1) Paragraph: 1.2

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

housing need of local persons out of date as it has a long term downward trend. local need is not met by estate agents putting properties on the open market

What modification(s) is necessary to make the Local Plan legally compliant or sound?

consultation to all households

How would the modification(s) you propose make the Local Plan legally compliant or sound?

supply hard copy when requested. not everyone has easy access to internet

Your suggested revised wording of any policy or text:

the council will supply written copies on request

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

AS an accountant and committee member of many community groups, I am used to delivering results, which this document fails to do

2) Paragraph: 2.4

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

housing on flood plains and marshland not identified

What modification(s) is necessary to make the Local Plan legally compliant or sound?

excluding unsuitable sites

How would the modification(s) you propose make the Local Plan legally compliant or sound?

remove the property speculators ability to sell cardboard houses on marshland to gullible buyers

Your suggested revised wording of any policy or text:

all sites have been tested for poor drainage and toxic residues

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

As accountant for a large property company and having bought and sold houses, I can help the council close the loopholes used by companies in the in the borough over the last 40 years

3) Paragraph: 2.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

this particular town requires social housing , not properties for sale out of the reach of most young families or the disabled or veterans

What modification(s) is necessary to make the Local Plan legally compliant or sound?

replacing the affordable definition with one that aligns with reality

How would the modification(s) you propose make the Local Plan legally compliant or sound?

gets the result it aims for, not the building of cardboard houses

Your suggested revised wording of any policy or text:

provision of social housing , not affordable housing

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

having experience in property in various parts of the country, I can help achieve realistic results which the plan may not do

4) Paragraph: 2.12

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

high quality design has not been supplied by property speculators to date

What modification(s) is necessary to make the Local Plan legally compliant or sound?

provision of social housing specified by the councils excellent housing maintenance dept

How would the modification(s) you propose make the Local Plan legally compliant or sound?

achieve the objectives stated

Your suggested revised wording of any policy or text:

replace "affordable housing " with social housing throughout the document as the definition is fundamentally flawed

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

used to committee procedures and providing brief and on point contributions

5) Paragraph: 4.3

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

existing local households have to compete with buyers from anywhere when private property companies are involved, so the aims are unachievable

What modification(s) is necessary to make the Local Plan legally compliant or sound?

council houses built in conjunction with housing associations as achieved in many parts of the country

How would the modification(s) you propose make the Local Plan legally compliant or sound?

get the results aimed for

Your suggested revised wording of any policy or text:

the Welbourne numbers can be piled into the first ten years , so there can be a moratorium on speculative planning applications for this period

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I have extensive inside knowledge of how companies renege on assurances

1) Paragraph: 1.5

Legally compliant	No
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Fareham Borough Council's adopted Statement of Community Involvement states "the Council aims to give everyone an equal opportunity to influence and comment on plans and planning applications shaping the future development within Fareham". It also states that it will use a variety of methods and "will understand the needs of different stakeholders and engage and consult in a way that suits them". They have not shown this in their actions. The council paid a distribution company for 53000 editions of the Fareham Today Special Edition to be printed and delivered to every household within the borough. These were very important at this time - especially to people who do not use the internet or social media. We are in the middle of a pandemic. People are unable to visit the council offices or pick up a copy of this in the library. In fact, none of the face-to-face methods outlined in the Statement of Community Involvement (How will we engage and consult? 5.1 d to g) have been used. There have been no stands in the shopping areas with the leaflets available to collect and FBC staff to explain the content. There has been no exhibition in a local building nor a CAT meeting. The notices on bus stops and notice boards would not be seen by people during lockdown or by those shielding or self-isolating. The virtual exhibition which is "available to everyone at any time of the night or day right up until 18th December" is of no use to the people will not know about this or will be unable to access it. For many, the delivery of this through their door would be their only access to the information. These leaflets were not delivered to all households. People in more than 70 roads in Portchester alone, reported on social media that they had not received a copy. Some quick investigation showed that roads in Fareham, Titchfield, Warsash and Stubbington had also not had these delivered. The PR and Marketing Manager does not know which roads have had the leaflets delivered and which have not, how many had been delivered and why so many roads had been missed. The non-delivery of these leaflets does not indicate that Fareham council understands the needs of residents, nor that it engaged in a way that suited all. While the PR and Marketing Manager informed me that Fareham Today does not form part of the consultation material, the fact remains that by delivering this to some but not many others, Fareham Council has not given everyone in the borough 'equal opportunity' to access the information needed to know where and how to comment on this stage of the consultation.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

An extension of/ further consultation period to allow the delivery of Special Edition of Fareham Today to all households and time for those residents to comment should they wish.,

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would give everyone "an equal opportunity to influence and comment on plans". as stated in the adopted Statement of Community Involvement,

Your suggested revised wording of any policy or text:

N/A

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I have information (including email exchanges) which shows evidence of the issue I have highlighted.

Respondent details:

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Statement of Community Involvement states a variety of methods, should be used to solicit comments from the public. Because paper based documents failed to be employed across the borough a large proportion of residents were deprived of sharing their opinions. This has been exacerbated by covid restrictions, limiting the access to council offices and libraries. Since 2017 Residents concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures required to trigger a full Council meeting debates, such debate was refused even after a challenge was raised to the Council's Scrutiny Board. It is discriminatory that community-generated evidence carries less weight than that provided by Developers consultants. e.g regarding previous use of land in Nitrate budget calculations similarly with traffic survey results captured by Residents and Community Speedwatch teams.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The Local Plan consultation should be extending into 2022 to take account of Covid and the lack of possible consultation. The Petition raised in 2017 and that met the required prerequisite of numbers should be debated at a Full Council Meeting. Residents and community generated evidence should be noted and listened to, despite many objections to an an exception increase in building dwellings in Warsash there has been no decrease in the level of proposed building in fact the opposite, there is now an increase.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

This would ensure that community involvement was being listened to and legally compliant by FBC.

Your suggested revised wording of any policy or text:

The Plan for Warsash dwellings is reduced to 420 to take account of residents and the community involvement. (I am not a lawyer or media consultant and do not see why I am being asked to revise the wording of any policy)

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent details:

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.5 Introduction: Statement of Community Involvement Paragraph 2.1 says a “variety of methods” should be used to solicit comments from the public. Because paper-based documents failed to be employed across the borough, a large proportion of residents were deprived of sharing their opinion. This was exacerbated by Covid restrictions, limiting the access to libraries and the council office. The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents’ concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Allow the public to be able to fully share their opinions and have their say now.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Public should be given the chance they were denied earlier in the process.

Your suggested revised wording of any policy or text:

Not sure

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Paragraph: 1.16

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.16: No mention is made of the 2017 unadopted draft Plan and Officers confirm it is the previous, 2015 plan which is extant. Para 4.8 Allows the LPA to consider Housing sites allocated in the previous adopted (extant) Local Plan. Yet, whilst HA1 did not feature in the extant 2015 Plan, page 38 ignores this, stating that housing will be provided through HA1 and other local sites. The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

We should take our fair share of housing but no more.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

?

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Policy: HP4 - Five-year Housing Land Supply

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications. Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockswood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should consider alternative access points onto other streets than Brook Lane or reduce the number of dwellings

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By reducing the impact of traffic and potential accidents.

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Paragraph: 10.15

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reduce the numbers of dwellings. Ensure there are adequate parking facilities within the site. It is already very hard to park in the center of Warsash and the additional cars will exacerbate the problem.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

?

Your suggested revised wording of any policy or text:

Not sure

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Paragraph: 7.18

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 7.18 Out of town shopping is discussed, but not defined; Out of town shopping will take jobs and customers away from local shopping areas and will increase traffic on the routes in and out of Warsash and Locks Heath.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

We should be encouraging people to shop locally and not to drive to shopping centres causing extra traffic on local roads. Also taking business from local shops and services.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

not sure

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Paragraph: 10.26

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.26 Infrastructure Delivery Plan calls for the expansion of health care provision through the addition of further GP locations in the Western Wards, However the table provided within the document only provides an historic timeline pre-dating the Local Plan. This is not a Sound approach taking into consideration that HA1 alone will bring an additional 830 dwellings..

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The large number of additional houses planned for Warsash will place a burden on the already stretched doctors surgeries and Dentists in the area.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

A current analysis of health care requirements needs to be undertaken.

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent details:

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

I do not think I have had access to a variety of methods from which to comment. Had to ring up and get a copy of Fareham today which took a week to come. I think to the layman a lot of the language used is very contradictory and misleading i.e. "tests of soundness" does not seem to add up to FBCs Legal compliance and Duty to cooperate. The community have tried to become involved but everything that we have done deputations, objections and protest marches have been denied..

What modification(s) is necessary to make the Local Plan legally compliant or sound?

More weight appears to be given to the developers rather than to the residents. I am totally opposed to the nitrates budget calculations and consider this needs to be challenged.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

I think that the residents would consider that their concerns have not been taken into account and our opinions appear to be negated.

Your suggested revised wording of any policy or text:

The plan does not meet the legal requirements as the community has been disenfranchised.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Because it is my right to hear exactly what arguments are put for and against.

2) Paragraph: 1.6

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

No joined up thinking for HA1; developers have been allowed to work in isolation, so the area is dotted with developments with no thought of the environmental impact. There should be another Environmental impact assessment to show what this will mean if it was all carried out.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

No mention made of the 2017 an unadopted draft plan because the planning authority allows for housing sites which had previously been allocated in an extant local plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would appear that everything leans towards the developers as more and more land appears to have been gobbled up by them. And as everything is being looked at in isolation you cannot get a coherent view of how this once agrarian landscape is being swamped by housing.

Your suggested revised wording of any policy or text:

I do not consider the plan to be effective as it does not take into account the reasonable alternatives available within the Fareham district.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Legal right as feel disenfranchised.

1) Policies map: LOCAL PLAN 2037 BOUNDARY (HP3, HP5-9, HP11, NE2, NE7, TIN4, D4)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

it has been commented on in previous consultation and none of the omments were taken on board which defets purpose of the consultation.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

review of quality of housing proposed and better sounds climate chnage policies

How would the modification(s) you propose make the Local Plan legally compliant or sound?

propose on site facilities, avoiding using local infrustrutere for bigger developments

Your suggested revised wording of any policy or text:

rethink climate emergency strategy: look at Southanpton City Council Green Charter and Wincehster City Council green policies

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

SEVERAL

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

SEVERAL

B1c Which part of the Policies Map?

UNABLE TO ACCESS AT HOME. FAREHAM / STUBBINGTON STRATEGIC GAP AREA.

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input type="checkbox"/>	<input checked="" type="checkbox"/>

B3 Please provide details you have to support your answers above

IT WOULD APPEAR TO ME, ESSENTIAL CRITERIA & EVIDENCE BASED FACTS 'HAVE BEEN OMITTED, THIS RENDERING PART OF THIS PLAN OUTDATED ALREADY, (AFTER ALL WE ARE IN 2020 - APPROACHING 2021) AND NOT COMPLIANT WITH THE ABOVE 3 POINTS IN ENTIRETY.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

TO INCLUDE THE OMITTED ESSENTIAL CRITERIA AND EVIDENCE BASED FACTS.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

I BELIEVE IT WOULD BY:

- 1) MINIMISING RISKS .THUS AVOIDING DEVASTATION.
- 2) PREVENTING POTENTIAL LEGAL ACTIONS AGAINST THE COUNCIL THUS AVOIDING WASTING TAXPAYERS MONIES.
- 3) PROTECTING a) RESIDENTS, b) THE ENVIRONMENT, c) THE COUNCIL

B4c Your suggested revised wording of any policy or text: d) THE COUNTRYSIDE & ALL WITHIN IT.

TO INCLUDE THE OMITTED ESSENTIAL CRITERIA AND EVIDENCE BASED FACTS.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

BECAUSE OF THE SERIOUSNESS OF THE OMISSIONS AND EVIDENCE-BASED FACTS WHICH I WOULD NEED TO CONVEY TO THE PLANNING INSPECTOR. THUS UPDATING THE PLAN TO BE IN LINE WITH MODERN TIMES.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

FAREHAM
BOROUGH COUNCIL

ESPECIALLY IF AN 11yr OLD CHILD HAS BEEN ALLOWED TO ADDRESS THE PLANNING INSPECTOR DIRECTLY, THEN SO SHOULD I.

Yours Sincerely.
Ms S. Boyce

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Paper based document Fareham Today Local Plan Special edition Autumn 2020 was not delivered to all households in Fareham. I received mine 2 weeks after the consultation had started & only because I completed an online form to report it missing

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Public needs to be consulted again so they are aware the process is being carried out

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Completing this structured online form is beyond the time constraints and knowledge base of the layman. There are hundreds of pages of documents to absorb & comment upon

Your suggested revised wording of any policy or text:

Public needs to be consulted again so they are aware the process is being carried out

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: DS1 - Development in the Countryside

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Objects to the both the wording of Policy HP4 and the link to DS1 policy as it implies that if Fareham's five year housing supply is not met, the first area of search is outside of the urban area boundary.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should refer to sites within urban areas, brownfield land, underutilised employment sites, sites close to train stations, under-utilised town centre sites such as car parks and shopping precincts, consideration of using Council land assets and other public sector land, intensification of existing neighbourhoods. These types of sites should be clearly identified as being preferential before greenfield land outside the urban area

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Prevent building on the countryside

Your suggested revised wording of any policy or text:

No proposal to amend the wording of Policy HP5 only that the link included in DS1 is removed

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Policy: DS1 - Development in the Countryside

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HP6 is not robust enough to stop development in the countryside

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The development of Rural Exception sites will not be permitted in areas designated as 'Special Landscape character' and the development will only be permitted where all criteria a-e are met

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Prevent building in the countryside

Your suggested revised wording of any policy or text:

The development of Rural Exception sites will not be permitted in areas designated as 'Special Landscape character' and the development will only be permitted where all criteria a-e are met

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: HA32 - Egmont Nursery

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA32 Housing allocation is undeliverable, it is also in an area this plan designates as special landscape character countryside & therefore should not be included.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 housing allocation from the Draft plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The site is undeliverable as there is no established right of way to the public Highway, removing HA32 would prevent an undeliverable site being included in the development plan.

Your suggested revised wording of any policy or text:

Remove HA32 housing allocation from the Draft plan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The site is currently subject to the beginning of a Judicial review case, FBC have consistently ignored residents statements that the site is not deliverable for a number of reasons including: 1) Lack of road access. The red line of the approved outline planning permission does not reach a public Highway, therefore that planning application and its approval are unlawful. 2) Inaccurate Nitrate calculations for nitrate mitigation, occupancy figure of 2.4 people is being used for large 5 bedroom houses. The site applicants position as chair of the local Conservative Club has rendered decision making by FBC in relation to this site biased and residents need an impartial judgement to take place on the inclusion of this site in the local plan.

5) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Many Planning Applications for HA1 are already in place. The HA1 masterplan included in this plan is not being followed. The greenspaces are not being kept. This whole area was designated countryside in the last development plan. The supporting documents prove residents claims the areas roads, schools & healthcare can not accomodate additional population of this density

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reduce the housing allocation in the HA1 area to a level the local infrastructure can accomodate

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Create sustainable development

Your suggested revised wording of any policy or text:

HA1 be reduced to total of 500 houses

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.5 Introduction: Statement of Community Involvement Paragraph 2.1 says a “variety of methods” should be used to solicit comments from the public. Because paper-based documents failed to be employed across the borough, a large proportion of residents were deprived of sharing their opinion. This was exacerbated by Covid restrictions, limiting the access to libraries and the council office. The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents’ concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Allow the public to be able to fully share their opinions and have their say now.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Public should be given the chance they were denied earlier in the process.

Your suggested revised wording of any policy or text:

Not sure

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Paragraph: 1.16

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.16: No mention is made of the 2017 unadopted draft Plan and Officers confirm it is the previous, 2015 plan which is extant. Para 4.8 Allows the LPA to consider Housing sites allocated in the previous adopted (extant) Local Plan. Yet, whilst HA1 did not feature in the extant 2015 Plan, page 38 ignores this, stating that housing will be provided through HA1 and other local sites. The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

We should take our fair share of housing but no more.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

?

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Policy: HP4 - Five-year Housing Land Supply

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications. Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockswood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should consider alternative access points onto other streets than Brook Lane or reduce the number of dwellings

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By reducing the impact of traffic and potential accidents.

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Paragraph: 10.15

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reduce the numbers of dwellings. Ensure there are adequate parking facilities within the site. It is already very hard to park in the center of Warsash and the additional cars will exacerbate the problem.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

?

Your suggested revised wording of any policy or text:

Not sure

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Paragraph: 7.18

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 7.18 Out of town shopping is discussed, but not defined; Out of town shopping will take jobs and customers away from local shopping areas and will increase traffic on the routes in and out of Warsash and Locks Heath.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

We should be encouraging people to shop locally and not to drive to shopping centres causing extra traffic on local roads. Also taking business from local shops and services.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

not sure

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Paragraph: 10.26

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.26 Infrastructure Delivery Plan calls for the expansion of health care provision through the addition of further GP locations in the Western Wards, However the table provided within the document only provides an historic timeline pre-dating the Local Plan. This is not a Sound approach taking into consideration that HA1 alone will bring an additional 830 dwellings..

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The large number of additional houses planned for Warsash will place a burden on the already stretched doctors surgeries and Dentists in the area.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

A current analysis of health care requirements needs to be undertaken.

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Paragraph: 4.2

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 4.2 of the Publication Plan is unsound. It bases housing numbers on a proposed new standard methodology for calculating need, which was consulted on in 2020 but has not been agreed by government and is therefore premature. There has always been a significant risk that it may not be adopted. This risk materialized by the announcement on 16 Dec. by the Ministry of Housing, Communities & Local Government stating the computer-based formula used to decide where houses should be located has been "updated" to focus more on cities and urban areas in the North and Midlands, away from rural and semi rural communities in the South East. I suspect that this was merely a PR exercise for the Executive leader to announce reduced housing numbers and gain votes for the election in May 2020. Applying the proposed new methodology which was clearly premature and which led to Fareham forecasting a 5 year land supply. They then prematurely agreed to take an allocation of unmet need from Portsmouth. Page 37 Paras 4.12, 4.16 and Policy HP1 Illustrates that whilst a contingency buffer of 1094 homes has been made, the Plan is heavily reliant on the certainty of delivery on 4858 houses at Welborne. The latest Housing Delivery test will not be available until after this public consultation period. The agreement is premature and therefore Policy H1 is unsound. Para 3.10 The decision to "rewild" the Stubbington Strategic Gap was made without consultation with council officers or elected Members. Instead, this announcement came via a press release issued after the start of the Full Council meeting which was in the process of debating this Plan. This clearly undemocratic and illegal.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The plan must apply the correct updated standard methodology for calculation need. Decisions taken on sites to be included or excluded in the plan need to be democratically selected. Premature decisions like the ones made in this plan must not be repeated in the future.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Revisions so that both the sites and evidence for this plan need to be use the 2014 projections. Council procedures need to be reviewed to ensure a democratic rather than autocratic approach to decision making More certainty on the council's own housing position with regard to dependency on Welborne, its ability to meet unmet need of neighbouring boroughs and the capacity to do so in respect of it's 5 year land supply will avoid unnecessary taxpayer's expense such as we have seen in the preparation of this plan, the second one to be 'ripped up' and not adopted since 2017.

Your suggested revised wording of any policy or text:

References should be made to applying the recommended up to date methodology not one which may or may not be adopted in the future and decision making to apply a sound democratic approach Any risk regarding dependencies impacting this council's ability to deliver the plan needs to be explicit with appropriate contingency built in and called out within the document

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Paragraph: 2.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 2.1 Statement of Community Involvement says a "variety of methods" should be used to solicit comments from the public. Planned paper based documents failed to be delivered to many residents across the borough, so a large proportion of residents were disadvantaged in preparing their comments on this plan. This was exacerbated by Covid restrictions, which limited public access to libraries and the council office. This is contrary to the legal obligation on the council to involve the community. Para 1.5 Introduction Publication Plan Introduction Page 1 specifies that representations should focus solely on "Tests of Soundness" but is contradictory to FBC's guidance in Fareham Today which includes the additional areas of "Legal Compliance" and "Duty to Cooperate". This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents' concerns regarding Fareham's approach to planning have not been considered regardless of protest marches and endless deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council's scrutiny Board. Community generated evidence carries less weight than that provided by developer's consultants and is therefore discriminatory. Residents challenged the previous use of land which plays a critical part in Nitrate budget calculations. At a recent appeal the inspector agreed with the views of residents and the appeal was dismissed. Similarly traffic survey results captured by Community Speedwatch teams and residents, demonstrate a huge discrepancy in the reality compared to the complex data presented by developers.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Public consultation in the true sense of the word needs to be demonstrated by this council. It should not be an 'ask then ignore' approach which at best, is all we have had since 2016. To facilitate a consultation process that a lay man would understand, communicating the proposals and implications with clarity and in plain English. The current process is complex, sometimes inaccurate and has the effect of discouraging engagement from residents, not because they don't want to but because they find the whole process off-putting, overwhelming and confusing. This Publication plan consultation is an example. It is important to overcome difficulties such as the current pandemic to ensure the public are not disadvantaged in consultations Its important to display policies and procedures in the public domain but equally important that this council follows its own guidance not changing the rules when it suits them Equal weight needs to be applied to all party's representation in planning decisions and this has to be evident to all concerned.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The council encourages public involvement, as it is legally required but feedback should be provided to objections, deputations and comments such as in this plan, even if not on an individual basis. At least the public will feel their contribution has been considered even if not adopted. Measures put in place to ensure the public are not disadvantaged during consultation, particularly in the face of adversity. Not everyone uses online technology. Application of the rules at all times should be a given. If the council's rules state a petition will trigger a debate at full council if it meets the required number of signatures, this should be applied. All evidence presented regardless of who presents it should at least be considered to carry equal weight by the council. Concerns over what may or may not happen if an application or consultation does not go the way the council want it to, shouldn't be a deciding factor. Communication of any documents that impact the public need to be written clearly and concisely. Not everyone is trained in planning law. This would help to fulfil the council's legal obligation to consult

Your suggested revised wording of any policy or text:

A 'variety of methods' used to solicit comments from the public should be expanded to 'ensure the material is easily understood.' Feedback on comments from members of the public should be provided as a matter of course. Innovative and reliable measures need to be in place to overcome unusual situations such as a pandemic, when face to face engagement is not possible, so that members of the public are not disadvantaged. Members of the public need to be clear about what they can expect when engaging with the council. A simple 'if you do this', 'we will do that' would suffice. The rules and guidance need to be executed correctly. The council needs to demonstrate how they have applied equal weight to the public's contributions and that of other representatives regardless of whether 'for' or 'against' a proposal.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Insofar as commentary on this Plan is strictly limited to narrow technical issues of legal compliance, and consistency with national policy, both of which require technical knowledge beyond that of most residents, I believe the very process of limiting consultation in this way is not in the spirit of the laws meant to provide for openness and ease of access for residents. My representations are filed as pertaining to development HA1, but in so far as the other policy areas impact this development, my comments should be duly noted across many of the policy areas, of which the web form only allows you to choose one. Legal Compliance The council has a duty to use a variety of methods to obtain community input (Para 1.5). For the first time to my knowledge, vast numbers of residents were not sent paper copies of the Plan (this has been precedent until now), and as such many residents were unaware or unable to comment. Moreover, Warsash Residents Associations were never consulted with respect to the housing allocations, which is contrary to Paragraph 66 of the NPPF. HA1 did not feature in the 2015 Local Plan, and paragraph 1.16 confirms that this plan is extant, and that the LPA should consider allocations made in the previous adopted plan. Para 4.19 Housing policies HA(2,5,6,8,11,14,16,18,20,21,25) are no longer proposed allocations, so why was HA1 singled out as an allocation and how was the Objectively Assessed Housing Need arrived at for this site? The new proposed Plan then goes on to ignore the 2015 Plan by stating HA1 will provide for these allocations without any due formal adoption of the 2017 Plan. Developers have taken advantage of the unadopted 2017 Plan by citing it as a reason to get approval, and some have been granted on this premise. Furthermore, the site has been extended to increase the boundaries of development even further than the unadopted 2017 Plan. HA1 is responsible for 62% of the housing allocations in the borough, (excluding Welbourne) , with no overarching master plan to deal with the pressures on community infrastructure. By actively allowing individual applications to determine the total extent of development, I believe FBC is absolving itself of responsibility to ensure community services are well catered for and commensurate with the increase in housing being proposed. Para 9.10 states the LPA is aspiring to Nitrate Neutrality. Strategic Policy NE1 requires designated sites be protected and ENHANCED. Likewise Para 9.50 (Policy NE4) confirms permissions will be granted when the integrity of designated sites be maintained or IMPROVED. On Page 199 Para 9.54 indicates that proposals for development should provide a net REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA's approach therefore contravenes both the Habitats Directive and the Publication Plan in respect of these policies. It is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves beyond scientific doubt, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been mitigated (rather than compensated). There is doubt that the LPA is applying the Natural England advice correctly and lawfully in this respect. Soundness Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant subversion of the settlement principle above, and moreover it seems has been done in a less than transparent manner to enable this development. Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary with no consultation. Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications. Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockwood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. Infrastructure Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect. Para 10.14 The Local Plan Strategic Transport Assessment at Para 14.16 reads; "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area HA1, of the local plan with 830 homes and isn't assessed within the The Local Plan Strategic Transport Assessment document. Para 7.13 Local retail/commercial facilities figures do not cater for the additional houses in Warsash. For example, no additional convenience goods floor space has been allocated to Warsash. Facilities Para 7.18 Out of town shopping is discussed, but not defined; Out of town shopping will take jobs and customers away from local shopping areas and will increase traffic on the routes in and out of Warsash and Locks Heath. Para 10.26 Infrastructure Delivery Plan Section 5.4 Education is planned with HCC but the period of any proposed extensions for child placements is only up to 2021 whereas the Plan covers up to 2037. This is not a sound approach for the education of our children. Education Para 10.27 Infrastructure Delivery Plan Table item 83 calls for section 106 provisions of additional Early Years Foundation Provision (EYP) within the Western Wards however HA1 does not indicate the placement of a nursery or pre-school within the development area. Where is the child placement contribution to be allocated as the IDP calls for the addition of 83 placements whereas there are over 1000 new dwellings being proposed for the Warsash area alone. Moreover, no allowances have been made for secondary schooling, which is at capacity in the area and is already subject to detrimental policy changes to the catchment

Please provide details you have to support your answers above

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Detailed long term infrastructure planning for the community to include retail, parking, schools, GP's, traffic measures commensurate with a 2037 timeline and which requires FORMAL community consultation at regular intervals. Lessening of proposed number of dwellings to maintain some green space in the village and improve living conditions for all residents, old and new. Requirement to have an integrated plan, not a one by one for individual developers, which lessens community funds and doesn't account for the cumulative impact on the village.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

as above

Your suggested revised wording of any policy or text:

as above

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 1.5 Introduction: Statement of Community Involvement and further Paragraph 2.1 says a “variety of methods” should be used to solicit comments from the public. Because paper-based documents failed to be employed across the borough, a large proportion of residents were deprived of sharing their opinion. This was exacerbated by Covid restrictions, limiting the access to libraries and the council office. The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents’ concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board. It is discriminatory that community-generated evidence carries less weight than that provided by Developers consultants. E.g. regarding previous use of land in Nitrate budget calculations similarly with traffic survey results captured by residents and Community Speedwatch teams.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should make another attempt to achieve a reasonable level of Community Involvement

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Allow for public opinion to be expressed through the appropriate channels and provide a mechanism for evidence collected by residents groups to be equally considered as that from Developer's consultants and associates

Your suggested revised wording of any policy or text:

The LPA will hold another Public Consultation on the Plan during the Summer of 2021 where their views and concerns can be properly considered

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number! There is no joined up "Masterplan" for HA1 (with developers working in complete isolation of one another). Therefore, another environmental impact assessment must be conducted showing the cumulative effect of HA1 in its entirety. Para 4.19 Housing policies HA(2,5,6,8,11,14,16,18,20,21,25) are no longer proposed allocations. So, why was HA1 singled out as an allocation and how was the Objectively Assessed Housing Need arrived at for this site? Developers have taken advantage of the LPA's decision to propose HA1 within (the now defunct) 2017 Plan and have submitted Applications that the LPA have resolved to grant permission on (many ahead of and likely contrary to) the Publication Plan. Others claiming their sites fit well with HA1 has now resulted in the boundaries of HA1 being adjusted to accommodate them. This seems to mark an inappropriate powershift toward the Developers.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

HA1 needs to be re-evaluated from the point of view of reducing overall number of dwellings (by conducting an OAN on the Warsash area alone). The Plan must also ensure a "joined up" approach is taken to the many Developers sites and the CUMULATIVE effects caused rather than the current piecemeal "Salami-Slicing" approach

How would the modification(s) you propose make the Local Plan legally compliant or sound?

HA1 would be properly re-assessed (starting from the point of the Extant 2015 Plan numbers and not the unadopted abandoned draft plan of 2017)

Your suggested revised wording of any policy or text:

HA1 will be re-assessed in the light of confirming the Objectively Assessed Housing Need in Warsash and the Western Wards and any Allocation sites will be considered both individually and as a whole to ensure the Cumulative effects on the infrastructure and environment are properly taken into account

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Paragraph: 9.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 9.10 Whereas the LPA is aspiring to Nitrate Neutrality, Strategic Policy NE1 requires designated sites be protected and ENHANCED Likewise Para 9.50 (Policy NE4) confirms permissions will be granted when the integrity of designated sites be maintained or IMPROVED. Finally, Page 199 Para 9.54 indicates that proposals for development should provide a net REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA’s approach therefore contravenes both the Habitats Directive and the Publication Plan in respect of these policies. Furthermore, a leading QC’s opinion is it is unclear how any development could be contemplated in the Western Wards without negatively impacting the SAC and RAMSAR sites and therefore based on proximity alone, this would invalidate the deliverability of these developments. As per advice from Natural England, it is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves beyond scientific doubt, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been mitigated (rather than compensated). There is doubt that the LPA is applying the Natural England advice correctly and lawfully in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA must ensure that mitigation of eutrophication complies with the directive to REDUCE overall Nitrate Levels and that inline with Natural England Advice that protected sites (SAC, SPA, RAMSAR) are not compromised because simple broader-region off-setting has been used as opposed to Local Mitigation of effects on those sites

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Plan would become consistent with Advice From Natural England and the Habitats Directive

Your suggested revised wording of any policy or text:

Sites will be allowed where Nitrate Reduction mitigation can be proven at a local area level

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 “Strategic Priorities” which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manœuvre by stealth of the council, to suit its own objectives.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Greenfield Sites will be assessed in their own right and Settlement Boundaries shall not be altered to include large proposed Housing Allocations until the Objectively Assessed Housing Need for the immediate vicinity have been considered. Similarly no redesignation of Greenfield sites to Urban status shall be allowed until OAHN can be proven to justify this.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Remove changes to Settlement Boundary as indicated in WW17 and apply Greenfield Site aspirations to HA1

Your suggested revised wording of any policy or text:

HA1 is in the Countryside and as such any consideration of Housing Allocation should conform with the Policies for Development in the Countryside and the Aspirations of the LPA to maintain such areas as a last resort for Development

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Policy: DS1 - Development in the Countryside

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Do not redraw the Settlement Boundary in WW17 and exclude HA1 as it does not meet requirements of DS1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Would then comply with DS1 and HP1

Your suggested revised wording of any policy or text:

HA1 is in the Countryside and outside Settlement Boundary. It does not meet the requirements of existing dwelling replacement in HP1 and therefore should not be considered for allocation without meeting the further requirements for development in the Countryside

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Policy: HP4 - Five-year Housing Land Supply

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Re-Assess HA1 in respect of being outside the Urban settlement and in terms of OAHN and Local Sustainability from an amenities and infrastructure perspective

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that Development in the Countryside is only considered with the requirements set forth in the relevant Policies and that any allocation proposed is locally sustainable through the addition of amenities and infrastructure to support the number of new dwellings proposed.

Your suggested revised wording of any policy or text:

HA1 Allocation needs to be re-evaluated to ensure the appropriate amount of infrastructure and amenities are delivered before any Development begins

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

7) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockwood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full Local Transport Assessment needs to be conducted for the routes serving HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that traffic and safety implications of an additional 830 dwellings in a relatively compact area have been properly considered

Your suggested revised wording of any policy or text:

The LPA will carry out a Full Local Transport Assessment for HA1 to determine the flow of traffic and congestion cause through the additional 1600 vehicular movements each day. In particular the safety of Brook Lane will be reviewed in the light of the "Pinch point" just beyond the School, which is on a blind corner and likely to result in injury or fatality, either from a head on collision or a vehicle striking a pedestrian from having to mount the kerb.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

8) Paragraph: 10.15

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full local Transport Assessment will be conducted for the routes serving HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure it was Positively prepared by taking into account the challenges of increased vehicular movements caused by HA1

Your suggested revised wording of any policy or text:

The LPA will conduct a full and thorough Local Transport Assessment to determine any traffic and safety issues created by HA1 and will ensure that the appropriate mitigation has been agreed before any allocation is approved.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

9) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 14.6 of Final Transport Assessment reads; "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area HA1, of the local plan with 830 homes and isn't assessed within the Transport Plan document.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The Transport Assessment has only been done at the Macro level (Strategic) and not local level - Need a detailed Transport Assessment for HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that the appropriate mitigation is in place for the additional traffic created by an extra 830 dwellings in the local area

Your suggested revised wording of any policy or text:

The LPA shall conduct a detailed Local Transport Assessment for HA1 before an allocation is approved

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

10) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: Page 52 indicates the need for the provision of "2 junior football pitches" Why are these not shown in the Masterplan?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include on the Masterplan where the two junior football pitches are proposed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Masterplan would be made consistent with Policy HA1

Your suggested revised wording of any policy or text:

Two Junior football pitches to be shown on the masterplan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

11) Paragraph: 3.27

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.27 fig 3.2 There are actually more than the indicated 8 potential growth areas shown on the map (assuming that these are construed as being the proposed allocations). This needs correction.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Either change the number of potential growth areas or modify the Map to be consistent with the figure of 8

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Update the Map or change the number (8) mentioned in Para 3.27

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

12) Paragraph: 3.37

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.37 is in conflict with Para 4.13 over the definition of small-scale development – is it sites of less than 1 Ha or development of not more than 4 dwellings?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Ensure the numbers are the same in both Paras

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Change either Para 3.37 or 4.13 to make them consistent

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Paragraph: BOROUGHWIDE POLICIES (HP4, HP10, H1, E1, R1-4, CC1-4, NE1, NE3-6, NE8-10, TIN1-2, D1-3, D5, HE1, HE3-6)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The map boundaries for the Warsash area have been moved post the planning. This is not legal, sound or compliant with a duty to cooperate.

Para 1.5 Introduction: Statement of Community Involvement Paragraph 2.1 says a “variety of methods” should be used to solicit comments from the public. Because paper-based documents failed to be employed across the borough, a large proportion of residents were deprived of sharing their opinion. This was exacerbated by Covid restrictions, limiting the access to libraries and the council office. The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Community Involvement Since 2017 residents’ concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board. It is discriminatory that community-generated evidence carries less weight than that provided by Developers consultants. E.g. regarding previous use of land in Nitrate budget calculations similarly with traffic survey results captured by residents and Community Speedwatch teams. Para 4.7 The Warsash Neighbourhood Forum (although now defunct) were never consulted with respect to their intention to allocate housing, in line with Para 66 of the NPPF.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Return to original boundaries

The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Return to original boundaries would be the correct thing to do.

The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary.

Your suggested revised wording of any policy or text:

I am not a legal expert and therefore suggest the people who wrote the policy make the correct amendments

The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

2) Paragraph: 1.16

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.16: No mention is made of the 2017 unadopted draft Plan and Officers confirm it is the previous, 2015 plan which is extant. Para 4.8 Allows the LPA to consider Housing sites allocated in the previous adopted (extant) Local Plan. Yet, whilst HA1 did not feature in the extant 2015 Plan, page 38 ignores this, stating that housing will be provided through HA1 and other local sites. The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number! Housing Allocations There is no joined up “Masterplan” for HA1 (with developers working in complete isolation of one another). Therefore, another environmental impact assessment must be conducted showing the cumulative effect of HA1 in its entirety. Para 4.19 Housing policies HA(2,5,6,8,11,14,16,18,20,21,25) are no longer proposed allocations. So, why was HA1 singled out as an allocation and how was the Objectively Assessed Housing Need arrived at for this site? Developers have taken advantage of the LPA’s decision to propose HA1 within (the now defunct) 2017 Plan and have submitted Applications that the LPA have resolved to grant permission on (many ahead of and likely contrary to) the Publication Plan. Others claiming their sites fit well with HA1 has now resulted in the boundaries of HA1 being adjusted to accommodate them. This seems to mark an inappropriate powershift toward the Developers

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Para 4.19 Housing policies HA(2,5,6,8,11,14,16,18,20,21,25) are no longer proposed allocations. So, why was HA1 singled out as an allocation and how was the Objectively Assessed Housing Need arrived at for this site?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Policy: CC1 - Climate Change

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 8.60 Section 8 mentions the requirement of meeting CO2 emission reduction targets, but instead of stating what the targets should be, the Plan simply refers to individual developments power generation rather than what each should deliver over and above Building Regulations requirements, on this basis the plan is not Positively Prepared Carbon Reduction Para 11.34 The council will support applications where development exceeds Building Regulations but no percentage target for improvement has been set. The Plan is therefore not a Sound and effective approach to carbon emissions reduction in the Borough. Para 11.36 Developers are encouraged to design for natural ventilation and green infrastructure but no standards are set. Just meeting building regulations will not see the country meet the Government promised carbon reductions. The council therefore should set standards to ensure developers are designing for sustainability much like the London boroughs that are using new standards of SAP10 which although not yet within building regulations, should be adhered to

What modification(s) is necessary to make the Local Plan legally compliant or sound?

No, I don't want to take part in a hearing session

4) Paragraph: 9.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 9.10 Whereas the LPA is aspiring to Nitrate Neutrality, Strategic Policy NE1 requires designated sites be protected and ENHANCED Likewise Para 9.50 (Policy NE4) confirms permissions will be granted when the integrity of designated sites be maintained or IMPROVED. Finally, Page 199 Para 9.54 indicates that proposals for development should provide a net REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA's approach therefore contravenes both the Habitats Directive and the Publication Plan in respect of these policies. Furthermore, a leading QC's opinion is it is unclear how any development could be contemplated in the Western Wards without negatively impacting the SAC and RAMSAR sites and therefore based on proximity alone, this would invalidate the deliverability of these developments. As per advice from Natural England, it is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves beyond scientific doubt, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been mitigated (rather than compensated). There is doubt that the LPA is applying the Natural England advice correctly and lawfully in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Para 9.10 Whereas the LPA is aspiring to Nitrate Neutrality, Strategic Policy NE1 requires designated sites be protected and ENHANCED Likewise Para 9.50 (Policy NE4) confirms permissions will be granted when the integrity of designated sites be maintained or IMPROVED. If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Paragraph: 2.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 "Strategic Priorities" which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manœuvre by stealth of the council, to suit its own objectives. Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 "Strategic Priorities" which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manoeuvre by stealth of the council, to suit its own objectives. Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary

Your suggested revised wording of any policy or text:

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 "Strategic Priorities" which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manoeuvre by stealth of the council, to suit its own objectives. Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Paragraph: 5.24

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications. Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockswood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots. Infrastructure Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect. Para 10.14 The Local Plan Strategic Transport Assessment at Para 14.16 reads; "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area HA1, of the local plan with 830 homes and isn't assessed within the The Local Plan Strategic Transport Assessment document. Policy HA1: Page 52 indicates the need for the provision of "2 junior football pitches" Why are these not shown in the Masterplan

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications. If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

7) Paragraph: 3.27

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 3.27 fig 3.2 There are actually more than the indicated 8 potential growth areas shown on the map (assuming that these are construed as being the proposed allocations). This needs correction. Housing Need Methodology Para 3.37 is in conflict with Para 4.13 over the definition of small-scale development – is it sites of less than 1 Ha or development of not more than 4 dwellings? Para 4.2 of the Publication Plan is unsound because it bases housing numbers on a proposed new methodology for calculating need and there is a tangible risk that it may not be adopted by the government. In addition Page 37 Paras 4.12, 4.16 and Policy HP1 Illustrates that whilst a contingency buffer of 1094 homes has been made, the Plan is heavily reliant on the certainty of delivery on 4858 houses at Welborne.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Warsash Inshore Fishermen's Group

RESPONSE TO CONSULTATION ON FAREHAM LOCAL PLAN 2037

Dear Planning Team

I am responding on behalf of the local fishermen here at Warsash and Southampton Estuary to the Fareham Local Plan 2036 (Final version; [Publication Plan \(fareham.gov.uk\)](https://www.fareham.gov.uk)).

We have some serious issues regarding the Plan's ability to deliver sustainable housing development without guarantee of protection (beyond reasonable doubt) of certain marine ecosystems within the Solent European Maritime Site and without guarantee of positively enhancing local commercial fishing businesses.

Although the features and species listed under the Habitats Directive (Special Areas of Conservation and Special Protection Areas) have already been evaluated by both Natural England (NE) and the Environment Agency (EA) in the respective Habitats Regulation Assessments (SCA's/SPA's), there are clearly some significant **Assessment oversights and gaps in the evidence base** which are of direct relevance and concern to the local Fishing Industry and also, we would suggest, to the future viability of the Solent Oyster Regeneration Project (Blue Marine Foundation).

These assessment oversights mean that the Fareham Plan, if implemented as stands, will likely lead to and exacerbate environmental effects within the SEMS . The specific issues we raise regarding the existing overgrowth of red seaweed (also known colloquially as 'The Red Menace') have not been evaluated by NE or the EA or mentioned in the Fareham Plan's evidence base.

The Plan fails to pass the test of soundness, (paragraph 1.5) in that it is discriminatory in that community-generated evidence carries less weight than that provided by the Councils (and developers) statutory consultants. Furthermore, there has been no formal involvement from the Councils statutory advisers with local fishermen with regard to seaweed eutrophication and the effects of wider seaweed overgrowths on their local industry.

The Plan fails under section 9 Natural Environment:

Specifically, NE4 water Quality effects and likely fails under NE1, protection of local ecological network (regarding sandbanks within the SEMs).

Paragraph 9.16 states: '*Paragraph 174b of the NPPF states that the Plan should promote the conservation and enhancement of priority habitats, ecological networks and the protection and recovery of **priority species**. Development proposals within the Borough are therefore expected to contribute to achieving this objective.*'

Solent native oyster, *ostrea edulis*, is currently a priority species for regeneration (Blue Marine Solent Oyster regeneration project). Nutrient exacerbated growth of smothering seasonal red seaweed masses leads to a significant negative effect upon the spatfall of the native oyster (ref: Warsash Fishermen SEMs enclosed)

The Plan fails to pass the test of soundness, in that there is a question regarding its long-term effectiveness with respect to Nitrogen-Mitigation. This strategy has not been proven. There is doubt that the Local Planning Advice is applying the Natural England advice lawfully in this respect.

However, as we have outlined above, there is a systemic failure here in that NE have not thus far considered the wider environmental issues we have brought to their recent attention (by email letters) and outlined comprehensively in this letter and attached paper. **These represent the 'evidence gaps' mentioned previously.**

It is the duty of NE and other Statutory Consultees to provide relevant evidence, ***where gaps in the evidence base have become available during the Consultation process, (NE submission to the Council, 2020).***

Para 9.5 of the Plan fails on the test of soundness. It assumes the Mitigation policy will be effective throughout the SEMs. Although the Local Planning Authority (LPA) is aspiring to Nitrate Neutrality, paragraph 9.1 requires designated sites be protected and ENHANCED as well as Strategic Policy NE1. Additionally, Para 9.50 (Policy NE4) confirms: 'Planning permission will be granted where the integrity of the designated sites is maintained, having regard to the effect of nutrients on the designated sites arising from increased wastewater production'. SEMs is a designated site.

The Plan fails to include the likely increase in bacterial contamination of shellfish (within sand-gravel bank seabed features) from increased sewage overflows, not mentioned in the Plan.

Para 9.38 through to 9.43 of the Plan indicates that proposals for development should provide a biodiversity net gain (including enhancements). This cannot be guaranteed.

The Plan fails under Para 9.5, under Policy NE4: '*Planning permission will be granted where the integrity of the designated sites is maintained, having regard to the effect of nutrients on the designated sites arising from increased wastewater production*'. This implies a REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA's approach therefore

cannot be proven to support the Habitats Directive, because ***the NE solutions are entirely untested, rely entirely on hypothetical modelling and fail to consider wider seaweed overgrowth issues specific to the fishing industry exacerbated by excessive nutrient loadings into Solent waters.***

The SEMS is already in an unfavourable condition with respect to localized seasonal seaweed aggregations and Southampton Water also receives frequent unfavourable shellfish classifications due to direct sewage overflows after heavy rain. Both significantly affect the local fishing fleet. (see enclosed paper, Warsash Fishermen SEMS)

It is inconceivable that additional development could be contemplated in the Western Wards without negatively impacting the SEMS, SAC and RAMSAR sites. This would invalidate the deliverability of these developments.

As per advice from Natural England, it is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves ***beyond scientific doubt***, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been **effectively** mitigated (rather than just compensated for). There is no evidence the N-Mitigation Plan will be effective throughout all areas of the SEMS affected by red-seaweed overgrowths.

We are of the opinion that the Plan fails badly in that respect.

If implemented as stands, the Plan is unlikely to:

- 1) ensure that red floating seaweed overgrowth within the wider SEMS (which already seriously restricts Commercial Fishing Activity within the SEMS) is not further exacerbated by increasing nutrient loadings in Solent waters, especially with respect to the Solent sewage outfall pipe serving Peel common effluent and its immediate marine environs.
- 2) ensure that water quality with respect to undesirable bacterial and viral contamination of shellfish beds in Southampton Water and the wider SEMS is not further exacerbated. (by post-rain/ storm waste-water overflows)
- 3) ensure that intertidal algal mats (seaweed overgrowth /deposition on mudflats) do not increase.

Although the Statutory Consultees for this Consultation (NE and EA) have included Assessments relating to point 3) above (intertidal Eutrophication) in line with their Statutory duties under the Habitats Directive, (SAC's/SPA's) **they have not made any Assessments regarding points 1 and 2. This is a serious oversight and failure of the process.**

If it is not the remit of either NE or EA to evaluate these effects (1 and 2), then we suggest further consultation with any relevant monitoring bodies. NE or CEFAS may be able to provide advice as could the fishery regulator, Southern IFCA.

We have already prepared a paper (enclosed) which comprehensively outlines the negative effect of seaweed overgrowth on the efficiency of commercial fishing businesses operating in the SEMS. As you will see from the report, the Solent is almost unique in this respect, distinct from other inshore commercial fisheries, which makes it imperative that the wider commercial and ecological impacts of increasing nutrient loadings in Solent waters are determined by the relevant Statutory or science-monitoring bodies.

This should be done before the Secretary of State is presented with this Plan for consideration.

Our enclosed paper also raises the issue of wastewater overflows after heavy rain which subsequently lead to shellfish beds becoming contaminated by E-coli and viral agents., not covered by this Plan.

There is no indication in the Fareham Plan that these contamination events will not increase and there is no indication from the EA or Southern Water advice with respect to that point.

In Part 2 of our paper (Warsash Fishermen SEMS, enclosed), we cast serious doubt on the ability of Natural England's Nitrogen Mitigation strategy to deliver a positive impact on seasonal seaweed overgrowths in the SEMS (specifically the red floating weed described in our paper).

The specific failure regarding this involves the assumptions made by the mitigation scheme rationale.

For the record we will expand on that here:

"NE's N-Mitigation strategy assumes that the effluent exiting the Peel Common outfall pipe in the Eastern Solent, homogeneously disperses with all Solent Waters. This clearly is highly unlikely. The sewage effluent plume data available from Southern Water reveals that there is already likely to be an unequal dispersion of the effluent due to distinct variations in tidal flow rates/timings throughout the SEMS (which fishermen are highly aware of already).

Furthermore, it is entirely unknown whether offsetting land on the Isle of Wight will positively impact marine sites within the SEMS (already seasonally infested with the red seaweed masses) which are spatially and tidally distinct from the offset watershed. In other words land offset north of Wootton is highly unlikely to reduce sub surface seaweed overgrowths along the Lee-on Solent shore, due to incomplete tidal mixing.

Because of these tidal variations, the area between East Bramble and Meon Shore will still likely receive a critical dose of nitrogen/phosphate and oestrogenic compounds on the westward/north-westward flowing ebb-tide. These compounds must already be having a site-specific impact on already present seaweed overgrowth here and due to shifting, already must be creating negative impacts on the wider SEMS in other bays of the Solent (that fishermen are already aware of). Potentially the Blue Marine oyster regeneration project, will also be negatively impacted, where dense algal deposits can prevent oyster spat-fall in the summer. (see historic reference to this, Warsash Fishermen's SEMS paper)

The local fishermen here have long supposed that the sewage outlet off Browndown must effectively 'feed' the growth of the red-filamentous floating weed throughout the spring and into summer growth season. Because of the behavior of the tidal flows in the Bramble East area, this weed congregates en masse along the contours of the seabed, including the greater Brambles Bank, eventually becoming spread along a wide area. It often persists into the Autumn and makes commercial net fishing with set nets and trawls very difficult. One area usually seriously affected is between the Lee post and Meon bouy (off Chilling Cliffs, but there are numerous weed infested spots throughout the Solent at peak seasonal growth times). It is not clear how much of this is attributable directly to the Peel outfall distinct from other outfalls in the catchment and this would require further Assessment as our paper suggests, but it IS more likely to be directly accelerated by significant localised sources of N-loading directly discharged from the Sewer discharge pipe.

Unless there is a significant lowering of nutrient transfer from agricultural land between Warsash and Lee-on Solent into this stretch of the fishery, as part of the Mitigation, then the nutrient loading from the Peel offshore outfall pipe would likely still encourage these overgrowths to occur along that stretch of the seabed and, without effective at-source Nitrogen/Phosphate removal at the Peel Common Waste-Water Treatment Works, would likely increase in proportion with increasing housing development and population density. ‘

The Evidence base for the Fareham Plan includes the subsection 4.3.24, '*sandbanks which are slightly covered by seawater at all times.*'. We are advised that this would include the Brambles Bank and subtidal areas of sand/gravel shoals along the stretch between Lee and Chilling, together with other such banks throughout the SEMS which form important fishery locations and features for local fishermen who use a variety of fishing practices from set-netting and trapping, to trawling and shellfish dredging.

Therefore, the Plan fails on the test of soundness in that it fails to supply evidence that these banks have been fully considered in the scoping advice with respect to: seaweed overgrowths and deposition effects on the seabed habitat and associated negative impact on commercial fishing operations. We would include the likely effects on the Solent oyster regeneration project in this.

Therefore, **the Plan also fails under paragraph 6.3 (Employment)** in that it fails to consider likely significant impact to local fishing businesses with regard to *seaweed overgrowth* impacts and potential bacterial/viral *shellfish contamination* from untreated sewage overflows. There will be a likely significant impact with respect to both parameters.

Natural England's latest advice to the Council is that: '*.. this approach may be refined if greater understanding of the eutrophication issue is gained by thorough new research or updated modelling.*' (section 4.3 and 4.11, ADVICE ON ACHIEVING NUTRIENT NEUTRALITY FOR NEW DEVELOPMENT IN THE SOLENT REGION, version 5, 2020)

We advise Fareham Borough Council to instruct, with immediate effect, its Statutory and non-Statutory Consultees that research should be extended to include:

- -the seasonal floating seaweed overgrowths in the SEMS and related consultation with the local fishing fleet and Blue Marine Native Oyster Regeneration Project.
- -a study of the possible interference effects of seasonal red seaweed depositions on native oyster spatfall in inshore zones of low tidal flows. (seaweed is not dispersed effectively inshore)
- -An enhanced and detailed study of the tidal variations in the Peel sewage outfall environs specific to sewage effluent dispersal.
- -seasonal floating red seaweed deposition in the local inshore zone (SEMS) and biodegradability study.
- -A thorough assessment of the efficacy of land offsetting/N-mitigation in specific areas of the Solent catchment (eg; the Wooton Creek farm) and an evaluation on the extent of mitigation effects (seaweed growth) in areas that are not within the immediate vicinity of the designated N-mitigation/offsetting site. (this relates to seawater tidal mixing disparities, and that our contention that offsetting in one area may not impact seaweed overgrowth/ depositions in another part of the SEMS due to tidal flow differences)

We would also request that the issues we have highlighted here be retrospectively applied to the Welborne development.

Finally, in addition to the failure of the Plan regarding the subject of seaweed overgrowth and water quality and effects on local fishermen, the Plan fails the test of soundness on:

Section 4 Housing Need and Supply:

The total new homes proposed for specific sites across the Borough (not including Welborne) is 1327. The allocation for Warsash is 924 dwellings (HA1 Greenaway north and south and including the Warsash Maritime site, HA7). This contributes around 69.6% (or thereabouts) of the entire allocation proposed by the Plan, excluding Welborne. This allocation is a massively unrealistic distribution and will lead to a number of negative impacts locally and therefore unsound.

Communication from Warsash Inshore Fishermen's Group.

November 2020

Subject: The effect of seaweed overgrowth and poor water quality (sewage effluent) on local inshore commercial fishermen in the Solent European Maritime Site (Part 1) and critique of Natural England's provision for nitrate mitigation (Part2).

Overview

The increased presence of nitrates and phosphates entering the Solent European Maritime Site (SEMS) via the watercourses in the riverine catchment area in Hampshire has recently shown to have had a significant adverse effect on the SEMS mudflat habitats locally, due to extensive deposits of putrefying seaweed arising from accelerated overgrowth. This led to a temporary closedown of house-building activity in the Fareham Borough while a 'mitigating solution' was found.

Part 1 of this report will focus on this issue from the perspective of the local fishermen operating from Warsash, Hants and will widen the perspective beyond just what has been reported in the media.

In **Part 2** it will be seen that serious doubt will be cast as to the suggested effectiveness of the nitrate mitigation plan as advised by Natural England and widely being adopted by Councils since hard evidence that the plans will be successful is lacking.

It should be noted that our views regarding the extensive seasonal presence of seaweed (Part 1) generally align with other fishermen within the wider Southampton Water and Solent region together with some of the reported experiences of local sea anglers.

Since we are now highlighting the important extensive seaweed problem and committing our views to paper for the first time in local history, the reader will be able to see the significance of the seaweed issue in relation to the urgent requirement to maintain our various local net fishing practices (severely affected by weed) which are currently under threat by local fishery regulators.

PART 1:

Solent Seaweed: An Historic Local Problem

(*Note the use of the term 'weed' or 'seaweed' refers mainly to invasive, free floating varieties, not species like bladderwrack or kelp which usually are not an extensive problem for fishermen here).

For many years the local fishermen that fish the Solent and estuarine areas nearby have had ongoing issues with seaweed* overgrowth, with different types of weed causing different effects at differing times and interfering with the deployment and function of fishing gear in the district. There is also some anecdotal evidence that the decay of various types weed and deposition onto the seabed may be having some serious implications for seabed sea life and for the current ongoing Solent Oyster Regeneration Project (see below).

There has not been much, if any, serious scientific exploration of the wider seaweed overgrowth problem in the SEMS and no one has sought out the fishermen's views on this matter, until now. We are outlining here how seaweed affects fishing operations, not offering specific statements as to possible causes of seaweed overgrowth (That is covered in **Part 2**).

Local fishermen here know that recent focus by ecologists on the green seaweed overgrowth on the mudflats within the SEMS is only part of the story and obscures the wider unseen problem of floating red-seaweed overgrowth in the less visible areas, away from the general view of the public.

Fishermen here however are widely acquainted with the issue as they are effectively sampling the sea every time they go out fishing. Our intimate knowledge of the Solent seabed and the characteristics of the tidal streams is unparalleled. The next best authority (in our humble opinion) would be professional divers and maritime hydrologists.

Seaweed overgrowth and interaction with fishing practices

Local fishermen at Warsash have used a variety of fishing practices throughout the last fifty-year period. During the height of the Solent oyster fishery, (1970s to 2007), the main seasonal winter fishery was oyster dredging with some clam dredging as well. During spring and summer seasons there have historically been inshore trawling for demersal fish and cuttlefish and later, the extensive use of traps for cuttlefish, together with whelk potting. Set nets, drift nets and baited longlines is also a common practice continuing until today.

All of these methods can be significantly hampered (and some methods often made literally unviable) when floating seaweed begins to grow in late April and into the summer months. This is the main fishing season for Warsash fishermen. Some fishing methods will be affected more than others.

It is said locally that Solent fishermen have to be much more determined than common as they have to contend with the extra burden and challenges of the ever-present seaweed problem, not to mention the challenge of working in a fast tidal area with extensive ship and sailing craft to contend with as well. The fisherman's decision of 'where to fish today?' is often accompanied by a question to another fishermen friend to the effect of: 'what was the weed like in that area?'

The 'red weed', as we call it, is known by different names and grows rapidly locally (as does the green varieties of lettuce-like and filamentous green weed, often found in the mudflat areas near freshwater/brackish environments and identified by NE as contributing to eutrophication of the SEMS mudflat habitats).

There is a rapid growth of both red and green weed from the end of April into summer. Large tides (Springs) tend to disperse the red weed throughout the water column and it can sometimes be seen near the surface. It is a free floating, filamentous weed and when it stops growing in late summer is deposited in the bays and bank contours throughout the Solent with some areas being affected more than others. It can persist well into the Autumn and can still be present in some areas (Osborne Bay, Stanswood Bay, Inner Hurst, Beaulieu etc) into the winter months, when it will have already been decomposing for a month or two.

It is regularly identified by sea anglers as being the main obstacle to rod fishing, both by shore and by boat. But that is just the tip of the iceberg.

The green weed mentioned in connection with the mudflat habitats with the SEMS also can hamper inshore fishing and angling activities on occasions. These areas are not regularly fished heavily commercially. One fishery in this environment is the historic mullet net fishery. Some of the Warsash Fishermen have inshore mullet fishing permits supplied by the River Hamble Harbour Authority. This allows them to fish seasonally and legally for mullet within the River Hamble in small boats. The fishery is similar to that of Poole Harbour which has been going for decades.

Any significant deposit of either green or red seaweed in these inshore areas will often be the deciding factor for the fisherman as to whether the net is safely deployable or not. We have noticed an increased abundance of the green weeds in the mudflat areas in recent years and the red variety is always present in the wider Solent area and can be more or less abundant depending on environmental factors like temperature, rainfall, tide strength, sunlight etc. Storm events can often move coagulated deposits inshore and dump it onto seabed contours.

The public slipway at Warsash hardway has to be regularly cleaned by the Council when often large masses of mainly green weed are taken away.

Furthermore, we must state that there may be a connection with the increasing tendency for returning mullet shoals to avoid inshore mudflats during the height of the green seaweed overgrowth. This observation has been recently noted by the fishermen locally and we wonder if it connected to the decaying effect and subsequent chemical release onto the mudflats, together with the effect of mudflat 'eutrophication' and water oxygen depletion. That will need further investigation by scientific study.

Netting in the Solent (SEMS) and seaweed overgrowth issues.

Set Nets/Drift/Ring

Throughout the UK the extensive use of **set-nets** (nets secured on the seabed) is a common practice and fishermen are able to have a relatively reliable fishing method for much of the fishing season when the fish target species are abundantly available. This is not the case in the Solent and Southampton Water.

Go to any fishing port west of Swanage or east of Selsey Bill and you will be able to observe the nearly year-round use of set nets, tides permitting, (for sole for example) with little, if any, troubling effect from floating red weed. This is not to say it does not occur sometimes and there are increasing reports we hear from outside the Solent of weed events, so it appears that the issue is increasing across the south, apparently in direct correlation with population density and growth.

In our case, the use of nets can be severely restricted and made impossible by the abundance of mobile seaweed. Nets cannot be left for as long as other fishermen do in other areas. Some years, it is virtually impossible to use

extensive lengths of set nets with any reasonable expectation of making an easy living, especially in the shallower zones, where red weed settles. At other times it may be possible to leave a surface net for a short time and still catch a few fish to make it just about worthwhile. Those nets are nearly always attended by the fishermen.

Fishermen here have to modify their deployment of set nets by either stopping much earlier than many of their UK counterparts (when the weed situation becomes intolerable, usually as early as the beginning of May) and switching fishing methods (traps or bottom set lines for example) or by seeking areas in the Solent and Southampton estuary where the weed may not yet have reached 'critical mass', or by limiting the amount of net and using short soak times. The potential loss of income is considerable compared to weed free areas in the UK.

Later in the year, Autumn, the weed situation can improve markedly in some spots which can allow the resumption of some netting activity, but it can still be a liability.

Seeking out other areas to fish may, in some cases, mean going out into deeper areas off the contours of the channels in order to avoid a negative weed event ('dose of weed' is the usual local term). However, it should be stated that this has a high risk attached as the tidal currents are often greater out deeper and if the fisher gets it wrong, a 'dose of weed' will likely result, with either the loss of the gear or a long period of cleaning out the nets.

Long hours cleaning nets from weed is physically wearing, mentally demotivating and economically counter-productive. Furthermore, the practice of having to deploying nets in deeper waters just to avoid floating sea weed is a risky business due to shipping movements/small craft and is usually restricted to smaller nepe tides only, as nets do not fish well in fast flows.

We have reason to believe that the Marine Management Organization (DEFRA) which regulate quotas and legislate nationally have yet to fully acknowledge and comprehend the difficulties that Solent fishermen face with regard to this seaweed issue, affecting their ability to provide fish for the table and secure a reasonable living. Regulation on the use of nets in the inshore zone throughout the UK and locally always fails to take into account the hampering effect on fishermen due to extensive mobile weed effects.

Furthermore, we should also state for the record that the Warsash Inshore Fishermen's critique of the proposed restriction on netting practices within the estuaries of the Southern Inshore Fisheries and Conservation Authority (SIFCA) and wider district should also be seen in the context of the difficulty of deploying nets locally, due to extensive hampering from the presence of seaweed. Again, this has not yet seriously been a consideration by the Authority and we hope they will take these comments here into consideration during their Consultation.

Fishermen also use a variety of drift net practices throughout the UK. The local fishermen here can fall back onto a drift net fishery to a certain extent, in line with national legislation requirements, when the setting of fixed nets is made impossible by sea-weed overgrowth. Drift nets are highly size selective. Because the net drifts with the tide the worst of the seaweed can often be avoided, but this is not always the case.

The use of drift nets (and also set nets) is severely restricted by the incoming yearly natural growth of a plankton called noctiluca, (known locally as 'the fire'**) which is bio-luminescent and lights up the water when disturbed (for example by a moving vessel, boat propellor and also by tidal currents).

**'Fire' appears with the return of the 'May Water' when the 12 degree (celsius) seawater thermocline reaches the local area, usually by mid May, .

Tidal currents moving across either a drift net or a set net will cause the plankton to literally light up the net, sometimes leaving a jelly-like deposit on the mesh. Some species of fish that have good eyesight, will often be able to see the net glowing in the dark (as nets are often deployed after dark) especially in clearer water conditions and this will often highly restrict the catch at times. Other fish species like sole do not seem to be affected by the 'fire'. 'Fire' makes the use of nets for some fish much less effective and therefore reduces the effective netting season by a large degree.

The increased presence of nutrients like nitrates and phosphates in the seawater will likely exacerbate the overgrowth of this plankton and this is an additional concern for us. Further scientific study will be required.

The 'fire' problem is commonly known by fishermen, but again, as with seaweed presence, is underappreciated by local and National commercial fishing authorities who may inadvertently seek to restrict or regulate the

seasonal deployment of nets without duly taking these already significant 'natural' restrictions on net deployment into account.

Another netting method which can be used to overcome the natural restriction of 'fire' and weed is ring netting in daylight hours in a small circle with a short length of net, (effectively a set net). This has already been officially recognised as a method of net fishing by Danish/Dutch authorities and we are seeking a similar classification here liaising through the NFFO with the use of (attended) short lengths of surface net, which also significantly lower the risk of salmonid interception in estuaries. This, if successfully negotiated with the local Authority will be a first for UK inshore fishermen.

This method is also the common method used in the Poole harbour mullet fishery. Because the net is deployed for a short time only, a 'dose of weed' can often be avoided, but not always. Short time net deployments locally are therefore the only real option left for local fishermen at most times of the year.

Longlines

When the red weed has reached maximum growth the use of longlines in certain areas can be rendered much less efficient. May through June is not really much of a problem in the deeper areas. By high summer the longline fishery should be in full swing with line caught fish like bass, skate and ray being a viable fishery.

The best areas to deploy to avoid weed are in the deeper sections of the Solent away from the contours where weed tends to get dumped by the tidal flows. Some areas by late July are usually un-fishable by longlines. These usually include inshore at Osborne Bay, Stanswood bay, Chilling and Hillhead and most of the stretch between Beulieu and Hurst. Some areas of Southampton Water can get bad also; near Calshot and the Thorn Channel are notorious as well for gathering red weed masses in summer, with some years better/worse than others.

Off the 40' contour however, it is usually possible to find a relatively weed free stretch on some tides. However, this year (2020) some fishermen had to cease line fishing late July as most of the best offshore areas were infested with red weed for a few weeks as well. This was the case for at least one Lymington fisherman that we know also, working further west, (personal communication).

By September 2020, most of the weed in the deep had been shifted by tides and wind with fewer areas affected offshore. Some of it had still remained inshore however in the areas which do not benefit from regular tidal flushing (bays) and tidal dead-spots such as Norris near Cowes.

Apart from the obvious interference of weed on the hooks of a longline (reducing fish catches) red weed packs onto the buoy- to- anchor line with the moving tide, taking down the marker buoy and in some cases, it will only reappear later in the slower part of the tide cycle. This means that the fisher has much less time to retrieve gear before the tide turns and begins flowing back in the opposite direction. It can become then a race against the clock. Therefore, the fisher will have a tendency to be less motivated to shoot the number of longline sets they usually would deploy.

Furthermore, retrieval of a weed packed buoy line means that a significant time loss will ensue as the fisherman will have to pull off (by hand) the weed packed onto the buoy line. This is easier said than done. Often the amount of weed is considerable, with historically nine to twelve-foot columns of weed measuring a foot wide packed solid onto the line not uncommon. Again, as with net cleaning, this represents a serious time wasting and physically draining extra operation which would not be the case if there was a lot less or no weed present.

Trawling

There are a few trawlers which regularly fish in the Solent and the skippers tend to be very cautious about where and when they deploy the gear due to the potential for a 'dose of the weed'. As with lining, the deeper areas are often favoured, away from weed strewn areas.

In September 2020 we had a report from a Gosport fisherman who deployed a trawl inshore in the Solent and filled the entire trawl up with the free-floating red weed. Simply put, a trawl just will not fish effectively if there are significant quantities of seaweed on the Solent sea bed. It is very disheartening for trawl skippers as they have a higher fuel cost overhead to pay than some smaller non-towed gear vessels and wasted efforts due to the presence of weed are de-motivating.

Shellfish dredging

Toward the end of the now defunct historic Solent Oyster fishery (2007) the presence of large masses of red weed sitting (and rotting) on the inshore seabed was cited by some fishermen as being a significant detrimental effect to the deposition of juvenile oyster spat. This problem was part of the perfect storm which sealed the fate of the already reducing return spat falls of the Solent Oyster largely triggered by the invasion of the American tingle driller whelk.

Other factors such as a failure to close the fishery earlier were also at play, (which led to over-fishing an already non renewing stock) but it is commonly accepted by local Warsash fishermen that seaweed overgrowth also played a significant role in the last days of the fishery.

The red seaweed overgrowth has also been raised at a recent committee meeting of the Southern IFCA relating to the oyster regeneration project. (September 2020). It is possible that the comment was 'minuted'.

Along Chilling and Hill Head, we have at least one testimony from a member of the Warsash group which describes the required effort to continually hold the same line of dredging for a considerable time in order to 'get through the weed' before any oysters could be reached.

The success of the Solent Oyster Regeneration project instigated by the Blue Marine Foundation will rest mainly upon the successful spatfall of small juvenile oysters onto the seabed. Many variables will be at play, including the presence of oyster pests like starfish, but the presence of large areas of trapped seaweed in the summer to autumn in some local bays not subject to much tidal flushing will severely reduce the success of this project in our opinion; since the numbers of adult oysters being set in cages in the marina environment represent nowhere near the kind of density of oysters that we remember on the seabed during the height of the fishery in the late 1970's and through to the 1990's. Back then, the seabed was literally thick with healthy, thriving oysters. Even the 'smell' of the sea was different, as we remember it.

The fishermen living now, that were involved in that industry, are the last living link to an important part of social history and all that knowledge will disappear with them.

The disappearance of the Solent oyster also has a cumulative knock-on effect, since there is no longer the massive water filtering capacity that was once present (one adult oyster filters up to 200 litres a day). Increasing seasonal,

mobile red weed on the seabed which eventually settles, decays and reduces seawater oxygen content is more likely then, to have a localised negative environmental impact, making the seabed even less hospitable to newly hatched oysters. It is doubtful this has been extensively studied, so more work would be required.

Although we wish the Blue Marine oyster project every success, the local fishermen are not very optimistic and even less so, when we know there is a largely unseen and un-acknowledged seaweed overgrowth problem which has not been factored in as well as the fact that oyster pests have not yet been removed.

Scallops

This year (2020) the newly emerging Solent scallop fishery* was affected by the mass of seaweed in Osbourne bay (mid summer) which stopped effective dredging for scallops there (Warsash Group fisherman's testimony). Sighting data from the Southern IFCA would be able to confirm that point. Only when the weed had cleared on the bed enough did the fishermen return there (mid September into October). At the time of writing (November 2020) the scallop areas in the bay have cleared and are largely weed free.

The efficient functioning of any shellfish dredge will be highly reduced if red-weed and other weed species are in abundance. The only option for the scallopers is to find spots out much deeper, but with the added increase risk associated with dredging in deeper waters (quick capsize after snagging on seabed being an ever-present and potentially lethal threat)

*With the disappearance of many oysters, a relative newcomer has begun to take hold; the scallop. Which is good news for the local fishermen.

Shellfish Beds in the SEMS and Southampton Water

There are many different shellfish types in the area. Oysters, clams, cockles, whelks, winkles and scallops. All of these can be fished under fishing license and are very sensitive to water quality, especially the bi-valve varieties like clams and oysters.

The main issue is the detrimental effect of bacterial and viral contamination resulting from inefficient sewage treatment and/or sewage overflows, the latter being a more likely after high rainfall events, like torrential downpours.

The classification of shellfish is carried out regularly and reported in a UK wide Sanitary Survey.

The Southampton Water is regularly tested for E-coli by the Food standards Agency in Southampton and a shellfish will only be designated if the species in question is tested. Once that occurs a designation will result; class A, B or C.

For many years now, manilla clams and pelourdes clams in the upper Southampton Water have regularly received a class C designation or the areas have been closed completely due to high E-coli levels, making the shellfish unfit for human consumption. Therefore, fishing activity is severely affected.

This situation has gone on for many years to the detriment of the local fishing industry. No schemes are in place to compensate fishermen for the yearly loss of potential earnings. Furthermore, the longer the beds remain unfishable, the less the shellfish will benefit from regular turning which can lead to the terminal decline in quality of the beds.

The recent upgrade to the sewage treatment works at Woolston will theoretically lower the E-coli/viral loadings from the effluent which is a positive development. However, with increasing pressure on the sewage system infrastructure due to an expanding population density in Southampton, it is questionable as to whether there will be any change in the shellfish quality as sewage overflows after heavy rain will still likely occur, (our assumption). (The population of Southampton grew by around 18 percent between 2001 and 2011; it is even higher now)

This is further re-enforced by the fact that climate change models predict far more frequent torrential downpours, leading to the increased risk of sewage overflow events (CSO's), allowing raw sewage to make its way into the shellfish production areas.

This is already an increasing problem in the Poole Harbour district, with at least one shellfish cultivation business currently being negatively affected.

As to the wider Solent: The current shellfish classification is taken to be Class B (which means the shellfish must be tanked for a short period with UV filtering in place). Any lowering of the water quality due to increasing sewage overflows and/or increasing sewage effluent discharges (from expanded development) will be a severe negative for the local fishing industry.

Part 2:

Analysis of the Nitrate Mitigation proposal (Natural England)

Author: Steve Matthews, Fishing Vessel, Sandie Ann, Warsash.

Disclaimer: The following analysis is solely that of the author alone and may not necessarily reflect the views of all inshore fishermen throughout the district. The causes of the wider Solent seaweed overgrowth problem outlined in the description above (Part 1), should be investigated by independent scientific assessment.

Pending further scientific study, it is reasonable to assume that the problem of the largely hidden red filamentous seaweed overgrowth issue we have uniquely outlined in Part 1 above is causally linked to the green seaweed inshore deposits, already identified as a significant problem on the SEMS mudflat areas by Natural England and wildlife organizations (Eutrophication).

It is also reasonable to assume that the existence of excess nitrogen compounds/phosphates and their sources (sewage and farm run-off being just two) is also causing the *offshore* red seaweed issue which can seriously interfere with commercial licensed fishing activities and has done so, unacknowledged by Government environmental bodies, for many years.

Our group estimates that for local set netting alone the seasonal fishery potential net worth is reduced by as much as 80% from May to September due to the presence of free-floating red weed restricting the effective use of fishing nets. This is therefore a serious concern.

Other trawler skippers that operated locally would also be able to give similar estimates.

The solution presented by Natural England (NE) of offsetting farmland in the water catchment area (taking out of agricultural production/re-wilding) has been suggested as a solution to the SEMS nitrate problem and looks, on the face of it, to be a reasonable one.

However, it is only a recent methodology, still highly hypothetical (rolled out in Poole, only a few years back) and there is no hard guarantee that the problem will be solved throughout each separate estuarine area and in the wider Solent (SEMS).

Indeed, the introduction of the Poole and Purbeck nitrogen mitigation scheme in 2017 may have had some local effect on the green weed overgrowth (has

that been scientifically demonstrated yet?), but clearly the shellfish cultivators there still have a problem with E-coli.

Therefore, it would appear that Combined Sewage Overflows (CSO's) are still occurring there (mitigation scheme or not and assuming sewage transfer from leisure craft have remained static) and that therefore, nitrogen is still being delivered directly into the aquatic environment from raw sewage sources, leading to ongoing seaweed overgrowth as well as associated E-coli/Norovirus shellfish contamination.

Since that is the case in Poole, serious doubts as to the effectiveness of the Nitrogen mitigation Scheme (Natural England) applied to the Solent water catchment are not unreasonable to raise.

Furthermore, the NE model appears not to factor in the climate change models into the N-mitigation methodology. Higher seawater temperatures will likely further accelerate seaweed growth, quite possibly negating any nitrogen-offsetting effect. The appearance of nocticula ('fire') as described in Part 1 is highly temperature dependant, just one or two degrees, as is the appearance of migrating fish.

Increasing torrential downpours will likely increase run off events and CSO's. Increasing housing development in the Solent catchment will lead to increasing hard-surfacing of the countryside and road building. *Those two causes, downpours and hard-surfacing, working together, will likely lead to an increasing irreversible compounded effect:* ie; a higher delivery rate of water run-off (and therefore nitrate/nitrogen compounds from various sources) to the SEMS. This does not appear to have been taken into account by the NE model.

Also, the nitrogen leaching effects from groundwater exacerbated by increasing run offs into the proposed development pond systems (SUDS) appear not to have been factored in either. Since those ponding systems are supposed to 'return water as quickly as possible', there is an un-quantified factor here also.

Additionally, the 110litre per day water compliance for developments is un-enforceable and therefore the wastewater flow determinations will likely to be higher in many cases.

The Natural England models and calculations assume complete tidal mixing of the run-offs and effluents with Solent tidal waters into the SEMS. As stated above, local fishermen's knowledge of the Solent seabed and tidal streams in the Solent is unparalleled and lead the author to conclude that if offsetting is carried out on the Isle of Wight (for example) to allow exclusive continued development of green-field sites on the mainland then the effluent nitrate offset from re-wilding a farm north of Wooton (for example) is highly unlikely to make any difference to seaweed overgrowth at Chilling (for example) due to the way the tidal flows move in Osbourne Bay.

That is a serious oversight by NE.

Note: The Southern Water sewer plume map (made available at time of writing) only shows the eastward flow of the plume from the outfall off Lee on Solent/Browndown. This is only the flood tide representation and not the ebb tide (westward flow). All of the hydrological modelling and mapping of the plume flows would need to be made available by Southern Water in order to be able to draw any further conclusions.

As well as the delivery of nitrogen via the watercourses, the NE calculations for nitrate loading and subsequent guidance for housing developers appear not to take into account sewage overflows (CSO's) after extended heavy rain/torrential downpours and subsequent likely nitrogen, bacterial and viral delivery and contamination of shellfish beds.

Unless developers are building adequate sewage flow infrastructure into the development then Combined Sewage Overflows (CSO's) will still likely increase in proportion to increased development. Food Standards Agency (FSA) limits for shellfish *may still continue to get worse* as they regularly do most years in Southampton Water after FSA monitoring.

In other words, the viability of our inshore shellfish beds will still likely be at risk and will likely have an even higher risk in proportion to ever increasing development in the SEMS catchment.

Even with nitrate land 'offsetting' more local to the proposed development this fact will likely not change due to CSO's.

The models used by the NE and the EA have not factored in the future (with increased development) considerable nitrogen loading into Solent catchment resulting from nitrogen loading from increasing car exhaust emissions and industrial development. All the science shows that with increasing development and road use and vehicle numbers, the nitrogen loading will increase significantly.

As with increased chance of CSO's after heavy rain due to more hard-surfacing, their will a similar increase delivery flow rate of dissolved nitrogen compounds to the SEMS; again, a factor not taken into account in the NE model.

The Fareham Borough and Eastleigh Council for example, must already know that the local road systems have been pushed to over-capacity in a very short time within the last few years, evidenced by virtual gridlock on the A27 road (just an example) at peak flow times: their highway modelling has already clearly failed local people who are living daily traffic nightmares in Locks heath, Sarisbury Green, Hamble, Fareham and Southampton. It is not clear whether any scientific assessment has been carried out as to the increased delivery of nitrogen compounds via vehicle exhaust emissions from increasingly free standing/engine idling traffic in gridlock and increased traffic flows in general. All of this extra nitrogen is likely ending up in the Solent and NE has failed to include it in their calculations. Another massive oversight.

And it is not just local. This would also include the entire road infrastructure, including motorway areas in South Hampshire, where exhaust emission nitrogen contaminated road water run-off feeds into SEMS. Increasingly wider gridlock events and increasing traffic in South Hampshire must be supplying significant emission-dissolved nitrogen compounds to the water catchment adjacent to many roads. (This has been widely studied in the USA).

Notwithstanding micro-particulates from tyre rubber and oils, washing into the same catchment systems; the biological effect on water borne fauna (like salmonids and other fish) from these particulates has simply not been scientifically determined.

All of this leads to the reasonable assertion that the calculations for nitrate loadings in the NE models are highly likely to be inaccurate by a significant degree, the expected offsetting effect: doubtful. There will still be a doubt regarding the current 'nitrate'/seaweed problem which is already being exacerbated by overdevelopment in the Hampshire water catchment zone feeding into the Solent (SEMS).

Further development in proportion with an ever-expanding population growth will likely further exacerbate these problems. It is simply the law of cause and effect in action.

The conclusion is that it is highly uncertain that the SEMS water quality with respect to nitrates/phosphates will *practically* change and that it is *highly*

uncertain that all the affected estuarine habitat (SAC's and SPA's) areas relating to seaweed overgrowth on mudflats and the wider SEMS where we fish will improve consistently throughout the district.

Secondly, it is highly unlikely that the water quality with respect to E.coli/norovirus contamination in shellfish will improve since CSO's will still be happening in proportion with increasing development without considerable improvements in the infrastructure/treatment of sewage.

Thirdly: any increasing CSO's will still deliver a loading of nitrogen (other than 'nitrate') in other nitrogen compound forms from raw sewage overflows, along with bacterial and viral contamination into the SEMS and Southampton Water, so there is some reasonable doubt that NE's nitrate offsetting methodology will actually be practically effective in reducing wider free-floating red seaweed overgrowth and improving the microbial quality of shellfish beds in Southampton Water and SEMS.

Regarding shellfish quality: most wider SEMS Food Standards Agency classifications are currently assumed as class B. However, that could easily be reduced to Class C with more frequent testing and an increasing CSO threat resulting from increased development. That must be avoided, the fishermen will not be happy if that happens.

Class C shellfish rating would be a disaster for the local clam shell fishing industry, the emerging Solent scallop fishery and the Solent Oyster Regeneration Project (Blue Marine Foundation). The potential loss of the Solent shell fishing industry would be incalculable. This is already a clear possibility and looming threat for Poole Harbour. Although Poole Harbour does not benefit from tidal flushing in the same way as the Solent, there is still a reasonable degree of doubt for the SEMS, so it would behove NE to take our warnings seriously. This year for example we have already seen an extension south, down the Southampton Water towards Chilling, of an unfavourable Class C rating for one clam species. (see FSA survey 2020).

Currently, in Poole Harbour, shellfish cultivation businesses are significantly being affected due to bacterial sewage contamination. (personal communication/Southern IFCA Committee meeting comment Sept 2020)

Any increase risk of contamination from sewage overflows applied to the local shellfish fishery most likely to prove detrimental to the quality of our local

shellfish beds and fishery will most certainly result in litigation with the water companies. We are watching the situation closely.

It appears that the local Councils together with NE and the Environment Agency have rushed through this nitrate mitigation 'solution' in order to enable the ever-expanding over-development of green field sites by developers within the SEMS water catchment area to continue. This will mean that over-development will continue and that the un-studied negative environmental effects like red seaweed overgrowth will also likely continue.

It is alarming that such on- the- hoof science (without hard, long-term proof that the measures will be successful) can be fast tracked through by Government Agencies who are failing to protect not only our green field areas but the very unique landscape of parts of southern England.

It should be their responsibility to assert that Central Government implement sensible policies which control the drivers of unsustainable housing demand (namely the drivers of population growth and movement of people). In short, sustainable policies for sustainable population growth, which include a revocation of existing legislation that currently enable unbridled green-field development by housing developers.

This would also help ease pressure on offshore marine aggregate dredging (which supports the building industry) which often takes place in environmentally sensitive juvenile fish spawning grounds in the English Channel and elsewhere. These grounds are being dredged back to bedrock in some cases, partly to feed ever-expanding UK housing/population growth.

Therefore, pending those long overdue changes to Central Government policy, and taking into consideration our analysis above, it would be pertinent that all current development in the Solent (SEMS) water catchment cease with immediate effect, until further long-term studies and peer review has been carried out.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

I need to be consulted

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

/

B4c Your suggested revised wording of any policy or text:

/

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

TBH im not sure I do. I just wish to be consulted. If this is the means of doing so then im happy to take part.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

From: June Ward [REDACTED]
Date: 6 December 2020 at 22:28:00 GMT
To: June Ward <[REDACTED]>
Subject: FBC Continued

Dear Katherine,

As discussed with you Friday 4 December I enclose the start of my comments on the consultation document which you said you would be able to put in the appropriate boxes as I am unable to as I found that I could not continue without logging on, each time which was not how the system should've worked.

When we spoke you said that you had not received the second paragraph that I submitted so I am hoping that I will start there, as you have already received my first submission.

As I am not able to view the pro forma I hope you will be able to put them into the correct boxes as obviously with only one iPad that I am using to work on and one for my notes which I have made, it would be too torturous.

So onto matters of legal compliance which I believe is paragraph 1.6

There is no mention of the 2017 unadopted draft plan although it has been confirmed that it was in the previous 2015 plan.

Although there was an overall reduction in the new housing it would appear that Warsash is actually going to take 20% more. HA1 has no joined up thinking. There should be an environmental impact on all of the sites proposed , so that each one is not seen in isolation.

Paragraph 4.19 states that many of the housing policies brackets HE256 811 1416 1820 2125 and no longer considered to be proposed allocations. I should like to know how objectively assessed housing need arrived at the fact that site HA1 was to take the bullet.

It would appear that the developers have taken advantage of the LPA's decision that proposing HA1 would mean that they have carte blanche to submit applications. I believe this is contrary to the publication plan. It would also appear that in order to fit in as many houses as possible into HA1 the boundaries have been adjusted to accommodate them. How does this not look as though the Developers have the upper hand and are actually driving this through.

So onto the Habitats directive which again comes under Matters of legal compliance.

Paragraph 9.10 is about nightrates neutrality strategic policy. I cannot see how the policy which requires designated sites to be protected and enhanced and improved is adhered too. I think the word I am looking for is there should be a net reduction the designated sites in unfavourable conditions. The LPA's way of adjudging is the exact opposite. It would appear that this is in direct contravention of both the habitats directive and the publication plan policies. The developments contemplated would be negatively impacting the SAC and RAMSAR sites. I cannot see that under these circumstances it would be a valid option.

I am calling it a day at present and wonder if you can reply to acknowledge receipt of this and that I am actually doing the right thing and making comments that you can import into the documentation,

Many thanks,

June Ward

Dear Katherine,

This next part of my document relates to the Test of Soundness

I am not at all happy with the settlement definition.

Policy HA1, which is supposedly a greenfield site is proposed to be changed to an urban area – via the redefinition of settlement boundaries reference WW 17. Greenfield sites are not particularly favourable for development as it says in the forward to the publication plan.

Paragraph 2.10 says that Fareham Borough aims to retain the identity of the amazing valuable landscape and settlement definition, protecting it's natural, built and historic assets. As someone who has lived in Warsash 45 years and been conversant with this area for nearly 10 years before that, ie the late 1960's, is a complete contradiction. What was once a very gentle countryside location seems to have been redesignated giving it up and status. And the change of the settlement boundary to enable this to happen is in my view completely unethical and beyond belief. I take exception to the fact that policy HP1 calls for the efficient use of existing buildings to meet such need on a 1 for 1 replacement dwelling basis. This is not applicable for HA1 and it would appear that FBC has managed to redraw the urban boundary.

My next comment on test of soundness is where infrastructure is concerned.

This concerns policy HP4 to be found paragraph 5.24; I think HA1 demonstrably fails to have any thing other than a detrimental effect on the environment, certainly the traffic(witness the two and a half hours to get off the motorway on Friday 4 th December, where all roads in and out of Warsash were snarled up, as we are a peninsula....or has this not occurred to anyone) and amenity has implications. Even now I feel that I cannot venture out too far from Warsash for fear of not getting back at a reasonable time due to the amount of traffic on the few roads in and out of Warsash. Warsash almost appears to be a prison! Don't go anywhere because you can't get back to your house!

This ties in with my next point policy HA1. Page 51 talks about traffic routes. As I have said earlier it almost feels that one is imprisoned in Warsash. I note that there was a recommendation that there should only be six dwellings and Greenaway Lane now I see that the plan proposes for 140 houses and that to enable this to be accessed the lane needs to be widened. I think the clue is in the word Lane. This is a delightful lane to walk through but with that amount of traffic proposed would be considerably dangerous. It is already "take your life in your hands to cross Warsash Road "let alone the impact of trying to walk within what was once considered countryside. As one gets older and appreciates the ability to be able to walk along country lanes. Page 54 suggests there should be seven new accesses onto an incredibly busy Brook lane and Lockswood Road as well as an additional iaccess at Brook Lane via three entry points from Greenaway Lane. I have already had to change my surgery where I was a patient for 40 odd years as it was impossible to get to the surgery on time due to the amount of traffic. My surgery is now in locks Heath Centre. I note that there was an occasion some time in the last few few weeks that the Air ambulance was unable to land; and ambulance was unable to get there because of the gridlock. My point is very much that the proximity of these access points and the position of such will cause even more gridlock. We are a peninsular we are hemmed in. More traffic will make us feel that we are even more in a cage.

Continuing with my other comments about infrastructure

Paragraph 10.15 where has that been an analysis of roads where the new houses are proposed. If we are considering 830 new dwellings what about the transport assessment for HA1. Although there could be an average of two cars per dwelling I know from experience that at one point, with our daughters coming and going from University, we had five cars in the driveway, which we could accommodate.....many of the new homes will not have this advantage, and extra cars will be accommodated on the roads.. how therefore is there no reference for the mitigation required to reduce congestion by 2037. Plan as presented failed the test of soundness by not being positively prepared in this respect. In this very Rural area one has to have access to a car to get anywhere, unless being confined to one's home is the way forward for FBC. I cannot see that paragraph 10.14 helps any of us.

I have had the pleasure of one of my family is moving closer to live with me in Warsash and the boys are very involved in outdoor activities so it was a joy that I saw there was provision of two junior football pitches however these appear to be missed off of the master plan?

Document 3 for FBC

Dear Katherine,

This relates to Test of soundness-

Housing need methodology

I think there is a disparity CE paragraph 3.27 figure 3.2. The map shows that there are eight possible growth areas when there are actually more than this. Could you confirm which is the correct one.

Again paragraph 3.37 does not align with paragraph 4.13 regarding the definition of small-scale development. In other words, is it sites of less than 1Ha or development of not more than four dwellings.

Again under the same heading; paragraph 4.2 of the publication plan is dubious as it bases housing numbers on the proposed new methodology for calculating need and there is some concern that this may not be adopted by the government. Also page 37 paragraphs 4.12, 4.16 and policy HP13 illustration says that the contingency barrier of 1094 has been made. I think the plan is very dependent that 4858 houses at Welbourne will be delivered.

Occupancy rates

Paragraph 5.41 states that a four or five bed house would have an average occupancy rate of 2.4 with regard to nitrate budget calculations. However it also states that the range of occupancy for affordable homes will be between 4-6 persons. This does not marry up with the claims in the publication plan for what the council needs and requires.

Carbon reduction

Paragraph 8.60 section 8 does not state what the target should be for the requirement of meeting CO2 emission targets. It simply refers to individual developments power generation. I would contend that the plan is not positively prepared.

Paragraph 11.34 does not state what the meeting of CO2 emission reduction targets should be. The plan just refers to individual developments power generation so again I contend that plan is not positively prepared.

Paragraph 11.36 no standards have been set for the developers to design for natural ventilation and green infrastructure. I cannot see how just meeting building regs, allies with the Governments needs to meet the promised carbon reduction. The council should lead by example by setting standards to ensure that developers are designing for sustainability. We need to look to the future using the new standards SA10.

Retail facilities

Paragraph 7.13 if Warsash is to have more houses then there will be additional retail facilities needed and with that will be the need for more parking spaces as many who have lived in this area for decades need to use their own transport for shopping, hairdressers, and many other facilities that this village has provided. It is already a job to cross the road from one side to the other and more cars to the area will make this even more impossible. There would need to be a crossing area to allow children to cross safely to get to the bus stop or to Brookfield School as well as the many elderly people who need to cross from one side to the other.

Paragraph 7.18 although out-of-town shopping is discussed it is not however defined. As one gets older one prefers to take ones custom to the local shops as driving is not so pleasurable. If we are to be encouraged to shop elsewhere this will increase the amount of traffic on our heavily congested roads.

Education

Paragraph 10.26 infrastructure delivery plan section 5.5. I note that education is planned with Hampshire county council however the period of any proposed extensions only covers to 2021. The plan however goes up to 2037. My grandchildren are already in three different schools within the area, two of which need cars. Offering houses to be developed but then not having school places it's not a sound approach to help to realise the dreams of future generations.

Paragraph 10.27 Infrastructure delivery plan table item 83 calls for section 106 provisions of additional early years foundation provision within the western wards. However H a one does not say if there is going to be a nursery or preschool within the proposed development area. There should be a child placement contribution to be allocated as there are over 1000 new houses being proposed for the Warsash area alone. Again If parents need childcare provision they would have to travel out of this immediate area in order to access provision; not at all ideal, adding to traffic chaos, length of time travelling to and from child care setting and not allowing children to make friendships with those who they might be at school with when they reach statutory age.

Healthcare

As regards Paragraph 10.26 the infrastructure delivery plan calls for the expansion of healthcare provision through further GP practices in the western wards. The document however only provides an historic timeline through dating the local plan. This is not a sound approach considering that HA1 will bring in additional 830 houses. It is already impossible to get an appointment at the nearest GP practice within a week.

Complies with duty to cooperate Housing need methodology

Paragraph 1.28 which agrees to take up the shortfall of homes from Portsmouth, numbering 847, would appear that FBC are taking a risk as the new methodology for calculating housing need has not been signed off by the Government. Also during this time of public consultation the housing delivery test will not be available

Paragraph 3.10 The rewilding of the Stubbington strategic gap was made without consultation with the council offices or elected members. It came via an announcement through a press release after the start of the full council meeting, which was in the process of debating this plan.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND ADJACENT TO 75 HOLLY HILL LANE, SARISBURY

**ON BEHALF OF
BARGATE HOMES**

Pegasus Group

4.0 Participation at the Examination Hearing Sessions 24

APPENDICES:

- 1.0 Landscape Response prepared by Terra Firma Consultancy including Opportunities and Constraints Plan**

1.0 Introduction

- 1.1** The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in Land adjacent to 75 Holly Hill Lane in Sarisbury.
- 1.2** The site is irregular in shape and extends to approximately 2.6 hectares. It is accessed via Holly Hill Lane, which adjoins the south-western boundary of the site, and the majority of the site lies to the east (rear) of the properties which front Holly Hill Lane. The southern boundary of the site adjoins Holly Hill Woodland Park and the eastern boundary extends as far as the boundaries of the properties on Mulberry Lane (accessed from Barnes Lane). The site has previously been promoted through Fareham Borough Council's (FBC) Strategic Housing and Employment Land Availability Assessment (SHELAA) – Site ID 1005.
- 1.3** For the reasons set out in these representations, our client is strongly of the view that this site should be allocated for residential development in the Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan). It is estimated that the site could accommodate approximately 30 dwellings. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).
- 1.4** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.5** The following representations utilise the same format as the Council's response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.4 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.5 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in

"Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

- 2.6 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.
- 2.7 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

-
- 2.8 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.
- 2.9 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.10 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.11 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.12 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's

announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

2.13 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.

2.14 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.

2.15 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.16 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require

that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

2.17 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

2.18 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.

2.19 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.

2.20 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies

that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

- 2.21 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.
- 2.22 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East

Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

2.23 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

2.24 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.25 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.26 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.27 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.28 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and

Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.29 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of our client's interest at Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.30 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and

Compulsory Purchase Act 2004).

- 2.31 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;

- Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31; and
- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

3.15 Paragraph 3.9 of the PLP states:

"Recent planning appeal decisions in the Borough have highlighted the need to consider the designation of valued landscapes as part of the Local Plan. Previous Local Plans have included the demarcation of 'Areas of Special Landscape Quality' in the Borough which were used to help shape planning strategy and decisions on planning applications. These areas were the Meon, Hamble and Hook valleys, Portsdown Hill and the Forest of Bere. Both the Landscape Assessment (2017), and the more recent 'Technical Review of Areas of Special Landscape Quality and the Strategic Gaps' (2020) still recognise the intrinsic character and distinctiveness of these relatively undeveloped areas of the Borough and so their locations have been used to shape the development strategy. There is a presumption against major development in these areas, unless it can be demonstrated through a landscape assessment that the quality

and distinctiveness of the landscape character can be conserved. For these reasons there remain no development allocations in these areas." (our underlining)

Our client objects to the identification of the Areas of Special Landscape Quality (ASLQ) in the borough, and particularly to the presumption against development in ASLQ and against allocation any sites for development within these areas. This is discussed in detail in the section relating to Policy DS3: Landscape below.

Policy DS1: Development in the Countryside

- 3.16** For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".
- 3.17** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.18** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

- 3.19** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.20** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non-designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.21** However, if it is held that Policy DS3 should not be deleted, the following comments apply.
- 3.22** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.23** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA3 is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.24** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and

several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.25 Having specific regard to our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury, the site has previously been promoted through FBC's SHELAA dated September 2020 (Site ID 1005) and was discounted solely because it is located within an ASLQ. Consequently, our client has appointed Terra Firma Consultancy to review this matter and a Landscape Response is attached to these representations at Appendix 1, together with an Opportunities and Constraints Plan for the site.

3.26 In summary, it is considered that if Policy DS3 is not deleted, it should better allow for flexibility when it can be proven that parcels of land within the ASLQ, when taken in isolation and studied in depth, can accommodate sensitive small-scale development. It is considered that our client's site has capacity for development without detriment to the wider Landscape Character Area and would also create opportunities for landscape enhancement and protection. Further site-specific details for Land adjacent to 75 Hilly Hill Lane are provided at the end of this section.

Policy HP1: New Residential Development

3.27 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.28 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.29 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.30 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.31 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.32 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.33 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.34 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.35 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.36 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.37 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.38 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.39 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.40 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.41 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.42 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.43 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.44** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.45** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury

- 3.46** Our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury has previously been promoted through the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA) dated September 2020. The site is discounted solely for the reason that it is located within a SLQA and our client's objection to this is set out above.
- 3.47** Otherwise, the SHELAA confirms that the principle of highway access to the site is acceptable, subject to allowing for the turning of refuse vehicles within the design of the access road, which could be addressed. It is confirmed that there are no known conservation constraints or noise/air quality constraints, and that the site is not within an identified area of archaeological potential. The SHELAA suggests that there is the potential for moderate to high quality

habitats and ecological interest within the woodland areas, but this could be assessed and appropriately mitigated.

- 3.48** In terms of its accessibility and sustainability, the SHELAA confirms that the site is located within 800m of accessible green space or play space, within 800m of a community/leisure facility, within 1,200m of a Primary School and within 1,600m of a Secondary School. It is also noted that the site is located 0.5 miles (by road) to the south of the A27 and its associated local facilities and services. There are also bus routes that run along Barnes Lane to the east, and the A27.
- 3.49** The SHELAA concludes that the site is both available and achievable but that it is not suitable due to its location within an ASLQ.
- 3.50** The Landscape Response prepared by Terra Firma Consultancy, enclosed at Appendix A, includes an Opportunities and Constraints Plan for the site which identifies an indicative developable area extending to approximately 0.93 hectares. On the basis of a development density of 30-35 dph, this would equate to the provision of between 28-33 dwellings on the site.
- 3.51** On the basis of the above, the Council is encouraged to allocate Land adjacent to 75 Holly Hill Lane in Sarisbury for approximately 30 dwellings. This site is controlled by a highly reputable local housing developer – Bargate Homes – who has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five-year housing land supply.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

4.0 Participation at the examination hearing sessions	26

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our client, Bargate Homes. These representations are consistent with and build upon the previous representations submitted to the Council by WYG in relation to this site in response to the Fareham Draft Local Plan 2036 Supplement in February 2020, and we ask that those previous representations are also considered alongside this submission because their content is not repeated here.
- 1.2** Our client has an interest in **land to the west of Old Street, Stubbington** which was previously the subject of development proposals for up to 160 (reduced to 150) new homes (planning application P/17/1451/OA refused on 23 March 2018, and appeal ref. APP/A1720/W/18/3200409 dismissed on 22 January 2019 refer). Since this appeal decision, and in the light of the Inspector's reasoning, extensive belts of strategic woodland planting have been undertaken at the site which will have the effect of visually detaching part of the site from the Meon Valley and creating a more modest sustainably located site for about 75 new homes on the edge of the urban area of Stubbington. Our client is strongly of the view that these material changes of circumstances at the site, coupled with the need for the Council to meet its local housing target of a minimum of 514 homes per annum, justify the allocation of the site for about 75 dwellings in the local plan.
- 1.3** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 – 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Remove Strategic Gap designation from Land West of Old Street, Stubbington.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local

housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national

guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature

and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed

need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.

2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.

2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham

to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such it's preparation is premature.

2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PFSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities

for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading (as confirmed by the Government's announcement on 16 December 2020 that the Council's annual housing target is to remain at 514 homes per annum).

3. It is not Effective:

- 2.28 The Council has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

- 2.29 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.
- 2.30 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be

included as additional housing to the minimum 514 hpa.

3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
 4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.31 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.32 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.33 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8** This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9** The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10** The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.
- 3.11** The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.
- 3.12** Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – the spatial extent of 'landscapes' should be defined here to avoid ambiguity. While the landscape as a whole could be enhanced by carefully designed development proposals, the principle of landscape change within the site itself should be established. If this requirement to 'conserve and enhance landscapes' is applied to the landscape features and character of a potential development site, then this requirement is excessive and unachievable once the landscape 'change' from an undeveloped site to a developed site is taken into account. Either the spatial extent of 'landscapes' should be defined or the requirement to 'enhance landscapes' be removed from the policy.

-
- 3.16** Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".
- 3.17** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.18** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS2: Development in Strategic Gaps

- 3.19** Under the heading 'Why we need this policy', Paragraph 3.43 of the Publication Local Plan states that "Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities". The introduction of 'settlement character' into the policy wording is not consistent with the evidence base which confirms at paragraph 2 in Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps that the "primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities".
- 3.20** Strategic Policy DS2: Development in Strategic Gaps should only apply to land which provides a spatial function to maintain separation of settlements and define settlement pattern rather than defining settlement character. Land west of Old Street, Stubbington does not contribute to the spatial separation of settlements, therefore Strategic Policy DS2 should not be applied to this land.
- 3.21** This view is supported by the Inspector for the appeal relating to Land west of Old Street, Stubbington APP/A1720/W/18/3200409 who stated that:

"The Meon Gap lies between Fareham/ Stubbington and the Western Wards/Whiteley. Policy CS22 requires the integrity of the gap to be maintained and the physical and visual separation of settlements to be respected. In terms of separation of settlements there is no dispute that there would be no diminution either in physical or visual terms if the development were to go ahead. The policy indicates that the gap boundaries will be reviewed to ensure that no more land than necessary is included in order to maintain gap function". (our underlining)

3.22 The Inspector goes on to state:

"It should be remembered that gap policy is a spatial tool. The Council referred to the role of the gap in maintaining the character or setting of Stubbington. This is considered in the 2017 LCA where the strategic gap designation is reviewed. However, the document makes clear that its purpose is to consider what role the landscape plays within the strategic gaps. It is not intended to examine the designation criteria, or the broad areas identified. This is important to note because it is landscape rather than spatial considerations that are key to settlement character and setting. The character and setting of Stubbington is not pertinent to gap designation or function in policy CS22".

3.23 The Inspector concluded:

"I appreciate that a review of gap boundaries was undertaken in 2012 and that no changes were recommended in relation to the land immediately adjacent to Stubbington. However, for the reasons I have given I do not consider that the proposed development of the appeal site would adversely affect the integrity of the Meon Gap". (our underlining)

3.24 For this reason, Strategic Policy DS2 should not apply to Land west of Old Street, Stubbington, because it has been confirmed that this land does not contribute to the function of the Strategic Gap. The Meon Valley is protected by many environmental designations which prevent development into this area from the Fareham side of the valley. The designated valley floor of the Meon Valley maintains separation of settlements to an extent that an adequate gap is maintained without the inclusion of Land west of Old Street, Stubbington within the Strategic Gap. Fareham Policy CS: 22: Strategic Gaps, states that "In

defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation." It is therefore unnecessary for Strategic Policy DS2 to apply Land west of Old Street, Stubbington.

3.25 At paragraph 7 of Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps states that "Where it is considered that there is capacity to absorb more development within the Fareham-Stubbington Strategic Gap, GI mitigation will be required, to a greater or lesser extent depending on the scale and nature of any development". Again, at paragraph 11 of the chapter 4 summary the Technical Review states "The ability to absorb development into the landscape exists, without compromising the integrity of the Gap function, again on the understanding that the settlement edges must include appropriate Green Infrastructure".

3.26 We submit that there is similar potential within the Meon Gap where the Gap is significantly wider than is the case for the Fareham-Stubbington Strategic Gap. This is particularly the case for Land west of Old Street, Stubbington where advance planting and green infrastructure has already been implemented during 2019 and is establishing well. This will continue to develop and establish a wooded edge to the Meon Valley, providing separation between the Meon Valley and Land west of Old Street, Stubbington. This would reinforce the wooded edge characteristics of settlements which are a feature throughout Fareham Borough, as referred to within the Fareham Borough Gap Review 2012, which states "The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap". In the case of Land west of Old Street, Stubbington the advance planting will create a wooded edge, providing a strong boundary between the site and the Meon Valley (stronger than is the case for the older housing at Hill Head where rear garden boundaries are visible from the Meon Valley) and in so doing it would be more consistent with the character of the settlement edges of the Borough. These green infrastructure enhancements already implemented will bring benefits to the biodiversity of the Meon Valley through enhanced planting and management of the existing farmland.

Policy DS3: Landscape

- 3.27** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.28** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council has created a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.29** However, if it is held that Policy DS3 should not be deleted, the following comments apply:
- 3.30** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.31** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.32** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.33 The local plan evidence at page 50 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not include the requirement for the landscape to be “protected and enhanced”. The requirement to “protect and enhance” the landscape is ambiguous because it is not clear whether it is intended to refer to the landscape of the ASLQ as a whole or if it would apply to a potential development site, within which the requirement to enhance is excessive and unachievable once the landscape ‘change’ from an undeveloped site to a developed site is taken into account. As an example, a development could provide enhancement to the ASLQ landscape through restoration of landscape features or new green infrastructure, but at a site scale the landscape ‘change’ from an undeveloped site to a developed site is unlikely to result in ‘enhancement’.

3.34 Each of the Candidate Areas of Special Landscape Quality have been assessed against the GLVIA3 Box 5.1 criteria, which is an accepted tool to assess landscape value. Land west of Old Street, Stubbington is located within ASLQ 4: Meon Valley and in LLCA 6.1c which is described as within the Landscape Assessment (2017) as:

“On the eastern side of the valley floor, area 6.1c is occupied by similar land uses but with greater variation in field pattern and enclosure. The area comprises a mosaic of smaller-scale pastures bounded by strong hedgerows and trees (particularly within the northern and southern ends of the area), two small-scale enclosed tributary valleys and some larger fields with a more open, denuded character within the central section around the Crofton Manor Equestrian Centre. Together with the adjacent horticultural glasshouses and other commercial operations, this lends a localised fringe character to the landscape but does not detract significantly from the essentially rural characteristics of the overall area”.

3.35 At Figure 3.3 each of the LCA within Fareham is assessed against the GLVIA3 ‘valued landscape’ criteria. Figure 1.3 explains the criteria in more detail, defining a ‘High match’, ‘Good match’, ‘Fair match’ and ‘Partial match’.

3.36 Land west of Old Street, Stubbington is located within LLCA 6.1c which is assessed as a ‘good match’ for all criteria, except ‘Associations’ which is a ‘partial match’. Figure 3.2 defines a ‘Good match’ as *“The area’s scenic quality and condition are both relatively high. It has a generally unspoilt, intact and coherent character with a good level of topographic and visual unity. It has several*

features of note, including natural and cultural designations, and is valued for its recreational opportunities. There are some detracting influences, but these do not generally intrude”.

3.37 We submit that the assessment of LLCA 6.1c has attributed a higher value for the ‘Recreational value’ criteria than can be justified. The southern half of LLCA 6.1c does not have any means of public access so can not be described as being ‘valued for its recreational opportunities’. In the northern half there are infrequent public footpaths and the Crofton Manor Equestrian Centre, neither of which justify the area being defined as ‘valued for its recreational opportunities’. Instead, the term ‘Recreational value is relatively limited’ is a fair reflection of the recreation provision within LLCA 6.1c as a whole, which is the definition applicable to a ‘Partial Match’.

3.38 Landscape quality (condition) is also assessed as a ‘Good Match’, despite the Landscape Assessment (2017) acknowledging its ‘denuded character’ and ‘fringe character’. This character is a feature of LLCA 6.1c, and for this reason the ‘Good Match’ definition as ‘generally unspoilt, intact and coherent character’ is not justifiable. A ‘Fair Match’ is most applicable to LLCA 6.1c, defined as “condition is moderate to good. It is generally intact and coherent with some unspoilt characteristics”.

3.39 The criteria of ‘Conservation interests’ is also assessed as a ‘Good Match’, defined as “It has a number of features of note, including natural and cultural designations”. We submit that ‘Fair Match’ is a more balanced description of LLCA 6.1c, defined as “some features of note which may include natural or cultural designations”.

Policy HP1: New Residential Development

3.40 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.

3.41 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.42 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.43 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.44 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.45 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.46 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and

- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.47 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.48 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.49 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.50 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.51 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.52 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.53 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.54 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the level of need for such units in the Borough – in the absence of this it is not clear whether the level of provision sought by this policy is appropriate.

Policy HP9: Self and Custom Build Homes

3.55 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.56 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). The total number of homes to be delivered by Welborne has reduced considerably over the last five years so this level of requirement should be reviewed as it will not yield the number of self or custom build homes as was anticipated at the time the Welborne Plan was prepared. Strategic allocations

such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.57** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.58** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Proposed housing allocation of Land West of Old Street, Stubbington for about 75 dwellings

- 3.59** In 2019 the appeal Inspector concluded that the development of the site would not adversely affect the integrity of the Meon Valley Strategic Gap. Clearly, therefore, the site should be excluded from the Strategic Gap boundary. The boundaries of the strategic gap were defined in relation to Core Strategy Policy CS22 and they were drawn in the context of the understanding of development needs at that time – an understanding which no longer reflects current reality, that being a very substantial shortfall in housing land supply and the preparation of the PLP by the Council which plans to under-provide housing against the Council's annual housing requirement of 514 homes per annum. Strategic Gap boundaries must be reviewed as part of the process of allocating additional sites for housing in this local plan, and our client's site west of Old Street, Stubbington should be removed from the Strategic Gap.

- 3.60** The 2019 appeal Inspector found that the West of Old Street, Stubbington site lay in an area of valued landscape. In this context, the value of the site's landscape has been re-assessed as part of our commentary on Policy DS3 above, against the GLVIA3 'valued landscape' criteria. As described, the site performs no better than as a Fair or Partial match against these criteria. When account is taken of the effect of the structural woodland planting undertaken over time, it is clear that development of the eastern part of the site will only have a minor impact on the wider landscape at most. Lying adjacent to the existing settlement of Stubbington, the introduction of development will appear entirely characteristic within the receiving landscape, while providing a strong, vegetated edge to the countryside in perpetuity. There is no doubt that the character of the developed part of the site would change, but that is no different for any greenfield development. There is no reason to assume that the site's development will be anything other than an attractive extension to Stubbington and one which is entirely congruous with its surroundings. The site's landscape containment has been enhanced through woodland planting which will both screen it from the Meon Valley and enhance its biodiversity.
- 3.61** Moreover, the western part of the site, beyond the woodland planting belt, is being used to provide mitigation habitat for Solent Waders and Brent Geese, offsetting development impact on low use SWBG sites elsewhere in borough. The segregation of this part of the site acknowledges this function and avoids its disturbance.
- 3.62** The West of Old Street site is also sustainably located for access to services and facilities and to sustainable transport modes (walking, cycling and public transport).
- 3.63** For all of these reasons, the Council is encouraged to allocate Land West of Old Street, Stubbington for about 75 dwellings. The site is controlled by a highly reputable local housing developer – Bargate Homes – which has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing session

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

POLICY HA1 HOUSING ALLOCATION – LAND NORTH AND SOUTH OF GREENAWAY LANE, WARSASH

**ON BEHALF OF
BARGATE HOMES**

APPENDICES:

Appendix 1 - Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

1.0 Introduction

1.1 The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash, identified within the emerging Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan).

1.2 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road (our client controls all but the easternmost part of this site); and 3. Land East of Brook Lane and North of Warsash Road. A Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1) is attached at Appendix 1.

1.3 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

1.4 For the reasons set out in these representations, our client strongly supports the allocation of their three land interests as part of Policy HA1. However, their view is that amendments are required to the specific wording of this policy. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).

1.5 Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.

1.6 The following representations utilise the same format as the Council’s response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HA1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B1c Which part of the Policies Map

2.4 Policy HA1 allocation site – Land North and South of Greenaway Lane, Warsash.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard

Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning

Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

- 2.9 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.
- 2.10 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.11 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.12 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.

-
- 2.13 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.
- 2.14 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.15 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.16 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.17 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

2.18 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

2.19 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.

2.20 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a

significant matter.

2.21 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.22 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.23 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

2.24 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

2.25 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's

case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.26 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.27 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.28 As stated at B3.1 above, it is unclear whether the PLP has planned to

adequately accommodate unmet need from other authorities.

2.29 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.30 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.31 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.32 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum)

between 2026/27 and 2030/31; and

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can

be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.16 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.17 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

3.18 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).

3.19 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**

3.20 However, if it is held that Policy DS3 should not be deleted, the following comments apply.

3.21 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

3.22 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.

3.23 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HA1: Land North and South of Greenaway Lane

3.24 As set out in the Introduction to these representations, our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash. Our client therefore strongly supports Policy HA1 and the identification of their three land interests within this proposed residential allocation.

3.25 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road; and 3. Land East of Brook Lane and North of Warsash Road.

3.26 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

3.27 The outstanding matters relating to the outline planning applications are all close to being resolved, especially now that a solution has been agreed in relation to nitrogen deposition into the Solent. It is therefore anticipated that outline planning permission can be granted for all three sites in the near future. Our client then intends to proceed to detailed planning followed by construction stages in a phased but timely manner, such that all three sites are deliverable and can therefore contribute towards the Council's housing land supply position in the short-term.

3.28 Whilst our client supports Policy HA1 and the allocation of their land interests for residential development in principle, in their view the wording of the site-specific requirements contained within the policy requires some amendments, as explained below.

a) The quantum of housing proposed shall be broadly consistent with the indicative site capacity

3.29 Policy HA1 sets out an indicative yield for the allocation as a whole of 824 dwellings. This is supported and no changes are suggested to this site-specific requirement. Our client's three land interests could provide up to 366 dwellings when combined. This includes up to 100 dwellings on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); approximately 126 dwellings on Land East of Brook Lane and East of Lockwood Road (considering our client does not control the easternmost part of the site so cannot deliver all of the 'up to 157 dwellings' approved at the outline stage); and up to 140 dwellings on Land East of Brook Lane and North of Warsash Road. This represents almost 45% of the indicative yield.

b) Primary highway access should be focused on Brook Lane and Lockwood Road with limited access via Greenaway Lane where necessary, subject to consideration of the impact on the character of Greenaway Lane

3.30 This is not supported, particularly having regard to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane). The wording of this site-specific requirement, including the use of 'limited' and 'where necessary', could be

considered to preclude the provision of a primary vehicular access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane.

- 3.31** The wording of site-specific requirement b) is inconsistent with Figure 4.1 – Policy HA1 Indicative Framework Plan contained with the PLP. Figure 4.1 identifies 'Indicative Principal Vehicular Access' points into the HA1 allocation, which are indicated by purple arrows and includes the identification of a principal access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane, located in the north-west corner of the site. Figure 4.1 also identifies two further principal accesses further east along Greenaway Lane associated with other parts of the HA1 allocation (outside of our client's control).
- 3.32** The wording of site-specific requirement b) is also inconsistent with the Illustrative Masterplan that has been approved by the Council as part of the resolution to grant outline planning permission for Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) under Ref. No. P/19/0402/OA. The approved Illustrative Masterplan includes the provision of a primary vehicular access point from Greenaway Lane, located in the north-west corner of the site (in a similar location to the purple arrow shown on Figure 4.1 of the PLP).
- 3.33** The Committee Report relating to the outline application (dated 16 December 2020), discusses highways matters at paragraphs 8.46 to 8.51. It confirms that from a highway safety perspective, the proposed access from Greenaway Lane is acceptable subject to the imposition of planning conditions (requiring the construction of the access junctions and visibility splays in accordance with the approved plans) and financial contributions towards off-site highways works and a Travel Plan.
- 3.34** The Committee Report confirms that the Highway Authority is satisfied that a safe means of access can be provided and identifies this as *"...a significant material planning consideration."* In terms of the impact on Greenaway Lane as a result of the physical alterations proposed as part of the development, the Committee Report states that these *"...are not of a level that would adversely detract from the character of Greenaway Lane or justify refusal of outline*

planning permission." The Committee Report then makes reference to the decision of the Planning Inspectorate in relation to a previous scheme for the site (Ref. No. APP/A1720/W/19/3225866 dated 11 December 2019), in which the Inspector confirms at paragraph 42 that *"...it would be possible to secure complementary development of the Greenaway Lane frontage within the scope of the reserved matters. Furthermore, highways works, and any additional traffic generated by the development, would affect only a very short section of the lane which lacks the more rural character seen towards the east."* At paragraph 38 of the Inspector's decision, it is concluded that *"...no necessity for an alternative access has been demonstrated on highways grounds."*

3.35 On the above basis, it is considered that the wording of site-specific requirement b) is inappropriate and misleading in potentially precluding the provision of a primary vehicular access to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane. This would be inconsistent with the provisions of Figure 4.1 of the PLP, as well as the Council's recent resolution to grant outline planning permission and conclusions of the previous appeal Inspector.

3.36 Accordingly, the wording of site-specific requirement b) should be amended to state:

"b) Primary highways access should be in accordance with the broad locations of the 'Indicative Principal Vehicular Access' points shown on Figure 4.1."

c) The provision of vehicular highway access between development parcels without prejudice to adjacent land in accordance with Policy D3

3.37 This is supported and no changes are suggested to this site-specific requirement. Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative secondary vehicular link roads' which are identified by dotted grey arrows. Our client agrees with the indicative location of these secondary access points within the Policy HA1 allocation, insofar as they relate to their three land interests, although it should be noted some of these connections may be bought forwards as pedestrian/cycle links only at

the detailed planning application stage to avoid more than 100 units having direct access onto Greenaway Lane.

d) The provision of a continuous north-south Green Infrastructure Corridor between the northern and southern site boundaries that is of an appropriate scale to accommodate public open space, connected foot and cycle paths, natural greenspace and wildlife habitats that link the two badger setts and other species, and east-west wildlife corridors. Highway cross-over points shall be limited in number and width and include wildlife tunnels where necessary, in accordance with the Framework Plan

3.38 The provisions of this site-specific requirement are supported in principle. The outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.39 Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative wildlife link tunnels'. This includes one running north-south on Land East of Brook Lane and North of Warsash Road which is accepted.

3.40 Figure 4.1 also shows two tunnels on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane), both of which are shown running north-south. Whilst it is acknowledged that these tunnels are only shown indicatively on Figure 4.1, it is noted that the southernmost tunnel on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) should in fact be shown running east-west, so that it crosses and runs perpendicular (not parallel to) the 'indicative secondary vehicular link road' in this location, and so that it reflects the line of the green corridor running along the southern boundary of the land parcel. Otherwise, the provision of two tunnels within this part of the allocation is accepted, as is the indicative location and orientation of the northernmost tunnel.

e) The provision of pedestrian and cycle connectivity between adjoining land parcels, as well as providing connectivity with Warsash Road and nearby facilities and services

3.41 This site-specific requirement is supported in principle and the outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.42 It is noted that it is not possible to provide direct connectivity between the land within the HA1 allocation and Warsash Road to the south, as the boundaries do not immediately adjoin the road. However, the outline illustrative masterplans provide pedestrian and cycle linkages to Brook Lane, which in turn leads to Warsash Road and nearby facilities and services.

3.43 In relation to the development proposals for Land East of Brook Lane and North of Warsash Road, it has previously been proposed to provide a pedestrian/cycle link from the southern boundary of the site into the rear car park of The Victory Hall which fronts on to Warsash Road. However, this proposal was not supported by the relevant stakeholders and so has not been carried forward into the illustrative outline masterplan for the site.

f) Building heights should be limited to a maximum of 2.5 storeys, except for buildings which front onto Greenaway Lane and Brook Lane where building heights shall be limited to a maximum of 2 storeys

3.44 The first part of this site-specific requirement is not supported. It is considered that some elements of 3 storey development are appropriate on the allocation site, provided they are located sensitively in the central parts of the site and setback from the site boundaries, allowing them to be appropriately screened and for a buffer to be provided to existing adjoining land uses. This is consistent with the requirement for the efficient use of land as set out in the NPPF.

3.45 The second part of this site-specific requirement for buildings fronting Greenaway Lane and Brook Lane to be limited to a maximum of 2 storeys is accepted.

g) Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does

not impact on living conditions

3.46 This is not supported. The wording of this site-specific requirement suggests that any tree that is subject to a Tree Preservation Order (TPO) cannot be removed. This is not appropriate and is not justified, particularly in light of the vehicular link required through TPO woodland in the southern most portion of the allocation. It is possible that cases may arise where it is necessary to remove a tree even if it is subject to a TPO, for example if the tree is no longer in a good condition or if it poses a health and safety risk in the future.

3.47 The wording of this site-specific requirement should be amended to provide greater flexibility and should state:

"Where possible, existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living conditions, unless agreed in writing with the Local Authority."

h) A Construction Environmental Management Plan to avoid adverse impacts of construction on the Solent designated sites shall be provided

3.48 This is supported and no changes are suggested to this site-specific requirement.

i) Provide future access to the existing underground water and wastewater infrastructure for maintenance and upsizing purposes (included at the request of Southern Water)

3.49 This is supported and no changes are suggested to this site-specific requirement. These measures can be incorporated into the detailed design for the three land parcels controlled by our client to ensure that future access is provided.

j) The site is identified as a mineral safeguarded site (sand and gravel are likely to underlay site). A Minerals Assessment will be required prior to any

development in accordance with the Hampshire Minerals and Waste Plan (2013)

3.50 The justification and evidence in support of this site-specific requirement are unclear. From our review of the information available on Hampshire County Council's (HCC) website, including the HCC Minerals and Waste Plan (adopted 2013) and its associated online Proposals Map, the HCC Minerals and Waste Safeguarding in Hampshire Supplementary Planning Document (adopted February 2016) and the HCC Minerals and Waste Plan Minerals Consultation Area (2015), the land within the Policy HA1 allocation does not appear to be identified as a minerals safeguarded site or as having any potential to be underlain by any mineral resources.

3.51 Furthermore, this matter has not been raised during the outline planning stages for our client's land interests.

3.52 This site-specific requirement is therefore not supported and should be deleted in relation to the Policy HA1 allocation.

k) Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4 and NE3. In addition, the following site-specific infrastructure will be required:

i) Two junior football pitches on-site; and

ii) Off-site improvements to existing sports facilities

3.53 The wording of site-specific requirement k) implies that financial contributions will definitely be required. This wording should be amended to provide more flexibility, in the event that it is agreed between the relevant parties that contributions are not in fact required in relation to one or more of the matters referred to.

3.54 The provision of reasonable financial contributions towards education and transport are accepted in principle where a specific need is identified and at an appropriate level to be agreed between the relevant parties.

3.55 In terms of our client's three land interests, financial contributions towards

education and transport have been agreed in principle through the resolutions to grant outline planning permission, with Section 106 Agreements to secure these being agreed prior to the outline planning permission for each site being issued.

3.56 The reference in site-specific requirement k) to providing contributions towards health is not supported. The Committee Report relating to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) (Ref. No. P/19/0402/OA dated 16 December 2020) discusses this matter with regard to a request from the University Hospital Southampton NHS Foundation Trust for a financial contribution to provide services needed by the occupants of the proposed new dwellings. The Officer's comments at paragraphs 8.64-8.68 of the Committee Report are as follows:

"In considering the requests it is noted that the construction of houses does not itself lead to population growth. Officers consider that the need for housing is a consequence of population growth. Furthermore, there is no account in the representations, it seems, for the potential for the residents of the new development to be moving locally around the Borough or adjoining boroughs such that their residence locally is already accounted for by the current services and funding commissioned by the hospital...

...The length of time between sites being identified, planning permission being granted, and the houses actually being constructed and subsequently occupied is many years. The amount of residential development coming forward in the Borough which has not been reasonably foreseeable for a period of year is therefore very limited.

In January 2019 the NHS launched its new 10-year plan. This plan sets out how the NHS thinks it can overcome the challenges that the NHS faces, such as staff shortages and growing demand for services. This is to be achieved essentially by doing things differently and at no point does it refer to the need for new developments to provide for healthcare services by means of financial contribution such as that requested by the Trust.

For the reasons set out above, Officers do not consider that the contribution

sought by the Trust is necessary to make the development acceptable in planning terms and thus the tests for planning obligations as set out above are not considered to have been met. Furthermore, given the adopted policy framework it is considered that in the absence of the contribution, the application does not fail as a consequence as this issue alone would not justify a reason for refusal, which it must do in order to make the contribution necessary to make the development acceptable in planning terms and meet the test for a planning obligation."

- 3.57** The same conclusions should be made in terms of site-specific requirement k) and the reference to health should therefore be deleted.
- 3.58** Finally, the requirement to provide two junior football pitches on-site is not supported. During the time that developers in the 'Warsash Cluster' have been in discussion with FBC in relation to their land interests, the Council has not been able to justify why on-site provision is needed and appears to have been an aspiration which has not been properly considered. The provision of sports pitches in this location is not appropriate, particularly having regard to the likely noise and traffic implications associated with this use, as well as the presumed need for a complementary pavilion. Site-specific requirement k) i) should therefore be deleted.
- 3.59** In terms of the requirement to provide off-site improvements to existing sports facilities, this is inconsistent with the financial contributions that have been agreed as part of the resolutions to grant outline planning permission for our client's three land interests and this requirement has not been raised by FBC as part of this process. The wording of site-specific requirement k) should therefore be amended to provide more flexibility, so that it cannot be interpreted that an off-site financial contribution towards sports facilities is required in relation to all land parcels within the Policy HA1 allocation (such as our client's three sites), but so that this can be sought in relation to the other parcels of land if justified and agreed between the relevant parties.
- 3.60** Taking into account all of the above, the wording of site-specific requirement k) should be amended to state:

"Infrastructure provision or contributions including but not limited to education and transport may be necessary in line with Policy TIN4 and NE3. In addition, contributions towards off-site improvements to existing sports facilities may be required."

Figure 4.1 – Policy HA1 Indicative Framework Plan

3.61 Figure 4.1 includes the identification of areas referred to as 'open space or development options. Development not on both', which are marked by a light green diagonal hatching. The only areas annotated as such on Figure 4.1 relate to our client's interest at Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) – one is shown at the western end of the site frontage with Greenaway Lane and the other running north-south in the centre of the site.

3.62 These annotations are not necessary and should be deleted as their intended purpose is unclear. The agreed illustrative outline masterplan for this site shows that development will be set back from Greenaway Lane with a linear area of public open shown across the entire site frontage, which in turn connects with further public open space shown running north-south through the centre of the site.

Policy HP1: New Residential Development

3.63 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.64 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.65 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.66 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.67 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.68 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.69 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.70 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.71 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.72 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.73 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.74 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.75 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.76 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.77 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.78 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.79 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.80** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.81** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDIX 1
Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND AT BROOK AVENUE, WARSASH

**ON BEHALF OF
ANTHONY AND LISA KING AND ANDREW AND MELANIE NORRIS**

**TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED)
PLANNING AND COMPULSORY PURCHASE ACT 2004**

3.0 Specific Proposed Changes **11**

4.0 Participation at the examination hearing sessions **27**

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our clients, Anthony and Lisa King, and Andrew and Melanie Norris, who own a potential housing site at Brook Avenue, Warsash. For the reasons set out in these representations, our clients are strongly of the view that their land should be allocated for housing development in the local plan.
- 1.2** These representations are consistent with, and build on, the previous representations which were submitted on behalf of Anthony and Lisa King by WYG in relation to the Fareham Draft Local Plan 2036 Supplement in February, 2020. Those previous representations are re-submitted with this representation for ease of reference.
- 1.3** The following representations utilise the same format as the Council’s response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

	Agent	Client
Title	Mr	Anthony and Lisa
First Name	Jeremy	King and Andrew
Last Name	Gardiner	and Melanie Norris
Job Title	Senior Director	c/o Agent
Organisation	Pegasus Group	
Address	3 West Links Tollgate Chandlers Ford Eastleigh Hampshire

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 - 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Former Policy HA2 allocation site Newgate Lane South, Employment allocations Policies E2 and E3.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020.

The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes

in the borough in any event, but the Council chose not to follow this national guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of

the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.

2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.

2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground –

as such it's preparation is premature.

- 2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.
- 2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PFSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits.

The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not Effective:

- 2.28 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

- 2.29 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

- 2.30 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.
- 2.31 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PFSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the

achievement of sustainable development.

4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.32 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of our clients' site at Brook Avenue, Warsash.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.33 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.34 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of our clients' land at Brook Avenue, Warsash.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8** This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9** The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10** The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.
- 3.11** The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.
- 3.12** Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

- 3.16** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.17** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

3.27 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (ASLQ) as shown on Figure 3.3 of the plan. This proposed designation affects our clients' site at Brook Lane, Warsash and all immediately surrounding land except (curiously) the Egmont Nursery site, Brook Avenue, which is a proposed allocation in the PLP and which has outline planning permission for 8 dwellings.

3.28 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. In our view, **this creation of a potentially irrelevant layer of policy is unnecessary and Policy DS3 should be deleted.**

However, if it is held that Policy DS3 should be retained in the plan, then the following comments apply:

3.29 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

- 3.30 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.31 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HP1: New Residential Development

- 3.32 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.
- 3.33 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

- 3.34 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.35 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.36 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.37 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.38 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.39 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.40 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.41 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.42 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.43 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.44 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.45 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

- 3.46 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on many of the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

- 3.47 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.
- 3.48 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.56 This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged

"to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.57 This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Appendix C:

- 3.58 The purpose of the inclusion of the Local Ecological Network Map at Appendix C is not understood. It includes the identification of land as "Network Opportunities". This does not appear to have a basis in the policies of the PLP. The plan is difficult to interpret given its scale but all or part of our clients' site may be identified as a Network Opportunity on this plan. This is not explained. This appendix should be deleted, as happened to a similar plan appended to the Regulation 19 Chichester District Local Plan.

Proposed housing allocation – land at Brook Avenue, Warsash

- 3.59 Our clients' site is identified at Appendix A of the accompanying February 2020 representations. It is SHELAA Site ID 3050 which is assessed as a "Discounted Housing Site" on page 161 of the Council's most recent SHELAA dated September 2020. Here it is confirmed that the site has a gross area of 2.04ha and an estimated yield of 55 dwellings. The site's "Suitability" (for development) was assessed as follows:

"Constraints: *Agricultural Land Grade 3b, Within 500m of SPA, Within 500m of SAC, Within 500m of Ramsar, Within 500m of SSSI, Countryside.*

Highways / Pedestrian access: *Access from the south would be unacceptable as the link to Brook Lane is narrow. Access from the north onto Brook Avenue is considered feasible. Footway provision along Brook Avenue would be required to Brook Lane.*

Conservation Comments: *No known constraints.*

Noise / Air Quality Assessment: *No issues.*

Archaeology: *Site not within identified area of archaeological potential.*

Ecology Comment: *The site contains an improved grassland field with boundary vegetation, which could be utilised by foraging and commuting bats, reptiles, dormice and breeding birds. Issues arising from increased recreation within the SINC will need to be considered. Protection and enhancement of the boundary vegetation is required.*

Accessible Facility Types 6/10: *Within 1600m of a Secondary School, within 800m of a Convenience Store or Supermarket, within 400m of a High Frequency Bus Stops, within 800m of a Accessible Green or Play Space, within 1200m of a Primary School, within 1600m of a Town/District or Local Centre.*

Reason for Discounting: *Development of scale promoted would not be in keeping with the settlement pattern.*

Is the site suitable? *No*

Is the site available? *Yes*

Is the site considered achievable? *Yes"*

Our comments:

The site is considered to be available and achievable for housing, but not suitable. This appears to be an illogical conclusion from the assessment

provided, particularly when account is taken of other planning permissions and allocations in the immediate area.

Proximity to the SPA/SAC/Ramsar and SSSI are not objections in principle to development in this location – as evidenced by the planning permission for housing at Egmont Nursery to the west of our clients' land (so closer to European designated sites) and the allocation of the "Warsash cluster" of housing sites north and south of Greenaway Lane a short distance to the east.

Access is available from Brook Avenue to the north.

There are no conservation, archaeology, noise or air quality constraints.

The site offers some ecological potential but this can be mitigated.

The site is sustainably located within walking distances of secondary and primary schools, local services and facilities including convenience shopping and a high frequency bus route.

Therefore, it appears that the only reason it was not allocated for housing was because the estimated yield of 55 dwellings was held to be not *"in keeping with the settlement pattern"*. The site's area is 2.04ha, so a scheme of 55 dwellings would be at a density of about 27 dwellings per hectare, a relatively low density.

To the east of the site are consolidated frontages of suburban housing fronting Brook Lane and Brook Avenue, but to the west housing along Brook Avenue is of lower density and is more sporadic.

In this context, it is suggested that the density of housing development should reduce east to west across the site, that the site should be allocated for "about 25 dwellings", but that its capacity should be confirmed through a detailed assessment of its constraints and the preparation of a feasibility layout.

For these reasons, the Council is encouraged to allocate our clients' site at Brook Avenue, Warsash for about 25 dwellings. Our clients have received many expressions of interest in their land from housing

developers, such that the site is deliverable in the short term and can make a modest though important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

Keely, Lauren

Subject: Local plan comments.

Name. Anne Brierley

Consultation on the local plan.
Comments on the local plan to 2037.

Firstly I would like to say that the deliveries of The Special addition of Fareham Today were not made to all areas. This led to a big delay in copies arriving and lost time in trying to understand or access the information given.. Not all people know how to use or have the technology to take part in this survey. By having to reply in the ways set out, is also off putting and in this remark i include myself. I would hope that this is still forwarded . I found also that when replying to the, Have Your Say On Our Future Development questionnaire, that there was not really any choice for development areas. Given the way the questionnaire was written it was no surprise to find that people wanted the development put at the outer edges of existing developments even if that ment using our country side.

HA4 Downend Road.

Ever since the 2017 draft plan was drawn up, the residents of the local area have had to constantly defend their rights and position on this.

Land WEST of Downend Road is not in the plan at the moment but it's only a matter of time before we will be defending this area too.

It is known that surveys have taken place and a wild life survey has continued all this year.

Several developers have been lining up, including the developers trying to get permission on land east of Downend Road. (Winnham Farm)

Housing Allocation

HA4

land east of Downend Road

Known as Winnham Farm.

First planning number P/18/0005/OA was DEFERRED and then DENIED over concerns with traffic and road safety at narrow bridge on Downend Road.

Went to appeal. App/A1720/w/19/3230015 Hearing on 23 to 25 September. Which was DISMISSED by the Inspector.

Resubmitted as number P/20/0912/OA DENIED again ON 18TH DEC 2020.

This area should of never been placed as a development site. The developers themselves knew of traffic problems from the start.

It went to the local plan that was never finalised 2017.

The council have left this area in the current plan and have never had any other intention but to keep it in, despite the area suffering SEVERE traffic congestion with many roads at a stand still. (Pre covid)
When the problems with Covid subside we will be back to square one.

Residents have very little faith in the traffic modelling, desk top surveys and transport assessments as they dont compare with reality.

Areas affected by SEVERE traffic congestion are:

M27 motorway and its slip roads,

The Delme Roundabout and A32 into Gosport

Downend Road and all side roads that join it. (Are regularly used as rat runs.)

Residents of Cams Hill Road, St Catherine's way, The Ridge Way, Ventnor Way, Alum Way and The Causeway . ALL have NO other exit route other than onto Downend Road. The Thicket on the west side of Downend Road also suffers rat running.

The A27 between Portchester to the Delme roundabout and onwards

The junction where Downend Road meets A27 & Shearwater Ave.

Who would then allow more development on Downend Road with such restrictions as, a bottle neck narrowing highway, over a narrow brick built network rail bridge ?

Traffic also impacts on the envioment, amenity, health and well being of residents.

Poor air quality which is known to be very high, with some residents having had a letters about this.

If it were not for this year's Covid 19 crises reducing traffic numbers , we may of exceeded the limits.

If you walk along the A27 you can taste the fumes in the air.

Policy DSP40.

States that a planning proposal should not have unacceptable enviromental, amenity, or traffic implications and plans should not create a bad relationship with the existing residential properties. I believe this continued application in this area fails the test on all counts.

Fareham council is breaking their own rules on policeys.

Transport and other infrastructure.

Highways England, Hampshire County Council and Fareham Borough Council along with the Developers are all aware of how dire the situation is.

No spare capacity for new roads or spare capacity on the Delme roundabout.

The developers and HCC dont dispute this.

It is for this reason that the Developers are required to make a contribution to the Delme Roundabout and many other items to numerous to list.

The mitigation plans the developers and HCC have proposed will be at best a very temporary fix and will be negated by the increase in traffic from more people being attracted into the area. The pridicted rise in vehicals ownership, regardless of engine type, and the enormous rise home deliveries and all traffic from other areas that pass through. There are going to be disruptions with the Downend Road /A27 Junction, possibly being worked on twice. Once for mitigation work, and again for extra lane for Bus Rapid Transit.

If the development goes forward i believe we would all face years of disruption.

Sustainable and alternative modes of transport for new developments.

A good idea but current residents know that to live in this area you need transport.

The few remaining shops at Portchester and Fareham are unlikely to be walked to.

The distances to bus stops is greater than the ideal distance for walking.

Only three buses on the A27 near the Thicket with one of them only running on a Wednesday between 11 & 2pm.

This did come up with the Inspector at appeal and he was hesitant until he was informed that there was to be the Bus Rapid Transit system.

How many years before it arrives ? And do they have the money to fund it ?

Reporting we are getting one and it arriving are very different things. Look at all the delays with Welborne.

Walking and cycling are more likely to be for leisure given every day time restraints, but senior school children will probably walk to Cams school most days.

Developments that are promoting walking and cycling will still have the choice of a motor vehicle and at the Downend location I believe they will.

1) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Paras 1.1 and 3.6 States settlement identity should be preserved Para 2.12 states development should be away from spaces that contribute to settlement definition Policy HA1 contravenes these paragraphs by infilling between the village of warmish an the locks heath area

What modification(s) is necessary to make the Local Plan legally compliant or sound?

No infill to north and south of Greenaway Lane

How would the modification(s) you propose make the Local Plan legally compliant or sound?

N/A

Your suggested revised wording of any policy or text:

N/A

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Paragraph: 1.13

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The opinions of over 1500 people over 21% of the population of Warmish was ignored

What modification(s) is necessary to make the Local Plan legally compliant or sound?

To take into account the views of the population as para 1.12 states

How would the modification(s) you propose make the Local Plan legally compliant or sound?

N/A

Your suggested revised wording of any policy or text:

N/A

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Paragraph: 2.12

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

There is inadequate infrastructure to cater for HA1. The GP lists are full. Hook with Warmish Primary School has a waiting list.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Delete HA1 from the plan or provide more GP surgeries and schools

How would the modification(s) you propose make the Local Plan legally compliant or sound?

N/A

Your suggested revised wording of any policy or text:

N/A

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Paragraph: 12.16

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Warmish has a population of approx. 7000, 6% of the total population of Fareham Borough. Yet it is being allocated 929 houses of out 8,389 proposed which is 11%. This does not protect, preserve or enhance the character of Warmish as a conservation area.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reduce significantly the number of houses allocated to Warmish.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

-

Your suggested revised wording of any policy or text:

-

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Policy: DS1 - Development in the Countryside

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The 2037 plan is sound in many respects. More so than its predecessor. However, I have some reservations. Firstly, the plan includes in Paragraph 1.14 an assertion that it is prepared predicated on reduced identified housing need suggested by the Standard Method calculation in the Government's proposed "Changes to the Planning System" document. This is still under review, and since it has not been finalised yet, and has generated considerable interest and even opposition among local authorities as well as the public, it seems unwise to base such a crucial calculation on an as-yet uncertain process. This would have a bearing on Fareham Borough Council's ability to fulfil its Five-Year Housing Land Supply obligations, it also has a bearing on some of the policies in the plan that seem to be linked and would have implications for the retention of the Strategic Gaps within the borough. Policy DS1 reinstates the strategic Gaps as that not Strategic Growth Areas. To this extent, the plan is sound. However, paragraph 3.46 goes on to suggest that there is "evidence" that the boundary of the Fareham / Stubbington Gap could be redrawn "... whilst retaining its important function of preventing settlement coalescence." That evidence is the opinion of a Hampshire County Council Planning official as part of their Technical Review of Areas of Special Landscape Quality and Strategic Gaps: Chapter 4: Strategic Gaps Conclusions and Recommendations paragraph 10. The author states: • "The Fareham-Stubbington Strategic Gap is also proposed for continued designation, also having strong sub-regional support, and a clear and continued role, but there exists (sic.) some opportunities for development to be absorbed within the Strategic Gap, subject to scale and future detailed design, without compromising its Gap function combined with mitigation measures that can support GI enhancement." This constitutes an opinion, albeit possibly an informed one, not evidence. This uncertainty about the borders of this particular Gap reduces the soundness in my mind, when taken together with Policy DS1 which outlines the conditions for any development in the Strategic Gaps. On its own Policy DS1 is innocuous enough, but it seems to be linked in Section e to a set of policies (HP1, HP2, HP4, HP5, HP6 and HP11) three of which might allow for exactly the development policy DS1 seeks to exclude. Policy HS4, which allows for the possibility that the Council may not meet the Five-Year Housing Supply criteria, seems to provide that the first place the Council will look to make good the deficit by looking outside Fareham's urban areas. Surely, the first look should be at brownfield sites in the borough. Policies HS5 and HS6 seem, prima facie, to offer the possibility of development of affordable housing within strict criteria. However, they are both included in the policy DS1 description. This linking offers the possibility that opportunistic developers may try to use the Affordable Housing gambit to build at just the right size to meet the conditions, but, with the link to the Five-Year Housing Supply as a primary consideration, develop in a way that incrementally aggregates to a more sizeable encroachment on the Strategic Gap. I believe these three Policies should be reconsidered, or at least their link to Policy DS1 before the plan is approved. If not, there is a considerable risk that developers may be able to take advantage of the poor drafting to pursue their aims in the Strategic Gap with the Council unable to constrain, or unaware of, the actual effects. Policy E1 / E2 / E3 / E4 / E5 / E6 These policies while in themselves, sound, seem to pursue an agenda that is not active in promoting either the government's Green agenda, nor common sense when it comes to climate change. While it is appreciated that any Production Plan shall be as anodyne as possible in order to pass the inspection, it is notable that none of the above policies does anything to suggest that there should be any preference for types of employment. With the UK government's recent suggestion that it wishes to pursue a Green Industrial Revolution, albeit this hasn't yet been put into legislation, the Fareham Plan includes nothing that points to sustainability in environmental terms not supports any environmental agenda or attempt to address climate change. It would have been encouraging to see any of the identified sites, including Daedalus, being suggested as a potential home for green industry, whether manufacture of energy generating technology, environmental remediation, R & D or just green-related consumer business. There is also no mention of Gosport Borough and any collaboration or consultation with them, which I would have thought was a necessity given the effect that any increased employment and movement of people would definitely have on shared infrastructure; transport links, roads etc. While Fareham and Gosport Boroughs' connections via the Solent LEP and PfSH indicate that they may confer, there is nothing in the plan that acknowledged the close interest in Fareham as a means of getting off the Gosport peninsula Policy E7: Solent Airport This policy Focusses exclusively on aviation business, with the relatively unrealistic aim of making what is plainly an airfield into an "airport"; "The airfield at Daedalus, herein called Solent Airport". That this seems to be earmarked for growth, not in the plan, explicitly, it a matter of great regret. The government has clearly indicated that it does not wish to see expansion of runways in the south East except for at Heathrow. And even that will require a reduction elsewhere. Fareham Borough Council is mistaken if it thinks that opening the airfield to potentially to jet flights is an acceptable development. It is contrary to the Government view on tackling Climate change; in inviting extra traffic in to the airport it also adds to the general level of traffic on the existing roads in the area, potentially negating the advantages that we are promised from the Stubbington by-pass.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

While I appreciate that Fareham Borough Council may read some of the attached, I am not certain that they will act on any of it. I'd like to be sure that it is considered.

2) Policy: HP4 - Five-year Housing Land Supply

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Uncertainty about the borders of the Fareham - Stubbington Strategic Gap reduces the soundness of the plan in my mind, when taken together with Policy DS1 which outlines the conditions for any development in the Strategic Gaps. On its own Policy DS1 is innocuous enough, but it seems to be linked in Section e to a set of policies (HP1, HP2, HP4, HP5, HP6 and HP11) three of which might allow for exactly the development policy DS1 seeks to exclude. Policy HS4, which allows for the possibility that the Council may not meet the Five-Year Housing Supply criteria, seems to provide that the first place the Council will look to make good the deficit by looking outside Fareham's urban areas. Surely, the first look should be at brownfield sites in the borough. Failure to do so puts non-urban land; countryside, at risk.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I am not sure Fareham Borough Council will fully consider the effects of the policies they have proposed against the comments made by myself and others. I'd like to be able to make sure they do.

3) Policy: HP5 - Provision of Affordable Housing

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policies HS5 and HS6 seem, prima facie, to offer the possibility of development of affordable housing within strict criteria. However, they are both included in the policy DS1 description. This linking offers the possibility that opportunistic developers may try to use the Affordable Housing gambit to build at just the right size to meet the conditions, but, with the link to the Five-Year Housing Supply as a primary consideration, develop in a way that incrementally aggregates to a more sizeable encroachment on the Strategic Gap. I believe these three Policies should be reconsidered, or at least their link to Policy DS1 before the plan is approved. If not, there is a considerable risk that developers may be able to take advantage of the poor drafting to pursue their aims in the Strategic Gap with the Council unable to constrain, or unaware of, the actual effects.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

I would urge the removal of reference to HP5 from Policy DS1 section e.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By removing HP5, which is aimed at promoting the construction of affordable housing on sites of 10 properties or more and which could, as linked to Policy DS1, be used to allow for development outside urban Fareham in pursuit of reaching the affordable housing target, the possibility of unscrupulous developers effecting incremental large scale development in the Fareham - Stubbington Strategic Gap is reduced.

Your suggested revised wording of any policy or text:

.... e) Is for housing development compliant with one of the following policies; HP1, HP2 or HP11, or ...

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I don't expect the drafters of the current version of the policy to see the subtleties of the problem it potentially creates. I would like to be there to explain it to them.

4) Policy: HP6 - Exception Sites

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

At present HP6 is explicitly linked to policy DS1 allow for development of small scale sites to comply with Affordable Housing targets using the policy as an exception to the presumption against development in rural areas. As drafted, it could allow for developers a) to use the Affordable description to build multiple small dwellings, where "all" are affordable or b) build multiple dwellings for "first -time buyers" where the development is less than 1 hectare or less than 5% of the adjacent settlement. As Gosport Borough Council has pointed out, if such developments are near or on the border with Gosport Borough, given the size of Gosport, the 5% provision is meaning less. The inclusion of a link to this policy within DS1 section e allows for the building of multiple small developments in a rural area, with no overall need to comply with a bigger plan, potentially allowing for incremental aggregation of much larger developments in the Fareham - Stubbington Strategic Gap, contrary to the stated aim of Fareham Borough Council

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Removal of the reference to HP6 from Policy DS1 section e as well as rewording of the policy explicitly to make any development affected by it a Fareham Borough development only.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Removing any ambiguity about the location of developments subject to policy HP6, this should protect the Fareham - Stubbington Strategic Gap from the potential for multiple small developments at the borders that may over time aggregate to a significant reduction on undeveloped land there.

Your suggested revised wording of any policy or text:

Policy DS1e) Is for housing development compliant with one of the following policies; HP1, HP2,HP11, or Policy HP6 ... a) The site is adjacent to existing settlements within Fareham Borough; and ...

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I would like to be sure that Fareham Borough Council is fully aware of the subtleties of the policies they have drafted.

5) Policy: E1- Employment Land Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy E1, while in itself, bordering on sound, seems to pursue an agenda that is not active in promoting either the government's Green agenda, nor common sense when it comes to climate change. While it is appreciated that any Production Plan shall be as anodyne as possible in order to pass the inspection, it is notable that none of the above policies does anything to suggest that there should be any preference for types of employment that acknowledges the government's Green Agenda and true sustainability. With the UK government's recent suggestion that it wishes to pursue a Green Industrial Revolution, albeit this hasn't yet been put into legislation, the Fareham Plan includes nothing that points to sustainability in environmental terms not supports any environmental agenda or attempt to address climate change. It would have been encouraging to see any of the identified sites, including Daedalus, being suggested as a potential home for green industry, whether manufacture of energy generating technology, environmental remediation, R & D or just green-related consumer business. There is also no mention of Gosport Borough and any collaboration or consultation with them, which I would have though was a necessity given the effect that any increased employment and movement of people would definitely have on shared infrastructure; transport links, roads etc. While Fareham and Gosport Boroughs' connections via the Solent LEP and PfSH indicate that they may confer, there is nothing in the plan that acknowledged the close interest in Fareham as a means of getting off the Gosport peninsula

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The inclusion of reference to green industry, sustainability or anything that indicates that the Council has a view on Climate change and the need to prepare for it and encourage the developmet of appropriate technologies and solutions.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would correct the overall, complacent tenor of the policy that advocated "business as usual".

Your suggested revised wording of any policy or text:

The Council's evidence base for the Borough's employment growth highlights the need to provide a range of modern good quality floorspace to meet employment forecasts in the Borough. The Council is keen to encourage a diverse range of economic growth, especially in the fields of "green technology and innovation", and this policy will ensure that the needs of new and growing businesses are met, and the Council will work with businesses and other partners to ensure the sufficient supply of quality employment floorspace.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I don't believe the Council will wish to step away from the conventional employment polices that they think have served them up to now. I'd like the opportunity to correct their perception.

6) Policy: E5 - Existing Employment Areas

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

I selected Policy E5 because it is present on the drop-down. I actually wanted to select Policy E7 which Fareham Borough Council has omitted from the drop-down. I hope this omission is not deliberate as I do think Policy E7 needs a challenge.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The removal of the nonsensical reference to an "airport". It is at present an airfield that handles a bearable (for nearby residents) amount of traffic. Fareham Borough Council and the operators of the airfield have applied for up to 40,000 aircraft movements per day; that is approximately 110 per day over 365 days. They also include in their plans the possibility of jet aircraft using the airfield. This presents an unacceptable level of activity on a small airfield bordered closely by residential areas and in a part of the country which the UK government has made clear is not appropriate for further expansion of runway availability.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By retaining the airfield as just that - an airfield with no idiotic aspirations for be an airport (this area is pretty well served by Southampton, Bournemouth and not so far away London Gatwick) and as an area for economic development that supported a green agenda, usign employment space there for procustion adn services that do not involve the use of greater quantities fo Jet fuel.

Your suggested revised wording of any policy or text:

The area defined as Daedalus, including the Solent Enterprise Zone, (as shown on the Policies map) will be retained for aviation related uses and employment opportunities including technology and innovation related to the correction of Climate Change and environmental management. It will also continue to support the present level of aviation activities, unless it can be demonstrated that such uses are no longer financially viable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The Fareham Borough Council Production plan incudes only vestigial references to environmental concerns and climate change remediation and then only in a passive sense. I would like to be able to suggest to the council that as a borough with a coastline they take the environment mmore seriously to avoid future problems not only for residents, but for neighbours.

Paragraph | 1.16

4 Representations

	Legally compliant	Sound	Complies with the duty to co operate
Total	4	4	4
Yes	0 0%	0 0%	1 25%
No	4 100%	4 100%	3 75%

Respondent: Mr Russell Prince-Wright (2711-221013)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

No mention is made of the 2017 unadopted draft Plan and Officers confirm it is the previous, 2015 plan which is extant

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Only refer to the adopted 2015 Local Plan and not the 2017 plan which was abandoned and should not be used for evidence or allocations

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By using the 2015 Adopted Plan the Council could rely on approved facts and not draft information which is not legally compliant or sound

Your suggested revised wording of any policy or text:

The policy will need to refer to the 2015 Adopted Plan only and then throughout the Plan, the facts and evidence should refer to this rather than information from the unadopted 2017 Plan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Richard Jarman (1712-211841)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

No mention is made of the 2017 unadopted draft Plan and Officers confirm it is the previous, 2015 plan which is extant. Para 4.8 Allows the LPA to consider Housing sites allocated in the previous adopted (extant) Local Plan. Yet, whilst HA1 did not feature in the extant 2015 Plan, page 38 ignores this, stating that housing will be provided through HA1 and other local sites. The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number! There is no joined up "Masterplan" for HA1 (with developers working in complete isolation of one another). Therefore, another environmental impact assessment must be conducted showing the cumulative effect of HA1 in its entirety.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reconsider the allocation of housing to Warsash and reconsider redistribution across Fareham. Complete a full environmental assessment for all development in Warsash

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Fairer distribution of housing allocation, with full impact assessment for all proposed development, rather than in isolation

Your suggested revised wording of any policy or text:

No comment

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mrs Jane Wright (412-451119)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.16: No mention is made of the 2017 unadopted draft Plan and Officers confirm it is the previous, 2015 plan which is extant. Para 4.8 Allows the LPA to consider Housing sites allocated in the previous adopted (extant) Local Plan. Yet, whilst HA1 did not feature in the extant 2015 Plan, page 38 ignores this, stating that housing will be provided through HA1 and other local sites. The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

We should take our fair share of housing but no more.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

?

Your suggested revised wording of any policy or text:

18th December 2020

BDL010 / JGC

Dear Gayle

**FAREHAM DRAFT LOCAL PLAN 2037 – PUBLICATION
VERSION**

Response on behalf of Buckland Development Limited

We are pleased to respond to the above consultation on behalf of our clients, Buckland Development Ltd (Buckland). As you are aware, Buckland are the promoters and development managers of Welborne. The Outline Planning Application for Welborne was submitted in March 2017 and is expected to be determined imminently, with reserved matters applications and construction to follow in the coming years. It is in this context we write to respond to the above consultation. We have also responded to the online questionnaire with answers supporting the points raised below.

Welborne, as the single largest site in the Borough, is of strategic importance to Fareham and the wider area as a whole. Buckland are committed to delivering Welborne and the aspirations of the Welborne Plan, as set out in the outline planning application. However, as you will be aware, the draft planning conditions associated with the proposed planning permission include a condition which restricts development at Welborne until funding for the M27 J10 has been secured. The Welborne Outline Planning Application commits £20m of developer funding to the junction improvements.

Since the planning committee in October 2019, the funding situation has worsened, with c. £30m of government funding now being reallocated to other schemes in the region. This leaves an estimated funding gap of c.£50m. Therefore, despite planning permission being imminent, development at Welborne cannot occur until this significant hurdle is overcome. Whilst Buckland generally support the Council's position to not revisit the detailed policies of the Welborne Plan, and consider it sound, consideration must be given to methods to unlock delivery at Welborne, especially given Welborne's role in the development plan, and its importance in ensuring the development plan is sound.

Given the need to deliver substantial infrastructure to support the community, opportunity to reduce the costs of this infrastructure is low. Reviewing the policies and requirements of the Welborne Plan, the only opportunity which gives flexibility to reinvest further development receipts into M27 J10 is to provide 10% affordable housing in the initial phases of development. However, even at

DAVID LOCK ASSOCIATES LIMITED

mail@davidlock.com

www.davidlock.com

lower affordable housing levels within the parameters of Welborne Plan policy (with a minimum requirement of 10% affordable housing and a viability review process to increase affordable housing later in the development programme), Welborne cannot viably support funding an increased M27 J10 contribution. This is evidenced in the viability work undertaken as part of the outline planning application, as presented to planning committee in October 2019, which states that Welborne can only support 10% affordable housing in the initial phases with £20m of developer funding. Should the developer funding increase, the amount of affordable housing which Welborne could viably support will reduce accordingly.

Whilst discussions are ongoing with FBC on methods to overcome these obstacles to Welborne's delivery, consideration must be given to methods to increase flexibility to enable Welborne to be able to deliver homes. This could be through edits to the Welborne Plan requirements, or through the removal of the condition which restricts development at Welborne until funding for the M27 J10 has been secured. This would enable development to start on site, whilst further funding was sought.

The need to unlock delivery at Welborne is paramount, as Welborne is critical to achieving the short- and long-term aspirations of this Local Plan, with a large proportion of FBCs housing requirement (and employment floorspace) expected to be delivered at Welborne within the plan period to 2037. Therefore, **Welborne's delivery is crucial to enable the development strategy of this plan to be considered justified and effective, which is imperative for the plan as a whole to be considered sound.**

On more specific matters, we support the designation of the land to the east of Welborne as a special landscape area (under draft Policy DS3), which is reflective of its local importance and, due to the area's topography, prevents the visual encroachment of the urban area to the open countryside to the north of FBCs administrative boundary. We consider this approach to be both legally compliant and sound.

We also support the position outlined in paragraph 9.30 of the draft plan, in relation to Biodiversity Net Gain requirements, as Buckland are in the process of agreeing a bespoke biodiversity enhancement strategy with FBC, following the provisions of the Welborne Plan. This Strategy which will reflect commitment to the delivery of significant biodiversity enhancement at Welborne, through its comprehensive network of open space and SANGs. Furthermore, it is important to note that these Biodiversity Net Gain requirements are yet to be legislated at a national level, and thus exact provisions and expectations are yet to be set out by Government. Thus, it could be questioned whether Policy NE2 is in fact premature, although this may be resolved depending on the time this plan is examined, and thus can be reviewed in this context by the Inspector at a later date.

Finally, we would also wish to support the viability work which has been undertaken by the Council to underpin this Local Plan. We particularly support the recommendation that a zero CIL rate should be applied to Welborne, given the scale of infrastructure contribution to be provided through the Welborne S106 agreement, and the viability discussions which have been undertaken as a part of the Welborne Outline Planning Application.

We look forward to formal confirmation that these comments have been received and processed. We also look forward to the opportunity to comment on the further phases of consultation on this plan, and are available to attend, and contribute to the local plan examination as required. If you have any questions or queries regarding the points raised in this letter, please do not hesitate to be in touch with me at your earliest convenience.

Yours sincerely

Cc: Alan Mayes
Subject: Fareham local plan should include a new railway station at Welborne

Follow Up Flag: Follow up
Flag Status: Completed

I reiterate my previous comments in the email below. The building of a new railway station on the Western edge of the Welborne site is relevant for the whole of Fareham, not just for Welborne. People in existing housing in North Fareham would be able to use this new station at Welborne including by walking and cycling along the Deviation Line footpath and cycleway.

I support the railway developments proposed and supported in the attached documents

<https://www.networkrail.co.uk/wp-content/uploads/2020/07/Solent-Connectivity-Continuous-Modular-Strategic-Planning.pdf>

<https://democracy.portsmouth.gov.uk/documents/s28560/TT%2029%20Oct%2020%20-%20Solent%20Rail%20CMSP%20report.pdf>

<https://democracy.portsmouth.gov.uk/ieListDocuments.aspx?CId=176&MId=4572>

Decision:

1. Noted the contents of this report
2. Endorsed the CMSP recommended train service specification:
Portsmouth – Southampton: additional 2 trains per hour giving 4 trains per hour; and
Portsmouth – Eastleigh: additional train per hour giving 2 trains per hour.
3. Supported in principle the following CMSP recommended infrastructure measures that will be required in Portsmouth to facilitate the new services:
Agreed the reinstatement of track in platform 2 at Portsmouth Harbour station, bringing the platform back into use; and/or
Agreed the provision of an additional platform at Portsmouth and Southsea station, adjacent to the low-level platforms 3 and 4.

as high quality improvements to public transport services and supporting infrastructure in the Sustainable Transport policy on page 222 of the Fareham Local Plan 2037 as the proposed and supported more frequent train services from Portsmouth to Eastleigh and to Southampton would also serve Portchester, Fareham, Swanwick Stations and a new station at Welborne and provide these stations and Fareham residents with a greatly improved train service to key destinations including Portsmouth, Southampton, Eastleigh and Winchester. The infrastructure improvements in Fareham include making Fareham Station bay platform 2 a through platform, replacing the railway bridge over the A27 immediately South of Fareham Station and conversion of the single track line from Botley Station to Fareham Tunnels to double track. This double tracking of the line would also require a two platform station to be built at Welborne.

Subject: Fareham local plan should include a new railway station at Welborne

The Fareham local plan should include a new railway station at Welborne. This is essential to take enough traffic off the roads in Fareham to avoid severe road traffic congestion. A bus service will not achieve the necessary modal shift to public transport. If people can walk to and from the railway station in Welborne and only have to buy a rail ticket they will take the train. If people have to spend time and money travelling by bus to Fareham Railway Station to take the train they will drive and we shall have severe road traffic congestion in Fareham.

Alan Mayes

APPENDICES:

APPENDIX 1:	LANDSCAPE EVIDENCE
-------------	--------------------

1.0 Introduction / Details

- 1.1** The following representations are made by Pegasus Group on behalf of our clients Bargate Homes Ltd and Sustainable Land. Our clients have interests in an area of land between Newgate Lane and Newgate Lane East (the new relief road) in Peel Common. Applications for outline planning permission (refs. P/18/1118/OA and P/19/0460/OA) have been made at 'Land at Newgate Lane' which together will provide for the development of up to 190 homes. Both applications are currently the subject of undetermined appeals.
- 1.2** Representations have been made in respect of the sites in response to the Regulation 18 consultation on the original version of the draft Local Plan in December 2017, and again in July 2019 and in February 2020 on subsequent consultations for the new Local Plan. The site continues to be promoted through the Local Plan process as it represents a sustainable and deliverable option to deliver much needed housing in this authority.
- 1.3** Our clients are important stakeholders within Fareham and are keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF).
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. The exceptions are questions A (1,2 & 3) and B5 (parts a & b) where a single response at the beginning and end of the representations is provided, respectively. This is because these responses are common to all questions and our representations.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.2 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

2.3 The NPPF (paragraph 33) states that plans should be reviewed every 5 years and updated as necessary. Previously the local planning authority indicated that this local plan review would amalgamate the adopted Local Plan Parts 1, 2 and 3 into a single new plan. Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. Recently, serious doubts have been expressed over whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. Certainly, the development is not currently "deliverable" in NPPF terms.

Taking all of this into account, the Welborne Plan should be reviewed, which it has not (PLP paragraph 4.9). It is also clear that at this stage the Council suggests that it is not intending to review the Welbourne Plan (Local Development Scheme (LDS), paragraph 1.5). Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

2.4 Include a review of the Welborne Plan in this Local Plan review.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.5 Compliance with the NPPF requirement to review plans and provide an up to date framework to ensure housing delivery.

B4c Your suggested revised wording of any policy or text

2.6 Not applicable.

3.0 Strategic Policy DS2: Development in Strategic Gaps

B1 Which part of the Local Plan is this representation about?

- 3.1** The following comments relate to the Policy DS2, the supporting text and the inclusion of our clients' land between Newgate Lane and Newgate Lane East (the new relief road) in Peel Common within this designation.

B2 Do you think the Publication Local Plan is:

Legally compliant – N/A

Sound - No

Complies with the duty to co-operate – N/A

- 3.2** The Fareham Local Plan is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

- 3.3** The PLP, paragraph 3.43, identifies that the:

"...primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities."

- 3.4** The proposed policy seeks to strengthen the current Core Strategy policy position, contained within Policy CS22 with regards to preventing settlement coalescence. It is stated in the PLP this has been undertaken in response to the NPPF and recent planning decisions (paragraph 3.44). The Council's evidence in relation to this policy is contained within the September 2020 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' document. Chapter 2, section 4.2, seeks to apply the NPPF to this policy.

3.5 The interpretation of the NPPF in this section is selective and as such misleading. For example in referencing paragraph 20 of the NPPF it states:

"Strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for... conservation and enhancement of the natural, built and historic environment, including landscapes."

3.6 This fails to recognise that strategic policies should also set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for housing (including affordable housing), employment, retail, leisure and other commercial development. The Council's evidence also refers to paragraph 170 of the NPPF noting:

"planning policies and decisions should contribute to and enhance the natural and local environment by... protecting and enhancing valued landscapes... (in a manner commensurate with their statutory status or identified quality in the development plan)".

3.7 It must, however, be recognised that the strategic gaps do not have any statutory status therefore shouldn't be unduly restrictive. A tightening of restrictions would be contrary to the NPPF. The policy does identify that development can be accommodated within the Strategic Gap. Indeed, the previous iteration of the plan identified site HA2 and Strategic Growth Areas within the Fareham – Stubbington Strategic Gap. Thus, suggesting that development in the gap is not prohibitive per se.

3.8 Within our representations on the draft Local Plan Supplement we argued the evidence base lacks robustness and has been applied without justification. The updated evidence does not overcome these concerns. Our clients site is situated within parcel 8c of the updated evidence. The study suggests that despite the proximity of Fareham and Gosport in the north part, the gap is currently still effective in providing a 'sense of separation', but it is at risk. It is further noted at point 15 that;

"Whilst the recently completed Newgate Lane South road development does not alter the experience of entering the urban area of Gosport beyond the Peel Common Roundabout, it does reduce tranquillity and bring more built features

(such as noise attenuation barriers) into this part of the gap.”

- 3.9** Despite this significant development, the ‘Technical Review of Areas of Special Landscape Quality and Strategic Gaps’ simply re-iterates previous conclusions from earlier analysis undertaken by LDA and described in the Fareham Borough Landscape Character Assessment, 2017. There is no consideration as to how the development of Newgate Lane South has altered the area. Clearly, the new highway has added a substantial urbanising influence upon the gap, this should be assessed. The blanket approach taken within the policy does not recognise these substantial changes.
- 3.10** Within our client’s appeal evidence in relation to applications P/18/1118/OA and P/19/0460/OA we provide evidence in relation to landscape and visual matters. This evidence takes full consideration of the strategic gap and identifies that Peel Common is not well defined as a coherent area of settlement character due to the fact the settlement appears to be based on the progression of wayside and ribbon development since the early twentieth century. It also notes that the amenity value of the area has altered since the completion of Newgate Lane East. It was concluded that this parcel makes a limited contribution to the wider context of the strategic gap.
- 3.11** The protection of the Strategic Gap is currently governed by policy CS22 of the Core Strategy, which does not permit development where it significantly affects the integrity of the gap. The policy provides a useful starting point for considering the purpose of strategic gaps. It states:
- 3.12** *“Their boundaries will be reviewed in accordance with the following criteria:*
- a) The open nature/sense of separation between settlements cannot be retained by other policy designations;*
 - b) The land to be included within the gap performs an important role in defining the settlement character of the area and separating settlements at risk of coalescence;*
 - c) In defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation.”*

3.13 Taking each of these key criteria in turn:

Openness and sense separation

3.14 Although the proposed development site is a greenfield site within the countryside, it would not represent isolated development. The site is located to the west of the settlement of Bridgemarky. The development will become a cohesive part of the Bridgemarky neighbourhood through the provision of key pedestrian links and local facilities (open space and children's play areas) for the benefit of the wider community.

3.15 The site is bounded by Newgate Lane East to the east. To the west it is bounded by Newgate Lane, which is the focus of ribbon development, and beyond this the Peel Common Waste Water Treatment Works and solar farm. If the site is not developed, then it will be an open pocket of land between the two roads within an otherwise urbanized landscape, which in our view is of inherently less value in terms of its contribution to the strategic gap.

3.16 It is notable that the Council's evidence 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' identifies the Peel Common Waste Water Treatment Works to provide a strong physical and visual gap between Gosport and Stubbington (Area 8b), and to a lesser extent so does the Solar Farm. This physical and visual gap would not be affected by development on our clients' sites.

3.17 The Council's evidence also identifies that a Green Infrastructure (GI) Strategy or Framework would be beneficial to enhance the GI value of the current gap and potentially help determine an appropriate GI framework for moderately scaled development. Our clients' proposals would enhance the provision of GI through the provision of on-site open space and pedestrian linkages. It should be noted that due to the site being within private ownership there is currently no public right of way connectivity, such that it has no real functional value as GI other than its contribution to a wider landscape setting.

3.18 As such, although the development of the site would necessarily have an urbanizing effect on the existing open land, good growth could be achieved without compromising the gap between the existing urban edge of Fareham/Bridgemarky and Stubbington.

Defining the Settlement Character and Preventing Coalescence

- 3.19** The character of the site and surrounding area is defined by both the natural and built environment, having regard to the landscape setting in which it sits.
- 3.20** The development of the site, by extending the boundary of the Fareham/Gosport built-up area would not have the effect of coalescence with Stubbington. The settlement character of Bridgemary is distinct from that of Stubbington. Whilst both are characterized by large areas of low-rise, medium-density development from the late-20th century (and in the case of Bridgemary also from the pre-war era), the development of Bridgemary as a suburban extension of Fareham/Gosport lends it a different character compared with Stubbington's growth as a distinct village with a more extensive local centre.
- 3.21** The remaining Strategic Gap will still achieve a 'green' gap between the two settlements such that the distinct identities of the two settlements are reinforced by their physical and visual separation.

Extent of Gap Required

- 3.22** Most obviously, the development of the Land at Newgate Lane would retain a 'green' gap between the two settlements. The extent of this gap remaining is sufficient to prevent coalescence in line with the policy consideration in Core Strategy Policy 22.
- 3.23** This green gap will also help to retain the physical and visual separation of the settlements, an effect which will be further enhanced by the introduction of the Stubbington By-Pass which will serve to sever them further. The location of Land at Newgate Lane is not within the 'pinch point' between Fareham and Stubbington. Further north, the Strategic Gap between the two settlements narrows, and an extension to Fareham in this location would reduce the gap to a much greater degree or eliminate it. This makes Land at Newgate Lane a preferable development location than sites north of Peel Common/West of Fareham in terms of impact on coalescence.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

- 3.24** The policy and proposals map should be amended to either exclude our client's site from the strategic gap or it should be identified as a location which could accommodate sensitive development.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 3.25** It would be justified by the evidence and would assist the Council in achieving an appropriate housing requirement.

B4c Your suggested revised wording of any policy or text

- 3.26** See response to B4a above.

4.0 Policy H1: Housing Provision (including supporting text)

B1 Which part of the Local Plan is this representation about?

4.1 Policy H1: Housing Provision and all supporting text.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

4.2 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective, positively prepared or justified.

B3 Please provide details you have to support your answers above.

4.3 The PLP has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in the "Changes to the Current Planning System"; but instead has published a revised approach to the standard method, which retains the method in its current form except for London and 19 of the most populated cities and urban centres.

4.4 The key change is to apply a 35% uplift to the standard method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

- 4.5** The National Planning Policy Framework (NPPF) states (paragraph 16 a) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on a consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 4.6** The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives.
- 4.7** The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the extant local housing need target is 514 homes per annum (hpa). Instead, the PLP plans for 403hpa, thereby failing to plan for the area's objectively assessed need and failing to contribute to the achievement of sustainable development.
- 4.8** The PPG (ID 2a-003-20190220) is clear that the current standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).

- 4.9** As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current standard method must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 4.10** The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure. However, given that there is no change for Fareham this is irrelevant.. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on a figure of 403hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.
- 4.11** It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities, as set out in a statement of common ground, is one reason why local housing need calculated using the current standard should be exceeded.
- 4.12** Paragraph 4.4 of the PLP states that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". However, in response, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. This produces an overall plan requirement of 7,295 dwellings, equivalent to 456hpa. The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "*...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution.*" It is not clear how this "general contribution" has been calculated but it appears inadequate.

4.13 Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no statements of common ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather, the Council speculates that this contribution would be “ratified” by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented suggests a higher requirement of 1,000 dwellings from a single authority.

4.14 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, which fundamentally means that the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure “to support the Government's objective of significantly boosting the supply of homes” (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4.15 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification.

Phased Provision

4.16 In addition to the issues with the overall requirement, Policy H1 also seeks to identify a ‘phased’ requirement. The overall supply is at least 8,389 dwellings this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required. Policy H1 seeks to ‘phase’ this supply identifying the following:

- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
- Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,
- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

4.17 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

4.18 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

4.19 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now and to do otherwise is not justified or effective.

Housing Supply

4.20 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27

junction 10.

4.21 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4-years¹. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

4.22 Our client's sites, SHLAA references 3129 and 3161, should be considered for allocation. Both sites are sustainable being well located in terms of accessibility to services, facilities and employment. They also have good access to public transport opportunities. Furthermore, whilst the sites are located within the Fareham – Stubbington Gap, there are no unsurmountable specific statutory or non-statutory landscape related planning designations.

4.23 The SHLAA identifies that both sites are discounted because:

"Development in this location would not be in keeping with the settlement pattern and would change the settlement character of Peel Common. The site is therefore considered unsuitable for residential development."

4.24 Our clients fundamentally disagree with these points. This is discussed in greater detail within our response to Policy DS2 above. However, in summary the sites are well located in relation to the settlement of Bridgemary and our evidence identifies that development in this location would have a limited impact due to the recent completion of the Newgate Lane East site. The proposals could also enhance the strategic gap through the provision of appropriate Green Infrastructure.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

4.25 The following amendments are necessary to ensure that the plan is legally compliant and sound.

¹ APP/A1720/W/19/3230015

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Undertake SA of all reasonable alternative housing requirements.
5. Provide a housing requirement which is not phased and meets needs now.
6. Provide additional allocations, including our clients, which can deliver in the short-term.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 4.26** Compliance with the NPPF requirement for the housing requirement to be based upon current local housing need standard method as a minimum. To comply with relevant legal and procedural requirements.

B4c Your suggested revised wording of any policy or text

- 4.27** Not applicable, as this will be dependent upon the outcome of the work identified in response to question B3.

5.0 Policy HP4: Five-Year Housing Land Supply

B1 Which part of the Local Plan is this representation about?

5.1 The following comments relate to Policy HP4 and all supporting text.

B2 Do you think the Publication Local Plan is:

Legally compliant – N/A

Sound - No

Complies with the duty to co-operate – N/A

5.2 The Fareham Local Plan is unsound as it is not effective or justified.

B3 Please provide details you have to support your answers above.

5.3 Whilst the principle of the policy is supported the current wording is considered contrary to its stated purpose. The supporting text identifies that this policy is required to provide flexibility if a five-year housing land supply cannot be demonstrated. However, in accordance with the NPPF, paragraph 11d, in such cases the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply.

5.4 It is therefore not justified to seek to apply additional requirements upon developments should a five-year supply not be demonstrable. For example, the requirement for the scale of the site to be relative to the shortfall is not only unclear but could be prohibitive of sustainable sites being brought forward. Furthermore, many of the criteria are replicated from other policies and as such are superfluous.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

5.5 A more positive policy is justified. Parts a, c, d and e should be deleted to avoid repetition and conflict with the NPPF.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

5.6 See above.

B4c Your suggested revised wording of any policy or text

5.7 See above.

6.0 Participation at the examination hearing sessions

B5a If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

6.1 Yes, I want to take part in the hearing sessions.

B5b Please outline why you consider it necessary to take part in the hearing session(s):

6.2 There are several detailed and complex points made within our representations which would benefit from further debate and consideration. It is also important that our clients can respond orally to hearing statements made by the Council and other participants to ensure that the Inspector has a full understanding of our case.

APPENDIX FL&HB 1.2.3	Extract from the 'Technical Review of AoSLQ and Strategic Gaps'
APPENDIX FL&BH 1.2.4	Landscape Analysis of the Strategic Gap

1. INTRODUCTION

Qualifications and Experience

- 1.1. My name is James Atkin. I hold the position of Director (Landscape) in the Birmingham Office of the Pegasus Group. The Company undertakes all aspects of planning, urban and landscape design and environmental planning. I have a Bachelor of Science Degree in Landscape Design and Plant Science and a Diploma in Landscape Management, both from the University of Sheffield. I am also a Chartered Member of the Landscape Institute (2005).
- 1.2. I have over 19 years professional experience specialising in the application of landscape and visual assessment and the use of best practice guidance. I have authored landscape and visual impact appraisals, assessments and evidence, both in the UK and in the international context.
- 1.3. Prior to joining the Pegasus Group I have worked in multidisciplinary consultancies, including Wardell Armstrong LLP and Atkins, advising on landscape and visual matters across a range of sectors including power, highways, rail, housing, waste, land reclamation and restoration, mineral extraction, commercial developments and renewable energy.
- 1.4. Since joining the Pegasus Group I have completed a number of detailed LVIA's for sites across the UK, including residential development and mixed use development schemes, care home developments, solar installations and commercial development. As an inherent part of this work I apply an iterative process of landscape and visual appraisal and assessment to inform masterplanning principles which avoid or respond to landscape and visual constraints and opportunities.
- 1.5. In this context I have produced technical documents on landscape and visual matters for use in the emerging design process, for planning applications and at appeal. I am currently involved in a variety of projects for mixed use and residential masterplans, of varying scales between 10 and 1000 units, in both urban and urban fringe environments, where matters of sensitive and designated landscapes are key considerations. The diversity of these different project types has enabled me to develop a strong understanding as to how different landscapes can respond to different types of development.

Terms of Reference

- 1.6. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 1.7. The outline application for 'Land at Newgate Lane (North) (Fareham Land LP; LPA ref. P/18/1118/OA) sought permission for:
- The demolition of existing buildings and development of up to 75 dwellings, open space, vehicular access point from Newgate Lane and associated and ancillary infrastructure, with all matters except access to be reserved.
- 1.8. The outline application for 'Land at Newgate Lane (South) (Bargate Homes Limited; LPA ref. P/19/0460/OA) sought permission for:
- The demolition of existing buildings and development of up to 115 dwellings, open space, vehicular access point from Newgate Lane and associated and ancillary infrastructure, with all matters except access to be reserved.
- 1.9. These are referred to as the 'northern' site and the 'southern' site respectively.
- 1.10. Whilst the two sites are subject of separate applications, it is important to note that the proposals have always been conceived as a cohesive development, together addressing the constraints and opportunities in respect of the local landscape context and providing a cohesive and complementary strategy for development and mitigation.
- 1.11. The evidence presented herein applies to both appeals, unless specifically stated otherwise.
- 1.12. Each application was supported by a Landscape and Visual Impact Assessment (LVIA), prepared by Pegasus Group on behalf of the appellants. Reference is made to the content and findings of these where relevant, supplemented by additional professional judgement as necessary.

Evidence Structure

- 1.13. The evidence is structured as follows, including this introduction (section 1):
- At section 2, I give a brief description of the appeal sites in their context, and the appeal scheme, including an analysis of constraints and opportunities and development potential (based on my own observations and judgement);
 - At section 3, I present a brief background to the appeal, including a summary of the Council's reasons for refusal where these are relevant to landscape and visual matters;
 - At section 4, I address the key issues in the reason for refusal in respect of landscape and visual matters, and present additional analysis of these;
 - At section 5, I address policies relevant to landscape and visual matters; and
 - At section 6, I provide a summary and conclusions.
- 1.14. Principles and good practice for undertaking landscape and visual impact assessment (LVIA) and/or applying the principles of LVIA are set out in the Landscape Institute (LI) and the Institute of Environmental Management (IEMA) Guidelines for Landscape and Visual Impact Assessment, Third Edition (2013)¹ (GLVIA3). The concepts and procedures set out in this guidance have been adopted where appropriate.
- 1.15. The professional judgements which are presented in this evidence for this appeal (reference LPA reference P/18/1118/OA and P/19/0460/OA) have been prepared in accordance with the guidance of my professional institution. I confirm that the opinions expressed are my true and professional opinions.

¹ Landscape Institute and Institute of Environmental Management and Assessment, Guidelines for Landscape and Visual Impact Assessment 3rd Edition (April, 2013)

2. THE APPEAL SITES

2.1. This section sets out an overview of the appeal sites and their context.

Overview

- 2.2. Together, the appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham and Gosport and within a discreet parcel of land that is bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east (with Newgate Lane and Newgate Lane East framing the northern edge of the sites also).
- 2.3. Hambrook Lodge (accessed from the west, off Newgate Lane) Lodge and its curtilage is located between the two sites, but the property (and the access to the property) is not included in the red line boundary for the sites.
- 2.4. The appeal sites are located outside the defined settlement boundary identified in the Local Plan policies map, in a 'Strategic Gap' known as the Fareham/Gosport to Stubbington/Lee on Solent Gap (or simply the Fareham - Stubbington Gap).
- 2.5. They are not subject to specific statutory or non-statutory landscape related planning designations.

Description and Context

- 2.6. The sites are located between Fareham and Gosport, adjacent to the suburbs of Woodcot and Bridgemary which are located to the east and adjacent to Peel Common which is located to the west.
- 2.7. The northern site comprises three enclosures, the largest of which is currently in arable production, the smaller two are in pastoral use. These cover an area that surrounds the northern extent of Hambrook Lodge which itself includes a number of related buildings (some dilapidated) and is generally enclosed by mature vegetation.
- 2.8. The southern site comprises four mixed use agricultural enclosures, the fields to the east are currently in arable production, whilst the field to the west, adjacent to Peel Common and Newgate Lane are in use as pastoral and equestrian paddocks. A small watercourse and drainage ditch bisects the southern site and reinforces the differentiation between the land uses of the eastern and western areas.

- 2.9. Newgate Lane is located immediately to the west of the sites and forms a connection with the southern edge of Fareham and, further south Gosport Road (noting that this is closed to traffic but retains a link for pedestrians and cyclists). Immediately to the east is the route of the new relief road, Newgate Lane East. Newgate Lane East is accessed from Newgate Lane by a T-junction, situated just north of the northern parcel.
- 2.10. The wider landscape context is set within the low-lying ground of the coastal plain landscapes and characterised by abrupt transitions between the open landscapes of the coastal plain and the urban environments which abut these. These urban areas include Fareham, Gosport and Woodcot and Bridgemary to the north and east. The settlement area of Stubbington, a medium scale, predominantly residential area is located to the west. The settlement edge of Stubbington forms the western extent of the Fareham to Stubbington strategic gap. In this context the strategic gap comprises an area of open landscape that extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.

Recent Landscape Change

- 2.11. The LVIA reports submitted in support of the planning applications were prepared and finalised in late 2018. These included reference to the published landscape character study for the Borough (The Fareham Landscape Assessment, 2017) which was prepared by LUC on behalf of Fareham Borough Council (FBC) and forms part of the evidence base to the current Local Plan.
- 2.12. The appeal sites are located in an area defined by the LUC study as 'LCA 8, Woodcot-Alver Valley' (including sub areas 08.1a and 08.2b). In relation to 'LCA 8, Woodcot-Alver Valley', the LUC study acknowledges the emerging proposals of the Fareham bypass (Newgate Lane East) and potential strategic housing development on the edge of Woodcot/Bridgemary (parcel HA2) and the landscape change that these may bring.
- 2.13. Since the publication of the LUC study (and submission of the Pegasus Group LVIA work) the proposals for Newgate Lane East have been constructed and the route has been open to traffic since April 2018; the majority of landscape works were completed in the 2018/19 season.
- 2.14. Although both the LUC study and the assessment of impacts undertaken in the submitted Pegasus Group LVIA make reference to the potential bypass and how it will

influence the local landscape, there is now scope to consider the actual and current baseline situation.

3. BACKGROUND TO THE APPEAL

3.1. The background to the proposal is set out in full, in the main Statement of Case, prepared by Pegasus Group on behalf of the appellant. This section provides a brief overview of the background relevant to landscape and visual matters.

Application

3.2. The applications were submitted in September 2018 (north) and April 2019 (south), with each supported by a separate Landscape and Visual Impact Assessment, prepared by Pegasus Group (**CDA.48** and **CDA.106**).

3.3. In respect of both appeal sites, landscape and visual matters formed part of an iterative design process that guided the evolution of the masterplans and integration of mitigation measures into the schemes.

3.4. For both sites, the submitted LVIA work demonstrated a limited effect on landscape character, whereby impacts are restricted to a local level.

3.5. The work also demonstrated that the proposed developments would not detract from the function of the wider strategic gap, both due to the inherent character of the landscape itself, and also due to the physical and visual separation that is present between the sites and the more obvious and open part of the strategic gap between Peel Common and the eastern edge of Stubbington.

3.6. For views and visual amenity, the submitted LVIA work also demonstrated that the sites (and proposed developments) would be generally screened by existing development and existing mature vegetation, the influence of both being augmented by the low lying and relatively flat nature of the landform. Prominent views of the sites would only be available from its immediate context along Newgate Lane and Woodcote Lane with the greatest degree of visual effect from locations immediately adjacent to the sites, and from a small number of existing individual residential properties, again, located close to (or adjacent to) the site. Together, and in the balance of landscaped and visual matters overall, these impacts and effects are were not considered significant in landscape and visual terms.

3.7. During the process of the application, further design changes have occurred; these either maintain or improve the proposed mitigation which forms an inherent part of the schemes.

Further Landscape and Visual Studies

- 3.8. Since the submission of the planning applications, the LPA has continued with the development and review of the Local Plan.
- 3.9. In previous iterations, notwithstanding the continued adoption of 'Strategic Gap' policies in this part of the Borough, the emerging local plan proposals had identified a 'Strategic Growth Area' situated across the landscape between Stubbington and Fareham, overlapping with a large part of the retained Strategic Gap. This had also indicated the inclusion of a housing allocation (HA2) on the southern edge of Fareham.

Plate 1: Extract from Fareham Draft Local Plan 2036 Supplement

- 3.10. In that previous iteration, the boundary of the Strategic Gap had been drawn to extend up to the settlement edge of Bridgemary (whilst incorporating the proposed housing allocation of HA2 and the recently constructed New Newgate Lane). In contrast, the Strategic Growth Area had been drawn to an eastern limit up to the existing waste water treatment works and the solar farm that are present to the south-west of the edge of

Fareham, noting that the extent of that boundary would exclude both appeal sites and exclude the emerging HA2 allocation.

- 3.11. Notwithstanding that the Fareham Landscape Assessment (LUC, 2017) forms part of the evidence base for the policy proposals, it was necessary to address the purpose and function of the gap and the proposed area of strategic growth.
- 3.12. In order to address this issue, Pegasus Group undertook a strategic level study of the Fareham-Stubbington Strategic Gap, including the area up to the Gosport boundary (**CDA.54**).
- 3.13. The aim of that study was to identify the core areas of Strategic Gap which were considered more fundamental to the function of the Strategic Gap in terms of preventing coalescence between settlements and maintaining of settlement identities. The study identified 'Priority Areas' that should be maintained as Strategic Gap, with areas outside of these considered further for growth.
- 3.14. The study concluded that areas on the northern and western edges of Stubbington and at Fareham (along Longfield Avenue and between Peel Common and Woodcot/Bridgemary) can accommodate growth and that development in these areas would not fundamentally undermine the physical separation, nor the sense of separation between Stubbington and Fareham.
- 3.15. During the course of the appeal FBC continued to progress their Local Plan. The evidence base to the latest draft Local Plan 2036 included a 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' (2020) undertaken by Hampshire County Council on behalf of FBC (**CDG.7**). The content and findings of this study are considered later in my evidence.

Consultation Responses

- 3.16. A summary of the main relevant consultation responses to the application are set out in the following section.

Urban Design, Fareham Borough Council

- 3.17. The response from FBC on landscape and visual matters was prepared by the Urban Design officer (4th February 2019) (**CDB.5a**). These comments were limited to the northern site and broadly suggested that the proposed development would have an

'unacceptable negative impact upon the integrity of the existing open, predominantly rural agricultural character', of the landscape'.

- 3.18. However, it was felt that the conclusions of the consultation response did not sufficiently consider the (then) emerging baseline of Newgate Lane East and potential strategic development site (HA2), consequently the response overemphasised the degree of impact arising from the scheme.
- 3.19. In this context Pegasus Group prepared a comprehensive response to address the points raised (refer to **CDA.41**).
- 3.20. In a separate, later, response, the Urban Design officer requested that the layout be reworked to make a 'less formal block structure' (**CDB.5b**). These comments were addressed in revisions to the LVIA and ILMP, which were resubmitted as LVIA Rev D (**CDA.48**).

Principal Tree Officer, Fareham Borough Council

- 3.21. No objection is raised in response to trees, with the tree officer noting that 'the illustrative masterplan shows the developable area with the majority of the existing field boundary trees and hedges retained and incorporated into public green space' and concluding that 'the principle of development within the area shown is broadly acceptable in arboricultural terms'.

Gosport Borough Council

- 3.22. Gosport Borough Council (GBC) have objected to the applications, noting issues of the strategic gap and green infrastructure.
- 3.23. In relation to the first point, GBC suggest that the 'scale and location will undoubtedly harm the integrity of the gap and will diminish the physical and visual separation of the settlements.
- 3.24. GBC go on to suggest that the sites would diminish the opportunities to make the 'optimum use' of green infrastructure, and particularly in providing green linkages from Fareham to the coast via the Alver Valley Country Park.

Natural England

- 3.25. The response from Natural England refers to green infrastructure provision, noting that the development is within in area that could benefit from enhanced green infrastructure provision.
- 3.26. In relation to landscape, the Natural England response notes that the proposal does not appear to be within, or within the setting of, any nationally designated landscape but also notes that proposals should complement, and where possible enhance, local distinctiveness, as guided by relevant landscape character assessment for the Borough.

Environment Agency

- 3.27. Further design changes to the masterplan were implemented in response to consultation comments from the Environment Agency and their provision of up to date flood map data.
- 3.28. This resulted in amendments to the southern appeal site and removal of a parcel of proposed development from an area to the west of the watercourse.
- 3.29. An LVIA addendum (**CDA.119**) was prepared that addressed the minor design change, along with the iteration of the Illustrative Landscape Masterplan.

Officers Reports to Committee

- 3.30. Appeals against the non-determination of the applications were submitted to the Planning Inspectorate, and the Council were notified in June 2020 as to the validity of these.
- 3.31. A report was prepared for Members which confirmed the position of the Council in respect of the case that would be presented at a forthcoming appeal, and inviting Members to confirm the decision that they would have made, had they been able to determine the planning application.
- 3.32. In both instances (north and south sites) the reports confirm that they would have refused the application.
- 3.33. The reports to committee set out a brief summary of the consultation responses received under several sub-headings (**CDC.1** and **CDC.2**). Those relevant to landscape and visual matters are summarised as follows:

Principle/location/policy issues

- Located in strategic gap;
- Loss of countryside;
- Impact on character of the 'new' Newgate Lane and the 'old' Newgate Lane;
- Impact on "green belt" (notwithstanding that the site is not in fact in an area defined as green belt);
- The site is not 'well integrated' contrary to policy DSP40;
- Loss of green land and linkages; and
- Impact on landscape.

Strategic Gap

- Impact on the strategic gap;
- Coalescence of Fareham and Gosport;
- The proposed development will not strengthen the strategic gap; and
- Development in the strategic gap will set a precedent for further development.

Environment

- Loss of green/open space and loss of agricultural land; and
- Impact on ability to make optimum use of green infrastructure, including providing green linkages from Fareham to the coast.

3.34. The report includes reference to a petition entitled 'Stop building in the Fareham/Gosport Strategic Gap' that was published in August 2020 and refers to several points in respect of landscape and visual matters and the strategic gap.

3.35. The main issues raised in respect of landscape and visual matters are set in the context of Local Plan Policy DSP 40 (paragraphs 8.32 to 8.61 of the North committee report and 8.31 to 8.6 of the South committee report).

3.36. The applications were subsequently refused (24th June 2020) (**CDC.4**) with the reasons for refusal as listed in the reports to committee. The overarching reason for refusal state that:

3.37. *"The development is contrary to Policies CS2, CS4, CS5, CS6, CS14, CS15, CS16, CS17 and CS22 of the Adopted Fareham Borough Core Strategy 2011 and Policies DSP6, DSP13 & DSP40 of the Adopted Local Plan Part 2: Development Site and Policies Plan, paragraphs 103, 109 and 110 of the NPPF and is unacceptable in that:*

- 3.38. For the southern site this is identical, save for the omission of reference to Policy CS16.
- 3.39. *"The development is contrary to Policies CS2, CS4, CS5, CS6, CS14, CS15, CS17 and CS22 of the Adopted Fareham Borough Core Strategy 2011 and Policies DSP6, DSP13 & DSP40 of the Adopted Local Plan Part 2: Development Site and Policies Plan, paragraphs 103, 109 and 110 of the NPPF and is unacceptable..."*
- 3.40. More specific reference to landscape and visual matters is made in the following reasons for refusal (noting that these are repeated for both the north and south sites):

- b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;*
- c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;*
- d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;*

- 3.41. On review of the consultation responses, reports to committee and relevant reasons for refusal, several common themes are apparent in respect of landscape and visual matters. These are summarised as follows:
- Issue 1A: What are the key characteristics of the site and its immediate context and how have the schemes responded to these in terms of mitigation?
 - Issue 1B: The degree of impact on the key characteristics of the site and its immediate context and the extent to which these can be considered as harmful.
- 3.42. These matters are effectively addressed in the submitted landscape and visual impact assessments which set out a comprehensive baseline for the site and the local landscape context, including an assessment of the impact and approach to mitigation. I will return to these documents in later sections of my evidence.
- Issue 2: The purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap.

-
- 3.43. During the course of the application a 'strategic landscape and visual appraisal' of the strategic gap was prepared to identify the role and function of the strategic gap, variations therein, the core areas and also how the strategic gap could be maintained whilst accommodating the strategic growth in the area. I will return to the gap study in later sections of my evidence.
- Issue 3: The context of the application sites in relation to the existing urban settlement edges/boundaries.
- 3.44. This issue is also touched upon in the submitted landscape and visual impact assessments in terms of the local landscape context to the appeal sites. I will return to the relevant findings of the LVIA reports in later sections of my evidence.
- 3.45. I consider these issues in the following sections, along with the different parts of the reason for refusal, thereafter drawing my conclusions.

4. ANALYSIS OF LANDSCAPE AND VISUAL MATTERS

4.1. In this section I set out an analysis of landscape and visual matters. I have presented the analysis under the broad topics raised in the reason for refusal, with reference to the key issues identified in the previous section of my evidence.

Reason for refusal b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside.

Landscape character and key characteristics

4.2. The reasons for refusal suggest that the proposed development fails to respond positively to, and be respectful of, the key characteristics of the area. In this section I set out the key characteristics relevant to the local landscape character, including reference to published guidance, but also with reference to recent landscape change that has resulted from the relatively recent completion of the new bypass, Newgate Lane East.

4.3. Landscape character for the area is defined by the 'Fareham Landscape Assessment', with the sites being located in the 'Woodcot/Alver Valley landscape character area, sub areas 08.1a for the northern site, and 08.1 and a small part of 08.1b for the southern site (relevant extracts are included in **Appendix FL&BH 1.2.1**). Peel Common, along with adjacent residential areas and remnant parts of the landscape up to the edge of Gosport, are also included in the same LCA; by contrast, the landscape between Fareham and Stubbington (including the wastewater treatment plant and solar farms) are located within the adjacent area of LCA 7, the Fareham/Stubbington Gap. There is a clear difference in the character between these areas that is based on the scale and pattern of the landscape, land use, enclosure landscape, and the degree of influence of the settlement edge along with urbanising influences.

4.4. The key characteristics of the relevant LCAs are considered in the baseline of the submitted LVIA (para 4.34, **CDA.48 and CDA.106**) and consequently informed the analysis, constraints and opportunities, and ultimately the landscape strategy for the mitigation that is included as an integrated part of the two masterplans for northern and southern schemes.

4.5. Greenfield development retains an inherent impact on the physical landscape, but it is possible to bring development forward in a positive manner that addresses landscape and visual constraints. The appeal schemes do so. Where this positive approach is

adopted, the perception of those physical impacts in terms of landscape character are also minimised, also something that the schemes achieve.

- 4.6. In respect of the key characteristics the Fareham Landscape Assessment (FLA) notes that 'key characteristics aim to improve understanding of the how places are distinctive and different from one another, rather than being an appraisal for areas that are 'better or worse'. It is the second and third sections of the FLA that address Landscape Sensitivity and the designations review that address matters of value, sensitivity and designations.
- 4.7. Key characteristics are defined in the 'Landscape Character Assessment' section of the FLA. For the Woodcot/Alver Valley (LCA8) the FLA notes that (FLA, page 62):
- 4.8. *"The Alver Valley also forms part of the strategic gap separating Fareham and Gosport but it is very different in character and scale from the open farmed landscape to the west. It comprises a mixed pattern of wooded common, small-scale pasture and ribbon development along the corridors of the River Alver and Newgate Lane and is bounded to the east by the urban edge of Gosport and to the north by the outskirts of Fareham."*
- 4.9. This sets out a clear distinction between the landscape context of the site, and the wider strategic gap area to the west and north-west, between Fareham and Stubbington. The description of the LCA also establishes the influence of the urban fringe; from the edge of Gosport, edge of Fareham, but also from ribbon development in the LCA (as reflected by the character of Peel Common). These influences should be considered in the appraisal of the appeal sites in the context of the local landscape.
- 4.10. The LCA defines several 'essential characteristics'. These are set out in the following table, set against a brief description as to how the appeal schemes would influence these or has responded to these.

Table 1: Summary of essential characteristics of the Woodcot/Alver Valley and anticipated change

Essential characteristics of the Woodcot/Alver Valley	Influence on landscape and design response
A mosaic of small and medium scale fields at Woodcot, forming a mixture of small horse-grazed pasture and larger arable fields divided by fences, ditches and gappy hedgerows;	<p>The scale and pattern of fields contribute to a more enclosed landscape.</p> <p>Grazed pasture, equestrian uses are not always positive aspects of the landscape and can be seen as detracting components of a landscape, driving needs for enhancement.</p> <p>Development and landscape strategy generally works within the scale of the existing field pattern aiming to</p>

	<p>limit overall 'massing' by working within the existing enclosures.</p> <p>This has an added benefit that vegetation is retained and subsequently enhanced through programmes of supplementary planting and longer term management.</p> <p>As part of the overall green infrastructure strategy for the appeal schemes, the sites can provide additional and reinforcement planting to hedgerows with additional tree planting also.</p>
<p>Although this area forms the upper part of the Alver Valley it lacks a distinct valley character;</p>	<p>A 'valley' landform is not pronounced here, reinforcing that this part of the landscape is a transition between the more distinct valley to the south-east and the flatter, slightly undulating plain to the west.</p> <p>This reinforces the nature of boundaries between character areas that they are rarely fixed along a defined alignment and instead tend to form a 'merging' or transition.</p>
<p>The hedgerow pattern is gradually replaced by scrubby woodland to the south, enclosing Chark Common and the golf course;</p>	<p>The hedgerow network is a stronger characteristic of the appeal sites and their context, with this network forming much of the green infrastructure framework.</p> <p>Newgate Lane East has impacted on the network to a degree, severing the hedgerows and field patterns in some parts of the landscape, particularly in proximity to the eastern edge of the appeal sites.</p> <p>The appeal schemes incorporate the hedgerow network as part of the overall masterplan, using this landscape component to guide the scale and form of the development envelope. There are likely to be some limited losses in parts of the appeal sites but retention, management and additional planting can mitigate these losses.</p>
<p>The character is influenced by the busy road corridor and the urban characteristics of Peel Common and Solent Enterprise Zone at HMS Daedalus on one side and the urban edge of Bridgemary on the other.</p>	<p>In the local landscape context of the appeal sites, urban influences and the settlement fringes are generally a prominent feature and, given the appeal sites and the surrounding undeveloped landscape areas do not exist in isolation, these urban edges do have an influence on the local landscape character.</p> <p>Newgate Lane East and its associated infrastructure (including prominent acoustic fencing, road junctions and crossings) have further influenced local landscape character, drawing the urban influence into the landscape between Peel Common and Gosport (at Bridgemary).</p> <p>The acknowledge landscape impact largely relates to the introduction of residential development into the appeal sites. However this will be congruent with the settlement pattern of Peel Common due to the placement and relationship between the appeal sites to Peel Common (along Newgate Lane) and the contained to the east and north by the alignment of Newgate Lane East.</p> <p>There also remains the existing connection between Peel Common and the edge of Gosport at Bridgemary, whereby the settlement pattern is connected by</p>

	existing properties along Woodcote Lane and the amenity land use of Brookers Field Recreation Ground (which is suburban in its character and contrasts to the agricultural land uses).
--	--

- 4.11. Overall, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement. Further details are described in the following sections.
- 4.12. In relation to the scale of the field patterns (and scale of the landscape), this has been used to guide the scale and pattern of the development areas on site. Field boundaries and parcels of development have been formed within the field patterns and their boundaries consequently breaking down the massing of proposed development. Notwithstanding the change in land use from agricultural fields to residential development, this approach to mitigation does draw on and reflect the key characteristics. Furthermore, the scale of development is consistent with the types of existing residential area that are present in the surrounding context, the appeal sites being subservient to the stronger and larger scale residential edges of Fareham and Gosport and also being compatible with the adjacent settlement area of Peel Common.
- 4.13. In respect of the landform, the proposed development will not unduly influence this characteristic; a characteristic which is not necessarily distinctive in any respect. The landform of the site in its context is not reflective of the broader Alver Valley and, I consider, shows part of a transitional area of topography that emerges from the valley and up toward the undulating plain to the north-west. Man made features such as the earth banks around the waste water treatment works are also a feature in the local landscape, maintaining a distinction between the landscape to the west and east of Peel Common.
- 4.14. As with the scale of the landscape, the proposed development has intentionally incorporated the field boundary hedgerows into the layout as far as possible, retaining the existing framework of vegetation. Notwithstanding that this will be set in the framework of a residential development and its open spaces, the hedgerow field pattern is retained, whereas elsewhere in the LCA (such as the golf courses) it would appear to have been eroded). Disruption to the hedgerow network is also apparent as a

consequence of the new bypass, Newgate Lane East, which has severed several of the local field patterns and hedgerows; the replacement of these with highways green infrastructure is acknowledged, but this does not respond to the pattern of the landscape in this locality. Vegetation and hedgerows retained within the layout are proposed to be augmented with new additional planting, supplemented by added diversity and landscape management, and where lost the additional planning will replace these.

- 4.15. In relation to urban influences, the landscape impact of introducing residential development into the site is acknowledged, and the impacts are clearly set out in the submitted LVIA. However in response to landscape character, and the existing influences of the urban edge that are noted in the FLA, the site has responded by avoiding and minimising this influence. This includes the provision of 'buffers' to form an offset to the edge of the proposed development and the adjacent landscape context. This will also help to create a partial screen, presenting a scheme that is not entirely defensive in terms of how it integrates with the adjacent landscape, but instead adopts a more positive approach of presenting a 'fair face' and more attractive, softer settlement edge.
- 4.16. More detail on landscape character is set out in section 2 of the FLA, relating to local landscape character areas and the sensitivity assessment. This divides LCA8 into five sub-areas, with areas 08.1a, 08.1b and 08.2a most relevant to the sites given they sit adjacent to each other and include the site. 08.2b and 08.2c provide some context to the local landscape but sit further afield and are slightly separate from the site context.

Plate 2: FLA extract (page 151) showing landscape types for LCAS

4.17. The structure of the landscape of 08.1a and 08.2a is defined predominantly as 'weak structure' or 'fringe character' with just a small part of 08.1a that is defined as 'strong structure' which is concurrent with parts of the southern site (refer to **Plate 2**).

4.18. In relation to the appeal sites, I agree with the definition of the structure as broadly 'weak' or 'fringe' character. This is because it is reflective of the various suburban influences that are prominent in this part of the landscape and contribute to the suburban continuity in the landscape that draws Peel Common, Bridgemary, Woodcot and the edge of Fareham together. Physical influences include the prominent residential edges of Gosport and Fareham, cycleway connections and the alignment of Newgate

Lane East (and substantial pieces of highways infrastructure that accompany this), but also the pocket of amenity land use situated to the north and south of these areas.

- 4.19. The more detailed sections of the LCA do not set out 'key characteristics' (over and above the 'essential characteristics' defined for the wider LCA) but instead include a more detailed descriptions (refer to **Appendix FL&BH 1.2.1**). These are presented for each sub-area in relation to:
- the landscape resource (landscape character and quality);
 - the visual environment (views, visual features and viewers);
 - setting of the urban area (contribution to setting and settlement character); and
 - green infrastructure (contribution to green infrastructure).
- 4.20. Each also includes descriptions of sensitivity and development potential.
- 4.21. The descriptions are extensive, but a summary is presented in the format of addressing 'development criteria and enhancement opportunities'. This section states that the area is of 'high sensitivity' and refers to matters of coalescence and it's 'generally unspoilt rural character'.
- 4.22. In itself this is a characteristic, but this part of the landscape does not exist in isolation, nor is it experienced in isolation and the sense of the rural character is equally influenced by the settlement fringe and amenity land uses that are presented by the residential areas and nearby sports and playing fields.
- 4.23. Furthermore, the FLA goes on to state that:
- 4.24. *"The situation is further complicated by the proposed new road which will have some effect on the integrity and character of the landscape resource and undeveloped gap."*
- 4.25. Newgate Lane East is now constructed and in use. The route includes additional road junctions as well as some prominent fencing along the route, visible from the road but also from the local rights of way and settlement fringes. I consider the road has effectively severed this part of the landscape, and provided a very urbanised corridor that connects previously suburban fringes, linking as it does such features as the urban edge of Fareham (with the solar installation and sports facilities also on this edge), the waste water treatment works, Peel Common itself and the amenity landscapes of Brookers Field recreation ground.

- 4.26. Consequently, this part of the landscape is no longer representative of the 'unspoilt' landscape described in the 2017 LA, nor does it fulfil its role of preventing coalescence between these edges of the settlement.
- 4.27. The FLA does acknowledge that, in relation to sub-area 8.2 there is some potential for development, stating that (page 167):
- 4.28. *"The only opportunities may lie within areas that are closely associated with existing development (e.g. at Peel Common or in the SW corner of area 8.2c) and can be integrated within the landscape without any physical or perceived encroachment within the gap."*
- 4.29. This part of the landscape does (and will), however, remain distinct from the wider strategic gap between Fareham and Stubbington which, in landscape character terms, is a clearly distinct part of the landscape from the suburban fringes of Fareham and Peel Common.
- 4.30. Turning back to the reason for refusal in respect of the key characteristics of the landscape, there are several development criteria and enhancement opportunities defined by the FLA which the proposed developments positively respond to. The relevant issues are set out in the following table, accompanied by a brief response as to how/why the proposed development responds positively. Although the two appeal schemes are separate applications, I include a plan of a composite landscape strategy that illustrates how the landscape strategy forms a comprehensive and connected mitigation strategy (refer to **Appendix FL&BH 1.2.2**).

Table 2: Summary of LCA8 sub-area development criteria/enhancement opportunity and design response of the appeal schemes

Relevant FLA development criteria and enhancement opportunity	Proposed development design response
Sub area 8.1 Woodcot	
Maintain and strengthen the existing structure of trees, hedgerows and other mature vegetation, to maximise its landscape and wildlife value and to minimise impacts on the rural character of the landscape	<p>The appeal schemes reference the scale and pattern of the landscape by placing a limit on the development envelope for built form and retaining hedgerow (and other) vegetation as far as possible. Losses will be mitigated by additional planting.</p> <p>The landscape strategy includes for a diverse range of tree, hedgerow and grassland areas, contributing to biodiversity potential.</p> <p>Being contained between Peel Common and Newgate Lane East, other than the 'on site' impact, impacts on the 'rural character' will be contained and limited.</p>

<p>Maintain the essentially open, undeveloped character of the public open space, playing fields and sports facilities within area 8.1b, and be designed to relate closely to the existing structure of trees hedgerows and existing characteristic built features within the area</p>	<p>Brookers Field Recreation ground is located immediately to the south-east of the appeal sites with additional playing fields and formal play areas located on the edge of Fareham to the north of the appeal sites. Notwithstanding the connections to these areas by the settlement pattern and roads/footpaths, the appeal schemes are physically contained and will not influence the openness of these areas.</p>
<p>Avoid any major incursion of the urban area into the countryside beyond existing well defined boundaries, or create significant new pockets of urban or urbanising development within open farmland</p>	<p>The presence of the solar farm, waste water treatment works and Peel Common itself all form a physical and perceptual barrier to the west; these are further reinforced for much of the western edge by various tree and woodland cover. To the east, Newgate Lane East has severed the agricultural landscape and now broadly forms an eastern limit to the appeal schemes, however there remains a perception and some physical connection to Bridgemary. Overall this does not represent a 'major incursion; into the countryside as in either respect, the appeal schemes will form an appropriate fit with the existing settlement patterns.</p>
<p>Protect the area's role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development strung out along road corridors (e.g. along the existing and proposed new alignment of Newgate Lane) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap</p>	<p>As noted, Peel Common and its immediate environs form a distinct edge to the settlement pattern associated with the edge of Fareham and Gosport. The appeal schemes will not breach this and will not have an impact on the overall strategic gap to the edge of Stubbington.</p> <p>In terms of ribbon development, together the appeal schemes will present an area of development that dovetails with the existing settlement pattern of Peel Common which in itself is partly comprised of ribbon development along Newgate Lane. The appeal schemes will alter this and consolidate the settlement pattern of Peel Common as a small core settlement area within the broader strategic gap (much in the way that Titchfield, to the north, exists between Titchfield Common and Fareham).</p>
<p>Maintain significant distance and separation from the corridor of the new road to minimise its urbanising effects upon the rural character of the area</p>	<p>The appeal schemes include a landscape buffer along their eastern edge which will integrate with the linear landscape proposals that have been implemented to mitigate the urbanising influence of the new road.</p>
<p>Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the open, flat landscape</p>	<p>The appeal sites are physically well contained by the combination of existing built form and green infrastructure and consequently it is not considered that residential development on the appeal sites will be particularly visible or prominent.</p>
<p>Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area</p>	<p>The appeal schemes will not unduly affect any of the open spaces in the area, not are they prominent or visible from the open spaces or prominent from the local PROW network.</p> <p>Furthermore, green infrastructure and open space is included on the western edges of the appeal sites which makes further provision for accessible green space and green links.</p>

<p>Provide substantial new investment in the landscape through extensive tree, hedgerow and woodland planting using native broadleaved species appropriate to the locality and soil conditions and habitat creation to diversify the intensively farmed landscape</p>	<p>The appeal schemes include for a range of landscape and habitat types as part of the landscape strategy. Use of native and locally prevalent species would be an inherent part of the proposals and this element of detailed design can be controlled by condition.</p>
<p>Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context</p>	<p>The detailed LVIA, along with additional analysis in this evidence, illustrates that mitigation measures will be successful in minimising impacts in respect of both landscape and visual matters.</p>
<p>Sub-area 8.2 – Peel Common and Alver Valley</p>	
<p>Safeguard the area’s vital role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development along road corridors (e.g. Broom Way, Shoot Lane and Gosport Road) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;</p>	<p>The appeal schemes will consolidate the settlement pattern of Peel Common and can be integrated into the landscape with very limited influence on the adjacent landscape areas, particularly due to the considerable degree of enclosure from existing green infrastructure.</p> <p>The integrity of the overall strategic gap will be retained; where this is narrowed between</p>
<p>Maintain the distinctly ‘isolated’ nature of settlement at Peel Common and ensure that any potential small-scale infill development within this area effectively ‘rounds off’ rather than extends the settlement boundary, to avoid the risk of physical or perceived coalescence with other built areas;</p>	<p>The appeal schemes will consolidate the settlement of Peel Common being limited as they are by the alignment of Newgate Lane East. The appeal sites represent an opportunity to round off this edge of the settlement, up to the existing junction, without overly diminishing the remaining countryside to the east of Newgate Lane East. Further south, the perception of separation between the existing edges of Peel Common and Bridgemary is already limited due to the presence of residential development along Woodcote Lane and also the amenity character of Brookers Field Recreation Ground which influences character at a local level.</p>
<p>Protect the semi-rural, undeveloped character of areas 8.2b and c;</p>	<p>The appeal sites are separated and distinct from these areas due to distance and the alignment of the Gosport Road.</p>
<p>Maintain and strengthen the existing structure of woodland, trees, hedgerows and other mature vegetation in all parts of the area, to maximise its landscape and wildlife value;</p>	<p>As previously noted, the comprehensive landscape strategy would deliver this.</p>
<p>In particular, maintain and enhance the mosaic of woodland, heathland, grassland and wetland habitats of value within the Lee-on-the-Solent golf course at Chark Common and</p>	<p>As previously noted, the comprehensive landscape strategy would deliver this – the strategy includes for diversity of habitats and landscape components.</p>

encourage further habitat creation and diversification within intensively managed areas to maximise wildlife and landscape value;	
Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the landscape;	As noted, the appeal schemes will not be unduly prominent in the landscape and are both physically and visually well contained.
Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area, particularly along the River Alver corridor and with the Country Park to the south;	The appeal schemes include areas of green infrastructure and open space which will make a positive contribution to the network of green infrastructure in the area. Connections to the River Alver corridor and Country Park will not be impacted.
Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.	As noted, the detailed LVIA, along with additional analysis in this evidence, illustrates that mitigation measures will be successful in minimising impacts in respect of both landscape and visual matters.
Use native broadleaved species appropriate to the locality and soil conditions in new tree and hedgerow planting.	Also as noted, the use of native and locally prevalent species would be an inherent part of the proposals and this element of detailed design can be controlled by condition.

Interim summary on landscape character

4.31. In this section so far, I have considered the first part of the reason for refusal (b), namely that the proposed development fails to respond positively to and be respectful of the key characteristics. This includes:

- A description of the characteristics with reference to the published guidance, reiterating that this baseline position was fully considered and acknowledged in the submitted LVIA;
- That there is a distinction in landscape character between this area (the site and its context) and the wider part of the strategic gap between Fareham and Stubbington;
- That the published baseline makes clear reference to the suburban nature and influences in this part of the landscape and that it gives give some context to the scope for potential development in this area;
- That this baseline is slightly out of date by virtue of Newgate Lane East, which is now constructed and in operation;
- Having set out this baseline position on the key characteristics, I have also described clearly, again reiterating that this was addressed in the submitted LVIA,

how the proposed development responds to these characteristics through the landscape strategy that forms the basis for the proposed development.

- 4.32. The mitigation strategy is largely integrated into the proposed development as a whole, with landscape and visual matters addressed in the layout, extent of developable area, green infrastructure strategy and areas of open space.
- 4.33. In summary, the appeal schemes can clearly demonstrate how they have responded positively to the local landscape character and is respectful of this through the restrictions placed on built form and provision of green infrastructure and open space (with associated landscape proposals) as an integral and positive component of the masterplan for the two appeal sites.
- 4.34. Not only is the landscape strategy consistent with the local landscape character, it also plays an important role in terms of lessening the predicted impacts of the 'built' component of the developments (as does the baseline context of the suburban edges of the settlement).
- 4.35. This leads me to the second part of the reason for refusal (b) where it suggests that the proposed development would be 'harmful' to the character and appearance of the countryside.

Impacts on the character and appearance on the countryside

- 4.36. In respect of landscape and visual matters, it is typical for landscape character to be discussed first, with views/visual receptors and appearance following. However, I will address the visibility and perception of the site (and proposed development) up front as it sets a very useful context in respect of landscape character.
- 4.37. It is important to note that a comprehensive landscape and visual impact assessment was prepared in support of the applications. These present a technical assessment of the baseline scenario, judgements on landscape value, susceptibility and overall landscape sensitivity as well as consideration of visual impacts from a range of visual receptors in the local area.
- 4.38. The technical assessment and professional judgements therein are based on a transparent approach and can be referred to for specific points. Overall, notwithstanding that there is an inevitable landscape impact on the appeal sites and that for locations directly adjacent to or close to the appeal sites might be of a higher significance of

effect, the overall balance of judgments found that, this degree of impact was acceptable and that mitigation had been successful in avoiding or minimising the impact and effect.

4.39. The overall visibility of the appeal sites is defined as follows:

- To the north, the visibility of the appeal sites is restricted to a short section of Newgate Lane and the junction/short section of Newgate Lane East. Views from the more northern section of Newgate Lane, and also the route of the public footpath between Newgate Lane and Woodcot, are generally screened by intervening vegetation and the route of Newgate Lane East;
- To the east, the visibility of the appeal sites is restricted to locations on the very edge of Woodcot and Bridgemary. This is generally restricted to the upper storeys of residential properties situated on the very edge of the settlement, views from ground floor levels and the street scene being generally screened by intervening vegetation. Newgate Lane East is highly visible from the east, large sections of the route being defined by tall acoustic fencing panels. In the future, views from the east of the appeal schemes is likely to be further screened and contained by the highways mitigation planting along Newgate Lane East, which will form a linear belt of green infrastructure in views from this direction;
- To the south, the visibility of the site is limited to a small number of properties located off Woodcote Lane, with filtered views from the road itself. Some views from Newgate Lane East and Newgate Lane will also be available, albeit limited in duration. In the longer term, highways mitigation planting will screen such views; and
- To the west, the visibility of the site is limited to the route of Newgate Lane with views from locations further west (including public footpaths) being screened by various sections of green infrastructure.

4.40. On balance, the potential visibility of the appeal schemes is very restricted and highly localised. Higher sensitivity receptors such as PROW have very few views. Views from receptors across the strategic gap between Stubbington and Peel Common (including PROW) will have no views.

4.41. Views from Bridgemary, although partially available now, are influenced by highways infrastructure of Newgate Lane East and in the longer term will potentially be fully screened by the mitigation planting along that route.

4.42. What remains is a small number of private dwellings in relatively close proximity to the appeal sites and some public vantage points from the local road network that have views

of the proposed developments. Such locations include a short section of Newgate Lane, the passing traffic (and receptors) along Newgate Lane East, and a short section of Woodcote Lane.

- 4.43. I raise the matter of views/visibility in the first instance, not just to demonstrate how limited the potential views and visual impacts are in their extent, but also to demonstrate that any perception of the change to landscape character is equally limited. In turn, this influences the extent to which any impact could be judged as 'harmful' to the character and appearance of the landscape.
- 4.44. In respect of character and appearance of the landscape, the limited 'scale of change' is just one consideration in the balance of judgement, other matters that are accounted for in the LVIA process include the nature of change. In this case, the appeal sites are not located in a landscape context where residential development, or other urbanising influences, are absent.
- 4.45. The settlement edges at Bridgemary and Fareham are prominent and influential on the local character; the appeal sites sit adjacent to Peel Common and the appeal schemes will complement this settlement pattern, particularly given its containment by the route of Newgate Lane East. Amenity landscapes are present in the form of Brookers Field Recreation Ground and the open spaces and sports fields to the north of the appeal sites.
- 4.46. The agricultural components of the landscape are noted and included in the consideration of landscape impacts, however the peri-urban influences described above are also a relevant part of the baseline consideration against which impacts are judged.
- 4.47. Impacts are also judged on the basis of avoiding or minimising the type and extent of any impact and the positive design approach, reflective of the local landscape context, is successful in avoiding and reducing such impacts. Previous sections of my evidence have clearly demonstrated the positive approach to mitigation.
- 4.48. Overall, an inevitable impact on the landscape will be generated, largely due to the loss of agricultural land to built development. This is addressed by the LVIA which, in reference to the relevant character area of the 'Woodcot/Alver Valley LLCA - Sub area 08.1a' concluded that the magnitude of impact within the study area will be medium which, assessed alongside the low to medium sensitivity, would result in a minor to moderate adverse effect.

4.49. In terms of landscape and visual impact assessment, this is at the lower end of the scale for the assessment of significance (which general range across a scale of negligible, minor, moderate and major). At this level of significance, at the lower end of the threshold, these impacts are considered to be acceptable in landscape terms and do not constitute an overall 'harm' to the landscape.

c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;

4.50. In this section I consider the purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap.

4.51. During the course of the application a 'strategic landscape and visual appraisal' of the gap was prepared and submitted and this addresses issues in respect of function of the gap, core areas and how the strategic gap can be maintained whilst accommodating the strategic growth in the area.

4.52. The overarching aim was to establish which areas of the gap were a priority to maintain its function and separation between settlements, and which parts of the gap could, subject to further detailed assessment, accommodate some form of built development that would be integrated, not highly visible and ensuring that it would not erode the physical, visual and perceived gap.

4.53. Albeit undertaken at a high level, the study found that the appeal sites (and landscape generally between Peel Common and Fareham/Gosport) were not a priority area required to maintain the integrity and function of the wider Fareham to Stubbington Strategic Gap.

4.54. In September 2020, in support of the emerging Local Plan, the evidence base was updated to include a recent study of strategic gaps across the Borough.

4.55. This document, a 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' was undertaken by Hampshire County Council on behalf of FBC and published in September 2020 (**CDG.7**). The study undertook a technical review of the six proposed 'Areas of Special Landscape Quality' and two proposed strategic countryside gaps (including the Meon Gap and the Fareham and Stubbington Gap).

4.56. The study reiterates the Fareham Draft Local Plan 2036, stating that (page 5, **CDG.7**):

- 4.57. "...Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities (page 27, Fareham Draft Local Plan 2036)"
- 4.58. Study states that the approach and methodology established a set of criteria for determining strategic gap characteristics and boundaries
- 4.59. The executive summary makes two observations in respect of the Fareham to Stubbington Strategic Gap, stating that (following extracts from pages 6 and 7 of the study, **CDG.7**):

"The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence through continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there are some opportunities for development to be accommodated within the landscape, without compromising the Strategic Gaps function..."

Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:

- *An area to the South of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function...*

It is also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past."

- 4.60. The study goes on to 'test' a series of areas against defined criteria, including primary and secondary measures (described on page 19 of the study, **CDG.7**). These are summarised in the following table.

Table 3: Summary of primary and secondary measures for strategic gap criteria

Principles of primary measures	Principles of secondary measures
<i>Physical and visual separation:</i> - absence of urban land uses	<i>Green infrastructure provision:</i> - role and purpose of green infrastructure

<ul style="list-style-type: none"> - primarily an absence of residential development - feeling relatively tranquil - have dark night skies - retain a sense of leaving a settlement, passing through a distinct tract of countryside before entering another - maximum and minimum distances are a 'rule of thumb' 	<ul style="list-style-type: none"> - influence appropriate gap distances
---	---

- 4.61. Further detail of these measures is set out in the detailed methodology to the study. Also in relation to the approach and methodology of the study, it notes that (page 20, para 45, **CDG.7**):
- 4.62. *"Whilst it has been stated earlier that Strategic Gaps, do not necessarily have an intrinsic landscape value, landscape character and it's quality does have a role to play in helping to understand and determine the extent of a gap and it's sensitivity to development..."*
- 4.63. Chapter 4 of the study sets out an overview of the Strategic Gaps, it states that (page 84, para 8, **CDG.7**):
- 4.64. *"The aim of the Fareham-Stubbington Gap is to avoid coalescence between the settlements of: Fareham and Bridgemary, with Stubbington and Lee-on-the-Solent."*
- 4.65. The study goes on to define a series of 'key features' within the Fareham to Stubbington Gap (page 96, **CDG.7**). I summarise these in the following table, along with a brief analysis as to whether these key features are reflected by the appeal sites and their immediate context.

Table 4: Summary of the defined 'Fareham-Stubbington Gap' key characteristics

Key feature as defined by the study	Relevance to the appeal sites and context
Open, predominantly arable farmland and horticulture with some glasshouses, a weak hedgerow structure and few trees	This is reflective of the core part of the gap, whereas the appeal sites are contained within a smaller scale arable landscape contained by a strong framework of hedgerows and hedgerow tree. This distinction is acknowledged by the defined landscape character guidance. Consequently, given the fundamental difference in landscape character here, the appeal schemes will not unduly influence this particular key feature.
The settlement edges are for the most part well screened by mature tree canopy, but there is some	The landscape context to the appeal sites also include the settlement edge of Gosport at Bridgemary, which is also visually apparent from the local landscape. Closer

<p>minor visual intrusion from Fareham, Stubbington and HMS Collingwood</p>	<p>to the appeal sites, Peel Common forms an incidental 'satellite' of the settlement pattern which has grown out of ribbon development along Newgate Lane and this is more prominent in the local landscape context.</p> <p>Given the existing context of the residential edges, particularly Peel Common, the appeal schemes are not considered to unduly influence this key feature of the Strategic Gap, particularly given the urbanising influence (and associated infrastructure of Newgate Lane East) along with mitigation in the appeal schemes which includes landscape buffers and additional landscape planting.</p>
<p>A few scattered farmsteads/horticultural holdings and a mosaic of small fragments of open farmland and horse grazed pastures sandwiched between.</p>	<p>This is more reflective of the appeal site and their local context, however it is useful to contrast this with similar farmsteads and horticultural buildings set within the more open arable landscape to the west. Fragmentation of the arable landscape in this area has also occurred through the implementation of Newgate Lane East which has severed several field parcels and hedgerows through the area.</p> <p>The appeal schemes have taken an approach of minimising impacts through reference to the scale and field pattern within the landscape which has defined the development envelopes for built form. Notwithstanding this positive approach, there is an acknowledged loss of agricultural land.</p>
<p>Large scale non-agricultural uses of business and airfield development at Solent Airport in Daedalus to the south.</p>	<p>There is limited physical and visual connections between the appeal sites and these features.</p> <p>The appeal schemes will not increase the prominence or extent of these uses in the landscape.</p>
<p>Utilities of: Peel Common Water Treatment Works enclosed from views by an earth bund and mature tree belt Peel Common Solar Farm</p>	<p>Both utilities are in close proximity to the appeal sites, the former acting as one of the main features that enclosure the appeal site physical and visually and restrict the potential visibility of the appeal schemes in terms of visual effects.</p> <p>These features effectively contain the appeal scheme and prevent any perception (physically or visually) of them from the west, and in particular from the context of the arable landscape across to Stubbington.</p>
<p>Construction site of Stubbington Bypass, which will provide an east-west route through the gap that has not previously existed.</p>	<p>This feature is physically and visually separate from the appeal schemes, but will likely introduce a detracting feature into the landscape, much in the same way Newgate Lane East has in the locality of the appeal sites.</p>
<p>Urban fringe character of Peel Common residential area</p>	<p>The appeal sites are located adjacent to the 'satellite' residential area of Peel Common and will consolidate this area of the settlement.</p> <p>In terms of the gap, notwithstanding the extension of the settlement (albeit limited by the alignment of Newgate Lane East, the gap will continue to function much in the same way that the strategic gap in the north continues to function, with the consolidated</p>

	settlement area of Titchfield situated between the two more pronounced settlement edges.
Recently completed highway works to Newgate Lane and Peel Common Roundabout, with associated noise attenuation fencing and bus and cycle infrastructure.	Overall these key features reflect the independent judgements in the LVIA and earlier in this evidence as to the impact of Newgate Lane East on the landscape. In term of the gap, these features conflict with some of the primary measures in relation to tranquillity and drawing a distinction between settlements along major routes.

4.66. In respect of the Fareham-Stubbington Gap, the study draws together key conclusions in respect of the primary and secondary measures. Several key conclusions are summarised as follows (I include the full extract of the conclusions at **Appendix FL&BH 1.2.3** of my evidence):

- Minimum and maximum distances of ca. 300m to 1.8m [sic] (assumed km);
- That Peel Common represents a 'false' settlement edge;
- Two areas of the gap have distances of 350m and 300m but that these distances are still perceived as a sense of separation between neighbouring settlements, partly due to presence of mature vegetation;
- These represent 'minimum' gaps (within the 'rule of thumb') but are not appropriate to become a standard dimension as they would be weak and at risk of being lost (i.e. they are acceptable, but not ideal) – furthermore they function due to the context of linking to wider sections of the gap either side;
- Moderate to large gap distances of ca. 600m to 1.8km are 'good' distances;
- Presence of urban land uses can correspond to loss of tranquillity and dark night skies as urban fringe characteristics 'creep into the gap';
- In terms of land uses, sports fields and recreation grounds on the fringes of urban settlements have the potential to bring urbanising influence;
- In comparison to the Meon Gap there is not the same level of GI resource, however measures could be taken to increase these through positive environmental management; and
- Mitigation will be required where there is considered to be capacity to absorb development.

4.67. These conclusions are illustrated in the study by analysis diagrams of legibility/visibility and key distances (refer to extracts at **Plates 3 and 4**).

Plate 3: Extract illustrating the analysis of legibility/visibility

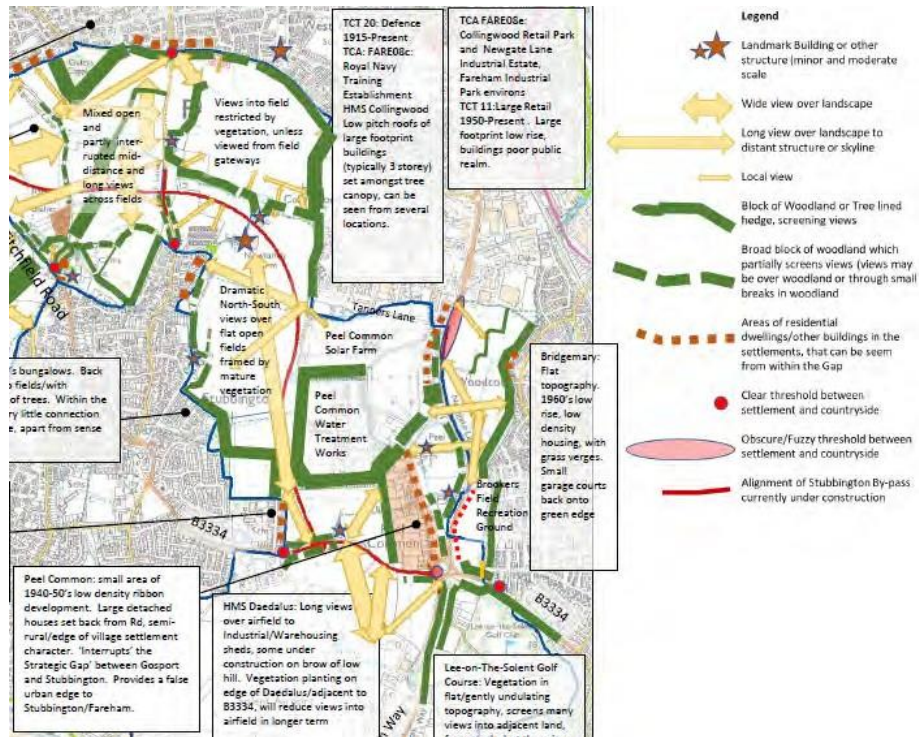

Plate 4: Extract illustrating key distances across the strategic gap

- 4.68. Having considered the analysis of the gap study, I refer back to the executive summary of the gap study where it notes that there exists some opportunities for development to be absorbed within the strategic gap without compromising its function. Further to illustrative extracts (**Plates 3 and 4**) I include some additional analysis of the gap in the context of the appeal sites (refer to **Appendix 1.2.4, Landscape Analysis of the Strategic Gap**).
- 4.69. The study suggest that an area south of Fareham and west of HMS Collingwood be considered, however this would place development in a more open and exposed part of the landscape, at a point where the existing gap (between HMS Collingwood and Newlands Farm/Stubbington) is only between ca. 325m and 550m. This would seem to contradict some of the principles set out in the analysis and conclusions.
- 4.70. I don't intend to critique the approach of the strategic gap study or its analysis, however I do think it is necessary to interrogate the robustness of the overall conclusions. The aims of the study include a review of the function of the strategic gaps in the Borough, but also to consider their boundaries. The study includes the necessary analysis to present a clear evidence base for amending boundaries in parts of the strategic gap. In relation to the edges of Fareham and Gosport, there is no recommendation to adjust the boundaries in this area, despite the findings of the study that:
- Some physical coalescence has already occurred;
 - These are some of the narrowest parts of the gap, resulting in a 'minimum functioning gap, that is weak';
 - Suburban edges and influences are often prominent, which reduces the effectiveness of the gap, including loss of tranquillity and presence of lighting;
 - Recreational land uses are present in the form of several sports and recreation grounds and these are noted as an issue in terms of their 'visual appropriateness'; and
 - The road network is such that there is no genuinely clear experience of a break between the settlement areas, particularly between Peel Common, Bridgemary and the southern edge of Fareham.
- 4.71. In relation to the landscape around the appeal sites, and particularly between Peel Common and Bridgemary, I cannot see how these trends would be reversed nor how the strategic gap could be strengthened, particularly with Newgate Lane East now forming such a strong urbanising feature in the local landscape context. The result is now the continued inclusion of a part of the gap that is weak and under pressure in the long term.

- 4.72. In that context I would think a logical and appropriate conclusion for the study would be to amend the boundary to omit this part of the landscape from the strategic gap, creating capacity for appropriate forms of development that could come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the importance of the core, priority areas of the gap, between Fareham and Stubbington where the gap clearly delivers its role and function in full. However, I do appreciate that this is not the conclusion of the published study.
- 4.73. Returning to the conclusions of the study, it notes that development coincidental with LCA8 (Woodcot-Alver Valley) would be inappropriate. However, it goes on to state that Gosport and Fareham have already partly coalesced (along the A32) and that urban characteristics are present throughout the study area 8C (which is coincidental with the appeal sites).
- 4.74. Given the urbanising influences, along with the considerable green infrastructure which provide appropriate visual qualities and separation thresholds, I consider that development in this area would not be inappropriate, particularly given that the inherent mitigation would also contribute substantially to the green infrastructure network (as illustrated on the Composite Landscape Strategy (refer to **Appendix FL&BH 1.2.2**))
- 4.75. Having considered the analysis within the study analysis of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the strategic gap. This is on the basis that (refer also to **Appendix FL&BH 1.2.4**):
- In relation to distances, the appeal schemes will reduce the gap between Bridgemaury and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances;
 - In terms of visibility, the appeal schemes will be physically and visually well contained – they site within the strong green infrastructure framework that is evident by blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the strategic gap from Stubbington;
 - Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, also along Newgate Lane and within the merging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;

- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area;
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

4.76. I also note that, notwithstanding differences in the technical approaches, the Pegasus group and Hampshire County strategic gap studies both independently acknowledge that the strategic gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site /project basis.

4.77. For the appeal schemes, this more detailed site analysis has been completed in the form of the submitted landscape and visual impact assessments. This iterative approach to design, based on the impact assessment, has informed the inherent mitigation to the masterplan and concludes that the proposed developments would be acceptable.

4.78. On this basis, I consider that the appeal schemes can come forward without a significant effect on the integrity and function of the strategic gap and without conflict to the aim of the Fareham to Stubbington Gap which is to avoid coalescence between Fareham and Bridgemarky with Stubbington and Lee-on-the-Solent.

d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries.

4.79. The final issue raised buy the reason for refusal in respect of landscape and visual matters related to the settlement boundaries and relationship between the sites and the urban edge.

4.80. Notwithstanding that this is more generally a planning matter related to the definition of settlement boundaries, I consider it useful to briefly consider the existing urban and suburban areas from a landscape and visual perspective; including how these relate to the site. This includes reference to Newgate Lane East and the potential 'future baseline' that could include emerging development of the former HA2 allocation.

- 4.81. In the context of the appeal sites, the current settlement pattern is defined by the edges of Fareham and Bridgemary which are generally defined by residential development, including some green infrastructure. Other settlement areas are that of Peel Common, which would appear to be a small 'satellite' of predominantly residential development, historically small scale ribbon development along Woodcote Lane and Newgate Lane. There is a mix of dwellings in terms of age, appearance and scale, and no one aspects really binds the settlement character together or delivers a unique sense of place.
- 4.82. The strategic gap study describes Peel Common as a 'false urban edge' and this is likely due to the visibility of dwellings on the approach from Stubbington, which briefly gives way to the open space of Brookers Field Recreation Ground before entering Gosport.
- 4.83. The surrounding landscape context to Peel Common is influenced equally by the agricultural landscape along with several areas of recreational open space and sports pitches. Newgate Lane East, Peel Common Roundabout and the utilities of Peel Common solar farm and the waste-water treatment works are all notable features that influence the character and pattern of the satellite settlement.
- 4.84. In terms of the more extensive urban areas that are located nearby, there is some connectivity close to Gosport Road a partial connection between Peel Common to Gosport in the form of Woodcote Lane (and its associated residential dwellings) and the amenity open space of Brookers Field Recreation Ground.
- 4.85. The reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries.
- 4.86. However, the appeal sites are located immediate to the east of Newgate Lane, and are physical contained by the alignment of Newgate Lane East; they sit immediately adjacent to the existing residential dwellings off Woodcote Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane. Together the appeal schemes will consolidate the pattern of Peel Common within a clearly prescribed and defined limit.
- 4.87. Furthermore, the proposals for green infrastructure and open space that form an integral part of the masterplans will set the proposed developments in a landscape framework that reflects some of the characteristics of Peel Common where tree belts and hedgerows are present to a greater or lesser degree across parts of the satellite. This includes proposals for an area of green space directly adjacent to Newgate Lane

that will form a green corridor that runs broadly through the centre of the emerging pattern.

- 4.88. Green infrastructure and open space on the eastern edge will integrate with the highways landscape planting along Newgate Lane East and together this will add to the containment of this pocket of settlement.
- 4.89. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 4.90. As previously noted, there exists some physical connections between Peel Common and Bridgemary. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemary, focused along the green route into Bridgemary (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 4.91. Whilst forming a consistent part of the overall settlement edge, these would be characterised by a softer transition than the current settlement edge, incorporating a strong network of green infrastructure which links the wider countryside to the west of HMS Collingwood, through the green infrastructure of the solar and waste water facilities, along the open spaces of the appeal schemes and Newgate Lane East, connection to the recreation ground and the wider extent of the Alver Valley further south.
- 4.92. At the time of writing the direction of the Local Plan had altered slightly and the former emerging allocation of HA2 had been removed. However, were HA2 to come forward this broader allocation would form a logical connection between Peel Common (including the appeal sites) and the edge of Fareham. This would represent a clear connection to the settlement edge of Fareham and a logical pattern of the settlement in this area. Furthermore, given the opportunities for including and extending the green infrastructure network, that larger extent of the settlement can come forward with a suitable mitigation strategy.
- 4.93. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.

5. RESPONSE TO POLICY

- 5.1. In the context of the analysis of effects identified in the previous section, I now go on to address the policy context, addressing these in respect of landscape and visual matters.
- 5.2. There are also several other saved and emerging policies relevant to landscape and visual matters which are not referenced in the reason for refusal but against which the appeal scheme will potentially make a positive contribution.

National Planning Policy Framework

- 5.3. The National Planning Policy Framework (NPPF) has a presumption in favour of sustainable development. Reference to the NPPF in the reason for refusal generally relate to sustainability and transport (noting paras 103, 109 and 110). Notwithstanding that landscape is not addressed at this level, there are other parts of the NPPF that are relevant.
- 5.4. NPPF paragraph 8 defines three overarching objectives to sustainable development, economic, social and environmental. The environmental objective (c) is explained in the following terms:
- 5.5. *"To contribute to protecting and enhancing our natural, built and historic environment; including making effective use of land, helping to improve biodiversity, using natural resources prudently, minimising waste and pollution, and mitigating and adapting to climate change, including moving to a low carbon economy."*
- 5.6. Section 15 of the NPPF is concerned specifically with conserving and enhancing the natural environment. Paragraph 170 notes that the planning policies and decisions should contribute to and enhance the natural and local environment by (a) protecting and enhancing 'Valued Landscapes' in a manner commensurate with their statutory status or identified quality in the Development Plan.
- 5.7. It is common ground that The site is not a 'valued landscape' for the purposes of Paragraph 170 of the NPPF.
- 5.8. The NPPF paragraph 170 also notes in sub section (b) that (my own emphasis):
- 5.9. *"Recognises the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and eco system services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland."*

- 5.10. To satisfactorily address policy at a national level it is necessary to undertake an appraisal of landscape character making reference to published guidance, but also looking more specifically at the local landscape character. This establishes a detailed baseline position for the landscape character of a site or area in question and presents and understanding of its sensitivity.
- 5.11. The submitted landscape and visual assessments that were prepared in support of the applications were undertaken using a methodology which accords with current best practice guidance for landscape and visual impact assessment (i.e. GLVIA3).
- 5.12. The submitted LVIA's make reference to published landscape character assessment prepared at a national, regional and district level and also addresses local character by reference to the description of the appeal site and its immediate context. The subsequent design of the proposed development reflects the relevant aspects of the local landscape character to ensure that impacts are minimised, that the proposals can be assimilated into the landscape and that mitigation forms an inherent part of the proposed development. Consequently, the LVIA responds fully to the requirement of the NPPF.

Adopted Fareham Borough Core Strategy 2011

- 5.13. The following section responds to policies included in the reason for refusal that are relevant to landscape and visual matters.

Policy CS4: Green Infrastructure, Biodiversity and Geological Conservation

- 5.14. This policy relates habitats and biodiversity and also ecologically focussed designations, however it also refers to the protection of trees and woodland. There is some relevance to landscape and visual matters by virtue of the parts of the policy that refer to green infrastructure. The policy refers to networks of accessible multi-functional green infrastructure to be planned around existing green spaces in urban, urban fringe and rural areas.
- 5.15. The appeal schemes incorporate a landscape strategy that forms an integrated part of the development proposals and sets a green framework for the masterplan. Notwithstanding the two applications are administratively separate, the landscape and green infrastructure strategies work together to provide a comprehensive framework of retained vegetation, proposed open space and augmentation of these through additional landscape works (refer to **Appendix FL&BH 1.2.2**).

- 5.16. Furthermore the green infrastructure network across the appeal sites dovetails with the wider green infrastructure network as it extends from the landscape to the west of Fareham, through the network of vegetation and open spaces to the north of Peel Common and along New Newgate Lane, and down toward the Alver Valley in the south.
- 5.17. Overall, the appeal schemes are considered to be consistent with and positively contribute to the policy in landscape and visual terms.

Policy CS14: Development Outside Settlements

- 5.18. This policy states that, for land outside the defined settlements, development will be strictly controlled to protect the countryside and coastline from development which would adversely affect its landscape character, appearance and function.
- 5.19. Both applications have been supported by comprehensive LVIAs which have found the proposals to be acceptable in landscape and visual terms. These documents also demonstrate the physical and visual containment of the appeal sites in relation to both the local landscape character and visual receptors.
- 5.20. In my evidence I have presented additional analysis that demonstrates the appeal schemes respond positively to the local landscape character and that this approach integrates mitigation that aims to avoid or minimise potential impacts. Some degree of residual impact is acknowledged at a site level, however in the context of the urban fringe context in this part of the landscape, the degree of impact is not considered to be at a level that would adversely affect the overall character of this part of the landscape.

Policy CS17: High Quality Design

- 5.21. This policy requires that proposed developments be of a high quality of design. This includes the need to, amongst other criteria:
- respond positively to and be respectful of the key characteristics of the area, including landscape
 - provide continuity of built form
 - provide green infrastructure, including landscaping, open spaces, greenways and trees

Policy CS22: Development in Strategic Gaps

- 5.22. This policy relates to land within a Strategic Gap and states that development proposals will not be permitted where it 'significantly' affects the integrity of the gap and the physical and visual separation of settlements.
- 5.23. The submitted LVIAs demonstrate that the appeal sites are physically and visually well contained. Landscape and visual impacts are limited to a highly localised area and the appeal sites together are contained in a strong framework of the existing settlement area of Peel Common, infrastructure (with associated vegetation) and the alignment of Newgate Lane East. This containment will be strengthened over time as mitigation within the schemes – and along Newgate Lane East – becomes established.
- 5.24. Additional analysis presented in my evidence also demonstrates several points in relation to the Strategic Gap, including that the key area for separation is between Stubbington and Fareham (including up to the western extent of Peel Common) and that the strategic gap in the area around Peel Common has been undermined to the point where it is no longer fulfils its role effectively.
- 5.25. Together, the containment of the site along with the strength of the gap between Stubbington and Fareham (at Peel Common) means that there will not be a significant effect on the integrity of the gap and consequently I do not see any conflict with this policy.

Adopted Fareham Borough Local Plan Part 2: Development Site and Policies Plan (June 2015)

Policy DSP40: Housing Allocations

- 5.26. This policy notes that, in the scenario where the Council does not have a five year supply of land for housing, additional housing sites, outside the urban area boundary, may be permitted. The policy sets out several criteria of which the following is relevant to landscape and visual matters:
- ii. The proposal is sustainably located adjacent to, and well related to, the existing urban settlement boundaries, and can be well integrated with the neighbouring settlement;
- Response: My evidence demonstrates the relationship between the appeal schemes and Peel Common and how this area, already party connected to the

edge of Gosport, would be consolidated as an area of settlement and present a well defined edge to the eastern edge of the Strategic Gap.

- iii. The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;

Response: My evidence has also demonstrated, in addition to the submitted LVIA, how the appeal schemes reflect local landscape character and a limit landscape and visual effects overall. My evidence also demonstrates that there will be no significant effect on the integrity of the strategic gap between Stubbington and Fareham.

- 5.27. Overall, in respect of landscape and visual matters, I do not consider there to be a conflict with this policy.

Other Matters

- 5.28. Matters raised in objection to the proposed scheme were summarised in the report to committee, including comments from the statutory consultees and several public comments. These include reference to matters of the countryside, strategic gap landscape and landscape character impacts and
- 5.29. I have dealt with these issues throughout my evidence in respect of several of the related points, including with reference to the submitted LVIAs, additional landscape and visual analysis in this evidence and the subsequent response to policy.

6. SUMMARY AND CONCLUSION

- 6.1. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 6.2. Together, the appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham and Gosport, that is bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east (with Newgate Lane and Newgate Lane East framing the northern edge of the sites also).
- 6.3. The wider landscape context of the appeal sites includes the low-lying ground of the coastal plain, characterised by abrupt the transition between the open landscapes and the adjacent urban environments of Fareham, Gosport (with Woodcot and Bridgemary). The settlement area of Stubbington forms the western extent of the Strategic Gap, extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.
- 6.4. Both applications were submitted with a detailed LVIA. These not only set out a comprehensive baseline and robust assessment of predicted impacts, but include details as to how landscape and visual matters have influenced the design of the masterplan, with mitigation measures consequently forming an inherent part of the proposals, both independently but also in respect of the complementary approach of the two schemes.
- 6.5. The reasons for refusal raises three main issues in respect of landscape and visual matters, stating that:
- b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;
 - c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;
 - d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;
- 6.6. This evidence considers the reasons for refusal against various information, including the submitted Landscape and Visual Impact Assessments, various consultation

responses, report to committee and other relevant baseline and evidence base material related to landscape and visual matters.

- 6.7. The submitted LVIAs address the key characteristics of the appeal sites and their immediate context. The submitted LVIAs also set out an assessment of the impact and approach to mitigation. This comprehensive process also enables judgements to be drawn in respect of the context of the appeal sites in relation to the existing urban settlement edges/boundaries.
- 6.8. The purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap has been addressed the a 'strategic landscape and visual appraisal' (prepared by Pegasus Group) and also by reference to the updated Technical Review of Areas of Special Landscape Quality and Strategic Gaps, prepared by Hampshire County Council on behalf of FBC.
- 6.9. With reference to this material, and supported by my own additional analysis where necessary, I conclude that the appeal schemes will not be harmful to the character and appearance of the countryside, will not significantly affect the integrity of the Strategic Gap and will relate well to the existing patterns of settlement.
- 6.10. This is on the basis the relevant key landscape characteristics of the area have been considered through the process of LVIA, consequently informing the analysis of constraints and opportunities, and ultimately the landscape strategy for the mitigation. This forms an integrated part of the two masterplans for northern and southern schemes.
- 6.11. Consequently, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms.
- 6.12. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement.
- 6.13. I consider that the subsequent residual impacts of the appeal schemes will be acceptable in landscape and visual terms.

- 6.14. In terms of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the Strategic Gap. This is on the basis that:
- In relation to distances, the appeal schemes will reduce the gap between Bridgemary and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances set out in the FBC study;
 - In terms of visibility, the appeal schemes will be physically and visually well contained – they sit within the strong green infrastructure framework that is evident in the form of blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the Strategic Gap from Stubbington;
 - Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, along Newgate Lane and within the emerging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;
 - The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
 - The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area; and
 - In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.
- 6.15. I also note that, notwithstanding differences in the technical approaches, the Pegasus Group and FBC Strategic Gap studies both independently acknowledge that the Strategic Gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site/project basis.
- 6.16. In respect of the conclusions of the FBC Strategic Gap study (where these note the relatively poor state of the gap at this point), I would think a logical and appropriate conclusion would be to amend the boundary to omit this part of the landscape from the Strategic Gap, creating capacity for development to come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the

importance of the core areas that are located further west, between Fareham and Stubbington where the Strategic Gap clearly delivers its role and function in full.

- 6.17. Finally, the reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries. However, my evidence demonstrates that the appeal sites are well related to Peel Common, being located to the east of Newgate Lane, physical contained by the alignment of Newgate Lane East and situated immediately adjacent to the existing residential dwellings off Woodcote Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane.
- 6.18. With existing and proposed green infrastructure in place, the appeal schemes will consolidate the pattern of Peel Common within a clearly defined limit. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 6.19. Furthermore, there are some existing physical connections between Peel Common and Bridgemary. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemary, focused along the green route into Bridgemary (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 6.20. If the previous emerging allocation of HA2 were to come forward, this broader area of development would reinforce the connection between Peel Common (including the appeal sites) and the edge of Fareham. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.
- 6.21. In all respects, considering Peel Common in itself, connections to Gosport, and with the potential for HA2 to come forward, development in this area will maintain a robust gap between Fareham (aligned with the western edge of Peel Common) and Stubbington.
- 6.22. Overall, in the context of these limited issues, and with the appeal schemes in place, landscape and visual issues are not sufficient to support a prospective reason for refusal.

PREFACE

The National Planning Policy Framework makes a clear commitment to conserving the natural environment in the planning system and recognises that it has a key role to play in the achievement of sustainable development. The Framework principles and policies make clear that planning should take account of the different roles and character of different areas, recognising the intrinsic character and beauty of the countryside and promoting local distinctiveness. Planning policies and decisions should be based upon up-to-date and relevant evidence about the landscape characteristics of the area and the primary tools for achieving this are landscape character assessments and, where appropriate, assessments of landscape sensitivity.

Fareham Borough Council is currently undertaking a review of its adopted Local Plan and commissioned *LDA Design* to up-date and expand upon the previous Fareham Landscape Assessment, undertaken in 1996, to provide robust evidence to inform Local Plan policy and planning decisions. The study brief included three main components:

- ▣ Landscape character assessment - a review of the baseline 'audit' of the character of the Borough landscape provided by the 1996 Landscape Character assessment, updated as necessary. The aim is to improve understanding of the key characteristics of the landscape that make places distinctive and different from one another, rather than better or worse;
- ▣ Landscape Sensitivity Assessment - detailed analysis and judgements regarding the value of the landscape and its sensitivity to change. The aim is to assist the Council in the evaluation of possible development options/alternatives to meet housing needs in the Local Plan Review and to inform the assessment of potential impacts on the landscape when determining planning applications;
- ▣ Designations Review - a review of landscape designations within the Borough, with specific reference to 'Strategic Gaps' and 'Areas of Special Landscape Character', but also 'other areas of protected or valued landscape designations'. The aim is to assist the Council in framing policy related to landscape protection, strategic gaps and settlement boundaries within the review of the Local Plan.

These components are presented in three separate 'parts', supported by appendices, and together form the 2017 Fareham Landscape Assessment. It should be emphasised that the assessment findings are based upon the professional judgement of the qualified landscape architects/planners within the consultant team and have not been influenced by, nor tested against, the opinions of the Council or the public.

LLCA 8.1 - WOODCOT

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

LANDSCAPE CHARACTER, QUALITY AND VALUE

This area forms part of the easternmost extent of the Stubbington–Fareham Strategic Gap. It is bounded by Newgate Lane to the west, beyond which lie the Newlands Solar Farm and Peel Common Waste Water Treatment Works. Out-of-town retail uses border the area to the north, while the eastern boundary is shared with the western edge of the Bridgemary area of neighbouring Gosport district. The southern boundary is formed by Woodcote Lane.

The LLCA is divided into two sub-areas, reflecting different land uses and their effects on intrinsic landscape character and quality. **Area 8.1a** comprises the land between Woodcote Lane in the south and Speedfield Park Playing Fields in the north. This area shares the typically flat, low-lying character of the coastal plain landscape that extends south and westwards to the Solent, but lacks the very expansive and denuded character of these areas. It is characterised by medium-scale, regular shaped fields, mostly under arable cultivation, bounded by a network of drainage ditches and a relatively intact structure of hedgerows, albeit heavily trimmed with some gappy sections and few mature hedgerow trees. Internally, the area has an open character but tree belts form taller, denser boundaries around the periphery of the area, especially to the north, east and south, which give the area a sense of enclosure from surrounding urban areas. The western boundary along Newgate Lane is more open and allows some intrusion from passing traffic but the area is devoid of built development (apart from farm buildings at Peel Farm) and retains a predominantly unspoilt, rural, agricultural character with limited intrusion from surrounding urban influences.

Area 8.1b is comparatively small and comprises two separate areas of recreation land and playing fields collectively referred to as Speedfields Park, connected by a surfaced pedestrian and cycle route. Both areas comprise amenity grassland and are enclosed by well-treed boundaries. The larger field adjacent to Newgate Lane contains a pavilion building and small car park along its northern boundary, with a variety of rugby posts, football goalposts and tall flood lights located in the centre of the field. The smaller field to the north east contains a single sports pitch and a children's play area in the south west corner. Despite retaining some of the characteristics of the adjacent landscape type (e.g. flat landform, well-defined hedgerow and tree boundaries and a regular field pattern) the introduction of built elements, car parking and management for sports use give the area a suburban, rather than rural agricultural, character.

The landscape of area 8.1 is not covered by any current national or local landscape designation. Scenic quality is not exceptional and is affected by some localised intrusion of urban features around its periphery and within area 8.1b. It does not contain any features of recognised conservation interest and it lacks the sense of remoteness and natural qualities that are found in other parts of the coastal plain. It has the sense of a 'landlocked' piece of countryside and the area's urban context is perceptible even if not dominating. However, area 8.1a does retain a predominantly rural, agricultural character and has a reasonably intact structure of hedgerows and significant tree cover around its periphery that contributes to its aesthetic appeal. The landscape is generally well-managed as agricultural land and in good condition, with limited evidence of 'fringe' uses or influences (e.g. horse paddocks, vacant land, unkempt fencing, fly tipping etc.). Overall, landscape value in area 8.1a is judged as moderate to high while in area 8.1b it is moderate, although the well-treed boundaries are valuable landscape features.

LLCA 8.1 - WOODCOT

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area lacks the very open, expansive character of other parts of the coastal plain (including adjacent land within the strategic gap to the west) but it nevertheless has a relatively open and large-scale character which makes it susceptible to change.

The distinctive character of **area 8.1a** relies on this openness, its rural agricultural character and the absence of prominent urban features, and it would be difficult to accommodate significant new development without affecting these characteristics or altering the balance between a predominantly rural or predominantly urban landscape. So, overall, the sensitivity of the landscape resource within area 8.1a is judged to be high (moderate to high value and high susceptibility to change), with very limited capacity to accommodate development without a significant impact on the integrity of the area's rural, agricultural character.

The existing balance will be affected, however, with the approved construction of the new southern section of Newgate Lane, which will provide a new connection from Newgate Lane to Peel Common Roundabout and a junction and link road to access the existing route of Newgate Lane. The road alignment just clips the extreme south-western corner of area 8.1b but cuts right through the middle of the southern half of area 8.1a and will inevitably introduce further activity, noise and urbanising features into the agricultural landscape, as well as resulting in physical disturbance to land and tree/vegetation cover.

However, the road corridor is relatively narrow and unaffected land within the rest of the area should be of a sufficient scale to remain viable as farmland and to maintain its essentially rural character. Mitigation proposals include new hedgerow and tree planting along the route to reduce its visibility and impact on the landscape and, if this is effective, the road itself may not have an overwhelming urbanising effect across the area as a whole in the longer term. However, significant further development in addition to the road scheme would almost certainly have this effect, potentially tipping the balance towards a predominantly urban character.

The sensitivity of the landscape resource within **area 8.1b** is slightly lower, as its rural character is already influenced by the proximity to built up areas/roads and the development of sports facilities and amenity uses within the area. Despite its more urbanised character, the area nevertheless has some value as part of the Borough's amenity landscape resource (as well as a role in the strategic gap and local GI network, see below) and its essentially open, undeveloped character would be significantly altered by further encroachment of built development. However, strong boundary vegetation would help to limit the influence of development within this area on the more rural landscape of area 8.1a to the south, particularly if located within the smaller northern field which is contained within very strong, well-treed boundaries.

LLCA 8.1 - WOODCOT

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

VIEWS, VISUAL FEATURES AND VIEWERS

Long distance visibility towards the area is low due to the typically low-lying and flat topography of the Borough (including the area itself), and the screening effects of boundary vegetation and surrounding built form. The area may be visible from some local elevated viewpoints (e.g. tall buildings in Fareham) and from higher ground at Portsdown, but from this distant location it forms an insignificant part of a wide panorama of the urban and coastal plain landscape.

Shorter-distance views into the area from built up areas to the north and east are largely filtered through established trees and boundary vegetation or interrupted by built form. Short distance visibility from the east is limited to private views from the rear of properties that back onto the area within the residential suburb of Bridgemary (e.g. Tuke's Avenue, Pettycot Crescent and around Heron Way). Short-distance visibility from the north is also significantly restricted by planting along the southern edge of the retail park, but there are open views through fencing into area 8.1b from the footpath that runs along the northern edge of the sports ground from Newgate Lane. Views of area 8.1a are largely screened from this direction by intervening vegetation.

Views from roads and public places to the south of the area are also very limited but there are some occasional views into the southern end of area 8.1a over or through the hedgerow that runs along Woodcote Lane/Brookers Lane at the far south of the area. Private properties along Woodcote Lane will experience similar views from upstairs windows.

The most significant views are from Newgate Lane which runs along the western side of the area, and from a number of properties along the roadside. Open views across large parts of areas 8.1a and b are possible from much of this length of road, where the roadside hedgerow is absent, gappy or trimmed to a low level. Land further to the east is less visible because of some intervening hedgerows or tree cover within the area.

Most of the available views are across open, undeveloped and relatively attractive countryside, with a strong backdrop of mature trees and limited evidence of built development or other urbanising features. The exceptions to this are views from the southern section of Newgate Lane between Peel Farm and Woodcote Lane, where a foreground of small-scale horse-grazed paddocks with wire fencing, shelters etc lends a fringe character to the view, and views into the sports fields in area 8.1b which have a more suburban character.

Currently, the main viewers are local residents within properties around the immediate periphery of the area, motorists and pedestrians on Newgate Lane and users of the sports facilities, public open space and footpath within area 8.1b. In future, the new alignment of Newgate Lane will increase the extent of the views available to road users, opening up most of area 8.1a to potential views from the road. Roadside planting will mitigate some of these effects but will take time to become effective.

LLCA 8.1 - WOODCOT

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Overall, visual sensitivity in this area is moderate to high. Although it is screened from longer-distance views, a large proportion of **area 8.1a** is highly visible from short distance views from Newgate Lane to the west, and it is overlooked by a number of properties around its periphery through or over boundary vegetation. The high intervisibility within the area means that these views are quite extensive across the area and they generally have an attractive, unspoilt rural character.

The extent of visibility will be exacerbated, at least over the short term, by the introduction of the new alignment proposed for Newgate Lane. This will open up additional views across the area from the new road and will affect the character of rural views across the area for a period of time. Roadside planting will mitigate some of these effects but will take time to become effective and visual sensitivity of the remaining undeveloped area will remain high.

While road users are only moderately susceptible to change, because of their focus on the road and fleeting nature of views, local residents are likely to be more focussed on the landscape and their surroundings and will be highly susceptible to change. The introduction of further development into the agricultural landscape is likely to have a significant impact on the character and quality of existing predominantly rural views, unless it can be successfully integrated within a substantial framework of new vegetation.

Area 8.1b is slightly less visually sensitive, partly because it benefits from more extensive tree cover around its boundaries, and also because the existing character of the views is already affected by some urbanising influences. Nevertheless, local residents and recreational users of the public open space and PRow network are highly susceptible to change and will value the existing open, essentially undeveloped character of this recreational landscape. Their visual amenity would be significantly affected by the introduction of built development within this area.

LLCA 8.1 - WOODCOT

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

CONTRIBUTION TO SETTING AND SETTLEMENT CHARACTER

The area lies within the lower-lying parts of the Borough, forming part of the coastal plain that slopes gently up to the foot of Portsdown Hill in the far north. While the area does not play a significant role in the topographic setting of the urban area, together with LCA7 to the west it forms part of a swathe of largely undeveloped agricultural landscape that lies between the urban areas of Fareham in the north, Stubbington in the west and Gosport in the east, providing clear visual and physical separation of these settlements. The significant role of the area in separating and preventing coalescence of these settlements is enshrined in policy, with the area designated a Strategic Gap in the Fareham Borough Local Plan.

The visual separation between settlements is apparent in all short distance views into the area from the edge of Fareham to the north, Newgate Lane to the west, Woodcote Lane to the south and in private views from Bridgemary (residential suburb of Gosport) in the east. The substantial vegetation along the northern and eastern boundaries provides strong definition of the edges of the urban areas of Fareham and Bridgemary and marks a clear distinction between town and country (albeit slightly blurred by the amenity uses in the north). This helps to reinforce the separate identity of each settlement and also provides the urban areas with an attractive, essentially rural setting.

The alignment of the approved Newgate Lane South encroaches within the Gap but, in itself, should not fundamentally alter the sense of separation, indeed it may in some ways strengthen it. The lack of roadside development along the new route will reinforce the experience of moving out of Fareham, passing through an area of undeveloped countryside and entering the urban area of Gosport beyond the Peel Common roundabout. Similarly the physical and visual gap across the area between the edge of Bridgemary and Peel Common may be more readily appreciated in views from the road as it passes through the middle of the gap between these two settlements.

The role of the area in separating Stubbington and Gosport is less easily perceived because of intervening development and other features that interrupt views, and occupy land, between the two areas. These include the Newlands Solar Farm, the waste water treatment plant and housing development along the western side of the Newgate Lane corridor at Peel Common. Nonetheless, the area does have a critical role in preventing the coalescence of these areas and this is likely to become more significant with the future redevelopment of land at MCA Daedalus and construction of the Stubbington Bypass to the west, within the existing gap between built areas.

The area does not play a significant gateway role for the Borough as a whole, being some way to south of the M27 and main railway line and therefore not visible from the main approach routes. However, it does provide a strong rural backdrop along Newgate Lane which forms part of a key approach into the Borough from Gosport District to the south via the B3334. This reinforces the sense of moving between settlements and districts.

Overall, **area 8.1** plays an important role in defining the edges, separate identity and settings of Fareham and Gosport and a critical role in preventing their coalescence. It also makes an important contribution to the swathe of landscape that currently separates Stubbington from Gosport, a role that may become more critical to maintain with the redevelopment of the MCA Daedalus site in future years.

LLCA 8.1 - WOODCOT

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Given the area's designation as part of the Strategic Gap and the role it plays in preventing coalescence between the settlements of Fareham, Stubbington and Gosport, the area is highly sensitive to change. The landscape lacks any strong landform feature (e.g. ridges or valleys) or a mature framework of woodland that could potentially contain and provide a strong landscape edge to any major extension of built form into this area. Intrusive development within the area would inevitably erode the visual and physical separation that currently exists and potentially alter the character of the landscape settings of the two settlements from predominantly agricultural to predominantly urban. Ultimately, the function and integrity of the area as farmland could be significantly eroded to the point where the gap becomes a corridor of greenspace between urban areas, or an 'urban park', rather than a functioning area of agricultural landscape with a distinct character and identity.

The proposed new bypass could potentially erode the integrity of the existing gap if it is regarded as forming a potential new edge for development. If the rural, undeveloped and open character of this area is to be maintained, it will be crucial to keep the urban boundaries as tightly drawn as possible and avoid infilling the land between the existing urban edges and the new road. Overall, therefore, there is very limited scope to accommodate development without a significant impact on the integrity of the area's rural, agricultural character and the role it performs in maintaining the separate identity and character of the settlements and their landscape settings.

LLCA 8.1 - WOODCOT

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

CONTRIBUTION TO
GREEN INFRASTRUCTURE NETWORK

This area does not support a wide range of GI assets in terms of biodiversity or landscape features (there are no designated features) but the area as a whole does make a contribution to the local GI network as an extensive area of undeveloped greenspace between the urban areas of Fareham and Gosport, albeit with limited public access. The tree lined boundaries and reasonably intact structure of hedgerows provide a valuable framework of vegetation within this large-scale, intensively managed landscape and the playing fields, public open space and footpath within area 8.1b are valuable recreational assets for local people. The footpath along the northern edge of the area and Woodcote Lane/Brookers Lane in the south provide east-west access links between the residential suburbs of Gosport across the strategic gap to Stubbington and beyond to the Meon Valley. There are no other PRow or access routes across or within area 8.1a.

The PUSHGI strategy identifies a sub-regional scale blue corridor following the drainage network that runs through the western side of the area southwards to join the River Alver (within Gosport District). The strategy includes a project (C7) to strengthen wildlife corridors connected to the River Alver but this is focused on the Alver Valley outside of the Borough. The Fareham GI strategy does not identify any specific projects within the boundary of this area.

LLCA 8.1 - WOODCOT

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area's GI value lies in its largely open, undeveloped nature, the public open space at Speedfields Park and the functional connections between Newgate Lane and Bridgemary provided by the public footpath to the north and Woodcote Lane to the south. The area is moderately sensitive to change. Any development that compromised the PRow network or the sense of openness and being 'in the countryside' would have an adverse effect on the GI network.

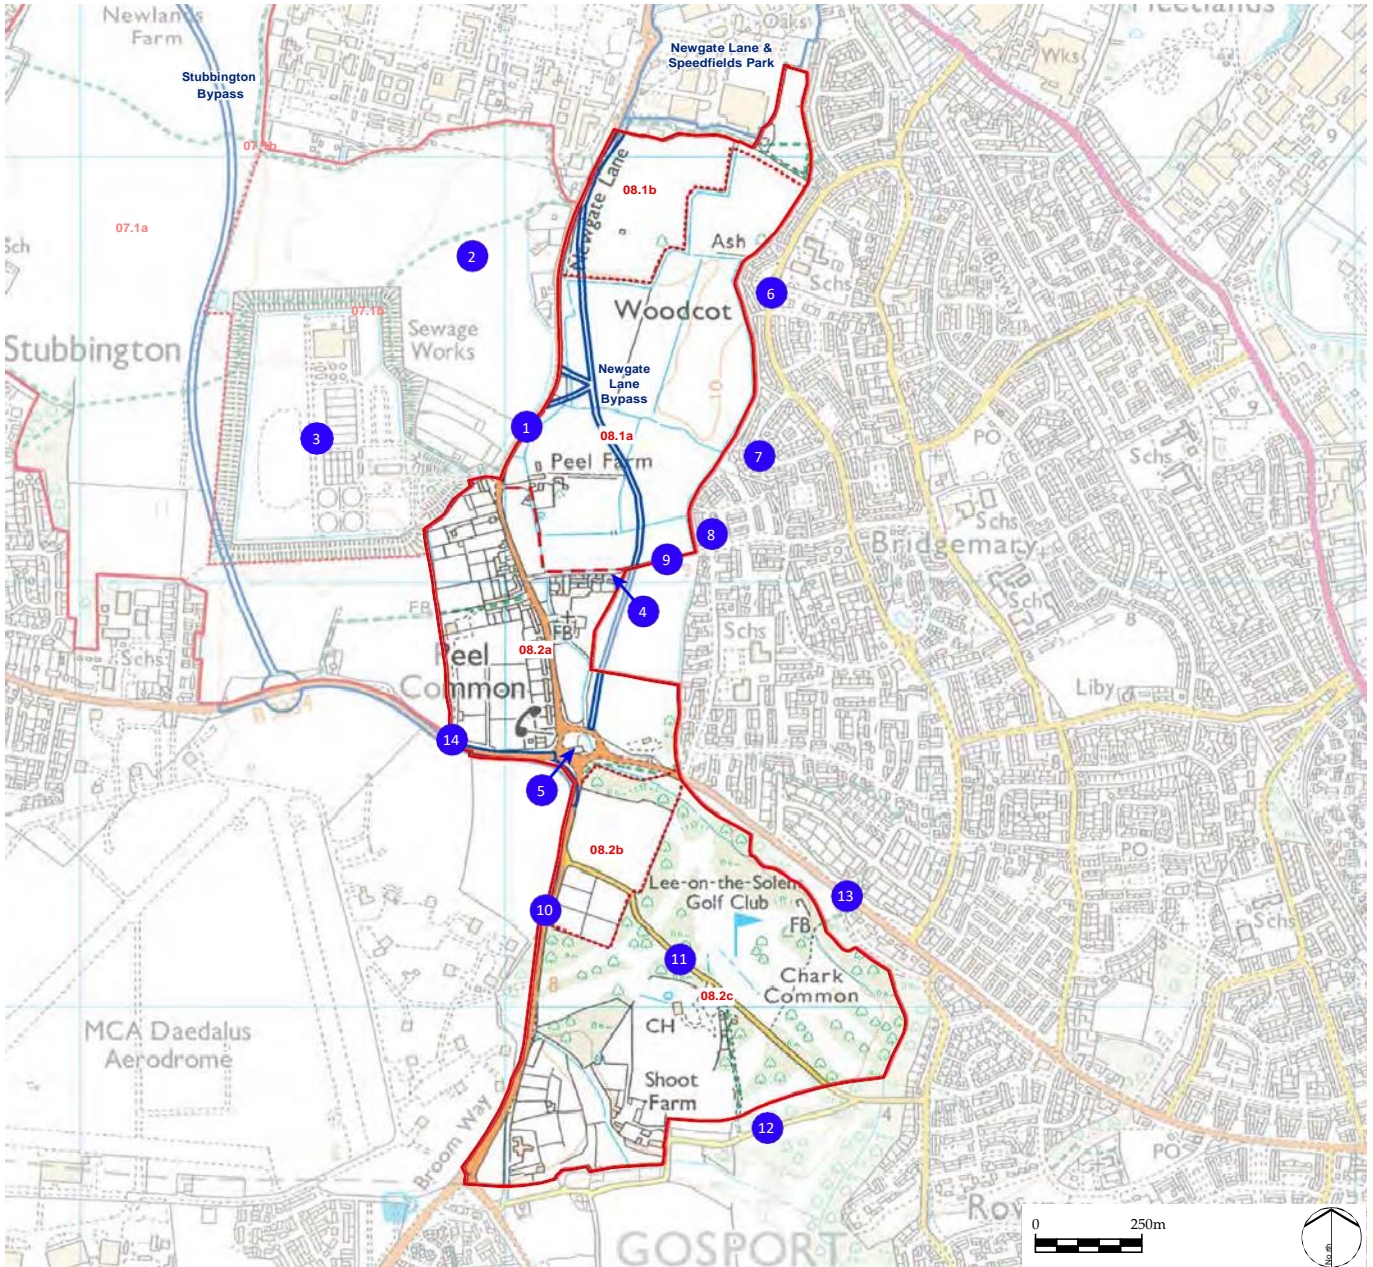

This area would benefit from improvements and extension of the local GI network, through major investment in the reinstatement or creation of hedgerows, woodlands and other habitats that have been lost or damaged by agricultural intensification, and through the extension of public open space or access connections through the area.

The main impacts of new road on GI resources are its potential interference with the east-west footpath link between Bridgemary and Peel Common that crosses the area along Woodcote/Brookers Lane, the loss of small areas of amenity space within the Speedfields Park and Brookers Field Recreation Grounds and the loss of some trees and hedgerow vegetation along the road alignment. Mitigation proposals will offset much of this impact.

LLCA 8.1 - WOODCOT

DEVELOPMENT CRITERIA AND ENHANCEMENT OPPORTUNITIES

As a whole, this area is of high sensitivity primarily on account of its critical role in preventing the coalescence of the urban areas of Fareham, Bridgemary and, to a lesser extent, Stubbington, and in defining the edges, setting and separate identity of these settlements. The relatively small size of the area, the high degree of intervisibility and its generally unspoilt, rural character make it particularly vulnerable to change. The generally open nature of the landscape means that it is difficult to integrate development without it being highly visible and potentially affecting the rural undeveloped character across a wide area, as well as eroding the physical, visual and perceived gap between settlements. The situation is further complicated by the proposed new road which will have some effect on the integrity and character of the landscape resource and undeveloped gap. Even a small amount of encroachment of further built development within the area could exacerbate these effects to the point at which the character of the whole area may be fundamentally altered.

There may be potential for some modest, small scale development associated with existing recreational land uses and built form within area 8.1b, as long as it is closely related to existing features and can be successfully integrated within the existing structure of hedgerows and trees without altering the essentially ‘undeveloped’ character of the amenity landscape or the wider agricultural landscape of area 8.1a.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban setting and green infrastructure, development proposals will need to:

- ▣ Protect the open, predominantly agricultural and undeveloped, rural character of area 8.1a;
- ▣ Maintain and strengthen the existing structure of trees, hedgerows and other mature vegetation, to maximise its landscape and wildlife value and to minimise impacts on the rural character of the landscape;
- ▣ Maintain the essentially open, undeveloped character of the public open space, playing fields and sports facilities within area 8.1b, and be designed to relate closely to the existing structure of trees hedgerows and existing characteristic built features within the area;
- ▣ Avoid any major incursion of the urban ~~area~~ into the countryside beyond existing well-defined boundaries, or create significant new pockets of urban or urbanising development within open farmland;
- ▣ Protect the area’s role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development strung out along road corridors (e.g. along the existing and proposed new alignment of Newgate Lane) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;
- ▣ Maintain significant distance and separation from the corridor of the new road to minimise its urbanising effects upon the rural character of the area;
- ▣ Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the open, flat landscape;
- ▣ Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area;
- ▣ Provide substantial new investment in the landscape through extensive tree, hedgerow and woodland planting using native broadleaved species appropriate to the locality and soil conditions and habitat creation to diversify the intensively farmed landscape;
- ▣ Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

LANDSCAPE CHARACTER, QUALITY AND VALUE

Landscape character, quality and value

This area forms the southern part of the Woodcot-Alver Valley LCA and the south-eastern part of the wider Stubbington–Fareham Strategic Gap. The area forms part of the flat, low-lying coastal plain but is very different in character and scale from the open agricultural landscape to the north and west. It is characterised by a mixed pattern of wooded common, small-scale pasture and ribbon development along the corridors of the River Alver and Newgate Lane and is bounded to the east by the urban edge of Gosport, to the west by the Daedalus airbase, to the north by the Peel Common Waste Water Treatment Works and arable farmland, and to the south by the open amenity land of the Alver Valley.

Area 8.2a comprises a strip of land on either side of Newgate Lane, extending from Peel Farm in the north to the Peel Common roundabout in the south. To the west of the road, the area is occupied by residential ribbon development backed by gardens and a small-scale pattern of fields, paddocks and other plots of land, contained by strong boundary vegetation to the rear. The eastern side of the road is characterised by a similar patchwork of small-scale, horse grazed pastures, built development south of Woodcote Lane (including housing, church and care home), gardens and small parcels of land enclosed by woodland, trees and hedgerows. In the far south-east corner is an area of public open space, including sports pitches and associated buildings. The character of this corridor is significantly affected by the influence of busy roads, street lighting, built development and other urban land uses, while the management of the small-scale pastures and plots of land - with their associated rather ramshackle fencing and structures - lends a distinct fringe character to the remaining unbuilt landscape. This situation will be exacerbated by the construction of the proposed new Newgate Lane-Peel Common bypass which will further fragment and intrude upon areas of undeveloped landscape. Overall landscape quality is therefore substantially degraded although the strong structure of vegetation that encloses this area is of some landscape value.

On the southern side of the Peel Common Roundabout lies Chark Common, which marks a distinct change in character from the open arable landscape of the northern part of the Woodcot-Alver Valley LCA, to a landscape which is strongly enclosed by extensive cover of woodland and trees, within which small-scale fields or open spaces are seemingly 'carved out' from the woodland cover. Within the overall area, **area 8.2b** is distinctive in that it forms a relatively large, regularly shaped parcel of open land, divided into smaller horse-grazed paddocks by fencing. This area shares some of the fringe characteristics of the roadside paddocks further north (e.g. fencing, land management, structures etc) but has a less urbanised context and is framed by a strong, attractive backdrop of woodland, mature trees and hedgerows. Its quality is less degraded and it retains a semi-rural character.

The remainder of the Chark Common area (**area 8.2c**) is dominated by the Lee-on-Solent Golf Course, which extends across the majority of the area, excluding the far south-west corner (comprising fields in use for horse-grazing along with former farm buildings converted for residential use). The landscape is characterised by open areas of grassland, heathland and wetland habitats (associated with the River Alver) contained within a strong structure of woodland belts, copses, mature trees and scrub. Parts of the land are intensively managed as part of the golf course (e.g. greens, fairways, bunkers etc.) and there are associated buildings and structures, which have an amenity character that somewhat detracts from the rural character of the landscape. However, most of the area is designated as a SINC (for its woodland, heathland and wetland habitats) and retains an attractive, enclosed and well-treed character with some 'semi-natural' qualities. The strong tree cover also provides an effective buffer to the influence of surrounding roads and neighbouring development within Gosport. The area is generally unspoilt and of relatively high landscape quality although it is not covered by any current national or local landscape designation.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The sensitivity of the landscape resource varies within this overall area. **Area 8.2a** is already substantially degraded by urban influences and has a predominantly 'fringe' character which reduces its sensitivity to change. This will be exacerbated by the construction of the proposed bypass. Further development within this area would further erode the extent of surviving 'undeveloped' land but would not have a significant effect upon the overall character and quality of the landscape resource. Notwithstanding its value as part of the strategic gap or other roles, in landscape resource terms alone this area has relatively low sensitivity and high development potential.

Area 8.2b also has fringe qualities but has not been degraded in the same way. It retains an essentially rural, pastoral character that is susceptible to change and would be significantly affected by the introduction of permanent built development. The area is physically and visually detached from other built form by the strong surrounding woodland framework and significant development would appear as an isolated area of built land within open countryside. A section of the western boundary along Broom Way is open and there is a visual relationship between the area and currently undeveloped land within the Daedalus site to the west which would also be affected by development within this area. Redevelopment proposals for the Daedalus site may change the situation but current indications suggest that the undeveloped 'green' character of this corner of the site is to be maintained. Overall, therefore, landscape sensitivity is judged as moderate to high and the potential for development is low.

Area 8.2c is highly sensitive to change. Although its use as a golf course has altered the underlying character of the landscape it nevertheless has an attractive wooded and enclosed character and supports a mosaic of other habitats and features of landscape and ecological value. Built development would undoubtedly intrude upon its quiet, semi-rural and secluded character. There may be some modest potential for accommodating small-scale development (i.e. individual buildings) within the south west corner of the area, where it is associated with existing built form and can be more successfully integrated within the existing vegetation structure, but otherwise there is very limited potential for development within the area.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

VIEWS, VISUAL FEATURES AND VIEWERS

The area's low lying position within the coastal plain means that there are few long distance views. The area may be perceived as one part of a much wider panorama taking in the urban and coastal landscapes in views from higher ground to the north of the Borough. However, its small size and lack of landmark features means the area is generally indistinguishable from the wider landscape within long-distance views.

More locally, large parts of **area 8.2a** are visible from roads, adjacent dwellings, lanes, public rights of way and open spaces within the area itself, although there are some small pockets of land enclosed behind built form and strong boundary vegetation that are less visible from public areas. The character and quality of the available views is already heavily influenced by urban characteristics and would not be fundamentally altered by additional built development.

Area 8.2b is largely enclosed within a strong wooded framework which restricts its visibility from surrounding areas but it is open along parts of its western boundary, allowing some direct views from adjacent Broom Way. There are also occasional filtered glimpses through the roadside trees along Brune Lane, which cuts through the middle of this area. Given that the main viewers will be road users, the visual sensitivity of this area is moderate and could be reduced further by mitigation planting to close the gap along the western boundary, although this will take time to become effective.

Area 8.2c is generally of low visual sensitivity. The extensive cover of trees and woodland around and within the area prevent all but glimpsed views from surrounding roads, through trees and gaps in the boundary vegetation. There are no views from neighbouring urban areas to the east. There is a public footpath that cuts through the golf course, linking Shoot Lane with Brune Lane, and another sort section of footpath into the area off Rowner Lane on the northern side of the area, otherwise there are no other publicly accessible viewpoints in this area.

The main viewers of this area are therefore local residents within Peel Common (area 8.2a), users of the main road network (Newgate Lane, Broom Way) and minor local lanes (Brune Lane, Shoot Lane), users of the limited network of PRow and open spaces, and golf course members. Apart from some attractive views within area 8.2c, the value of the landscape as a visual resource for these receptors lies primarily in its character as undeveloped land rather than its intrinsic scenic quality.

© Barry Shimmion

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Visual sensitivity is relatively low within this area. Area 8.2a is highly visible but the character of the views is such that further development is unlikely to have a major impact on visual amenity. Area 8.2b is visually well-contained apart from a section of its western boundary, but this visual exposure could be mitigated by additional planting to close the gap. Likewise, area 8.2c is also highly visually contained by the extensive cover of trees and woodland within and around the area, with very limited publicly accessible views. However, balanced against this is the relatively unspoilt character of the views in the Chark Common area which are highly susceptible to change, and the high level of sensitivity of people using the PRow network (albeit very restricted) and otherwise accessing the area for recreational purposes, who appreciate their surroundings and will be very aware of changes.

Across much of the area, therefore, there are limited opportunities to integrate development into the visual environment without unacceptable adverse effects on the character and quality of existing views and on the visual amenity of sensitive viewers. However, there may be some modest scope for accommodating small-scale development (i.e. individual buildings) within less visible, well-contained pockets of land within areas 8.2a and in the south-western corner of area 8.2c, where the existing vegetation structure has the potential to limit effects on high quality views and visual amenity.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

CONTRIBUTION TO SETTING AND SETTLEMENT CHARACTER

The area lies within the lower-lying parts of the Borough, forming part of the coastal plain that slopes gently up to the foot of Portsdown Hill in the far north. While the area does not play a significant role in the topographic setting of the urban area, together with LCA7 to the west (and area 8.1 to the north) it forms part of a swathe of largely undeveloped landscape that lies between the urban areas of Fareham in the north, Stubbington in the west and Gosport in the east, providing clear visual and physical separation of these settlements. The significant role of the area in separating and preventing coalescence of these settlements is enshrined in policy, with the area designated a Strategic Gap in the Fareham Borough Local Plan.

The role of **area 8.2a** as part of the gap is evident to the east of Newgate Lane, where the strip of roadside paddocks forms part of a wider corridor of undeveloped landscape between the road and the western edge of Bridgemary. However, the role of this area in maintaining the gap westwards towards Stubbington is less easy to perceive from the Newgate Lane corridor as views in this direction are blocked by built development along the roadside at Peel Common. Nevertheless, when viewed from the west (from the Gosport Road) it becomes apparent that Peel Common is an isolated small settlement that lies within the wider gap, rather than defining its western boundary or connecting to a larger urban area. It will be vital to maintain this ‘isolation’ of development at Peel Common if the physical and visual integrity of the wider gap is to be maintained.

The Peel Common Roundabout is a critical ‘pinch point’ within the gap between Peel Common and the edge of Bridgemary where there is a real risk of the two areas coalescing. This will be further exacerbated by the new bypass which eats into the remaining undeveloped land to the north of the roundabout and also, potentially, by redevelopment of the Daedalus site to the south. It will be vital to protect the undeveloped landscape within the public open space to the east of the roundabout in order to maintain a physical, visual and perceptual gap between the built areas.

Areas 8.2b and c also play a pivotal role in maintaining separation of urban areas and as a link between the upper and lower parts of the Alver Valley corridor. This triangle of semi-rural, heavily wooded landscape is important not only in physically and visually separating built areas at Peel Common and Bridgemary but also in separating Bridgemary from the northern edge of Lee-on-the-Solent. The redevelopment of MCA Daedalus may potentially exacerbate the perceived closing of the gap between Lee-on-the-Solent and Peel Common. It will be essential, therefore, to maintain the undeveloped character of all sides of this triangle, avoiding encroachment of development along Broom Way, Shoot Lane and Gosport Road.

This southern area also forms a vital link in the wider Alver Valley landscape corridor which extends southwards into Gosport District to the coast, providing a distinct edge and landscape setting to the urban areas to the south. It will be very important to maintain the integrity of this continuous corridor of undeveloped landscape and avoid the encroachment of development within and across it.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Given the area's designation as part of the Strategic Gap and the role it plays in preventing coalescence between the settlements of Fareham, Stubbington, Bridgemarky and Lee-on-the-Solent, the area is highly sensitive to change. The area also contributes to the perceived sense of separation between Gosport District and Fareham Borough. Any development that reduced the physical or visual separation between these settlements would have an adverse effect on the integrity of the gap and on the area's contribution to the distinct identity and settings of the surrounding urban areas. Consequently, the area offers very limited development potential in respect of its role in maintaining the separation and setting of settlements. The only opportunities may lie within areas that are closely associated with existing development (e.g. at Peel Common or in the SW corner of area 8.2c) and can be integrated within the landscape without any physical or perceived encroachment within the gap.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

CONTRIBUTION TO GREEN INFRASTRUCTURE NETWORK

The area's main contribution to the GI network is through its role as an extensive area of undeveloped land between the urban areas of Fareham and Gosport and, in particular, as part of the wider corridor of greenspace and habitats that follow the course of the River Alver, identified within the PUSH GI strategy as a 'sub-regional scale blue corridor'. The strategy includes a project (C7) to strengthen wildlife corridors connected to the River Alver but this is focused on the Alver Valley outside of the Borough.

The northern part of the area (8.2a) does not support a wide range of designated GI assets but the framework of mature hedgerows and trees and the playing fields to the east of the Peel Common Roundabout are all valuable GI resources in this urbanised area. Woodcote Lane and the footpath linking Newgate Lane with Gosport Road also provide a valuable access link connecting Bridgemary with Stubbington across the middle of this area.

The southern part of the area (**areas 8.2b and c**) contains significant biodiversity assets in the extensive woodland, grassland, heathland and wetland habitats (designated as a SINC) within the golf course and surrounding area but is relatively inaccessible to the public, with only three short lengths of public footpath and no public open space. An extension of public access in this area, particularly along the river corridor to link with the Alver Valley Country Park to the south (in Gosport District) would be desirable. The Fareham GI strategy identifies project BW14 which aims to create 'cross boundary links from South Fareham Gap and Daedalus to the Alver valley Country Park' and 'to provide a linear corridor between Stubbington, Lee-on-the-Solent and Gosport'.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area's primary GI value lies in its largely undeveloped nature and the extensive network of woodland, grassland, heathland and wetland habitats within the corridor of the River Alver and within Chark Common in the south of the area. These assets are particularly scarce and valuable within the heavily urbanised and pressured context of this part of the Borough and are therefore very sensitive to change.

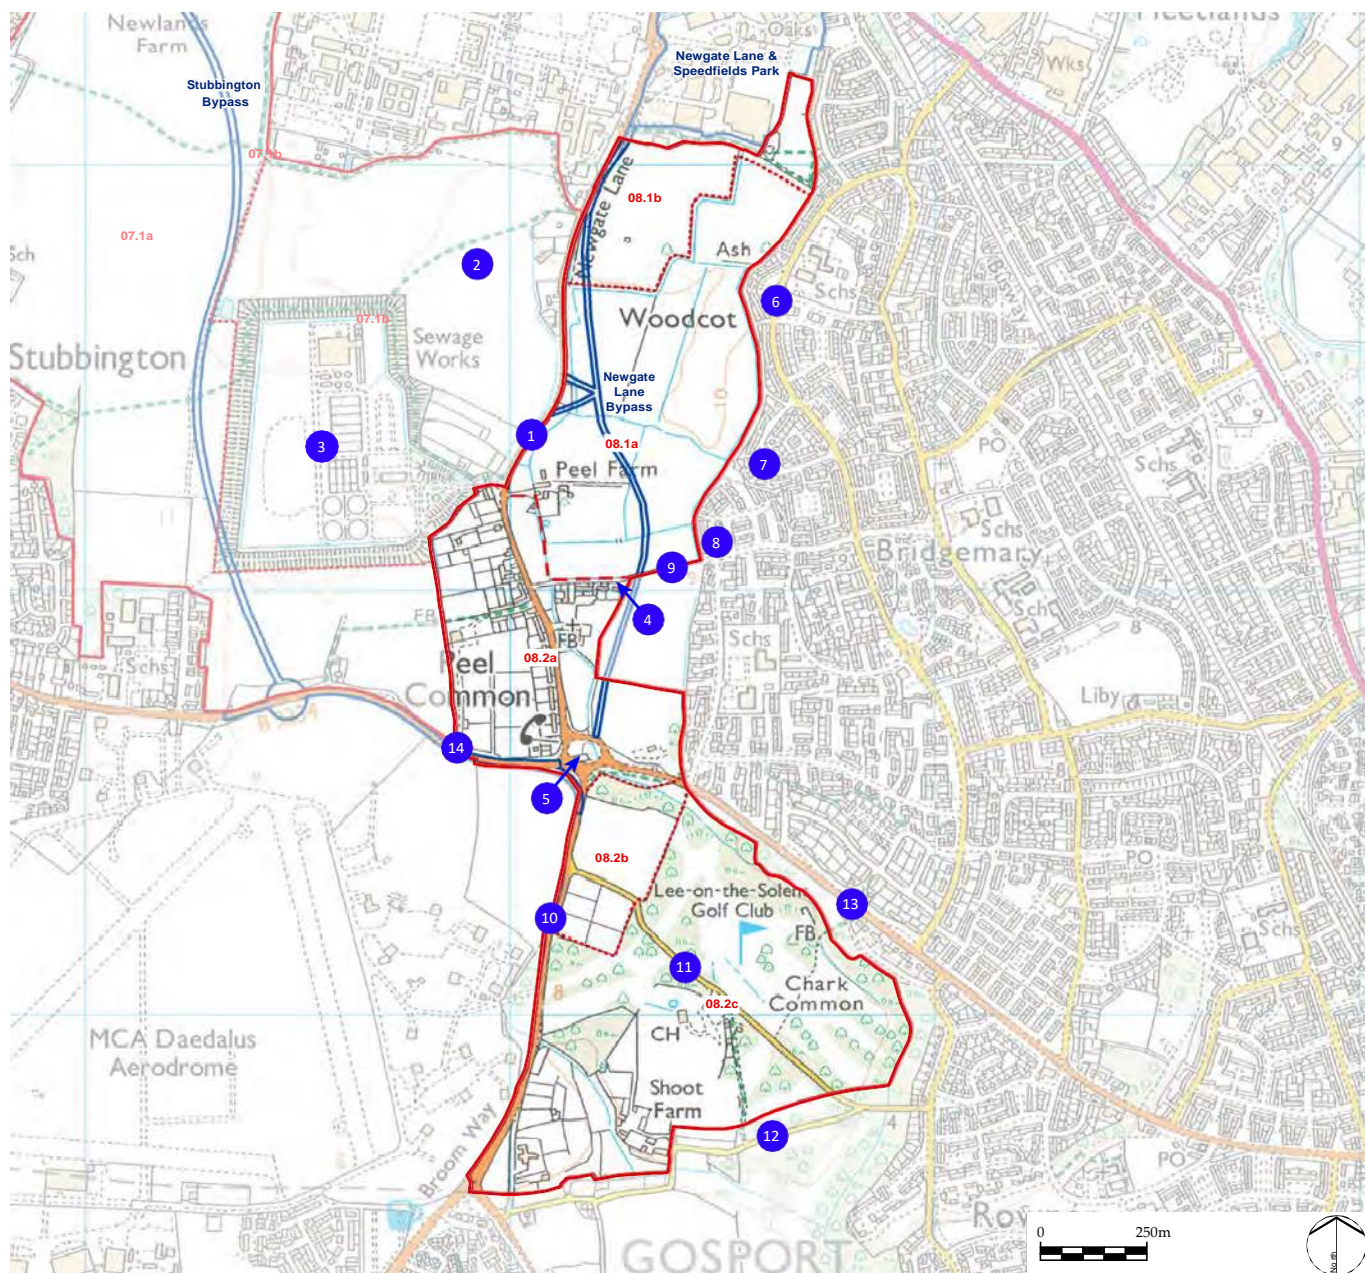

The existing network of public access an open space is fairly sparse within the area and existing features need to be protected and their function and quality enhanced. The area would benefit from improvements to the local access network to provide improved east-west links between urban areas and the wider access network of the coastal plain, and north- south links to connect the northern part of the river corridor with the Alver Valley Country Park and the coast.

Any new development would need to maintain the largely 'undeveloped' character of the area, ensure the protection of features of landscape or biodiversity value, and maintain and extend the provision of access and public open space opportunities. There is very limited scope for this to be achieved in this highly constrained area.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

DEVELOPMENT CRITERIA AND ENHANCEMENT OPPORTUNITIES

As a whole, this area is of high sensitivity primarily on account of its critical role in preventing the coalescence of the urban areas of Fareham, Bridgemary, Lee-on-the-Solent and, to a lesser extent, Stubbington, and in defining the edges, setting and separate identity of these settlements. The narrowness of the gap between development at Peel Common and the edge of Bridgemary means that this area has a particularly vital role in maintaining physical, visual and perceived separation and even a limited amount of development in the ‘wrong’ place, particularly along the main roads that enclose the southern part of the area, could threaten the integrity of the gap. The situation is further complicated by the proposed new bypass which will inevitably have some effect on the integrity and character of the landscape resource and undeveloped gap and further ‘squeeze’ the gap at its narrowest point.

Other key sensitivities include the important range of habitats within the Chark Common area and the area’s contribution to the corridor of undeveloped greenspace (albeit largely inaccessible) along the course of the River Alver, from Fareham to the Alver Valley Country Park and beyond to the coast.

There may be potential for some modest, small scale development associated with existing built form at Peel Common or in the far south-west of the area, as long as it is closely related to existing features and can be successfully integrated within the existing structure of hedgerows and trees without altering the essentially ‘undeveloped’ character of the landscape or threatening the integrity of the gap.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban setting and green infrastructure, development proposals will need to:

- ▣ Safeguard the area’s vital role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development along road corridors (e.g. Broom Way, Shoot Lane and Gosport Road) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;
- ▣ In particular, protect and strengthen the undeveloped character of the public open space to the east of the Peel Common roundabout;
- ▣ Maintain the distinctly ‘isolated’ nature of settlement at Peel Common and ensure that any potential small-scale infill development within this area effectively ‘rounds off’ rather than extends the settlement boundary, to avoid the risk of physical or perceived coalescence with other built areas;
- ▣ Protect the semi-rural, undeveloped character of areas 8.2b and c;
- ▣ Maintain and strengthen the existing structure of woodland, trees, hedgerows and other mature vegetation in all parts of the area, to maximise its landscape and wildlife value;
- ▣ In particular, maintain and enhance the mosaic of woodland, heathland, grassland and wetland habitats of value within the Lee-on-the-Solent golf course at Chark Common and encourage further habitat creation and diversification within intensively managed areas to maximise wildlife and landscape value;
- ▣ Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the landscape;
- ▣ Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area, particularly along the River Alver corridor and with the Country Park to the south;
- ▣ Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.
- ▣ Use native broadleaved species appropriate to the locality and soil conditions in new tree and hedgerow planting.

APPENDIX FL&BH 1.2.2

COMPOSITE LANDSCAPE STRATEGY

- KEY**
- Site boundary
 - Existing trees/vegetation to be retained
 - Existing drainage
 - Existing public rights of way
 - Newgate Lane relief road Southern Section (Currently under construction)
 - Proposed development cells and units
 - Proposed key frontages
 - Proposed secondary frontages
 - Proposed buffer planting to eastern and southern boundaries
 - Proposed tree planting
 - Proposed feature tree planting
 - Proposed hedgerows
 - Proposed footpaths
 - Proposed attenuation area
 - Proposed play areas
 - Continuity of green infrastructure connections to the Alker Valley
 - Direct connection to existing settlement pattern

Eastern boundary vegetation (existing and proposed) will form a partial screen and help assimilate the developments

Open spaces and landscape planting reinforce the defined edge along Newgate Lane

Existing vegetation (including hedgerows) retained where possible and used to define development parcels, reflecting scale and pattern of the local landscape

Retained sense of openness along 'old' Newgate Lane giving focus of open space within the settlement pattern

Land at Newgate Lane, (North) and Land at Newgate Lane (South) Fareham, Hampshire
 Fareham Land Partnership and Bargate Homes LP

Executive Summary

Fareham Borough Council is in the process of producing a new Local Plan to address housing, employment and retail development requirements across the Borough up to 2037. Once adopted, the new Local Plan will replace the adopted Local Plan Part 1 (Core Strategy) and Local Plan Part 2 (Development Sites & Policies).

To support Local Plan development, Fareham Borough Council commissioned the Landscape Team, in Hampshire County Council, to undertake a technical review of:

- six proposed Areas of Special Landscape Quality (ASLQ).
- two proposed Strategic Countryside Gaps: Meon Gap and between Fareham and Stubbington.

Fareham Borough Council's recent past experience in the determining of two planning applications, identified the need to address the 'valued landscapes' of Fareham.

"Two recent planning appeal decisions demonstrated how the argument of valued landscapes could help to determine planning decisions. Both decisions were on sites located in the Lower Meon Valley (Land west of Old Street, Stubbington and Land east of Posbrook Lane, Titchfield) and the Inspectors recognised the high-quality landscape concluding that the Lower Meon is a valued landscape.

...with this in mind, the Council proposed the designation of valued landscapes as part of the Draft Local Plan Update consultation in the summer of 2019."(page 27, Fareham Draft Local Plan 2036)

There was also the need to clarify the role that Strategic Gap designation plays within planning policies in the Countryside, and establish the clear difference between a policy that addresses landscape quality and a policy that addresses the prevention of coalescence of settlements with separate identities, as:

"...Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities." (page 27, Fareham Draft Local Plan 2036)

This technical review is published at the Regulation 19 stage to support the proposed designations.

The technical review undertaken during March to July 2020, reviewed recent relevant documents and developed an appropriate and concise methodology for determining Areas of Special Landscape Quality (or ASLQ), based primarily on criteria from the Guidelines for Landscape and Visual Impact Assessment (GLIVIA) 3rd Edition, Box. 5.1, supported by other examples of good practice and case law.

As there is no standard national guidance on Strategic Gap determination, a methodology and set of criteria were established for determining Strategic Gap characteristics and boundaries through review and analysis of pertinent recent Strategic Gap proposals developed for other Local Plans and through Fareham Borough Council's own Strategic Gap history.

Executive Summary

The resultant analysis and site surveys of all Fareham Borough's Landscape Character Areas concludes that:

- The six proposed ASLQ put forward for designation in the Fareham Local Plan Supplement (Reg 18 consultation document, Jan-March 2020), can be considered as 'valued landscapes' as they scored highly against the assessment criteria and therefore should be identified for ASLQ designation in the Fareham Local Plan 2037, with some modifications made to boundaries, to bring them into line with the current Fareham Borough Landscape Character Assessment 2017, but also;
- Through this process, two further landscape character areas in Fareham Borough were identified as having equivalently 'valued landscape' characteristics and so it is recommended that Chilling-Brownwich Coastal Plain and parts of the Cams to Portchester Coast should also be designated.
- Conservation Areas where they sit in or adjacent to a proposed ASLQ should be included as part of the ASLQ because of their mutually supportive relationship.

The resultant analysis and site surveys of the two Strategic Gaps, conclude that:

- The Meon Strategic Gap is proposed for continued designation, having both strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence, that could result from continued pressure for expansion of the Western Parishes; North and West Fareham, and from pressure for the expansion of Stubbington.
- One moderate amendment is proposed to the North Eastern corner of the Meon Gap; that is an extension to the Gap around Funtley to prevent Funtley from coalescing with North and West Fareham.
- The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence through continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there are some opportunities for development to be accommodated within the landscape, without compromising the Strategic Gaps function.

Executive Summary

Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:

- An area to the South of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function.
- An area to the north west of Stubbington south of Oakcroft Lane and east of Ranvilles Lane, as some development could be visually and physically absorbed into the Gap without compromising the Gap function.

It is also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past.

In order to develop appropriate Green Infrastructure mitigation and enhancement associated with the areas of recent and future change described above, in the Fareham-Stubbington Gap, Green Infrastructure Frameworks or Strategies are required for each area.

Chapter 4: Strategic Gaps

Figure 4.1. Photograph taken from road that leads to The Great Barn, near Titchfield Abbey, looking East towards edge of Fareham, in The Meon Gap. Beyond the tree line is Fareham. Photograph: Charlotte Webb June 2020

Chapter 4: Strategic Gaps Overview

1. This chapter describes the application of methodology to determine the extent of the two Strategic Gaps in the draft Fareham Local Plan 2036 and gives specific recommendations for each Gap:
 1. Fareham/Stubbington and the Western Wards (the Meon Gap)
 2. Fareham/Bridgemary and Stubbington / Lee-on-the-Solent (the Fareham-Stubbington Strategic Gap)

Role and purpose of the Strategic Gap

2. As a reminder of the previously stated purpose of the Strategic Gap:

“The primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities.”
(Fareham Publication Local Plan 2037)

First Filter to establish Study Area Extents

3. The Strategic Gap Study Area extents are shown in Figure 4.1. and detailed site analysis sheets can be found in Appendix 5. The study areas were established to show specific tracts of land between the settlement boundaries of nearest neighbour settlements.

Strategic Policy DS2: Development in Strategic Gaps

“In order to prevent the coalescence of urban areas and to maintain the separate identity of settlements, Strategic Gaps are identified as shown on the Policies map between the following areas:

- 1) *Fareham / Stubbington and the Western Wards (Meon Gap)*
- 2) *Fareham / Bridgemary and Stubbington / Lee-on-the-Solent (Fareham- Stubbington Strategic Gap)*

Development proposals will not be permitted where they significantly affect the integrity of the gap and the physical and visual separation of settlements or the distinctive nature of settlement characters.”

4. Both the Meon Gap and Fareham-Stubbington Gap are identified as ‘Cross-authority’ Gaps, with the Meon Gap running north into Winchester City Council Local Plan Area and the Fareham-Stubbington Gap running South-East into Gosport Borough Council Local Plan Area. Identified through PFSH Position Statement 2016.
5. Within the sub-region of South Hampshire, the purpose of the Meon Gap *“is of particular significance as it demarks the boundary of the Portsmouth and Southampton Housing Market Areas”* .(PFSH Position Statement 2016)

Chapter 4: Strategic Gaps Overview

-
5. Within Fareham Borough the aim of the Meon Gap is to prevent coalescence of Fareham and Stubbington with the Western Wards, but also important is the avoidance of coalescence with the settlement of Titchfield, that lies within the middle of the Gap. As stated earlier, the Meon Gap runs northwards following the River Valley across the borough boundary into Winchester City Council Local Authority Area, where Winchester Local Plan Policy CP18 - Settlement Gaps' includes the 'Meon Gap' (Whiteley – Fareham/Fareham Western Wards), with a local gap between North Fareham SDA and Knowle and Wickham designated under Policy SH4: North Fareham SDA.
6. The aim of the Fareham- Stubbington Gap is to avoid coalescence between the settlements of: Fareham and , Bridgemary, with Stubbington and Lee-on-the-Solent. Gosport Local Plan also supports PFSH Position Statement 2016 and has designated a Strategic Gap which runs from the Borough border through the Alver Valley, but also Brookers Field Recreation Ground on the border with Fareham, is designated as Strategic Gap. The settlement boundary for Bridgemary, Gosport, lies on the Borough boundary with Fareham. The Strategic Gap designation is contained within Gosport Local Plan 2011-2029 adopted October 2015.
7. As stated in Chapter 1, a key demonstration of pressure for development comes from the potential site allocations assessed in the Strategic Housing and Employment Land Availability Study, December 2019. The pressure for development in the Fareham-Stubbington Gap, is very significant to the risk for complete loss of countryside gap. The pressure in the Meon Gap is more moderate, with a 'squeezing' of the central area around Titchfield, but with a significant pressure to develop pockets of land along the west side of Titchfield Road, between Titchfield and Stubbington. There is moderate pressure for development on the Western edge of Fareham and between Titchfield and Titchfield Common and Southwards pressure from Titchfield along Posbrook Lane. The indication of development pressure Southwards from Titchfield Common to Hook, is also of note, with the potential to put pressure on Chilling-Brownwich Coastal Plain.
8. In addition to the two Appeal Sites at Posbrook Lane, Titchfield, and Old Street, Stubbington, which highlighted 'valued landscapes' in the Meon Valley, recent noteworthy planning applications which also highlight development pressures, within the Strategic Gaps are:
- P/14/0841/FP: Land of Cartwright Drive, Titchfield
 - P/19/0301/FP: Land East of Crofton Cemetery and West of Peak Lane, Fareham
 - P/14/0222/OA: Longfield Avenue, Land to the South – Fareham

Potential Development Impact

7. As stated in Chapter 1, a key demonstration of pressure for development comes from the potential site allocations assessed in the Strategic

Chapter 4: Strategic Gaps Overview

11. In the Meon Gap: P/14/0841/FP: Land of Cartwright Drive, Titchfield: Proposals for an 86 unit Care Homes, with associating landscape and car parking and a 15.4ha Country Park (with car parking), was approved though it was contrary to the current Policy C22: Strategic Gaps and within the setting of Titchfield Abbey Conservation Area. Construction on site was recently completed and is included in the site analysis.
12. P/19/0301/FP: Land East of Crofton Cemetery and West of Peak Lane, Fareham: refused for several reasons, such as design in relation to the setting of the Cemetery, but not for it's siting in the Fareham-Stubbington Gap.
13. P/14/0222/OA: Longfield Avenue, Land to the South – Fareham, an outline application for up to 1550 dwelling and associated infrastructure was withdrawn.

Key Routes for experiencing the Strategic Gaps

14. Key routes for the primary purpose of experiencing the physical and visual separation of settlements have been identified and are shown in Figure 4.2. This work ties in closely with the previous analysis carried out by LDA and described in Chapter 3 of the Adopted Fareham Borough Landscape Character Assessment 2017. As much as is possible, the key routes (or 'paths') pass between the settlement edges identified in the first filter, so that a significant number of drivers and walkers should experience the sense of leaving one settlement, passing through a distinctly different space, i.e. countryside between settlements before reaching another distinctly different settlement. This was tested out as part of the site analysis and is described in Appendix 5.

Settlement Edge Characteristics

15. This study builds upon the work previously carried out by David Hares Associates in the Fareham Borough Gap Review 2012. There have been negligible changes in the settlement edges since 2012 and the summary of settlement types shown in illustration 4 of the Fareham Borough Gap Review 2012 is still relevant:

“The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap” (page 19, Fareham Borough Gap Review. David Hares, 2012)

16. A key feature of many of Fareham's settlement edges is that of Woodland screening. Detailed findings are described in Appendix 5. The Spatial Visibility/Legibility maps A5.8-A5.10 show key long views and views towards settlement edges where dwellings or other landmark buildings can either be seen or are hidden or partially hidden from view by woodland, tree canopies or hedgerows. Primary measure 10 gives descriptions of the impact of the settlement edges on users from multiple vantage points.

Chapter 4: Strategic Gaps Overview

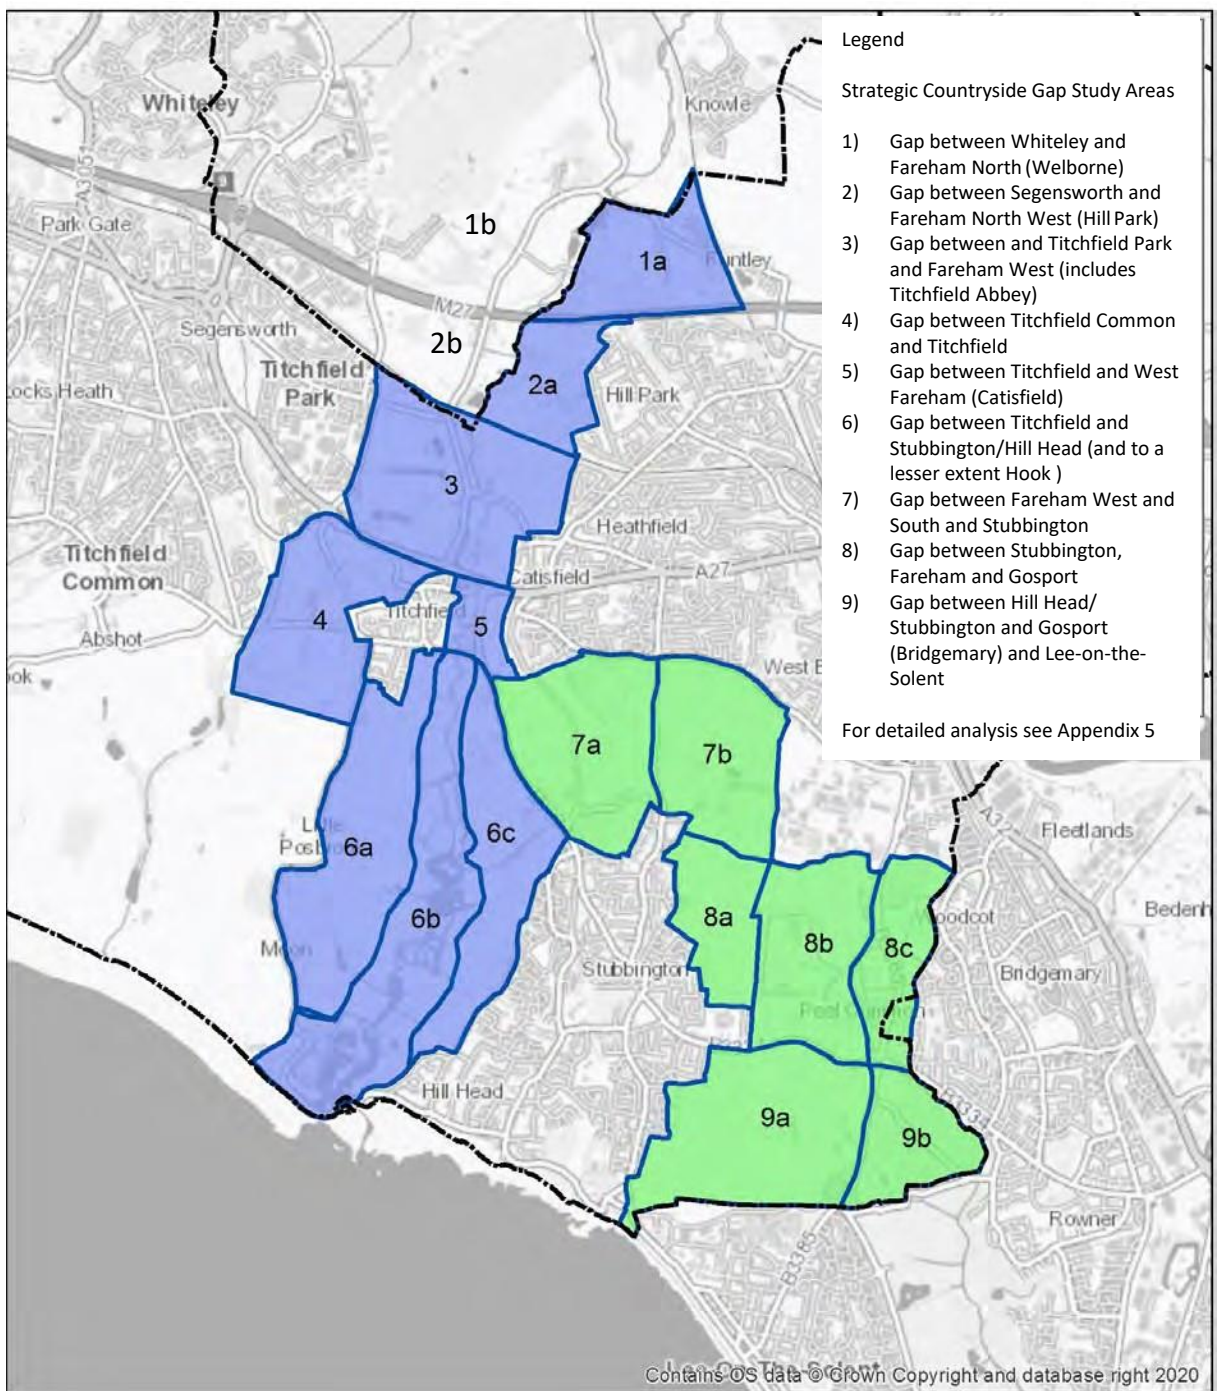

Figure 4.1. Plan showing Strategic Gap Study Area Extents

Chapter 4: Strategic Gaps Overview

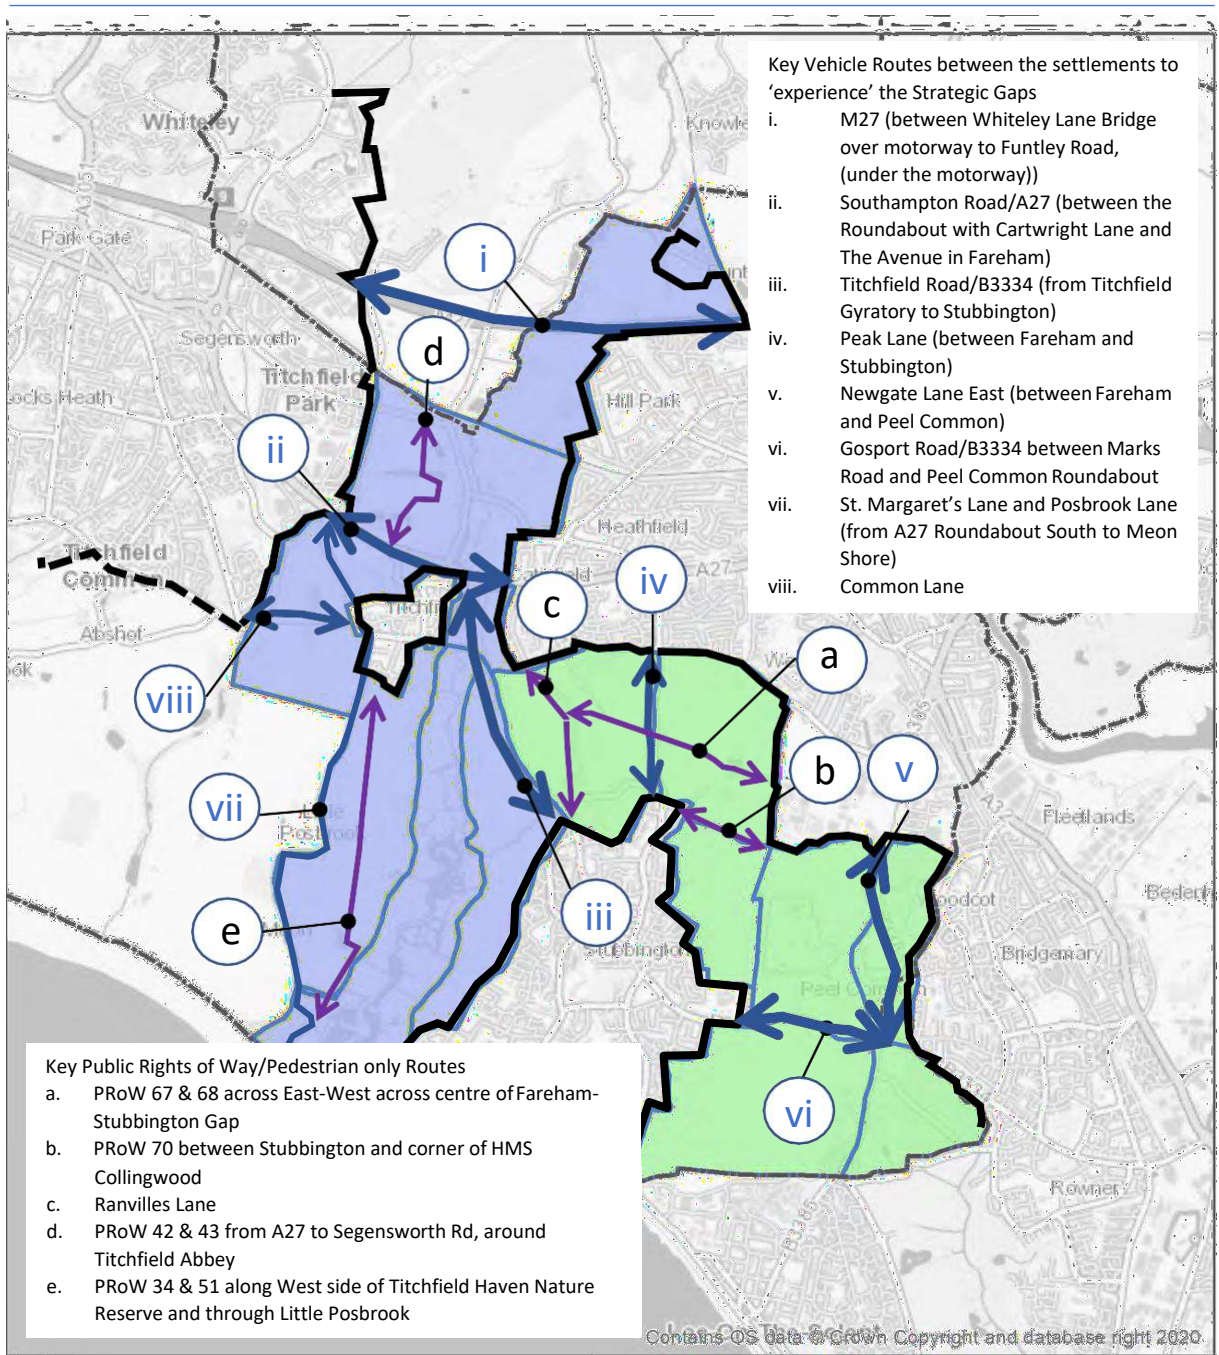

Figure 4.2. Plan showing key experiential routes through the Strategic Gaps

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

Key features of the Strategic Gap

1. Key Features of the Fareham-Stubbington Strategic Gap are:

- Open, predominantly arable farmland and horticulture with some glasshouses, a weak hedgerow structure and few trees
- The settlement edges are for the most part well screened by mature tree canopy, but there is some minor visual intrusion from Fareham, Stubbington and HMS Collingwood
- a few scattered farmsteads/horticultural holdings and a mosaic of small fragments of open farmland and horse-grazed pastures sandwiched between:
- large-scale non-agricultural uses of Business and airfield development at Solent Airport in Daedalus to the South and the utilities of:
 - Peel Common Water Treatment Works enclosed from views by an earth bund and mature tree belt
 - Peel Common Solar Farm
- Construction site of Stubbington-bypass, which will provide an East-West and South route through the Gap that has not previously existed
- Urban fringe character of Peel Common residential area

- Recently completed highway works to Newgate Lane, and Peel Common Roundabout, with associated noise attenuation fencing and bus and cycle infrastructure.

Potential Development Impact

2. As stated earlier, the potential impact of development is high within the Fareham-Stubbington Gap, with the potential to develop large tracts of farmland.
3. It is too early to determine the full impact that Stubbington Bypass will have on the landscape character and development pressures of the Gap. As the Bypass is currently under construction and its alignment marked out, it is possible to see how it might affect the sense of separation between Fareham and Stubbington. In some respects it strengthens the sense of separation because it will be a physical demarcation and partial interruption to cross-movement. It also becomes another key route from which to experience the Gap, but it will bring more noise and activity and may exert a suburbanising influence on the landscape. It is strongly recommended that once the construction works have been completed and the road is fully operational a review of the Landscape Character Assessment for LCA 7: Fareham-Stubbington Gap is carried out.

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

Other Environmental and Planning Designations

4. Unlike the Meon Gap, the Fareham-Stubbington Gap does not have a significant number of environmental designations. The only are two areas of Ancient/Semi-Ancient Woodland: Oxleys Coppice, which is also a SINC (Southern edge of Fareham) and Tips Copse, (East edge of Stubbington, North of Crofton Secondary School). The Strategic Gap designation would be the key designation in this area.

Summary findings of the Study Area Assessments:

5. The descriptions run from West to East and then South. More detailed analysis of each area can be found in Appendix 5.

Area East of Titchfield Road and West of Peak Lane (Strategic Gap Study Area 7a):

6. Due to the significant number of viewpoints from long stretches of the key roads that run through the area: Titchfield Road and Peak Lane (and from the Stubbington Bypass, when it is completed) and from the numerous footpaths that run through the middle of this area, it is strongly recommended that the vast majority of this section of Strategic Gap remains intact. It provides a useful informal recreational resource, within a distinctive

landscape character, that is of good quality, where residents can walk in relative tranquility away from roads and enjoy long and varied views. Due to its moderate to large gap dimensions (800-1.2km) it has been able to retain a relatively high level of tranquility and dark nights skies, compared to other parts of Fareham and it would be a significant loss to local residents if they were not able to continue to enjoy this informal recreational resource.

7. For this section of the Gap, this analysis agrees with the summary findings of LDA in Chapter 3 of the Fareham Borough Landscape Character Assessment 2017 - *“The landscape performs a highly effective role in providing a 'sense' of separation and the experience of moving between one settlement and the other.....Edges of Fareham and Stubbington are clearly defined by strong boundary vegetation and there is a clear distinction between 'town and country' there is a strong sense of leaving one urban area and moving through open countryside before entering another. Scale of the gap allows the time to appreciate sense of being in open countryside. Being able to see far across the gap and identify the edges, also strengthens the sense of separation.”* (page 41) .

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

8. However there exists the potential to make modifications to the settlement boundary of North Stubbington: to extend the boundary to run along Oakcroft Lane, as the isolated field that sits aside Crofton Cemetery, does not protrude into the landscape beyond the current Northern and Western edges of Stubbington. Largely sitting behind a mature line of Poplars also helps this isolated field absorb some development (subject to detail design), without risking the integrity of the Gap, as a whole. Retention and enhancement of GI will be required, within the site. **Development of a GI Framework or Strategy is recommended** for the site in its context.

Area East of Peak Lane and West of HMS Collingwood (Strategic Gap Study Area 7b):

9. Whilst this area comes under the same Landscape Character Area as Strategic Gap Study Area 7a, the terrain is much flatter, and the blocks of vegetation are less varied. Vegetation around the main large field screens the field from view from many vantage points. There are much fewer opportunities to see across this land, unless close to the field gates. From within the main field there are more visual detractors in the form of MOD buildings in HMS Collingwood, a low-rise tower in the

adjacent estate off Longfield Drive and a long view to the Fareham Borough Council Office Tower Block. Subject to detailed design, scale and functions, it is considered possible for the main field to absorb some development without a significant impact on visual quality of the Strategic Gap. If managed appropriately, development could have beneficial effect on the GI network (recreational and environmental) that exists around the periphery of the field subject to appropriate attention being paid to GI provision and design. Therefore a change in Strategic Gap boundary could potentially be accommodated without undermining the principal purpose of the gap to prevent coalescence of settlements. However, such adjustment would be driven by more detailed testing of development forms, scale, landscape and GI interventions. Such work would also need to consider the potential reduction of tranquility and dark night skies ratings in the area. **Establishing a GI Framework or Strategy is recommended.**

10. The experience of driving along Peak Lane is currently pleasant and it is recommended that with any potential boundary change that a GI zone of around 150m width between Peak Lane and any development, be established. This is to maintain the experience of

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

‘leaving’ Fareham driving through Countryside and arriving at the separate settlement of Stubbington.

The Open Coastal Plain between Stubbington and the Peel Common Water Treatment Works, (Strategic Gap Study Area 8a)

11. There are two key PRoW across this Landscape, that connect Stubbington and Fareham through a narrow gap of around 600m. The paths cross a dramatic flat landscape which has strong linear North-South views between Daedalus and Newgate Lane Farm, framed by blocks of woodland vegetation, on the boundary bund around the Peel Common Water Treatment Works and the east side of Stubbington, including Tips Copse Ancient Woodland. These views should be valued and retained, providing a great sense of space in an otherwise narrow corridor.
12. There is very little opportunity to absorb development in this corridor. Visual intrusion of buildings would be unwelcome, as it would reduce tranquility. Some of the tree belts are thin, and a substantial belt of woodland would strengthen the landscape structure and provide an attractive edge to frame North South Views and views towards the eastern edge of Stubbington. Advance planting of this

belt would be advised. A **GI Framework or Strategy is recommended.**

Section of Fareham-Stubbington that provides a three-way Gap between Stubbington, Fareham and Gosport (Bridgemary) (Strategic Gap Study Area 8b)

13. There are no proposed changes to the Strategic Gap in this area. The strong screening around the Peel Common Water Treatment works provides an effective visual and physical barrier between all three settlements.
14. There is pressure for development along Gosport Road (A334) between the Southern edge of Stubbington and Peel Common. It is strongly recommended that development pressure is resisted in this area as it would risk visual and physical coalescence between Stubbington and Gosport.

Newgate Lane and Peel Common Area (Strategic Gap Study Area 8c)

15. Despite the proximity of Fareham and Gosport in the north part, the gap is currently still effective in providing a ‘sense of separation’, but it is at risk. Substantial vegetation around boundaries currently prevents visual coalescence. There is a defined boundary along settlement edges and a gap of sufficient scale and

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

and coherence of character. Whilst the recently completed Newgate Lane South road development does not alter the experience of entering the urban area of Gosport beyond the Peel Common Roundabout, it does reduce tranquility and bring more built features (such as noise attenuation barriers) into this part of the gap. Further development within the gap in addition to the road scheme, together with existing urban fringe activity, is likely to cause visual, or even physical, coalescence of settlements on either side of the new road corridor.

16. Even with the development of Newgate Lane South, the previous analysis carried out by LDA and described in Chapter 3 of the Fareham Borough Landscape Character Assessment 2017, is still relevant: *“A cohesive area of undeveloped landscape which performs an important role in respect of the primary purposes of the Strategic Gap, i.e. in defining the edges, separate identity and settings of Fareham and Gosport, preventing their coalescence. Even minor encroachment beyond existing settlement boundaries could have an adverse effect on these functions and the overall integrity of the landscape and Strategic Gap.”* (page 43)

17. It is recommended that a **GI Framework or Strategy for the Strategic Gap Study Area 8c** would be beneficial to enhance the GI value of the current gap and potentially help determine an appropriate GI framework for moderately scaled development. The planting associated with the Newgate Lane Highway works will exert a stronger woodland/hedgerow edge as it establishes, and this should be factored into a GI Strategy. The GI Strategy or Framework should reassess the Open Coastal Plain Landscape Type: with a view to creating stronger GI structure throughout, but highlighting and retaining long North-South views, and largely undeveloped views eastward from old Newgate Lane, to retain a sense of space and ‘big skies’.

Daedalus and Lee-on-the-Solent Golf Course (Strategic Gap Study Area 9a and 9b)

18. This study does not suggest alterations to the Strategic Gap around the Airfield and Lee-on-the-Solent Golf Course. Current development within the Airfield is highly visible, but in keeping with current land uses/character of the area. Some further development could be accommodated in the Airfield but would depend on where within the site; scale and; what mitigation is delivered.

Chapter 5: Summary Conclusions and Recommendations

Figure 5.1. Photograph of Titchfield Abbey, from the new Country Park adjacent to A27.
Photograph: Charlotte Webb June 2020

Chapter 5: Summary Conclusions and Recommendations

-
1. The resultant analysis and site surveys of all Fareham Borough's Landscape Character Areas recommends that:
 - The six proposed ASLQ put forward for designation in the Fareham Local Plan Supplement (Reg 18 consultation document, Jan-March 2020), can be considered as 'valued landscapes' as they scored highly against the assessment criteria and therefore should be identified for ASLQ designation in the Fareham Local Plan 2037, with some modifications made to boundaries, to bring them into line with the current Fareham Borough Landscape Character Assessment 2017, but also;
 - Through this process, two further landscape character areas in Fareham were identified as having equivalently 'valued landscape' characteristics and so it is recommended that Chilling-Brownwich Coastal Plain and parts of the Cams to Portchester Coast should also be designated.
 - Conservation Areas where they sit in or adjacent to a proposed ASLQ should be included as part of the ASLQ because of their mutually supportive relationship.
 2. It is considered that there is a clear difference between the ASLQ designation, where the landscape value is the key reason for designation, in the context of Strategic Gaps, landscape character and its quality are a 'part of the picture' sitting amongst a broader range of criteria.
 3. The resultant analysis and site surveys of the two Strategic Gaps, conclude that the Meon Strategic Gap:
 - is proposed for continued designation, having both strong sub-regional justification for its designation, and a clear and continued role in preventing settlement coalescence, that could result from pressure for expansion of the Western Parishes; North and West Fareham, and from pressure for the expansion of Stubbington with;
 - one moderate amendment proposed to the North Eastern corner of the Meon Gap; that is an extension to the Gap around Funtley to prevent Funtley from coalescing with North and West Fareham.
 4. The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional justification for its designation, with an important role in preventing settlement coalescence from continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there may be potential for some development to be accommodated within the landscape, without compromising its Strategic Gap function.

Chapter 5: Summary Conclusions and Recommendations

5. Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:
 - An area to the south of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function.
 - An area to the north west of Stubbington, south of Oakcroft Lane and east of Ranvilles Lane.
6. It also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past.
7. In order to develop appropriate Green Infrastructure mitigation and enhancement associated with the areas of recent and future change described above, in the Fareham-Stubbington Gap, Green Infrastructure Frameworks or Strategies are required for each area.

1. INTRODUCTION	2
2. BACKGROUND	3
3. SUMMARY	4

1. INTRODUCTION

Qualifications and Experience

- 1.1. My name is James Atkin, Director (Landscape) in the Birmingham Office of the Pegasus Group and a Chartered Member of the Landscape Institute (2005). I have over 19 years experience specialising in the application of LVIA across a range of sectors including power, highways, rail, housing, waste, land reclamation and restoration, mineral extraction, commercial developments and renewable energy.
- 1.2. Since joining the Pegasus Group I have completed detailed LVIA's for sites across the UK, including schemes for residential, mixed use, care home, solar and commercial development. As an inherent part of this work I apply an iterative process of LVIA to inform masterplanning principles that respond appropriately to landscape and visual constraints and opportunities.

Terms of Reference

- 1.3. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 1.4. Principles and good practice for undertaking landscape and visual impact assessment (LVIA) and/or applying the principles of LVIA are set out in the Landscape Institute (LI) and the Institute of Environmental Management (IEMA) Guidelines for Landscape and Visual Impact Assessment, Third Edition (2013)¹ (GLVIA3). The concepts and procedures set out in this guidance have been adopted where appropriate.
- 1.5. The evidence included in this supporting statement for this appeal (LPA reference: P/18/1118/OA - AND - P/19/0460/OA) is true and has been prepared in accordance with the guidance of my professional institution. I confirm that the opinions expressed are my true and professional opinions.

¹ Landscape Institute and Institute of Environmental Management and Assessment, Guidelines for Landscape and Visual Impact Assessment 3rd Edition (April, 2013)

2. BACKGROUND

- 2.1. The appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham. The appeal sites are bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east.
- 2.2. The wider landscape context of the appeal sites includes the low-lying ground of the coastal plain and the adjacent urban environments of Fareham, Gosport (with Woodcot and Bridgemary). The settlement area of Stubbington forms the western extent of the Strategic Gap which extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.
- 2.3. The applications were submitted with a detailed LVIA which set out a comprehensive baseline and robust assessment of predicted impacts. These included details as to how landscape and visual matters have influenced the design of the masterplan, with mitigation measures consequently forming an inherent part of the proposals.
- 2.4. The reasons for refusal raises three main issues in respect of landscape and visual matters, stating that:
 - b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;
 - c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;
 - d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;
- 2.5. This evidence considers these issues against various information, including the submitted LVIA's, consultation responses, report to committee and other relevant baseline and evidence base documents related to landscape and visual matters.

3. SUMMARY

- 3.1. The submitted LVIAs address the key characteristics of the appeal sites and their context. The submitted LVIAs also set out an assessment of the impact and approach to mitigation. This process also enables judgements to be drawn in respect of the context of the appeal sites in relation to the existing urban settlement edges/boundaries.
- 3.2. With reference to this material, and supported by my own additional analysis where necessary, I conclude that the appeal schemes will not be harmful to the character and appearance of the countryside, will not significantly affect the integrity of the Strategic Gap and will relate well to the existing patterns of settlement.
- 3.3. This is on the basis the relevant key landscape characteristics of the area have been considered through the process of LVIA, consequently informing the analysis of constraints and opportunities, and ultimately the landscape strategy for the mitigation. This forms an integrated part of the two masterplans for northern and southern schemes.
- 3.4. Consequently, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms.
- 3.5. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement.
- 3.6. I consider that the subsequent residual impacts of the appeal schemes will be acceptable in landscape and visual terms.
- 3.7. In terms of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the Strategic Gap. This is on the basis that:
 - In relation to distances, the appeal schemes will reduce the gap between Bridgemary and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances set out in the FBC study;

- In terms of visibility, the appeal schemes will be physically and visually well contained – they sit within the strong green infrastructure framework that is evident in the form of blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the Strategic Gap from Stubbington;
- Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, along Newgate Lane and within the emerging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;
- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area; and
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

3.8. I also note that, notwithstanding differences in the technical approaches, the Pegasus Group and FBC Strategic Gap studies both independently acknowledge that the Strategic Gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site/project basis.

3.9. In respect of the conclusions of the FBC Strategic Gap study (where these note the relatively poor state of the gap at this point), I would think a logical and appropriate conclusion would be to amend the boundary to omit this part of the landscape from the Strategic Gap, creating capacity for development to come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the importance of the core areas that are located further west, between Fareham and Stubbington where the Strategic Gap clearly delivers its role and function in full.

3.10. Finally, the reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries. However, my evidence demonstrates that the appeal sites are well related to Peel Common, being located to the east of Newgate Lane, physical contained by the alignment of Newgate Lane East and situated immediately adjacent to the existing residential dwellings off Woodcote

Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane.

- 3.11. With existing and proposed green infrastructure in place, the appeal schemes will consolidate the pattern of Peel Common within a clearly defined limit. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 3.12. Furthermore, there are some existing physical connections between Peel Common and Bridgemarky. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemarky, focused along the green route into Bridgemarky (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 3.13. If the previous emerging allocation of HA2 were to come forward, this broader area of development would reinforce the connection between Peel Common (including the appeal sites) and the edge of Fareham. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.
- 3.14. In all respects, considering Peel Common in itself, connections to Gosport, and with the potential for HA2 to come forward, development in this area will maintain a robust gap between Fareham (aligned with the western edge of Peel Common) and Stubbington.
- 3.15. Overall, in the context of these limited issues, and with the appeal schemes in place, landscape and visual issues are not sufficient to support a prospective reason for refusal.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND ADJACENT TO 75 HOLLY HILL LANE, SARISBURY

**ON BEHALF OF
BARGATE HOMES**

APPENDICES:

- 1.0 Landscape Response prepared by Terra Firma Consultancy including Opportunities and Constraints Plan**

1.0 Introduction

- 1.1** The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in Land adjacent to 75 Holly Hill Lane in Sarisbury.
- 1.2** The site is irregular in shape and extends to approximately 2.6 hectares. It is accessed via Holly Hill Lane, which adjoins the south-western boundary of the site, and the majority of the site lies to the east (rear) of the properties which front Holly Hill Lane. The southern boundary of the site adjoins Holly Hill Woodland Park and the eastern boundary extends as far as the boundaries of the properties on Mulberry Lane (accessed from Barnes Lane). The site has previously been promoted through Fareham Borough Council's (FBC) Strategic Housing and Employment Land Availability Assessment (SHELAA) – Site ID 1005.
- 1.3** For the reasons set out in these representations, our client is strongly of the view that this site should be allocated for residential development in the Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan). It is estimated that the site could accommodate approximately 30 dwellings. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).
- 1.4** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.5** The following representations utilise the same format as the Council's response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.4 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.5 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in

"Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

- 2.6 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.
- 2.7 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

-
- 2.8 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.
- 2.9 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.10 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.11 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.12 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's

announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

2.13 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.

2.14 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.

2.15 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.16 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require

that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

- 2.17 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.
- 2.18 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.19 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.20 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies

that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be “ratified” by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.21 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.22 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East

Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

2.23 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

2.24 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.25 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.26 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.27 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.28 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and

Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.29 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of our client's interest at Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.30 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and

Compulsory Purchase Act 2004).

- 2.31 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;

- Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31; and
- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

3.15 Paragraph 3.9 of the PLP states:

"Recent planning appeal decisions in the Borough have highlighted the need to consider the designation of valued landscapes as part of the Local Plan. Previous Local Plans have included the demarcation of 'Areas of Special Landscape Quality' in the Borough which were used to help shape planning strategy and decisions on planning applications. These areas were the Meon, Hamble and Hook valleys, Portsdown Hill and the Forest of Bere. Both the Landscape Assessment (2017), and the more recent 'Technical Review of Areas of Special Landscape Quality and the Strategic Gaps' (2020) still recognise the intrinsic character and distinctiveness of these relatively undeveloped areas of the Borough and so their locations have been used to shape the development strategy. There is a presumption against major development in these areas, unless it can be demonstrated through a landscape assessment that the quality

and distinctiveness of the landscape character can be conserved. For these reasons there remain no development allocations in these areas." (our underlining)

Our client objects to the identification of the Areas of Special Landscape Quality (ASLQ) in the borough, and particularly to the presumption against development in ASLQ and against allocation any sites for development within these areas. This is discussed in detail in the section relating to Policy DS3: Landscape below.

Policy DS1: Development in the Countryside

- 3.16** For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".
- 3.17** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.18** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

- 3.19** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.20** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non-designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.21** However, if it is held that Policy DS3 should not be deleted, the following comments apply.
- 3.22** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.23** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA3 is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.24** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and

several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.25 Having specific regard to our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury, the site has previously been promoted through FBC's SHELAA dated September 2020 (Site ID 1005) and was discounted solely because it is located within an ASLQ. Consequently, our client has appointed Terra Firma Consultancy to review this matter and a Landscape Response is attached to these representations at Appendix 1, together with an Opportunities and Constraints Plan for the site.

3.26 In summary, it is considered that if Policy DS3 is not deleted, it should better allow for flexibility when it can be proven that parcels of land within the ASLQ, when taken in isolation and studied in depth, can accommodate sensitive small-scale development. It is considered that our client's site has capacity for development without detriment to the wider Landscape Character Area and would also create opportunities for landscape enhancement and protection. Further site-specific details for Land adjacent to 75 Hilly Hill Lane are provided at the end of this section.

Policy HP1: New Residential Development

3.27 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.28 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.29 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.30 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.31 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.32 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.33 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.34 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.35 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.36 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.37 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.38 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.39 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.40 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.41 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.42 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.43 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.44** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.45** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury

- 3.46** Our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury has previously been promoted through the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA) dated September 2020. The site is discounted solely for the reason that it is located within a SLQA and our client's objection to this is set out above.
- 3.47** Otherwise, the SHELAA confirms that the principle of highway access to the site is acceptable, subject to allowing for the turning of refuse vehicles within the design of the access road, which could be addressed. It is confirmed that there are no known conservation constraints or noise/air quality constraints, and that the site is not within an identified area of archaeological potential. The SHELAA suggests that there is the potential for moderate to high quality

habitats and ecological interest within the woodland areas, but this could be assessed and appropriately mitigated.

- 3.48** In terms of its accessibility and sustainability, the SHELAA confirms that the site is located within 800m of accessible green space or play space, within 800m of a community/leisure facility, within 1,200m of a Primary School and within 1,600m of a Secondary School. It is also noted that the site is located 0.5 miles (by road) to the south of the A27 and its associated local facilities and services. There are also bus routes that run along Barnes Lane to the east, and the A27.
- 3.49** The SHELAA concludes that the site is both available and achievable but that it is not suitable due to its location within an ASLQ.
- 3.50** The Landscape Response prepared by Terra Firma Consultancy, enclosed at Appendix A, includes an Opportunities and Constraints Plan for the site which identifies an indicative developable area extending to approximately 0.93 hectares. On the basis of a development density of 30-35 dph, this would equate to the provision of between 28-33 dwellings on the site.
- 3.51** On the basis of the above, the Council is encouraged to allocate Land adjacent to 75 Holly Hill Lane in Sarisbury for approximately 30 dwellings. This site is controlled by a highly reputable local housing developer – Bargate Homes – who has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five-year housing land supply.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDIX 1

Landscape Response prepared by Terra Firma Consultancy and associated Opportunities and Constrains Plan

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND WEST OF OLD STREET, STUBBINGTON

ON BEHALF OF BARGATE HOMES

TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED) PLANNING AND COMPULSORY PURCHASE ACT 2004

Prepared by: Jeremy Gardiner & Trevor Moody

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our client, Bargate Homes. These representations are consistent with and build upon the previous representations submitted to the Council by WYG in relation to this site in response to the Fareham Draft Local Plan 2036 Supplement in February 2020, and we ask that those previous representations are also considered alongside this submission because their content is not repeated here.
- 1.2** Our client has an interest in **land to the west of Old Street, Stubbington** which was previously the subject of development proposals for up to 160 (reduced to 150) new homes (planning application P/17/1451/OA refused on 23 March 2018, and appeal ref. APP/A1720/W/18/3200409 dismissed on 22 January 2019 refer). Since this appeal decision, and in the light of the Inspector's reasoning, extensive belts of strategic woodland planting have been undertaken at the site which will have the effect of visually detaching part of the site from the Meon Valley and creating a more modest sustainably located site for about 75 new homes on the edge of the urban area of Stubbington. Our client is strongly of the view that these material changes of circumstances at the site, coupled with the need for the Council to meet its local housing target of a minimum of 514 homes per annum, justify the allocation of the site for about 75 dwellings in the local plan.
- 1.3** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 – 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Remove Strategic Gap designation from Land West of Old Street, Stubbington.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local

housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national

guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature

and misleading.

2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.

2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.

2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed

need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham

to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such it's preparation is premature.

2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PFSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities

for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading (as confirmed by the Government's announcement on 16 December 2020 that the Council's annual housing target is to remain at 514 homes per annum).

3. It is not Effective:

- 2.28 The Council has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

- 2.29 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.
- 2.30 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be

included as additional housing to the minimum 514 hpa.

3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
 4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.31 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.32 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.33 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – the spatial extent of 'landscapes' should be defined here to avoid ambiguity. While the landscape as a whole could be enhanced by carefully designed development proposals, the principle of landscape change within the site itself should be established. If this requirement to 'conserve and enhance landscapes' is applied to the landscape features and character of a potential development site, then this requirement is excessive and unachievable once the landscape 'change' from an undeveloped site to a developed site is taken into account. Either the spatial extent of 'landscapes' should be defined or the requirement to 'enhance landscapes' be removed from the policy.

-
- 3.16** Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".
- 3.17** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.18** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS2: Development in Strategic Gaps

- 3.19** Under the heading 'Why we need this policy', Paragraph 3.43 of the Publication Local Plan states that "Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities". The introduction of 'settlement character' into the policy wording is not consistent with the evidence base which confirms at paragraph 2 in Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps that the "primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities".
- 3.20** Strategic Policy DS2: Development in Strategic Gaps should only apply to land which provides a spatial function to maintain separation of settlements and define settlement pattern rather than defining settlement character. Land west of Old Street, Stubbington does not contribute to the spatial separation of settlements, therefore Strategic Policy DS2 should not be applied to this land.
- 3.21** This view is supported by the Inspector for the appeal relating to Land west of Old Street, Stubbington APP/A1720/W/18/3200409 who stated that:

"The Meon Gap lies between Fareham/ Stubbington and the Western Wards/Whiteley. Policy CS22 requires the integrity of the gap to be maintained and the physical and visual separation of settlements to be respected. In terms of separation of settlements there is no dispute that there would be no diminution either in physical or visual terms if the development were to go ahead. The policy indicates that the gap boundaries will be reviewed to ensure that no more land than necessary is included in order to maintain gap function". (our underlining)

3.22 The Inspector goes on to state:

"It should be remembered that gap policy is a spatial tool. The Council referred to the role of the gap in maintaining the character or setting of Stubbington. This is considered in the 2017 LCA where the strategic gap designation is reviewed. However, the document makes clear that its purpose is to consider what role the landscape plays within the strategic gaps. It is not intended to examine the designation criteria, or the broad areas identified. This is important to note because it is landscape rather than spatial considerations that are key to settlement character and setting. The character and setting of Stubbington is not pertinent to gap designation or function in policy CS22".

3.23 The Inspector concluded:

"I appreciate that a review of gap boundaries was undertaken in 2012 and that no changes were recommended in relation to the land immediately adjacent to Stubbington. However, for the reasons I have given I do not consider that the proposed development of the appeal site would adversely affect the integrity of the Meon Gap". (our underlining)

3.24 For this reason, Strategic Policy DS2 should not apply to Land west of Old Street, Stubbington, because it has been confirmed that this land does not contribute to the function of the Strategic Gap. The Meon Valley is protected by many environmental designations which prevent development into this area from the Fareham side of the valley. The designated valley floor of the Meon Valley maintains separation of settlements to an extent that an adequate gap is maintained without the inclusion of Land west of Old Street, Stubbington within the Strategic Gap. Fareham Policy CS: 22: Strategic Gaps, states that "In

defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation." It is therefore unnecessary for Strategic Policy DS2 to apply Land west of Old Street, Stubbington.

3.25 At paragraph 7 of Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps states that "Where it is considered that there is capacity to absorb more development within the Fareham-Stubbington Strategic Gap, GI mitigation will be required, to a greater or lesser extent depending on the scale and nature of any development". Again, at paragraph 11 of the chapter 4 summary the Technical Review states "The ability to absorb development into the landscape exists, without compromising the integrity of the Gap function, again on the understanding that the settlement edges must include appropriate Green Infrastructure".

3.26 We submit that there is similar potential within the Meon Gap where the Gap is significantly wider than is the case for the Fareham-Stubbington Strategic Gap. This is particularly the case for Land west of Old Street, Stubbington where advance planting and green infrastructure has already been implemented during 2019 and is establishing well. This will continue to develop and establish a wooded edge to the Meon Valley, providing separation between the Meon Valley and Land west of Old Street, Stubbington. This would reinforce the wooded edge characteristics of settlements which are a feature throughout Fareham Borough, as referred to within the Fareham Borough Gap Review 2012, which states "The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap". In the case of Land west of Old Street, Stubbington the advance planting will create a wooded edge, providing a strong boundary between the site and the Meon Valley (stronger than is the case for the older housing at Hill Head where rear garden boundaries are visible from the Meon Valley) and in so doing it would be more consistent with the character of the settlement edges of the Borough. These green infrastructure enhancements already implemented will bring benefits to the biodiversity of the Meon Valley through enhanced planting and management of the existing farmland.

Policy DS3: Landscape

- 3.27** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.28** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council has created a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.29** However, if it is held that Policy DS3 should not be deleted, the following comments apply:
- 3.30** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.31** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.32** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.33 The local plan evidence at page 50 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not include the requirement for the landscape to be “protected and enhanced”. The requirement to “protect and enhance” the landscape is ambiguous because it is not clear whether it is intended to refer to the landscape of the ASLQ as a whole or if it would apply to a potential development site, within which the requirement to enhance is excessive and unachievable once the landscape ‘change’ from an undeveloped site to a developed site is taken into account. As an example, a development could provide enhancement to the ASLQ landscape through restoration of landscape features or new green infrastructure, but at a site scale the landscape ‘change’ from an undeveloped site to a developed site is unlikely to result in ‘enhancement’.

3.34 Each of the Candidate Areas of Special Landscape Quality have been assessed against the GLVIA3 Box 5.1 criteria, which is an accepted tool to assess landscape value. Land west of Old Street, Stubbington is located within ASLQ 4: Meon Valley and in LLCA 6.1c which is described as within the Landscape Assessment (2017) as:

“On the eastern side of the valley floor, area 6.1c is occupied by similar land uses but with greater variation in field pattern and enclosure. The area comprises a mosaic of smaller-scale pastures bounded by strong hedgerows and trees (particularly within the northern and southern ends of the area), two small-scale enclosed tributary valleys and some larger fields with a more open, denuded character within the central section around the Crofton Manor Equestrian Centre. Together with the adjacent horticultural glasshouses and other commercial operations, this lends a localised fringe character to the landscape but does not detract significantly from the essentially rural characteristics of the overall area”.

3.35 At Figure 3.3 each of the LCA within Fareham is assessed against the GLVIA3 ‘valued landscape’ criteria. Figure 1.3 explains the criteria in more detail, defining a ‘High match’, ‘Good match’, ‘Fair match’ and ‘Partial match’.

3.36 Land west of Old Street, Stubbington is located within LLCA 6.1c which is assessed as a ‘good match’ for all criteria, except ‘Associations’ which is a ‘partial match’. Figure 3.2 defines a ‘Good match’ as *“The area’s scenic quality and condition are both relatively high. It has a generally unspoilt, intact and coherent character with a good level of topographic and visual unity. It has several*

features of note, including natural and cultural designations, and is valued for its recreational opportunities. There are some detracting influences, but these do not generally intrude”.

3.37 We submit that the assessment of LLCA 6.1c has attributed a higher value for the ‘Recreational value’ criteria than can be justified. The southern half of LLCA 6.1c does not have any means of public access so can not be described as being ‘valued for its recreational opportunities’. In the northern half there are infrequent public footpaths and the Crofton Manor Equestrian Centre, neither of which justify the area being defined as ‘valued for its recreational opportunities’. Instead, the term ‘Recreational value is relatively limited’ is a fair reflection of the recreation provision within LLCA 6.1c as a whole, which is the definition applicable to a ‘Partial Match’.

3.38 Landscape quality (condition) is also assessed as a ‘Good Match’, despite the Landscape Assessment (2017) acknowledging its ‘denuded character’ and ‘fringe character’. This character is a feature of LLCA 6.1c, and for this reason the ‘Good Match’ definition as ‘generally unspoilt, intact and coherent character’ is not justifiable. A ‘Fair Match’ is most applicable to LLCA 6.1c, defined as “condition is moderate to good. It is generally intact and coherent with some unspoilt characteristics”.

3.39 The criteria of ‘Conservation interests’ is also assessed as a ‘Good Match’, defined as “It has a number of features of note, including natural and cultural designations”. We submit that ‘Fair Match’ is a more balanced description of LLCA 6.1c, defined as “some features of note which may include natural or cultural designations”.

Policy HP1: New Residential Development

3.40 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.

3.41 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.42 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.43 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.44 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.45 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.46 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and

- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.47 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.48 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.49 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.50 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.51 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.52 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.53 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.54 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the level of need for such units in the Borough – in the absence of this it is not clear whether the level of provision sought by this policy is appropriate.

Policy HP9: Self and Custom Build Homes

3.55 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.56 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). The total number of homes to be delivered by Welborne has reduced considerably over the last five years so this level of requirement should be reviewed as it will not yield the number of self or custom build homes as was anticipated at the time the Welborne Plan was prepared. Strategic allocations

such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.57** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.58** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Proposed housing allocation of Land West of Old Street, Stubbington for about 75 dwellings

- 3.59** In 2019 the appeal Inspector concluded that the development of the site would not adversely affect the integrity of the Meon Valley Strategic Gap. Clearly, therefore, the site should be excluded from the Strategic Gap boundary. The boundaries of the strategic gap were defined in relation to Core Strategy Policy CS22 and they were drawn in the context of the understanding of development needs at that time – an understanding which no longer reflects current reality, that being a very substantial shortfall in housing land supply and the preparation of the PLP by the Council which plans to under-provide housing against the Council's annual housing requirement of 514 homes per annum. Strategic Gap boundaries must be reviewed as part of the process of allocating additional sites for housing in this local plan, and our client's site west of Old Street, Stubbington should be removed from the Strategic Gap.

-
- 3.60** The 2019 appeal Inspector found that the West of Old Street, Stubbington site lay in an area of valued landscape. In this context, the value of the site's landscape has been re-assessed as part of our commentary on Policy DS3 above, against the GLVIA3 'valued landscape' criteria. As described, the site performs no better than as a Fair or Partial match against these criteria. When account is taken of the effect of the structural woodland planting undertaken over time, it is clear that development of the eastern part of the site will only have a minor impact on the wider landscape at most. Lying adjacent to the existing settlement of Stubbington, the introduction of development will appear entirely characteristic within the receiving landscape, while providing a strong, vegetated edge to the countryside in perpetuity. There is no doubt that the character of the developed part of the site would change, but that is no different for any greenfield development. There is no reason to assume that the site's development will be anything other than an attractive extension to Stubbington and one which is entirely congruous with its surroundings. The site's landscape containment has been enhanced through woodland planting which will both screen it from the Meon Valley and enhance its biodiversity.
- 3.61** Moreover, the western part of the site, beyond the woodland planting belt, is being used to provide mitigation habitat for Solent Waders and Brent Geese, offsetting development impact on low use SWBG sites elsewhere in borough. The segregation of this part of the site acknowledges this function and avoids its disturbance.
- 3.62** The West of Old Street site is also sustainably located for access to services and facilities and to sustainable transport modes (walking, cycling and public transport).
- 3.63** For all of these reasons, the Council is encouraged to allocate Land West of Old Street, Stubbington for about 75 dwellings. The site is controlled by a highly reputable local housing developer – Bargate Homes – which has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing session

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

POLICY HA1 HOUSING ALLOCATION – LAND NORTH AND SOUTH OF GREENAWAY LANE, WARSASH

**ON BEHALF OF
BARGATE HOMES**

APPENDICES:

Appendix 1 - Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

1.0 Introduction

1.1 The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash, identified within the emerging Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan).

1.2 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road (our client controls all but the easternmost part of this site); and 3. Land East of Brook Lane and North of Warsash Road. A Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1) is attached at Appendix 1.

1.3 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

1.4 For the reasons set out in these representations, our client strongly supports the allocation of their three land interests as part of Policy HA1. However, their view is that amendments are required to the specific wording of this policy. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).

1.5 Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.

1.6 The following representations utilise the same format as the Council’s response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HA1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B1c Which part of the Policies Map

2.4 Policy HA1 allocation site – Land North and South of Greenaway Lane, Warsash.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard

Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning

Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

- 2.9 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.
- 2.10 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.11 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.12 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.

2.13 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

2.14 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.

2.15 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.

2.16 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.17 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

2.18 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

2.19 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.

2.20 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a

significant matter.

2.21 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.22 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.23 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

2.24 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

2.25 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's

case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.26 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.27 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.28 As stated at B3.1 above, it is unclear whether the PLP has planned to

adequately accommodate unmet need from other authorities.

2.29 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.30 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.31 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.32 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum)

between 2026/27 and 2030/31; and

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8** This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9** The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10** The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.
- 3.11** The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can

be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.16 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.17 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

3.18 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).

3.19 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**

3.20 However, if it is held that Policy DS3 should not be deleted, the following comments apply.

3.21 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

3.22 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.

3.23 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HA1: Land North and South of Greenaway Lane

3.24 As set out in the Introduction to these representations, our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash. Our client therefore strongly supports Policy HA1 and the identification of their three land interests within this proposed residential allocation.

3.25 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road; and 3. Land East of Brook Lane and North of Warsash Road.

3.26 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

3.27 The outstanding matters relating to the outline planning applications are all close to being resolved, especially now that a solution has been agreed in relation to nitrogen deposition into the Solent. It is therefore anticipated that outline planning permission can be granted for all three sites in the near future. Our client then intends to proceed to detailed planning followed by construction stages in a phased but timely manner, such that all three sites are deliverable and can therefore contribute towards the Council's housing land supply position in the short-term.

3.28 Whilst our client supports Policy HA1 and the allocation of their land interests for residential development in principle, in their view the wording of the site-specific requirements contained within the policy requires some amendments, as explained below.

a) The quantum of housing proposed shall be broadly consistent with the indicative site capacity

3.29 Policy HA1 sets out an indicative yield for the allocation as a whole of 824 dwellings. This is supported and no changes are suggested to this site-specific requirement. Our client's three land interests could provide up to 366 dwellings when combined. This includes up to 100 dwellings on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); approximately 126 dwellings on Land East of Brook Lane and East of Lockwood Road (considering our client does not control the easternmost part of the site so cannot deliver all of the 'up to 157 dwellings' approved at the outline stage); and up to 140 dwellings on Land East of Brook Lane and North of Warsash Road. This represents almost 45% of the indicative yield.

b) Primary highway access should be focused on Brook Lane and Lockwood Road with limited access via Greenaway Lane where necessary, subject to consideration of the impact on the character of Greenaway Lane

3.30 This is not supported, particularly having regard to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane). The wording of this site-specific requirement, including the use of 'limited' and 'where necessary', could be

considered to preclude the provision of a primary vehicular access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane.

- 3.31** The wording of site-specific requirement b) is inconsistent with Figure 4.1 – Policy HA1 Indicative Framework Plan contained with the PLP. Figure 4.1 identifies 'Indicative Principal Vehicular Access' points into the HA1 allocation, which are indicated by purple arrows and includes the identification of a principal access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane, located in the north-west corner of the site. Figure 4.1 also identifies two further principal accesses further east along Greenaway Lane associated with other parts of the HA1 allocation (outside of our client's control).
- 3.32** The wording of site-specific requirement b) is also inconsistent with the Illustrative Masterplan that has been approved by the Council as part of the resolution to grant outline planning permission for Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) under Ref. No. P/19/0402/OA. The approved Illustrative Masterplan includes the provision of a primary vehicular access point from Greenaway Lane, located in the north-west corner of the site (in a similar location to the purple arrow shown on Figure 4.1 of the PLP).
- 3.33** The Committee Report relating to the outline application (dated 16 December 2020), discusses highways matters at paragraphs 8.46 to 8.51. It confirms that from a highway safety perspective, the proposed access from Greenaway Lane is acceptable subject to the imposition of planning conditions (requiring the construction of the access junctions and visibility splays in accordance with the approved plans) and financial contributions towards off-site highways works and a Travel Plan.
- 3.34** The Committee Report confirms that the Highway Authority is satisfied that a safe means of access can be provided and identifies this as "*...a significant material planning consideration.*" In terms of the impact on Greenaway Lane as a result of the physical alterations proposed as part of the development, the Committee Report states that these "*...are not of a level that would adversely detract from the character of Greenaway Lane or justify refusal of outline*

planning permission." The Committee Report then makes reference to the decision of the Planning Inspectorate in relation to a previous scheme for the site (Ref. No. APP/A1720/W/19/3225866 dated 11 December 2019), in which the Inspector confirms at paragraph 42 that *"...it would be possible to secure complementary development of the Greenaway Lane frontage within the scope of the reserved matters. Furthermore, highways works, and any additional traffic generated by the development, would affect only a very short section of the lane which lacks the more rural character seen towards the east."* At paragraph 38 of the Inspector's decision, it is concluded that *"...no necessity for an alternative access has been demonstrated on highways grounds."*

3.35 On the above basis, it is considered that the wording of site-specific requirement b) is inappropriate and misleading in potentially precluding the provision of a primary vehicular access to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane. This would be inconsistent with the provisions of Figure 4.1 of the PLP, as well as the Council's recent resolution to grant outline planning permission and conclusions of the previous appeal Inspector.

3.36 Accordingly, the wording of site-specific requirement b) should be amended to state:

"b) Primary highways access should be in accordance with the broad locations of the 'Indicative Principal Vehicular Access' points shown on Figure 4.1."

c) The provision of vehicular highway access between development parcels without prejudice to adjacent land in accordance with Policy D3

3.37 This is supported and no changes are suggested to this site-specific requirement. Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative secondary vehicular link roads' which are identified by dotted grey arrows. Our client agrees with the indicative location of these secondary access points within the Policy HA1 allocation, insofar as they relate to their three land interests, although it should be noted some of these connections may be bought forwards as pedestrian/cycle links only at

the detailed planning application stage to avoid more than 100 units having direct access onto Greenaway Lane.

d) The provision of a continuous north-south Green Infrastructure Corridor between the northern and southern site boundaries that is of an appropriate scale to accommodate public open space, connected foot and cycle paths, natural greenspace and wildlife habitats that link the two badger setts and other species, and east-west wildlife corridors. Highway cross-over points shall be limited in number and width and include wildlife tunnels where necessary, in accordance with the Framework Plan

3.38 The provisions of this site-specific requirement are supported in principle. The outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.39 Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative wildlife link tunnels'. This includes one running north-south on Land East of Brook Lane and North of Warsash Road which is accepted.

3.40 Figure 4.1 also shows two tunnels on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane), both of which are shown running north-south. Whilst it is acknowledged that these tunnels are only shown indicatively on Figure 4.1, it is noted that the southernmost tunnel on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) should in fact be shown running east-west, so that it crosses and runs perpendicular (not parallel to) the 'indicative secondary vehicular link road' in this location, and so that it reflects the line of the green corridor running along the southern boundary of the land parcel. Otherwise, the provision of two tunnels within this part of the allocation is accepted, as is the indicative location and orientation of the northernmost tunnel.

e) The provision of pedestrian and cycle connectivity between adjoining land parcels, as well as providing connectivity with Warsash Road and nearby facilities and services

3.41 This site-specific requirement is supported in principle and the outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.42 It is noted that it is not possible to provide direct connectivity between the land within the HA1 allocation and Warsash Road to the south, as the boundaries do not immediately adjoin the road. However, the outline illustrative masterplans provide pedestrian and cycle linkages to Brook Lane, which in turn leads to Warsash Road and nearby facilities and services.

3.43 In relation to the development proposals for Land East of Brook Lane and North of Warsash Road, it has previously been proposed to provide a pedestrian/cycle link from the southern boundary of the site into the rear car park of The Victory Hall which fronts on to Warsash Road. However, this proposal was not supported by the relevant stakeholders and so has not been carried forward into the illustrative outline masterplan for the site.

f) Building heights should be limited to a maximum of 2.5 storeys, except for buildings which front onto Greenaway Lane and Brook Lane where building heights shall be limited to a maximum of 2 storeys

3.44 The first part of this site-specific requirement is not supported. It is considered that some elements of 3 storey development are appropriate on the allocation site, provided they are located sensitively in the central parts of the site and setback from the site boundaries, allowing them to be appropriately screened and for a buffer to be provided to existing adjoining land uses. This is consistent with the requirement for the efficient use of land as set out in the NPPF.

3.45 The second part of this site-specific requirement for buildings fronting Greenaway Lane and Brook Lane to be limited to a maximum of 2 storeys is accepted.

g) Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does

not impact on living conditions

3.46 This is not supported. The wording of this site-specific requirement suggests that any tree that is subject to a Tree Preservation Order (TPO) cannot be removed. This is not appropriate and is not justified, particularly in light of the vehicular link required through TPO woodland in the southern most portion of the allocation. It is possible that cases may arise where it is necessary to remove a tree even if it is subject to a TPO, for example if the tree is no longer in a good condition or if it poses a health and safety risk in the future.

3.47 The wording of this site-specific requirement should be amended to provide greater flexibility and should state:

"Where possible, existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living conditions, unless agreed in writing with the Local Authority."

h) A Construction Environmental Management Plan to avoid adverse impacts of construction on the Solent designated sites shall be provided

3.48 This is supported and no changes are suggested to this site-specific requirement.

i) Provide future access to the existing underground water and wastewater infrastructure for maintenance and upsizing purposes (included at the request of Southern Water)

3.49 This is supported and no changes are suggested to this site-specific requirement. These measures can be incorporated into the detailed design for the three land parcels controlled by our client to ensure that future access is provided.

j) The site is identified as a mineral safeguarded site (sand and gravel are likely to underlay site). A Minerals Assessment will be required prior to any

development in accordance with the Hampshire Minerals and Waste Plan (2013)

3.50 The justification and evidence in support of this site-specific requirement are unclear. From our review of the information available on Hampshire County Council's (HCC) website, including the HCC Minerals and Waste Plan (adopted 2013) and its associated online Proposals Map, the HCC Minerals and Waste Safeguarding in Hampshire Supplementary Planning Document (adopted February 2016) and the HCC Minerals and Waste Plan Minerals Consultation Area (2015), the land within the Policy HA1 allocation does not appear to be identified as a minerals safeguarded site or as having any potential to be underlain by any mineral resources.

3.51 Furthermore, this matter has not been raised during the outline planning stages for our client's land interests.

3.52 This site-specific requirement is therefore not supported and should be deleted in relation to the Policy HA1 allocation.

k) Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4 and NE3. In addition, the following site-specific infrastructure will be required:

i) Two junior football pitches on-site; and

ii) Off-site improvements to existing sports facilities

3.53 The wording of site-specific requirement k) implies that financial contributions will definitely be required. This wording should be amended to provide more flexibility, in the event that it is agreed between the relevant parties that contributions are not in fact required in relation to one or more of the matters referred to.

3.54 The provision of reasonable financial contributions towards education and transport are accepted in principle where a specific need is identified and at an appropriate level to be agreed between the relevant parties.

3.55 In terms of our client's three land interests, financial contributions towards

education and transport have been agreed in principle through the resolutions to grant outline planning permission, with Section 106 Agreements to secure these being agreed prior to the outline planning permission for each site being issued.

3.56 The reference in site-specific requirement k) to providing contributions towards health is not supported. The Committee Report relating to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) (Ref. No. P/19/0402/OA dated 16 December 2020) discusses this matter with regard to a request from the University Hospital Southampton NHS Foundation Trust for a financial contribution to provide services needed by the occupants of the proposed new dwellings. The Officer's comments at paragraphs 8.64-8.68 of the Committee Report are as follows:

"In considering the requests it is noted that the construction of houses does not itself lead to population growth. Officers consider that the need for housing is a consequence of population growth. Furthermore, there is no account in the representations, it seems, for the potential for the residents of the new development to be moving locally around the Borough or adjoining boroughs such that their residence locally is already accounted for by the current services and funding commissioned by the hospital...

...The length of time between sites being identified, planning permission being granted, and the houses actually being constructed and subsequently occupied is many years. The amount of residential development coming forward in the Borough which has not been reasonably foreseeable for a period of year is therefore very limited.

In January 2019 the NHS launched its new 10-year plan. This plan sets out how the NHS thinks it can overcome the challenges that the NHS faces, such as staff shortages and growing demand for services. This is to be achieved essentially by doing things differently and at no point does it refer to the need for new developments to provide for healthcare services by means of financial contribution such as that requested by the Trust.

For the reasons set out above, Officers do not consider that the contribution

sought by the Trust is necessary to make the development acceptable in planning terms and thus the tests for planning obligations as set out above are not considered to have been met. Furthermore, given the adopted policy framework it is considered that in the absence of the contribution, the application does not fail as a consequence as this issue alone would not justify a reason for refusal, which it must do in order to make the contribution necessary to make the development acceptable in planning terms and meet the test for a planning obligation."

- 3.57** The same conclusions should be made in terms of site-specific requirement k) and the reference to health should therefore be deleted.
- 3.58** Finally, the requirement to provide two junior football pitches on-site is not supported. During the time that developers in the 'Warsash Cluster' have been in discussion with FBC in relation to their land interests, the Council has not been able to justify why on-site provision is needed and appears to have been an aspiration which has not been properly considered. The provision of sports pitches in this location is not appropriate, particularly having regard to the likely noise and traffic implications associated with this use, as well as the presumed need for a complementary pavilion. Site-specific requirement k) i) should therefore be deleted.
- 3.59** In terms of the requirement to provide off-site improvements to existing sports facilities, this is inconsistent with the financial contributions that have been agreed as part of the resolutions to grant outline planning permission for our client's three land interests and this requirement has not been raised by FBC as part of this process. The wording of site-specific requirement k) should therefore be amended to provide more flexibility, so that it cannot be interpreted that an off-site financial contribution towards sports facilities is required in relation to all land parcels within the Policy HA1 allocation (such as our client's three sites), but so that this can be sought in relation to the other parcels of land if justified and agreed between the relevant parties.
- 3.60** Taking into account all of the above, the wording of site-specific requirement k) should be amended to state:

"Infrastructure provision or contributions including but not limited to education and transport may be necessary in line with Policy TIN4 and NE3. In addition, contributions towards off-site improvements to existing sports facilities may be required."

Figure 4.1 – Policy HA1 Indicative Framework Plan

3.61 Figure 4.1 includes the identification of areas referred to as 'open space or development options. Development not on both', which are marked by a light green diagonal hatching. The only areas annotated as such on Figure 4.1 relate to our client's interest at Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) – one is shown at the western end of the site frontage with Greenaway Lane and the other running north-south in the centre of the site.

3.62 These annotations are not necessary and should be deleted as their intended purpose is unclear. The agreed illustrative outline masterplan for this site shows that development will be set back from Greenaway Lane with a linear area of public open shown across the entire site frontage, which in turn connects with further public open space shown running north-south through the centre of the site.

Policy HP1: New Residential Development

3.63 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.64 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.65 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.66 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.67 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.68 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.69 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.70 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.71 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.72 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.73 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.74 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.75 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.76 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.77 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.78 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.79 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.80** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.81** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDIX 1
Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND AT BROOK AVENUE, WARSASH

**ON BEHALF OF
ANTHONY AND LISA KING AND ANDREW AND MELANIE NORRIS**

**TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED)
PLANNING AND COMPULSORY PURCHASE ACT 2004**

4.0 Participation at the examination hearing sessions **27**

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our clients, Anthony and Lisa King, and Andrew and Melanie Norris, who own a potential housing site at Brook Avenue, Warsash. For the reasons set out in these representations, our clients are strongly of the view that their land should be allocated for housing development in the local plan.
- 1.2** These representations are consistent with, and build on, the previous representations which were submitted on behalf of Anthony and Lisa King by WYG in relation to the Fareham Draft Local Plan 2036 Supplement in February, 2020. Those previous representations are re-submitted with this representation for ease of reference.
- 1.3** The following representations utilise the same format as the Council’s response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

	Agent	Client

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 - 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Former Policy HA2 allocation site Newgate Lane South, Employment allocations Policies E2 and E3.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020.

The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes

in the borough in any event, but the Council chose not to follow this national guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.

2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.

2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of

the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground –

as such it's preparation is premature.

- 2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.
- 2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PFSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits.

The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not Effective:

- 2.28 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

- 2.29 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

- 2.30 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.
- 2.31 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PFSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the

achievement of sustainable development.

4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.32 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of our clients' site at Brook Avenue, Warsash.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.33 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.34 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of our clients' land at Brook Avenue, Warsash.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8** This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9** The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10** The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.
- 3.11** The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.
- 3.12** Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

-
- 3.16** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.17** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

- 3.27 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (ASLQ) as shown on Figure 3.3 of the plan. This proposed designation affects our clients' site at Brook Lane, Warsash and all immediately surrounding land except (curiously) the Egmont Nursery site, Brook Avenue, which is a proposed allocation in the PLP and which has outline planning permission for 8 dwellings.
- 3.28** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. In our view, **this creation of a potentially irrelevant layer of policy is unnecessary and Policy DS3 should be deleted.**

However, if it is held that Policy DS3 should be retained in the plan, then the following comments apply:

- 3.29 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

- 3.30 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.31 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HP1: New Residential Development

- 3.32 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.
- 3.33 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

- 3.34 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.35 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.36 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.37 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.38 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.39 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.40 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.41 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.42 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.43 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.44 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.45 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

- 3.46 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on many of the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

- 3.47 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.
- 3.48 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.56 This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged

"to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.57 This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Appendix C:

- 3.58 The purpose of the inclusion of the Local Ecological Network Map at Appendix C is not understood. It includes the identification of land as "Network Opportunities". This does not appear to have a basis in the policies of the PLP. The plan is difficult to interpret given its scale but all or part of our clients' site may be identified as a Network Opportunity on this plan. This is not explained. This appendix should be deleted, as happened to a similar plan appended to the Regulation 19 Chichester District Local Plan.

Proposed housing allocation – land at Brook Avenue, Warsash

- 3.59 Our clients' site is identified at Appendix A of the accompanying February 2020 representations. It is SHELAA Site ID 3050 which is assessed as a "Discounted Housing Site" on page 161 of the Council's most recent SHELAA dated September 2020. Here it is confirmed that the site has a gross area of 2.04ha and an estimated yield of 55 dwellings. The site's "Suitability" (for development) was assessed as follows:

"Constraints: *Agricultural Land Grade 3b, Within 500m of SPA, Within 500m of SAC, Within 500m of Ramsar, Within 500m of SSSI, Countryside.*

Highways / Pedestrian access: *Access from the south would be unacceptable as the link to Brook Lane is narrow. Access from the north onto Brook Avenue is considered feasible. Footway provision along Brook Avenue would be required to Brook Lane.*

Conservation Comments: *No known constraints.*

Noise / Air Quality Assessment: *No issues.*

Archaeology: *Site not within identified area of archaeological potential.*

Ecology Comment: *The site contains an improved grassland field with boundary vegetation, which could be utilised by foraging and commuting bats, reptiles, dormice and breeding birds. Issues arising from increased recreation within the SINC will need to be considered. Protection and enhancement of the boundary vegetation is required.*

Accessible Facility Types 6/10: *Within 1600m of a Secondary School, within 800m of a Convenience Store or Supermarket, within 400m of a High Frequency Bus Stops, within 800m of a Accessible Green or Play Space, within 1200m of a Primary School, within 1600m of a Town/District or Local Centre.*

Reason for Discounting: *Development of scale promoted would not be in keeping with the settlement pattern.*

Is the site suitable? *No*

Is the site available? *Yes*

Is the site considered achievable? *Yes"*

Our comments:

The site is considered to be available and achievable for housing, but not suitable. This appears to be an illogical conclusion from the assessment

provided, particularly when account is taken of other planning permissions and allocations in the immediate area.

Proximity to the SPA/SAC/Ramsar and SSSI are not objections in principle to development in this location – as evidenced by the planning permission for housing at Egmont Nursery to the west of our clients' land (so closer to European designated sites) and the allocation of the "Warsash cluster" of housing sites north and south of Greenaway Lane a short distance to the east.

Access is available from Brook Avenue to the north.

There are no conservation, archaeology, noise or air quality constraints.

The site offers some ecological potential but this can be mitigated.

The site is sustainably located within walking distances of secondary and primary schools, local services and facilities including convenience shopping and a high frequency bus route.

Therefore, it appears that the only reason it was not allocated for housing was because the estimated yield of 55 dwellings was held to be not *"in keeping with the settlement pattern"*. The site's area is 2.04ha, so a scheme of 55 dwellings would be at a density of about 27 dwellings per hectare, a relatively low density.

To the east of the site are consolidated frontages of suburban housing fronting Brook Lane and Brook Avenue, but to the west housing along Brook Avenue is of lower density and is more sporadic.

In this context, it is suggested that the density of housing development should reduce east to west across the site, that the site should be allocated for "about 25 dwellings", but that its capacity should be confirmed through a detailed assessment of its constraints and the preparation of a feasibility layout.

For these reasons, the Council is encouraged to allocate our clients' site at Brook Avenue, Warsash for about 25 dwellings. Our clients have received many expressions of interest in their land from housing

developers, such that the site is deliverable in the short term and can make a modest though important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

Sent by email to: planningpolicy@fareham.gov.uk

17/12/2020

Dear Sir/ Madam

Response by the Home Builders Federation to the consultation on the Fareham Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Fareham Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

We would like to submit the following representations on the Local Plan, and we would welcome, in due course, participating in hearings of the Examination in Public.

Duty to Co-operate

2. We note that the Council is part of the Partnership for South Hampshire and has worked closely with these authorities in determining housing needs and examining opportunities as to how these needs could be addressed. The Local Plan outlines at paragraph 4.4 that there are likely to be significant unmet needs arising in Portsmouth and in response to this the Council has identified a further 847 homes to meet needs. Whilst this increase is welcomed, we are concerned that it does not seem to reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PfSH) of over 10,000 homes. So, whilst the Council appears to have co-operated with its neighbours on the issue of housing needs, we are concerned that its contribution is insufficient when considered against the scale of the issue at hand. It would also be the case that this contribution has been made solely as a result of the Council using the standard method as proposed in the most recent Government consultation, and which to date has not been adopted, that significantly reduces the minimum number of homes to be planned for in Fareham. So whilst it would appear that the Council has co-operated with its neighbours in relation to the legal requirements set out in the Localism Act, the outcomes of that co-operation are insufficient to address the cross boundary issue that has been identified – an issue we will come to in relation to policy H1.

Policy H1 - Housing Provision

This policy is unsound as it is inconsistent with national policy

Housing needs

3. The Council are clearly aware that the housing requirement within the policy H1 is inconsistent with national policy as it is based on a standard method that has not been adopted by the Government. Whilst we recognise the Government were out to consultation on an alternative approach it was by no means certain that it would be adopted. The uncertainty as to the standard method has now been addressed with the Government publishing its latest Planning Practice Guidance which states at 2a-004 that the Government has retained the 2014-based household projections as the baseline estimates for household growth within the standard method.
4. The application of the standard method as set out in the most up to date guidance would require the Council to deliver 514 new homes each year. As such the 403 dwellings per annum local housing needs assessment is not consistent with planning policy as it currently stands. We hope a similar degree of haste will be taken in adopting this figure as was taken in moving forward with the lower assessment of needs in Fareham. In addition to this issue, we have three further concerns with regard to policy H1, which are:
 - The policy does not include the Council minimum required level of housing delivery;
 - The degree to which unmet needs in neighbouring areas has been taken into account;
 - Whether economic growth aspiration for the south Hampshire area will be supported to proposed levels of housing delivery; and
 - Plan period and past under delivery.

The housing requirement

5. Policy H1 does not set out the minimum number of homes the Council is required to deliver. Rather it sets out the number of homes that are expected to be delivered by the local plan. It is important that the Council sets out in H1 the minimum number of homes it is required to deliver in order to monitor its performance in meeting this requirement with regard to both the five year housing land supply and the housing delivery test. As set out in table 4.1 of the local plan this figure should be the local housing need figure plus any unmet needs within a neighbouring area that the Council has agreed to take.

Unmet needs

6. Paragraph 60 of the NPPF states that “*any needs that cannot be met within neighbouring areas should also be taken into account when establishing the amount of housing to be planned for*”. As we note above the Council has, to some

extent, taken account of unmet needs across the south Hampshire sub-region and in response has stated that it will provide a further 847 homes. However, this is a very modest contribution to what is a very high level of unmet needs in the south of Hampshire. The Council state in paragraph 4.4 of the local plan that, based on the current standard method, unmet needs across the sub region of South Hampshire are in the region of 10,750 dwellings. Whilst we recognise that this will change with regard to the amended standard method and as new plans come forward it is unlikely to reduce substantially given that Boroughs such as Portsmouth, Havant, Gosport and Southampton have tight boundaries which will limit any scope for significant increases in provision. Considering the scale of the unmet needs Fareham's decision to contribute just 847 homes to the current shortfall is insufficient.

7. What is evident from the consultation on the Local Plan 2036 supplement was that the Council clearly considered it possible to deliver well above what is being proposed in the published Local Plan 2037. For example, paragraph 3.5 of the supplement to the Local Plan 2036 outlines an annual housing requirement for the Borough of between 572 and 598 homes per annum between 2020 and 2036. This annual rate of delivery would deliver between 9,000 and 9,500 homes over 16 years. It goes on to identify potential sites that could be allocated to support this higher level of delivery.
8. However, the Council has not considered as part of the preparation of the published Local Plan 2037 whether more could have been done to address unmet needs of other areas. In particular we would have expected a higher level of delivery beyond what is proposed in the published local plan to have been considered within the Sustainability Appraisal. However, this issue of unmet needs and increased delivery beyond what is being proposed in policy H1 is not mentioned in the SA published in November 2020 as part of this consultation. As such the Council cannot say whether or not a higher level of housing delivery, which would have done more to address unmet needs across the sub region was a more sustainable approach compared to the chosen strategy. This is not only a concern regarding the soundness of the Council's approach to unmet needs but also the efficacy of the SA that has been prepared to support this local plan.

Growth strategies

9. Paragraph 2a-010 of Planning Practice Guidance (PPG) outlines that there will be circumstances where it is appropriate to plan for a higher housing figure than that identified through the standard method. One of these is where an authority has agreed to take on the unmet needs of another area as discussed above however other situations are identified where housing need may exceed past trends. These include:
 - Deliverable growth strategies
 - Strategic infrastructure improvements likely to drive an increase in homes

10. The Council is clearly committed to economic growth as stated at paragraph 6.1 of the publication local plan but notes at paragraph 6.7 of the Local Plan 2037 that whilst PfSH is committed to reviewing employment requirements published to support the spatial position statement this will not be intime to support this local plan. Due to the absence of this sub regional assessment of employment growth the Council have undertaken its own assessment of the likely increase in jobs over the plan period. The Business Needs, Site Assessment and Employment Land Study (BNSAELS) states at paragraph 6.23 that between 2018 and 2036 it is estimated that a further 4,600 jobs will be created in Fareham. This equates to annual growth in employment from the current baseline of 48,000 jobs of about 0.5% per annum (pa) which is lower than the 0.8% pa jobs growth forecast in the PfSH SHMA update published 2016¹. This higher level of growth would see the number of jobs in the Borough grow by around 6,900 over the same period as that assessed in BNSAELS. However, no detail has been provided by the Council as to whether the level of housing delivery within Fareham will meet these employment growth expectations let alone whether the wider jobs growth expectations of the sub region will be met.
11. The Strategic Housing Market Assessment published by PfSH in 2016 indicated that between 2011 and 2030 that 4,630 homes were needed each year between 2011 and 2030 to support the expectation that there would be 86,300 additional jobs across South Hampshire. However, housing delivery during this period as set out in Table H1 of the Spatial Position Statement indicates growth of around 4,536. Whilst the shortfall is relatively small across the whole sub region, given that the Council have noted at paragraph 4.5 that both Portsmouth and Gosport will struggle to meet their needs going forward it will be important, prior to submission, for the Council to consider with its partners in the PfSH whether sufficient housing will be provided to support these sub regional growth expectations, or whether further allocations are needed in relatively less constrained areas such as Fareham.
12. If insufficient housing is provided in sub-region, we are also concerned that higher levels of in-commuting will be required in order to support the expected levels of employment growth. This would be inconsistent with paragraphs 102 and 103 of the NPPF which require Council's to consider how they can deliver patterns of growth that seek to limit the need to travel. This is an issue that will also need to be considered by the Council and its neighbours prior to submission of the local plan.

Plan period and past under supply

13. There are also other impacts from the application of the standard method that have not been taken into account by the Council. In particular the Council have not grappled with the issue of under supply from the point at which the standard method was introduced in 2018. Planning Practice Guidance states in relation to

¹ Page 56 of the 2016 SHMA

this:

“Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate”.

14. As the Council commenced preparation of this local plan in 2017 it is important that and the Council consider housing completions from the introduction of the standard method compared with the level of local housing need from that point. We recognise that the Standard Method takes account of backlog but only in so far as the affordability ratio will have worsened in the years prior to the calculation and does not take account of under provision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.

Year	Number of completions/ projected completions	Local housing need	Shortfall
2018/2019	290	520	230
2019/2020	263 ²	520	257
2020/2021	132 ³	520	388

15. The table above indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No consideration is given to these unmet needs in the published plan and even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
16. As housing delivery in the Borough has been below both its requirement in the Core Strategy and the measure of local housing need derived from the Standard Method the Council are wrong to have selected a plan period and housing strategy that takes no account of this. It is the antithesis of positive planning and as such we would suggest that the plan period be revised to start from 2019/20 which is the base date from which the affordability evidence is taken.

Housing land supply

17. The HBF would not wish to comment on the merits or otherwise of individual sites selected for allocation but it is critical that the Council's assumptions on lapse rates, non-implementation allowances, lead in times and delivery rates contained within its overall housing land supply, five-year housing land supply and housing trajectory are correct and realistic. These assumptions should be supported by parties responsible for the delivery of housing and sense checked by the Council using historical empirical data and local knowledge. We note that the Council has

² Fareham BC Authority Monitoring Report 2018/19 (February 2020)

³ Fareham BC Five-year housing land supply position report (June 2020)

included a housing trajectory at appendix B of the local plan as required by the NPPF. However, for the purposes of transparency and effective scrutiny of this trajectory it is necessary for the Council to set out in its evidence base trajectories for each of the sites that make up supply across the plan period. We could not find this evidence, and in our experience, it is both helpful to the inspector examining the plan as well as those making representations.

18. We note and welcome the contingency between the Council's requirement and the number of homes it expects to be delivered over the plan period. It is important that there is a significant contingency to take account of any delays in the delivery of key sites or overestimates in the amount of windfall expected in any plan to ensure that development needs are met in full. As such should the eventual standard method adopted by the Government see housing needs increase in Fareham, we would expect to see this level of contingency within the Council's land supply maintained. Similarly, the Council would probably need to allocate further sites of one hectare or less to ensure it meets the requirement set out in paragraph 64 of the NPPF.

Conclusions on H1

19. The policy is not sound as considered on the basis that:
 - It uses a standard method for assessing housing need that is still out to consultation and potentially subject to change. However, we recognise that the situation is in a state of flux at present and as such recommend the plan is not submitted until the Government have finalised any changes to the standard method;
 - It fails to take sufficient account of the scale of the unmet needs identified within neighbouring areas as required by paragraph 60 of the NPPF;
 - Does not consider whether housing growth will be sufficient to support its economic growth expectations and the impact this would have on commuting and the need to promote sustainable patterns of growth as required by paragraph 103 of the NPPF.

HP2: New Small-Scale Development outside the Urban Areas

The policy is not sound as it is not consistent with national policy.

20. The HBF's preference would be for the Council to identify appropriate sites and allocate them within the local plan. This would provide the certainty that small developers seek with regard to bringing such sites forward. However, in lieu of allocation the overarching principle of this policy and its aim to support small and medium sized housebuilders and those seeking self-build plots is supported.
21. But we would suggest that at present the policy is not consistent with national policy as it could lead to sites not making the most efficient use of land as required by paragraph 122 of the NPPF. There will be situations where such sites on the edge of urban areas could be developed for more than 4 units without any adverse

impacts. We would therefore suggest that the threshold be increased to 10 units in order to reflect the definition of minor development as well as being consistent with the Government's approach to affordable housing contributions on small sites as set out in paragraph 63 of the NPPF.

Recommendation

22. Part 5a of policy HP2 be amended as set out below:
 - a. Of not more than 4 10 units; and

Policy HP4: Five-year housing land supply

Part d of this policy is inconsistent with the NPPF

23. The HBF supports this policy, however we would suggest that the phrase "*in the short term*" in part d is unnecessary as the meaning of deliverable with regard to local plans is clearly defined in the glossary of the NPPF. The inclusion of the phrase short term could cause unnecessary confusion for applicants and decision makers.

Recommendation

That the phrase "*in the short term*" is deleted from part d of policy HP4.

HP5 – Provision of affordable housing

The policy is unsound in its consideration of the percentage requirement for affordable home ownership and with regard to its treatment of older peoples housing which is unjustified

24. Firstly, the policy requirement regarding affordable home ownership is inconsistent with paragraph 64 of the NPPF which expects 10% of all homes on major development involving housing provision to be available for affordable home ownership. Footnote 29 then confirms that these homes are then included as part of the affordable housing contribution. For example, on a site of 100 homes paragraph 64 of the NPPF would require at least 10 homes to be available for affordable home ownership, equating to 25% of the affordable housing delivery on a greenfield site. The Council's policy at present only requires 10% of all affordable housing to be available for affordable home ownership. The Council's policy would require such development to deliver 4 homes for affordable home ownership – just 4% of total delivery on that site. This inconsistency with national policy should be amended.
25. Secondly, whilst we welcome the decision to vary rates within the Borough to reflect viability, we are concerned that despite the evidence the Council will still, seemingly, require specialist development for older people to support the delivery of affordable homes. In section 6.6 of the Viability Study it is clear that both

sheltered housing and extra care housing for older people are not viable at any level of affordable housing. It is therefore surprising that the policy has not removed the requirement for such accommodation to contribute towards the provision of affordable housing.

Recommendation

26. That policy HP5 to be amended as follows:
- To reflect paragraph 64 of the NPPF
 - To state that specialist residential accommodation for older people be exempt from providing affordable housing.

HP9 – Self and Custom Build Homes

The policy is unsound as it has not been justified

27. Whilst the HBF support the encouragement of self-build housing through the local plan, we do not consider the requirement for sites of over 40 to set aside 10% dwellings to be delivered through serviced plots for self and custom house building to be justified or consistent with national policy.
28. Firstly, the evidence with regard to the demand for, and supply of self-build plots would suggest that a significant proportion of demand for self-build in Fareham will be met through windfall sites. As the Council note in paragraph 5.8 of the Self and Custom Build Background Paper the demand for self-build plots arising within the first base period of the self-build register was addressed through windfall and it would seem that a similar result will occur within the second base period. Therefore, to suggest that 10% of all development over 40 units are required as self-build is not justified as it would seem that the Council through normal development management process is supporting sufficient plots to come forward without recourse to the impositions being proposed in policy H9. In addition, policy HP2 will also support the delivery of additional sites that will clearly be attractive to both self and custom build housing. Whilst the Council may not want to be dependent on windfall development if this approach is meeting identified demand then there is no need to require such plots to be provided on other sites.
29. Secondly, we welcome the Council's review of the self-build register. From this review it is clear that of the 79 people on the register only 56 people are actively pursuing the possibility of building their own home. In addition, only 40 of those said they would consider a plot on a larger self-build development. Even then it is not clear from these answers whether they would be looking for a plot on major housing building site or would prefer a site solely devoted to self-build plots. As such we are concerned that there is not a significant demand for plots on larger housing being developed by housebuilders and that the 10% requirement in HP9 is unjustified.

30. Finally, it is also important to recognise that paragraphs 57-024 and 57-025 of the PPG sets out a variety of approaches that need to be considered – including the use of the Council's own land. This is reiterated in para 57-14 of the PPG which sets out the need for Council's to consider how they can support the delivery of self-build plots through their housing strategy, land disposal and regeneration functions. We would suggest that rather than place additional burdens on house builders for the provision of self-build plots it should utilise its own land or seek to engage with landowners to identify suitable sites on which to deliver serviced self-build plots. Indeed, it would appear from paragraph 5.14 of the Self and Custom Build Background Paper that such an approach has worked in Fareham.

Recommendation

31. That policy HP9 is deleted.

Policy NE2: Biodiversity Net Gain

32. The Council have included the Government's suggestion that new development should improve the biodiversity on their site to show a 10% net gain over the pre-development baseline within this policy. Whilst we recognise that this is the Government's current position favoured position it is likely that there will be transition period to allow the development industry to adapt to the proposed changes. As such we would suggest that the Council remains consistent with paragraph 170 of national policy to seek net gains in biodiversity and not include the requirement to show a 10% net gain. A policy without a specific percentage requirement would be consistent with current policy and should the relevant legislation be enacted as currently proposed such a policy would be sufficiently flexible to support a 10% requirement and any transition period.

Recommendation

33. That the 10% requirement be deleted.

Policy NE8: Air Quality

The policy is unsound as it is not justified

34. The HBF is supportive of encouragement for the use of electric and hybrid vehicles via a national standardised approach implemented through the Building Regulations to ensure a consistent approach to future proofing the housing stock. It is the industry's preference for a national approach to the provision of charging points rather than local authorities setting their own standards. We consider this is necessary to allow research and development and supply chains to focus upon responding to agreed national targets, and for training providers to plan their programmes to equip the labour force to meet these new requirements. It is fundamentally inefficient to create a plurality of standards.

35. The Government has recognised in recent consultations the possible impact of any requirement to provide electric vehicle charging points on housing supply, where the requirements are not technically feasible. The Government's recent consultation proposed introducing exemptions for such developments. The costs of installing the cables and the charge point hardware will vary considerably based on site-specific conditions in relation to the local grid. The introduction of EVCPs in new buildings will impact on the electricity demand from these buildings especially for multi-dwelling buildings. A requirement for large numbers of EVCPs will require a larger connection to the development and will introduce a power supply requirement, which may otherwise not be needed. The level of upgrade needed is dependent on the capacity available in the local network resulting in additional costs in relation to charge point instalment.
36. Where such costs are high the Government are proposing that any potential negative impact on housing supply should be mitigated with an appropriate exemption from the charge point installation requirement based on the grid connection cost. The consultation proposes that the threshold for the exemption is set at £3,600. In the instances the additional costs are likely to make developments unviable, it is the Government's view that the EVCP requirements should not apply and only the minimum Energy Performance of Buildings Directive requirements should be applied.
37. As such we would suggest that the requirement for EVCPs should be deleted because the Government's proposed changes to Building Regulations will provide a more effective framework for the delivery of charging points for electric vehicles.

Recommendation

38. Part A of the third paragraph within policy NE8 is deleted.

D4: Water Quality and resources

The policy is unsound as it is not consistent with national policy.

39. The final sentence of policy D4 is inconsistent with paragraph 16 of the NPPF which requires policies to be unambiguous and evident as to how the decision maker should react. The policy as written could lead to applications being refused by decision makers on the basis that a development does not achieve a standard that is higher than the maximum requirement that can be applied through the adoption of the optional technical standards.

Recommendation

40. The final sentence of this policy is deleted.

D5: Internal Space standards

The policy is unsound as it has not been justified

41. Policy D5 requires development to meet national spaces standards as a minimum. Whilst the HBF share the Council desire good quality homes delivered within Fareham we also consider that space standards can, in some instances, have a negative impact upon affordability issues and reduce customer choice. In terms of choice, for example, some developers will provide entry level two, three and four-bedroom properties which may not meet the optional nationally described space standards but which would allow on lower incomes can afford a property which has their required number of bedrooms.
42. Given the poor affordability of property in the area and the tight constraints on development it is therefore important that the Council can provide, in line with PPG, robust evidence that there is a need to introduce the optional space standards – that these standards are a must have rather than a nice to have policy. However, as the Council note in paragraph 11.59 of the publication local plan most new homes in Fareham are built to a size that is consistent with the nationally described space standards. The only inconsistency they note is that the smallest bedroom often fails to meet the space standards. This evidence does not suggest that there is a pressing need for the introduction of space standard within Fareham but does indicate that requiring larger bedrooms could reduce the number of smaller homes with three or four bedrooms.
43. The HBF is not aware of any evidence that market dwellings in Fareham that do not meet the NDSS remaining unsold or that those living in these dwellings consider that their housing needs are not met. There is no evidence that the size of houses built are considered inappropriate by purchasers or dwellings that do not meet the NDSS are selling less well in comparison with other dwellings. The HBF in partnership with National House Building Council (NHBC) undertake an annual independently verified National New Homes Customer Satisfaction Survey. The 2019 Survey demonstrates that 91% of new home buyers would purchase a new build home again and 89% would recommend their housebuilder to a friend. The results also conclude that 93% of respondents were happy with the internal design of their new home, which does not suggest that significant numbers of new home buyers are looking for different layouts or house sizes to that currently built.
44. Given that there is little to suggest that development below space standards is an endemic concern within Fareham we would suggest that policy D5 is deleted from the plan. This would give the Council greater flexibility to maximise the number of sites that are developable as well as extending consumer choice to more households.

Conclusion

45. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, for the following reasons:

- Failure to give sufficient consideration to the housing needs of neighbouring areas and the consequences on the delivery of sustainable development across south Hampshire;
- Housing needs have not been assessed in accordance with standard methodology as set out in PPG;
- Policy H2 inconsistent with national policy with regard to making the most effective use of land;
- Policy HP5 fails to include exemption for older people's housing in line with the Council's viability evidence;
- Requirement for 10% of plots on sites over 40 units be allocated for self-builders is unjustified;
- The adoption of the nationally described space standards in policy D5 has not been adequately justified.

We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and examination. Should you require any further clarification on the issues raised in this representation please contact me.

Yours faithfully

Mark Behrendt MRTPI
Planning Manager – Local Plans
Home Builders Federation

1) Paragraph: 5.24

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

olicy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications. Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockwood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots. Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect. Para 10.14 The Local Plan Strategic Transport Assessment at Para 14.16 reads; "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area HA1, of the local plan with 830 homes and isn't assessed within the The Local Plan Strategic Transport Assessment document. Policy HA1: Page 52 indicates the need for the provision of "2 junior football pitches" Why are these not shown in the Masterplan?

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 "Strategic Priorities" which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manœuvre by stealth of the council, to suit its own objectives.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

We really need to rethink the number of houses planned for development in Warsash, with no infrastructure supporting that development. Warsash is bounded on two sides by water - there is very limited access in or out, especially with another potential 1600 cars in the village.

Remove the proposal to redefine the settlement boundary

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Reconsider the transport, traffic and impact on local infrastructure.

It will also the area to retain its identity, valued landscape and settlement definition

Your suggested revised wording of any policy or text:

Revise the policy test in line with environmental, amenity and traffic issues

I have no revised wording to suggest. I am not a town planner or lawyer.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

2) Paragraph: 5.6

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove the proposal to redefine the settlement boundary

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would protect the local identity, valued landscapes and settlement definition

Your suggested revised wording of any policy or text:

I have no proposed revised wording - I am not a lawyer or town planner

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Paragraph: 3.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The decision to “rewild” the Stubbington Strategic Gap was made without consultation with council officers or elected Members. Instead, this announcement came via a press release issued after the start of the Full Council meeting which was in the process of debating this Plan?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reconsider the re-wilding or the Stubbington gap. Why couldn't Warsash have this designation instead, and the building commence at Stubbington?

How would the modification(s) you propose make the Local Plan legally compliant or sound?

I would allow a full consultation on the options available, instead of choosing the most convenient

Your suggested revised wording of any policy or text:

I have no revised wording - I am not a lawyer or town planner

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Paragraph: 1.28

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.28 In agreeing to take up a shortfall in homes of 847 from Portsmouth, Fareham Council are taking a risk as the new methodology for calculating Housing Need has not been signed off by the Government and the Housing Delivery test will not be available during this public consultation period.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The government appear to be changing their mind on allocation of housing - Fareham has taken too much of a hit and should revisit the building targets.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would re-look at the housing targets for the region

Your suggested revised wording of any policy or text:

I have no revised wording or text

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Paragraph: 9.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Whereas the LPA is aspiring to Nitrate Neutrality, Strategic Policy NE1 requires designated sites be protected and ENHANCED Likewise Para 9.50 (Policy NE4) confirms permissions will be granted when the integrity of designated sites be maintained or IMPROVED. Finally, Page 199 Para 9.54 indicates that proposals for development should provide a net REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA's approach therefore contravenes both the Habitats Directive and the Publication Plan in respect of these policies. Furthermore, a leading QC's opinion is it is unclear how any development could be contemplated in the Western Wards without negatively impacting the SAC and RAMSAR sites and therefore based on proximity alone, this would invalidate the deliverability of these developments. As per advice from Natural England, it is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves beyond scientific doubt, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been mitigated (rather than compensated). There is doubt that the LPA is applying the Natural England advice correctly and lawfully in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The development site needs to be protected and improved , with a net reduction on nitrites and consider the legal opinion.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would meet legal requirements on the habitats directive

Your suggested revised wording of any policy or text:

No comment

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Paragraph: 1.16

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

No mention is made of the 2017 unadopted draft Plan and Officers confirm it is the previous, 2015 plan which is extant. Para 4.8 Allows the LPA to consider Housing sites allocated in the previous adopted (extant) Local Plan. Yet, whilst HA1 did not feature in the extant 2015 Plan, page 38 ignores this, stating that housing will be provided through HA1 and other local sites. The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number! There is no joined up "Masterplan" for HA1 (with developers working in complete isolation of one another). Therefore, another environmental impact assessment must be conducted showing the cumulative effect of HA1 in its entirety.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reconsider the allocation of housing to Warsash and reconsider redistribution across Fareham. Complete a full environmental assessment for all development in Warsash

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Fairer distribution of housing allocation, with full impact assessment for all proposed development, rather than in isolation

Your suggested revised wording of any policy or text:

No comment

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

7) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Introduction: Statement of Community Involvement Paragraph 2.1 says a “variety of methods” should be used to solicit comments from the public. Because paper-based documents failed to be employed across the borough, a large proportion of residents were deprived of sharing their opinion. This was exacerbated by Covid restrictions, limiting the access to libraries and the council office. The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents’ concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board. It is discriminatory that community-generated evidence carries less weight than that provided by Developers consultants. E.g. regarding previous use of land in Nitrate budget calculations similarly with traffic survey results captured by residents and Community Speedwatch teams. Para 4.7 The Warsash Neighbourhood Forum (although now defunct) were never consulted with respect to their intention to allocate housing, in line with Para 66 of the NPPF.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

It needs to have a much wider consultation process, involving great access for the community. The online method is restrictive for many people.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would allow all residents to view and comment on the proposals

Your suggested revised wording of any policy or text:

No comment

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

8) Paragraph: 10.26

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Infrastructure Delivery Plan calls for the expansion of health care provision through the addition of further GP locations in the Western Wards, However the table provided within the document only provides an historic timeline pre-dating the Local Plan. This is not a Sound approach taking into consideration that HA1 alone will bring an additional 830 dwellings.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Legally enforce the provision of further healthcare provision

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would provide sufficient healthcare resources to meet the demand of the additional housing

Your suggested revised wording of any policy or text:

No comment

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

9) Paragraph: 7.13

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Local retail/commercial facilities figures do not cater for the additional houses in Warsash. For example, no additional convenience goods floor space has been allocated to Warsash. Para 7.18 Out of town shopping is discussed, but not defined; Out of town shopping will take jobs and customers away from local shopping areas and will increase traffic on the routes in and out of Warsash and Locks Heath.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Legally enforce the provision of further retail space in Warsash

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would reduce traffic and provide local jobs in the community

Your suggested revised wording of any policy or text:

no comment

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

10) Paragraph: 10.26

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Infrastructure Delivery Plan Section 5.4 Education is planned with HCC but the period of any proposed extensions for child placements is only up to 2021 whereas the Plan covers up to 2037. This is not a sound approach for the education of our children.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

There is already a lot of pressure on the local schools - adding more housing will in most likelihood, force children to travel some distance for schooling. the plan needs to legally enforce the provision of further schooling through the lifetime of the plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would provide for child placements up to the lifetime fo the plan

Your suggested revised wording of any policy or text:

no comment

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

11) Paragraph: 11.34

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The council will support applications where development exceeds Building Regulations but no percentage target for improvement has been set. The Plan is therefore not a Sound and effective approach to carbon emissions reduction in the Borough.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Set targets for exceeding carbon emissions as part of the plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It will legally enforce the reduction of carbon in the borough

Your suggested revised wording of any policy or text:

No comment

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

From: June Ward <[REDACTED]>
Date: 6 December 2020 at 22:28:00 GMT
To: June Ward <[REDACTED]>
Subject: FBC Continued

Dear Katherine,

As discussed with you Friday 4 December I enclose the start of my comments on the consultation document which you said you would be able to put in the appropriate boxes as I am unable to as I found that I could not continue without logging on, each time which was not how the system should've worked.

When we spoke you said that you had not received the second paragraph that I submitted so I am hoping that I will start there, as you have already received my first submission.

As I am not able to view the pro forma I hope you will be able to put them into the correct boxes as obviously with only one iPad that I am using to work on and one for my notes which I have made, it would be too torturous.

So onto matters of legal compliance which I believe is paragraph 1.6

There is no mention of the 2017 unadopted draft plan although it has been confirmed that it was in the previous 2015 plan.

Although there was an overall reduction in the new housing it would appear that Warsash is actually going to take 20% more. HA1 has no joined up thinking. There should be an environmental impact on all of the sites proposed , so that each one is not seen in isolation.

Paragraph 4.19 states that many of the housing policies brackets HE256 811 1416 1820 2125 and no longer considered to be proposed allocations. I should like to know how objectively assessed housing need arrived at the fact that site HA1 was to take the bullet.

It would appear that the developers have taken advantage of the LPA's decision that proposing HA1 would mean that they have carte blanche to submit applications. I believe this is contrary to the publication plan. It would also appear that in order to fit in as many houses as possible into HA1 the boundaries have been adjusted to accommodate them. How does this not look as though the Developers have the upper hand and are actually driving this through.

So onto the Habitats directive which again comes under Matters of legal compliance.

Paragraph 9.10 is about nightrates neutrality strategic policy. I cannot see how the policy which requires designated sites to be protected and enhanced and improved is adhered too. I think the word I am looking for is there should be a net reduction the designated sites in unfavourable conditions. The LPA's way of adjudging is the exact opposite. It would appear that this is in direct contravention of both the habitats directive and the publication plan policies. The developments contemplated would be negatively impacting the SAC and RAMSAR sites. I cannot see that under these circumstances it would be a valid option.

I am calling it a day at present and wonder if you can reply to acknowledge receipt of this and that I am actually doing the right thing and making comments that you can import into the documentation,

Many thanks,

June Ward

Dear Katherine,

This next part of my document relates to the Test of Soundness

I am not at all happy with the settlement definition.

Policy HA1, which is supposedly a greenfield site is proposed to be changed to an urban area – via the redefinition of settlement boundaries reference WW 17. Greenfield sites are not particularly favourable for development as it says in the forward to the publication plan.

Paragraph 2.10 says that Fareham Borough aims to retain the identity of the amazing valuable landscape and settlement definition, protecting it's natural, built and historic assets. As someone who has lived in Warsash 45 years and been conversant with this area for nearly 10 years before that, ie the late 1960's, is a complete contradiction. What was once a very gentle countryside location seems to have been redesignated giving it up and status. And the change of the settlement boundary to enable this to happen is in my view completely unethical and beyond belief. I take exception to the fact that policy HP1 calls for the efficient use of existing buildings to meet such need on a 1 for 1 replacement dwelling basis. This is not applicable for HA1 and it would appear that FBC has managed to redraw the urban boundary.

My next comment on test of soundness is where infrastructure is concerned.

This concerns policy HP4 to be found paragraph 5.24; I think HA1 demonstrably fails to have any thing other than a detrimental effect on the environment, certainly the traffic(witness the two and a half hours to get off the motorway on Friday 4 th December, where all roads in and out of Warsash were snarled up, as we are a peninsula....or has this not occurred to anyone) and amenity has implications. Even now I feel that I cannot venture out too far from Warsash for fear of not getting back at a reasonable time due to the amount of traffic on the few roads in and out of Warsash. Warsash almost appears to be a prison! Don't go anywhere because you can't get back to your house!

This ties in with my next point policy HA1. Page 51 talks about traffic routes. As I have said earlier it almost feels that one is imprisoned in Warsash. I note that there was a recommendation that there should only be six dwellings and Greenaway Lane now I see that the plan proposes for 140 houses and that to enable this to be accessed the lane needs to be widened. I think the clue is in the word Lane. This is a delightful lane to walk through but with that amount of traffic proposed would be considerably dangerous. It is already "take your life in your hands to cross Warsash Road "let alone the impact of trying to walk within what was once considered countryside. As one gets older and appreciates the ability to be able to walk along country lanes. Page 54 suggests there should be seven new accesses onto an incredibly busy Brook lane and Lockswood Road as well as an additional iaccess at Brook Lane via three entry points from Greenaway Lane. I have already had to change my surgery where I was a patient for 40 odd years as it was impossible to get to the surgery on time due to the amount of traffic. My surgery is now in locks Heath Centre. I note that there was an occasion some time in the last few few weeks that the Air ambulance was unable to land; and ambulance was unable to get there because of the gridlock. My point is very much that the proximity of these access points and the position of such will cause even more gridlock. We are a peninsular we are hemmed in. More traffic will make us feel that we are even more in a cage.

Continuing with my other comments about infrastructure

Paragraph 10.15 where has that been an analysis of roads where the new houses are proposed. If we are considering 830 new dwellings what about the transport assessment for HA1. Although there could be an average of two cars per dwelling I know from experience that at one point, with our daughters coming and going from University, we had five cars in the driveway, which we could accommodate.....many of the new homes will not have this advantage, and extra cars will be accommodated on the roads.. how therefore is there no reference for the mitigation required to reduce congestion by 2037. Plan as presented failed the test of soundness by not being positively prepared in this respect. In this very Rural area one has to have access to a car to get anywhere, unless being confined to one's home is the way forward for FBC. I cannot see that paragraph 10.14 helps any of us.

I have had the pleasure of one of my family is moving closer to live with me in Warsash and the boys are very involved in outdoor activities so it was a joy that I saw there was provision of two junior football pitches however these appear to be missed off of the master plan?

Document 3 for FBC

Dear Katherine,

This relates to Test of soundness-

Housing need methodology

I think there is a disparity CE paragraph 3.27 figure 3.2. The map shows that there are eight possible growth areas when there are actually more than this. Could you confirm which is the correct one.

Again paragraph 3.37 does not align with paragraph 4.13 regarding the definition of small-scale development. In other words, is it sites of less than 1Ha or development of not more than four dwellings.

Again under the same heading; paragraph 4.2 of the publication plan is dubious as it bases housing numbers on the proposed new methodology for calculating need and there is some concern that this may not be adopted by the government. Also page 37 paragraphs 4.12, 4.16 and policy HP13 illustration says that the contingency barrier of 1094 has been made. I think the plan is very dependent that 4858 houses at Welbourne will be delivered.

Occupancy rates

Paragraph 5.41 states that a four or five bed house would have an average occupancy rate of 2.4 with regard to nitrate budget calculations. However it also states that the range of occupancy for affordable homes will be between 4-6 persons. This does not marry up with the claims in the publication plan for what the council needs and requires.

Carbon reduction

Paragraph 8.60 section 8 does not state what the target should be for the requirement of meeting CO2 emission targets. It simply refers to individual developments power generation. I would contend that the plan is not positively prepared.

Paragraph 11.34 does not state what the meeting of CO2 emission reduction targets should be. The plan just refers to individual developments power generation so again I contend that plan is not positively prepared.

Paragraph 11.36 no standards have been set for the developers to design for natural ventilation and green infrastructure. I cannot see how just meeting building regs, allies with the Governments needs to meet the promised carbon reduction. The council should lead by example by setting standards to ensure that developers are designing for sustainability. We need to look to the future using the new standards SA10.

Retail facilities

Paragraph 7.13 if Warsash is to have more houses then there will be additional retail facilities needed and with that will be the need for more parking spaces as many who have lived in this area for decades need to use their own transport for shopping, hairdressers, and many other facilities that this village has provided. It is already a job to cross the road from one side to the other and more cars to the area will make this even more impossible. There would need to be a crossing area to allow children to cross safely to get to the bus stop or to Brookfield School as well as the many elderly people who need to cross from one side to the other.

Paragraph 7.18 although out-of-town shopping is discussed it is not however defined. As one gets older one prefers to take ones custom to the local shops as driving is not so pleasurable. If we are to be encouraged to shop elsewhere this will increase the amount of traffic on our heavily congested roads.

Education

Paragraph 10.26 infrastructure delivery plan section 5.5. I note that education is planned with Hampshire county council however the period of any proposed extensions only covers to 2021. The plan however goes up to 2037. My grandchildren are already in three different schools within the area, two of which need cars. Offering houses to be developed but then not having school places it's not a sound approach to help to realise the dreams of future generations.

Paragraph 10.27 Infrastructure delivery plan table item 83 calls for section 106 provisions of additional early years foundation provision within the western wards. However H a one does not say if there is going to be a nursery or preschool within the proposed development area. There should be a child placement contribution to be allocated as there are over 1000 new houses being proposed for the Warsash area alone. Again If parents need childcare provision they would have to travel out of this immediate area in order to access provision; not at all ideal, adding to traffic chaos, length of time travelling to and from child care setting and not allowing children to make friendships with those who they might be at school with when they reach statutory age.

Healthcare

As regards Paragraph 10.26 the infrastructure delivery plan calls for the expansion of healthcare provision through further GP practices in the western wards. The document however only provides an historic timeline through dating the local plan. This is not a sound approach considering that HA1 will bring in additional 830 houses. It is already impossible to get an appointment at the nearest GP practice within a week.

Complies with duty to cooperate
Housing need methodology

Paragraph 1.28 which agrees to take up the shortfall of homes from Portsmouth, numbering 847, would appear that FBC are taking a risk as the new methodology for calculating housing need has not been signed off by the Government. Also during this time of public consultation the housing delivery test will not be available

Paragraph 3.10 The rewilding of the Stubbington strategic gap was made without consultation with the council offices or elected members. It came via an announcement through a press release after the start of the full council meeting, which was in the process of debating this plan.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND AT NEWGATE LANE (NORTH AND SOUTH), FAREHAM

ON BEHALF OF BARGATE HOMES LTD AND SUSTAINABLE LAND

**TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED)
PLANNING AND COMPULSORY PURCHASE ACT 2004**

APPENDICES:

APPENDIX 1:	LANDSCAPE EVIDENCE
-------------	--------------------

1.0 Introduction / Details

- 1.1** The following representations are made by Pegasus Group on behalf of our clients Bargate Homes Ltd and Sustainable Land. Our clients have interests in an area of land between Newgate Lane and Newgate Lane East (the new relief road) in Peel Common. Applications for outline planning permission (refs. P/18/1118/OA and P/19/0460/OA) have been made at 'Land at Newgate Lane' which together will provide for the development of up to 190 homes. Both applications are currently the subject of undetermined appeals.
- 1.2** Representations have been made in respect of the sites in response to the Regulation 18 consultation on the original version of the draft Local Plan in December 2017, and again in July 2019 and in February 2020 on subsequent consultations for the new Local Plan. The site continues to be promoted through the Local Plan process as it represents a sustainable and deliverable option to deliver much needed housing in this authority.
- 1.3** Our clients are important stakeholders within Fareham and are keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF).
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. The exceptions are questions A (1,2 & 3) and B5 (parts a & b) where a single response at the beginning and end of the representations is provided, respectively. This is because these responses are common to all questions and our representations.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.2 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

2.3 The NPPF (paragraph 33) states that plans should be reviewed every 5 years and updated as necessary. Previously the local planning authority indicated that this local plan review would amalgamate the adopted Local Plan Parts 1, 2 and 3 into a single new plan. Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. Recently, serious doubts have been expressed over whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. Certainly, the development is not currently "deliverable" in NPPF terms.

Taking all of this into account, the Welborne Plan should be reviewed, which it has not (PLP paragraph 4.9). It is also clear that at this stage the Council suggests that it is not intending to review the Welbourne Plan (Local Development Scheme (LDS), paragraph 1.5). Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

2.4 Include a review of the Welborne Plan in this Local Plan review.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.5 Compliance with the NPPF requirement to review plans and provide an up to date framework to ensure housing delivery.

B4c Your suggested revised wording of any policy or text

2.6 Not applicable.

3.0 Strategic Policy DS2: Development in Strategic Gaps

B1 Which part of the Local Plan is this representation about?

- 3.1 The following comments relate to the Policy DS2, the supporting text and the inclusion of our clients' land between Newgate Lane and Newgate Lane East (the new relief road) in Peel Common within this designation.

B2 Do you think the Publication Local Plan is:

Legally compliant – N/A

Sound - No

Complies with the duty to co-operate – N/A

- 3.2 The Fareham Local Plan is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

- 3.3 The PLP, paragraph 3.43, identifies that the:

"...primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities."

- 3.4 The proposed policy seeks to strengthen the current Core Strategy policy position, contained within Policy CS22 with regards to preventing settlement coalescence. It is stated in the PLP this has been undertaken in response to the NPPF and recent planning decisions (paragraph 3.44). The Council's evidence in relation to this policy is contained within the September 2020 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' document. Chapter 2, section 4.2, seeks to apply the NPPF to this policy.

3.5 The interpretation of the NPPF in this section is selective and as such misleading. For example in referencing paragraph 20 of the NPPF it states:

"Strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for... conservation and enhancement of the natural, built and historic environment, including landscapes."

3.6 This fails to recognise that strategic policies should also set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for housing (including affordable housing), employment, retail, leisure and other commercial development. The Council's evidence also refers to paragraph 170 of the NPPF noting:

"planning policies and decisions should contribute to and enhance the natural and local environment by... protecting and enhancing valued landscapes... (in a manner commensurate with their statutory status or identified quality in the development plan)".

3.7 It must, however, be recognised that the strategic gaps do not have any statutory status therefore shouldn't be unduly restrictive. A tightening of restrictions would be contrary to the NPPF. The policy does identify that development can be accommodated within the Strategic Gap. Indeed, the previous iteration of the plan identified site HA2 and Strategic Growth Areas within the Fareham – Stubbington Strategic Gap. Thus, suggesting that development in the gap is not prohibitive per se.

3.8 Within our representations on the draft Local Plan Supplement we argued the evidence base lacks robustness and has been applied without justification. The updated evidence does not overcome these concerns. Our clients site is situated within parcel 8c of the updated evidence. The study suggests that despite the proximity of Fareham and Gosport in the north part, the gap is currently still effective in providing a 'sense of separation', but it is at risk. It is further noted at point 15 that;

"Whilst the recently completed Newgate Lane South road development does not alter the experience of entering the urban area of Gosport beyond the Peel Common Roundabout, it does reduce tranquillity and bring more built features

(such as noise attenuation barriers) into this part of the gap.”

- 3.9** Despite this significant development, the ‘Technical Review of Areas of Special Landscape Quality and Strategic Gaps’ simply re-iterates previous conclusions from earlier analysis undertaken by LDA and described in the Fareham Borough Landscape Character Assessment, 2017. There is no consideration as to how the development of Newgate Lane South has altered the area. Clearly, the new highway has added a substantial urbanising influence upon the gap, this should be assessed. The blanket approach taken within the policy does not recognise these substantial changes.
- 3.10** Within our client’s appeal evidence in relation to applications P/18/1118/OA and P/19/0460/OA we provide evidence in relation to landscape and visual matters. This evidence takes full consideration of the strategic gap and identifies that Peel Common is not well defined as a coherent area of settlement character due to the fact the settlement appears to be based on the progression of wayside and ribbon development since the early twentieth century. It also notes that the amenity value of the area has altered since the completion of Newgate Lane East. It was concluded that this parcel makes a limited contribution to the wider context of the strategic gap.
- 3.11** The protection of the Strategic Gap is currently governed by policy CS22 of the Core Strategy, which does not permit development where it significantly affects the integrity of the gap. The policy provides a useful starting point for considering the purpose of strategic gaps. It states:
- 3.12** *“Their boundaries will be reviewed in accordance with the following criteria:*
- a) The open nature/sense of separation between settlements cannot be retained by other policy designations;*
 - b) The land to be included within the gap performs an important role in defining the settlement character of the area and separating settlements at risk of coalescence;*
 - c) In defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation.”*

3.13 Taking each of these key criteria in turn:

Openness and sense separation

3.14 Although the proposed development site is a greenfield site within the countryside, it would not represent isolated development. The site is located to the west of the settlement of Bridgemarky. The development will become a cohesive part of the Bridgemarky neighbourhood through the provision of key pedestrian links and local facilities (open space and children's play areas) for the benefit of the wider community.

3.15 The site is bounded by Newgate Lane East to the east. To the west it is bounded by Newgate Lane, which is the focus of ribbon development, and beyond this the Peel Common Waste Water Treatment Works and solar farm. If the site is not developed, then it will be an open pocket of land between the two roads within an otherwise urbanized landscape, which in our view is of inherently less value in terms of its contribution to the strategic gap.

3.16 It is notable that the Council's evidence 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' identifies the Peel Common Waste Water Treatment Works to provide a strong physical and visual gap between Gosport and Stubbington (Area 8b), and to a lesser extent so does the Solar Farm. This physical and visual gap would not be affected by development on our clients' sites.

3.17 The Council's evidence also identifies that a Green Infrastructure (GI) Strategy or Framework would be beneficial to enhance the GI value of the current gap and potentially help determine an appropriate GI framework for moderately scaled development. Our clients' proposals would enhance the provision of GI through the provision of on-site open space and pedestrian linkages. It should be noted that due to the site being within private ownership there is currently no public right of way connectivity, such that it has no real functional value as GI other than its contribution to a wider landscape setting.

3.18 As such, although the development of the site would necessarily have an urbanizing effect on the existing open land, good growth could be achieved without compromising the gap between the existing urban edge of Fareham/Bridgemarky and Stubbington.

Defining the Settlement Character and Preventing Coalescence

- 3.19** The character of the site and surrounding area is defined by both the natural and built environment, having regard to the landscape setting in which it sits.
- 3.20** The development of the site, by extending the boundary of the Fareham/Gosport built-up area would not have the effect of coalescence with Stubbington. The settlement character of Bridgemary is distinct from that of Stubbington. Whilst both are characterized by large areas of low-rise, medium-density development from the late-20th century (and in the case of Bridgemary also from the pre-war era), the development of Bridgemary as a suburban extension of Fareham/Gosport lends it a different character compared with Stubbington's growth as a distinct village with a more extensive local centre.
- 3.21** The remaining Strategic Gap will still achieve a 'green' gap between the two settlements such that the distinct identities of the two settlements are reinforced by their physical and visual separation.

Extent of Gap Required

- 3.22** Most obviously, the development of the Land at Newgate Lane would retain a 'green' gap between the two settlements. The extent of this gap remaining is sufficient to prevent coalescence in line with the policy consideration in Core Strategy Policy 22.
- 3.23** This green gap will also help to retain the physical and visual separation of the settlements, an effect which will be further enhanced by the introduction of the Stubbington By-Pass which will serve to sever them further. The location of Land at Newgate Lane is not within the 'pinch point' between Fareham and Stubbington. Further north, the Strategic Gap between the two settlements narrows, and an extension to Fareham in this location would reduce the gap to a much greater degree or eliminate it. This makes Land at Newgate Lane a preferable development location than sites north of Peel Common/West of Fareham in terms of impact on coalescence.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

- 3.24** The policy and proposals map should be amended to either exclude our client's site from the strategic gap or it should be identified as a location which could accommodate sensitive development.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 3.25** It would be justified by the evidence and would assist the Council in achieving an appropriate housing requirement.

B4c Your suggested revised wording of any policy or text

- 3.26** See response to B4a above.

4.0 Policy H1: Housing Provision (including supporting text)

B1 Which part of the Local Plan is this representation about?

4.1 Policy H1: Housing Provision and all supporting text.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

4.2 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective, positively prepared or justified.

B3 Please provide details you have to support your answers above.

4.3 The PLP has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in the "Changes to the Current Planning System"; but instead has published a revised approach to the standard method, which retains the method in its current form except for London and 19 of the most populated cities and urban centres.

4.4 The key change is to apply a 35% uplift to the standard method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

4.5 The National Planning Policy Framework (NPPF) states (paragraph 16 a) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on a consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.

4.6 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives.

4.7 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the extant local housing need target is 514 homes per annum (hpa). Instead, the PLP plans for 403hpa, thereby failing to plan for the area's objectively assessed need and failing to contribute to the achievement of sustainable development.

4.8 The PPG (ID 2a-003-20190220) is clear that the current standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:

"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination." (PPG ID 2a-015-20190220).

- 4.9** As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current standard method must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 4.10** The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure. However, given that there is no change for Fareham this is irrelevant.. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on a figure of 403hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.
- 4.11** It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities, as set out in a statement of common ground, is one reason why local housing need calculated using the current standard should be exceeded.
- 4.12** Paragraph 4.4 of the PLP states that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". However, in response, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. This produces an overall plan requirement of 7,295 dwellings, equivalent to 456hpa. The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate.

4.13 Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no statements of common ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather, the Council speculates that this contribution would be “ratified” by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented suggests a higher requirement of 1,000 dwellings from a single authority.

4.14 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, which fundamentally means that the plan *will not be effective*. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure “to support the Government’s objective of significantly boosting the supply of homes” (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4.15 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification.

Phased Provision

4.16 In addition to the issues with the overall requirement, Policy H1 also seeks to identify a ‘phased’ requirement. The overall supply is at least 8,389 dwellings this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required. Policy H1 seeks to ‘phase’ this supply identifying the following:

- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
- Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,
- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

4.17 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

4.18 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

4.19 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now and to do otherwise is not justified or effective.

Housing Supply

4.20 The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27

junction 10.

4.21 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4-years¹. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

4.22 Our client's sites, SHLAA references 3129 and 3161, should be considered for allocation. Both sites are sustainable being well located in terms of accessibility to services, facilities and employment. They also have good access to public transport opportunities. Furthermore, whilst the sites are located within the Fareham – Stubbington Gap, there are no unsurmountable specific statutory or non-statutory landscape related planning designations.

4.23 The SHLAA identifies that both sites are discounted because:

"Development in this location would not be in keeping with the settlement pattern and would change the settlement character of Peel Common. The site is therefore considered unsuitable for residential development."

4.24 Our clients fundamentally disagree with these points. This is discussed in greater detail within our response to Policy DS2 above. However, in summary the sites are well located in relation to the settlement of Bridgemarky and our evidence identifies that development in this location would have a limited impact due to the recent completion of the Newgate Lane East site. The proposals could also enhance the strategic gap through the provision of appropriate Green Infrastructure.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

4.25 The following amendments are necessary to ensure that the plan is legally compliant and sound.

¹ APP/A1720/W/19/3230015

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Undertake SA of all reasonable alternative housing requirements.
5. Provide a housing requirement which is not phased and meets needs now.
6. Provide additional allocations, including our clients, which can deliver in the short-term.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 4.26** Compliance with the NPPF requirement for the housing requirement to be based upon current local housing need standard method as a minimum. To comply with relevant legal and procedural requirements.

B4c Your suggested revised wording of any policy or text

- 4.27** Not applicable, as this will be dependent upon the outcome of the work identified in response to question B3.

5.0 Policy HP4: Five-Year Housing Land Supply

B1 Which part of the Local Plan is this representation about?

5.1 The following comments relate to Policy HP4 and all supporting text.

B2 Do you think the Publication Local Plan is:

Legally compliant – N/A

Sound - No

Complies with the duty to co-operate – N/A

5.2 The Fareham Local Plan is unsound as it is not effective or justified.

B3 Please provide details you have to support your answers above.

5.3 Whilst the principle of the policy is supported the current wording is considered contrary to its stated purpose. The supporting text identifies that this policy is required to provide flexibility if a five-year housing land supply cannot be demonstrated. However, in accordance with the NPPF, paragraph 11d, in such cases the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply.

5.4 It is therefore not justified to seek to apply additional requirements upon developments should a five-year supply not be demonstrable. For example, the requirement for the scale of the site to be relative to the shortfall is not only unclear but could be prohibitive of sustainable sites being brought forward. Furthermore, many of the criteria are replicated from other policies and as such are superfluous.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

5.5 A more positive policy is justified. Parts a, c, d and e should be deleted to avoid repetition and conflict with the NPPF.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

5.6 See above.

B4c Your suggested revised wording of any policy or text

5.7 See above.

6.0 Participation at the examination hearing sessions

B5a If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

6.1 Yes, I want to take part in the hearing sessions.

B5b Please outline why you consider it necessary to take part in the hearing session(s):

6.2 There are several detailed and complex points made within our representations which would benefit from further debate and consideration. It is also important that our clients can respond orally to hearing statements made by the Council and other participants to ensure that the Inspector has a full understanding of our case.

APPENDIX FL&HB 1.2.3	Extract from the 'Technical Review of AoSLQ and Strategic Gaps'
APPENDIX FL&BH 1.2.4	Landscape Analysis of the Strategic Gap

1. INTRODUCTION

Qualifications and Experience

- 1.1. My name is James Atkin. I hold the position of Director (Landscape) in the Birmingham Office of the Pegasus Group. The Company undertakes all aspects of planning, urban and landscape design and environmental planning. I have a Bachelor of Science Degree in Landscape Design and Plant Science and a Diploma in Landscape Management, both from the University of Sheffield. I am also a Chartered Member of the Landscape Institute (2005).
- 1.2. I have over 19 years professional experience specialising in the application of landscape and visual assessment and the use of best practice guidance. I have authored landscape and visual impact appraisals, assessments and evidence, both in the UK and in the international context.
- 1.3. Prior to joining the Pegasus Group I have worked in multidisciplinary consultancies, including Wardell Armstrong LLP and Atkins, advising on landscape and visual matters across a range of sectors including power, highways, rail, housing, waste, land reclamation and restoration, mineral extraction, commercial developments and renewable energy.
- 1.4. Since joining the Pegasus Group I have completed a number of detailed LVIA's for sites across the UK, including residential development and mixed use development schemes, care home developments, solar installations and commercial development. As an inherent part of this work I apply an iterative process of landscape and visual appraisal and assessment to inform masterplanning principles which avoid or respond to landscape and visual constraints and opportunities.
- 1.5. In this context I have produced technical documents on landscape and visual matters for use in the emerging design process, for planning applications and at appeal. I am currently involved in a variety of projects for mixed use and residential masterplans, of varying scales between 10 and 1000 units, in both urban and urban fringe environments, where matters of sensitive and designated landscapes are key considerations. The diversity of these different project types has enabled me to develop a strong understanding as to how different landscapes can respond to different types of development.

Terms of Reference

- 1.6. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 1.7. The outline application for 'Land at Newgate Lane (North) (Fareham Land LP; LPA ref. P/18/1118/OA) sought permission for:
- The demolition of existing buildings and development of up to 75 dwellings, open space, vehicular access point from Newgate Lane and associated and ancillary infrastructure, with all matters except access to be reserved.
- 1.8. The outline application for 'Land at Newgate Lane (South) (Bargate Homes Limited; LPA ref. P/19/0460/OA) sought permission for:
- The demolition of existing buildings and development of up to 115 dwellings, open space, vehicular access point from Newgate Lane and associated and ancillary infrastructure, with all matters except access to be reserved.
- 1.9. These are referred to as the 'northern' site and the 'southern' site respectively.
- 1.10. Whilst the two sites are subject of separate applications, it is important to note that the proposals have always been conceived as a cohesive development, together addressing the constraints and opportunities in respect of the local landscape context and providing a cohesive and complementary strategy for development and mitigation.
- 1.11. The evidence presented herein applies to both appeals, unless specifically stated otherwise.
- 1.12. Each application was supported by a Landscape and Visual Impact Assessment (LVIA), prepared by Pegasus Group on behalf of the appellants. Reference is made to the content and findings of these where relevant, supplemented by additional professional judgement as necessary.

Evidence Structure

- 1.13. The evidence is structured as follows, including this introduction (section 1):
- At section 2, I give a brief description of the appeal sites in their context, and the appeal scheme, including an analysis of constraints and opportunities and development potential (based on my own observations and judgement);
 - At section 3, I present a brief background to the appeal, including a summary of the Council's reasons for refusal where these are relevant to landscape and visual matters;
 - At section 4, I address the key issues in the reason for refusal in respect of landscape and visual matters, and present additional analysis of these;
 - At section 5, I address policies relevant to landscape and visual matters; and
 - At section 6, I provide a summary and conclusions.
- 1.14. Principles and good practice for undertaking landscape and visual impact assessment (LVIA) and/or applying the principles of LVIA are set out in the Landscape Institute (LI) and the Institute of Environmental Management (IEMA) Guidelines for Landscape and Visual Impact Assessment, Third Edition (2013)¹ (GLVIA3). The concepts and procedures set out in this guidance have been adopted where appropriate.
- 1.15. The professional judgements which are presented in this evidence for this appeal (reference LPA reference P/18/1118/OA and P/19/0460/OA) have been prepared in accordance with the guidance of my professional institution. I confirm that the opinions expressed are my true and professional opinions.

¹ Landscape Institute and Institute of Environmental Management and Assessment, Guidelines for Landscape and Visual Impact Assessment 3rd Edition (April, 2013)

2. THE APPEAL SITES

2.1. This section sets out an overview of the appeal sites and their context.

Overview

- 2.2. Together, the appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham and Gosport and within a discreet parcel of land that is bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east (with Newgate Lane and Newgate Lane East framing the northern edge of the sites also).
- 2.3. Hambrook Lodge (accessed from the west, off Newgate Lane) Lodge and its curtilage is located between the two sites, but the property (and the access to the property) is not included in the red line boundary for the sites.
- 2.4. The appeal sites are located outside the defined settlement boundary identified in the Local Plan policies map, in a 'Strategic Gap' known as the Fareham/Gosport to Stubbington/Lee on Solent Gap (or simply the Fareham - Stubbington Gap).
- 2.5. They are not subject to specific statutory or non-statutory landscape related planning designations.

Description and Context

- 2.6. The sites are located between Fareham and Gosport, adjacent to the suburbs of Woodcot and Bridgemary which are located to the east and adjacent to Peel Common which is located to the west.
- 2.7. The northern site comprises three enclosures, the largest of which is currently in arable production, the smaller two are in pastoral use. These cover an area that surrounds the northern extent of Hambrook Lodge which itself includes a number of related buildings (some dilapidated) and is generally enclosed by mature vegetation.
- 2.8. The southern site comprises four mixed use agricultural enclosures, the fields to the east are currently in arable production, whilst the field to the west, adjacent to Peel Common and Newgate Lane are in use as pastoral and equestrian paddocks. A small watercourse and drainage ditch bisects the southern site and reinforces the differentiation between the land uses of the eastern and western areas.

- 2.9. Newgate Lane is located immediately to the west of the sites and forms a connection with the southern edge of Fareham and, further south Gosport Road (noting that this is closed to traffic but retains a link for pedestrians and cyclists). Immediately to the east is the route of the new relief road, Newgate Lane East. Newgate Lane East is accessed from Newgate Lane by a T-junction, situated just north of the northern parcel.
- 2.10. The wider landscape context is set within the low-lying ground of the coastal plain landscapes and characterised by abrupt transitions between the open landscapes of the coastal plain and the urban environments which abut these. These urban areas include Fareham, Gosport and Woodcot and Bridgemary to the north and east. The settlement area of Stubbington, a medium scale, predominantly residential area is located to the west. The settlement edge of Stubbington forms the western extent of the Fareham to Stubbington strategic gap. In this context the strategic gap comprises an area of open landscape that extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.

Recent Landscape Change

- 2.11. The LVIA reports submitted in support of the planning applications were prepared and finalised in late 2018. These included reference to the published landscape character study for the Borough (The Fareham Landscape Assessment, 2017) which was prepared by LUC on behalf of Fareham Borough Council (FBC) and forms part of the evidence base to the current Local Plan.
- 2.12. The appeal sites are located in an area defined by the LUC study as 'LCA 8, Woodcot-Alver Valley' (including sub areas 08.1a and 08.2b). In relation to 'LCA 8, Woodcot-Alver Valley', the LUC study acknowledges the emerging proposals of the Fareham bypass (Newgate Lane East) and potential strategic housing development on the edge of Woodcot/Bridgemary (parcel HA2) and the landscape change that these may bring.
- 2.13. Since the publication of the LUC study (and submission of the Pegasus Group LVIA work) the proposals for Newgate Lane East have been constructed and the route has been open to traffic since April 2018; the majority of landscape works were completed in the 2018/19 season.
- 2.14. Although both the LUC study and the assessment of impacts undertaken in the submitted Pegasus Group LVIA make reference to the potential bypass and how it will

influence the local landscape, there is now scope to consider the actual and current baseline situation.

3. BACKGROUND TO THE APPEAL

3.1. The background to the proposal is set out in full, in the main Statement of Case, prepared by Pegasus Group on behalf of the appellant. This section provides a brief overview of the background relevant to landscape and visual matters.

Application

3.2. The applications were submitted in September 2018 (north) and April 2019 (south), with each supported by a separate Landscape and Visual Impact Assessment, prepared by Pegasus Group (**CDA.48** and **CDA.106**).

3.3. In respect of both appeal sites, landscape and visual matters formed part of an iterative design process that guided the evolution of the masterplans and integration of mitigation measures into the schemes.

3.4. For both sites, the submitted LVIA work demonstrated a limited effect on landscape character, whereby impacts are restricted to a local level.

3.5. The work also demonstrated that the proposed developments would not detract from the function of the wider strategic gap, both due to the inherent character of the landscape itself, and also due to the physical and visual separation that is present between the sites and the more obvious and open part of the strategic gap between Peel Common and the eastern edge of Stubbington.

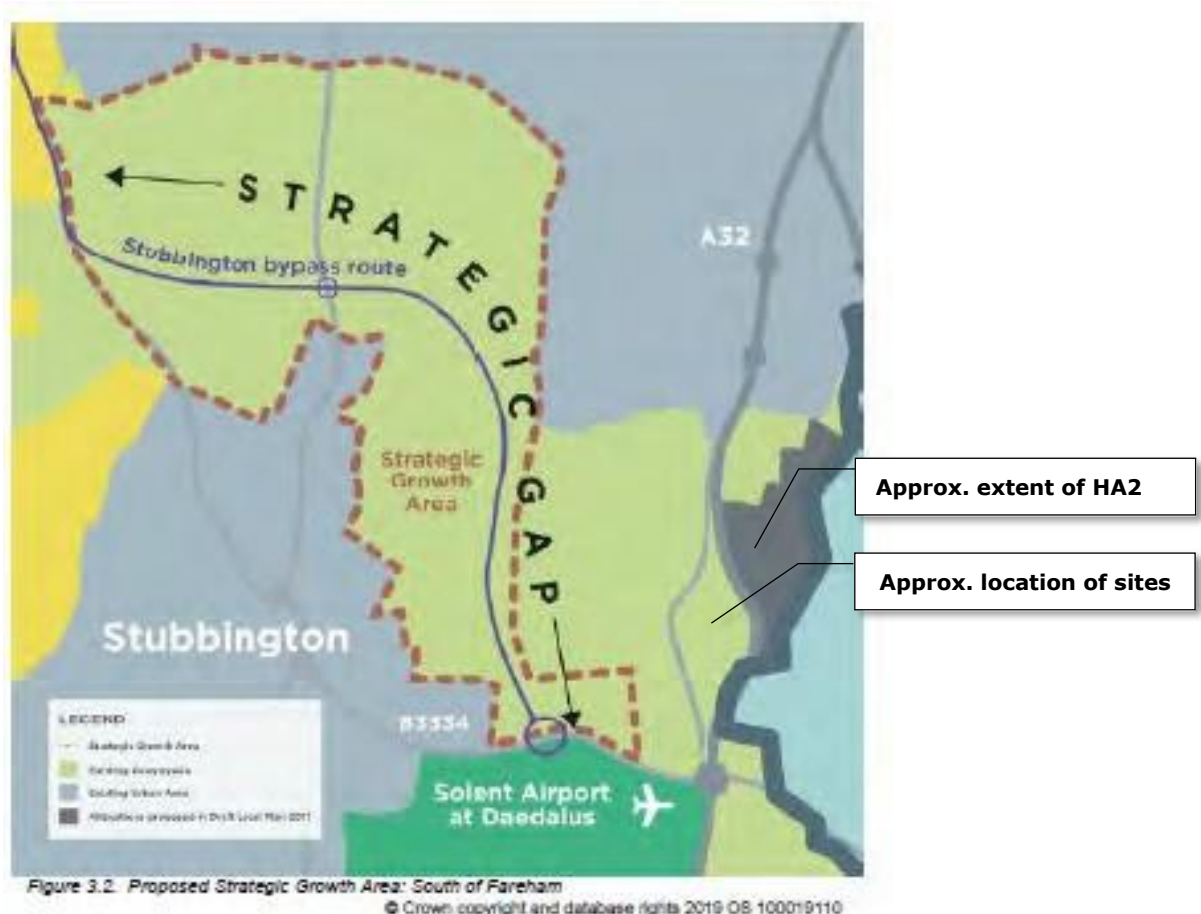

3.6. For views and visual amenity, the submitted LVIA work also demonstrated that the sites (and proposed developments) would be generally screened by existing development and existing mature vegetation, the influence of both being augmented by the low lying and relatively flat nature of the landform. Prominent views of the sites would only be available from its immediate context along Newgate Lane and Woodcote Lane with the greatest degree of visual effect from locations immediately adjacent to the sites, and from a small number of existing individual residential properties, again, located close to (or adjacent to) the site. Together, and in the balance of landscaped and visual matters overall, these impacts and effects are were not considered significant in landscape and visual terms.

3.7. During the process of the application, further design changes have occurred; these either maintain or improve the proposed mitigation which forms an inherent part of the schemes.

Further Landscape and Visual Studies

- 3.8. Since the submission of the planning applications, the LPA has continued with the development and review of the Local Plan.
- 3.9. In previous iterations, notwithstanding the continued adoption of 'Strategic Gap' policies in this part of the Borough, the emerging local plan proposals had identified a 'Strategic Growth Area' situated across the landscape between Stubbington and Fareham, overlapping with a large part of the retained Strategic Gap. This had also indicated the inclusion of a housing allocation (HA2) on the southern edge of Fareham.

Plate 1: Extract from Fareham Draft Local Plan 2036 Supplement

- 3.10. In that previous iteration, the boundary of the Strategic Gap had been drawn to extend up to the settlement edge of Bridgemary (whilst incorporating the proposed housing allocation of HA2 and the recently constructed New Newgate Lane). In contrast, the Strategic Growth Area had been drawn to an eastern limit up to the existing waste water treatment works and the solar farm that are present to the south-west of the edge of

Fareham, noting that the extent of that boundary would exclude both appeal sites and exclude the emerging HA2 allocation.

- 3.11. Notwithstanding that the Fareham Landscape Assessment (LUC, 2017) forms part of the evidence base for the policy proposals, it was necessary to address the purpose and function of the gap and the proposed area of strategic growth.
- 3.12. In order to address this issue, Pegasus Group undertook a strategic level study of the Fareham-Stubbington Strategic Gap, including the area up to the Gosport boundary (**CDA.54**).
- 3.13. The aim of that study was to identify the core areas of Strategic Gap which were considered more fundamental to the function of the Strategic Gap in terms of preventing coalescence between settlements and maintaining of settlement identities. The study identified 'Priority Areas' that should be maintained as Strategic Gap, with areas outside of these considered further for growth.
- 3.14. The study concluded that areas on the northern and western edges of Stubbington and at Fareham (along Longfield Avenue and between Peel Common and Woodcot/Bridgemary) can accommodate growth and that development in these areas would not fundamentally undermine the physical separation, nor the sense of separation between Stubbington and Fareham.
- 3.15. During the course of the appeal FBC continued to progress their Local Plan. The evidence base to the latest draft Local Plan 2036 included a 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' (2020) undertaken by Hampshire County Council on behalf of FBC (**CDG.7**). The content and findings of this study are considered later in my evidence.

Consultation Responses

- 3.16. A summary of the main relevant consultation responses to the application are set out in the following section.

Urban Design, Fareham Borough Council

- 3.17. The response from FBC on landscape and visual matters was prepared by the Urban Design officer (4th February 2019) (**CDB.5a**). These comments were limited to the northern site and broadly suggested that the proposed development would have an

'unacceptable negative impact upon the integrity of the existing open, predominantly rural agricultural character', of the landscape'.

- 3.18. However, it was felt that the conclusions of the consultation response did not sufficiently consider the (then) emerging baseline of Newgate Lane East and potential strategic development site (HA2), consequently the response overemphasised the degree of impact arising from the scheme.
- 3.19. In this context Pegasus Group prepared a comprehensive response to address the points raised (refer to **CDA.41**).
- 3.20. In a separate, later, response, the Urban Design officer requested that the layout be reworked to make a 'less formal block structure' (**CDB.5b**). These comments were addressed in revisions to the LVIA and ILMP, which were resubmitted as LVIA Rev D (**CDA.48**).

Principal Tree Officer, Fareham Borough Council

- 3.21. No objection is raised in response to trees, with the tree officer noting that 'the illustrative masterplan shows the developable area with the majority of the existing field boundary trees and hedges retained and incorporated into public green space' and concluding that 'the principle of development within the area shown is broadly acceptable in arboricultural terms'.

Gosport Borough Council

- 3.22. Gosport Borough Council (GBC) have objected to the applications, noting issues of the strategic gap and green infrastructure.
- 3.23. In relation to the first point, GBC suggest that the 'scale and location will undoubtedly harm the integrity of the gap and will diminish the physical and visual separation of the settlements.
- 3.24. GBC go on to suggest that the sites would diminish the opportunities to make the 'optimum use' of green infrastructure, and particularly in providing green linkages from Fareham to the coast via the Alver Valley Country Park.

Natural England

- 3.25. The response from Natural England refers to green infrastructure provision, noting that the development is within in area that could benefit from enhanced green infrastructure provision.
- 3.26. In relation to landscape, the Natural England response notes that the proposal does not appear to be within, or within the setting of, any nationally designated landscape but also notes that proposals should complement, and where possible enhance, local distinctiveness, as guided by relevant landscape character assessment for the Borough.

Environment Agency

- 3.27. Further design changes to the masterplan were implemented in response to consultation comments from the Environment Agency and their provision of up to date flood map data.
- 3.28. This resulted in amendments to the southern appeal site and removal of a parcel of proposed development from an area to the west of the watercourse.
- 3.29. An LVIA addendum (**CDA.119**) was prepared that addressed the minor design change, along with the iteration of the Illustrative Landscape Masterplan.

Officers Reports to Committee

- 3.30. Appeals against the non-determination of the applications were submitted to the Planning Inspectorate, and the Council were notified in June 2020 as to the validity of these.
- 3.31. A report was prepared for Members which confirmed the position of the Council in respect of the case that would be presented at a forthcoming appeal, and inviting Members to confirm the decision that they would have made, had they been able to determine the planning application.
- 3.32. In both instances (north and south sites) the reports confirm that they would have refused the application.
- 3.33. The reports to committee set out a brief summary of the consultation responses received under several sub-headings (**CDC.1** and **CDC.2**). Those relevant to landscape and visual matters are summarised as follows:

Principle/location/policy issues

- Located in strategic gap;
- Loss of countryside;
- Impact on character of the 'new' Newgate Lane and the 'old' Newgate Lane;
- Impact on "green belt" (notwithstanding that the site is not in fact in an area defined as green belt);
- The site is not 'well integrated' contrary to policy DSP40;
- Loss of green land and linkages; and
- Impact on landscape.

Strategic Gap

- Impact on the strategic gap;
- Coalescence of Fareham and Gosport;
- The proposed development will not strengthen the strategic gap; and
- Development in the strategic gap will set a precedent for further development.

Environment

- Loss of green/open space and loss of agricultural land; and
- Impact on ability to make optimum use of green infrastructure, including providing green linkages from Fareham to the coast.

3.34. The report includes reference to a petition entitled 'Stop building in the Fareham/Gosport Strategic Gap' that was published in August 2020 and refers to several points in respect of landscape and visual matters and the strategic gap.

3.35. The main issues raised in respect of landscape and visual matters are set in the context of Local Plan Policy DSP 40 (paragraphs 8.32 to 8.61 of the North committee report and 8.31 to 8.6 of the South committee report).

3.36. The applications were subsequently refused (24th June 2020) (**CDC.4**) with the reasons for refusal as listed in the reports to committee. The overarching reason for refusal state that:

3.37. *"The development is contrary to Policies CS2, CS4, CS5, CS6, CS14, CS15, CS16, CS17 and CS22 of the Adopted Fareham Borough Core Strategy 2011 and Policies DSP6, DSP13 & DSP40 of the Adopted Local Plan Part 2: Development Site and Policies Plan, paragraphs 103, 109 and 110 of the NPPF and is unacceptable in that:*

- 3.38. For the southern site this is identical, save for the omission of reference to Policy CS16.
- 3.39. *"The development is contrary to Policies CS2, CS4, CS5, CS6, CS14, CS15, CS17 and CS22 of the Adopted Fareham Borough Core Strategy 2011 and Policies DSP6, DSP13 & DSP40 of the Adopted Local Plan Part 2: Development Site and Policies Plan, paragraphs 103, 109 and 110 of the NPPF and is unacceptable..."*
- 3.40. More specific reference to landscape and visual matters is made in the following reasons for refusal (noting that these are repeated for both the north and south sites):

b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;

c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;

d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;

- 3.41. On review of the consultation responses, reports to committee and relevant reasons for refusal, several common themes are apparent in respect of landscape and visual matters. These are summarised as follows:
- Issue 1A: What are the key characteristics of the site and its immediate context and how have the schemes responded to these in terms of mitigation?
 - Issue 1B: The degree of impact on the key characteristics of the site and its immediate context and the extent to which these can be considered as harmful.
- 3.42. These matters are effectively addressed in the submitted landscape and visual impact assessments which set out a comprehensive baseline for the site and the local landscape context, including an assessment of the impact and approach to mitigation. I will return to these documents in later sections of my evidence.
- Issue 2: The purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap.

-
- 3.43. During the course of the application a 'strategic landscape and visual appraisal' of the strategic gap was prepared to identify the role and function of the strategic gap, variations therein, the core areas and also how the strategic gap could be maintained whilst accommodating the strategic growth in the area. I will return to the gap study in later sections of my evidence.
- Issue 3: The context of the application sites in relation to the existing urban settlement edges/boundaries.
- 3.44. This issue is also touched upon in the submitted landscape and visual impact assessments in terms of the local landscape context to the appeal sites. I will return to the relevant findings of the LVIA reports in later sections of my evidence.
- 3.45. I consider these issues in the following sections, along with the different parts of the reason for refusal, thereafter drawing my conclusions.

4. ANALYSIS OF LANDSCAPE AND VISUAL MATTERS

4.1. In this section I set out an analysis of landscape and visual matters. I have presented the analysis under the broad topics raised in the reason for refusal, with reference to the key issues identified in the previous section of my evidence.

Reason for refusal b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside.

Landscape character and key characteristics

- 4.2. The reasons for refusal suggest that the proposed development fails to respond positively to, and be respectful of, the key characteristics of the area. In this section I set out the key characteristics relevant to the local landscape character, including reference to published guidance, but also with reference to recent landscape change that has resulted from the relatively recent completion of the new bypass, Newgate Lane East.
- 4.3. Landscape character for the area is defined by the 'Fareham Landscape Assessment', with the sites being located in the 'Woodcot/Alver Valley landscape character area, sub areas 08.1a for the northern site, and 08.1 and a small part of 08.1b for the southern site (relevant extracts are included in **Appendix FL&BH 1.2.1**). Peel Common, along with adjacent residential areas and remnant parts of the landscape up to the edge of Gosport, are also included in the same LCA; by contrast, the landscape between Fareham and Stubbington (including the wastewater treatment plant and solar farms) are located within the adjacent area of LCA 7, the Fareham/Stubbington Gap. There is a clear difference in the character between these areas that is based on the scale and pattern of the landscape, land use, enclosure landscape, and the degree of influence of the settlement edge along with urbanising influences.
- 4.4. The key characteristics of the relevant LCAs are considered in the baseline of the submitted LVIA (para 4.34, **CDA.48 and CDA.106**) and consequently informed the analysis, constraints and opportunities, and ultimately the landscape strategy for the mitigation that is included as an integrated part of the two masterplans for northern and southern schemes.
- 4.5. Greenfield development retains an inherent impact on the physical landscape, but it is possible to bring development forward in a positive manner that addresses landscape and visual constraints. The appeal schemes do so. Where this positive approach is

adopted, the perception of those physical impacts in terms of landscape character are also minimised, also something that the schemes achieve.

- 4.6. In respect of the key characteristics the Fareham Landscape Assessment (FLA) notes that 'key characteristics aim to improve understanding of the how places are distinctive and different from one another, rather than being an appraisal for areas that are 'better or worse'. It is the second and third sections of the FLA that address Landscape Sensitivity and the designations review that address matters of value, sensitivity and designations.
- 4.7. Key characteristics are defined in the 'Landscape Character Assessment' section of the FLA. For the Woodcot/Alver Valley (LCA8) the FLA notes that (FLA, page 62):
- 4.8. *"The Alver Valley also forms part of the strategic gap separating Fareham and Gosport but it is very different in character and scale from the open farmed landscape to the west. It comprises a mixed pattern of wooded common, small-scale pasture and ribbon development along the corridors of the River Alver and Newgate Lane and is bounded to the east by the urban edge of Gosport and to the north by the outskirts of Fareham."*
- 4.9. This sets out a clear distinction between the landscape context of the site, and the wider strategic gap area to the west and north-west, between Fareham and Stubbington. The description of the LCA also establishes the influence of the urban fringe; from the edge of Gosport, edge of Fareham, but also from ribbon development in the LCA (as reflected by the character of Peel Common). These influences should be considered in the appraisal of the appeal sites in the context of the local landscape.
- 4.10. The LCA defines several 'essential characteristics'. These are set out in the following table, set against a brief description as to how the appeal schemes would influence these or has responded to these.

Table 1: Summary of essential characteristics of the Woodcot/Alver Valley and anticipated change

Essential characteristics of the Woodcot/Alver Valley	Influence on landscape and design response
A mosaic of small and medium scale fields at Woodcot, forming a mixture of small horse-grazed pasture and larger arable fields divided by fences, ditches and gappy hedgerows;	<p>The scale and pattern of fields contribute to a more enclosed landscape.</p> <p>Grazed pasture, equestrian uses are not always positive aspects of the landscape and can be seen as detracting components of a landscape, driving needs for enhancement.</p> <p>Development and landscape strategy generally works within the scale of the existing field pattern aiming to</p>

	<p>limit overall 'massing' by working within the existing enclosures.</p> <p>This has an added benefit that vegetation is retained and subsequently enhanced through programmes of supplementary planting and longer term management.</p> <p>As part of the overall green infrastructure strategy for the appeal schemes, the sites can provide additional and reinforcement planting to hedgerows with additional tree planting also.</p>
<p>Although this area forms the upper part of the Alver Valley it lacks a distinct valley character;</p>	<p>A 'valley' landform is not pronounced here, reinforcing that this part of the landscape is a transition between the more distinct valley to the south-east and the flatter, slightly undulating plain to the west.</p> <p>This reinforces the nature of boundaries between character areas that they are rarely fixed along a defined alignment and instead tend to form a 'merging' or transition.</p>
<p>The hedgerow pattern is gradually replaced by scrubby woodland to the south, enclosing Chark Common and the golf course;</p>	<p>The hedgerow network is a stronger characteristic of the appeal sites and their context, with this network forming much of the green infrastructure framework.</p> <p>Newgate Lane East has impacted on the network to a degree, severing the hedgerows and field patterns in some parts of the landscape, particularly in proximity to the eastern edge of the appeal sites.</p> <p>The appeal schemes incorporate the hedgerow network as part of the overall masterplan, using this landscape component to guide the scale and form of the development envelope. There are likely to be some limited losses in parts of the appeal sites but retention, management and additional planting can mitigate these losses.</p>
<p>The character is influenced by the busy road corridor and the urban characteristics of Peel Common and Solent Enterprise Zone at HMS Daedalus on one side and the urban edge of Bridgemary on the other.</p>	<p>In the local landscape context of the appeal sites, urban influences and the settlement fringes are generally a prominent feature and, given the appeal sites and the surrounding undeveloped landscape areas do not exist in isolation, these urban edges do have an influence on the local landscape character.</p> <p>Newgate Lane East and its associated infrastructure (including prominent acoustic fencing, road junctions and crossings) have further influenced local landscape character, drawing the urban influence into the landscape between Peel Common and Gosport (at Bridgemary).</p> <p>The acknowledge landscape impact largely relates to the introduction of residential development into the appeal sites. However this will be congruent with the settlement pattern of Peel Common due to the placement and relationship between the appeal sites to Peel Common (along Newgate Lane) and the contained to the east and north by the alignment of Newgate Lane East.</p> <p>There also remains the existing connection between Peel Common and the edge of Gosport at Bridgemary, whereby the settlement pattern is connected by</p>

	existing properties along Woodcote Lane and the amenity land use of Brookers Field Recreation Ground (which is suburban in its character and contrasts to the agricultural land uses).
--	--

- 4.11. Overall, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement. Further details are described in the following sections.
- 4.12. In relation to the scale of the field patterns (and scale of the landscape), this has been used to guide the scale and pattern of the development areas on site. Field boundaries and parcels of development have been formed within the field patterns and their boundaries consequently breaking down the massing of proposed development. Notwithstanding the change in land use from agricultural fields to residential development, this approach to mitigation does draw on and reflect the key characteristics. Furthermore, the scale of development is consistent with the types of existing residential area that are present in the surrounding context, the appeal sites being subservient to the stronger and larger scale residential edges of Fareham and Gosport and also being compatible with the adjacent settlement area of Peel Common.
- 4.13. In respect of the landform, the proposed development will not unduly influence this characteristic; a characteristic which is not necessarily distinctive in any respect. The landform of the site in its context is not reflective of the broader Alver Valley and, I consider, shows part of a transitional area of topography that emerges from the valley and up toward the undulating plain to the north-west. Man made features such as the earth banks around the waste water treatment works are also a feature in the local landscape, maintaining a distinction between the landscape to the west and east of Peel Common.
- 4.14. As with the scale of the landscape, the proposed development has intentionally incorporated the field boundary hedgerows into the layout as far as possible, retaining the existing framework of vegetation. Notwithstanding that this will be set in the framework of a residential development and its open spaces, the hedgerow field pattern is retained, whereas elsewhere in the LCA (such as the golf courses) it would appear to have been eroded). Disruption to the hedgerow network is also apparent as a

consequence of the new bypass, Newgate Lane East, which has severed several of the local field patterns and hedgerows; the replacement of these with highways green infrastructure is acknowledged, but this does not respond to the pattern of the landscape in this locality. Vegetation and hedgerows retained within the layout are proposed to be augmented with new additional planting, supplemented by added diversity and landscape management, and where lost the additional planning will replace these.

- 4.15. In relation to urban influences, the landscape impact of introducing residential development into the site is acknowledged, and the impacts are clearly set out in the submitted LVIA. However in response to landscape character, and the existing influences of the urban edge that are noted in the FLA, the site has responded by avoiding and minimising this influence. This includes the provision of 'buffers' to form an offset to the edge of the proposed development and the adjacent landscape context. This will also help to create a partial screen, presenting a scheme that is not entirely defensive in terms of how it integrates with the adjacent landscape, but instead adopts a more positive approach of presenting a 'fair face' and more attractive, softer settlement edge.
- 4.16. More detail on landscape character is set out in section 2 of the FLA, relating to local landscape character areas and the sensitivity assessment. This divides LCA8 into five sub-areas, with areas 08.1a, 08.1b and 08.2a most relevant to the sites given they sit adjacent to each other and include the site. 08.2b and 08.2c provide some context to the local landscape but sit further afield and are slightly separate from the site context.

Plate 2: FLA extract (page 151) showing landscape types for LCAS

- 4.17. The structure of the landscape of 08.1a and 08.2a is defined predominantly as 'weak structure' or 'fringe character' with just a small part of 08.1a that is defined as 'strong structure' which is concurrent with parts of the southern site (refer to **Plate 2**).
- 4.18. In relation to the appeal sites, I agree with the definition of the structure as broadly 'weak' or 'fringe' character. This is because it is reflective of the various suburban influences that are prominent in this part of the landscape and contribute to the suburban continuity in the landscape that draws Peel Common, Bridgemary, Woodcot and the edge of Fareham together. Physical influences include the prominent residential edges of Gosport and Fareham, cycleway connections and the alignment of Newgate

Lane East (and substantial pieces of highways infrastructure that accompany this), but also the pocket of amenity land use situated to the north and south of these areas.

- 4.19. The more detailed sections of the LCA do not set out 'key characteristics' (over and above the 'essential characteristics' defined for the wider LCA) but instead include a more detailed descriptions (refer to **Appendix FL&BH 1.2.1**). These are presented for each sub-area in relation to:
- the landscape resource (landscape character and quality);
 - the visual environment (views, visual features and viewers);
 - setting of the urban area (contribution to setting and settlement character); and
 - green infrastructure (contribution to green infrastructure).
- 4.20. Each also includes descriptions of sensitivity and development potential.
- 4.21. The descriptions are extensive, but a summary is presented in the format of addressing 'development criteria and enhancement opportunities'. This section states that the area is of 'high sensitivity' and refers to matters of coalescence and it's 'generally unspoilt rural character'.
- 4.22. In itself this is a characteristic, but this part of the landscape does not exist in isolation, nor is it experienced in isolation and the sense of the rural character is equally influenced by the settlement fringe and amenity land uses that are presented by the residential areas and nearby sports and playing fields.
- 4.23. Furthermore, the FLA goes on to state that:
- 4.24. *"The situation is further complicated by the proposed new road which will have some effect on the integrity and character of the landscape resource and undeveloped gap."*
- 4.25. Newgate Lane East is now constructed and in use. The route includes additional road junctions as well as some prominent fencing along the route, visible from the road but also from the local rights of way and settlement fringes. I consider the road has effectively severed this part of the landscape, and provided a very urbanised corridor that connects previously suburban fringes, linking as it does such features as the urban edge of Fareham (with the solar installation and sports facilities also on this edge), the waste water treatment works, Peel Common itself and the amenity landscapes of Brookers Field recreation ground.

- 4.26. Consequently, this part of the landscape is no longer representative of the 'unspoilt' landscape described in the 2017 LA, nor does it fulfil its role of preventing coalescence between these edges of the settlement.
- 4.27. The FLA does acknowledge that, in relation to sub-area 8.2 there is some potential for development, stating that (page 167):
- 4.28. *"The only opportunities may lie within areas that are closely associated with existing development (e.g. at Peel Common or in the SW corner of area 8.2c) and can be integrated within the landscape without any physical or perceived encroachment within the gap."*
- 4.29. This part of the landscape does (and will), however, remain distinct from the wider strategic gap between Fareham and Stubbington which, in landscape character terms, is a clearly distinct part of the landscape from the suburban fringes of Fareham and Peel Common.
- 4.30. Turning back to the reason for refusal in respect of the key characteristics of the landscape, there are several development criteria and enhancement opportunities defined by the FLA which the proposed developments positively respond to. The relevant issues are set out in the following table, accompanied by a brief response as to how/why the proposed development responds positively. Although the two appeal schemes are separate applications, I include a plan of a composite landscape strategy that illustrates how the landscape strategy forms a comprehensive and connected mitigation strategy (refer to **Appendix FL&BH 1.2.2**).

Table 2: Summary of LCA8 sub-area development criteria/enhancement opportunity and design response of the appeal schemes

Relevant FLA development criteria and enhancement opportunity	Proposed development design response
Sub area 8.1 Woodcot	
Maintain and strengthen the existing structure of trees, hedgerows and other mature vegetation, to maximise its landscape and wildlife value and to minimise impacts on the rural character of the landscape	<p>The appeal schemes reference the scale and pattern of the landscape by placing a limit on the development envelope for built form and retaining hedgerow (and other) vegetation as far as possible. Losses will be mitigated by additional planting.</p> <p>The landscape strategy includes for a diverse range of tree, hedgerow and grassland areas, contributing to biodiversity potential.</p> <p>Being contained between Peel Common and Newgate Lane East, other than the 'on site' impact, impacts on the 'rural character' will be contained and limited.</p>

<p>Maintain the essentially open, undeveloped character of the public open space, playing fields and sports facilities within area 8.1b, and be designed to relate closely to the existing structure of trees hedgerows and existing characteristic built features within the area</p>	<p>Brookers Field Recreation ground is located immediately to the south-east of the appeal sites with additional playing fields and formal play areas located on the edge of Fareham to the north of the appeal sites. Notwithstanding the connections to these areas by the settlement pattern and roads/footpaths, the appeal schemes are physically contained and will not influence the openness of these areas.</p>
<p>Avoid any major incursion of the urban area into the countryside beyond existing well defined boundaries, or create significant new pockets of urban or urbanising development within open farmland</p>	<p>The presence of the solar farm, waste water treatment works and Peel Common itself all form a physical and perceptual barrier to the west; these are further reinforced for much of the western edge by various tree and woodland cover. To the east, Newgate Lane East has severed the agricultural landscape and now broadly forms an eastern limit to the appeal schemes, however there remains a perception and some physical connection to Bridgemary. Overall this does not represent a 'major incursion; into the countryside as in either respect, the appeal schemes will form an appropriate fit with the existing settlement patterns.</p>
<p>Protect the area's role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development strung out along road corridors (e.g. along the existing and proposed new alignment of Newgate Lane) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap</p>	<p>As noted, Peel Common and its immediate environs form a distinct edge to the settlement pattern associated with the edge of Fareham and Gosport. The appeal schemes will not breach this and will not have an impact on the overall strategic gap to the edge of Stubbington.</p> <p>In terms of ribbon development, together the appeal schemes will present an area of development that dovetails with the existing settlement pattern of Peel Common which in itself is partly comprised of ribbon development along Newgate Lane. The appeal schemes will alter this and consolidate the settlement pattern of Peel Common as a small core settlement area within the broader strategic gap (much in the way that Titchfield, to the north, exists between Titchfield Common and Fareham).</p>
<p>Maintain significant distance and separation from the corridor of the new road to minimise its urbanising effects upon the rural character of the area</p>	<p>The appeal schemes include a landscape buffer along their eastern edge which will integrate with the linear landscape proposals that have been implemented to mitigate the urbanising influence of the new road.</p>
<p>Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the open, flat landscape</p>	<p>The appeal sites are physically well contained by the combination of existing built form and green infrastructure and consequently it is not considered that residential development on the appeal sites will be particularly visible or prominent.</p>
<p>Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area</p>	<p>The appeal schemes will not unduly affect any of the open spaces in the area, not are they prominent or visible from the open spaces or prominent from the local PROW network.</p> <p>Furthermore, green infrastructure and open space is included on the western edges of the appeal sites which makes further provision for accessible green space and green links.</p>

<p>Provide substantial new investment in the landscape through extensive tree, hedgerow and woodland planting using native broadleaved species appropriate to the locality and soil conditions and habitat creation to diversify the intensively farmed landscape</p>	<p>The appeal schemes include for a range of landscape and habitat types as part of the landscape strategy. Use of native and locally prevalent species would be an inherent part of the proposals and this element of detailed design can be controlled by condition.</p>
<p>Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context</p>	<p>The detailed LVIA, along with additional analysis in this evidence, illustrates that mitigation measures will be successful in minimising impacts in respect of both landscape and visual matters.</p>
<p>Sub-area 8.2 – Peel Common and Alver Valley</p>	
<p>Safeguard the area’s vital role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development along road corridors (e.g. Broom Way, Shoot Lane and Gosport Road) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;</p>	<p>The appeal schemes will consolidate the settlement pattern of Peel Common and can be integrated into the landscape with very limited influence on the adjacent landscape areas, particularly due to the considerable degree of enclosure from existing green infrastructure.</p> <p>The integrity of the overall strategic gap will be retained; where this is narrowed between</p>
<p>Maintain the distinctly ‘isolated’ nature of settlement at Peel Common and ensure that any potential small-scale infill development within this area effectively ‘rounds off’ rather than extends the settlement boundary, to avoid the risk of physical or perceived coalescence with other built areas;</p>	<p>The appeal schemes will consolidate the settlement of Peel Common being limited as they are by the alignment of Newgate Lane East. The appeal sites represent an opportunity to round off this edge of the settlement, up to the existing junction, without overly diminishing the remaining countryside to the east of Newgate Lane East. Further south, the perception of separation between the existing edges of Peel Common and Bridgemary is already limited due to the presence of residential development along Woodcote Lane and also the amenity character of Brookers Field Recreation Ground which influences character at a local level.</p>
<p>Protect the semi-rural, undeveloped character of areas 8.2b and c;</p>	<p>The appeal sites are separated and distinct from these areas due to distance and the alignment of the Gosport Road.</p>
<p>Maintain and strengthen the existing structure of woodland, trees, hedgerows and other mature vegetation in all parts of the area, to maximise its landscape and wildlife value;</p>	<p>As previously noted, the comprehensive landscape strategy would deliver this.</p>
<p>In particular, maintain and enhance the mosaic of woodland, heathland, grassland and wetland habitats of value within the Lee-on-the-Solent golf course at Chark Common and</p>	<p>As previously noted, the comprehensive landscape strategy would deliver this – the strategy includes for diversity of habitats and landscape components.</p>

encourage further habitat creation and diversification within intensively managed areas to maximise wildlife and landscape value;	
Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the landscape;	As noted, the appeal schemes will not be unduly prominent in the landscape and are both physically and visually well contained.
Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area, particularly along the River Alver corridor and with the Country Park to the south;	The appeal schemes include areas of green infrastructure and open space which will make a positive contribution to the network of green infrastructure in the area. Connections to the River Alver corridor and Country Park will not be impacted.
Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.	As noted, the detailed LVIA, along with additional analysis in this evidence, illustrates that mitigation measures will be successful in minimising impacts in respect of both landscape and visual matters.
Use native broadleaved species appropriate to the locality and soil conditions in new tree and hedgerow planting.	Also as noted, the use of native and locally prevalent species would be an inherent part of the proposals and this element of detailed design can be controlled by condition.

Interim summary on landscape character

4.31. In this section so far, I have considered the first part of the reason for refusal (b), namely that the proposed development fails to respond positively to and be respectful of the key characteristics. This includes:

- A description of the characteristics with reference to the published guidance, reiterating that this baseline position was fully considered and acknowledged in the submitted LVIA;
- That there is a distinction in landscape character between this area (the site and its context) and the wider part of the strategic gap between Fareham and Stubbington;
- That the published baseline makes clear reference to the suburban nature and influences in this part of the landscape and that it gives give some context to the scope for potential development in this area;
- That this baseline is slightly out of date by virtue of Newgate Lane East, which is now constructed and in operation;
- Having set out this baseline position on the key characteristics, I have also described clearly, again reiterating that this was addressed in the submitted LVIA,

how the proposed development responds to these characteristics through the landscape strategy that forms the basis for the proposed development.

- 4.32. The mitigation strategy is largely integrated into the proposed development as a whole, with landscape and visual matters addressed in the layout, extent of developable area, green infrastructure strategy and areas of open space.
- 4.33. In summary, the appeal schemes can clearly demonstrate how they have responded positively to the local landscape character and is respectful of this through the restrictions placed on built form and provision of green infrastructure and open space (with associated landscape proposals) as an integral and positive component of the masterplan for the two appeal sites.
- 4.34. Not only is the landscape strategy consistent with the local landscape character, it also plays an important role in terms of lessening the predicted impacts of the 'built' component of the developments (as does the baseline context of the suburban edges of the settlement).
- 4.35. This leads me to the second part of the reason for refusal (b) where it suggests that the proposed development would be 'harmful' to the character and appearance of the countryside.

Impacts on the character and appearance on the countryside

- 4.36. In respect of landscape and visual matters, it is typical for landscape character to be discussed first, with views/visual receptors and appearance following. However, I will address the visibility and perception of the site (and proposed development) up front as it sets a very useful context in respect of landscape character.
- 4.37. It is important to note that a comprehensive landscape and visual impact assessment was prepared in support of the applications. These present a technical assessment of the baseline scenario, judgements on landscape value, susceptibility and overall landscape sensitivity as well as consideration of visual impacts from a range of visual receptors in the local area.
- 4.38. The technical assessment and professional judgements therein are based on a transparent approach and can be referred to for specific points. Overall, notwithstanding that there is an inevitable landscape impact on the appeal sites and that for locations directly adjacent to or close to the appeal sites might be of a higher significance of

effect, the overall balance of judgments found that, this degree of impact was acceptable and that mitigation had been successful in avoiding or minimising the impact and effect.

4.39. The overall visibility of the appeal sites is defined as follows:

- To the north, the visibility of the appeal sites is restricted to a short section of Newgate Lane and the junction/short section of Newgate Lane East. Views from the more northern section of Newgate Lane, and also the route of the public footpath between Newgate Lane and Woodcot, are generally screened by intervening vegetation and the route of Newgate Lane East;
- To the east, the visibility of the appeal sites is restricted to locations on the very edge of Woodcot and Bridgemary. This is generally restricted to the upper storeys of residential properties situated on the very edge of the settlement, views from ground floor levels and the street scene being generally screened by intervening vegetation. Newgate Lane East is highly visible from the east, large sections of the route being defined by tall acoustic fencing panels. In the future, views from the east of the appeal schemes is likely to be further screened and contained by the highways mitigation planting along Newgate Lane East, which will form a linear belt of green infrastructure in views from this direction;
- To the south, the visibility of the site is limited to a small number of properties located off Woodcote Lane, with filtered views from the road itself. Some views from Newgate Lane East and Newgate Lane will also be available, albeit limited in duration. In the longer term, highways mitigation planting will screen such views; and
- To the west, the visibility of the site is limited to the route of Newgate Lane with views from locations further west (including public footpaths) being screened by various sections of green infrastructure.

4.40. On balance, the potential visibility of the appeal schemes is very restricted and highly localised. Higher sensitivity receptors such as PROW have very few views. Views from receptors across the strategic gap between Stubbington and Peel Common (including PROW) will have no views.

4.41. Views from Bridgemary, although partially available now, are influenced by highways infrastructure of Newgate Lane East and in the longer term will potentially be fully screened by the mitigation planting along that route.

4.42. What remains is a small number of private dwellings in relatively close proximity to the appeal sites and some public vantage points from the local road network that have views

of the proposed developments. Such locations include a short section of Newgate Lane, the passing traffic (and receptors) along Newgate Lane East, and a short section of Woodcote Lane.

- 4.43. I raise the matter of views/visibility in the first instance, not just to demonstrate how limited the potential views and visual impacts are in their extent, but also to demonstrate that any perception of the change to landscape character is equally limited. In turn, this influences the extent to which any impact could be judged as 'harmful' to the character and appearance of the landscape.
- 4.44. In respect of character and appearance of the landscape, the limited 'scale of change' is just one consideration in the balance of judgement, other matters that are accounted for in the LVIA process include the nature of change. In this case, the appeal sites are not located in a landscape context where residential development, or other urbanising influences, are absent.
- 4.45. The settlement edges at Bridgemary and Fareham are prominent and influential on the local character; the appeal sites sit adjacent to Peel Common and the appeal schemes will complement this settlement pattern, particularly given its containment by the route of Newgate Lane East. Amenity landscapes are present in the form of Brookers Field Recreation Ground and the open spaces and sports fields to the north of the appeal sites.
- 4.46. The agricultural components of the landscape are noted and included in the consideration of landscape impacts, however the peri-urban influences described above are also a relevant part of the baseline consideration against which impacts are judged.
- 4.47. Impacts are also judged on the basis of avoiding or minimising the type and extent of any impact and the positive design approach, reflective of the local landscape context, is successful in avoiding and reducing such impacts. Previous sections of my evidence have clearly demonstrated the positive approach to mitigation.
- 4.48. Overall, an inevitable impact on the landscape will be generated, largely due to the loss of agricultural land to built development. This is addressed by the LVIA which, in reference to the relevant character area of the 'Woodcot/Alver Valley LLCA - Sub area 08.1a' concluded that the magnitude of impact within the study area will be medium which, assessed alongside the low to medium sensitivity, would result in a minor to moderate adverse effect.

4.49. In terms of landscape and visual impact assessment, this is at the lower end of the scale for the assessment of significance (which general range across a scale of negligible, minor, moderate and major). At this level of significance, at the lower end of the threshold, these impacts are considered to be acceptable in landscape terms and do not constitute an overall 'harm' to the landscape.

c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;

4.50. In this section I consider the purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap.

4.51. During the course of the application a 'strategic landscape and visual appraisal' of the gap was prepared and submitted and this addresses issues in respect of function of the gap, core areas and how the strategic gap can be maintained whilst accommodating the strategic growth in the area.

4.52. The overarching aim was to establish which areas of the gap were a priority to maintain its function and separation between settlements, and which parts of the gap could, subject to further detailed assessment, accommodate some form of built development that would be integrated, not highly visible and ensuring that it would not erode the physical, visual and perceived gap.

4.53. Albeit undertaken at a high level, the study found that the appeal sites (and landscape generally between Peel Common and Fareham/Gosport) were not a priority area required to maintain the integrity and function of the wider Fareham to Stubbington Strategic Gap.

4.54. In September 2020, in support of the emerging Local Plan, the evidence base was updated to include a recent study of strategic gaps across the Borough.

4.55. This document, a 'Technical Review of Areas of Special Landscape Quality and Strategic Gaps' was undertaken by Hampshire County Council on behalf of FBC and published in September 2020 (**CDG.7**). The study undertook a technical review of the six proposed 'Areas of Special Landscape Quality' and two proposed strategic countryside gaps (including the Meon Gap and the Fareham and Stubbington Gap).

4.56. The study reiterates the Fareham Draft Local Plan 2036, stating that (page 5, **CDG.7**):

- 4.57. "...Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities (page 27, Fareham Draft Local Plan 2036)"
- 4.58. Study states that the approach and methodology established a set of criteria for determining strategic gap characteristics and boundaries
- 4.59. The executive summary makes two observations in respect of the Fareham to Stubbington Strategic Gap, stating that (following extracts from pages 6 and 7 of the study, **CDG.7**):

"The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence through continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there are some opportunities for development to be accommodated within the landscape, without compromising the Strategic Gaps function..."

Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:

- *An area to the South of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function...*

It is also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past."

- 4.60. The study goes on to 'test' a series of areas against defined criteria, including primary and secondary measures (described on page 19 of the study, **CDG.7**). These are summarised in the following table.

Table 3: Summary of primary and secondary measures for strategic gap criteria

Principles of primary measures	Principles of secondary measures
<i>Physical and visual separation:</i> - absence of urban land uses	<i>Green infrastructure provision:</i> - role and purpose of green infrastructure

<ul style="list-style-type: none"> - primarily an absence of residential development - feeling relatively tranquil - have dark night skies - retain a sense of leaving a settlement, passing through a distinct tract of countryside before entering another - maximum and minimum distances are a 'rule of thumb' 	<ul style="list-style-type: none"> - influence appropriate gap distances
---	---

- 4.61. Further detail of these measures is set out in the detailed methodology to the study. Also in relation to the approach and methodology of the study, it notes that (page 20, para 45, **CDG.7**):
- 4.62. *"Whilst it has been stated earlier that Strategic Gaps, do not necessarily have an intrinsic landscape value, landscape character and it's quality does have a role to play in helping to understand and determine the extent of a gap and it's sensitivity to development..."*
- 4.63. Chapter 4 of the study sets out an overview of the Strategic Gaps, it states that (page 84, para 8, **CDG.7**):
- 4.64. *"The aim of the Fareham-Stubbington Gap is to avoid coalescence between the settlements of: Fareham and Bridgemary, with Stubbington and Lee-on-the-Solent."*
- 4.65. The study goes on to define a series of 'key features' within the Fareham to Stubbington Gap (page 96, **CDG.7**). I summarise these in the following table, along with a brief analysis as to whether these key features are reflected by the appeal sites and their immediate context.

Table 4: Summary of the defined 'Fareham-Stubbington Gap' key characteristics

Key feature as defined by the study	Relevance to the appeal sites and context
Open, predominantly arable farmland and horticulture with some glasshouses, a weak hedgerow structure and few trees	This is reflective of the core part of the gap, whereas the appeal sites are contained within a smaller scale arable landscape contained by a strong framework of hedgerows and hedgerow tree. This distinction is acknowledged by the defined landscape character guidance. Consequently, given the fundamental difference in landscape character here, the appeal schemes will not unduly influence this particular key feature.
The settlement edges are for the most part well screened by mature tree canopy, but there is some	The landscape context to the appeal sites also include the settlement edge of Gosport at Bridgemary, which is also visually apparent from the local landscape. Closer

<p>minor visual intrusion from Fareham, Stubbington and HMS Collingwood</p>	<p>to the appeal sites, Peel Common forms an incidental 'satellite' of the settlement pattern which has grown out of ribbon development along Newgate Lane and this is more prominent in the local landscape context.</p> <p>Given the existing context of the residential edges, particularly Peel Common, the appeal schemes are not considered to unduly influence this key feature of the Strategic Gap, particularly given the urbanising influence (and associated infrastructure of Newgate Lane East) along with mitigation in the appeal schemes which includes landscape buffers and additional landscape planting.</p>
<p>A few scattered farmsteads/horticultural holdings and a mosaic of small fragments of open farmland and horse grazed pastures sandwiched between.</p>	<p>This is more reflective of the appeal site and their local context, however it is useful to contrast this with similar farmsteads and horticultural buildings set within the more open arable landscape to the west. Fragmentation of the arable landscape in this area has also occurred through the implementation of Newgate Lane East which has severed several field parcels and hedgerows through the area.</p> <p>The appeal schemes have taken an approach of minimising impacts through reference to the scale and field pattern within the landscape which has defined the development envelopes for built form. Notwithstanding this positive approach, there is an acknowledged loss of agricultural land.</p>
<p>Large scale non-agricultural uses of business and airfield development at Solent Airport in Daedalus to the south.</p>	<p>There is limited physical and visual connections between the appeal sites and these features.</p> <p>The appeal schemes will not increase the prominence or extent of these uses in the landscape.</p>
<p>Utilities of: Peel Common Water Treatment Works enclosed from views by an earth bund and mature tree belt Peel Common Solar Farm</p>	<p>Both utilities are in close proximity to the appeal sites, the former acting as one of the main features that enclosure the appeal site physical and visually and restrict the potential visibility of the appeal schemes in terms of visual effects.</p> <p>These features effectively contain the appeal scheme and prevent any perception (physically or visually) of them from the west, and in particular from the context of the arable landscape across to Stubbington.</p>
<p>Construction site of Stubbington Bypass, which will provide an east-west route through the gap that has not previously existed.</p>	<p>This feature is physically and visually separate from the appeal schemes, but will likely introduce a detracting feature into the landscape, much in the same way Newgate Lane East has in the locality of the appeal sites.</p>
<p>Urban fringe character of Peel Common residential area</p>	<p>The appeal sites are located adjacent to the 'satellite' residential area of Peel Common and will consolidate this area of the settlement.</p> <p>In terms of the gap, notwithstanding the extension of the settlement (albeit limited by the alignment of Newgate Lane East, the gap will continue to function much in the same way that the strategic gap in the north continues to function, with the consolidated</p>

	settlement area of Titchfield situated between the two more pronounced settlement edges.
Recently completed highway works to Newgate Lane and Peel Common Roundabout, with associated noise attenuation fencing and bus and cycle infrastructure.	Overall these key features reflect the independent judgements in the LVIA and earlier in this evidence as to the impact of Newgate Lane East on the landscape. In term of the gap, these features conflict with some of the primary measures in relation to tranquillity and drawing a distinction between settlements along major routes.

4.66. In respect of the Fareham-Stubbington Gap, the study draws together key conclusions in respect of the primary and secondary measures. Several key conclusions are summarised as follows (I include the full extract of the conclusions at **Appendix FL&BH 1.2.3** of my evidence):

- Minimum and maximum distances of ca. 300m to 1.8m [sic] (assumed km);
- That Peel Common represents a 'false' settlement edge;
- Two areas of the gap have distances of 350m and 300m but that these distances are still perceived as a sense of separation between neighbouring settlements, partly due to presence of mature vegetation;
- These represent 'minimum' gaps (within the 'rule of thumb') but are not appropriate to become a standard dimension as they would be weak and at risk of being lost (i.e. they are acceptable, but not ideal) – furthermore they function due to the context of linking to wider sections of the gap either side;
- Moderate to large gap distances of ca. 600m to 1.8km are 'good' distances;
- Presence of urban land uses can correspond to loss of tranquillity and dark night skies as urban fringe characteristics 'creep into the gap';
- In terms of land uses, sports fields and recreation grounds on the fringes of urban settlements have the potential to bring urbanising influence;
- In comparison to the Meon Gap there is not the same level of GI resource, however measures could be taken to increase these through positive environmental management; and
- Mitigation will be required where there is considered to be capacity to absorb development.

4.67. These conclusions are illustrated in the study by analysis diagrams of legibility/visibility and key distances (refer to extracts at **Plates 3 and 4**).

Plate 3: Extract illustrating the analysis of legibility/visibility

Plate 4: Extract illustrating key distances across the strategic gap

- 4.68. Having considered the analysis of the gap study, I refer back to the executive summary of the gap study where it notes that there exists some opportunities for development to be absorbed within the strategic gap without compromising its function. Further to illustrative extracts (**Plates 3 and 4**) I include some additional analysis of the gap in the context of the appeal sites (refer to **Appendix 1.2.4, Landscape Analysis of the Strategic Gap**).
- 4.69. The study suggest that an area south of Fareham and west of HMS Collingwood be considered, however this would place development in a more open and exposed part of the landscape, at a point where the existing gap (between HMS Collingwood and Newlands Farm/Stubbington) is only between ca. 325m and 550m. This would seem to contradict some of the principles set out in the analysis and conclusions.
- 4.70. I don't intend to critique the approach of the strategic gap study or its analysis, however I do think it is necessary to interrogate the robustness of the overall conclusions. The aims of the study include a review of the function of the strategic gaps in the Borough, but also to consider their boundaries. The study includes the necessary analysis to present a clear evidence base for amending boundaries in parts of the strategic gap. In relation to the edges of Fareham and Gosport, there is no recommendation to adjust the boundaries in this area, despite the findings of the study that:
- Some physical coalescence has already occurred;
 - These are some of the narrowest parts of the gap, resulting in a 'minimum functioning gap, that is weak';
 - Suburban edges and influences are often prominent, which reduces the effectiveness of the gap, including loss of tranquillity and presence of lighting;
 - Recreational land uses are present in the form of several sports and recreation grounds and these are noted as an issue in terms of their 'visual appropriateness'; and
 - The road network is such that there is no genuinely clear experience of a break between the settlement areas, particularly between Peel Common, Bridgemary and the southern edge of Fareham.
- 4.71. In relation to the landscape around the appeal sites, and particularly between Peel Common and Bridgemary, I cannot see how these trends would be reversed nor how the strategic gap could be strengthened, particularly with Newgate Lane East now forming such a strong urbanising feature in the local landscape context. The result is now the continued inclusion of a part of the gap that is weak and under pressure in the long term.

- 4.72. In that context I would think a logical and appropriate conclusion for the study would be to amend the boundary to omit this part of the landscape from the strategic gap, creating capacity for appropriate forms of development that could come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the importance of the core, priority areas of the gap, between Fareham and Stubbington where the gap clearly delivers its role and function in full. However, I do appreciate that this is not the conclusion of the published study.
- 4.73. Returning to the conclusions of the study, it notes that development coincidental with LCA8 (Woodcot-Alver Valley) would be inappropriate. However, it goes on to state that Gosport and Fareham have already partly coalesced (along the A32) and that urban characteristics are present throughout the study area 8C (which is coincidental with the appeal sites).
- 4.74. Given the urbanising influences, along with the considerable green infrastructure which provide appropriate visual qualities and separation thresholds, I consider that development in this area would not be inappropriate, particularly given that the inherent mitigation would also contribute substantially to the green infrastructure network (as illustrated on the Composite Landscape Strategy (refer to **Appendix FL&BH 1.2.2**))
- 4.75. Having considered the analysis within the study analysis of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the strategic gap. This is on the basis that (refer also to **Appendix FL&BH 1.2.4**):
- In relation to distances, the appeal schemes will reduce the gap between Bridgemary and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances;
 - In terms of visibility, the appeal schemes will be physically and visually well contained – they site within the strong green infrastructure framework that is evident by blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the strategic gap from Stubbington;
 - Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, also along Newgate Lane and within the merging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;

- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area;
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

4.76. I also note that, notwithstanding differences in the technical approaches, the Pegasus group and Hampshire County strategic gap studies both independently acknowledge that the strategic gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site /project basis.

4.77. For the appeal schemes, this more detailed site analysis has been completed in the form of the submitted landscape and visual impact assessments. This iterative approach to design, based on the impact assessment, has informed the inherent mitigation to the masterplan and concludes that the proposed developments would be acceptable.

4.78. On this basis, I consider that the appeal schemes can come forward without a significant effect on the integrity and function of the strategic gap and without conflict to the aim of the Fareham to Stubbington Gap which is to avoid coalescence between Fareham and Bridgemarky with Stubbington and Lee-on-the-Solent.

d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries.

4.79. The final issue raised buy the reason for refusal in respect of landscape and visual matters related to the settlement boundaries and relationship between the sites and the urban edge.

4.80. Notwithstanding that this is more generally a planning matter related to the definition of settlement boundaries, I consider it useful to briefly consider the existing urban and suburban areas from a landscape and visual perspective; including how these relate to the site. This includes reference to Newgate Lane East and the potential 'future baseline' that could include emerging development of the former HA2 allocation.

- 4.81. In the context of the appeal sites, the current settlement pattern is defined by the edges of Fareham and Bridgemary which are generally defined by residential development, including some green infrastructure. Other settlement areas are that of Peel Common, which would appear to be a small 'satellite' of predominantly residential development, historically small scale ribbon development along Woodcote Lane and Newgate Lane. There is a mix of dwellings in terms of age, appearance and scale, and no one aspects really binds the settlement character together or delivers a unique sense of place.
- 4.82. The strategic gap study describes Peel Common as a 'false urban edge' and this is likely due to the visibility of dwellings on the approach from Stubbington, which briefly gives way to the open space of Brookers Field Recreation Ground before entering Gosport.
- 4.83. The surrounding landscape context to Peel Common is influenced equally by the agricultural landscape along with several areas of recreational open space and sports pitches. Newgate Lane East, Peel Common Roundabout and the utilities of Peel Common solar farm and the waste-water treatment works are all notable features that influence the character and pattern of the satellite settlement.
- 4.84. In terms of the more extensive urban areas that are located nearby, there is some connectivity close to Gosport Road a partial connection between Peel Common to Gosport in the form of Woodcote Lane (and its associated residential dwellings) and the amenity open space of Brookers Field Recreation Ground.
- 4.85. The reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries.
- 4.86. However, the appeal sites are located immediate to the east of Newgate Lane, and are physical contained by the alignment of Newgate Lane East; they sit immediately adjacent to the existing residential dwellings off Woodcote Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane. Together the appeal schemes will consolidate the pattern of Peel Common within a clearly prescribed and defined limit.
- 4.87. Furthermore, the proposals for green infrastructure and open space that form an integral part of the masterplans will set the proposed developments in a landscape framework that reflects some of the characteristics of Peel Common where tree belts and hedgerows are present to a greater or lesser degree across parts of the satellite. This includes proposals for an area of green space directly adjacent to Newgate Lane

that will form a green corridor that runs broadly through the centre of the emerging pattern.

- 4.88. Green infrastructure and open space on the eastern edge will integrate with the highways landscape planting along Newgate Lane East and together this will add to the containment of this pocket of settlement.
- 4.89. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 4.90. As previously noted, there exists some physical connections between Peel Common and Bridgemary. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemary, focused along the green route into Bridgemary (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 4.91. Whilst forming a consistent part of the overall settlement edge, these would be characterised by a softer transition than the current settlement edge, incorporating a strong network of green infrastructure which links the wider countryside to the west of HMS Collingwood, through the green infrastructure of the solar and waste water facilities, along the open spaces of the appeal schemes and Newgate Lane East, connection to the recreation ground and the wider extent of the Alver Valley further south.
- 4.92. At the time of writing the direction of the Local Plan had altered slightly and the former emerging allocation of HA2 had been removed. However, were HA2 to come forward this broader allocation would form a logical connection between Peel Common (including the appeal sites) and the edge of Fareham. This would represent a clear connection to the settlement edge of Fareham and a logical pattern of the settlement in this area. Furthermore, given the opportunities for including and extending the green infrastructure network, that larger extent of the settlement can come forward with a suitable mitigation strategy.
- 4.93. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.

5. RESPONSE TO POLICY

- 5.1. In the context of the analysis of effects identified in the previous section, I now go on to address the policy context, addressing these in respect of landscape and visual matters.
- 5.2. There are also several other saved and emerging policies relevant to landscape and visual matters which are not referenced in the reason for refusal but against which the appeal scheme will potentially make a positive contribution.

National Planning Policy Framework

- 5.3. The National Planning Policy Framework (NPPF) has a presumption in favour of sustainable development. Reference to the NPPF in the reason for refusal generally relate to sustainability and transport (noting paras 103, 109 and 110). Notwithstanding that landscape is not addressed at this level, there are other parts of the NPPF that are relevant.
- 5.4. NPPF paragraph 8 defines three overarching objectives to sustainable development, economic, social and environmental. The environmental objective (c) is explained in the following terms:
- 5.5. *"To contribute to protecting and enhancing our natural, built and historic environment; including making effective use of land, helping to improve biodiversity, using natural resources prudently, minimising waste and pollution, and mitigating and adapting to climate change, including moving to a low carbon economy."*
- 5.6. Section 15 of the NPPF is concerned specifically with conserving and enhancing the natural environment. Paragraph 170 notes that the planning policies and decisions should contribute to and enhance the natural and local environment by (a) protecting and enhancing 'Valued Landscapes' in a manner commensurate with their statutory status or identified quality in the Development Plan.
- 5.7. It is common ground that The site is not a 'valued landscape' for the purposes of Paragraph 170 of the NPPF.
- 5.8. The NPPF paragraph 170 also notes in sub section (b) that (my own emphasis):
- 5.9. *"Recognises the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and eco system services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland."*

- 5.10. To satisfactorily address policy at a national level it is necessary to undertake an appraisal of landscape character making reference to published guidance, but also looking more specifically at the local landscape character. This establishes a detailed baseline position for the landscape character of a site or area in question and presents and understanding of its sensitivity.
- 5.11. The submitted landscape and visual assessments that were prepared in support of the applications were undertaken using a methodology which accords with current best practice guidance for landscape and visual impact assessment (i.e. GLVIA3).
- 5.12. The submitted LVIA's make reference to published landscape character assessment prepared at a national, regional and district level and also addresses local character by reference to the description of the appeal site and its immediate context. The subsequent design of the proposed development reflects the relevant aspects of the local landscape character to ensure that impacts are minimised, that the proposals can be assimilated into the landscape and that mitigation forms an inherent part of the proposed development. Consequently, the LVIA responds fully to the requirement of the NPPF.

Adopted Fareham Borough Core Strategy 2011

- 5.13. The following section responds to policies included in the reason for refusal that are relevant to landscape and visual matters.

Policy CS4: Green Infrastructure, Biodiversity and Geological Conservation

- 5.14. This policy relates habitats and biodiversity and also ecologically focussed designations, however it also refers to the protection of trees and woodland. There is some relevance to landscape and visual matters by virtue of the parts of the policy that refer to green infrastructure. The policy refers to networks of accessible multi-functional green infrastructure to be planned around existing green spaces in urban, urban fringe and rural areas.
- 5.15. The appeal schemes incorporate a landscape strategy that forms an integrated part of the development proposals and sets a green framework for the masterplan. Notwithstanding the two applications are administratively separate, the landscape and green infrastructure strategies work together to provide a comprehensive framework of retained vegetation, proposed open space and augmentation of these through additional landscape works (refer to **Appendix FL&BH 1.2.2**).

- 5.16. Furthermore the green infrastructure network across the appeal sites dovetails with the wider green infrastructure network as it extends from the landscape to the west of Fareham, through the network of vegetation and open spaces to the north of Peel Common and along New Newgate Lane, and down toward the Alver Valley in the south.
- 5.17. Overall, the appeal schemes are considered to be consistent with and positively contribute to the policy in landscape and visual terms.

Policy CS14: Development Outside Settlements

- 5.18. This policy states that, for land outside the defined settlements, development will be strictly controlled to protect the countryside and coastline from development which would adversely affect its landscape character, appearance and function.
- 5.19. Both applications have been supported by comprehensive LVIAs which have found the proposals to be acceptable in landscape and visual terms. These documents also demonstrate the physical and visual containment of the appeal sites in relation to both the local landscape character and visual receptors.
- 5.20. In my evidence I have presented additional analysis that demonstrates the appeal schemes respond positively to the local landscape character and that this approach integrates mitigation that aims to avoid or minimise potential impacts. Some degree of residual impact is acknowledged at a site level, however in the context of the urban fringe context in this part of the landscape, the degree of impact is not considered to be at a level that would adversely affect the overall character of this part of the landscape.

Policy CS17: High Quality Design

- 5.21. This policy requires that proposed developments be of a high quality of design. This includes the need to, amongst other criteria:
- respond positively to and be respectful of the key characteristics of the area, including landscape
 - provide continuity of built form
 - provide green infrastructure, including landscaping, open spaces, greenways and trees

Policy CS22: Development in Strategic Gaps

- 5.22. This policy relates to land within a Strategic Gap and states that development proposals will not be permitted where it 'significantly' affects the integrity of the gap and the physical and visual separation of settlements.
- 5.23. The submitted LVIAs demonstrate that the appeal sites are physically and visually well contained. Landscape and visual impacts are limited to a highly localised area and the appeal sites together are contained in a strong framework of the existing settlement area of Peel Common, infrastructure (with associated vegetation) and the alignment of Newgate Lane East. This containment will be strengthened over time as mitigation within the schemes – and along Newgate Lane East – becomes established.
- 5.24. Additional analysis presented in my evidence also demonstrates several points in relation to the Strategic Gap, including that the key area for separation is between Stubbington and Fareham (including up to the western extent of Peel Common) and that the strategic gap in the area around Peel Common has been undermined to the point where it is no longer fulfils its role effectively.
- 5.25. Together, the containment of the site along with the strength of the gap between Stubbington and Fareham (at Peel Common) means that there will not be a significant effect on the integrity of the gap and consequently I do not see any conflict with this policy.

Adopted Fareham Borough Local Plan Part 2: Development Site and Policies Plan (June 2015)

Policy DSP40: Housing Allocations

- 5.26. This policy notes that, in the scenario where the Council does not have a five year supply of land for housing, additional housing sites, outside the urban area boundary, may be permitted. The policy sets out several criteria of which the following is relevant to landscape and visual matters:
- ii. The proposal is sustainably located adjacent to, and well related to, the existing urban settlement boundaries, and can be well integrated with the neighbouring settlement;
- Response: My evidence demonstrates the relationship between the appeal schemes and Peel Common and how this area, already party connected to the

edge of Gosport, would be consolidated as an area of settlement and present a well defined edge to the eastern edge of the Strategic Gap.

- iii. The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;

Response: My evidence has also demonstrated, in addition to the submitted LVIA, how the appeal schemes reflect local landscape character and a limit landscape and visual effects overall. My evidence also demonstrates that there will be no significant effect on the integrity of the strategic gap between Stubbington and Fareham.

- 5.27. Overall, in respect of landscape and visual matters, I do not consider there to be a conflict with this policy.

Other Matters

- 5.28. Matters raised in objection to the proposed scheme were summarised in the report to committee, including comments from the statutory consultees and several public comments. These include reference to matters of the countryside, strategic gap landscape and landscape character impacts and
- 5.29. I have dealt with these issues throughout my evidence in respect of several of the related points, including with reference to the submitted LVIAs, additional landscape and visual analysis in this evidence and the subsequent response to policy.

6. SUMMARY AND CONCLUSION

- 6.1. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 6.2. Together, the appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham and Gosport, that is bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east (with Newgate Lane and Newgate Lane East framing the northern edge of the sites also).
- 6.3. The wider landscape context of the appeal sites includes the low-lying ground of the coastal plain, characterised by abrupt the transition between the open landscapes and the adjacent urban environments of Fareham, Gosport (with Woodcot and Bridgemary). The settlement area of Stubbington forms the western extent of the Strategic Gap, extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.
- 6.4. Both applications were submitted with a detailed LVIA. These not only set out a comprehensive baseline and robust assessment of predicted impacts, but include details as to how landscape and visual matters have influenced the design of the masterplan, with mitigation measures consequently forming an inherent part of the proposals, both independently but also in respect of the complementary approach of the two schemes.
- 6.5. The reasons for refusal raises three main issues in respect of landscape and visual matters, stating that:
- b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;
 - c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;
 - d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;
- 6.6. This evidence considers the reasons for refusal against various information, including the submitted Landscape and Visual Impact Assessments, various consultation

responses, report to committee and other relevant baseline and evidence base material related to landscape and visual matters.

- 6.7. The submitted LVIAs address the key characteristics of the appeal sites and their immediate context. The submitted LVIAs also set out an assessment of the impact and approach to mitigation. This comprehensive process also enables judgements to be drawn in respect of the context of the appeal sites in relation to the existing urban settlement edges/boundaries.
- 6.8. The purpose and function of the strategic gap in terms of providing physical and visual separation between settlements and how the site functions in relation to the wider gap has been addressed the a 'strategic landscape and visual appraisal' (prepared by Pegasus Group) and also by reference to the updated Technical Review of Areas of Special Landscape Quality and Strategic Gaps, prepared by Hampshire County Council on behalf of FBC.
- 6.9. With reference to this material, and supported by my own additional analysis where necessary, I conclude that the appeal schemes will not be harmful to the character and appearance of the countryside, will not significantly affect the integrity of the Strategic Gap and will relate well to the existing patterns of settlement.
- 6.10. This is on the basis the relevant key landscape characteristics of the area have been considered through the process of LVIA, consequently informing the analysis of constraints and opportunities, and ultimately the landscape strategy for the mitigation. This forms an integrated part of the two masterplans for northern and southern schemes.
- 6.11. Consequently, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms.
- 6.12. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement.
- 6.13. I consider that the subsequent residual impacts of the appeal schemes will be acceptable in landscape and visual terms.

- 6.14. In terms of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the Strategic Gap. This is on the basis that:
- In relation to distances, the appeal schemes will reduce the gap between Bridgemarky and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances set out in the FBC study;
 - In terms of visibility, the appeal schemes will be physically and visually well contained – they sit within the strong green infrastructure framework that is evident in the form of blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the Strategic Gap from Stubbington;
 - Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, along Newgate Lane and within the emerging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;
 - The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
 - The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area; and
 - In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.
- 6.15. I also note that, notwithstanding differences in the technical approaches, the Pegasus Group and FBC Strategic Gap studies both independently acknowledge that the Strategic Gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site/project basis.
- 6.16. In respect of the conclusions of the FBC Strategic Gap study (where these note the relatively poor state of the gap at this point), I would think a logical and appropriate conclusion would be to amend the boundary to omit this part of the landscape from the Strategic Gap, creating capacity for development to come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the

importance of the core areas that are located further west, between Fareham and Stubbington where the Strategic Gap clearly delivers its role and function in full.

- 6.17. Finally, the reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries. However, my evidence demonstrates that the appeal sites are well related to Peel Common, being located to the east of Newgate Lane, physical contained by the alignment of Newgate Lane East and situated immediately adjacent to the existing residential dwellings off Woodcote Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane.
- 6.18. With existing and proposed green infrastructure in place, the appeal schemes will consolidate the pattern of Peel Common within a clearly defined limit. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 6.19. Furthermore, there are some existing physical connections between Peel Common and Bridgemary. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemary, focused along the green route into Bridgemary (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 6.20. If the previous emerging allocation of HA2 were to come forward, this broader area of development would reinforce the connection between Peel Common (including the appeal sites) and the edge of Fareham. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.
- 6.21. In all respects, considering Peel Common in itself, connections to Gosport, and with the potential for HA2 to come forward, development in this area will maintain a robust gap between Fareham (aligned with the western edge of Peel Common) and Stubbington.
- 6.22. Overall, in the context of these limited issues, and with the appeal schemes in place, landscape and visual issues are not sufficient to support a prospective reason for refusal.

PREFACE

The National Planning Policy Framework makes a clear commitment to conserving the natural environment in the planning system and recognises that it has a key role to play in the achievement of sustainable development. The Framework principles and policies make clear that planning should take account of the different roles and character of different areas, recognising the intrinsic character and beauty of the countryside and promoting local distinctiveness. Planning policies and decisions should be based upon up-to-date and relevant evidence about the landscape characteristics of the area and the primary tools for achieving this are landscape character assessments and, where appropriate, assessments of landscape sensitivity.

Fareham Borough Council is currently undertaking a review of its adopted Local Plan and commissioned *LDA Design* to up-date and expand upon the previous Fareham Landscape Assessment, undertaken in 1996, to provide robust evidence to inform Local Plan policy and planning decisions. The study brief included three main components:

- ▣ Landscape character assessment - a review of the baseline 'audit' of the character of the Borough landscape provided by the 1996 Landscape Character assessment, updated as necessary. The aim is to improve understanding of the key characteristics of the landscape that make places distinctive and different from one another, rather than better or worse;
- ▣ Landscape Sensitivity Assessment - detailed analysis and judgements regarding the value of the landscape and its sensitivity to change. The aim is to assist the Council in the evaluation of possible development options/alternatives to meet housing needs in the Local Plan Review and to inform the assessment of potential impacts on the landscape when determining planning applications;
- ▣ Designations Review - a review of landscape designations within the Borough, with specific reference to 'Strategic Gaps' and 'Areas of Special Landscape Character', but also 'other areas of protected or valued landscape designations'. The aim is to assist the Council in framing policy related to landscape protection, strategic gaps and settlement boundaries within the review of the Local Plan.

These components are presented in three separate 'parts', supported by appendices, and together form the 2017 Fareham Landscape Assessment. It should be emphasised that the assessment findings are based upon the professional judgement of the qualified landscape architects/planners within the consultant team and have not been influenced by, nor tested against, the opinions of the Council or the public.

LLCA 8.1 - WOODCOT

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

LANDSCAPE CHARACTER, QUALITY AND VALUE

This area forms part of the easternmost extent of the Stubbington–Fareham Strategic Gap. It is bounded by Newgate Lane to the west, beyond which lie the Newlands Solar Farm and Peel Common Waste Water Treatment Works. Out-of-town retail uses border the area to the north, while the eastern boundary is shared with the western edge of the Bridgemary area of neighbouring Gosport district. The southern boundary is formed by Woodcote Lane.

The LLCA is divided into two sub-areas, reflecting different land uses and their effects on intrinsic landscape character and quality. **Area 8.1a** comprises the land between Woodcote Lane in the south and Speedfield Park Playing Fields in the north. This area shares the typically flat, low-lying character of the coastal plain landscape that extends south and westwards to the Solent, but lacks the very expansive and denuded character of these areas. It is characterised by medium-scale, regular shaped fields, mostly under arable cultivation, bounded by a network of drainage ditches and a relatively intact structure of hedgerows, albeit heavily trimmed with some gappy sections and few mature hedgerow trees. Internally, the area has an open character but tree belts form taller, denser boundaries around the periphery of the area, especially to the north, east and south, which give the area a sense of enclosure from surrounding urban areas. The western boundary along Newgate Lane is more open and allows some intrusion from passing traffic but the area is devoid of built development (apart from farm buildings at Peel Farm) and retains a predominantly unspoilt, rural, agricultural character with limited intrusion from surrounding urban influences.

Area 8.1b is comparatively small and comprises two separate areas of recreation land and playing fields collectively referred to as Speedfields Park, connected by a surfaced pedestrian and cycle route. Both areas comprise amenity grassland and are enclosed by well-treed boundaries. The larger field adjacent to Newgate Lane contains a pavilion building and small car park along its northern boundary, with a variety of rugby posts, football goalposts and tall flood lights located in the centre of the field. The smaller field to the north east contains a single sports pitch and a children's play area in the south west corner. Despite retaining some of the characteristics of the adjacent landscape type (e.g. flat landform, well-defined hedgerow and tree boundaries and a regular field pattern) the introduction of built elements, car parking and management for sports use give the area a suburban, rather than rural agricultural, character.

The landscape of area 8.1 is not covered by any current national or local landscape designation. Scenic quality is not exceptional and is affected by some localised intrusion of urban features around its periphery and within area 8.1b. It does not contain any features of recognised conservation interest and it lacks the sense of remoteness and natural qualities that are found in other parts of the coastal plain. It has the sense of a 'landlocked' piece of countryside and the area's urban context is perceptible even if not dominating. However, area 8.1a does retain a predominantly rural, agricultural character and has a reasonably intact structure of hedgerows and significant tree cover around its periphery that contributes to its aesthetic appeal. The landscape is generally well-managed as agricultural land and in good condition, with limited evidence of 'fringe' uses or influences (e.g. horse paddocks, vacant land, unkempt fencing, fly tipping etc.). Overall, landscape value in area 8.1a is judged as moderate to high while in area 8.1b it is moderate, although the well-treed boundaries are valuable landscape features.

LLCA 8.1 - WOODCOT

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area lacks the very open, expansive character of other parts of the coastal plain (including adjacent land within the strategic gap to the west) but it nevertheless has a relatively open and large-scale character which makes it susceptible to change.

The distinctive character of **area 8.1a** relies on this openness, its rural agricultural character and the absence of prominent urban features, and it would be difficult to accommodate significant new development without affecting these characteristics or altering the balance between a predominantly rural or predominantly urban landscape. So, overall, the sensitivity of the landscape resource within area 8.1a is judged to be high (moderate to high value and high susceptibility to change), with very limited capacity to accommodate development without a significant impact on the integrity of the area's rural, agricultural character.

The existing balance will be affected, however, with the approved construction of the new southern section of Newgate Lane, which will provide a new connection from Newgate Lane to Peel Common Roundabout and a junction and link road to access the existing route of Newgate Lane. The road alignment just clips the extreme south-western corner of area 8.1b but cuts right through the middle of the southern half of area 8.1a and will inevitably introduce further activity, noise and urbanising features into the agricultural landscape, as well as resulting in physical disturbance to land and tree/vegetation cover.

However, the road corridor is relatively narrow and unaffected land within the rest of the area should be of a sufficient scale to remain viable as farmland and to maintain its essentially rural character. Mitigation proposals include new hedgerow and tree planting along the route to reduce its visibility and impact on the landscape and, if this is effective, the road itself may not have an overwhelming urbanising effect across the area as a whole in the longer term. However, significant further development in addition to the road scheme would almost certainly have this effect, potentially tipping the balance towards a predominantly urban character.

The sensitivity of the landscape resource within **area 8.1b** is slightly lower, as its rural character is already influenced by the proximity to built up areas/roads and the development of sports facilities and amenity uses within the area. Despite its more urbanised character, the area nevertheless has some value as part of the Borough's amenity landscape resource (as well as a role in the strategic gap and local GI network, see below) and its essentially open, undeveloped character would be significantly altered by further encroachment of built development. However, strong boundary vegetation would help to limit the influence of development within this area on the more rural landscape of area 8.1a to the south, particularly if located within the smaller northern field which is contained within very strong, well-treed boundaries.

LLCA 8.1 - WOODCOT

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

IEWS, VISUAL FEATURES AND VIEWERS

Long distance visibility towards the area is low due to the typically low-lying and flat topography of the Borough (including the area itself), and the screening effects of boundary vegetation and surrounding built form. The area may be visible from some local elevated viewpoints (e.g. tall buildings in Fareham) and from higher ground at Portsdown, but from this distant location it forms an insignificant part of a wide panorama of the urban and coastal plain landscape.

Shorter-distance views into the area from built up areas to the north and east are largely filtered through established trees and boundary vegetation or interrupted by built form. Short distance visibility from the east is limited to private views from the rear of properties that back onto the area within the residential suburb of Bridgemary (e.g. Tuke's Avenue, Pettycot Crescent and around Heron Way). Short-distance visibility from the north is also significantly restricted by planting along the southern edge of the retail park, but there are open views through fencing into area 8.1b from the footpath that runs along the northern edge of the sports ground from Newgate Lane. Views of area 8.1a are largely screened from this direction by intervening vegetation.

Views from roads and public places to the south of the area are also very limited but there are some occasional views into the southern end of area 8.1a over or through the hedgerow that runs along Woodcote Lane/Brookers Lane at the far south of the area. Private properties along Woodcote Lane will experience similar views from upstairs windows.

The most significant views are from Newgate Lane which runs along the western side of the area, and from a number of properties along the roadside. Open views across large parts of areas 8.1a and b are possible from much of this length of road, where the roadside hedgerow is absent, gappy or trimmed to a low level. Land further to the east is less visible because of some intervening hedgerows or tree cover within the area.

Most of the available views are across open, undeveloped and relatively attractive countryside, with a strong backdrop of mature trees and limited evidence of built development or other urbanising features. The exceptions to this are views from the southern section of Newgate Lane between Peel Farm and Woodcote Lane, where a foreground of small-scale horse-grazed paddocks with wire fencing, shelters etc lends a fringe character to the view, and views into the sports fields in area 8.1b which have a more suburban character.

Currently, the main viewers are local residents within properties around the immediate periphery of the area, motorists and pedestrians on Newgate Lane and users of the sports facilities, public open space and footpath within area 8.1b. In future, the new alignment of Newgate Lane will increase the extent of the views available to road users, opening up most of area 8.1a to potential views from the road. Roadside planting will mitigate some of these effects but will take time to become effective.

LLCA 8.1 - WOODCOT

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Overall, visual sensitivity in this area is moderate to high. Although it is screened from longer-distance views, a large proportion of **area 8.1a** is highly visible from short distance views from Newgate Lane to the west, and it is overlooked by a number of properties around its periphery through or over boundary vegetation. The high intervisibility within the area means that these views are quite extensive across the area and they generally have an attractive, unspoilt rural character.

The extent of visibility will be exacerbated, at least over the short term, by the introduction of the new alignment proposed for Newgate Lane. This will open up additional views across the area from the new road and will affect the character of rural views across the area for a period of time. Roadside planting will mitigate some of these effects but will take time to become effective and visual sensitivity of the remaining undeveloped area will remain high.

While road users are only moderately susceptible to change, because of their focus on the road and fleeting nature of views, local residents are likely to be more focussed on the landscape and their surroundings and will be highly susceptible to change. The introduction of further development into the agricultural landscape is likely to have a significant impact on the character and quality of existing predominantly rural views, unless it can be successfully integrated within a substantial framework of new vegetation.

Area 8.1b is slightly less visually sensitive, partly because it benefits from more extensive tree cover around its boundaries, and also because the existing character of the views is already affected by some urbanising influences. Nevertheless, local residents and recreational users of the public open space and PRow network are highly susceptible to change and will value the existing open, essentially undeveloped character of this recreational landscape. Their visual amenity would be significantly affected by the introduction of built development within this area.

LLCA 8.1 - WOODCOT

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

CONTRIBUTION TO SETTING AND SETTLEMENT CHARACTER

The area lies within the lower-lying parts of the Borough, forming part of the coastal plain that slopes gently up to the foot of Portsdown Hill in the far north. While the area does not play a significant role in the topographic setting of the urban area, together with LCA7 to the west it forms part of a swathe of largely undeveloped agricultural landscape that lies between the urban areas of Fareham in the north, Stubbington in the west and Gosport in the east, providing clear visual and physical separation of these settlements. The significant role of the area in separating and preventing coalescence of these settlements is enshrined in policy, with the area designated a Strategic Gap in the Fareham Borough Local Plan.

The visual separation between settlements is apparent in all short distance views into the area from the edge of Fareham to the north, Newgate Lane to the west, Woodcote Lane to the south and in private views from Bridgemary (residential suburb of Gosport) in the east. The substantial vegetation along the northern and eastern boundaries provides strong definition of the edges of the urban areas of Fareham and Bridgemary and marks a clear distinction between town and country (albeit slightly blurred by the amenity uses in the north). This helps to reinforce the separate identity of each settlement and also provides the urban areas with an attractive, essentially rural setting.

The alignment of the approved Newgate Lane South encroaches within the Gap but, in itself, should not fundamentally alter the sense of separation, indeed it may in some ways strengthen it. The lack of roadside development along the new route will reinforce the experience of moving out of Fareham, passing through an area of undeveloped countryside and entering the urban area of Gosport beyond the Peel Common roundabout. Similarly the physical and visual gap across the area between the edge of Bridgemary and Peel Common may be more readily appreciated in views from the road as it passes through the middle of the gap between these two settlements.

The role of the area in separating Stubbington and Gosport is less easily perceived because of intervening development and other features that interrupt views, and occupy land, between the two areas. These include the Newlands Solar Farm, the waste water treatment plant and housing development along the western side of the Newgate Lane corridor at Peel Common. Nonetheless, the area does have a critical role in preventing the coalescence of these areas and this is likely to become more significant with the future redevelopment of land at MCA Daedalus and construction of the Stubbington Bypass to the west, within the existing gap between built areas.

The area does not play a significant gateway role for the Borough as a whole, being some way to south of the M27 and main railway line and therefore not visible from the main approach routes. However, it does provide a strong rural backdrop along Newgate Lane which forms part of a key approach into the Borough from Gosport District to the south via the B3334. This reinforces the sense of moving between settlements and districts.

Overall, **area 8.1** plays an important role in defining the edges, separate identity and settings of Fareham and Gosport and a critical role in preventing their coalescence. It also makes an important contribution to the swathe of landscape that currently separates Stubbington from Gosport, a role that may become more critical to maintain with the redevelopment of the MCA Daedalus site in future years.

LLCA 8.1 - WOODCOT

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Given the area's designation as part of the Strategic Gap and the role it plays in preventing coalescence between the settlements of Fareham, Stubbington and Gosport, the area is highly sensitive to change. The landscape lacks any strong landform feature (e.g. ridges or valleys) or a mature framework of woodland that could potentially contain and provide a strong landscape edge to any major extension of built form into this area. Intrusive development within the area would inevitably erode the visual and physical separation that currently exists and potentially alter the character of the landscape settings of the two settlements from predominantly agricultural to predominantly urban. Ultimately, the function and integrity of the area as farmland could be significantly eroded to the point where the gap becomes a corridor of greenspace between urban areas, or an 'urban park', rather than a functioning area of agricultural landscape with a distinct character and identity.

The proposed new bypass could potentially erode the integrity of the existing gap if it is regarded as forming a potential new edge for development. If the rural, undeveloped and open character of this area is to be maintained, it will be crucial to keep the urban boundaries as tightly drawn as possible and avoid infilling the land between the existing urban edges and the new road. Overall, therefore, there is very limited scope to accommodate development without a significant impact on the integrity of the area's rural, agricultural character and the role it performs in maintaining the separate identity and character of the settlements and their landscape settings.

LLCA 8.1 - WOODCOT

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

CONTRIBUTION TO GREEN INFRASTRUCTURE NETWORK

This area does not support a wide range of GI assets in terms of biodiversity or landscape features (there are no designated features) but the area as a whole does make a contribution to the local GI network as an extensive area of undeveloped greenspace between the urban areas of Fareham and Gosport, albeit with limited public access. The tree lined boundaries and reasonably intact structure of hedgerows provide a valuable framework of vegetation within this large-scale, intensively managed landscape and the playing fields, public open space and footpath within area 8.1b are valuable recreational assets for local people. The footpath along the northern edge of the area and Woodcote Lane/Brookers Lane in the south provide east-west access links between the residential suburbs of Gosport across the strategic gap to Stubbington and beyond to the Meon Valley. There are no other PRow or access routes across or within area 8.1a.

The PUSHGI strategy identifies a sub-regional scale blue corridor following the drainage network that runs through the western side of the area southwards to join the River Alver (within Gosport District). The strategy includes a project (C7) to strengthen wildlife corridors connected to the River Alver but this is focused on the Alver Valley outside of the Borough. The Fareham GI strategy does not identify any specific projects within the boundary of this area.

LLCA 8.1 - WOODCOT

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area's GI value lies in its largely open, undeveloped nature, the public open space at Speedfields Park and the functional connections between Newgate Lane and Bridgemary provided by the public footpath to the north and Woodcote Lane to the south. The area is moderately sensitive to change. Any development that compromised the PRoW network or the sense of openness and being 'in the countryside' would have an adverse effect on the GI network.

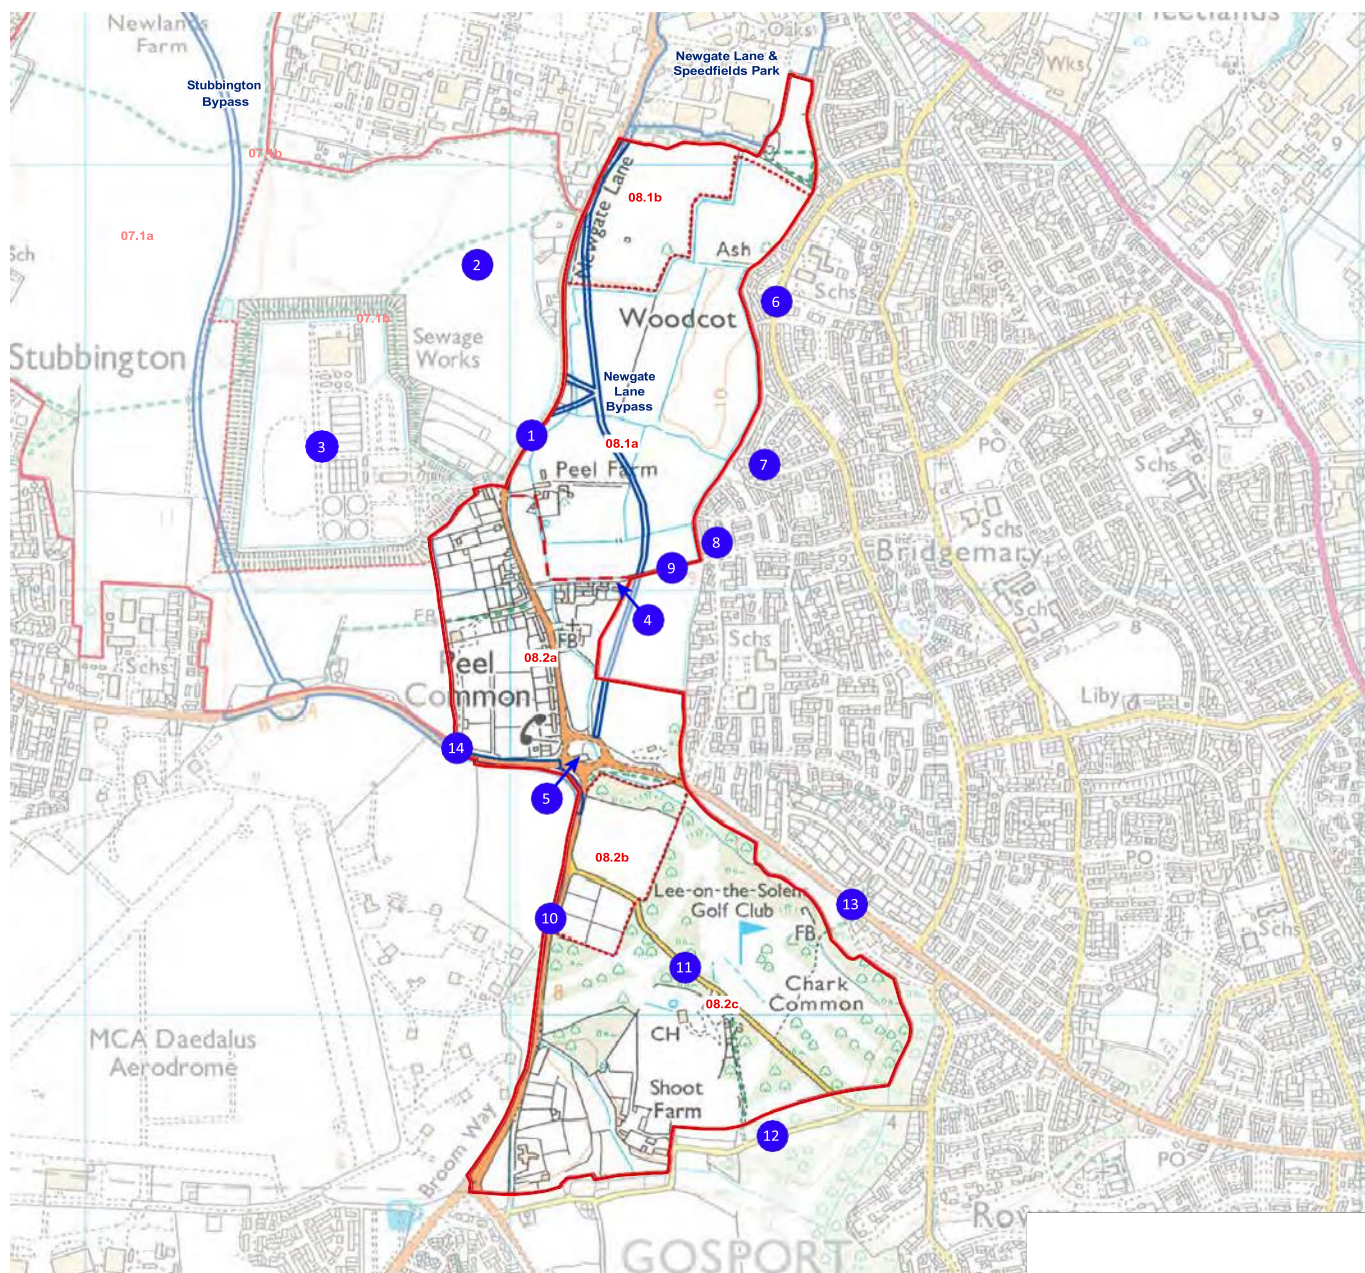

This area would benefit from improvements and extension of the local GI network, through major investment in the reinstatement or creation of hedgerows, woodlands and other habitats that have been lost or damaged by agricultural intensification, and through the extension of public open space or access connections through the area.

The main impacts of new road on GI resources are its potential interference with the east-west footpath link between Bridgemary and Peel Common that crosses the area along Woodcote/Brookers Lane, the loss of small areas of amenity space within the Speedfields Park and Brookers Field Recreation Grounds and the loss of some trees and hedgerow vegetation along the road alignment. Mitigation proposals will offset much of this impact.

LLCA 8.1 - WOODCOT

DEVELOPMENT CRITERIA AND ENHANCEMENT OPPORTUNITIES

As a whole, this area is of high sensitivity primarily on account of its critical role in preventing the coalescence of the urban areas of Fareham, Bridgemary and, to a lesser extent, Stubbington, and in defining the edges, setting and separate identity of these settlements. The relatively small size of the area, the high degree of intervisibility and its generally unspoilt, rural character make it particularly vulnerable to change. The generally open nature of the landscape means that it is difficult to integrate development without it being highly visible and potentially affecting the rural undeveloped character across a wide area, as well as eroding the physical, visual and perceived gap between settlements. The situation is further complicated by the proposed new road which will have some effect on the integrity and character of the landscape resource and undeveloped gap. Even a small amount of encroachment of further built development within the area could exacerbate these effects to the point at which the character of the whole area may be fundamentally altered.

There may be potential for some modest, small scale development associated with existing recreational land uses and built form within area 8.1b, as long as it is closely related to existing features and can be successfully integrated within the existing structure of hedgerows and trees without altering the essentially ‘undeveloped’ character of the amenity landscape or the wider agricultural landscape of area 8.1a.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban setting and green infrastructure, development proposals will need to:

- ▣ Protect the open, predominantly agricultural and undeveloped, rural character of area 8.1a;
- ▣ Maintain and strengthen the existing structure of trees, hedgerows and other mature vegetation, to maximise its landscape and wildlife value and to minimise impacts on the rural character of the landscape;
- ▣ Maintain the essentially open, undeveloped character of the public open space, playing fields and sports facilities within area 8.1b, and be designed to relate closely to the existing structure of trees hedgerows and existing characteristic built features within the area;
- ▣ Avoid any major incursion of the urban ~~area~~ into the countryside beyond existing well-defined boundaries, or create significant new pockets of urban or urbanising development within open farmland;
- ▣ Protect the area’s role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development strung out along road corridors (e.g. along the existing and proposed new alignment of Newgate Lane) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;
- ▣ Maintain significant distance and separation from the corridor of the new road to minimise its urbanising effects upon the rural character of the area;
- ▣ Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the open, flat landscape;
- ▣ Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area;
- ▣ Provide substantial new investment in the landscape through extensive tree, hedgerow and woodland planting using native broadleaved species appropriate to the locality and soil conditions and habitat creation to diversify the intensively farmed landscape;
- ▣ Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

LANDSCAPE CHARACTER, QUALITY AND VALUE

Landscape character, quality and value

This area forms the southern part of the Woodcot-Alver Valley LCA and the south-eastern part of the wider Stubbington–Fareham Strategic Gap. The area forms part of the flat, low-lying coastal plain but is very different in character and scale from the open agricultural landscape to the north and west. It is characterised by a mixed pattern of wooded common, small-scale pasture and ribbon development along the corridors of the River Alver and Newgate Lane and is bounded to the east by the urban edge of Gosport, to the west by the Daedalus airbase, to the north by the Peel Common Waste Water Treatment Works and arable farmland, and to the south by the open amenity land of the Alver Valley.

Area 8.2a comprises a strip of land on either side of Newgate Lane, extending from Peel Farm in the north to the Peel Common roundabout in the south. To the west of the road, the area is occupied by residential ribbon development backed by gardens and a small-scale pattern of fields, paddocks and other plots of land, contained by strong boundary vegetation to the rear. The eastern side of the road is characterised by a similar patchwork of small-scale, horse grazed pastures, built development south of Woodcote Lane (including housing, church and care home), gardens and small parcels of land enclosed by woodland, trees and hedgerows. In the far south-east corner is an area of public open space, including sports pitches and associated buildings. The character of this corridor is significantly affected by the influence of busy roads, street lighting, built development and other urban land uses, while the management of the small-scale pastures and plots of land - with their associated rather ramshackle fencing and structures - lends a distinct fringe character to the remaining unbuilt landscape. This situation will be exacerbated by the construction of the proposed new Newgate Lane-Peel Common bypass which will further fragment and intrude upon areas of undeveloped landscape. Overall landscape quality is therefore substantially degraded although the strong structure of vegetation that encloses this area is of some landscape value.

On the southern side of the Peel Common Roundabout lies Chark Common, which marks a distinct change in character from the open arable landscape of the northern part of the Woodcot-Alver Valley LCA, to a landscape which is strongly enclosed by extensive cover of woodland and trees, within which small-scale fields or open spaces are seemingly 'carved out' from the woodland cover. Within the overall area, **area 8.2b** is distinctive in that it forms a relatively large, regularly shaped parcel of open land, divided into smaller horse-grazed paddocks by fencing. This area shares some of the fringe characteristics of the roadside paddocks further north (e.g. fencing, land management, structures etc) but has a less urbanised context and is framed by a strong, attractive backdrop of woodland, mature trees and hedgerows. Its quality is less degraded and it retains a semi-rural character.

The remainder of the Chark Common area (**area 8.2c**) is dominated by the Lee-on-Solent Golf Course, which extends across the majority of the area, excluding the far south-west corner (comprising fields in use for horse-grazing along with former farm buildings converted for residential use). The landscape is characterised by open areas of grassland, heathland and wetland habitats (associated with the River Alver) contained within a strong structure of woodland belts, copses, mature trees and scrub. Parts of the land are intensively managed as part of the golf course (e.g. greens, fairways, bunkers etc.) and there are associated buildings and structures, which have an amenity character that somewhat detracts from the rural character of the landscape. However, most of the area is designated as a SINC (for its woodland, heathland and wetland habitats) and retains an attractive, enclosed and well-treed character with some 'semi-natural' qualities. The strong tree cover also provides an effective buffer to the influence of surrounding roads and neighbouring development within Gosport. The area is generally unspoilt and of relatively high landscape quality although it is not covered by any current national or local landscape designation.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

LANDSCAPE RESOURCE - SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The sensitivity of the landscape resource varies within this overall area. **Area 8.2a** is already substantially degraded by urban influences and has a predominantly 'fringe' character which reduces its sensitivity to change. This will be exacerbated by the construction of the proposed bypass. Further development within this area would further erode the extent of surviving 'undeveloped' land but would not have a significant effect upon the overall character and quality of the landscape resource. Notwithstanding its value as part of the strategic gap or other roles, in landscape resource terms alone this area has relatively low sensitivity and high development potential.

Area 8.2b also has fringe qualities but has not been degraded in the same way. It retains an essentially rural, pastoral character that is susceptible to change and would be significantly affected by the introduction of permanent built development. The area is physically and visually detached from other built form by the strong surrounding woodland framework and significant development would appear as an isolated area of built land within open countryside. A section of the western boundary along Broom Way is open and there is a visual relationship between the area and currently undeveloped land within the Daedalus site to the west which would also be affected by development within this area. Redevelopment proposals for the Daedalus site may change the situation but current indications suggest that the undeveloped 'green' character of this corner of the site is to be maintained. Overall, therefore, landscape sensitivity is judged as moderate to high and the potential for development is low.

Area 8.2c is highly sensitive to change. Although its use as a golf course has altered the underlying character of the landscape it nevertheless has an attractive wooded and enclosed character and supports a mosaic of other habitats and features of landscape and ecological value. Built development would undoubtedly intrude upon its quiet, semi-rural and secluded character. There may be some modest potential for accommodating small-scale development (i.e. individual buildings) within the south west corner of the area, where it is associated with existing built form and can be more successfully integrated within the existing vegetation structure, but otherwise there is very limited potential for development within the area.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

VIEWS, VISUAL FEATURES AND VIEWERS

The area's low lying position within the coastal plain means that there are few long distance views. The area may be perceived as one part of a much wider panorama taking in the urban and coastal landscapes in views from higher ground to the north of the Borough. However, its small size and lack of landmark features means the area is generally indistinguishable from the wider landscape within long-distance views.

More locally, large parts of **area 8.2a** are visible from roads, adjacent dwellings, lanes, public rights of way and open spaces within the area itself, although there are some small pockets of land enclosed behind built form and strong boundary vegetation that are less visible from public areas. The character and quality of the available views is already heavily influenced by urban characteristics and would not be fundamentally altered by additional built development.

Area 8.2b is largely enclosed within a strong wooded framework which restricts its visibility from surrounding areas but it is open along parts of its western boundary, allowing some direct views from adjacent Broom Way. There are also occasional filtered glimpses through the roadside trees along Brune Lane, which cuts through the middle of this area. Given that the main viewers will be road users, the visual sensitivity of this area is moderate and could be reduced further by mitigation planting to close the gap along the western boundary, although this will take time to become effective.

Area 8.2c is generally of low visual sensitivity. The extensive cover of trees and woodland around and within the area prevent all but glimpsed views from surrounding roads, through trees and gaps in the boundary vegetation. There are no views from neighbouring urban areas to the east. There is a public footpath that cuts through the golf course, linking Shoot Lane with Brune Lane, and another sort section of footpath into the area off Rowner Lane on the northern side of the area, otherwise there are no other publicly accessible viewpoints in this area.

The main viewers of this area are therefore local residents within Peel Common (area 8.2a), users of the main road network (Newgate Lane, Broom Way) and minor local lanes (Brune Lane, Shoot Lane), users of the limited network of PRow and open spaces, and golf course members. Apart from some attractive views within area 8.2c, the value of the landscape as a visual resource for these receptors lies primarily in its character as undeveloped land rather than its intrinsic scenic quality.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

VISUAL ENVIRONMENT – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Visual sensitivity is relatively low within this area. Area 8.2a is highly visible but the character of the views is such that further development is unlikely to have a major impact on visual amenity. Area 8.2b is visually well-contained apart from a section of its western boundary, but this visual exposure could be mitigated by additional planting to close the gap. Likewise, area 8.2c is also highly visually contained by the extensive cover of trees and woodland within and around the area, with very limited publicly accessible views. However, balanced against this is the relatively unspoilt character of the views in the Chark Common area which are highly susceptible to change, and the high level of sensitivity of people using the PRow network (albeit very restricted) and otherwise accessing the area for recreational purposes, who appreciate their surroundings and will be very aware of changes.

Across much of the area, therefore, there are limited opportunities to integrate development into the visual environment without unacceptable adverse effects on the character and quality of existing views and on the visual amenity of sensitive viewers. However, there may be some modest scope for accommodating small-scale development (i.e. individual buildings) within less visible, well-contained pockets of land within areas 8.2a and in the south-western corner of area 8.2c, where the existing vegetation structure has the potential to limit effects on high quality views and visual amenity.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

CONTRIBUTION TO SETTING AND SETTLEMENT CHARACTER

The area lies within the lower-lying parts of the Borough, forming part of the coastal plain that slopes gently up to the foot of Portsdown Hill in the far north. While the area does not play a significant role in the topographic setting of the urban area, together with LCA7 to the west (and area 8.1 to the north) it forms part of a swathe of largely undeveloped landscape that lies between the urban areas of Fareham in the north, Stubbington in the west and Gosport in the east, providing clear visual and physical separation of these settlements. The significant role of the area in separating and preventing coalescence of these settlements is enshrined in policy, with the area designated a Strategic Gap in the Fareham Borough Local Plan.

The role of **area 8.2a** as part of the gap is evident to the east of Newgate Lane, where the strip of roadside paddocks forms part of a wider corridor of undeveloped landscape between the road and the western edge of Bridgemary. However, the role of this area in maintaining the gap westwards towards Stubbington is less easy to perceive from the Newgate Lane corridor as views in this direction are blocked by built development along the roadside at Peel Common. Nevertheless, when viewed from the west (from the Gosport Road) it becomes apparent that Peel Common is an isolated small settlement that lies within the wider gap, rather than defining its western boundary or connecting to a larger urban area. It will be vital to maintain this 'isolation' of development at Peel Common if the physical and visual integrity of the wider gap is to be maintained.

The Peel Common Roundabout is a critical 'pinch point' within the gap between Peel Common and the edge of Bridgemary where there is a real risk of the two areas coalescing. This will be further exacerbated by the new bypass which eats into the remaining undeveloped land to the north of the roundabout and also, potentially, by redevelopment of the Daedalus site to the south. It will be vital to protect the undeveloped landscape within the public open space to the east of the roundabout in order to maintain a physical, visual and perceptual gap between the built areas.

Areas 8.2b and c also play a pivotal role in maintaining separation of urban areas and as a link between the upper and lower parts of the Alver Valley corridor. This triangle of semi-rural, heavily wooded landscape is important not only in physically and visually separating built areas at Peel Common and Bridgemary but also in separating Bridgemary from the northern edge of Lee-on-the-Solent. The redevelopment of MCA Daedalus may potentially exacerbate the perceived closing of the gap between Lee-on-the-Solent and Peel Common. It will be essential, therefore, to maintain the undeveloped character of all sides of this triangle, avoiding encroachment of development along Broom Way, Shoot Lane and Gosport Road.

This southern area also forms a vital link in the wider Alver Valley landscape corridor which extends southwards into Gosport District to the coast, providing a distinct edge and landscape setting to the urban areas to the south. It will be very important to maintain the integrity of this continuous corridor of undeveloped landscape and avoid the encroachment of development within and across it.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

SETTING OF URBAN AREA – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

Given the area's designation as part of the Strategic Gap and the role it plays in preventing coalescence between the settlements of Fareham, Stubbington, Bridgemarky and Lee-on-the-Solent, the area is highly sensitive to change. The area also contributes to the perceived sense of separation between Gosport District and Fareham Borough. Any development that reduced the physical or visual separation between these settlements would have an adverse effect on the integrity of the gap and on the area's contribution to the distinct identity and settings of the surrounding urban areas. Consequently, the area offers very limited development potential in respect of its role in maintaining the separation and setting of settlements. The only opportunities may lie within areas that are closely associated with existing development (e.g. at Peel Common or in the SW corner of area 8.2c) and can be integrated within the landscape without any physical or perceived encroachment within the gap.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

CONTRIBUTION TO GREEN INFRASTRUCTURE NETWORK

The area's main contribution to the GI network is through its role as an extensive area of undeveloped land between the urban areas of Fareham and Gosport and, in particular, as part of the wider corridor of greenspace and habitats that follow the course of the River Alver, identified within the PUSH GI strategy as a 'sub-regional scale blue corridor'. The strategy includes a project (C7) to strengthen wildlife corridors connected to the River Alver but this is focused on the Alver Valley outside of the Borough.

The northern part of the area (8.2a) does not support a wide range of designated GI assets but the framework of mature hedgerows and trees and the playing fields to the east of the Peel Common Roundabout are all valuable GI resources in this urbanised area. Woodcote Lane and the footpath linking Newgate Lane with Gosport Road also provide a valuable access link connecting Bridgemary with Stubbington across the middle of this area.

The southern part of the area (**areas 8.2b and c**) contains significant biodiversity assets in the extensive woodland, grassland, heathland and wetland habitats (designated as a SINC) within the golf course and surrounding area but is relatively inaccessible to the public, with only three short lengths of public footpath and no public open space. An extension of public access in this area, particularly along the river corridor to link with the Alver Valley Country Park to the south (in Gosport District) would be desirable. The Fareham GI strategy identifies project BW14 which aims to create 'cross boundary links from South Fareham Gap and Daedalus to the Alver valley Country Park' and 'to provide a linear corridor between Stubbington, Lee-on-the-Solent and Gosport'.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

GREEN INFRASTRUCTURE – SENSITIVITY ASSESSMENT

SENSITIVITY AND DEVELOPMENT POTENTIAL

The area's primary GI value lies in its largely undeveloped nature and the extensive network of woodland, grassland, heathland and wetland habitats within the corridor of the River Alver and within Chark Common in the south of the area. These assets are particularly scarce and valuable within the heavily urbanised and pressured context of this part of the Borough and are therefore very sensitive to change.

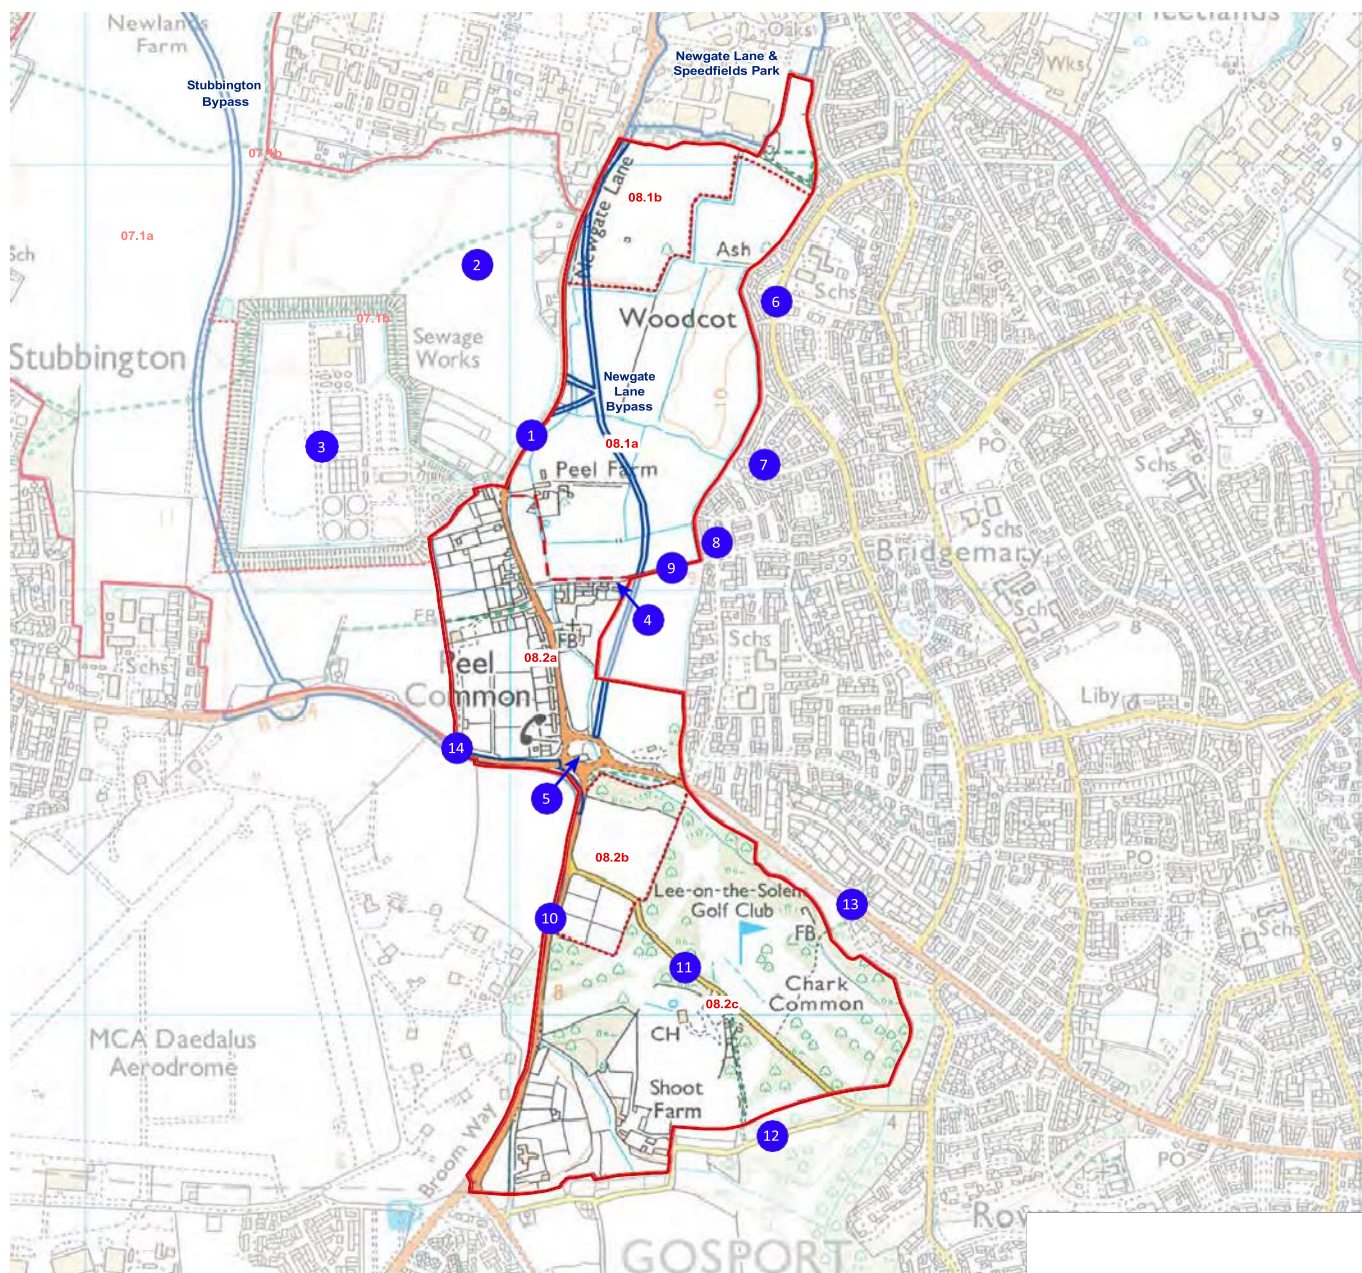

The existing network of public access an open space is fairly sparse within the area and existing features need to be protected and their function and quality enhanced. The area would benefit from improvements to the local access network to provide improved east-west links between urban areas and the wider access network of the coastal plain, and north- south links to connect the northern part of the river corridor with the Alver Valley Country Park and the coast.

Any new development would need to maintain the largely 'undeveloped' character of the area, ensure the protection of features of landscape or biodiversity value, and maintain and extend the provision of access and public open space opportunities. There is very limited scope for this to be achieved in this highly constrained area.

LLCA 8.2 - PEEL COMMON AND ALVER VALLEY

DEVELOPMENT CRITERIA AND ENHANCEMENT OPPORTUNITIES

As a whole, this area is of high sensitivity primarily on account of its critical role in preventing the coalescence of the urban areas of Fareham, Bridgemary, Lee-on-the-Solent and, to a lesser extent, Stubbington, and in defining the edges, setting and separate identity of these settlements. The narrowness of the gap between development at Peel Common and the edge of Bridgemary means that this area has a particularly vital role in maintaining physical, visual and perceived separation and even a limited amount of development in the ‘wrong’ place, particularly along the main roads that enclose the southern part of the area, could threaten the integrity of the gap. The situation is further complicated by the proposed new bypass which will inevitably have some effect on the integrity and character of the landscape resource and undeveloped gap and further ‘squeeze’ the gap at its narrowest point.

Other key sensitivities include the important range of habitats within the Chark Common area and the area’s contribution to the corridor of undeveloped greenspace (albeit largely inaccessible) along the course of the River Alver, from Fareham to the Alver Valley Country Park and beyond to the coast.

There may be potential for some modest, small scale development associated with existing built form at Peel Common or in the far south-west of the area, as long as it is closely related to existing features and can be successfully integrated within the existing structure of hedgerows and trees without altering the essentially ‘undeveloped’ character of the landscape or threatening the integrity of the gap.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban setting and green infrastructure, development proposals will need to:

- ▣ Safeguard the area’s vital role in maintaining the separation of settlements and a clear distinction between urban and rural areas. In particular, avoid ribbon development along road corridors (e.g. Broom Way, Shoot Lane and Gosport Road) and any development beyond the existing urban edge that cannot be successfully integrated within the existing landscape structure and which could affect the visual, physical or perceived integrity of the strategic gap;
- ▣ In particular, protect and strengthen the undeveloped character of the public open space to the east of the Peel Common roundabout;
- ▣ Maintain the distinctly ‘isolated’ nature of settlement at Peel Common and ensure that any potential small-scale infill development within this area effectively ‘rounds off’ rather than extends the settlement boundary, to avoid the risk of physical or perceived coalescence with other built areas;
- ▣ Protect the semi-rural, undeveloped character of areas 8.2b and c;
- ▣ Maintain and strengthen the existing structure of woodland, trees, hedgerows and other mature vegetation in all parts of the area, to maximise its landscape and wildlife value;
- ▣ In particular, maintain and enhance the mosaic of woodland, heathland, grassland and wetland habitats of value within the Lee-on-the-Solent golf course at Chark Common and encourage further habitat creation and diversification within intensively managed areas to maximise wildlife and landscape value;
- ▣ Avoid the introduction of tall buildings or structures that would be particularly visually prominent within the landscape;
- ▣ Protect and enhance enjoyment of the landscape by maintaining and enhancing the existing areas of public open space and access network, and by making further provision for accessible greenspace and access links within and across the area, particularly along the River Alver corridor and with the Country Park to the south;
- ▣ Demonstrate design that has minimal impact on the surrounding landscape and is in keeping with the character of the local landscape context.
- ▣ Use native broadleaved species appropriate to the locality and soil conditions in new tree and hedgerow planting.

APPENDIX FL&BH 1.2.2
COMPOSITE LANDSCAPE STRATEGY

- KEY**
-  Site boundary
 -  Existing trees/vegetation to be retained
 -  Existing drainage
 -  Existing public rights of way
 -  Newgate Lane relief road Southern Section (Currently under construction)
 -  Proposed development cells and units
 -  Proposed key frontages
 -  Proposed secondary frontages
 -  Proposed buffer planting to eastern and southern boundaries
 -  Proposed tree planting
 -  Proposed feature tree planting
 -  Proposed hedgerows
 -  Proposed footpaths
 -  Proposed attenuation area
 -  Proposed play areas
 -  Continuity of green infrastructure connections to the Alker Valley
 -  Direct connection to existing settlement pattern

Retained sense of openness along 'old' Newgate Lane giving focus of open space within the settlement pattern

Eastern boundary vegetation (existing and proposed) will form a partial screen and help assimilate the developments

Open spaces and landscape planting reinforce the defined edge along Newgate Lane

Continuity of the local landscape Existing vegetation (including hedgerows) retained where possible and used to define development parcels, reflecting scale and pattern

Executive Summary

Fareham Borough Council is in the process of producing a new Local Plan to address housing, employment and retail development requirements across the Borough up to 2037. Once adopted, the new Local Plan will replace the adopted Local Plan Part 1 (Core Strategy) and Local Plan Part 2 (Development Sites & Policies).

To support Local Plan development, Fareham Borough Council commissioned the Landscape Team, in Hampshire County Council, to undertake a technical review of:

- six proposed Areas of Special Landscape Quality (ASLQ).
- two proposed Strategic Countryside Gaps: Meon Gap and between Fareham and Stubbington.

Fareham Borough Council's recent past experience in the determining of two planning applications, identified the need to address the 'valued landscapes' of Fareham.

"Two recent planning appeal decisions demonstrated how the argument of valued landscapes could help to determine planning decisions. Both decisions were on sites located in the Lower Meon Valley (Land west of Old Street, Stubbington and Land east of Posbrook Lane, Titchfield) and the Inspectors recognised the high-quality landscape concluding that the Lower Meon is a valued landscape.

...with this in mind, the Council proposed the designation of valued landscapes as part of the Draft Local Plan Update consultation in the summer of 2019."(page 27, Fareham Draft Local Plan 2036)

There was also the need to clarify the role that Strategic Gap designation plays within planning policies in the Countryside, and establish the clear difference between a policy that addresses landscape quality and a policy that addresses the prevention of coalescence of settlements with separate identities, as:

"...Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities." (page 27, Fareham Draft Local Plan 2036)

This technical review is published at the Regulation 19 stage to support the proposed designations.

The technical review undertaken during March to July 2020, reviewed recent relevant documents and developed an appropriate and concise methodology for determining Areas of Special Landscape Quality (or ASLQ), based primarily on criteria from the Guidelines for Landscape and Visual Impact Assessment (GLIVIA) 3rd Edition, Box. 5.1, supported by other examples of good practice and case law.

As there is no standard national guidance on Strategic Gap determination, a methodology and set of criteria were established for determining Strategic Gap characteristics and boundaries through review and analysis of pertinent recent Strategic Gap proposals developed for other Local Plans and through Fareham Borough Council's own Strategic Gap history.

Executive Summary

The resultant analysis and site surveys of all Fareham Borough's Landscape Character Areas concludes that:

- The six proposed ASLQ put forward for designation in the Fareham Local Plan Supplement (Reg 18 consultation document, Jan-March 2020), can be considered as 'valued landscapes' as they scored highly against the assessment criteria and therefore should be identified for ASLQ designation in the Fareham Local Plan 2037, with some modifications made to boundaries, to bring them into line with the current Fareham Borough Landscape Character Assessment 2017, but also;
- Through this process, two further landscape character areas in Fareham Borough were identified as having equivalently 'valued landscape' characteristics and so it is recommended that Chilling-Brownwich Coastal Plain and parts of the Cams to Portchester Coast should also be designated.
- Conservation Areas where they sit in or adjacent to a proposed ASLQ should be included as part of the ASLQ because of their mutually supportive relationship.

The resultant analysis and site surveys of the two Strategic Gaps, conclude that:

- The Meon Strategic Gap is proposed for continued designation, having both strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence, that could result from continued pressure for expansion of the Western Parishes; North and West Fareham, and from pressure for the expansion of Stubbington.
- One moderate amendment is proposed to the North Eastern corner of the Meon Gap; that is an extension to the Gap around Funtley to prevent Funtley from coalescing with North and West Fareham.
- The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional agreement for its designation, and a clear role in preventing settlement coalescence through continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there are some opportunities for development to be accommodated within the landscape, without compromising the Strategic Gaps function.

Executive Summary

Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:

- An area to the South of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function.
- An area to the north west of Stubbington south of Oakcroft Lane and east of Ranvilles Lane, as some development could be visually and physically absorbed into the Gap without compromising the Gap function.

It is also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past.

In order to develop appropriate Green Infrastructure mitigation and enhancement associated with the areas of recent and future change described above, in the Fareham-Stubbington Gap, Green Infrastructure Frameworks or Strategies are required for each area.

Chapter 4: Strategic Gaps

Figure 4.1. Photograph taken from road that leads to The Great Barn, near Titchfield Abbey, looking East towards edge of Fareham, in The Meon Gap. Beyond the tree line is Fareham. Photograph: Charlotte Webb June 2020

Chapter 4: Strategic Gaps Overview

1. This chapter describes the application of methodology to determine the extent of the two Strategic Gaps in the draft Fareham Local Plan 2036 and gives specific recommendations for each Gap:

1. Fareham/Stubbington and the Western Wards (the Meon Gap)
2. Fareham/Bridgemary and Stubbington / Lee-on-the-Solent (the Fareham-Stubbington Strategic Gap)

Role and purpose of the Strategic Gap

2. As a reminder of the previously stated purpose of the Strategic Gap:

“The primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities.”
(Fareham Publication Local Plan 2037)

First Filter to establish Study Area Extents

3. The Strategic Gap Study Area extents are shown in Figure 4.1. and detailed site analysis sheets can be found in Appendix 5. The study areas were established to show specific tracts of land between the settlement boundaries of nearest neighbour settlements.

Strategic Policy DS2: Development in Strategic Gaps

“In order to prevent the coalescence of urban areas and to maintain the separate identity of settlements, Strategic Gaps are identified as shown on the Policies map between the following areas:

- 1) Fareham / Stubbington and the Western Wards (Meon Gap)
- 2) Fareham / Bridgemary and Stubbington / Lee-on-the-Solent (Fareham- Stubbington Strategic Gap)

Development proposals will not be permitted where they significantly affect the integrity of the gap and the physical and visual separation of settlements or the distinctive nature of settlement characters.”

4. Both the Meon Gap and Fareham-Stubbington Gap are identified as ‘Cross-authority’ Gaps, with the Meon Gap running north into Winchester City Council Local Plan Area and the Fareham-Stubbington Gap running South-East into Gosport Borough Council Local Plan Area. Identified through PFSH Position Statement 2016.
5. Within the sub-region of South Hampshire, the purpose of the Meon Gap *“is of particular significance as it demarks the boundary of the Portsmouth and Southampton Housing Market Areas”* .(PFSH Position Statement 2016)

Chapter 4: Strategic Gaps Overview

-
5. Within Fareham Borough the aim of the Meon Gap is to prevent coalescence of Fareham and Stubbington with the Western Wards, but also important is the avoidance of coalescence with the settlement of Titchfield, that lies within the middle of the Gap. As stated earlier, the Meon Gap runs northwards following the River Valley across the borough boundary into Winchester City Council Local Authority Area, where Winchester Local Plan Policy CP18 - Settlement Gaps' includes the 'Meon Gap' (Whiteley – Fareham/Fareham Western Wards), with a local gap between North Fareham SDA and Knowle and Wickham designated under Policy SH4: North Fareham SDA.
6. The aim of the Fareham- Stubbington Gap is to avoid coalescence between the settlements of: Fareham and , Bridgemary, with Stubbington and Lee-on-the-Solent. Gosport Local Plan also supports P/SH Position Statement 2016 and has designated a Strategic Gap which runs from the Borough border through the Alver Valley, but also Brookers Field Recreation Ground on the border with Fareham, is designated as Strategic Gap. The settlement boundary for Bridgemary, Gosport, lies on the Borough boundary with Fareham. The Strategic Gap designation is contained within Gosport Local Plan 2011-2029 adopted October 2015.
7. As stated in Chapter 1, a key demonstration of pressure for development comes from the potential site allocations assessed in the Strategic Housing and Employment Land Availability Study, December 2019. The pressure for development in the Fareham-Stubbington Gap, is very significant to the risk for complete loss of countryside gap. The pressure in the Meon Gap is more moderate, with a 'squeezing' of the central area around Titchfield, but with a significant pressure to develop pockets of land along the west side of Titchfield Road, between Titchfield and Stubbington. There is moderate pressure for development on the Western edge of Fareham and between Titchfield and Titchfield Common and Southwards pressure from Titchfield along Posbrook Lane. The indication of development pressure Southwards from Titchfield Common to Hook, is also of note, with the potential to put pressure on Chilling-Brownwich Coastal Plain.
8. In addition to the two Appeal Sites at Posbrook Lane, Titchfield, and Old Street, Stubbington, which highlighted 'valued landscapes' in the Meon Valley, recent noteworthy planning applications which also highlight development pressures, within the Strategic Gaps are:
- P/14/0841/FP: Land of Cartwright Drive, Titchfield
 - P/19/0301/FP: Land East of Crofton Cemetery and West of Peak Lane, Fareham
 - P/14/0222/OA: Longfield Avenue, Land to the South – Fareham

Potential Development Impact

7. As stated in Chapter 1, a key demonstration of pressure for development comes from the potential site allocations assessed in the Strategic

Chapter 4: Strategic Gaps Overview

11. In the Meon Gap: P/14/0841/FP: Land of Cartwright Drive, Titchfield: Proposals for an 86 unit Care Homes, with associating landscape and car parking and a 15.4ha Country Park (with car parking), was approved though it was contrary to the current Policy C22: Strategic Gaps and within the setting of Titchfield Abbey Conservation Area. Construction on site was recently completed and is included in the site analysis.
12. P/19/0301/FP: Land East of Crofton Cemetery and West of Peak Lane, Fareham: refused for several reasons, such as design in relation to the setting of the Cemetery, but not for it's siting in the Fareham-Stubbington Gap.
13. P/14/0222/OA: Longfield Avenue, Land to the South – Fareham, an outline application for up to 1550 dwelling and associated infrastructure was withdrawn.

Key Routes for experiencing the Strategic Gaps

14. Key routes for the primary purpose of experiencing the physical and visual separation of settlements have been identified and are shown in Figure 4.2. This work ties in closely with the previous analysis carried out by LDA and described in Chapter 3 of the Adopted Fareham Borough Landscape Character Assessment 2017. As much as is possible, the key routes (or 'paths') pass between the settlement edges identified in the first filter, so that a significant number of drivers and walkers should experience the sense of leaving one settlement, passing through a distinctly different space, i.e. countryside between settlements before reaching another distinctly different settlement. This was tested out as part of the site analysis and is described in Appendix 5.
15. This study builds upon the work previously carried out by David Hares Associates in the Fareham Borough Gap Review 2012. There have been negligible changes in the settlement edges since 2012 and the summary of settlement types shown in illustration 4 of the Fareham Borough Gap Review 2012 is still relevant:

“The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap” (page 19, Fareham Borough Gap Review. David Hares, 2012)
16. A key feature of many of Fareham's settlement edges is that of Woodland screening. Detailed findings are described in Appendix 5. The Spatial Visibility/Legibility maps A5.8-A5.10 show key long views and views towards settlement edges where dwellings or other landmark buildings can either be seen or are hidden or partially hidden from view by woodland, tree canopies or hedgerows. Primary measure 10 gives descriptions of the impact of the settlement edges on users from multiple vantage points.

Chapter 4: Strategic Gaps Overview

Chapter 4: Strategic Gaps Overview

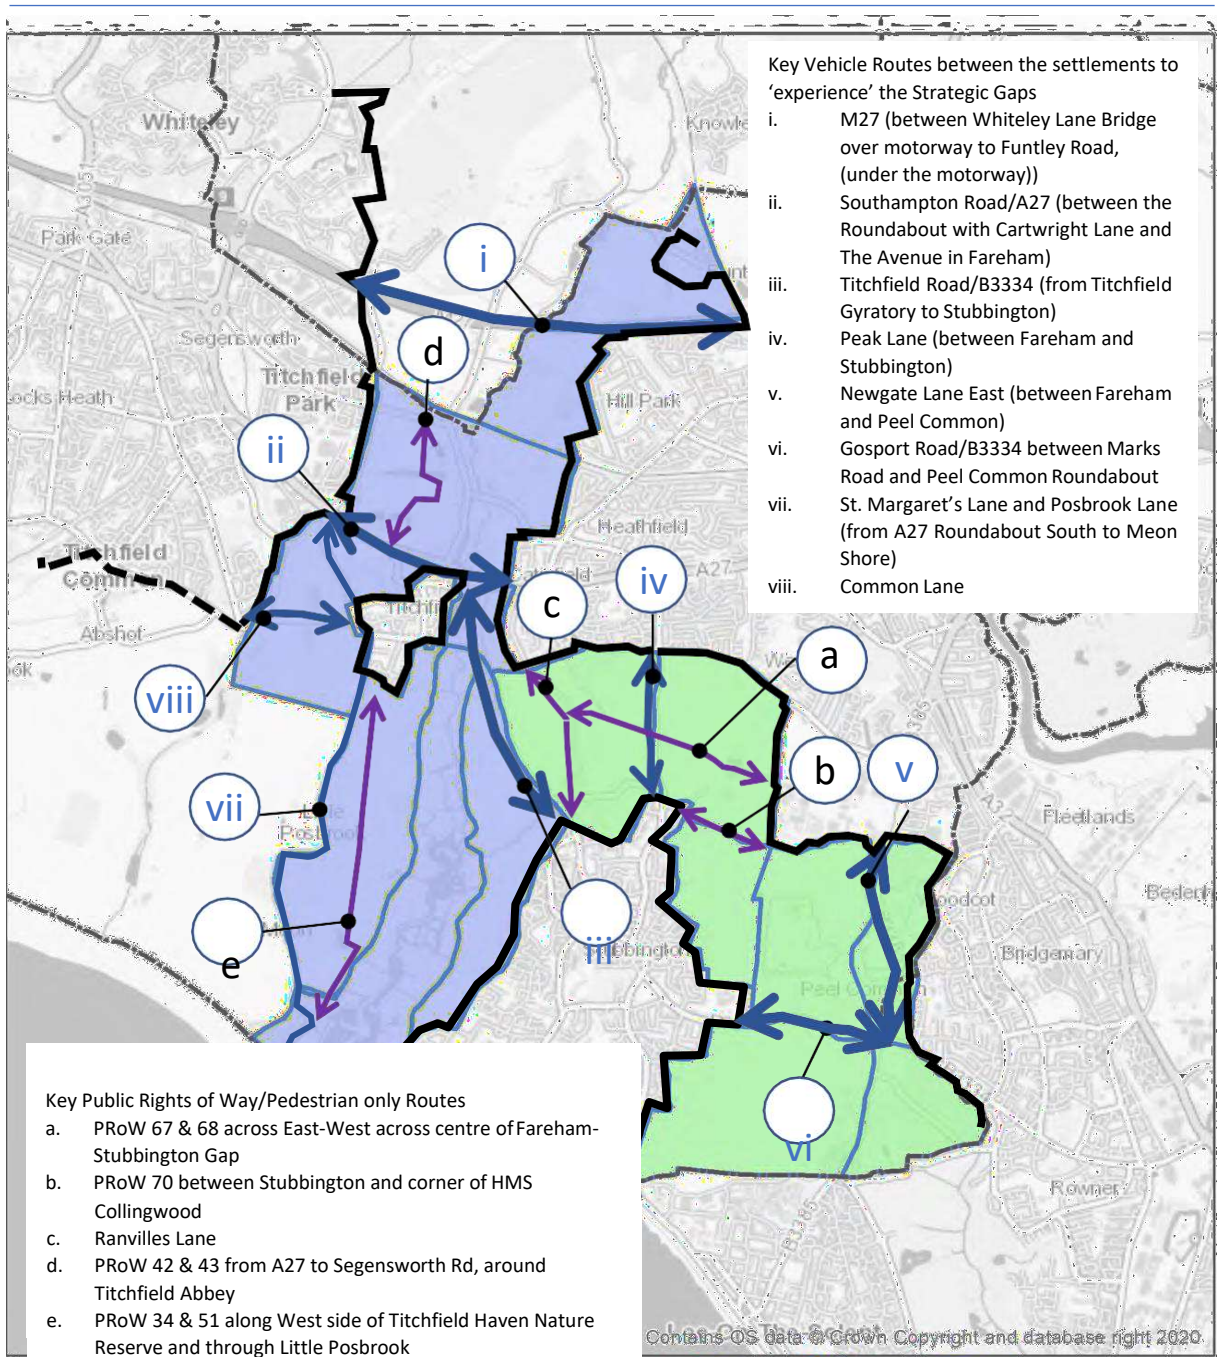

Figure 4.2. Plan showing key experiential routes through the Strategic Gaps

Chapter 4: Strategic Gaps Overview

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

Key features of the Strategic Gap

1. Key Features of the Fareham-Stubbington Strategic Gap are:

- Open, predominantly arable farmland and horticulture with some glasshouses, a weak hedgerow structure and few trees
- The settlement edges are for the most part well screened by mature tree canopy, but there is some minor visual intrusion from Fareham, Stubbington and HMS Collingwood
- a few scattered farmsteads/horticultural holdings and a mosaic of small fragments of open farmland and horse-grazed pastures sandwiched between:
- large-scale non-agricultural uses of Business and airfield development at Solent Airport in Daedalus to the South and the utilities of:
 - Peel Common Water Treatment Works enclosed from views by an earth bund and mature tree belt
 - Peel Common Solar Farm
- Construction site of Stubbington-bypass, which will provide an East-West and South route through the Gap that has not previously existed
- Urban fringe character of Peel Common residential area

- Recently completed highway works to Newgate Lane, and Peel Common Roundabout, with associated noise attenuation fencing and bus and cycle infrastructure.

Potential Development Impact

2. As stated earlier, the potential impact of development is high within the Fareham-Stubbington Gap, with the potential to develop large tracts of farmland.
3. It is too early to determine the full impact that Stubbington Bypass will have on the landscape character and development pressures of the Gap. As the Bypass is currently under construction and its alignment marked out, it is possible to see how it might affect the sense of separation between Fareham and Stubbington. In some respects it strengthens the sense of separation because it will be a physical demarcation and partial interruption to cross-movement. It also becomes another key route from which to experience the Gap, but it will bring more noise and activity and may exert a suburbanising influence on the landscape. It is strongly recommended that once the construction works have been completed and the road is fully operational a review of the Landscape Character Assessment for LCA 7: Fareham-Stubbington Gap is carried out.

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

Other Environmental and Planning Designations

4. Unlike the Meon Gap, the Fareham-Stubbington Gap does not have a significant number of environmental designations. The only are two areas of Ancient/Semi-Ancient Woodland: Oxleys Coppice, which is also a SINC (Southern edge of Fareham) and Tips Copse, (East edge of Stubbington, North of Crofton Secondary School). The Strategic Gap designation would be the key designation in this area.

Summary findings of the Study Area Assessments:

5. The descriptions run from West to East and then South. More detailed analysis of each area can be found in Appendix 5.

Area East of Titchfield Road and West of Peak Lane (Strategic Gap Study Area 7a):

6. Due to the significant number of viewpoints from long stretches of the key roads that run through the area: Titchfield Road and Peak Lane (and from the Stubbington Bypass, when it is completed) and from the numerous footpaths that run through the middle of this area, it is strongly recommended that the vast majority of this section of Strategic Gap remains intact. It provides a useful informal recreational resource, within a distinctive

landscape character, that is of good quality, where residents can walk in relative tranquility away from roads and enjoy long and varied views. Due to its moderate to large gap dimensions (800-1.2km) it has been able to retain a relatively high level of tranquility and dark nights skies, compared to other parts of Fareham and it would be a significant loss to local residents if they were not able to continue to enjoy this informal recreational resource.

7. For this section of the Gap, this analysis agrees with the summary findings of LDA in Chapter 3 of the Fareham Borough Landscape Character Assessment 2017 - *“The landscape performs a highly effective role in providing a 'sense' of separation and the experience of moving between one settlement and the other.....Edges of Fareham and Stubbington are clearly defined by strong boundary vegetation and there is a clear distinction between 'town and country' there is a strong sense of leaving one urban area and moving through open countryside before entering another. Scale of the gap allows the time to appreciate sense of being in open countryside. Being able to see far across the gap and identify the edges, also strengthens the sense of separation.”* (page 41) .

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

8. However there exists the potential to make modifications to the settlement boundary of North Stubbington: to extend the boundary to run along Oakcroft Lane, as the isolated field that sits aside Crofton Cemetery, does not protrude into the landscape beyond the current Northern and Western edges of Stubbington. Largely sitting behind a mature line of Poplars also helps this isolated field absorb some development (subject to detail design), without risking the integrity of the Gap, as a whole. Retention and enhancement of GI will be required, within the site. **Development of a GI Framework or Strategy is recommended** for the site in its context.

Area East of Peak Lane and West of HMS Collingwood (Strategic Gap Study Area 7b):

9. Whilst this area comes under the same Landscape Character Area as Strategic Gap Study Area 7a, the terrain is much flatter, and the blocks of vegetation are less varied. Vegetation around the main large field screens the field from view from many vantage points. There are much fewer opportunities to see across this land, unless close to the field gates. From within the main field there are more visual detractors in the form of MOD buildings in HMS Collingwood, a low-rise tower in the

adjacent estate off Longfield Drive and a long view to the Fareham Borough Council Office Tower Block. Subject to detailed design, scale and functions, it is considered possible for the main field to absorb some development without a significant impact on visual quality of the Strategic Gap. If managed appropriately, development could have beneficial effect on the GI network (recreational and environmental) that exists around the periphery of the field subject to appropriate attention being paid to GI provision and design. Therefore a change in Strategic Gap boundary could potentially be accommodated without undermining the principal purpose of the gap to prevent coalescence of settlements. However, such adjustment would be driven by more detailed testing of development forms, scale, landscape and GI interventions. Such work would also need to consider the potential reduction of tranquility and dark night skies ratings in the area. **Establishing a GI Framework or Strategy is recommended.**

10. The experience of driving along Peak Lane is currently pleasant and it is recommended that with any potential boundary change that a GI zone of around 150m width between Peak Lane and any development, be established. This is to maintain the experience of

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

‘leaving’ Fareham driving through Countryside and arriving at the separate settlement of Stubbington.

The Open Coastal Plain between Stubbington and the Peel Common Water Treatment Works, (Strategic Gap Study Area 8a)

11. There are two key PRoW across this Landscape, that connect Stubbington and Fareham through a narrow gap of around 600m. The paths cross a dramatic flat landscape which has strong linear North-South views between Daedalus and Newgate Lane Farm, framed by blocks of woodland vegetation, on the boundary bund around the Peel Common Water Treatment Works and the east side of Stubbington, including Tips Copse Ancient Woodland. These views should be valued and retained, providing a great sense of space in an otherwise narrow corridor.
12. There is very little opportunity to absorb development in this corridor. Visual intrusion of buildings would be unwelcome, as it would reduce tranquility. Some of the tree belts are thin, and a substantial belt of woodland would strengthen the landscape structure and provide an attractive edge to frame North South Views and views towards the eastern edge of Stubbington. Advance planting of this

belt would be advised. A **GI Framework or Strategy is recommended.**

Section of Fareham-Stubbington that provides a three-way Gap between Stubbington, Fareham and Gosport (Bridgemary) (Strategic Gap Study Area 8b)

13. There are no proposed changes to the Strategic Gap in this area. The strong screening around the Peel Common Water Treatment works provides an effective visual and physical barrier between all three settlements.
14. There is pressure for development along Gosport Road (A334) between the Southern edge of Stubbington and Peel Common. It is strongly recommended that development pressure is resisted in this area as it would risk visual and physical coalescence between Stubbington and Gosport.

Newgate Lane and Peel Common Area (Strategic Gap Study Area 8c)

15. Despite the proximity of Fareham and Gosport in the north part, the gap is currently still effective in providing a ‘sense of separation’, but it is at risk. Substantial vegetation around boundaries currently prevents visual coalescence. There is a defined boundary along settlement edges and a gap of sufficient scale and

Chapter 4: Strategic Gaps

SG 2: The Fareham-Stubbington Gap

and coherence of character. Whilst the recently completed Newgate Lane South road development does not alter the experience of entering the urban area of Gosport beyond the Peel Common Roundabout, it does reduce tranquility and bring more built features (such as noise attenuation barriers) into this part of the gap. Further development within the gap in addition to the road scheme, together with existing urban fringe activity, is likely to cause visual, or even physical, coalescence of settlements on either side of the new road corridor.

16. Even with the development of Newgate Lane South, the previous analysis carried out by LDA and described in Chapter 3 of the Fareham Borough Landscape Character Assessment 2017, is still relevant: *“A cohesive area of undeveloped landscape which performs an important role in respect of the primary purposes of the Strategic Gap, i.e. in defining the edges, separate identity and settings of Fareham and Gosport, preventing their coalescence. Even minor encroachment beyond existing settlement boundaries could have an adverse effect on these functions and the overall integrity of the landscape and Strategic Gap.”* (page 43)

17. It is recommended that a **GI Framework or Strategy for the Strategic Gap Study Area 8c** would be beneficial to enhance the GI value of the current gap and potentially help determine an appropriate GI framework for moderately scaled development. The planting associated with the Newgate Lane Highway works will exert a stronger woodland/hedgerow edge as it establishes, and this should be factored into a GI Strategy. The GI Strategy or Framework should reassess the Open Coastal Plain Landscape Type: with a view to creating stronger GI structure throughout, but highlighting and retaining long North-South views, and largely undeveloped views eastward from old Newgate Lane, to retain a sense of space and ‘big skies’.

Daedalus and Lee-on-the-Solent Golf Course (Strategic Gap Study Area 9a and 9b)

18. This study does not suggest alterations to the Strategic Gap around the Airfield and Lee-on-the-Solent Golf Course. Current development within the Airfield is highly visible, but in keeping with current land uses/character of the area. Some further development could be accommodated in the Airfield but would depend on where within the site; scale and; what mitigation is delivered.

Chapter 5: Summary Conclusions and Recommendations

Figure 5.1. Photograph of Titchfield Abbey, from the new Country Park adjacent to A27.
Photograph: Charlotte Webb June 2020

Chapter 5: Summary Conclusions and Recommendations

-
1. The resultant analysis and site surveys of all Fareham Borough's Landscape Character Areas recommends that:
 - The six proposed ASLQ put forward for designation in the Fareham Local Plan Supplement (Reg 18 consultation document, Jan-March 2020), can be considered as 'valued landscapes' as they scored highly against the assessment criteria and therefore should be identified for ASLQ designation in the Fareham Local Plan 2037, with some modifications made to boundaries, to bring them into line with the current Fareham Borough Landscape Character Assessment 2017, but also;
 - Through this process, two further landscape character areas in Fareham were identified as having equivalently 'valued landscape' characteristics and so it is recommended that Chilling-Brownwich Coastal Plain and parts of the Cams to Portchester Coast should also be designated.
 - Conservation Areas where they sit in or adjacent to a proposed ASLQ should be included as part of the ASLQ because of their mutually supportive relationship.
 2. It is considered that there is a clear difference between the ASLQ designation, where the landscape value is the key reason for designation, in the context of Strategic Gaps, landscape character and its quality are a 'part of the picture' sitting amongst a broader range of criteria.
 3. The resultant analysis and site surveys of the two Strategic Gaps, conclude that the Meon Strategic Gap:
 - is proposed for continued designation, having both strong sub-regional justification for its designation, and a clear and continued role in preventing settlement coalescence, that could result from pressure for expansion of the Western Parishes; North and West Fareham, and from pressure for the expansion of Stubbington with;
 - one moderate amendment proposed to the North Eastern corner of the Meon Gap; that is an extension to the Gap around Funtley to prevent Funtley from coalescing with North and West Fareham.
 4. The Fareham-Stubbington Strategic Gap is proposed for continued designation, also having strong sub-regional justification for its designation, with an important role in preventing settlement coalescence from continued and heavy pressure for Southern expansion of Fareham and Northern and Eastern expansion of Stubbington, but it is considered that there may be potential for some development to be accommodated within the landscape, without compromising its Strategic Gap function.

Chapter 5: Summary Conclusions and Recommendations

5. Possible adjustments to the Fareham-Stubbington Strategic Gap could be considered in the following locations:
 - An area to the south of Fareham, and west of HMS Collingwood, as some development in this area could be visually absorbed into the Gap without compromising the Gap function.
 - An area to the north west of Stubbington, south of Oakcroft Lane and east of Ranvilles Lane.
6. It also noted that the Newgate Lane Area (Newgate Lane West and East from Fareham to Peel Common Roundabout) has undergone a significant amount of change in the recent past.
7. In order to develop appropriate Green Infrastructure mitigation and enhancement associated with the areas of recent and future change described above, in the Fareham-Stubbington Gap, Green Infrastructure Frameworks or Strategies are required for each area.

1. INTRODUCTION	2
2. BACKGROUND	3
3. SUMMARY	4

1. INTRODUCTION

Qualifications and Experience

- 1.1. My name is James Atkin, Director (Landscape) in the Birmingham Office of the Pegasus Group and a Chartered Member of the Landscape Institute (2005). I have over 19 years experience specialising in the application of LVIA across a range of sectors including power, highways, rail, housing, waste, land reclamation and restoration, mineral extraction, commercial developments and renewable energy.
- 1.2. Since joining the Pegasus Group I have completed detailed LVIA's for sites across the UK, including schemes for residential, mixed use, care home, solar and commercial development. As an inherent part of this work I apply an iterative process of LVIA to inform masterplanning principles that respond appropriately to landscape and visual constraints and opportunities.

Terms of Reference

- 1.3. This evidence is written on behalf of Fareham Land LP and Bargate Homes Ltd (the appellants) and relates to an appeal for non-determination by Fareham Borough Council in respect of two outline applications for residential development, both on land to the east of Newgate Lane. This evidence sets out an overview of relevant landscape and visual matters.
- 1.4. Principles and good practice for undertaking landscape and visual impact assessment (LVIA) and/or applying the principles of LVIA are set out in the Landscape Institute (LI) and the Institute of Environmental Management (IEMA) Guidelines for Landscape and Visual Impact Assessment, Third Edition (2013)¹ (GLVIA3). The concepts and procedures set out in this guidance have been adopted where appropriate.
- 1.5. The evidence included in this supporting statement for this appeal (LPA reference: P/18/1118/OA - AND - P/19/0460/OA) is true and has been prepared in accordance with the guidance of my professional institution. I confirm that the opinions expressed are my true and professional opinions.

¹ Landscape Institute and Institute of Environmental Management and Assessment, Guidelines for Landscape and Visual Impact Assessment 3rd Edition (April, 2013)

2. BACKGROUND

- 2.1. The appeal sites extend to ca. 10 hectares (ha) of agricultural land, situated close to the urban edge of Fareham. The appeal sites are bounded by Newgate Lane to the west, Woodcote Lane to the south and Newgate Lane East to the east.
- 2.2. The wider landscape context of the appeal sites includes the low-lying ground of the coastal plain and the adjacent urban environments of Fareham, Gosport (with Woodcot and Bridgemary). The settlement area of Stubbington forms the western extent of the Strategic Gap which extends across the coastal plain between the local settlement areas. Separation is most pronounced across the arable areas between Fareham/Peel Common and Stubbington.
- 2.3. The applications were submitted with a detailed LVIA which set out a comprehensive baseline and robust assessment of predicted impacts. These included details as to how landscape and visual matters have influenced the design of the masterplan, with mitigation measures consequently forming an inherent part of the proposals.
- 2.4. The reasons for refusal raises three main issues in respect of landscape and visual matters, stating that:
 - b) The proposed development fails to respond positively to and be respectful of the key characteristics of the area and would be harmful to the character and appearance of the countryside;
 - c) The provision of development in this location would significantly affect the integrity of the strategic gap and the physical and visual separation of settlements;
 - d) The application site is not sustainably located adjacent to, well related to or well-integrated with the existing urban settlement boundaries;
- 2.5. This evidence considers these issues against various information, including the submitted LVIA's, consultation responses, report to committee and other relevant baseline and evidence base documents related to landscape and visual matters.

3. SUMMARY

- 3.1. The submitted LVIAs address the key characteristics of the appeal sites and their context. The submitted LVIAs also set out an assessment of the impact and approach to mitigation. This process also enables judgements to be drawn in respect of the context of the appeal sites in relation to the existing urban settlement edges/boundaries.
- 3.2. With reference to this material, and supported by my own additional analysis where necessary, I conclude that the appeal schemes will not be harmful to the character and appearance of the countryside, will not significantly affect the integrity of the Strategic Gap and will relate well to the existing patterns of settlement.
- 3.3. This is on the basis the relevant key landscape characteristics of the area have been considered through the process of LVIA, consequently informing the analysis of constraints and opportunities, and ultimately the landscape strategy for the mitigation. This forms an integrated part of the two masterplans for northern and southern schemes.
- 3.4. Consequently, I consider the approach taken to the design of the respective masterplans to have adopted a positive approach in landscape and visual terms.
- 3.5. The loss of the agricultural enclosures and replacement of these areas with residential development is largely the main cause of impact, however this is balanced by the response to the grain and pattern of the landscape and its scale, as well as the response to the characteristics of the landscape, several of which are defined as 'essential' by the published guidance. Where these are referenced, mitigation adopts an approach of retention and/or enhancement.
- 3.6. I consider that the subsequent residual impacts of the appeal schemes will be acceptable in landscape and visual terms.
- 3.7. In terms of the Fareham to Stubbington gap, I consider the appeal sites are well placed to accommodate development without undue consequences or impacts on the role and function of the Strategic Gap. This is on the basis that:
 - In relation to distances, the appeal schemes will reduce the gap between Bridgemy and Stubbington physically from ca. 1.6km to ca. 1.1km which remains a considerable distance and well within the thresholds of the 'rule of thumb' appropriate distances set out in the FBC study;

- In terms of visibility, the appeal schemes will be physically and visually well contained – they sit within the strong green infrastructure framework that is evident in the form of blocks of woodland and tree lined hedges which screen or partially screen views – furthermore they will not be visible across the Strategic Gap from Stubbington;
- Existing screening is present immediately adjacent to the appeal sites in terms of the woodland around the waste water treatment works, along Newgate Lane and within the emerging framework of vegetation along Newgate Lane East that will continue to establish and increasingly provide a robust visual screen from the east;
- The surrounding context and urbanising influences, including the settlement area of Peel Common which reduce the degree of change;
- The opportunity to contribute to, and maintain, a strong green infrastructure network that complements both the strategic gap and the areas of settlement, in the form of the landscape d areas and landscape buffers along the eastern and western edges of the appeal sites which will reinforce and connect the linear routes which cross broadly north to south through this area; and
- In connection with the green infrastructure provision, the ability to incorporate substantial mitigation that will successfully avoid or minimise landscape and visual effects.

3.8. I also note that, notwithstanding differences in the technical approaches, the Pegasus Group and FBC Strategic Gap studies both independently acknowledge that the Strategic Gap can accommodate some form of growth and development within it. Both also recognise the need for additional, more detailed assessment on a site/project basis.

3.9. In respect of the conclusions of the FBC Strategic Gap study (where these note the relatively poor state of the gap at this point), I would think a logical and appropriate conclusion would be to amend the boundary to omit this part of the landscape from the Strategic Gap, creating capacity for development to come forward with a strong framework of green infrastructure and mitigation. This would place an emphasis on the importance of the core areas that are located further west, between Fareham and Stubbington where the Strategic Gap clearly delivers its role and function in full.

3.10. Finally, the reason for refusal suggests that the appeal schemes will not relate to, or integrate with, the existing urban settlement boundaries. However, my evidence demonstrates that the appeal sites are well related to Peel Common, being located to the east of Newgate Lane, physical contained by the alignment of Newgate Lane East and situated immediately adjacent to the existing residential dwellings off Woodcote

Lane and directly opposite the mix of dwellings and urban influences along the northern section of Newgate Lane.

- 3.11. With existing and proposed green infrastructure in place, the appeal schemes will consolidate the pattern of Peel Common within a clearly defined limit. As such I consider that the appeal schemes will integrate well, and in a positive way, with the settlement area at Peel Common.
- 3.12. Furthermore, there are some existing physical connections between Peel Common and Bridgemarky. With the appeal schemes in place, the consolidated pattern of Peel Common would continue to blend with the urban edge of Gosport and Bridgemarky, focused along the green route into Bridgemarky (along Woodcote Lane) and focussed on the large amenity open space of Brookers Field Recreation Ground.
- 3.13. If the previous emerging allocation of HA2 were to come forward, this broader area of development would reinforce the connection between Peel Common (including the appeal sites) and the edge of Fareham. In each eventuality, I consider there to be a good connection between the appeal schemes and the existing areas of the settlement.
- 3.14. In all respects, considering Peel Common in itself, connections to Gosport, and with the potential for HA2 to come forward, development in this area will maintain a robust gap between Fareham (aligned with the western edge of Peel Common) and Stubbington.
- 3.15. Overall, in the context of these limited issues, and with the appeal schemes in place, landscape and visual issues are not sufficient to support a prospective reason for refusal.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND ADJACENT TO 75 HOLLY HILL LANE, SARISBURY

**ON BEHALF OF
BARGATE HOMES**

APPENDICES:

- 1.0 Landscape Response prepared by Terra Firma Consultancy including Opportunities and Constraints Plan**
-

1.0 Introduction

- 1.1** The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in Land adjacent to 75 Holly Hill Lane in Sarisbury.
- 1.2** The site is irregular in shape and extends to approximately 2.6 hectares. It is accessed via Holly Hill Lane, which adjoins the south-western boundary of the site, and the majority of the site lies to the east (rear) of the properties which front Holly Hill Lane. The southern boundary of the site adjoins Holly Hill Woodland Park and the eastern boundary extends as far as the boundaries of the properties on Mulberry Lane (accessed from Barnes Lane). The site has previously been promoted through Fareham Borough Council's (FBC) Strategic Housing and Employment Land Availability Assessment (SHELAA) – Site ID 1005.
- 1.3** For the reasons set out in these representations, our client is strongly of the view that this site should be allocated for residential development in the Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan). It is estimated that the site could accommodate approximately 30 dwellings. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).
- 1.4** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.5** The following representations utilise the same format as the Council's response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.4 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.5 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in

"Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

- 2.6 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.
- 2.7 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

-
- 2.8 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.
- 2.9 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.10 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.11 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.12 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's

announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

2.13 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.

2.14 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.

2.15 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.16 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require

that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

- 2.17 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.
- 2.18 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.19 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.20 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies

that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be “ratified” by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.21 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be “circa 10,750 dwellings”. At paragraph 4.5, Fareham’s “immediate neighbours” are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is “likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...”. The Council’s ‘Duty to Co-operate Statement of Compliance’ identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: “...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution.” It is not clear how this “general contribution” has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport’s unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.22 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the “South East

Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

- 2.23 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

- 2.24 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.25 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.26 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.27 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.28 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and

Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.29 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of our client's interest at Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.30 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and

Compulsory Purchase Act 2004).

2.31 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury for approximately 30 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;

- Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31; and
- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

3.15 Paragraph 3.9 of the PLP states:

"Recent planning appeal decisions in the Borough have highlighted the need to consider the designation of valued landscapes as part of the Local Plan. Previous Local Plans have included the demarcation of 'Areas of Special Landscape Quality' in the Borough which were used to help shape planning strategy and decisions on planning applications. These areas were the Meon, Hamble and Hook valleys, Portsdown Hill and the Forest of Bere. Both the Landscape Assessment (2017), and the more recent 'Technical Review of Areas of Special Landscape Quality and the Strategic Gaps' (2020) still recognise the intrinsic character and distinctiveness of these relatively undeveloped areas of the Borough and so their locations have been used to shape the development strategy. There is a presumption against major development in these areas, unless it can be demonstrated through a landscape assessment that the quality

and distinctiveness of the landscape character can be conserved. For these reasons there remain no development allocations in these areas." (our underlining)

Our client objects to the identification of the Areas of Special Landscape Quality (ASLQ) in the borough, and particularly to the presumption against development in ASLQ and against allocation any sites for development within these areas. This is discussed in detail in the section relating to Policy DS3: Landscape below.

Policy DS1: Development in the Countryside

- 3.16** For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".
- 3.17** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.18** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

- 3.19** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.20** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non-designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.21** However, if it is held that Policy DS3 should not be deleted, the following comments apply.
- 3.22** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.23** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA3 is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.24** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and

several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.25 Having specific regard to our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury, the site has previously been promoted through FBC's SHELAA dated September 2020 (Site ID 1005) and was discounted solely because it is located within an ASLQ. Consequently, our client has appointed Terra Firma Consultancy to review this matter and a Landscape Response is attached to these representations at Appendix 1, together with an Opportunities and Constraints Plan for the site.

3.26 In summary, it is considered that if Policy DS3 is not deleted, it should better allow for flexibility when it can be proven that parcels of land within the ASLQ, when taken in isolation and studied in depth, can accommodate sensitive small-scale development. It is considered that our client's site has capacity for development without detriment to the wider Landscape Character Area and would also create opportunities for landscape enhancement and protection. Further site-specific details for Land adjacent to 75 Holly Hill Lane are provided at the end of this section.

Policy HP1: New Residential Development

3.27 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.28 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.29 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.30 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.31 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.32 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.33 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.34 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.35 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.36 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.37 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.38 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.39 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.40 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.41 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.42 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.43 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.44** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.45** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Allocation of Land adjacent to 75 Holly Hill Lane, Sarisbury

- 3.46** Our client's land interest adjacent to 75 Holly Hill Lane in Sarisbury has previously been promoted through the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA) dated September 2020. The site is discounted solely for the reason that it is located within a SLQA and our client's objection to this is set out above.
- 3.47** Otherwise, the SHELAA confirms that the principle of highway access to the site is acceptable, subject to allowing for the turning of refuse vehicles within the design of the access road, which could be addressed. It is confirmed that there are no known conservation constraints or noise/air quality constraints, and that the site is not within an identified area of archaeological potential. The SHELAA suggests that there is the potential for moderate to high quality

habitats and ecological interest within the woodland areas, but this could be assessed and appropriately mitigated.

- 3.48** In terms of its accessibility and sustainability, the SHELAA confirms that the site is located within 800m of accessible green space or play space, within 800m of a community/leisure facility, within 1,200m of a Primary School and within 1,600m of a Secondary School. It is also noted that the site is located 0.5 miles (by road) to the south of the A27 and its associated local facilities and services. There are also bus routes that run along Barnes Lane to the east, and the A27.
- 3.49** The SHELAA concludes that the site is both available and achievable but that it is not suitable due to its location within an ASLQ.
- 3.50** The Landscape Response prepared by Terra Firma Consultancy, enclosed at Appendix A, includes an Opportunities and Constraints Plan for the site which identifies an indicative developable area extending to approximately 0.93 hectares. On the basis of a development density of 30-35 dph, this would equate to the provision of between 28-33 dwellings on the site.
- 3.51** On the basis of the above, the Council is encouraged to allocate Land adjacent to 75 Holly Hill Lane in Sarisbury for approximately 30 dwellings. This site is controlled by a highly reputable local housing developer – Bargate Homes – who has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five-year housing land supply.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDIX 1

Landscape Response prepared by Terra Firma Consultancy and associated Opportunities and Constrains Plan

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND WEST OF OLD STREET, STUBBINGTON

ON BEHALF OF BARGATE HOMES

TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED) PLANNING AND COMPULSORY PURCHASE ACT 2004

Prepared by: Jeremy Gardiner & Trevor Moody

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our client, Bargate Homes. These representations are consistent with and build upon the previous representations submitted to the Council by WYG in relation to this site in response to the Fareham Draft Local Plan 2036 Supplement in February 2020, and we ask that those previous representations are also considered alongside this submission because their content is not repeated here.
- 1.2** Our client has an interest in **land to the west of Old Street, Stubbington** which was previously the subject of development proposals for up to 160 (reduced to 150) new homes (planning application P/17/1451/OA refused on 23 March 2018, and appeal ref. APP/A1720/W/18/3200409 dismissed on 22 January 2019 refer). Since this appeal decision, and in the light of the Inspector's reasoning, extensive belts of strategic woodland planting have been undertaken at the site which will have the effect of visually detaching part of the site from the Meon Valley and creating a more modest sustainably located site for about 75 new homes on the edge of the urban area of Stubbington. Our client is strongly of the view that these material changes of circumstances at the site, coupled with the need for the Council to meet its local housing target of a minimum of 514 homes per annum, justify the allocation of the site for about 75 dwellings in the local plan.
- 1.3** Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.
- 1.4** The following representations utilise the same format as the Council's response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 – 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Remove Strategic Gap designation from Land West of Old Street, Stubbington.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 **The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.**

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local

housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national

guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature

and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

- 2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

- 2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed

need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham

to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such it's preparation is premature.

2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities

for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading (as confirmed by the Government's announcement on 16 December 2020 that the Council's annual housing target is to remain at 514 homes per annum).

3. It is not Effective:

- 2.28 The Council has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.29 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.30 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be

included as additional housing to the minimum 514 hpa.

3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
 4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.31 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.32 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.33 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of Land West of Old Street, Stubbington for about 75 dwellings.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8** This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9** The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10** The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.
- 3.11** The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.
- 3.12** Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – the spatial extent of 'landscapes' should be defined here to avoid ambiguity. While the landscape as a whole could be enhanced by carefully designed development proposals, the principle of landscape change within the site itself should be established. If this requirement to 'conserve and enhance landscapes' is applied to the landscape features and character of a potential development site, then this requirement is excessive and unachievable once the landscape 'change' from an undeveloped site to a developed site is taken into account. Either the spatial extent of 'landscapes' should be defined or the requirement to 'enhance landscapes' be removed from the policy.

3.16 Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.17 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.18 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS2: Development in Strategic Gaps

3.19 Under the heading 'Why we need this policy', Paragraph 3.43 of the Publication Local Plan states that "Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, defining settlement character and providing green infrastructure opportunities". The introduction of 'settlement character' into the policy wording is not consistent with the evidence base which confirms at paragraph 2 in Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps that the "primary purpose of identifying Strategic Gaps is to prevent the coalescence of separate settlements and help maintain distinct community identities. Strategic Gaps do not necessarily have intrinsic landscape value but are important in maintaining the settlement pattern, protecting settlement identity and providing green infrastructure opportunities".

3.20 Strategic Policy DS2: Development in Strategic Gaps should only apply to land which provides a spatial function to maintain separation of settlements and define settlement pattern rather than defining settlement character. Land west of Old Street, Stubbington does not contribute to the spatial separation of settlements, therefore Strategic Policy DS2 should not be applied to this land.

3.21 This view is supported by the Inspector for the appeal relating to Land west of Old Street, Stubbington APP/A1720/W/18/3200409 who stated that:

"The Meon Gap lies between Fareham/ Stubbington and the Western Wards/Whiteley. Policy CS22 requires the integrity of the gap to be maintained and the physical and visual separation of settlements to be respected. In terms of separation of settlements there is no dispute that there would be no diminution either in physical or visual terms if the development were to go ahead. The policy indicates that the gap boundaries will be reviewed to ensure that no more land than necessary is included in order to maintain gap function". (our underlining)

3.22 The Inspector goes on to state:

"It should be remembered that gap policy is a spatial tool. The Council referred to the role of the gap in maintaining the character or setting of Stubbington. This is considered in the 2017 LCA where the strategic gap designation is reviewed. However, the document makes clear that its purpose is to consider what role the landscape plays within the strategic gaps. It is not intended to examine the designation criteria, or the broad areas identified. This is important to note because it is landscape rather than spatial considerations that are key to settlement character and setting. The character and setting of Stubbington is not pertinent to gap designation or function in policy CS22".

3.23 The Inspector concluded:

"I appreciate that a review of gap boundaries was undertaken in 2012 and that no changes were recommended in relation to the land immediately adjacent to Stubbington. However, for the reasons I have given I do not consider that the proposed development of the appeal site would adversely affect the integrity of the Meon Gap". (our underlining)

3.24 For this reason, Strategic Policy DS2 should not apply to Land west of Old Street, Stubbington, because it has been confirmed that this land does not contribute to the function of the Strategic Gap. The Meon Valley is protected by many environmental designations which prevent development into this area from the Fareham side of the valley. The designated valley floor of the Meon Valley maintains separation of settlements to an extent that an adequate gap is maintained without the inclusion of Land west of Old Street, Stubbington within the Strategic Gap. Fareham Policy CS: 22: Strategic Gaps, states that "In

defining the extent of a gap, no more land than is necessary to prevent the coalescence of settlements should be included having regard to maintaining their physical and visual separation." It is therefore unnecessary for Strategic Policy DS2 to apply Land west of Old Street, Stubbington.

3.25 At paragraph 7 of Chapter 4 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps states that "Where it is considered that there is capacity to absorb more development within the Fareham-Stubbington Strategic Gap, GI mitigation will be required, to a greater or lesser extent depending on the scale and nature of any development". Again, at paragraph 11 of the chapter 4 summary the Technical Review states "The ability to absorb development into the landscape exists, without compromising the integrity of the Gap function, again on the understanding that the settlement edges must include appropriate Green Infrastructure".

3.26 We submit that there is similar potential within the Meon Gap where the Gap is significantly wider than is the case for the Fareham-Stubbington Strategic Gap. This is particularly the case for Land west of Old Street, Stubbington where advance planting and green infrastructure has already been implemented during 2019 and is establishing well. This will continue to develop and establish a wooded edge to the Meon Valley, providing separation between the Meon Valley and Land west of Old Street, Stubbington. This would reinforce the wooded edge characteristics of settlements which are a feature throughout Fareham Borough, as referred to within the Fareham Borough Gap Review 2012, which states "The edges of new housing are often more visible than older housing stock as a result of garden tree planting, which has helped to screen the older properties adjoining the gap. Properties which back onto woodland have the most robust edge to the gap". In the case of Land west of Old Street, Stubbington the advance planting will create a wooded edge, providing a strong boundary between the site and the Meon Valley (stronger than is the case for the older housing at Hill Head where rear garden boundaries are visible from the Meon Valley) and in so doing it would be more consistent with the character of the settlement edges of the Borough. These green infrastructure enhancements already implemented will bring benefits to the biodiversity of the Meon Valley through enhanced planting and management of the existing farmland.

Policy DS3: Landscape

- 3.27** This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).
- 3.28** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council has created a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**
- 3.29** However, if it is held that Policy DS3 should not be deleted, the following comments apply:
- 3.30** Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.
- 3.31** With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.32** Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". In the event that Policy DS3 is not deleted, this should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

3.33 The local plan evidence at page 50 of the Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not include the requirement for the landscape to be “protected and enhanced”. The requirement to “protect and enhance” the landscape is ambiguous because it is not clear whether it is intended to refer to the landscape of the ASLQ as a whole or if it would apply to a potential development site, within which the requirement to enhance is excessive and unachievable once the landscape ‘change’ from an undeveloped site to a developed site is taken into account. As an example, a development could provide enhancement to the ASLQ landscape through restoration of landscape features or new green infrastructure, but at a site scale the landscape ‘change’ from an undeveloped site to a developed site is unlikely to result in ‘enhancement’.

3.34 Each of the Candidate Areas of Special Landscape Quality have been assessed against the GLVIA3 Box 5.1 criteria, which is an accepted tool to assess landscape value. Land west of Old Street, Stubbington is located within ASLQ 4: Meon Valley and in LLCA 6.1c which is described as within the Landscape Assessment (2017) as:

“On the eastern side of the valley floor, area 6.1c is occupied by similar land uses but with greater variation in field pattern and enclosure. The area comprises a mosaic of smaller-scale pastures bounded by strong hedgerows and trees (particularly within the northern and southern ends of the area), two small-scale enclosed tributary valleys and some larger fields with a more open, denuded character within the central section around the Crofton Manor Equestrian Centre. Together with the adjacent horticultural glasshouses and other commercial operations, this lends a localised fringe character to the landscape but does not detract significantly from the essentially rural characteristics of the overall area”.

3.35 At Figure 3.3 each of the LCA within Fareham is assessed against the GLVIA3 ‘valued landscape’ criteria. Figure 1.3 explains the criteria in more detail, defining a ‘High match’, ‘Good match’, ‘Fair match’ and ‘Partial match’.

3.36 Land west of Old Street, Stubbington is located within LLCA 6.1c which is assessed as a ‘good match’ for all criteria, except ‘Associations’ which is a ‘partial match’. Figure 3.2 defines a ‘Good match’ as *“The area’s scenic quality and condition are both relatively high. It has a generally unspoilt, intact and coherent character with a good level of topographic and visual unity. It has several*

features of note, including natural and cultural designations, and is valued for its recreational opportunities. There are some detracting influences, but these do not generally intrude”.

3.37 We submit that the assessment of LLCA 6.1c has attributed a higher value for the ‘Recreational value’ criteria than can be justified. The southern half of LLCA 6.1c does not have any means of public access so can not be described as being ‘valued for its recreational opportunities’. In the northern half there are infrequent public footpaths and the Crofton Manor Equestrian Centre, neither of which justify the area being defined as ‘valued for its recreational opportunities’. Instead, the term ‘Recreational value is relatively limited’ is a fair reflection of the recreation provision within LLCA 6.1c as a whole, which is the definition applicable to a ‘Partial Match’.

3.38 Landscape quality (condition) is also assessed as a ‘Good Match’, despite the Landscape Assessment (2017) acknowledging its ‘denuded character’ and ‘fringe character’. This character is a feature of LLCA 6.1c, and for this reason the ‘Good Match’ definition as ‘generally unspoilt, intact and coherent character’ is not justifiable. A ‘Fair Match’ is most applicable to LLCA 6.1c, defined as “condition is moderate to good. It is generally intact and coherent with some unspoilt characteristics”.

3.39 The criteria of ‘Conservation interests’ is also assessed as a ‘Good Match’, defined as “It has a number of features of note, including natural and cultural designations”. We submit that ‘Fair Match’ is a more balanced description of LLCA 6.1c, defined as “some features of note which may include natural or cultural designations”.

Policy HP1: New Residential Development

3.40 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.

3.41 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.42 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.43 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.44 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.45 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.46 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and

- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.47 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.48 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.49 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.50 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.51 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.52 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.53 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.54 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the level of need for such units in the Borough – in the absence of this it is not clear whether the level of provision sought by this policy is appropriate.

Policy HP9: Self and Custom Build Homes

3.55 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.56 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). The total number of homes to be delivered by Welborne has reduced considerably over the last five years so this level of requirement should be reviewed as it will not yield the number of self or custom build homes as was anticipated at the time the Welborne Plan was prepared. Strategic allocations

such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.57** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.58** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Proposed housing allocation of Land West of Old Street, Stubbington for about 75 dwellings

- 3.59** In 2019 the appeal Inspector concluded that the development of the site would not adversely affect the integrity of the Meon Valley Strategic Gap. Clearly, therefore, the site should be excluded from the Strategic Gap boundary. The boundaries of the strategic gap were defined in relation to Core Strategy Policy CS22 and they were drawn in the context of the understanding of development needs at that time – an understanding which no longer reflects current reality, that being a very substantial shortfall in housing land supply and the preparation of the PLP by the Council which plans to under-provide housing against the Council's annual housing requirement of 514 homes per annum. Strategic Gap boundaries must be reviewed as part of the process of allocating additional sites for housing in this local plan, and our client's site west of Old Street, Stubbington should be removed from the Strategic Gap.

-
- 3.60** The 2019 appeal Inspector found that the West of Old Street, Stubbington site lay in an area of valued landscape. In this context, the value of the site's landscape has been re-assessed as part of our commentary on Policy DS3 above, against the GLVIA3 'valued landscape' criteria. As described, the site performs no better than as a Fair or Partial match against these criteria. When account is taken of the effect of the structural woodland planting undertaken over time, it is clear that development of the eastern part of the site will only have a minor impact on the wider landscape at most. Lying adjacent to the existing settlement of Stubbington, the introduction of development will appear entirely characteristic within the receiving landscape, while providing a strong, vegetated edge to the countryside in perpetuity. There is no doubt that the character of the developed part of the site would change, but that is no different for any greenfield development. There is no reason to assume that the site's development will be anything other than an attractive extension to Stubbington and one which is entirely congruous with its surroundings. The site's landscape containment has been enhanced through woodland planting which will both screen it from the Meon Valley and enhance its biodiversity.
- 3.61** Moreover, the western part of the site, beyond the woodland planting belt, is being used to provide mitigation habitat for Solent Waders and Brent Geese, offsetting development impact on low use SWBG sites elsewhere in borough. The segregation of this part of the site acknowledges this function and avoids its disturbance.
- 3.62** The West of Old Street site is also sustainably located for access to services and facilities and to sustainable transport modes (walking, cycling and public transport).
- 3.63** For all of these reasons, the Council is encouraged to allocate Land West of Old Street, Stubbington for about 75 dwellings. The site is controlled by a highly reputable local housing developer – Bargate Homes – which has a strong local track record of delivery and is keen to bring it forward for development immediately, such that the site can make an important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing session

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

POLICY HA1 HOUSING ALLOCATION – LAND NORTH AND SOUTH OF GREENAWAY LANE, WARSASH

**ON BEHALF OF
BARGATE HOMES**

4.0 Participation at the Examination Hearing Sessions 32

APPENDICES:

Appendix 1 - Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

1.0 Introduction

1.1 The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash, identified within the emerging Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan).

1.2 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road (our client controls all but the easternmost part of this site); and 3. Land East of Brook Lane and North of Warsash Road. A Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1) is attached at Appendix 1.

1.3 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

1.4 For the reasons set out in these representations, our client strongly supports the allocation of their three land interests as part of Policy HA1. However, their view is that amendments are required to the specific wording of this policy. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).

1.5 Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.

1.6 The following representations utilise the same format as the Council’s response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HA1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B1c Which part of the Policies Map

2.4 Policy HA1 allocation site – Land North and South of Greenaway Lane, Warsash.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard

Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning

Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

- 2.9 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.
- 2.10 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.11 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- "...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.12 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.

- 2.13 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.
- 2.14 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.15 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.16 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.17 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

2.18 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

2.19 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.

2.20 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a

significant matter.

2.21 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.22 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.23 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

2.24 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

2.25 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's

case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.26 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.27 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.28 As stated at B3.1 above, it is unclear whether the PLP has planned to

adequately accommodate unmet need from other authorities.

2.29 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.30 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

2.31 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).

2.32 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum)

between 2026/27 and 2030/31; and

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can

be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.16 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.17 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

3.18 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).

3.19 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**

3.20 However, if it is held that Policy DS3 should not be deleted, the following comments apply.

3.21 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

3.22 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.

3.23 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HA1: Land North and South of Greenaway Lane

3.24 As set out in the Introduction to these representations, our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash. Our client therefore strongly supports Policy HA1 and the identification of their three land interests within this proposed residential allocation.

3.25 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road; and 3. Land East of Brook Lane and North of Warsash Road.

3.26 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

3.27 The outstanding matters relating to the outline planning applications are all close to being resolved, especially now that a solution has been agreed in relation to nitrogen deposition into the Solent. It is therefore anticipated that outline planning permission can be granted for all three sites in the near future. Our client then intends to proceed to detailed planning followed by construction stages in a phased but timely manner, such that all three sites are deliverable and can therefore contribute towards the Council's housing land supply position in the short-term.

3.28 Whilst our client supports Policy HA1 and the allocation of their land interests for residential development in principle, in their view the wording of the site-specific requirements contained within the policy requires some amendments, as explained below.

a) The quantum of housing proposed shall be broadly consistent with the indicative site capacity

3.29 Policy HA1 sets out an indicative yield for the allocation as a whole of 824 dwellings. This is supported and no changes are suggested to this site-specific requirement. Our client's three land interests could provide up to 366 dwellings when combined. This includes up to 100 dwellings on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); approximately 126 dwellings on Land East of Brook Lane and East of Lockwood Road (considering our client does not control the easternmost part of the site so cannot deliver all of the 'up to 157 dwellings' approved at the outline stage); and up to 140 dwellings on Land East of Brook Lane and North of Warsash Road. This represents almost 45% of the indicative yield.

b) Primary highway access should be focused on Brook Lane and Lockwood Road with limited access via Greenaway Lane where necessary, subject to consideration of the impact on the character of Greenaway Lane

3.30 This is not supported, particularly having regard to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane). The wording of this site-specific requirement, including the use of 'limited' and 'where necessary', could be

considered to preclude the provision of a primary vehicular access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane.

- 3.31** The wording of site-specific requirement b) is inconsistent with Figure 4.1 – Policy HA1 Indicative Framework Plan contained with the PLP. Figure 4.1 identifies 'Indicative Principal Vehicular Access' points into the HA1 allocation, which are indicated by purple arrows and includes the identification of a principal access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane, located in the north-west corner of the site. Figure 4.1 also identifies two further principal accesses further east along Greenaway Lane associated with other parts of the HA1 allocation (outside of our client's control).
- 3.32** The wording of site-specific requirement b) is also inconsistent with the Illustrative Masterplan that has been approved by the Council as part of the resolution to grant outline planning permission for Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) under Ref. No. P/19/0402/OA. The approved Illustrative Masterplan includes the provision of a primary vehicular access point from Greenaway Lane, located in the north-west corner of the site (in a similar location to the purple arrow shown on Figure 4.1 of the PLP).
- 3.33** The Committee Report relating to the outline application (dated 16 December 2020), discusses highways matters at paragraphs 8.46 to 8.51. It confirms that from a highway safety perspective, the proposed access from Greenaway Lane is acceptable subject to the imposition of planning conditions (requiring the construction of the access junctions and visibility splays in accordance with the approved plans) and financial contributions towards off-site highways works and a Travel Plan.
- 3.34** The Committee Report confirms that the Highway Authority is satisfied that a safe means of access can be provided and identifies this as *"...a significant material planning consideration."* In terms of the impact on Greenaway Lane as a result of the physical alterations proposed as part of the development, the Committee Report states that these *"...are not of a level that would adversely detract from the character of Greenaway Lane or justify refusal of outline*

planning permission." The Committee Report then makes reference to the decision of the Planning Inspectorate in relation to a previous scheme for the site (Ref. No. APP/A1720/W/19/3225866 dated 11 December 2019), in which the Inspector confirms at paragraph 42 that *"...it would be possible to secure complementary development of the Greenaway Lane frontage within the scope of the reserved matters. Furthermore, highways works, and any additional traffic generated by the development, would affect only a very short section of the lane which lacks the more rural character seen towards the east."* At paragraph 38 of the Inspector's decision, it is concluded that *"...no necessity for an alternative access has been demonstrated on highways grounds."*

3.35 On the above basis, it is considered that the wording of site-specific requirement b) is inappropriate and misleading in potentially precluding the provision of a primary vehicular access to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane. This would be inconsistent with the provisions of Figure 4.1 of the PLP, as well as the Council's recent resolution to grant outline planning permission and conclusions of the previous appeal Inspector.

3.36 Accordingly, the wording of site-specific requirement b) should be amended to state:

"b) Primary highways access should be in accordance with the broad locations of the 'Indicative Principal Vehicular Access' points shown on Figure 4.1."

c) The provision of vehicular highway access between development parcels without prejudice to adjacent land in accordance with Policy D3

3.37 This is supported and no changes are suggested to this site-specific requirement. Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative secondary vehicular link roads' which are identified by dotted grey arrows. Our client agrees with the indicative location of these secondary access points within the Policy HA1 allocation, insofar as they relate to their three land interests, although it should be noted some of these connections may be bought forwards as pedestrian/cycle links only at

the detailed planning application stage to avoid more than 100 units having direct access onto Greenaway Lane.

d) The provision of a continuous north-south Green Infrastructure Corridor between the northern and southern site boundaries that is of an appropriate scale to accommodate public open space, connected foot and cycle paths, natural greenspace and wildlife habitats that link the two badger setts and other species, and east-west wildlife corridors. Highway cross-over points shall be limited in number and width and include wildlife tunnels where necessary, in accordance with the Framework Plan

3.38 The provisions of this site-specific requirement are supported in principle. The outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.39 Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative wildlife link tunnels'. This includes one running north-south on Land East of Brook Lane and North of Warsash Road which is accepted.

3.40 Figure 4.1 also shows two tunnels on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane), both of which are shown running north-south. Whilst it is acknowledged that these tunnels are only shown indicatively on Figure 4.1, it is noted that the southernmost tunnel on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) should in fact be shown running east-west, so that it crosses and runs perpendicular (not parallel to) the 'indicative secondary vehicular link road' in this location, and so that it reflects the line of the green corridor running along the southern boundary of the land parcel. Otherwise, the provision of two tunnels within this part of the allocation is accepted, as is the indicative location and orientation of the northernmost tunnel.

e) The provision of pedestrian and cycle connectivity between adjoining land parcels, as well as providing connectivity with Warsash Road and nearby facilities and services

3.41 This site-specific requirement is supported in principle and the outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.42 It is noted that it is not possible to provide direct connectivity between the land within the HA1 allocation and Warsash Road to the south, as the boundaries do not immediately adjoin the road. However, the outline illustrative masterplans provide pedestrian and cycle linkages to Brook Lane, which in turn leads to Warsash Road and nearby facilities and services.

3.43 In relation to the development proposals for Land East of Brook Lane and North of Warsash Road, it has previously been proposed to provide a pedestrian/cycle link from the southern boundary of the site into the rear car park of The Victory Hall which fronts on to Warsash Road. However, this proposal was not supported by the relevant stakeholders and so has not been carried forward into the illustrative outline masterplan for the site.

f) Building heights should be limited to a maximum of 2.5 storeys, except for buildings which front onto Greenaway Lane and Brook Lane where building heights shall be limited to a maximum of 2 storeys

3.44 The first part of this site-specific requirement is not supported. It is considered that some elements of 3 storey development are appropriate on the allocation site, provided they are located sensitively in the central parts of the site and setback from the site boundaries, allowing them to be appropriately screened and for a buffer to be provided to existing adjoining land uses. This is consistent with the requirement for the efficient use of land as set out in the NPPF.

3.45 The second part of this site-specific requirement for buildings fronting Greenaway Lane and Brook Lane to be limited to a maximum of 2 storeys is accepted.

g) Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does

not impact on living conditions

3.46 This is not supported. The wording of this site-specific requirement suggests that any tree that is subject to a Tree Preservation Order (TPO) cannot be removed. This is not appropriate and is not justified, particularly in light of the vehicular link required through TPO woodland in the southern most portion of the allocation. It is possible that cases may arise where it is necessary to remove a tree even if it is subject to a TPO, for example if the tree is no longer in a good condition or if it poses a health and safety risk in the future.

3.47 The wording of this site-specific requirement should be amended to provide greater flexibility and should state:

"Where possible, existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living conditions, unless agreed in writing with the Local Authority."

h) A Construction Environmental Management Plan to avoid adverse impacts of construction on the Solent designated sites shall be provided

3.48 This is supported and no changes are suggested to this site-specific requirement.

i) Provide future access to the existing underground water and wastewater infrastructure for maintenance and upsizing purposes (included at the request of Southern Water)

3.49 This is supported and no changes are suggested to this site-specific requirement. These measures can be incorporated into the detailed design for the three land parcels controlled by our client to ensure that future access is provided.

j) The site is identified as a mineral safeguarded site (sand and gravel are likely to underlay site). A Minerals Assessment will be required prior to any

development in accordance with the Hampshire Minerals and Waste Plan (2013)

3.50 The justification and evidence in support of this site-specific requirement are unclear. From our review of the information available on Hampshire County Council's (HCC) website, including the HCC Minerals and Waste Plan (adopted 2013) and its associated online Proposals Map, the HCC Minerals and Waste Safeguarding in Hampshire Supplementary Planning Document (adopted February 2016) and the HCC Minerals and Waste Plan Minerals Consultation Area (2015), the land within the Policy HA1 allocation does not appear to be identified as a minerals safeguarded site or as having any potential to be underlain by any mineral resources.

3.51 Furthermore, this matter has not been raised during the outline planning stages for our client's land interests.

3.52 This site-specific requirement is therefore not supported and should be deleted in relation to the Policy HA1 allocation.

k) Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4 and NE3. In addition, the following site-specific infrastructure will be required:

i) Two junior football pitches on-site; and

ii) Off-site improvements to existing sports facilities

3.53 The wording of site-specific requirement k) implies that financial contributions will definitely be required. This wording should be amended to provide more flexibility, in the event that it is agreed between the relevant parties that contributions are not in fact required in relation to one or more of the matters referred to.

3.54 The provision of reasonable financial contributions towards education and transport are accepted in principle where a specific need is identified and at an appropriate level to be agreed between the relevant parties.

3.55 In terms of our client's three land interests, financial contributions towards

education and transport have been agreed in principle through the resolutions to grant outline planning permission, with Section 106 Agreements to secure these being agreed prior to the outline planning permission for each site being issued.

3.56 The reference in site-specific requirement k) to providing contributions towards health is not supported. The Committee Report relating to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) (Ref. No. P/19/0402/OA dated 16 December 2020) discusses this matter with regard to a request from the University Hospital Southampton NHS Foundation Trust for a financial contribution to provide services needed by the occupants of the proposed new dwellings. The Officer's comments at paragraphs 8.64-8.68 of the Committee Report are as follows:

"In considering the requests it is noted that the construction of houses does not itself lead to population growth. Officers consider that the need for housing is a consequence of population growth. Furthermore, there is no account in the representations, it seems, for the potential for the residents of the new development to be moving locally around the Borough or adjoining boroughs such that their residence locally is already accounted for by the current services and funding commissioned by the hospital...

...The length of time between sites being identified, planning permission being granted, and the houses actually being constructed and subsequently occupied is many years. The amount of residential development coming forward in the Borough which has not been reasonably foreseeable for a period of year is therefore very limited.

In January 2019 the NHS launched its new 10-year plan. This plan sets out how the NHS thinks it can overcome the challenges that the NHS faces, such as staff shortages and growing demand for services. This is to be achieved essentially by doing things differently and at no point does it refer to the need for new developments to provide for healthcare services by means of financial contribution such as that requested by the Trust.

For the reasons set out above, Officers do not consider that the contribution

sought by the Trust is necessary to make the development acceptable in planning terms and thus the tests for planning obligations as set out above are not considered to have been met. Furthermore, given the adopted policy framework it is considered that in the absence of the contribution, the application does not fail as a consequence as this issue alone would not justify a reason for refusal, which it must do in order to make the contribution necessary to make the development acceptable in planning terms and meet the test for a planning obligation."

- 3.57** The same conclusions should be made in terms of site-specific requirement k) and the reference to health should therefore be deleted.
- 3.58** Finally, the requirement to provide two junior football pitches on-site is not supported. During the time that developers in the 'Warsash Cluster' have been in discussion with FBC in relation to their land interests, the Council has not been able to justify why on-site provision is needed and appears to have been an aspiration which has not been properly considered. The provision of sports pitches in this location is not appropriate, particularly having regard to the likely noise and traffic implications associated with this use, as well as the presumed need for a complementary pavilion. Site-specific requirement k) i) should therefore be deleted.
- 3.59** In terms of the requirement to provide off-site improvements to existing sports facilities, this is inconsistent with the financial contributions that have been agreed as part of the resolutions to grant outline planning permission for our client's three land interests and this requirement has not been raised by FBC as part of this process. The wording of site-specific requirement k) should therefore be amended to provide more flexibility, so that it cannot be interpreted that an off-site financial contribution towards sports facilities is required in relation to all land parcels within the Policy HA1 allocation (such as our client's three sites), but so that this can be sought in relation to the other parcels of land if justified and agreed between the relevant parties.
- 3.60** Taking into account all of the above, the wording of site-specific requirement k) should be amended to state:

"Infrastructure provision or contributions including but not limited to education and transport may be necessary in line with Policy TIN4 and NE3. In addition, contributions towards off-site improvements to existing sports facilities may be required."

Figure 4.1 – Policy HA1 Indicative Framework Plan

3.61 Figure 4.1 includes the identification of areas referred to as 'open space or development options. Development not on both', which are marked by a light green diagonal hatching. The only areas annotated as such on Figure 4.1 relate to our client's interest at Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) – one is shown at the western end of the site frontage with Greenaway Lane and the other running north-south in the centre of the site.

3.62 These annotations are not necessary and should be deleted as their intended purpose is unclear. The agreed illustrative outline masterplan for this site shows that development will be set back from Greenaway Lane with a linear area of public open shown across the entire site frontage, which in turn connects with further public open space shown running north-south through the centre of the site.

Policy HP1: New Residential Development

3.63 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.64 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.65 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.66 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.67 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.68 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.69 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.70 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.71 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.72 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.73 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.74 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.75 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.76 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.77 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.78 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.79 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.80** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.81** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDIX 1
Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

LAND AT BROOK AVENUE, WARSASH

**ON BEHALF OF
ANTHONY AND LISA KING AND ANDREW AND MELANIE NORRIS**

**TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED)
PLANNING AND COMPULSORY PURCHASE ACT 2004**

Prepared by: Jeremy Gardiner & Trevor Moody

3.0 Specific Proposed Changes **11**

4.0 Participation at the examination hearing sessions **27**

1.0 Introduction

- 1.1** The following representations are by Pegasus Group on behalf of our clients, Anthony and Lisa King, and Andrew and Melanie Norris, who own a potential housing site at Brook Avenue, Warsash. For the reasons set out in these representations, our clients are strongly of the view that their land should be allocated for housing development in the local plan.
- 1.2** These representations are consistent with, and build on, the previous representations which were submitted on behalf of Anthony and Lisa King by WYG in relation to the Fareham Draft Local Plan 2036 Supplement in February, 2020. Those previous representations are re-submitted with this representation for ease of reference.
- 1.3** The following representations utilise the same format as the Council’s response form. Each area of the Publication Local Plan (PLP) which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

	Agent	Client
Title	Mr	Anthony and Lisa
First Name	Jeremy	King and Andrew
Last Name	Gardiner	and Melanie Norris
Job Title	Senior Director	c/o Agent
Organisation	Pegasus Group	
Address	3 West Links Tollgate Chandlers Ford Eastleigh Hampshire

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5 - 1.6, 1.14, 1.17,1.37, 2.12, 3.19 - 3.22, 3.43, 3.46, 3.49 - 3.57, 4.1 - 4.20, Appendices B and C.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HP4, HP5, HP7, DS1, DS2, DS3, E2, E3, NE5, D1.

B1c Which part of the Policies Map

2.4 Former Policy HA2 allocation site Newgate Lane South, Employment allocations Policies E2 and E3.

B2 Do you think the Publication Local Plan is:

Legally compliant - No

Sound - No

Complies with the duty to co-operate - No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020.

The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

2.9 *"Transition*

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need." (our underlining)

2.10 This transitional arrangement applied to Fareham at the time, such that the previous Standard Method (514hpa) continued to apply for plan-making purposes

in the borough in any event, but the Council chose not to follow this national guidance.

- 2.11 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the Consultation draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.
- 2.12 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:
- 2.13 *"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination."* (PPG ID 2a-015-20190220).
- 2.14 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current Standard Method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.
- 2.15 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December, 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the Consultation revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.

- 2.16 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.17 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.18 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

- 2.19 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLB fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared":

- 2.20 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August, 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of

the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

- 2.21 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.
- 2.22 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a significant matter.
- 2.23 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground –

as such it's preparation is premature.

- 2.24 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough, and Fareham East forms part of the Portsmouth Housing Market Area. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.
- 2.25 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PFSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July, 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits.

The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP." (our underlining)

- 2.26 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not Justified:

- 2.27 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not Effective:

- 2.28 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not Consistent with National Policy:

- 2.29 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology annual housing need figure of 514 hpa;
- Its strategy lacks a robust evidential justification;
- It's proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.30 As stated at B3.1 above, it is unclear whether the PLP has planned to adequately accommodate unmet need from other authorities.

2.31 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PFSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the

achievement of sustainable development.

4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
 5. The Council has not undertaken SA of all reasonable alternative housing requirements;
 6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems;
- 2.32 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa, including the allocation of our clients' site at Brook Avenue, Warsash.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.33 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.34 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text:

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the confirmed Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets, including the allocation of our clients' land at Brook Avenue, Warsash.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613,
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum) between 2026/27 and 2030/31,

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

- 3.8** This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.
- 3.9** The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).
- 3.10** The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now - to do otherwise is not justified or effective.
- 3.11** The second part of Policy H1 identifies the sources of supply. Whilst our clients do not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.
- 3.12** Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent

appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This marks a significant change in approach since the Regulation 18 version of this plan when the emphasis was on a strategy for locating development sustainably. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5 year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

-
- 3.16** Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.
- 3.17** Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

- 3.27 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (ASLQ) as shown on Figure 3.3 of the plan. This proposed designation affects our clients' site at Brook Lane, Warsash and all immediately surrounding land except (curiously) the Egmont Nursery site, Brook Avenue, which is a proposed allocation in the PLP and which has outline planning permission for 8 dwellings.
- 3.28** From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. In our view, **this creation of a potentially irrelevant layer of policy is unnecessary and Policy DS3 should be deleted.**

However, if it is held that Policy DS3 should be retained in the plan, then the following comments apply:

- 3.29 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

-
- 3.30 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.
- 3.31 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HP1: New Residential Development

- 3.32 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five Year Housing Land Supply.
- 3.33 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

- 3.34 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.35 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.36 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.37 If a five year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.38 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and
- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.39 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.40 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.41 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.42 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.43 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.44 Therefore, amend the first line of the policy to read:

"Development proposals for all new dwellings shall normally provide: ..."

3.45 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

- 3.46 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on many of the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

- 3.47 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.
- 3.48 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.56 This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged

"to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.57 This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

Appendix C:

- 3.58 The purpose of the inclusion of the Local Ecological Network Map at Appendix C is not understood. It includes the identification of land as "Network Opportunities". This does not appear to have a basis in the policies of the PLP. The plan is difficult to interpret given its scale but all or part of our clients' site may be identified as a Network Opportunity on this plan. This is not explained. This appendix should be deleted, as happened to a similar plan appended to the Regulation 19 Chichester District Local Plan.

Proposed housing allocation – land at Brook Avenue, Warsash

- 3.59 Our clients' site is identified at Appendix A of the accompanying February 2020 representations. It is SHELAA Site ID 3050 which is assessed as a "Discounted Housing Site" on page 161 of the Council's most recent SHELAA dated September 2020. Here it is confirmed that the site has a gross area of 2.04ha and an estimated yield of 55 dwellings. The site's "Suitability" (for development) was assessed as follows:

"Constraints: Agricultural Land Grade 3b, Within 500m of SPA, Within 500m of SAC, Within 500m of Ramsar, Within 500m of SSSI, Countryside.

Highways / Pedestrian access: Access from the south would be unacceptable as the link to Brook Lane is narrow. Access from the north onto Brook Avenue is considered feasible. Footway provision along Brook Avenue would be required to Brook Lane.

Conservation Comments: No known constraints.

Noise / Air Quality Assessment: No issues.

Archaeology: Site not within identified area of archaeological potential.

Ecology Comment: The site contains an improved grassland field with boundary vegetation, which could be utilised by foraging and commuting bats, reptiles, dormice and breeding birds. Issues arising from increased recreation within the SINC will need to be considered. Protection and enhancement of the boundary vegetation is required.

Accessible Facility Types 6/10: Within 1600m of a Secondary School, within 800m of a Convenience Store or Supermarket, within 400m of a High Frequency Bus Stops, within 800m of a Accessible Green or Play Space, within 1200m of a Primary School, within 1600m of a Town/District or Local Centre.

Reason for Discounting: Development of scale promoted would not be in keeping with the settlement pattern.

Is the site suitable? No

Is the site available? Yes

Is the site considered achievable? Yes"

Our comments:

The site is considered to be available and achievable for housing, but not suitable. This appears to be an illogical conclusion from the assessment

provided, particularly when account is taken of other planning permissions and allocations in the immediate area.

Proximity to the SPA/SAC/Ramsar and SSSI are not objections in principle to development in this location – as evidenced by the planning permission for housing at Egmont Nursery to the west of our clients' land (so closer to European designated sites) and the allocation of the "Warsash cluster" of housing sites north and south of Greenaway Lane a short distance to the east.

Access is available from Brook Avenue to the north.

There are no conservation, archaeology, noise or air quality constraints.

The site offers some ecological potential but this can be mitigated.

The site is sustainably located within walking distances of secondary and primary schools, local services and facilities including convenience shopping and a high frequency bus route.

Therefore, it appears that the only reason it was not allocated for housing was because the estimated yield of 55 dwellings was held to be not *"in keeping with the settlement pattern"*. The site's area is 2.04ha, so a scheme of 55 dwellings would be at a density of about 27 dwellings per hectare, a relatively low density.

To the east of the site are consolidated frontages of suburban housing fronting Brook Lane and Brook Avenue, but to the west housing along Brook Avenue is of lower density and is more sporadic.

In this context, it is suggested that the density of housing development should reduce east to west across the site, that the site should be allocated for "about 25 dwellings", but that its capacity should be confirmed through a detailed assessment of its constraints and the preparation of a feasibility layout.

For these reasons, the Council is encouraged to allocate our clients' site at Brook Avenue, Warsash for about 25 dwellings. Our clients have received many expressions of interest in their land from housing

developers, such that the site is deliverable in the short term and can make a modest though important contribution to the Council's five year housing land supply.

4.0 Participation at the examination hearing sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

**Representations towards the Fareham
Borough Draft Local Plan 2036 Publication
Draft (Regulation 19) Consultation on Behalf
of Persimmon Homes (South Coast)**

December 2020

1. Introduction

Persimmon welcomes the opportunity to comment on the Fareham Draft Local Plan 2036 (DLP) Publication (Regulation 19) consultation.

This letter is set out in sections as summarised below:

- Section 2 sets out our response to Duty to Cooperate issues
- Section 3 sets out our policy specific responses
- Section 4 sets out our response in relation to Omission Sites

2. Duty to Cooperate

The Duty to Cooperate places a legal duty on local planning authorities to engage constructively, actively and on an ongoing basis to maximise the effectiveness of Local Plan preparation in the context of strategic cross boundary matters, including housing.

Planning Practice Guidance recommends that authorities should produce, maintain, and update one or more Statement(s) of Common Ground, throughout the plan-making process. The Council has unilaterally produced a 'Statement of Compliance with the Duty to Co-operate' which sets out how the Council claims to have addressed the duty to cooperate, including in relation to addressing the unmet housing need of its neighbouring authorities. This is not an agreed Statement. It is noted that there is little to no explanation within the Statement as to what cross boundary discussions have taken place since the Council has significantly altered its approach with regards to housing need (as detailed below). In Persimmon's view, this information is absent because neighbouring authorities, in particular Portsmouth and Gosport, will not be supportive of Fareham's approach.

As mentioned above, the Council's Regulation 19 consultation document is significantly different from the Regulation 18 draft in terms of its approach to housing. This is largely as a result of it applying the lower Local Housing Need (LHN) as derived from the Government's proposed new Standard Methodology, which has not been approved. The Regulation 18 version of the Plan included a number of Strategic Growth Areas that were identified, in part, to meet the housing needs of neighbouring authorities of Gosport and Portsmouth. These Areas have now been deleted, and do not feature in the Publication Plan.

The Council's decision to use the new Standard Methodology LHN in order to take advantage of lower housing numbers is premature, and is at odds with the approach being taken by nearly all other Local Planning Authorities developing Local Plans in the sub-region, including Gosport and Portsmouth.

It is understood that the SGAs would meet at least 1,000 dwellings from Portsmouth's unmet needs, alongside a proportion of Gosport's (quantum not published). However, the Publication Plan suggests that unmet need accommodated by the Plan will only equate to 847 dwellings. By Fareham choosing to use the draft new Standard Methodology and reducing its housing site allocations as well, the scope for the Plan to pick up the housing needs of these neighbouring council areas has been significantly curtailed.

It is Persimmon's view therefore that, given the significant change in approach by Fareham Council, the joint working that it has undertaken on housing issues to date has been fundamentally undermined to a point where it can only be concluded that Council has failed the duty to cooperate.

2. Policy Specific Comments

DEVELOPMENT STRATEGY

Strategic Policy DS1 Development in the Countryside

Policy DS1 provides the policy basis for the delineation of settlement boundaries. In the context of our comments below, notably in relation to not meeting housing need, omission sites and the delineation of Strategic Gaps, the Council should amend the settlement boundaries to allow additional development to come forward.

With regards to the criterion d) of Policy DS1, an allowance for new or replacement building, conversion and/or extension of a school is welcomed. However, the Policy appears to limit re-provision to existing sites shown on the Policies Map. As set out in greater detail in the our response to Policy DS2 and the Omission Site section, discussions are on-going with the Meoncross school to facilitate expansion of the car park and/or playing fields in the short term. The potential relocation of the school to other land within Persimmon's interest at Cuckoo Lane over the longer-term is also being explored. As currently drafted, by strictly limiting development to within an existing educational facility, the Policy would prevent such future improvements and the possible relocation of Meoncross School.

Strategic Policy DS2 Development in Gaps

The Council has commissioned Hampshire County Council to review its Strategic Gaps. The County's methodology for this review is set out in the Technical Review of Areas of Special Landscape Quality and Strategic Gaps (September 2020). This applies 'Primary Measures' (i.e. physical and visual separation) and 'Secondary Measures' (i.e. Green Infrastructure Provision) to define the gaps. We support the inclusion of physical and visual separation as a means of determining the gap boundary, but we see no justification for including the secondary measures as this is outside of the scope of the role of a gap. In any case, Green Infrastructure is an issue that is dealt with separately under Policy NE9 of the draft Plan.

The following commentary on this policy considers each of the Strategic Gaps before comments are made on the content of Policy DS2 itself.

The Fareham-Stubbington Gap

As set out in the recommendations of the Gap Review paper (Chapter 4: Conclusions and Recommendations, Paragraph 10): *'there exists some opportunities for development to be absorbed within the Stubbington-Fareham Strategic Gap, subject to scale and future detailed design, without compromising its Gap function...'* It is surprising then that the Council has not examined this potential in greater details as part of its Publication draft Local Plan, particularly given that the most recent Regulation 18 Local Plan consultation proposed a Strategic Growth Area (SGA) within this gap as a means of accommodating growth.

It is also surprising that the Gap Review Paper does not adequately consider the influence of the Stubbington by-pass on the Fareham-Stubbington Gap. Paragraph 3 of Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap states that: *'As the Bypass is currently under construction and its alignment marked out, it is possible to see how it might affect the sense of separation between Fareham and Stubbington.'* The report also states that it is too early to understand the full impact that Stubbington Bypass will have on the landscape character and development pressures of the Gap. This second assertion is contested. Given that the by-pass construction has progressed significantly, and that by-pass proposal has been subject to landscape assessment (including through the ES associated with the application), there is sufficient information available to allow for a robust assessment of the impact of the by-pass on the gap and the landscape to be carried out. A review of the landscape and gap evidence should be carried out prior to submission of the Plan for examination.

There can be no doubt that the by-pass will have a considerable influence on the Fareham-Stubbington Strategic Gap - effectively splitting it two. Once the by-pass is complete, it will form a strong defensible boundary, which will make the difference in the character between areas north and south even more apparent than it is already. This difference in the character requires considered in the Local Plan and its evidence base.

Land to the north of the bypass route is considerably more open in character, with large open fields with limited boundary planting providing prominent views north from the bypass toward the southern urban edge of Fareham, which is well defined by Rowan Way. This area is characterised by a strong sense of tranquillity, and is a much more sensitive landscape that is more befitting of Gap designation in accordance with the Council's own methodology. Land to the south of the bypass, however, comprises considerably more urban influences as demonstrated by existing development along Ranvilles Lane / Titchfield Road, the cemetery south of Oakcroft Land and development around May's Lane / Peak land (including where the urban area of Stubbington protrudes into the gap). This observation is supported by the detailed analysis of gap study area 7a (see Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap, para 8) which states that:

*'There exists the potential to **make modifications to the settlement boundary of North Stubbington: to extend the boundary to run along Oakcroft Lane**, as the isolated field that sits aside Crofton Cemetery, does not protrude into the landscape beyond the current Northern and Western edges of Stubbington. Largely sitting behind a mature line of Poplars also helps this isolated field absorb some development (subject to detail design), **without risking the integrity of the Gap, as a whole.**'*
(Persimmon's emphasis)

Paragraph 11, Bullet 2 of Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap of the Gap Review evidence reconfirms the limited role that the area to the north west of Stubbington, south of Oakcroft Lane and east of Ranvilles Lane plays as a gap. The Gap study states that this area has *'the ability to absorb development into the landscape exists, without compromising the integrity of the Gap function'*. The Council will be aware of the planning application within this part of the gap (LPA Application Reference: P/20/0522/FP). This application comprises 209 new homes a considerable area of land to the north of the housing and to the south of the by-pass for ecological purposes. The Site Plan is attached to these representations at Appendix 1. The application is a resubmission of a planning application that addresses technical and design issues raised by the Council previously. It is understood that the application is due to be considered by planning committee in January 2021.

One key consideration when reviewing the boundary of a gap is the consideration that no more land should be included in the gap than is necessary (see adopted Core Strategy Policy CS22, Fareham Borough Council Gap Review 2012 and South Hampshire Strategy 2012). This concept is reiterated in the Gap Review Paper as 'minimum land take'. In light of the above, it is Persimmon's view that the gap evidence should be reconsidered with areas north and south of the by-pass assessed separately to take account of the by-pass. For reasons set out above, and in accordance with the Gap Review methodology, it is considered that a review of the evidence would indicate that the land north of the by-pass should be retained as gap and land to the south should be deleted from the gap designation. Retaining a gap to the north would preserve a c. 800m gap between the by-pass and the southern urban edge of Fareham, which is described in the Gap Review Paper as being *'moderate-large gap'* of a *'good distance'* that *'gives the traveller time to experience the countryside after leaving one settlement before joining another.'* Retaining a gap of adequate width in this location is particularly important given the role Peak Lane plays in providing a well utilised north-south link between Stubbington and Fareham.

With regards to land to the east of Stubbington, Paragraph 11, of Chapter 4: Strategic Gaps SG 2: The Fareham-Stubbington Gap of the Gap Review indicates that there is very little opportunity to absorb development in this corridor but that advanced planting along the eastern edge of the settlement would be beneficial. Persimmon Homes have interests in this area (as discussed in detail later in these representations). In summary, the proposals include new residential development, significant new strategic planting and open space along the eastern edge of the site. Discussion are on-going with the

Meoncross School to facilitate expansion of the car park and playing fields in the short term and the potential relocation of the school to other land within Persimmon's interests over the longer-term.

In light of the our comments set out above It is considered that the Fareham-Stubbington Strategic Gap should be redrawn so that land to the south and west of the by-pass is removed from the gap.

Whilst not a gap issue per se, the emerging and previous Local Plans, have tended to avoid allocating any significant growth on the periphery of Stubbington. Sensitively redrawing the gap boundary as suggested above will allow for much needed sustainable development housing to come forward to support the housing aspirations of those wish to live in or remain living in Stubbington.

The Meon Strategic Gap

As touched upon above, the function of a Strategic Gap is to prevent the coalescence of separate settlements. Land to the west of Stubbington is identified as a gap but there is no settlement to the west of the Stubbington that requires protection from coalescence. With regards to Strategic Gap Study Area 6, it is noted that the Gap Review study states that this gap is provided to ensure there is no coalescence between Stubbington and Titchfield along Titchfield Road. Whilst this northern most extent of this study area may serve this purpose, the central and southern parts of the Study Area 6 play no role whatsoever in preventing coalescence. This is recognised in Paragraph 13 of Chapter 4: Strategic Gaps SG 1: The Meon Gap of the Gap Review Study. Nonetheless, the Study recommends that the Gap is retained in this area due to: high levels of tranquillity, its role in providing separation of Portsmouth and Southampton, and to recognise the potential longer-term settlement expansion southwards from Titchfield and South Westwards from Hook. Based on the Council's Gap Review methodology, these are not adequate reasons to include this land within the gap.

A more logical delineation of the gap, which would ensure that no more land than necessary is included within it, could be to end its southernmost extent at Crofton Manor Equestrian Centre where the transition from countryside to urban (as part of Stubbington) becomes apparent. As recognised in the Gap review study, much of the land to the south of the Equestrian Centre is subject to protection under draft Policy DS3 (as discussed below), and ecological constraints which provide adequate protection against inappropriate development in this area. A gap is therefore not necessary.

General Comments on Policy DS2

Notwithstanding our comments above, in our considered view, Policy DS2 is too restrictive. There may be a point within the plan period, for example where the Council is unable to demonstrate a sufficient five year housing land supply, where additional housing may be required over and above those sites identified in the Plan. The Council has persistently struggled to demonstrate a sufficient five year housing land supply in recent years so flexibility in the Policy is required.

As demonstrated through the Council's Regulation 18 draft Plan, a sustainable location for such development may be in the Strategic Gap between Stubbington and Fareham. As such, the Policy should include additional wording to allow for appropriate and sustainable development in the Strategic Gap in such circumstances where housing supply needs to be increased.

The Policy also seeks to prevent development in Strategic Gaps that may significantly affect its 'integrity' and the 'distinctive nature of settlement characters'. This is a highly subjective policy criteria that will be challenging to interpret by decision-makers and applicants alike. The reference to 'integrity' and the 'distinctive nature of settlement characters' should be deleted from the Policy. The function of a Strategic Gap is to prevent the coalescence of separate settlements, which can be achieved through assessment of the impact of a proposed development on the physical and visual separation of settlements. The other policy criteria are superfluous.

In light of the above, it is considered that the Strategic Policy DS2 - Development in gaps and delineation of the Gap as shown on the draft Policies Map, should be redrawn as set out above. If this is not the case the Policy cannot be said to either justified or effective and is therefore unsound.

Strategic Policy DS3: Landscape

Policy DS3: Landscape identifies a number of Areas of Special Landscape Quality (ASLQ), including the Meon Valley. This is new Policy that does not form part of the adopted Local Plan. The first part of this Policy seeks to significantly restrict development in the Meon valley area. However, considering that the Council has successfully defended the Meon Valley area from a number of hostile planning applications in the recent past without this Policy in place, the justification for it is questionable. Given the prohibitive nature of Policy DS3, the development potential of Site 5 (Cuckoo Lane) for housing and new school provision, will unlikely be realised unless the site is allocated for development in the Local Plan and/or the site is excluded from the Meon Valley ASLQ designation.

HOUSING POLICIES

Strategic Policy H1 Housing Provision

As mentioned in the Duty to Co-operate section above, the Council is applying the Government's former draft Standard Methodology to arrive at its LHN (403 dpa) as opposed to the current Standard Methodology (514 dpa). The draft Standard Methodology is not Government Policy, it is only a consultation draft. The Government has recently (16th December 2020) released revised LHN figures that indicate that the Council's baseline LHN will increase to 514dpa. This increase LHN to exactly the same figure as per the current Standard Methodology. This newly published data clearly undermines the Council's premature decision to use the lower LHN figure. It is also noted that when the current and new LHN figures for Gosport and Southampton are considered both Councils are facing an increase in LHN of 106 dpa and 315 dpa, respectively. This is significant as both of these Authorities may need to look to Fareham to accommodate unmet housing needs. This will place even greater pressure on Fareham Borough Council to increase its housing requirement set out in Policy H1. For completeness, Portsmouth's LHN remains unchanged between the two data sets.

Notwithstanding, our concerns that the Council has failed the legal test with regards to the duty to cooperate, Policy H1 cannot be assumed to be sound as undershoots current and emerging LHN. The Plan cannot therefore be considered consistent with national policy and it is not positively prepared. Should the Council seek to amend its housing requirement (for example using the current Standard Methodology) and make consequential changes to its supply sites, re-consultation on a revised Regulation 19 Plan will be necessary.

Policy H1 includes an estimated 1,224 windfall dwellings. The Council's Housing Windfall Projections Background Paper (June 2020) does not provide a detailed breakdown of which sites are being considered as windfall. The Council's figures cannot therefore be scrutinised. Until such time as the Council publishes this detail underpinning the windfall allowance, this element of the supply should not be counted towards the Council's housing requirement.

The Policy also looks to implement a stepped housing requirement, which backloads housing delivery towards the latter part of the Plan period. This approach is at odds with the NPPF's objective to boost the supply of housing and appears not be justified by the expected rate of delivery of sites as set out in the summary housing trajectory in Appendix B of the Plan. For example, in the first period (2021/22 and 2025/26) the Council proposes a requirement of 2,250 dwellings (averaging 450 dwellings per annum). However its housing trajectory suggests that 3,085 dwellings will be delivered, which is equivalent to 617dpa. As such, Policy H1 should be expressed as an average requirement; it should not be stepped.

The Policy also sets out that approximately 428 homes will be delivered on specified brownfield sites and/or regeneration opportunities in Fareham Town Centre. In some cases deliverability, viability availability (i.e. in existing use) is not assured (notably sites FTC2-5). Whilst Local Plans should be aspiration, they should also be deliverable. Allied to above, a further 1,327 homes are identified on Housing Allocation sites (i.e. allocation prefixed with a HA reference). However, a number of these sites are rolled forward allocations from the current adopted Local Plan, and in some cases (i.e. HA29 and HA30) are sites that formed part of the Western Wards growth area that were originally identified

in the 1970's, but have failed to be delivered. As such, it is questionable whether the Council has properly assessed deliverability / developability of some of the sites comprising its supply. It is advisable therefore that the quantum of housing expected from some of the questionable supply sites should not be counted against the housing requirement in the Plan, and alternative sites (such as those set out in the Omission Sites section) should be identified to ensure the Council's housing requirements are met. In addition to the above, the deliverability issues associated with Welborne are well documented. Recently it is understood that due to delays in the site coming forward, the Council has lost external funding to deliver critical highway improvement works. This further underscores the challenges associated with this site. The Council would be well advised to take a highly cautious approach when seeking to include housing supply from Welborne. The draft Plan currently includes 4,020 dwellings as part of the housing supply. In light of the above, this figure is considered to be highly optimistic and should be revised downwards.

Notwithstanding, our concerns regarding the Council's choice of LHN, this figure should be regarded as the starting point for developing the Plan's housing requirement. Councils are advised through national planning policy/ guidance to consider whether any adjustments should be made to the LHN figure to account for other factors such as economic growth (which appears to be absent from the Plan) and unmet need from neighbouring authorities (as discussed above). With regards to affordable housing, the Council commissioned a Housing Needs Survey as part of its previous Regulation 18consultation draft Plan in 2017. At the time, the Survey suggested that there is a net affordable housing need of 302 dpa (i.e. nearly ¼ of the overall annual requirement). Whilst the Standard Methodology accounts for affordability (or lack thereof in Fareham's case), actual affordable housing need indicates that a further uplift to its LHN may be necessary.

Policy HP4 Five-Year Housing Land Supply

Policy HP4 states that development 'may be' permitted where a development meet all the criteria in policy HP4. The Policy should be reworded to positively state that a development 'will be' permitted if it meets the policy criteria. When determining planning applications, the decision maker is required to read the Local Plan as a whole; there is no reason for the Policy to be equivocal on this matter.

With regards to criterion (b) the policy states that a development should be '...integrated with the neighbouring settlement'. Does this mean a physical link between the development and the adjoining settlement or that a development should be integrated in design terms? This needs to be clarified.

Criterion c) seeks to prevent development in strategic gaps that may significantly affect its integrity. As per our comments in respect of Policy DS2, this is a highly subjective policy criteria that will be challenging to interpret by decision-makers and applicants alike. It is also noted that Policy DS2 sets out different policy requirement with regards to the protection of Strategic Gap (i.e. proposals should not affect the physical and visual separation of settlements). This has the potential to create an internal conflict within the Plan as it is unclear which policy requirements (either HP4 or DS2) would take precedent where the Council unable to demonstrate adequate five year supply. It is suggested therefore that the wording for Criterion c) is deleted or replaced with a cross reference to Policy DS2 (including Permission's suggested amendment to this DS2).

Policy HP5 Provision of Affordable Housing

With respect to the percentages of affordable housing sought at sites, Policy HP5 should include a viability review mechanism to provide flexibility. This will assist with the viability of schemes should there be a fall in market over the lifetime of the Plan and/or in circumstance where unknown development costs are introduced (nitrate mitigation costs associated with the HRA requirements are a case in point having seriously affected the viability of schemes over the past year or so).

As set out in the supporting text to this Policy (paragraph 5.32), the Council publishes on its website the identified affordable housing need by area of the Borough. The Council's website shows considerably different housing need for each area. The affordable tenure mix is therefore too prescriptive and does not reflect the Council's own evidence base. It is advisable therefore that the

Council replaces criteria i-ii with a statement confirming that affordable housing mix and tenure will be negotiated with the Council evidence base set out its webpage used as the starting point.

Further underscoring our concerns with the nature of the tenure mix, the Council should be aware of the potential practical challenges associated such a small percentage of Affordable Home Ownership. The Policy could be interpreted by officer so that Affordable Home Ownership is provided at 10%, which would be a challenge for reasons set out below. Registered Providers are becoming ever specialised with some only dealing with the shared ownership side and others the rented side. Requiring such a small percentage of Affordable Home Ownership products through this Policy may create challenges in terms the viability of tender bids for this type of unit. In addition, Affordable Home Ownership, including shared ownership schemes, have been shown to be an effective means of getting people on the property ladder. As the Council's own evidence shows 10% is considerably below what is actually needed.

The final element of Policy HP5 addresses the market rent of Affordable Rented units, which will be judged as 80% of market rent or the relevant Local Housing Allowance (LHA), whichever is lower. The NPPF only make provision for rent to be set at 80% of market. It does not state that market rents should be benchmarked against LHA. The reference to LHA should be deleted to ensure that HP5 is in conformity with national policy.

It is also noted in Paragraph 5.42 of the supporting text to HP5 that the Council may need review the Affordable Housing Supplementary Planning Document (SPD) to address changes to the affordable housing and mix. SPDs should not be used to review issues that have a direct impact on viability. This should be tested through the Local Plan review process.

Policy HP7 Adaptable and Accessible Dwellings

The PPG sets out a number of tests against which Councils should consider when seeking to introduce M4(2) and M4(3) policies into its Local Plans. The Council's Specialist Housing Background Paper (September 2020) has been produced which shows how the Council claims to have met these tests.

In terms of need, the Background Paper sets out the population with Long Term Health Problem or Disability based on census data. However, this measures population, not households, so should not be assumed to an accurate proxy for need. It should also be noted that some people who state that they may have a Long Term Health Problem or Disability as part of a Census response may not have an illness that would affect mobility and would not therefore not necessarily require M4(2) or M4(3) dwellings. The evidence base should be updated to reflect the above.

With regards to the provision of Category 3 specifically, the Council's evidence of need is weak being based on a national wheelchair usage that may not reflect the level of need in Fareham Borough. Furthermore, with regards to Category 3 affordable housing, from a practical point of view, Registered Providers are less willing to take on wheelchair dwellings as they can be difficult to occupy. If there is no suitable occupier then the unit could be sat empty for a significant period while a suitable occupier is found. During this time the unit is not generating any income, and could have been used to house a family that is in need at the time.

As the Council correctly identifies, a large proportion of older homeowners will seek to remain within their own homes with care provided in situ. Should these owner occupiers need to downsize or relocate they will be able to utilise the equity built up within their dwellings to access products which meet their specific. This may be sheltered or extra care accommodation. Within recent years, as this market has developed, the industry has responded with a number of private sheltered accommodation schemes approved within Fareham. In this context, the Local Plan also looks to facilitate the delivery of specialist housing through Policy HP8 and through specific housing allocations made in the Plan (HA42 – HA43). The Background Paper does not appear to have factored in the supply of specialist homes that may come forward be on allocated sites and windfall sites permissible under Policy HP8.

With regards to the second test relating to location of specialist housing, as set out HP8, this type of accommodation is best located in accessible locations. Given the mobility challenges which some older people face, town and district centres, with their conveniently located services such as shops and health facilities, are ideal locations for older persons housing. Fareham town centre is a highly accessible location where a significant quantum of flatted housing is proposed with the benefit of a reduced affordable housing policy requirement. District Centres are also highly accessible locations where there is a potential for older persons housing could be delivered. The Council should therefore consider restricting this Policy requirement to areas of high accessibility.

Policy HP9 Self Build and Custom Homes

Policy HP9 sets out a policy requirement for 10% of all units on sites over 40 dwellings to provide plots for sale to address local self or custom build need. It is noted, however, that at Paragraph 5.8 of the Council's Self and Custom Build Housing Background Paper (September 2020) it is stated that the Council has met its past and future self-build requirements – this has been achieved without the need for a specific policy. It is also noted that the adopted Welborne Plan requires some 1% of its housing to be for self / custom build. Set against the current identified need of 35 net plots it would seem excessive to require a policy to further increase self / custom build supply. This could result in significant over provision of a product for which there is no clear market demand. In light of the above, the justification for Policy HP9 is therefore questionable. The policy does include provision for plot to be developed for non-self-build ,should they not be taken up, however, this Local Plan has made no assessment about the extent to which this would affect cash flow and the viability of developments. It is Persimmon's view therefore that this Policy should be deleted.

Notwithstanding our overarching concerns regarding the justification for this policy, there are a number of practical considerations that the Plan fails to adequately acknowledge. Criterion a) for example, sets out that self or custom build plots should be serviced. The Policy needs to clarify what is meant by 'serviced'. Does serviced this relate highway access, gas, water, electricity and/or broadband, and to which point should the plots be serviced? Turning to criterion c) it is not clear who would be responsible for setting out the design parameters. Placing a requirement to conform to set parameters could put off some prospective self / custom builders. The requirement to provide self and custom build plots may also have a number of practical and management issue, such as:

- Phasing and completion of the wider site.
- Section 106 contributions due to the exemption that applies to self-build housing.
- Delivery of housing in accordance with paragraph 59 of the NPPF to boost significantly housing supply, where supply on an ad hoc basis by self-builders is likely to be slow compared with the remainder of the site or even not take place at all.
- The reserve matters period running out and needing to be extended.
- Ad-hoc builders turning up outside specified hours of work.
- Storage of materials as there is limited room on plot and storage spills onto the market housing part of the site.
- Purchasers having to stop building due to unemployment/lack of funds.
- Purchaser dissatisfaction where building continues on a site which was expected to finish when they moved in.

CLIMATE CHANGE

Strategic Policy CC1 Climate Change

This Policy states that the 'Council will promote mitigation and adaptation to climate change through...' It is unclear whether the criteria will be sought as part of development proposals, or whether the criteria relate to development delivered by the Council. This requires clarification. If it is the former, the Policy should make clear that the criteria are not requirements but should only be met where it is possible to do so.

Policy CC2 Managing Flood Risk and Sustainable Drainage Systems

Policy CC2 requires all developments to be designed in accordance with the CIRIA C753 SuDS Manual or equivalent national or local guidance. The SuDS manual is, however, only guidance. In Persimmon's experience, strict adherence to the guidance can be problematic as the design of a SUDS system also need to consider design, aesthetics, engineering etc. It is recommended therefore that the wording for this bullet point is prefixed with 'Where possible,' to provide the necessary flexibility.

NATURAL ENVIRONMENT

Policy NE2 Biodiversity Net Gain

Policy NE2 sets out a requirement for site to deliver 10% net gain for biodiversity. The Local Plan viability assessment assumes a cost of £500 per dwelling. This development cost is based on limited evidence and seems low, particularly for greenfield sites (as opposed to brownfield equivalents) which are likely to require significant more extensive measures to achieve a 10% net gain. In many cases, the requirement to achieve BNG is likely to negatively impact on the developable area, resulting in a loss of revenue that negatively impacts on viability, rather than be a cost associated with each individual units per se. In Persimmon's view, the viability evidence to support the introduction of this Policy is inadequate. As mentioned above, meeting BNG at 10% can require considerable land take; on some sites Persimmon has been involved in, BNG has required around 50% of the gross site area. It is not clear whether or to what extent the Council has factored in this 'land hungry' BNG requirement as part of its housing allocations capacity estimates. It is also noted that BNG should be achieved across a site, it is not a requirement to be met at the individual plot level (although this might form part of the BNG solution). As such, supporting text Paragraph 32 is misleading and should be deleted.

Policy NE4 Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

This is new Policy which sets out Fareham's policy approach to dealing with excessive nutrient (nitrate) loading on protected European sites of ecological importance. However, the Policy is light on detail with insufficient guidance as to how applicants will be able to demonstrate conformity. Given Persimmon's significant experience in dealing with such matters, the Company is aware of how this Policy can be implemented in practice, but for less informed developers/applicants this may be more challenging.

Notwithstanding the above, the Company is aware that the primary means of determining whether a development proposal will be able to demonstrate nutrient neutrality is by producing a nutrient budget using the Natural England Methodology. Given that the Natural England Methodology provides a key evidence base and is fundamental to the implementation of Policy NE4, it is critical that this document is examined in detailed alongside the Local Plan. Of particular concern is that Natural England's Methodology includes a number of onerous stages that result in significantly more mitigation being required than is actually necessary. These provisions include, but are not limited to, housing occupancy rates, internal migration (particularly those households that are occupying new affordable housing) and default permit levels. Furthermore, despite many of steps set out Natural England Methodology taking a precautionary approach to nitrate assessment, an arbitrary buffer of 20% increase in nitrate loading is added at the end of the calculator. This buffer is not required and will further exacerbate the issue of overproviding mitigation land that is not necessary. Lastly, it is noted that the Partnership for South Hampshire has updated the Integrated Water Management Study (IWMS). The IWMS provides a key evidence base underpinning the nitrate assessment work, but the Natural England Methodology does not take into account this new evidence.

Policy NE5 Solent Wader and Goose Sites

Policy NE5 sets out the Council approach to protecting area which are used by Solent Waders and/or Brent Geese. The Policy makes reference to such area as shown on the Policies Map. These

designations are, however, informed by an interactive GIS map provided on the Solent Bird Aware website, which forms a critical evidence base to the development of Policy NE5. It is therefore concerning that, on the same webpage as the bird habitat GIS mapping, members of the public can download a form to report bird sightings. It is not clear whether or to what extent these reported sightings are authenticated / scrutinised by a qualified ecologist. There appears to be wide scope for land to be incorrectly identified as a bird site leading to unnecessary cost being expended to mitigate site, and in the worst cases complete sterilisation of that land. This is certainly the case with a number of sites that are with Persimmon Homes' interests (as detailed later in these representations). There is a concern therefore that the mapping evidence base underpinning Policy NE5 is flawed.

The Policy also does not set provision with regards to bird surveys. The methodology for bird sites allows sites to be identified as habitat even if they are not actually being used by birds. It would seem logical that the policy makes provision for applicant to undertake ecology survey and assessment of bird sites in order to demonstrate the absence or presence of a species. We would recommend that one year's survey data should be sufficient, with further surveys only required if the some activity has been identified at a site.

The Council will also be aware that it is the Solent Bird Aware mapping (not the Policies Map) that is used by consultees (Natural England and the Council's own in-house ecologist), to determine whether a development will impact on any protected bird habitat areas, to avoid any confusion in the future, and to ensure the Policies Map remains in date, it is suggested the Policy Map deletes these designations.

With regards to the criterion a) 'Core and Primary Support Areas' the Policy requires that development on such sites should result in an overall net gain to the Solent Wader and Brent Geese Network. BNG is a requirement of Policy NE2; the concept for which is established in the NPPF. However, Persimmon are unaware of any such requirement in national policy or the evidence base underpinning this policy, for a net gain for specific species, including protected birds.

Policy NE6 Trees, Woodland and Hedgerows

Point a) of this Policy advises that the 'unnecessary loss' of non-protected trees, hedgerow and woodland should be avoided. It is unclear what 'unnecessary loss' means in practice.

Point b) of the Policy should be a new sentence, and what is meant by the term 'unavoidable' in this context should be clarified.

Policy NE8 Air Quality

Criteria a) of this policy requires electricity charging infrastructure to be provided as part of new development (excluding Welborne). It is unclear why this Policy is not to be applied to Welborne. Presumably this is because of the impact of such provision on viability. Viability issues associated with EV charging provision are, however, not limited to Welborne.

The Local Plan Viability study includes development cost associated with EV charging as part of £10,000 per plot contingency. Paragraph 5.3.8 of the Study states that, '*it is unclear at stage of writing if or when any of these measures will be required, so [the study takes] a very cautious and conservative approach....*' With regards to the EV charging, Policy NE8 requires such provision; there is no uncertainty as to what is expected of a development proposal. As such, the Viability Study should consider this issue in greater detail and not combine this policy requirement with other unknown cost demands on development. Combining these 'unknowns' a single contingency means that it is not possible to scrutinise in detail whether the assumptions made with respect to EV is reliable.

We would highlight that the cost for providing EV charging points is around £500-£600 but this does not include additional costs associated with providing additional sub-stations on larger development sites so that all charging points are capable of being used concurrently (alongside all other energy

demands on a development), and the potential to provide enhanced electricity supply (i.e. off-site upgrades) over and above that required for the units that could challenge a scheme's viability.

As current drafted, this element of the Policy is not justified.

TRANSPORT AND OTHER INFRASTRUCTURE

Strategic Policy TIN1 Transport Infrastructure, Policy TIN2 Highway Safety and Road Network and Strategic Policy TIN4: Infrastructure Delivery

These policies concern development contributions to the delivery of new infrastructure. However, it is considered the funding for such infrastructure may, in many instances, be a matter for CIL.

Notwithstanding, the above, if such Infrastructure is a requirement to make the development acceptable in planning terms, then such contribution need to meet the relevant tests set out in the CIL Regulations. It is no longer appropriate for blanket contribution to be sought by planning authorities. The Policy should be clear on this matter.

With specific reference to TIN2 it is unclear why the Council has chosen not to show the alignment of the Stubbington by-pass on the Policies Map given its strategic importance. This Policies map should be updated to show this route.

DESIGN

Policy D1 High Quality Design and Place Making

Policy D1 makes reference to a number of principles of policy and urban design, but also makes reference to guidance contained in the supporting text. For clarity and avoid any confusion over what is policy and what is supporting, text, it is suggested that this cross reference to the supporting text contained in the policy wording is deleted.

The Council should also review the policy to remove any duplication with other policies in the Plan, for example the section relating nature.

Consideration should also be given as whether the policy needs to be so detailed given that the Council has comprehensive guidance on design set out in its adopted Design SPD.

Policy D3: Coordination of Development and Piecemeal Proposal

This Policy seeks to avoid ransom situations. However, The Council will be aware of case law that prevents it from interfering on private property rights with regard to depressing or prevent returns to a landowners.

Policy D4: Water Quality and Resource

The second part of this policy requires developers to meet the Optional Technical Housing Standard for Water Efficiently (i.e. 110L/person/day). Meeting these Standards should be optional, not required. Whilst the Natural England Nutrient Methodology for the Solent area requires development to meet these standards as a means of addressing nitrate loading, there may be instances where nutrient neutrality can be achieved without doing so. The justification for requiring proposals to meet this standard are inadequate.

D5 Space Standards

The housing standards review introduced the optional space standards which local authorities could adopt by way of reference in their local plans. However, a prerequisite to the adoption of the space standards are the following tests set out in the planning practice guidance (Paragraph: 020 Reference ID: 56-020-20150327).

“Where a need for internal space standards is identified, local planning authorities should provide justification for requiring internal space policies. Local planning authorities should take account of the following areas:

- **need** – evidence should be provided on the size and type of dwellings currently being built in the area, to ensure the impacts of adopting space standards can be properly assessed, for example, to consider any potential impact on meeting demand for starter homes.
- **viability** – the impact of adopting the space standard should be considered as part of a plan’s viability assessment with account taken of the impact of potentially larger dwellings on land supply. Local planning authorities will also need to consider impacts on affordability where a space standard is to be adopted.
- **timing** – there may need to be a reasonable transitional period following adoption of a new policy on space standards to enable developers to factor the cost of space standards into future land acquisitions.’

In order to meet the policy test for the inclusion of the space standards there is a requirement for the council to establish the need for the adoption of the national space standard. To this end, the Council has published a Specialist Housing Background Paper (September 2020). Para 6.7 of Background Paper states most dwellings that have been consented or are awaiting determination are consistent with the 2015 Technical housing standards – nationally described space standard. The Background paper, makes references to the larger plots not meeting this standard, with an example being made of site ref 14/19. However, on the whole most dwellings considered in the Council’s Background Paper, including large units, are meeting the Optional standards. From a need perspective, it would seem as though there is little justification for the introduction of this Policy.

In terms of first part of the viability test, the Council’s Local Plan Viability Study indicates that development viability would not be negatively impacted by the introduction of the standards. This Study, however, is completed at a relatively high level, which makes it difficult to conclude whether this part of the test has been complied with. With regards to the second part of the test, no assessment has been carried out by the Council to demonstrate that the requirement for new development will not negatively impact affordability within the market.

As set out in paragraph 6.10 of the Background Paper, the Council has decided not to set a transition period for the adoption of the national space standards as it is of the view its introduction would not affect viability. For reasons set out above, we do not concur with this assessment, and suggest that a three year grace period is introduced to allow sites that are under a fixed contract to be brought forward. It is also noted that, the Council are looking to apply the draft policies in this Plan, including the requirement for national space standards prior to the examination or adoption of the plan. This contrary to the approach set out in the planning practice guidance. It is not practical to expect development proposals that are currently being considered to suddenly meet space standards.

In light of the above, Policy DS5 is not justified and should be deleted for reasons of soundness.

Local Plan Appendices

Appendix B set out a summary housing trajectory for the sites identified in the Plan. This is inadequate to properly assess the delivery expectation made by the Council with respect to individual sites. To enable proper scrutiny of the trajectory, the Council’s housing trajectory should be broken down by individual sites. This is particularly important because the Council has consistently over-estimated the delivery timescales for key sites. For example, Welborne, which was originally identified in the Core Strategy (2011), was expected to commence delivery in 2014/15. The site has still not achieved an implementable planning permission, and commenced development is still some way off.

4. Omission Sites

The following section provides an overview of the sites in Fareham Borough that are in Persimmon's interests, but have not been identified for allocation. These sites are largely located on the periphery of Stubbington and are within the ownership of the Dunley Estate. The Table below summarises the Dunley land holdings including capacity. The sites are shown on the enclosed Location Plans provided at Appendix 2.

Site Number	Address	Gross Area Acres (Hectares)	Site Capacity Estimate*
1	Land East of Burnt House Lane	23.53 (9.52)	240 - 320
2	Land West of Peak Lane	46.25 (18.72)	TBC
3	Land North of Titchfield Road	4.83 (1.95)	40 - 50
4	Land South of Titchfield Road	2.78 (1.12)	10 - 30
5	Land West of Cuckoo Lane	52.76 (21.35)	150-200
6	Land at Oakcroft Lane	41.04 (16.20)	209
Total		171.19 (69.28)	649 - 809

*Based on net developable area, not gross area.

Sites 1-3 and Site 6 fall within the South of Fareham SGA that was identified as part of the most recent Regulation 18 draft Plan. The remaining sites (Sites 4 and 5) are located outside of the SGA. The following section addresses each site in turn.

In support of the Draft Local Plan Regulation 19 Plan, the Council updated its Strategic Housing and Employment Land Availability Assessment (SHELAA) in September 2020. This replaces the previous study which published in December 2019. The conclusion of the SHELAA as related to each of the sites shown in the Table above are considered.

Site 1: Land East of Burnt House Lane

This site is located to the eastern edge of the Stubbington. Persimmon has undertaken some initial capacity testing in relation to Site 1, including an initial highways assessment and masterplanning. The outcome of this work indicates that the site is capable of delivering around 240 to 320 new homes. This accounts for on-site constraints including the provision of a noise attenuation bund, and strategic planting to the eastern and northern boundaries of the site. Adjacent to this site is the Meoncross School, which is seeking alternative arrangements for playing pitches close to the school (the existing pitches are currently leased and do not adjoin the school) and additional car parking to avoid parents parking on the nearby residential streets. Persimmon is in discussion with the school about how development at the Burnt House Lane may assist in addressing the school's immediate needs. In the longer term, however, given that the school is unable to expand within its existing site, consideration is being given as to whether the facility could be relocated to the Cuckoo Lane site (Site 5) to the west of Stubbington. The Council is strongly of the view that the site is sustainable and suitable for development and it is capable of being brought forward as a standalone allocation site, or as part of a wider masterplan with the South of Fareham SGA, should the Council seek to revisit this project.

The SHELAA 2019 concluded that Site 1 (SHELAA Ref: 1040) was deliverable housing site. However, in the Council SHELAA 2020 the Council considers the site to be undeliverable due a) to a significant visual impact undermining the integrity of the Strategic Gap, and b) the site being classified as a Low Use Brent Geese and Solent Waders site with no evidence of a strategy compliant solution. The

Council ascribes a capacity of 125 dwellings to the site. It is unclear how the Council has reached the conclusions in the new SHELAA given its assessment of the 2019 SHELAA undertaken just nine months prior. Notwithstanding this, as set in these representations, it is Persimmon's view that the Strategic Gap should be redrawn to exclude this site. With regards to the identification of the site as bird habitat, we have raised concerns in these representations regarding the robustness of the evidence underpinning this designation. Nonetheless, by improving the suitability of other sites in the area for bird use (i.e. Site 2 or 5) under the terms of the Council's Policy NE5, a policy compliant strategy to address the loss of the bird site to development is not unachievable. A strategy of improving habitat off-site is being taken in respect of the Oakcroft Lane site, which is also a low use site, and has the support of Natural England and the Council's ecologist.

Site 2: Land West of Peak Lane

This site is located to the north of the by-pass and extends across much of the gap towards the urban edge of Fareham in the north. Given its location and context, the development potential of this site is considered to be limited. However, the land could be an effective nitrate mitigation and/or bird protected habitat site that mitigation solution that could be used to address the potential impact development on other sites within Permission interests and/or other sites in the Borough the require mitigation solutions.

Site 3: Land North of Titchfield Road

This site is located to the north-west of Stubbington. Whilst this site formed part of the previous SGA, it is clearly distinct from and separate from it. This site is small scale that is well-contained in landscape terms, surrounded by existing built development and is deliverable in the short-term as stand-alone site that can be brought forward either as part of outside of the SGA masterplanning process should the Council seek to revisit this project. Initial capacity assessments of Site 3 indicates that it is capable of delivering around 40-50 new homes.

The SHELAA 2019 concluded that Site 3 (SHELAA Ref: 3190) was a deliverable housing site. However, in the SHELAA 2020 considers the site to be undeliverable due it being classified as a Low Use Brent Geese and Solent Waders site with no evidence of a strategy compliant solution. The Council ascribes a capacity of 20 dwellings to the site. It is unclear how the Council has reached these conclusions regarding the suitability of the site given its assessment of the site undertaken just nine months prior. With regards to the identification of the site as bird habitat, we have raised concerns in these representations regarding the robustness of the evidence underpinning this designation. Nonetheless, by improving the suitability of other sites in the area for bird use (i.e. Site 2 or 5) under the terms of the Council's Policy NE5, a policy compliant strategy to address the loss of the site to development is not unachievable. This approach to improving habitat off-site is being taken in respect of the Oakcroft Lane site, which is also a low use site, and has the support of Natural England and the Council's ecologist.

Site 4: Land South of Titchfield Road

This small site is located to the north-west of Stubbington. It bounded to the north-east and north-west by existing housing fronting Titchfield Road and the Crofton Equestrian Centre. The site's relationship with the wider Meon Valley landscape is limited by the woodland to the south of the site. The woodland to the south and its associated watercourse (which is also within Dunley Estate ownership) is recognised as an important ecological resource. Sensitive site design, however, could provide a means of ensuring the ecological interests at this adjoining site are protected and enhanced. Initial site capacity assessment indicated that the site is capable of delivering between c. 10-30 new homes. Were the Council minded to allocate the site for residential development, it could provide an important contribution towards its small-medium site housing allowance as required by Paragraph 68 of the NPPF.

Site 5: Land West of Cuckoo Lane

This site adjoins the settlement boundary of Stubbington to its north-eastern boundary. It is characterised by a substantial arable field that is well-contained in the north by the built form of Stubbington and substantial woodland. Initial capacity testing of this site, which has allowed for a substantial ecological buffer to the woodland, strategic planting to contain the site from the wider Meon Valley, land for a new school and new parkland further south, indicates that it is capable of delivering around 150-200 new homes.

This site is assessed in the SHELAA as being undeliverable due to being located within a *'highly sensitive landscape (based on the Fareham Landscape Assessment) and within an Area of Special Landscape Quality. Significant ecological constraints associated with the adjacent SPA/SSSI affect the suitability of the site.'* The SHELAA ascribes a capacity of 240 dwellings to the site. Whilst the ecological and landscape challenges associated with this site are recognised, they are not insurmountable. Although not a consideration for the SHELAA per se, the site provides the opportunity to deliver substantial ecological and recreation benefits, alongside community benefits, including new education provision and allotments.

Site 6: Land at Oakcroft Lane

Similar to Sites 1 and 3, the Oakcroft Lane site can be delivered outside of or as part of the SGA process (should the Council revisit this project). However, as demonstrated through the planning application, the site is deliverable now as a standalone development site. Technical issues associated with the development have been resolved and Persimmon are currently awaiting determination of the application by the Council. The site is capable of delivering 209 new homes alongside a considerable area of space to the north of the housing and to the south of the by-pass for ecological purposes. The Site Plan is attached to these representations at Appendix 1.

The SHELAA 2019 concluded that Site 3 (SHELAA Ref: 3141) was a deliverable housing site. However, in the SHELAA 2020 the Council considers the site to be undeliverable due to the site to be undeliverable due to the site being classified as a Low Use Brent Geese and Solent Waders site with no evidence of a strategy compliant solution. The Council ascribes a capacity of 200 dwellings to the site. It is unclear how the Council has reached these conclusions given its assessment of the site undertaken just nine months prior, and considering the site-specific mitigation strategy for protected birds has the support of Natural England and the Council's ecologist via the planning application process.

1.0 INTRODUCTION AND SUMMARY

1.1 Southern Planning Practice are instructed by Raymond Brown Minerals & Recycling Ltd (Raymond Brown), to submit representations to the Regulation 19 version of the Fareham Local Plan 2037. Raymond Brown is acting on behalf of the two landowners, Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd (please see attached land ownership plan).

1.2 Raymond Brown is part of the Raymond Brown Group, a leading recycling and waste management business and distributor of primary and recycled aggregates for use in construction applications. One of their sites is at Rookery Farm, Fareham. The land is located immediately north of the M27 motorway and to the west of Whiteley. Access is from Botley Road, approximately 100m north of the bridge over the M27.

1.3 The Local Plan, as drafted, is assessed to be UNSOUND and also fails to comply with the Duty to Co-Operate. These representations set out the reasons why: -

1. the Plan is considered to be UNSOUND and

2. fails to comply with the Duty to Co-Operate

and sets out the steps that require to be taken to make the Plan SOUND.

1.4 Separate representation forms have been submitted against each policy and paragraph which is considered to be UNSOUND, but the case to be made is set out in full in this document.

1.5 In summary, OBJECTION is raised to Strategic Policy H1 Housing Provision on the grounds that the figures promoted are not soundly based or justified. This is addressed in detail in Section 2.0. Objection is also raised to the allocation of a number of the housing sites in that they are not suitable, and /or available and/or achievable, particularly within the Local Plan period. This is addressed under Section 3.0.

1.6 Section 4.0 sets out why Land at Rookery Farm should be allocated as a Housing Site to start to address the issues identified in Sections 2.0 and 3.0. Section 5.0 draws these matters together with consideration of modifications that are required to be made to the Plan

to ensure that it is SOUND and will provide a sound planning framework to deliver the much needed housing over the Plan Period.

- 1.7** It is concluded that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.
- 1.8** Objections are therefore raised to Policies H1, FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13 and the omission of an allocation for housing for Rookery Farm, Botley Road, Fareham. Objections are also raised to paragraphs 3.19 (including Figure 3.1) as well as paragraphs 4.1 – 4.20 including Tables 4.1, 4.2 and 4.3.

2.0 OBJECTION to Strategic Policy H1 – Housing Provision

Overview

2.1 The objections to this Policy are several and are addressed individually below. The individual and cumulative failings render the policy UNSOUND and as Strategic Policy H1 forms the basis for the provision of much needed housing across the whole Borough, it follows that the whole Plan is rendered UNSOUND. It should be noted that although the issues have been subdivided into several sections, many of the issues interrelate and cumulatively exacerbate the conclusions drawn that the Council is failing to provide properly for its housing need.

2.2 The objections to this Policy include:

- (i) The Housing Numbers used and in particular the reliance on the draft Standard Method set out in the Changes to the Current Planning System in the Government’s White Paper;
- (ii) Duty to Co-Operate and Unmet Need – Fareham has not undertaken this Duty in a sound manner;
- (iii) Additional factors Contributing to the Shortfall, including the 5 year Housing Land Supply Position;
- (iv) Over-reliance on Welborne to provide a significant proportion of Fareham’s housing which is considered unachievable, resulting in a need for more sites to be allocated;
- (v) Inability to meet the identified Affordable Housing Provision;
- (vi) Over-reliance on Windfall allowance

2.3 Before analysing the approach adopted by Fareham, it is first worth reviewing the clear guidance on the approach to be followed as set out under the National Planning Policy Framework (NPPF) and the Planning Practice Guidance (PPG). It is important to note that the NPPF makes it clear that “*strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas*” (Paragraph 11).

2.4 Paragraph 60 builds on this and states that “*To determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional*

circumstances justify an alternative approach which also reflects current and future demographic trends and market signals. In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.” This clarifies how the housing numbers calculated by the standard method should be considered when preparing a Local Plan. Paragraph: 004 (Reference ID: 2a-004-20190220) of the Planning Practice Guidance confirms that the standard method should be used to calculate a **minimum** (emphasis added) housing need figure.

2.5 In addition to the Borough’s own housing needs, as acknowledged by the draft Local Plan, its housing figure needs to incorporate the needs of neighbouring authorities. Paragraph 35 a) of the NPPF sets out that in order for a plan to be sound it must be positively prepared *“providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs (our emphasis); and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development”*.

2.6 The following sections demonstrate how Fareham has failed to follow this clear guidance with the result that Strategic Policy H1 and the Plan is UNSOUND.

i) Housing Numbers: Reliance on the Standard Method set out in the ‘Changes to the Current Planning System’ White Paper.

2.7 The Publication Draft correctly points out at Para 4.2 that *‘Local housing need should be determined by using the Standard Method set out in national Planning Practice Guidance (PPG). This Method currently combines 2014-based household projections with affordability data released in March 2020 to calculate the annual need. Using this method, the housing need for Fareham currently stands at a minimum of 514 dwellings per annum (dpa).’*

2.8 Fareham, however, has chosen to use the new Standard Method set out in the ‘Changes to the Current Planning System’ White Paper, which was published on 6th August 2020 with consultation closing on 1st October 2020.

2.9 Para 4.2 of the Publication Draft explains why the Council has ‘jumped the gun’ and used the draft new Method:

'The Council therefore considers it appropriate for this Publication Local Plan to plan for a scale of growth based on the proposed new Method, and not one based on out-of-date household projections. This reduces the housing need figure to 403 dpa, based on a base date of 2021. The new Method would be introduced with a change to the PPG and the timing of submission of this plan for examination will be determined by the precise wording of the government policy.'

- 2.10** ON 16 DECEMBER 2020, GOVERNMENT ANNOUNCED THEIR RESPONSE TO THE 'CHANGES TO THE CURRENT PLANNING SYSTEM' WHITE PAPER AND PUBLISHED REVISED PROPOSALS FOR ENABLING THE DELIVERY OF MORE HOMES ACROSS ENGLAND. IT IS UNDERSTOOD THAT GOVERNMENT WILL NOT NOW PROCEED WITH THE DRAFT NEW STANDARD METHODOLOGY ANNOUNCED EARLIER IN THE YEAR AND ON WHICH FAREHAM HAS BASED ITS HOUSING NUMBERS. INSTEAD, THE GOVERNMENT HAS ANNOUNCED THAT IT WILL CONTINUE TO RETAIN THE STANDARD METHOD IN ITS CURRENT FORM WITH THE ADDITION OF A 'TOP-UP' APPLICABLE TO ENGLAND'S 20 LARGEST CITIES. PLEASE SEE LINK:

<https://www.gov.uk/government/consultations/changes-to-the-current-planning-system/outcome/government-response-to-the-local-housing-need-proposals-in-changes-to-the-current-planning-system>

- 2.11** It follows that the only basis that Fareham can and should proceed at the current time is to use the existing Standard Method which would result in an uplift in its dwellings per annum (dpa) from 403 to at least 514.

ii) Duty to Co-Operate and Unmet Need from Neighbouring Authorities

- 2.12** Fareham Borough Council is a member of the Partnership for South Hampshire (PfSH). In September 2019, Fareham Borough Council and Havant Borough Council together with all the authorities of the PfSH published a Statement of Common Ground (SOCG). The SOCG sets out how the local authorities in South Hampshire have successfully worked together on strategic planning matters and how they continue to do so. As part of the Local Plan Review, a Statement of Compliance with the Duty to Cooperate has been produced. This is in accordance with Paragraph 24 of the NPPF. This confirms that the Council is proposing to

take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution (Paragraph 4.6).

2.13 Fareham Borough Council is identified as being within the Portsmouth Housing Market Area (HMA). The PfSH Strategic Housing Market Assessment (SHMA) indicates an overall objectively assessed need figure of 121,500 dwellings, over the whole PfSH area from 2014-2036. It should be noted that the SHMA was prepared in January 2014 and the identified housing need is not based on up to date figures, therefore its housing numbers are considered to be out-of-date. The SOCG acknowledges that the housing need figures within the PfSH Spatial Position Statement (SPS) (2016) are not in accordance with standard methodology set out in NPPF (2019). The SPS is being reviewed to bring it in line with updated development needs. However, there is no indicative timescale for the SPS review and given the recent Housing White Paper, such a statement is unlikely to come out ahead of the submission of the Fareham Local Plan.

2.14 One key issue arising for the PfSH Portsmouth HMA/PfSH East (Portsmouth, Havant, Fareham, Gosport, Winchester) is the challenge of delivering sufficient homes to meet the housing need of the area given the significant geographical constraints and nationally important environmental and landscape designations. It is acknowledged that some authorities within the PfSH East area are more constrained than others. Portsmouth, Havant and Gosport are all physically constrained as well as having coastal environmental designations, to varying degrees. Therefore, as Fareham Borough is less constrained and physically has the space to provide housing in addition to its own need, the Borough should look to accommodate unmet need from neighbouring authorities.

2.15 It is acknowledged that Portsmouth cannot meet its housing need and a key role of PfSH has been to consider the capacity of other local authorities in the PfSH area which could contribute to accommodating the unmet need arising from Portsmouth. As acknowledged, Fareham Borough has relatively few constraints compared to its neighbouring authorities, indeed Fareham Borough has been identified as an area which can help to accommodate the unmet need arising from Portsmouth. Paragraph 4.5 of the Publication Plan confirms that Portsmouth City Council have asked Fareham to contribute 1,000 dwellings to their unmet need. It also confirms that there is likely to be an unmet need arising from Gosport and Havant (this is now emphasised in Table 1, if the standard new method were applied). However, Fareham have only included 847 dwellings in the total housing requirement to

contribute to the unmet need of neighbouring authorities. This figure is alone not enough to provide for Portsmouth’s unmet need, never mind the other authorities within the PfSH East area. It is evident therefore that the plan is not appropriately planning for unmet need arising from neighbouring authorities and has not been positively prepared in accordance with paragraph 35 a) of the NPPF. It is therefore unsound.

2.16 The following table looks at the housing need per annum for all the authorities within the PfSH East area. It sets out the current local plan requirement, the average delivery rate over the last 3 years, the housing figure under the current standard methodology and the housing figures under the proposed new standard method set out in the August 2020 consultation ‘Planning for the Future’ White Paper. It should again be noted that Fareham Borough Council are using the housing need figure calculated by the proposed new standard method set out in the White Paper, not the current standard method required by the NPPF.

PfSH East	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard method	Proposed new standard method (at August 2020)	Change in housing requirement under SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1,025	+333
Total	1,804	1,828	2,802	3,430	+628

Table 1 – Housing need per annum and delivery rates for authorities within PfSH East

2.17 It is also pertinent to note that whilst Fareham has chosen to adopt the draft new Standard Methodology for its own figures, it has not acknowledged the implications arising in terms of the Duty to Co-operate and that there is a significant uplift overall in the housing requirements, including for those authorities potentially already struggling, including Havant and Gosport.

2.18 In Summary:

- No Local Authority in the PfSH East area is currently planning for enough homes to meet their identified need.
- Whilst the housing need as calculated by the proposed new standard method (August 2020) for Portsmouth and Fareham has slightly reduced from the current standard method, the housing need for Gosport, Havant and Winchester has significantly increased. This has resulted in an increase of just over 600 dwellings per annum in the PfSH East area.
- No Local Authority in the PfSH East has been able to deliver their housing need as required by the current standard method in the last 3 years.
- The total housing need in the PfSH East area under the proposed new standard method is far higher than the previously identified housing need.

iii) Additional Factors affecting Fareham's Housing Numbers

2.19 Table 1 (Housing need per annum and delivery rates for authorities within PfSH East) confirms that no Local Authority in the PfSH East area has been able to deliver their housing need as required by the current standard method in the last 3 years. There could be several explanations for the authorities not meeting their housing need including reliance on large sites not coming forward or delivering at the rate they should, not appropriately planning for the homes they need and the recent Solent nitrate issue could all be contributing factors.

2.20 In June 2020, Fareham published their 5 year housing land supply position. At this time, Fareham had a supply of 2.72 years. This supply obviously falls substantially below the government's requirement of a 5 year supply, as set out in Paragraph 73 of the NPPF. After reviewing the housing supply, as set out in the 5 Year Housing Land Supply Report, it is apparent that the Council remains reliant on a few large housing sites coming forward to contribute to the housing land supply in future years.

2.21 As such, Fareham Borough Council should look to bolster their supply through the allocation of a range of sites as encouraged by the NPPF.

2.22 To be able to meet the increased housing needs in a sustainable manner, and to maintain a 5 year supply of deliverable housing sites across the Plan period, the Council must look to

all tier settlements in the hierarchy to deliver homes through a range of sites. However, it should be noted that strategic sites should not be solely relied on due to lengthy lead in times. Instead, a mix of housing sites should be sought and allocated to enable a 5 year supply to be achieved and maintained.

2.23 In addition to bolstering the supply going forward, Fareham need to seek to address the backlog of unmet need. In particular, the South Coast Nitrate crisis put thousands of homes on hold for some time to resolve the eutrophication issues of the Solent to reduce impact on the protected habitats and species. The Nitrate Neutrality Update Report to PfSH Joint Committee (14 October 2019) acknowledged that *“given that there is a severely reduced number of permissions being granted in the PfSH in the financial year 2019/20, it is not unnecessary to assume that the delivery of homes will be suppressed in the years 2020/21 and 2021/22.”*

2.24 The submission Local Plan is very conservative in its ambitions for growth in the Borough, especially considering it is under a Duty-to-Cooperate to meet neighbouring authorities’ unmet need. It does not allocate many new sites and instead relies heavily on sites that have been allocated previously. Strategic Policy H1 confirms this, as the provision for 8,389 homes comprises the following:

- 552 homes already with planning permission
- 4,858 homes on sites with resolution to grant permission (Welborne contributes the large majority of these homes)

2.25 Therefore, around 65% of the housing provision already has planning permission or resolution to grant, meaning the Local Plan only allocates sites for approximately 1,750 homes for development over the plan period despite only 2.72 years of housing land supply and a record of under delivery in the Borough. It is of note that nearly 50% of the housing provision is reliant on the Welborne allocation. If this allocation is not to come forward in the plan period due to funding issues, or be significantly delayed, Fareham’s housing provision will be significantly reduced and identified housing needs will not be met. As such, the emerging Local Plan MUST look to allocate further sites accordingly.

2.26 Reflecting the above the application of a 15% contingency as shown under Table 4.3 and explained at paragraph 4.12 of the Plan appears woefully inadequate.

iv) Over Reliance on Welborne Garden Village

- 2.27** Fareham is relying very heavily on one strategic site to deliver almost 50% of its housing provision, namely Welborne Garden Village. Of the supply identified in Table 4.2 relating to Strategic Policy H1, some 4,020 of the overall provision of 8,389 is to come from this one strategic site. This is flawed and potentially undeliverable. Following a resolution to grant planning permission in October 2019 for the outline planning application under Ref: P/17/0266/OA, the Section 106 agreement has still not been signed and therefore planning permission has not yet been issued. According to the Council's website and details held on the outline planning application, a decision is due by 8th January 2021.
- 2.28** The Delivery Report¹ on Welborne Garden City sets out that up to 750 homes will be delivered in the first 5 years. However, this figure appears highly unrealistic and unachievable as set out in more detail below; in addition, the site cannot be developed until funding is secured for Junction 10 of the M27.
- 2.29** On 14 January 2020, Hampshire County Council published an Executive Decision Record on the M27 Junction 10. It confirmed that the progression of work on the Full Business Case is at an impasse, and it is understood that HCC were terminating the role as scheme promoter to avoid abortive work or expenditure, pending resolution of funding and delivery arrangements of the scheme.
- 2.30** The delivery of the Garden City is suggested to be over a 20 year period, with on average 300 dwellings a year being completed. It would be expected higher delivery in early years, lower delivery in later years. As acknowledged, the submission Local Plan relies on approximately 4,000 homes from Welborne coming forward in the plan period.
- 2.31** With regards to the delivery of the site, a key point of note is in the Council's latest 5 year Housing Land Supply (HLS) Position Statement (June 2020). This statement sets out, at paragraph 29, that the site promoter anticipates commencements/completions at Welborne to occur approximately two years later than that set out within the information supporting the

¹ Page 83 of the Delivery Document <https://welboregardenvillage.co.uk/delivery/>

planning application. It is acknowledged that the site promoter has advised the Council of the following anticipated delivery rate:

- 30 dwellings in 2022-23
- 180 dwellings in 2023-24
- 240 dwellings in 2024-25

2.32 The above figures indicate that Welborne can only deliver 450 homes in the next 5 years, up to 2025. This is already a significant drop from the figure set out in the original planning application which was suggesting the delivery of 750 homes within 5 years of commencement. If Welborne can only deliver 450 homes in the next 5 years, it seems an impossible task to deliver the remaining circa 3,550 over the remaining 12 years of the plan period.

2.33 In addition, given the current lack of funding for the access, the anticipated delivery seems highly unlikely and this will have a dramatic effect on Fareham's 5 year HLS and securing its overall housing provision. Therefore, it is considered that relying on one site to deliver a significant number of houses is a high risk strategy. As such, a greater range of sites should be considered.

v) Affordable Housing

2.34 Paragraph 4.3 of the draft Local Plan confirms that '*The need for affordable housing in the Borough is based on the number of existing and newly formed households who lack their own housing and cannot afford to meet their housing needs in the market*'. The Council goes on to state that it is confident that it will meet its affordable housing needs through the provision based on its Policy HP5 and it does not need to make any further adjustments to its overall housing figures.

2.35 However, paragraph 5.29 of the draft Local Plan indicates that one of the key issues facing residents in the Borough is the unaffordability of homes to buy or to rent, and that therefore the delivery of homes that are affordable is a priority. The Council's Affordable Housing Strategy 2019 – 2036 (2019), as referenced at paragraph 5.30 of the draft Local Plan, indicates that there is a need for some 3,500 affordable homes up until 2036. It is not clear how the housing number can and will meet the identified affordable housing demand.

2.36 Key concerns include:

- The reliance on the number of houses, including affordable housing, to be delivered by Welborne. The very real concerns over the deliverability of housing from Welborne has already been addressed; the issues identified have a consequential impact on the delivery of affordable housing;
- The heavy reliance in terms of the overall housing provision on windfall sites, many of which are likely to fall under the threshold of 10 or more dwellings and therefore not deliver any affordable housing;
- The reliance on a range of allocated sites (Section 3) which appear to be aspirational rather than realistic and therefore again the impact on the provision of affordable housing.

2.37 The Council fully recognises its substantial affordable housing need across the Borough over the Plan period but it is simply not at all clear that the numbers required can be met under the housing provision being made. It is therefore concluded that the very clear potential that the need for affordable housing in the Borough will not be met leads to a need to increase the overall housing requirement.

vi) Windfall Allowance

2.38 Part of the Housing Provision is to be met through unexpected (windfall) development. There is no issue in principle with including an allowance for windfall development, but that figure must be realistic and based on evidence.

2.39 The NPPF defines windfall sites as 'sites not specifically identified in the development plan'. Paragraph 70 of the NPPF sets out that where an allowance for windfall sites is to be made, there should be compelling evidence that they will provide a reliable source of supply, using the strategic housing land availability evidence, historic windfall delivery rates and expected future trends to support such an allowance.

2.40 In this case the Council is relying on 1,224 new homes to come through windfall development out of total of 8,389 new homes. Whilst it is appreciated that the methodology for calculating windfall allowances have changed over time, it is worth noting that in the current adopted Local Plan Part 2: Development Sites and Policies (2015), the average historic windfall

allowance was calculated to be 20 (Appendix F). In the 5 Year Housing Land Supply Position Paper to Planning Committee on 24 June 2020, the Council included a small site windfall allowance of 37 dwellings for each of 2 years (years 4-5).

- 2.41 In the draft Local Plan the reliance on windfall sites has jumped to 1224 which if crudely divided by the length of the Plan period (16 years) gives an annual figure of 76.5. There is no explanation to justify such an over reliance on windfall figures.

Conclusions in respect of Strategic Policy H1

- 2.42 It is clear that there are fundamental concerns over many aspects of the Council's housing provision which have been explored in this Section. There can only be one conclusion that the provision is woefully inadequate and is **UNSOUND**.

3.0 Analysis of Housing Allocations

- 3.1** The Council has allocated and is relying on a number of ‘development’ sites to assist in the delivery of and in meeting its housing provision. However, the suitability, availability and achievability of several of these sites needs to be questioned and whether they can and will deliver the number of units proposed. It is acknowledged that these sites are not proposed for delivery of housing numbers in the early years of the Plan but it must still be questioned whether there is sufficient confidence that these sites will be brought forward, that they should be included in the plan.
- 3.2** This analysis has only focussed on the medium to larger of the sites, most of them proposing to bring forward in excess of 50 units and there may well be serious issues of suitability, availability and achievability with some of the smaller sites. It is noted that at least 9 of the sites are indicated to make provision for less than 10 units. It is unusual for sites yielding such a small number of units to be included as specific allocations; it begs the question as to whether the Council has needed to bring in such small sites to secure its numbers.
- 3.3** The number of sites where there are serious concerns and questions over their suitability, availability and achievability total at least 6, which in total would provide some 400 – 500 residential units. These sites are addressed below, and the order selected simply follows the order in which they are listed on pages 39 – 40 of the draft Plan and then considered in further detail under site specific policies.

FTC1 Palmerston Car Park (Indicative Dwelling Yield: 20) (SHELAA ref: 3233)

- 3.4** This is a constrained town centre car park site and the development of housing will be constrained by issues of noise and disturbance from the surrounding roads as well as the service access to the Shopping Centre. The setting of the adjacent Osborn Road Conservation Area to the north will need to be preserved. The Council is keen, under other policies to safeguard and promote Fareham town centre as its principal town centre but there appears to be no co-ordinated car parking strategy to ensure that the loss of existing car parking sites will not compromise those objectives.

- 3.5** At the very minimum the proposal that this site can deliver up to 20 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC2 Market Quay (Indicative Dwelling Yield: 100)
(SHELAA ref: 1425)**

- 3.6** This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 60 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 100 units. The site is also expected to deliver approx. 4000 sqm of commercial leisure space together with a new multi storey car park and new town square. The future and viability of town centre strategies may need a comprehensive review in a post Covid era. The site specific requirements also make reference to the possibility of a hotel which presumably, if brought forward, would impact on the achievement of other elements of the proposal, including the residential. There is no indication that there is any real prospect of bringing the site forward over and above aspirational objectives.

- 3.7** At the very minimum the proposal that this site can deliver up to 100 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC3 Fareham Station East (Indicative Dwelling Yield: 120)
(SHELAA ref: 0211)**

- 3.8** There are fundamental questions about the suitability and achievability of this site for the intended development. This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 90 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 120 units. Such an ambitious scheme would appear to depend on a comprehensive approach, particularly given the limited access options. Yet, even the SHELAA assessment identifies that the site is in multiple commercial and industrial uses, including railway related uses which brings into question site assembly issues both in terms of achievability and timing.

- 3.9** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC4: Fareham Station West (Indicative Dwelling Yield: 94)
(SHELAA Ref: 0212)**

- 3.10** This is a long and very narrow site sandwiched between the railway to the east and protected trees to the west. The allocation and the SHELAA recognise the multiple constraints facing this site in terms of bringing it forward for development. These constraints include, amongst others, the multiple uses existing on the site, the access constraints including that the existing access crosses land in Flood Zone 2, noise, contamination and amenity issues.

- 3.11** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC5: Crofton Conservatories (Indicative Dwelling Yield 49)
SHELAA Ref: 1325**

- 3.12** This site continues to be in active retail use, following the expiry of a temporary permission for retail use and the potential availability of the site is questioned.

**HA7: Warsash Maritime Academy (Indicative Dwelling Yield 100)
SHELAA Ref: 3088**

- 3.13** This site has a long history and has been carried forward from the Local Plan Part 2. The site faces considerable issues in terms of bringing forward a suitable and viable housing development, not least of which is that the western part of the site must be excluded from development because of flooding issues and discussions with Natural England would potentially exclude further land to secure appropriate buffers to sites of international nature conservation significance. As a result, the majority of the development and residential units

would necessarily be brought forward through the conversion of the existing listed buildings on site, potentially impacting on viability.

- 3.14** The site lies in the countryside and is remote from shops and facilities. There are traffic problems along Newton Road which is the only access solution leading to Warsash Centre and up to Park Gate where permission exists for some 800 residential units.
- 3.15** The viability and achievability of this site for some 100 residential units must therefore be questioned.
- 3.16** Due to the ecological and highway issues the Council has determined that any planning application should be submitted with an EIA.

HA13 Hunts Pond Road (Indicative Dwelling Yield 38)

SHELAA Ref: 305

- 3.17** Under the Local Plan Part 2 this site was allocated under Policy DSP53 for Community Uses as part of a larger scheme to include education and open space. It is understood that the site is no longer required by Hampshire County Council for educational purposes, but there is no confirmation that a proper assessment has been undertaken of the continued need of this land for local community uses.

HA4 Downend (Indicative Dwelling Yield 350)

SHELAA Ref 3030

- 3.18** Site HA4 at Downend for some 350 residential units has been the subject of two planning applications both of which were refused against officer recommendation. The first planning application was dismissed at appeal justifying the council's reason for refusal. It is likely the second application which was refused in November 2020 will be appealed however, the committee's stance in terms of determining both applications on this site brings into question whether the council really support this housing allocation. It is therefore questioned whether the Council should be relying on the site as a housing allocation which the Council has found, in the form of the most recent applications, wholly unacceptable.

Other Sites

- 3.19** There are potential constraints with a number of the other sites, which may at the very least delay their delivery or even bring into question their achievability. Site FTC6, Magistrates Court at Fareham and allocated for some 45 units is held up by a complicated deal to resolve the nitrates issue, involving land within Winchester District.

Conclusions and Implications Arising

- 3.20** This analysis demonstrates that there are serious and substantial questions over the suitability, availability and achievability of a number of the allocated sites and whether they will be able to provide the housing figures, either in whole or in part which Fareham is seeking to rely upon. It is therefore contended that it is UNSOUND for Fareham to rely on each and all of these housing sites to deliver all of the dwelling units proposed
- 3.21** This adds to the strength of the argument, as set out under Section 2, that Fareham needs to bring forward additional sites for allocation to help meet its housing need. The next section focuses on why land at Rookery Farm should be included as a housing allocation in the Local Plan.

4.0 Rookery Farm

4.1 It is clear from Sections 2.0 and 3.0 that not only has Fareham under provided on the housing figures it requires to meet over the Local Plan period, but it is very unlikely that it will be able to deliver even the numbers it is proposing to provide. Fareham therefore needs to allocate further housing sites to improve housing deliverability; Rookery Farm should be allocated as a housing site. This was allocated in the draft Reg 18 Supplement in early 2020 under the Policy Reference HAX (SHELAA ref: 0046).

Site Location

4.2 The site is located immediately north of the M27 Motorway and west of Whiteley. Access is from Botley Road approximately 100m north of the bridge over the Motorway. Please see attached site plan showing the land forming part of the proposed development area. It is estimated at this early stage that the site could accommodate in the region of 150-200 residential units including an element of affordable housing and a mix of housing types to accord with Fareham's policies and approach to housing mix.

4.3 146 Botley Road (also known as Rookery Farm) lies to the north of the land and is in separate private ownership. The dwelling is listed. Residential development along Swanwick Lane lies further to the north.

4.4 The residential development of Whiteley is to the east. To the south are the local centre at Park Gate and the railway station at Swanwick, both within easy walking distance of the site.

4.5 Rookery Avenue is opposite the access to the site. At present this is a cul de sac however there is a safeguarded road extension to continue Rookery Avenue into Whiteley, linking Botley Road to the Parkway South roundabout.

4.6 To the south of the site is a vehicular and pedestrian bridge that provides access to residential properties at Bridge Road.

The Site

- 4.7** The site as a whole occupies approximately 20.05 Ha of land accessed from Botley Road just to the north of the M27 Motorway. The front part of the site is visible from Botley Road however the access road, which is between an earth bund to the north and embankment to the south, drops to a lower central area where aggregate recycling has, until recently, taken place.
- 4.8** Adjacent to the motorway is a large embankment created by historic land raising. The central part of the site comprises a relatively flat operational area where recycling materials have been stockpiled. To the north is the Orchard where the land gradually drops towards the rear of properties fronting onto Swanwick Lane.
- 4.9** At present due to the change in levels and the surrounding housing only the front part of the site adjacent to Botley Road is visible from outside the site.
- 4.10** The site at present has two principal landowners Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd, with Raymond Brown acting on their behalf

Site Planning History

- 4.11** Rookery Farm was originally a fruit farm and some evidence of this former use is still evident in an area of remnant orchard to the north-west of the site. Part of the site adjacent to the M27 has been land raised and restored to grazing land. This forms a large embankment which screens the central part of the site from the M27 and Botley Road.
- 4.12** Planning permission was first granted on appeal in 1987 (APP/Z1700/A/55/049143) for the infilling of agricultural land with c.1.3 million cubic metres of construction and demolition wastes with restoration to agricultural use. Tipping commenced in 1988 and temporary planning permission for waste recovery (recycling) was granted in 1995.
- 4.13** A further temporary planning permission for the inert waste recycling operation was granted in 2006 (P/06/0443/CC), time limited to expire in 2021. This permission introduced an expiry date for land raising operations of 31st December 2026.

- 4.14** In 2014, planning permission (P/14/0857/CC) was granted for the permanent retention of the aggregate recycling facility. In 2016 (P/15/1213/CC) and 2018 (P/18/0978/CC) planning permission was granted which, in effect, extended the validity of the development pursuant to planning permission P/14/0857/CC until 25 October 2020. This date has also since been extended by way of The Business and Planning Act 2020 to 1 May 2021.
- 4.15** Details pursuant to the remaining pre-commencement conditions are to be submitted to Hampshire County Council for approval in January 2021. Following discharge of these conditions and implementation of the permission, conditions relating to restoration associated with the earlier land raising permissions fall away leaving just the permanent recycling use. The site will subsequently, in planning terms, predominately formally become previously developed (brownfield) land.
- 4.16** Note there have been no minerals operations at the site and any changes to the landscape are as a result of land raising, not from extraction activities.
- 4.17** The main body of the site is currently safeguarded for aggregates recycling in the Hampshire Minerals & Waste Plan. Hampshire County Council have indicated that there is overcapacity for inert waste recycling at present. As such if the site was to be allocated for housing then the safeguarding status would be reviewed.
- 4.18** It should be noted that in its comments on the draft Plan 2020 (Regulation 18 Draft Local Plan 2036 Supplement) when the site was allocated for residential development, Hampshire County Council as Minerals and Waste Authority advised:

Hampshire County Council has concluded that sufficient aggregate recycling capacity is currently in place to deal with the additional waste and as such no objection to this allocation will be raised

Site Appraisal

- 4.19** It is noted that the site was found to be a developable housing site within the Fareham Local Plan 2036 Strategic Housing and Employment Land Availability Assessment (SHELAA) December 2019, but subsequently discounted as unsuitable in the Fareham Local Plan 2037

Strategic Housing and Employment Land Availability Assessment (SHELAA) September 2020.

- 4.20** In considering the site developable, the SHELAA (2019) makes the following comments regarding suitability of the site:

‘Overall suitable for housing development. Further work required to ascertain an appropriate development structure and net developable areas, having regard to site ground conditions, drainage, habitat surveys, movement connections and retention of existing cover of woodlands, trees and hedgerows. Eastern part of site has good pedestrian accessibility to existing local services. Potential scope to include a small convenience store to improve sustainability of main core of the site. Suitable highways improvements required, with linkages to surrounding movement networks. Potential impact of noise and air quality to be assessed and appropriately mitigated’.

- 4.21** In subsequently discounting the site, the SHELAA (2020) makes the following comment regarding reason for discounting the site as un-developable:

‘Site topography and boundary likely to create isolated cul de sac development. Main developable area of the site is not well related to existing settlement and is relatively isolated from local services’.

- 4.22** The reasoning behind the change in conclusion reached by the SHELAA (2020) is unclear as there has been no substantive change in circumstances or new information related to the site not previously provided to the Local Planning Authority. Furthermore, the SHELAA (2020) attributes the same 8 out of 10 score for accessibility to facilities from the site as the SHELAA (2019), recognising the inherently sustainable location adjacent the urban area of Swanwick, the proximity to Swanwick Railway Station and nearby shops/amenities. As identified in the SHELAA (2019) suitability summary, if necessary, sustainability of the main core of the site could further be improved via development of a small convenience store in-situ.

- 4.23** Paragraph 4.28 of the SHELAA (2020) states that *‘the information from the SHELAA forms an important part of the evidence base for the Local Plan 2037, providing a source of developable sites which are suitable for future development needs, available within the plan*

period and viably achievable. Developable sites which can be brought forward under the Council's development strategy will contribute to the housing and employment supply for the Local Plan 2037...'

4.24 Paragraph 3.21 of the Publication Version of the Fareham Local Plan 2037 states:

'3.21 The development strategy proposed by the Local Plan includes:

...Development allocations on previously developed land where available, and on greenfield land around the edges of existing urban areas in order to meet remaining housing and employment needs, but otherwise managing appropriate levels of development outside of urban areas'.

4.25 As the site should be considered to be previously developed/brownfield land, it is sequentially preferable for development based on the Council's Local Plan development strategy. Furthermore, paragraph 4.18 (Assessing Site Suitability) of the SHELAA (2020) states that 'sites outside the urban area will not necessarily be excluded as they could be considered alongside a review of urban area boundaries as part of Local Plan development...'

4.26 Paragraph 3.3 of the Background Paper: Settlement Boundary Review (September 2020) states that 'the reasons for establishing settlement boundaries include:

- *Directing development to more sustainable locations in terms of accessibility and proximity to public transport, and in terms of being well served by existing essential services and facilities'....*
- *'To assist in urban regeneration, by encouraging the re-use of brownfield land'.*

4.27 Considering the proximity of the existing Settlement Boundary to the site (approximately seven metres distance on the opposite (eastern) side of Botley Road), Rookery Farm site would represent an entirely reasonable and logical extension to the established urban area which would be in accordance with the development strategy contained within the Local Plan.

4.28 Cul de sac type development formats are well established and entirely functional residential layout present in the vicinity of the site. Such a development format would therefore reflect the prevailing development pattern and design vernacular and be sympathetic to existing

communities. Indeed a number of the sites put forward in the current draft plan would potentially result in cul de sac developments, including:

FTC3 – Fareham Station (120 dwellings)

FTC4 – Fareham Station West (90 dwellings)

HA3 Southampton Road (348 dwellings)

HA4 Downend Road (350 dwellings)

- 4.29** The site presently benefits from permanent planning permission for development and use for aggregate recycling. This is significant in terms of both vehicle movements and future development potential. Current planning permissions contain conditions limiting HGV movements to 240 per day, all of which utilise the current site access point on Botley Road. These authorised HGV movements would be replaced by domestic vehicle movements, substantially mitigating any perceived increase in road traffic on Botley Road. In addition, the imminent completion of the North Whiteley Link Road is anticipated to reduce vehicle movements on Botley Road. Without wanting to pre-empt the outcome of any Transport Feasibility Assessment, development of the site could also facilitate the development of the western end of the Rookery Avenue extension as there is space within the site to accommodate a roundabout.
- 4.30** Planning permission P/18/0978/CC includes for considerable earthworks to create extended and raised bunding to re-model the site and mitigate against noise impacts from the recycling use. A significant proportion of this re-modelling is on the south western boundary of the site. Such earthworks would be very similar in scale and form to those likely to be required to reduce noise levels from motorway traffic to appropriate levels for inhabitants of any future residential development on the site.
- 4.31** The Council has previously been furnished with a Phase 1 Contaminated Land Assessment and Slope Stability Assessment for the site, identifying that the embankment/land raise slope adjacent to the M27 is stable and that the site could be suitable for re-development in accordance with the indicative masterplan previously submitted.
- 4.32** Any future development scheme pursuant to an allocation would also include mitigation to address potential air quality concerns associated with proximity to the motorway. Such

issues can be effectively managed through building design and layout amongst other techniques.

4.33 The site comprises circa 20 hectares of land with a net developable area of circa 10 hectares. Significant land is therefore available within the land ownership for biodiversity enhancement, on-site nitrate mitigation and dedication to public open space.

4.34 The following points detail the benefits of residential development on the Rookery Farm site:

- Once the permanent recycling permission is implemented the site will become previously development land/brownfield and its development will reduce the need for more sensitive (greenfield) sites within the Borough;
- The site is in a highly sustainable location in proximity to a railway station and amenities, is deliverable and would provide necessary housing capacity within the Plan;
- It should be noted that in its response to the draft 2020 Plan (Regulation 18 Draft Local Plan 2036 Supplement) showing the inclusion of Rookery Farm, the County Council responded as follows:

This allocation is close to Swanwick railway station. The County Council supports the opportunity for this site to provide high quality walking and cycling routes to Swanwick station. This may include a new active modes bridge over the motorway and enhanced interchange at Swanwick Station with new local bus services. The development brief also needs to include provision for off-site improvements to address the inadequate bus, walking and cycling connections to the Segensworth business parks.

- Provision of Public Open Space on a former land raise site and access to it from existing footpath routes;
- Removal of a 'heavy industry' use from an otherwise residential setting;
- Would facilitate the Rookery Avenue extension. This would provide better access to the motorway, the industrial area of Whiteley and Whiteley District Centre;
- Opens up pedestrian links across the motorway to Addison Road;
- The site would not be visually prominent and would form a logical urban extension. Development could enable biodiversity enhancements associated with long-term habitat management plans and the re-instatement of a pre-existing stream across the site;
- The development would be offset by the loss of 240 HGV vehicle movements a day.

- 4.35** Were recycling operations to cease and land raising be completed, circa one million tonnes of waste material would need to be imported to the site before planning permission expiry in December 2026. This will impact the surrounding ambient environment through noise, dust and exhaust/plant emissions associated with operations and significant numbers of HGV movements.
- 4.36** Resumption and completion of land raising would also result in the site and location becoming permanently sterilised for future development. This is therefore a unique opportunity to re-develop the site to meet a real and urgent need to provide homes in the Borough.

5.0 **Modifications Required to the Plan to Make it Sound**

- 5.1. There is no need to revisit the arguments and issues which have been set out at length in the earlier sections and which demonstrate that the Plan as drafted is UNSOUND. The modifications required are set out below in bullet form. It will be immediately clear that the required work to ensure that the Plan is SOUND extends well beyond detailed amendments to drafted policy wording; a fundamental review of the Plan and the basis upon which it has been prepared is required.
- 5.2. The revised approach to the preparation of the Plan, with consequential implications for the redrafting of **Strategic Policy H1**, requires:
- a) A thorough reassessment of the Housing numbers using the Standard Method as set out under the PPG; it is premature to use the draft new Standard Method which Government has now formally abandoned. The only reason it has been used by Fareham is because it appears to provide a lower number of units required. This is clearly UNSOUND and for the plan to made SOUND, the current Standard Method must be re-used and those sites proposed for allocation in the Local Plan Supplement be included.
 - b) The Duty to Co-operate has not been undertaken properly and thoroughly; Fareham has underprovided in terms of meeting the needs of the adjoining authorities who are struggling to meet their housing needs, including Portsmouth, Gosport and Havant all of which are geographically very constrained. The exercise needs to be undertaken again to ensure that Fareham properly plans to accommodate the needs arising from surrounding authorities. It is worth noting that the under provision is made even worse if account were to be taken of the draft new Standard Methodology where the housing requirements of adjoining constrained authorities is increased; Fareham appears to have decided to ignore this implication arising from the new draft Standard Method.
 - c) The Council has a history of under delivery of housing figures and its 5 year housing land supply figure currently stands at under 3 years. On the basis that the NPPF and PPG are both clear that the housing provision numbers should be regarded as

minimum, and reflecting the above position, Fareham requires to be considerably more ambitious in terms of its overall housing provision figures.

- d) There is a very concerning over reliance on the achievability of so much of the housing provision from one site, namely Welborne Garden Village. This is even more of a significant issue given the fundamental difficulties that appear to be encountered over the funding and provision of the new motorway junction which is fundamental to the progress of the overall development. The amount of reliance that can properly be placed on the delivery of housing numbers from this one development needs to be reviewed and significantly reduced.
- e) There is also a potential over reliance on windfalls to deliver a significant proportion of the overall housing figures; this requires to be revisited with a downward adjustment.
- f) The Council is in very real danger of not being able to meet its affordable housing requirements, given all the constraints identified. The housing numbers and potential affordable housing provision requires to be recalculated with the need to increase the overall housing numbers if the affordable housing needs are to be met.

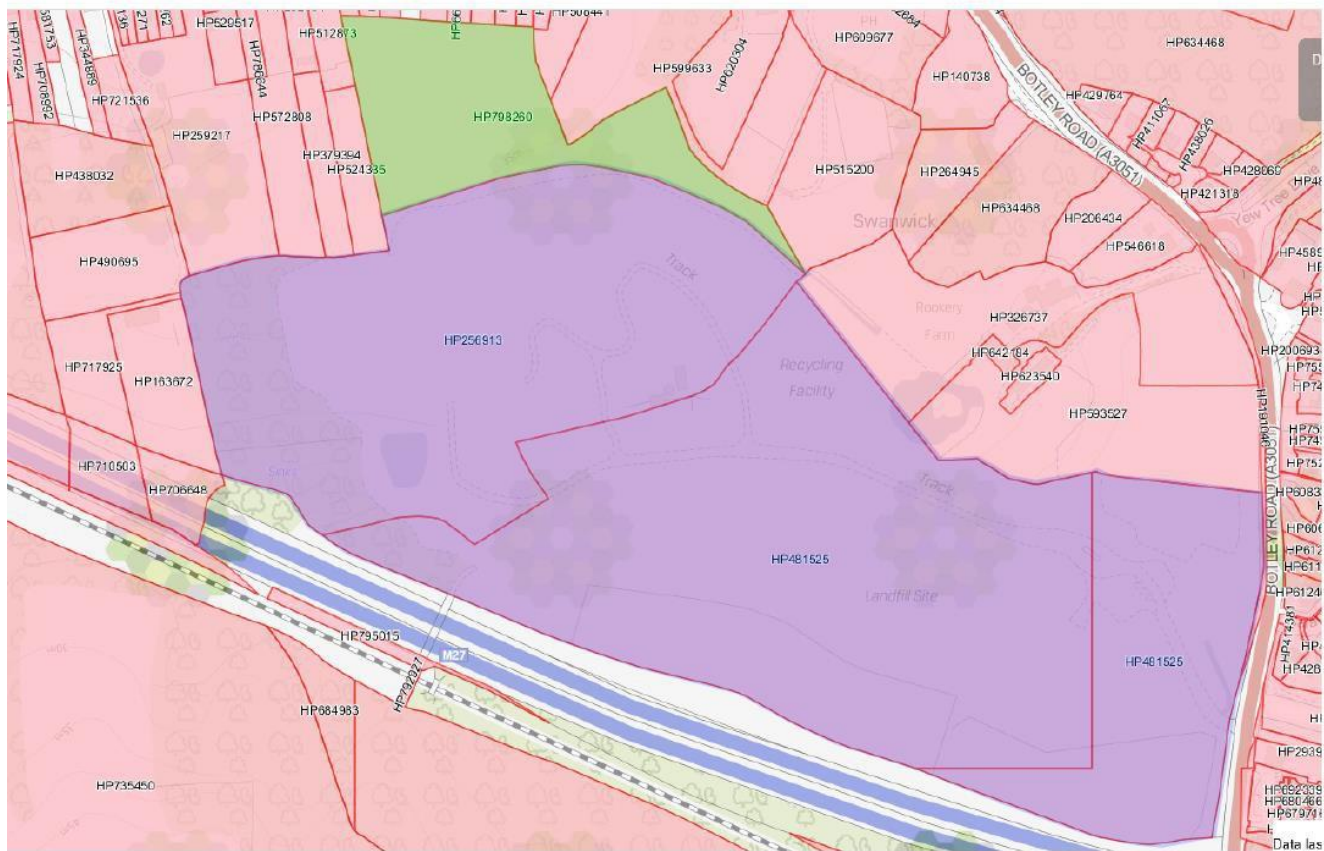

5.3 In addition to the above the Council also requires to re-address a number of its allocated housing sites, including at the very minimum **Sites FTC1, FTC2, FTC3, FTC4, FTC5, HA7 and HA13**. This reassessment in terms of suitability, achievability and availability is likely to reduce substantially the number of new dwelling units that can be achieved from these allocations.

5.4 The Council is clearly underproviding in terms of its overall housing numbers and the reliance it is placing on sites that face constraints and may not be achievable. The Council needs to make further allocations, and this should include Land at Rookery Farm which is suitable, available and achievable and subject to planning, deliverable within a 5 year period. The site has been considered suitable, available and achievable and was allocated in the Local Plan Supplement; the principal reason why it no longer appears as an allocation is because of the Council's unsound change in the methodology it is applying to calculate its housing numbers. **Rookery Farm should be reinstated as a housing allocation.**

- 5.5 It follows that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.

Para 1.28 In agreeing to take up a shortfall in homes of 847 from Portsmouth, Fareham Council are taking a risk as the new methodology for calculating Housing Need has not been signed off by the Government and the Housing Delivery test will not be available during this public consultation period.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

State that the final figures for Housing need in the Borough, including adjacent councils will be available once the new government methodology has been confirmed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The basis for Housing numbers would be supported by an accepted methodology rather than a proposed one

Your suggested revised wording of any policy or text:

Only PROVISIONAL figures for Housing needs are available in this Plan. The LPA will be able to provide final figures once the new methodology for calculation of OAHN is confirmed by the Government

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Richard Jarman (1712-211841)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.28 In agreeing to take up a shortfall in homes of 847 from Portsmouth, Fareham Council are taking a risk as the new methodology for calculating Housing Need has not been signed off by the Government and the Housing Delivery test will not be available during this public consultation period.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The government appear to be changing their mind on allocation of housing - Fareham has taken too much of a hit and should revisit the building targets.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would re-look at the housing targets for the region

Your suggested revised wording of any policy or text:

I have no revised wording or text

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

The LPA has relied on a recently-proposed (but not adopted) Central Government algorithm for deciding where houses should be located. As this has now been updated, with an emphasis on brownfield sites and sites in the North and the Midlands, the LPA needs to revise its methodology and calculations for Housing Needs in the Borough as a whole and in particular in strategic sites such as within Warsash and the Western Wards.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Timescales need to be re calculated based on new Housing Need Calculation

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Change all the dates to allow for new figures to be determined based on latest Central Government Methodology

Your suggested revised wording of any policy or text:

N/A - Plan needs complete overhaul in view of Housing Need calculations are Flawed!

Para 2.1 Statement of Community Involvement says a “variety of methods” should be used to solicit comments from the public. Planned paper based documents failed to be delivered to many residents across the borough, so a large proportion of residents were disadvantaged in preparing their comments on this plan. This was exacerbated by Covid restrictions, which limited public access to libraries and the council office. This is contrary to the legal obligation on the council to involve the community. Para 1.5 Introduction Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of ”Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents’ concerns regarding Fareham’s approach to planning have not been considered regardless of protest marches and endless deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board. Community generated evidence carries less weight than that provided by developer’s consultants and is therefore discriminatory. Residents challenged the previous use of land which plays a critical part in Nitrate budget calculations. At a recent appeal the inspector agreed with the views of residents and the appeal was dismissed. Similarly traffic survey results captured by Community Speedwatch teams and residents, demonstrate a huge discrepancy in the reality compared to the complex data presented by developers.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Public consultation in the true sense of the word needs to be demonstrated by this council. It should not be an 'ask then ignore' approach which at best, is all we have had since 2016. To facilitate a consultation process that a lay man would understand, communicating the proposals and implications with clarity and in plain English. The current process is complex, sometimes inaccurate and has the effect of discouraging engagement from residents, not because they don't want to but because they find the whole process off-putting, overwhelming and confusing. This Publication plan consultation is an example. It is important to overcome difficulties such as the current pandemic to ensure the public are not disadvantaged in consultations Its important to display policies and procedures in the public domain but equally important that this council follows its own guidance not changing the rules when it suits them Equal weight needs to be applied to all party's representation in planning decisions and this has to be evident to all concerned.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The council encourages public involvement, as it is legally required but feedback should be provided to objections, deputations and comments such as in this plan, even if not on an individual basis. At least the public will feel their contribution has been considered even if not adopted. Measures put in place to ensure the public are not disadvantaged during consultation, particularly in the face of adversity. Not everyone uses online technology. Application of the rules at all times should be a given. If the council's rules state a petition will trigger a debate at full council if it meets the required number of signatures, this should be applied. All evidence presented regardless of who presents it should at least be considered to carry equal weight by the council. Concerns over what may or may not happen if an application or consultation does not go the way the council want it to, shouldn't be a deciding factor. Communication of any documents that impact the public need to be written clearly and concisely. Not everyone is trained in planning law. This would help to fulfil the council's legal obligation to consult

Your suggested revised wording of any policy or text:

A 'variety of methods' used to solicit comments from the public should be expanded to 'ensure the material is easily understood.' Feedback on comments from members of the public should be provided as a matter of course. Innovative and reliable measures need to be in place to overcome unusual situations such as a pandemic, when face to face engagement is not possible, so that members of the public are not disadvantaged. Members of the public need to be clear about what they can expect when engaging with the council. A simple 'if you do this', 'we will do that' would suffice. The rules and guidance need to be executed correctly. The council needs to demonstrate how they have applied equal weight to the public's contributions and that of other representatives regardless of whether 'for' or 'against' a proposal.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: mr R A K Murphy (1812-13138)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

this particular town requires social housing , not properties for sale out of the reach of most young families or the disabled or veterans

What modification(s) is necessary to make the Local Plan legally compliant or sound?

replacing the affordable definition with one that aligns with reality

How would the modification(s) you propose make the Local Plan legally compliant or sound?

gets the result it aims for, not the building of cardboard houses

Your suggested revised wording of any policy or text:

provision of social housing , not affordable housing

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

having experience in property in various parts of the country, I can help achieve realistic results which the plan may not do

Respondent: Mr Richard Jarman (1712-211841)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 "Strategic Priorities" which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manoeuvre by stealth of the council, to suit its own objectives.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove the proposal to redefine the settlement boundary

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It will also the area to retain its identity, valued landscape and settlement definition

Your suggested revised wording of any policy or text:

I have no revised wording to suggest. I am not a town planner or lawyer.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mrs Hilary Megginson (1812-91342)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

The council needs to demonstrate how they have applied equal weight to the public's contributions and that of other representatives regardless of whether 'for' or 'against' a proposal.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

As the representative of thousands of local residents since 2016, there is a need for them to have a voice in decisions which impact their lives. Community involvement can easily be evidenced but consideration for their concerns and suggestions is absent and has been for years. The accuracy and undemocratic approach described in my submission is replicated in a number of other topics which will be covered in future iterations of this consultation, once a correct plan is presented. They include:- Housing allocations. In particular HA1 and distribution Habitats Directive. Is the LPA meeting its legal obligations? Settlement definition. Contrary to new standard methodology and policies. Movement of boundary to fit in development rather than selecting Urban areas for development Brownfield v Greenfield sites. Are we using it to the maximum? Carbon reduction. Lack of emission and improvement targets Infrastructure. Including environmental, amenity and traffic Predetermination of members 2 live Judicial Reviews against this council. An update.

Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 "Strategic Priorities" which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manoeuvre by stealth of the council, to suit its own objectives. Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Please provide details you have to support your answers above

housing on flood plains and marshland not identified

What modification(s) is necessary to make the Local Plan legally compliant or sound?

excluding unsuitable sites

How would the modification(s) you propose make the Local Plan legally compliant or sound?

remove the property speculators ability to sell cardboard houses on marshland to gullible buyers

Your suggested revised wording of any policy or text:

all sites have been tested for poor drainage and toxic residues

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

As accountant for a large property company and having bought and sold houses, I can help the council close the loopholes used by companies in the in the borough over the last 40 years

1 INTRODUCTION

1.1 Introduction

- 1.1.1 These representations are submitted by Gladman in response to the current consultation held by Fareham Borough Council (FBC) on the proposed submission draft Fareham Local Plan (FLP). Gladman specialise in the promotion of strategic land for residential development and associated community infrastructure and has considerable experience in the development industry across a number of sectors, including residential and employment development. From that experience, we understand the need for the planning system to provide local communities with the homes and jobs that are needed to ensure residents have access to decent homes and employment opportunities.
- 1.1.2 Gladman has a wealth of experience in contributing to the Development Plan preparation process, having made representations on numerous local planning documents throughout the UK and having participated in many Local Plan public examinations. It is on the basis of this experience that the comments are made in this representation.
- 1.1.3 Prior to this consultation the Government published the Planning for the Future White Paper setting out proposals for how the Government wants to 'radically reform' the planning system. Central to the Government's proposals will be a simpler, more streamlined Local Plan making process. Consultation on the proposals ended on 29th October 2020. Subject to the outcomes of this process the Government has signalled its intent to make rapid progress toward this new planning system through the swift introduction of new legislation to implement the changes.
- 1.1.4 As the White Paper is only currently under consultation and there is currently uncertainty around timescales for moving towards a new Local Plan making process, this representation has been prepared against the backdrop of the current system. In progressing the FLP under the current system, the Council will need to carefully consider some of its policy choices and ensure that its evidence base is up-to-date and robust in light of changing circumstances and the changes brought about by the revised National Planning Policy Framework (2019).

2 NATIONAL PLANNING POLICY

2.1 National Planning Policy Framework

2.1.1 On 24th July 2018, the Ministry of Housing, Communities and Local Government (MHCLG) published the Revised National Planning Policy Framework which was subsequently updated in February 2019. These publications form the first revisions of the Framework since 2012 and implement changes that have been informed through the Housing White Paper, The Planning for the Right Homes in the Right Places consultation and the draft Revised Framework consultation.

2.1.2 The Framework (2019) introduces a number of major changes to national policy and provides further clarification to national planning policy as well as new measures on a range of matters. Crucially, the changes to national policy reaffirms the Government's commitment to ensuring up-to-date plans are in place which provide a positive vision for the areas which they are responsible for to address the housing, economic, social and environmental priorities to help shape future local communities for future generations. Paragraph 16 of the Framework (2019) states that Plans should:

- a) *Be prepared with the objective of contributing to the achievement of sustainable development;*
- b) *Be prepared positively, in a way that is aspirational but deliverable;*
- c) *Be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;*
- d) *Contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;*
- e) *Be accessible through the use of digital tools to assist public involvement and policy presentation; and*
- f) *Serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).*

2.1.3 To support the Government's continued objective of significantly boosting the supply of homes, it is important that the Local Plan provides a sufficient amount and variety of land that can come forward where it is needed, that the needs of groups with specific housing

requirements are addressed and that land with permission is developed without unnecessary delay¹.

- 2.1.4 To be considered sound at Examination the emerging Local Plan will need to meet all four of the soundness tests set out in paragraph 35 of the Framework (2019).

2.2 Planning Practice Guidance

- 2.2.1 The Government published updates to its Planning Practice Guidance (PPG) on 13th September 2018. The updated PPG provides further clarity on how specific elements of the revised Framework should be interpreted when preparing Local Plans.

2.3 Planning for the Future White Paper

- 2.3.1 On the 6th August, Government published the Planning for the Future White Paper setting out proposals for how it is seeking to 'radically reform' the planning system. The proposals are seeking to streamline and modernise the planning process.

- 2.3.2 Consultation recently closed on these proposals and it will be important that the Council keeps up to date with the implementation of these changes and the implications this will in turn have on the preparation of any subsequent Local Plan review. Timescales remain uncertain however subject to the outcomes of this process the Government has signalled its intent to make rapid progress toward this new planning system through the swift introduction of new legislation to implement the changes.

- 2.3.3 More importantly alongside this consultation, a consultation on immediate changes to the current planning system was also held, closing on the 1st October. Of significant note is a proposed revised standard method for calculating local housing need, which when implemented will be used as the basis for plans created prior to any changes outlined in the White Paper. Introduction of the revised methodology, which proposes to incorporate a percentage of existing stock as the baseline of the calculation, identifies an indicative housing figure of 403dpa for Fareham.

¹ NPPF – Paragraph 60

3 LEGAL REQUIREMENTS

3.1 Duty to Cooperate

- 3.1.1 The Duty to Cooperate (DtC) is a legal requirement established through section 33(A) of the Planning and Compulsory Purchase Act 2004, as amended by Section 110 of the Localism Act. The DtC requires local planning authorities to engage constructively, actively and on an ongoing basis with neighbouring authorities on cross-boundary strategic issues through the process of ongoing engagement and collaboration.²
- 3.1.1 As demonstrated through the outcome of the Coventry, Mid Sussex, Castle Point and St Albans examinations, if a Council fails to satisfactorily discharge its DtC a Planning Inspector must recommend non-adoption of the Plan. This cannot be rectified through modifications.
- 3.1.2 The NPPF(2019) has introduced a number of significant changes to how local planning authorities are expected to cooperate including the preparation of Statement(s) of Common Ground (SOCG) which are required to demonstrate that a plan is based on effective cooperation and has been based on agreements made by neighbouring authorities where cross boundary strategic issues are likely to exist. The NPPF(2019) sets out that local planning authorities should produce, maintain, and update one or more Statement(s) of Common Ground (SOCG), throughout the plan making process³. The SOCG(s) should provide a written record of the progress made by the strategic planning authorities during the process of planning for strategic cross-boundary matters and will need to demonstrate the measures local authorities have taken to ensure cross boundary matters have been considered and what actions are required to ensure issues are proactively dealt with e.g. unmet housing needs.
- 3.1.3 This issue is particularly crucial for the FLP given the work currently being undertaken through the Partnership for South Hampshire (PFSH) which is seeking to identify Strategic Development Opportunities to meet identified unmet needs across the sub-region.
- 3.1.4 The PFSH is currently working on a new SOCG between all constituent authorities and will effectively supersede the Spatial Position Statement (2016). Paragraph 3.17 of the submission Local Plan confirms that bilateral conversations with neighbouring authorities have been undertaken and the Council is aware of unmet needs arising across the region due to neighbouring borough's capacity to address any unmet need. The Council acknowledges at

² PPG Reference ID: 61-021-20180913

³ PPG Reference ID: 61-001-20180913

paragraph 4.4 that there is a significant likelihood of a substantial level of unmet housing needs in the sub-region with figures released in September 2020 suggesting unmet need in the sub-region of circa 10,750 dwellings. This figure is derived from 11 councils who are all at varying stages of plan preparation and based on the current standard methodology.

- 3.1.5 At the time of writing, it is noted that Portsmouth City Council (PCC) have written to the Council requesting a contribution of 1,000 dwellings to assist in meeting their unmet housing needs. Gosport Borough Council (GBC) is also likely to have an issue with unmet housing need, currently estimated to be in the region of 2,500 dwellings.
- 3.1.6 In principle, Gladman support the Council's decision to increase the housing target by 847 dwellings to contribute toward the unmet housing needs issue of the wider area. However, Gladman are concerned that without a signed SOCG between constituent authorities, it is difficult to consider whether this level of housing is sufficient to meet the wider needs of the area. Gladman recommend that a further consultation which considers the outcome of the work of the PFSH will be required so that the Local Plan can reflect the outcome of that process prior to the submission of the Local Plan to the Secretary of State for examination.
- 3.1.7 Since effective cooperation is an ongoing issue, Gladman reserve the right to provide further comments in relation to this matter once further evidence and signed statements become available.

3.2 Sustainability Appraisal

- 3.2.1 In accordance with Section 19 of the Planning and Compulsory Purchase Act 2004, policies set out in Local Plans must be subject to a Sustainability Appraisal (SA), and also incorporate the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 (the SEA Regulations).
- 3.2.2 The SA/SEA is a systematic process that should be undertaken at each stage of the Plan's preparation, assessing the effects of the FLP proposals on sustainable development when judged against all reasonable alternatives. The Council must ensure that the future results of the SA clearly justify its policy choices. In meeting development needs of the area, it should be clear from the results of the assessment why some policy options have been progressed and others have been rejected. This must be undertaken through a comparative and equal assessment of all reasonable alternatives, in the same level of detail for both chosen and rejected alternatives. The Council's decision making, and scoring should be robust, justified and transparent.

4 FAREHAM LOCAL PLAN

4.1 Vision and Objectives

4.1.1 In principle, Gladman support the Council's vision and objectives. In particular, we support the Plan's commitment to accommodating development to address the need for new homes and employment space in Fareham Borough and the commitment to ensuring a strong and diverse economy is delivered.

4.1.2 Notwithstanding this, it is considered the Plan could go further in its aims to support housing and economic growth of the wider sub-region with reference to assisting neighbouring authorities with any unmet housing needs. This is particularly important due to the ongoing work of the PfSH and outstanding evidence relating to unmet housing needs and how this will be redistributed across the PfSH area.

4.2 Strategic Policy DS1: Development in the Countryside

4.2.1 Strategic Policy DS1 states proposals for development in the countryside, which is defined as land outside the Urban Area boundary, will only be supported in a narrow set of circumstances.

4.2.2 Gladman are opposed to the use of settlement boundaries, as these are often used as an arbitrary tool to prevent otherwise sustainable proposals from going forward. The policy wording as currently drafted only allows for development in a narrow set of circumstances (i.e. replacement dwelling, previously developed land etc.) and does not allow for sufficient flexibility to respond to changes of circumstance such as a shortfall in housing supply. Gladman believe that this policy should be modified to a criteria-based policy which will provide a more appropriate mechanism for assessing the merits of individual development proposed, based on their specific circumstances and ability to deliver sustainable development rather than being discounted simply due to a sites location beyond an artificial boundary.

4.2.3 To achieve this; a criteria based approach would allow the plan to protect itself against unsustainable development whilst at the same time offering a flexible solution to the consideration of development opportunities outside these boundaries that are able to come forward to meet identified needs should the Council's housing land supply start to fail. Gladman refer to the submission version of the Harborough Local Plan, Policy GD2, which states:

“in addition to sites allocated by this Local Plan and neighbourhood plans, development within or contiguous with the existing or committed built up area of the Market Harborough, Key Centres, the Leicestershire Principal Urban Area (PUA), Rural Centres and Selected Rural Villages will be permitted where...”

A series of criteria follows.

- 4.2.4 Clearly the policy here would need to reflect the local circumstances of Fareham but it does provide an example of a local authority taking a proactive approach to guiding development and ensuring that it can meet its housing target as well as plan for approaches if and when problems arise over the course of a plan period with regard to the delivery of allocated sites. Accordingly, Gladman recommend the use of a criteria-based policy should be included within the FLP to ensure housing needs are met in full.
- 4.2.5 In addition, the second element of the policy requires proposals to demonstrate that if they require a location outside of the urban area, do not significantly affect the integrity of a Strategic Gap and are not located on Best and Most Versatile (BMV) agricultural land. Gladman are unclear with the necessity of including this additional criteria as these matters are dealt with elsewhere within the FLP and therefore their inclusion in Policy DS1 leads to unnecessary duplication and not in accordance with the NPPF2019. As such, this element of the policy should be deleted as the finer details of each of these issues are dealt with elsewhere within the draft Local Plan.

4.3 Strategic Policy DS2: Development in Strategic Gaps

- 4.3.1 The above policy identifies two Strategic Gaps whereby development proposals would not be permitted where they significantly affect the integrity of the gap and the physical and visual separation of settlements or the distinctive nature of settlement characters.
- 4.3.2 Gladman consider that new development can often be located in countryside gaps without leading to the physical or visual merging of settlements, eroding the sense of separation between them or resulting in the loss of openness and character. It is important that such designations are supported by robust evidence and that the policy wording allows for sites to be considered on their individual merits. In this regard, the policy is currently worded in a negative stance which may affect the consideration of development proposals. Gladman consider that the policy should be reconsidered in a positive manner and modified to allow for a balancing exercise to be undertaken which assesses any harm to the visual or functional

separation of settlements against the benefits of the proposal rather than seeking to apply a blanket restriction on development in these areas.

4.4 Strategic Policy H1: Housing Provision

Housing Need

- 4.4.1 Strategic Policy H1 makes provision for at least 8,389 net additional dwellings across the borough during the period 2021 – 2037. Whilst Gladman acknowledge that the housing requirement is set as a minimum, Policy H1 is not considered positively prepared as it does not provide a strategy which meets housing needs in full.
- 4.4.2 The level of housing required by the standard methodology as set in NPPF2019 requires provision for a minimum of 514dpa. It should be remembered that the housing need figure calculated using the Standard Method should be considered as a starting point as it does not take into account other factors which affect demographic behaviours (e.g. affordability, economic adjustments etc).
- 4.4.3 The Council has instead decided to use the Government’s proposed housing methodology as announced in the Planning for the Future White Paper which allows LPAs to use either a percentage of the Borough’s existing housing stock as the calculation’s starting point or the most up-to-date household projections, whichever is the highest before an affordability uplift is applied. The Council has decided it is appropriate to plan for a scale of growth based on the proposed methodology which reduces the housing need figure to 403dpa.
- 4.4.4 The proposed approach is not appropriate nor justified as it will not deliver the minimum housing required by national policy using the standard method. The Council must remember that the implementation of the White Paper is still subject to the outcome of consultation and may be subject to change. In addition, it is not appropriate to delay the progress of the Local Plan until the measures announced within the White Paper come into force.
- 4.4.5 Accordingly, the Council should amend the housing requirement back to 514dpa and allocate sufficient sites across a number of locations to meet housing needs in full.

Phasing

- 4.4.6 Policy H1 outlines the Council’s intention to phase the delivery of the housing requirement over the plan period. The housing requirement is phased as follows:
- Approximately 2,250 dwellings (450dpa) between 2021/22 and 2025/26

- Approximately 2,400 dwellings (480dpa) between 2026/27 and 2030/31
- Approximately 3,750 dwellings (625dpa) between 2031/32 and 2036/2037

4.4.7 The result of this element of the policy acts to artificially suppress the delivery of development in the early years of the plan due to strategic site issues given the majority of housing supply comprises of the Welborne Garden Village. Indeed, the Council has not achieved annual delivery figures in excess of 450 dwellings since 2007-08 so it is unclear how the Council expects to achieve these delivery rates especially towards the back end of the plan period without a sufficient supply and mix of housing sites.

4.4.8 The Framework is clear in its intention to boost significantly the supply of housing. This strategy is further underlined by the buffers applied by national policy and the PPG's approach that requires local authorities to meet housing shortfall within a five year period.

4.4.9 Gladman consider that the backloading of land supply will likely threaten the overall deliverability of the Plan. Should the Council fail to deliver these higher rates towards the end of the plan period, there is little flexibility or opportunity provided to ensure the housing requirement can be met in full. The phasing approach is therefore unsound and should be deleted and replaced with a flat annual requirement of 514dpa.

Buffer

4.4.10 In principle, Gladman support the inclusion of a 15% buffer to allow for contingency for under delivery associated with the reliance on large strategic sites within the housing supply. However, the buffer does not provide any sort of contingency due to the Council's decision to reduce housing requirement to 403dpa. In reality, it merely provides a level of housing comparable to the amount of housing needed to meet the annual requirement as identified under the Standard Method. Gladman reiterate that the housing requirement should be increased to 514dpa and a buffer applied to this figure.

4.4.11 Notwithstanding the above, Gladman would suggest that given the uncertainty surrounding both the delivery of strategic scale sites and the potential for unmet need within the wider sub-region, that this contingency should be increased to 20% above the Standard Method figure to ensure housing needs are met in full. This will also reflect HBF's advice following Central Government research on this issue.

Housing Provision

4.4.12 Strategic Policy H1 makes provision for at least 8,389 net dwellings across the borough during the period 2021 – 2037 and is comprised of:

- An estimated 552 homes that already have planning permission;
- An estimated 4,858 on sites with resolutions to grant permission as of 1st July 2020, including at Welborne Garden Village;
- Approximately 1,327 homes on sites allocated in the Publication Plan;
- Approximately 428 homes on brownfield sites/regeneration areas; and
- An estimated 1,224 homes delivered through windfall development.

4.4.13 To ensure the soundness of the Plan, Gladman submit that additional housing land is needed to ensure that the Council is able to demonstrate a robust supply of housing land should any of the sites within the Council's supply slip away. This is particularly important due to the reliance on sites with resolutions to grant planning permission and the vast majority of the Council's supply comprising of the Welborne Garden Village.

4.4.14 Whilst Gladman does not wish to comment on the suitability of sites selected, the Council will need to be able to demonstrate that sites will come forward as anticipated and take account of site specific issues and/or reflects the requirements and timescales of key infrastructure to be provided by sites selected. It is imperative that these assumptions are made in collaboration with landowners/land promoters to ensure these details are up-to-date at the point of submission. In this regard, it is difficult to assess the Council's consideration of sites as the Housing Trajectory at Appendix B only provides a cursory overview of expected delivery rates over the plan period and does not provide an individual break down of anticipated delivery rates on individual sites. As such, Gladman reserves the right to provide further detailed comments at the examination should further information be made available.

4.4.15 To ensure the effectiveness of the Plan in ensuring a supply of specific deliverable sites sufficient to maintain a five year housing requirement over the course of the plan period, additional allocations are considered necessary. Indeed, the planning committee has resolved to grant outline planning permission for Welborne Garden City in October 2019 to provide up to 6,000 dwellings over the plan period and beyond. There are a number of key factors that can affect the delivery of Garden Villages, Strategic Sites and smaller scale development opportunities such as the signing of s106 agreements, reserve matters applications and improvements to infrastructure prior to development commencing, discharge of planning conditions, marketing of development and so on, all of which can affect the delivery of homes. The Council will need to avoid a continued reliance associated with the Garden Village and large scale strategic allocations over the plan period and instead allocate additional housing land to ensure a competitive and responsive supply of housing is available to support housing delivery of the Council's large strategic allocations.

4.5 Policy HP1: New Residential Development

4.5.1 Policy HP1 states residential development within the urban area boundary will be supported in principle. Residential development in locations outside of the urban area boundary will only be permitted if it involves the conversion of an existing non-residential building or it is for a replacement dwelling which is of an appropriate character to the location.

4.5.2 Gladman do not consider the above policy to be positively prepared as it is restrictive and goes against the ethos of the Framework to significantly boost the supply of housing. The policy should be amended to be flexible in accordance with the approach outlined in section 4.2 of these representations.

4.6 Policy HP2: New Small-Scale Development Outside the Urban Areas

4.6.1 The above policy states new small-scale development outside the urban area boundary, as shown on the policies map, will be permitted where a site is located within or adjacent to existing areas of housing; or well related to settlement boundary and is within reasonable proximity to high frequency public transportation.

4.6.2 In principle, Gladman support the inclusion of this policy which allows for small scale development beyond the urban area. However, we would question the decision to limit development to no more than 4 units as this is contrary to the ethos of the Framework which seeks to significantly boost housing supply. Gladman consider such a policy should be included within the draft Local Plan without any limitations on size of development to ensure the Council are able to demonstrate a strong and robust housing land supply should sites identified slip away.

4.6.3 In addition, Gladman query how a decision maker is expected to apply this policy consistently and with ease as it contradicts the approach taken in Policy HP1 and reinforces the need for Policy HP1 to be deleted and the criteria listed to be amalgamated into Policy H2.

4.7 Policy HP4: Five-Year Housing Land Supply

4.7.1 Policy HP4 outlines the Council's approach to circumstances where it cannot demonstrate a five year housing land supply, a criteria then follows. In principle, Gladman support this approach but would suggest that the policy is modified to '~~may be~~ will be permitted where they meet the following criteria' as opposed to the current use of wording.

4.7.2 Criterion (a) of the proposed policy suggests that a site needs to be relative in scale to the demonstrated shortfall in the housing land supply. A proposal which comes forward which is

considered to be sustainable and in conformity with other policies of the Local Plan should be considered to be acceptable in planning terms regardless of whether it is relative to the scale and size of the housing land supply shortfall. Gladman consider that the reference to scale should be removed in order to allow for additional flexibility in the supply of housing as it will assist the Council in ensuring that a 5 year housing land supply can be maintained going forward.

- 4.7.3 In addition, Criterion (b) states that a site should be adjacent to the existing urban settlement boundaries to be considered sustainable. This criterion is too onerous as sites which are well related to, but not directly adjacent to existing settlements could, be considered to be sustainable when assessed against policies contained in the Local Plan as a whole. Again, Criterion (b) should be amended to reflect this.

4.8 Policy HP7: Adaptable and Accessible Dwellings

- 4.8.1 Policy HP7 requires at least 15% of all new dwellings to be built to optional building regulation M4(2) and on all schemes over 100 dwellings, at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible category M4(3) standard.

- 4.8.2 In this regard, Gladman refer to the PPG which provides additional guidance on the use of these optional standards. The Council need to ensure that this policy is in line with the guidance and that the justification and specific detail of the policy take account of the various factors which the PPG refers to:

“Based on their housing needs assessment and other available datasets it will be for the local planning authorities to set out how they intend to approach the need for Requirement M4(2) (accessible and adaptable dwellings), and / or M4(3) (wheelchair user dwellings), of the Building Regulations. There is a wide range of published official statistics and factors which local planning authorities can consider and take into account, including:

- *The likely future need for older and disabled people (including wheelchair user dwellings).*
- *Size, location, type and quality of dwellings needed to meet specifically evidenced needs (for example retirement homes, sheltered homes, or care homes).*
- *The accessibility and adaptability of existing stock.*
- *How needs vary across different tenures.*

- *The overall impact of viability.*⁴

4.8.3 Gladman note that these technical standards have deliberately been set as optional standards which, if to be included as a policy in the FLP, would need to be justified by robust evidence.

4.8.4 When considering this policy, the Council need to be aware of the impact that these requirements, particularly M4(3) have on scheme viability (due in part to size requirements) and the knock-on effects that this could have on the delivery of much needed housing. In order to be able to include such requirements in the Local Plan, the Council will need to be able to robustly justify the inclusion and demonstrate that consideration has been given to this requirement within the viability study. The provision of M4(3) wheelchair user dwellings, is far more onerous in terms of size requirements; therefore, it is crucial that the implications of the proposed policy requirement have been properly tested.

4.8.5 In addition to this, with regard to M4(3) Gladman refer to the PPG which states:

“Part M of the Building Regulations sets a distinction between wheelchair accessible (a home readily useable by a wheelchair user at the point of completion) and wheelchair adaptable (a home that can be easily adapted to meet the needs of a household including wheelchair users) dwellings.

*Local plan policies for wheelchair accessible homes should be applied only to those dwellings where the local authority is responsible for allocating or nominating a person to live in that dwelling.*⁵

4.8.6 This clearly demonstrates that M4(3) should only be applied to affordable homes within the Council’s control and therefore Policy HP7 should be updated to reflect this and reference to private homes deleted.

4.8.7 Gladman submit that the Council must be able to demonstrate through robust evidence the justification for these policy requirements within the Local Plan in order for them to be found sound at examination. The NPPF footnote 46 states:

“Planning policies for housing should make use of the Government’s optional technical standards for accessible and adaptable housing, where this would address an identified need for such properties...”

⁴ PPG ID: 56-007-20150327

⁵ PPG ID: 56-009-20150327

- 4.8.8 Gladman do not consider that a general reference to an ageing population to be sufficient justification for the inclusion of these policy requirements. In this regard, Gladman refer to the Inspector’s report for the Derby Local Plan (December 2016), which at paragraph 117 states

“Although there is general evidence of an ageing population in the SHMA, having regard to the PPG this does not amount to the justification required for the LP to include the optional standards and the specific proportion of Part M4(2) dwellings...”

4.9 Policy HP9: Self and Custom Build Homes

- 4.9.1 Whilst Gladman support the inclusion of a policy in relation to self-build and custom build units, as this is in line with Government aims and objectives, we raise concerns regarding the detail within this policy.

- 4.9.2 It is expected that on sites of 40 dwellings or more (gross), 10% of the overall dwellings shall be provided through the provision of plots for self and custom build homes. Gladman welcome the flexibility provided by this policy which recognises that plots which do not sell within 12 months of initial promotion, are able to be developed for housing other than self-build homes.

- 4.9.3 However, Gladman query the evidential justification for 40 dwellings (gross) being the trigger for the provision of self-build and custom build housing. The Council’s Self Build Register only identifies 180 residents which does not translate to demand for this form of housing. Gladman consider that this policy would benefit from re-wording to state that, rather than being required on all schemes of 40 or more dwellings, that if up-to-date evidence indicates that there is a demand in the particular location then schemes are encouraged to make provision. Such a modification would help ensure that market housing is not unnecessarily delayed for a period of 12 months if there is no interest in self-build housing on individual sites.

4.10 Policy NE2: Biodiversity Net Gain

- 4.10.1 Policy NE2 requires development of one more or more dwelling or new commercial/leisure buildings to provide at least 10% net gain for biodiversity for the lifetime of the development. Gladman do not consider this policy to be positively prepared as it goes above and beyond that which is required by the NPP2019. Gladman submit that the percentage requirement should be deleted and reference to ‘biodiversity net gains’ included in the policy wording to ensure compliance with national policy.

4.11 Policy D5: Internal Space Standards

4.11.1 Policy D5 requires all new dwellings, including subdivisions and conversions to meet the nationally described space standards (NDSS) or future equivalent as a minimum.

4.11.2 In this regard Gladman refer to the Written Ministerial Statement (WMS) dated 25th March 2015 which confirms that:

“The optional new national technical standards should only be required through any new Local Plan policies if they address a clearly evidenced need, and where their impact on viability has been considered, in accordance with the NPPG”.

4.11.3 Furthermore with particular reference to the NDSS the PPG⁶ confirms:

“where a need for internal space standards is identified, local planning authorities should provide justification for requiring internal space policies”.

4.11.4 If the Council wishes to adopt this standard it should be justified by meeting the criteria set out in the PPG, including need, viability and impact on affordability.

4.11.5 The Council will need to provide robust evidence to justify the inclusion of the space standards within a policy in the Local Plan. Similarly to the accessibility standards, if it had been the Government’s intention that all properties were built to these standards then these standards would have been made mandatory rather than optional.

4.11.6 Gladman’s concerns regarding the optional national space standards relates to the additional cost and the implications for affordability. Where, for example, a housebuilder would normally build a standard 2-bedroom unit at 72sqm, the national space standards would require the dwellings to have certain dimensions which would mean they could only be built at a minimum of 79sqm, which could add significantly to the cost of the property and in turn increase the cost of an entry level 2-bedroom house, further exacerbating the affordability issues in the area.

4.11.7 The Council need to take these factors into account and will need robust evidence on both need and viability to support the proposed policy requirements outlined in Policy D5.

⁶ ID: 56-020-20150327.

5 OVERALL CONCLUSIONS

5.1.1 These representations have been drafted with reference to the revised NPPF(2019) and the updated PPG. To be found sound at examination the FLP would need to meet the tests set out in paragraph 35 of the NPPF(2019):

- **“Positively prepared** – providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework.”

5.1.2 Having considered the FLP in this context, Gladman are concerned that a number of policies contained within this plan do not accord with national policy and require modification to ensure soundness with the tests set out above.

5.1.3 Gladman believe that further flexibility and contingency is required through the FLP and that, consequently, additional non-strategic housing allocations should be included in the plan.

5.1.4 Gladman welcome this opportunity to comment on the publication draft plan and would like to be kept updated on progress moving forwards with the FLP. Gladman request to participate at the relevant hearing sessions through the examination of the FLP to discuss the matters raised in this submission further.

Executive Summary

Local Plans should be prepared to contribute to the achievement of sustainable development. They should be positively prepared and seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. As the starting point, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas. These requirements exist within the context of the Government's now longstanding objective to significantly boost the supply of homes.

The Regulation 19 Plan, which is meant to be the Plan the Council intends to submit for Examination, is not founded on the Government's published Standard Method as required by the NPPF and NPPG.

Rather, the Council has alighted upon the possible outcome of a Government consultation document and has based the Development Strategy, Policy H1 and the strategy to meet housing needs on this lower level of housing. This is manifestly unsound.

The fact that the Council do not intend to submit its plan until there is certainty as to a change to the Standard Method does not mitigate the cost of conducting this consultation to the public purse or unnecessary expenditure by other public and private bodies. Moreover, this approach plainly risks undermining public confidence in the plan-led system, if, as is possible, the housing requirement has to be increased. The Council has simply acted prematurely in seizing upon a consultation document that suggests a lower housing requirement; this may be expedient but is the antithesis of positive planning. Put simply, there is no basis for the Council to have formed this consultation document at the present time.

In the event that the Government decides not to proceed with its amendment to the Standard Method, or that such an amendment results in a different outcome for Fareham, the Council will need to further amend the plan. In that instance, a wholly new consultation exercise would be required given the likely magnitude of amendments that would be necessary, adding further delay to the plan-making process, and cost to the public purse and to interested parties, whilst, regrettably, undermining confidence in the Local Plan process.

Moreover, the Council has not recognised the context within which this Plan is being prepared. Housing delivery relative to the Core Strategy has resulted in a substantial shortfall in new housing over past years and this Plan provides an opportunity for positive and ambitious planning to ensure development needs are met and the principles of good growth are achieved. The Plan fails in this regard.

The Council purports to make a contribution towards meeting the unmet need of its neighboring authorities; however, this does not reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PFSH) of over 10,000 homes. It is not at all apparent that this Plan is founded on constructive, active and on an ongoing engagement as required by Section 33A.

It is instructive that whilst Welborne was identified to provide housing to meet sub-regional requirements, its role has now changed to meeting the Borough's housing needs first and foremost;

consequently this Plan makes a significantly lower contribution to the wider sub-regional needs which plainly have not diminished.

Furthermore, the Plan has exaggerated the likely housing supply from Welborne and other sources to such an extent that a shortfall in housing supply is inevitable.

The Plan overlooks the opportunity provided by the previously identified Strategic Growth Area at South Fareham which would make an important contribution to housing supply in the short term and providing surety of supply over the longer term. The suitability of this location is apparent from the Council's evidence base; it is accessible to the Borough's main urban area, it is not an area that is sensitive in landscape terms, development can be accommodated without undermining the principle of separation between Fareham and Stubbington, there are no environmental designations that preclude development and the transport modelling and its' conclusions has assumed development in this location. A development scheme in this location can also deliver nitrate neutrality and biodiversity net gain. Development to the South of Fareham can achieve *Good Growth*.

Unfortunately, the Sustainability Appraisal does not consider higher levels of growth consistent with the January 2020 Local Plan Supplement, and, as such, fails to consider a reasonable alternative.

The following Modifications are considered necessary for the Local Plan to be sound:

- The minimum housing requirement should be defined by reference to the existing Standard Method;
- The housing requirement should be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;
- The level of unmet need that is accommodated should be based on constructive, active and on ongoing engagement with neighbouring authorities;
- Assumptions about the delivery of new housing at Welborne should be revisited and revised down;
- The windfall allowance should be revised down;
- Alternatively, the level of contingency should be increased;
- Additional housing allocations should be provided for;
- Land South of Fareham should be allocated for housing development; and
- Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood should be amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1 Introduction

- 1.1 Hallam Land Management Limited ('Hallam') control a substantial tract of land to the South of Fareham, south of Longfield Avenue, west of HMS Collingwood and adjoining the Stubbington Bypass, the construction of which has recently commenced.
- 1.2 In successive representations to the Local Plan Review we have draw attention to the merits and advantages of locating development to the South of Fareham and how this would achieve the Borough Council's objective of *Good Growth*.
- 1.3 In the January 2020 Local Plan Supplement, this land, along with other parcels in this location, was identified by the Borough Council as a potential Strategic Growth Area.
- 1.4 In the current consultation document, such an allocation has not been carried forward.
- 1.5 On this occasion, the Borough Council's has alighted upon the possible revision to the Government's Standard Method for assessing local housing need, which suggests a lower level of housing for Fareham.
- 1.6 In our opinion, the Borough Council are wrong to have published this consultation document in this form given the status of this version of the Plan is afforded by the Local Plan Regulations; *the Plan a Local Planning Authority intends to submit for Examination*. To have based a Plan on the possible outcome of a Government consultation is plainly premature and, regrettably, the Plan's housing strategy is not positively prepared and is unsound.
- 1.7 The Plan's housing strategy is not an effective one. It has no regard to past performance relative to the objective assessment of housing need and the level of contingency is not sufficient when the likely delivery of Welbourne is viewed objectively. Over the plan period a significant shortfall in new housing is inevitable.
- 1.8 For the reasons given in this representation, additional housing land should be allocated in Policy H1.
- 1.9 Land South of Fareham is an eminently suitable and sustainable location for future development and should be identified accordingly. In the context of the Borough Council's *Good Growth* principles that underpin the Plan's Development Strategy, Hallam's development proposals achieve the high-level development principles and requirements set out in the Local Plan Supplement which remain entirely appropriate.
- 1.10 It is especially significant that the Borough Council's assessment of Strategic Gaps has drawn the conclusion that new development can be located south of Longfield Avenue without harming the integral purpose of this earlier designation. We agree with this conclusion, which accords with our previous submissions that carefully planned development will not result in the coalescence of Fareham and Stubbington and that the separate identities of these settlements can be retained.
- 1.11 Development at South Fareham can be brought forward to provide new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality

of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.

- 1.12 As such, and for the reasons given herein, the previous potential Strategic Growth Area at South Fareham should have been retained in the Local Plan for future development.
- 1.13 In our representations in the following Sections we set out that, whilst the Plan's Vision and Strategic Priorities are correct, absent amendments to Policy H1, this version of the Local Plan will not provide sufficient housing and this will run counter to its stated intention to address housing needs by the end of the plan period.

2 Vision and Strategic Priorities

- 2.1 In this Section of our representations we consider the consultation document's Vision and the Strategic Priorities that the Borough Council has identified. It is instructive to consider the extent to which the Plan's policies and proposals will, in practice, contribute towards this Vision being realised and the Strategic Priorities being met, in the context of what the NPPF's anticipates of a Local Plan.

National Planning Policy Framework

- 2.2 Para 15 of the NPPF requires that each Local Plan should provide a positive vision for the future of its area; a framework for addressing housing needs and other economic, social and environmental priorities. (emphasis added)
- 2.3 Para 17 requires that a Local Plan includes strategic policies to address the local authority's priorities for the development and the use of land in its area.
- 2.4 Para 20 states that strategic policies should set out the overall strategy for the pattern, scale and quality of development, and make provision for, *inter alia*, housing, employment, retail, leisure and other commercial development, infrastructure, community facilities and conservation and enhancement of the environment.
- 2.5 Para 22 states that strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure.
- 2.6 Para 23 states that strategic policies should provide a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development. This should include planning for and allocating sufficient sites to deliver the strategic priorities of the area.
- 2.7 In the context of plan making making, the NPPF's presumption in favour of sustainable development is framed in the following terms:
- a. *plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
 - b. *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:*
 - i. *the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - ii. *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.*
- 2.8 In this context, it is important to recognise the significance of the Regulation 19 stage in the plan-making process. This is the Plan the Borough Council intends to submit to the Secretary of

State for the purpose of Examination pursuant to Section 20 of the Act. This is explained in the NPPG *"The publication stage plan should be the document that the local authority considers ready for examination"*. Therefore, this is the Plan and the approach to meeting objectively assessed need that the Borough Council now consider appropriate.

- 2.9 But, as the Borough Council has suggested it won't decide whether or not to submit the Plan until it knows the outcome of the Government's review of the Standard Method, this is little more than a "wait and see" approach. This is plainly wrong given the importance of the plan-led system in overall terms, the alacrity with which an up-to-date Local Plan is needed in Fareham, and the need to maintain public confidence in the plan-making system generally.
- 2.10 As will be shown later, the practical difference between a housing strategy based of 520 dwellings per annum and 403 dwellings per annum is an 'end date' five years hence. When viewed in the context of providing surety over the longer term and the emphasis in the NPPF on exceeding the minimum requirement, adopting a higher growth level at this stage would have been the positive and responsible response to this circumstance.

The Vision

- 2.11 The Borough Council's Vision as set out in the consultation document intends that it:
- *"will accommodate development to address the need for new homes and employment space in Fareham Borough; and*
 - *new housing will address the particular needs in the Borough, such as our growing housing need and an ageing population and creating attractive places to live"*.
- 2.12 The Vision is framed by reference to the Borough's needs, whereas Fareham is part of the established Partnership for Urban Southampton and has a role in contributing to meeting the housing needs of the sub-region. Indeed, there is no reference to Fareham's sub-regional role on any of the text associated with the Vision and Strategic Priorities in Section 2 of the Plan. In this context, the Vision should be drawn more widely.
- 2.13 Significantly, the allocation at Welborne in the Core Strategy was specifically for a sub-regional purpose, but its role by the present time appears to have been recast entirely; a matter we return to later.
- 2.14 Without prejudice to the above, achieving any Vision requires policies and proposals that are genuinely aligned with it. In respect of housing, the outcome of the Local Plan's policies and proposals should be that the Borough's housing needs are met.
- 2.15 As such, the Local Plan must, first, establish the correct strategic housing requirement in Policy H1 i.e. the overall number of new homes that need to be built by 2037 and, second, ensure a housing supply strategy that has the necessary surety that this can be achieved.
- 2.16 What experience both in Fareham and elsewhere has shown is that there must be an element of theoretical overprovision as part of the housing strategy to ensure that sufficient new housing is built.
- 2.17 To an extent the consultation document recognises this, but, as will be shown, it significantly

misjudges housing supply to such an extent that it undermines achievement of the Vision.

2.18 Conversely had a positive approach to plan-making been adopted, the Local Plan would have provided a robust planning strategy for the Borough.

Strategic Priorities

2.19 In the context of the Vision, the first Strategic Priority is to:

- *address the housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.*

2.20 Again, there is no reference to Fareham's wider sub-regional role. In the context of Section 33A of the Planning and Compulsory Purchase Act, which requires constructive and active engagement on strategic matters, this is a surprising omission.

2.21 Without prejudice to this point, as a matter of principle, such a strategic objective is soundly based and is aligned with the significant importance the Government attaches to housing provision. Such a Strategic Priority is universally found in Local Plans national-wide.

2.22 However, in this instance, the apparent driver to the Publication Draft has been an attempt to reduce the scale of housing provision despite the Vision and Strategic Priority. This is the only conclusion that can be drawn from the Council having based its Regulation 19 Plan on a consultation document concerning a potential revision to the Standard Method.

2.23 This approach is plainly not sound for the following reasons:

2.24 Firstly, it departs from the method of calculating local housing need set out in para 60 of the NPPF. No exceptional circumstance has been suggested other than a lower figure is derived from the potential revision to the Standard Method. In a recent comment the Planning Minister referred to outputs based on the consultation exercise as "*entirely speculative*".

2.25 Secondly, even if that figure is correct, it is in no way obvious how the wider needs of the sub-region are to be met; across the wider geographic area as a whole the level of local housing need is suggested to be greater than has hitherto been the case.

2.26 Thirdly, the approach to housing supply significantly overstates likely housing delivery and the scale of contingency is simply not sufficient to ensure future housing supply would meet identified need.

2.27 The inevitable conclusion is that this version of the Local Plan is not positively prepared, justified, effective or consistent with national policy. Therefore, whilst the Plan may have a clear strategic priority to address the need for new homes in the Borough, its subsequent policy to base the strategic housing requirement of 403 dwellings per annum means, when considered objectively, that it fails to do so. To consciously plan for 20% less housing than has been identified firstly as necessary, and secondly as capable of being accommodated, is not properly addressing the need for new homes in the Borough.

2.28 In short, the Plan provides for too few houses over the plan period. This in turn will give rise to

adverse effects. It will restrict the number of people who are able to purchase new housing from doing so and constrain the operation of the housing market. It will also reduce the amount of affordable housing that is built because that is a proportion of the overall amount of housing. Moreover, by restricting market housing it creates an additional and greater incidence of housing need as people who would otherwise have been able to buy a market home are prevented from and they fall into housing need. This will have harmful socio-economic effects and runs counter to the Vision to meet the Borough's housing need.

2.29 For these reasons, the consultation document is not soundly based.

3 Development Strategy

- 3.1 The preceding Section has considered the Regulation 19 Plan's Vision and Strategic Priorities as they relate to housing provision and has identified that, as a practical effect, its policies and proposal will not deliver the intended outcome in terms of meeting housing need by the end of the plan period. In this Section, we consider the proposed Development Strategy and the extent to which it could accommodate a greater level of development if necessary.
- 3.2 The Plan's Development Strategy, set out on pages 17 – 32, and its associated Key Diagram and more detailed Policies Map, are framed by the Borough Council's approach to housing provision. This is evident from comparing the direction of travel outlined in the January 2020 Local Plan Supplement based on the published Standard Method and which identified the need for Strategic Areas of Growth to be allocated for future development, and the present approach which includes very few new housing allocations.
- 3.3 In the event the Borough Council has to re-cast its approach to housing provision, it will also need to adjust its Development Strategy in order to be able to deliver the strategic objective to address housing need. In this regard, it is of note that para 3.5 of the consultation document acknowledges that *"the [Local Plan] Supplement consultation in early 2020 identified the Council's preferred approach to its Development Strategy which it proposes to use to guide the focus of development until at least 2037"*. This clearly illustrates the suitability of the Strategy at that time as the basis of plan-making presently.
- 3.4 In the following paragraphs we comment on the various elements of the Council's Development Strategy both as articulated presently but also in the context of a revised housing strategy which would require additional land to be identified for development in the plan period.

Good Growth

- 3.5 The 2019 Issues and Options consultation established the principle of **Good Growth** as the keystone for the Local Plan's Development Strategy.
- 3.6 *Good Growth* was defined in the 2020 Local Plan Supplement in the following terms:
- building homes and creating employment spaces in such a way as to improve the quality of life whilst protecting the most valued and natural historic environments.
 - respecting environmental protections and delivering opportunities for environmental gain, providing opportunities for reduced energy demand and waste production, whilst sensitively managing the countryside and valued landscapes.
 - providing open space and leisure opportunities to encourage healthy and active lifestyles and encouraging more of us to use active forms of travel rather than the car.
- 3.7 This definition has been retained in the Regulation 19 Plan.
- 3.8 These principles exist within an overarching scale of development that the Borough will need to provide for over the plan period. It is of paramount importance that, in the context of the Plan's Vision and Strategic Priorities, this scale of development is correctly defined at the outset; only then can it be said the Plan will address housing and employment needs adequately,

appropriately and sustainably. If the housing requirement is drawn too low, it will have negative social and economic effects.

- 3.9 It follows that, at the plan-making stage, the Local Plan is able to set out strategic and development management policies that have *Good Growth* principles at their core; both in terms of determining which locations in the Borough are to be allocated for new development and then the form and nature of such development.
- 3.10 The ensuing Land Use Strategy should prioritise locations that are able to achieve the principles of *Good Growth*, albeit there are instances where there are competing interest and, as with all planning decisions, balanced judgements will be necessary.

Development Strategy

- 3.11 This Section of the Regulation 19 Plan describes the factors that the Council has used to determine its Development Strategy. Because of the range of considerations that are inputted to, and then flow from this, what the Plan is actually describing is its land use strategy, namely where development is acceptable and conversely where factors determine new development would not be appropriate and other considerations are more important.

Landscape and countryside

- 3.12 We agree that there are parts of the Borough which have a fundamental importance in landscape terms and it is right that preservation of the landscape in those locations is the principal consideration. Figure 3.1 which illustrates the Key Diagram identifies "Areas of Special Landscape Quality" and we agree with the designation of the areas shown in this regard. Policy DS3, which we comment on later, should be worded to ensure that preserving the special landscape quality of these areas is given primacy.

Settlement boundaries

- 3.13 Settlement boundaries delineated in earlier development plans were drawn in the context of development needs as determined at that time.
- 3.14 Where the scale of development cannot be met on land within the Borough's urban area, development in the countryside adjoining main settlements is a wholly necessary and legitimate proposition.
- 3.15 As a consequence of allocating land for development to meet identified needs, settlement boundaries can and should be amended accordingly. In short, the existing settlement boundaries are not immutable.

The desire to respect settlement identity

- 3.16 Given that Areas of Special Landscape Quality have been assessed and delineated on the Key Diagram it is also necessary to consider whether land identified in the current Development Plan as Strategic Gap still requires such protection, whether its boundaries can justifiably be amended in light of up-to-date circumstances or whether any areas of land subject to that designation can be developed in order to contribute to a sustainable pattern of development.

- 3.17 The *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* considers existing Strategic Gaps in the adopted Local Plan and concludes that land south of Fareham, east of Peak Lane and west of HMS Collingwood does not perform the same function in terms of maintaining separation between Fareham and Stubbington as other land that is subject to this designation and is more integral to the purpose of preserving identity.
- 3.18 Chapter 4 of that Study, Paragraph 10 states that *"there exists some opportunities for development to be absorbed within the strategic gap subject to scale and future detailed design, without compromising its gap function combined with mitigation measures that can support green infrastructure enhancement"*.
- 3.19 It follows as a matter of principle that this land should not be designated as Strategic Gap in this Local Plan as this designation plainly cannot be justified in that location. Conversely, to continue to propose this land as Strategic Gap is not justified on the basis of the Council's own evidence.
- 3.20 It is highly material that the Local Plan Supplement had anticipated a Strategic Growth Area in this location, reflecting the broad conclusions of the earlier Options testing that this represents a sustainable and accessible location for new development and that such development can be accommodated without harm to the separation between Fareham and Stubbington. The significance of this is especially important in the context of the greater scale of development the Local Plan should accommodate and as such this represents an eminently suitable location for development. The fact this land is outside of the settlement boundary is in no way an overriding determinant that would preclude its allocation.

Climate change, flood zones and coastal management areas

- 3.21 We agree that the Local Plan should not direct major new development to areas identified as having a role in mitigating the impacts of flooding or coastal erosion. It is noteworthy that the areas of potential flood risk are associated with the River Hamble, River Meon, River Wallington and Lee-Solent estuary and are largely subject to nature conservation designations and landscape designations which limit the extent these locations would be suitable for development in any event.
- 3.22 In this context, the land identified as suitable for future development to the south of Fareham is not subject to flood risk and can be developed with Sustainable Urban Drainage measures that would not increase the risk of flooding elsewhere.

Protected areas for nature conservation

- 3.23 There are strategic nature conservation constraints that exist in the Borough in the form of International and Nationally designated sites. These overlap with other environmental designations and exert a significant constraint on where development can be located, limiting the extent of land absent a constraint. None of these constraints directly affect the land south of Fareham referred to in preceding paragraphs.

Transport corridors and opportunities to encourage more active travel modes

- 3.24 The NPPF advises that the planning system should actively manage patterns of growth to support sustainable travel. Significant development should be focused on locations which are

or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health.

- 3.25 In this regard, the Local Plan Strategic Transport Assessment states the following: *The proposed growth locations in the Local Plan to accommodate forecast population and economic growth, took a wide range of factors into consideration, including transport and access implications. Most of the Local Plan growth is located either within or on the edge of existing conurbations, providing good opportunities for trips to be made by modes of transport other than the private car. Consequently, the proposed growth in the Local Plan is generally in sustainable locations in terms of transport and access*”.
- 3.26 It is important to stress that this Transport Assessment in fact includes development at the Strategic Growth Areas, therefore, this conclusion reflects the suitability of new development in this location in these terms.
- 3.27 Whilst certain representations have previously raised concern about traffic impacts, the Transport Assessment concludes that the scale of development proposed (including the Strategic Growth Areas) and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective.

Need to encourage diversity in the housing market

- 3.28 We agree that there needs to a balance in the portfolio of housing sites. We comment later on the likely delivery of housing from Welborne, which can only represent a modest supply of housing in anything other than the longer term.
- 3.29 To meet the objective of providing sufficient housing, additional housing allocations are required for all of the reasons in this representation and in particular those in response to Policy H1. Whilst development to the south of Fareham will change the character of part of the undeveloped land between Fareham and Stubbington, this must be balanced with the material benefits of the scheme in terms of the new housing to increase housing supply in the short term and to provide a surety of supply over the longer term.
- 3.30 The opportunity to the south of Fareham is of a sufficient scale to meet the identified need for market housing, affordable housing, specialist accommodation and self-build and custom build housing, along with the co-location of local services and facilities to support a new neighbourhood.

Sustainability and accessibility to services

- 3.31 Fareham is identified in the Core Strategy as a ‘key growth point’ in the South Hampshire sub region and a ‘secondary regional centre’. The town is the largest in the Borough with a population of approximately 37,000 people. Fareham is also an important economic centre, which has developed further over recent years, with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane, Peel Common Roundabout and the construction of the Stubbington Bypass.
- 3.32 Amongst the advantages previously identified for the South Fareham Strategic Growth Area is

its proximity to the town centre, the Solent Enterprise Zone at Daedalus, the railway station and existing local services and amenities with good access to walking, cycling, and public transport links. Local facilities are situated along Bishopsfield Avenue and at Broadlaw Walk. Large-scale out-of-town retail facilities are located at Newgate Lane and Fareham Road to the east of Longfield Avenue.

- 3.33 Large-scale development to the south of Fareham, rather than a more dispersed pattern, would maximise opportunities to prioritise pedestrian and cycle links and extend public transport to maximise sustainable modes of travel.

The requirement to meet housing and employment needs

- 3.34 *Good Growth* can only be achieved if the Local Plan intends to meet objectively assessed need for housing, which for the reasons set out in response to Policy H1, it does not achieve this at the present time.

Spatial Interpretation

- 3.35 As a matter of principle, the identification of deliverable or developable previously developed land should be a priority, however, it is widely understood that such opportunities do not exist to accommodate the scale of new housing and employment required in the Borough.
- 3.36 Accordingly, the allocation of greenfield sites for future development is both a legitimate and necessary measure.
- 3.37 The morphology of the Borough is comprised of three urbanised areas: Fareham, Portchester and the 'Western Wards', which are part of a coastal conurbation that extends from Portsmouth in the east to Southampton in the west. Fareham is the pre-eminent urban area within the Borough in terms of services and facilities and public transport. Portchester and the 'Western Wards' are characterised more as residential suburbs.
- 3.38 Interspersed to a greater and lesser degree between these settlements are areas of separation comprising Portsmouth Harbour, Alver Valley, Meon Valley and the River Hamble. These are strategically important corridors that separate the main urban areas, protect their identity and prevent settlements within the coastal conurbation from merging together.
- 3.39 To the north of the M27, the Borough is of a more rural character, noting of course the proposed new community at Welborne which will undoubtedly change the character of this area over a long period of time.
- 3.40 Stubbington, a residential suburb, lies south of and separate from Fareham's urban area along with the sub-regionally important employment and logistics node at Daedalus. The Borough Council have stated aspirations to maximise the potential of the airfield's land and infrastructure assets through new commercial development, providing clusters for aviation, non-aviation and skills/innovation activity. This will contribute positively to the creation of skilled jobs in the Solent Enterprise Zone.
- 3.41 These characteristics have led the Council, rightly in our opinion, to consider the designation of Valued Landscapes as part of the Local Plan and in this context we are aware that the 2017 Landscape Assessment acknowledges the intrinsic landscape character of the Meon, Hamble

and Hook valleys.

- 3.42 We agree that the Meon Valley is a distinctly valued landscape. In our 2019 response to the Issues and Options consultation we referred to various Appeal decisions that alight upon the value of the landscape in this location. Continuing to protect this area from development and formalising a landscape designation in the Meon Valley would be appropriate.
- 3.43 The extent to which land around the 'Western Wards' is capable of accommodating new development is constrained by the extent of nature conservation designations close to the existing urban area which limits development opportunities to small scale schemes at most.
- 3.44 On the basis of the above, it follows that **locations that adjoin Fareham town, as distinct from villages away from it located in the rural hinterland to the north and west of the Borough, are inherently more suitable in terms of reflecting the morphology of the Borough, preserving its natural environment and maximizing accessibility to services and facilities to achieve the most sustainable pattern of development.**
- 3.45 The extent to which new development opportunities in those locations can consolidate and enhance the accessibility advantages of Fareham Town Centre and Daedalus are consistent with the *Good Growth* principles set out in paras 3.5 and 3.6 above.

Development Strategy Policies

- 3.46 Para 3.2 of the consultation document defines the Development Strategy as providing the *"distribution, scale and form of development and supporting infrastructure, a set of proposals to deliver the strategy, policies against which to assess planning applications, and proposals for monitoring the success of the plan"*.
- 3.47 In addition to the narration of the Strategy, this Section of the Plan includes three policies; the first controlling new development in the countryside, the second in respect of the Strategic Gap and a third concerning Landscape. These policies do not set out a Settlement Hierarchy or Spatial Strategy for the Plan area and such policies do not appear elsewhere in the Plan either. The practical effect of this is that there is no policy that delivers the spatial objectives in so far as where new development should be located i.e. affording a priority to locations within and adjoining Fareham town as the most sustainable location in the Borough.
- 3.48 Given that para 3.2 suggests the role of the Development Strategy provides a set of policies that direct where and how new development should be located, the omission of what are usually commonplace policies is significant.

Strategic Policy DS1: Development in the Countryside

- 3.49 Policy DS1 seeks to control the use of land outside defined settlement boundaries i.e. in countryside locations.
- 3.50 In some circumstances it would be appropriate to grant planning permission for new development in such locations. In those instances, the benefits of a development proposal would need to be considered against the criteria in part two of the policy. In this context, we do not agree that Criterion 'v' is drafted correctly.

- 3.51 On certain occasions other considerations associated with a development proposal would merit planning permission being granted notwithstanding the agricultural classification of the land concerned. In this regard, whilst the NPPF affords a preference to development of lower quality agricultural land, it does not preclude the development of best and most versatile land (see footnote 53 of the NPPF).
- 3.52 As presently drafted Policy DS1 conflicts with the expression of this policy approach in the NPPF; as such criterion 'v' should be reworded as follows: "*avoid or minimise the loss of best and most versatile agricultural land*".

Strategic Policy DS2: Development in Strategic Gaps

- 3.53 In earlier representations we have identified that the evidence base provided by the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* does not justify the delineation of the Strategic Gap south of Fareham in the manner shown on the Key Diagram.
- 3.54 In particular, that Report identifies that the land south of Longfield Avenue and west of HMS Collingwood could accommodate new development without a significant adverse effect on the objectives of the Strategic Gap designation.
- 3.55 It follows that this land is not an integral part of the Fareham and Stubbington Gap.
- 3.56 As such the Strategic Gap should not extend across this land, as this would add a policy restriction that ought not apply on the basis of the published evidence. Put simply, such a designation should not include more land than is necessary to achieve its purpose.
- 3.57 For the Local Plan Key Diagram to be justified, and for the Local Plan to be sound, the delineation of the Strategic Gap south of Fareham should be amended accordingly.

Strategic Policy DS3: Landscape

- 3.58 The Local Plan intends to formalise Areas of Special Landscape Quality to reflect their valued status as determined through the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps*. As written, Policy DS3 does not however afford any particular level of protection to these areas beyond Policy DS1, which in any event requires development proposals in the Countryside to "*conserve and enhance landscapes*".
- 3.59 Policy DS3 also appears to permit major development proposals in these locations whereas the Development Strategy has sought to avoid new allocations in these locations because of their landscape sensitivity. The definition of major development is provided in the Glossary¹ and when applied to this Policy, could see large scale development proposals being advanced when this is what the Local Plan is seeking to avoid. As drafted, this Policy does little to enforce the Plan's Development Strategy.

¹ For residential schemes, major development includes those of 10 dwellings or more or on a site of 0.5 hectares or more. For other development, it includes building(s) with a floor area of 1000sq.m or more or on a site of 1 hectare or more.

4 Policy H1: Addressing housing needs by the end of the plan period in an appropriate and sustainable manner

- 4.1 In this Section we consider specifically Policy H1 and whether, as presently formed, the Borough Council's strategic housing requirement and housing supply strategy are sound.
- 4.2 The NPPF expects the planning system to significantly boost the supply of new housing by providing, in the first instance, a sufficient amount of development land where it is needed (para 59 refers).
- 4.3 It is clear that a Local Plan's housing requirement is to be calculated by reference to the Government's Standard Method, unless exceptional circumstances can be proven (para 60 refers).
- 4.4 In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.
- 4.5 As discussed in Section 2, the Plan's Vision and Strategic Priorities establish the intention to address the Borough housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.
- 4.6 For the Plan to address, and indeed meet, housing needs by the end of the plan period, it is important to have regard to the following considerations which are material to determining a sound strategy in the context of the Government's presumption in favour of sustainable development:
 - context and the backdrop to this Local Plan;
 - an objective assessment of local housing need;
 - unmet need from neighbouring authorities;
 - the Plan's housing deliver strategy and whether this is sufficiently robust.
- 4.7 As will be shown, the consultation document will not achieve this, and when measured objectively, a shortfall in housing supply over the plan period will be inevitable, contrary to the stated Vision and Strategic Priority.

Context

- 4.8 The earlier Core Strategy set out a Development Strategy for the period to 2026 that has hitherto been achieved in part only. This partial achievement has had significant implications for housing delivery in the plan area.
- 4.9 In aggregate, the Core Strategy intended that some 9,000 new homes would be built in Fareham

in the 20 years between 2006 and 2026. This comprised:

- 5,350 at the North Fareham Strategic Development Area (Welborne) to meet sub-regional needs as identified in both the South East Plan and the South Hampshire Sub-Regional Strategy; and
- 3,729 elsewhere in the Borough²;

- 4.10 Over the 13 years since the start of the Core Strategy's plan period (2006/7 and 2018/19) only 4,200 new homes have been built. This is equivalent to 46% of the housing requirement in 68% of the plan period.
- 4.11 In comparison with the trajectory on page 21 of the Core Strategy, new housing has had to be accommodated in locations outside of allocated Strategic Development Area; in the four years from 2016, almost twice as many new homes have been provided elsewhere in the Borough than the 469 intended for the whole of that 5 year period 2016/21.
- 4.12 Following the Core Strategy, when the Welborne Plan was prepared in 2015, and to reflect the changed circumstances by then the Council re-calculated likely delivery at the Garden Village. Policy WEL3 identified approximately 6,000 new homes to be completed by 2036. First completions were to be achieved in 2015/16, 1,500 completions were to have been achieved by 2021 and 2,860 completions by 2026.
- 4.13 Plainly this hasn't been achieved and without question there has been a substantial shortfall in housing provision compared to the Core Strategy.
- 4.14 Manifestly, this shortfall is significant and cannot simply be put to one side. It is striking that Welborne was identified originally to meet sub-regional needs but because it hasn't delivered it now represents a source of housing to meet in a substantial part the Borough's own housing need and thus the Borough's contribution of the wider sub-regional need is much reduced.
- 4.15 Given the strategic objective defined by the Council, and in the context of the NPPF's presumption in favour of sustainable development, this has a clear implication for plan-making in Fareham. National Planning Policy invites Local Authorities to exceed the minimum housing requirement and to adopt a positive approach to planning for future housing. Plan-making should not be a simple mathematical exercise but a fundamental examination of how to best plan for the long-term future of the Borough. In this instance, and as the Local Plan Supplement was endeavoring to achieve, this enables the Council to develop a strategy for the longer term.
- 4.16 The change of direction in the Regulation 19 consultation document appears to be framed by precisely the opposite; planning for the minimum plan period and the least amount of new development plausible. Patently, that approach does not include the flexibility which a Local Plan should provide.
- 4.17 For example, had the Regulation 19 Plan retained the level of housing calculated by reference to the published Standard Method – 520 dwellings per annum – and had a lower housing requirement in fact materialized, the practical effect of this would merely have been a housing supply strategy that would endure beyond the end of the plan period. In simple terms, the

² Policies CS2 and CS15 refer

housing strategy would cater for an addition 5 years worth of housing. Given that it is beyond comprehension that housing need will not cease after 2037, this would have been a positive, adaptable, plan-led, longer term strategy.

- 4.18 The fact that the Council has alighted upon a potentially lower housing requirement without apparently considering the practical effect of retaining the existing housing requirement manifestly demonstrates a negative, rather than positive, approach to plan making.
- 4.19 Moreover, the Sustainability Appraisal has plainly not considered this as a reasonable alternative and, as such, is flawed. The Assessment of Alternatives in Section 5 of the Sustainability Appraisal relates to development locations rather than the overall quantum of development. The PPG advises that *"a sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted"*. The purpose of testing reasonable alternatives is to determine that a Local Plan promotes sustainable development when judged against reasonable alternatives, to achieve relevant environmental, economic and social objectives.
- 4.20 This negative approach is further evident when considering the components of the housing strategy which again illustrates a do-minimum approach.

Local Housing Need

- 4.21 Application of the Standard Method to calculate the Local Plan's local housing need would require 520 new homes to be provided each year, or 8,320 new homes in total between 2021-2037.
- 4.22 Alternatively, the Regulation 19 Plan is based on 403 new homes each year which is derived from the proposed revisions to the Standard Method published as a consultation document by the Government in the Summer. These proposed revisions carry no weight at the present time and do not provide any basis for the calculation of housing need for the purpose of this Local Plan at the present time.
- 4.23 Only if the proposed revisions are carried forward without alteration by Government would this serve as a basis to underpin the Plan and enable it to be submitted. Any change to the formula, as it relates to Fareham or any of its neighbouring authorities, would require reconsideration of the housing requirement in Policy H1. The Regulation 19 Plan is contingent therefore on the outcome of that entirely separate process, rather than being a Plan which the Council is able to submit for Examination. It is, for want of a better term, a "wait and see" plan.
- 4.24 As the Council appear to acknowledge themselves by the intention not to submit the Plan for Examination until the outcome of the Government's consultation is known, it is plainly not a sound approach at the present time.
- 4.25 Little more can be said about this, other than to draw attention to the obvious difficulties that have arisen in light of the Government's consultation, which have led to a significant level of opposition to the suggested changes. As recently as mid-November the Planning Minister referred to estimates of local housing need derived from its consultation exercise as *"entirely speculative"* and indicating that the revised formula was being re-evaluated.

- 4.26 It is also important to consider when the Standard Method was introduced and the practical effects of this which the Council don't appear to acknowledge.
- 4.27 The Standard Method was introduced in 2018 and the assessed level of local housing need was based on a period of 2016 onwards. The Council appear not to have grappled with the guidance in the Planning Practice Guidance in respect of this: "*Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate*". Plainly we are some way into the plan making process which commenced in 2017 and this requires the Council to have asked themselves how have housing completions compared with the level of local housing need from that point.
- 4.28 The published requirement was 520 dwelling per annum from 2016 onwards, whereas the highest number of completions was 349 in 2016/17 and less than half for the two years since where monitoring information is available.
- 4.29 The Standard Method takes account of backlog but only in so far as affordability will have increased in the years prior to the calculation and does not take account of underprovision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.
- 4.30 The following table illustrates this:

Year	Number of Completions	Level of Local Housing Need	Shortfall
2018/2019	290	520	230
2019/2020*	263	520	257
2020/2021**	132	520	388

*Projected housing supply April 2019

**Projected housing supply June 2020

- 4.31 This indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No account is taken of this in the current consultation document. Even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
- 4.32 In the circumstance where housing delivery in the Borough has been below both that anticipated by the Core Strategy and the measure of local housing need derived from the Standard Method, however calculated, the Council are plainly wrong to have selected a plan period that takes no account of this and a housing strategy that has no regard to that underprovision. This further undermines any notion of a positively prepared plan.

Unmet Need

- 4.33 Section 33A of the Planning and Compulsory Purchase Act 2004 requires a local planning authority to cooperate with, *inter alia*, other local planning authorities, and engage constructively, actively and on an ongoing basis in the preparation development plan documents, so far as relating to strategic matter. Paragraph 25 of the NPPF says 'strategic policy making authorities should collaborate to identify the relevant strategic matters which they need

to address in their plans'. Unlike problems associated with soundness, a failure to discharge the obligation in Section 33A cannot be remedied once the plan has been submitted for examination.³

- 4.34 It is clear from the work of the Partnership for Urban South Hampshire that housing provision is a strategic matter and thus there is a need for co-operation between constituent plan-making authorities. In this regard, the 'plan-making' section of the PPG provides guidance in relation to the duty to cooperate. Paragraph 022 states that strategic policy making authorities are expected to have addressed key strategic matters through effective joint working, and not deferred them while relying on an inspector to direct them. It states "[An] Authority will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any outcomes achieved; this will be thoroughly tested at the plan examination."
- 4.35 The consultation document makes an allowance of an additional 847 houses as a contribution to meeting unmet need from Fareham's Neighbouring Authorities. But as this is the Submission version of the Plan, this allowance should have regard to the co-operation referred to above. There is no evidence that this is anything other than an allowance made by Borough Council without reference to the joint working through PUSH; this is nothing else but a "cart before horse" approach.
- 4.36 The consultation document acknowledges that there is "a significant likelihood of a substantial level of unmet need in the sub-region" (para 4.4) and that over the plan period the level of unmet need in the sub-region could be circa 10,750 new homes. It is instructive that the references to unmet need in para 4.5 of the consultation document are in the context of the current Standard Method and not the higher sub-regional figure that the proposed Standard Revision indicates. In this regard, the plan appears to be "comparing apples and pears".
- 4.37 The following table compares the housing requirement from the current Standard Method and that indicated by the proposed revision.

LPA	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard Method	Proposed new Standard Method	Difference between current and proposed SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1025	+333
PUSH East	1804	1828	2802	3430	+628
Southampton	815	1148	1012	832	-180
Eastleigh		857	694	885	+191
New Forest	521	346	729	782	+53
Test Valley	588	834	550	813	+263
PUSH West	1924	3183	2977	3312	+335

- 4.38 The above illustrates that whilst the Fareham figure might decline, across the sub-region the

³ *Samuel Smith Old Brewery (Tadcaster) v Selby DC [2015] EWCA Civ 1104 paragraphs 38 and 40*

overall scale of housing is greater both in PUSH East and West.

- 4.39 Over a 16-year period, the difference between the proposed new Standard Method would require an additional 10,000 new homes to be built across PUSH East. Compared to average delivery over the past 3 years, almost twice as many new homes will need to be built. This is unquestionably a step change in housing delivery and each Local Authority area will need to contribute towards this and maximise its contribution to the sub-regional requirement.
- 4.40 In September 2020 the PUSH Report to its Joint Committee looked at the potential implications of housing supply relative to Local Housing Need, and using the proposed revision to the Standard Method this still identified a shortfall of over 6,500 across the PUSH East sub-region.⁴
- 4.41 At para 4.5 of the consultation document, the Borough Council put forward a contribution of 847 dwellings towards meeting unmet need. There is no evidence of how this figure has been derived. All that is evident from the earlier passages of that paragraph is the very unclear picture that exists and which is subject to additional work by PUSH. Consequently, the proposed contribution of 847 dwellings – 13% - to unmet need doesn't appear to have any basis in a full and proper assessment of future housing requirement and supply across the sub-region. This is significant because, historically, Welborne had been identified to provide housing supply for that sub-regional purpose whereas now its contribution almost entirely to meet Fareham's housing need.
- 4.42 Switching the role of Welborne in this fashion is taking away a supply of housing identified previously to meet sub-regional needs in the longer term, when plainly that need still exists, and elevating supply available to meet the Borough's need. This denies the original intention of Welbourne, and places a very heavy reliance on one source of housing to meet local needs; on the basis of the Council's strategy, some two thirds of the Borough's housing needs would be met at Welborne.
- 4.43 Again, this illustrates why preparing a Regulation 19 Plan on this basis isn't justified and does not contribute to effective planning across the sub-region.
- 4.44 Moreover, on this basis, the evidence to justify the Council having discharged its duty under Section 33A is not at all obvious; this is particularly significant as this is the Regulation 19 Plan to be submitted for Examination.

Plan Period

- 4.45 The current consultation document is based on the plan period 2021-2037. This is 16 years and would accord with the 'at least 15 years' in the NPPF, if the Local Plan were in fact adopted in 2021. Experience of Local Plan Examinations and the length of time between Regulation 19 and adoption suggests this is highly unlikely. But assuming the Plan is adopted in the 2022 this would provide the bare 15-year plan period.
- 4.46 It is in this context that one has to consider whether the plan is "*sufficiently flexible to adapt to rapid change*". For the reasons given later we say it does not meet this requirement.

⁴ Table 4 Comparison of Housing Need and Supply 2020-2036

Delivery at Welborne

- 4.47 The consultation document's housing strategy is heavily reliant on housing delivery at Welborne, which was previously identified to meet sub-regional requirements. Table 4.2 of the consultation indicates that over 4,000 new homes are to be built at Welborne by 2037 to meet Fareham Borough's local housing need.
- 4.48 This is not a realistic assumption.
- 4.49 It has been readily apparent for some time that past delivery assumptions at Welborne could not be achieved. Despite the Core Strategy and the Welborne Plan assuming a significant number of new homes would have been built at Welborne by the present time, there is still no outline planning permission some 14 months after the Borough Council's Planning Committee resolved in October 2019 to grant permission for the outline planning application (P/17/0266/OA).
- 4.50 In our response to the January 2020 Supplement, we noted that it wasn't surprising that by that time the Section 106 had not been signed given the particular scale of that development.
- 4.51 However, by the present time, the absence of an outline planning permission raises a more fundamental concern about delivery at Welborne.
- 4.52 Nowhere do the Council provide any evidence as to when they expect outline permission to be granted, the extent of any pre-commencement works and their associated timescale, when reserved matters applications are expected and when first completions will be achieved. The closest the Council gets to any justification is that the housing trajectory has been agreed with the developer Buckland.
- 4.53 We are aware that there will also need to be Highway Agreements relating to works to the M27 Junction 10 prior to those works being commenced; again, in our experience such highway agreements are complex and can take a long period of time to complete. The works to be undertaken to the M27 and A32 are substantial. The Planning Officer's Report highlights the estimated costs of these works as £80m-£90m and that funding gap exists in relation to these works. More recently, we understand the Council has had to seek additional funding from Government to cover earlier Local Enterprise Partnership funding that has since been lost. Hampshire County Council has recently confirmed that: "The J10 works are not fully committed at this stage and there is no defined timescale for delivery." This is clearly a major risk in overall terms but also in terms of when such works will be undertaken and the duration of such works.
- 4.54 This is germane to timescales as to when development at Welborne can be anticipated, notwithstanding the milestone it reached in 2019.
- 4.55 A number of housing trajectories have been proposed for Welborne at different stages. The Borough Council's January 2017 Background Paper concerning Welborne set out the Council's assumption at that time. This suggested that 4,090 new homes would be built at Welborne by 2036. Whilst this would align with the current assumption, this overlooks the fact that circumstances have already moved beyond the key dates suggested therein.
- 4.56 If the 2017 trajectory is simply rolled forward to the present day and it is assumed that outline planning permission is granted in 2021/2022 and development commences in 2023/24 then the

total number of completions would be 3,090 dwellings by 2037 – see *Appendix 1*.

- 4.57 This trajectory is clearly sensitive to assumptions. Any delay in commencing development beyond will 2023/24 will cause fewer completions in the plan period.
- 4.58 Moreover, the extent to which 250 dwellings can be built and sustained each year from 2026 onwards is also a highly sensitive assumption.
- 4.59 We note that more recent research from Lichfields⁵ suggests that for sites of more than 2000 dwellings, the average period of time from planning to delivery is 2.9 years. Moreover, that research indicates that for scheme the size of Welborne the number of houses built each year averaged 140 dwellings.
- 4.60 If a mid point between these two assumptions of 185 dwellings per annum were achieved and sustained as the peak output, this would only yield 2,360 dwellings in the plan period.
- 4.61 It is instructive to note that to achieve 4,020 completions in the plan period would require a build rate from 2024/25 onwards of 309 dwellings per annum. A build rate in excess of 300 dwellings per annum was rejected by the Council in 2017.
- 4.62 What is clear from the above is that Welborne’s contribution to housing supply during the plan period has been over-estimated. This component of housing supply is not justified and consequently the housing supply strategy is not effective.

Proposed Allocations

- 4.63 From our analysis of proposed allocations we have been able to identify that, whilst a number of subject to current planning applications, a significant number are subject to constraints that could delay their development. A number of Sites are owned by public bodies or are subject to multiple landownerships and with existing uses⁶. Moreover, a great many are Sites within the urban areas which are likely only suited to flatted schemes to achieve the capacity numbers and may not be suitable to developers.
- 4.64 Other Sites are subject to nitrates constraints⁷ which may require a strategic solution to enable their release.
- 4.65 Consequently, it is questionable whether they will all be developed and this supports not only the principle of a contingency allowance but also the importance that that allowance reflects the overall level of uncertainty associated with the housing supply strategy.

Windfall

- 4.66 Table 4.2 of the consultation document includes a windfall allowance of 1,224 new homes between 2021 and 2037.
- 4.67 The principle of including a windfall allowance is explained in the NPPF at para 70 in the

⁵ Start to Finish (2016), Driving Housing Delivery (2018)

⁶ FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13, HA22, HA24, HA31, HA36-39, HA42, HA44

⁷ HA1, HA12, HA34, HA40

following terms:

- Firstly, there should be compelling evidence that they will provide a reliable source of supply.
- Secondly, any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 4.68 It is evident that the above is much more than a consideration of historic windfall delivery and requires the plan-maker to actively consider future supply from this source.
- 4.69 The Council's Windfall Background Paper projects forward 51 windfall completions on small sites from 2024/25 and an additional 52 windfall completions from large sites from 2025/26. The only source of information that the Council has used to arrive at these figures is its breakdown of past windfall delivery from 2009 – 2019 which averaged 101 dwellings (51 for small sites and 52 for large sites).
- 4.70 Para 3.6 of the Background Papers states: *"The estimated rate of windfall development is based on past completion rates..."* (emphasis added)
- 4.71 Para 3.9 of the Background Paper states: *"To ensure that a cautious approach is taken and windfall projections are not overly optimistic, the projections have only taken account of windfall delivery since 2009/10"*.
- 4.72 The very next paragraphs states *"Based on the preceding analysis, the windfall projections for the Borough are 51 dwellings per year from small site delivery and 51 dwellings per year from large site delivery"*.
- 4.73 It is clear that the assumption in Table 4.2 of the consultation document is derived solely from past trends and it is claimed that this demonstrates *"a compelling case"*. However, nowhere in the analysis is there consideration of whether this is a reliable source of future supply, rather it is just a forward projection of what happened in the past. The analysis does not provide any consideration of expected future trends.
- 4.74 It is important to recognise that windfall opportunities are finite. Opportunities to redevelop vacant or redundant land will have largely been exhausted by the present time because of planning policies that have prioritised such sources of supply for the past decade and longer. Consequently, future windfall over the plan period will rely to a much greater extent on recycling of land (i.e. existing uses being changed). This is inevitable a less certain source of housing supply.
- 4.75 For the purpose of assessing whether the Plan's housing supply strategy is sound, we have adjusted the windfall contribution by 25% i.e. 918 completions over the plan period.

Revised Housing Strategy

- 4.76 In the preceding Sections we have considered both the level of local housing need and the housing supply strategy providing a reasoned justification why this Regulation 19 Plan is not sound. The following table illustrates the effect of this.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	8,320	520 dpa
Under-supply 2018-2020	875	Added to reflect actual housebuilding relative to LHN
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	10,050	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect roll-forward of 2017 Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 25% to reflect finite supply
Total Supply	7,150	Sum of Supply estimates
Shortfall	2,900	

*retained at 13% of unmet need for illustrative purposes absent any Statement of Common Ground

- 4.77 The above illustrates that with these alternative assumptions, additional land needs to be identified for some 3,000 new homes.
- 4.78 Even if the strategic housing requirement were calculated simply by reference to 403 dwellings per annum, there would be no contingency to take account of changing circumstances over the plan period, contrary to the assertion in the plan to this effect.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	6,448	403 dpa
Under-supply 2018-2020	nil	N/A
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	7,295	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect 2017 Housing Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 20% to reflect finite supply
Total Supply	7,153	Sum of Supply estimates
Shortfall	142	

- 4.79 The above analysis clearly shows that Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to assumptions about housing supply, additional housing land should be allocated for development.
- 4.80 In the following Section we submit that the Strategic Growth Area identified in the Local Plan Supplement 2020 should be allocated for housing development.

5 South Fareham Strategic Growth Area

- 5.1 In our previous representations we supported the inclusion of Strategic Growth Areas in the Local Plan. Hallam control a substantial tract of land to the South of Fareham, adjoining the Stubbington Bypass, the construction of which has recently commenced. This land, along with other parcels in this location, is identified in Figure 3.2 of the Local Plan Supplement Consultation Document as the Proposed Strategic Growth Area South of Fareham.
- 5.2 The justification for the allocation of a Strategic Growth Areas is evident from the preceding Section which identified a significant shortage in the amount of new housing to be provided in the Borough and the amount of future development land allocated for this purpose. Development South of Fareham could provide housing land over the plan period, both in the immediate term and continuity over the long term.

South of Fareham

- 5.3 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. The town is the largest in the Borough with a population of around 37,300. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town.
- 5.4 Fareham is also an important economic centre, which has developed further over recent years with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane and the Peel Common Roundabout.
- 5.5 A new, mixed use masterplanned development to the South of Fareham, contiguous with Longfield Avenue, benefits from its proximity to the town centre, Daedalus, the railway station and existing local services and amenities with good access to walking, cycling and public transport links. These are locational merits that align with *Good Growth*.
- 5.6 Stubbington and Hill Head form a single urban area and have a population of c.14,300. These settlements have a range of services with a local centre, doctors, dentists, two primary schools, a secondary school and a community centre.
- 5.7 Local employment has improved with the development at Daedalus, which lies to the south east of the settlement. Development in south Fareham would delivery homes close to this economic and employment zone, providing housing for the growing workforce.
- 5.8 The Stubbington Bypass is being constructed to connect Gosport Road, Peak Lane and Titchfield Road. This will inevitably create an urbanising influence through the centre of the existing Strategic Gap. Development to the south of Fareham would assist in assimilating the bypass into the landscape and soften the impact of the road on the gap, beyond what could be achieved from constructing the bypass alone.

Development Potential

- 5.9 Paragraph 3.24 of the consultation document identifies high-level development principles and

requirements. Hallam support these intended outcomes and these have underpinned their proposals for a mixed-use masterplanned development.

- 5.10 Work undertaken over a long period of time has identified the suitability of the land controlled by Hallam to accommodate new development, how development can be arranged and the extent of mitigation required.
- 5.11 In our response to the 2019 Issues and Options consultation, we identified potential areas for development in this location and for convenience we have attached this at *Appendix 1*. Whilst this considered only land which Hallam control, we recognise that there are other smaller scale development opportunities within the general location, and that the Borough Council intend to work with landowners and site promoters to develop a Council-led masterplan which will focus on the delivery of community benefits as part of Good Growth. In this context, Hallam are committed to working with the Council and others to develop these proposals further as part of a co-ordinated approach.
- 5.12 A development scheme could comprise the following:
- Approximately 1,200 units
 - a new healthcare facility
 - a primary school
 - a care home
 - community hub
 - local shops
 - sports hub and
 - Green Infrastructure to include public open space, equipped areas of play, Sustainable Drainage Systems (SuDS), tree, hedge and shrub planting, meadows, structural woodland planting, allotment gardens and permissive footpaths and cycleways.
- 5.13 Development would be accessed from a primary and secondary access from Longfield Avenue, along with associated improvements to the existing Long field Avenue/Bishopsfield Road junction and carriageway and a primary access from Peak Lane.
- 5.14 An outline planning application for such a proposed development was submitted in June 2020 and is presently undetermined.

Accessibility and Movement

- 5.15 The accessibility advantages of this location enables positive promotion of active travel. The proposed development will be served by an internal network of footways and access arrangements that can be utilised by both pedestrians and cyclists. The site is surrounded by Public Rights of Way (PRoW) that in turn can serve as cycle/walking connections from the site to other roads in the vicinity of the site. These will be maintained and improved in order to encourage more sustainable modes of travel as an alternative to the conventional car.
- 5.16 Bus based public transport is also a feasible means of sustainable travel from this location. Service provision on the route number X5 operated by First Group provides opportunity for peak commuter travel and also for off-peak travel. The scale of development proposed is

sufficient to deliver dedicated public transport coverage between the Site and key destinations that will have the frequency and reliability to attract patronage to secure long term viability. Any improvement will be discussed with the necessary stakeholders, but it is envisaged that the development will support the introduction of new services.

- 5.17 The Eclipse Busway - a Bus Rapid Transport scheme between Fareham and Gosport opened in 2012 providing a priority public transport route connecting the two towns. The BRT scheme provides a more efficient service using new, comfortable, low-emission buses that encourages bus travel through enhancing the bus travel experience. Using the new busway, buses are able to avoid congested parts of the highway network including A32 so that passengers can benefit from reliable journey times and can plan their onward travel connections.
- 5.18 A number of new highway improvements works have been implemented or are currently under construction which is intended to improve bus journey reliability, and encourage more people to switch from car travel to using the bus. This would have an effect of helping reduce traffic numbers and traffic congestion between Fareham and Gosport, including along Newgate Lane.

Nitrates

- 5.19 The land is located directly west of the edge of urban area that forms part of the designated Chichester, Langstone and Portsmouth Harbours Eutrophic NVZ (TraC) (Nitrate Vulnerable Zone). The land is currently predominantly arable farmland with a history of mixed crops such as wheat, barley, oats, rape etc. and break crops such as peas, winter oil seed rape and beans.
- 5.20 The above is recorded on a Nutrient plan detailing fertilizer types, tonnages and time applied for each individual field. The fertilizer applied during the period of record is a mix of pig and farm yard manures.
- 5.21 It is recognised that intense farming with fertilization with natural manures will lead to nitrate leaching into the surrounding surface water and ground water environment.
- 5.22 Through development of the land, the leaching of nitrates through farming activities will be curtailed. While there will be a new source of nitrate production and leachate associated with the new development, this is considered to be at worst a neutral impact and through further assessment a net reduction in nitrate leaching can be achievable.

Biodiversity

- 5.23 The Hallam land is divided into two areas by Peak Lane; the eastern area comprises largely of arable land with hedgerows and ditches forming the compartmentalisation typical of the surrounding arable tenure and has limited nature conservation value. The western compartment consists of a large area of set aside land, with areas of arable crops, which are bound by limited hedgerows and tree lines.
- 5.24 The most significant habitat is Oxleys Coppice which is designated as a SINC and an area of ancient and semi-ancient woodland (ASNW), which has been evaluated as county level conservation value. The Scheme can ensure that Oxleys Coppice is protected.
- 5.25 Hedgerows are mostly classified under the Hedgerow Evaluation Grade System (HEGS) as moderate and moderate/high value. Only two hedgerows are classified as 'important' under the

Hedgerow Regulations (REGS). Several drainage ditches are found through the Site but only have limited marginal and aquatic vegetation. These are classified as no more than local conservation value.

- 5.26 Surveys have identified the presence of a number of protected species, bats and breeding birds. Measures to safeguard these species and their habitats can readily be accommodated as part of the development proposed. The habitats created and the species which will benefit from the mitigation measures proposed in the Site will lead to an overall beneficial effect in the long term. Similarly, in accordance with the Solent Waders and Brent Goose Strategy, a financial contribution will be made to this, based on the classification of land's suitability for supporting such species.
- 5.27 The Solent & Southampton Water Ramsar/SPA, which also includes Titchfield Haven SSSI, is approximately 700m from the Site. Portsmouth Harbour Ramsar/SPA/SSSI is located approximately 1.3km to the east of the Site at its nearest point, which also support a variety of habitats and an assemblage of dark-bellied brent geese. The Solent Maritime SAC extends from the River Hamble mouth up to Botley in the west, this is approximately 4.7km west of the Site.
- 5.28 There is the potential for a Likely Significant Effect on the Solent SPAs from an increase in recreation from new housing development within a 5.6km zone of influence of the Solent. As a result, an Interim Solent Recreation Mitigation Strategy was published in 2014 to enable initial mitigation measures to be placed, so LAs could continue to grant permission for new homes. The strategy has been updated to form the basis for future new housing up to 2034, with the Bird Aware Solent Recreation Mitigation Strategy (2017).
- 5.29 As this Site falls within the established zone of likely significant effect (5.6km), a HRA/AA will be required by the LPA; however a site specific Test of Likely Significance will be provided to facilitate the LPA assessment. The mitigations measures required to facilitate the Proposed Development will see a financial contribution provided for the in-combination effects on the Solent SPA, with additional bespoke mitigation provided within the Site to mitigate for the alone effects.
- 5.30 The details of bespoke mitigation are to be discussed with Natural England. Current proposals will include an area of County Park/Green Infrastructure to the west of Peak Lane, measuring approximately 23ha, which will include a circular walk, car park and habitat features to provide point of interest, as well as safe areas for dogs to be exercised off the lead. Alternative areas of GI will be provided around the main residential areas to the east of Peak Lane, here approximately 32ha will be provided, which will incorporate recreational opportunities and areas of biodiversity net gain.
- 5.31 The mitigation measures provided within the Site will ensure that there are no likely significant effects on the Solent alone and in-combination with other schemes within Fareham.

Strategic Gap

- 5.32 The current Core Strategy designates land between Fareham and Stubbington as a Strategic Gap. This follows such a designation being contained within earlier Development Plans; Settlement Gap policies in Hampshire date back at least 30 years when they were included within the South and Mid Hampshire Structure Plans (1988 and 1989). They were carried forward into the Hampshire County Structure Plan 1994 and the Hampshire County Structure

Plan 1996-2011. Consequently, with each new development plan needing to make provision for current and future development needs, the role and function of gaps need to be considered having regard to up to date circumstances.

- 5.33 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. As described earlier, this new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. Such a conclusion is similar to the assessment undertaken by Hallam previously.

Summary

- 5.34 Hallam support the identification of the Strategic Growth Area to the South of Fareham and have identified a development scheme that achieves the high-level development principles and requirements set out in the consultation document.
- 5.35 Importantly, development in this location can be brought forward that provides new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.
- 5.36 The merits of this location are substantial, and carefully planned development will not result in the coalescence of Fareham and Stubbington and the separate identities of these settlements can be retained.
- 5.37 As such, the allocation of land at South Fareham in the Local Plan for future development is considered wholly appropriate.

6 Policy NE5 and Policies Map

- 6.1 The Policies Map includes designations relating to Waders and Brent Geese and are associated with Policy NE5. This designation covers four categories of land – Core and Primary Support Areas, Secondary Support Areas, Low Use Areas and Candidate Areas.
- 6.2 The extent to which the land concerned is used by Waders and Brent Geese, particularly beyond the Core Areas, is transitory and can differ from time to time as a consequence of changes in agricultural practices (for example, arable land with wintering cereals provides an optimal foraging resource, whereas when this is replaced / succeeded by grassland habitats its function can change, which could affect species assemblages and regularity it is used. Changes in land use also promote further recreational uses which is the case for areas west of Peak Lane) or changes to the extent of the built environment (for example newly built structures, such as the Stubbington Bypass, will change the suitability of a location in proximity to it as a receptor). Therefore, to delineate these areas in the manner shown on a Policies Map, which affords permanence to the designation, fails to take account of the potential changes in circumstance and is not sound as a matter of principle.
- 6.3 The practical effect of this is that Policy NE5 directs the decision-maker to consider development proposals against the criteria listed therein and the status of the land by reference to the designations shown on the proposals map, which may at that point in time no longer be up-to-date or relevant.
- 6.4 Through Hallam's work in respect of the land to the South of Fareham, and through discussion with Natural England, it has identified a different classification to that shown on the Policies Map for certain of those parcels of land, as shown on *Appendix 2*. This illustrates how the application of Policy NE5 could misdirect the decision maker.
- 6.5 On this basis, these designations should not be shown on the Policies Map in the manner they are presently.
- 6.6 A more generic designation such as Areas of Waders and Brent Geese Sensitivity, which does not classify individual land parcels, would be more appropriate.
- 6.7 It would follow that Policy NE5 would be amended to require planning applications to assess and determine the use of land subject to those development proposals and at that point, when an up to date classification has been determined, the criteria and mitigation in Policy NE5 would apply.

7 Summary

- 7.1 These Representations have been prepared on behalf of Hallam Land Management Limited (Hallam), who control a substantial tract of land to the South of Fareham, adjoining the existing urban area and Stubbington Bypass, the construction of which has recently commenced.
- 7.2 This land was identified in the Local Plan Supplement 2020 as a potential Strategic Growth Area. Whilst the Regulation 19 Plan does not propose to carry forward the South of Fareham Strategic Growth Area, as is evident from these representations the need for such an allocation has not diminished.
- 7.3 The consultation document rightly identifies the Borough Council's commitment to meet the Borough's housing need by the end of the plan-period. This is plainly aligned with the NPPF and the Government's objectives. What is notably absent from the Vision and Strategic Priorities, is the recognition that Fareham is important in a sub-regional context and was previously intended to provide significant development land at Welborne to meet wider needs.
- 7.4 Policy H1 is not founded on a sound basis. In preparing and publishing this Regulation 19 Plan, the Borough Council has afforded greater weight to a potential revision to the Government's Standard Method and has disregarded the published and established measure of local housing need which has underpinned its work to date. Unless and until the Government publish a revision to the Standard Method, this version of the Plan cannot be submitted for Examination as it is plainly unsound. The Borough Council recognise this from its Committee Papers.⁸ This is nothing other than a "wait and see" Plan.
- 7.5 Only if the Standard Method is published in the same final form will the Plan be able to proceed – there is no indication if or when the Government intend to complete this exercise given the significant scrutiny it has attracted.
- 7.6 A more positive approach would have been to retain the higher level of housing as the basis of the Plan to provide surety over a long term with policy measures to manage housing supply in the event the level of local housing need was reduced. Unfortunately, the Council hasn't considered this as an option or a reasonable alternative in the Sustainability Assessment.
- 7.7 Even in the event the proposed revision to the Standard Method were confirmed as the Plan assumes, there is little if any evidence of a cogent understanding of the level of unmet need across neighbouring authorities. There is no apparent evidence of effective co-operation to justify the contribution the Plan proposes to unmet need.
- 7.8 Moreover, the Council hasn't applied its mind to the level of housing that been achieved since the Standard Method was introduced at the start of the plan making process and the date the plan is to be adopted. Viewed objectively, housing completions over that three year period were below the level of local housing need and this shortfall, which is part of a much greater shortfall when compared to the Core Strategy's housing intentions, should be accounted for.
- 7.9 Turning to housing supply, the assumption that Welborne will provide 4000 new homes within the plan period is not founded upon evidence previously produced by the Council and the level

⁸ Executive Briefing Paper 12th October 2020, para 12

of housing output assumed is at a level the Council previously considered unrealistic.

- 7.10 The windfall assumption drawn simply from past trends has not justified why this is a source of future supply. Uncertainties also exist in relation to a number of the proposed allocated sites because of landownership, extent of existing uses and location.
- 7.11 For all of the above reasons, the Plan's approach to housing will fall short of its Vision and Strategic Priorities. Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to housing supply, additional housing land should be allocated for development.

South of Fareham

- 7.12 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town. Similarly, Fareham is an important economic centre, including the Solent Enterprise Zone at Daedalus to the south of the town.
- 7.13 It is considered that development to the south of Fareham would be in a sustainable location, with good access to walking, cycling and public transport links, as well as local services and amenities. This location adjacent to the existing urban area creates a good opportunity for a natural and sustainable extension to the urban area. Development in south Fareham would deliver homes close to an important source of new employment and jobs at Daedalus.

Strategic Gap

- 7.14 The current Core Strategy designated land between Fareham and Stubbington as a Strategic Gap.
- 7.15 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. This new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. The delineation of the Strategic Gap on the Policies Map should be amended accordingly.

Proposed Modifications

- 7.16 The following Modifications are considered necessary for the Local Plan to be sound:
 - 7.16.1 The minimum housing requirement in Policy H1 to be defined by reference to the existing Standard Method;
 - 7.16.2 The housing requirement be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;

- 7.16.3 The level of unmet need that is accommodated be based on constructive, active and on ongoing engagement with neighbouring authorities;
- 7.16.4 Assumptions about the delivery of new housing at Welborne be revisited and revised down;
- 7.16.5 The windfall allowance be revised down;
- 7.16.6 Alternatively, to 6.16.4 and 6.16.5 the level of contingency be increased;
- 7.16.7 Additional housing allocations be provided for;
- 7.16.8 Land South of Fareham is allocated for housing development; and
- 7.16.9 Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood is amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- 7.16.10 The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

J11 M27 – Down Barn Farm, Fareham

Representations on the Fareham Borough Local
Plan to 2037

Submitted on behalf of Graham Moyse

December 2020

Contents

1.	Introduction	1
2.	Representations	3
3.	Land at J11 of the M27 (inc Down Barn Farm)	10

Appendix 1:	Land at J11 of the M27 (inc Down Barn Farm).	11
-------------	--	----

Stuart Irvine

Client

Graham Moyse

December 2020

1. Introduction

- 1.1 Turley are instructed by Graham Moyle to prepare representations in respect of the Fareham Local Plan 2037 – Regulation 19 Submission Draft.
- 1.2 Graham Moyle owns land in the vicinity of Junction 11 of the M27 (known as Down Barn Farm) and as a local farmer and entrepreneur, oversees a number of valued local businesses.
- 1.3 The primary purpose of the representations is to shape the policies of the Local Plan to support the aspirations of Graham Moyle in respect of the potential that exists at Down Barn Farm.
- 1.4 The representations have been set out in Section 2 of this report and have also been submitted individually on the relevant representation forms.
- 1.5 Section 3 sets out some initial details of the potential that exists on the land at J11 of the M27 (including Down Barn Farm). Whilst these proposals are still at a formative stage, that they offer an exciting and unique opportunity to address two key development concepts, namely:
 - A dedicated electric vehicle service station and associated facilities
 - A location to accommodate business / infrastructure users that require proximity to the strategic road network
- 1.6 The location of the site at Junction 11 of the M27 is well suited to respond to such uses given its accessibility to the motorway network and its proximity to key urban areas.
- 1.7 Whilst the broad principles of the emerging Local Plan are supported, it is our view that there are two substantive omissions in terms of its content, namely:
 - Insufficient recognition is given to the need to provide infrastructure to support the growth of electric vehicle usage (including specific allocations for such facilities); and
 - There has been a failure to recognise the need for specific employment provision to accommodate users who need a high level of accessibility and are of form that is not well suited to being within the built up environment.
- 1.8 These principles are drawn out through the representation in Section 2.0, with the conclusions that:
 - The wording of several policies should be amended to more fully recognise the importance of electric vehicles and to provide support to the delivery of infrastructure that is necessary to support the establishment and growth of the electric vehicle network over the lifetime of the Local Plan.

- Greater recognition should be given within the relevant employment policies, to supporting growth in locations, such as the land at J11 of the M27, where they respond to the specific needs of users.

2. Representations

2.1 Representations have been made in respect of the following chapters, paragraphs and policies of the plan.

- Paragraph 2.10 – Fareham Local Plan 2037 Vision
- Paragraph 2.12 – Strategic Priorities
- Paragraphs 3.4 / 3.5 – Good Growth
- Policy DS1 – Development in the Countryside
- Policy DS3 – Landscape
- Chapter 6 – Employment
- Policy E1 – Employment Land Provision
- Chapter 8 – Climate Change
- Policy CC1 – Climate Change
- Policy CC4 – Renewable and Low Carbon Energy
- Policy NE8 – Air Quality
- Policy TIN1 – Sustainable Transport
- Policy TIN4 – Infrastructure Delivery

2.2 Each representation is by its nature an objection and consideration has been given in respect of each as to how the plan could be amended to overcome the objection.

2.3 In addition to the representations being set out below, each has also been submitted on an individual objection form.

Paragraph 2.10 - Fareham Local Plan 2037 Vision

Representation

2.4 The vision is supported in general terms. However, its failure to include reference to supporting measures to address climate change is a significant oversight. Making provision for the necessary infrastructure within the Borough to support changing technologies is fundamental to addressing climate change. There are substantive changes, such as the transition of petrol to electric vehicles, which will take effect over the plan period, and the vision should reflect the need to deliver appropriate infrastructure to support that change.

Amendment

- 2.5 Add an additional statement to confirm that the Local Plan will promote the delivery of infrastructure to support infrastructure delivery that is relevant to address the climate change agenda.

Paragraph 2.12 – Strategic Priorities

Representation

- 2.6 Whilst there is a strategic priority relating the climate change, it fails to recognise the need for and importance of infrastructure delivery to support key aspects such as the transition from a road network that is dominated by petrol based vehicles to one where electric vehicles are the primary vehicle mode. This transition will take place over the life of the plan period and there is a need to promote both home and network based facilities to enable this to take place. A failure to specifically reference this as a strategic priority is a clear oversight.

Amendment

- 2.7 Amend strategic priority number 11 to make specific reference to the provision of infrastructure to supports electric vehicles changing, both at home and across the highway network.

Paragraphs 3.4 / 3.5 – Good Growth

Representation

- 2.8 The concept of good growth should be extended to make specific reference to highway network related infrastructure that promotes electric vehicles. Over the plan period the sale of petrol / diesel vehicles will end (2030) and the transition toward alternatives, principally electric vehicles will require the delivery of necessary infrastructure, both in homes and across the network. The promotion of good growth should include a clear and proactive intent to deliver such infrastructure.

Amendment

- 2.9 Include reference within the supporting text to the delivery of electric vehicle related infrastructure as part of measures to address climate change.

Policy DS1 – Development in the Countryside

Representation

- 2.10 The policy should include an additional bullet that allows for employment related development that has a specific locational requirement, such as accessibility to the strategic road network.

- 2.11 In addition there should also be a wording amendment to bullet h), to recognise that certain infrastructure can have specific location requirements, which means that delivery is required within a countryside location.
- 2.12 Examples of such provision include facilities to serve the strategic road network (including electric vehicle charging stations) and to those forms of business where there are specific sustainable advantages to being close to roads (for example waste related activities).
- 2.13 The policy should provide sufficient flexibility to allow for due consideration to be given to infrastructure and commercial requirements and the way in which key climate change and wider sustainability can be achieved by accommodating appropriate development in the countryside. It is recognised that such uses may be limited in form, but the policy should acknowledge that such uses should be supported.

Amendment

- 2.14 Amend the policy to include reference to commercial and infrastructure based uses that have key locational requirements, such as proximity and accessibility to the strategic road network.

Policy DS3 - Landscape

Representation

- 2.15 The policy is well formed, but would benefit from specific recognition that there will be forms of development that have specific locational requirements. This may include growth in locations where change in the landscape is more sensitive to change. In such circumstances, there will be means through which impacts can be appropriately mitigated. To support this, the policy should include reference to supporting development where landscape impacts are being addressed through appropriately formed landscape strategies.

Amendment

- 2.16 Amend the policy to reflect that where there are landscape impacts associated with development, growth can still be supported provided an appropriate landscape strategy (including mitigation where required) is set out.

Chapter 6 - Employment

Representation

- 2.17 The approach to employment provision set out within Chapter 6 serves to faces adequately into the quantitative employment needs of the Borough over the plan period. However, there is a lack of recognition to key qualitative matters, including the need to support the demands of business that have specific location requirements and to those uses that may be displaced to accommodate other uses (particularly residential).
- 2.18 There will be businesses that demand locations that are well related to the strategic road network for example, or are for forms of development that are not well suited to

either residential areas or B1 based business locations. There does not appear to be a cogent evidence base to demonstrate how the needs of such users are to be accommodated.

- 2.19 By its nature, the quantitative approach to employment provision does not factor this in, with new employment provision being on a restricted number of sites, which are either distant from the strategic network or are focussed on office based uses. On existing sites, there has been a significant reduction of available provision as a consequence of redevelopment for other uses, particularly residential. This implication of these changes has not been addressed, with the needs of displaced uses being particularly acute.
- 2.20 To address this, the employment strategy should make specific allowance for the broad needs of business, with a positive and proactive approach to accommodating the genuine needs of economic development, with a presumption in favour of investment in employment generating development and associated infrastructure.

Amendment

- 2.21 Expand the employment section to include a policy that supports employment generating development (by way of presumption in favour) and recognises the specific location requirements of certain commercial uses, including those that have been displaced by the redevelopment of existing employment sites.

Policy E1 – Employment Land Provision

Representation

- 2.22 The policy is wholly focussed on a numerical approach to employment provision, with no reference to qualitative employment needs. In addition, the new employment allocations are highly restrictive in locational terms and provide limited scope for new growth in other parts of the Borough.
- 2.23 The policy should recognise the broader employment needs that will exist within the Borough across the plan period, to ensure that opportunities for new investment are not missed, or that the qualitative and location needs of businesses can be met.
- 2.24 In this regard, the policy should be expanded to recognise that the employment requirements should not be viewed as a maximum provision and that other opportunities for employment growth should not be frustrated unnecessarily. This should take the form of a general presumption in favour of employment generating development in suitable and sustainable locations.
- 2.25 In specific terms, consideration should be given to identifying land at J11 of the M27 (including Down Barn Farm) as an employment allocation. This site is well related to the strategic road network and provides a unique opportunity to accommodate users who are dependent upon such a location. The site is also well suited to accommodate users who are also ill suited to either a residential environment or a more traditional business park location. This is reflected by its current use by the Highways Agency as a

processing facility to support the implementation of the smart motorway improvements on the M27.

- 2.26 The merits of this location are not driven by the quantitative needs as set out within the plan, but the qualitative considerations described above. The site would be of particular interest to a number of existing business who are being displaced by other major developments in the wider South Hampshire context. This is a unique opportunity that the Local Plan should embrace either by way of a specific allocation, or by creating policies that allow due consideration to be given to such development should it come forward via a planning application.

Amendment

- 2.27 Amend the policy to reflect the comments above.

Chapter 8 – Climate Change

Representation

- 2.28 The climate change chapter has not been drafted with a full recognition of key consideration that are relevant to the promotion of climate change objectives. In particular, the failure to adequately reference the transition of petrol to electric vehicle based travel and its associated infrastructure needs is a major oversight.
- 2.29 The Government has committed to ending the sale of petrol and diesel vehicles by 2030, with all vehicles to be zero emission based by 2035. Both of these events are within the plan period and will require the delivery of appropriate home based and network based infrastructure.
- 2.30 It is noted that the broader plan includes policies that reference the need to integrate electric vehicle charging into new development, however, it is entirely silent on the needs to delivery supporting infrastructure across the wider transport network. This should be addressed by the provision of a specific policy within Chapter 8 that promotes the provision of key infrastructure that will support the transition of the highway network to net zero. This would include support for electric changing facilities in appropriate locations that are well related to the strategic road network.

Amendment

- 2.31 Include specific reference within the Chapter to the need to support the transition to a net zero highway network, with a specific policy that promotes the delivery of related infrastructure, including electric vehicle changing.

Policy CC1 – Climate Change

Representation

- 2.32 This policy is inadequate as it fails to recognise the importance of supporting the transition of road vehicles towards net zero, which will be a key consideration over the plan period if wider Government objectives are to be achieved.

Amendment

- 2.33 Amend the policy to include a bullet point that recognises the importance of infrastructure delivery associated with the transition of the road vehicles to net zero, including appropriate supporting infrastructure.

Policy CC4 – Renewable and Low Carbon Energy

Representation

- 2.34 This policy focuses exclusively on energy generating development. This is unnecessarily narrow, and indeed has been drafted in an overly negative way that fails to recognise the fundamental benefits associated with delivering such valuable forms of energy generation.
- 2.35 The policy should recognise that there will be infrastructure that serves to promote net zero, such as electric vehicles, which should be supported. This may sit in a policy of its own, but failing that, CC4 should be expanded to include the consideration of development proposals that deliver such infrastructure, but with a more generous presumption in favour of such development, rather than the overly restrictive approach that is currently cast within the policy.
- 2.36 This restrictive approach has been driven by the perception that uses such as solar farms and wind farms imply significant impacts (particularly visual). This is not the case of all forms of net zero and progressive technologies and the policy should make a clear distinction in that regard.

Amendment

- 2.37 Unless addressed in a policy of its own right, CC4 should be amended to include reference to other forms of infrastructure that promote net zero related technologies, such as electric vehicle charging. In making these amendments, the policy text should be recast to recognise that these technologies are different to those energy generating uses that are perceived to have significant visual impacts. This should be reflected by a general presumption in favour of the delivery of lower impact infrastructure.

Policy NE8 – Air Quality

Representation

- 2.38 The references within this policy to the promotion of electric vehicle charging infrastructure is welcomed. However, this is focussed exclusively on provision within new developments. This is insufficient to meet the infrastructure needs required to service the transition of petrol / diesel vehicles to net zero emissions based vehicles over the period to 2025.
- 2.39 Whilst home based infrastructure is appropriate, it does not address the key consideration of charging facilities within the wider highway network, particularly in terms of users who are travelling across the strategic road network where there is a substantive issue regarding the ability to recharge when on longer journeys or where access to home based infrastructure is not available.

- 2.40 In this respect, unless addressed elsewhere in the plan, policy NE8 should include provisions that support the delivery of electric vehicle charging infrastructure to serve the wider strategic road network.

Amendment

- 2.41 Amend the policy as suggested above.

Policy TIN1 – Sustainable Transport

Representation

- 2.42 This policy is premised on the basis of the promotion of non-car based means of travel. This is commendable but does not adequately recognise that the transition towards net zero emissions based vehicles will also make a valuable contribution towards more sustainable transport patterns. Given the timescales associated with this transition (over the period to 2035), there should be strong support within TIN1 to the delivery of infrastructure that enables this transition.

Amendment

- 2.43 Amend to include reference to the role of electric vehicles as a sustainable mode of transport and to provide support for appropriate infrastructure to facilitate their delivery.

Policy TIN4 – Infrastructure Delivery

Representation

- 2.44 This policy focuses wholly on ensuring that infrastructure that supports new development is delivered in a timely manner. This is supported but it fails to address the need for the delivery of wider infrastructure, particularly that which stems from the objectives set out within the Climate Change chapter (and also reflecting our representations on the policies in that chapter).
- 2.45 The policy should be broadened in its intent to incorporate a focus on ensuring that this wider infrastructure is delivered alongside new development to ensure that core climate change objectives are capable of being met. This implies an imperative to support the early delivery of such infrastructure within the early parts of the plan period.

Amendment

- 2.46 Amend to include reference to the timely delivery of wider infrastructure, particularly that which is crucial to supporting climate change related objectives.

3. Land at J11 of the M27 (inc Down Barn Farm)

- 3.1 The land at J 11 of the M27 comprises the land immediately adjacent to the motorway junction (to the north and north east) extending up to Boarhunt Road. The site currently accommodates a number of users, including a park & ride and strategic base for the Highways England in undertaking the smart motorway improvements that are currently underway.
- 3.2 A plan showing the location of the site is attached at Appendix One.
- 3.3 This site offers a unique opportunity to respond to a range of development needs, including those that require a location that is directly related to the strategic road network, or to accommodate users that are not well suited to either a residential environment or a business park.
- 3.4 A number of potential forms of development are appropriate for this location, including:
- Service facilities to serve the M27, including scope for an electric vehicle charging station.
 - Uses of a similar form to those that are currently in place to meet the needs of Highways England – such as processing of building / waste materials.
 - Displaced users who require relocation away from other sites that are being redeveloped for other uses or are allocated for such development. This is particularly relevant to locations such as Tipner where the sites development will require a number of business to relocate to alternative sites that meet their needs.
 - Other uses that require accessibility to the strategic road network.
- 3.5 The site can be developed in an appropriate manner, incorporating a strong landscape framework and measure to promote biodiversity gain. The ability of the site to accommodate significant development without giving rise to undue impacts is currently being demonstrated by the scale of existing activity on site.
- 3.6 Further details to support the promotion of the site in the manner outlined above are currently in preparation and we would welcome the opportunity to consider how the Local Plan can support its delivery.

Appendix 1: Land at J11 of the M27 (inc Down Barn Farm).

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson

[REDACTED]

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

Fareham Borough Council Local Plan (Reg.19) Proposed Submission Version Consultation

Hampshire County Council Response – 18 December 2020

Hampshire County Council does consider the local plan to be sound and legally compliant. The County Council welcomes the opportunity to respond on this consultation and sets out its comments firstly on the Transport Assessment and then on specific local plan policies in its capacity as the local highways authority, local education authority and in its role as an adult services provider with a focus on specialist care.

The County Council then sets out its comments on specific site allocations in its capacity as the local highway authority, local minerals and waste planning authority and also as the local education authority with responsibility for school place planning.

Policy HA2: Newgate Lane South (removal as a housing allocation)

Hampshire County Council is the Local Highway Authority (LHA) for all roads in Hampshire except for motorways and trunk roads and the LHA response is concerned with the potential highway and transportation impacts of the land use proposals set out by the borough council on the local road network. HCC's primary concern as highway authority is the efficient use, management and maintenance of the local highway network. Ensuring that all new development mitigates its impact on the Hampshire network is the function of the highway authority.

The LHA submitted comments in December 2017 and February 2020 in response to the draft local plan regulation 18 consultations. As part of both responses the LHA submitted an objection to policy HA2 (Newgate Lane South). This objection is not resubmitted due to the removal of policy HA2 as an allocated housing site from the revised development strategy in the Publication Plan.

Transport Assessment

At the time of the previous draft local plan consultation in January 2020 the evidence base did not include a completed Transport Assessment (TA) to replace the interim TA published in support of the 2017 draft local plan consultation therefore the local highway authority submitted a holding objection. The TA has now been finalised and forms part of the Publication Plan evidence base.

The LHA supports the methodology used by FBC in preparing a borough-wide TA and the use of the strategic model known as the Sub Regional Transport Model (SRTM) to assess the wider transport impacts of the strategic disposition of proposed development across the Borough.

The Fareham Local Plan - SRTM modelling report (2020) sets out the Baseline, the Do minimum (with local plan development) scenario and the Do Something (with mitigation) model runs and forms part of the transport evidence base. As part of the strategic transport modelling the LHA understands that a total of 2,150 dwellings was attributed to the proposed Strategic Growth Areas (SGAs) and included in the Do minimum scenario. This means that the strategic modelling was carried out using a higher housing number than is currently proposed in the Publication Plan. The LHA recognises that the strategic modelling with the higher housing number represents a worst-case scenario and that the limitations of the SRTM do not allow for localised impacts at junctions to be attributed to specific development sites. Consequently, it is not possible for the SRTM to isolate the transport impacts of the SGAs on the highway network. Therefore, the LHA accepts the outputs from the strategic modelling report and has not requested an additional model run of the SRTM to reflect the removal of the two SGAs and subsequent lower housing number.

The SRTM modelling report indicates that the incremental impact of all the site allocations including the SGAs is forecast to affect links and junctions across the highway network and particularly along the A27 corridor through Fareham borough. The future resilience of the A27 corridor is a concern for the LHA which is why the LHA is undertaking a transport study for the A27 corridor which the County Council will seek to adopt as future strategy. The strategy will seek to incorporate a multi modal approach that facilitates a modal shift away from private car use. Future transport assessments of development sites along the A27 corridor should take this into account and have regard to the emerging transport strategy.

A key aspect of the A27 corridor strategy will be the application of the 'Link and Place' approach to street planning and design. This approach recognises a street functions as both a link (that is movement by all modes of transport including pedestrians) and a place (destination in itself) and will help determine policy priorities between competing users with a greater emphasis on the function of places. This 'link and place' approach is being developed as a Hampshire County Council policy which will be fully imbedded in the next Local Transport Plan for Hampshire (Local Transport Plan 4).

The TA assessed the cumulative impacts of the site allocations and demonstrates that the significant transport impacts of the local plan development on the highway network can be mitigated through proposed highway interventions. The TA specifically highlights the junction at Parkway/Leafy lane which is north of the M27 junction 9 and serves the Whiteley business estate in the adjoining district of Winchester City Council. The Parkway/Leafy Lane junction is predicted to be significantly impacted by local plan development traffic (with long queues along Leafy Lane) and meets the criteria for requiring mitigation.

However, this junction does not warrant a Do Something mitigation scheme for increased junction capacity. This is because the Leafy Lane arm of the junction leads to a residential area with a 20mph zone reinforced by vertical speed reduction measures. The policy approach by the LHA is to reduce rat-running along Leafy Lane between

Fareham and Whiteley. Therefore, an alternative highway scheme which strengthens the current situation of suppressing flows along Leafy Lane should be the mitigation scheme to be taken forward. The LHA will need further discussions with both Fareham Borough Council and Winchester City Council to establish the form of any mitigation scheme if it is required.

The Do Something modelling for the TA proposed five mitigation schemes for increased junction capacity and modelled only the highway impacts of increased motorised vehicle traffic. There are other solutions for mitigating the transport impacts from local plan development which are more in line with the emerging policy agenda on decarbonising transport from Government and Hampshire County Council. These mitigation options would generally follow a sequential approach to assess their impact on the local road network and the role they can play in traffic reduction and reducing transport emissions starting with measures to avoid the need to travel, active travel measures, public transport (SE Hampshire rapid transit) and finally localised junction improvements. This wider and sequential approach to mitigation will need to be applied to all site-specific transport assessments.

Development Strategy

The LHA acknowledges that the Publication Plan proposes a lower housing number than in the previous draft local plans. This lower housing number is in response to a lower level of housing growth proposed by Government in its consultation in August 2020 on a new standard methodology for calculating the annual housing need. The LHA recognises that FBC need to await the outcome of the Government's consultation before the Publication Plan with the lower housing number can proceed to adoption in line with the FBC's revised Local Development Scheme (September 2020).

The consequence of a reduced housing number is a change to the development strategy and the removal of several housing sites. The LHA supports the removal of housing site HA2 Newgate Lane South. The LHA submitted an objection to policy HA2 in the previous draft local plan consultations.

The LHA also supports the removal of the Strategic Growth Area policy from the Publication Plan. The South of Fareham and North of Fareham Strategic Growth Areas were included in the draft local plan consultations and the LHA submitted a holding objection.

Climate Change

Fareham Borough Council as Local Planning Authority has a legal duty to help meet the requirements of the Climate Change Act 2008. The LHA wishes to be reassured that the borough Council has satisfied itself that the Publication Plan goes far enough in supporting the Government and Hampshire County Council policies on climate change that have emerged during the local plan preparation process. This is in view of the Hampshire County Council's recently adopted climate change strategy and targets to be

carbon neutral by 2050 and resilient to a two degree rise in temperature. For Hampshire to meet these targets, which are in line with Government legal requirements, land-use planning and transport policies at the local district level need to play a strong role and are likely to be most effective at the plan making stage.

The LHA acknowledges the transport evidence submitted in the Strategic Transport Assessment which shows how the traffic impact of the local plan development can be mitigated in traffic and transport terms. The LHA wishes to see demonstrated how the local plan proposals, in relation to transport and how we travel, will contribute to the longer-term goal of achieving carbon neutrality and building resilient networks and systems.

Strategic Policy CC1: Climate Change

The LHA supports the amended climate change chapter and strategic policy CC1 however the supporting text needs more detail with reference to the County Council's adopted Climate Change Strategy (2020) and targets including the resilience of the highway network.

Policy NE8: Air Quality

The local plan correctly identifies road transport emissions as the main source of air pollution which is relevant to the County Council's responsibilities as both highway and public health authority. The LHA supports the local plan commitments to reduce, minimise and mitigate road transport emissions and their impact. However, the Air Quality Policy NE8 needs to be more specific and should be amended to include the policy text 'development should deliver sustainable transport (public transport, walking and cycling) as part of improving air quality'.

Policy TIN1 Sustainable Transport

Given the connection between transport, local plan allocations, air quality and health, there is a lack of commentary or cross reference on air quality management within the Transport Chapter. For example, the supportive text needs to make clear how the transport policies (such as Sustainable Transport TIN1) contribute to both the climate change objectives of reducing CO2 emissions and to the air quality objectives of reducing air pollution.

The LHA recommend amending policy TIN1 on Sustainable Transport to make direct reference to the role of sustainable transport in improving air quality. The supporting policy text also needs to refer to the Air Quality Management Areas / Clean Air Zone designation (on sections of the A27 and A32) and the Air Quality Action Plans in place due to concerns over nitrogen dioxide levels caused by road traffic. Likewise, the Air Quality section needs to refer to the transport chapter and policies and the role they play in mitigating the transport impacts on air quality.

The Transport chapter needs to refer to the Strategic Transport Assessment and the impacts of the local plan traffic on air quality in particular air pollution from the M27, the A32 and A27. This should be cross-referenced with the air quality work carried out as part of the AQMAs and the local plan Sustainability Appraisal. The LHA supports transport mitigation measures of sustainable and active travel modes as an alternative to making private vehicle trips which help overall to reduce emissions harmful to human health and the environment. The LHA would not support any transport mitigation measures which threatened to undermine the success of the current Air Quality Management Areas.

The Transport chapter needs to strengthen the commitment to deliver high quality walking and cycling facilities with reference to the Government's new cycle infrastructure design guidance in Local Transport Note 1/20. Reference to cycle infrastructure design should also be included in the Design chapter.

To contribute to reducing car use, opportunities for enhancing and encouraging active travel to and from school should be encouraged and implemented working closely with Hampshire County Council Children's Services and Highways Departments. The County Council will require the provision of safe walking and cycle routes to schools and existing routes to be enhanced where necessary to improve walking and cycling numbers. Contributions from developers will be sought where necessary including for the production and monitoring of school travel plans (STP's).

Policy TIN3: Safeguarded Routes

The LHA supports the new policy TIN3 Safeguarded routes in relation to delivering bus rapid transit in Fareham and Portchester. However, the supporting text should refer to the future extensions of the SEHRT network to the west of Fareham towards Segensworth, Swanwick Station, Whiteley and the North Whiteley major development area and to serve the Solent Enterprise Zone at Daedalus and adjacent coastal settlements.

Strategic Policy R4 Community and Leisure Facilities

Hampshire County Council Children's Services consider that it is important that the impact of additional housing is assessed and where necessary developer contributions are provided to provide additional childcare places either through on-site facilities or the expansion of nearby provision. The impact will be assessed on a case-by-case basis.

The County Council also provides an Early Years guidance note on this issue for the Borough Council to consider in their plan making in relation to the future need and housing allocations.

Strategic Priority 8

Hampshire County Council Adult Services welcome the reference to affordable housing and the need to address the specific needs of different groups in the community, including the elderly and people with disabilities. However, it is recommended that reference is made to the need to meet a range of housing needs, including those in need of affordable housing and those in need of specialist housing including the elderly and people with disabilities in Strategic Policy H1: Housing Provision.

Consideration should also be given to whether opportunities are available to encourage specialist housing provision in specific site allocations.

Policy HP 5: Affordable Housing

The County Council recommend that Policy HP5 or the supporting text should encourage the provision of housing to meet a range of needs, including specialist housing to meet older persons' needs (such as extra care housing) and those with disabilities.

Policy HP7: Adaptable and Accessible Dwellings

The County Council notes that the Specialist Housing Topic Paper includes reference to the low cost of providing homes to above base accessibility standards. Although there is a correlation between age and mobility, people of all ages may have some mobility impairment, either permanently or temporarily.

The proposed percentages of housing the policy requires to be built to higher accessibility standards is modest and given the rate at which the stock is added to each year it will be a very long time before a significant supply of accessible housing is available in the Borough. With such modest levels of provision, the likelihood of a person who develops mobility impairment will find themselves in a home that can meet their needs is low. Adopting a requirement for a larger proportion of the stock to be built to Cat2 standards in particular would better meet individuals' changing needs and support the creation of sustainable communities by reducing the need to move to find suitable accommodation.

Policy HP 8: Older Persons and Specialist Housing Provision

The inclusion of an enabling policy is welcomed by the County Council; however it is recommended there is specific mention of specialist provision of affordable housing, including extra care housing and housing for those with disabilities. It is noted that specific housing allocations are made only in respect of sheltered accommodation (Policies HA42 / 43 /44). The County Council consider that these sites may also be suitable for other forms of specialist housing, including extra care housing and housing for those with disabilities. It is recommended those policies are amended to reflect this.

The County Council supports the opportunity for exception type development in specific circumstances in this policy and Policy HP6.

Housing Site Allocations

The County Council has considered the housing allocations in its capacity as the local highways authority, local education authority and local minerals and waste planning authority and provides the following commentary.

An initial assessment of the impact on school place planning has been considered based on the level of housing identified, and details are highlighted below for specific sites where there will be an impact on the supply of local school places at primary, secondary and education for pupils with Special Educational Needs and Disabilities (SEND).

The County Council as the local minerals and waste planning authority is pleased to see that some of the comments regarding mineral and waste safeguarding, from the Regulation 18 consultation, have been considered and included within the Regulation 19 proposed submission document. Within the County Council's Regulation 18 response a list of sites that were deemed to require a Mineral Resource Assessment as part of any potential application was provided. It is noted that all the allocated housing sites that the County Council made such comments on have been removed from the Proposed Submission Document as being no longer available or no longer suitable.

Housing Allocation Policy HA1 – North and south of Greenaway Lane – 824 dwellings

The development of 824 dwellings will create additional pressure for school places locally at primary, secondary and special schools. It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement j.

Housing Allocation Policy HA3 – Southampton Road – 384 dwellings

The identification of the need for developer contributions for education and ensuring safe walking/cycling routes to local schools are provided, is welcomed.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement k.

Housing Allocation Policy HA4 – Downend Road East, Portchester – 350 dwellings

It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirement j, that the site will require a Minerals Assessment prior to any development. The County Council would also like to bring to the Borough Council's attention that this allocated housing site sits within the safeguarded buffer zone of Warren Farm and Down End Quarry, a safeguarded waste site operated by Veolia Environmental Services (UK) Plc.

The safeguarded buffer zone is informed by the safeguarded sites list as defined through 'Policy 26: Safeguarding - waste infrastructure' of the adopted Hampshire Minerals and Waste Plan (2013) (HMWP). The purpose of this policy is to protect current and potential waste sites from pressures to be replaced by other forms of development, including through 'encroachment' where nearby land-uses impact their ability to continue operating.

It is often the case that appropriate buffers and mitigation measures can make potential nearby development compatible. Any mitigation measures would need to be undertaken by the proposed non-minerals or waste development (i.e. the allocated housing development) and reduce potential impacts to and from the safeguarded site to levels that would ensure the safeguarded site could continue its intended waste use.

Usually, the mitigation measures would need to focus on impacts such as noise, dust, visual impact, odour and traffic movements. They can take a variety of forms, including landscape design, tree planting, barriers, building design and orientation and use of different building materials.

The appropriate mitigation measures are best informed through direct discussions with the operator of the safeguarded site as they will be most be aware of operational requirements. However, the County Council is also available for further discussions, as well as facilitation, if required.

With regard to the above site, the County Council would therefore request further wording be added to the site-specific requirements of allocated housing site HA4 as set out below:

“the provision of evidence that the safeguarded site has been considered within any forthcoming planning application, how operator comments have been taken into account and what impacts these comments have had on the proposed development design. Details of any mitigation measures chosen as a result of the analysis should also be included with an application for the site”.

In the unlikely event that it is not possible to agree appropriate mitigation measures, the County Council would seek evidence that the waste management capacity can be relocated or provided elsewhere and delivered.

Housing Allocation Policy HA9 - Heath Road

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council’s data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement g.

Policy HA2: Newgate Lane South

The County Council as local highway authority supports the removal of policy HA2 Newgate Lane South.

Strategic Growth Area

The County Council as local highway authority supports the removal of the Strategic Growth Area policy.

Employment Allocations

The County Council has considered the employment site allocations in its capacity as local minerals and waste planning authority and provides the following commentary.

Policy E2 - Faraday Business Park

Whilst a number of the allocated housing sites have had site-specific requirements added to them for Minerals Assessments, allocated employment site E2 - Faraday Business Park has not had any added. In line with the County Council’s Regulation 18 response to the local plan consultation, the County Council again request that a site-specific requirement be added to this allocated site policy so that any forthcoming planning application would need to be accompanied by a Minerals Resource

Assessment. The County Council recommend adding the following site-specific wording: The site is within a Minerals Consultation Area. Minerals extraction may be appropriate, where environmentally suitable, subject to confirmation of the scale and quality of the resource.

The County Council would like to take this opportunity to reiterate that any development or significant redevelopments of land may impact mineral resources. As minerals can only be worked where they are found, it is important that viable mineral resources are 'safeguarded' (protected) from needless sterilisation by other development to help to secure a long-term future supply of minerals. Mineral resources are necessary for a vast array of construction activities and their availability is a prerequisite for any housing development. As such, the NPPF requires planning authorities to define Minerals Safeguarding Areas and adopt policies so that, 1) known locations of mineral resources of local and national importance are not needlessly sterilised by non-mineral development, 2) if it is necessary for non-mineral development to take place, the prior extraction of minerals, where practicable and environmentally feasible, is encouraged.

Dear Sir or Madam

Regulation 19 Local Plan Consultation

Thank you for consulting Historic England on the above document. Our main comments are set out in Appendices 1 and 2 to this letter.

Appendix 1 deals with all policies we wish to make comment on, excluding site allocation policies. Site allocation policies are located in Appendix 2. Appendix 3 is the same set of comments in Appendices 1 and 2, The official forms do not appear to be editable, so we have not used them.

We do not consider our appearance to be necessary at examination on any of the points we have raised, however, we would be happy to attend, should the Inspector request this.

Yours faithfully

Edward Winter

Historic Environment Planning Adviser

Appendix 1: Table of Historic England’s detailed comments on the Fareham Regulation 19 Local Plan Policies (excluding site allocations: see Appendix B for site allocations)

Policy/section	Soundness/legal compliance/DTC	Comments	Suggested change
Vision, strategic priorities	Not sound.	We welcome the reference to the continued protection of heritage in the vision, and strategic priorities 3 and 10. These are important elements of the positive strategy for the conservation and enjoyment of the historic environment, which the plan should demonstrate, as set out in NPPF paragraph 185. However, to be consistent with NPPF, and therefore sound , para 185, in Strategic Priority 10, “historical assets” should be replaced with “historic environment”.	In Strategic Priority 10, “historical assets” should be replaced with “historic environment”.
Policy HP1: New Residential Development	No comment.	No comment.	
Design chapter, Policy D1	Sound.	We welcome the characterisation of well-designed, contextual development that is “responsive to local history, culture and heritage”, and the reference to heritage in criterion (i) in Policy D1.	
Strategic Policy DS3: Landscape	Sound.	We support criterion (f) as part of the positive strategy for conserving and enhancing the historic environment	

Strategic Policy HE1: Historic Environment and Heritage Assets	Sound.	We support having a strategic policy for the historic environment and heritage assets and welcome its identification in paragraph 1.35, which lists those policies that are considered to be strategic, in line with NPPF paragraph 21. The inclusion of a strategic policy for heritage complies with NPPF paragraph 20.	
Historic Environment Chapter (general approach)	Sound.	We support the approach the Council has taken, to have separate policies for conservation areas, listed buildings/structures & settings, archaeology, non-designated assets and heritage at risk. The separation of each of these asset-classes provides more detailed policy for each of the identified types of asset, which should be more useful to applicants and decision-makers. The detailed policies are supported by the strategic policy, which also references national heritage policy. NB: Fareham has locally listed parks and gardens, i.e. non-designated assets, but has no registered parks & gardens i.e. designated assets.	
Background paper	Sound.	We welcome the background paper as a useful tool in demonstrating that a suitable evidence base has informed the plan, in respect of the historic environment.

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
HA42	Land South of Cams Alders	Not sound	<p>Proposed site allocation H42 is one of three sites proposed to be allocated for sheltered housing, in this case for 60 dwellings, the site being 1.29 hectares in total area. The site allocation plan shows the extent of the scheduled area of Fort Fareham, as well as a 50m buffer around the monument. The site allocation area, is located approximately 70m due north of the monument, at the closest point. The site allocation area extends to the north-east and north-west of this point, with an irregular shape.</p> <p>The whole of the proposed allocation is considered to be located within the setting of Fort Fareham. The setting of the fort has already been significantly compromised by development in its setting, as well as within the monument itself. The northern corner of the monument, where the proposed allocation is located, therefore represents the only significant area that remains free from development, and this would have been part of the field of fire associated with the fort. This area does contain a tree belt,</p>	<p>Change criterion (h) to:</p> <p>“h. Provision of a heritage statement (in accordance with Policy HE3) that assesses the potential impact of proposals on the significance of Fort Fareham and through development in its setting, together with an archaeological assessment (in accordance with Policy HE4) and a scheme of mitigation to off-set any harm to the setting of the monument.”</p>

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>which, through blocking the field on fire, also compromises the setting, but as this is not development, we consider this is something that has the potential to be reversed at some point in the future.</p> <p>The allocation text or plan does not make clear to what extent the allocated area would be built upon, but with a stated capacity of 60 dwellings on a site of 1.29 hectares, we presume that no significant areas of the site would be left undeveloped. Therefore it is likely that the proposed development will affect the significance of the monument, through development in its setting.</p> <p>The NPPF states that “[heritage] assets are an irreplaceable resource, and should be conserved in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of existing and future generations” (184), and that “great weight should be given to the asset’s conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>substantial harm, total loss or less than substantial harm to its significance” (193). “Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting), should require clear and convincing justification” and “scheduled monuments are considered to be assets of the highest significance” (194).</p> <p>The NPPF also states that “significant adverse effects on [any of the sustainability] objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered) (32).</p> <p>We recognise that the site allocation requires a heritage statement and this is welcome.</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>In the SA of the publication version of the plan, the main reason for the site selection seems to be based on location: the SA asserts that demand for sheltered housing is most likely to occur in Portchester and Fareham South. Presumably, no other suitable sites are suitable, in terms of location (if other sites were available that do not cause significant adverse effects on a sustainability objective, following NPPF para 32, Land South of Cam Alders should not be allocated). However, given that the impact of the proposed allocation is recognised as ‘negative’ in the high level assessment result, in the historic environment objective, the policy should reflect the NPPF requirement to mitigate, as set out in para 32.</p> <p>Therefore the site allocation should require a mitigation plan to offset harm to the setting of Fort Fareham. Without this, we consider the policy to be inconsistent with national policy and therefore unsound.</p> <p>In addition to the above concern, the</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>policy is also somewhat unclear in terms of its wording, with regard to “conservation and setting...” and “grade II scheduled monument”. Fort Fareham is not a grade II scheduled monument: this classification does not exist. It is both a scheduled monument, AND a grade II listed building. In such cases, the scheduling take precedence. Describing Fort Fareham as a grade II scheduled monument could give the impression that it is not an asset of the highest significance. The reference to “conservation and setting” is considered to lack clarity. We suggest criterion (h) is amended as suggested below, to account for all three of our concerns. Without amendment, we consider the policy to be inconsistent with national policy and therefore unsound, for each of the three reasons we cite.</p> <p>“h. Provision of a heritage statement (in accordance with Policy HE3) that assesses the potential impact of proposals on the significance of Fort Fareham and through development in</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			its setting, together with an archaeological assessment (in accordance with Policy HE4) and a scheme of mitigation to off-set any harm to the setting of the monument.”

Executive Summary

Local Plans should be prepared to contribute to the achievement of sustainable development. They should be positively prepared and seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. As the starting point, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas. These requirements exist within the context of the Government's now longstanding objective to significantly boost the supply of homes.

The Regulation 19 Plan, which is meant to be the Plan the Council intends to submit for Examination, is not founded on the Government's published Standard Method as required by the NPPF and NPPG.

Rather, the Council has alighted upon the possible outcome of a Government consultation document and has based the Development Strategy, Policy H1 and the strategy to meet housing needs on this lower level of housing. This is manifestly unsound.

The fact that the Council do not intend to submit its plan until there is certainty as to a change to the Standard Method does not mitigate the cost of conducting this consultation to the public purse or unnecessary expenditure by other public and private bodies. Moreover, this approach plainly risks undermining public confidence in the plan-led system, if, as is possible, the housing requirement has to be increased. The Council has simply acted prematurely in seizing upon a consultation document that suggests a lower housing requirement; this may be expedient but is the antithesis of positive planning. Put simply, there is no basis for the Council to have formed this consultation document at the present time.

In the event that the Government decides not to proceed with its amendment to the Standard Method, or that such an amendment results in a different outcome for Fareham, the Council will need to further amend the plan. In that instance, a wholly new consultation exercise would be required given the likely magnitude of amendments that would be necessary, adding further delay to the plan-making process, and cost to the public purse and to interested parties, whilst, regrettably, undermining confidence in the Local Plan process.

Moreover, the Council has not recognised the context within which this Plan is being prepared. Housing delivery relative to the Core Strategy has resulted in a substantial shortfall in new housing over past years and this Plan provides an opportunity for positive and ambitious planning to ensure development needs are met and the principles of good growth are achieved. The Plan fails in this regard.

The Council purports to make a contribution towards meeting the unmet need of its neighboring authorities; however, this does not reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PFSH) of over 10,000 homes. It is not at all apparent that this Plan is founded on constructive, active and on an ongoing engagement as required by Section 33A.

It is instructive that whilst Welborne was identified to provide housing to meet sub-regional requirements, its role has now changed to meeting the Borough's housing needs first and foremost;

consequently this Plan makes a significantly lower contribution to the wider sub-regional needs which plainly have not diminished.

Furthermore, the Plan has exaggerated the likely housing supply from Welborne and other sources to such an extent that a shortfall in housing supply is inevitable.

The Plan overlooks the opportunity provided by the previously identified Strategic Growth Area at South Fareham which would make an important contribution to housing supply in the short term and providing surety of supply over the longer term. The suitability of this location is apparent from the Council's evidence base; it is accessible to the Borough's main urban area, it is not an area that is sensitive in landscape terms, development can be accommodated without undermining the principle of separation between Fareham and Stubbington, there are no environmental designations that preclude development and the transport modelling and its' conclusions has assumed development in this location. A development scheme in this location can also deliver nitrate neutrality and biodiversity net gain. Development to the South of Fareham can achieve *Good Growth*.

Unfortunately, the Sustainability Appraisal does not consider higher levels of growth consistent with the January 2020 Local Plan Supplement, and, as such, fails to consider a reasonable alternative.

The following Modifications are considered necessary for the Local Plan to be sound:

- The minimum housing requirement should be defined by reference to the existing Standard Method;
- The housing requirement should be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;
- The level of unmet need that is accommodated should be based on constructive, active and on ongoing engagement with neighbouring authorities;
- Assumptions about the delivery of new housing at Welborne should be revisited and revised down;
- The windfall allowance should be revised down;
- Alternatively, the level of contingency should be increased;
- Additional housing allocations should be provided for;
- Land South of Fareham should be allocated for housing development; and
- Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood should be amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1 Introduction

- 1.1 Hallam Land Management Limited ('Hallam') control a substantial tract of land to the South of Fareham, south of Longfield Avenue, west of HMS Collingwood and adjoining the Stubbington Bypass, the construction of which has recently commenced.
- 1.2 In successive representations to the Local Plan Review we have draw attention to the merits and advantages of locating development to the South of Fareham and how this would achieve the Borough Council's objective of *Good Growth*.
- 1.3 In the January 2020 Local Plan Supplement, this land, along with other parcels in this location, was identified by the Borough Council as a potential Strategic Growth Area.
- 1.4 In the current consultation document, such an allocation has not been carried forward.
- 1.5 On this occasion, the Borough Council's has alighted upon the possible revision to the Government's Standard Method for assessing local housing need, which suggests a lower level of housing for Fareham.
- 1.6 In our opinion, the Borough Council are wrong to have published this consultation document in this form given the status of this version of the Plan is afforded by the Local Plan Regulations; *the Plan a Local Planning Authority intends to submit for Examination*. To have based a Plan on the possible outcome of a Government consultation is plainly premature and, regrettably, the Plan's housing strategy is not positively prepared and is unsound.
- 1.7 The Plan's housing strategy is not an effective one. It has no regard to past performance relative to the objective assessment of housing need and the level of contingency is not sufficient when the likely delivery of Welbourne is viewed objectively. Over the plan period a significant shortfall in new housing is inevitable.
- 1.8 For the reasons given in this representation, additional housing land should be allocated in Policy H1.
- 1.9 Land South of Fareham is an eminently suitable and sustainable location for future development and should be identified accordingly. In the context of the Borough Council's *Good Growth* principles that underpin the Plan's Development Strategy, Hallam's development proposals achieve the high-level development principles and requirements set out in the Local Plan Supplement which remain entirely appropriate.
- 1.10 It is especially significant that the Borough Council's assessment of Strategic Gaps has drawn the conclusion that new development can be located south of Longfield Avenue without harming the integral purpose of this earlier designation. We agree with this conclusion, which accords with our previous submissions that carefully planned development will not result in the coalescence of Fareham and Stubbington and that the separate identities of these settlements can be retained.
- 1.11 Development at South Fareham can be brought forward to provide new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality

of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.

- 1.12 As such, and for the reasons given herein, the previous potential Strategic Growth Area at South Fareham should have been retained in the Local Plan for future development.
- 1.13 In our representations in the following Sections we set out that, whilst the Plan's Vision and Strategic Priorities are correct, absent amendments to Policy H1, this version of the Local Plan will not provide sufficient housing and this will run counter to its stated intention to address housing needs by the end of the plan period.

2 Vision and Strategic Priorities

- 2.1 In this Section of our representations we consider the consultation document's Vision and the Strategic Priorities that the Borough Council has identified. It is instructive to consider the extent to which the Plan's policies and proposals will, in practice, contribute towards this Vision being realised and the Strategic Priorities being met, in the context of what the NPPF's anticipates of a Local Plan.

National Planning Policy Framework

- 2.2 Para 15 of the NPPF requires that each Local Plan should provide a positive vision for the future of its area; a framework for addressing housing needs and other economic, social and environmental priorities. (emphasis added)
- 2.3 Para 17 requires that a Local Plan includes strategic policies to address the local authority's priorities for the development and the use of land in its area.
- 2.4 Para 20 states that strategic policies should set out the overall strategy for the pattern, scale and quality of development, and make provision for, *inter alia*, housing, employment, retail, leisure and other commercial development, infrastructure, community facilities and conservation and enhancement of the environment.
- 2.5 Para 22 states that strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure.
- 2.6 Para 23 states that strategic policies should provide a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development. This should include planning for and allocating sufficient sites to deliver the strategic priorities of the area.
- 2.7 In the context of plan making making, the NPPF's presumption in favour of sustainable development is framed in the following terms:
- a. *plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
 - b. *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:*
 - i. *the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - ii. *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.*
- 2.8 In this context, it is important to recognise the significance of the Regulation 19 stage in the plan-making process. This is the Plan the Borough Council intends to submit to the Secretary of

State for the purpose of Examination pursuant to Section 20 of the Act. This is explained in the NPPG *"The publication stage plan should be the document that the local authority considers ready for examination"*. Therefore, this is the Plan and the approach to meeting objectively assessed need that the Borough Council now consider appropriate.

- 2.9 But, as the Borough Council has suggested it won't decide whether or not to submit the Plan until it knows the outcome of the Government's review of the Standard Method, this is little more than a "wait and see" approach. This is plainly wrong given the importance of the plan-led system in overall terms, the alacrity with which an up-to-date Local Plan is needed in Fareham, and the need to maintain public confidence in the plan-making system generally.
- 2.10 As will be shown later, the practical difference between a housing strategy based of 520 dwellings per annum and 403 dwellings per annum is an 'end date' five years hence. When viewed in the context of providing surety over the longer term and the emphasis in the NPPF on exceeding the minimum requirement, adopting a higher growth level at this stage would have been the positive and responsible response to this circumstance.

The Vision

- 2.11 The Borough Council's Vision as set out in the consultation document intends that it:
- *"will accommodate development to address the need for new homes and employment space in Fareham Borough; and*
 - *new housing will address the particular needs in the Borough, such as our growing housing need and an ageing population and creating attractive places to live".*
- 2.12 The Vision is framed by reference to the Borough's needs, whereas Fareham is part of the established Partnership for Urban Southampton and has a role in contributing to meeting the housing needs of the sub-region. Indeed, there is no reference to Fareham's sub-regional role on any of the text associated with the Vision and Strategic Priorities in Section 2 of the Plan. In this context, the Vision should be drawn more widely.
- 2.13 Significantly, the allocation at Welborne in the Core Strategy was specifically for a sub-regional purpose, but its role by the present time appears to have been recast entirely; a matter we return to later.
- 2.14 Without prejudice to the above, achieving any Vision requires policies and proposals that are genuinely aligned with it. In respect of housing, the outcome of the Local Plan's policies and proposals should be that the Borough's housing needs are met.
- 2.15 As such, the Local Plan must, first, establish the correct strategic housing requirement in Policy H1 i.e. the overall number of new homes that need to be built by 2037 and, second, ensure a housing supply strategy that has the necessary surety that this can be achieved.
- 2.16 What experience both in Fareham and elsewhere has shown is that there must be an element of theoretical overprovision as part of the housing strategy to ensure that sufficient new housing is built.
- 2.17 To an extent the consultation document recognises this, but, as will be shown, it significantly

misjudges housing supply to such an extent that it undermines achievement of the Vision.

2.18 Conversely had a positive approach to plan-making been adopted, the Local Plan would have provided a robust planning strategy for the Borough.

Strategic Priorities

2.19 In the context of the Vision, the first Strategic Priority is to:

- *address the housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.*

2.20 Again, there is no reference to Fareham's wider sub-regional role. In the context of Section 33A of the Planning and Compulsory Purchase Act, which requires constructive and active engagement on strategic matters, this is a surprising omission.

2.21 Without prejudice to this point, as a matter of principle, such a strategic objective is soundly based and is aligned with the significant importance the Government attaches to housing provision. Such a Strategic Priority is universally found in Local Plans national-wide.

2.22 However, in this instance, the apparent driver to the Publication Draft has been an attempt to reduce the scale of housing provision despite the Vision and Strategic Priority. This is the only conclusion that can be drawn from the Council having based its Regulation 19 Plan on a consultation document concerning a potential revision to the Standard Method.

2.23 This approach is plainly not sound for the following reasons:

2.24 Firstly, it departs from the method of calculating local housing need set out in para 60 of the NPPF. No exceptional circumstance has been suggested other than a lower figure is derived from the potential revision to the Standard Method. In a recent comment the Planning Minister referred to outputs based on the consultation exercise as "*entirely speculative*".

2.25 Secondly, even if that figure is correct, it is in no way obvious how the wider needs of the sub-region are to be met; across the wider geographic area as a whole the level of local housing need is suggested to be greater than has hitherto been the case.

2.26 Thirdly, the approach to housing supply significantly overstates likely housing delivery and the scale of contingency is simply not sufficient to ensure future housing supply would meet identified need.

2.27 The inevitable conclusion is that this version of the Local Plan is not positively prepared, justified, effective or consistent with national policy. Therefore, whilst the Plan may have a clear strategic priority to address the need for new homes in the Borough, its subsequent policy to base the strategic housing requirement of 403 dwellings per annum means, when considered objectively, that it fails to do so. To consciously plan for 20% less housing than has been identified firstly as necessary, and secondly as capable of being accommodated, is not properly addressing the need for new homes in the Borough.

2.28 In short, the Plan provides for too few houses over the plan period. This in turn will give rise to

adverse effects. It will restrict the number of people who are able to purchase new housing from doing so and constrain the operation of the housing market. It will also reduce the amount of affordable housing that is built because that is a proportion of the overall amount of housing. Moreover, by restricting market housing it creates an additional and greater incidence of housing need as people who would otherwise have been able to buy a market home are prevented from and they fall into housing need. This will have harmful socio-economic effects and runs counter to the Vision to meet the Borough's housing need.

2.29 For these reasons, the consultation document is not soundly based.

3 Development Strategy

- 3.1 The preceding Section has considered the Regulation 19 Plan's Vision and Strategic Priorities as they relate to housing provision and has identified that, as a practical effect, its policies and proposal will not deliver the intended outcome in terms of meeting housing need by the end of the plan period. In this Section, we consider the proposed Development Strategy and the extent to which it could accommodate a greater level of development if necessary.
- 3.2 The Plan's Development Strategy, set out on pages 17 – 32, and its associated Key Diagram and more detailed Policies Map, are framed by the Borough Council's approach to housing provision. This is evident from comparing the direction of travel outlined in the January 2020 Local Plan Supplement based on the published Standard Method and which identified the need for Strategic Areas of Growth to be allocated for future development, and the present approach which includes very few new housing allocations.
- 3.3 In the event the Borough Council has to re-cast its approach to housing provision, it will also need to adjust its Development Strategy in order to be able to deliver the strategic objective to address housing need. In this regard, it is of note that para 3.5 of the consultation document acknowledges that *"the [Local Plan] Supplement consultation in early 2020 identified the Council's preferred approach to its Development Strategy which it proposes to use to guide the focus of development until at least 2037"*. This clearly illustrates the suitability of the Strategy at that time as the basis of plan-making presently.
- 3.4 In the following paragraphs we comment on the various elements of the Council's Development Strategy both as articulated presently but also in the context of a revised housing strategy which would require additional land to be identified for development in the plan period.

Good Growth

- 3.5 The 2019 Issues and Options consultation established the principle of **Good Growth** as the keystone for the Local Plan's Development Strategy.
- 3.6 *Good Growth* was defined in the 2020 Local Plan Supplement in the following terms:
- building homes and creating employment spaces in such a way as to improve the quality of life whilst protecting the most valued and natural historic environments.
 - respecting environmental protections and delivering opportunities for environmental gain, providing opportunities for reduced energy demand and waste production, whilst sensitively managing the countryside and valued landscapes.
 - providing open space and leisure opportunities to encourage healthy and active lifestyles and encouraging more of us to use active forms of travel rather than the car.
- 3.7 This definition has been retained in the Regulation 19 Plan.
- 3.8 These principles exist within an overarching scale of development that the Borough will need to provide for over the plan period. It is of paramount importance that, in the context of the Plan's Vision and Strategic Priorities, this scale of development is correctly defined at the outset; only then can it be said the Plan will address housing and employment needs adequately,

appropriately and sustainably. If the housing requirement is drawn too low, it will have negative social and economic effects.

- 3.9 It follows that, at the plan-making stage, the Local Plan is able to set out strategic and development management policies that have *Good Growth* principles at their core; both in terms of determining which locations in the Borough are to be allocated for new development and then the form and nature of such development.
- 3.10 The ensuing Land Use Strategy should prioritise locations that are able to achieve the principles of *Good Growth*, albeit there are instances where there are competing interest and, as with all planning decisions, balanced judgements will be necessary.

Development Strategy

- 3.11 This Section of the Regulation 19 Plan describes the factors that the Council has used to determine its Development Strategy. Because of the range of considerations that are inputted to, and then flow from this, what the Plan is actually describing is its land use strategy, namely where development is acceptable and conversely where factors determine new development would not be appropriate and other considerations are more important.

Landscape and countryside

- 3.12 We agree that there are parts of the Borough which have a fundamental importance in landscape terms and it is right that preservation of the landscape in those locations is the principal consideration. Figure 3.1 which illustrates the Key Diagram identifies "Areas of Special Landscape Quality" and we agree with the designation of the areas shown in this regard. Policy DS3, which we comment on later, should be worded to ensure that preserving the special landscape quality of these areas is given primacy.

Settlement boundaries

- 3.13 Settlement boundaries delineated in earlier development plans were drawn in the context of development needs as determined at that time.
- 3.14 Where the scale of development cannot be met on land within the Borough's urban area, development in the countryside adjoining main settlements is a wholly necessary and legitimate proposition.
- 3.15 As a consequence of allocating land for development to meet identified needs, settlement boundaries can and should be amended accordingly. In short, the existing settlement boundaries are not immutable.

The desire to respect settlement identity

- 3.16 Given that Areas of Special Landscape Quality have been assessed and delineated on the Key Diagram it is also necessary to consider whether land identified in the current Development Plan as Strategic Gap still requires such protection, whether its boundaries can justifiably be amended in light of up-to-date circumstances or whether any areas of land subject to that designation can be developed in order to contribute to a sustainable pattern of development.

- 3.17 The *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* considers existing Strategic Gaps in the adopted Local Plan and concludes that land south of Fareham, east of Peak Lane and west of HMS Collingwood does not perform the same function in terms of maintaining separation between Fareham and Stubbington as other land that is subject to this designation and is more integral to the purpose of preserving identity.
- 3.18 Chapter 4 of that Study, Paragraph 10 states that *"there exists some opportunities for development to be absorbed within the strategic gap subject to scale and future detailed design, without compromising its gap function combined with mitigation measures that can support green infrastructure enhancement"*.
- 3.19 It follows as a matter of principle that this land should not be designated as Strategic Gap in this Local Plan as this designation plainly cannot be justified in that location. Conversely, to continue to propose this land as Strategic Gap is not justified on the basis of the Council's own evidence.
- 3.20 It is highly material that the Local Plan Supplement had anticipated a Strategic Growth Area in this location, reflecting the broad conclusions of the earlier Options testing that this represents a sustainable and accessible location for new development and that such development can be accommodated without harm to the separation between Fareham and Stubbington. The significance of this is especially important in the context of the greater scale of development the Local Plan should accommodate and as such this represents an eminently suitable location for development. The fact this land is outside of the settlement boundary is in no way an overriding determinant that would preclude its allocation.

Climate change, flood zones and coastal management areas

- 3.21 We agree that the Local Plan should not direct major new development to areas identified as having a role in mitigating the impacts of flooding or coastal erosion. It is noteworthy that the areas of potential flood risk are associated with the River Hamble, River Meon, River Wallington and Lee-Solent estuary and are largely subject to nature conservation designations and landscape designations which limit the extent these locations would be suitable for development in any event.
- 3.22 In this context, the land identified as suitable for future development to the south of Fareham is not subject to flood risk and can be developed with Sustainable Urban Drainage measures that would not increase the risk of flooding elsewhere.

Protected areas for nature conservation

- 3.23 There are strategic nature conservation constraints that exist in the Borough in the form of International and Nationally designated sites. These overlap with other environmental designations and exert a significant constraint on where development can be located, limiting the extent of land absent a constraint. None of these constraints directly affect the land south of Fareham referred to in preceding paragraphs.

Transport corridors and opportunities to encourage more active travel modes

- 3.24 The NPPF advises that the planning system should actively manage patterns of growth to support sustainable travel. Significant development should be focused on locations which are

or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health.

- 3.25 In this regard, the Local Plan Strategic Transport Assessment states the following: *The proposed growth locations in the Local Plan to accommodate forecast population and economic growth, took a wide range of factors into consideration, including transport and access implications. Most of the Local Plan growth is located either within or on the edge of existing conurbations, providing good opportunities for trips to be made by modes of transport other than the private car. Consequently, the proposed growth in the Local Plan is generally in sustainable locations in terms of transport and access*”.
- 3.26 It is important to stress that this Transport Assessment in fact includes development at the Strategic Growth Areas, therefore, this conclusion reflects the suitability of new development in this location in these terms.
- 3.27 Whilst certain representations have previously raised concern about traffic impacts, the Transport Assessment concludes that the scale of development proposed (including the Strategic Growth Areas) and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective.

Need to encourage diversity in the housing market

- 3.28 We agree that there needs to a balance in the portfolio of housing sites. We comment later on the likely delivery of housing from Welborne, which can only represent a modest supply of housing in anything other than the longer term.
- 3.29 To meet the objective of providing sufficient housing, additional housing allocations are required for all of the reasons in this representation and in particular those in response to Policy H1. Whilst development to the south of Fareham will change the character of part of the undeveloped land between Fareham and Stubbington, this must be balanced with the material benefits of the scheme in terms of the new housing to increase housing supply in the short term and to provide a surety of supply over the longer term.
- 3.30 The opportunity to the south of Fareham is of a sufficient scale to meet the identified need for market housing, affordable housing, specialist accommodation and self-build and custom build housing, along with the co-location of local services and facilities to support a new neighbourhood.

Sustainability and accessibility to services

- 3.31 Fareham is identified in the Core Strategy as a ‘key growth point’ in the South Hampshire sub region and a ‘secondary regional centre’. The town is the largest in the Borough with a population of approximately 37,000 people. Fareham is also an important economic centre, which has developed further over recent years, with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane, Peel Common Roundabout and the construction of the Stubbington Bypass.
- 3.32 Amongst the advantages previously identified for the South Fareham Strategic Growth Area is

its proximity to the town centre, the Solent Enterprise Zone at Daedalus, the railway station and existing local services and amenities with good access to walking, cycling, and public transport links. Local facilities are situated along Bishopsfield Avenue and at Broadlaw Walk. Large-scale out-of-town retail facilities are located at Newgate Lane and Fareham Road to the east of Longfield Avenue.

- 3.33 Large-scale development to the south of Fareham, rather than a more dispersed pattern, would maximise opportunities to prioritise pedestrian and cycle links and extend public transport to maximise sustainable modes of travel.

The requirement to meet housing and employment needs

- 3.34 *Good Growth* can only be achieved if the Local Plan intends to meet objectively assessed need for housing, which for the reasons set out in response to Policy H1, it does not achieve this at the present time.

Spatial Interpretation

- 3.35 As a matter of principle, the identification of deliverable or developable previously developed land should be a priority, however, it is widely understood that such opportunities do not exist to accommodate the scale of new housing and employment required in the Borough.
- 3.36 Accordingly, the allocation of greenfield sites for future development is both a legitimate and necessary measure.
- 3.37 The morphology of the Borough is comprised of three urbanised areas: Fareham, Portchester and the 'Western Wards', which are part of a coastal conurbation that extends from Portsmouth in the east to Southampton in the west. Fareham is the pre-eminent urban area within the Borough in terms of services and facilities and public transport. Portchester and the 'Western Wards' are characterised more as residential suburbs.
- 3.38 Interspersed to a greater and lesser degree between these settlements are areas of separation comprising Portsmouth Harbour, Alver Valley, Meon Valley and the River Hamble. These are strategically important corridors that separate the main urban areas, protect their identity and prevent settlements within the coastal conurbation from merging together.
- 3.39 To the north of the M27, the Borough is of a more rural character, noting of course the proposed new community at Welborne which will undoubtedly change the character of this area over a long period of time.
- 3.40 Stubbington, a residential suburb, lies south of and separate from Fareham's urban area along with the sub-regionally important employment and logistics node at Daedalus. The Borough Council have stated aspirations to maximise the potential of the airfield's land and infrastructure assets through new commercial development, providing clusters for aviation, non-aviation and skills/innovation activity. This will contribute positively to the creation of skilled jobs in the Solent Enterprise Zone.
- 3.41 These characteristics have led the Council, rightly in our opinion, to consider the designation of Valued Landscapes as part of the Local Plan and in this context we are aware that the 2017 Landscape Assessment acknowledges the intrinsic landscape character of the Meon, Hamble

and Hook valleys.

- 3.42 We agree that the Meon Valley is a distinctly valued landscape. In our 2019 response to the Issues and Options consultation we referred to various Appeal decisions that alight upon the value of the landscape in this location. Continuing to protect this area from development and formalising a landscape designation in the Meon Valley would be appropriate.
- 3.43 The extent to which land around the 'Western Wards' is capable of accommodating new development is constrained by the extent of nature conservation designations close to the existing urban area which limits development opportunities to small scale schemes at most.
- 3.44 On the basis of the above, it follows that **locations that adjoin Fareham town, as distinct from villages away from it located in the rural hinterland to the north and west of the Borough, are inherently more suitable in terms of reflecting the morphology of the Borough, preserving its natural environment and maximizing accessibility to services and facilities to achieve the most sustainable pattern of development.**
- 3.45 The extent to which new development opportunities in those locations can consolidate and enhance the accessibility advantages of Fareham Town Centre and Daedalus are consistent with the *Good Growth* principles set out in paras 3.5 and 3.6 above.

Development Strategy Policies

- 3.46 Para 3.2 of the consultation document defines the Development Strategy as providing the *"distribution, scale and form of development and supporting infrastructure, a set of proposals to deliver the strategy, policies against which to assess planning applications, and proposals for monitoring the success of the plan"*.
- 3.47 In addition to the narration of the Strategy, this Section of the Plan includes three policies; the first controlling new development in the countryside, the second in respect of the Strategic Gap and a third concerning Landscape. These policies do not set out a Settlement Hierarchy or Spatial Strategy for the Plan area and such policies do not appear elsewhere in the Plan either. The practical effect of this is that there is no policy that delivers the spatial objectives in so far as where new development should be located i.e. affording a priority to locations within and adjoining Fareham town as the most sustainable location in the Borough.
- 3.48 Given that para 3.2 suggests the role of the Development Strategy provides a set of policies that direct where and how new development should be located, the omission of what are usually commonplace policies is significant.

Strategic Policy DS1: Development in the Countryside

- 3.49 Policy DS1 seeks to control the use of land outside defined settlement boundaries i.e. in countryside locations.
- 3.50 In some circumstances it would be appropriate to grant planning permission for new development in such locations. In those instances, the benefits of a development proposal would need to be considered against the criteria in part two of the policy. In this context, we do not agree that Criterion 'v' is drafted correctly.

- 3.51 On certain occasions other considerations associated with a development proposal would merit planning permission being granted notwithstanding the agricultural classification of the land concerned. In this regard, whilst the NPPF affords a preference to development of lower quality agricultural land, it does not preclude the development of best and most versatile land (see footnote 53 of the NPPF).
- 3.52 As presently drafted Policy DS1 conflicts with the expression of this policy approach in the NPPF; as such criterion 'v' should be reworded as follows: "*avoid or minimise the loss of best and most versatile agricultural land*".

Strategic Policy DS2: Development in Strategic Gaps

- 3.53 In earlier representations we have identified that the evidence base provided by the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* does not justify the delineation of the Strategic Gap south of Fareham in the manner shown on the Key Diagram.
- 3.54 In particular, that Report identifies that the land south of Longfield Avenue and west of HMS Collingwood could accommodate new development without a significant adverse effect on the objectives of the Strategic Gap designation.
- 3.55 It follows that this land is not an integral part of the Fareham and Stubbington Gap.
- 3.56 As such the Strategic Gap should not extend across this land, as this would add a policy restriction that ought not apply on the basis of the published evidence. Put simply, such a designation should not include more land than is necessary to achieve its purpose.
- 3.57 For the Local Plan Key Diagram to be justified, and for the Local Plan to be sound, the delineation of the Strategic Gap south of Fareham should be amended accordingly.

Strategic Policy DS3: Landscape

- 3.58 The Local Plan intends to formalise Areas of Special Landscape Quality to reflect their valued status as determined through the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps*. As written, Policy DS3 does not however afford any particular level of protection to these areas beyond Policy DS1, which in any event requires development proposals in the Countryside to "*conserve and enhance landscapes*".
- 3.59 Policy DS3 also appears to permit major development proposals in these locations whereas the Development Strategy has sought to avoid new allocations in these locations because of their landscape sensitivity. The definition of major development is provided in the Glossary¹ and when applied to this Policy, could see large scale development proposals being advanced when this is what the Local Plan is seeking to avoid. As drafted, this Policy does little to enforce the Plan's Development Strategy.

¹ For residential schemes, major development includes those of 10 dwellings or more or on a site of 0.5 hectares or more. For other development, it includes building(s) with a floor area of 1000sq.m or more or on a site of 1 hectare or more.

4 Policy H1: Addressing housing needs by the end of the plan period in an appropriate and sustainable manner

- 4.1 In this Section we consider specifically Policy H1 and whether, as presently formed, the Borough Council's strategic housing requirement and housing supply strategy are sound.
- 4.2 The NPPF expects the planning system to significantly boost the supply of new housing by providing, in the first instance, a sufficient amount of development land where it is needed (para 59 refers).
- 4.3 It is clear that a Local Plan's housing requirement is to be calculated by reference to the Government's Standard Method, unless exceptional circumstances can be proven (para 60 refers).
- 4.4 In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.
- 4.5 As discussed in Section 2, the Plan's Vision and Strategic Priorities establish the intention to address the Borough housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.
- 4.6 For the Plan to address, and indeed meet, housing needs by the end of the plan period, it is important to have regard to the following considerations which are material to determining a sound strategy in the context of the Government's presumption in favour of sustainable development:
 - context and the backdrop to this Local Plan;
 - an objective assessment of local housing need;
 - unmet need from neighbouring authorities;
 - the Plan's housing deliver strategy and whether this is sufficiently robust.
- 4.7 As will be shown, the consultation document will not achieve this, and when measured objectively, a shortfall in housing supply over the plan period will be inevitable, contrary to the stated Vision and Strategic Priority.

Context

- 4.8 The earlier Core Strategy set out a Development Strategy for the period to 2026 that has hitherto been achieved in part only. This partial achievement has had significant implications for housing delivery in the plan area.
- 4.9 In aggregate, the Core Strategy intended that some 9,000 new homes would be built in Fareham

in the 20 years between 2006 and 2026. This comprised:

- 5,350 at the North Fareham Strategic Development Area (Welborne) to meet sub-regional needs as identified in both the South East Plan and the South Hampshire Sub-Regional Strategy; and
- 3,729 elsewhere in the Borough²;

- 4.10 Over the 13 years since the start of the Core Strategy's plan period (2006/7 and 2018/19) only 4,200 new homes have been built. This is equivalent to 46% of the housing requirement in 68% of the plan period.
- 4.11 In comparison with the trajectory on page 21 of the Core Strategy, new housing has had to be accommodated in locations outside of allocated Strategic Development Area; in the four years from 2016, almost twice as many new homes have been provided elsewhere in the Borough than the 469 intended for the whole of that 5 year period 2016/21.
- 4.12 Following the Core Strategy, when the Welborne Plan was prepared in 2015, and to reflect the changed circumstances by then the Council re-calculated likely delivery at the Garden Village. Policy WEL3 identified approximately 6,000 new homes to be completed by 2036. First completions were to be achieved in 2015/16, 1,500 completions were to have been achieved by 2021 and 2,860 completions by 2026.
- 4.13 Plainly this hasn't been achieved and without question there has been a substantial shortfall in housing provision compared to the Core Strategy.
- 4.14 Manifestly, this shortfall is significant and cannot simply be put to one side. It is striking that Welborne was identified originally to meet sub-regional needs but because it hasn't delivered it now represents a source of housing to meet in a substantial part the Borough's own housing need and thus the Borough's contribution of the wider sub-regional need is much reduced.
- 4.15 Given the strategic objective defined by the Council, and in the context of the NPPF's presumption in favour of sustainable development, this has a clear implication for plan-making in Fareham. National Planning Policy invites Local Authorities to exceed the minimum housing requirement and to adopt a positive approach to planning for future housing. Plan-making should not be a simple mathematical exercise but a fundamental examination of how to best plan for the long-term future of the Borough. In this instance, and as the Local Plan Supplement was endeavoring to achieve, this enables the Council to develop a strategy for the longer term.
- 4.16 The change of direction in the Regulation 19 consultation document appears to be framed by precisely the opposite; planning for the minimum plan period and the least amount of new development plausible. Patently, that approach does not include the flexibility which a Local Plan should provide.
- 4.17 For example, had the Regulation 19 Plan retained the level of housing calculated by reference to the published Standard Method – 520 dwellings per annum – and had a lower housing requirement in fact materialized, the practical effect of this would merely have been a housing supply strategy that would endure beyond the end of the plan period. In simple terms, the

² Policies CS2 and CS15 refer

housing strategy would cater for an addition 5 years worth of housing. Given that it is beyond comprehension that housing need will not cease after 2037, this would have been a positive, adaptable, plan-led, longer term strategy.

- 4.18 The fact that the Council has alighted upon a potentially lower housing requirement without apparently considering the practical effect of retaining the existing housing requirement manifestly demonstrates a negative, rather than positive, approach to plan making.
- 4.19 Moreover, the Sustainability Appraisal has plainly not considered this as a reasonable alternative and, as such, is flawed. The Assessment of Alternatives in Section 5 of the Sustainability Appraisal relates to development locations rather than the overall quantum of development. The PPG advises that *"a sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted"*. The purpose of testing reasonable alternatives is to determine that a Local Plan promotes sustainable development when judged against reasonable alternatives, to achieve relevant environmental, economic and social objectives.
- 4.20 This negative approach is further evident when considering the components of the housing strategy which again illustrates a do-minimum approach.

Local Housing Need

- 4.21 Application of the Standard Method to calculate the Local Plan's local housing need would require 520 new homes to be provided each year, or 8,320 new homes in total between 2021-2037.
- 4.22 Alternatively, the Regulation 19 Plan is based on 403 new homes each year which is derived from the proposed revisions to the Standard Method published as a consultation document by the Government in the Summer. These proposed revisions carry no weight at the present time and do not provide any basis for the calculation of housing need for the purpose of this Local Plan at the present time.
- 4.23 Only if the proposed revisions are carried forward without alteration by Government would this serve as a basis to underpin the Plan and enable it to be submitted. Any change to the formula, as it relates to Fareham or any of its neighbouring authorities, would require reconsideration of the housing requirement in Policy H1. The Regulation 19 Plan is contingent therefore on the outcome of that entirely separate process, rather than being a Plan which the Council is able to submit for Examination. It is, for want of a better term, a "wait and see" plan.
- 4.24 As the Council appear to acknowledge themselves by the intention not to submit the Plan for Examination until the outcome of the Government's consultation is known, it is plainly not a sound approach at the present time.
- 4.25 Little more can be said about this, other than to draw attention to the obvious difficulties that have arisen in light of the Government's consultation, which have led to a significant level of opposition to the suggested changes. As recently as mid-November the Planning Minister referred to estimates of local housing need derived from its consultation exercise as *"entirely speculative"* and indicating that the revised formula was being re-evaluated.

- 4.26 It is also important to consider when the Standard Method was introduced and the practical effects of this which the Council don't appear to acknowledge.
- 4.27 The Standard Method was introduced in 2018 and the assessed level of local housing need was based on a period of 2016 onwards. The Council appear not to have grappled with the guidance in the Planning Practice Guidance in respect of this: "*Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate*". Plainly we are some way into the plan making process which commenced in 2017 and this requires the Council to have asked themselves how have housing completions compared with the level of local housing need from that point.
- 4.28 The published requirement was 520 dwelling per annum from 2016 onwards, whereas the highest number of completions was 349 in 2016/17 and less than half for the two years since where monitoring information is available.
- 4.29 The Standard Method takes account of backlog but only in so far as affordability will have increased in the years prior to the calculation and does not take account of underprovision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.
- 4.30 The following table illustrates this:

Year	Number of Completions	Level of Local Housing Need	Shortfall
2018/2019	290	520	230
2019/2020*	263	520	257
2020/2021**	132	520	388

*Projected housing supply April 2019

**Projected housing supply June 2020

- 4.31 This indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No account is taken of this in the current consultation document. Even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
- 4.32 In the circumstance where housing delivery in the Borough has been below both that anticipated by the Core Strategy and the measure of local housing need derived from the Standard Method, however calculated, the Council are plainly wrong to have selected a plan period that takes no account of this and a housing strategy that has no regard to that underprovision. This further undermines any notion of a positively prepared plan.

Unmet Need

- 4.33 Section 33A of the Planning and Compulsory Purchase Act 2004 requires a local planning authority to cooperate with, *inter alia*, other local planning authorities, and engage constructively, actively and on an ongoing basis in the preparation development plan documents, so far as relating to strategic matter. Paragraph 25 of the NPPF says 'strategic policy making authorities should collaborate to identify the relevant strategic matters which they need

to address in their plans'. Unlike problems associated with soundness, a failure to discharge the obligation in Section 33A cannot be remedied once the plan has been submitted for examination.³

- 4.34 It is clear from the work of the Partnership for Urban South Hampshire that housing provision is a strategic matter and thus there is a need for co-operation between constituent plan-making authorities. In this regard, the 'plan-making' section of the PPG provides guidance in relation to the duty to cooperate. Paragraph 022 states that strategic policy making authorities are expected to have addressed key strategic matters through effective joint working, and not deferred them while relying on an inspector to direct them. It states "[An] Authority will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any outcomes achieved; this will be thoroughly tested at the plan examination."
- 4.35 The consultation document makes an allowance of an additional 847 houses as a contribution to meeting unmet need from Fareham's Neighbouring Authorities. But as this is the Submission version of the Plan, this allowance should have regard to the co-operation referred to above. There is no evidence that this is anything other than an allowance made by Borough Council without reference to the joint working through PUSH; this is nothing else but a "cart before horse" approach.
- 4.36 The consultation document acknowledges that there is "a significant likelihood of a substantial level of unmet need in the sub-region" (para 4.4) and that over the plan period the level of unmet need in the sub-region could be circa 10,750 new homes. It is instructive that the references to unmet need in para 4.5 of the consultation document are in the context of the current Standard Method and not the higher sub-regional figure that the proposed Standard Revision indicates. In this regard, the plan appears to be "comparing apples and pears".
- 4.37 The following table compares the housing requirement from the current Standard Method and that indicated by the proposed revision.

LPA	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard Method	Proposed new Standard Method	Difference between current and proposed SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1025	+333
PUSH East	1804	1828	2802	3430	+628
Southampton	815	1148	1012	832	-180
Eastleigh		857	694	885	+191
New Forest	521	346	729	782	+53
Test Valley	588	834	550	813	+263
PUSH West	1924	3183	2977	3312	+335

- 4.38 The above illustrates that whilst the Fareham figure might decline, across the sub-region the

³ *Samuel Smith Old Brewery (Tadcaster) v Selby DC [2015] EWCA Civ 1104 paragraphs 38 and 40*

overall scale of housing is greater both in PUSH East and West.

- 4.39 Over a 16-year period, the difference between the proposed new Standard Method would require an additional 10,000 new homes to be built across PUSH East. Compared to average delivery over the past 3 years, almost twice as many new homes will need to be built. This is unquestionably a step change in housing delivery and each Local Authority area will need to contribute towards this and maximise its contribution to the sub-regional requirement.
- 4.40 In September 2020 the PUSH Report to its Joint Committee looked at the potential implications of housing supply relative to Local Housing Need, and using the proposed revision to the Standard Method this still identified a shortfall of over 6,500 across the PUSH East sub-region.⁴
- 4.41 At para 4.5 of the consultation document, the Borough Council put forward a contribution of 847 dwellings towards meeting unmet need. There is no evidence of how this figure has been derived. All that is evident from the earlier passages of that paragraph is the very unclear picture that exists and which is subject to additional work by PUSH. Consequently, the proposed contribution of 847 dwellings – 13% - to unmet need doesn't appear to have any basis in a full and proper assessment of future housing requirement and supply across the sub-region. This is significant because, historically, Welborne had been identified to provide housing supply for that sub-regional purpose whereas now its contribution almost entirely to meet Fareham's housing need.
- 4.42 Switching the role of Welborne in this fashion is taking away a supply of housing identified previously to meet sub-regional needs in the longer term, when plainly that need still exists, and elevating supply available to meet the Borough's need. This denies the original intention of Welbourne, and places a very heavy reliance on one source of housing to meet local needs; on the basis of the Council's strategy, some two thirds of the Borough's housing needs would be met at Welborne.
- 4.43 Again, this illustrates why preparing a Regulation 19 Plan on this basis isn't justified and does not contribute to effective planning across the sub-region.
- 4.44 Moreover, on this basis, the evidence to justify the Council having discharged its duty under Section 33A is not at all obvious; this is particularly significant as this is the Regulation 19 Plan to be submitted for Examination.

Plan Period

- 4.45 The current consultation document is based on the plan period 2021-2037. This is 16 years and would accord with the 'at least 15 years' in the NPPF, if the Local Plan were in fact adopted in 2021. Experience of Local Plan Examinations and the length of time between Regulation 19 and adoption suggests this is highly unlikely. But assuming the Plan is adopted in the 2022 this would provide the bare 15-year plan period.
- 4.46 It is in this context that one has to consider whether the plan is "*sufficiently flexible to adapt to rapid change*". For the reasons given later we say it does not meet this requirement.

⁴ Table 4 Comparison of Housing Need and Supply 2020-2036

Delivery at Welborne

- 4.47 The consultation document's housing strategy is heavily reliant on housing delivery at Welborne, which was previously identified to meet sub-regional requirements. Table 4.2 of the consultation indicates that over 4,000 new homes are to be built at Welborne by 2037 to meet Fareham Borough's local housing need.
- 4.48 This is not a realistic assumption.
- 4.49 It has been readily apparent for some time that past delivery assumptions at Welborne could not be achieved. Despite the Core Strategy and the Welborne Plan assuming a significant number of new homes would have been built at Welborne by the present time, there is still no outline planning permission some 14 months after the Borough Council's Planning Committee resolved in October 2019 to grant permission for the outline planning application (P/17/0266/OA).
- 4.50 In our response to the January 2020 Supplement, we noted that it wasn't surprising that by that time the Section 106 had not been signed given the particular scale of that development.
- 4.51 However, by the present time, the absence of an outline planning permission raises a more fundamental concern about delivery at Welborne.
- 4.52 Nowhere do the Council provide any evidence as to when they expect outline permission to be granted, the extent of any pre-commencement works and their associated timescale, when reserved matters applications are expected and when first completions will be achieved. The closest the Council gets to any justification is that the housing trajectory has been agreed with the developer Buckland.
- 4.53 We are aware that there will also need to be Highway Agreements relating to works to the M27 Junction 10 prior to those works being commenced; again, in our experience such highway agreements are complex and can take a long period of time to complete. The works to be undertaken to the M27 and A32 are substantial. The Planning Officer's Report highlights the estimated costs of these works as £80m-£90m and that funding gap exists in relation to these works. More recently, we understand the Council has had to seek additional funding from Government to cover earlier Local Enterprise Partnership funding that has since been lost. Hampshire County Council has recently confirmed that: "The J10 works are not fully committed at this stage and there is no defined timescale for delivery." This is clearly a major risk in overall terms but also in terms of when such works will be undertaken and the duration of such works.
- 4.54 This is germane to timescales as to when development at Welborne can be anticipated, notwithstanding the milestone it reached in 2019.
- 4.55 A number of housing trajectories have been proposed for Welborne at different stages. The Borough Council's January 2017 Background Paper concerning Welborne set out the Council's assumption at that time. This suggested that 4,090 new homes would be built at Welborne by 2036. Whilst this would align with the current assumption, this overlooks the fact that circumstances have already moved beyond the key dates suggested therein.
- 4.56 If the 2017 trajectory is simply rolled forward to the present day and it is assumed that outline planning permission is granted in 2021/2022 and development commences in 2023/24 then the

total number of completions would be 3,090 dwellings by 2037 – see *Appendix 1*.

- 4.57 This trajectory is clearly sensitive to assumptions. Any delay in commencing development beyond will 2023/24 will cause fewer completions in the plan period.
- 4.58 Moreover, the extent to which 250 dwellings can be built and sustained each year from 2026 onwards is also a highly sensitive assumption.
- 4.59 We note that more recent research from Lichfields⁵ suggests that for sites of more than 2000 dwellings, the average period of time from planning to delivery is 2.9 years. Moreover, that research indicates that for scheme the size of Welborne the number of houses built each year averaged 140 dwellings.
- 4.60 If a mid point between these two assumptions of 185 dwellings per annum were achieved and sustained as the peak output, this would only yield 2,360 dwellings in the plan period.
- 4.61 It is instructive to note that to achieve 4,020 completions in the plan period would require a build rate from 2024/25 onwards of 309 dwellings per annum. A build rate in excess of 300 dwellings per annum was rejected by the Council in 2017.
- 4.62 What is clear from the above is that Welborne’s contribution to housing supply during the plan period has been over-estimated. This component of housing supply is not justified and consequently the housing supply strategy is not effective.

Proposed Allocations

- 4.63 From our analysis of proposed allocations we have been able to identify that, whilst a number of subject to current planning applications, a significant number are subject to constraints that could delay their development. A number of Sites are owned by public bodies or are subject to multiple landownerships and with existing uses⁶. Moreover, a great many are Sites within the urban areas which are likely only suited to flatted schemes to achieve the capacity numbers and may not be suitable to developers.
- 4.64 Other Sites are subject to nitrates constraints⁷ which may require a strategic solution to enable their release.
- 4.65 Consequently, it is questionable whether they will all be developed and this supports not only the principle of a contingency allowance but also the importance that that allowance reflects the overall level of uncertainty associated with the housing supply strategy.

Windfall

- 4.66 Table 4.2 of the consultation document includes a windfall allowance of 1,224 new homes between 2021 and 2037.
- 4.67 The principle of including a windfall allowance is explained in the NPPF at para 70 in the

⁵ Start to Finish (2016), Driving Housing Delivery (2018)

⁶ FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13, HA22, HA24, HA31, HA36-39, HA42, HA44

⁷ HA1, HA12, HA34, HA40

following terms:

- Firstly, there should be compelling evidence that they will provide a reliable source of supply.
- Secondly, any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 4.68 It is evident that the above is much more than a consideration of historic windfall delivery and requires the plan-maker to actively consider future supply from this source.
- 4.69 The Council's Windfall Background Paper projects forward 51 windfall completions on small sites from 2024/25 and an additional 52 windfall completions from large sites from 2025/26. The only source of information that the Council has used to arrive at these figures is its breakdown of past windfall delivery from 2009 – 2019 which averaged 101 dwellings (51 for small sites and 52 for large sites).
- 4.70 Para 3.6 of the Background Papers states: *"The estimated rate of windfall development is based on past completion rates..."* (emphasis added)
- 4.71 Para 3.9 of the Background Paper states: *"To ensure that a cautious approach is taken and windfall projections are not overly optimistic, the projections have only taken account of windfall delivery since 2009/10".*
- 4.72 The very next paragraphs states *"Based on the preceding analysis, the windfall projections for the Borough are 51 dwellings per year from small site delivery and 51 dwellings per year from large site delivery".*
- 4.73 It is clear that the assumption in Table 4.2 of the consultation document is derived solely from past trends and it is claimed that this demonstrates *"a compelling case"*. However, nowhere in the analysis is there consideration of whether this is a reliable source of future supply, rather it is just a forward projection of what happened in the past. The analysis does not provide any consideration of expected future trends.
- 4.74 It is important to recognise that windfall opportunities are finite. Opportunities to redevelop vacant or redundant land will have largely been exhausted by the present time because of planning policies that have prioritised such sources of supply for the past decade and longer. Consequently, future windfall over the plan period will rely to a much greater extent on recycling of land (i.e. existing uses being changed). This is inevitable a less certain source of housing supply.
- 4.75 For the purpose of assessing whether the Plan's housing supply strategy is sound, we have adjusted the windfall contribution by 25% i.e. 918 completions over the plan period.

Revised Housing Strategy

- 4.76 In the preceding Sections we have considered both the level of local housing need and the housing supply strategy providing a reasoned justification why this Regulation 19 Plan is not sound. The following table illustrates the effect of this.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	8,320	520 dpa
Under-supply 2018-2020	875	Added to reflect actual housebuilding relative to LHN
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	10,050	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect roll-forward of 2017 Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 25% to reflect finite supply
Total Supply	7,150	Sum of Supply estimates
Shortfall	2,900	

*retained at 13% of unmet need for illustrative purposes absent any Statement of Common Ground

- 4.77 The above illustrates that with these alternative assumptions, additional land needs to be identified for some 3,000 new homes.
- 4.78 Even if the strategic housing requirement were calculated simply by reference to 403 dwellings per annum, there would be no contingency to take account of changing circumstances over the plan period, contrary to the assertion in the plan to this effect.

Housing Component	Dwellings	Notes
Local Housing Need 2021-2037	6,448	403 dpa
Under-supply 2018-2020	nil	N/A
Unmet need from Neighbouring Authorities*	847	No adjustment
Strategic Housing Requirement	7,295	No adjustment
Commitments	552	No adjustment
Sites with the benefit of Resolution to Grant	838	Excludes Welborne but no other adjustment
Welborne	3,090	Reduced to reflect 2017 Housing Trajectory
Allocations in the Publication Plan	1755	No adjustment
Windfall Development	918	Reduced by 20% to reflect finite supply
Total Supply	7,153	Sum of Supply estimates
Shortfall	142	

- 4.79 The above analysis clearly shows that Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to assumptions about housing supply, additional housing land should be allocated for development.
- 4.80 In the following Section we submit that the Strategic Growth Area identified in the Local Plan Supplement 2020 should be allocated for housing development.

5 South Fareham Strategic Growth Area

- 5.1 In our previous representations we supported the inclusion of Strategic Growth Areas in the Local Plan. Hallam control a substantial tract of land to the South of Fareham, adjoining the Stubbington Bypass, the construction of which has recently commenced. This land, along with other parcels in this location, is identified in Figure 3.2 of the Local Plan Supplement Consultation Document as the Proposed Strategic Growth Area South of Fareham.
- 5.2 The justification for the allocation of a Strategic Growth Areas is evident from the preceding Section which identified a significant shortage in the amount of new housing to be provided in the Borough and the amount of future development land allocated for this purpose. Development South of Fareham could provide housing land over the plan period, both in the immediate term and continuity over the long term.

South of Fareham

- 5.3 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. The town is the largest in the Borough with a population of around 37,300. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town.
- 5.4 Fareham is also an important economic centre, which has developed further over recent years with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane and the Peel Common Roundabout.
- 5.5 A new, mixed use masterplanned development to the South of Fareham, contiguous with Longfield Avenue, benefits from its proximity to the town centre, Daedalus, the railway station and existing local services and amenities with good access to walking, cycling and public transport links. These are locational merits that align with *Good Growth*.
- 5.6 Stubbington and Hill Head form a single urban area and have a population of c.14,300. These settlements have a range of services with a local centre, doctors, dentists, two primary schools, a secondary school and a community centre.
- 5.7 Local employment has improved with the development at Daedalus, which lies to the south east of the settlement. Development in south Fareham would delivery homes close to this economic and employment zone, providing housing for the growing workforce.
- 5.8 The Stubbington Bypass is being constructed to connect Gosport Road, Peak Lane and Titchfield Road. This will inevitably create an urbanising influence through the centre of the existing Strategic Gap. Development to the south of Fareham would assist in assimilating the bypass into the landscape and soften the impact of the road on the gap, beyond what could be achieved from constructing the bypass alone.

Development Potential

- 5.9 Paragraph 3.24 of the consultation document identifies high-level development principles and

requirements. Hallam support these intended outcomes and these have underpinned their proposals for a mixed-use masterplanned development.

- 5.10 Work undertaken over a long period of time has identified the suitability of the land controlled by Hallam to accommodate new development, how development can be arranged and the extent of mitigation required.
- 5.11 In our response to the 2019 Issues and Options consultation, we identified potential areas for development in this location and for convenience we have attached this at *Appendix 1*. Whilst this considered only land which Hallam control, we recognise that there are other smaller scale development opportunities within the general location, and that the Borough Council intend to work with landowners and site promoters to develop a Council-led masterplan which will focus on the delivery of community benefits as part of Good Growth. In this context, Hallam are committed to working with the Council and others to develop these proposals further as part of a co-ordinated approach.
- 5.12 A development scheme could comprise the following:
- Approximately 1,200 units
 - a new healthcare facility
 - a primary school
 - a care home
 - community hub
 - local shops
 - sports hub and
 - Green Infrastructure to include public open space, equipped areas of play, Sustainable Drainage Systems (SuDS), tree, hedge and shrub planting, meadows, structural woodland planting, allotment gardens and permissive footpaths and cycleways.

5.13 Development would be accessed from a primary and secondary access from Longfield Avenue, along with associated improvements to the existing Long field Avenue/Bishopsfield Road junction and carriageway and a primary access from Peak Lane.

5.14 An outline planning application for such a proposed development was submitted in June 2020 and is presently undetermined.

Accessibility and Movement

5.15 The accessibility advantages of this location enables positive promotion of active travel. The proposed development will be served by an internal network of footways and access arrangements that can be utilised by both pedestrians and cyclists. The site is surrounded by Public Rights of Way (PRoW) that in turn can serve as cycle/walking connections from the site to other roads in the vicinity of the site. These will be maintained and improved in order to encourage more sustainable modes of travel as an alternative to the conventional car.

5.16 Bus based public transport is also a feasible means of sustainable travel from this location. Service provision on the route number X5 operated by First Group provides opportunity for peak commuter travel and also for off-peak travel. The scale of development proposed is

sufficient to deliver dedicated public transport coverage between the Site and key destinations that will have the frequency and reliability to attract patronage to secure long term viability. Any improvement will be discussed with the necessary stakeholders, but it is envisaged that the development will support the introduction of new services.

- 5.17 The Eclipse Busway - a Bus Rapid Transport scheme between Fareham and Gosport opened in 2012 providing a priority public transport route connecting the two towns. The BRT scheme provides a more efficient service using new, comfortable, low-emission buses that encourages bus travel through enhancing the bus travel experience. Using the new busway, buses are able to avoid congested parts of the highway network including A32 so that passengers can benefit from reliable journey times and can plan their onward travel connections.
- 5.18 A number of new highway improvements works have been implemented or are currently under construction which is intended to improve bus journey reliability, and encourage more people to switch from car travel to using the bus. This would have an effect of helping reduce traffic numbers and traffic congestion between Fareham and Gosport, including along Newgate Lane.

Nitrates

- 5.19 The land is located directly west of the edge of urban area that forms part of the designated Chichester, Langstone and Portsmouth Harbours Eutrophic NVZ (TraC) (Nitrate Vulnerable Zone). The land is currently predominantly arable farmland with a history of mixed crops such as wheat, barley, oats, rape etc. and break crops such as peas, winter oil seed rape and beans.
- 5.20 The above is recorded on a Nutrient plan detailing fertilizer types, tonnages and time applied for each individual field. The fertilizer applied during the period of record is a mix of pig and farm yard manures.
- 5.21 It is recognised that intense farming with fertilization with natural manures will lead to nitrate leaching into the surrounding surface water and ground water environment.
- 5.22 Through development of the land, the leeching of nitrates through farming activities will be curtailed. While there will be a new source of nitrate production and leachate associated with the new development, this is considered to be at worst a neutral impact and through further assessment a net reduction in nitrate leaching can be achievable.

Biodiversity

- 5.23 The Hallam land is divided into two areas by Peak Lane; the eastern area comprises largely of arable land with hedgerows and ditches forming the compartmentalisation typical of the surrounding arable tenure and has limited nature conservation value. The western compartment consists of a large area of set aside land, with areas of arable crops, which are bound by limited hedgerows and tree lines.
- 5.24 The most significant habitat is Oxleys Coppice which is designated as a SINC and an area of ancient and semi-ancient woodland (ASNW), which has been evaluated as county level conservation value. The Scheme can ensure that Oxleys Coppice is protected.
- 5.25 Hedgerows are mostly classified under the Hedgerow Evaluation Grade System (HEGS) as moderate and moderate/high value. Only two hedgerows are classified as 'important' under the

Hedgerow Regulations (REGS). Several drainage ditches are found through the Site but only have limited marginal and aquatic vegetation. These are classified as no more than local conservation value.

- 5.26 Surveys have identified the presence of a number of protected species, bats and breeding birds. Measures to safeguard these species and their habitats can readily be accommodated as part of the development proposed. The habitats created and the species which will benefit from the mitigation measures proposed in the Site will lead to an overall beneficial effect in the long term. Similarly, in accordance with the Solent Waders and Brent Goose Strategy, a financial contribution will be made to this, based on the classification of land's suitability for supporting such species.
- 5.27 The Solent & Southampton Water Ramsar/SPA, which also includes Titchfield Haven SSSI, is approximately 700m from the Site. Portsmouth Harbour Ramsar/SPA/SSSI is located approximately 1.3km to the east of the Site at its nearest point, which also support a variety of habitats and an assemblage of dark-bellied brent geese. The Solent Maritime SAC extends from the River Hamble mouth up to Botley in the west, this is approximately 4.7km west of the Site.
- 5.28 There is the potential for a Likely Significant Effect on the Solent SPAs from an increase in recreation from new housing development within a 5.6km zone of influence of the Solent. As a result, an Interim Solent Recreation Mitigation Strategy was published in 2014 to enable initial mitigation measures to be placed, so LAs could continue to grant permission for new homes. The strategy has been updated to form the basis for future new housing up to 2034, with the Bird Aware Solent Recreation Mitigation Strategy (2017).
- 5.29 As this Site falls within the established zone of likely significant effect (5.6km), a HRA/AA will be required by the LPA; however a site specific Test of Likely Significance will be provided to facilitate the LPA assessment. The mitigations measures required to facilitate the Proposed Development will see a financial contribution provided for the in-combination effects on the Solent SPA, with additional bespoke mitigation provided within the Site to mitigate for the alone effects.
- 5.30 The details of bespoke mitigation are to be discussed with Natural England. Current proposals will include an area of County Park/Green Infrastructure to the west of Peak Lane, measuring approximately 23ha, which will include a circular walk, car park and habitat features to provide point of interest, as well as safe areas for dogs to be exercised off the lead. Alternative areas of GI will be provided around the main residential areas to the east of Peak Lane, here approximately 32ha will be provided, which will incorporate recreational opportunities and areas of biodiversity net gain.
- 5.31 The mitigation measures provided within the Site will ensure that there are no likely significant effects on the Solent alone and in-combination with other schemes within Fareham.

Strategic Gap

- 5.32 The current Core Strategy designates land between Fareham and Stubbington as a Strategic Gap. This follows such a designation being contained within earlier Development Plans; Settlement Gap policies in Hampshire date back at least 30 years when they were included within the South and Mid Hampshire Structure Plans (1988 and 1989). They were carried forward into the Hampshire County Structure Plan 1994 and the Hampshire County Structure

Plan 1996-2011. Consequently, with each new development plan needing to make provision for current and future development needs, the role and function of gaps need to be considered having regard to up to date circumstances.

- 5.33 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. As described earlier, this new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. Such a conclusion is similar to the assessment undertaken by Hallam previously.

Summary

- 5.34 Hallam support the identification of the Strategic Growth Area to the South of Fareham and have identified a development scheme that achieves the high-level development principles and requirements set out in the consultation document.
- 5.35 Importantly, development in this location can be brought forward that provides new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.
- 5.36 The merits of this location are substantial, and carefully planned development will not result in the coalescence of Fareham and Stubbington and the separate identities of these settlements can be retained.
- 5.37 As such, the allocation of land at South Fareham in the Local Plan for future development is considered wholly appropriate.

6 Policy NE5 and Policies Map

- 6.1 The Policies Map includes designations relating to Waders and Brent Geese and are associated with Policy NE5. This designation covers four categories of land – Core and Primary Support Areas, Secondary Support Areas, Low Use Areas and Candidate Areas.
- 6.2 The extent to which the land concerned is used by Waders and Brent Geese, particularly beyond the Core Areas, is transitory and can differ from time to time as a consequence of changes in agricultural practices (for example, arable land with wintering cereals provides an optimal foraging resource, whereas when this is replaced / succeeded by grassland habitats its function can change, which could affect species assemblages and regularity it is used. Changes in land use also promote further recreational uses which is the case for areas west of Peak Lane) or changes to the extent of the built environment (for example newly built structures, such as the Stubbington Bypass, will change the suitability of a location in proximity to it as a receptor). Therefore, to delineate these areas in the manner shown on a Policies Map, which affords permanence to the designation, fails to take account of the potential changes in circumstance and is not sound as a matter of principle.
- 6.3 The practical effect of this is that Policy NE5 directs the decision-maker to consider development proposals against the criteria listed therein and the status of the land by reference to the designations shown on the proposals map, which may at that point in time no longer be up-to-date or relevant.
- 6.4 Through Hallam's work in respect of the land to the South of Fareham, and through discussion with Natural England, it has identified a different classification to that shown on the Policies Map for certain of those parcels of land, as shown on *Appendix 2*. This illustrates how the application of Policy NE5 could misdirect the decision maker.
- 6.5 On this basis, these designations should not be shown on the Policies Map in the manner they are presently.
- 6.6 A more generic designation such as Areas of Waders and Brent Geese Sensitivity, which does not classify individual land parcels, would be more appropriate.
- 6.7 It would follow that Policy NE5 would be amended to require planning applications to assess and determine the use of land subject to those development proposals and at that point, when an up to date classification has been determined, the criteria and mitigation in Policy NE5 would apply.

7 Summary

- 7.1 These Representations have been prepared on behalf of Hallam Land Management Limited (Hallam), who control a substantial tract of land to the South of Fareham, adjoining the existing urban area and Stubbington Bypass, the construction of which has recently commenced.
- 7.2 This land was identified in the Local Plan Supplement 2020 as a potential Strategic Growth Area. Whilst the Regulation 19 Plan does not propose to carry forward the South of Fareham Strategic Growth Area, as is evident from these representations the need for such an allocation has not diminished.
- 7.3 The consultation document rightly identifies the Borough Council's commitment to meet the Borough's housing need by the end of the plan-period. This is plainly aligned with the NPPF and the Government's objectives. What is notably absent from the Vision and Strategic Priorities, is the recognition that Fareham is important in a sub-regional context and was previously intended to provide significant development land at Welborne to meet wider needs.
- 7.4 Policy H1 is not founded on a sound basis. In preparing and publishing this Regulation 19 Plan, the Borough Council has afforded greater weight to a potential revision to the Government's Standard Method and has disregarded the published and established measure of local housing need which has underpinned its work to date. Unless and until the Government publish a revision to the Standard Method, this version of the Plan cannot be submitted for Examination as it is plainly unsound. The Borough Council recognise this from its Committee Papers.⁸ This is nothing other than a "wait and see" Plan.
- 7.5 Only if the Standard Method is published in the same final form will the Plan be able to proceed – there is no indication if or when the Government intend to complete this exercise given the significant scrutiny it has attracted.
- 7.6 A more positive approach would have been to retain the higher level of housing as the basis of the Plan to provide surety over a long term with policy measures to manage housing supply in the event the level of local housing need was reduced. Unfortunately, the Council hasn't considered this as an option or a reasonable alternative in the Sustainability Assessment.
- 7.7 Even in the event the proposed revision to the Standard Method were confirmed as the Plan assumes, there is little if any evidence of a cogent understanding of the level of unmet need across neighbouring authorities. There is no apparent evidence of effective co-operation to justify the contribution the Plan proposes to unmet need.
- 7.8 Moreover, the Council hasn't applied its mind to the level of housing that been achieved since the Standard Method was introduced at the start of the plan making process and the date the plan is to be adopted. Viewed objectively, housing completions over that three year period were below the level of local housing need and this shortfall, which is part of a much greater shortfall when compared to the Core Strategy's housing intentions, should be accounted for.
- 7.9 Turning to housing supply, the assumption that Welborne will provide 4000 new homes within the plan period is not founded upon evidence previously produced by the Council and the level

⁸ Executive Briefing Paper 12th October 2020, para 12

of housing output assumed is at a level the Council previously considered unrealistic.

- 7.10 The windfall assumption drawn simply from past trends has not justified why this is a source of future supply. Uncertainties also exist in relation to a number of the proposed allocated sites because of landownership, extent of existing uses and location.
- 7.11 For all of the above reasons, the Plan's approach to housing will fall short of its Vision and Strategic Priorities. Policy H1 has not been prepared in accordance with National Planning Policy, is not justified, is not effective and is not positively-prepared. Policy H1 should be amended to increase the strategic housing requirement and for this to be phrased as a minimum, and, both because of this, and necessary adjustments to housing supply, additional housing land should be allocated for development.

South of Fareham

- 7.12 Fareham is a sub-regional centre and is the main focus for facilities and services in the Borough. It follows that development which adjoins the existing urban area will benefit from accessibility and connectivity to these facilities and services, enhancing opportunities for active travel and supporting the vibrancy and vitality of the town. Similarly, Fareham is an important economic centre, including the Solent Enterprise Zone at Daedalus to the south of the town.
- 7.13 It is considered that development to the south of Fareham would be in a sustainable location, with good access to walking, cycling and public transport links, as well as local services and amenities. This location adjacent to the existing urban area creates a good opportunity for a natural and sustainable extension to the urban area. Development in south Fareham would deliver homes close to an important source of new employment and jobs at Daedalus.

Strategic Gap

- 7.14 The current Core Strategy designated land between Fareham and Stubbington as a Strategic Gap.
- 7.15 The Borough Council has now commissioned a new assessment of its Strategic Gaps. Whilst there are reasons why a Gap Policy should be retained, the assessment that relates to the Gap between Fareham and Stubbington rightly identified that not all of the land currently subject to that designation serves an integral purpose to retaining separation between the settlements to protect their identities. This new assessment concludes that land south of Longfield Avenue, west of HMS Collingwood can accommodate new development without significant adverse impact on the integrity of the Gap. The delineation of the Strategic Gap on the Policies Map should be amended accordingly.

Proposed Modifications

- 7.16 The following Modifications are considered necessary for the Local Plan to be sound:
 - 7.16.1 The minimum housing requirement in Policy H1 to be defined by reference to the existing Standard Method;
 - 7.16.2 The housing requirement be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;

- 7.16.3 The level of unmet need that is accommodated be based on constructive, active and on ongoing engagement with neighbouring authorities;
- 7.16.4 Assumptions about the delivery of new housing at Welborne be revisited and revised down;
- 7.16.5 The windfall allowance be revised down;
- 7.16.6 Alternatively, to 6.16.4 and 6.16.5 the level of contingency be increased;
- 7.16.7 Additional housing allocations be provided for;
- 7.16.8 Land South of Fareham is allocated for housing development; and
- 7.16.9 Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood is amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- 7.16.10 The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

Subject: Fareham Local Plan 2037

Follow Up Flag: Follow up
Flag Status: Flagged

For Fareham Planning Department.

I must first recognise how much thought and work has gone into the Plan, and it reads well. Congratulations to the authors, who know their subject in such detail. Most of it I agree with, without reading every word, but comments have been invited.

Strategic Priorities. Para 2.21 (5). I think a vibrant future for the town centre might be positive with increased housing, ie FTC1, FTC2 and FTC6, but all these developments remove some existing parking space, or add to a car parking problem. If there is no new parking, where will out of town shoppers park their cars? Perhaps hidden within the text is an assumption that FBC can do nothing to halt changes to the retail trade: from increased IT shopping, click and collect, and the demise or closure of retail chains and local businesses. This was happening before the Covid19 outbreak, but has become much worse. So will people come from outlying communities like Stubbington, as they will not be able to buy what they want in Fareham anyway. I believe FBC will have to consider lowering business rates to counter balance lower footfall, or give help with high rents to encourage more local shops and businesses. Maybe entertainment options might bring some life to the centre. Whiteley is the main shopping centre for Fareham now, which unfortunately comes under Winchester. I would suggest that para 2.21 needs greater vision if the town centre is to survive, albeit in a different form than today.

Strategic Gap. Para 3.9 and 3.10. Para 3.9 reads positively, but 3.10 says 'a redefinition' does not preserve the size or shape of the existing. This is reinforced when read in conjunction with para 3.44 'spatial definition tightened', and 'redrawing boundaries' in para 3.46. I fear for the future of Strategic Gaps when referring back to Strategic Growth Areas in para 3.20: are these potential new SGAs, or a yet again redefinition of Strategic Gaps? My confidence in the existing SGs being retained is seriously diminished, and these conflicting phrases do not create trust in the FBC future decision making on this topic.

On this same topic of the boundaries of the Meon SG, I would greatly appreciate having or seeing a map of the Meon SG area, as my house backs on to open fields looking west to the river. This would help me to comment on any future development submission which involves land on the east side of the river along Old St and further north to Titchfield Road. Thank you.

Housing Allocation Policy HA3. What will happen to the existing business within this development outline?

Housing Allocation Policy HA41. I read this with interest, as it is local to me. A very interesting development, original thinking. But where will the residents park their cars without denying existing shoppers? And how will they be able to recharge batteries as there is no parking at the back of the existing building?

Employment. Two development sites are on Solent airfield, and the third at Whiteley. None of these is served by any form of public transport, so private transport will be essential. Does this fit with climate change? Or is it assumed e-vehicles of one sort or another will be commonplace after 2037? But in the meantime? Any thought about discussing new or revised bus routes with the bus companies?

Air Quality and Transport. Reading these as a current and topical issue worldwide, the policies read well, yet I feel quite strongly that there is something the FBC can do (other than address the issue for future planning applications) to reduce existing levels of pollution. Why not plan for the Strategic Gap between Fareham and Stubbington/Hill Head/Lee to be heavily planted with trees in the spaces between the new by-pass and existing dwellings to lower Co2 levels? This would help the environment, nature, keep communities separate, provide recreation space for good mental health, and improve air quality, all in the one exercise. More trees throughout the borough is already being studied, I understand. Central government will set the pace for reducing fossil fuel emissions, phasing out petrol and diesel. I feel the cost of e-vehicles will be prohibitive compared with existing cars, so the number of vehicles may fall. This will drive the need for better public transport. Locally, this should be a much better bus service, not just a

trunk route service as we have today in Stubbington. But I doubt that any bus service could meet the needs of the elderly, handicapped, young and old, and be available throughout the day, or be affordable. Nevertheless I would like to have found more sense of action or need in words on this under either of these two headings, and also something about car charging ports in the Housing Policy section. FBC has to lead on this last point, I believe.

Having struggled to page 244, I'm done for. But again, a very exhaustive Plan with many specialisations, and an eye opener for the uninitiated, which is me!

Thank you for your patience in reading this.

David Mugford

Strategic priorities 1 and 11 fail to address FBC's commitment to carbon neutrality by 2030. FBC made a commitment to the borough to achieving carbon neutrality by 2030 in an Oct 2019 council meeting. A carbon reduction plan has yet to be published but it seems FBC is limiting this ambition to activities over which it has direct control. This is very disappointing. Surely, in a local plan of this scope and reach, where FBC has the power of approval, FBC should be prepared to take a lead in energy conservation and carbon neutrality by mandating building design policies which to help achieve these objectives, not only in 'the embodied energy' of construction materials (para 11.24) but also in whole-life energy consumption and reduced CO2 emissions through insulation, choice of heating systems and re-usable energy sources.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Where FBC has the power of approval, FBC should be prepared to take a lead in energy conservation and carbon neutrality by mandating building design policies which to help achieve its declared carbon neutrality objective, not only in 'the embodied energy' of construction materials (para 11.24) but also in whole-life energy consumption and reduced CO2 emissions through insulation, choice of heating systems and re-usable energy sources.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

FBC would then be honouring its commitment.

Your suggested revised wording of any policy or text:

Above words should be summarised to extend the wording of Strategic Priorities 1 and 11 at para 2.12 to include the FBC carbon neutral commitment. Full wording to be included later in the report in the Climate Change and Design sections (8 & 11)

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: mr R A K Murphy (1812-13138)

Legally compliant	No

Test of Soundness Settlement Definition In the Forward to the Publication Plan it is stated "Greenfield sites are less favoured locations for development". Para 2.1 states "Fareham Borough Council (FBC) will RETAIN its identity, valued landscapes and SETTLEMENT DEFINITION and will protect it's natural, built and historic assets". Further, Para 2.12 "Strategic Priorities" states "FBC will strive to maximise development within the Urban Area and away from the wider countryside and to create places which encourage healthier lifestyles". It is unbelievable then to find that it is proposed that Policy HA1, currently Greenfield, is to be re-designated as an Urban Area (via the re-definition of Settlement Boundaries ref WW17). This re-designation from Greenfield status to Urban status and the movement of the Settlement Boundary in order to accommodate the inclusion of further developments put forward by developers totally contradicts what is stated in the Publication Plan. It is a blatant and unethical manoeuvre by FBC by stealth to suit it's own objectives to concentrate 62% of new housing in one small area without any Infrastructure improvements.

2. Strategic Policy DS1 (Pares 3.36 and 5.6) deals with the need, IN EXCEPTIONAL CIRCUMSTANCES AND WHERE NECESSARY AND JUSTIFIED, for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for-one replacement dwelling basis. Before it's proposed re-designation to Urban Status, HA1 is defined as countryside and has no previously developed land so cannot be used in such a way under the Publication Plan. To achieve it's objectives for 62% of Housing Allocation to be in HA1, FBC has conveniently redrawn the urban boundary.

Infrastructure Policy HP4, Para 5.24. HA1 fails to meet criteria e). The plan for the development of HA1 would demonstrably have unacceptable environmental, amenity and traffic implications.

2. Page 51 refers to traffic routes in HA1. There have been previous recommendations to limit the number of dwellings having direct access onto Greenaway Lane in HA1 to 6 because it was recognised that the Lane is unique in Warsash due to it's rural feel. It is very narrow in places, there are no pavements just some grass verges and there are ancient ditches and lots of trees at the eastern end. It is widely used recreationally. The Publication Plan proposes that the number of dwellings with direct access be increased to 140 and the Lane will be widened (how on earth could this be achieved?) The character of the Lane will be destroyed and there will be a considerable impact on the safety of the large number of non-vehicular users. The Publication Plan, Page 54, highlights that there will be 7 new access roads onto Brook Lane, an already busy main road, and Lockwood Road from all the individual developments in HA1. Additionally, the Greenaway Lane access onto Brook Lane, which is situated on a bend in Brook Lane, will become exceptionally busy as the extra vehicles from the 140 new dwellings will feed into it. The number, position and proximity of the new roads onto Brook Lane are a result of the lack of a cohesive Master Plan for HA1, the lack of a cumulative view combined with the lack of connectivity between adjacent sites. It is piecemeal development at its worst and will undoubtedly lead to gridlock and accident black spots on Greenaway Lane and Brook Lane. Para 10.5 does not include an analysis of streets where the majority of the new dwellings are proposed. Why hasn't HA1 had more consideration in the Transport Assessment when there are 830 new dwellings proposed for this area (62% of the total for Fareham)? With an average of 2 cars per dwelling, an additional 1,660 vehicles will be on local roads in Warsash and there is no reference to the mitigation required to reduce the resulting congestion by 2037. The Publication Plan fails the Test of Soundness by not focusing on this impact. The Publication Plan Strategic Transport Assessment at Para 14.16 states "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective". This statement doesn't include the area HA1 of the Publication Plan for which 830 dwellings within piecemeal developments are planned. HA1 isn't included within the Local Plan Strategic Transport Assessment. Page 52 indicates the need for the provision of "2 junior football pitches" within HA1. Why are these not shown on the Masterplan?. Housing Need Methodology Para 3.27, fig 3.2. There are more than the 8 indicated potential growth areas shown on the map (assuming these are construed as being the proposed allocations. The map is wrong.

2. Para 3.37 is in conflict with Para 4.13 over the definition of small scale development. Is it sites of less than 1 Ha or a development of not more than 4 dwellings? 3. Para 4.2 of the Publication Plan is Unsound. It bases housing numbers on a proposed new methodology for calculating Housing Need. There is a tangible risk that this methodology may not be adopted by the Government. Also Page 37, Paras 4.12 4.16 and Policy HA1 illustrates that whilst a contingency buffer of 1,094 dwellings has been made, this Publication Plan is heavily reliant on the delivery of 4,858 dwellings at Welborne. This is by no means a certainty. Occupancy Rates Para 5.41. As regards the Nitrate Budget Calculations the LPA is using an average occupancy rate of 2.4 persons for a 4/5 bedroom dwelling. As regards the occupancy rate in this section, however, it states that the spectrum of occupancy for affordable homes will be in the range of 4-6. The Publication Plan's claims are not reflected in FBC's own proposals and requirements. This does not pass the Test of Soundness. Carbon Reduction The Publication Plan is not Positively Prepared. Section 8, Para 8.60 talks about the requirement of meeting CO2 Emission Reduction Targets. However it fails to state what the targets are. Instead, the Publication Plan refers to individual developments power generation rather than what each development should deliver over and above the Building Regulations requirements.

2. Para 11.34. The Publication Plan is not Sound as it does not provide an effective approach to Carbon Emissions reduction in the Borough of Fareham. It is stated that Applications will be supported where the development exceeds Building Regulations but no percentage target is set. 3. Para 11.36. No standards are set for Developers who are being encouraged to design for Natural Ventilation and Green Infrastructure. Just meeting Building Regulations will not see FBC contributing to the Government's promised Carbon Reductions. Why have standards not been set within this Publication Plan to ensure Developers are designing for sustainability even though such standards may not yet be within the Building Regulations. Retail Facilities Para 7.13. No additional Convenience Goods floor space has been allocated for Warsash. Existing local retail/commercial facilities do not cater for the additional people 830 new dwellings already planned for HA1 (Warsash) will bring.

2. Para 7.18. Out of town shopping is discussed but not defined. The use of out of town

Client
Graham Moyse

December 2020

1. Introduction

- 1.1 Turley are instructed by Graham Moyle to prepare representations in respect of the Fareham Local Plan 2037 – Regulation 19 Submission Draft.
- 1.2 Graham Moyle owns land in the vicinity of Junction 11 of the M27 (known as Down Barn Farm) and as a local farmer and entrepreneur, oversees a number of valued local businesses.
- 1.3 The primary purpose of the representations is to shape the policies of the Local Plan to support the aspirations of Graham Moyle in respect of the potential that exists at Down Barn Farm.
- 1.4 The representations have been set out in Section 2 of this report and have also been submitted individually on the relevant representation forms.
- 1.5 Section 3 sets out some initial details of the potential that exists on the land at J11 of the M27 (including Down Barn Farm). Whilst these proposals are still at a formative stage, that they offer an exciting and unique opportunity to address two key development concepts, namely:
 - A dedicated electric vehicle service station and associated facilities
 - A location to accommodate business / infrastructure users that require proximity to the strategic road network
- 1.6 The location of the site at Junction 11 of the M27 is well suited to respond to such uses given its accessibility to the motorway network and its proximity to key urban areas.
- 1.7 Whilst the broad principles of the emerging Local Plan are supported, it is our view that there are two substantive omissions in terms of its content, namely:
 - Insufficient recognition is given to the need to provide infrastructure to support the growth of electric vehicle usage (including specific allocations for such facilities); and
 - There has been a failure to recognise the need for specific employment provision to accommodate users who need a high level of accessibility and are of form that is not well suited to being within the built up environment.
- 1.8 These principles are drawn out through the representation in Section 2.0, with the conclusions that:
 - The wording of several policies should be amended to more fully recognise the importance of electric vehicles and to provide support to the delivery of infrastructure that is necessary to support the establishment and growth of the electric vehicle network over the lifetime of the Local Plan.

- Greater recognition should be given within the relevant employment policies, to supporting growth in locations, such as the land at J11 of the M27, where they respond to the specific needs of users.

2. Representations

2.1 Representations have been made in respect of the following chapters, paragraphs and policies of the plan.

- Paragraph 2.10 – Fareham Local Plan 2037 Vision
- Paragraph 2.12 – Strategic Priorities
- Paragraphs 3.4 / 3.5 – Good Growth
- Policy DS1 – Development in the Countryside
- Policy DS3 – Landscape
- Chapter 6 – Employment
- Policy E1 – Employment Land Provision
- Chapter 8 – Climate Change
- Policy CC1 – Climate Change
- Policy CC4 – Renewable and Low Carbon Energy
- Policy NE8 – Air Quality
- Policy TIN1 – Sustainable Transport
- Policy TIN4 – Infrastructure Delivery

2.2 Each representation is by its nature an objection and consideration has been given in respect of each as to how the plan could be amended to overcome the objection.

2.3 In addition to the representations being set out below, each has also been submitted on an individual objection form.

Paragraph 2.10 - Fareham Local Plan 2037 Vision

Representation

2.4 The vision is supported in general terms. However, its failure to include reference to supporting measures to address climate change is a significant oversight. Making provision for the necessary infrastructure within the Borough to support changing technologies is fundamental to addressing climate change. There are substantive changes, such as the transition of petrol to electric vehicles, which will take effect over the plan period, and the vision should reflect the need to deliver appropriate infrastructure to support that change.

Amendment

- 2.5 Add an additional statement to confirm that the Local Plan will promote the delivery of infrastructure to support infrastructure delivery that is relevant to address the climate change agenda.

Paragraph 2.12 – Strategic Priorities

Representation

- 2.6 Whilst there is a strategic priority relating the climate change, it fails to recognise the need for and importance of infrastructure delivery to support key aspects such as the transition from a road network that is dominated by petrol based vehicles to one where electric vehicles are the primary vehicle mode. This transition will take place over the life of the plan period and there is a need to promote both home and network based facilities to enable this to take place. A failure to specifically reference this as a strategic priority is a clear oversight.

Amendment

- 2.7 Amend strategic priority number 11 to make specific reference to the provision of infrastructure to supports electric vehicles changing, both at home and across the highway network.

Paragraphs 3.4 / 3.5 – Good Growth

Representation

- 2.8 The concept of good growth should be extended to make specific reference to highway network related infrastructure that promotes electric vehicles. Over the plan period the sale of petrol / diesel vehicles will end (2030) and the transition toward alternatives, principally electric vehicles will require the delivery of necessary infrastructure, both in homes and across the network. The promotion of good growth should include a clear and proactive intent to deliver such infrastructure.

Amendment

- 2.9 Include reference within the supporting text to the delivery of electric vehicle related infrastructure as part of measures to address climate change.

Policy DS1 – Development in the Countryside

Representation

- 2.10 The policy should include an additional bullet that allows for employment related development that has a specific locational requirement, such as accessibility to the strategic road network.

- 2.11 In addition there should also be a wording amendment to bullet h), to recognise that certain infrastructure can have specific location requirements, which means that delivery is required within a countryside location.
- 2.12 Examples of such provision include facilities to serve the strategic road network (including electric vehicle charging stations) and to those forms of business where there are specific sustainable advantages to being close to roads (for example waste related activities).
- 2.13 The policy should provide sufficient flexibility to allow for due consideration to be given to infrastructure and commercial requirements and the way in which key climate change and wider sustainability can be achieved by accommodating appropriate development in the countryside. It is recognised that such uses may be limited in form, but the policy should acknowledge that such uses should be supported.

Amendment

- 2.14 Amend the policy to include reference to commercial and infrastructure based uses that have key locational requirements, such as proximity and accessibility to the strategic road network.

Policy DS3 - Landscape

Representation

- 2.15 The policy is well formed, but would benefit from specific recognition that there will be forms of development that have specific locational requirements. This may include growth in locations where change in the landscape is more sensitive to change. In such circumstances, there will be means through which impacts can be appropriately mitigated. To support this, the policy should include reference to supporting development where landscape impacts are being addressed through appropriately formed landscape strategies.

Amendment

- 2.16 Amend the policy to reflect that where there are landscape impacts associated with development, growth can still be supported provided an appropriate landscape strategy (including mitigation where required) is set out.

Chapter 6 - Employment

Representation

- 2.17 The approach to employment provision set out within Chapter 6 serves to faces adequately into the quantitative employment needs of the Borough over the plan period. However, there is a lack of recognition to key qualitative matters, including the need to support the demands of business that have specific location requirements and to those uses that may be displaced to accommodate other uses (particularly residential).
- 2.18 There will be businesses that demand locations that are well related to the strategic road network for example, or are for forms of development that are not well suited to

either residential areas or B1 based business locations. There does not appear to be a cogent evidence base to demonstrate how the needs of such users are to be accommodated.

- 2.19 By its nature, the quantitative approach to employment provision does not factor this in, with new employment provision being on a restricted number of sites, which are either distant from the strategic network or are focussed on office based uses. On existing sites, there has been a significant reduction of available provision as a consequence of redevelopment for other uses, particularly residential. This implication of these changes has not been addressed, with the needs of displaced uses being particularly acute.
- 2.20 To address this, the employment strategy should make specific allowance for the broad needs of business, with a positive and proactive approach to accommodating the genuine needs of economic development, with a presumption in favour of investment in employment generating development and associated infrastructure.

Amendment

- 2.21 Expand the employment section to include a policy that supports employment generating development (by way of presumption in favour) and recognises the specific location requirements of certain commercial uses, including those that have been displaced by the redevelopment of existing employment sites.

Policy E1 – Employment Land Provision

Representation

- 2.22 The policy is wholly focussed on a numerical approach to employment provision, with no reference to qualitative employment needs. In addition, the new employment allocations are highly restrictive in locational terms and provide limited scope for new growth in other parts of the Borough.
- 2.23 The policy should recognise the broader employment needs that will exist within the Borough across the plan period, to ensure that opportunities for new investment are not missed, or that the qualitative and location needs of businesses can be met.
- 2.24 In this regard, the policy should be expanded to recognise that the employment requirements should not be viewed as a maximum provision and that other opportunities for employment growth should not be frustrated unnecessarily. This should take the form of a general presumption in favour of employment generating development in suitable and sustainable locations.
- 2.25 In specific terms, consideration should be given to identifying land at J11 of the M27 (including Down Barn Farm) as an employment allocation. This site is well related to the strategic road network and provides a unique opportunity to accommodate users who are dependent upon such a location. The site is also well suited to accommodate users who are also ill suited to either a residential environment or a more traditional business park location. This is reflected by its current use by the Highways Agency as a

processing facility to support the implementation of the smart motorway improvements on the M27.

- 2.26 The merits of this location are not driven by the quantitative needs as set out within the plan, but the qualitative considerations described above. The site would be of particular interest to a number of existing business who are being displaced by other major developments in the wider South Hampshire context. This is a unique opportunity that the Local Plan should embrace either by way of a specific allocation, or by creating policies that allow due consideration to be given to such development should it come forward via a planning application.

Amendment

- 2.27 Amend the policy to reflect the comments above.

Chapter 8 – Climate Change

Representation

- 2.28 The climate change chapter has not been drafted with a full recognition of key consideration that are relevant to the promotion of climate change objectives. In particular, the failure to adequately reference the transition of petrol to electric vehicle based travel and its associated infrastructure needs is a major oversight.
- 2.29 The Government has committed to ending the sale of petrol and diesel vehicles by 2030, with all vehicles to be zero emission based by 2035. Both of these events are within the plan period and will require the delivery of appropriate home based and network based infrastructure.
- 2.30 It is noted that the broader plan includes policies that reference the need to integrate electric vehicle charging into new development, however, it is entirely silent on the needs to delivery supporting infrastructure across the wider transport network. This should be addressed by the provision of a specific policy within Chapter 8 that promotes the provision of key infrastructure that will support the transition of the highway network to net zero. This would include support for electric changing facilities in appropriate locations that are well related to the strategic road network.

Amendment

- 2.31 Include specific reference within the Chapter to the need to support the transition to a net zero highway network, with a specific policy that promotes the delivery of related infrastructure, including electric vehicle changing.

Policy CC1 – Climate Change

Representation

- 2.32 This policy is inadequate as it fails to recognise the importance of supporting the transition of road vehicles towards net zero, which will be a key consideration over the plan period if wider Government objectives are to be achieved.

Amendment

- 2.33 Amend the policy to include a bullet point that recognises the importance of infrastructure delivery associated with the transition of the road vehicles to net zero, including appropriate supporting infrastructure.

Policy CC4 – Renewable and Low Carbon Energy

Representation

- 2.34 This policy focuses exclusively on energy generating development. This is unnecessarily narrow, and indeed has been drafted in an overly negative way that fails to recognise the fundamental benefits associated with delivering such valuable forms of energy generation.
- 2.35 The policy should recognise that there will be infrastructure that serves to promote net zero, such as electric vehicles, which should be supported. This may sit in a policy of its own, but failing that, CC4 should be expanded to include the consideration of development proposals that deliver such infrastructure, but with a more generous presumption in favour of such development, rather than the overly restrictive approach that is currently cast within the policy.
- 2.36 This restrictive approach has been driven by the perception that uses such as solar farms and wind farms imply significant impacts (particularly visual). This is not the case of all forms of net zero and progressive technologies and the policy should make a clear distinction in that regard.

Amendment

- 2.37 Unless addressed in a policy of its own right, CC4 should be amended to include reference to other forms of infrastructure that promote net zero related technologies, such as electric vehicle charging. In making these amendments, the policy text should be recast to recognise that these technologies are different to those energy generating uses that are perceived to have significant visual impacts. This should be reflected by a general presumption in favour of the delivery of lower impact infrastructure.

Policy NE8 – Air Quality

Representation

- 2.38 The references within this policy to the promotion of electric vehicle charging infrastructure is welcomed. However, this is focussed exclusively on provision within new developments. This is insufficient to meet the infrastructure needs required to service the transition of petrol / diesel vehicles to net zero emissions based vehicles over the period to 2025.
- 2.39 Whilst home based infrastructure is appropriate, it does not address the key consideration of charging facilities within the wider highway network, particularly in terms of users who are travelling across the strategic road network where there is a substantive issue regarding the ability to recharge when on longer journeys or where access to home based infrastructure is not available.

- 2.40 In this respect, unless addressed elsewhere in the plan, policy NE8 should include provisions that support the delivery of electric vehicle charging infrastructure to serve the wider strategic road network.

Amendment

- 2.41 Amend the policy as suggested above.

Policy TIN1 – Sustainable Transport

Representation

- 2.42 This policy is premised on the basis of the promotion of non-car based means of travel. This is commendable but does not adequately recognise that the transition towards net zero emissions based vehicles will also make a valuable contribution towards more sustainable transport patterns. Given the timescales associated with this transition (over the period to 2035), there should be strong support within TIN1 to the delivery of infrastructure that enables this transition.

Amendment

- 2.43 Amend to include reference to the role of electric vehicles as a sustainable mode of transport and to provide support for appropriate infrastructure to facilitate their delivery.

Policy TIN4 – Infrastructure Delivery

Representation

- 2.44 This policy focuses wholly on ensuring that infrastructure that supports new development is delivered in a timely manner. This is supported but it fails to address the need for the delivery of wider infrastructure, particularly that which stems from the objectives set out within the Climate Change chapter (and also reflecting our representations on the policies in that chapter).
- 2.45 The policy should be broadened in its intent to incorporate a focus on ensuring that this wider infrastructure is delivered alongside new development to ensure that core climate change objectives are capable of being met. This implies an imperative to support the early delivery of such infrastructure within the early parts of the plan period.

Amendment

- 2.46 Amend to include reference to the timely delivery of wider infrastructure, particularly that which is crucial to supporting climate change related objectives.

3. Land at J11 of the M27 (inc Down Barn Farm)

- 3.1 The land at J 11 of the M27 comprises the land immediately adjacent to the motorway junction (to the north and north east) extending up to Boarhunt Road. The site currently accommodates a number of users, including a park & ride and strategic base for the Highways England in undertaking the smart motorway improvements that are currently underway.
- 3.2 A plan showing the location of the site is attached at Appendix One.
- 3.3 This site offers a unique opportunity to respond to a range of development needs, including those that require a location that is directly related to the strategic road network, or to accommodate users that are not well suited to either a residential environment or a business park.
- 3.4 A number of potential forms of development are appropriate for this location, including:
- Service facilities to serve the M27, including scope for an electric vehicle charging station.
 - Uses of a similar form to those that are currently in place to meet the needs of Highways England – such as processing of building / waste materials.
 - Displaced users who require relocation away from other sites that are being redeveloped for other uses or are allocated for such development. This is particularly relevant to locations such as Tipner where the sites development will require a number of business to relocate to alternative sites that meet their needs.
 - Other uses that require accessibility to the strategic road network.
- 3.5 The site can be developed in an appropriate manner, incorporating a strong landscape framework and measure to promote biodiversity gain. The ability of the site to accommodate significant development without giving rise to undue impacts is currently being demonstrated by the scale of existing activity on site.
- 3.6 Further details to support the promotion of the site in the manner outlined above are currently in preparation and we would welcome the opportunity to consider how the Local Plan can support its delivery.

Appendix 1: Land at J11 of the M27 (inc Down Barn Farm).

Para 3.10 The decision to “rewild” the Stubbington Strategic Gap was made without consultation with council officers or elected Members. Instead, this announcement came via a press release issued after the start of the Full Council meeting which was in the process of debating this Plan?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full decision needs to be made regarding the Stubbington Gap status

How would the modification(s) you propose make the Local Plan legally compliant or sound?

To include a consultation with Council Officers in order to decide on whether or not to "rewild" the Stubbington Gap

Your suggested revised wording of any policy or text:

The Stubbington Strategic Gap will be the subject of a Consultation by Council Officers. A decision over how allocations may be allowed in this area versus a complete "rewild" exercise will be concluded.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Richard Jarman (1712-211841)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The decision to “rewild” the Stubbington Strategic Gap was made without consultation with council officers or elected Members. Instead, this announcement came via a press release issued after the start of the Full Council meeting which was in the process of debating this Plan?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reconsider the re-wilding or the Stubbington gap. Why couldn't Warsash have this designation instead, and the building commence at Stubbington?

How would the modification(s) you propose make the Local Plan legally compliant or sound?

I would allow a full consultation on the options available, instead of choosing the most convenient

Your suggested revised wording of any policy or text:

I have no revised wording - I am not a lawyer or town planner

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mrs Iris Grist (312-341014)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Figure 3.1 quite clearly shows site HA4 to be in the countryside, yet the report says that there are no development allocations in these areas. Site HA4 is on the slopes of Porstdown Hill, and outside of the urban area and settlement boundaries. Council is trying to have it both ways, just to get their umbers up. The railway line is a very clear boundary.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Give everyone a paper copy

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Tell the truth about where the countryside starts

Your suggested revised wording of any policy or text:

Most of what is written about Portsdown Hill is misleading, as it talks a lot about the northern side, which is completely irrelevant, as most of that is in Winchester's area.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

	Legally compliant	Sound	Complies with the duty to co operate
Total	1	1	1
Yes	0 0%	0 0%	0 0%
No	1 100%	1 100%	1 100%

Respondent: Mr Russ Wright (1712-17936)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The LPA has relied on a recently-proposed (but not adopted) Central Government algorithm for deciding where houses should be located. As this has now been updated, with an emphasis on brownfield sites and sites in the North and the Midlands, the LPA needs to revise its methodology and calculations for Housing Needs in the Borough as a whole and in particular in strategic sites such as within Warsash and the Western Wards.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should use the latest methodology for calculating Objectively Assessed Housing Need in line with Central Government Policy

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Plan should implement the new algorithms for calculating Housing Need

Your suggested revised wording of any policy or text:

Not Applicable - The Local Plan needs to be completely revised to incorporate the Government's latest Standard methodology for calculating Housing Needs in the Borough

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Policies map: HOUSING ALLOCATIONS (HA1, HA3-4, HA7, HA9-10, HA12-13, HA15, HA17, HA19, HA22-24, HA26-44)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Legally Compliant: FBC have not engaged sufficiently with the local community since 2017 and have repeatedly ignored responses from the community, including protest marches and a petition with sufficient signatures for a debate. The distribution of housing across the borough is disproportionate. There has been an overall reduction in the number of houses allocated across the borough, however the number of houses for HA1 has remained the same. This has resulted in an increase in the proportion of houses allocated to HA1 relative the remainder of the borough. The local plan does not comply with the Habitats Directive. Housing on this site will not improve the integrity of designated sites. It is not clear that FBC is applying advice from Natural England correctly. Sound: HA1 is a Greenfield site. FBC are re-designating it for their own convenience. There is insufficient infrastructure to support the scale of development planned by FBC for HA1. Insufficient analysis has been done to take into account the traffic implications of 1500-2000 additional cars. Complies with Duty to Cooperate: The deal that FBC made regarding the Stubbington Strategic Gap does not appear to have been properly discussed and debated. The process is opaque.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

FBC should have qualified people prepare a plan based on proper investigation and analysis. The number of houses allocated across the borough should be proportionate and investment in infrastructure made. New housing should not be built on greenfield sites and the council should not be arbitrarily re-classifying greenfield as brownfield. Development should be looked at holistically rather than piecemeal developments by individual developers. Much more thought needs to be applied to the Nitrates issue and ensuring compliance with the advice of Natural England.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

All of the objections made would be addressed.

Your suggested revised wording of any policy or text:

All of the related points above would need to be re-worded.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

J11 M27 – Down Barn Farm, Fareham

Representations on the Fareham Borough Local
Plan to 2037

Submitted on behalf of Graham Moyse

December 2020

Contents

1.	Introduction	1
2.	Representations	3
3.	Land at J11 of the M27 (inc Down Barn Farm)	10

Appendix 1:	Land at J11 of the M27 (inc Down Barn Farm).	11
-------------	--	----

Stuart Irvine

Client

Graham Moyse

December 2020

1. Introduction

- 1.1 Turley are instructed by Graham Moyle to prepare representations in respect of the Fareham Local Plan 2037 – Regulation 19 Submission Draft.
- 1.2 Graham Moyle owns land in the vicinity of Junction 11 of the M27 (known as Down Barn Farm) and as a local farmer and entrepreneur, oversees a number of valued local businesses.
- 1.3 The primary purpose of the representations is to shape the policies of the Local Plan to support the aspirations of Graham Moyle in respect of the potential that exists at Down Barn Farm.
- 1.4 The representations have been set out in Section 2 of this report and have also been submitted individually on the relevant representation forms.
- 1.5 Section 3 sets out some initial details of the potential that exists on the land at J11 of the M27 (including Down Barn Farm). Whilst these proposals are still at a formative stage, that they offer an exciting and unique opportunity to address two key development concepts, namely:
 - A dedicated electric vehicle service station and associated facilities
 - A location to accommodate business / infrastructure users that require proximity to the strategic road network
- 1.6 The location of the site at Junction 11 of the M27 is well suited to respond to such uses given its accessibility to the motorway network and its proximity to key urban areas.
- 1.7 Whilst the broad principles of the emerging Local Plan are supported, it is our view that there are two substantive omissions in terms of its content, namely:
 - Insufficient recognition is given to the need to provide infrastructure to support the growth of electric vehicle usage (including specific allocations for such facilities); and
 - There has been a failure to recognise the need for specific employment provision to accommodate users who need a high level of accessibility and are of form that is not well suited to being within the built up environment.
- 1.8 These principles are drawn out through the representation in Section 2.0, with the conclusions that:
 - The wording of several policies should be amended to more fully recognise the importance of electric vehicles and to provide support to the delivery of infrastructure that is necessary to support the establishment and growth of the electric vehicle network over the lifetime of the Local Plan.

- Greater recognition should be given within the relevant employment policies, to supporting growth in locations, such as the land at J11 of the M27, where they respond to the specific needs of users.

2. Representations

2.1 Representations have been made in respect of the following chapters, paragraphs and policies of the plan.

- Paragraph 2.10 – Fareham Local Plan 2037 Vision
- Paragraph 2.12 – Strategic Priorities
- Paragraphs 3.4 / 3.5 – Good Growth
- Policy DS1 – Development in the Countryside
- Policy DS3 – Landscape
- Chapter 6 – Employment
- Policy E1 – Employment Land Provision
- Chapter 8 – Climate Change
- Policy CC1 – Climate Change
- Policy CC4 – Renewable and Low Carbon Energy
- Policy NE8 – Air Quality
- Policy TIN1 – Sustainable Transport
- Policy TIN4 – Infrastructure Delivery

2.2 Each representation is by its nature an objection and consideration has been given in respect of each as to how the plan could be amended to overcome the objection.

2.3 In addition to the representations being set out below, each has also been submitted on an individual objection form.

Paragraph 2.10 - Fareham Local Plan 2037 Vision

Representation

2.4 The vision is supported in general terms. However, its failure to include reference to supporting measures to address climate change is a significant oversight. Making provision for the necessary infrastructure within the Borough to support changing technologies is fundamental to addressing climate change. There are substantive changes, such as the transition of petrol to electric vehicles, which will take effect over the plan period, and the vision should reflect the need to deliver appropriate infrastructure to support that change.

Amendment

- 2.5 Add an additional statement to confirm that the Local Plan will promote the delivery of infrastructure to support infrastructure delivery that is relevant to address the climate change agenda.

Paragraph 2.12 – Strategic Priorities

Representation

- 2.6 Whilst there is a strategic priority relating the climate change, it fails to recognise the need for and importance of infrastructure delivery to support key aspects such as the transition from a road network that is dominated by petrol based vehicles to one where electric vehicles are the primary vehicle mode. This transition will take place over the life of the plan period and there is a need to promote both home and network based facilities to enable this to take place. A failure to specifically reference this as a strategic priority is a clear oversight.

Amendment

- 2.7 Amend strategic priority number 11 to make specific reference to the provision of infrastructure to supports electric vehicles changing, both at home and across the highway network.

Paragraphs 3.4 / 3.5 – Good Growth

Representation

- 2.8 The concept of good growth should be extended to make specific reference to highway network related infrastructure that promotes electric vehicles. Over the plan period the sale of petrol / diesel vehicles will end (2030) and the transition toward alternatives, principally electric vehicles will require the delivery of necessary infrastructure, both in homes and across the network. The promotion of good growth should include a clear and proactive intent to deliver such infrastructure.

Amendment

- 2.9 Include reference within the supporting text to the delivery of electric vehicle related infrastructure as part of measures to address climate change.

Policy DS1 – Development in the Countryside

Representation

- 2.10 The policy should include an additional bullet that allows for employment related development that has a specific locational requirement, such as accessibility to the strategic road network.

- 2.11 In addition there should also be a wording amendment to bullet h), to recognise that certain infrastructure can have specific location requirements, which means that delivery is required within a countryside location.
- 2.12 Examples of such provision include facilities to serve the strategic road network (including electric vehicle charging stations) and to those forms of business where there are specific sustainable advantages to being close to roads (for example waste related activities).
- 2.13 The policy should provide sufficient flexibility to allow for due consideration to be given to infrastructure and commercial requirements and the way in which key climate change and wider sustainability can be achieved by accommodating appropriate development in the countryside. It is recognised that such uses may be limited in form, but the policy should acknowledge that such uses should be supported.

Amendment

- 2.14 Amend the policy to include reference to commercial and infrastructure based uses that have key locational requirements, such as proximity and accessibility to the strategic road network.

Policy DS3 - Landscape

Representation

- 2.15 The policy is well formed, but would benefit from specific recognition that there will be forms of development that have specific locational requirements. This may include growth in locations where change in the landscape is more sensitive to change. In such circumstances, there will be means through which impacts can be appropriately mitigated. To support this, the policy should include reference to supporting development where landscape impacts are being addressed through appropriately formed landscape strategies.

Amendment

- 2.16 Amend the policy to reflect that where there are landscape impacts associated with development, growth can still be supported provided an appropriate landscape strategy (including mitigation where required) is set out.

Chapter 6 - Employment

Representation

- 2.17 The approach to employment provision set out within Chapter 6 serves to faces adequately into the quantitative employment needs of the Borough over the plan period. However, there is a lack of recognition to key qualitative matters, including the need to support the demands of business that have specific location requirements and to those uses that may be displaced to accommodate other uses (particularly residential).
- 2.18 There will be businesses that demand locations that are well related to the strategic road network for example, or are for forms of development that are not well suited to

either residential areas or B1 based business locations. There does not appear to be a cogent evidence base to demonstrate how the needs of such users are to be accommodated.

- 2.19 By its nature, the quantitative approach to employment provision does not factor this in, with new employment provision being on a restricted number of sites, which are either distant from the strategic network or are focussed on office based uses. On existing sites, there has been a significant reduction of available provision as a consequence of redevelopment for other uses, particularly residential. This implication of these changes has not been addressed, with the needs of displaced uses being particularly acute.
- 2.20 To address this, the employment strategy should make specific allowance for the broad needs of business, with a positive and proactive approach to accommodating the genuine needs of economic development, with a presumption in favour of investment in employment generating development and associated infrastructure.

Amendment

- 2.21 Expand the employment section to include a policy that supports employment generating development (by way of presumption in favour) and recognises the specific location requirements of certain commercial uses, including those that have been displaced by the redevelopment of existing employment sites.

Policy E1 – Employment Land Provision

Representation

- 2.22 The policy is wholly focussed on a numerical approach to employment provision, with no reference to qualitative employment needs. In addition, the new employment allocations are highly restrictive in locational terms and provide limited scope for new growth in other parts of the Borough.
- 2.23 The policy should recognise the broader employment needs that will exist within the Borough across the plan period, to ensure that opportunities for new investment are not missed, or that the qualitative and location needs of businesses can be met.
- 2.24 In this regard, the policy should be expanded to recognise that the employment requirements should not be viewed as a maximum provision and that other opportunities for employment growth should not be frustrated unnecessarily. This should take the form of a general presumption in favour of employment generating development in suitable and sustainable locations.
- 2.25 In specific terms, consideration should be given to identifying land at J11 of the M27 (including Down Barn Farm) as an employment allocation. This site is well related to the strategic road network and provides a unique opportunity to accommodate users who are dependent upon such a location. The site is also well suited to accommodate users who are also ill suited to either a residential environment or a more traditional business park location. This is reflected by its current use by the Highways Agency as a

processing facility to support the implementation of the smart motorway improvements on the M27.

- 2.26 The merits of this location are not driven by the quantitative needs as set out within the plan, but the qualitative considerations described above. The site would be of particular interest to a number of existing business who are being displaced by other major developments in the wider South Hampshire context. This is a unique opportunity that the Local Plan should embrace either by way of a specific allocation, or by creating policies that allow due consideration to be given to such development should it come forward via a planning application.

Amendment

- 2.27 Amend the policy to reflect the comments above.

Chapter 8 – Climate Change

Representation

- 2.28 The climate change chapter has not been drafted with a full recognition of key consideration that are relevant to the promotion of climate change objectives. In particular, the failure to adequately reference the transition of petrol to electric vehicle based travel and its associated infrastructure needs is a major oversight.
- 2.29 The Government has committed to ending the sale of petrol and diesel vehicles by 2030, with all vehicles to be zero emission based by 2035. Both of these events are within the plan period and will require the delivery of appropriate home based and network based infrastructure.
- 2.30 It is noted that the broader plan includes policies that reference the need to integrate electric vehicle charging into new development, however, it is entirely silent on the needs to delivery supporting infrastructure across the wider transport network. This should be addressed by the provision of a specific policy within Chapter 8 that promotes the provision of key infrastructure that will support the transition of the highway network to net zero. This would include support for electric changing facilities in appropriate locations that are well related to the strategic road network.

Amendment

- 2.31 Include specific reference within the Chapter to the need to support the transition to a net zero highway network, with a specific policy that promotes the delivery of related infrastructure, including electric vehicle changing.

Policy CC1 – Climate Change

Representation

- 2.32 This policy is inadequate as it fails to recognise the importance of supporting the transition of road vehicles towards net zero, which will be a key consideration over the plan period if wider Government objectives are to be achieved.

Amendment

- 2.33 Amend the policy to include a bullet point that recognises the importance of infrastructure delivery associated with the transition of the road vehicles to net zero, including appropriate supporting infrastructure.

Policy CC4 – Renewable and Low Carbon Energy

Representation

- 2.34 This policy focuses exclusively on energy generating development. This is unnecessarily narrow, and indeed has been drafted in an overly negative way that fails to recognise the fundamental benefits associated with delivering such valuable forms of energy generation.
- 2.35 The policy should recognise that there will be infrastructure that serves to promote net zero, such as electric vehicles, which should be supported. This may sit in a policy of its own, but failing that, CC4 should be expanded to include the consideration of development proposals that deliver such infrastructure, but with a more generous presumption in favour of such development, rather than the overly restrictive approach that is currently cast within the policy.
- 2.36 This restrictive approach has been driven by the perception that uses such as solar farms and wind farms imply significant impacts (particularly visual). This is not the case of all forms of net zero and progressive technologies and the policy should make a clear distinction in that regard.

Amendment

- 2.37 Unless addressed in a policy of its own right, CC4 should be amended to include reference to other forms of infrastructure that promote net zero related technologies, such as electric vehicle charging. In making these amendments, the policy text should be recast to recognise that these technologies are different to those energy generating uses that are perceived to have significant visual impacts. This should be reflected by a general presumption in favour of the delivery of lower impact infrastructure.

Policy NE8 – Air Quality

Representation

- 2.38 The references within this policy to the promotion of electric vehicle charging infrastructure is welcomed. However, this is focussed exclusively on provision within new developments. This is insufficient to meet the infrastructure needs required to service the transition of petrol / diesel vehicles to net zero emissions based vehicles over the period to 2025.
- 2.39 Whilst home based infrastructure is appropriate, it does not address the key consideration of charging facilities within the wider highway network, particularly in terms of users who are travelling across the strategic road network where there is a substantive issue regarding the ability to recharge when on longer journeys or where access to home based infrastructure is not available.

- 2.40 In this respect, unless addressed elsewhere in the plan, policy NE8 should include provisions that support the delivery of electric vehicle charging infrastructure to serve the wider strategic road network.

Amendment

- 2.41 Amend the policy as suggested above.

Policy TIN1 – Sustainable Transport

Representation

- 2.42 This policy is premised on the basis of the promotion of non-car based means of travel. This is commendable but does not adequately recognise that the transition towards net zero emissions based vehicles will also make a valuable contribution towards more sustainable transport patterns. Given the timescales associated with this transition (over the period to 2035), there should be strong support within TIN1 to the delivery of infrastructure that enables this transition.

Amendment

- 2.43 Amend to include reference to the role of electric vehicles as a sustainable mode of transport and to provide support for appropriate infrastructure to facilitate their delivery.

Policy TIN4 – Infrastructure Delivery

Representation

- 2.44 This policy focuses wholly on ensuring that infrastructure that supports new development is delivered in a timely manner. This is supported but it fails to address the need for the delivery of wider infrastructure, particularly that which stems from the objectives set out within the Climate Change chapter (and also reflecting our representations on the policies in that chapter).
- 2.45 The policy should be broadened in its intent to incorporate a focus on ensuring that this wider infrastructure is delivered alongside new development to ensure that core climate change objectives are capable of being met. This implies an imperative to support the early delivery of such infrastructure within the early parts of the plan period.

Amendment

- 2.46 Amend to include reference to the timely delivery of wider infrastructure, particularly that which is crucial to supporting climate change related objectives.

3. Land at J11 of the M27 (inc Down Barn Farm)

- 3.1 The land at J 11 of the M27 comprises the land immediately adjacent to the motorway junction (to the north and north east) extending up to Boarhunt Road. The site currently accommodates a number of users, including a park & ride and strategic base for the Highways England in undertaking the smart motorway improvements that are currently underway.
- 3.2 A plan showing the location of the site is attached at Appendix One.
- 3.3 This site offers a unique opportunity to respond to a range of development needs, including those that require a location that is directly related to the strategic road network, or to accommodate users that are not well suited to either a residential environment or a business park.
- 3.4 A number of potential forms of development are appropriate for this location, including:
- Service facilities to serve the M27, including scope for an electric vehicle charging station.
 - Uses of a similar form to those that are currently in place to meet the needs of Highways England – such as processing of building / waste materials.
 - Displaced users who require relocation away from other sites that are being redeveloped for other uses or are allocated for such development. This is particularly relevant to locations such as Tipner where the sites development will require a number of business to relocate to alternative sites that meet their needs.
 - Other uses that require accessibility to the strategic road network.
- 3.5 The site can be developed in an appropriate manner, incorporating a strong landscape framework and measure to promote biodiversity gain. The ability of the site to accommodate significant development without giving rise to undue impacts is currently being demonstrated by the scale of existing activity on site.
- 3.6 Further details to support the promotion of the site in the manner outlined above are currently in preparation and we would welcome the opportunity to consider how the Local Plan can support its delivery.

Appendix 1: Land at J11 of the M27 (inc Down Barn Farm).

Executive Summary

Local Plans should be prepared to contribute to the achievement of sustainable development. They should be positively prepared and seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. As the starting point, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas. These requirements exist within the context of the Government's now longstanding objective to significantly boost the supply of homes.

The Regulation 19 Plan, which is meant to be the Plan the Council intends to submit for Examination, is not founded on the Government's published Standard Method as required by the NPPF and NPPG.

Rather, the Council has alighted upon the possible outcome of a Government consultation document and has based the Development Strategy, Policy H1 and the strategy to meet housing needs on this lower level of housing. This is manifestly unsound.

The fact that the Council do not intend to submit its plan until there is certainty as to a change to the Standard Method does not mitigate the cost of conducting this consultation to the public purse or unnecessary expenditure by other public and private bodies. Moreover, this approach plainly risks undermining public confidence in the plan-led system, if, as is possible, the housing requirement has to be increased. The Council has simply acted prematurely in seizing upon a consultation document that suggests a lower housing requirement; this may be expedient but is the antithesis of positive planning. Put simply, there is no basis for the Council to have formed this consultation document at the present time.

In the event that the Government decides not to proceed with its amendment to the Standard Method, or that such an amendment results in a different outcome for Fareham, the Council will need to further amend the plan. In that instance, a wholly new consultation exercise would be required given the likely magnitude of amendments that would be necessary, adding further delay to the plan-making process, and cost to the public purse and to interested parties, whilst, regrettably, undermining confidence in the Local Plan process.

Moreover, the Council has not recognised the context within which this Plan is being prepared. Housing delivery relative to the Core Strategy has resulted in a substantial shortfall in new housing over past years and this Plan provides an opportunity for positive and ambitious planning to ensure development needs are met and the principles of good growth are achieved. The Plan fails in this regard.

The Council purports to make a contribution towards meeting the unmet need of its neighboring authorities; however, this does not reflect the scale of the unmet needs identified by the Partnership for South Hampshire (PFSH) of over 10,000 homes. It is not at all apparent that this Plan is founded on constructive, active and on an ongoing engagement as required by Section 33A.

It is instructive that whilst Welborne was identified to provide housing to meet sub-regional requirements, its role has now changed to meeting the Borough's housing needs first and foremost;

consequently this Plan makes a significantly lower contribution to the wider sub-regional needs which plainly have not diminished.

Furthermore, the Plan has exaggerated the likely housing supply from Welborne and other sources to such an extent that a shortfall in housing supply is inevitable.

The Plan overlooks the opportunity provided by the previously identified Strategic Growth Area at South Fareham which would make an important contribution to housing supply in the short term and providing surety of supply over the longer term. The suitability of this location is apparent from the Council's evidence base; it is accessible to the Borough's main urban area, it is not an area that is sensitive in landscape terms, development can be accommodated without undermining the principle of separation between Fareham and Stubbington, there are no environmental designations that preclude development and the transport modelling and its' conclusions has assumed development in this location. A development scheme in this location can also deliver nitrate neutrality and biodiversity net gain. Development to the South of Fareham can achieve *Good Growth*.

Unfortunately, the Sustainability Appraisal does not consider higher levels of growth consistent with the January 2020 Local Plan Supplement, and, as such, fails to consider a reasonable alternative.

The following Modifications are considered necessary for the Local Plan to be sound:

- The minimum housing requirement should be defined by reference to the existing Standard Method;
- The housing requirement should be increased further to take account of the low level of completions from 2018 onwards compared to the level of local housing need;
- The level of unmet need that is accommodated should be based on constructive, active and on ongoing engagement with neighbouring authorities;
- Assumptions about the delivery of new housing at Welborne should be revisited and revised down;
- The windfall allowance should be revised down;
- Alternatively, the level of contingency should be increased;
- Additional housing allocations should be provided for;
- Land South of Fareham should be allocated for housing development; and
- Separate from the allocation of land South of Fareham, the boundary of the Strategic Gap south of Longfield Avenue and west of HMS Collingwood should be amended so as not to include the land identified by the Borough Council's *Technical Assessment* that is not considered integral to the Gap function.
- The designation associated with Waders and Brent Geese on the Policies Map should be altered with consequential changes to Policy NE5.

1 Introduction

- 1.1 Hallam Land Management Limited ('Hallam') control a substantial tract of land to the South of Fareham, south of Longfield Avenue, west of HMS Collingwood and adjoining the Stubbington Bypass, the construction of which has recently commenced.
- 1.2 In successive representations to the Local Plan Review we have draw attention to the merits and advantages of locating development to the South of Fareham and how this would achieve the Borough Council's objective of *Good Growth*.
- 1.3 In the January 2020 Local Plan Supplement, this land, along with other parcels in this location, was identified by the Borough Council as a potential Strategic Growth Area.
- 1.4 In the current consultation document, such an allocation has not been carried forward.
- 1.5 On this occasion, the Borough Council's has alighted upon the possible revision to the Government's Standard Method for assessing local housing need, which suggests a lower level of housing for Fareham.
- 1.6 In our opinion, the Borough Council are wrong to have published this consultation document in this form given the status of this version of the Plan is afforded by the Local Plan Regulations; *the Plan a Local Planning Authority intends to submit for Examination*. To have based a Plan on the possible outcome of a Government consultation is plainly premature and, regrettably, the Plan's housing strategy is not positively prepared and is unsound.
- 1.7 The Plan's housing strategy is not an effective one. It has no regard to past performance relative to the objective assessment of housing need and the level of contingency is not sufficient when the likely delivery of Welbourne is viewed objectively. Over the plan period a significant shortfall in new housing is inevitable.
- 1.8 For the reasons given in this representation, additional housing land should be allocated in Policy H1.
- 1.9 Land South of Fareham is an eminently suitable and sustainable location for future development and should be identified accordingly. In the context of the Borough Council's *Good Growth* principles that underpin the Plan's Development Strategy, Hallam's development proposals achieve the high-level development principles and requirements set out in the Local Plan Supplement which remain entirely appropriate.
- 1.10 It is especially significant that the Borough Council's assessment of Strategic Gaps has drawn the conclusion that new development can be located south of Longfield Avenue without harming the integral purpose of this earlier designation. We agree with this conclusion, which accords with our previous submissions that carefully planned development will not result in the coalescence of Fareham and Stubbington and that the separate identities of these settlements can be retained.
- 1.11 Development at South Fareham can be brought forward to provide new homes, associated community and commercial facilities within an overall scheme that provides accessible green infrastructure and open space that will enable residents and visitors to experience a high quality

of life and well-being. The accessibility of this location can be capitalised upon with investment in new sustainable and active modes of travel. By locating new development here, valued landscapes and natural environments will be preserved.

- 1.12 As such, and for the reasons given herein, the previous potential Strategic Growth Area at South Fareham should have been retained in the Local Plan for future development.
- 1.13 In our representations in the following Sections we set out that, whilst the Plan's Vision and Strategic Priorities are correct, absent amendments to Policy H1, this version of the Local Plan will not provide sufficient housing and this will run counter to its stated intention to address housing needs by the end of the plan period.

2 Vision and Strategic Priorities

- 2.1 In this Section of our representations we consider the consultation document's Vision and the Strategic Priorities that the Borough Council has identified. It is instructive to consider the extent to which the Plan's policies and proposals will, in practice, contribute towards this Vision being realised and the Strategic Priorities being met, in the context of what the NPPF's anticipates of a Local Plan.

National Planning Policy Framework

- 2.2 Para 15 of the NPPF requires that each Local Plan should provide a positive vision for the future of its area; a framework for addressing housing needs and other economic, social and environmental priorities. (emphasis added)
- 2.3 Para 17 requires that a Local Plan includes strategic policies to address the local authority's priorities for the development and the use of land in its area.
- 2.4 Para 20 states that strategic policies should set out the overall strategy for the pattern, scale and quality of development, and make provision for, *inter alia*, housing, employment, retail, leisure and other commercial development, infrastructure, community facilities and conservation and enhancement of the environment.
- 2.5 Para 22 states that strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure.
- 2.6 Para 23 states that strategic policies should provide a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development. This should include planning for and allocating sufficient sites to deliver the strategic priorities of the area.
- 2.7 In the context of plan making making, the NPPF's presumption in favour of sustainable development is framed in the following terms:
- a. *plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
 - b. *strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:*
 - i. *the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - ii. *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.*
- 2.8 In this context, it is important to recognise the significance of the Regulation 19 stage in the plan-making process. This is the Plan the Borough Council intends to submit to the Secretary of

State for the purpose of Examination pursuant to Section 20 of the Act. This is explained in the NPPG *"The publication stage plan should be the document that the local authority considers ready for examination"*. Therefore, this is the Plan and the approach to meeting objectively assessed need that the Borough Council now consider appropriate.

- 2.9 But, as the Borough Council has suggested it won't decide whether or not to submit the Plan until it knows the outcome of the Government's review of the Standard Method, this is little more than a "wait and see" approach. This is plainly wrong given the importance of the plan-led system in overall terms, the alacrity with which an up-to-date Local Plan is needed in Fareham, and the need to maintain public confidence in the plan-making system generally.
- 2.10 As will be shown later, the practical difference between a housing strategy based of 520 dwellings per annum and 403 dwellings per annum is an 'end date' five years hence. When viewed in the context of providing surety over the longer term and the emphasis in the NPPF on exceeding the minimum requirement, adopting a higher growth level at this stage would have been the positive and responsible response to this circumstance.

The Vision

- 2.11 The Borough Council's Vision as set out in the consultation document intends that it:
- *"will accommodate development to address the need for new homes and employment space in Fareham Borough; and*
 - *new housing will address the particular needs in the Borough, such as our growing housing need and an ageing population and creating attractive places to live".*
- 2.12 The Vision is framed by reference to the Borough's needs, whereas Fareham is part of the established Partnership for Urban Southampton and has a role in contributing to meeting the housing needs of the sub-region. Indeed, there is no reference to Fareham's sub-regional role on any of the text associated with the Vision and Strategic Priorities in Section 2 of the Plan. In this context, the Vision should be drawn more widely.
- 2.13 Significantly, the allocation at Welborne in the Core Strategy was specifically for a sub-regional purpose, but its role by the present time appears to have been recast entirely; a matter we return to later.
- 2.14 Without prejudice to the above, achieving any Vision requires policies and proposals that are genuinely aligned with it. In respect of housing, the outcome of the Local Plan's policies and proposals should be that the Borough's housing needs are met.
- 2.15 As such, the Local Plan must, first, establish the correct strategic housing requirement in Policy H1 i.e. the overall number of new homes that need to be built by 2037 and, second, ensure a housing supply strategy that has the necessary surety that this can be achieved.
- 2.16 What experience both in Fareham and elsewhere has shown is that there must be an element of theoretical overprovision as part of the housing strategy to ensure that sufficient new housing is built.
- 2.17 To an extent the consultation document recognises this, but, as will be shown, it significantly

misjudges housing supply to such an extent that it undermines achievement of the Vision.

2.18 Conversely had a positive approach to plan-making been adopted, the Local Plan would have provided a robust planning strategy for the Borough.

Strategic Priorities

2.19 In the context of the Vision, the first Strategic Priority is to:

- *address the housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.*

2.20 Again, there is no reference to Fareham's wider sub-regional role. In the context of Section 33A of the Planning and Compulsory Purchase Act, which requires constructive and active engagement on strategic matters, this is a surprising omission.

2.21 Without prejudice to this point, as a matter of principle, such a strategic objective is soundly based and is aligned with the significant importance the Government attaches to housing provision. Such a Strategic Priority is universally found in Local Plans national-wide.

2.22 However, in this instance, the apparent driver to the Publication Draft has been an attempt to reduce the scale of housing provision despite the Vision and Strategic Priority. This is the only conclusion that can be drawn from the Council having based its Regulation 19 Plan on a consultation document concerning a potential revision to the Standard Method.

2.23 This approach is plainly not sound for the following reasons:

2.24 Firstly, it departs from the method of calculating local housing need set out in para 60 of the NPPF. No exceptional circumstance has been suggested other than a lower figure is derived from the potential revision to the Standard Method. In a recent comment the Planning Minister referred to outputs based on the consultation exercise as "*entirely speculative*".

2.25 Secondly, even if that figure is correct, it is in no way obvious how the wider needs of the sub-region are to be met; across the wider geographic area as a whole the level of local housing need is suggested to be greater than has hitherto been the case.

2.26 Thirdly, the approach to housing supply significantly overstates likely housing delivery and the scale of contingency is simply not sufficient to ensure future housing supply would meet identified need.

2.27 The inevitable conclusion is that this version of the Local Plan is not positively prepared, justified, effective or consistent with national policy. Therefore, whilst the Plan may have a clear strategic priority to address the need for new homes in the Borough, its subsequent policy to base the strategic housing requirement of 403 dwellings per annum means, when considered objectively, that it fails to do so. To consciously plan for 20% less housing than has been identified firstly as necessary, and secondly as capable of being accommodated, is not properly addressing the need for new homes in the Borough.

2.28 In short, the Plan provides for too few houses over the plan period. This in turn will give rise to

adverse effects. It will restrict the number of people who are able to purchase new housing from doing so and constrain the operation of the housing market. It will also reduce the amount of affordable housing that is built because that is a proportion of the overall amount of housing. Moreover, by restricting market housing it creates an additional and greater incidence of housing need as people who would otherwise have been able to buy a market home are prevented from and they fall into housing need. This will have harmful socio-economic effects and runs counter to the Vision to meet the Borough's housing need.

2.29 For these reasons, the consultation document is not soundly based.

3 Development Strategy

- 3.1 The preceding Section has considered the Regulation 19 Plan's Vision and Strategic Priorities as they relate to housing provision and has identified that, as a practical effect, its policies and proposal will not deliver the intended outcome in terms of meeting housing need by the end of the plan period. In this Section, we consider the proposed Development Strategy and the extent to which it could accommodate a greater level of development if necessary.
- 3.2 The Plan's Development Strategy, set out on pages 17 – 32, and its associated Key Diagram and more detailed Policies Map, are framed by the Borough Council's approach to housing provision. This is evident from comparing the direction of travel outlined in the January 2020 Local Plan Supplement based on the published Standard Method and which identified the need for Strategic Areas of Growth to be allocated for future development, and the present approach which includes very few new housing allocations.
- 3.3 In the event the Borough Council has to re-cast its approach to housing provision, it will also need to adjust its Development Strategy in order to be able to deliver the strategic objective to address housing need. In this regard, it is of note that para 3.5 of the consultation document acknowledges that *"the [Local Plan] Supplement consultation in early 2020 identified the Council's preferred approach to its Development Strategy which it proposes to use to guide the focus of development until at least 2037"*. This clearly illustrates the suitability of the Strategy at that time as the basis of plan-making presently.
- 3.4 In the following paragraphs we comment on the various elements of the Council's Development Strategy both as articulated presently but also in the context of a revised housing strategy which would require additional land to be identified for development in the plan period.

Good Growth

- 3.5 The 2019 Issues and Options consultation established the principle of **Good Growth** as the keystone for the Local Plan's Development Strategy.
- 3.6 *Good Growth* was defined in the 2020 Local Plan Supplement in the following terms:
- building homes and creating employment spaces in such a way as to improve the quality of life whilst protecting the most valued and natural historic environments.
 - respecting environmental protections and delivering opportunities for environmental gain, providing opportunities for reduced energy demand and waste production, whilst sensitively managing the countryside and valued landscapes.
 - providing open space and leisure opportunities to encourage healthy and active lifestyles and encouraging more of us to use active forms of travel rather than the car.
- 3.7 This definition has been retained in the Regulation 19 Plan.
- 3.8 These principles exist within an overarching scale of development that the Borough will need to provide for over the plan period. It is of paramount importance that, in the context of the Plan's Vision and Strategic Priorities, this scale of development is correctly defined at the outset; only then can it be said the Plan will address housing and employment needs adequately.

appropriately and sustainably. If the housing requirement is drawn too low, it will have negative social and economic effects.

- 3.9 It follows that, at the plan-making stage, the Local Plan is able to set out strategic and development management policies that have *Good Growth* principles at their core; both in terms of determining which locations in the Borough are to be allocated for new development and then the form and nature of such development.
- 3.10 The ensuing Land Use Strategy should prioritise locations that are able to achieve the principles of *Good Growth*, albeit there are instances where there are competing interest and, as with all planning decisions, balanced judgements will be necessary.

Development Strategy

- 3.11 This Section of the Regulation 19 Plan describes the factors that the Council has used to determine its Development Strategy. Because of the range of considerations that are inputted to, and then flow from this, what the Plan is actually describing is its land use strategy, namely where development is acceptable and conversely where factors determine new development would not be appropriate and other considerations are more important.

Landscape and countryside

- 3.12 We agree that there are parts of the Borough which have a fundamental importance in landscape terms and it is right that preservation of the landscape in those locations is the principal consideration. Figure 3.1 which illustrates the Key Diagram identifies "Areas of Special Landscape Quality" and we agree with the designation of the areas shown in this regard. Policy DS3, which we comment on later, should be worded to ensure that preserving the special landscape quality of these areas is given primacy.

Settlement boundaries

- 3.13 Settlement boundaries delineated in earlier development plans were drawn in the context of development needs as determined at that time.
- 3.14 Where the scale of development cannot be met on land within the Borough's urban area, development in the countryside adjoining main settlements is a wholly necessary and legitimate proposition.
- 3.15 As a consequence of allocating land for development to meet identified needs, settlement boundaries can and should be amended accordingly. In short, the existing settlement boundaries are not immutable.

The desire to respect settlement identity

- 3.16 Given that Areas of Special Landscape Quality have been assessed and delineated on the Key Diagram it is also necessary to consider whether land identified in the current Development Plan as Strategic Gap still requires such protection, whether its boundaries can justifiably be amended in light of up-to-date circumstances or whether any areas of land subject to that designation can be developed in order to contribute to a sustainable pattern of development.

- 3.17 The *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* considers existing Strategic Gaps in the adopted Local Plan and concludes that land south of Fareham, east of Peak Lane and west of HMS Collingwood does not perform the same function in terms of maintaining separation between Fareham and Stubbington as other land that is subject to this designation and is more integral to the purpose of preserving identity.
- 3.18 Chapter 4 of that Study, Paragraph 10 states that *"there exists some opportunities for development to be absorbed within the strategic gap subject to scale and future detailed design, without compromising its gap function combined with mitigation measures that can support green infrastructure enhancement"*.
- 3.19 It follows as a matter of principle that this land should not be designated as Strategic Gap in this Local Plan as this designation plainly cannot be justified in that location. Conversely, to continue to propose this land as Strategic Gap is not justified on the basis of the Council's own evidence.
- 3.20 It is highly material that the Local Plan Supplement had anticipated a Strategic Growth Area in this location, reflecting the broad conclusions of the earlier Options testing that this represents a sustainable and accessible location for new development and that such development can be accommodated without harm to the separation between Fareham and Stubbington. The significance of this is especially important in the context of the greater scale of development the Local Plan should accommodate and as such this represents an eminently suitable location for development. The fact this land is outside of the settlement boundary is in no way an overriding determinant that would preclude its allocation.

Climate change, flood zones and coastal management areas

- 3.21 We agree that the Local Plan should not direct major new development to areas identified as having a role in mitigating the impacts of flooding or coastal erosion. It is noteworthy that the areas of potential flood risk are associated with the River Hamble, River Meon, River Wallington and Lee-Solent estuary and are largely subject to nature conservation designations and landscape designations which limit the extent these locations would be suitable for development in any event.
- 3.22 In this context, the land identified as suitable for future development to the south of Fareham is not subject to flood risk and can be developed with Sustainable Urban Drainage measures that would not increase the risk of flooding elsewhere.

Protected areas for nature conservation

- 3.23 There are strategic nature conservation constraints that exist in the Borough in the form of International and Nationally designated sites. These overlap with other environmental designations and exert a significant constraint on where development can be located, limiting the extent of land absent a constraint. None of these constraints directly affect the land south of Fareham referred to in preceding paragraphs.

Transport corridors and opportunities to encourage more active travel modes

- 3.24 The NPPF advises that the planning system should actively manage patterns of growth to support sustainable travel. Significant development should be focused on locations which are

or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions, and improve air quality and public health.

- 3.25 In this regard, the Local Plan Strategic Transport Assessment states the following: *The proposed growth locations in the Local Plan to accommodate forecast population and economic growth, took a wide range of factors into consideration, including transport and access implications. Most of the Local Plan growth is located either within or on the edge of existing conurbations, providing good opportunities for trips to be made by modes of transport other than the private car. Consequently, the proposed growth in the Local Plan is generally in sustainable locations in terms of transport and access*”.
- 3.26 It is important to stress that this Transport Assessment in fact includes development at the Strategic Growth Areas, therefore, this conclusion reflects the suitability of new development in this location in these terms.
- 3.27 Whilst certain representations have previously raised concern about traffic impacts, the Transport Assessment concludes that the scale of development proposed (including the Strategic Growth Areas) and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective.

Need to encourage diversity in the housing market

- 3.28 We agree that there needs to a balance in the portfolio of housing sites. We comment later on the likely delivery of housing from Welborne, which can only represent a modest supply of housing in anything other than the longer term.
- 3.29 To meet the objective of providing sufficient housing, additional housing allocations are required for all of the reasons in this representation and in particular those in response to Policy H1. Whilst development to the south of Fareham will change the character of part of the undeveloped land between Fareham and Stubbington, this must be balanced with the material benefits of the scheme in terms of the new housing to increase housing supply in the short term and to provide a surety of supply over the longer term.
- 3.30 The opportunity to the south of Fareham is of a sufficient scale to meet the identified need for market housing, affordable housing, specialist accommodation and self-build and custom build housing, along with the co-location of local services and facilities to support a new neighbourhood.

Sustainability and accessibility to services

- 3.31 Fareham is identified in the Core Strategy as a ‘key growth point’ in the South Hampshire sub region and a ‘secondary regional centre’. The town is the largest in the Borough with a population of approximately 37,000 people. Fareham is also an important economic centre, which has developed further over recent years, with the success of The Solent Enterprise Zone at Daedalus to the south of the town supported by significant investment in infrastructure improvements including improvements to Newgate Lane, Peel Common Roundabout and the construction of the Stubbington Bypass.
- 3.32 Amongst the advantages previously identified for the South Fareham Strategic Growth Area is

its proximity to the town centre, the Solent Enterprise Zone at Daedalus, the railway station and existing local services and amenities with good access to walking, cycling, and public transport links. Local facilities are situated along Bishopsfield Avenue and at Broadlaw Walk. Large-scale out-of-town retail facilities are located at Newgate Lane and Fareham Road to the east of Longfield Avenue.

- 3.33 Large-scale development to the south of Fareham, rather than a more dispersed pattern, would maximise opportunities to prioritise pedestrian and cycle links and extend public transport to maximise sustainable modes of travel.

The requirement to meet housing and employment needs

- 3.34 *Good Growth* can only be achieved if the Local Plan intends to meet objectively assessed need for housing, which for the reasons set out in response to Policy H1, it does not achieve this at the present time.

Spatial Interpretation

- 3.35 As a matter of principle, the identification of deliverable or developable previously developed land should be a priority, however, it is widely understood that such opportunities do not exist to accommodate the scale of new housing and employment required in the Borough.
- 3.36 Accordingly, the allocation of greenfield sites for future development is both a legitimate and necessary measure.
- 3.37 The morphology of the Borough is comprised of three urbanised areas: Fareham, Portchester and the 'Western Wards', which are part of a coastal conurbation that extends from Portsmouth in the east to Southampton in the west. Fareham is the pre-eminent urban area within the Borough in terms of services and facilities and public transport. Portchester and the 'Western Wards' are characterised more as residential suburbs.
- 3.38 Interspersed to a greater and lesser degree between these settlements are areas of separation comprising Portsmouth Harbour, Alver Valley, Meon Valley and the River Hamble. These are strategically important corridors that separate the main urban areas, protect their identity and prevent settlements within the coastal conurbation from merging together.
- 3.39 To the north of the M27, the Borough is of a more rural character, noting of course the proposed new community at Welborne which will undoubtedly change the character of this area over a long period of time.
- 3.40 Stubbington, a residential suburb, lies south of and separate from Fareham's urban area along with the sub-regionally important employment and logistics node at Daedalus. The Borough Council have stated aspirations to maximise the potential of the airfield's land and infrastructure assets through new commercial development, providing clusters for aviation, non-aviation and skills/innovation activity. This will contribute positively to the creation of skilled jobs in the Solent Enterprise Zone.
- 3.41 These characteristics have led the Council, rightly in our opinion, to consider the designation of Valued Landscapes as part of the Local Plan and in this context we are aware that the 2017 Landscape Assessment acknowledges the intrinsic landscape character of the Meon, Hamble

and Hook valleys.

- 3.42 We agree that the Meon Valley is a distinctly valued landscape. In our 2019 response to the Issues and Options consultation we referred to various Appeal decisions that alight upon the value of the landscape in this location. Continuing to protect this area from development and formalising a landscape designation in the Meon Valley would be appropriate.
- 3.43 The extent to which land around the 'Western Wards' is capable of accommodating new development is constrained by the extent of nature conservation designations close to the existing urban area which limits development opportunities to small scale schemes at most.
- 3.44 On the basis of the above, it follows that **locations that adjoin Fareham town, as distinct from villages away from it located in the rural hinterland to the north and west of the Borough, are inherently more suitable in terms of reflecting the morphology of the Borough, preserving its natural environment and maximizing accessibility to services and facilities to achieve the most sustainable pattern of development.**
- 3.45 The extent to which new development opportunities in those locations can consolidate and enhance the accessibility advantages of Fareham Town Centre and Daedalus are consistent with the *Good Growth* principles set out in paras 3.5 and 3.6 above.

Development Strategy Policies

- 3.46 Para 3.2 of the consultation document defines the Development Strategy as providing the *"distribution, scale and form of development and supporting infrastructure, a set of proposals to deliver the strategy, policies against which to assess planning applications, and proposals for monitoring the success of the plan"*.
- 3.47 In addition to the narration of the Strategy, this Section of the Plan includes three policies; the first controlling new development in the countryside, the second in respect of the Strategic Gap and a third concerning Landscape. These policies do not set out a Settlement Hierarchy or Spatial Strategy for the Plan area and such policies do not appear elsewhere in the Plan either. The practical effect of this is that there is no policy that delivers the spatial objectives in so far as where new development should be located i.e. affording a priority to locations within and adjoining Fareham town as the most sustainable location in the Borough.
- 3.48 Given that para 3.2 suggests the role of the Development Strategy provides a set of policies that direct where and how new development should be located, the omission of what are usually commonplace policies is significant.

Strategic Policy DS1: Development in the Countryside

- 3.49 Policy DS1 seeks to control the use of land outside defined settlement boundaries i.e. in countryside locations.
- 3.50 In some circumstances it would be appropriate to grant planning permission for new development in such locations. In those instances, the benefits of a development proposal would need to be considered against the criteria in part two of the policy. In this context, we do not agree that Criterion 'v' is drafted correctly.

- 3.51 On certain occasions other considerations associated with a development proposal would merit planning permission being granted notwithstanding the agricultural classification of the land concerned. In this regard, whilst the NPPF affords a preference to development of lower quality agricultural land, it does not preclude the development of best and most versatile land (see footnote 53 of the NPPF).
- 3.52 As presently drafted Policy DS1 conflicts with the expression of this policy approach in the NPPF; as such criterion 'v' should be reworded as follows: "*avoid or minimise the loss of best and most versatile agricultural land*".

Strategic Policy DS2: Development in Strategic Gaps

- 3.53 In earlier representations we have identified that the evidence base provided by the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps* does not justify the delineation of the Strategic Gap south of Fareham in the manner shown on the Key Diagram.
- 3.54 In particular, that Report identifies that the land south of Longfield Avenue and west of HMS Collingwood could accommodate new development without a significant adverse effect on the objectives of the Strategic Gap designation.
- 3.55 It follows that this land is not an integral part of the Fareham and Stubbington Gap.
- 3.56 As such the Strategic Gap should not extend across this land, as this would add a policy restriction that ought not apply on the basis of the published evidence. Put simply, such a designation should not include more land than is necessary to achieve its purpose.
- 3.57 For the Local Plan Key Diagram to be justified, and for the Local Plan to be sound, the delineation of the Strategic Gap south of Fareham should be amended accordingly.

Strategic Policy DS3: Landscape

- 3.58 The Local Plan intends to formalise Areas of Special Landscape Quality to reflect their valued status as determined through the *Technical Review of Areas of Special Landscape Quality and Strategic Gaps*. As written, Policy DS3 does not however afford any particular level of protection to these areas beyond Policy DS1, which in any event requires development proposals in the Countryside to "*conserve and enhance landscapes*".
- 3.59 Policy DS3 also appears to permit major development proposals in these locations whereas the Development Strategy has sought to avoid new allocations in these locations because of their landscape sensitivity. The definition of major development is provided in the Glossary¹ and when applied to this Policy, could see large scale development proposals being advanced when this is what the Local Plan is seeking to avoid. As drafted, this Policy does little to enforce the Plan's Development Strategy.

¹ For residential schemes, major development includes those of 10 dwellings or more or on a site of 0.5 hectares or more. For other development, it includes building(s) with a floor area of 1000sq.m or more or on a site of 1 hectare or more.

4 Policy H1: Addressing housing needs by the end of the plan period in an appropriate and sustainable manner

- 4.1 In this Section we consider specifically Policy H1 and whether, as presently formed, the Borough Council's strategic housing requirement and housing supply strategy are sound.
- 4.2 The NPPF expects the planning system to significantly boost the supply of new housing by providing, in the first instance, a sufficient amount of development land where it is needed (para 59 refers).
- 4.3 It is clear that a Local Plan's housing requirement is to be calculated by reference to the Government's Standard Method, unless exceptional circumstances can be proven (para 60 refers).
- 4.4 In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.
- 4.5 As discussed in Section 2, the Plan's Vision and Strategic Priorities establish the intention to address the Borough housing and employment needs by the end of the plan period in an appropriate and sustainable manner, creating places people want to live or where businesses want to locate.
- 4.6 For the Plan to address, and indeed meet, housing needs by the end of the plan period, it is important to have regard to the following considerations which are material to determining a sound strategy in the context of the Government's presumption in favour of sustainable development:
 - context and the backdrop to this Local Plan;
 - an objective assessment of local housing need;
 - unmet need from neighbouring authorities;
 - the Plan's housing deliver strategy and whether this is sufficiently robust.
- 4.7 As will be shown, the consultation document will not achieve this, and when measured objectively, a shortfall in housing supply over the plan period will be inevitable, contrary to the stated Vision and Strategic Priority.

Context

- 4.8 The earlier Core Strategy set out a Development Strategy for the period to 2026 that has hitherto been achieved in part only. This partial achievement has had significant implications for housing delivery in the plan area.
- 4.9 In aggregate, the Core Strategy intended that some 9,000 new homes would be built in Fareham

in the 20 years between 2006 and 2026. This comprised:

- 5,350 at the North Fareham Strategic Development Area (Welborne) to meet sub-regional needs as identified in both the South East Plan and the South Hampshire Sub-Regional Strategy; and
- 3,729 elsewhere in the Borough²;

- 4.10 Over the 13 years since the start of the Core Strategy's plan period (2006/7 and 2018/19) only 4,200 new homes have been built. This is equivalent to 46% of the housing requirement in 68% of the plan period.
- 4.11 In comparison with the trajectory on page 21 of the Core Strategy, new housing has had to be accommodated in locations outside of allocated Strategic Development Area; in the four years from 2016, almost twice as many new homes have been provided elsewhere in the Borough than the 469 intended for the whole of that 5 year period 2016/21.
- 4.12 Following the Core Strategy, when the Welborne Plan was prepared in 2015, and to reflect the changed circumstances by then the Council re-calculated likely delivery at the Garden Village. Policy WEL3 identified approximately 6,000 new homes to be completed by 2036. First completions were to be achieved in 2015/16, 1,500 completions were to have been achieved by 2021 and 2,860 completions by 2026.
- 4.13 Plainly this hasn't been achieved and without question there has been a substantial shortfall in housing provision compared to the Core Strategy.
- 4.14 Manifestly, this shortfall is significant and cannot simply be put to one side. It is striking that Welborne was identified originally to meet sub-regional needs but because it hasn't delivered it now represents a source of housing to meet in a substantial part the Borough's own housing need and thus the Borough's contribution of the wider sub-regional need is much reduced.
- 4.15 Given the strategic objective defined by the Council, and in the context of the NPPF's presumption in favour of sustainable development, this has a clear implication for plan-making in Fareham. National Planning Policy invites Local Authorities to exceed the minimum housing requirement and to adopt a positive approach to planning for future housing. Plan-making should not be a simple mathematical exercise but a fundamental examination of how to best plan for the long-term future of the Borough. In this instance, and as the Local Plan Supplement was endeavoring to achieve, this enables the Council to develop a strategy for the longer term.
- 4.16 The change of direction in the Regulation 19 consultation document appears to be framed by precisely the opposite; planning for the minimum plan period and the least amount of new development plausible. Patently, that approach does not include the flexibility which a Local Plan should provide.
- 4.17 For example, had the Regulation 19 Plan retained the level of housing calculated by reference to the published Standard Method – 520 dwellings per annum – and had a lower housing requirement in fact materialized, the practical effect of this would merely have been a housing supply strategy that would endure beyond the end of the plan period. In simple terms, the

² Policies CS2 and CS15 refer

housing strategy would cater for an addition 5 years worth of housing. Given that it is beyond comprehension that housing need will not cease after 2037, this would have been a positive, adaptable, plan-led, longer term strategy.

- 4.18 The fact that the Council has alighted upon a potentially lower housing requirement without apparently considering the practical effect of retaining the existing housing requirement manifestly demonstrates a negative, rather than positive, approach to plan making.
- 4.19 Moreover, the Sustainability Appraisal has plainly not considered this as a reasonable alternative and, as such, is flawed. The Assessment of Alternatives in Section 5 of the Sustainability Appraisal relates to development locations rather than the overall quantum of development. The PPG advises that *"a sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted"*. The purpose of testing reasonable alternatives is to determine that a Local Plan promotes sustainable development when judged against reasonable alternatives, to achieve relevant environmental, economic and social objectives.
- 4.20 This negative approach is further evident when considering the components of the housing strategy which again illustrates a do-minimum approach.

Local Housing Need

- 4.21 Application of the Standard Method to calculate the Local Plan's local housing need would require 520 new homes to be provided each year, or 8,320 new homes in total between 2021-2037.
- 4.22 Alternatively, the Regulation 19 Plan is based on 403 new homes each year which is derived from the proposed revisions to the Standard Method published as a consultation document by the Government in the Summer. These proposed revisions carry no weight at the present time and do not provide any basis for the calculation of housing need for the purpose of this Local Plan at the present time.
- 4.23 Only if the proposed revisions are carried forward without alteration by Government would this serve as a basis to underpin the Plan and enable it to be submitted. Any change to the formula, as it relates to Fareham or any of its neighbouring authorities, would require reconsideration of the housing requirement in Policy H1. The Regulation 19 Plan is contingent therefore on the outcome of that entirely separate process, rather than being a Plan which the Council is able to submit for Examination. It is, for want of a better term, a "wait and see" plan.
- 4.24 As the Council appear to acknowledge themselves by the intention not to submit the Plan for Examination until the outcome of the Government's consultation is known, it is plainly not a sound approach at the present time.
- 4.25 Little more can be said about this, other than to draw attention to the obvious difficulties that have arisen in light of the Government's consultation, which have led to a significant level of opposition to the suggested changes. As recently as mid-November the Planning Minister referred to estimates of local housing need derived from its consultation exercise as *"entirely speculative"* and indicating that the revised formula was being re-evaluated.

- 4.26 It is also important to consider when the Standard Method was introduced and the practical effects of this which the Council don't appear to acknowledge.
- 4.27 The Standard Method was introduced in 2018 and the assessed level of local housing need was based on a period of 2016 onwards. The Council appear not to have grappled with the guidance in the Planning Practice Guidance in respect of this: "*Strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate*". Plainly we are some way into the plan making process which commenced in 2017 and this requires the Council to have asked themselves how have housing completions compared with the level of local housing need from that point.
- 4.28 The published requirement was 520 dwelling per annum from 2016 onwards, whereas the highest number of completions was 349 in 2016/17 and less than half for the two years since where monitoring information is available.
- 4.29 The Standard Method takes account of backlog but only in so far as affordability will have increased in the years prior to the calculation and does not take account of underprovision since then. In these terms, the shortfall between the assessed level of housing need by reference to the Standard Method and actual completions has to be taken into account going forward.
- 4.30 The following table illustrates this:

Year	Number of Completions	Level of Local Housing Need	Shortfall
2018/2019	290	520	230
2019/2020*	263	520	257
2020/2021**	132	520	388

*Projected housing supply April 2019

**Projected housing supply June 2020

- 4.31 This indicates in the three years since the Standard Method was first published, the cumulative shortfall in housing completions is expected to be 875. No account is taken of this in the current consultation document. Even if the lower figure of 403 was taken as the level of local housing need, the shortfall would be in excess of 500 new homes.
- 4.32 In the circumstance where housing delivery in the Borough has been below both that anticipated by the Core Strategy and the measure of local housing need derived from the Standard Method, however calculated, the Council are plainly wrong to have selected a plan period that takes no account of this and a housing strategy that has no regard to that underprovision. This further undermines any notion of a positively prepared plan.

Unmet Need

- 4.33 Section 33A of the Planning and Compulsory Purchase Act 2004 requires a local planning authority to cooperate with, *inter alia*, other local planning authorities, and engage constructively, actively and on an ongoing basis in the preparation development plan documents, so far as relating to strategic matter. Paragraph 25 of the NPPF says 'strategic policy making authorities should collaborate to identify the relevant strategic matters which they need

to address in their plans'. Unlike problems associated with soundness, a failure to discharge the obligation in Section 33A cannot be remedied once the plan has been submitted for examination.³

- 4.34 It is clear from the work of the Partnership for Urban South Hampshire that housing provision is a strategic matter and thus there is a need for co-operation between constituent plan-making authorities. In this regard, the 'plan-making' section of the PPG provides guidance in relation to the duty to cooperate. Paragraph 022 states that strategic policy making authorities are expected to have addressed key strategic matters through effective joint working, and not deferred them while relying on an inspector to direct them. It states "[An] Authority will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any outcomes achieved; this will be thoroughly tested at the plan examination."
- 4.35 The consultation document makes an allowance of an additional 847 houses as a contribution to meeting unmet need from Fareham's Neighbouring Authorities. But as this is the Submission version of the Plan, this allowance should have regard to the co-operation referred to above. There is no evidence that this is anything other than an allowance made by Borough Council without reference to the joint working through PUSH; this is nothing else but a "cart before horse" approach.
- 4.36 The consultation document acknowledges that there is "a significant likelihood of a substantial level of unmet need in the sub-region" (para 4.4) and that over the plan period the level of unmet need in the sub-region could be circa 10,750 new homes. It is instructive that the references to unmet need in para 4.5 of the consultation document are in the context of the current Standard Method and not the higher sub-regional figure that the proposed Standard Revision indicates. In this regard, the plan appears to be "comparing apples and pears".
- 4.37 The following table compares the housing requirement from the current Standard Method and that indicated by the proposed revision.

LPA	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard Method	Proposed new Standard Method	Difference between current and proposed SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1025	+333
PUSH East	1804	1828	2802	3430	+628
Southampton	815	1148	1012	832	-180
Eastleigh		857	694	885	+191
New Forest	521	346	729	782	+53
Test Valley	588	834	550	813	+263
PUSH West	1924	3183	2977	3312	+335

- 4.38 The above illustrates that whilst the Fareham figure might decline, across the sub-region the

³ *Samuel Smith Old Brewery (Tadcaster) v Selby DC [2015] EWCA Civ 1104 paragraphs 38 and 40*

overall scale of housing is greater both in PUSH East and West.

- 4.39 Over a 16-year period, the difference between the proposed new Standard Method would require an additional 10,000 new homes to be built across PUSH East. Compared to average delivery over the past 3 years, almost twice as many new homes will need to be built. This is unquestionably a step change in housing delivery and each Local Authority area will need to contribute towards this and maximise its contribution to the sub-regional requirement.
- 4.40 In September 2020 the PUSH Report to its Joint Committee looked at the potential implications of housing supply relative to Local Housing Need, and using the proposed revision to the Standard Method this still identified a shortfall of over 6,500 across the PUSH East sub-region.⁴
