the Site (opposite Stag Way) to be retained and enhanced for vehicular and pedestrian access into the future development parcels.
- Bus route along Funtley Road passing by the Site.
- Large mature trees surrounding and within the Site present an opportunity to create a mature, well-established green structure.
- The potential to create green buffers with the opportunity for additional tree planting around future development parcels to provide an improved green settlement edge.
- To create a positive interface with the landscape where development parcels front the green infrastructure.
- Potential to create areas of public open space with pedestrian links within the development and to the wider landscape beyond. This may include opening up access to the bridge crossing over the M27.
- Potential to create a well-designed, discrete and accessible urban extension to Funtley and Fareham, rounding off the settlement, which is well contained by the existing boundary vegetation and topography of the Site.
- Land within the Site historically subject to excavation has been since reinstated back to agricultural use (as discussed in section 2.10). Therefore this land does not pose a constraint to development in terms of further excavation.

4. Landscape Constraints and Opportunities

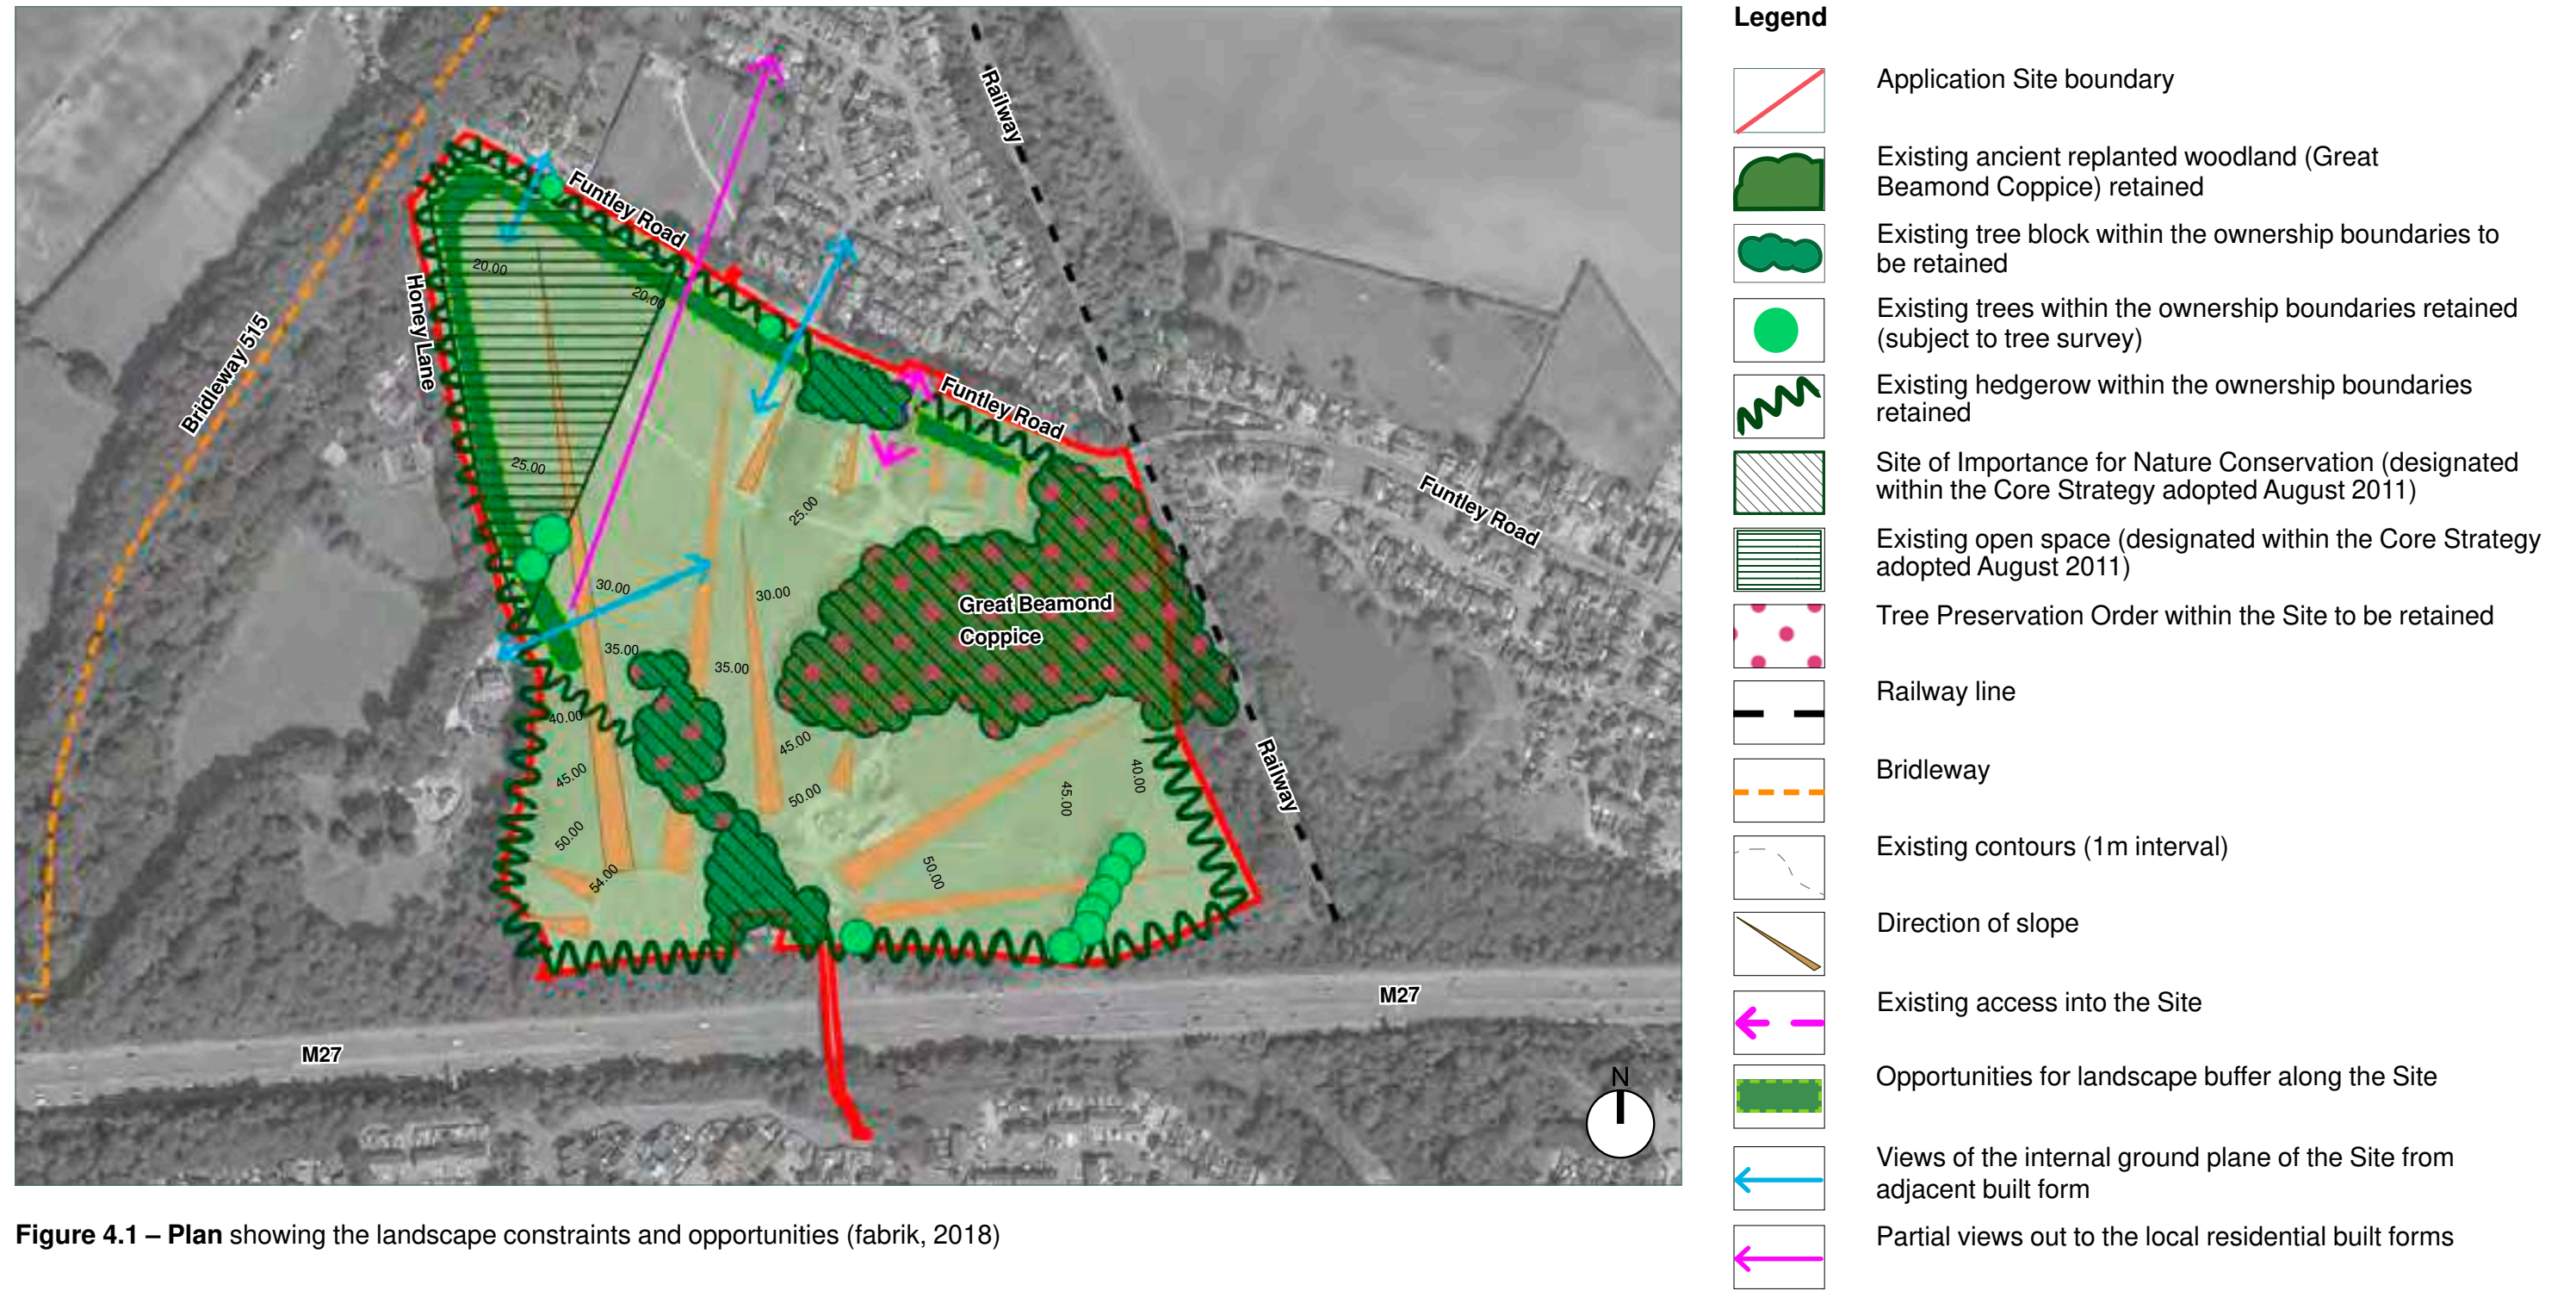

Figure 4.1 – Plan showing the landscape constraints and opportunities (fabrik, 2018)

5. Illustrative Proposed Development Parameters

5.1 Landscape Development Parameters

The landscape development parameters illustrated on **Figure 5.1** have been prepared by considering the landscape features of the Site and other areas within the Site along with landscape policy, landscape character and the visual constraints associated with the local landscape.

The parameters therefore seek to:

- Locate the development parcels on the lower slopes of the Site to the north to minimise cut and fill as well as in-keeping within the local residential character of Funtley and the northern fringe of Fareham.
- Minimise the visual impact of the future development by providing landscape buffer planting along the development boundaries.
- Maintain and enhance the existing landscape features of the Site by retaining, where possible, existing trees and supplementing with additional trees, woodland and hedgerow planting.
- Make use of the existing access to the Site for access to the proposed development, and provide replacement and enhancement planting within this area. A secondary emergency access from Funtley Road may also be required to the north-west of this.
- Where appropriate, contribute to an improved ecological value of the Site through the incorporation of native species within the landscape planting and grassland proposals.
- Make use of any sustainable drainage features to integrate a more diverse range of plant species, suited to temporary flooding.
- Provide public open space within the development and to the south. Incorporate pedestrian links to serve the new residents and the wider community within Funtley and Fareham. This would provide an alternative option to the existing designated open space within the north-western part of the Site (Core Strategy 2011). Pedestrian links may extend to the south through the opening up of the M27 footbridge.

5. Illustrative Proposed Development Parameters

Figure 5.1 – Plan showing the illustrative landscape development parameters (fabrik, 2018)

6. Appraisal of Landscape and Visual Effects

6.1 Effects on Heritage Assets

The Site does not contain nor is adjacent to any heritage assets (such as Listed Building, Scheduled Ancient Monument and Conservation Areas). Therefore, there will be no change to the character of the landscape around these assets, and no views towards the proposed development are predicted from them (**neutral** effect).

6.2 Effects on Topography

Study area topography:

There will be no physical change to the existing topography across the wider study area since the changes will occur at Site and immediate Site level only.

The value is low - medium; susceptibility is low; and sensitivity is low. The magnitude of change would be neutral. Therefore the effect on the topography at the study area level is **neutral**.

Site topography:

The proposed development parcels have been carefully located on the lower slopes within northern part of the Site. Some limited regrading where the Site meets the public highway may be required to facilitate ease of access for all. There may be some localised modifications to the existing landform within the proposed development parcels, to facilitate access and to form effective development platforms. In addition, localised excavations would be made to create sustainable drainage features. It is expected that suitable excavated material would be retained on Site and reused in the open spaces where grassed areas and planting are proposed. Care would be taken to avoid impacts on the rooting zones of existing vegetation. Any inert spoil excavated may be suitable for reuse within areas of proposed hardstanding, subject to confirmation by the project engineer.

The value is medium; susceptibility is low - medium; and sensitivity is low - medium. The magnitude of change would be low - medium. Therefore, the effects on this receptor is likely to result in **minor - moderate** adverse effects at the construction phase. Since no

further earthworks would occur beyond the construction stage, the operational phase effects on the Site topography would be **neutral**.

6.3 Effects on Land Use

Study area land use:

Farmland

At wider landscape level, there will be no direct change to the wider arable and pasture lands across the study area as the proposed changed to the existing land use will occur at Site level only. Furthermore, existing areas of farmland are largely separated from the Site by existing settlement, the existing and disused railway lines and mature vegetation.

During construction, there may be some views of construction plant / structures from elevated areas of private farmland north of Funtley, up to Knowle village (indirect effect). During operation, there may be some partial views of the upper elements of the built form (namely rooflines) from this private farmland, seen in context with existing built form within the valley through which Funtley Road passes. Any views of open and planted land south of the proposed development would remain. This is also an indirect effect and no direct changes to these farmed areas would occur.

Settlement and transport corridors

The Site forms a context and setting to a small part of the existing Funtley village and a short section of Funtley Road. This would change through the introduction of built development within the northern part of the Site. This would result in a limited change to the settlement pattern and character of the road corridor by extending built form to the south of Funtley Road. A broad context of open, unbuilt land would remain to the south of the proposed built area. In addition, longer views towards the elevated land within the southern parts of the Site from existing built areas and of the canopy of mature trees and woodland in these parts of the Site, are likely to be maintained. The road corridor would become more enclosed by built form, albeit this is proposed to be set well back from the existing Site boundary hedge, incorporating open space, sustainable drainage

features and additional planting.

The settlement pattern of Fareham would remain unchanged, and there would be no change to the pattern of roads around the Site or wider study area.

Open spaces

There would also be no physical change to existing open spaces across the study area, including that at Lakeside to the east of the Site.

Appraisal of study area land use effects

The value of the land use at study area level is low - medium; susceptibility is low; and sensitivity is low - medium. The magnitude of change would be low - medium, with the greatest level of change experienced by those land uses within very close proximity to the Site (Funtley Road and a part of Funtley village). A number of areas would experience no change (Fareham and rural landscapes east and west of the Site). Limited indirect visual change may be experienced from farmland further north of Funtley up to Knowle village. Therefore, the effect on land use at the study area level would be at worst, **minor** negative, with the effects being very localised to the Site.

The many areas of mitigation planting associated with the proposed development would reduce the effects to at worst **minor** negative to **neutral** in the long term (year 15). Other positive benefits are predicted through the creation of new public open spaces that would be accessible to both existing and new residents.

There would therefore be a **neutral** effect to the settlement pattern of Fareham, existing open spaces and the existing transportation network.

6. Appraisal of Landscape and Visual Effects

6.3 Effects on Land Use (continued)

Site land use:

The areas within the Site would be permanently changed from privately owned pasture land to a residential development. The new uses would include associated green infrastructure incorporating, retained vegetation and woodland; new trees and boundary buffer planting; planting throughout the built areas; sustainable drainage features and a series green, open spaces within the built area and to the south of it.

The Site lies entirely within the landscape designation of Area Outside Of Defined Urban Settlement within the Core Strategy (adopted August 2011) and a part of the Site to the north-west is designated as existing open space within the Core Strategy. The latter is not currently accessible to the public and the land is within private ownership for equestrian uses.

The changes to incorporate a built development and new publicly accessible open spaces within these areas is consistent with Local Plan Part 2 Policy DSP40 Housing Allocations, and with emerging the emerging Local Plan 2036, which allocates the Site for residential development. In addition, the supporting Landscape Assessment update (part of the evidence base to the Plan) indicates that small scale and sensitively integrated development may be appropriate in this location, given the existing residential areas of Funtley Road.

At enabling construction stage, the existing uses of the Site would change, particularly in the areas proposed for built development and new access. However, change would be limited within the proposed open spaces of the community park to the south, except for the creation of new paths, and implementation of green infrastructure such as sustainable drainage, new grasslands and planting.

The construction site would gradually change to a built development, with associated landscape planting. The built element, while wholly changing land use, would only occur in a part of the Site to the north. The proposed community park would retain a largely open character to land to the south, and would incorporate new paths for walkers. This park, together with further linear greenspaces and an open

space incorporating play features, would be provide facilities for use by new and existing residents.

The value of the land use at Site level is medium; the susceptibility is medium - high; and sensitivity is medium - high. The magnitude of change would be medium - high at the enabling, construction and early years operational stages. Therefore, as with any greenfield site, the level of effects would be **moderate - major** negative, arising principally from the introduction of built form to the paddocks. In addition, the provision of publicly accessible open spaces would result in a **minor - moderate** positive effect from completion of development (Year 1).

By Year 15, mitigation planting would further temper the effects on the Site land use, so that at worst, **minor** negative effects are predicted. The positive effects of the open spaces would remain, while the many new areas of planting within the Site, and management of existing vegetation are also expected to give rise to positive effects (see para. 6.4).

6.4 Effects on Existing Vegetation

Study area vegetation:

There are expected to be no physical changes to the existing vegetation across the wider study area since the changes are proposed at Site level only. Existing vegetation along the north side of Funtley Road is not expected to be affected by the provision of new access into the Site.

The value is low - medium; susceptibility is low; and sensitivity is low. The magnitude of change would be neutral. Therefore the effect on the vegetation at the study area level is **neutral**.

Site vegetation:

The Great Beamond Coppice, the existing tree groups near the existing access entrance and the tree blocks within the south-western part of the Site are designated as Sites of Importance for Nature Conservation in the Core Strategy. The mature vegetation and trees within these areas are to be retained and protected during

the construction works, with careful consideration given to the recommendations of the project ecologist and arboriculturist.

The proposed development would protect and retain the Ancient Replanted Woodland of Great Beamond Coppice and majority of mature trees and boundary vegetation within the Site. A 15m buffer would be retained to the Coppice.

There is expected to be some loss of existing trees and boundary vegetation within the Site to accommodate the proposed development parcels and access roads. A part of this includes dense, ornamental conifers of limited value to landscape character. Further arboricultural works may be undertaken to other vegetation within the wider Site area, if deemed necessary by the relevant professional for health and safety reasons, to remove any dead, dying, diseased or dangerous parts of the retained vegetation.

The value of the vegetation at Site level is medium; susceptibility is medium; and sensitivity is medium. The magnitude of change arising from the limited necessary vegetation loss at enabling / construction stage is predicted to be medium, giving rise to at worst, **moderate** negative effects. However these effects would be localised to the northern part of the Site where built form is proposed.

Effects on the majority of the vegetation within the Site are expected to be **neutral** or potentially positive, where management of vegetation would ensure its retention and longevity.

There is ample opportunity within and around the proposed built area and proposed community park, for replacement and additional tree, hedge, shrub and other planting, including landscape buffer planting, making use of species appropriate to the space, position and function. This would mitigate for and improve, the visual and landscape effects of the vegetation removal required to facilitate effective development.

Further details are set out in the Design and Access Statement (DAS) accompanying the planning application.

6. Appraisal of Landscape and Visual Effects

6.4 Effects on Existing Vegetation (continued)

The planting would be implemented during the construction stage with the effects in place by Year 1 of the operational stage. The low magnitude of change would give rise to **minor** positive effects. The positive effects of this planting on the landscape assets of the Site, and views within and towards the built area, would further increase over time, as this matures. The effect on the Site vegetation by Year 15 would therefore be **moderate** positive.

6.5 Effects on Public Rights of Way

Study area public rights of way:

There would be no physical change to the existing public rights of way network during construction or operation. Visual effects are considered separately.

The value is medium - high; susceptibility is low; and sensitivity is medium. The magnitude of change would be neutral. Therefore the effect on the topography at the study area level during construction and operation is **neutral**.

There are opportunities to provide pedestrian connections between the proposed development and existing Bridleway 515 (along the disused railway line) to the immediate west. It may also be possible to open up a connection to Fareham via the footbridge over the M27 to the immediate south of the Site. This in turn could facilitate access by existing residents in this location to the open space and rights of way network north of the motorway.

As such, at the operational stage, the magnitude of change is predicted to be low, with effects the effects being **minor - moderate** positive in Years 1 and 15.

6.6 Effects on Landscape Character

National and county landscape character:

There would be **negligible** effects to the landscape character at national character level (NCA128 South Hampshire Lowlands) and county character level (LCA 3E Meon Valley). This is because the limited scale of the proposed development, and relatively high level of physical and visual enclosure of the Site, would result in changes that occur principally at the Site, and immediate local level.

There would be no change to the Portsdown Hill chalk ridge or Meon River described at NCA level, and the proposed development would form a very small part of NCA128 that is described as being dominated by large towns and with fragmentation by major transport links including the M27.

At county level, the proposed development would not affect the recreational route along the disused railway line to the west, and would retain a significant area of unbuilt land to the south, separating it from the motorway and Fareham settlement. Vegetation within the Site would be retained and protected as far as is practicable and potential adverse effects on the SINC and Ancient Replanted woodland within the Site have been designed out of the development proposals.

The value of the national and district character varies from low - high; susceptibility is low; and sensitivity is low - medium. The magnitude of change would be negligible, and therefore the effects would be **negligible**.

Borough and Site landscape character:

At Fareham Borough level, the Site lies within LCA 6: Meon Valley. While the Site comprises of pasture land, it is nonetheless subject to the nearby influences of relatively recent built form at Funtley, the live railway to the east and M27 and Fareham urban fringe to the south. The proposed development would form a limited addition to this existing built context.

The proposed development is set out to closely follow the parameters for the Site allocation set out in the emerging Local Plan. Thus, there would be built form in the northerly, lower lying and more level parts of the Site, forming a limited extension to the existing Funtley village. Like the existing residential development north of Funtley Road, development would be set back to allow a leafy green and spacious character to be retained along the road. Development is not proposed on the steep slopes or high ground of the Site.

In accordance with the LCA, the proposal protects the important landscape features of the Site - the steeply sloping landforms, unbuilt skyline, mature vegetation and openness to the south; while proposing to integrate many new areas of planting, including in association with new sustainable drainage features.

Development would, like the existing village, be kept to the relatively low lying part of the valley within which it lies, limiting the potential for widespread visual effects.

The proposed built form would respond to the positive aspects of existing built form both north of Funtley village and within the wider settled areas. A generous network of green infrastructure and open spaces are proposed. Further details are set out in the DAS accompanying the planning application.

The value of the borough character varies from low - medium; susceptibility is medium; and sensitivity is low - medium. The magnitude of change would be medium - high at the Site level only, reducing to negligible - low with distance across LCA6 from the Site. Therefore, the effects would be at worst, **moderate - major** negative for the parts of the Site proposed for built development at the construction and operational stage (Year 1). This is due to the change in character from semi-enclosed pasture fields to a residential development.

The changes beyond the proposed built area, would be at worst, **minor - moderate** negative (Year 1) for those areas immediately around the proposed built area - the existing village to the north and open land retained to the south - due to changes to the context and setting of these areas.

6. Appraisal of Landscape and Visual Effects

6.6 Effects on Landscape Character (continued)

However, further afield, the effects would be at worst, **minor** or **negligible**, due to the physical and visual separation of the Site from most of the area of Fareham borough LCA 6: Meon Valley.

As the planting associated with the green infrastructure areas matures through time, the landscape and visual effects would improve, so that at Site level, these are expected to be no greater than **minor** negative (on a clear day in winter) and at best, **minor - moderate** positive (Year 15) due to the additional physical enclosure, landscape integration and visual softening and screening provided by the proposed planting. In turn, the effects on the parts of the character area surrounding the Site would also be further tempered in the medium to long terms.

6.7 Effects on Visual Receptors

Residential Receptors

The residential receptors that will experience the most direct and proximate views of the construction site and emerging built development would be occupants of the few dwellings to the north side of Funtley Road, just east of the railway Bridge (Viewpoint 5).

Some additional residents along the north side of Funtley Road would also experience direct views, albeit with filtering of views through tall vegetation along both sides of Funtley Road - see Viewpoints 6, S13A, and winter views S3 and 7. This vegetation becomes more of a screen in summer views (with leaf cover). However, parts of this may require removal to facilitate access into the Site from Funtley Road and the built development, which in turn, may further increase visibility into the Site in the short term.

Further visual receptors along Roebuck Avenue and Stag Way may experience some partial and oblique views of the construction site and emerging built form where the roads themselves allow visibility toward parts of the Site - see Viewpoints 6b and 7 (winter view). The

Site boundary vegetation provides a greater level of visual screening to some views in summer. As above, some loss of vegetation may be required to facilitate access into the Site and the development itself, which may further increase visibility into the Site in the short term.

In all of these views, construction hoardings may partially obscure views.

There would also be oblique and more distant views of the construction site and emerging built development from the property (Bramleigh) at the south end of Honey Lane, due to its position on elevated ground and the relatively low level hedge at the boundary with the Site (Viewpoints S5, S6 and S13A, and summer Viewpoint 4). The views would be in context with existing views towards built form north of Funtley Road. While built form would be brought forward in the view, existing longer distance views towards the lower Downs, part of Knowle village and other built areas to the north of Funtley would be largely retained.

The completed development and newly implemented planting would create a new element in these views, replacing part of existing views of pasture fields. The areas of the Site remaining unbuilt would appear as a park with new areas of planting.

The value of the residential receptors is medium; susceptibility is medium - high; and sensitivity is medium - high. The magnitude of change at the construction and Year 1 operational stage would be medium - high, and therefore the effects would be at worst, **moderate - major** negative (Year 1), for the relatively limited number of residents with potential views towards the proposed development. The many areas of mitigation planting would contribute to some visual softening of the built areas in the early years. However in the mid to long terms this is predicted to create a significant amount of visual softening and screening, and therefore a bettering of the visual effects. Thus by Year 15, the effects are predicted to reduce to at worst, **minor** negative (the greater effects being on a clear day in winter).

Views from the dwelling at the south end of Honey Lane would retain long views out to the distant countryside to the north, albeit beyond additional areas of built form and planting within the valley. Views from dwellings to the north side of Funtley Road are likely to retain some partial views of the higher, southern parts of the Site, as a backdrop to the built form in the foreground.

Receptors using Roads

The views would be very similar to those described for the residential receptors above, and therefore includes parts of Funtley Road, Honey Lane, Roebuck Avenue and Stag Way (see Viewpoints 4-7, 8 and S13A). In all cases, the views would be transitory and Site hoardings may partly screen views.

Views from the western part of Funtley Road are likely to be more open due to the more limited nature of existing vegetation here, albeit the necessary vegetation removal to facilitate access and development to the east may also increase visibility into the Site in the short term.

Views from Honey Lane are rather more limited by existing vegetation at the boundary with the Site, even in winter. Visibility is mainly from two gaps in this vegetation at the north and south ends of the lane.

The value of the receptors using the roads is low; susceptibility is low; and sensitivity is low. The magnitude of change at the construction and Year 1 operational stage would be medium - high, and therefore the effects would be at worst, **minor - moderate** negative (Year 1). The setback of development from the roads edging the Site and landscape buffer planting would contribute to mitigating effects in the short to medium terms. By year 15, the landscape buffers would provide more robust visual softening and screening, reducing the effects to at worst, **minor** negative.

6. Appraisal of Landscape and Visual Effects

6.7 Effects on Visual Receptors (continued)

Receptors using Public Rights of Way and M27 footbridge

There is a slight possibility that users of Public Footpaths 88 and 89 to the east of Funtley (Viewpoints 9 and) may be aware of tall construction plant within the Site, should this be required to facilitate development. There may also be some awareness of works to provide the proposed community park in the south-eastern part of the Site. Any potential views to the construction site would be distant and form part of a wide panorama that includes parts of Funtley, the telecommunications mast on the Site and pylons carrying overhead wires, as well as farmland and vegetation in the intervening areas. The construction effects are therefore predicted to be **negligible**.

Due to the landform of the Site and vegetation and built form in the intervening areas, no notable views of the proposed development or associated proposed community park are predicted from these two footpaths. The operational effects are therefore predicted to be **neutral**.

From Public Bridleway 515 to the immediate west of the Site, walkers and equestrians in the vicinity of the bridge crossing over Funtley Road are likely to gain glimpsed views of the construction site and emerging built form. Views would be filtered by existing vegetation along the disused railway embankment and less apparent from the section north of Funtley Road than from that to the south - see winter Viewpoints 12A and 14A. By the operational stage, these glimpses would be replaced by a completed development, seen in context with existing partial views through the vegetation of existing dwellings north of Funtley Road.

The value of the receptors using Bridleway 515 is medium; susceptibility is medium; and sensitivity is medium. The magnitude of change at the construction and Year 1 operational stage would be medium, and therefore the effects would be at worst, **moderate** negative (Year 1). The setback of development from the western and

northern edges of the Site and landscape buffer planting here and to the south would contribute to mitigating effects in the short to medium terms. By year 15, the landscape buffers would provide more robust visual softening and screening, reducing the effects to at worst, **minor** negative. In summer, views to the proposed development are likely to be less evident as existing vegetation would reduce visibility towards the Site.

From the bridge crossing over the M27, there is little opportunity for views into the Site and no notable views of the construction phase for the southern community park are proposed. The land proposed for the built development would not be visible either during or following construction. Therefore effects are judged to be **minor** for this receptor.

Discounted Visual Receptors

No views during construction or operation are predicted from the following middle distance and wider area locations as the views are truncated by landform, vegetation and / or built form: Viewpoints 1 and 2 - Funtley Lane and Lakeside; summer Viewpoints 12 and 14 from Bridleway 515, to the west; and more distant Viewpoints 11, 13 and 19 (from the west / north-west) and 15 - 18 (from the north-east). No views towards the Site were identified from the South Downs National Park.

7. Policy Compliance

7.1 Emerging Fareham Local Plan 2036 (Draft Consultation Version)

The proposed development is consistent with the Development Allocation for the Site (Policy HA10), set out in the emerging Fareham Local Plan 2036 (see Figure 2.4). It confines the proposed development to the northern parts of the Site; and creates new public open space in the form of parkland with paths to the south. It respects a 15m buffer to Great Beamond Coppice and protects the majority of the existing vegetation within and bounding the Site. The proposal creates new public open space with play elements in the north, incorporating existing vegetation designated as a SINC. The proposed open spaces more than compensate for the loss of the existing designated open space land within the Site (which is not currently accessible to the public).

Access is proposed to be taken from Funtley Road, making use of the existing access track into the Site. Green corridors, buffers and spaces are integral to the proposed built and green infrastructure areas. Sustainable drainage features are proposed, potentially contributing to the biodiversity and landscape value of the Site. View corridors would be retained between development blocks, allowing views towards the undeveloped southern slopes from Funtley Road to be retained. In accordance with emerging Policy CF6, the open space provision would more than compensate for the change of use of the existing open space designation with the Site (which is not currently accessible to the public).

A total of 55No dwellings are proposed in accordance with the Site allocation. The built form would respect the positive aspects of existing settlement character, and further details on this, and the proposed landscape mitigation are set out in the DAS. Community facilities and pedestrian and cycle links to surrounding areas to the north, south, west and east are also proposed (Policy D1).

The setbacks of the proposed development from the Site boundaries to the north and west, and proposals for landscape buffers with many new areas of planting here and to the south, would create a significant landscape framework that together with the retained

vegetation would contribute to effective landscape integration of the built areas.

In turn, this planting, as well as planting within the built areas would contribute to meaningful visual softening and partial screening of the development from surrounding built areas, while partial views of the higher, undeveloped slopes of the Site would be retained. This is consistent with the aims of the policy.

The confinement of the proposed built area to the existing, developed valley floor (through which Funtley Road runs) would limit the extent to which the proposals would impact on the character of the Site and wider surrounding landscape (Policies NE1 and D1). This is because this part of the Site already benefits from a high degree of landscape and visual containment, by surrounding landform (including railway embankments), built form and existing mature and dense vegetation. The higher slopes of the Site, which are intervisible with elevated farmland north of Funtley and up to Knowle village, would remain undeveloped and additional planting is proposed in these locations.

7.2 National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG)

In terms of section 7 of the NPPF and NPPG section ID 26 relating to design, the proposed development seeks to provide attractive, high quality and inclusive design; with a strong sense of place, that is integrated with and respectful to the character and pattern of the local area. The proposed provision of a community building, community park and public open space with play areas provide opportunities for social interaction and active lifestyles. The built areas would be developed on the basis of perimeter blocks with good natural surveillance to all public areas. Adaptability and efficiency of the built environment would be important considerations. The proposed development carefully considers the topography of the Site and potential impact on views in the layout and form of the built areas.

In accordance with sections 8 (healthy communities) and 10 (climate change) of the NPPF, the areas of green and blue infrastructure would support action to combat effects of climate change through

provision of shading, water attenuation, and carbon absorption. Consistent with section 10 of the NPPF. Regarding NPPF section 11 (natural environment) the proposals protect the undulating landform of the Site and the majority of the existing vegetation, and seek to improve the biodiversity of the Site by creating further diversity to the range of planting and grassland types within it.

In accordance with NPPG Paragraphs 009 and 015 the proposed development promotes green infrastructure including a number of open and green public spaces; it respects natural features, and promotes a high quality landscape with many areas of planting that contributes to the quality of the local area. By placing development in the lower parts of the Site, and in association with existing built form, the wider landscapes of the Site would be maintained as open, while there would be negligible impact on surrounding areas (NPPG section ID 8).

7.3 Fareham Local Development Framework, Core Strategy (Adopted August 2011)

In turn, these proposals for the Site are consistent with the Fareham Core Strategy (2011) Strategic Objectives SO10 (to manage, maintain and improve the built and natural environment to deliver quality places, taking into account the character and setting of existing settlements); SO11 (to protect sensitive habitats and maintain separate settlement identity); as well as Policy CS4 (protection of habitats important to biodiversity and provision of accessible green space for informal recreation); Policy CS14 (to protect countryside from adverse effects on landscape, character and function arising from development); Policy C17 (to create high quality development that adheres to good urban design and sustainability principles, that is respectful of landscape, scale, form and spaciousness, and that includes greenways and trees within the public realm); Policy CS21 (to seek to provide alternative, and better public open space provision to replace the designated area of open space within the Site); and, Policy CS22 (the proposal does not affect the Strategic Gap located west of the disused railway line).

7. Policy Compliance

7.4 Fareham Borough Local Plan Part 2: Development Sites and Policies (Adopted June 2015)

Referring to the Fareham Borough Local Plan Part 2 (2015), the proposed development:

- Seeks to mitigate and improve any potential impacts on neighbouring development and adjoining land, through respectful layout and provision of a robust landscape framework (In accordance with Policies DSP2 and DSP40);
- Does not adversely affect heritage assets (In accordance with Policies DSP5 and DSP40);
- Lies outside of the Defined Urban Settlement Boundary, but is located close to and would be in keeping with the character, scale and appearance of surrounding areas; is sited and designed to integrate with the existing settlement and prevent detracting from existing landscape; and is laid out to respect views into and out of the Site and to the elevated land to the south (In accordance with Policies DSP6 and DSP40);
- Protects designated nature conservation sites and provides additional planting within or around these; provides a wide range of new grassland, herbaceous, aquatic, shrub, hedge and tree planting, including native species and species supporting potential habitat creation, nectar and pollen provision; and retains the majority of the existing vegetation on the Site, providing a number of new landscape buffers and other areas of planting, as well as sustainable drainage ponds that would contribute to maintaining and reinforcing the biodiversity network (In accordance with Policies DSP13 and DSP40); and
- Does not adversely affect a Strategic Gap (In accordance with Policy DSP40).

In terms of the Planning Obligations Supplementary Planning Document for the Borough of Fareham (Excluding Welborne) Adopted April 2016, the proposed development provides a village green integrating play features to the north; and a community park to the south. In total, over 53% of the Site area (8.62ha out of 16.18ha) would remain undeveloped, for use as open spaces and for green and blue infrastructure.

7.5 Landscape Character

In accordance with Statement of Opportunity 1 (SEO1) set out in the profile for **National Character Area 128: South Hampshire Lowlands**, the proposed development promotes creative and effective sustainable development, including a well-connected network of high-quality greenspace, which would benefit local communities, protect local distinctiveness, encourage public understanding and enjoyment of the natural environment, and help to mitigate the impacts of climate change.

In addition, in accordance with SEO2, the proposed development would protect, manage and enhance the area's historic well-wooded character – including its ancient semi-natural woodlands and hedgerows – to link and strengthen habitats for wildlife, and improve recreational opportunities.

There is also opportunity, in accordance with SEO3 to diversify the grassland habitats with the Site, providing recreational opportunities and potential improved biodiversity.

In accordance with the opportunities for **Hampshire County Landscape Character Area 3E: Meon Valley**, the proposed development:

- Keeps development within the valley bottom and avoids building on the slopes and elevated parts of the Site;
- Retains the majority of the existing vegetated boundary structure to the Site;
- Provides many areas of green infrastructure with retained and new planting; and
- Creates potential pedestrian / cycle links to existing settlements and public rights of way.

In accordance with the priorities for enhancement for **Fareham Borough Landscape Character Area 6: Meon Valley**, the proposed development:

- Protects important landscape and ecological resources, woodland and the slopes and ridge of the Site, which form part of the valley within which it lies;
- Creates a development that is limited in extent and which relates well to the existing Funtley village, maintaining an informal, rural character to the southern parts of the Site (community park);
- Provides opportunity to remove unsightly features from the Site;
- Sets development away from the Site boundaries, providing space to reinforce existing boundary vegetation with additional landscape buffers, that protect the character of the nearby roads and settlement. Where vegetation removal is required to facilitate safe access and egress from the Site, this would be minimised as far as possible, with new planting provided within the Site, outside of visibility splays; and
- Reinforces the retained green infrastructure network with many new areas of planting, including as part of the sustainable drainage strategy.

8. Summary and Conclusions

8.1 Summary of the baseline conditions

The Site is located at south-western edge of Funtley village in Hampshire and is bound by Funtley Road to the north and Honey Lane to the west.

The Site lies wholly within the landscape designation of 'Areas outside of Defined Urban Settlement' as defined in the proposal map of the Fareham Borough Core Strategy (adopted August 2011), whilst the area within north-western part of the Site is also designated as 'Existing Open Space' albeit this is not currently accessible to the public. The Ancient Woodland of Great Beamond Coppice is also located within the north east of the Site.

The Great Beamond Coppice is designated as a Site of Importance for Nature Conservation together with the existing tree groups located near the existing access entrance along the northern boundary and south-western boundary as shown on Figures 2.1 and 4.1. There are no other landscape designations within the Site. The Site is also subject to the influences of the nearby M27 motorway, settlement at Funtley village and the live railway to the east; with the addition of a telecommunications mast and timber poles carrying overhead lines within the Site. Therefore, the existing Site is considered to have a medium landscape value overall.

The Site is allocated for residential units in the emerging Fareham Local Plan 2036, subject to Policy HA10. In addition, the updated Borough Landscape Assessment (part of the Local Plan evidence base) indicates that small scale and sensitively integrated development could be accommodated in this location. The development allocation would remove the open space designation within the Site, albeit other existing policy provision seeks the provision of alternative or better uses. Several new, publicly accessible open spaces are therefore included as part of the scheme proposals.

Across the study area, there are a number of heritage assets comprising of Listed Buildings, Scheduled Ancient Monuments and local non-designated heritage asset Historic Parks and Gardens. There are no heritage assets located within or adjacent to the Site and none would be affected by the proposed development.

Views of the Site from the wider landscape (including the South Downs National Park) are truncated due to the undulating landform and intervening vegetation, whilst open and partial views of the internal ground plane and vegetation within and along the Site are apparent from the receptors located within close proximity of the Site - along parts of Funtley Road, Stag Way, Roebuck Avenue, Honey Lane; along part of Bridleway 515 to the west, near the bridge crossing over Funtley Road; and from parts of Public Footpaths 88 and 89 to the east of Funtley.

8.2 Summary of the landscape effects

The proposed development within the Site would not noticeably alter the landscape character at the national or county levels as discussed in this LVIA (**negligible** effects).

It is predicted that there would be, at worst, a **moderate - major** negative effect on land use landscape character at Site level - that is, the parts of the Site proposed for built development, due to the change in character from semi-enclosed pasture fields. Beyond this built area, the effects on the character of the wider Site and immediate context is predicted to be at worst, **minor - moderate** negative, but on the wider Borough character area, effects would be no greater than **negligible** or **minor**. Nevertheless, the proposed development is sited in close proximity to existing settlement and would not affect separate settlement identity or gaps.

Some modifications to landform would be required within the Site to provide safe access into, out of and within the proposed development, and to provide effective development platforms. The more steeply sloping and elevated parts of the Site would not be built on, with localised ground modelling only required to construct new pedestrian and cycle paths.

The effect on the Site landform is predicted to be at worst, **minor - moderate** negative at the construction stage only. Vegetation removal within the Site would be limited to that essential to facilitate effective development, to provide a safe area for new residents, or for other arboricultural or ecological reasons as identified by the relevant project specialists. The effects are predicted to be at worst, **moderate** negative at the construction stage, albeit these effects would be largely localised to the area proposed for built form.

The proposed development would, from the outset, be contained within an existing landscape framework of retained and protected mature hedges, trees, tree belts and woodland. There would also be retained open land (for community park uses) to the south. The proposed village green open space to the north would include play facilities and incorporate the retained SINC.

As the many areas of proposed landscape mitigation planting mature, the short term negative effects on land use and landscape character identified above would improve considerably with time, further reinforcing landscape integration, visual softening and partial screening.

Thus the effects on Site character and the immediate context would reduce by Year 15 to at worst **minor** negative (a clear day in winter) to at best **minor - moderate** positive, due to the ongoing positive management of the existing vegetation within the Site, and reinforcement of this with an additional robust network of varied landscape planting, diverse grasslands and planting associated with the proposed sustainable drainage features.

The many new areas of planting proposed would replace vegetation lost, while providing a considerable additional resource to the Site. Therefore, the effect on the Site vegetation is predicted to be **minor** positive in Year 1 and **moderate** positive by Year 15 when this is maturing.

8. Summary and Conclusions

8.2 Summary of the landscape effects (continued)

In terms of land use and the designated open space area of the Site, the provision of a total of 8.62ha of new publicly accessible open space with the proposed development is predicted to give rise to **minor - moderate** positive effects from Year 1 of operation. This would mean that over 53% of the total Site area of 16.18ha) would remain undeveloped and semi-rural in character.

Furthermore, the potential to provide pedestrian and cycle links to existing settlement north of Funtley Road, to Bridleway 515 to the west, and to Fareham to the south (by opening up the bridge link over the M27), the proposed development is predicted to give rise to **minor - moderate** positive effects on the public rights of way network from Year 1.

8.3 Summary of the visual effects

Regarding visual effects, the most noticeable visual change arising from the proposed development would be for the road users of Funtley Road and residents along the north side of the road, including a few residents of Stag Way and Roebuck Avenue. The views would be direct and in close range of the Site, albeit some views would be partly filtered by existing boundary vegetation.

Residents of Bramleigh at the south end of Honey Lane would have more distant and elevated views to the proposed development, seen in context with existing development at Funtley, and the farmland, and built areas including part of Knowle village to the north of Funtley. While development would be brought forward in these views, overall, the character and amenity of the panoramic views would be retained.

The construction and Year 1 operational effects are predicted to be at worst, **moderate - major** negative for residents along Funtley Road / Stage Way / Roebuck Avenue / Honey Lane; and **minor - moderate** negative for the transient receptors using Funtley Road. The mitigation planting associated with the built development would reduce these visual effects to at worst, **minor** negative for Funtley

Road residents and road users by Year 15. The scheme proposes to retain views beyond the built area to the elevated and more open higher ground within the community park to the south.

No notable visual effects are predicted from Public Footpaths 88 and 89 to the east of Funtley, due to the limited areas of the Site visible, and screening by landform, built form at Funtley and vegetation in the intervening areas.

From Bridleway 515 to the west, some partial views and glimpses of the proposed development would be seen beyond existing vegetation along the embankments of the disused railway line. These views would be in context with partial views and glimpses of existing built form to the north of the Site, and would be in context with retained semi-open parkland with additional planting south of the built area. The Year 1 effects are predicted to be at worst, **moderate** negative, and only from a short section of the Bridleway in the vicinity of the bridge crossing over Funtley Road. By Year 15, the softening and enclosing effect of mitigation planting is predicted to reduce the visual effects to at worst, **minor** negative. There would be no views of the development from most sections of the Bridleway due to physical and visual separation by dense vegetation in the intervening areas.

8.3 Conclusions

It is considered that the proposed development, which is subject to an allocation in the emerging Fareham Local Plan 2036, would represent a relatively limited and logical extension to an existing settlement. No widespread landscape or visual effects are predicted, and those effects predicted to occur at a Site and immediate site context level can be effectively mitigated and compensated for. The proposed development also offers opportunity for long term management of the Site and its mature vegetation (including Ancient Replanted Woodland); and provision of an additional robust structure of green infrastructure incorporating a diverse range of planting and grasslands, including within the areas of sustainable drainage. There would be the provision of a considerable area of new publicly accessible open space. The development is proposed to

be well connected to existing settlement and public rights of way. In conclusion, therefore, with careful consideration of the constraints and opportunities of the Site, an appropriate development can be provided without substantial harm to landscape or views, but which provides a number of community and landscape benefits.

Appendix 1 – fabrik LVA Methodology

A1.1 Introduction

The methodology employed in carrying out an LVA or LVA with an impact statement of the Site, is drawn from the Landscape Institute and the Institute of Environmental Management and Assessment's "Guidelines for Landscape and Visual Impact Assessment" (GLVIA) Third Edition (Routledge 2013).

The term landscape is defined as an area perceived by people, whose character is the result of the action and interaction of nature and / or human factors. It results from the way that different components of our environment – both natural and cultural / historical interact together and are perceived by us. The term does not mean just special, valued or designated landscapes and it does not only apply to the countryside. The definition of landscape can be classified as:

- All types of rural landscape, from high mountains and wild countryside to urban fringe farmland (rural landscapes);
- Marine and coastal landscapes (seascapes); and
- The landscape of villages, towns and cities (townscapes).

An LVA with an impact statement provides a description of the baseline conditions and sets out how the study area and site appears, or would appear, prior to the proposed development. The baseline assessment is then used to predict the landscape and visual impacts arising from the proposed development. The assessment of impact is carried out as part of the iterative design process in order to build in mitigation measures to reduce the impacts as much as possible. The impact assessment will identify and assess effects during the construction and operational stages of the proposed development.

A1.2 Summary Overview of LVA Methodology

The LVA baseline assessment describes:

- Each of the landscape elements which then collectively inform landscape character for the contextual area to the site and the site itself;
- The character, amenity and degree of openness of the view from a range of visual receptors (either transient, serial or static views);
- The current baseline scenarios;
- The value of each of the landscape and visual receptors.

Landscape effects derive from changes in either direct or in-direct changes to the physical landscape, which may give rise to changes to the individual landscape components which in turn effects the landscape character and potentially changes how the landscape is experienced and valued.

Visual effects relate to the changes that arise in the composition, character and amenity of the view as a result of changes to the landscape elements.

The assessment of effects therefore systematically:

- Combines the value of the receptor with the susceptibility to the proposed change to determine the sensitivity of the receptor;
- Combines the size, scale, geographic extent, duration of the proposals and its reversibility in order to understand the magnitude of the proposal.
- Combines the sensitivity of the each of the receptors and the magnitude of effect to determine the significance of the effect.
- Presents the landscape and visual effects in a factual logical, well-reasoned and objective fashion.
- Indicates the measures proposed over and above those designed into the scheme to prevent/avoid, reduce, offset, remedy, compensate for the effects (mitigation measures) or which provide an overall landscape and visual enhancement;

- Sets out any assumptions considered throughout the assessment of effects.

Effects may be positive (beneficial) or negative (adverse) direct or indirect, residual, permanent or temporary short, medium or long term. They can also arise at different scales (national, regional, local or site level) and have different levels of significance (major, moderate, low, negligible or neutral / no change). The combination of the above factors influences the professional judgement and opinion on the significance of the landscape and visual effect.

The following sections sets out in more detail the assessment process employed.

A1.3 Establishing the Landscape Baseline

Desk and Field Studies: The initial step is to identify the existing landscape and visual resource in the vicinity of the proposed development – the baseline landscape and visual conditions. The purpose of baseline study is to record and analyse the existing landscape, in terms of its constituent elements, features, characteristics, geographic extent, historical and cultural associations, condition, the way the landscape is experienced and the value / importance of that particular landscape. The baseline assessment will also identify any potential changes likely to occur in the local landscape or townscape which will change the characteristics of either the site or its setting.

An desk study is carried out to establish the physical components of the local landscape and to broadly identify the boundaries of the study area. Ordnance survey (OS) maps and digital data is used to identify local features relating to topography/ drainage pattern, land cover, vegetation, built developments/settlement pattern, transport corridors/definitive public rights of way and any historic or prominent landscape features, which together combine to create a series of key characteristics and character areas. Vertical aerial photography will be used, to supplement the OS information. At this stage, any special designated landscapes (such as Areas of Outstanding Natural Beauty, National Parks, Green Belt, Conservation Areas, Listed Buildings, Areas of Special Character); heritage or ecological assets are identified. A review of information available in terms of any published historic landscape characterisation together with any other landscape / capacity / urban fringe and visual related studies is carried out at this stage.

Landscape character assessment, is the tool for classifying the landscape into distinct character areas or types, which share common features and characteristics. There is a well established methodology developed in the UK by the Countryside Agency and Scottish Natural Heritage in 2002, with further guidance published by Natural England in 2014. The national and regional level character assessments are often available in published documents, however the local / district or site levels may need to be set out

based on a combination of desk studies and field survey work. The character assessment will also identify environmental and landscape opportunities, recent changes, future trends and forces for change where they may be important in relation to the proposal, especially considering how the landscape appears, or would appear prior to the commencement of development. The condition of the landscape, i.e. the physical state of an individual area of landscape, is described as factually as possible. The assessment of landscape importance includes reference to policy or designations as an indicator of recognised value, including specific features or characteristics that justify the designation of the area. The value of that landscape by different stakeholders or user groups may also influence the baseline assessment.

If published local / site level landscape character assessments are not available, the landscape is to be classified into distinctive character areas and / or types, based on variations in landform, land cover, vegetation / settlement pattern, field pattern, enclosure, condition, value and etc. The classification will take into account any National, County/District and Parish level landscape character assessments.

These desk based studies are then used as a basis for verification in the field.

Judgements on the value of both the landscape and visual receptor are made at the baseline stage.

Landscape Value

Value is concerned with the relative value or importance that is attached to different landscapes. The baseline assessment considers any environmental, historical and cultural aspects, physical and visual components together with any statutory and non-statutory designations and takes into account other values to society, which may be expressed by the local community or consultees. These tables are considered a starting point for consideration in the field. The landscape designations are to be considered in terms of their ‘meaning’ to today’s context. The following table sets out the criteria

and definitions used in the baseline assessment to determine landscape value at the local or site level (in addition to condition / quality as set out on the previous page). Wherever possible information and opinions on landscape value is to be sought through discussions with consultees, stakeholders and user groups.

Table A1.1 sets out the criteria used to determine landscape condition / quality and value at the local or site level in the field.

Table A1.1 – Landscape Value Criteria

Criteria
<p>High (Very Good / Good Condition) International - National - Regional Scale</p> <ul style="list-style-type: none"> • Exceptional landscape with outstanding perceptual qualities. Very attractive, intact, natural, scenic, rare, wild and tranquil. The landscape may include World Heritage Sites, National Parks, Areas of Outstanding Natural Beauty or Heritage Coast or key elements/features within them; together with any non-statutory designations. Alternatively, the landscape may be un-designated but is valued as set out in published landscape character assessments and which, for example, identify and artistic and literary connections which assist in informing the identify of a local area (such as ‘Constable Country’); • Recognisable landscape or townscape structure, characteristic patterns and combinations of landform and landcover are evident, resulting in a strong sense of place; • No or limited potential for substitution and which is susceptible to small changes; • A landscape that contains particular characteristics or elements important to the character of the area; • A valued landscape for recreational activity where the experience of the landscape is important; • Good condition with -appropriate management for land use and land cover, or with some scope to improve certain elements; • Distinct features worthy of conservation; • Unique sense of place; • No or limited detracting features.

Criteria
<p>Medium (Good - Ordinary Condition) Regional - Local Scale</p> <ul style="list-style-type: none"> • Ordinary landscape and perceptual qualities. The landscape may include local designations such as Special Landscape Areas, Areas of Great Landscape Value, Strategic or Local Gaps; or un-designated but value expressed through literature, historical and / or cultural associations; or through demonstrable use by the local community; together with any non-statutory designations. Alternatively, the landscape may be valued through the landscape character assessment approach. • Distinguishable landscape or townscape structure, with some characteristic patterns of landform and landcover; • Potential for substitution and tolerant of some change; • Typical, commonplace farmed landscape or a townscape with limited variety or distinctiveness; • A landscape which provides recreational activity where there are focused areas to experience the landscape qualities; • Scope to improve management; • Some dominant features worthy of conservation; • Some detracting features.
<p>Low (Ordinary - Poor Condition) Local /Site Scale</p> <ul style="list-style-type: none"> • Poor landscape and perceptual qualities. Generally un-designated. Certain individual landscape elements or features may be worthy of conservation and landscape either identified or would benefit from restoration or enhancement (such as local parks and open spaces). Alternatively, the landscape may be valued through the landscape character assessment approach. • Monotonous, weak, uniform or degraded landscape or townscape which has lost most of it's natural or built heritage features and where the landcover are often masked by land use; • Tolerant of substantial change; • A landscape which provides some recreational activities with limited focus on the landscape attributes; • Lack of management and intervention has resulted in degradation; • Frequent dominant detracting features; • Disturbed or derelict land requires treatment.

A1.4 Establishing in the Visual Baseline

Desk and Field Studies: The visual baseline will establish the area in which the site and the proposed development may be visible, the different groups of people who may experience the views, the places where they will be affected and the nature, character and amenity of those views.

The area of study for the Visual Assessment is determined through identifying the area from which the existing site and proposal may be visible (the Zone of Theoretical Visibility or ZTV). The baseline ZTV of the site is determined through either manual topographical analysis (a combination of desk and field based analysis which are considered appropriate for Landscape and Visual Appraisals and projects below the EIA threshold) or digital mapping based on bare earth modelling, (which do not take account of features such as vegetation or built form) constructing a map showing the area where the proposal may theoretically be visible. The extent of the mapping will depend on the type of proposal. The actual extent of visibility is checked in the field (both in the summer and winter months if the project timescales allow) to record the screening effect of buildings, walls, fences, trees, hedgerows and banks not identified in the initial bare ground mapping stage and to provide an accurate baseline assessment of visibility. Viewpoints within the ZTV should also be identified during the desk assessment, and the viewpoints used for photographs selected to demonstrate the relative visibility of the site (and any existing landscape and built forms). The selection of a range of key viewpoints will be based on the following criteria for determination in the field:

- The requirement to provide an even spread of representative, specific, illustrative or static / kinetic / sequential / transient viewpoints within the ZTV and around all sides of the Site.
- From locations which represent a range of near, middle and long distance views (although the most distant views may be discounted in the impact assessment if it is judged that visibility from this distance will be extremely limited).
- Views from sensitive receptors within designated, historic or cultural landscapes or heritage assets (such as from within World Heritage Sites; adjacent to Listed Buildings - and co-ordinated

with the heritage consultant - Areas of Outstanding Natural Beauty or Registered Parks and Gardens) key tourist locations and public vantage points (such as viewpoints identified on OS maps).

- The inclusion of strategic / important / designed views and vistas identified in published documents.

Views from the following are to be included in the visual assessment:

1. Individual private dwellings. These are to be collated as representative viewpoints as it may not be practical to visit all properties that might be affected.
2. Key public buildings, where relevant (e.g. libraries; hospitals, churches, community halls etc)
3. Transient views from public viewpoints, i.e. from roads, railway lines and public rights of way (including tourist or scenic routes and associated viewpoints);
4. Areas of open space, recreation grounds and visitor attractions; and
5. Places of employment, are to be included in the assessment where relevant.

A1.4 Establishing in the Visual Baseline (continued)

The final selection of the key viewpoints for inclusion in the LVA will be based proportionately in relation to the scale and nature of the development proposals and likely significant effects and in agreement with the LPA.

The visual assessment should record:

- The character and amenity of the view, including topographic, geological and drainage features, woodland, tree and hedgerow cover, land use, field boundaries, artefacts, access and rights of way, direction of view and potential seasonal screening effects will be noted, and any skyline elements or features.
- The type of view, whether panoramas, vistas or glimpses.

The baseline photographs are to be taken in accordance with the Landscape Institutes technical guidance on Photography and Photomontage in LVIA (Landscape Institute 2011). The extent of visibility of the range of receptors is based on a grading of degrees of visibility, from a visual inspection of the site and surrounding area. There will be a continuity of degree of visibility ranging from no view of the site to full open views. Views are recorded, even if views are truncated of the existing site, as the proposed development may be visible in these views. To indicate the degree of visibility of the site from any location three categories are used:

a) **Open View:**

An open, unobstructed and clear view of a significant proportion of the ground plane of the site; or its boundary elements; or a clear view of part of the site and its component elements in close proximity.

b) **Partial View:**

A view of part of the site, a filtered or glimpsed view of the site, or a distant view where the site is perceived as a small part of the wider view;

c) **Truncated View:**

No view of the site or the site is difficult to perceive.

Following the field survey (which should cover ideally both winter and summer views) the extent to which the site is visible from the surrounding area will be mapped. A Photographic Viewpoint Plan will be prepared to illustrate the representative, specific and illustrative views into / towards and within the Site (if publicly accessible) and the degree of visibility of the site noted. This Plan will be included in a Key Views document for agreement with the Local Planning Authority and any other statutory consultees as part of the consultation process. The visual assessment will include a series of annotated photographs, the location and extent of the site within the view together with identifying the character and amenity of the view, together with any specific elements or important component features such as landform, buildings or vegetation or detracting features which interrupt, filter or otherwise influence views. The photograph will also be annotated with the Value attributed to the receptor or group of receptors.

By the end of this stage of the combined landscape and visual site study, it will be possible to advise, in landscape and visual terms, on any specific mitigation measures required in terms of the developments preferred siting, layout and design.

Value of Visual Receptors

Judgements on the value attached the views experienced are based on the following criteria.

Table A1.2 – Value Attached to Views

Value	Criteria
High	Views from landscapes / viewpoints of national importance, or highly popular visitor attractions where the view forms an important part of the experience, or with important cultural associations. This may include residential receptors in Listed Buildings where the primary elevation of the dwelling is orientated to take advantage of a particular view (for example across a Registered Park and Garden or National Park).
Medium	Views from landscapes / viewpoints of regional / district importance or moderately popular visitor attractions where the view forms part of the experience, or with local cultural associations. This may include residential receptors where the primary elevation of the dwelling is orientated to take advantage of a particular view.
Low	Views from landscapes / viewpoints with no designation, not particularly important and with minimal or no cultural associations. This may include views from the rear elevation of residential properties.

Susceptibility of the Visual Receptor to the Proposed Change

The susceptibility to the proposed changes in views and visual amenity occur as a result of the occupation or activity of people experiencing the view and the extent to which their attention or interest may be focused on the views and the visual amenity they experience. The grouping of susceptibility of the visual receptors is set out later in this document.

A1.5 Predicting and Describing the Landscape and Visual Effects

An assessment of visual effect deals with the change on the character and amenity arising from the proposal on the range of visual receptors.

The assessment of effects aims to:

- Identify systematically and separately the likely landscape and visual effects of the development;
- Identify the components and elements of the landscape that are likely to be affected by the scheme;
- Identify interactions between the landscape receptors and the different components of the development at all its different stages (e.g. enabling, construction, operation, restoration etc);
- Indicate the secondary mitigation measures over and above those already designed into the scheme proposed to avoid, reduce, remedy or compensate for these effects;
- Estimate the magnitude of the effects as accurately as possible and considering this in relation to the sensitivity of the receptor; and
- Provide an assessment of the significance of these effects in a logical and well-reasoned fashion.

Having established the value of the landscape and visual receptor, the effects are then considered in relation to the magnitude of change, which includes the size / scale, geographical extent of the areas influenced and the duration and reversibility.

Wherever possible tables or matrixes will be used, linked with the illustrative plans, so that the landscape and visual effects are recorded and quantified in a systematic and logical manner. Consideration is given to the impacts on completion of development at Year 1 and at maturity (Year 15) (to represent short, medium and long term effects) so that the effects of the development after mitigation has matured are identified. Assumptions or limitations to the assessment will also be set out.

Effects will include the direct and/or indirect impacts of the development on individual landscape elements / features as well as the effect upon the general landscape character and visual receptors.

Landscape Susceptibility

Landscape susceptibility is evaluated by its ability to accommodate the proposed change (i.e. the degree to which the landscape is able to accommodate the **proposed** change without undue consequences for the maintenance of the baseline situation and / or the achievement of landscape planning policies and strategies) as set out in Table A1.2.

As part of the assessment of the landscape character and its component parts, conclusions will be drawn as to the overall susceptibility of the landscape / landscape elements and visual environment to the type of development proposed. Existing landscape capacity assessments may form a starting point for the refinement of the assessment of landscape susceptibility at the local and site level.

Table A1.3 – Landscape Susceptibility Criteria

Susceptibility	Criteria
High	A landscape or townscape particularly susceptible to the proposed change, which would result in significant negative effects on landscape character, value, features or individual elements.
Medium	A landscape or townscape capable of accepting some of the proposed change with some negative effects on landscape character, value, features or elements.
Low	A landscape or townscape capable of accommodating the proposed change without significant negative effects on landscape character, value, features or elements.

Landscape Sensitivity

The assessment of landscape sensitivity is then combined through a judgement on the value attributed to that landscape receptor / component and the susceptibility of the landscape receptor to the proposed change using the following matrix.

Table A1.4 - Landscape Sensitivity

		Landscape Receptor Susceptibility		
		High	Medium	Low
Landscape Value	High	High	High - Medium	Medium
	Medium	High - Medium	Medium	Medium - Low
	Low	Medium	Medium - Low	Low - Negligible

Visual Susceptibility

The susceptibility of the different types of people to the changes proposed is based on the occupation of the activity of the viewer at a given location; and the extent to which the persons attention or interest may be focussed on a view, considering the visual character and amenity experienced at a given view. The criteria used to assess the susceptibility of a visual receptor are summarised below.

Table A1.5 – Visual Susceptibility Criteria

Susceptibility	Criteria
High	People with particular interest in the view, with prolonged viewing opportunity, including: Residents where views contribute to the landscape setting enjoyed by the community; those engaged in outdoor recreation, such as those using public rights of way; views from within the designated landscapes and heritage assets where the views of the surroundings are an important contributor to the experience; travellers along scenic routes.
Medium	People with moderate interest in the view and their surroundings, including: Communities where the development results in changes in the landscape setting or value of views enjoyed by the community; people travelling through the landscape, where the appreciation of the view contributes to the enjoyment and quality of that journey; people engaged in outdoor recreation, where their appreciation of their surrounding and particular view is incidental to their enjoyment of that activity.
Low	People with momentary, or little interest in the view and their surroundings, including: People engaged in outdoor sport; People at their work place; Travellers where the view is fleeting or incidental to the journey.

Visual Sensitivity

The sensitivity of visual receptors in views is based on the professional judgement combining the value and susceptibility to change on that visual receptor.

Table A1.6 - Visual Sensitivity

		Visual Receptor Susceptibility		
		High	Medium	Low
Value of Visual Receptor	High	High	High - Medium	Medium
	Medium	High - Medium	Medium	Low
	Low	Medium	Low	Low - Negligible

A1.6 Magnitude of Effects

In determining the magnitude of landscape effects, this will consider:

1. Scale and size of the change in the landscape (considering the changes to individual components and the effect this has on contribution to landscape character; the degree to which aesthetic or perceptual aspects of the landscape are altered; whether the effect changes the key characteristics of the landscape);
2. Geographic extent over which the landscape effects will be experienced (effects limited to the site level; effects on the immediate setting; effects relating to the scale of the landscape type or character area; effects on a larger scale such as influencing several landscape character areas); and
3. The duration, permanence and reversibility of the proposal.

Similar to landscape effects, the magnitude of visual effects will consider:

1. Scale and size of the change to the view (considering loss or addition of features to the view and proportion of the view occupied by the proposed development; the degree of contrast or integration of any new landscape features or changes in the landscape and characteristics in terms of form, scale, mass, line, height, colour and texture; and the nature of the view of the proposed development relative to the time over which it will be experienced and whether views will be full, partial or glimpses).
2. Geographical extent (including the angle of the view; the distance of the viewpoint to the proposed development; and the extent of the area over which the changes would be visible).
3. The duration, permanence and reversibility of the proposal.

A1.7 Significance of Effects

The two principal criteria determining the significance of effects are the sensitivity of the receptor in relation to the magnitude of effect. A higher level of significance is generally attached to the magnitude of change on a sensitive receptor; for example, a low magnitude of change on highly sensitive receptor can be of greater significance than very high magnitude of change on low sensitivity receptor. Therefore, whilst the table opposite sets out a starting point for the assessment, it is important that a balanced and well reasoned professional judgement of these two criteria is provided and an explanation provided.

In order to develop thresholds of significance, both the sensitivity of receptors and the magnitude of change must be classified for both landscape receptors and visual receptors as set out in the tables below. Where landscape effects are judged to be adverse, additional mitigation or compensatory measures are to be considered. The significant landscape effects remaining after mitigation are then to be summarised as the residual effects.

Magnitude Elements					Overall Magnitude of Change
Size / Scale	Geographic Extent	Duration	Permanence	Reversibility	
Major	Wide or Local; Direct and open view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	High
Major	Site Level; Direct and open view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	High - Medium
Moderate	Local / Site Level; Direct or oblique, partial view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	Medium - Low
Minor	Local / Site level; Oblique partial or glimpsed view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	Low
Negligible	All of the above and a truncated view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	Negligible

The criteria for each of the above is to be determined relative to the size and scale of the individual project applying professional judgement and opinion.

However, the following are typically used:

Size and Scale: relates to the combination of the following (and are linked to the descriptions set out under table A1.9):

- extent of existing landscape elements that will be lost (to proportion of the total extent that is lost) and the contribution that the element has to landscape character;
- the degree to which aesthetic or perceptual aspects of the landscape are altered (addition or removal of features and elements)
- whether the effect changes the key distinctive characteristics of the landscape;
- size and scale of change in the view with respect to the loss or addition of features in the view and changes to the composition, including the proportion of the view occupied by the proposed development;
- the degree of contrast or integration of any new features or changes in the townscape with the existing or remaining townscape or landscape elements and characteristic terms of form, scale, mass, line, height, colour and texture;
- the nature of the view of the proposed development, in terms of relative amount of time over which it will be experienced and whether views will be open, partial, glimpsed.

Geographic Extent: The geographic area over which the landscape effects will be felt relative to the proposal; and relative to visual receptors is to reflect the angle of the view; the distance of the viewpoint; the extent of the area over which the changes would be visible.

Duration, Permanence and Reversibility: These are separate but linked considerations and are project specific. For example, changes to a brownfield urban site could be reversible. Construction impacts are likely to be short term, temporary, but see the start of a permanent change. Operational effects are likely to be long term, permanent and either irreversible or reversible, depending on the nature of the project.

No change: If there is no change to the landscape or visual receptor then the overall magnitude of change will be **Neutral**.

A1.7 Significance of Effects (continued)

Effects will be described clearly and objectively, and the extent and duration of any negative / positive effects quantified, using four categories of effects, indicating a gradation from high to low.

Table A1.7 - Sensitivity and Magnitude of Effects

		Landscape and Visual Receptor Sensitivity		
		High	Medium	Low
Magnitude of Change	High	Major	Moderate to Major	Moderate
	Medium	Moderate to Major	Moderate	Minor - Moderate
	Low	Moderate to Major	Minor - Moderate	Minor
	Negligible	Negligible	Negligible	Negligible
	Neutral	Neutral	Neutral	Neutral

The degree of effect is graded on the following scale in relation to the significance criteria above:

Table A1.9 - Significance of Landscape and Visual Effects

Effect Significance	Criteria
Substantial negative / adverse effect	Where the proposals would cause the substantial or significant loss of key mature landscape elements and characteristic features / a significant deterioration in the character and amenity of the view in terms of perceptual qualities / or introduce element(s) considered to be wholly and substantially uncharacteristic of the area; and where the proposals would result in a significant change, or more notable change in more distant views, on the character and amenity of the view from the range of visual receptors.
Major negative / adverse effect	Where the proposals would cause the total loss of key mature landscape elements and characteristic features / a major deterioration in the character and amenity of the view in terms of perceptual qualities / or introduce element(s) considered to be wholly and substantially uncharacteristic of the area; and where the proposals would result in a significant change, or more notable change in more distant views, on the character and amenity of the view from the range of visual receptors.
Moderate negative / adverse effect	Where the proposals would cause the loss of some of the key landscape elements and / or particularly representative characteristic features / or introduce elements considered significantly uncharacteristic of the area; and a noticeable deterioration in the character and amenity of the view from the range of visual receptors.
Minor negative / adverse effect	Where the proposals would cause the loss of some landscape elements or characteristic features / introduce elements characteristic of the area; and a barely perceptible deterioration in the character and amenity of the view from the range of visual receptors.

Negligible	Where the proposals would have no discernible deterioration or improvement in the existing baseline situation in terms of landscape elements or view.
Neutral	Where the proposals would result in no change overall (resulting in no net improvement or adverse effect).
Minor positive / beneficial effect	Where the proposals would result in minor loss or alteration or improvement of the key elements and features / provide a small enhancement to the existing landscape elements or characteristic features; and cause a barely perceptible improvement in the existing view for the range of receptors.
Moderate positive / beneficial effect	Where the proposals would cause some enhancement to the existing landscape elements or characteristic features / noticeable improvement in the character and amenity of the existing view from a range of visual receptors.
Major positive / beneficial effect	Where the proposals would cause a major enhancement to the existing landscape elements or characteristic features / noticeable improvement in the character and amenity of the existing view from a range of visual receptors.
Substantial positive / beneficial effect	Where the proposals would cause a significant enhancement to the existing landscape elements or characteristic features / wholesale improvement in the character and amenity of the existing view from a range of visual receptors.

Effects assessed as being greater than moderate are considered to be a significant effect.

A1.8 Effects During Site Enabling and Construction

It is recognised that project characteristics and hence sources of effects, will vary through time. The initial effects arise from the site enabling and construction works. Sources of landscape and visual effects may include:

- The location of the site access and haulage routes;
- The origin and nature of materials stockpiles, stripping of material and cut and fill operations / disposal and construction compounds;
- The construction equipment and plant (and colour);
- The provision of utilities, including lighting and any temporary facilities;
- The scale, location and nature of any temporary parking areas and on-site accommodation;
- The measures for the temporary protection of existing features (such as vegetation, trees, ponds, etc) and any temporary screening (such as hoarding lines); and
- The programme of work and phasing of development.

A1.9 Effects During Operation (at Year 1)

At the operational stage, the sources of landscape and visual effects may include:

- The location, scale, height, mass and design of buildings in terms of elevational treatment; structures and processes, including any other features;
- Details of service arrangements such as storage areas or infrastructure elements and utilities and haulage routes;
- Access arrangements and traffic movements;
- Lighting;
- Car parking;
- The noise and movement of vehicles in terms of perceived effects on tranquillity;
- Visible plumes from chimneys;
- Signage and boundary treatments;
- Outdoor activities that may be visible;

- The operational landscape, including landform, structure planting, green infrastructure and hard landscape features;
- Land management operations and objectives; and
- The enhancement or restoration of any landscape resource of particular view.

A1.10 Mitigation and Compensatory Measures

The purpose of mitigation is to avoid, reduce and where possible, remedy or offset, any significant (major to minor) negative (adverse) effects on the landscape and visual receptors arising from the proposed development. Mitigation is thus not solely concerned with “damage limitation”, but may also consider measures that could compensate for unavoidable residual effects. Mitigation measures may be considered under three categories:

- Primary measures that intrinsically comprise part of the development design through an iterative process;
- Standard construction and operational management practices for avoiding and reducing environmental effects; and
- Secondary (or residual) measures designed to specifically address the remaining effects after the primary and standard construction practices have been incorporated.

If planting is required as part of the mitigation measures, it is proposed that areas of planting are introduced as part of the proposed development and the height of this planting will be considered as follows (dependent on plant specification and details of the scheme):

- Planting at completion / short term: 3-5 metres (dependent on plant specification).

Strategies to address likely negative (adverse) effects include:

- Prevention and avoidance of an impact by changing the form of development;
- Reduce impact by changing siting, location and form of development;

- Remediation of impact, e.g. by screen planting;
- Compensation of impact e.g. by replacing felled trees with new trees; and
- Enhancement e.g. creation of new landscape or habitat.

A1.11 Guidelines for Mitigation:

- Consultation with local community and special interest groups, if possible, on the proposed mitigation measures is important;
- Landscape mitigation measures should be designed to suit the existing landscape character and needs of the locality, respecting and building on local landscape distinctiveness and helping to address any relevant existing issues in the landscape;

Many mitigation measures, especially planting, are not immediately effective. Where planting is intended to provide a visual screen for the development, it may also be appropriate to assess residual effects for different periods of time, such as day of opening at Year 1.

- The proposed mitigation measures should identify and address specific landscape issues, objectives and performance standards for the establishment, management maintenance and monitoring of new landscape features.
- A programme of appropriate monitoring may be agreed with the regulatory authority, so that compliance and effectiveness can be readily monitored and evaluated.

Winchester City Council response to Fareham Borough Council

Regulation 19 Local Plan Consultation (6th November – 18th December 2020)

Thank you for the opportunity to comment on your Regulation 19 Local Plan Consultation. The representations below relate to key cross-boundary issues and follow previous comments Winchester City Council has submitted in respect of earlier consultations on the emerging Local Plan, and discussions under the Duty to Cooperate.

Strategic Policy DS2: Development in Strategic Gaps

The City Council considers Policy DS2 to be sound and to satisfy the duty to cooperate insofar as it defines and protects the Meon Gap by defining the boundaries of the gap in a consistent way to those within Winchester District.

Strategic Policy H1: Housing Provision

The City Council supports the intention of Policy H1 to meet the Borough's housing requirement under the Standard Methodology and provide an element to contribute to meeting unmet need in neighbouring authorities, pending an updated Partnership for South Hampshire Joint Strategy. However, while a Local Plan is able to use the current Standard Methodology requirement and fix this on submission of the Plan, Policy H1 appears to be based on a significantly lower figure that results from a Government consultation which is not yet confirmed. Similarly, the unmet needs of neighbouring authorities will also be subject to the final Standard Methodology requirement for these authorities and their ability to provide it.

The City Council recognises the difficulties of setting a housing requirement when neither element is yet fixed, but would suggest that it may be necessary for the Plan to be updated by way of Modifications in order to be meet the tests of soundness and the Duty to Cooperate in relation to the housing requirement. Alternatively, an early review may be needed once the final requirements are clarified.

The City Council has no comments to raise in respect of the additional site allocations which are largely within the Borough's developed area and are not considered to impact significantly on Winchester City Council's area.

Policy HP11: Gypsies, Travellers and Travelling Showpeople

The City Council considers Policy HP11 to be sound as it provides for the needs of gypsies and travellers to be met. It welcomes that fact that the Local Plan has been able to identify sufficient sites to meet the Borough's need for traveller sites, but the City Council has been unable to identify sufficient plots for travelling showpeople through its Gypsy & Traveller DPD and has asked the Borough Council whether it can help meet this need during discussions under the Duty to Cooperate. While Policy HP11 may allow for permission to be granted to meet such a need, the explanatory text is not clear whether suitable sites have been sought to help meet the unmet need for travelling showpeoples' sites in the south of Winchester District.

Strategic Policy E1: Employment Land Provision & Policy E4: Solent 2

The City Council supports the continued allocation of land at Solent 2 for employment use and considers this to be sound and supportive of the duty to cooperate.

Yours sincerely,

Adrian Fox

Strategic Planning Manager

1) Policies map: AREAS OF SPECIAL LANDSCAPE QUALITY (DS3)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Recent planning decisions in the Borough have highlighted the need to consider the designation of 'valued landscapes' as part of the Local Plan. And with the correct decision to remove the Land to the South of Romsey Avenue (HA6), no doubt based on the environmental importance given to this land by Natural England. To ensure this plan can be classed as sound you now need to afford and classify the land south of Romsey avenue within the demarcation of 'Areas of Special Landscape Quality'. Even the more recent 'Technical Review of Areas of Special Landscape Quality and the Strategic Gaps' (2020) should be amended to include the Land south of Romsey Avenue to demonstrate complete and definite commitment by Fareham borough council to our Environment.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

To ensure this plan can be classed as sound you now need to afford and classify the land south of Romsey avenue within the demarcation of 'Areas of Special Landscape Quality'. Even the more recent 'Technical Review of Areas of Special Landscape Quality and the Strategic Gaps' (2020) should be amended to include the Land south of Romsey Avenue to demonstrate complete and definite commitment by Fareham borough council to our Environment.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Demonstrate complete and definite commitment by Fareham borough council to our Environment and protect important primary support areas for the Portsmouth Harbour SPA for generations to come.

Your suggested revised wording of any policy or text:

include farm land to the south of Romsey Avenue on maps as Area of Special landscape quality and/or strategic gaps

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Executive Summary

Local Plans should be prepared to contribute to the achievement of sustainable development. They should be positively prepared and seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. As the starting point, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas. These requirements exist within the context of the Government's now longstanding objective to significantly boost the supply of homes.

The Regulation 19 Plan, which is meant to be the Plan the Council intends to submit for Examination, is not founded on the Government's published Standard Method as required by the NPPF and NPPG.

Rather, the Council has alighted upon the possible outcome of a Government consultation document and has based the Development Strategy, Policy H1 and the strategy to meet housing needs on this lower level of housing. This is manifestly unsound.

The fact that the Council do not intend to submit its plan until there is certainty as to a change to the Standard Method does not mitigate the cost of conducting this consultation to the public purse or unnecessary expenditure by other public and private bodies. Moreover, this approach plainly risks undermining public confidence in the plan-led system, if, as is possible, the housing requirement has to be increased. The Council has simply acted prematurely in seizing upon a consultation document that suggests a lower housing requirement; this may be expedient but is the antithesis of positive planning. Put simply, there is no basis for the Council to have formed this consultation document at the present time.

In the event that the Government decides not to proceed with its amendment to the Standard Method, or that such an amendment results in a different outcome for Fareham, the Council will need to further amend the plan. In that instance, a wholly new consultation exercise would be required given the likely magnitude of amendments that would be necessary, adding further delay to the plan-making process, and cost to the public purse and to interested parties, whilst, regrettably, undermining confidence in the Local Plan process.

Moreover, the Council has not recognised the context within which this Plan is being prepared. Housing delivery relative to the Core Strategy has resulted in a substantial shortfall in new housing over past years and this Plan provides an opportunity for positive and ambitious planning to ensure development needs are met and the principles of good growth are achieved. The Plan fails in this regard.

The Council purports to make a contribution towards meeting the unmet need of its neighboring authorities; however, this does not reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PFSH) of over 10,000 homes. It is not at all apparent that this Plan is founded on constructive, active and on an ongoing engagement as required by Section 33A.

It is instructive that whilst Welborne was identified to provide housing to meet sub-regional requirements, its role has now changed to meeting the Borough's housing needs first and foremost;

consequently this Plan makes a significantly lower contribution to the wider sub-regional needs which plainly have not diminished.

Furthermore, the Plan has exaggerated the likely housing supply from Welborne and other sources to such an extent that a shortfall in housing supply is inevitable.

The Plan overlooks the opportunity provided by the previously identified Strategic Growth Area at South Fareham which would make an important contribution to housing supply in the short term and providing surety of supply over the longer term. The suitability of this location is apparent from the Council's evidence base; it is accessible to the Borough's main urban area, it is not an area that is sensitive in landscape terms, development can be accommodated without undermining the principle of separation between Fareham and Stubbington, there are no environmental designations that preclude development and the transport modelling and its' conclusions has assumed development in this location. A development scheme in this location can also deliver nitrate neutrality and biodiversity net gain. Development to the South of Fareham can achieve *Good Growth*.

Unfortunately, the Sustainability Appraisal does not consider higher levels of growth consistent with the January 2020 Local Plan Supplement, and, as such, fails to consider a reasonable alternative.

The following Modifications are considered necessary for the Local Plan to be sound:

- The minimum housing requirement should be defined by reference to the existing Standard Method;
- The housing requirement should be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;
- The level of unmet need that is accommodated should be based on constructive, active and on ongoing engagement with neighbouring authorities;
- Assumptions about the delivery of new housing at Welborne should be revisited and revised down;
- The windfall allowance should be revised down;
- Alternatively, the level of contingency should be increased;
- Additional housing allocations should be provided for;
- Land South of Fareham should be allocated for housing development; and
- Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood should be amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1 Introduction

- 1.1 Hallam Land Management Limited ('Hallam') control a substantial tract of land to the South of Fareham, south of Longfield Avenue, west of HMS Collingwood and adjoining the Stubbington Bypass, the construction of which has recently commenced.
- 1.2 In successive representations to the Local Plan Review we have draw attention to the merits and advantages of locating development to the South of Fareham and how this would achieve the Borough Council's objective of *Good Growth*.
- 1.3 In the January 2020 Local Plan Supplement, this land, along with other parcels in this location, was identified by the Borough Council as a potential Strategic Growth Area.
- 1.4 In the current consultation document, such an allocation has not been carried forward.
- 1.5 On this occasion, the Borough Council's has alighted upon the possible revision to the Government's Standard Method for assessing local housing need, which suggests a lower level of housing for Fareham.
- 1.6 In our opinion, the Borough Council are wrong to have published this consultation document in this form given the status of this version of the Plan is afforded by the Local Plan Regulations; *the Plan a Local Planning Authority intends to submit for Examination*. To have based a Plan on the possible outcome of a Government consultation is plainly premature and, regrettably, the Plan's housing strategy is not positively prepared and is unsound.
- 1.7 The Plan's housing strategy is not an effective one. It has no regard to past performance relative to the objective assessment of housing need and the level of contingency is not sufficient when the likely delivery of Welbourne is viewed objectively. Over the plan period a significant shortfall in new housing is inevitable.
- 1.8 For the reasons given in this representation, additional housing land should be allocated in Policy H1.
- 1.9 Land South of Fareham is an eminently suitable and sustainable location for future development and should be identified accordingly. In the context of the Borough Council's *Good Growth* principles that underpin the Plan's Development Strategy, Hallam's development proposals achieve the high-level development principles and requirements set out in the Local Plan Supplement which remain entirely appropriate.
- 1.10 It is especially significant that the Borough Council's assessment of Strategic Gaps has drawn the conclusion that new development can be located south of Longfield Avenue without harming the integral purpose of this earlier designation. We agree with this conclusion, which accords with our previous submissions that carefully planned development will not result in the coalescence of Fareham and Stubbington and that the separate identities of these settlements can be retained.
- 1.11 Development at South Fareham can be brought forward to provide new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality

of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.

- 1.12 As such, and for the reasons given herein, the previous potential Strategic Growth Area at South Fareham should have been retained in the Local Plan for future development.
- 1.13 In our representations in the following Sections we set out that, whilst the Plan's Vision and Strategic Priorities are correct, absent amendments to Policy H1, this version of the Local Plan will not provide sufficient housing and this will run counter to its stated intention to address housing needs by the end of the plan period.

2 Vision and Strategic Priorities

- 2.1 In this Section of our representations we consider the consultation document's Vision and the Strategic Priorities that the Borough Council has identified. It is instructive to consider the extent to which the Plan's policies and proposals will, in practice, contribute towards this Vision being realised and the Strategic Priorities being met, in the context of what the NPPF's anticipates of a Local Plan.

National Planning Policy Framework

- 2.2 Para 15 of the NPPF requires that each Local Plan should provide a positive vision for the future of its area; a framework for addressing housing needs and other economic, social and environmental priorities. (emphasis added)
- 2.3 Para 17 requires that a Local Plan includes strategic policies to address the local authority's priorities for the development and the use of land in its area.
- 2.4 Para 20 states that strategic policies should set out the overall strategy for the pattern, scale and quality of development, and make provision for, *inter alia*, housing, employment, retail, leisure and other commercial development, infrastructure, community facilities and conservation and enhancement of the environment.
- 2.5 Para 22 states that strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure.
- 2.6 Para 23 states that strategic policies should provide a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development. This should include planning for and allocating sufficient sites to deliver the strategic priorities of the area.
- 2.7 In the context of plan making making, the NPPF's presumption in favour of sustainable development is framed in the following terms:
- a. *plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
 - b. *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:*
 - i. *the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - ii. *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.*
- 2.8 In this context, it is important to recognise the significance of the Regulation 19 stage in the plan-making process. This is the Plan the Borough Council intends to submit to the Secretary of

State for the purpose of Examination pursuant to Section 20 of the Act. This is explained in the NPPG *"The publication stage plan should be the document that the local authority considers ready for examination"*. Therefore, this is the Plan and the approach to meeting objectively assessed need that the Borough Council now consider appropriate.

- 2.9 But, as the Borough Council has suggested it won't decide whether or not to submit the Plan until it knows the outcome of the Government's review of the Standard Method, this is little more than a "wait and see" approach. This is plainly wrong given the importance of the plan-led system in overall terms, the alacrity with which an up-to-date Local Plan is needed in Fareham, and the need to maintain public confidence in the plan-making system generally.
- 2.10 As will be shown later, the practical difference between a housing strategy based of 520 dwellings per annum and 403 dwellings per annum is an 'end date' five years hence. When viewed in the context of providing surety over the longer term and the emphasis in the NPPF on exceeding the minimum requirement, adopting a higher growth level at this stage would have been the positive and responsible response to this circumstance.

The Vision

- 2.11 The Borough Council's Vision as set out in the consultation document intends that it:
- *"will accommodate development to address the need for new homes and employment space in Fareham Borough; and*
 - *new housing will address the particular needs in the Borough, such as our growing housing need and an ageing population and creating attractive places to live".*
- 2.12 The Vision is framed by reference to the Borough's needs, whereas Fareham is part of the established Partnership for Urban Southampton and has a role in contributing to meeting the housing needs of the sub-region. Indeed, there is no reference to Fareham's sub-regional role on any of the text associated with the Vision and Strategic Priorities in Section 2 of the Plan. In this context, the Vision should be drawn more widely.
- 2.13 Significantly, the allocation at Welborne in the Core Strategy was specifically for a sub-regional purpose, but its role by the present time appears to have been recast entirely; a matter we return to later.
- 2.14 Without prejudice to the above, achieving any Vision requires policies and proposals that are genuinely aligned with it. In respect of housing, the outcome of the Local Plan's policies and proposals should be that the Borough's housing needs are met.
- 2.15 As such, the Local Plan must, first, establish the correct strategic housing requirement in Policy H1 i.e. the overall number of new homes that need to be built by 2037 and, second, ensure a housing supply strategy that has the necessary surety that this can be achieved.
- 2.16 What experience both in Fareham and elsewhere has shown is that there must be an element of theoretical overprovision as part of the housing strategy to ensure that sufficient new housing is built.
- 2.17 To an extent the consultation document recognises this, but, as will be shown, it significantly

misjudges housing supply to such an extent that it undermines achievement of the Vision.

2.18 Conversely had a positive approach to plan-making been adopted, the Local Plan would have provided a robust planning strategy for the Borough.

Strategic Priorities

2.19 In the context of the Vision, the first Strategic Priority is to:

- *address the housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.*

2.20 Again, there is no reference to Fareham's wider sub-regional role. In the context of Section 33A of the Planning and Compulsory Purchase Act, which requires constructive and active engagement on strategic matters, this is a surprising omission.

2.21 Without prejudice to this point, as a matter of principle, such a strategic objective is soundly based and is aligned with the significant importance the Government attaches to housing provision. Such a Strategic Priority is universally found in Local Plans national-wide.

2.22 However, in this instance, the apparent driver to the Publication Draft has been an attempt to reduce the scale of housing provision despite the Vision and Strategic Priority. This is the only conclusion that can be drawn from the Council having based its Regulation 19 Plan on a consultation document concerning a potential revision to the Standard Method.

2.23 This approach is plainly not sound for the following reasons:

2.24 Firstly, it departs from the method of calculating local housing need set out in para 60 of the NPPF. No exceptional circumstance has been suggested other than a lower figure is derived from the potential revision to the Standard Method. In a recent comment the Planning Minister referred to outputs based on the consultation exercise as "*entirely speculative*".

2.25 Secondly, even if that figure is correct, it is in no way obvious how the wider needs of the sub-region are to be met; across the wider geographic area as a whole the level of local housing need is suggested to be greater than has hitherto been the case.

2.26 Thirdly, the approach to housing supply significantly overstates likely housing delivery and the scale of contingency is simply not sufficient to ensure future housing supply would meet identified need.

2.27 The inevitable conclusion is that this version of the Local Plan is not positively prepared, justified, effective or consistent with national policy. Therefore, whilst the Plan may have a clear strategic priority to address the need for new homes in the Borough, its subsequent policy to base the strategic housing requirement of 403 dwellings per annum means, when considered objectively, that it fails to do so. To consciously plan for 20% less housing than has been identified firstly as necessary, and secondly as capable of being accommodated, is not properly addressing the need for new homes in the Borough.

2.28 In short, the Plan provides for too few houses over the plan period. This in turn will give rise to

adverse effects. It will restrict the number of people who are able to purchase new housing from doing so and constrain the operation of the housing market. It will also reduce the amount of affordable housing that is built because that is a proportion of the overall amount of housing. Moreover, by restricting market housing it creates an additional and greater incidence of housing need as people who would otherwise have been able to buy a market home are prevented from and they fall into housing need. This will have harmful socio-economic effects and runs counter to the Vision to meet the Borough's housing need.

2.29 For these reasons, the consultation document is not soundly based.

3 Development Strategy

- 3.1 The preceding Section has considered the Regulation 19 Plan's Vision and Strategic Priorities as they relate to housing provision and has identified that, as a practical effect, its policies and proposal will not deliver the intended outcome in terms of meeting housing need by the end of the plan period. In this Section, we consider the proposed Development Strategy and the extent to which it could accommodate a greater level of development if necessary.
- 3.2 The Plan's Development Strategy, set out on pages 17 – 32, and its associated Key Diagram and more detailed Policies Map, are framed by the Borough Council's approach to housing provision. This is evident from comparing the direction of travel outlined in the January 2020 Local Plan Supplement based on the published Standard Method and which identified the need for Strategic Areas of Growth to be allocated for future development, and the present approach which includes very few new housing allocations.
- 3.3 In the event the Borough Council has to re-cast its approach to housing provision, it will also need to adjust its Development Strategy in order to be able to deliver the strategic objective to address housing need. In this regard, it is of note that para 3.5 of the consultation document acknowledges that *"the [Local Plan] Supplement consultation in early 2020 identified the Council's preferred approach to its Development Strategy which it proposes to use to guide the focus of development until at least 2037"*. This clearly illustrates the suitability of the Strategy at that time as the basis of plan-making presently.
- 3.4 In the following paragraphs we comment on the various elements of the Council's Development Strategy both as articulated presently but also in the context of a revised housing strategy which would require additional land to be identified for development in the plan period.

Good Growth

- 3.5 The 2019 Issues and Options consultation established the principle of **Good Growth** as the keystone for the Local Plan's Development Strategy.
- 3.6 *Good Growth* was defined in the 2020 Local Plan Supplement in the following terms:
- building homes and creating employment spaces in such a way as to improve the quality of life whilst protecting the most valued and natural historic environments.
 - respecting environmental protections and delivering opportunities for environmental gain, providing opportunities for reduced energy demand and waste production, whilst sensitively managing the countryside and valued landscapes.
 - providing open space and leisure opportunities to encourage healthy and active lifestyles and encouraging more of us to use active forms of travel rather than the car.
- 3.7 This definition has been retained in the Regulation 19 Plan.
- 3.8 These principles exist within an overarching scale of development that the Borough will need to provide for over the plan period. It is of paramount importance that, in the context of the Plan's Vision and Strategic Priorities, this scale of development is correctly defined at the outset; only then can it be said the Plan will address housing and employment needs adequately,

appropriately and sustainably. If the housing requirement is drawn too low, it will have negative social and economic effects.

- 3.9 It follows that, at the plan-making stage, the Local Plan is able to set out strategic and development management policies that have *Good Growth* principles at their core; both in terms of determining which locations in the Borough are to be allocated for new development and then the form and nature of such development.
- 3.10 The ensuing Land Use Strategy should prioritise locations that are able to achieve the principles of *Good Growth*, albeit there are instances where there are competing interest and, as with all planning decisions, balanced judgements will be necessary.

Development Strategy

- 3.11 This Section of the Regulation 19 Plan describes the factors that the Council has used to determine its Development Strategy. Because of the range of considerations that are inputted to, and then flow from this, what the Plan is actually describing is its land use strategy, namely where development is acceptable and conversely where factors determine new development would not be appropriate and other considerations are more important.

Landscape and countryside

- 3.12 We agree that there are parts of the Borough which have a fundamental importance in landscape terms and it is right that preservation of the landscape in those locations is the principal consideration. Figure 3.1 which illustrates the Key Diagram identifies "Areas of Special Landscape Quality" and we agree with the designation of the areas shown in this regard. Policy DS3, which we comment on later, should be worded to ensure that preserving the special landscape quality of these areas is given primacy.

Settlement boundaries

- 3.13 Settlement boundaries delineated in earlier development plans were drawn in the context of development needs as determined at that time.
- 3.14 Where the scale of development cannot be met on land within the Borough's urban area, development in the countryside adjoining main settlements is a wholly necessary and legitimate proposition.
- 3.15 As a consequence of allocating land for development to meet identified needs, settlement boundaries can and should be amended accordingly. In short, the existing settlement boundaries are not immutable.

The desire to respect settlement identity

- 3.16 Given that Areas of Special Landscape Quality have been assessed and delineated on the Key Diagram it is also necessary to consider whether land identified in the current Development Plan as Strategic Gap still requires such protection, whether its boundaries can justifiably be amended in light of up-to-date circumstances or whether any areas of land subject to that designation can be developed in order to contribute to a sustainable pattern of development.

- 3.17 The *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* considers existing Strategic Gaps in the adopted Local Plan and concludes that land south of Fareham, east of Peak Lane and west of HMS Collingwood does not perform the same function in terms of maintaining separation between Fareham and Stubbington as other land that is subject to this designation and is more integral to the purpose of preserving identity.
- 3.18 Chapter 4 of that Study, Paragraph 10 states that *"there exists some opportunities for development to be absorbed within the strategic gap subject to scale and future detailed design, without compromising its gap function combined with mitigation measures that can support green infrastructure enhancement"*.
- 3.19 It follows as a matter of principle that this land should not be designated as Strategic Gap in this Local Plan as this designation plainly cannot be justified in that location. Conversely, to continue to propose this land as Strategic Gap is not justified on the basis of the Council's own evidence.
- 3.20 It is highly material that the Local Plan Supplement had anticipated a Strategic Growth Area in this location, reflecting the broad conclusions of the earlier Options testing that this represents a sustainable and accessible location for new development and that such development can be accommodated without harm to the separation between Fareham and Stubbington. The significance of this is especially important in the context of the greater scale of development the Local Plan should accommodate and as such this represents an eminently suitable location for development. The fact this land is outside of the settlement boundary is in no way an overriding determinant that would preclude its allocation.

Climate change, flood zones and coastal management areas

- 3.21 We agree that the Local Plan should not direct major new development to areas identified as having a role in mitigating the impacts of flooding or coastal erosion. It is noteworthy that the areas of potential flood risk are associated with the River Hamble, River Meon, River Wallington and Lee-Solent estuary and are largely subject to nature conservation designations and landscape designations which limit the extent these locations would be suitable for development in any event.
- 3.22 In this context, the land identified as suitable for future development to the south of Fareham is not subject to flood risk and can be developed with Sustainable Urban Drainage measures that would not increase the risk of flooding elsewhere.

Protected areas for nature conservation

- 3.23 There are strategic nature conservation constraints that exist in the Borough in the form of International and Nationally designated sites. These overlap with other environmental designations and exert a significant constraint on where development can be located, limiting the extent of land absent a constraint. None of these constraints directly affect the land south of Fareham referred to in preceding paragraphs.

Transport corridors and opportunities to encourage more active travel modes

- 3.24 The NPPF advises that the planning system should actively manage patterns of growth to support sustainable travel. Significant development should be focused on locations which are

or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health.

- 3.25 In this regard, the Local Plan Strategic Transport Assessment states the following: *The proposed growth locations in the Local Plan to accommodate forecast population and economic growth, took a wide range of factors into consideration, including transport and access implications. Most of the Local Plan growth is located either within or on the edge of existing conurbations, providing good opportunities for trips to be made by modes of transport other than the private car. Consequently, the proposed growth in the Local Plan is generally in sustainable locations in terms of transport and access*”.
- 3.26 It is important to stress that this Transport Assessment in fact includes development at the Strategic Growth Areas, therefore, this conclusion reflects the suitability of new development in this location in these terms.
- 3.27 Whilst certain representations have previously raised concern about traffic impacts, the Transport Assessment concludes that the scale of development proposed (including the Strategic Growth Areas) and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective.

Need to encourage diversity in the housing market

- 3.28 We agree that there needs to a balance in the portfolio of housing sites. We comment later on the likely delivery of housing from Welborne, which can only represent a modest supply of housing in anything other than the longer term.
- 3.29 To meet the objective of providing sufficient housing, additional housing allocations are required for all of the reasons in this representation and in particular those in response to Policy H1. Whilst development to the south of Fareham will change the character of part of the undeveloped land between Fareham and Stubbington, this must be balanced with the material benefits of the scheme in terms of the new housing to increase housing supply in the short term and to provide a surety of supply over the longer term.
- 3.30 The opportunity to the south of Fareham is of a sufficient scale to meet the identified need for market housing, affordable housing, specialist accommodation and self-build and custom build housing, along with the co-location of local services and facilities to support a new neighbourhood.

Sustainability and accessibility to services

- 3.31 Fareham is identified in the Core Strategy as a ‘key growth point’ in the South Hampshire sub region and a ‘secondary regional centre’. The town is the largest in the Borough with a population of approximately 37,000 people. Fareham is also an important economic centre, which has developed further over recent years, with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane, Peel Common Roundabout and the construction of the Stubbington Bypass.
- 3.32 Amongst the advantages previously identified for the South Fareham Strategic Growth Area is

its proximity to the town centre, the Solent Enterprise Zone at Daedalus, the railway station and existing local services and amenities with good access to walking, cycling, and public transport links. Local facilities are situated along Bishopsfield Avenue and at Broadlaw Walk. Large-scale out-of-town retail facilities are located at Newgate Lane and Fareham Road to the east of Longfield Avenue.

- 3.33 Large-scale development to the south of Fareham, rather than a more dispersed pattern, would maximise opportunities to prioritise pedestrian and cycle links and extend public transport to maximise sustainable modes of travel.

The requirement to meet housing and employment needs

- 3.34 *Good Growth* can only be achieved if the Local Plan intends to meet objectively assessed need for housing, which for the reasons set out in response to Policy H1, it does not achieve this at the present time.

Spatial Interpretation

- 3.35 As a matter of principle, the identification of deliverable or developable previously developed land should be a priority, however, it is widely understood that such opportunities do not exist to accommodate the scale of new housing and employment required in the Borough.
- 3.36 Accordingly, the allocation of greenfield sites for future development is both a legitimate and necessary measure.
- 3.37 The morphology of the Borough is comprised of three urbanised areas: Fareham, Portchester and the 'Western Wards', which are part of a coastal conurbation that extends from Portsmouth in the east to Southampton in the west. Fareham is the pre-eminent urban area within the Borough in terms of services and facilities and public transport. Portchester and the 'Western Wards' are characterised more as residential suburbs.
- 3.38 Interspersed to a greater and lesser degree between these settlements are areas of separation comprising Portsmouth Harbour, Alver Valley, Meon Valley and the River Hamble. These are strategically important corridors that separate the main urban areas, protect their identity and prevent settlements within the coastal conurbation from merging together.
- 3.39 To the north of the M27, the Borough is of a more rural character, noting of course the proposed new community at Welborne which will undoubtedly change the character of this area over a long period of time.
- 3.40 Stubbington, a residential suburb, lies south of and separate from Fareham's urban area along with the sub-regionally important employment and logistics node at Daedalus. The Borough Council have stated aspirations to maximise the potential of the airfield's land and infrastructure assets through new commercial development, providing clusters for aviation, non-aviation and skills/innovation activity. This will contribute positively to the creation of skilled jobs in the Solent Enterprise Zone.
- 3.41 These characteristics have led the Council, rightly in our opinion, to consider the designation of Valued Landscapes as part of the Local Plan and in this context we are aware that the 2017 Landscape Assessment acknowledges the intrinsic landscape character of the Meon, Hamble

and Hook valleys.

- 3.42 We agree that the Meon Valley is a distinctly valued landscape. In our 2019 response to the Issues and Options consultation we referred to various Appeal decisions that alight upon the value of the landscape in this location. Continuing to protect this area from development and formalising a landscape designation in the Meon Valley would be appropriate.
- 3.43 The extent to which land around the 'Western Wards' is capable of accommodating new development is constrained by the extent of nature conservation designations close to the existing urban area which limits development opportunities to small scale schemes at most.
- 3.44 On the basis of the above, it follows that **locations that adjoin Fareham town, as distinct from villages away from it located in the rural hinterland to the north and west of the Borough, are inherently more suitable in terms of reflecting the morphology of the Borough, preserving its natural environment and maximizing accessibility to services and facilities to achieve the most sustainable pattern of development.**
- 3.45 The extent to which new development opportunities in those locations can consolidate and enhance the accessibility advantages of Fareham Town Centre and Daedalus are consistent with the *Good Growth* principles set out in paras 3.5 and 3.6 above.

Development Strategy Policies

- 3.46 Para 3.2 of the consultation document defines the Development Strategy as providing the *"distribution, scale and form of development and supporting infrastructure, a set of proposals to deliver the strategy, policies against which to assess planning applications, and proposals for monitoring the success of the plan"*.
- 3.47 In addition to the narration of the Strategy, this Section of the Plan includes three policies; the first controlling new development in the countryside, the second in respect of the Strategic Gap and a third concerning Landscape. These policies do not set out a Settlement Hierarchy or Spatial Strategy for the Plan area and such policies do not appear elsewhere in the Plan either. The practical effect of this is that there is no policy that delivers the spatial objectives in so far as where new development should be located i.e. affording a priority to locations within and adjoining Fareham town as the most sustainable location in the Borough.
- 3.48 Given that para 3.2 suggests the role of the Development Strategy provides a set of policies that direct where and how new development should be located, the omission of what are usually commonplace policies is significant.

Strategic Policy DS1: Development in the Countryside

- 3.49 Policy DS1 seeks to control the use of land outside defined settlement boundaries i.e. in countryside locations.
- 3.50 In some circumstances it would be appropriate to grant planning permission for new development in such locations. In those instances, the benefits of a development proposal would need to be considered against the criteria in part two of the policy. In this context, we do not agree that Criterion 'v' is drafted correctly.

- 3.51 On certain occasions other considerations associated with a development proposal would merit planning permission being granted notwithstanding the agricultural classification of the land concerned. In this regard, whilst the NPPF affords a preference to development of lower quality agricultural land, it does not preclude the development of best and most versatile land (see footnote 53 of the NPPF).
- 3.52 As presently drafted Policy DS1 conflicts with the expression of this policy approach in the NPPF; as such criterion 'v' should be reworded as follows: "*avoid or minimise the loss of best and most versatile agricultural land*".

Strategic Policy DS2: Development in Strategic Gaps

- 3.53 In earlier representations we have identified that the evidence base provided by the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* does not justify the delineation of the Strategic Gap south of Fareham in the manner shown on the Key Diagram.
- 3.54 In particular, that Report identifies that the land south of Longfield Avenue and west of HMS Collingwood could accommodate new development without a significant adverse effect on the objectives of the Strategic Gap designation.
- 3.55 It follows that this land is not an integral part of the Fareham and Stubbington Gap.
- 3.56 As such the Strategic Gap should not extend across this land, as this would add a policy restriction that ought not apply on the basis of the published evidence. Put simply, such a designation should not include more land than is necessary to achieve its purpose.
- 3.57 For the Local Plan Key Diagram to be justified, and for the Local Plan to be sound, the delineation of the Strategic Gap south of Fareham should be amended accordingly.

Strategic Policy DS3: Landscape

- 3.58 The Local Plan intends to formalise Areas of Special Landscape Quality to reflect their valued status as determined through the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps*. As written, Policy DS3 does not however afford any particular level of protection to these areas beyond Policy DS1, which in any event requires development proposals in the Countryside to "*conserve and enhance landscapes*".
- 3.59 Policy DS3 also appears to permit major development proposals in these locations whereas the Development Strategy has sought to avoid new allocations in these locations because of their landscape sensitivity. The definition of major development is provided in the Glossary¹ and when applied to this Policy, could see large scale development proposals being advanced when this is what the Local Plan is seeking to avoid. As drafted, this Policy does little to enforce the Plan's Development Strategy.

¹ For residential schemes, major development includes those of 10 dwellings or more or on a site of 0.5 hectares or more. For other development, it includes building(s) with a floor area of 1000sq.m or more or on a site of 1 hectare or more.

4 Policy H1: Addressing housing needs by the end of the plan period in an appropriate and sustainable manner

- 4.1 In this Section we consider specifically Policy H1 and whether, as presently formed, the Borough Council's strategic housing requirement and housing supply strategy are sound.
- 4.2 The NPPF expects the planning system to significantly boost the supply of new housing by providing, in the first instance, a sufficient amount of development land where it is needed (para 59 refers).
- 4.3 It is clear that a Local Plan's housing requirement is to be calculated by reference to the Government's Standard Method, unless exceptional circumstances can be proven (para 60 refers).
- 4.4 In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.
- 4.5 As discussed in Section 2, the Plan's Vision and Strategic Priorities establish the intention to address the Borough housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.
- 4.6 For the Plan to address, and indeed meet, housing needs by the end of the plan period, it is important to have regard to the following considerations which are material to determining a sound strategy in the context of the Government's presumption in favour of sustainable development:
- context and the backdrop to this Local Plan;
 - an objective assessment of local housing need;
 - unmet need from neighbouring authorities;
 - the Plan's housing deliver strategy and whether this is sufficiently robust.
- 4.7 As will be shown, the consultation document will not achieve this, and when measured objectively, a shortfall in housing supply over the plan period will be inevitable, contrary to the stated Vision and Strategic Priority.

Context

- 4.8 The earlier Core Strategy set out a Development Strategy for the period to 2026 that has hitherto been achieved in part only. This partial achievement has had significant implications for housing delivery in the plan area.
- 4.9 In aggregate, the Core Strategy intended that some 9,000 new homes would be built in Fareham

in the 20 years between 2006 and 2026. This comprised:

- 5,350 at the North Fareham Strategic Development Area (Welborne) to meet sub-regional needs as identified in both the South East Plan and the South Hampshire Sub-Regional Strategy; and
- 3,729 elsewhere in the Borough²;

- 4.10 Over the 13 years since the start of the Core Strategy's plan period (2006/7 and 2018/19) only 4,200 new homes have been built. This is equivalent to 46% of the housing requirement in 68% of the plan period.
- 4.11 In comparison with the trajectory on page 21 of the Core Strategy, new housing has had to be accommodated in locations outside of allocated Strategic Development Area; in the four years from 2016, almost twice as many new homes have been provided elsewhere in the Borough than the 469 intended for the whole of that 5 year period 2016/21.
- 4.12 Following the Core Strategy, when the Welborne Plan was prepared in 2015, and to reflect the changed circumstances by then the Council re-calculated likely delivery at the Garden Village. Policy WEL3 identified approximately 6,000 new homes to be completed by 2036. First completions were to be achieved in 2015/16, 1,500 completions were to have been achieved by 2021 and 2,860 completions by 2026.
- 4.13 Plainly this hasn't been achieved and without question there has been a substantial shortfall in housing provision compared to the Core Strategy.
- 4.14 Manifestly, this shortfall is significant and cannot simply be put to one side. It is striking that Welborne was identified originally to meet sub-regional needs but because it hasn't delivered it now represents a source of housing to meet in a substantial part the Borough's own housing need and thus the Borough's contribution of the wider sub-regional need is much reduced.
- 4.15 Given the strategic objective defined by the Council, and in the context of the NPPF's presumption in favour of sustainable development, this has a clear implication for plan-making in Fareham. National Planning Policy invites Local Authorities to exceed the minimum housing requirement and to adopt a positive approach to planning for future housing. Plan-making should not be a simple mathematical exercise but a fundamental examination of how to best plan for the long-term future of the Borough. In this instance, and as the Local Plan Supplement was endeavoring to achieve, this enables the Council to develop a strategy for the longer term.
- 4.16 The change of direction in the Regulation 19 consultation document appears to be framed by precisely the opposite; planning for the minimum plan period and the least amount of new development plausible. Patently, that approach does not include the flexibility which a Local Plan should provide.
- 4.17 For example, had the Regulation 19 Plan retained the level of housing calculated by reference to the published Standard Method – 520 dwellings per annum – and had a lower housing requirement in fact materialized, the practical effect of this would merely have been a housing supply strategy that would endure beyond the end of the plan period. In simple terms, the

² Policies CS2 and CS15 refer

housing strategy would cater for an addition 5 years worth of housing. Given that it is beyond comprehension that housing need will not cease after 2037, this would have been a positive, adaptable, plan-led, longer term strategy.

- 4.18 The fact that the Council has alighted upon a potentially lower housing requirement without apparently considering the practical effect of retaining the existing housing requirement manifestly demonstrates a negative, rather than positive, approach to plan making.
- 4.19 Moreover, the Sustainability Appraisal has plainly not considered this as a reasonable alternative and, as such, is flawed. The Assessment of Alternatives in Section 5 of the Sustainability Appraisal relates to development locations rather than the overall quantum of development. The PPG advises that *"a sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted"*. The purpose of testing reasonable alternatives is to determine that a Local Plan promotes sustainable development when judged against reasonable alternatives, to achieve relevant environmental, economic and social objectives.
- 4.20 This negative approach is further evident when considering the components of the housing strategy which again illustrates a do-minimum approach.

Local Housing Need

- 4.21 Application of the Standard Method to calculate the Local Plan's local housing need would require 520 new homes to be provided each year, or 8,320 new homes in total between 2021-2037.
- 4.22 Alternatively, the Regulation 19 Plan is based on 403 new homes each year which is derived from the proposed revisions to the Standard Method published as a consultation document by the Government in the Summer. These proposed revisions carry no weight at the present time and do not provide any basis for the calculation of housing need for the purpose of this Local Plan at the present time.
- 4.23 Only if the proposed revisions are carried forward without alteration by Government would this serve as a basis to underpin the Plan and enable it to be submitted. Any change to the formula, as it relates to Fareham or any of its neighbouring authorities, would require reconsideration of the housing requirement in Policy H1. The Regulation 19 Plan is contingent therefore on the outcome of that entirely separate process, rather than being a Plan which the Council is able to submit for Examination. It is, for want of a better term, a "wait and see" plan.
- 4.24 As the Council appear to acknowledge themselves by the intention not to submit the Plan for Examination until the outcome of the Government's consultation is known, it is plainly not a sound approach at the present time.
- 4.25 Little more can be said about this, other than to draw attention to the obvious difficulties that have arisen in light of the Government's consultation, which have led to a significant level of opposition to the suggested changes. As recently as mid-November the Planning Minister referred to estimates of local housing need derived from its consultation exercise as *"entirely speculative"* and indicating that the revised formula was being re-evaluated.

- 4.26 It is also important to consider when the Standard Method was introduced and the practical effects of this which the Council don't appear to acknowledge.
- 4.27 The Standard Method was introduced in 2018 and the assessed level of local housing need was based on a period of 2016 onwards. The Council appear not to have grappled with the guidance in the Planning Practice Guidance in respect of this: "*Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate*". Plainly we are some way into the plan making process which commenced in 2017 and this requires the Council to have asked themselves how have housing completions compared with the level of local housing need from that point.
- 4.28 The published requirement was 520 dwelling per annum from 2016 onwards, whereas the highest number of completions was 349 in 2016/17 and less than half for the two years since where monitoring information is available.
- 4.29 The Standard Method takes account of backlog but only in so far as affordability will have increased in the years prior to the calculation and does not take account of underprovision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.
- 4.30 The following table illustrates this:

Year	Number of Completions	Level of Local Housing Need	Shortfall
2018/2019	290	520	230
2019/2020*	263	520	257
2020/2021**	132	520	388

*Projected housing supply April 2019

**Projected housing supply June 2020

- 4.31 This indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No account is taken of this in the current consultation document. Even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
- 4.32 In the circumstance where housing delivery in the Borough has been below both that anticipated by the Core Strategy and the measure of local housing need derived from the Standard Method, however calculated, the Council are plainly wrong to have selected a plan period that takes no account of this and a housing strategy that has no regard to that underprovision. This further undermines any notion of a positively prepared plan.

Unmet Need

- 4.33 Section 33A of the Planning and Compulsory Purchase Act 2004 requires a local planning authority to cooperate with, *inter alia*, other local planning authorities, and engage constructively, actively and on an ongoing basis in the preparation development plan documents, so far as relating to strategic matter. Paragraph 25 of the NPPF says 'strategic policy making authorities should collaborate to identify the relevant strategic matters which they need

to address in their plans'. Unlike problems associated with soundness, a failure to discharge the obligation in Section 33A cannot be remedied once the plan has been submitted for examination.³

- 4.34 It is clear from the work of the Partnership for Urban South Hampshire that housing provision is a strategic matter and thus there is a need for co-operation between constituent plan-making authorities. In this regard, the 'plan-making' section of the PPG provides guidance in relation to the duty to cooperate. Paragraph 022 states that strategic policy making authorities are expected to have addressed key strategic matters through effective joint working, and not deferred them while relying on an inspector to direct them. It states "[An] Authority will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any outcomes achieved; this will be thoroughly tested at the plan examination."
- 4.35 The consultation document makes an allowance of an additional 847 houses as a contribution to meeting unmet need from Fareham's Neighbouring Authorities. But as this is the Submission version of the Plan, this allowance should have regard to the co-operation referred to above. There is no evidence that this is anything other than an allowance made by Borough Council without reference to the joint working through PUSH; this is nothing else but a "cart before horse" approach.
- 4.36 The consultation document acknowledges that there is "*a significant likelihood of a substantial level of unmet need in the sub-region*" (para 4.4) and that over the plan period the level of unmet need in the sub-region could be circa 10,750 new homes. It is instructive that the references to unmet need in para 4.5 of the consultation document are in the context of the current Standard Method and not the higher sub-regional figure that the proposed Standard Revision indicates. In this regard, the plan appears to be "comparing apples and pears".
- 4.37 The following table compares the housing requirement from the current Standard Method and that indicated by the proposed revision.

LPA	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard Method	Proposed new Standard Method	Difference between current and proposed SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111

- 4.38 The above illustrates that whilst the Fareham figure might decline, across the sub-region the

³ *Samuel Smith Old Brewery (Tadcaster) v Selby DC [2015] EWCA Civ 1104 paragraphs 38 and 40*

overall scale of housing is greater both in PUSH East and West.

- 4.39 Over a 16-year period, the difference between the proposed new Standard Method would require an additional 10,000 new homes to be built across PUSH East. Compared to average delivery over the past 3 years, almost twice as many new homes will need to be built. This is unquestionably a step change in housing delivery and each Local Authority area will need to contribute towards this and maximise its contribution to the sub-regional requirement.
- 4.40 In September 2020 the PUSH Report to its Joint Committee looked at the potential implications of housing supply relative to Local Housing Need, and using the proposed revision to the Standard Method this still identified a shortfall of over 6,500 across the PUSH East sub-region.⁴
- 4.41 At para 4.5 of the consultation document, the Borough Council put forward a contribution of 847 dwellings towards meeting unmet need. There is no evidence of how this figure has been derived. All that is evident from the earlier passages of that paragraph is the very unclear picture that exists and which is subject to additional work by PUSH. Consequently, the proposed contribution of 847 dwellings – 13% - to unmet need doesn't appear to have any basis in a full and proper assessment of future housing requirement and supply across the sub-region. This is significant because, historically, Welborne had been identified to provide housing supply for that sub-regional purpose whereas now its contribution almost entirely to meet Fareham's housing need.
- 4.42 Switching the role of Welborne in this fashion is taking away a supply of housing identified previously to meet sub-regional needs in the longer term, when plainly that need still exists, and elevating supply available to meet the Borough's need. This denies the original intention of Welbourne, and places a very heavy reliance on one source of housing to meet local needs; on the basis of the Council's strategy, some two thirds of the Borough's housing needs would be met at Welborne.
- 4.43 Again, this illustrates why preparing a Regulation 19 Plan on this basis isn't justified and does not contribute to effective planning across the sub-region.
- 4.44 Moreover, on this basis, the evidence to justify the Council having discharged its duty under Section 33A is not at all obvious; this is particularly significant as this is the Regulation 19 Plan to be submitted for Examination.

Plan Period

- 4.45 The current consultation document is based on the plan period 2021-2037. This is 16 years and would accord with the 'at least 15 years' in the NPPF, if the Local Plan were in fact adopted in 2021. Experience of Local Plan Examinations and the length of time between Regulation 19 and adoption suggests this is highly unlikely. But assuming the Plan is adopted in the 2022 this would provide the bare 15-year plan period.
- 4.46 It is in this context that one has to consider whether the plan is "*sufficiently flexible to adapt to rapid change*". For the reasons given later we say it does not meet this requirement.

⁴ Table 4 Comparison of Housing Need and Supply 2020-2036

Delivery at Welborne

- 4.47 The consultation document's housing strategy is heavily reliant on housing delivery at Welborne, which was previously identified to meet sub-regional requirements. Table 4.2 of the consultation indicates that over 4,000 new homes are to be built at Welborne by 2037 to meet Fareham Borough's local housing need.
- 4.48 This is not a realistic assumption.
- 4.49 It has been readily apparent for some time that past delivery assumptions at Welborne could not be achieved. Despite the Core Strategy and the Welborne Plan assuming a significant number of new homes would have been built at Welborne by the present time, there is still no outline planning permission some 14 months after the Borough Council's Planning Committee resolved in October 2019 to grant permission for the outline planning application (P/17/0266/OA).
- 4.50 In our response to the January 2020 Supplement, we noted that it wasn't surprising that by that time the Section 106 had not been signed given the particular scale of that development.
- 4.51 However, by the present time, the absence of an outline planning permission raises a more fundamental concern about delivery at Welborne.
- 4.52 Nowhere do the Council provide any evidence as to when they expect outline permission to be granted, the extent of any pre-commencement works and their associated timescale, when reserved matters applications are expected and when first completions will be achieved. The closest the Council gets to any justification is that the housing trajectory has been agreed with the developer Buckland.
- 4.53 We are aware that there will also need to be Highway Agreements relating to works to the M27 Junction 10 prior to those works being commenced; again, in our experience such highway agreements are complex and can take a long period of time to complete. The works to be undertaken to the M27 and A32 are substantial. The Planning Officer's Report highlights the estimated costs of these works as £80m-£90m and that funding gap exists in relation to these works. More recently, we understand the Council has had to seek additional funding from Government to cover earlier Local Enterprise Partnership funding that has since been lost. Hampshire County Council has recently confirmed that: "The J10 works are not fully committed at this stage and there is no defined timescale for delivery." This is clearly a major risk in overall terms but also in terms of when such works will be undertaken and the duration of such works.
- 4.54 This is germane to timescales as to when development at Welborne can be anticipated, notwithstanding the milestone it reached in 2019.
- 4.55 A number of housing trajectories have been proposed for Welborne at different stages. The Borough Council's January 2017 Background Paper concerning Welborne set out the Council's assumption at that time. This suggested that 4,090 new homes would be built at Welborne by 2036. Whilst this would align with the current assumption, this overlooks the fact that circumstances have already moved beyond the key dates suggested therein.
- 4.56 If the 2017 trajectory is simply rolled forward to the present day and it is assumed that outline planning permission is granted in 2021/2022 and development commences in 2023/24 then the

total number of completions would be 3,090 dwellings by 2037 – see *Appendix 1*.

- 4.57 This trajectory is clearly sensitive to assumptions. Any delay in commencing development beyond will 2023/24 will cause fewer completions in the plan period.
- 4.58 Moreover, the extent to which 250 dwellings can be built and sustained each year from 2026 onwards is also a highly sensitive assumption.
- 4.59 We note that more recent research from Lichfields⁵ suggests that for sites of more than 2000 dwellings, the average period of time from planning to delivery is 2.9 years. Moreover, that research indicates that for scheme the size of Welborne the number of houses built each year averaged 140 dwellings.
- 4.60 If a mid point between these two assumptions of 185 dwellings per annum were achieved and sustained as the peak output, this would only yield 2,360 dwellings in the plan period.
- 4.61 It is instructive to note that to achieve 4,020 completions in the plan period would require a build rate from 2024/25 onwards of 309 dwellings per annum. A build rate in excess of 300 dwellings per annum was rejected by the Council in 2017.
- 4.62 What is clear from the above is that Welborne's contribution to housing supply during the plan period has been over-estimated. This component of housing supply is not justified and consequently the housing supply strategy is not effective.

Proposed Allocations

- 4.63 From our analysis of proposed allocations we have been able to identify that, whilst a number of subject to current planning applications, a significant number are subject to constraints that could delay their development. A number of Sites are owned by public bodies or are subject to multiple landownerships and with existing uses⁶. Moreover, a great many are Sites within the urban areas which are likely only suited to flatted schemes to achieve the capacity numbers and may not be suitable to developers.
- 4.64 Other Sites are subject to nitrates constraints⁷ which may require a strategic solution to enable their release.
- 4.65 Consequently, it is questionable whether they will all be developed and this supports not only the principle of a contingency allowance but also the importance that that allowance reflects the overall level of uncertainty associated with the housing supply strategy.

Windfall

- 4.66 Table 4.2 of the consultation document includes a windfall allowance of 1,224 new homes between 2021 and 2037.
- 4.67 The principle of including a windfall allowance is explained in the NPPF at para 70 in the

⁵ Start to Finish (2016), Driving Housing Delivery (2018)

⁶ FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13, HA22, HA24, HA31, HA36-39, HA42, HA44

⁷ HA1, HA12, HA34, HA40

following terms:

- Firstly, there should be compelling evidence that they will provide a reliable source of supply.
- Secondly, any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 4.68 It is evident that the above is much more than a consideration of historic windfall delivery and requires the plan-maker to actively consider future supply from this source.
- 4.69 The Council's Windfall Background Paper projects forward 51 windfall completions on small sites from 2024/25 and an additional 52 windfall completions from large sites from 2025/26. The only source of information that the Council has used to arrive at these figures is its breakdown of past windfall delivery from 2009 – 2019 which averaged 101 dwellings (51 for small sites and 52 for large sites).
- 4.70 Para 3.6 of the Background Papers states: *"The estimated rate of windfall development is based on past completion rates..."* (emphasis added)
- 4.71 Para 3.9 of the Background Paper states: *"To ensure that a cautious approach is taken and windfall projections are not overly optimistic, the projections have only taken account of windfall delivery since 2009/10".*
- 4.72 The very next paragraphs states *"Based on the preceding analysis, the windfall projections for the Borough are 51 dwellings per year from small site delivery and 51 dwellings per year from large site delivery".*
- 4.73 It is clear that the assumption in Table 4.2 of the consultation document is derived solely from past trends and it is claimed that this demonstrates *"a compelling case"*. However, nowhere in the analysis is there consideration of whether this is a reliable source of future supply, rather it is just a forward projection of what happened in the past. The analysis does not provide any consideration of expected future trends.
- 4.74 It is important to recognise that windfall opportunities are finite. Opportunities to redevelop vacant or redundant land will have largely been exhausted by the present time because of planning policies that have prioritised such sources of supply for the past decade and longer. Consequently, future windfall over the plan period will rely to a much greater extent on recycling of land (i.e. existing uses being changed). This is inevitable a less certain source of housing supply.
- 4.75 For the purpose of assessing whether the Plan's housing supply strategy is sound, we have adjusted the windfall contribution by 25% i.e. 918 completions over the plan period.

Revised Housing Strategy

- 4.76 In the preceding Sections we have considered both the level of local housing need and the housing supply strategy providing a reasoned justification why this Regulation 19 Plan is not sound. The following table illustrates the effect of this.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	8,320	520 dpa
Under-supply 2018-2020	875	Added to reflect actual housebuilding relative to LHN
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	10,050	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect roll-forward of 2017 Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 25% to reflect finite supply
Total Supply	7,150	Sum of Supply estimates
Shortfall	2,900	

*retained at 13% of unmet need for illustrative purposes absent any Statement of Common Ground

- 4.77 The above illustrates that with these alternative assumptions, additional land needs to be identified for some 3,000 new homes.
- 4.78 Even if the strategic housing requirement were calculated simply by reference to 403 dwellings per annum, there would be no contingency to take account of changing circumstances over the plan period, contrary to the assertion in the plan to this effect.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	6,448	403 dpa
Under-supply 2018-2020	nil	N/A
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	7,295	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect 2017 Housing Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 20% to reflect finite supply
Total Supply	7,153	Sum of Supply estimates
Shortfall	142	

- 4.79 The above analysis clearly shows that Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to assumptions about housing supply, additional housing land should be allocated for development.
- 4.80 In the following Section we submit that the Strategic Growth Area identified in the Local Plan Supplement 2020 should be allocated for housing development.

5 South Fareham Strategic Growth Area

- 5.1 In our previous representations we supported the inclusion of Strategic Growth Areas in the Local Plan. Hallam control a substantial tract of land to the South of Fareham, adjoining the Stubbington Bypass, the construction of which has recently commenced. This land, along with other parcels in this location, is identified in Figure 3.2 of the Local Plan Supplement Consultation Document as the Proposed Strategic Growth Area South of Fareham.
- 5.2 The justification for the allocation of a Strategic Growth Areas is evident from the preceding Section which identified a significant shortage in the amount of new housing to be provided in the Borough and the amount of future development land allocated for this purpose. Development South of Fareham could provide housing land over the plan period, both in the immediate term and continuity over the long term.

South of Fareham

- 5.3 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. The town is the largest in the Borough with a population of around 37,300. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town.
- 5.4 Fareham is also an important economic centre, which has developed further over recent years with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane and the Peel Common Roundabout.
- 5.5 A new, mixed use masterplanned development to the South of Fareham, contiguous with Longfield Avenue, benefits from its proximity to the town centre, Daedalus, the railway station and existing local services and amenities with good access to walking, cycling and public transport links. These are locational merits that align with *Good Growth*.
- 5.6 Stubbington and Hill Head form a single urban area and have a population of c.14,300. These settlements have a range of services with a local centre, doctors, dentists, two primary schools, a secondary school and a community centre.
- 5.7 Local employment has improved with the development at Daedalus, which lies to the south east of the settlement. Development in south Fareham would delivery homes close to this economic and employment zone, providing housing for the growing workforce.
- 5.8 The Stubbington Bypass is being constructed to connect Gosport Road, Peak Lane and Titchfield Road. This will inevitably create an urbanising influence through the centre of the existing Strategic Gap. Development to the south of Fareham would assist in assimilating the bypass into the landscape and soften the impact of the road on the gap, beyond what could be achieved from constructing the bypass alone.

Development Potential

- 5.9 Paragraph 3.24 of the consultation document identifies high-level development principles and

requirements. Hallam support these intended outcomes and these have underpinned their proposals for a mixed-use masterplanned development.

- 5.10 Work undertaken over a long period of time has identified the suitability of the land controlled by Hallam to accommodate new development, how development can be arranged and the extent of mitigation required.
- 5.11 In our response to the 2019 Issues and Options consultation, we identified potential areas for development in this location and for convenience we have attached this at *Appendix 1*. Whilst this considered only land which Hallam control, we recognise that there are other smaller scale development opportunities within the general location, and that the Borough Council intend to work with landowners and site promoters to develop a Council-led masterplan which will focus on the delivery of community benefits as part of Good Growth. In this context, Hallam are committed to working with the Council and others to develop these proposals further as part of a co-ordinated approach.
- 5.12 A development scheme could comprise the following:
- Approximately 1,200 units
 - a new healthcare facility
 - a primary school
 - a care home
 - community hub
 - local shops
 - sports hub and
 - Green Infrastructure to include public open space, equipped areas of play, Sustainable Drainage Systems (SuDS), tree, hedge and shrub planting, meadows, structural woodland planting, allotment gardens and permissive footpaths and cycleways.
- 5.13 Development would be accessed from a primary and secondary access from Longfield Avenue, along with associated improvements to the existing Long field Avenue/Bishopsfield Road junction and carriageway and a primary access from Peak Lane.
- 5.14 An outline planning application for such a proposed development was submitted in June 2020 and is presently undetermined.

Accessibility and Movement

- 5.15 The accessibility advantages of this location enables positive promotion of active travel. The proposed development will be served by an internal network of footways and access arrangements that can be utilised by both pedestrians and cyclists. The site is surrounded by Public Rights of Way (PRoW) that in turn can serve as cycle/walking connections from the site to other roads in the vicinity of the site. These will be maintained and improved in order to encourage more sustainable modes of travel as an alternative to the conventional car.
- 5.16 Bus based public transport is also a feasible means of sustainable travel from this location. Service provision on the route number X5 operated by First Group provides opportunity for peak commuter travel and also for off-peak travel. The scale of development proposed is

sufficient to deliver dedicated public transport coverage between the Site and key destinations that will have the frequency and reliability to attract patronage to secure long term viability. Any improvement will be discussed with the necessary stakeholders, but it is envisaged that the development will support the introduction of new services.

- 5.17 The Eclipse Busway - a Bus Rapid Transport scheme between Fareham and Gosport opened in 2012 providing a priority public transport route connecting the two towns. The BRT scheme provides a more efficient service using new, comfortable, low-emission buses that encourages bus travel through enhancing the bus travel experience. Using the new busway, buses are able to avoid congested parts of the highway network including A32 so that passengers can benefit from reliable journey times and can plan their onward travel connections.
- 5.18 A number of new highway improvements works have been implemented or are currently under construction which is intended to improve bus journey reliability, and encourage more people to switch from car travel to using the bus. This would have an effect of helping reduce traffic numbers and traffic congestion between Fareham and Gosport, including along Newgate Lane.

Nitrates

- 5.19 The land is located directly west of the edge of urban area that forms part of the designated Chichester, Langstone and Portsmouth Harbours Eutrophic NVZ (TraC) (Nitrate Vulnerable Zone). The land is currently predominantly arable farmland with a history of mixed crops such as wheat, barley, oats, rape etc. and break crops such as peas, winter oil seed rape and beans.
- 5.20 The above is recorded on a Nutrient plan detailing fertilizer types, tonnages and time applied for each individual field. The fertilizer applied during the period of record is a mix of pig and farm yard manures.
- 5.21 It is recognised that intense farming with fertilization with natural manures will lead to nitrate leaching into the surrounding surface water and ground water environment.
- 5.22 Through development of the land, the leaching of nitrates through farming activities will be curtailed. While there will be a new source of nitrate production and leachate associated with the new development, this is considered to be at worst a neutral impact and through further assessment a net reduction in nitrate leaching can be achievable.

Biodiversity

- 5.23 The Hallam land is divided into two areas by Peak Lane; the eastern area comprises largely of arable land with hedgerows and ditches forming the compartmentalisation typical of the surrounding arable tenure and has limited nature conservation value. The western compartment consists of a large area of set aside land, with areas of arable crops, which are bound by limited hedgerows and tree lines.
- 5.24 The most significant habitat is Oxleys Coppice which is designated as a SINC and an area of ancient and semi-ancient woodland (ASNW), which has been evaluated as county level conservation value. The Scheme can ensure that Oxleys Coppice is protected.
- 5.25 Hedgerows are mostly classified under the Hedgerow Evaluation Grade System (HEGS) as moderate and moderate/high value. Only two hedgerows are classified as 'important' under the

Hedgerow Regulations (REGS). Several drainage ditches are found through the Site but only have limited marginal and aquatic vegetation. These are classified as no more than local conservation value.

- 5.26 Surveys have identified the presence of a number of protected species, bats and breeding birds. Measures to safeguard these species and their habitats can readily be accommodated as part of the development proposed. The habitats created and the species which will benefit from the mitigation measures proposed in the Site will lead to an overall beneficial effect in the long term. Similarly, in accordance with the Solent Waders and Brent Goose Strategy, a financial contribution will be made to this, based on the classification of land's suitability for supporting such species.
- 5.27 The Solent & Southampton Water Ramsar/SPA, which also includes Titchfield Haven SSSI, is approximately 700m from the Site. Portsmouth Harbour Ramsar/SPA/SSSI is located approximately 1.3km to the east of the Site at its nearest point, which also support a variety of habitats and an assemblage of dark-bellied brent geese. The Solent Maritime SAC extends from the River Hamble mouth up to Botley in the west, this is approximately 4.7km west of the Site.
- 5.28 There is the potential for a Likely Significant Effect on the Solent SPAs from an increase in recreation from new housing development within a 5.6km zone of influence of the Solent. As a result, an Interim Solent Recreation Mitigation Strategy was published in 2014 to enable initial mitigation measures to be placed, so LAs could continue to grant permission for new homes. The strategy has been updated to form the basis for future new housing up to 2034, with the Bird Aware Solent Recreation Mitigation Strategy (2017).
- 5.29 As this Site falls within the established zone of likely significant effect (5.6km), a HRA/AA will be required by the LPA; however a site specific Test of Likely Significance will be provided to facilitate the LPA assessment. The mitigations measures required to facilitate the Proposed Development will see a financial contribution provided for the in-combination effects on the Solent SPA, with additional bespoke mitigation provided within the Site to mitigate for the alone effects.
- 5.30 The details of bespoke mitigation are to be discussed with Natural England. Current proposals will include an area of County Park/Green Infrastructure to the west of Peak Lane, measuring approximately 23ha, which will include a circular walk, car park and habitat features to provide point of interest, as well as safe areas for dogs to be exercised off the lead. Alternative areas of GI will be provided around the main residential areas to the east of Peak Lane, here approximately 32ha will be provided, which will incorporate recreational opportunities and areas of biodiversity net gain.
- 5.31 The mitigation measures provided within the Site will ensure that there are no likely significant effects on the Solent alone and in-combination with other schemes within Fareham.

Strategic Gap

- 5.32 The current Core Strategy designates land between Fareham and Stubbington as a Strategic Gap. This follows such a designation being contained within earlier Development Plans; Settlement Gap policies in Hampshire date back at least 30 years when they were included within the South and Mid Hampshire Structure Plans (1988 and 1989). They were carried forward into the Hampshire County Structure Plan 1994 and the Hampshire County Structure

Plan 1996-2011. Consequently, with each new development plan needing to make provision for current and future development needs, the role and function of gaps need to be considered having regard to up to date circumstances.

- 5.33 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. As described earlier, this new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. Such a conclusion is similar to the assessment undertaken by Hallam previously.

Summary

- 5.34 Hallam support the identification of the Strategic Growth Area to the South of Fareham and have identified a development scheme that achieves the high-level development principles and requirements set out in the consultation document.
- 5.35 Importantly, development in this location can be brought forward that provides new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.
- 5.36 The merits of this location are substantial, and carefully planned development will not result in the coalescence of Fareham and Stubbington and the separate identities of these settlements can be retained.
- 5.37 As such, the allocation of land at South Fareham in the Local Plan for future development is considered wholly appropriate.

6 Policy NE5 and Policies Map

- 6.1 The Policies Map includes designations relating to Waders and Brent Geese and are associated with Policy NE5. This designation covers four categories of land – Core and Primary Support Areas, Secondary Support Areas, Low Use Areas and Candidate Areas.
- 6.2 The extent to which the land concerned is used by Waders and Brent Geese, particularly beyond the Core Areas, is transitory and can differ from time to time as a consequence of changes in agricultural practices (for example, arable land with wintering cereals provides an optimal foraging resource, whereas when this is replaced / succeeded by grassland habitats its function can change, which could affect species assemblages and regularity it is used. Changes in land use also promote further recreational uses which is the case for areas west of Peak Lane) or changes to the extent of the built environment (for example newly built structures, such as the Stubbington Bypass, will change the suitability of a location in proximity to it as a receptor). Therefore, to delineate these areas in the manner shown on a Policies Map, which affords permanence to the designation, fails to take account of the potential changes in circumstance and is not sound as a matter of principle.
- 6.3 The practical effect of this is that Policy NE5 directs the decision-maker to consider development proposals against the criteria listed therein and the status of the land by reference to the designations shown on the proposals map, which may at that point in time no longer be up-to-date or relevant.
- 6.4 Through Hallam's work in respect of the land to the South of Fareham, and through discussion with Natural England, it has identified a different classification to that shown on the Policies Map for certain of those parcels of land, as shown on *Appendix 2*. This illustrates how the application of Policy NE5 could misdirect the decision maker.
- 6.5 On this basis, these designations should not be shown on the Policies Map in the manner they are presently.
- 6.6 A more generic designation such as Areas of Waders and Brent Geese Sensitivity, which does not classify individual land parcels, would be more appropriate.
- 6.7 It would follow that Policy NE5 would be amended to require planning applications to assess and determine the use of land subject to those development proposals and at that point, when an up to date classification has been determined, the criteria and mitigation in Policy NE5 would apply.

7 Summary

- 7.1 These Representations have been prepared on behalf of Hallam Land Management Limited (Hallam), who control a substantial tract of land to the South of Fareham, adjoining the existing urban area and Stubbington Bypass, the construction of which has recently commenced.
- 7.2 This land was identified in the Local Plan Supplement 2020 as a potential Strategic Growth Area. Whilst the Regulation 19 Plan does not propose to carry forward the South of Fareham Strategic Growth Area, as is evident from these representations the need for such an allocation has not diminished.
- 7.3 The consultation document rightly identifies the Borough Council's commitment to meet the Borough's housing need by the end of the plan-period. This is plainly aligned with the NPPF and the Government's objectives. What is notably absent from the Vision and Strategic Priorities, is the recognition that Fareham is important in a sub-regional context and was previously intended to provide significant development land at Welborne to meet wider needs.
- 7.4 Policy H1 is not founded on a sound basis. In preparing and publishing this Regulation 19 Plan, the Borough Council has afforded greater weight to a potential revision to the Government's Standard Method and has disregarded the published and established measure of local housing need which has underpinned its work to date. Unless and until the Government publish a revision to the Standard Method, this version of the Plan cannot be submitted for Examination as it is plainly unsound. The Borough Council recognise this from its Committee Papers.⁸ This is nothing other than a "wait and see" Plan.
- 7.5 Only if the Standard Method is published in the same final form will the Plan be able to proceed – there is no indication if or when the Government intend to complete this exercise given the significant scrutiny it has attracted.
- 7.6 A more positive approach would have been to retain the higher level of housing as the basis of the Plan to provide surety over a long term with policy measures to manage housing supply in the event the level of local housing need was reduced. Unfortunately, the Council hasn't considered this as an option or a reasonable alternative in the Sustainability Assessment.
- 7.7 Even in the event the proposed revision to the Standard Method were confirmed as the Plan assumes, there is little if any evidence of a cogent understanding of the level of unmet need across neighbouring authorities. There is no apparent evidence of effective co-operation to justify the contribution the Plan proposes to unmet need.
- 7.8 Moreover, the Council hasn't applied its mind to the level of housing that been achieved since the Standard Method was introduced at the start of the plan making process and the date the plan is to be adopted. Viewed objectively, housing completions over that three year period were below the level of local housing need and this shortfall, which is part of a much greater shortfall when compared to the Core Strategy's housing intentions, should be accounted for.
- 7.9 Turning to housing supply, the assumption that Welborne will provide 4000 new homes within the plan period is not founded upon evidence previously produced by the Council and the level

⁸ Executive Briefing Paper 12th October 2020, para 12

of housing output assumed is at a level the Council previously considered unrealistic.

- 7.10 The windfall assumption drawn simply from past trends has not justified why this is a source of future supply. Uncertainties also exist in relation to a number of the proposed allocated sites because of landownership, extent of existing uses and location.
- 7.11 For all of the above reasons, the Plan's approach to housing will fall short of its Vision and Strategic Priorities. Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to housing supply, additional housing land should be allocated for development.

South of Fareham

- 7.12 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town. Similarly, Fareham is an important economic centre, including the Solent Enterprise Zone at Daedalus to the south of the town.
- 7.13 It is considered that development to the south of Fareham would be in a sustainable location, with good access to walking, cycling and public transport links, as well as local services and amenities. This location adjacent to the existing urban area creates a good opportunity for a natural and sustainable extension to the urban area. Development in south Fareham would deliver homes close to an important source of new employment and jobs at Daedalus.

Strategic Gap

- 7.14 The current Core Strategy designated land between Fareham and Stubbington as a Strategic Gap.
- 7.15 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. This new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. The delineation of the Strategic Gap on the Policies Map should be amended accordingly.

Proposed Modifications

- 7.16 The following Modifications are considered necessary for the Local Plan to be sound:
 - 7.16.1 The minimum housing requirement in Policy H1 to be defined by reference to the existing Standard Method;
 - 7.16.2 The housing requirement be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;

- 7.16.3 The level of unmet need that is accommodated be based on constructive, active and on ongoing engagement with neighbouring authorities;
- 7.16.4 Assumptions about the delivery of new housing at Welborne be revisited and revised down;
- 7.16.5 The windfall allowance be revised down;
- 7.16.6 Alternatively, to 6.16.4 and 6.16.5 the level of contingency be increased;
- 7.16.7 Additional housing allocations be provided for;
- 7.16.8 Land South of Fareham is allocated for housing development; and
- 7.16.9 Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood is amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- 7.16.10 The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

Fareham Local Plan 2037 Publication
Regulation 19 Consultation

Dear Sirs,

Please find attached comments from CPRE Hampshire regarding the Regulation 19 Fareham Local Plan 2037 consultation.

Firstly, a general point; CPRE Hampshire is extremely pleased to see that Fareham BC have approached their new Local Plan from a landscape-based perspective, a process which we wholly support. Furthermore, we fully endorse Fareham BC's inclusion of a Climate Change policy, which must underpin all other policies and spatial planning.

Furthermore, we are pleased to see that Fareham have adopted housing numbers based on the latest available housing projections from the ONS, the 2018-based projections, which show a considerable reduction in estimated local need.

However, we remain disappointed that there seems to be no mention of a potential new South Hampshire **Green Belt** in the Reg 19 consultation. In an earlier consultation by Fareham BC in July 2019, there were a number of mentions of this option, notably in Section 10c regarding the Meon Valley, where it said "The Council will also be working with PUSH to consider the potential for greenbelt land across local authority areas, and there could be scope for this area to become part of a South Hampshire greenbelt." As CPRE Hampshire has long campaigned for a sub-regional area of restraint in order to encourage urban regeneration and prevent sprawl, this was very much welcomed. Sadly, this does not seem to have been included in the Reg 19 document, and we consider its exclusion to be a significant wasted opportunity, as the NPPF allows local authorities to designate Green Belt as part of the Local Plan process. It has been agreed that the PFSH authorities are to consider a new Green Belt as part of their forthcoming Statement of Common Ground and we would have hoped to see Fareham BC leading the way.

CPRE Hampshire has completed Response forms for individual policies which are attached below this letter, but in summary our headline comments are as follows:

Development Strategy

Strategic Policy DS1 Development in the Countryside: CPRE Hampshire agrees with these principles but notes that a South Hampshire Green Belt could aid considerably in achieving these goals.

Strategic Policy DS2 Strategic Gaps: We note the decision to re-define strategic gaps (the Meon and Fareham-Stubbington gaps) and suggest that a new Green Belt could achieve this. An area could easily be defined to encompass the Meon Valley, which could link to an area of larger Green Belt to the north of the Borough in Winchester District.

Strategic Policy DS3 Areas of Special Landscape Quality: CPRE Hampshire agree with Fareham BC's analysis of the Borough's varied landscapes and supports any intention to define them as Areas of Special Landscape Quality, illustrated in Figure 3.3. However, CPRE Hampshire suggests that some of these could be further protected if they also formed part of a wider South Hampshire Green Belt, in particular the Upper Hamble Valley, the Meon Valley, the Forest of Bere and Portsdown Hill.

Climate Change

Strategic Policy CC1 Climate Change: CPRE Hampshire believes that one of the most fundamental ways of combating the likelihood of adverse climate change, is to plan development where it can use better public transport and be less reliant on the car. The aspirations in Policy CC1 are more about how development can respond to climate change, and rather less about how spatial planning of future development can help prevent it. We consider that this is a missed opportunity. However, we feel that Criterion a) does not go far enough. According to Camilla Ween, Harvard Loeb Fellow, speaking on behalf of Transport for New Homes “Transport is responsible for about 26% of greenhouse gas emissions, much arising from personal car journeys. Our society will not be able to achieve the UN goals if we do not change the way we travel; that means we need to create new communities that are NOT car dependent. That means careful consideration of where new development is located, as well as how we design new communities, for example, places that are well connected with high quality public realm and movement infrastructure that encourage people to want to move to a car-free lifestyle.” It must be a fundamental tenet of the Fareham Local Plan that NO development should be permitted that relies on the car as its main means of access.

Nothing less than a drastic change to spatial strategy and a move away from South Hampshire’s historic pattern of sprawling suburbs will enable any meaningful contribution to the fight against adverse climate change. We owe it to future generations to do our utmost to shift patterns of behaviour that have become entrenched with the use of the private car. Even electric cars will not solve many of these issues as they still leave residues from tyres and fluids and are unsustainable in terms of battery manufacture. The adoption of a South Hampshire Green Belt would assist this by encouraging urban redevelopment, and preventing sprawl into the countryside where modal change to walking, cycling and public transport is very much more difficult to achieve.

Housing

Policy H1 Housing: CPRE Hampshire recognises that the current guidance from MHCLG requires the calculation of local housing need (LHN) based on figures from the 2014-based household projections, although a recent MHCLG consultation suggested a new methodology. Whatever the methodology, CPRE Hampshire supports Fareham BC in using the most up-to-date household figures based on the 2018-based projections. We also welcome the removal of Policy HA2 from the Reg 19 Local Plan.

Policy HA1 Warsash: CPRE Hampshire does not believe that the proposed development around Warsash can be considered truly sustainable, reliant as it is on the car as the main means of transport. We are concerned about the lack of a masterplan and believe the proposed framework does not fulfil a place making function.

Policy HP4 Five-Year Housing Land Supply: CPRE Hampshire has significant concerns about the unintended consequences of this policy, specifically its linkage with DS1, and believe that it may lead to site selection looking outside the Urban Area in the first instance.

Policy HP6 Exception Sites: The potentially inadvertent use of the word OR in Criterion c) could allow significantly large exception sites to be allowed, as long as they remain below the threshold of 5% of the size of the adjacent settlement. There should be a fixed upper limit.

Natural Environment

Strategic Policy NE1 Protection of Nature Conservation, Biodiversity and the Local Ecological Network: CPRE Hampshire supports the use of ecological network mapping to conserve nature and protect biodiversity and as a tool for influencing spatial planning.

Policy NE2 Biodiversity Net Gain: CPRE Hampshire supports the requirements for 10% biodiversity net gain on all development.

Policy NE4 Water Quality effects on the SPAs, SACs and Ramsar sites of the Solent: CPRE Hampshire understands there is an outstanding judicial process underway regarding the effectiveness of Fareham BC’s proposals for mitigating nitrate and other pollutants on the Solent and other protected waterways. At this point, CPRE Hampshire is therefore unable to endorse the proposed policy until the legal issues have been resolved.

Policy NE6 Trees, Woodlands and Hedgerows: CPRE Hampshire agrees with any policy that supports the preservation or enhancement of trees, woodlands and hedgerows.

Policy NE8 Air Quality: CPRE Hampshire supports the requirements for air quality improvement but considers more could be achieved if development were only to be permitted in locations around mass public transport hubs, rather than being car dependent.

Policy NE9 Green Infrastructure: CPRE Hampshire agrees that green infrastructure is important to the wider ecological network and to the health and wellbeing of residents but suggests that it would be better protected in perpetuity were it to be formalised as part of a new Green Belt.

Transport and Other Infrastructure

Strategic Policy TIN1 Sustainable Transport: CPRE Hampshire recognises that Fareham BC aspire to have ‘good growth’ with existing and proposed transport corridors influencing choice of development, but we feel the policy does not go far enough. The Council should feel empowered to reject development which is not already located around, or can provide, public mass transit hubs, in particular the rail network.

The principles of development and transport as set out in the Transport for New Homes checklist should be followed - <https://www.transportfornewhomes.org.uk/the-project/checklist-for-new-housing-developments/>.

Design

Strategic Policy D1 High Quality Design and Placemaking: The design quality of future developments starts with overall masterplanning and landscape context as well as specific building details. Fareham has seen a proliferation of poorly designed car dependant nondescript developments over recent years, and it is critical that major improvements are made for the future.

Yours faithfully,

Caroline Dibden

Vice-President
CPRE Hampshire

Paragraphs 3.29 – 3.36

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy DS1: Development in the Countryside

B1c Which part of the Policies Map?

Areas of Special Landscape Quality and Strategic Gaps

- a) East of Welborne,**
- b) the Strategic Gap along the Meon, and**
- c) to the north-west of the borough.**

2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire STRONGLY SUPPORTS the overall approach taken by Fareham BC in the Fareham Local Plan 2037 for a spatial strategy based on countryside, which is justified as it is in accordance with the aspirations as set out in the NPPF for development to be brownfield first, and for countryside to be protected for its intrinsic value and beauty, and for protection of Best and Most Versatile agricultural land. It is also supported by the Government's 25-year Environment Plan and for the recommendations as set out by the Climate Change Committee.

Furthermore, CPRE Hampshire SUPPORTS the Vision for the Fareham Local Plan 2037 which states that Fareham BC seek to retain its identity, and the identity of individual settlements within the Borough, through measures that seek to retain the valued landscapes and settlement definition.

We also SUPPORT Strategic Priority 2 which seeks to maximise development in the urban area and away from the wider countryside, valued landscapes and those of special quality and spaces that contribute to settlement definition.

CPRE Hampshire believes that the Vision and Strategic Priority 2 would both be better achieved if a new Green Belt was designated, due to its permanence and effectiveness. We submitted to Fareham BC and to PFSH a report by NEF Consulting on the potential socio-economic and environmental benefits of a Green Belt: <https://www.cprehampshire.org.uk/our-campaigns/south-hampshire-green-belt/>. This demonstrates the considerable financial benefits as well as to health and wellbeing, climate change and natural capital of protecting the green space near to population centres, in perpetuity, something that only Green Belt is designed to achieve.

Looking at the specific policy wording, CPRE Hampshire believes that criterion (e) of **Policy DS1** is unsound, specifically in the way it permits development in the countryside that is compliant with Policies **HP4, HP5 and HP6**. Permissions that might be compliant with these policies appear to be in direct contradiction with the other criteria in **Policy DS1**, and the policy is therefore internally inconsistent.

HP4 relates to the Five Year Housing Supply (5YHLS) and allows residential development outside the urban area boundary where the Council is unable to demonstrate a 5YHLS. It is believed that the Government intends to remove 5YHLS test in the planning reforms, so this policy may be redundant and should be reworded to future proof its deletion. However, that notwithstanding, the main problem is that the wording of Policy HP4 and its linkage with **DS1** could unintentionally lead to countryside locations taking priority over alternative, more sustainable, urban or brownfield locations.

HP5 relates to the provision of affordable housing on sites of 10 or more, and its linkage to **DS1** could unintentionally suggest that Fareham BC accepts in principle the development of ANY affordable housing site outside the urban area boundary. The risk is that the linkage could potentially enable large scale housing development in the countryside as long as it could be demonstrated that 40% affordable housing would be achieved.

HP6 relates to small rural affordable housing exception sites, and whilst CPRE Hampshire supports the provision of rural affordable housing, the concern is that the linkage with **DS1** could inadvertently lead to a series of separate applications which in combination amount to significant levels of development in the countryside. The cumulative impact on the separation of settlements resulting from a number of sites each individually sub- 1 hectare or <5% of the adjacent settlement must be considered, but at the moment the policy has no mechanism for dealing with this potential eventuality. See separate comments on **Policy HP6** as regards the use of the word *OR*.

CPRE Hampshire SUPPORTS criteria i) to v) of **Policy DS1** and believe they provide a sound underpinning of the principles aspired to by Fareham BC.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Fareham BC should look at the areal extent of a possible South Hampshire Green Belt as part of this Local Plan, as it has been confirmed by Leader Cllr Woodward that they wish to see such a designation to protect the countryside and gaps.

Remove the linkage of **Policies HP4, HP5 and HP6** with **Policy DS1**.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Including a proposed South Hampshire Green Belt would be in accordance with the aspirations as set out by the Council in council meetings, PFSH meetings and in press releases.

Removing the linkage of **Policies HP4, HP5 and HP6** with **Policy DS1** would remove the internal inconsistency by removing the possibility of inadvertent development in the countryside.

B4c Your suggested revised wording of any policy or text:

Remove the linkage of **Policies HP4, HP5 and HP6** from Policy **S1 (e)**.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for Local Plans to take the countryside into account when devising spatial development strategy, and we would like to appear at the Hearings to support Fareham BC in choosing this approach. Our expertise lies in spatial strategy and reconciling development requirements with the environmental constraints of countryside, and its uses and purposes.

Strategic Policy DS2: Development in Strategic Gaps

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC to designate strategic gaps between Fareham / Stubbington and the Western Wards (Meon Gap) and between Fareham / Bridgemary and Stubbington / Lee-on-the-Solent (Fareham- Stubbington Strategic Gap). However, a study carried out on behalf of CPRE Hampshire in January 2019, by consultants West Waddy, showed that historically strategic gaps in South Hampshire have failed to adequately prevent coalescence of settlements. This report was shared with Fareham BC as a member of the Partnership for South Hampshire, and can be submitted as part of our evidence on this matter to the examination hearings.

“An Assessment of the Effectiveness of Settlement Gap Policies in South Hampshire in preventing Urban Sprawl & the Coalescence of Settlements” – January 2019, West Waddy.

The conclusions show that through appeals and permissions the gaps designated in South Hampshire (including Fareham) have been significantly reduced over time, and are thus an ineffective policy and thus unsound. Para 3.10 confirms that this has been the case in Fareham.

The findings of this report show that “In the national context, South Hampshire is fairly unique among the large urban areas in England in having no designated Green Belt, with reliance instead being placed upon Gaps designated in Local Plans to prevent the coalescence of settlements.”

Furthermore “given the major urban extensions currently being proposed and the past history of erosion of Gaps through subsequent permissions being granted, a strong argument can be made that the current Gap policies across the sub-region are failing in their remit to prevent coalescence and sprawl, which is ultimately likely to lead to currently separate settlements forming one large South Hampshire conurbation and expanding out into the adjoining areas of countryside. The exceptional circumstances therefore exist to demonstrate that a new stronger policy backed by explicit Government advice is needed to prevent this happening and the tool for this is a Green Belt, which is already in use around most large urban areas in England. South Hampshire is the exception in having no such designation.”

CPRE Hampshire has submitted to Fareham BC and to PFSH a report by NEF Consulting on the potential socio-economic and environmental benefits of a Green Belt: <https://www.cprehampshire.org.uk/our-campaigns/south-hampshire-green-belt/>

Notwithstanding the above comments regarding a new Green Belt, CPRE Hampshire SUPPORTS the removal of the earlier proposed Strategic Growth Area SGA, previously entitled HA2 (in the Reg 18 consultation version) from the now proposed Fareham-Stubbington Strategic Gap. The previous inclusion of the SGA was clearly subject to objections by neighbouring Gosport BC, which would have undermined any Duty to Co-operate and thus soundness. It was also objected to by many CPRE members and is therefore of concern to us.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Fareham BC should look at the areal extent of a possible South Hampshire Green Belt as part of this Local Plan, as it has been confirmed by Leader Cllr Woodward that they wish to see such a designation to protect the gaps between settlements.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Including a proposed South Hampshire Green Belt would be in accordance with the aspirations as set out by the Council in council meetings, PFSH meetings and in press releases, and would lead to a much more rigorous policy to prevent coalescence which is Fareham BC’s stated aim.

A need for a South Hampshire Green Belt was confirmed by Cllr Woodward in the Fareham BC Executive Committee at 6pm on Monday 7th December 2020. Its omission from the Reg 19 Local Plan consultation is thus not in accordance from the council’s own publicly announced policy.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for a new South Hampshire Green Belt, and we would like to appear at the Hearings to further explain our justification and why Fareham merits the exceptional circumstances required to designate a new Green Belt. We have a petition which has been signed by nearly 15,000 people asking Fareham BC (alongside Eastleigh BC, Winchester CC and Test Valley BC) to designate a Green Belt as part of its Local Plan process.

POLICY DS3: Landscape

All Areas of Special Landscape Quality

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE fully SUPPORTS the approach taken by Fareham BC in respect of analysing and including Areas of Special Landscape Quality as part of its development strategy and as Strategic Policy S3. This is in accordance with the aspirations outlined in the NPPF to value landscape for its intrinsic character and beauty of the countryside, as outlined in NPPF Para 170 a) and b).

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for Local Plans to take landscape into account when devising spatial development strategy, and we would like to appear at the Hearings to support Fareham BC in choosing this approach. Our expertise lies in spatial strategy and reconciling development requirements with the environmental constraints of, and impacts upon, the wider landscape.

POLICY H1: Housing Provision

Strategic Policy H1: Housing Provision

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The approach taken by Fareham BC to calculating housing need for this Reg 19 version is based upon the MHCLG consultation on a new standard method in August 2020, which showed Fareham’s housing need to be lower (403 dpa) than using the previous standard method (514 dpa). CPRE Hampshire SUPPORTS the use of the latest base data on household projections (the 2018-based projections from the ONS) as it conforms with Para 31 of the NPPF “The preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be adequate and proportionate, focused tightly on supporting and justifying the policies concerned, and take into account relevant market signals.”

As can be seen from the graph below, the most up-to-date population projections (in 000’s) for Fareham evidences the trend towards a lower requirement, and this would translate into a lower household projection. The impact of Covid-19, and corresponding economic fallout, on migration patterns will remain unclear for some time, and it is therefore sensible to use a cautious approach to planning and development.

However, for Fareham to agree to take unmet need from Portsmouth is premature, predating as it does the revised statement of common ground from PFSH, and therefore Policy H1 is unsound.

It is also clear that there remains a significant reliance on delivery of housing at Welborne, which is subject to a separate plan. Delays to infrastructure finding at Welborne could have an impact on Fareham’s overall strategy for delivery of its housing needs in the plan period.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove the requirement to take housing from Portsmouth CC.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a recognised authoritative voice on Hampshire’s housing numbers, the standard methodology and has been involved in this aspect of Fareham’s Local Plans since the time of the South East Plan in 2005, and the formation of PfSH (Partnership for South Hampshire).

CPRE Hampshire is part of an expert group in the National CPRE network on housing numbers, and would like to appear at the hearing sessions to SUPPORT the use of the most up-to-date household projections.

Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire has significant concerns about the piecemeal development already seen, and proposed, in the Warsash area. Population growth in the 10 years 2009-2019 has reached 9% in Warsash and the western wards, while Fareham itself has only grown by 4%. As Warsash has no access to the rail network, this pattern of development could not be considered sustainable. It therefore fails the soundness tests.

An indicative framework as shown in Figure 4.1, but this does not meet the requirements for a masterplan, and it is not adequate for long-term planning to integrate the various separate sites and applications by a series of different developers. Policy HA1 will fail to meet any government aspirations for placemaking as set out in the NPPF Chapter 12, Paras 124 to 130, and is therefore unsound.

Para 124 of the NPPF states “The creation of high quality buildings and places is fundamental to what the planning and development process should achieve. Good design is a key aspect of sustainable development, creates better places in which to live and work and helps make development acceptable to communities.”

Para 125 of the NPPF states “Design policies should be developed with local communities, so they reflect local aspirations, and are grounded in an understanding and evaluation of each area’s defining characteristics.” It is apparent from discussion with CPRE Hampshire members that there has not, to date, been any meaningful involvement of local communities.

It is clear that the settlement policy boundaries have been moved to accommodate the applications pending for Warsash. This is not consistent with a plan-led approach but is simply reactive to a developer-led situation, and takes no account of the area’s defining features.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

More analysis of the sustainability criteria for the overall development strategy, such as access to public transport is required before sites such as HA1 are confirmed. Has every opportunity for brownfield development around rail networks been ruled out?

Much more consultation with the local community is required before the proposed HA1 framework meets NPPF prerequisites.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has worked for some years with local campaign group Save Warsash and the Western Wards, and a number of our members will be affected by the proposals for such a large allocation of housing to one small settlement. We would like to take part in the hearing sessions to represent their concerns for initial choice of an unsustainable site, loss of countryside and open space in Warsash, and poor design due to lack of a masterplan.

POLICY HP4: Five-year housing land supply

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 5.22 to 5.28

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy HP4: Five-year housing land supply

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

Policy HP4 states “If the Council cannot demonstrate a five-year supply of land for housing against the housing requirement set out in Policy H1, additional housing sites, outside the Urban Area boundary, may be permitted where they meet all of the following criteria.....” The problem with this policy is that inadvertently it encourages the first choice of sites to be “outside the Urban Area”. CPRE Hampshire is sure that this is not what Fareham BC intends, and in any event it would not be in accordance with the councils own aspirations for a brownfield first approach, nor in accordance with the NPPF Para 137, and is therefore unsound. A sequential approach should be used, even in the event of a lack of a five-year housing land supply.

The problem is exacerbated by the linkage of **Policy HP4** with **Policy DS1**, particularly **DS1 Criterion (e)** as discussed above.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy HP4 should be rewritten to include a sequential approach, which “makes as much use as possible of suitable brownfield sites and underutilised land” as per Para 137 (a) of the NPPF.

The linkage of **Policy DS1 (e)** and **Policy HP4** should be removed.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be in accordance with the NPPF.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is part of an expert group in the National CPRE network on housing numbers, and the five-year housing land supply, and would like to appear at the hearing sessions to discuss its impact on the Fareham Reg 19 Local Plan.

POLICY HP6: Exception Sites

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 5.43 to 5.51

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy HP6: Exception sites

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The second part of **Policy HP6, Criterion (c)**, would allow exception sites with a limit of 1 hectare *OR* a proviso that the scheme does not exceed 5% of the size of the adjacent settlement. The problem is the word *OR*, as this could lead to large sites adjacent to large settlements being permitted as they would still be beneath the 5% cut-off. For example, Fareham town is a large settlement, of some 20,000 households, and so an exception site of up to 5% could itself number 1,000 dwellings. CPRE Hampshire is sure that this is not what was intended by Fareham BC as the aspiration is for small sites on urban boundaries.

The problem is exacerbated by the linkage of **Policy HP6, Criterion (c)**, with **Policy DS1**, particularly **DS1 Criterion (e)** as discussed above.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy HP6 should be rewritten to include a sequential approach, which “makes as much use as possible of suitable brownfield sites and underutilised land” as per Para 137 (a) of the NPPF.

Criterion c) should be reworded to remove the reference to *OR* 5% of the size of the adjacent settlement and have a fixed upper limit of what is meant by ‘small sites’ as identified in the justification text (Para 5.46).

The linkage of **Policy DS1 (e)** and **Policy HP6** should be removed.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Any ambiguity on what a “small site” means would be removed giving clarity for applicants and for FBC.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of affordable housing, such that it is located and designed appropriately, and would like to appear at the hearing sessions to discuss the impact of Policy HP6 on the Fareham Reg 19 Local Plan.

STRATEGIC POLICY CC1: Climate Change

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 8.1 to 8.10

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy CC1: Climate change

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant		NO
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire generally SUPPORTS the approach taken by Fareham BC to Climate Change. But we believe that **Policy CC1, Criterion (a)** does not go far enough to encourage/enforce a truly sustainable pattern of development and is unlikely to lead to a meaningful reduction of emissions from private car use.

Section 19(1A) of the Planning and Compulsory Purchase Act 2004 requires that a local authority's development plan documents must: (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority's area contribute to the mitigation of, and adaptation to, climate change.

The NPPF Para 148 further includes the requirement that “the planning system should support the transition to a low carbon future in a changing climate”, should “shape places in ways that contribute to radical reductions in greenhouse gas emissions” and Footnote 48 “in line with the objectives and provisions of the Climate Change Act 2008.”

CPRE Hampshire believes that one of the most fundamental ways of combating the likelihood of adverse climate change, is to plan development where it can use better public transport and be less reliant on the car. The aspirations in **Policy CC1** are more about how development can respond to climate change, and rather less about how spatial planning of future development can help prevent it. We consider that this is a missed opportunity. According to Camilla Ween, Harvard Loeb Fellow, speaking on behalf of Transport for New Homes “Transport is responsible for about 26% of greenhouse gas emissions, much arising from personal car journeys. Our society will not be able to achieve the UN goals if we do not change the way we travel; that means we need to create new communities that are NOT car dependent. That means careful consideration of where new development is located, as well as how we design new communities, for example, places that are well connected with high quality public realm and movement infrastructure that encourage people to want to move to a car-free lifestyle.” It must be a fundamental tenet of the Fareham Local Plan that NO development should be permitted that relies on the car as its main means of access.

Nothing less than a drastic change to spatial strategy and a move away from South Hampshire’s historic pattern of sprawling suburbs will enable any meaningful contribution to the fight against adverse climate change. We owe it to future generations to do our utmost to shift patterns of behaviour that have become entrenched with the use of the private car. Even electric cars will not solve many of these issues as they still leave residues from tyres and fluids and are unsustainable in terms of battery manufacture.

Policy CC1 is therefore not legally compliant unless the large part of Fareham’s spatial strategy is geared to development around mass public transport hubs and avoiding sites which are car-dependant. It is clear that sites such as Policy HA1 would fail to meet this condition.

CPRE Hampshire recommends the checklist provided by Transport for New Homes, which sets out an objective approach to planning new housing areas without dependence on cars:

<https://www.transportfornewhomes.org.uk/wp-content/uploads/2019/10/checklist.pdf>

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

CPRE Hampshire recommends strengthening **Policy CC1, Criterion (a)** to enable a spatial strategy more likely to meet the requirements set out in Section 19(1A) of the Planning and Compulsory Purchase Act 2004, and the NPPF, by including a requirement for mass public transport hubs to be the first approach for development, and to enable Fareham to refuse car-dependent applications.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be in accordance with Section 19(1A) of the Planning and Compulsory Purchase Act 2004, and the NPPF Para 148.

B4c Your suggested revised wording of any policy or text:

(a) A development strategy that minimises the need to travel by allocating sites and generally directing development to locations **near to mass public transport hubs**, with better services and facilities, or where they are capable of being improved.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning housing, such that it is located and designed appropriately around public transport hubs to minimise emissions and would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy CC1** in this regard.

POLICY NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| X | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.5 to 9.27

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

B1c Which part of the Policies Map?

The Local Ecological Network map in Appendix C

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The approach taken by Fareham BC is sound, and CPRE Hampshire SUPPORTS the requirement for nature to be conserved and ecological networks to be protected as per the forthcoming Environment Act.
