

communities. Indeed a number of the sites put forward in the current draft plan would potentially result in cul de sac developments, including:

FTC3 – Fareham Station (120 dwellings)

FTC4 – Fareham Station West (90 dwellings)

HA3 Southampton Road (348 dwellings)

HA4 Downend Road (350 dwellings)

- 4.29** The site presently benefits from permanent planning permission for development and use for aggregate recycling. This is significant in terms of both vehicle movements and future development potential. Current planning permissions contain conditions limiting HGV movements to 240 per day, all of which utilise the current site access point on Botley Road. These authorised HGV movements would be replaced by domestic vehicle movements, substantially mitigating any perceived increase in road traffic on Botley Road. In addition, the imminent completion of the North Whiteley Link Road is anticipated to reduce vehicle movements on Botley Road. Without wanting to pre-empt the outcome of any Transport Feasibility Assessment, development of the site could also facilitate the development of the western end of the Rookery Avenue extension as there is space within the site to accommodate a roundabout.
- 4.30** Planning permission P/18/0978/CC includes for considerable earthworks to create extended and raised bunding to re-model the site and mitigate against noise impacts from the recycling use. A significant proportion of this re-modelling is on the south western boundary of the site. Such earthworks would be very similar in scale and form to those likely to be required to reduce noise levels from motorway traffic to appropriate levels for inhabitants of any future residential development on the site.
- 4.31** The Council has previously been furnished with a Phase 1 Contaminated Land Assessment and Slope Stability Assessment for the site, identifying that the embankment/land raise slope adjacent to the M27 is stable and that the site could be suitable for re-development in accordance with the indicative masterplan previously submitted.
- 4.32** Any future development scheme pursuant to an allocation would also include mitigation to address potential air quality concerns associated with proximity to the motorway. Such

issues can be effectively managed through building design and layout amongst other techniques.

4.33 The site comprises circa 20 hectares of land with a net developable area of circa 10 hectares. Significant land is therefore available within the land ownership for biodiversity enhancement, on-site nitrate mitigation and dedication to public open space.

4.34 The following points detail the benefits of residential development on the Rookery Farm site:

- Once the permanent recycling permission is implemented the site will become previously development land/brownfield and its development will reduce the need for more sensitive (greenfield) sites within the Borough;
- The site is in a highly sustainable location in proximity to a railway station and amenities, is deliverable and would provide necessary housing capacity within the Plan;
- It should be noted that in its response to the draft 2020 Plan (Regulation 18 Draft Local Plan 2036 Supplement) showing the inclusion of Rookery Farm, the County Council responded as follows:

This allocation is close to Swanwick railway station. The County Council supports the opportunity for this site to provide high quality walking and cycling routes to Swanwick station. This may include a new active modes bridge over the motorway and enhanced interchange at Swanwick Station with new local bus services. The development brief also needs to include provision for off-site improvements to address the inadequate bus, walking and cycling connections to the Segensworth business parks.

- Provision of Public Open Space on a former land raise site and access to it from existing footpath routes;
- Removal of a 'heavy industry' use from an otherwise residential setting;
- Would facilitate the Rookery Avenue extension. This would provide better access to the motorway, the industrial area of Whiteley and Whiteley District Centre;
- Opens up pedestrian links across the motorway to Addison Road;
- The site would not be visually prominent and would form a logical urban extension. Development could enable biodiversity enhancements associated with long-term habitat management plans and the re-instatement of a pre-existing stream across the site;
- The development would be offset by the loss of 240 HGV vehicle movements a day.

- 4.35** Were recycling operations to cease and land raising be completed, circa one million tonnes of waste material would need to be imported to the site before planning permission expiry in December 2026. This will impact the surrounding ambient environment through noise, dust and exhaust/plant emissions associated with operations and significant numbers of HGV movements.
- 4.36** Resumption and completion of land raising would also result in the site and location becoming permanently sterilised for future development. This is therefore a unique opportunity to re-develop the site to meet a real and urgent need to provide homes in the Borough.

5.0 **Modifications Required to the Plan to Make it Sound**

- 5.1. There is no need to revisit the arguments and issues which have been set out at length in the earlier sections and which demonstrate that the Plan as drafted is UNSOUND. The modifications required are set out below in bullet form. It will be immediately clear that the required work to ensure that the Plan is SOUND extends well beyond detailed amendments to drafted policy wording; a fundamental review of the Plan and the basis upon which it has been prepared is required.
- 5.2. The revised approach to the preparation of the Plan, with consequential implications for the redrafting of **Strategic Policy H1**, requires:
- a) A thorough reassessment of the Housing numbers using the Standard Method as set out under the PPG; it is premature to use the draft new Standard Method which Government has now formally abandoned. The only reason it has been used by Fareham is because it appears to provide a lower number of units required. This is clearly UNSOUND and for the plan to made SOUND, the current Standard Method must be re-used and those sites proposed for allocation in the Local Plan Supplement be included.
 - b) The Duty to Co-operate has not been undertaken properly and thoroughly; Fareham has underprovided in terms of meeting the needs of the adjoining authorities who are struggling to meet their housing needs, including Portsmouth, Gosport and Havant all of which are geographically very constrained. The exercise needs to be undertaken again to ensure that Fareham properly plans to accommodate the needs arising from surrounding authorities. It is worth noting that the under provision is made even worse if account were to be taken of the draft new Standard Methodology where the housing requirements of adjoining constrained authorities is increased; Fareham appears to have decided to ignore this implication arising from the new draft Standard Method.
 - c) The Council has a history of under delivery of housing figures and its 5 year housing land supply figure currently stands at under 3 years. On the basis that the NPPF and PPG are both clear that the housing provision numbers should be regarded as

minimum, and reflecting the above position, Fareham requires to be considerably more ambitious in terms of its overall housing provision figures.

- d) There is a very concerning over reliance on the achievability of so much of the housing provision from one site, namely Welborne Garden Village. This is even more of a significant issue given the fundamental difficulties that appear to be encountered over the funding and provision of the new motorway junction which is fundamental to the progress of the overall development. The amount of reliance that can properly be placed on the delivery of housing numbers from this one development needs to be reviewed and significantly reduced.
- e) There is also a potential over reliance on windfalls to deliver a significant proportion of the overall housing figures; this requires to be revisited with a downward adjustment.
- f) The Council is in very real danger of not being able to meet its affordable housing requirements, given all the constraints identified. The housing numbers and potential affordable housing provision requires to be recalculated with the need to increase the overall housing numbers if the affordable housing needs are to be met.

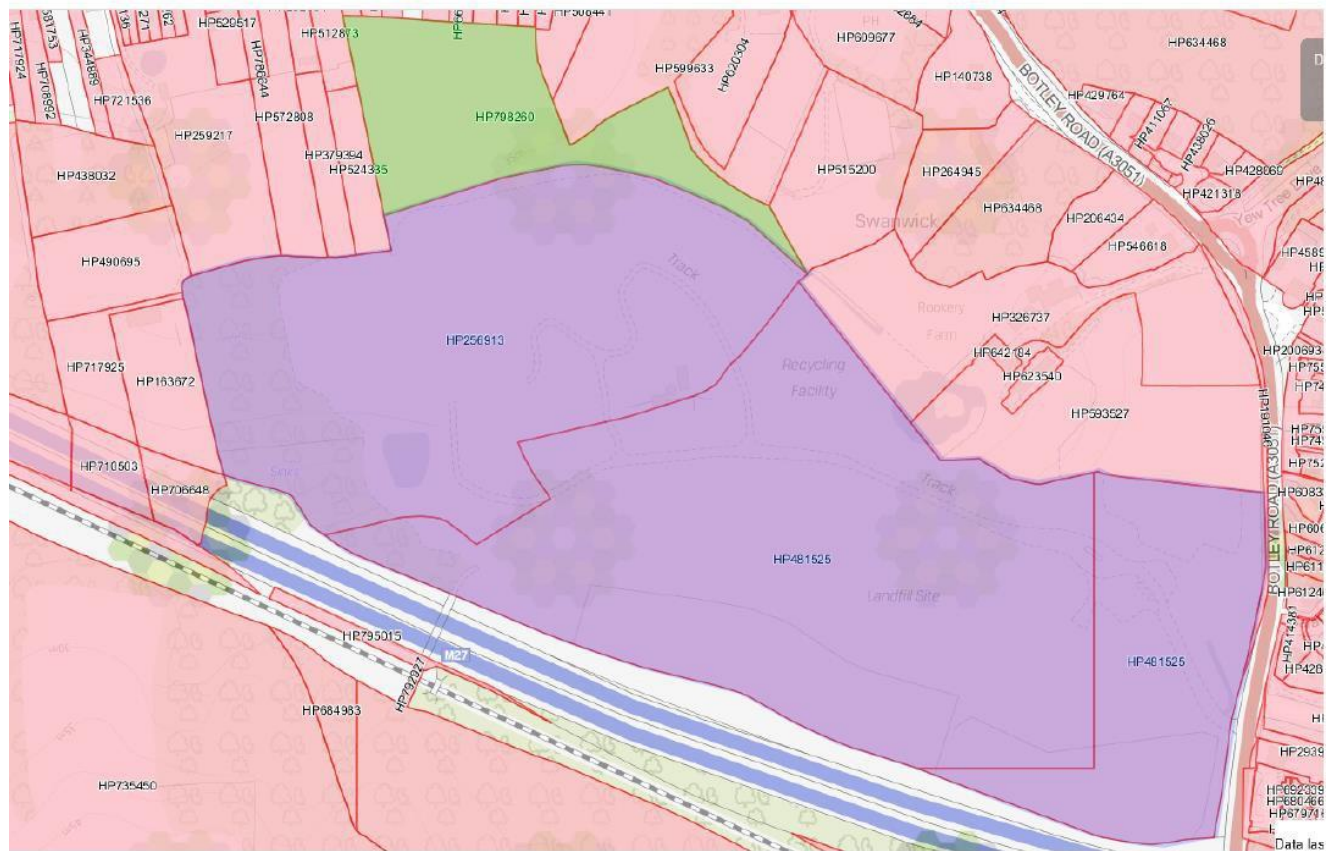

5.3 In addition to the above the Council also requires to re-address a number of its allocated housing sites, including at the very minimum **Sites FTC1, FTC2, FTC3, FTC4, FTC5, HA7 and HA13**. This reassessment in terms of suitability, achievability and availability is likely to reduce substantially the number of new dwelling units that can be achieved from these allocations.

5.4 The Council is clearly underproviding in terms of its overall housing numbers and the reliance it is placing on sites that face constraints and may not be achievable. The Council needs to make further allocations, and this should include Land at Rookery Farm which is suitable, available and achievable and subject to planning, deliverable within a 5 year period. The site has been considered suitable, available and achievable and was allocated in the Local Plan Supplement; the principal reason why it no longer appears as an allocation is because of the Council's unsound change in the methodology it is applying to calculate its housing numbers. **Rookery Farm should be reinstated as a housing allocation.**

- 5.5 It follows that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson

[REDACTED]

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

B1 Which part of the Local Plan is this representation about?

A paragraph Go to B1a

A policy Go to B1b X

The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction). N/A

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Housing Allocation Policy: HA1 - North and South of Greenaway Lane, Warsash and Figure 4.1: Policy HA1 indicative Framework Plan

B1c Which part of the Policies Map? N/A

B2 Do you think the Publication Local Plan is:

Legally compliant Yes

Sound No

Complies with the duty to co-operate No comment

B3 Please provide details you have to support your answers above

Legally compliant There is no reason to believe the Plan has not met the legal requirements for plan making as set out by planning laws.

Complies with the duty to co-operate The onus is on Fareham Borough Council to demonstrate that the Plan complies with the duty to co-operate. It will have to provide evidence that it has engaged and worked effectively with neighbouring authorities and statutory bodies.

Sound Land & Partners Ltd considers that Policy HA1 and Figure 4.1: Policy HA1 indicative Framework Plan, as currently written, is unsound.

Land & Partners Ltd has recently sold land on behalf of the landowners and within the housing allocation. This comprised land west of the track serving Greenaway Lane and Warsash Road and which was subject to the outline planning application P/17/0998/OA and SHELAA site reference 3056.

This representation relates to the residual land east of the track and covered by the outline planning application P/17/0998/OA and SHELAA site reference 3056, as well as additional land at 59 Greenaway Lane (SHELAA site reference 3189).

There is continued support for housing allocation HA1 and the increase to the housing allocation indicative yield by the Council, up from 700 dwellings to 824 dwellings. However, the exclusion of land at 59 Greenaway Lane from the same allocation is objectionable. The Council seeks to include this land in the urban area but not the housing allocation.

The Council's own analysis of land at 59 Greenaway Lane within their 2020 SHELAA confirms that the site is considered suitable for development as part of the proposed Warsash cluster allocation. It is not clear, therefore, why the Council has chosen not to include this available 0.33-hectare site within the proposed allocation. The policy is unsound on this basis.

The majority of the criteria and requirements of Policy HA1 and Figure 4.1: Policy HA1 indicative Framework Plan are supported (a, b, c, e, f, h, i and j); however, criteria d, g and k, as currently written, are not justified nor effective.

d)

Figure 4.1 is an expression of the Council's aspirations for housing allocation. This includes indicative wildlife corridors and Land & Partners would like flexibility for the 3m ecology corridors to be provided within the residual land to be determined as part of the forthcoming planning application. This is especially relevant within the south-eastern corner of SHELAA site 3056, where ecology corridors would be designed as part of the scheme around the housing and trees within that part of the site. As it currently stands, the notation of existing woodland or treed areas within the south-eastern corner of the site within Figure 4.1 is not accurate and identifies far more tree cover than actually exists. This does not reconcile with the protected trees identified within the Council's red line allocation boundary plan.

There is no need for a footpath route through the whole of the south-eastern corner of the site, as to provide one along the alignment envisaged within Figure 4.1 would render this part of the site undevelopable. There would be pedestrian access into this area to the individual dwellings, but not as route through for the general public.

There is an objection to the green notation adjoining Lockwood Road within Figure 4.1, as this area is required for Sustainable Urban Drainage. The Council has already resolved to grant application P/17/0998/OA including this.

The five mobile homes indicated adjoining the track within Figure 4.1 would be removed as the site would be redeveloped.

g)

There is an objection to criterion g), as this requires all existing protected trees to be retained and incorporated within the development. This criterion does not take any account of the category or amenity values of the existing trees, nor does it provide any flexibility to allow for the removal of low, medium and higher amenity trees, where required, and their replacement

as part of a proposal. This is especially the case within the south-eastern corner of the site subject to SHELAA site 3056 and on land at 59 Greenaway Lane (SHELAA site 3189).

k)

Off-site improvements to existing sports facilities are not justified and have not been requested as part of the any of the planning applications to date. The Council has not provided any evidence of existing deficiencies with off-site sports facilities and as such any improvements should be funded by contributions from the Council's Community Infrastructure Levy.

It is now the intention for Land & Partners Ltd to prepare and submit a new planning application for the residual land in due course. This would include provision for primary and secondary roads, vehicular, cycle and pedestrian routes, ecological corridors, low/medium density housing and Sustainable Urban Drainage. The submitted Site Plan Framework Plan prepared by Land & Partners Ltd identifies these features and how the residual land to the east of the track could be developed.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound? You put in all the evidence and information needed to support your representation.

The Council should make the following amendments to make policy HA1 and Figure 4.1 sound:

- Include land at 59 Greenaway Lane (SHELLA site 3189) within the housing allocation boundary red line;
- Amend criterion d) and Figure 4.1 to make clear that there should be flexibility for ecology corridors to be determined as part of individual planning applications;
- Delete the green hatched notation adjoining Lockwood Road within Figure 4.1, as this area is required for Sustainable Urban Drainage;
- Delete the footpath link through the south-eastern corner of the housing allocation within Figure 4.1 and replace with a Cycle and Pedestrian route which runs from Lockwood Road to the track, as per the submitted Site Plan Framework Plan prepared by Land & Partners Ltd;
- Remove the five mobile homes to the east of the track within Figure 4.1;
- Figure 4.1 should be amended to ensure the protected trees reconcile with those identified on the housing allocation boundary red line plan and the submitted Site Plan Framework Plan prepared by Land & Partners Ltd;
- Criterion g) should be amended to provide flexibility to allow for the removal of low, medium and higher amenity trees, where required, and their replacement as part of a proposed scheme; and
- Delete the requirement within criterion k) to provide or contribute towards off-site improvements to existing sports facilities.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Some of the changes sought under B4a above are simply to address what has previously been agreed with the Council as part of their consideration of application P/17/0998/OA. Other changes seek to clarify matters, request some flexibility within the wording of Policy HA1 (and

the Council's Framework Plan), make improvements and to rectify what appear to be errors or omissions made by the Council. The changes requested would make Policy HA1 and Figure 4.1: Policy HA1 indicative Framework Plan (and the Local Plan) sound.

B4c Your suggested revised wording of any policy or text:

Policy HA1

d)and east-west corridors **to be determined as part of individual applications.**

g) Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals, unless the removal of low, medium and higher amenity trees, where required, can be justified and their replacement forms part of a proposed scheme;

k) delete ii. Off-site improvements to existing sports facilities

Figure 4.1 Policy HA1 Indicative Framework Plan

Amend Council's Framework Plan to address comments made under B4a above and to reflect the Site Plan Framework Plan prepared by Land & Partners Ltd for the residual land east of the track between Greenway Lane and Warsash Road.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing

Yes, I want to take part in a hearing session session Yes

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

It will be necessary to attend the examination and to assist the Inspector by expanding upon the changes being sought to Policy HA1 and Figure 4.1.

15th December 2020

FAO: planningpolicy@fareham.gov.uk

Fareham Local Plan 2037 Publication
Regulation 19 Consultation

Dear Sirs,

Please find attached comments from CPRE Hampshire regarding the Regulation 19 Fareham Local Plan 2037 consultation.

Firstly, a general point; CPRE Hampshire is extremely pleased to see that Fareham BC have approached their new Local Plan from a landscape-based perspective, a process which we wholly support. Furthermore, we fully endorse Fareham BC's inclusion of a Climate Change policy, which must underpin all other policies and spatial planning.

Furthermore, we are pleased to see that Fareham have adopted housing numbers based on the latest available housing projections from the ONS, the 2018-based projections, which show a considerable reduction in estimated local need.

However, we remain disappointed that there seems to be no mention of a potential new South Hampshire **Green Belt** in the Reg 19 consultation. In an earlier consultation by Fareham BC in July 2019, there were a number of mentions of this option, notably in Section 10c regarding the Meon Valley, where it said "The Council will also be working with PUSH to consider the potential for greenbelt land across local authority areas, and there could be scope for this area to become part of a South Hampshire greenbelt." As CPRE Hampshire has long campaigned for a sub-regional area of restraint in order to encourage urban regeneration and prevent sprawl, this was very much welcomed. Sadly, this does not seem to have been included in the Reg 19 document, and we consider its exclusion to be a significant wasted opportunity, as the NPPF allows local authorities to designate Green Belt as part of the Local Plan process. It has been agreed that the PfSH authorities are to consider a new Green Belt as part of their forthcoming Statement of Common Ground and we would have hoped to see Fareham BC leading the way.

CPRE Hampshire has completed Response forms for individual policies which are attached below this letter, but in summary our headline comments are as follows:

Development Strategy

Strategic Policy DS1 Development in the Countryside: CPRE Hampshire agrees with these principles but notes that a South Hampshire Green Belt could aid considerably in achieving these goals.

Strategic Policy DS2 Strategic Gaps: We note the decision to re-define strategic gaps (the Meon and Fareham-Stubbington gaps) and suggest that a new Green Belt could achieve this. An area could easily be defined to encompass the Meon Valley, which could link to an area of larger Green Belt to the north of the Borough in Winchester District.

Strategic Policy DS3 Areas of Special Landscape Quality: CPRE Hampshire agree with Fareham BC's analysis of the Borough's varied landscapes and supports any intention to define them as Areas of Special Landscape Quality, illustrated in Figure 3.3. However, CPRE Hampshire suggests that some of these could be further protected if they also formed part of a wider South Hampshire Green Belt, in particular the Upper Hamble Valley, the Meon Valley, the Forest of Bere and Portsdown Hill.

Climate Change

Strategic Policy CC1 Climate Change: CPRE Hampshire believes that one of the most fundamental ways of combating the likelihood of adverse climate change, is to plan development where it can use better public transport and be less reliant on the car. The aspirations in Policy CC1 are more about how development can respond to climate change, and rather less about how spatial planning of future development can help prevent it. We consider that this is a missed opportunity. However, we feel that Criterion a) does not go far enough. According to Camilla Ween, Harvard Loeb Fellow, speaking on behalf of Transport for New Homes “Transport is responsible for about 26% of greenhouse gas emissions, much arising from personal car journeys. Our society will not be able to achieve the UN goals if we do not change the way we travel; that means we need to create new communities that are NOT car dependent. That means careful consideration of where new development is located, as well as how we design new communities, for example, places that are well connected with high quality public realm and movement infrastructure that encourage people to want to move to a car-free lifestyle.” It must be a fundamental tenet of the Fareham Local Plan that NO development should be permitted that relies on the car as its main means of access.

Nothing less than a drastic change to spatial strategy and a move away from South Hampshire’s historic pattern of sprawling suburbs will enable any meaningful contribution to the fight against adverse climate change. We owe it to future generations to do our utmost to shift patterns of behaviour that have become entrenched with the use of the private car. Even electric cars will not solve many of these issues as they still leave residues from tyres and fluids and are unsustainable in terms of battery manufacture. The adoption of a South Hampshire Green Belt would assist this by encouraging urban redevelopment, and preventing sprawl into the countryside where modal change to walking, cycling and public transport is very much more difficult to achieve.

Housing

Policy H1 Housing: CPRE Hampshire recognises that the current guidance from MHCLG requires the calculation of local housing need (LHN) based on figures from the 2014-based household projections, although a recent MHCLG consultation suggested a new methodology. Whatever the methodology, CPRE Hampshire supports Fareham BC in using the most up-to-date household figures based on the 2018-based projections. We also welcome the removal of Policy HA2 from the Reg 19 Local Plan.

Policy HA1 Warsash: CPRE Hampshire does not believe that the proposed development around Warsash can be considered truly sustainable, reliant as it is on the car as the main means of transport. We are concerned about the lack of a masterplan and believe the proposed framework does not fulfil a place making function.

Policy HP4 Five-Year Housing Land Supply: CPRE Hampshire has significant concerns about the unintended consequences of this policy, specifically its linkage with DS1, and believe that it may lead to site selection looking outside the Urban Area in the first instance.

Policy HP6 Exception Sites: The potentially inadvertent use of the word OR in Criterion c) could allow significantly large exception sites to be allowed, as long as they remain below the threshold of 5% of the size of the adjacent settlement. There should be a fixed upper limit.

Natural Environment

Strategic Policy NE1 Protection of Nature Conservation, Biodiversity and the Local Ecological Network: CPRE Hampshire supports the use of ecological network mapping to conserve nature and protect biodiversity and as a tool for influencing spatial planning.

Policy NE2 Biodiversity Net Gain: CPRE Hampshire supports the requirements for 10% biodiversity net gain on all development.

Policy NE4 Water Quality effects on the SPAs, SACs and Ramsar sites of the Solent: CPRE Hampshire understands there is an outstanding judicial process underway regarding the effectiveness of Fareham BC’s proposals for mitigating nitrate and other pollutants on the Solent and other protected waterways. At this point, CPRE Hampshire is therefore unable to endorse the proposed policy until the legal issues have been resolved.

Policy NE6 Trees, Woodlands and Hedgerows: CPRE Hampshire agrees with any policy that supports the preservation or enhancement of trees, woodlands and hedgerows.

Policy NE8 Air Quality: CPRE Hampshire supports the requirements for air quality improvement but considers more could be achieved if development were only to be permitted in locations around mass public transport hubs, rather than being car dependent.

Policy NE9 Green Infrastructure: CPRE Hampshire agrees that green infrastructure is important to the wider ecological network and to the health and wellbeing of residents but suggests that it would be better protected in perpetuity were it to be formalised as part of a new Green Belt.

Transport and Other Infrastructure

Strategic Policy TIN1 Sustainable Transport: CPRE Hampshire recognises that Fareham BC aspire to have 'good growth' with existing and proposed transport corridors influencing choice of development, but we feel the policy does not go far enough. The Council should feel empowered to reject development which is not already located around, or can provide, public mass transit hubs, in particular the rail network.

The principles of development and transport as set out in the Transport for New Homes checklist should be followed - <https://www.transportfornewhomes.org.uk/the-project/checklist-for-new-housing-developments/>.

Design

Strategic Policy D1 High Quality Design and Placemaking: The design quality of future developments starts with overall masterplanning and landscape context as well as specific building details. Fareham has seen a proliferation of poorly designed car dependant nondescript developments over recent years, and it is critical that major improvements are made for the future.

Yours faithfully,

Caroline Dibden

Vice-President
CPRE Hampshire

Areas of Special Landscape Quality and Strategic Gaps

- a) East of Welborne,**
- b) the Strategic Gap along the Meon, and**
- c) to the north-west of the borough.**

2	Do you think the Publication Local Plan is:	Yes	No
	Legally compliant	YES	
	Sound		NO
	Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire STRONGLY SUPPORTS the overall approach taken by Fareham BC in the Fareham Local Plan 2037 for a spatial strategy based on countryside, which is justified as it is in accordance with the aspirations as set out in the NPPF for development to be brownfield first, and for countryside to be protected for its intrinsic value and beauty, and for protection of Best and Most Versatile agricultural land. It is also supported by the Government's 25-year Environment Plan and for the recommendations as set out by the Climate Change Committee.

Furthermore, CPRE Hampshire SUPPORTS the Vision for the Fareham Local Plan 2037 which states that Fareham BC seek to retain its identity, and the identity of individual settlements within the Borough, through measures that seek to retain the valued landscapes and settlement definition.

We also SUPPORT Strategic Priority 2 which seeks to maximise development in the urban area and away from the wider countryside, valued landscapes and those of special quality and spaces that contribute to settlement definition.

CPRE Hampshire believes that the Vision and Strategic Priority 2 would both be better achieved if a new Green Belt was designated, due to its permanence and effectiveness. We submitted to Fareham BC and to PFSH a report by NEF Consulting on the potential socio-economic and environmental benefits of a Green Belt: <https://www.cprehampshire.org.uk/our-campaigns/south-hampshire-green-belt/>. This demonstrates the considerable financial benefits as well as to health and wellbeing, climate change and natural capital of protecting the green space near to population centres, in perpetuity, something that only Green Belt is designed to achieve.

Looking at the specific policy wording, CPRE Hampshire believes that criterion (e) of **Policy DS1** is unsound, specifically in the way it permits development in the countryside that is compliant with Policies **HP4, HP5 and HP6**. Permissions that might be compliant with these policies appear to be in direct contradiction with the other criteria in **Policy DS1**, and the policy is therefore internally inconsistent.

HP4 relates to the Five Year Housing Supply (5YHLS) and allows residential development outside the urban area boundary where the Council is unable to demonstrate a 5YHLS. It is believed that the Government intends to remove 5YHLS test in the planning reforms, so this policy may be redundant and should be reworded to future proof its deletion. However, that notwithstanding, the main problem is that the wording of Policy HP4 and its linkage with **DS1** could unintentionally lead to countryside locations taking priority over alternative, more sustainable, urban or brownfield locations.

HP5 relates to the provision of affordable housing on sites of 10 or more, and its linkage to **DS1** could unintentionally suggest that Fareham BC accepts in principle the development of ANY affordable housing site outside the urban area boundary. The risk is that the linkage could potentially enable large scale housing development in the countryside as long as it could be demonstrated that 40% affordable housing would be achieved.

HP6 relates to small rural affordable housing exception sites, and whilst CPRE Hampshire supports the provision of rural affordable housing, the concern is that the linkage with **DS1** could inadvertently lead to a series of separate applications which in combination amount to significant levels of development in the countryside. The cumulative impact on the separation of settlements resulting from a number of sites each individually sub- 1 hectare or <5% of the adjacent settlement must be considered, but at the moment the policy has no mechanism for dealing with this potential eventuality. See separate comments on **Policy HP6** as regards the use of the word *OR*.

CPRE Hampshire SUPPORTS criteria i) to v) of **Policy DS1** and believe they provide a sound underpinning of the principles aspired to by Fareham BC.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Fareham BC should look at the areal extent of a possible South Hampshire Green Belt as part of this Local Plan, as it has been confirmed by Leader Cllr Woodward that they wish to see such a designation to protect the countryside and gaps.

Remove the linkage of **Policies HP4, HP5 and HP6** with **Policy DS1**.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Including a proposed South Hampshire Green Belt would be in accordance with the aspirations as set out by the Council in council meetings, PFSH meetings and in press releases.

Removing the linkage of **Policies HP4, HP5 and HP6** with **Policy DS1** would remove the internal inconsistency by removing the possibility of inadvertent development in the countryside.

B4c Your suggested revised wording of any policy or text:

Remove the linkage of **Policies HP4, HP5 and HP6** from Policy **S1 (e)**.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for Local Plans to take the countryside into account when devising spatial development strategy, and we would like to appear at the Hearings to support Fareham BC in choosing this approach. Our expertise lies in spatial strategy and reconciling development requirements with the environmental constraints of countryside, and its uses and purposes.

POLICY DS2: Development in Strategic Gaps

Strategic Policy DS2: Development in Strategic Gaps

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC to designate strategic gaps between Fareham / Stubbington and the Western Wards (Meon Gap) and between Fareham / Bridgemarky and Stubbington / Lee-on-the-Solent (Fareham- Stubbington Strategic Gap). However, a study carried out on behalf of CPRE Hampshire in January 2019, by consultants West Waddy, showed that historically strategic gaps in South Hampshire have failed to adequately prevent coalescence of settlements. This report was shared with Fareham BC as a member of the Partnership for South Hampshire, and can be submitted as part of our evidence on this matter to the examination hearings.

“An Assessment of the Effectiveness of Settlement Gap Policies in South Hampshire in preventing Urban Sprawl & the Coalescence of Settlements” – January 2019, West Waddy.

The conclusions show that through appeals and permissions the gaps designated in South Hampshire (including Fareham) have been significantly reduced over time, and are thus an ineffective policy and thus unsound. Para 3.10 confirms that this has been the case in Fareham.

The findings of this report show that “In the national context, South Hampshire is fairly unique among the large urban areas in England in having no designated Green Belt, with reliance instead being placed upon Gaps designated in Local Plans to prevent the coalescence of settlements.”

Furthermore “given the major urban extensions currently being proposed and the past history of erosion of Gaps through subsequent permissions being granted, a strong argument can be made that the current Gap policies across the sub-region are failing in their remit to prevent coalescence and sprawl, which is ultimately likely to lead to currently separate settlements forming one large South Hampshire conurbation and expanding out into the adjoining areas of countryside. The exceptional circumstances therefore exist to demonstrate that a new stronger policy backed by explicit Government advice is needed to prevent this happening and the tool for this is a Green Belt, which is already in use around most large urban areas in England. South Hampshire is the exception in having no such designation.”

CPRE Hampshire has submitted to Fareham BC and to PFSH a report by NEF Consulting on the potential socio-economic and environmental benefits of a Green Belt: <https://www.cprehampshire.org.uk/our-campaigns/south-hampshire-green-belt/>

Notwithstanding the above comments regarding a new Green Belt, CPRE Hampshire SUPPORTS the removal of the earlier proposed Strategic Growth Area SGA, previously entitled HA2 (in the Reg 18 consultation version) from the now proposed Fareham-Stubbington Strategic Gap. The previous inclusion of the SGA was clearly subject to objections by neighbouring Gosport BC, which would have undermined any Duty to Co-operate and thus soundness. It was also objected to by many CPRE members and is therefore of concern to us.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Fareham BC should look at the areal extent of a possible South Hampshire Green Belt as part of this Local Plan, as it has been confirmed by Leader Cllr Woodward that they wish to see such a designation to protect the gaps between settlements.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Including a proposed South Hampshire Green Belt would be in accordance with the aspirations as set out by the Council in council meetings, PFSH meetings and in press releases, and would lead to a much more rigorous policy to prevent coalescence which is Fareham BC’s stated aim.

A need for a South Hampshire Green Belt was confirmed by Cllr Woodward in the Fareham BC Executive Committee at 6pm on Monday 7th December 2020. Its omission from the Reg 19 Local Plan consultation is thus not in accordance from the council’s own publicly announced policy.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for a new South Hampshire Green Belt, and we would like to appear at the Hearings to further explain our justification and why Fareham merits the exceptional circumstances required to designate a new Green Belt. We have a petition which has been signed by nearly 15,000 people asking Fareham BC (alongside Eastleigh BC, Winchester CC and Test Valley BC) to designate a Green Belt as part of its Local Plan process.

POLICY DS3: Landscape

All Areas of Special Landscape Quality

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE fully SUPPORTS the approach taken by Fareham BC in respect of analysing and including Areas of Special Landscape Quality as part of its development strategy and as Strategic Policy S3. This is in accordance with the aspirations outlined in the NPPF to value landscape for its intrinsic character and beauty of the countryside, as outlined in NPPF Para 170 a) and b).

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has long campaigned for Local Plans to take landscape into account when devising spatial development strategy, and we would like to appear at the Hearings to support Fareham BC in choosing this approach. Our expertise lies in spatial strategy and reconciling development requirements with the environmental constraints of, and impacts upon, the wider landscape.

POLICY H1: Housing Provision

Strategic Policy H1: Housing Provision

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

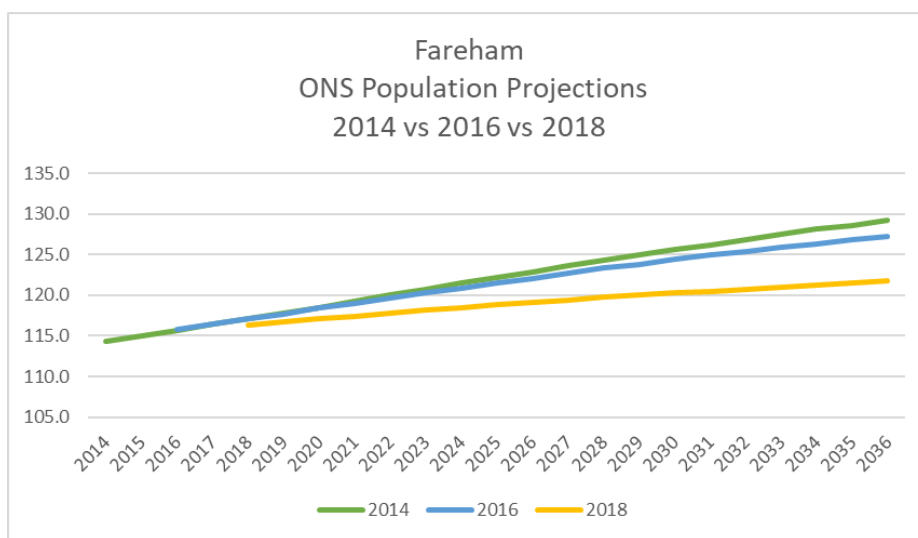

B3 Please provide details you have to support your answers above

The approach taken by Fareham BC to calculating housing need for this Reg 19 version is based upon the MHCLG consultation on a new standard method in August 2020, which showed Fareham’s housing need to be lower (403 dpa) than using the previous standard method (514 dpa). CPRE Hampshire SUPPORTS the use of the latest base data on household projections (the 2018-based projections from the ONS) as it conforms with Para 31 of the NPPF “The preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be adequate and proportionate, focused tightly on supporting and justifying the policies concerned, and take into account relevant market signals.”

As can be seen from the graph below, the most up-to-date population projections (in 000’s) for Fareham evidences the trend towards a lower requirement, and this would translate into a lower household projection. The impact of Covid-19, and corresponding economic fallout, on migration patterns will remain unclear for some time, and it is therefore sensible to use a cautious approach to planning and development.

However, for Fareham to agree to take unmet need from Portsmouth is premature, predating as it does the revised statement of common ground from PFSH, and therefore Policy H1 is unsound.

It is also clear that there remains a significant reliance on delivery of housing at Welborne, which is subject to a separate plan. Delays to infrastructure finding at Welborne could have an impact on Fareham's overall strategy for delivery of its housing needs in the plan period.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove the requirement to take housing from Portsmouth CC.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a recognised authoritative voice on Hampshire's housing numbers, the standard methodology and has been involved in this aspect of Fareham's Local Plans since the time of the South East Plan in 2005, and the formation of PfSH (Partnership for South Hampshire).

CPRE Hampshire is part of an expert group in the National CPRE network on housing numbers, and would like to appear at the hearing sessions to SUPPORT the use of the most up-to-date household projections.

POLICY HA1: North and South of Greenaway Lane, Warsash

B1 Which part of the Local Plan is this representation about?

- | | | |
|-------------------------------------|------------------|-----------|
| <input type="checkbox"/> | A paragraph | Go to B1a |
| <input checked="" type="checkbox"/> | A policy | Go to B1b |
| <input checked="" type="checkbox"/> | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Housing Allocation Policy: HA1 North and South of Greenaway Lane, Warsash

B1c Which part of the Policies Map?

Figure 4.1

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire has significant concerns about the piecemeal development already seen, and proposed, in the Warsash area. Population growth in the 10 years 2009-2019 has reached 9% in Warsash and the western wards, while Fareham itself has only grown by 4%. As Warsash has no access to the rail network, this pattern of development could not be considered sustainable. It therefore fails the soundness tests.

An indicative framework as shown in Figure 4.1, but this does not meet the requirements for a masterplan, and it is not adequate for long-term planning to integrate the various separate sites and applications by a series of different developers. Policy HA1 will fail to meet any government aspirations for placemaking as set out in the NPPF Chapter 12, Paras 124 to 130, and is therefore unsound.

Para 124 of the NPPF states “The creation of high quality buildings and places is fundamental to what the planning and development process should achieve. Good design is a key aspect of sustainable development, creates better places in which to live and work and helps make development acceptable to communities.”

Para 125 of the NPPF states “Design policies should be developed with local communities, so they reflect local aspirations, and are grounded in an understanding and evaluation of each area’s defining characteristics.” It is apparent from discussion with CPRE Hampshire members that there has not, to date, been any meaningful involvement of local communities.

It is clear that the settlement policy boundaries have been moved to accommodate the applications pending for Warsash. This is not consistent with a plan-led approach but is simply reactive to a developer-led situation, and takes no account of the area’s defining features.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

More analysis of the sustainability criteria for the overall development strategy, such as access to public transport is required before sites such as HA1 are confirmed. Has every opportunity for brownfield development around rail networks been ruled out?

Much more consultation with the local community is required before the proposed HA1 framework meets NPPF prerequisites.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire, the countryside charity, has worked for some years with local campaign group Save Warsash and the Western Wards, and a number of our members will be affected by the proposals for such a large allocation of housing to one small settlement. We would like to take part in the hearing sessions to represent their concerns for initial choice of an unsustainable site, loss of countryside and open space in Warsash, and poor design due to lack of a masterplan.

POLICY HP4: Five-year housing land supply

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 5.22 to 5.28

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy HP4: Five-year housing land supply

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

Policy HP4 states “If the Council cannot demonstrate a five-year supply of land for housing against the housing requirement set out in Policy H1, additional housing sites, outside the Urban Area boundary, may be permitted where they meet all of the following criteria.....” The problem with this policy is that inadvertently it encourages the first choice of sites to be “outside the Urban Area”. CPRE Hampshire is sure that this is not what Fareham BC intends, and in any event it would not be in accordance with the councils own aspirations for a brownfield first approach, nor in accordance with the NPPF Para 137, and is therefore unsound. A sequential approach should be used, even in the event of a lack of a five-year housing land supply.

The problem is exacerbated by the linkage of **Policy HP4** with **Policy DS1**, particularly **DS1 Criterion (e)** as discussed above.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy HP4 should be rewritten to include a sequential approach, which “makes as much use as possible of suitable brownfield sites and underutilised land” as per Para 137 (a) of the NPPF.

The linkage of **Policy DS1 (e)** and **Policy HP4** should be removed.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be in accordance with the NPPF.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is part of an expert group in the National CPRE network on housing numbers, and the five-year housing land supply, and would like to appear at the hearing sessions to discuss its impact on the Fareham Reg 19 Local Plan.

POLICY HP6: Exception Sites

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 5.43 to 5.51

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy HP6: Exception sites

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The second part of **Policy HP6, Criterion (c)**, would allow exception sites with a limit of 1 hectare *OR* a proviso that the scheme does not exceed 5% of the size of the adjacent settlement. The problem is the word *OR*, as this could lead to large sites adjacent to large settlements being permitted as they would still be beneath the 5% cut-off. For example, Fareham town is a large settlement, of some 20,000 households, and so an exception site of up to 5% could itself number 1,000 dwellings. CPRE Hampshire is sure that this is not what was intended by Fareham BC as the aspiration is for small sites on urban boundaries.

The problem is exacerbated by the linkage of **Policy HP6, Criterion (c)**, with **Policy DS1**, particularly **DS1 Criterion (e)** as discussed above.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy HP6 should be rewritten to include a sequential approach, which “makes as much use as possible of suitable brownfield sites and underutilised land” as per Para 137 (a) of the NPPF.

Criterion c) should be reworded to remove the reference to *OR* 5% of the size of the adjacent settlement and have a fixed upper limit of what is meant by ‘small sites’ as identified in the justification text (Para 5.46).

The linkage of **Policy DS1 (e)** and **Policy HP6** should be removed.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Any ambiguity on what a “small site” means would be removed giving clarity for applicants and for FBC.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of affordable housing, such that it is located and designed appropriately, and would like to appear at the hearing sessions to discuss the impact of Policy HP6 on the Fareham Reg 19 Local Plan.

STRATEGIC POLICY CC1: Climate Change

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 8.1 to 8.10

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy CC1: Climate change

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant		NO
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire generally SUPPORTS the approach taken by Fareham BC to Climate Change. But we believe that **Policy CC1, Criterion (a)** does not go far enough to encourage/enforce a truly sustainable pattern of development and is unlikely to lead to a meaningful reduction of emissions from private car use.

Section 19(1A) of the Planning and Compulsory Purchase Act 2004 requires that a local authority's development plan documents must: (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority's area contribute to the mitigation of, and adaptation to, climate change.

The NPPF Para 148 further includes the requirement that “the planning system should support the transition to a low carbon future in a changing climate”, should “shape places in ways that contribute to radical reductions in greenhouse gas emissions” and Footnote 48 “in line with the objectives and provisions of the Climate Change Act 2008.”

CPRE Hampshire believes that one of the most fundamental ways of combating the likelihood of adverse climate change, is to plan development where it can use better public transport and be less reliant on the car. The aspirations in **Policy CC1** are more about how development can respond to climate change, and rather less about how spatial planning of future development can help prevent it. We consider that this is a missed opportunity. According to Camilla Ween, Harvard Loeb Fellow, speaking on behalf of Transport for New Homes “Transport is responsible for about 26% of greenhouse gas emissions, much arising from personal car journeys. Our society will not be able to achieve the UN goals if we do not change the way we travel; that means we need to create new communities that are NOT car dependent. That means careful consideration of where new development is located, as well as how we design new communities, for example, places that are well connected with high quality public realm and movement infrastructure that encourage people to want to move to a car-free lifestyle.” It must be a fundamental tenet of the Fareham Local Plan that NO development should be permitted that relies on the car as its main means of access.

Nothing less than a drastic change to spatial strategy and a move away from South Hampshire’s historic pattern of sprawling suburbs will enable any meaningful contribution to the fight against adverse climate change. We owe it to future generations to do our utmost to shift patterns of behaviour that have become entrenched with the use of the private car. Even electric cars will not solve many of these issues as they still leave residues from tyres and fluids and are unsustainable in terms of battery manufacture.

Policy CC1 is therefore not legally compliant unless the large part of Fareham’s spatial strategy is geared to development around mass public transport hubs and avoiding sites which are car-dependant. It is clear that sites such as Policy HA1 would fail to meet this condition.

CPRE Hampshire recommends the checklist provided by Transport for New Homes, which sets out an objective approach to planning new housing areas without dependence on cars:

<https://www.transportfornewhomes.org.uk/wp-content/uploads/2019/10/checklist.pdf>

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

CPRE Hampshire recommends strengthening **Policy CC1, Criterion (a)** to enable a spatial strategy more likely to meet the requirements set out in Section 19(1A) of the Planning and Compulsory Purchase Act 2004, and the NPPF, by including a requirement for mass public transport hubs to be the first approach for development, and to enable Fareham to refuse car-dependent applications.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be in accordance with Section 19(1A) of the Planning and Compulsory Purchase Act 2004, and the NPPF Para 148.

B4c Your suggested revised wording of any policy or text:

(a) A development strategy that minimises the need to travel by allocating sites and generally directing development to locations **near to mass public transport hubs**, with better services and facilities, or where they are capable of being improved.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning housing, such that it is located and designed appropriately around public transport hubs to minimise emissions and would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy CC1** in this regard.

POLICY NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| X | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.5 to 9.27

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

B1c Which part of the Policies Map?

The Local Ecological Network map in Appendix C

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

The approach taken by Fareham BC is sound, and CPRE Hampshire SUPPORTS the requirement for nature to be conserved and ecological networks to be protected as per the forthcoming Environment Act.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning development, such that it is located and designed appropriately to conserve and enhance the biodiversity of the area and would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy NE1** in this regard.

POLICY NE2: Biodiversity net gain

B1 Which part of the Local Plan is this representation about?

- | | | |
|-------------------------------------|------------------|-----------|
| <input checked="" type="checkbox"/> | A paragraph | Go to B1a |
| <input checked="" type="checkbox"/> | A policy | Go to B1b |
| <input checked="" type="checkbox"/> | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.28 to 9.44

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy NE2: Biodiversity net gain

B1c Which part of the Policies Map?

The Local Ecological Network map in Appendix C

B2 Do you think the Publication Local Plan is:

Yes

No

Legally compliant

YES

Sound

YES

Complies with the duty to co-operate

YES

B3 Please provide details you have to support your answers above

The approach taken by Fareham BC is sound, and CPRE Hampshire SUPPORTS the requirement for biodiversity net gain as per the forthcoming Environment Act.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning development, such that it is located and designed appropriately to see a net gain in biodiversity of the area, and would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy NE2** in this regard.

POLICY NE4: Water quality effects on the SPAs, SACs and Ramsar sites of the Solent

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.50 to 9.54

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY NE4: Water quality effects on the SPAs, SACs and Ramsar sites of the Solent

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant		NO
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire understands there is an outstanding judicial process underway regarding the effectiveness of Fareham BC's proposals for mitigating nitrate and other pollutants on the Solent and other protected waterways. At this point, CPRE Hampshire is therefore unable to endorse the proposed policy until the legal issues have been resolved.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire's remit covers protection and enhancement of both land and seascape, including Hampshire's iconic chalk streams and rivers, and the Solent. In the absence of an outcome on the legal matters, the hearing session may be the first opportunity to evaluate the effectiveness and legality of the proposed policy.

POLICY NE6: Trees, woodland and hedgerows

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.79 to 9.89

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY NE6: Trees, woodland and hedgerows

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

Yes

No

Legally compliant

YES

Sound

YES

Complies with the duty to co-operate

YES

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy HE6** is sound. The Climate Change Committee has called for a 40% increase in the extent of hedgerows by 2050 to help tackle the climate emergency, and we would thus like to see more hedgerows planted and restored in Fareham BC.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

NO Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

POLICY NE8: Air quality

B1 Which part of the Local Plan is this representation about?

<input checked="" type="checkbox"/>	A paragraph	Go to B1a
<input checked="" type="checkbox"/>	A policy	Go to B1b
<input type="checkbox"/>	The policies map	Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.98 to 9.118

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy NE8: Air quality

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

Yes

No

Legally compliant

YES

Sound

YES

Complies with the duty to co-operate

YES

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy HE8** is sound.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

NO Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

POLICY NE9: Green infrastructure

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 9.119 to 9.125

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy NE9: Green infrastructure

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound	YES	
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy HE9** is sound. However, we believe that a link with **Policy HE1** should be included within **Policy HE9** itself, rather than just within the supporting text in **Para 9.122**. CPRE Hampshire further believes that much better Green Infrastructure provision could be safeguarded over the long term if it were to be incorporated within a South Hampshire Green Belt.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of green infrastructure alongside planning development, such that it is located and designed appropriately, in order to benefit biodiversity, natural capital, but also residents' health and wellbeing. We would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy NE9** in this regard, and to discuss whether a South Hampshire Green Belt could ensure green infrastructure is protected in perpetuity.

POLICY TIN1: Sustainable transport

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 10.1 to 10.11

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy TIN1: Sustainable transport

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire SUPPORTS the approach taken by Fareham BC and consider **Policy TIN1** to be a good starting point. CPRE Hampshire recognises that Fareham BC aspire to have ‘good growth’ with existing and proposed transport corridors influencing choice of development, however we feel **Policy TIN1** does not go far enough. The Council should feel empowered to reject development which is not already located around, or can provide, public mass transit hubs, in particular the rail network. The policy as it stands does not give Fareham BC a sufficiently robust mechanism for achieving this. It is therefore unlikely to comply with the aspirations to meet climate change objectives as set out in **Policy CC1** or for air quality in **Policy NE8**.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The principles of development and transport as set out in the Transport for New Homes checklist should be followed - <https://www.transportfornewhomes.org.uk/the-project/checklist-for-new-housing-developments/>.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The policy would then comply with climate change and air quality objectives.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire is a keen proponent of a spatial strategy for planning housing, such that it is located and designed appropriately around public transport hubs to minimise emissions and impacts on climate change. We would like to appear at the hearing sessions to discuss the likely effectiveness of **Policy TIN1** in this regard.

POLICY D1: High quality design and place making

B1 Which part of the Local Plan is this representation about?

- | | | |
|----------|------------------|-----------|
| X | A paragraph | Go to B1a |
| X | A policy | Go to B1b |
| | The policies map | Go to B1c |

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

Paragraphs 11.1 to 11.36

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

POLICY D1: High quality design and place making

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	YES	
Sound		NO
Complies with the duty to co-operate	YES	

B3 Please provide details you have to support your answers above

CPRE Hampshire welcomes the approach taken by Fareham BC towards high quality design in **Policy D1** but would like to see the inclusion of the words countryside and landscape into **Criterion (i)**. The omission of these words makes it inconsistent with **Strategic Policies DS1 and DS3** and therefore unsound.

The design quality of future developments starts with overall masterplanning and landscape context as well as specific building details. Fareham has seen a proliferation of poorly designed car dependant nondescript developments over recent years, and it is critical that major improvements are made for the future.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include the words countryside and landscape into **Criterion (i)**.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

This would then be in accordance with **Strategic Policies DS1 and DS3**.

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

YES

Yes, I want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

CPRE Hampshire has many members in Fareham who are keenly interested in the design of future developments and would like to see major improvements over previous failures in design quality, which has historically resulted in large sprawling estates of car-dependant nondescript housing.

Respondent details:

Title:	Mrs
First Name:	Robyn
Last Name:	da Silva
Job Title: (where relevant)	[No Reply]

Address:	[Redacted]
Postcode:	[Redacted]
Telephone Number:	[Redacted]
Email Address:	[Redacted]

1) Policies map: HOUSING ALLOCATIONS (HA1, HA3-4, HA7, HA9-10, HA12-13, HA15, HA17, HA19, HA22-24, HA26-44)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Legally Compliant: FBC have not engaged sufficiently with the local community since 2017 and have repeatedly ignored responses from the community, including protest marches and a petition with sufficient signatures for a debate. The distribution of housing across the borough is disproportionate. There has been an overall reduction in the number of houses allocated across the borough, however the number of houses for HA1 has remained the same. This has resulted in an increase in the proportion of houses allocated to HA1 relative the remainder of the borough. The local plan does not comply with the Habitats Directive. Housing on this site will not improve the integrity of designated sites. It is not clear that FBC is applying advice from Natural England correctly. Sound: HA1 is a Greenfield site. FBC are re-designating it for their own convenience. There is insufficient infrastructure to support the scale of development planned by FBC for HA1. Insufficient analysis has been done to take into account the traffic implications of 1500-2000 additional cars. Complies with Duty to Cooperate: The deal that FBC made regarding the Stubbington Strategic Gap does not appear to have been properly discussed and debated. The process is opaque.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

FBC should have qualified people prepare a plan based on proper investigation and analysis. The number of houses allocated across the borough should be proportionate and investment in infrastructure made. New housing should not be built on greenfield sites and the council should not be arbitrarily re-classifying greenfield as brownfield. Development should be looked at holistically rather than piecemeal developments by individual developers. Much more thought needs to be applied to the Nitrates issue and ensuring compliance with the advice of Natural England.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

All of the objections made would be addressed.

Your suggested revised wording of any policy or text:

All of the related points above would need to be re-worded.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Sent by email to: consultation@fareham.gov.uk

15th December 2020

Dear Sir/Madam,

Response to the consultation on the Fareham Borough Local Plan 2037

Foreman Homes would like to thank Fareham Borough Council for giving us the opportunity to comment on the emerging Local Plan. We would welcome, in due course, participating in hearings of the Examination in Public.

The following comments are related to:

- Policy H1: Housing Provision
- Policy HP2: New Small-Scale Development outside the Urban Areas
- Policy HP4: Five-year Housing Land Supply
- Policy HP5: Provision of Affordable Housing
- Policy HP9: Self and Custom Build Houses
- Policy NE2: Biodiversity Net Gain
- Policy HA1: North and South of Greenaway Lane
- Policy HA15: Beacon Bottom West, Park Gate
- Policy HA27: Land off Rookery Avenue
- Policy HA34: Sovereign Crescent

Policy H1: Housing Provision

The policy is not sound as it is not consistent with national policy.

Housing Requirement

Paragraph 4.2

The paragraph sets out how the housing need is determined through the use of the standard methodology set out in National Planning Practice Guidance (PPG). Under this method the housing need for Fareham currently stands at a minimum 514 dwellings per annum (dpa), the Council have

**Unit 1, Station Industrial Park, Duncan Road,
Park Gate, Southampton SO30 1BX**
0330 333 7365 foremanhomes.co.uk

Foreman Homes Limited registered in England Company no 03313213

not however, adopted this method in calculating the housing need. As it is rightly said, in August 2020 the Government released a consultation on a new standard methodology and this is how the housing requirement has been calculated. This methodology is, however, yet to be adopted and therefore the resultant identified housing requirement figure set out in the policy falls way below what is currently required to accommodate the growing need in the Borough (as per the current standard methodology). Due to this shortfall, the policy is contrary to paragraph 60 of the National Planning Policy Framework which states that the strategic policies should be informed by a local housing need assessment, conducted using the standard method in the NPPG, and therefore the Council's approach to calculating housing need is incorrect and considered unsound.

Housing Supply

Paragraph 4.8

The paragraph sets out that in order to meet the requirement, the Council have taken into account existing commitments including applications that have 'resolution to grant' which equate to 4,858 (including Welbourne). The latest Five Year Housing Land Supply Position (June 2020) sets out that Planning Inspectors found that applications with a 'resolution to grant planning permission' are not considered deliverable in terms of the definition set out in Annex 2 of the NPPF. The sites with resolution to grant, except for those that relate to allocated housing sites within the Council's adopted Local Plan, should not be included in the five year housing land supply calculations. A number of sites are dependent on nutrient neutrality solutions, and although these are now starting to come forward there is no guarantee these sites will be deliverable. It is not clear as to whether these figures have been removed from the projected land supply calculation in the Local Plan 2037, but if they haven't these numbers need to be adjusted to reflect the projected housing land supply.

Housing Provision

Paragraph 4.19

The paragraph sets out a number of previous housing allocations that have been removed as they are considered to be no longer available or suitable. Not all sites have been examined as part of these comments, however, the removal of allocations HA16 (Military Road) and HA20 (North Wallington and Standard Way) is considered unjustified (Appendix 1). These sites are available and are also suitable for development in the short term, these sites were identified in the SHELAA as being suitable, available and achievable (Appendix 2). There has been no change in circumstances since

these sites were allocated in the previous iteration of the plan, therefore they should not be removed. There are live applications for both sites (ref: P/19/0130/OA and P/19/0894/OA). The allocation site HA16 would contribute 26 self-build dwellings and HA20 would provide 29 dwellings towards the housing numbers. These sites are important in bringing forward housing numbers to meet Fareham's land supply. The de-allocation of the self-build site is contrary to policy 61 of the NPPF which states that "housing need for different groups (including those wishing to commission or build their own homes) should be assessed and reflected in planning policies". The removal is also contrary to the self and custom build requirement that the Council promotes in Policy HP9 which identifies a need for these dwellings in the Borough. The proposed developments include the provision of both market and affordable units the removal of the allocation is again contrary to paragraph 61 of the NPPF. The removal of these sites is unjustified and will result in the loss of much needed housing, including affordable and self-build, the policy is therefore considered unsound.

Conclusions on Policy H1

The Policy is not sound as considered on the basis that:

- It uses a standard method for assessing housing need that is still out to consultation and potentially subject to change.
- It is not clear as to whether the calculated land supply includes applications which have resolutions to grant, if sites have been incorporated numbers should be adjusted to remove these permissions in accordance with the definition of "deliverable" as set out in the NPPF.
- The removal of allocated sites HA16 and H20 is unjustified as they were previously considered by the Council to be suitable and deliverable and there have been no changes in circumstances.

Policy HA1: North and South of Greenaway Lane

The policy is sound as it is consistent with national policy

The allocation allows for 824 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the strategic development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF which states "Planning policies should identify a supply of a) specific, deliverable sites for years one to five

of the plan period and b) specific, developable sites or broad locations for growth for 6-10 and where possible for years 11-15 of the plan.” The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

Foreman Homes have submitted two outline applications on two parcels of land on the northern side of Greenaway Lane. An outline application for the land to the east of Brook Lane (ref: P/17/0845/OA) for the development of up to 180 dwellings with access off Brook Lane has a resolution to grant planning permission. The second application was submitted in 2018 and for residential development of up to 80 dwellings on the site known as land to the west of Lockwood Road (ref: P/18/0590/OA). Both sites are developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HA15: Beacon Bottom West, Park Gate

The policy is sound as it is consistent with national policy

The allocation allows for 29 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a current planning application for 29 dwellings (P/18/1258/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HA27: Land off Rookery Avenue

The policy is sound as it is consistent with national policy

The allocation allows for 32 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a current planning application for 32 dwellings (P/19/0870/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted. The site is defined as brownfield land, therefore development would make effective use of the land and policy is supported by the NPPF Paragraph 117-119.

Policy HA34: Sovereign Crescent

The policy is sound as it is consistent with national policy

The allocation allows for 38 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a resolution to grant an application for 38 dwellings (P/18/0484/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HP2: New Small-scale Development

The policy is not sound as it is not consistent with national policy.

The overarching principle of this policy is supported, however, the policy as it is currently written is not consistent with national policy. Paragraph 122 and 123 of the NPPF set out that planning policies should support development that makes efficient use of land in order to meet as much of the identified need for housing within the area. The restriction of 4 dwellings on sites on the edge of urban areas may not be constructive to making efficient use of the land as some sites may be able to accommodate more. It is suggested that the threshold be increased to 10 units which would reflect the definition of a minor development as set out in Annex 2 of the NPPF.

Paragraph 5.16

Paragraph 5.16 supports Policy HP2 (New Small-Scale Development Outside the Urban Area) and sets out what is considered to be sustainable in relation to walking distances from the site to nearby facilities. These criteria are based only on walking and not cycling distances, which should be considered as it is another form of transport that the Council is promoting. The distances set out in the criteria should be based on the Manual for Streets which sets out what is considered to be sustainable:

- 800m is a comfortable walking distance.
- 2km is a reasonable walking distance.
- Cycle distance has a range up to 5 miles.

Recommendations

The threshold of not more than 4 dwellings should be amended to a threshold of not more than 10 dwellings.

Walking distances set out in the policy should be changed to be in line with the Manual for Streets. Cycling distances should also be considered as cycling is promoted as a sustainable alternative to the

use of a car. If the distances are set to those currently suggested in the draft plan, a number of sustainable sites will be discounted and the policy would not make sufficient use of land

Conclusions on Policy HP2

Although the Policy is generally supported, as it is written it is currently considered to be unsound:

- The limit of 4 dwellings is not constructive to making the most efficient use of land as set out in paragraphs 122 and 123 of the NPPF
- Sustainable distances only consider walking distances and not cycling or multi modal trips.

Policy HP4: Five-year Housing Land Supply

The policy is sound as it is consistent with national policy

Policy is positively prepared and justified and is consistent with paragraph 35 of the NPPF. The policy reflects the existing policy DSP40 of the Local Plan Part 2 which has allowed for the delivery of dwellings towards the housing land supply of the borough. The continuation of this approach to providing housing land supply is considered appropriate and pro-active. This will allow for a contingency plan if the developments set out in Policy HP1 do not come forward within the plan period and the 5 year housing land supply falls short.

Policy HP9: Self and Custom Build Houses

The policy is unsound as it has not been justified

Although it is agreed that provisions should be made for self and custom build dwellings and applications should be supported in principle, the requirement for sites over 40 to set aside 10% of dwellings is unjustified and inconsistent with national policy.

The requirement would place burdens on house builders which may not be justified. The Self and Custom Build Background Paper suggests that a significant proportion of sites were met through windfall sites and this is likely to continue. Evidence therefore suggests that the Council, through normal development management processes, is supporting sufficient plots to come forward without imposing a requirement on major developments. In addition, Policy H2 will support the delivery of additional sites that will be more attractive to both self and custom build housing. If the demand is being met by smaller sites, as it currently is, there is no requirement or justification to rely on major housing developments, which are likely to be less attractive. The requirement for a developer to wait

12 months before selling a dwelling as it is not required as a self-build is unjustified and reduces the amount of housing available on the open market and as a result reduce housing figures.

Conclusion of Policy HP9

The policy is unjustified and is not positively prepared in accordance with paragraph 35 of the NPPF. The policy is not required there should be deleted.

Strategic Policy E1: Employment Land Provision

The policy is unsound as it is not in accordance with national policy

The policy sets out there is a requirement of 104,000m² of new employment floor space required over the plan period and this will be provided over three sites. It is suggested that there is a need for a contingency plan in case these sites do not come forward to meet the required space. A number of employment allocations, which were allocated in the previous iteration of the draft local plan, have been removed which is considered to be unjustified as they were considered sustainable and deliverable and key to bringing forward much needed employment space. It is argued that further sites should be allocated to ensure there is no shortfall if the allocated sites do not come forward or are not suitable for the needs of future employers.

The employment allocation E5 (Standard Way, Appendix 3) included in the previous edition of the emerging Local Plan 2037 was identified as a site that could provide 2000m² of flexible employment floor space. This site was identified in the SHELAA as being suitable, available and achievable (Appendix 4). There has been no change in circumstances since these sites were allocated in the previous iteration of the plan, therefore they should not be removed. The site is still available and developable which is evident through the live application on site – P/19/0196/OA.

Conclusion of Policy E1

The reliance on three allocations does not allow for flexibility if these sites do not come forward. The floorspace required over the plan period does not take into consideration fluctuation in the employment market, therefore, further allocations should be included in the policy.

Policy NE2: Biodiversity Net Gain

The policy is unsound as it is not in accordance with national policy

Policy reflects the Government's suggestion that new development should improve the biodiversity on their site to show a 10% net gain over the pre-development baseline. Whilst it is recognised that this is the Government's current favoured position, it is likely that there will be transition period to allow the development industry to adapt to the proposed changes. As such, it is suggested that the policy remains consistent with paragraph 170 of national policy to seek net gains in biodiversity and not include the requirement to show a 10% net gain. A policy without a specific percentage requirement would be consistent with current policy and should the relevant legislation be enacted, as currently proposed, such a policy would be sufficiently flexible to support a 10% requirement and any transition period.

Conclusion of Policy NE2

Although policy reflects the Government's current favoured position a percentage requirement should not be set as it is contrary to paragraph 170 which does not set out a specific percentage.

Conclusion

At present it is not considered that the plan is sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, for the following reasons:

- Housing needs have not been assessed in accordance with standard methodology as set out in the PPG;
- It is not clear as to whether the calculated land supply includes applications which have resolutions to grant, if sites have been incorporated, numbers should be adjusted to remove these permissions in accordance with the definition of "deliverable" as set out in the NPPF.
- The removal of allocated sites is unjustified
- Policy H2 is inconsistent with national policy with regard to making the most effective use of land;
- Requirement for 10% of plots on sites over 40 units be allocated for self-builders is unjustified;

A number of policies are considered sound in accordance with paragraph 35 of the NPPF in that they are positively prepared, justified and effective. These include:

- Policy HA1: North and South of Greenaway Lane

- Policy HA15: Beacon Bottom West, Park Gate
- Policy HA27: Land off Rookery Avenue
- Policy HA34: Sovereign Crescent
- Policy HP4: Five-year Housing Land Supply

We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and examination. Should you require any further clarification on the issues raised in this representation please contact me.

Yours faithfully,

Katherine Richards BSc MSc MRTPI

Appendix 1: Allocations HA16 and H20 removed from the Local Plan

DEVELOPMENT ALLOCATIONS

Housing Site: HA16	SHLAA Reference: 27
Name: Military Road	Proposed Use: Self and Custom Build
Location: Wallington	Capacity: 26 dwellings
Size: 2.2 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- a) The provision of land for self and custom build housing, to include the provision of serviced plots; and
- b) Provision of an illustrative masterplan to identify the layout of individual plots;
- c) The quantum of housing proposed is broadly consistent with the indicative site capacity; and
- d) Primary highway access shall be focused from Military Road; and
- e) Building heights shall be limited to a maximum of 2 storeys; and
- f) Safe pedestrian and cycle access and crossing points from the site to Pallant Gardens, Drift Road and Pinks Hill housing allocation (HA8); and
- g) Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living

DEVELOPMENT ALLOCATIONS

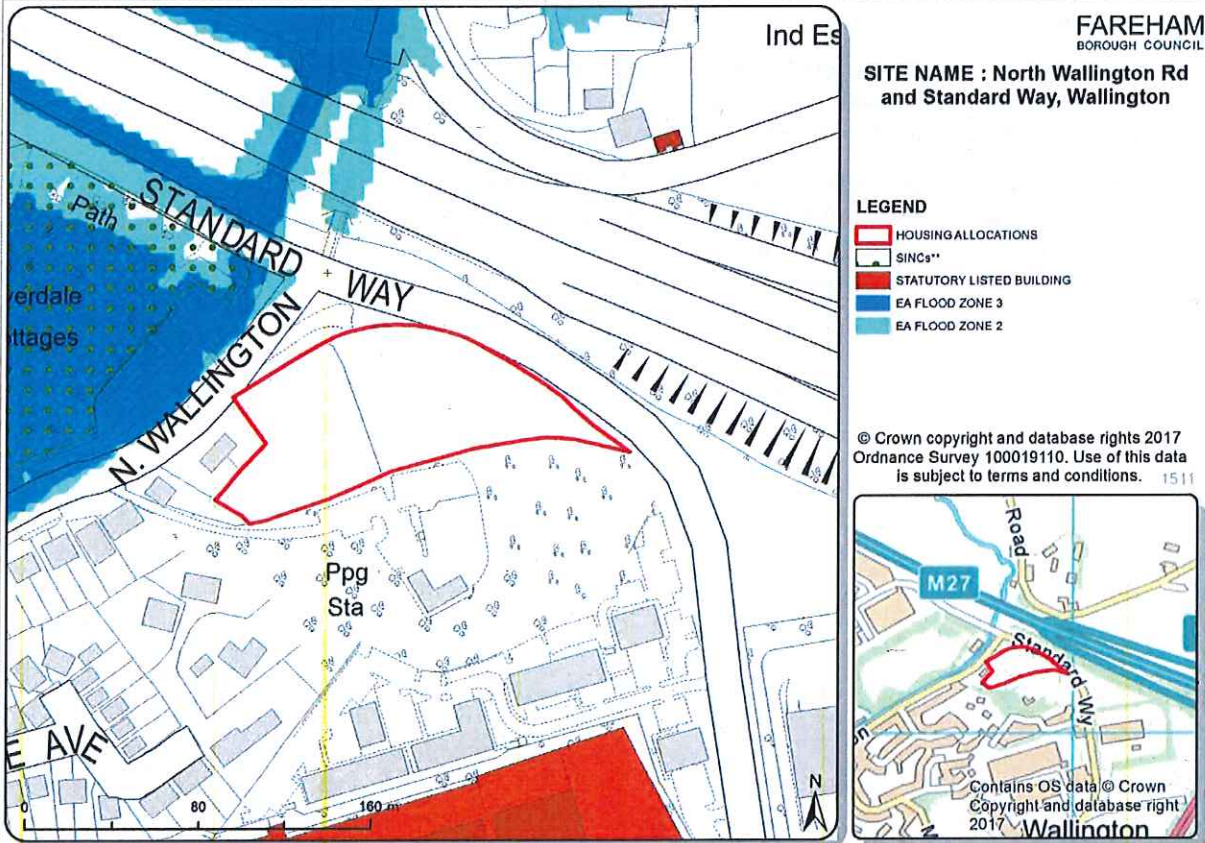

conditions or prevent damage to any nearby dwellings, roads, footpaths or other infrastructure; and

- h) A Heritage Statement shall accompany any application to provide details on the potential impact of proposals on the conservation and setting of the Fort Wallington façade; and
- i) Proposals shall demonstrate that the development will have no adverse impacts upon groundwater in respect of its location in Zone 1; and
- l) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Off-site highway improvement and mitigations works; and
 - Local schools and early-years childcare infrastructure (as identified by the Local Education Authority); and
 - On-site open space which shall be provided on the eastern part of the site in order to provide an appropriate setting to the Fort Wallington façade.

DEVELOPMENT ALLOCATIONS

Housing Site: HA20	SHLAA Reference: 324
Name: North Wallington and Standard Way	Proposed Use: Residential
Location: Wallington	Indicative Capacity: 21 dwellings
Size: 0.87 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- a) The quantum of housing proposed is broadly consistent with the indicative site capacity; and
- b) Primary highway access shall be focused from North Wallington; and
- c) The height of buildings shall be limited to a maximum of 2 storeys; and
- d) The design and layout of proposals shall retain and strengthen the existing tree boundary located along the southern perimeter of the site. The existing trees and hedgerows shall also be retained along North Wallington and Standard Way frontage except where access points may be required; and
- e) Proposals will need to minimise any impact upon the amenity of the adjacent public house residences; and
- f) Proposals shall include a safe pedestrian and cycle crossing point of North Wallington

DEVELOPMENT ALLOCATIONS

to/from the site with Standard Way; and

- g) A noise assessment shall accompany an application for residential development to assess the level of noise from the M27. The design and layout of proposals must take account of any noise mitigation measures that are identified by the assessment; and
- h) Provision of an air quality assessment to identify appropriate on-site measures to mitigate NO₂ emissions arising from the M27 (in accordance with Policy INF2); and
- i) Proposals shall demonstrate that the development will have no adverse impacts upon groundwater in respect of its location in Zone 1; and
- j) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Off-site highway improvement and mitigations works; and
 - Local schools and early-years childcare infrastructure (as identified by the Local Education Authority); and
 - Enhancements to existing off-site open space.

Appendix 2: SHELAA Site 27 (Military Road) and Site 324 (North Wallington and Standard Way)

5. Developable Housing Site Assessments

SITE DETAILS		Developable Housing Site	Fareham East
ID:	27	Site Name:	Military Road, Wallington
Current Land Use:	Paddock		
Surrounding Land Use:	Residential to north and along south boundary. Employment (Fort Wallington) to northeast (Grade II Listed Building)		
Gross Site Area (ha):	2.17	Housing Yield (estimate):	26
Employment Yield (estimate):	0	Gypsy and Traveller Pitches (estimate):	0
SUITABILITY			
Constraints:	Public ROW, Agricultural Land Grade 2, Minerals and Waste 2016 Brick Clay and Superficial sand/gravel, Within 500m of SPA, Within 500m of Ramsar, Within 500m of SSSI, TPOs, Ground Water Protection Zone, Countryside		
Highways/ Pedestrian Access:	Access via Drift Road would be unsuitable. Improvements to the Military Road/ Pinks Hill junction would be required but is considered feasible. Pinks Hill would require improvement to the A27 slip road. Pedestrian and cycle connections would be required to link the site to local services.		
Conservation Comments:	Fort Wallington is a grade II listed building. One of a series of forts built in the 19th century for the defence of Portsmouth Harbour. The south facing curtain wall survives, development of the eastern area would harm the setting of the listed building. The existing northern boundary marks the line of the fort perimeter, retaining a break to define the outline of the former fort would be preferable.		
Noise/Air Quality Assessment:	A noise assessment would be required given the sites proximity to Fort Wallington Industrial Estate but otherwise unlikely to be any issues in this regard.		
Archaeology:	Site not within identified area of archaeological potential.		
Ecology Comment:	Site provides good habitat for notable invertebrate and supports dormice and reptiles. Bat flight line connectivity between wooded habitats and flight line/grazing/roosting habitat for intertidal grazing birds. Woodland should be maintained and any introduced gaps should minimise loss of connectivity. Lighting strategy should leave edges dark.		
Accessible Facility Types: 7/10	Within 1600m of a Secondary School, within 800m of a Convenience Store or Supermarket, within 1200m of a GP Surgery, within 1600m of a Major Employment Areas, within 800m of a Accessible Green or Play Space, within 1600m of a Town/District or Local Centre, within 800m of a Community/Leisure Facility		
Suitability Comment:	Suitable highways improvements required. Development must have regard to TPOs, Listed Building and ecological potential. Proximity of Fort Wallington Industrial Estate with regards to noise impact should be considered.		
Is the site suitable?	Yes	Is the site available?	Yes
		Is the site considered achievable?	Yes

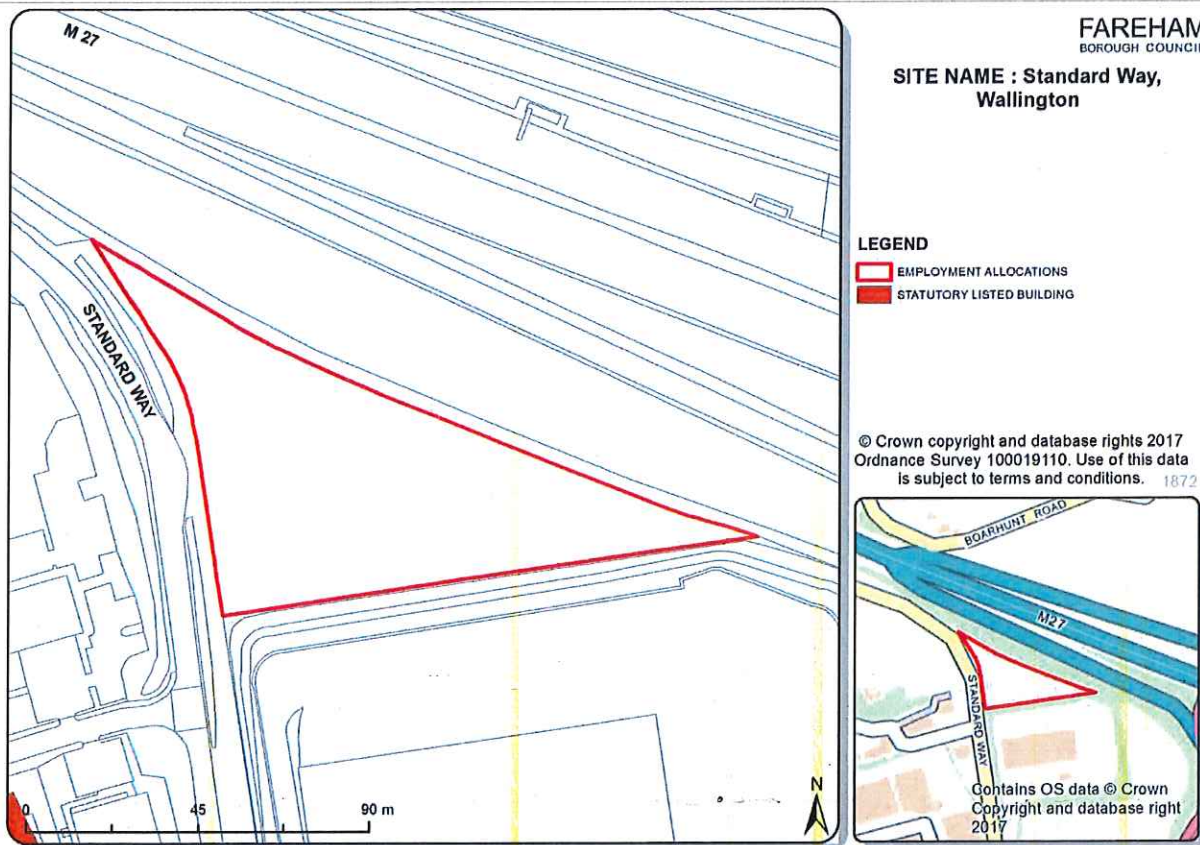

Appendix 3: Allocation E5 removed from the Local Plan

DEVELOPMENT ALLOCATIONS

Employment Site: E5	SELAA Reference: 20
Name: Standard Way	Proposed Use: Employment (B1, B2 or B8)
Location: Standard Way, Wallington	Capacity: 2,000 sq. metres
Size: 0.6 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- The quantum of employment floorspace shall be broadly consistent with the indicative site capacity; and
- Primary vehicular access shall be obtained from Standard Way; and
- Provision of safe pedestrian and cycle connections from the site and along Standard Way up to the junction with North Wallington; and
- Provision of a noise assessment that identifies appropriate mitigation to address noise from the A27, M27 and neighbouring industrial area; and
- Provision of an air quality assessment to identify appropriate measures to mitigate NO₂ emissions arising from the development in accordance with Policy INF2; and
- Boundary vegetation and trees should be retained, apart from where removal is necessary for highways safety reasons; and

DEVELOPMENT ALLOCATIONS

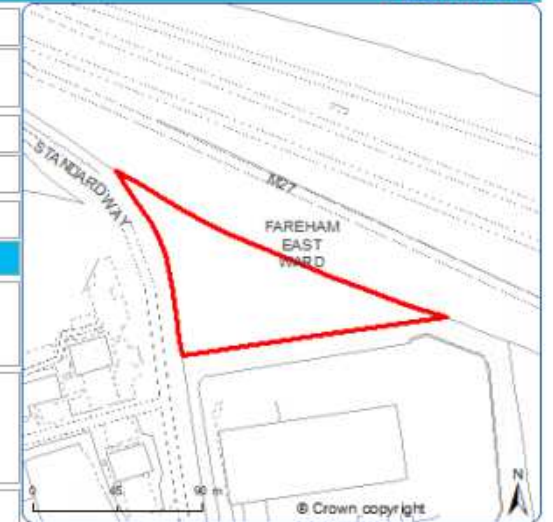

- g) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure:
- Off-site highway improvement and mitigations works.

Appendix 4: SHELAA Site 20 (Standard Way)

7. Developable Employment Site Assessments

SITE DETAILS		Developable Employment Site	Fareham East
ID:	20	Site Name:	Standard Way, Wallington
Current Land Use:	Vacant. Small paddock area located to the north of Standard Way and to the north of Fareham Heights office park. Lined with trees with access off of Standard Way and M27 to north.		
Surrounding Land Use:	Adjoining motorway M27 to northeast; Frontage to Standard Way to west; adjoining WTS to south.		
Gross Site Area (ha):	0.59	Housing Yield (estimate):	0
Employment Yield (estimate):	2,000sqm	Gypsy and Traveller Pitches (estimate):	0
SUITABILITY			
Constraints:	Public ROW, Agricultural Land Grade 2, Minerals and Waste 2016 Brick Clay, Superficial sand/gravel and Safeguarded Site, Ground Water Protection Zone, Countryside, Within 50m of potentially infilled and gassing ground, groundwater source protection zone.		
Highways/ Pedestrian Access:	This site would appear to have the potential for access created from Standard Way. The junction location would need to be towards the southern end of the frontage for visibility purposes. Measures would also need to be put in place to limit additional commercial vehicle activity on Pinks Hill or to make width improvements along its length.		
Conservation Comments:	No known constraints		
Noise/Air Quality Assessment:	No known issues.		
Archaeology:	There are no archaeological sites currently recorded at this location although Fort Wallington sits within the immediate vicinity. It is in an area that might be regarded as within the field of fire (setting) of the fort, but the fort and the views from t		
Ecology Comment:	The site comprises Priority Habitat Coastal and Floodplain Grazing Marsh with woodland boundaries. Buffers to be retained with significant margins. Appears suitable for bats, badger and may support territory of barn owl.		
Accessible Facility Types:	4/10	Within 1600m of a Major Employment Areas, within 800m of a Accessible Green or Play Space, within 1600m of a Town/District or Local Centre, within 800m of a Community/Leisure Facility	
Suitability Comment:	The site falls within an area that has an overriding 'urban fringe' character, due to the urban character of the adjoining industrial estate and waste transfer. The site lies within a field to the north of the waste transfer station, which is mostly hidden by vegetation, with only occasional glimpses through gateways along Standard Way. Visibility of the site is therefore relatively limited, and visual sensitivity is quite low, whilst strong vegetation cover significantly reduces intrusion from the motorway, and creates an enclosed and attractive parcel of land of lower quality landscape value. Site is suited for either B2 or B8 employment uses.		
Is the site suitable?	Yes	Is the site available?	Yes
		Is the site considered achievable?	Yes

Early Years requirements in major new developments – a summary

This document provides summary guidance for Hampshire County Council and other agencies in determining a requirement for early years and childcare places to support new housing developments and to inform local planners.

This document augments the extant guidance entitled 'Early Years requirements in major new developments' where detailed estimates of place requirements, take up of early education entitlements for government funded hours, and parental demand are provided. This document is a guide to supply and demand in localised areas, and specifically addresses the Early Years requirements for the area of:

Fareham Borough

In looking at the demand for childcare in an area the Services for Young Children (SfYC) team typically look at the ward and adjoining areas Small Area Population Forecast (SAPF) data and assess it against the known supply of places. Childcare places need to be monitored regularly as the demand for childcare is directly and indirectly influenced by national and local policies. This childcare sufficiency work is carried out by the SFYC team and it is requested that prior to any development we are consulted and are able to share our up to date knowledge of the childcare need in the area.

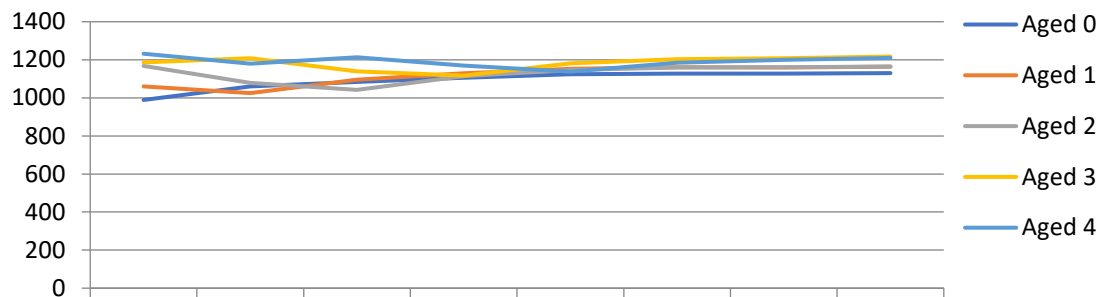

SFYC monitors childcare need for all early year's age cohorts. Early Years Education (EYE) is a statutory offer which is available universally to all three- and four-year olds from the term after their third birthday. For two-year olds, the offer is limited to children of families who meet low income criteria. There is no statutory EYE offer for children aged nought and one year old, but the local authority has a statutory duty under the Childcare Act 2006 to ensure working parents of children aged nought to five can access suitable childcare to meet their needs. This duty extends to children up to twelve years old for Out of School Care.

The overall Fareham area child population aged 0 and 4 years old dipped in 2019 by 83 but is projected to grow by a net 250 between 2018 and 2025 – 0.45% on 2018. The high-level trend projection to 2025 is shown below (Fig.1).

Significant growth in Fareham North ward is anticipated due to the impact of the Welbourne development. Most other ward areas are projected to see either a much slower increase or slight decrease in child numbers, with the overall picture apart from Fareham North showing a broadly static position.

Fig. 1

Fareham area population trend forecast 2018-2025

	2018	2019	2020	2021	2022	2023	2024	2025
Aged 0	989	1060	1083	1105	1124	1127	1127	1130
Aged 1	1060	1025	1095	1130	1153	1162	1160	1164
Aged 2	1168	1078	1042	1114	1146	1159	1162	1164
Aged 3	1186	1209	1140	1117	1181	1203	1209	1217
Aged 4	1232	1180	1213	1169	1138	1185	1200	1210

1. Demand for places:

The starting point is to calculate the number of children in each age group expected from the SAPF data. It must be noted that the SAPF is a modelled population forecast. It also does not take into account the fact that parents don't always take up their childcare places in the same district in which they live.

We know from market data that for each age cohort the percent of children requiring childcare in an early setting is typically:

- Aged 0 – 1 yr old 17%
- Aged 2 yr old 70%
- Aged 3 yr old 99%
- Aged 4 yr old 66% (It is assumed that 34% of this age cohort is typically at school)

Early Years Education (EYE) is a statutory offer which is available universally to all 3- and 4-year olds. For two-year olds, the offer is limited to children of families who meet low income criteria. In Hampshire, children can start their free entitlement in the term after their second/third and fourth birthday and can receive a maximum of 570 hours per child's eligibility year. From 2017 the Government increased the offer to 1140 hours for working parents; publicly known as the "30 hours offer".

EYE hours are not limited to the school academic year, offering parents the flexibility to take up their hours across the number of weeks that the provision is open. The demand for three-year-old places is high and trend data in Hampshire indicates that in the region of 90-95% of the three-year-old population take up this entitlement. It is, therefore, expected that there will be continued high demand from this age group within any new housing development.

The demand for four-year-old places, prior to their starting school, is also high. However, due to four-year olds taking up their school place, often in the September after their fourth birthday, the demand within the pre-school and nursery sector is in the region of 32-36% of the four-year-old population.

The demand for two-year olds continues to grow for families who meet certain low income level criteria outlined in section 2 below.

2. Low income families

Where housing developments include a significant level of social housing, shared ownership schemes and/or dwellings that would attract low income families, developers and planners should consider accessibility to affordable early years education and childcare.

Developers and planners should be aware that, since September 2014, the provision of free early years education to eligible 2-year olds is a statutory offer. The offer provides the same choices for parents as the free early years' education entitlement for 3- and 4-year olds. The exception is that the eligibility is primarily based on income assessment.

3. Space requirements and regulations

The space required to fulfil these requirements is stipulated within the [Statutory Early Years Foundation Stage](#) ¹

Section 3.57 sets out premises requirements and states, the premises and equipment must be organised in a way that meets the needs of children. In registered provision, providers must meet the following indoor space requirements:

- Children under two years: 3.5 m² per child.
- Two-year olds: 2.5 m² per child.
- Children aged three to five years: 2.3 m² per child.

These calculations should be based on the net or useable areas of the rooms used by the children, not including storage areas, thoroughfares, dedicated staff areas, cloakrooms, utility rooms, kitchens and toilets.

All early years and childcare operators must register with Ofsted as the regulatory body. Ofsted will inspect an organisation's ability to meet expected standards covered within the Early Years Foundation Stage. The Early Years Foundation Stage also contains expected minimum requirements for the suitability of premises which can be found within the same statutory framework document (accessed through the link on page 3). It is expected that all early years and childcare providers are able to meet requirements to deliver the free early years entitlement at the highest quality and Hampshire providers are expected to achieve and maintain "good" and "outstanding" inspection results.

¹ Statutory Early Years Foundation Stage 2014

4. What developers should provide

Developers should consider 80 early years places for every 1,000 houses and that these places are offered through a mix of facilities where possible. The childcare planning should allow for flexible hours of opening and covering at least 7am to 7pm for full day care.

For 1,000 houses, it is anticipated that one full day provision of 50+ places, together with an additional 30 places from shared community premises, would meet the needs of this size of development.

Where developments provide a high number of social housing dwellings, it is considered there will be the potential for greater demand for affordable childcare and access for two-year-old funded provision. It is likely that this childcare will be required to support employment activities and, therefore, any provision to support lower income families should have regard to the flexibility of opening and closing times of childcare to meet the employment or return to learning requirements of parents and carers.

The location of the childcare provision is parental choice, some choose for their childcare to be located near to their home address and some choose childcare close to their work- place.

The childcare market has also seen parents preferring provision that is close to, or on the site of, infant or primary schools where the school site is large enough to accommodate the provision.

5. Timing of the early years and childcare development

There must be early consideration of the allocation of the sites and/or premises for early years and childcare. It is recommended that such provision is considered for development and occupation at the same time as that for primary schools. This is especially important within developments that have little or no accessible early years and childcare provision adjacent to the new housing development.

The impact of a new housing development, alongside current capacity in the early years and childcare market, should also be considered in terms of early occupation of families and their ability to access provision and whether any interim measures are put in place prior to thresholds of dwellings occupied being reached.

6. How this should be provided

Recent practice suggests to planners / developers that provision should be made for early years and childcare facilities for children 0- 5 years within their plans for the housing developments. Childcare facilities should either be associated within / alongside community facilities or in a dedicated space identified and available for development. In either case, it is suggested that there are advantages with locating adjacent to, or combined with, primary school sites.

For dedicated nursery/childcare facilities, we suggest an area of 0.25 hectares. For combined school / pre-school sites this can be reduced to 0.2 hectares as there can be economies with a more flexible site layout when both are planned together. These

site areas are estimates that the Council has used in other recently provided facilities but will need to be tested against the draft accommodation briefs.

It is assumed that the sites would be made available through an open and transparent process to interested early years and childcare providers; or through the district councils and community associations where it is expected that childcare will be operated within community facilities.

The location of any provision must enable good access for walking along safe and pushchair accessible routes as well as having good public transport and motor-vehicle transport links and be within a 1-2 mile radius of the main housing development.

It should be noted that early years and childcare provisions of 50+ places are considered more economically viable and may attract the best investment opportunity from the sector.

It is also a requirement that a childcare operator that is seeking to accommodate children for free early years education makes an application to Hampshire County Council prior to opening their provision. Any developer who has engaged a childcare establishment to deliver or take up opportunity on their site should ensure the childcare provider contacts Services For Young Children at Hampshire County Council via email childcare@hants.gov.uk at the earliest opportunity.

7. Comments on identified Sites in Fareham Local Plan 2037, Housing Need and Supply

https://www.fareham.gov.uk/PDF/planning/publicationplan/Publication_plan_FINA_L.pdf

<p>Ha1 North and South Of Greenaway Lane (824 dwellings)</p>	<p>This proposal would generate demand for an additional 50+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution. These places are essential, to meet the needs of working families</p>
<p>HA3 Southampton Rd (348 dwellings)</p>	<p>This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families.</p>

HA4 Downend Rd East (350 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families. In our Spring 2020 Childcare Sufficiency Audit Portchester West was identified as an area to be closely monitored due to the collective new and planned housing developments in the area.
HA7 Warsash Maritime Academy (100 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed. In our Spring 2020 Childcare Sufficiency Audit Warsash was identified as an area to be closely monitored due to the collective new and planned housing developments in the area. Existing settings are close to capacity, including Out of School provision. These places are essential, to meet the needs of working families
HA9 Locksheath Rd (70 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed
HA10 Funtley Road Sth (55 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed

<p>FTC 1 (20 dwellings) FTC 2 (100 dwellings) FTC 3 (120 dwellings) FTC 4 (94 dwellings) FTC 5 (49 dwellings) FTC 6 (45 dwellings)</p>	<p>The plan does not indicate the provision of childcare facilities. These are generally small developments in dispersed locations; however collectively they create 428 dwellings in the Fareham Town Centre Area. A new Full Day Care nursery offering approximately 50 places has opened in Fareham Town Centre which may relieve the pressure on places in the area. The impact of new housing on childcare sufficiency in Fareham Town Centre will need to be closely monitored by SFYC.</p>
<p>Planned developments with less than 50 dwellings (HA12,HA13,HA15,HA19,HA22, HA23,HA24,HA26,HA27,HA28, HA29,HA30,HA32,HA33,HA34,HA35,HA36, HA37,HA38,HA39,HA41)</p>	<p>These are smaller developments in dispersed locations. Depending on the housing mix and age demographic of the residents any generated demand can most likely be accommodated in existing provision.</p>

8. Contact

Hampshire County Council's Children's Services can be contacted to discuss any support requirement in selection of appropriate high quality early years and childcare providers or any aspects of the regulation and legislation requirements.

The childcare and early years education development team can be contacted via childcare@hants.gov.uk

Links to documents that may support design of childcare buildings:

Fareham Borough Council Local Plan (Reg.19) Proposed Submission Version Consultation

Hampshire County Council Response – 18 December 2020

Hampshire County Council does consider the local plan to be sound and legally compliant. The County Council welcomes the opportunity to respond on this consultation and sets out its comments firstly on the Transport Assessment and then on specific local plan policies in its capacity as the local highways authority, local education authority and in its role as an adult services provider with a focus on specialist care.

The County Council then sets out its comments on specific site allocations in its capacity as the local highway authority, local minerals and waste planning authority and also as the local education authority with responsibility for school place planning.

Policy HA2: Newgate Lane South (removal as a housing allocation)

Hampshire County Council is the Local Highway Authority (LHA) for all roads in Hampshire except for motorways and trunk roads and the LHA response is concerned with the potential highway and transportation impacts of the land use proposals set out by the borough council on the local road network. HCC's primary concern as highway authority is the efficient use, management and maintenance of the local highway network. Ensuring that all new development mitigates its impact on the Hampshire network is the function of the highway authority.

The LHA submitted comments in December 2017 and February 2020 in response to the draft local plan regulation 18 consultations. As part of both responses the LHA submitted an objection to policy HA2 (Newgate Lane South). This objection is not resubmitted due to the removal of policy HA2 as an allocated housing site from the revised development strategy in the Publication Plan.

Transport Assessment

At the time of the previous draft local plan consultation in January 2020 the evidence base did not include a completed Transport Assessment (TA) to replace the interim TA published in support of the 2017 draft local plan consultation therefore the local highway authority submitted a holding objection. The TA has now been finalised and forms part of the Publication Plan evidence base.

The LHA supports the methodology used by FBC in preparing a borough-wide TA and the use of the strategic model known as the Sub Regional Transport Model (SRTM) to assess the wider transport impacts of the strategic disposition of proposed development across the Borough.

The Fareham Local Plan - SRTM modelling report (2020) sets out the Baseline, the Do minimum (with local plan development) scenario and the Do Something (with mitigation) model runs and forms part of the transport evidence base. As part of the strategic transport modelling the LHA understands that a total of 2,150 dwellings was attributed to the proposed Strategic Growth Areas (SGAs) and included in the Do minimum scenario. This means that the strategic modelling was carried out using a higher housing number than is currently proposed in the Publication Plan. The LHA recognises that the strategic modelling with the higher housing number represents a worst-case scenario and that the limitations of the SRTM do not allow for localised impacts at junctions to be attributed to specific development sites. Consequently, it is not possible for the SRTM to isolate the transport impacts of the SGAs on the highway network. Therefore, the LHA accepts the outputs from the strategic modelling report and has not requested an additional model run of the SRTM to reflect the removal of the two SGAs and subsequent lower housing number.

The SRTM modelling report indicates that the incremental impact of all the site allocations including the SGAs is forecast to affect links and junctions across the highway network and particularly along the A27 corridor through Fareham borough. The future resilience of the A27 corridor is a concern for the LHA which is why the LHA is undertaking a transport study for the A27 corridor which the County Council will seek to adopt as future strategy. The strategy will seek to incorporate a multi modal approach that facilitates a modal shift away from private car use. Future transport assessments of development sites along the A27 corridor should take this into account and have regard to the emerging transport strategy.

A key aspect of the A27 corridor strategy will be the application of the 'Link and Place' approach to street planning and design. This approach recognises a street functions as both a link (that is movement by all modes of transport including pedestrians) and a place (destination in itself) and will help determine policy priorities between competing users with a greater emphasis on the function of places. This 'link and place' approach is being developed as a Hampshire County Council policy which will be fully imbedded in the next Local Transport Plan for Hampshire (Local Transport Plan 4).

The TA assessed the cumulative impacts of the site allocations and demonstrates that the significant transport impacts of the local plan development on the highway network can be mitigated through proposed highway interventions. The TA specifically highlights the junction at Parkway/Leafy lane which is north of the M27 junction 9 and serves the Whiteley business estate in the adjoining district of Winchester City Council. The Parkway/Leafy Lane junction is predicted to be significantly impacted by local plan development traffic (with long queues along Leafy Lane) and meets the criteria for requiring mitigation.

However, this junction does not warrant a Do Something mitigation scheme for increased junction capacity. This is because the Leafy Lane arm of the junction leads to a residential area with a 20mph zone reinforced by vertical speed reduction measures. The policy approach by the LHA is to reduce rat-running along Leafy Lane between

Fareham and Whiteley. Therefore, an alternative highway scheme which strengthens the current situation of suppressing flows along Leafy Lane should be the mitigation scheme to be taken forward. The LHA will need further discussions with both Fareham Borough Council and Winchester City Council to establish the form of any mitigation scheme if it is required.

The Do Something modelling for the TA proposed five mitigation schemes for increased junction capacity and modelled only the highway impacts of increased motorised vehicle traffic. There are other solutions for mitigating the transport impacts from local plan development which are more in line with the emerging policy agenda on decarbonising transport from Government and Hampshire County Council. These mitigation options would generally follow a sequential approach to assess their impact on the local road network and the role they can play in traffic reduction and reducing transport emissions starting with measures to avoid the need to travel, active travel measures, public transport (SE Hampshire rapid transit) and finally localised junction improvements. This wider and sequential approach to mitigation will need to be applied to all site-specific transport assessments.

Development Strategy

The LHA acknowledges that the Publication Plan proposes a lower housing number than in the previous draft local plans. This lower housing number is in response to a lower level of housing growth proposed by Government in its consultation in August 2020 on a new standard methodology for calculating the annual housing need. The LHA recognises that FBC need to await the outcome of the Government's consultation before the Publication Plan with the lower housing number can proceed to adoption in line with the FBC's revised Local Development Scheme (September 2020).

The consequence of a reduced housing number is a change to the development strategy and the removal of several housing sites. The LHA supports the removal of housing site HA2 Newgate Lane South. The LHA submitted an objection to policy HA2 in the previous draft local plan consultations.

The LHA also supports the removal of the Strategic Growth Area policy from the Publication Plan. The South of Fareham and North of Fareham Strategic Growth Areas were included in the draft local plan consultations and the LHA submitted a holding objection.

Climate Change

Fareham Borough Council as Local Planning Authority has a legal duty to help meet the requirements of the Climate Change Act 2008. The LHA wishes to be reassured that the borough Council has satisfied itself that the Publication Plan goes far enough in supporting the Government and Hampshire County Council policies on climate change that have emerged during the local plan preparation process. This is in view of the Hampshire County Council's recently adopted climate change strategy and targets to be

carbon neutral by 2050 and resilient to a two degree rise in temperature. For Hampshire to meet these targets, which are in line with Government legal requirements, land-use planning and transport policies at the local district level need to play a strong role and are likely to be most effective at the plan making stage.

The LHA acknowledges the transport evidence submitted in the Strategic Transport Assessment which shows how the traffic impact of the local plan development can be mitigated in traffic and transport terms. The LHA wishes to see demonstrated how the local plan proposals, in relation to transport and how we travel, will contribute to the longer-term goal of achieving carbon neutrality and building resilient networks and systems.

Strategic Policy CC1: Climate Change

The LHA supports the amended climate change chapter and strategic policy CC1 however the supporting text needs more detail with reference to the County Council's adopted Climate Change Strategy (2020) and targets including the resilience of the highway network.

Policy NE8: Air Quality

The local plan correctly identifies road transport emissions as the main source of air pollution which is relevant to the County Council's responsibilities as both highway and public health authority. The LHA supports the local plan commitments to reduce, minimise and mitigate road transport emissions and their impact. However, the Air Quality Policy NE8 needs to be more specific and should be amended to include the policy text 'development should deliver sustainable transport (public transport, walking and cycling) as part of improving air quality'.

Policy TIN1 Sustainable Transport

Given the connection between transport, local plan allocations, air quality and health, there is a lack of commentary or cross reference on air quality management within the Transport Chapter. For example, the supportive text needs to make clear how the transport policies (such as Sustainable Transport TIN1) contribute to both the climate change objectives of reducing CO2 emissions and to the air quality objectives of reducing air pollution.

The LHA recommend amending policy TIN1 on Sustainable Transport to make direct reference to the role of sustainable transport in improving air quality. The supporting policy text also needs to refer to the Air Quality Management Areas / Clean Air Zone designation (on sections of the A27 and A32) and the Air Quality Action Plans in place due to concerns over nitrogen dioxide levels caused by road traffic. Likewise, the Air Quality section needs to refer to the transport chapter and policies and the role they play in mitigating the transport impacts on air quality.

The Transport chapter needs to refer to the Strategic Transport Assessment and the impacts of the local plan traffic on air quality in particular air pollution from the M27, the A32 and A27. This should be cross-referenced with the air quality work carried out as part of the AQMAs and the local plan Sustainability Appraisal. The LHA supports transport mitigation measures of sustainable and active travel modes as an alternative to making private vehicle trips which help overall to reduce emissions harmful to human health and the environment. The LHA would not support any transport mitigation measures which threatened to undermine the success of the current Air Quality Management Areas.

The Transport chapter needs to strengthen the commitment to deliver high quality walking and cycling facilities with reference to the Government's new cycle infrastructure design guidance in Local Transport Note 1/20. Reference to cycle infrastructure design should also be included in the Design chapter.

To contribute to reducing car use, opportunities for enhancing and encouraging active travel to and from school should be encouraged and implemented working closely with Hampshire County Council Children's Services and Highways Departments. The County Council will require the provision of safe walking and cycle routes to schools and existing routes to be enhanced where necessary to improve walking and cycling numbers. Contributions from developers will be sought where necessary including for the production and monitoring of school travel plans (STP's).

Policy TIN3: Safeguarded Routes

The LHA supports the new policy TIN3 Safeguarded routes in relation to delivering bus rapid transit in Fareham and Portchester. However, the supporting text should refer to the future extensions of the SEHRT network to the west of Fareham towards Segensworth, Swanwick Station, Whiteley and the North Whiteley major development area and to serve the Solent Enterprise Zone at Daedalus and adjacent coastal settlements.

Strategic Policy R4 Community and Leisure Facilities

Hampshire County Council Children's Services consider that it is important that the impact of additional housing is assessed and where necessary developer contributions are provided to provide additional childcare places either through on-site facilities or the expansion of nearby provision. The impact will be assessed on a case-by-case basis.

The County Council also provides an Early Years guidance note on this issue for the Borough Council to consider in their plan making in relation to the future need and housing allocations.

Strategic Priority 8

Hampshire County Council Adult Services welcome the reference to affordable housing and the need to address the specific needs of different groups in the community, including the elderly and people with disabilities. However, it is recommended that reference is made to the need to meet a range of housing needs, including those in need of affordable housing and those in need of specialist housing including the elderly and people with disabilities in Strategic Policy H1: Housing Provision.

Consideration should also be given to whether opportunities are available to encourage specialist housing provision in specific site allocations.

Policy HP 5: Affordable Housing

The County Council recommend that Policy HP5 or the supporting text should encourage the provision of housing to meet a range of needs, including specialist housing to meet older persons' needs (such as extra care housing) and those with disabilities.

Policy HP7: Adaptable and Accessible Dwellings

The County Council notes that the Specialist Housing Topic Paper includes reference to the low cost of providing homes to above base accessibility standards. Although there is a correlation between age and mobility, people of all ages may have some mobility impairment, either permanently or temporarily.

The proposed percentages of housing the policy requires to be built to higher accessibility standards is modest and given the rate at which the stock is added to each year it will be a very long time before a significant supply of accessible housing is available in the Borough. With such modest levels of provision, the likelihood of a person who develops mobility impairment will find themselves in a home that can meet their needs is low. Adopting a requirement for a larger proportion of the stock to be built to Cat2 standards in particular would better meet individuals' changing needs and support the creation of sustainable communities by reducing the need to move to find suitable accommodation.

Policy HP 8: Older Persons and Specialist Housing Provision

The inclusion of an enabling policy is welcomed by the County Council; however it is recommended there is specific mention of specialist provision of affordable housing, including extra care housing and housing for those with disabilities. It is noted that specific housing allocations are made only in respect of sheltered accommodation (Policies HA42 / 43 /44). The County Council consider that these sites may also be suitable for other forms of specialist housing, including extra care housing and housing for those with disabilities. It is recommended those policies are amended to reflect this.

The County Council supports the opportunity for exception type development in specific circumstances in this policy and Policy HP6.

Housing Site Allocations

The County Council has considered the housing allocations in its capacity as the local highways authority, local education authority and local minerals and waste planning authority and provides the following commentary.

An initial assessment of the impact on school place planning has been considered based on the level of housing identified, and details are highlighted below for specific sites where there will be an impact on the supply of local school places at primary, secondary and education for pupils with Special Educational Needs and Disabilities (SEND).

The County Council as the local minerals and waste planning authority is pleased to see that some of the comments regarding mineral and waste safeguarding, from the Regulation 18 consultation, have been considered and included within the Regulation 19 proposed submission document. Within the County Council's Regulation 18 response a list of sites that were deemed to require a Mineral Resource Assessment as part of any potential application was provided. It is noted that all the allocated housing sites that the County Council made such comments on have been removed from the Proposed Submission Document as being no longer available or no longer suitable.

Housing Allocation Policy HA1 – North and south of Greenaway Lane – 824 dwellings

The development of 824 dwellings will create additional pressure for school places locally at primary, secondary and special schools. It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement j.

Housing Allocation Policy HA3 – Southampton Road – 384 dwellings

The identification of the need for developer contributions for education and ensuring safe walking/cycling routes to local schools are provided, is welcomed.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement k.

Housing Allocation Policy HA4 – Downend Road East, Portchester – 350 dwellings

It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirement j, that the site will require a Minerals Assessment prior to any development. The County Council would also like to bring to the Borough Council's attention that this allocated housing site sits within the safeguarded buffer zone of Warren Farm and Down End Quarry, a safeguarded waste site operated by Veolia Environmental Services (UK) Plc.

The safeguarded buffer zone is informed by the safeguarded sites list as defined through 'Policy 26: Safeguarding - waste infrastructure' of the adopted Hampshire Minerals and Waste Plan (2013) (HMWP). The purpose of this policy is to protect current and potential waste sites from pressures to be replaced by other forms of development, including through 'encroachment' where nearby land-uses impact their ability to continue operating.

It is often the case that appropriate buffers and mitigation measures can make potential nearby development compatible. Any mitigation measures would need to be undertaken by the proposed non-minerals or waste development (i.e. the allocated housing development) and reduce potential impacts to and from the safeguarded site to levels that would ensure the safeguarded site could continue its intended waste use.

Usually, the mitigation measures would need to focus on impacts such as noise, dust, visual impact, odour and traffic movements. They can take a variety of forms, including landscape design, tree planting, barriers, building design and orientation and use of different building materials.

The appropriate mitigation measures are best informed through direct discussions with the operator of the safeguarded site as they will be most be aware of operational requirements. However, the County Council is also available for further discussions, as well as facilitation, if required.

With regard to the above site, the County Council would therefore request further wording be added to the site-specific requirements of allocated housing site HA4 as set out below:

“the provision of evidence that the safeguarded site has been considered within any forthcoming planning application, how operator comments have been taken into account and what impacts these comments have had on the proposed development design. Details of any mitigation measures chosen as a result of the analysis should also be included with an application for the site”.

In the unlikely event that it is not possible to agree appropriate mitigation measures, the County Council would seek evidence that the waste management capacity can be relocated or provided elsewhere and delivered.

Housing Allocation Policy HA9 - Heath Road

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council’s data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement g.

Policy HA2: Newgate Lane South

The County Council as local highway authority supports the removal of policy HA2 Newgate Lane South.

Strategic Growth Area

The County Council as local highway authority supports the removal of the Strategic Growth Area policy.

Employment Allocations

The County Council has considered the employment site allocations in its capacity as local minerals and waste planning authority and provides the following commentary.

Policy E2 - Faraday Business Park

Whilst a number of the allocated housing sites have had site-specific requirements added to them for Minerals Assessments, allocated employment site E2 - Faraday Business Park has not had any added. In line with the County Council’s Regulation 18 response to the local plan consultation, the County Council again request that a site-specific requirement be added to this allocated site policy so that any forthcoming planning application would need to be accompanied by a Minerals Resource

Assessment. The County Council recommend adding the following site-specific wording: The site is within a Minerals Consultation Area. Minerals extraction may be appropriate, where environmentally suitable, subject to confirmation of the scale and quality of the resource.

The County Council would like to take this opportunity to reiterate that any development or significant redevelopments of land may impact mineral resources. As minerals can only be worked where they are found, it is important that viable mineral resources are 'safeguarded' (protected) from needless sterilisation by other development to help to secure a long-term future supply of minerals. Mineral resources are necessary for a vast array of construction activities and their availability is a prerequisite for any housing development. As such, the NPPF requires planning authorities to define Minerals Safeguarding Areas and adopt policies so that, 1) known locations of mineral resources of local and national importance are not needlessly sterilised by non-mineral development, 2) if it is necessary for non-mineral development to take place, the prior extraction of minerals, where practicable and environmentally feasible, is encouraged.

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

MATTERS OF LEGAL COMPLIANCE Community Involvement Since 2017 Residents concerns have been disregarded even though there have been Protest Marches, deputations and countless objections raised. For example: despite a petition exceeding the required number of signatures needed to trigger a Full Council meeting debate, the debate was refused even after a challenge was raised to the Council's scrutiny Board. It is discriminatory that community generated evidence carries less weight than that provided by Developers Consultants. For example: residents knowledge about the previous use of land in Nitrate budget calculations and traffic survey results captured by residents and Community Speed Watch Teams. Para 4.7. The Warsash Neighbourhood Forum (now defunct) was never consulted with respect to the Council's intention to allocate housing to Warsash as required by Para 66 of the NPFF. Para 1.5 Introduction: Statement of Community Involvement para 2.1 states a "variety of methods" should be used to solicit comments from the public. Paper documents failed to be delivered across the Borough (Fareham Today) so a large proportion of residents were deprived of giving their comments or perhaps aren't even aware that a new Draft Local Plan exists on which they can comment. The fact that access to libraries and the Council office has been restricted due to Covid has made matters worse. The Publication Plan Introduction on Page 1 states that representations should focus solely on "Tests of Soundness". However, FBC's guidance in Fareham Today contradicts this and includes additional areas of "Legal Compliance" and "Duty to Cooperate". This is confusing and misleading to residents wanting to submit representations.

2. Housing Allocations The total of new homes required proposed for specific sites across the Borough (excluding Welborne) is 1,342. Of these 830 of them, 62%, are proposed for HA1 (Warsash). This huge concentration of new homes in one small area is an unfair distribution of Housing Allocation in an already overburdened area for which no new infrastructure is planned. FBC recently secured an overall REDUCTION in new housing of 22.5%. Despite this FBC are proposing HA1 (Warsash) should endure a 20% INCREASE in their housing allocation number. This seems unjustifiable. Within HA1 there is no joined up "Master Plan". Developers are working in complete isolation from one another resulting in an unnecessary number of access roads, some within yards of each other. Another Environmental Impact Plan must be conducted showing the cumulative effect of housing allocation in HA1 in it's entirety. Para 4.19. Housing Allocations HA2,5,6,8,11,18,20,21, and 25 are no longer proposed Housing Allocations. Instead 62% of Housing Allocations are in the small area of HA1. Why has HA1 been singled out for Housing Allocation? How was the Objectively Assessed Housing Need arrived at for this area? Para 1.16: HA1 did not feature in the 2015 Local Plan and Officers confirm it is the 2015 Plan which is extant. No mention is made of the unadopted 2017 Draft Local Plan. Para 4.8 allows the LPA to consider Housing sites in the previous adopted (extant) Local Plan. On page 38 this is ignored and it states that Housing Allocation will be provided in the unadopted 2017 Draft Local Plan locations including HA1 and other local sites. The LPA's decision to include HA1 in the unadopted 2017 Draft Local Plan led to a frenzy of Applications submitted by Developers taking advantage of the situation. The LPA have resolved to grant permission on these Applications many ahead of and likely contrary to the Publication Plan. The LPA has also adjusted the boundaries of HA1 to accommodate Developers claiming their Applications on sites outside HA1 fit well with HA1. This demonstrates that as regards Housing Allocation and development there seems to have been an inappropriate power shift toward the Developers while residents concerns (Community Involvement) are disregarded.

3. Habitats Directive Strategic Policy NE1 requires designated sites (SACs, SPAs and RAMSARs) to be protected and ENHANCED. Likewise in Strategic Policy NE4 para 9.50 confirms permissions will be granted when the integrity be maintained or IMPROVED. In addition on page 199 para 9.54 indicates that proposals for development should provide a net REDUCTION in eutrophication for designated sites which are in an unfavourable condition. The LPA is however only aspiring to NITRATE NEUTRALITY. This therefore contravenes both the Habitats Directive and the Publication Plan. In the opinion of a leading QC it is unclear how any developments could be contemplated in the Western Wards of the Borough without negatively impacting the SAC, SPA and RAMSAR sites. Therefore, based on proximity alone, this would invalidate the deliverability of any of these developments. Advice from Natural England states it is the responsibility of the LPA to fulfil it's legal obligations. They must satisfy themselves BEYOND SCIENTIFIC DOUBT that adverse effects on the designated SAC, SPA and RAMSAR sites from harmful nutrients generated by new residential developments have been mitigated (and not just compensated for). There is doubt that the LPA is applying the Natural England advice correctly and lawfully. Complies with Duty to Cooperate

1. Housing Need Methodology Para 1.28: FBC have agreed to take up a shortfall in homes from Portsmouth of 847 dwellings. This is a risk for FBC as the new methodology for calculating Housing Need has not yet been signed off by the Government. Also the Housing Delivery Test will not be available during this public consultation period. Para 3.10: the decision to "rewild" the Stubbington Strategic Gap was made without any consultation with elected Members or Council Officers. The surprise announcement was made in a Press Release issued after the start of the Full Council meeting which was in the process of debating this Plan. It is astounding that such an important decision should have been made secretly, by whom, no one publicly knows, and that it was not included within the Plan itself. For such a huge area of land to not be included in the consideration of use of land for Housing thus relieving hard hit areas such as HA1 seems inconceivable. This area also has the infrastructure of a new road already in place. Why was it not assessment for Housing Need?

Please provide details you have to support your answers above

Test of Soundness Settlement Definition In the Forward to the Publication Plan it is stated "Greenfield sites are less favoured locations for development". Para 2.1 states "Fareham Borough Council (FBC) will RETAIN its identity, valued landscapes and SETTLEMENT DEFINITION and will protect it's natural, built and historic assets". Further, Para 2.12 "Strategic Priorities" states "FBC will strive to maximise development within the Urban Area and away from the wider countryside and to create places which encourage healthier lifestyles". It is unbelievable then to find that it is proposed that Policy HA1, currently Greenfield, is to be re-designated as an Urban Area (via the re-definition of Settlement Boundaries ref WW17). This re-designation from Greenfield status to Urban status and the movement of the Settlement Boundary in order to accommodate the inclusion of further developments put forward by developers totally contradicts what is stated in the Publication Plan. It is a blatant and unethical manoeuvre by FBC by stealth to suit it's own objectives to concentrate 62% of new housing in one small area without any Infrastructure improvements.

2. Strategic Policy DS1 (Pares 3.36 and 5.6) deals with the need, IN EXCEPTIONAL CIRCUMSTANCES AND WHERE NECESSARY AND JUSTIFIED, for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for-one replacement dwelling basis. Before it's proposed re-designation to Urban Status, HA1 is defined as countryside and has no previously developed land so cannot be used in such a way under the Publication Plan. To achieve it's objectives for 62% of Housing Allocation to be in HA1, FBC has conveniently redrawn the urban boundary.

Infrastructure Policy HP4, Para 5.24. HA1 fails to meet criteria e). The plan for the development of HA1 would demonstrably have unacceptable environmental, amenity and traffic implications.

2. Page 51 refers to traffic routes in HA1. There have been previous recommendations to limit the number of dwellings having direct access onto Greenaway Lane in HA1 to 6 because it was recognised that the Lane is unique in Warsash due to it's rural feel. It is very narrow in places, there are no pavements just some grass verges and there are ancient ditches and lots of trees at the eastern end. It is widely used recreationally. The Publication Plan proposes that the number of dwellings with direct access be increased to 140 and the Lane will be widened (how on earth could this be achieved?) The character of the Lane will be destroyed and there will be a considerable impact on the safety of the large number of non-vehicular users. The Publication Plan, Page 54, highlights that there will be 7 new access roads onto Brook Lane, an already busy main road, and Lockwood Road from all the individual developments in HA1. Additionally, the Greenaway Lane access onto Brook Lane, which is situated on a bend in Brook Lane, will become exceptionally busy as the extra vehicles from the 140 new dwellings will feed into it. The number, position and proximity of the new roads onto Brook Lane are a result of the lack of a cohesive Master Plan for HA1, the lack of a cumulative view combined with the lack of connectivity between adjacent sites. It is piecemeal development at its worst and will undoubtedly lead to gridlock and accident black spots on Greenaway Lane and Brook Lane. Para 10.5 does not include an analysis of streets where the majority of the new dwellings are proposed. Why hasn't HA1 had more consideration in the Transport Assessment when there are 830 new dwellings proposed for this area (62% of the total for Fareham)? With an average of 2 cars per dwelling, an additional 1,660 vehicles will be on local roads in Warsash and there is no reference to the mitigation required to reduce the resulting congestion by 2037. The Publication Plan fails the Test of Soundness by not focusing on this impact. The Publication Plan Strategic Transport Assessment at Para 14.16 states "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts are capable of mitigation at the strategic level, and that the Plan is therefore deliverable and sound from a transport perspective". This statement doesn't include the area HA1 of the Publication Plan for which 830 dwellings within piecemeal developments are planned. HA1 isn't included within the Local Plan Strategic Transport Assessment. Page 52 indicates the need for the provision of "2 junior football pitches" within HA1. Why are these not shown on the Masterplan?. Housing Need Methodology Para 3.27, fig 3.2. There are more than the 8 indicated potential growth areas shown on the map (assuming these are construed as being the proposed allocations. The map is wrong.

2. Para 3.37 is in conflict with Para 4.13 over the definition of small scale development. Is it sites of less than 1 Ha or a development of not more than 4 dwellings? 3. Para 4.2 of the Publication Plan is Unsound. It bases housing numbers on a proposed new methodology for calculating Housing Need. There is a tangible risk that this methodology may not be adopted by the Government. Also Page 37, Paras 4.12 4.16 and Policy HA1 illustrates that whilst a contingency buffer of 1,094 dwellings has been made, this Publication Plan is heavily reliant on the delivery of 4,858 dwellings at Welborne. This is by no means a certainty. Occupancy Rates Para 5.41. As regards the Nitrate Budget Calculations the LPA is using an average occupancy rate of 2.4 persons for a 4/5 bedroom dwelling. As regards the occupancy rate in this section, however, it states that the spectrum of occupancy for affordable homes will be in the range of 4-6. The Publication Plan's claims are not reflected in FBC's own proposals and requirements. This does not pass the Test of Soundness. Carbon Reduction The Publication Plan is not Positively Prepared. Section 8, Para 8.60 talks about the requirement of meeting CO2 Emission Reduction Targets. However it fails to state what the targets are. Instead, the Publication Plan refers to individual developments power generation rather than what each development should deliver over and above the Building Regulations requirements.

2. Para 11.34. The Publication Plan is not Sound as it does not provide an effective approach to Carbon Emissions reduction in the Borough of Fareham. It is stated that Applications will be supported where the development exceeds Building Regulations but no percentage target is set. 3. Para 11.36. No standards are set for Developers who are being encouraged to design for Natural Ventilation and Green Infrastructure. Just meeting Building Regulations will not see FBC contributing to the Government's promised Carbon Reductions. Why have standards not been set within this Publication Plan to ensure Developers are designing for sustainability even though such standards may not yet be within the Building Regulations. Retail Facilities Para 7.13. No additional Convenience Goods floor space has been allocated for Warsash. Existing local retail/commercial facilities do not cater for the additional people 830 new dwellings already planned for HA1 (Warsash) will bring.

2. Para 7.18. Out of town shopping is discussed but not defined. The use of out of town

What modification(s) is necessary to make the Local Plan legally compliant or sound?

See attached comments. All points made to be considered, answered and debated. The Plan to be then modified as appropriate.

See attached comments

How would the modification(s) you propose make the Local Plan legally compliant or sound?

See attached comments pointing out the failure of the Plan being legally compliant or sound (comments on soundness to follow). Modifications proposed would then improve the Plan.

See attached comments

Your suggested revised wording of any policy or text:

Council Officers would be best placed to revise the wording of any policy or text.

See attached comments

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.5 Legal Compliance A petition which was signed by 2390 residents of Warsash relating to housing numbers (now 1001) was ignored by the council. A road traffic census conducted by residents was considered inadmissible by FBC as it contradicted the HCC electronic census which HCC themselves considered inaccurate. Discrimination on the part of FBC, siding with developers and opposed to residents. Para 1.16 the number of new homes proposed across the borough is 1342 which gives an unfair distribution for HA1 as it will be allocated 62% of this figure in a 1.7 mile stretch of Brook Lane. This is a physical impossibility for this Lane but FBC will not entertain this.. Test of Soundness Para 10.15 Fragmented Transport plan. No analysis of the road structuring. Will the number of exits on to a particular road cause more congestions? this has not been considered. Brook Lane being the worst case with over 2000 extra vehicles trying to exit onto the A27 at peak periods. HHC have not been asked to comment on this problem.. Para7.13 No plan has been proposed for additional retail/commercial facilities in the the area to accommodate the additional people from the new dwellings. Locks Heath Centre is a small shopping outlet and is having difficulty in coping with the present volume of customers. Similarly there are few jobs available in the area so it will be necessarsary to commute, by car, north of the M27 Para 10.28. Education all the schools in the area are at maximum capacity and no short term solution has been found. Para10.26 No immediate plans are in place for additional medical facilities to cope with the influx of people Duty to co-operate At no time has FBC discussed the HA1 project with HCC in its entirety as they feel that they will be overruled, therefore there is no point in starting a dialogue.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A complete rethink of the attitude of the FB Planning department with respect to best use of the facilities available. Not to be driven by the Developers wishes

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Ensure that the Planning Department considers all aspects relating to the area including it's geographic position.

Your suggested revised wording of any policy or text:

None

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.5 Introduction: Statement of Community Involvement Paragraph 2.1 says a “variety of methods” should be used to solicit comments from the public. Because paper-based documents failed to be employed across the borough, a large proportion of residents were deprived of sharing their opinion. This was exacerbated by Covid restrictions, limiting the access to libraries and the council office. The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents’ concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Allow the public to be able to fully share their opinions and have their say now.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Public should be given the chance they were denied earlier in the process.

Your suggested revised wording of any policy or text:

Not sure

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Paragraph: 1.16

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 1.16: No mention is made of the 2017 unadopted draft Plan and Officers confirm it is the previous, 2015 plan which is extant. Para 4.8 Allows the LPA to consider Housing sites allocated in the previous adopted (extant) Local Plan. Yet, whilst HA1 did not feature in the extant 2015 Plan, page 38 ignores this, stating that housing will be provided through HA1 and other local sites. The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

We should take our fair share of housing but no more.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

?

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Policy: HP4 - Five-year Housing Land Supply

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications. Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockswood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should consider alternative access points onto other streets than Brook Lane or reduce the number of dwellings

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By reducing the impact of traffic and potential accidents.

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Paragraph: 10.15

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reduce the numbers of dwellings. Ensure there are adequate parking facilities within the site. It is already very hard to park in the center of Warsash and the additional cars will exacerbate the problem.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

?

Your suggested revised wording of any policy or text:

Not sure

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Paragraph: 7.18

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 7.18 Out of town shopping is discussed, but not defined; Out of town shopping will take jobs and customers away from local shopping areas and will increase traffic on the routes in and out of Warsash and Locks Heath.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

We should be encouraging people to shop locally and not to drive to shopping centres causing extra traffic on local roads. Also taking business from local shops and services.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

not sure

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Paragraph: 10.26

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.26 Infrastructure Delivery Plan calls for the expansion of health care provision through the addition of further GP locations in the Western Wards, However the table provided within the document only provides an historic timeline pre-dating the Local Plan. This is not a Sound approach taking into consideration that HA1 alone will bring an additional 830 dwellings..

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The large number of additional houses planned for Warsash will place a burden on the already stretched doctors surgeries and Dentists in the area.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

A current analysis of health care requirements needs to be undertaken.

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

I do not think I have had access to a variety of methods from which to comment. Had to ring up and get a copy of Fareham today which took a week to come. I think to the layman a lot of the language used is very contradictory and misleading i.e. "tests of soundness" does not seem to add up to FBCs Legal compliance and Duty to cooperate. The community have tried to become involved but everything that we have done deputations, objections and protest marches have been denied..

What modification(s) is necessary to make the Local Plan legally compliant or sound?

More weight appears to be given to the developers rather than to the residents. I am totally opposed to the nitrates budget calculations and consider this needs to be challenged.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

I think that the residents would consider that their concerns have not been taken into account and our opinions appear to be negated.

Your suggested revised wording of any policy or text:

The plan does not meet the legal requirements as the community has been disenfranchised.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Because it is my right to hear exactly what arguments are put for and against.

2) Paragraph: 1.6

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

No joined up thinking for HA1; developers have been allowed to work in isolation, so the area is dotted with developments with no thought of the environmental impact. There should be another Environmental impact assessment to show what this will mean if it was all carried out.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

No mention made of the 2017 an unadopted draft plan because the planning authority allows for housing sites which had previously been allocated in an extant local plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would appear that everything leans towards the developers as more and more land appears to have been gobbled up by them. And as everything is being looked at in isolation you cannot get a coherent view of how this once agrarian landscape is being swamped by housing.

Your suggested revised wording of any policy or text:

I do not consider the plan to be effective as it does not take into account the reasonable alternatives available within the Fareham district.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Legal right as feel disenfranchised.

Date: 6 December 2020 at 22:28:00 GMT
To: June Ward [REDACTED]
Subject: FBC Continued

Dear Katherine,

As discussed with you Friday 4 December I enclose the start of my comments on the consultation document which you said you would be able to put in the appropriate boxes as I am unable to as I found that I could not continue without logging on, each time which was not how the system should've worked.

When we spoke you said that you had not received the second paragraph that I submitted so I am hoping that I will start there, as you have already received my first submission.

As I am not able to view the pro forma I hope you will be able to put them into the correct boxes as obviously with only one iPad that I am using to work on and one for my notes which I have made, it would be too torturous.

So onto matters of legal compliance which I believe is paragraph 1.6

There is no mention of the 2017 unadopted draft plan although it has been confirmed that it was in the previous 2015 plan.

Although there was an overall reduction in the new housing it would appear that Warsash is actually going to take 20% more. HA1 has no joined up thinking. There should be an environmental impact on all of the sites proposed, so that each one is not seen in isolation.

Paragraph 4.19 states that many of the housing policies brackets HE256 811 1416 1820 2125 and no longer considered to be proposed allocations. I should like to know how objectively assessed housing need arrived at the fact that site HA1 was to take the bullet.

It would appear that the developers have taken advantage of the LPA's decision that proposing HA1 would mean that they have carte blanche to submit applications. I believe this is contrary to the publication plan. It would also appear that in order to fit in as many houses as possible into HA1 the boundaries have been adjusted to accommodate them. How does this not look as though the Developers have the upper hand and are actually driving this through.

So onto the Habitats directive which again comes under Matters of legal compliance.

Paragraph 9.10 is about nightrates neutrality strategic policy. I cannot see how the policy which requires designated sites to be protected and enhanced and improved is adhered to. I think the word I am looking for is there should be a net reduction the designated sites in unfavourable conditions. The LPA's way of adjudging is the exact opposite. It would appear that this is in direct contravention of both the habitats directive and the publication plan policies. The developments contemplated would be negatively impacting the SAC and RAMSAR sites. I cannot see that under these circumstances it would be a valid option.

I am calling it a day at present and wonder if you can reply to acknowledge receipt of this and that I am actually doing the right thing and making comments that you can import into the documentation,

Many thanks,

June Ward

Dear Katherine,

This next part of my document relates to the Test of Soundness

I am not at all happy with the settlement definition.

Policy HA1, which is supposedly a greenfield site is proposed to be changed to an urban area – via the redefinition of settlement boundaries reference WW 17. Greenfield sites are not particularly favourable for development as it says in the forward to the publication plan.

Paragraph 2.10 says that Fareham Borough aims to retain the identity of the amazing valuable landscape and settlement definition, protecting it's natural, built and historic assets. As someone who has lived in Warsash 45 years and been conversant with this area for nearly 10 years before that, ie the late 1960's, is a complete contradiction. What was once a very gentle countryside location seems to have been redesignated giving it up and status. And the change of the settlement boundary to enable this to happen is in my view completely unethical and beyond belief. I take exception to the fact that policy HP1 calls for the efficient use of existing buildings to meet such need on a 1 for 1 replacement dwelling basis. This is not applicable for HA1 and it would appear that FBC has managed to redraw the urban boundary.

My next comment on test of soundness is where infrastructure is concerned.

This concerns policy HP4 to be found paragraph 5.24; I think HA1 demonstrably fails to have any thing other than a detrimental effect on the environment, certainly the traffic(witness the two and a half hours to get off the motorway on Friday 4 th December, where all roads in and out of Warsash were snarled up, as we are a peninsula....or has this not occurred to anyone) and amenity has implications. Even now I feel that I cannot venture out too far from Warsash for fear of not getting back at a reasonable time due to the amount of traffic on the few roads in and out of Warsash. Warsash almost appears to be a prison! Don't go anywhere because you can't get back to your house!

This ties in with my next point policy HA1. Page 51 talks about traffic routes. As I have said earlier it almost feels that one is imprisoned in Warsash. I note that there was a recommendation that there should only be six dwellings and Greenaway Lane now I see that the plan proposes for 140 houses and that to enable this to be accessed the lane needs to be widened. I think the clue is in the word Lane. This is a delightful lane to walk through but with that amount of traffic proposed would be considerably dangerous. It is already "take your life in your hands to cross Warsash Road "let alone the impact of trying to walk within what was once considered countryside. As one gets older and appreciates the ability to be able to walk along country lanes. Page 54 suggests there should be seven new accesses onto an incredibly busy Brook lane and Lockswood Road as well as an additional iaccess at Brook Lane via three entry points from Greenaway Lane. I have already had to change my surgery where I was a patient for 40 odd years as it was impossible to get to the surgery on time due to the amount of traffic. My surgery is now in locks Heath Centre. I note that there was an occasion some time in the last few few weeks that the Air ambulance was unable to land; and ambulance was unable to get there because of the gridlock. My point is very much that the proximity of these access points and the position of such will cause even more gridlock. We are a peninsular we are hemmed in. More traffic will make us feel that we are even more in a cage.

Continuing with my other comments about infrastructure

Paragraph 10.15 where has that been an analysis of roads where the new houses are proposed. If we are considering 830 new dwellings what about the transport assessment for HA1. Although there could be an average of two cars per dwelling I know from experience that at one point, with our daughters coming and going from University, we had five cars in the driveway, which we could accommodate.....many of the new homes will not have this advantage, and extra cars will be accommodated on the roads.. how therefore is there no reference for the mitigation required to reduce congestion by 2037. Plan as presented failed the test of soundness by not being positively prepared in this respect. In this very Rural area one has to have access to a car to get anywhere, unless being confined to one's home is the way forward for FBC. I cannot see that paragraph 10.14 helps any of us.

I have had the pleasure of one of my family is moving closer to live with me in Warsash and the boys are very involved in outdoor activities so it was a joy that I saw there was provision of two junior football pitches however these appear to be missed off of the master plan?

Document 3 for FBC

Dear Katherine,

This relates to Test of soundness-

Housing need methodology

I think there is a disparity CE paragraph 3.27 figure 3.2. The map shows that there are eight possible growth areas when there are actually more than this. Could you confirm which is the correct one.

Again paragraph 3.37 does not align with paragraph 4.13 regarding the definition of small-scale development. In other words, is it sites of less than 1Ha or development of not more than four dwellings.

Again under the same heading; paragraph 4.2 of the publication plan is dubious as it bases housing numbers on the proposed new methodology for calculating need and there is some concern that this may not be adopted by the government. Also page 37 paragraphs 4.12, 4.16 and policy HP13 illustration says that the contingency barrier of 1094 has been made. I think the plan is very dependent that 4858 houses at Welbourne will be delivered.

Occupancy rates

Paragraph 5.41 states that a four or five bed house would have an average occupancy rate of 2.4 with regard to nitrate budget calculations. However it also states that the range of occupancy for affordable homes will be between 4-6 persons. This does not marry up with the claims in the publication plan for what the council needs and requires.

Carbon reduction

Paragraph 8.60 section 8 does not state what the target should be for the requirement of meeting CO2 emission targets. It simply refers to individual developments power generation. I would contend that the plan is not positively prepared.

Paragraph 11.34 does not state what the meeting of CO2 emission reduction targets should be. The plan just refers to individual developments power generation so again I contend that plan is not positively prepared.

Paragraph 11.36 no standards have been set for the developers to design for natural ventilation and green infrastructure. I cannot see how just meeting building regs, allies with the Governments needs to meet the promised carbon reduction. The council should lead by example by setting standards to ensure that developers are designing for sustainability. We need to look to the future using the new standards SA10.

Retail facilities

Paragraph 7.13 if Warsash is to have more houses then there will be additional retail facilities needed and with that will be the need for more parking spaces as many who have lived in this area for decades need to use their own transport for shopping, hairdressers, and many other facilities that this village has provided. It is already a job to cross the road from one side to the other and more cars to the area will make this even more impossible. There would need to be a crossing area to allow children to cross safely to get to the bus stop or to Brookfield School as well as the many elderly people who need to cross from one side to the other.

Paragraph 7.18 although out-of-town shopping is discussed it is not however defined. As one gets older one prefers to take ones custom to the local shops as driving is not so pleasurable. If we are to be encouraged to shop elsewhere this will increase the amount of traffic on our heavily congested roads.

Education

Paragraph 10.26 infrastructure delivery plan section 5.5. I note that education is planned with Hampshire county council however the period of any proposed extensions only covers to 2021. The plan however goes up to 2037. My grandchildren are already in three different schools within the area, two of which need cars. Offering houses to be developed but then not having school places it's not a sound approach to help to realise the dreams of future generations.

Paragraph 10.27 Infrastructure delivery plan table item 83 calls for section 106 provisions of additional early years foundation provision within the western wards. However H a one does not say if there is going to be a nursery or preschool within the proposed development area. There should be a child placement contribution to be allocated as there are over 1000 new houses being proposed for the Warsash area alone. Again If parents need childcare provision they would have to travel out of this immediate area in order to access provision; not at all ideal, adding to traffic chaos, length of time travelling to and from child care setting and not allowing children to make friendships with those who they might be at school with when they reach statutory age.

Healthcare

As regards Paragraph 10.26 the infrastructure delivery plan calls for the expansion of healthcare provision through further GP practices in the western wards. The document however only provides an historic timeline through dating the local plan. This is not a sound approach considering that HA1 will bring in additional 830 houses. It is already impossible to get an appointment at the nearest GP practice within a week.

Complies with duty to cooperate Housing need methodology

Paragraph 1.28 which agrees to take up the shortfall of homes from Portsmouth, numbering 847, would appear that FBC are taking a risk as the new methodology for calculating housing need has not been signed off by the Government. Also during this time of public consultation the housing delivery test will not be available

Paragraph 3.10 The rewilding of the Stubbington strategic gap was made without consultation with the council offices or elected members. It came via an announcement through a press release after the start of the full council meeting, which was in the process of debating this plan.

FAREHAM LOCAL PLAN 2037 REPRESENTATIONS

POLICY HA1 HOUSING ALLOCATION – LAND NORTH AND SOUTH OF GREENAWAY LANE, WARSASH

**ON BEHALF OF
BARGATE HOMES**

APPENDICES:

Appendix 1 - Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

1.0 Introduction

1.1 The following representations are prepared by Pegasus Group on behalf of our client, Bargate Homes. Our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash, identified within the emerging Fareham Local Plan 2037 (hereafter referred to as the Publication Local Plan).

1.2 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road (our client controls all but the easternmost part of this site); and 3. Land East of Brook Lane and North of Warsash Road. A Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1) is attached at Appendix 1.

1.3 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

1.4 For the reasons set out in these representations, our client strongly supports the allocation of their three land interests as part of Policy HA1. However, their view is that amendments are required to the specific wording of this policy. These representations also set out our client's position in relation to required amendments to some of the more general policies proposed within the Publication Local Plan (PLP).

1.5 Our client is an important stakeholder within Fareham and is keen to work with the Council to produce a plan which is legally compliant and meets the tests of soundness set out within the National Planning Policy Framework (NPPF). Currently the plan is neither legally compliant nor sound.

1.6 The following representations utilise the same format as the Council’s response form. Each area of the PLP which is deemed to be either not legally compliant or unsound is clearly outlined below. Proposed changes to the plan in relation to policies, supporting text and the proposals map are provided.

2.0 Plan Overall

B1 Which part of the Local Plan is this representation about?

2.1 The following comments relate to the overall Local Plan.

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan:

2.2 Paragraphs 1.5–1.6, 1.14, 1.17, 1.37, 2.12, 3.19–3.22, 3.49–3.57, 4.1–4.20, Appendix B.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan

2.3 Policies H1, HA1, HP1, HP4, HP5, HP6, HP7, HP9, DS1, DS3, NE8, D1.

B1c Which part of the Policies Map

2.4 Policy HA1 allocation site – Land North and South of Greenaway Lane, Warsash.

B2 Do you think the Publication Local Plan is:

Legally compliant – No

Sound – No

Complies with the duty to co-operate – No

2.5 The Fareham Local Plan is not legally compliant and is unsound as it is not consistent with national policy, effective or justified.

B3 Please provide details you have to support your answers above.

B3.1 The Publication Local Plan is not Legally Compliant

2.6 The Publication Local Plan (PLP) has based its housing proposals on the annual housing target derived from the Government's draft Revised Standard

Methodology published in August 2020 in its consultation "Planning for the Future". The Government's response to this consultation was published on 16th December 2020. The Government does not propose to proceed with the changes to assessing local housing need consulted on earlier this year in "Changes to the Current Planning System"; but instead has published a revised approach to the Standard Method, which retains the method in its previous and current form except for London and 19 of the most populated cities and urban centres.

2.7 The key change is to apply a 35% uplift to the Standard Method for Greater London and the 19 most populated cities and urban areas in England – Birmingham, Liverpool, Bristol, Manchester, Sheffield, Leeds, Leicester, Coventry, Bradford, Nottingham, Kingston upon Hull, Newcastle upon Tyne, Stoke on Trent, Southampton, Plymouth, Derby, Reading, Wolverhampton and Brighton and Hove. The minimum housing requirement for Fareham calculated using the amended standard method therefore remains 514hpa.

2.8 The Government's White Paper, "Changes to the Current Planning System" (published in August 2020 alongside the "Planning for the Future" consultation) provided guidance to local planning authorities which were at or close to the Regulation 19 stage of plan-making at paragraph 43:

"Transition

43. The Government is aware that any change in the standard method will have an impact for plans that are currently under development, as authorities expend considerable resources in developing new plans. To enable an orderly transition to the revised standard method, and achieve as much short-term supply as possible while setting the right expectations for early stage plan-making, we propose that from the publication date of the revised guidance, authorities which are already at the second stage of the strategic plan consultation process (Regulation 19) are given 6 months to submit their plan to the Planning Inspectorate for examination. Authorities close to publishing their second stage consultation (Regulation 19), should be given 3 months from the publication date of the revised guidance to publish their Regulation 19 plan and a further 6 months to submit their plan to the Planning

Inspectorate. This is to strike a balance between allowing an appropriate transition period for plans that are nearly through the process, but without causing a significant delay in planning for a higher level of need."

2.9 This transitional arrangement applies to Fareham at the time, such that the previous Standard Method (514 hpa) continued to apply for plan-making purposes in the borough in any event, but the Council chose not to follow this national guidance.

2.10 The National Planning Policy Framework (NPPF) states (paragraph 16 a)) that Plans should "be prepared with the objective of contributing to the achievement of sustainable development". Footnote 10 confirms that this is a legal requirement of local planning authorities in exercising their plan-making functions. Meeting the objectives of sustainable development includes "...meeting the needs of the present...". By preparing a Plan based on the revised draft Standard Methodology target of 403 dwellings per annum, the local planning authority is failing to meet its local objectively assessed need for housing, thereby failing to plan to deliver sustainable development.

2.11 The PPG (ID 2a-003-20190220) is clear that the standard method should be used and any other method should only be used in exceptional circumstances. It further explains that:

"...Where an alternative approach results in a lower housing need figure than that identified using the standard method, the strategic policy-making authority will need to demonstrate, using robust evidence, that the figure is based on realistic assumptions of demographic growth and that there are exceptional local circumstances that justify deviating from the standard method. This will be tested at examination." (PPG ID 2a-015-20190220).

2.12 As discussed above the extant standard method identifies a requirement of 514hpa. The NPPF (paragraph 60) identifies that the current standard method provides a minimum requirement. To depart and provide a figure lower than the current Standard Method requires exceptional circumstances and must be justified by clear and robust evidence. This is absent from the Council's evidence base and as such is an unsound approach.

-
- 2.13 The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's case, 514 hpa) – a requirement confirmed by the Government's announcement of 16th December 2020. As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa was procedurally flawed, lacking in evidential basis, premature and misleading.
- 2.14 The NPPF (paragraph 33) also states that plans should be reviewed every 5 years and updated as necessary. The Inspector's Report on the Examination into the Fareham Local Plan Part 2 (dated 12th May 2015) included modifications which were all proposed by the Council. Its first Main Modification was "a commitment to an early review of the local plan (ie. LP1, LP2 and LP3)". This included a timetable for the local plan review between 2016 and 2018 which the Council has failed to adhere to, having previously expressed its commitment to the Inspector.
- 2.15 The Local Plan Part 3 is the Welborne Plan which was adopted in 2015. The total quantum of housing to be delivered at Welborne has reduced over the years, and the date for its commencement has repeatedly slipped back. The development is currently running about 5 years late. Recently, serious doubts have been expressed over whether it is deliverable at all given the reported funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10. The development is certainly not currently "deliverable" in NPPF terms. Nonetheless, the PLP relies heavily on the delivery of homes at Welborne as by far the most important source of its housing supply - 4,020 homes (just over 48%) out of a total suggested supply of 8,389 homes are timetabled to be completed at Welborne by 2037, and completions are included in the Council's trajectory for the first five years of the plan. Given the heavy reliance placed on a development which, at best, appears to be at serious risk of continuing to be significantly delayed, the Welborne Plan should be reviewed as a matter of urgency.
- 2.16 Given the importance of the Welborne Plan to housing delivery this is considered an issue of both soundness and legal non-compliance.

B3.2 The Publication Local Plan is not Sound

2.17 Paragraphs 1.5 – 1.6 of the PLP set out the "Tests of Soundness" which require that the Plan has been "positively prepared, justified, effective and consistent with national policy". The PLP fails to meet the Tests of Soundness for the following reasons:

1. It has not been "positively prepared"

2.18 The Plan does not seek to, as a minimum, meet the area's objectively assessed need. Given that the Core Strategy was adopted on 4th August 2011, it is significantly out of date such that (as advised by paragraph 73 and footnote 32 of the NPPF) local housing need should be calculated using the current Standard Methodology. On this basis the local housing need target is 514 homes per annum (hpa) plus the appropriate buffer (5% or 20%). Instead, the PLP plans for 403 hpa, thereby failing to plan for the area's objectively assessed need, and failing to contribute to the achievement of sustainable development.

2.19 The lower housing requirement has also not been the subject of sustainability appraisal (SA). Whilst the SA re-assesses sites based upon a lower housing requirement it fails to consider the implications of a lower housing requirement, compared to the current standard method, upon the delivery of the SA objectives. Even if the lower requirement were justified by national policy, which it is not, the retention of the housing requirement at the level previously consulted upon would be a reasonable alternative.

2.20 The Council published an Affordable Housing Strategy in 2019. On page 14 of the Affordable Housing Strategy, it is suggested that there is a need for 3,500 affordable homes to 2036, or circa 220 per annum. This is based on the existing need for 3,000 affordable homes and an allowance of 500 homes to provide for new households and those falling into need. Given that an average of only 76 affordable homes have been built per annum in Fareham Borough since 2011, there is a significant need to boost the supply of additional affordable housing to address needs. Indeed, the delivery of affordable housing needs to almost treble. The provision of affordable housing to address this need is a

significant matter.

2.21 It is also unclear whether the PLP has planned to adequately accommodate unmet need from other authorities. The PPG (ID 2a-010-20190220) identifies that meeting unmet needs from neighbouring authorities as set out in a Statement of Common Ground is one reason why local housing need calculated using the current standard should be exceeded. Contrary to the advice within the PPG (ID 2a-010-20190220) there are currently no Statements of Common Ground identifying if the figure of 847 dwellings is adequate or accepted by other authorities. Rather the Council speculates that this contribution would be "ratified" by a subsequent Partnership for South Hampshire Statement of Common Ground (Duty to Co-operate Statement of Compliance, paragraph 4.5). There is, however, no evidence to support this speculation. Indeed, the only evidence presented confirms a request for Fareham to accommodate 1,000 dwellings from a single neighbouring authority. The PLP has been prepared in advance of the publication of Statements of Common Ground – as such its preparation is premature.

2.22 At paragraph 4.4 of the PLP it is stated that unmet need in the sub-region over the plan period could be "circa 10,750 dwellings". At paragraph 4.5, Fareham's "immediate neighbours" are considered, and it is confirmed that Portsmouth City Council has requested that Fareham contributes 1,000 dwellings towards its unmet need, and that Gosport is "likely to have an unmet need issue, currently estimated to be in the region of 2,500 dwellings...". The Council's 'Duty to Co-operate Statement of Compliance' identifies at paragraph 4.6 that instead of responding to the request from Portsmouth the Council is proposing to: "...take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution." It is not clear how this "general contribution" has been calculated but it appears inadequate. Gosport Borough lies between Portsmouth and Fareham. It is clear that Portsmouth cannot accommodate any of Gosport's unmet need so the obvious place to accommodate it is in Fareham Borough. Therefore, if Fareham plans to deliver the unmet needs of Portsmouth and Gosport, its contribution would be 3,500 homes. However, the PLP (Table 4.1) proposes a contribution of just 847 dwellings to wider unmet need. This figure should be reviewed.

2.23 In relation to unmet need, it should also be remembered that Welborne (previously known as the North of Fareham SDA) was originally conceived by PUSH (now PfSH) as one of two SDAs which were promoted to meet the sub-regional needs of south Hampshire and brought forward in the "South East Plan". The Inspector's Report on the Examination into the Fareham LDF Core Strategy (dated 20th July 2011) identified five Main Issues, Main Issue 1 being:

"7. The North of Fareham SDA represents the most significant and controversial element of the Core Strategy.While the principle of the SDA's development is contained in the regional strategy – policy SH2 of the South East Plan (SEP) – the justification for the proposal derives from evidence prepared by South Hampshire local authorities (the Partnership for Urban South Hampshire [PUSH]) during the SEP's preparation....The advantages of SDAs are seen as threefold: safeguarding existing towns and villages by reducing coalescence; providing more opportunities for planning gain; and achieving a critical mass to deliver sustainability benefits. The development now proposed is one of two SDAs proposed by PUSH and brought forward into the SEP. Both are aimed at meeting sub-regional housing needs and, as such, their housing totals are separated from the housing requirement for the remainder of the Boroughs concerned in the sub-regional strategy and SEP."
(our underlining)

2.24 However, the Council is now treating Welborne as a source of housing supply for Fareham Borough only, disregarding its planned sub-regional role. This compounds the lack of positive preparation of the PLP and starkly contrasts the Council's current approach to the delivery of housing to meet sub-regional needs with its approach of a decade ago.

2. It is not "justified":

2.25 The PLP's strategy for housing delivery is not appropriate, because it is based on a need figure derived from the draft revised Standard Methodology which was still the subject of public consultation at the time that the Plan was prepared. The Government's response to the consultation is awaited. The Government's guidance is that transitional arrangements require Regulation 19 plans to be based on the current Standard Methodology figure (in Fareham's

case, 514 hpa). As such, Fareham's decision to progress to Regulation 19 stage with a strategy based on the draft revised Standard Methodology figure of 403 hpa is procedurally flawed, lacking in evidential basis, premature and potentially misleading.

3. It is not "effective":

2.26 Fareham has decided to deliberately plan to not meet its local objectively assessed housing need, so fundamentally the plan will not be effective. This, coupled with its apparent failure to plan to contribute appropriately to the unmet housing need of the sub-region, indicates a failure to work effectively with its neighbouring authorities on cross-boundary strategic planning for housing delivery and a failure "to support the Government's objective of significantly boosting the supply of homes" (NPPF, paragraph 59). Rather, the PLP proposes to restrict the supply of homes in the plan period in a way which will exacerbate the local housing crisis.

4. It is not "consistent with national policy":

2.27 The PLP is not consistent with the NPPF because:

- It will not contribute to the achievement of sustainable development by not, as a minimum, planning to meet its local objectively assessed housing need;
- It is not planning to adequately meet the unmet housing needs of neighbouring authorities in the sub-region;
- It has not based its housing proposals on the current Standard Methodology;
- Its strategy lacks a robust evidential justification; and
- Its proposed housing land supply includes a majority of housing from sites which are not "deliverable" as defined by the NPPF.

B3.3 The Publication Local Plan does not Comply with the Duty to Co-operate

2.28 As stated at B3.1 above, it is unclear whether the PLP has planned to

adequately accommodate unmet need from other authorities.

2.29 Against a sub-regional unmet need figure of "circa 10,750 dwellings", and in the context of both neighbouring authorities of Portsmouth City Council and Gosport Borough Council having "unmet need issue(s)", and Havant Borough Council being expressly unable to accommodate any unmet need, the PLP (Table 4.1) proposes a contribution of 847 dwellings to wider unmet need. It is not clear how this has been calculated and it appears inadequate.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

1. Plan to meet, as a minimum, the area's objectively assessed housing need. The current Standard Methodology annual housing need figure is currently 514 hpa.
2. Provide Statements of Common Ground in relation to unmet need from neighbouring and PfSH authorities. Any agreements will need to be included as additional housing to the minimum 514hpa.
3. In any event, plan for a level of housing which contributes to the achievement of sustainable development.
4. Treat this plan as an interim plan and reaffirm the Council's commitment to undertake an urgent a review of the Welborne Plan for incorporation into a consolidated early review of this plan.
5. The Council has not undertaken SA of all reasonable alternative housing requirements.
6. The Council has not planned to meet current housing needs, opting instead to phase its housing supply in a way which will exacerbate the current significant under-supply problems.

2.30 Consequential to the above, the Council must allocate additional sites for housing in this interim plan (ahead of the urgent review of the Welborne Plan) to meet its confirmed housing target of 514 hpa.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

- 2.31 The role of plan-making in contributing to the achievement of sustainable development is a legal requirement (Section 39(2) of the Planning and Compulsory Purchase Act 2004).
- 2.32 Revisions to the plan so that it plans, as a minimum, to meet the local objectively assessed need for housing, meet affordable housing need and adequately contribute to meeting unmet need would assist the PLP to meet the Tests of Soundness.

3.0 Specific Proposed Changes

B4c Suggested revised wording of any policy or text

Policy H1: Housing provision

- 3.1** Completely revise the proposed housing target on the basis of the current Standard Methodology figure for the Borough of a minimum of 514 hpa plus an appropriate contribution to meeting sub-regional unmet needs.
- 3.2** Ensure that the revised housing target includes the delivery of a minimum of 220 affordable homes per annum.
- 3.3** Plan to deliver the revised housing target including a five-year supply of deliverable sites. In this regard, Welborne (the supply of housing from which is relied on heavily by the PLP) cannot currently be regarded as "deliverable" as defined in the NPPF.
- 3.4** Consequential updates to paragraphs 4.1 – 4.20 including Tables 4.1, 4.2, 4.3.
- 3.5** Consequential revisions to the list of Housing Allocation Policies under paragraph 4.20 to include allocations sufficient to deliver the revised housing and affordable housing targets.
- 3.6** Policy H1 also seeks to identify a 'phased' requirement. The overall supply is described as at least 8,389 dwellings - this is just 165 dwellings greater than the requirement when the correct local housing need standard method is applied. Given the need to provide for unmet needs from neighbouring authorities this is clearly insufficient and as such further allocations are required.
- 3.7** Policy H1 seeks to 'phase' this supply identifying the following:
- Approximately 2,250 dwellings (averaging 450 dwellings per annum) between 2021/22 and 2025/2613;
 - Approximately 2,400 dwellings (averaging 480 dwellings per annum)

between 2026/27 and 2030/31; and

- Approximately 3,750 dwellings (averaging 625 dwellings per annum) between 2031/32 and 2036/2037.

3.8 This phasing clearly will not meet the overall plan requirement. The rationale for this phasing is due to an anticipation that many of the housing allocations will begin to deliver later in the plan period. This is simply a factor of the sites chosen rather than an evidence-based approach to need. The net effect is that in the early part of the plan period the full need will not be met, exacerbating the current significant housing land supply shortfall in the Borough. This will mean households will either be unable to form or will be forced to move elsewhere to find appropriate accommodation. This not only has an impact upon affordability through increased demand but also has implications for social mobility and health for young and old alike.

3.9 The lack of housing to meet needs in the short-term is exacerbated by recent under-delivery of both market and affordable housing. The Council recognises it has under-delivered in recent years due to the reference to the need for a 20% buffer in accordance with NPPF, paragraph 73 (paragraph 4.16, PLP).

3.10 The housing requirement in the PLP should not be phased to manufacture a five-year housing land supply in the short-term. The plan should seek to address housing need now – to do otherwise is not justified or effective.

3.11 The second part of Policy H1 identifies the sources of supply. Whilst our client does not wish to comment upon individual sites, we do have significant concerns that the sources of supply will not deliver the plan period housing requirement in full. The PLP, paragraph 4.16, acknowledges that many of the chosen sites will not deliver until later in the plan period therefore any slippage in timescale could well push delivery beyond the plan period. Furthermore, the Council is heavily reliant upon delivery at Welborne. Within our comments upon the Plan overall we identify the need for delivery from this site to be reviewed and indeed question whether it is deliverable at all given the funding gap of tens of millions of pounds that exists in relation to the required upgrade of M27 junction 10.

3.12 Furthermore, the Council cannot currently demonstrate a five-year housing land supply. The Council's most recent assessment of its five-year housing land supply suggests a 4.03-year supply. This assessment appears optimistic given recent appeal decisions which identify it is closer 2.4 years. Given these shortcomings it is essential that the PLP seeks to address this under-supply in the short-term.

Section 3: Development Strategy

3.13 This section is substantially focussed on restricting development outside the existing settlement policy boundaries of urban areas. This is in conflict with the NPPF, paragraph 11, which advises that "Plans and decisions should apply a presumption in favour of sustainable development" and that "For plan-making this means that:

a) plans should positively seek opportunities to meet the development needs of their areas, and be sufficiently flexible to adapt to rapid change".

3.14 The highly restrictive strategic policy approach introduced into the PLP does not accord with this national guidance.

Policy DS1: Development in the Countryside

3.15 For housing development which is brought forward in the absence of a 5-year housing land supply, Policy HP4 applies. This will necessarily introduce new built form onto greenfield sites adjacent or well related to existing urban area boundaries. This will inevitably cause a change to the landscape character of the site and immediately adjacent land. Criteria ii) and iii) require proposals to "conserve and enhance landscapes" and "recognise the intrinsic character and beauty of the countryside". It is not clear which "landscapes" are being referred to – presumably this should be restricted to formally designated landscapes or defined "valued" landscapes because otherwise it could be applied to every area of countryside. It is also not clear how, for example, a housing development can "conserve and enhance" a landscape – relevant measures should be defined. Moreover, it is not clear how the extent to which a proposal has recognised "the intrinsic character of the beauty of the countryside" can

be measured. After all, those attributes can be "recognised" but then disregarded. It is true that every area of countryside has a "character" but not that every area of countryside has "beauty".

3.16 Criterion v) should include an exception for development which is brought forward under Policy HP4, where the application of the "tilted balance" would allow the loss of BMVAL.

3.17 Paragraph 3.39 fails to explain how this policy works in relation to housing policies.

Policy DS3: Landscape

3.18 This draft policy designates about a quarter of the land area of the Borough as "Areas of Special Landscape Quality" (as shown on Figure 3.3).

3.19 From the commentary provided in paragraph 3.49, it appears that the Council is equating its 'Areas of Special Landscape Quality' (ASLQ) with 'valued landscapes'. This is questionable. All landscapes are valued at some level by different people. NPPF paragraph 170 triggers a need to consider when landscape value is just a local consideration, or when landscapes are more 'out of the ordinary'. Fundamentally, for a landscape to be a valued landscape, it does not have to be designated - so by designating the ASLQ (or by creating a valued landscape designation) the Council is at risk of creating a policy that is irrelevant, because guidance says that non designated landscapes can be valued, so site-by-site assessments will be required in any event. **Given that Policy DS3 is irrelevant, it is unnecessary and it should be deleted.**

3.20 However, if it is held that Policy DS3 should not be deleted, the following comments apply.

3.21 Paragraph 3.55 states that "...all parts of the Borough have some landscape quality and may be sensitive to landscape change". This is ambiguous. All landscape will be of 'a quality' but quality (in GLVIA3 aligned with condition) is only one consideration of landscape sensitivity.

3.22 With regard to "How the policy works", paragraph 3.56 states that "*The criteria within the policy (points a-g) are derived from the Guidelines for Landscape and Visual Impact Assessment (GLVIA 3) published by the Landscape Institute.*". The GLVIA is an extensive and diverse document and, if it is to be used as basis for this policy then a specific reference or explanation should be provided as to how points a-g have been derived.

3.23 Paragraph 3.57 refers to the submission of "...a proportionate Landscape Assessment". This should be amended to require the submission of a 'Landscape and Visual Impact Assessment'. There are many applications of Landscape Assessment and several forms of reporting. Reference to LVIA would be specific and clear as to what is required (and incidentally relates better to the approaches set out in GLVIA3).

Policy HA1: Land North and South of Greenaway Lane

3.24 As set out in the Introduction to these representations, our client has interests in three parcels of land that all form part of the proposed Policy HA1 housing allocation – Land North and South of Greenaway Lane, Warsash. Our client therefore strongly supports Policy HA1 and the identification of their three land interests within this proposed residential allocation.

3.25 The three land interests are as follows: 1. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); 2. Land East of Brook Lane and West of Lockwood Road; and 3. Land East of Brook Lane and North of Warsash Road.

3.26 At the time of writing these representations, all three sites are subject to outline planning applications, which have all been considered by Fareham Borough Council's (FBC) Planning Committee. Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) has a resolution to grant outline planning permission for the construction of up to 100 dwellings (Ref. No. P/19/0402/OA). Land East of Brook Lane and West of Lockwood Road has a resolution to grant outline planning permission for the construction of up to 157 dwellings (Ref. No. P/17/0998/OA). Land East of Brook Lane and North of Warsash Road has a resolution to grant outline planning permission for up to 140 dwellings (Ref. No. P/17/0752/OA).

3.27 The outstanding matters relating to the outline planning applications are all close to being resolved, especially now that a solution has been agreed in relation to nitrogen deposition into the Solent. It is therefore anticipated that outline planning permission can be granted for all three sites in the near future. Our client then intends to proceed to detailed planning followed by construction stages in a phased but timely manner, such that all three sites are deliverable and can therefore contribute towards the Council's housing land supply position in the short-term.

3.28 Whilst our client supports Policy HA1 and the allocation of their land interests for residential development in principle, in their view the wording of the site-specific requirements contained within the policy requires some amendments, as explained below.

a) The quantum of housing proposed shall be broadly consistent with the indicative site capacity

3.29 Policy HA1 sets out an indicative yield for the allocation as a whole of 824 dwellings. This is supported and no changes are suggested to this site-specific requirement. Our client's three land interests could provide up to 366 dwellings when combined. This includes up to 100 dwellings on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane); approximately 126 dwellings on Land East of Brook Lane and East of Lockwood Road (considering our client does not control the easternmost part of the site so cannot deliver all of the 'up to 157 dwellings' approved at the outline stage); and up to 140 dwellings on Land East of Brook Lane and North of Warsash Road. This represents almost 45% of the indicative yield.

b) Primary highway access should be focused on Brook Lane and Lockwood Road with limited access via Greenaway Lane where necessary, subject to consideration of the impact on the character of Greenaway Lane

3.30 This is not supported, particularly having regard to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane). The wording of this site-specific requirement, including the use of 'limited' and 'where necessary', could be

considered to preclude the provision of a primary vehicular access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane.

3.31 The wording of site-specific requirement b) is inconsistent with Figure 4.1 – Policy HA1 Indicative Framework Plan contained with the PLP. Figure 4.1 identifies 'Indicative Principal Vehicular Access' points into the HA1 allocation, which are indicated by purple arrows and includes the identification of a principal access to the Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane, located in the north-west corner of the site. Figure 4.1 also identifies two further principal accesses further east along Greenaway Lane associated with other parts of the HA1 allocation (outside of our client's control).

3.32 The wording of site-specific requirement b) is also inconsistent with the Illustrative Masterplan that has been approved by the Council as part of the resolution to grant outline planning permission for Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) under Ref. No. P/19/0402/OA. The approved Illustrative Masterplan includes the provision of a primary vehicular access point from Greenaway Lane, located in the north-west corner of the site (in a similar location to the purple arrow shown on Figure 4.1 of the PLP).

3.33 The Committee Report relating to the outline application (dated 16 December 2020), discusses highways matters at paragraphs 8.46 to 8.51. It confirms that from a highway safety perspective, the proposed access from Greenaway Lane is acceptable subject to the imposition of planning conditions (requiring the construction of the access junctions and visibility splays in accordance with the approved plans) and financial contributions towards off-site highways works and a Travel Plan.

3.34 The Committee Report confirms that the Highway Authority is satisfied that a safe means of access can be provided and identifies this as "*...a significant material planning consideration.*" In terms of the impact on Greenaway Lane as a result of the physical alterations proposed as part of the development, the Committee Report states that these "*...are not of a level that would adversely detract from the character of Greenaway Lane or justify refusal of outline*

planning permission." The Committee Report then makes reference to the decision of the Planning Inspectorate in relation to a previous scheme for the site (Ref. No. APP/A1720/W/19/3225866 dated 11 December 2019), in which the Inspector confirms at paragraph 42 that *"...it would be possible to secure complementary development of the Greenaway Lane frontage within the scope of the reserved matters. Furthermore, highways works, and any additional traffic generated by the development, would affect only a very short section of the lane which lacks the more rural character seen towards the east."* At paragraph 38 of the Inspector's decision, it is concluded that *"...no necessity for an alternative access has been demonstrated on highways grounds."*

3.35 On the above basis, it is considered that the wording of site-specific requirement b) is inappropriate and misleading in potentially precluding the provision of a primary vehicular access to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) from Greenaway Lane. This would be inconsistent with the provisions of Figure 4.1 of the PLP, as well as the Council's recent resolution to grant outline planning permission and conclusions of the previous appeal Inspector.

3.36 Accordingly, the wording of site-specific requirement b) should be amended to state:

"b) Primary highways access should be in accordance with the broad locations of the 'Indicative Principal Vehicular Access' points shown on Figure 4.1."

c) The provision of vehicular highway access between development parcels without prejudice to adjacent land in accordance with Policy D3

3.37 This is supported and no changes are suggested to this site-specific requirement. Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative secondary vehicular link roads' which are identified by dotted grey arrows. Our client agrees with the indicative location of these secondary access points within the Policy HA1 allocation, insofar as they relate to their three land interests, although it should be noted some of these connections may be bought forwards as pedestrian/cycle links only at

the detailed planning application stage to avoid more than 100 units having direct access onto Greenaway Lane.

d) The provision of a continuous north-south Green Infrastructure Corridor between the northern and southern site boundaries that is of an appropriate scale to accommodate public open space, connected foot and cycle paths, natural greenspace and wildlife habitats that link the two badger setts and other species, and east-west wildlife corridors. Highway cross-over points shall be limited in number and width and include wildlife tunnels where necessary, in accordance with the Framework Plan

3.38 The provisions of this site-specific requirement are supported in principle. The outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.39 Figure 4.1 – Policy HA1 Indicative Framework Plan of the PLP shows the location of 'indicative wildlife link tunnels'. This includes one running north-south on Land East of Brook Lane and North of Warsash Road which is accepted.

3.40 Figure 4.1 also shows two tunnels on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane), both of which are shown running north-south. Whilst it is acknowledged that these tunnels are only shown indicatively on Figure 4.1, it is noted that the southernmost tunnel on Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) should in fact be shown running east-west, so that it crosses and runs perpendicular (not parallel to) the 'indicative secondary vehicular link road' in this location, and so that it reflects the line of the green corridor running along the southern boundary of the land parcel. Otherwise, the provision of two tunnels within this part of the allocation is accepted, as is the indicative location and orientation of the northernmost tunnel.

e) The provision of pedestrian and cycle connectivity between adjoining land parcels, as well as providing connectivity with Warsash Road and nearby facilities and services

3.41 This site-specific requirement is supported in principle and the outline illustrative masterplans for the three parts of the HA1 allocation under our client's control incorporate these measures as far as possible and have been agreed with the Council.

3.42 It is noted that it is not possible to provide direct connectivity between the land within the HA1 allocation and Warsash Road to the south, as the boundaries do not immediately adjoin the road. However, the outline illustrative masterplans provide pedestrian and cycle linkages to Brook Lane, which in turn leads to Warsash Road and nearby facilities and services.

3.43 In relation to the development proposals for Land East of Brook Lane and North of Warsash Road, it has previously been proposed to provide a pedestrian/cycle link from the southern boundary of the site into the rear car park of The Victory Hall which fronts on to Warsash Road. However, this proposal was not supported by the relevant stakeholders and so has not been carried forward into the illustrative outline masterplan for the site.

f) Building heights should be limited to a maximum of 2.5 storeys, except for buildings which front onto Greenaway Lane and Brook Lane where building heights shall be limited to a maximum of 2 storeys

3.44 The first part of this site-specific requirement is not supported. It is considered that some elements of 3 storey development are appropriate on the allocation site, provided they are located sensitively in the central parts of the site and setback from the site boundaries, allowing them to be appropriately screened and for a buffer to be provided to existing adjoining land uses. This is consistent with the requirement for the efficient use of land as set out in the NPPF.

3.45 The second part of this site-specific requirement for buildings fronting Greenaway Lane and Brook Lane to be limited to a maximum of 2 storeys is accepted.

g) Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does

not impact on living conditions

3.46 This is not supported. The wording of this site-specific requirement suggests that any tree that is subject to a Tree Preservation Order (TPO) cannot be removed. This is not appropriate and is not justified, particularly in light of the vehicular link required through TPO woodland in the southern most portion of the allocation. It is possible that cases may arise where it is necessary to remove a tree even if it is subject to a TPO, for example if the tree is no longer in a good condition or if it poses a health and safety risk in the future.

3.47 The wording of this site-specific requirement should be amended to provide greater flexibility and should state:

"Where possible, existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living conditions, unless agreed in writing with the Local Authority."

h) A Construction Environmental Management Plan to avoid adverse impacts of construction on the Solent designated sites shall be provided

3.48 This is supported and no changes are suggested to this site-specific requirement.

i) Provide future access to the existing underground water and wastewater infrastructure for maintenance and upsizing purposes (included at the request of Southern Water)

3.49 This is supported and no changes are suggested to this site-specific requirement. These measures can be incorporated into the detailed design for the three land parcels controlled by our client to ensure that future access is provided.

j) The site is identified as a mineral safeguarded site (sand and gravel are likely to underlay site). A Minerals Assessment will be required prior to any

development in accordance with the Hampshire Minerals and Waste Plan (2013)

3.50 The justification and evidence in support of this site-specific requirement are unclear. From our review of the information available on Hampshire County Council's (HCC) website, including the HCC Minerals and Waste Plan (adopted 2013) and its associated online Proposals Map, the HCC Minerals and Waste Safeguarding in Hampshire Supplementary Planning Document (adopted February 2016) and the HCC Minerals and Waste Plan Minerals Consultation Area (2015), the land within the Policy HA1 allocation does not appear to be identified as a minerals safeguarded site or as having any potential to be underlain by any mineral resources.

3.51 Furthermore, this matter has not been raised during the outline planning stages for our client's land interests.

3.52 This site-specific requirement is therefore not supported and should be deleted in relation to the Policy HA1 allocation.

k) Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4 and NE3. In addition, the following site-specific infrastructure will be required:

i) Two junior football pitches on-site; and

ii) Off-site improvements to existing sports facilities

3.53 The wording of site-specific requirement k) implies that financial contributions will definitely be required. This wording should be amended to provide more flexibility, in the event that it is agreed between the relevant parties that contributions are not in fact required in relation to one or more of the matters referred to.

3.54 The provision of reasonable financial contributions towards education and transport are accepted in principle where a specific need is identified and at an appropriate level to be agreed between the relevant parties.

3.55 In terms of our client's three land interests, financial contributions towards

education and transport have been agreed in principle through the resolutions to grant outline planning permission, with Section 106 Agreements to secure these being agreed prior to the outline planning permission for each site being issued.

3.56 The reference in site-specific requirement k) to providing contributions towards health is not supported. The Committee Report relating to Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) (Ref. No. P/19/0402/OA dated 16 December 2020) discusses this matter with regard to a request from the University Hospital Southampton NHS Foundation Trust for a financial contribution to provide services needed by the occupants of the proposed new dwellings. The Officer's comments at paragraphs 8.64-8.68 of the Committee Report are as follows:

"In considering the requests it is noted that the construction of houses does not itself lead to population growth. Officers consider that the need for housing is a consequence of population growth. Furthermore, there is no account in the representations, it seems, for the potential for the residents of the new development to be moving locally around the Borough or adjoining boroughs such that their residence locally is already accounted for by the current services and funding commissioned by the hospital..."

...The length of time between sites being identified, planning permission being granted, and the houses actually being constructed and subsequently occupied is many years. The amount of residential development coming forward in the Borough which has not been reasonably foreseeable for a period of year is therefore very limited.

In January 2019 the NHS launched its new 10-year plan. This plan sets out how the NHS thinks it can overcome the challenges that the NHS faces, such as staff shortages and growing demand for services. This is to be achieved essentially by doing things differently and at no point does it refer to the need for new developments to provide for healthcare services by means of financial contribution such as that requested by the Trust.

For the reasons set out above, Officers do not consider that the contribution

sought by the Trust is necessary to make the development acceptable in planning terms and thus the tests for planning obligations as set out above are not considered to have been met. Furthermore, given the adopted policy framework it is considered that in the absence of the contribution, the application does not fail as a consequence as this issue alone would not justify a reason for refusal, which it must do in order to make the contribution necessary to make the development acceptable in planning terms and meet the test for a planning obligation."

3.57 The same conclusions should be made in terms of site-specific requirement k) and the reference to health should therefore be deleted.

3.58 Finally, the requirement to provide two junior football pitches on-site is not supported. During the time that developers in the 'Warsash Cluster' have been in discussion with FBC in relation to their land interests, the Council has not been able to justify why on-site provision is needed and appears to have been an aspiration which has not been properly considered. The provision of sports pitches in this location is not appropriate, particularly having regard to the likely noise and traffic implications associated with this use, as well as the presumed need for a complementary pavilion. Site-specific requirement k) i) should therefore be deleted.

3.59 In terms of the requirement to provide off-site improvements to existing sports facilities, this is inconsistent with the financial contributions that have been agreed as part of the resolutions to grant outline planning permission for our client's three land interests and this requirement has not been raised by FBC as part of this process. The wording of site-specific requirement k) should therefore be amended to provide more flexibility, so that it cannot be interpreted that an off-site financial contribution towards sports facilities is required in relation to all land parcels within the Policy HA1 allocation (such as our client's three sites), but so that this can be sought in relation to the other parcels of land if justified and agreed between the relevant parties.

3.60 Taking into account all of the above, the wording of site-specific requirement k) should be amended to state:

"Infrastructure provision or contributions including but not limited to education and transport may be necessary in line with Policy TIN4 and NE3. In addition, contributions towards off-site improvements to existing sports facilities may be required."

Figure 4.1 – Policy HA1 Indicative Framework Plan

3.61 Figure 4.1 includes the identification of areas referred to as 'open space or development options. Development not on both', which are marked by a light green diagonal hatching. The only areas annotated as such on Figure 4.1 relate to our client's interest at Land South of Greenaway Lane (adjacent to 125 Greenaway Lane) – one is shown at the western end of the site frontage with Greenaway Lane and the other running north-south in the centre of the site.

3.62 These annotations are not necessary and should be deleted as their intended purpose is unclear. The agreed illustrative outline masterplan for this site shows that development will be set back from Greenaway Lane with a linear area of public open shown across the entire site frontage, which in turn connects with further public open space shown running north-south through the centre of the site.

Policy HP1: New Residential Development

3.63 This policy relates to all new housing proposals. However, it only envisages housing coming forward outside Urban Area boundaries through either the conversion of a non-residential building or as a replacement dwelling. It should also cross-refer to Policy HP4 which allows housing to come forward on land outside Urban Area boundaries if the Council cannot demonstrate a Five-Year Housing Land Supply.

3.64 Therefore add:

"c) It is for additional housing in circumstances where the Council cannot demonstrate a Five Year Housing Land Supply and Policy HP4 applies."

Policy HP4: Five-Year Housing Land Supply

3.65 The housing requirement set out in Policy H1 must be re-calculated using the current Standard methodology as described in our comments on draft Policy H1 above.

3.66 Paragraph 5.24 infers that Policy HP4 reproduces Local Plan Part 2 Policy DSP40. However, the third criterion in Policy DSP40 was as follows:

"iii) The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;"

3.67 This has been replaced in Policy HP4 by:

"c) The proposal is sensitively designed to reflect the landscape character and setting of the settlement, is of a scale proportionate to its setting and recognises the intrinsic character and beauty of the countryside and, if relevant, does not significantly affect the integrity of a Strategic Gap;"

3.68 If a five-year housing land supply cannot be demonstrated, then in accordance with the NPPF, paragraph 11d, the most relevant policies in the plan would be out of date and the presumption in favour of sustainable development would apply. This policy may therefore be judged to be inappropriate because it adds restrictions which may prevent sustainable sites from coming forward. However, if such a policy is held to be necessary, then a faithful reproduction of Policy DSP40 iii) is strongly preferred. See our comments on Policy DS1 in this regard.

Policy HP5: Provision of Affordable Housing

3.69 This draft policy states that "affordable housing must be provided" (our underlining) in the following proportions:

- i. At least 10% as Social Rent; and
- ii. At least 55% as Affordable Rent or Social Rent; and

- iii. The remainder, but no less than 10% as Affordable Home Ownership.
- iv. The mix of property size and type should reflect the local need and the site characteristics.

3.70 As drafted this policy is not sufficiently flexible. As acknowledged at paragraph 5.36, development viability will be an issue on some sites. As acknowledged at paragraph 5.39, occasionally the tenure mix prescribed by the policy will not be appropriate; and as acknowledged at paragraph 5.34, other exceptional circumstances may arise (such as abnormal costs) which dictate that a non-standard provision of affordable housing is demonstrated to be appropriate.

3.71 Therefore, amend the first part of the policy to read:

"Sites that can accommodate 10 or more dwellings or sites with an area of 0.5 hectares or more shall normally provide: ..."

3.72 And amend the second part of the policy to read:

"The affordable housing shall normally be provided in accordance with the following proportions: ..."

Policy HP7: Adaptable and Accessible Dwellings

3.73 This draft policy states:

"Development proposals for all new dwellings shall provide:

- a) At least 15% of all new dwellings at Category 2 standard; and
- b) On schemes of over 100 dwellings (gross), at least 2% of private housing and 5% of affordable housing shall be provided as wheelchair accessible Category 3 properties."

3.74 Similar to Policy HP5 above, as drafted this policy is not sufficiently flexible. It is acknowledged that this policy is based on the requirements of Part M of the Building Regulations but it must allow for circumstances arising which mean that these requirements cannot be delivered (fully or otherwise).

3.75 Therefore, amend the first line of the policy to read:

**"Development proposals for all new dwellings shall normally provide:
..."**

3.76 Paragraph 5.57 of the supporting text states:

"The cost to development for providing Category 2 and 3 is relatively minimal. Flexibility for additional costs have been factored into the viability evidence base and this indicates that the requirements for Category 2 and 3 should have no detrimental impact on the viability of schemes in the Borough..."

3.77 This statement is strongly disputed. In reality, these costs will not be factored into a developer's viability calculations (particularly in relation to Category 3 requirements) because option agreements / conditional contracts will have already been agreed on the sites that the Council want to see come forward, so these costs will not have been anticipated. The Category 3 requirements must be substantiated by quantified evidence of the need for such units in the Borough.

Policy HP9: Self and Custom Build Homes

3.78 This policy requires 10% of dwellings on sites of 40 dwellings or more to be provided for Self and Custom Build Homes. The practical implications of managing self or custom build developments on sites otherwise being constructed by housing developers or housing associations must be carefully considered. There is concern that 40 dwellings is too small a threshold at which to introduce this requirement due to the potentially onerous construction management implications which will arise. It would be preferable for the Council to allocate specific sites for self and custom build developments instead of requiring this element on all housing developments of 40 dwellings or more.

3.79 It is noted that, as stated at paragraph 5.70, only 1% of housing plots at Welborne are required to be provided for self or custom build under the Welborne Plan (2015). Strategic allocations such as Welborne provide the ideal opportunity for parcels of land to be allocated for self or custom build, so that

opportunity should not be missed. This should be addressed in the review of the Welborne Plan which is overdue and necessary.

Policy D1: High Quality Design and Place Making

- 3.80** This is a highly aspirational policy which sets out ten criteria ("key characteristics of high quality design") against which all development proposals will be judged "to ensure the creation of quality places." It is not clear what a "quality place" is – this should be defined. The ten criteria push the "bar" too high – all proposals cannot be expected to "create places that are attractive, memorable, distinctive and of strong character", for example, laudable though those aspirations are. In practice, very few proposals would receive planning permission if assessed against this requirement.

Appendix B: Housing Trajectory

- 3.81** This appendix must be updated as it does not reflect the quantum of housing required to meet the local needs. It also projects completions of 975 homes in 2023/24 and 961 homes in 2024/5, which are at risk due to the delays to Welborne which continue. Completions from Welborne should be shown separately as previously.

4.0 Participation at the Examination Hearing Sessions

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

4.1 Yes, we want to take part in a hearing session.

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

4.2 To contribute to testing the legal compliance and soundness of the PLP for the reasons set out in these representations.

APPENDIX 1
Site Location Plan (Drawing No. FLPR-LP.01 – Rev P1)

Fareham Local Plan Representation

This representation addresses the soundness of the plan in particular with respect of the Locks Heath and Warsash Area. and where the plan has not met the duty to cooperate with education and health authorities.

The housing proposed for these areas is :-

Development area	Dwellings
HA1 North and South of Greenaway Lane	824
HA7 Warsash Maritime Academy	100
HA13 Hunts Pond Road	38
HA19 399-403 Hunts Pond Rd	16
HA34 Land South West of Sovereign Crescent	38
HA35 Former Scout Hut, Coldeast Way	7
HA36 Locks Heath District Centre	35
HA37 Former Locks Heath Filing Station	30
HA39 Land at 51 Greenaway Lane	5

giving a total of 1093 dwellings.

The employment areas in the plan are in Whiteley and Lee on the Solent.

The developments create a dormitory area where up to 2000 new residents will be commuting. The Lee on Solent areas are too far for many to cycle and over 2 hours to walk. This leaves Whiteley as the nearest employment area, over an hours walk away. There may be a commuting bus route there in the future but there is no provision at present and no land set aside for developing a rapid transit route.

Many of the new residents will be commuting further afield and using the M27. All commuting involves either crossing or using the A27.

Section 10.5 of the plan states “ The Highway Authority Local Cycling and Walking Infrastructure Plan (LCWIP) identifies a network of key walking and cycling routes across the Borough and recommends actions along those routes where improvements are needed”. May be it will when it has been published.

Climate change has brought about many more days of heavy rain and strong winds, and this has been predicted to get worse. People are not going to commit to commuting on foot or by cycle in foul weather. It is inevitable that there will be a large increase in car traffic on the A27 where there are already lengthy queues at rush hour.

Paragraph 10.4 states “10.4 The Highway Authority’s preferred approach to mitigation of highway impacts, is to focus on active and sustainable modes of travel and reducing the need to travel by motor vehicle.” This is at best wishful thinking and a pious hope, and at worst an abdication of responsibility.

In Policy TIN2 the plan states :

Development will be permitted where:

a) There is no unacceptable impact on highway safety, and the residual cumulative impact on the road networks is not severe; and

- b) The impacts on the local and strategic highway network arising from the development itself or the cumulative effects of development on the network are mitigated through provision of improvements and enhancements to the local network or contributions towards necessary or relevant off-site transport improvement schemes.

Given the geography of the area it is inevitable that development of this scale will have a severe cumulative impact on the road network, which at times is already exceeding its capacity. Without positive effort by the Highway Authority policy TIN2 would stop all the development if it is honestly applied.

There is no mention of retail provision in this area. Almost nobody would be prepared to carry the weekly shopping very far, and there will be need for more parking in Warsash centre and the Locks Heath centre. HA36 and HA37 actually reduce the parking area available in Locks Heath, in addition HA36 takes away much of the parking used by the elderly visiting the health centre and the day care facility.

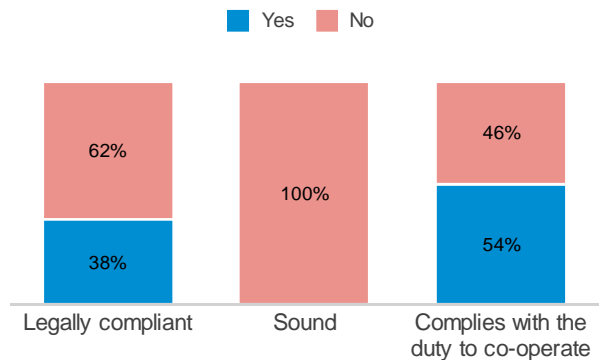

The increase in population will create more demand for school places within walking distance of the housing development for primary schools and cycling distance for secondary schools if the 'school run' is to be prevented. There is no land set aside to this provision and no evidence that the Education Authority has been consulted.

The increase in population will place more burden on the local doctors, and more load on the hospitals. There is no land set aside for any further GP provision or patient parking. There is no evidence of consultation with the care providers.

The national policy is for all new cars to be electric by 2030. For this policy to work all cars will need access to a charging point. Providing just one point per dwelling with off street parking is insufficient, there needs to be one for each car parking space dedicated to a dwelling.

	Legally compliant	Sound	Complies with the duty to co-operate
Total	13	13	13
Yes	5 38%	0 0%	7 54%
No	8 62%	13 100%	6 46%

Respondent: Unknown1 Unknown1 (Unknown1)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number! There is no joined up "Masterplan" for HA1 (with developers working in complete isolation of one another). Therefore, another environmental impact assessment must be conducted showing the cumulative effect of HA1 in its entirety. Para 4.19 Housing policies

HA(2,5,6,8,11,14,16,18,20,21,25) are no longer proposed allocations. So, why was HA1 singled out as an allocation and how was the Objectively Assessed Housing Need arrived at for this site? Developers have taken advantage of the LPA's decision to propose HA1 within (the now defunct) 2017 Plan and have submitted Applications that the LPA have resolved to grant permission on (many ahead of and likely contrary to) the Publication Plan. Others claiming their sites fit well with HA1 has now resulted in the boundaries of HA1 being adjusted to accommodate them. This seems to mark an inappropriate powershift toward the Developers.

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 "Strategic Priorities" which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manœuvre by stealth of the council, to suit its own objectives.

Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockwood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots

Para 14.6 of Final Transport Assessment reads; "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area HA1, of the local plan with 830 homes and isn't assessed within the Transport Plan document.

Policy HA1: Page 52 indicates the need for the provision of "2 junior football pitches" Why are these not shown in the Masterplan?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

HA1 needs to be re-evaluated from the point of view of reducing overall number of dwellings (by conducting an OAN on the Warsash area alone). The Plan must also ensure a "joined up" approach is taken to the many Developers sites and the CUMULATIVE effects caused rather than the current piecemeal "Salami-Slicing" approach

Greenfield Sites will be assessed in their own right and Settlement Boundaries shall not be altered to include large proposed Housing Allocations until the Objectively Assessed Housing Need for the immediate vicinity have been considered. Similarly no redesignation of Greenfield sites to Urban status shall be allowed until OAHN can be proven to justify this.

A full Local Transport Assessment needs to be conducted for the routes serving HA1

The Transport Assessment has only been done at the Macro level (Strategic) and not local level - Need a detailed Transport Assessment for HA1

Include on the Masterplan where the two junior football pitches are proposed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

HA1 would be properly re-assessed (starting from the point of the Extant 2015 Plan numbers and not the unadopted abandoned draft plan of 2017)

Remove changes to Settlement Boundary as indicated in WW17 and apply Greenfield Site aspirations to HA1

It would ensure that traffic and safety implications of an additional 830 dwellings in a relatively compact area have been properly considered

It would ensure that the appropriate mitigation is in place for the additional traffic created by an extra 830 dwellings in the local area

The Masterplan would be made consistent with Policy HA1

Your suggested revised wording of any policy or text:

HA1 will be re-assessed in the light of confirming the Objectively Assessed Housing Need in Warsash and the Western Wards and any Allocation sites will be considered both individually and as a whole to ensure the Cumulative effects on the infrastructure and environment are properly taken into account

HA1 is in the Countryside and as such any consideration of Housing Allocation should conform with the Policies for Development in the Countryside and the Aspirations of the LPA to maintain such areas as a last resort for Development

The LPA will carry out a Full Local Transport Assessment for HA1 to determine the flow of traffic and congestion cause through the additional 1600 vehicular movements each day. In particular the safety of Brook Lane will be reviewed in the light of the "Pinch point" just beyond the School, which is on a blind corner and likely to result in injury or fatality, either from a head on collision or a vehicle striking a pedestrian from having to mount the kerb.

The LPA shall conduct a detailed Local Transport Assessment for HA1 before an allocation is approved

Two Junior football pitches to be shown on the masterplan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

Respondent: Miss Tamsin Dickinson (1612-41256)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Insofar as commentary on this Plan is strictly limited to narrow technical issues of legal compliance, and consistency with national policy, both of which require technical knowledge beyond that of most residents, I believe the very process of limiting consultation in this way is not in the spirit of the laws meant to provide for openness and ease of access for residents. My representations are filed as pertaining to development HA1, but in so far as the other policy areas impact this development, my comments should be duly noted across many of the policy areas, of which the web form only allows you to choose one. Legal Compliance The council has a duty to use a variety of methods to obtain community input (Para 1.5). For the first time to my knowledge, vast numbers of residents were not sent paper copies of the Plan (this has been precedent until now), and as such many residents were unaware or unable to comment. Moreover, Warsash Residents Associations were never consulted with respect to the housing allocations, which is contrary to Paragraph 66 of the NPPF. HA1 did not feature in the 2015 Local Plan, and paragraph 1.16 confirms that this plan is extant, and that the LPA should consider allocations made in the previous adopted plan. Para 4.19 Housing policies HA(2,5,6,8,11,14,16,18,20,21,25) are no longer proposed allocations, so why was HA1 singled out as an allocation and how was the Objectively Assessed Housing Need arrived at for this site? The new proposed Plan then goes on to ignore the 2015 Plan by stating HA1 will provide for these allocations without any due formal adoption of the 2017 Plan. Developers have taken advantage of the unadopted 2017 Plan by citing it as a reason to get approval, and some have been granted on this premise. Furthermore, the site has been extended to increase the boundaries of development even further than the unadopted 2017 Plan. HA1 is responsible for 62% of the housing allocations in the borough, (excluding Welbourne) , with no overarching master plan to deal with the pressures on community infrastructure. By actively allowing individual applications to determine the total extent of development, I believe FBC is absolving itself of responsibility to ensure community services are well catered for and commensurate with the increase in housing being proposed. Para 9.10 states the LPA is aspiring to Nitrate Neutrality. Strategic Policy NE1 requires designated sites be protected and ENHANCED. Likewise Para 9.50 (Policy NE4) confirms permissions will be granted when the integrity of designated sites be maintained or IMPROVED. On Page 199 Para 9.54 indicates that proposals for development should provide a net REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA's approach therefore contravenes both the Habitats Directive and the Publication Plan in respect of these policies. It is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves beyond scientific doubt, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been mitigated (rather than compensated). There is doubt that the LPA is applying the Natural England advice correctly and lawfully in this respect. Soundness Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant subversion of the settlement principle above, and moreover it seems has been done in a less than transparent manner to enable this development. Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary with no consultation. Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications. Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockswood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. Infrastructure Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect. Para 10.14 The Local Plan Strategic Transport Assessment at Para 14.16 reads; "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area HA1, of the local plan with 830 homes and isn't assessed within the The Local Plan Strategic Transport Assessment document. Para 7.13 Local retail/commercial facilities figures do not cater for the additional houses in Warsash. For example, no additional convenience goods floor space has been allocated to Warsash. Facilities Para 7.18 Out of town shopping is discussed, but not defined; Out of town shopping will take jobs and customers away from local shopping areas and will increase traffic on the routes in and out of Warsash and Locks Heath. Para 10.26 Infrastructure Delivery Plan Section 5.4 Education is planned with HCC but the period of any proposed extensions for child placements is only up to 2021 whereas the Plan covers up to 2037. This is not a sound approach for the education of our children. Education Para 10.27 Infrastructure Delivery Plan Table item 83 calls for section 106 provisions of additional Early Years Foundation Provision (EYP) within the Western Wards however HA1 does not indicate the placement of a nursery or pre-school within the development area. Where is the child placement contribution to be allocated as the IDP calls for the addition of 83 placements whereas there are over 1000 new dwellings being proposed for the Warsash area alone. Moreover, no allowances have been made for secondary schooling, which is at capacity in the area and is already subject to detrimental policy changes to the catchment

Please provide details you have to support your answers above

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Detailed long term infrastructure planning for the community to include retail, parking, schools, GP's, traffic measures commensurate with a 2037 timeline and which requires FORMAL community consultation at regular intervals. Lessening of proposed number of dwellings to maintain some green space in the village and improve living conditions for all residents, old and new. Requirement to have an integrated plan, not a one by one for individual developers, which lessens community funds and doesn't account for the cumulative impact on the village.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

as above

Your suggested revised wording of any policy or text:

as above

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Ronald Wyatt (1812-12959)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA1 is still in the extant development plan (2015) as countryside. Although para.4.8 allows the planning authority to consider sites in the previously adopted plan, HA1 was never included in the 2015 plan.. It should never have allowed development on HA1. It is a large site yet designated for over 800 houses but being developed in a piecemeal way. It is unsound for such a large development not to have an overarching environmental assessment. We are told by the Leader of the Council that Fareham will have a 22% reduction in housing need yet this site's allocation has grown by 20%. Given that HA1 is 62% of all Fareham's housing (excluding Welbourne) we have a reduced need and 11 other sites were withdrawn from development in this plan, I would contend that the plan did not consider development sites objectively and rationally.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

HA1 development should be stopped. It shouldn't have gone ahead to the point where it is now and certainly should not go any further until it is more coherent. It requires an overall strategy for environmental, recreational, road and school issues

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would allow the planning authority to address the shortcomings in the way this area is being handled. In doing so it could rebalance the development across the borough which in turn would help address the other issues I raise.

Your suggested revised wording of any policy or text:

I will leave that to those of better brain.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Robin Webb (212-421914)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

• By echoing a national preference for ‘mass transit and other means of transport’, without suggesting how these alternative transport systems might become available/practical, the housing policies HA1 and HA7 (approx. 950 homes) aggravate the already serious congestion faced by car (and bus) passengers attempting to reach the A27 or the M27 from the Warsash peninsular in peak periods. These policies attracted hundreds of reasoned objections, mostly about transport and local facilities in the 2017 consultation. In the current plan, however, these allocations seem unchanged. They are in evident conflict with plan statements with regard to Transport and Other Infrastructure (10.3) on ‘accessibility improvement’ and ‘management of network congestion’. The bullet list of road improvements at para 10.15 does include improvements to Warsash/Abshot Road but neither of these appear to be of relevance to the problems of A27 or M27 access. • The plan (para 11.10) states that ‘Development should avoid being in a place that is dominated by vehicle access and movement priority’. So don’t build on a roundabout. However, out-of-scale development (HA1 & 6 again) will generate vehicle access and movement priority by further extending the existing commuter and school access traffic jams .

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Substantially reduce the HA1 and HA7 housing allocation (preferred option) or commit to road improvements to cope with existing problems and to cope with projected increases in use.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Self evident

Your suggested revised wording of any policy or text:

This could depend on how FBC elects to address this problem. It’s worth noting, however, that the Total Housing Requirement at para 4.6 Table 4.1 is stated as 8,389. Puzzlingly, this includes a 15% contingency instead of the national requirement of 10%. So the plan includes a surplus of 364 homes over the requirement. One might therefore look no further than a 364 house reduction to the HA1/HA7 allocation to bring the total requirement back into line.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don’t want to take part in a hearing session

Respondent: Mr Phillip Hawkins (512-311134)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Issues Relating to Legal Compliance: Community Participation Para 1.5: Statement of Community Involvement Para 2.1 states a "variety of methods" should be used to solicit comments from the public The lack of distribution of paper documents across the Borough has denied high proportions of residents the opportunity to make their views known. Covid, ie access to Council offices and libraries has also had an adverse impact Residents' voices have been disregarded despite protest marches, delegations and objections put forward. Petitions raised by the community which qualified for a full Council meeting debate was refused, even though challenges were made via the Council's scrutiny procedure Community evidence has been ignored in favour of developers, eg traffic surveys/previous use of land in nitrate budget calculations Para 4.7: The Warsash N/hood Forum was not consulted in relation to the intention to allocate housing, (Para 66 of the NPPF) Housing Allocations The amount of new homes, excluding Welbourne, put forward for sites across the Borough is 1342. The proposed distribution is unbalanced-HA1 being allocated to take 62%-830 homes. FBC are now suggesting Warsash suffer a further 20% increase The HA1 has little continuity. Developers are working in isolation of each other, increasing the potential adverse harm. This will alter the outcome of the present environmental analysis in its totality, making it necessary for a further environmental assessment in order to reflect these issues Para 4.19: Housing Policies - HA2,5,6,8,11,14,16,18,20,21 and 25 are now not being considered as locations. On what criteria was HA1 selected and housing needs assessed for his site? HA1 has been adjusted to accommodate developers in that boundaries have been adjusted to suit and fit their sites. This has resulted in what seems to establish a substantial bias towards the developers Habitats Directive Para 9.10: The LPA breaches the Habitats Directive and the publicised Plan. QC's opinion is it is unclear how any development could be contemplated in the Western Wards without negatively impacting the SAC and RAMSAR sites and therefore based on proximity alone, this would invalidate the deliverability of these developments Advice from N/England - It is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves beyond doubt, that adverse effects on designated SAC, SPA and RAMSAR sites from harmful nutrients generated by new residential development, has been mitigated (rather than compensated). It is doubtful that the LPA is acting in accordance with N/England advice accurately and lawfully in this respect Test of Soundness Settlement Definition Policy HA1-(Currently a Greenfield Site) is being put forward to be redesignated as a URBAN area (via the re-definition of Settlement Boundaries ref. WW17) The foreword in the Publication Plan defines that Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. HA1 goes against these principles, as does Para 2.12. Strategic Priorities aims to develop within urban areas and not encroach on countryside in order to generate and encourage healthier lifestyles. Changing the designation of Policy HA1 to Urban and aligning settlement boundaries to facilitate developers is an unashamedable attempt to alter existing criteria to suit Council's own purposes Infrastructure Policy HP4 (Para 5.24): HA1 fail to satisfy criteria e) proposal The proposal would have intolerable environmental, amenity and adverse traffic issues Policy HA1: Page 51 refers to traffic routes regardless of recommendation to limit access to 6 dwellings on Greenaway Lane. The Plan proposes for up to 140 dwellings access to be accomplished by widening the oldest Lanes in Warsash, creating negative impact on the characteristics and history of the Lane and the safety of pedestrians. Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockwood Rd, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. This will in all probability result in unacceptable and avoidable risks from traffic congestion/accident blackspots Para 10.15: The Transport Plan fails to include an analysis of streets where the majority of the houses are proposed. 830 new dwellings are proposed, and as yet no analysis has been given to HA1 in the transport assessment. An average of 2 cars per dwelling, ie approx. 1600 additional vehicles will add to already congested roads with no indication mitigation. This Plan falls short of meeting 'The Test of Soundness' by not addressing these key issues Para 10.14: The Local Plan Strategic Transport Assessment(LPSTA) Para4.16 - "In conclusion, based on the work of this LPSTA, it is considered that the quantum and distribution of the development proposed in the Local Plan, and the resulting transport impacts, are capable of mitigation at the Strategic level, and that the Plan is therefore deliverable and sound from a transport perspective." This statement fails to address the area HA1, of the local Plan and the 830 homes, with no assessment within the LPSTA Policy HA1: Page 52 indicates the need for the provision of "2 junior football pitches". The provision of these is not addressed. Why? Housing Needs Methodology Para 3.27 figure 3.2: The map only shows 8 growth areas. This is not accurate as there are more. Needs rectification Para 4.2: This part of the Publication Plan is unsafe as it bases housing numbers on a proposed new process for calculating need. This is a potential risk in that it may not be adopted by the government. In addition Page 37 Paras 4.12, 4.16 and Policy HP1 identifies that whilst a contingency buffer of 1094 homes has been made, the Plan is heavily reliant on the certainty of delivery on 4858 houses at Welborne Occupancy rates Para 5.41: The LPA makes a case for an average occupancy rate of 2.4 for a 4/5 bed dwelling with reference to Nitrate budget calculations. However the opposite is expressed here, ie the range of occupancy for affordable homes will be in the range of 4 - 6. The Publication Plan claims are therefore not adhered to its own proposals and guidelines Carbon Reduction Para 8.60: Section 8-the need to achieve CO2 emission reduction targets. However, instead of identifying the actual targets, the Plan simply refers to individual developments power usage, as opposed to what each should deliver over and above Building Regs requirements Therefore the plan is not 'Positively Prepared' Para 11.34 -The Council will support applications where development exceeds Building Regs. No % target for this improvement has been identified, making the Plan unfit and not a sound effective approach to carbon emissions reduction Para 11.36: Developers are encouraged to design for natural ventilation and green infrastructure but no standards are set. Just meeting Building Regs will not see the country meet the government promised carbon reductions. The Council therefore should set standards to ensure developers are designing for sustainability, see-encompasses London Boroughs that are using new standards of SAP10, which although not yet within Building Regs, should be adhered to Retail Facilities Para 7.13: Local retail/commercial facilities figures do not cater for the additional houses in Warsash.

a ridiculous number of new homes proposed here in a dormitory area with no nearby public transport, over-subscribed schools, GPs and dentists and grid-locked roads at rush-hours, particularly the Brook Lane and Barnes Lane and Brook Avenue junctions. Entrances onto Brook Lane will be very clogged and dangerous. Inadequate parking will be provided so parking spillage in surrounding residential roads will be a nightmare Yellow lines will need to be introduced. Gridlocks also at junctions with A27. Far too many houses and flats proposed for Sarisbury and Locks Health and Warsash area which will become a conurbation.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Keep more countryside

How would the modification(s) you propose make the Local Plan legally compliant or sound?

former agricultural land should not be built upon.

Your suggested revised wording of any policy or text:

in line with council policy to preserve the green spaces still left in the Western wards, these developments to be shelved/mothballed

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Many Planning Applications for HA1 are already in place. The HA1 masterplan included in this plan is not being followed. The greenspaces are not being kept. This whole area was designated countryside in the last development plan. The supporting documents prove residents claims the areas roads, schools & healthcare can not accomodate additional popultion of this density

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reduce the housing allocation in the HA1 area to a level the local infastructure can accomodate

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Create sustainable development

Your suggested revised wording of any policy or text:

HA1 be reduced to total of 500 houses

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Ms Charlotte Mayall (1112-457141)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Southern Water is the statutory water and wastewater undertaker for Warsash. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure. Proposals for 824 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of foul flooding unless the requisite works are implemented in advance of occupation. This would not be consistent with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019), which requires planning policies to prevent new development from contributing to pollution of the environment. In addition, Paragraph 19 of the National Planning Practice Guidance (NPPG) states 'Good design and mitigation measures can be secured through site specific policies for allocated sites [...]. For example, they can be used to ensure that new development and mains water and wastewater infrastructure provision is aligned and to ensure new development is phased and not occupied until the necessary works relating to water and wastewater have been carried out.'

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Our proposed modification would help to ensure the local Plan is sound by ensuring it is consistent with the above national policies and guidance set out in the NPPF and NPPG.

Your suggested revised wording of any policy or text:

In consideration of the above, we recommend the following criterion is added to Policy HA1; 'Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.'

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Policy: H1 - Housing Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA 7 Reference 3088. 100 dwellings for this site is too intensive. This area borders on nature reserve and the coastal footpath is a vital to residents for leisure and recreation as well as being an important area for migratory birds. This area should not be developed to such a scale but existing buildings converted only. HA1 Ref - 3126 Page 51. (a) Again the number of houses built at 824 is far too intensive for this site, which is DESIGNATED COUNTRYSIDE and is important site for wildlife. Development numbers should be reduced allowing green space to border all road frontages so that the development doesn't impinge on existing residents. (b) There should be more access onto Lockswood Road so that Brook Lane which is a main cycle route for children going to the Secondary School are kept safe.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

It is not sound as it is focussing too much development in one small village.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Have consideration to the Designated Countryside and build on brownfield sites only.

Your suggested revised wording of any policy or text:

If this is my only chance to make a representation then you should make it easier to do so.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1) Paragraph: 1.5

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 1.5 Introduction: Statement of Community Involvement and further Paragraph 2.1 says a “variety of methods” should be used to solicit comments from the public. Because paper-based documents failed to be employed across the borough, a large proportion of residents were deprived of sharing their opinion. This was exacerbated by Covid restrictions, limiting the access to libraries and the council office. The Publication Plan Introduction Page 1 specifies that representations should focus solely on “Tests of Soundness” but is contradictory to FBC’s guidance in Fareham Today which includes the additional areas of “Legal Compliance” and “Duty to Cooperate” This is misleading and confusing to members of the public wishing to provide commentary. Since 2017 residents’ concerns have not been considered regardless of protest marches, deputations and objections raised. For example, despite a petition exceeding the prerequisite number of signatures needed to trigger a Full Council meeting debate, such debate was refused, even after a challenge was raised to the Council’s scrutiny Board. It is discriminatory that community-generated evidence carries less weight than that provided by Developers consultants. E.g. regarding previous use of land in Nitrate budget calculations similarly with traffic survey results captured by residents and Community Speedwatch teams.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should make another attempt to achieve a reasonable level of Community Involvement

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Allow for public opinion to be expressed through the appropriate channels and provide a mechanism for evidence collected by residents groups to be equally considered as that from Developer's consultants and associates

Your suggested revised wording of any policy or text:

The LPA will hold another Public Consultation on the Plan during the Summer of 2021 where their views and concerns can be properly considered

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: The total new homes proposed for specific sites across the Borough (not including Welborne) is 1342. It is an unfair distribution for HA1 (proposed at 830 dwellings) to contribute 62% of this quantum. Moreover, whilst FBC recently enjoyed an overall reduction in new houses of 22.5% they are now proposing Warsash should endure a 20% increase in their local number! There is no joined up "Masterplan" for HA1 (with developers working in complete isolation of one another). Therefore, another environmental impact assessment must be conducted showing the cumulative effect of HA1 in its entirety. Para 4.19 Housing policies HA(2,5,6,8,11,14,16,18,20,21,25) are no longer proposed allocations. So, why was HA1 singled out as an allocation and how was the Objectively Assessed Housing Need arrived at for this site? Developers have taken advantage of the LPA's decision to propose HA1 within (the now defunct) 2017 Plan and have submitted Applications that the LPA have resolved to grant permission on (many ahead of and likely contrary to) the Publication Plan. Others claiming their sites fit well with HA1 has now resulted in the boundaries of HA1 being adjusted to accommodate them. This seems to mark an inappropriate powershift toward the Developers.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

HA1 needs to be re-evaluated from the point of view of reducing overall number of dwellings (by conducting an OAN on the Warsash area alone). The Plan must also ensure a "joined up" approach is taken to the many Developers sites and the CUMULATIVE effects caused rather than the current piecemeal "Salami-Slicing" approach

How would the modification(s) you propose make the Local Plan legally compliant or sound?

HA1 would be properly re-assessed (starting from the point of the Extant 2015 Plan numbers and not the unadopted abandoned draft plan of 2017)

Your suggested revised wording of any policy or text:

HA1 will be re-assessed in the light of confirming the Objectively Assessed Housing Need in Warsash and the Western Wards and any Allocation sites will be considered both individually and as a whole to ensure the Cumulative effects on the infrastructure and environment are properly taken into account

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Paragraph: 9.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 9.10 Whereas the LPA is aspiring to Nitrate Neutrality, Strategic Policy NE1 requires designated sites be protected and ENHANCED Likewise Para 9.50 (Policy NE4) confirms permissions will be granted when the integrity of designated sites be maintained or IMPROVED. Finally, Page 199 Para 9.54 indicates that proposals for development should provide a net REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA’s approach therefore contravenes both the Habitats Directive and the Publication Plan in respect of these policies. Furthermore, a leading QC’s opinion is it is unclear how any development could be contemplated in the Western Wards without negatively impacting the SAC and RAMSAR sites and therefore based on proximity alone, this would invalidate the deliverability of these developments. As per advice from Natural England, it is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves beyond scientific doubt, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been mitigated (rather than compensated). There is doubt that the LPA is applying the Natural England advice correctly and lawfully in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA must ensure that mitigation of eutrophication complies with the directive to REDUCE overall Nitrate Levels and that inline with Natural England Advice that protected sites (SAC, SPA, RAMSAR) are not compromised because simple broader-region off-setting has been used as opposed to Local Mitigation of effects on those sites

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Plan would become consistent with Advice From Natural England and the Habitats Directive

Your suggested revised wording of any policy or text:

Sites will be allowed where Nitrate Reduction mitigation can be proven at a local area level

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Policy HA1 (currently a Greenfield site), is proposed to be re-designated as an urban area (via the re-definition of Settlement Boundaries ref. WW17). In the Foreword to Publication Plan: Greenfield sites are less favoured locations for development. Para 2.10 states Fareham Borough will retain its identity, valued landscapes and settlement definition and will protect its natural, built and historic assets. The proposed allocation of Policy HA1 contradicts these aspirations and those of Para 2.12 “Strategic Priorities” which strive to maximise development within the urban area and away from the wider countryside and to create places which encourage healthier lifestyles. The re-designation of the Policy HA1 to urban status and the movement of the Settlement Boundary to encompass it, is a blatant and possibly, unethical, manœuvre by stealth of the council, to suit its own objectives.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Greenfield Sites will be assessed in their own right and Settlement Boundaries shall not be altered to include large proposed Housing Allocations until the Objectively Assessed Housing Need for the immediate vicinity have been considered. Similarly no redesignation of Greenfield sites to Urban status shall be allowed until OAHN can be proven to justify this.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Remove changes to Settlement Boundary as indicated in WW17 and apply Greenfield Site aspirations to HA1

Your suggested revised wording of any policy or text:

HA1 is in the Countryside and as such any consideration of Housing Allocation should conform with the Policies for Development in the Countryside and the Aspirations of the LPA to maintain such areas as a last resort for Development

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Policy: DS1 - Development in the Countryside

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Strategic Policy DS1 (Paras 5.6 and 3.36) deals with the need (in exceptional circumstances and where necessary and justified) for residential development in the countryside on previously developed land. Additionally, Policy HP1 calls for the efficient use of existing buildings to meet such need on a one-for one replacement dwelling basis. These conditions do not apply to HA1 and therefore it seems the "convenient" alternative was for FBC to redraw the urban boundary!

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Do not redraw the Settlement Boundary in WW17 and exclude HA1 as it does not meet requirements of DS1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Would then comply with DS1 and HP1

Your suggested revised wording of any policy or text:

HA1 is in the Countryside and outside Settlement Boundary. It does not meet the requirements of existing dwelling replacement in HP1 and therefore should not be considered for allocation without meeting the further requirements for development in the Countryside

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Policy: HP4 - Five-year Housing Land Supply

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Re-Assess HA1 in respect of being outside the Urban settlement and in terms of OAHN and Local Sustainability from an amenities and infrastructure perspective

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that Development in the Countryside is only considered with the requirements set forth in the relevant Policies and that any allocation proposed is locally sustainable through the addition of amenities and infrastructure to support the number of new dwellings proposed.

Your suggested revised wording of any policy or text:

HA1 Allocation needs to be re-evaluated to ensure the appropriate amount of infrastructure and amenities are delivered before any Development begins

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

7) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockswood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full Local Transport Assessment needs to be conducted for the routes serving HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that traffic and safety implications of an additional 830 dwellings in a relatively compact area have been properly considered

Your suggested revised wording of any policy or text:

The LPA will carry out a Full Local Transport Assessment for HA1 to determine the flow of traffic and congestion cause through the additional 1600 vehicular movements each day. In particular the safety of Brook Lane will be reviewed in the light of the "Pinch point" just beyond the School, which is on a blind corner and likely to result in injury or fatality, either from a head on collision or a vehicle striking a pedestrian from having to mount the kerb.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

8) Paragraph: 10.15

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why, when there are 830 new dwellings proposed, hasn't more consideration been given to HA1 in the transport assessment. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads and there is no reference for the mitigation required to reduce congestion by 2037. The Plan fails the Test of Soundness by not being Positively Prepared in this respect.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

A full local Transport Assessment will be conducted for the routes serving HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure it was Positively prepared by taking into account the challenges of increased vehicular movements caused by HA1

Your suggested revised wording of any policy or text:

The LPA will conduct a full and thorough Local Transport Assessment to determine any traffic and safety issues created by HA1 and will ensure that the appropriate mitigation has been agreed before any allocation is approved.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

9) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Para 14.6 of Final Transport Assessment reads; "In conclusion, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area HA1, of the local plan with 830 homes and isn't assessed within the Transport Plan document.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The Transport Assessment has only been done at the Macro level (Strategic) and not local level - Need a detailed Transport Assessment for HA1

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that the appropriate mitigation is in place for the additional traffic created by an extra 830 dwellings in the local area

Your suggested revised wording of any policy or text:

The LPA shall conduct a detailed Local Transport Assessment for HA1 before an allocation is approved

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

10) Policy: HA1 - North and South of Greenaway Lane

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HA1: Page 52 indicates the need for the provision of "2 junior football pitches" Why are these not shown in the Masterplan?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include on the Masterplan where the two junior football pitches are proposed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The Masterplan would be made consistent with Policy HA1

Your suggested revised wording of any policy or text:

Two Junior football pitches to be shown on the masterplan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

11) Paragraph: 3.27

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.27 fig 3.2 There are actually more than the indicated 8 potential growth areas shown on the map (assuming that these are construed as being the proposed allocations). This needs correction.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Either change the number of potential growth areas or modify the Map to be consistent with the figure of 8

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Update the Map or change the number (8) mentioned in Para 3.27

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

12) Paragraph: 3.37

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Para 3.37 is in conflict with Para 4.13 over the definition of small-scale development – is it sites of less than 1 Ha or development of not more than 4 dwellings?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Ensure the numbers are the same in both Paras

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would be consistent

Your suggested revised wording of any policy or text:

Change either Para 3.37 or 4.13 to make them consistent

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Steve Matthews

Warsash Inshore Fishermen's Group

RESPONSE TO CONSULTATION ON FAREHAM LOCAL PLAN 2037

Dear Planning Team

I am responding on behalf of the local fishermen here at Warsash and Southampton Estuary to the Fareham Local Plan 2036 (Final version; [Publication Plan \(fareham.gov.uk\)](https://www.fareham.gov.uk/publication-plan)).

We have some serious issues regarding the Plan's ability to deliver sustainable housing development without guarantee of protection (beyond reasonable doubt) of certain marine ecosystems within the Solent European Maritime Site and without guarantee of positively enhancing local commercial fishing businesses.

Although the features and species listed under the Habitats Directive (Special Areas of Conservation and Special Protection Areas) have already been evaluated by both Natural England (NE) and the Environment Agency (EA) in the respective Habitats Regulation Assessments (SCA's/SPA's), there are clearly some significant **Assessment oversights and gaps in the evidence base** which are of direct relevance and concern to the local Fishing Industry and also, we would suggest, to the future viability of the Solent Oyster Regeneration Project (Blue Marine Foundation).

These assessment oversights mean that the Fareham Plan, if implemented as stands, will likely lead to and exacerbate environmental effects within the SEMS . The specific issues we raise regarding the existing overgrowth of red seaweed (also known colloquially as 'The Red Menace') have not been evaluated by NE or the EA or mentioned in the Fareham Plan's evidence base.

The Plan fails to pass the test of soundness, (paragraph 1.5) in that it is discriminatory in that community-generated evidence carries less weight than that provided by the Councils (and developers) statutory consultants. Furthermore, there has been no formal involvement from the Councils statutory advisers with local fishermen with regard to seaweed eutrophication and the effects of wider seaweed overgrowths on their local industry.

The Plan fails under section 9 Natural Environment:

Specifically, NE4 water Quality effects and likely fails under NE1, protection of local ecological network (regarding sandbanks within the SEMS).

Paragraph 9.16 states: '*Paragraph 174b of the NPPF states that the Plan should promote the conservation and enhancement of priority habitats, ecological networks and the protection and recovery of **priority species**. Development proposals within the Borough are therefore expected to contribute to achieving this objective.*'

Solent native oyster, *ostrea edulis*, is currently a priority species for regeneration (Blue Marine Solent Oyster regeneration project). Nutrient exacerbated growth of smothering seasonal red seaweed masses leads to a significant negative effect upon the spatfall of the native oyster (ref: Warsash Fishermen SEMS enclosed)

The Plan fails to pass the test of soundness, in that there is a question regarding its long-term effectiveness with respect to Nitrogen-Mitigation. This strategy has not been proven. There is doubt that the Local Planning Advice is applying the Natural England advice lawfully in this respect.

However, as we have outlined above, there is a systemic failure here in that NE have not thus far considered the wider environmental issues we have brought to their recent attention (by email letters) and outlined comprehensively in this letter and attached paper. **These represent the 'evidence gaps' mentioned previously.**

It is the duty of NE and other Statutory Consultees to provide relevant evidence, ***where gaps in the evidence base have become available during the Consultation process, (NE submission to the Council, 2020).***

Para 9.5 of the Plan fails on the test of soundness. It assumes the Mitigation policy will be effective throughout the SEMS. Although the Local Planning Authority (LPA) is aspiring to Nitrate Neutrality, paragraph 9.1 requires designated sites be protected and ENHANCED as well as Strategic Policy NE1. Additionally, Para 9.50 (Policy NE4) confirms: 'Planning permission will be granted where the integrity of the designated sites is maintained, having regard to the effect of nutrients on the designated sites arising from increased wastewater production'. SEMS is a designated site.

The Plan fails to include the likely increase in bacterial contamination of shellfish (within sand-gravel bank seabed features) from increased sewage overflows, not mentioned in the Plan.

Para 9.38 through to 9.43 of the Plan indicates that proposals for development should provide a biodiversity net gain (including enhancements). This cannot be guaranteed.

The Plan fails under Para 9.5, under Policy NE4: '*Planning permission will be granted where the integrity of the designated sites is maintained, having regard to the effect of nutrients on the designated sites arising from increased wastewater production*'. This implies a REDUCTION in eutrophication for designated sites in an unfavourable condition. The LPA's approach therefore

cannot be proven to support the Habitats Directive, because ***the NE solutions are entirely untested, rely entirely on hypothetical modelling and fail to consider wider seaweed overgrowth issues specific to the fishing industry exacerbated by excessive nutrient loadings into Solent waters.***

The SEMS is already in an unfavourable condition with respect to localized seasonal seaweed aggregations and Southampton Water also receives frequent unfavourable shellfish classifications due to direct sewage overflows after heavy rain. Both significantly affect the local fishing fleet. (see enclosed paper, Warsash Fishermen SEMS)

It is inconceivable that additional development could be contemplated in the Western Wards without negatively impacting the SEMS, SAC and RAMSAR sites. This would invalidate the deliverability of these developments.

As per advice from Natural England, it is the responsibility of the LPA to fulfil its legal obligations and satisfy themselves ***beyond scientific doubt***, that adverse effects on the designated SAC, SPA and RAMSAR sites, from harmful nutrients generated by new residential development, has been **effectively** mitigated (rather than just compensated for). There is no evidence the N-Mitigation Plan will be effective throughout all areas of the SEMS affected by red-seaweed overgrowths.

We are of the opinion that the Plan fails badly in that respect.

If implemented as stands, the Plan is unlikely to:

- 1) ensure that red floating seaweed overgrowth within the wider SEMS (which already seriously restricts Commercial Fishing Activity within the SEMS) is not further exacerbated by increasing nutrient loadings in Solent waters, especially with respect to the Solent sewage outfall pipe serving Peel common effluent and its immediate marine environs.
- 2) ensure that water quality with respect to undesirable bacterial and viral contamination of shellfish beds in Southampton Water and the wider SEMS is not further exacerbated. (by post-rain/ storm waste-water overflows)
- 3) ensure that intertidal algal mats (seaweed overgrowth /deposition on mudflats) do not increase.

Although the Statutory Consultees for this Consultation (NE and EA) have included Assessments relating to point 3) above (intertidal Eutrophication) in line with their Statutory duties under the Habitats Directive, (SAC's/SPA's) **they have not made any Assessments regarding points 1 and 2. This is a serious oversight and failure of the process.**

If it is not the remit of either NE or EA to evaluate these effects (1 and 2), then we suggest further consultation with any relevant monitoring bodies. NE or CEFAS may be able to provide advice as could the fishery regulator, Southern IFCA.

We have already prepared a paper (enclosed) which comprehensively outlines the negative effect of seaweed overgrowth on the efficiency of commercial fishing businesses operating in the SEMS. As you will see from the report, the Solent is almost unique in this respect, distinct from other inshore commercial fisheries, which makes it imperative that the wider commercial and ecological impacts of increasing nutrient loadings in Solent waters are determined by the relevant Statutory or science-monitoring bodies.

This should be done before the Secretary of State is presented with this Plan for consideration.

Our enclosed paper also raises the issue of wastewater overflows after heavy rain which subsequently lead to shellfish beds becoming contaminated by E-coli and viral agents., not covered by this Plan.

There is no indication in the Fareham Plan that these contamination events will not increase and there is no indication from the EA or Southern Water advice with respect to that point.

In Part 2 of our paper (Warsash Fishermen SEMS, enclosed), we cast serious doubt on the ability of Natural England's Nitrogen Mitigation strategy to deliver a positive impact on seasonal seaweed overgrowths in the SEMS (specifically the red floating weed described in our paper).

The specific failure regarding this involves the assumptions made by the mitigation scheme rationale.

For the record we will expand on that here:

"NE's N-Mitigation strategy assumes that the effluent exiting the Peel Common outfall pipe in the Eastern Solent, homogeneously disperses with all Solent Waters. This clearly is highly unlikely. The sewage effluent plume data available from Southern Water reveals that there is already likely to be an unequal dispersion of the effluent due to distinct variations in tidal flow rates/timings throughout the SEMS (which fishermen are highly aware of already).

Furthermore, it is entirely unknown whether offsetting land on the Isle of Wight will positively impact marine sites within the SEMS (already seasonally infested with the red seaweed masses) which are spatially and tidally distinct from the offset watershed. In other words land offset north of Wootton is highly unlikely to reduce sub surface seaweed overgrowths along the Lee-on Solent shore, due to incomplete tidal mixing.

Because of these tidal variations, the area between East Bramble and Meon Shore will still likely receive a critical dose of nitrogen/phosphate and oestrogenic compounds on the westward/north-westward flowing ebb-tide. These compounds must already be having a site-specific impact on already present seaweed overgrowth here and due to shifting, already must be creating negative impacts on the wider SEMS in other bays of the Solent (that fishermen are already aware of). Potentially the Blue Marine oyster regeneration project, will also be negatively impacted, where dense algal deposits can prevent oyster spat-fall in the summer. (see historic reference to this, Warsash Fishermen's SEMS paper)

The local fishermen here have long supposed that the sewage outlet off Browndown must effectively 'feed' the growth of the red-filamentous floating weed throughout the spring and into summer growth season. Because of the behavior of the tidal flows in the Bramble East area, this weed congregates en masse along the contours of the seabed, including the greater Brambles Bank, eventually becoming spread along a wide area. It often persists into the Autumn and makes commercial net fishing with set nets and trawls very difficult. One area usually seriously affected is between the Lee post and Meon bouy (off Chilling Cliffs, but there are numerous weed infested spots throughout the Solent at peak seasonal growth times). It is not clear how much of this is attributable directly to the Peel outfall distinct from other outfalls in the catchment and this would require further Assessment as our paper suggests, but it IS more likely to be directly accelerated by significant localised sources of N-loading directly discharged from the Sewer discharge pipe.

Unless there is a significant lowering of nutrient transfer from agricultural land between Warsash and Lee-on Solent into this stretch of the fishery, as part of the Mitigation, then the nutrient loading from the Peel offshore outfall pipe would likely still encourage these overgrowths to occur along that stretch of the seabed and, without effective at-source Nitrogen/Phosphate removal at the Peel Common Waste-Water Treatment Works, would likely increase in proportion with increasing housing development and population density. ‘

The Evidence base for the Fareham Plan includes the subsection 4.3.24, '*sandbanks which are slightly covered by seawater at all times.*'. We are advised that this would include the Brambles Bank and subtidal areas of sand/gravel shoals along the stretch between Lee and Chilling, together with other such banks throughout the SEMS which form important fishery locations and features for local fishermen who use a variety of fishing practices from set-netting and trapping, to trawling and shellfish dredging.

Therefore, the Plan fails on the test of soundness in that it fails to supply evidence that these banks have been fully considered in the scoping advice with respect to: seaweed overgrowths and deposition effects on the seabed habitat and associated negative impact on commercial fishing operations. We would include the likely effects on the Solent oyster regeneration project in this.

Therefore, **the Plan also fails under paragraph 6.3 (Employment)** in that it fails to consider likely significant impact to local fishing businesses with regard to *seaweed overgrowth* impacts and potential bacterial/viral *shellfish contamination* from untreated sewage overflows. There will be a likely significant impact with respect to both parameters.

Natural England's latest advice to the Council is that: '*.. this approach may be refined if greater understanding of the eutrophication issue is gained by thorough new research or updated modelling.*' (section 4.3 and 4.11, ADVICE ON ACHIEVING NUTRIENT NEUTRALITY FOR NEW DEVELOPMENT IN THE SOLENT REGION, version 5, 2020)

We advise Fareham Borough Council to instruct, with immediate effect, its Statutory and non-Statutory Consultees that research should be extended to include:

- -the seasonal floating seaweed overgrowths in the SEMS and related consultation with the local fishing fleet and Blue Marine Native Oyster Regeneration Project.
- -a study of the possible interference effects of seasonal red seaweed depositions on native oyster spatfall in inshore zones of low tidal flows. (seaweed is not dispersed effectively inshore)
- -An enhanced and detailed study of the tidal variations in the Peel sewage outfall environs specific to sewage effluent dispersal.
- -seasonal floating red seaweed deposition in the local inshore zone (SEMS) and biodegradability study.
- -A thorough assessment of the efficacy of land offsetting/N-mitigation in specific areas of the Solent catchment (eg; the Wooton Creek farm) and an evaluation on the extent of mitigation effects (seaweed growth) in areas that are not within the immediate vicinity of the designated N-mitigation/offsetting site. (this relates to seawater tidal mixing disparities, and that our contention that offsetting in one area may not impact seaweed overgrowth/ depositions in another part of the SEMS due to tidal flow differences)

We would also request that the issues we have highlighted here be retrospectively applied to the Welborne development.

Finally, in addition to the failure of the Plan regarding the subject of seaweed overgrowth and water quality and effects on local fishermen, the Plan fails the test of soundness on:

Section 4 Housing Need and Supply:

The total new homes proposed for specific sites across the Borough (not including Welborne) is 1327. The allocation for Warsash is 924 dwellings (HA1 Greenaway north and south and including the Warsash Maritime site, HA7). This contributes around 69.6% (or thereabouts) of the entire allocation proposed by the Plan, excluding Welborne. This allocation is a massively unrealistic distribution and will lead to a number of negative impacts locally and therefore unsound.

Prepared on behalf of the Warsash and Southampton Estuary Fishermen

Communication from Warsash Inshore Fishermen's Group.

November 2020

Subject: The effect of seaweed overgrowth and poor water quality (sewage effluent) on local inshore commercial fishermen in the Solent European Maritime Site (Part 1) and critique of Natural England's provision for nitrate mitigation (Part2).

Overview

The increased presence of nitrates and phosphates entering the Solent European Maritime Site (SEMS) via the watercourses in the riverine catchment area in Hampshire has recently shown to have had a significant adverse effect on the SEMS mudflat habitats locally, due to extensive deposits of putrefying seaweed arising from accelerated overgrowth. This led to a temporary closedown of house-building activity in the Fareham Borough while a 'mitigating solution' was found.

Part 1 of this report will focus on this issue from the perspective of the local fishermen operating from Warsash, Hants and will widen the perspective beyond just what has been reported in the media.

In **Part 2** it will be seen that serious doubt will be cast as to the suggested effectiveness of the nitrate mitigation plan as advised by Natural England and widely being adopted by Councils since hard evidence that the plans will be successful is lacking.

It should be noted that our views regarding the extensive seasonal presence of seaweed (Part 1) generally align with other fishermen within the wider Southampton Water and Solent region together with some of the reported experiences of local sea anglers.

Since we are now highlighting the important extensive seaweed problem and committing our views to paper for the first time in local history, the reader will be able to see the significance of the seaweed issue in relation to the urgent requirement to maintain our various local net fishing practices (severely affected by weed) which are currently under threat by local fishery regulators.

PART 1:

Solent Seaweed: An Historic Local Problem

(*Note the use of the term 'weed' or 'seaweed' refers mainly to invasive, free floating varieties, not species like bladderwrack or kelp which usually are not an extensive problem for fishermen here).

For many years the local fishermen that fish the Solent and estuarine areas nearby have had ongoing issues with seaweed* overgrowth, with different types of weed causing different effects at differing times and interfering with the deployment and function of fishing gear in the district. There is also some anecdotal evidence that the decay of various types weed and deposition onto the seabed may be having some serious implications for seabed sea life and for the current ongoing Solent Oyster Regeneration Project (see below).

There has not been much, if any, serious scientific exploration of the wider seaweed overgrowth problem in the SEMS and no one has sought out the fishermen's views on this matter, until now. We are outlining here how seaweed affects fishing operations, not offering specific statements as to possible causes of seaweed overgrowth (That is covered in **Part 2**).

Local fishermen here know that recent focus by ecologists on the green seaweed overgrowth on the mudflats within the SEMS is only part of the story and obscures the wider unseen problem of floating red-seaweed overgrowth in the less visible areas, away from the general view of the public.

Fishermen here however are widely acquainted with the issue as they are effectively sampling the sea every time they go out fishing. Our intimate knowledge of the Solent seabed and the characteristics of the tidal streams is unparalleled. The next best authority (in our humble opinion) would be professional divers and maritime hydrologists.

Seaweed overgrowth and interaction with fishing practices

Local fishermen at Warsash have used a variety of fishing practices throughout the last fifty-year period. During the height of the Solent oyster fishery, (1970s to 2007), the main seasonal winter fishery was oyster dredging with some clam dredging as well. During spring and summer seasons there have historically been inshore trawling for demersal fish and cuttlefish and later, the extensive use of traps for cuttlefish, together with whelk potting. Set nets, drift nets and baited longlines is also a common practice continuing until today.

All of these methods can be significantly hampered (and some methods often made literally unviable) when floating seaweed begins to grow in late April and into the summer months. This is the main fishing season for Warsash fishermen. Some fishing methods will be affected more than others.

It is said locally that Solent fishermen have to be much more determined than common as they have to contend with the extra burden and challenges of the ever-present seaweed problem, not to mention the challenge of working in a fast tidal area with extensive ship and sailing craft to contend with as well. The fisherman's decision of 'where to fish today?' is often accompanied by a question to another fishermen friend to the effect of: 'what was the weed like in that area?'

The 'red weed', as we call it, is known by different names and grows rapidly locally (as does the green varieties of lettuce-like and filamentous green weed, often found in the mudflat areas near freshwater/brackish environments and identified by NE as contributing to eutrophication of the SEMS mudflat habitats).

There is a rapid growth of both red and green weed from the end of April into summer. Large tides (Springs) tend to disperse the red weed throughout the water column and it can sometimes be seen near the surface. It is a free floating, filamentous weed and when it stops growing in late summer is deposited in the bays and bank contours throughout the Solent with some areas being affected more than others. It can persist well into the Autumn and can still be present in some areas (Osborne Bay, Stanswood Bay, Inner Hurst, Beaulieu etc) into the winter months, when it will have already been decomposing for a month or two.

It is regularly identified by sea anglers as being the main obstacle to rod fishing, both by shore and by boat. But that is just the tip of the iceberg.

The green weed mentioned in connection with the mudflat habitats with the SEMS also can hamper inshore fishing and angling activities on occasions. These areas are not regularly fished heavily commercially. One fishery in this environment is the historic mullet net fishery. Some of the Warsash Fishermen have inshore mullet fishing permits supplied by the River Hamble Harbour Authority. This allows them to fish seasonally and legally for mullet within the River Hamble in small boats. The fishery is similar to that of Poole Harbour which has been going for decades.

Any significant deposit of either green or red seaweed in these inshore areas will often be the deciding factor for the fisherman as to whether the net is safely deployable or not. We have noticed an increased abundance of the green weeds in the mudflat areas in recent years and the red variety is always present in the wider Solent area and can be more or less abundant depending on environmental factors like temperature, rainfall, tide strength, sunlight etc. Storm events can often move coagulated deposits inshore and dump it onto seabed contours.

The public slipway at Warsash hardway has to be regularly cleaned by the Council when often large masses of mainly green weed are taken away.

Furthermore, we must state that there may be a connection with the increasing tendency for returning mullet shoals to avoid inshore mudflats during the height of the green seaweed overgrowth. This observation has been recently noted by the fishermen locally and we wonder if it connected to the decaying effect and subsequent chemical release onto the mudflats, together with the effect of mudflat 'eutrophication' and water oxygen depletion. That will need further investigation by scientific study.

Netting in the Solent (SEMS) and seaweed overgrowth issues.

Set Nets/Drift/Ring

Throughout the UK the extensive use of **set-nets** (nets secured on the seabed) is a common practice and fishermen are able to have a relatively reliable fishing method for much of the fishing season when the fish target species are abundantly available. This is not the case in the Solent and Southampton Water.

Go to any fishing port west of Swanage or east of Selsey Bill and you will be able to observe the nearly year-round use of set nets, tides permitting, (for sole for example) with little, if any, troubling effect from floating red weed. This is not to say it does not occur sometimes and there are increasing reports we hear from outside the Solent of weed events, so it appears that the issue is increasing across the south, apparently in direct correlation with population density and growth.

In our case, the use of nets can be severely restricted and made impossible by the abundance of mobile seaweed. Nets cannot be left for as long as other fishermen do in other areas. Some years, it is virtually impossible to use

extensive lengths of set nets with any reasonable expectation of making an easy living, especially in the shallower zones, where red weed settles. At other times it may be possible to leave a surface net for a short time and still catch a few fish to make it just about worthwhile. Those nets are nearly always attended by the fishermen.

Fishermen here have to modify their deployment of set nets by either stopping much earlier than many of their UK counterparts (when the weed situation becomes intolerable, usually as early as the beginning of May) and switching fishing methods (traps or bottom set lines for example) or by seeking areas in the Solent and Southampton estuary where the weed may not yet have reached 'critical mass', or by limiting the amount of net and using short soak times. The potential loss of income is considerable compared to weed free areas in the UK.

Later in the year, Autumn, the weed situation can improve markedly in some spots which can allow the resumption of some netting activity, but it can still be a liability.

Seeking out other areas to fish may, in some cases, mean going out into deeper areas off the contours of the channels in order to avoid a negative weed event ('dose of weed' is the usual local term). However, it should be stated that this has a high risk attached as the tidal currents are often greater out deeper and if the fisher gets it wrong, a 'dose of weed' will likely result, with either the loss of the gear or a long period of cleaning out the nets.

Long hours cleaning nets from weed is physically wearing, mentally demotivating and economically counter-productive. Furthermore, the practice of having to deploying nets in deeper waters just to avoid floating sea weed is a risky business due to shipping movements/small craft and is usually restricted to smaller nepe tides only, as nets do not fish well in fast flows.

We have reason to believe that the Marine Management Organization (DEFRA) which regulate quotas and legislate nationally have yet to fully acknowledge and comprehend the difficulties that Solent fishermen face with regard to this seaweed issue, affecting their ability to provide fish for the table and secure a reasonable living. Regulation on the use of nets in the inshore zone throughout the UK and locally always fails to take into account the hampering effect on fishermen due to extensive mobile weed effects.

Furthermore, we should also state for the record that the Warsash Inshore Fishermen's critique of the proposed restriction on netting practices within the estuaries of the Southern Inshore Fisheries and Conservation Authority (SIFCA) and wider district should also be seen in the context of the difficulty of deploying nets locally, due to extensive hampering from the presence of seaweed. Again, this has not yet seriously been a consideration by the Authority and we hope they will take these comments here into consideration during their Consultation.

Fishermen also use a variety of drift net practices throughout the UK. The local fishermen here can fall back onto a drift net fishery to a certain extent, in line with national legislation requirements, when the setting of fixed nets is made impossible by sea-weed overgrowth. Drift nets are highly size selective. Because the net drifts with the tide the worst of the seaweed can often be avoided, but this is not always the case.

The use of drift nets (and also set nets) is severely restricted by the incoming yearly natural growth of a plankton called noctiluca, (known locally as 'the fire'**) which is bio-luminescent and lights up the water when disturbed (for example by a moving vessel, boat propellor and also by tidal currents).

**'Fire' appears with the return of the 'May Water' when the 12 degree (celsius) seawater thermocline reaches the local area, usually by mid May, .

Tidal currents moving across either a drift net or a set net will cause the plankton to literally light up the net, sometimes leaving a jelly-like deposit on the mesh. Some species of fish that have good eyesight, will often be able to see the net glowing in the dark (as nets are often deployed after dark) especially in clearer water conditions and this will often highly restrict the catch at times. Other fish species like sole do not seem to be affected by the 'fire'. 'Fire' makes the use of nets for some fish much less effective and therefore reduces the effective netting season by a large degree.

The increased presence of nutrients like nitrates and phosphates in the seawater will likely exacerbate the overgrowth of this plankton and this is an additional concern for us. Further scientific study will be required.

The 'fire' problem is commonly known by fishermen, but again, as with seaweed presence, is underappreciated by local and National commercial fishing authorities who may inadvertently seek to restrict or regulate the

seasonal deployment of nets without duly taking these already significant 'natural' restrictions on net deployment into account.

Another netting method which can be used to overcome the natural restriction of 'fire' and weed is ring netting in daylight hours in a small circle with a short length of net, (effectively a set net). This has already been officially recognised as a method of net fishing by Danish/Dutch authorities and we are seeking a similar classification here liaising through the NFFO with the use of (attended) short lengths of surface net, which also significantly lower the risk of salmonid interception in estuaries. This, if successfully negotiated with the local Authority will be a first for UK inshore fishermen.

This method is also the common method used in the Poole harbour mullet fishery. Because the net is deployed for a short time only, a 'dose of weed' can often be avoided, but not always. Short time net deployments locally are therefore the only real option left for local fishermen at most times of the year.

Longlines

When the red weed has reached maximum growth the use of longlines in certain areas can be rendered much less efficient. May through June is not really much of a problem in the deeper areas. By high summer the longline fishery should be in full swing with line caught fish like bass, skate and ray being a viable fishery.

The best areas to deploy to avoid weed are in the deeper sections of the Solent away from the contours where weed tends to get dumped by the tidal flows. Some areas by late July are usually un-fishable by longlines. These usually include inshore at Osborne Bay, Stanswood bay, Chilling and Hillhead and most of the stretch between Beulieu and Hurst. Some areas of Southampton Water can get bad also; near Calshot and the Thorn Channel are notorious as well for gathering red weed masses in summer, with some years better/worse than others.

Off the 40' contour however, it is usually possible to find a relatively weed free stretch on some tides. However, this year (2020) some fishermen had to cease line fishing late July as most of the best offshore areas were infested with red weed for a few weeks as well. This was the case for at least one Lymington fisherman that we know also, working further west, (personal communication).

By September 2020, most of the weed in the deep had been shifted by tides and wind with fewer areas affected offshore. Some of it had still remained inshore however in the areas which do not benefit from regular tidal flushing (bays) and tidal dead-spots such as Norris near Cowes.

Apart from the obvious interference of weed on the hooks of a longline (reducing fish catches) red weed packs onto the buoy- to- anchor line with the moving tide, taking down the marker buoy and in some cases, it will only reappear later in the slower part of the tide cycle. This means that the fisher has much less time to retrieve gear before the tide turns and begins flowing back in the opposite direction. It can become then a race against the clock. Therefore, the fisher will have a tendency to be less motivated to shoot the number of longline sets they usually would deploy.

Furthermore, retrieval of a weed packed buoy line means that a significant time loss will ensue as the fisherman will have to pull off (by hand) the weed packed onto the buoy line. This is easier said than done. Often the amount of weed is considerable, with historically nine to twelve-foot columns of weed measuring a foot wide packed solid onto the line not uncommon. Again, as with net cleaning, this represents a serious time wasting and physically draining extra operation which would not be the case if there was a lot less or no weed present.

Trawling

There are a few trawlers which regularly fish in the Solent and the skippers tend to be very cautious about where and when they deploy the gear due to the potential for a 'dose of the weed'. As with lining, the deeper areas are often favoured, away from weed strewn areas.

In September 2020 we had a report from a Gosport fisherman who deployed a trawl inshore in the Solent and filled the entire trawl up with the free-floating red weed. Simply put, a trawl just will not fish effectively if there are significant quantities of seaweed on the Solent sea bed. It is very disheartening for trawl skippers as they have a higher fuel cost overhead to pay than some smaller non-towed gear vessels and wasted efforts due to the presence of weed are de-motivating.

Shellfish dredging

Toward the end of the now defunct historic Solent Oyster fishery (2007) the presence of large masses of red weed sitting (and rotting) on the inshore seabed was cited by some fishermen as being a significant detrimental effect to the deposition of juvenile oyster spat. This problem was part of the perfect storm which sealed the fate of the already reducing return spat falls of the Solent Oyster largely triggered by the invasion of the American tingle driller whelk.

Other factors such as a failure to close the fishery earlier were also at play, (which led to over-fishing an already non renewing stock) but it is commonly accepted by local Warsash fishermen that seaweed overgrowth also played a significant role in the last days of the fishery.

The red seaweed overgrowth has also been raised at a recent committee meeting of the Southern IFCA relating to the oyster regeneration project. (September 2020). It is possible that the comment was 'minuted'.

Along Chilling and Hill Head, we have at least one testimony from a member of the Warsash group which describes the required effort to continually hold the same line of dredging for a considerable time in order to 'get through the weed' before any oysters could be reached.

The success of the Solent Oyster Regeneration project instigated by the Blue Marine Foundation will rest mainly upon the successful spatfall of small juvenile oysters onto the seabed. Many variables will be at play, including the presence of oyster pests like starfish, but the presence of large areas of trapped seaweed in the summer to autumn in some local bays not subject to much tidal flushing will severely reduce the success of this project in our opinion; since the numbers of adult oysters being set in cages in the marina environment represent nowhere near the kind of density of oysters that we remember on the seabed during the height of the fishery in the late 1970's and through to the 1990's. Back then, the seabed was literally thick with healthy, thriving oysters. Even the 'smell' of the sea was different, as we remember it.

The fishermen living now, that were involved in that industry, are the last living link to an important part of social history and all that knowledge will disappear with them.

The disappearance of the Solent oyster also has a cumulative knock-on effect, since there is no longer the massive water filtering capacity that was once present (one adult oyster filters up to 200 litres a day). Increasing seasonal,

mobile red weed on the seabed which eventually settles, decays and reduces seawater oxygen content is more likely then, to have a localised negative environmental impact, making the seabed even less hospitable to newly hatched oysters. It is doubtful this has been extensively studied, so more work would be required.

Although we wish the Blue Marine oyster project every success, the local fishermen are not very optimistic and even less so, when we know there is a largely unseen and un-acknowledged seaweed overgrowth problem which has not been factored in as well as the fact that oyster pests have not yet been removed.

Scallops

This year (2020) the newly emerging Solent scallop fishery* was affected by the mass of seaweed in Osbourne bay (mid summer) which stopped effective dredging for scallops there (Warsash Group fisherman's testimony). Sighting data from the Southern IFCA would be able to confirm that point. Only when the weed had cleared on the bed enough did the fishermen return there (mid September into October). At the time of writing (November 2020) the scallop areas in the bay have cleared and are largely weed free.

The efficient functioning of any shellfish dredge will be highly reduced if red-weed and other weed species are in abundance. The only option for the scallopers is to find spots out much deeper, but with the added increase risk associated with dredging in deeper waters (quick capsize after snagging on seabed being an ever-present and potentially lethal threat)

*With the disappearance of many oysters, a relative newcomer has begun to take hold; the scallop. Which is good news for the local fishermen.

Shellfish Beds in the SEMS and Southampton Water

There are many different shellfish types in the area. Oysters, clams, cockles, whelks, winkles and scallops. All of these can be fished under fishing license and are very sensitive to water quality, especially the bi-valve varieties like clams and oysters.

The main issue is the detrimental effect of bacterial and viral contamination resulting from inefficient sewage treatment and/or sewage overflows, the latter being a more likely after high rainfall events, like torrential downpours.

The classification of shellfish is carried out regularly and reported in a UK wide Sanitary Survey.

The Southampton Water is regularly tested for E-coli by the Food standards Agency in Southampton and a shellfish will only be designated if the species in question is tested. Once that occurs a designation will result; class A, B or C.

For many years now, manilla clams and pelourdes clams in the upper Southampton Water have regularly received a class C designation or the areas have been closed completely due to high E-coli levels, making the shellfish unfit for human consumption. Therefore, fishing activity is severely affected.

This situation has gone on for many years to the detriment of the local fishing industry. No schemes are in place to compensate fishermen for the yearly loss of potential earnings. Furthermore, the longer the beds remain unfishable, the less the shellfish will benefit from regular turning which can lead to the terminal decline in quality of the beds.

The recent upgrade to the sewage treatment works at Woolston will theoretically lower the E-coli/viral loadings from the effluent which is a positive development. However, with increasing pressure on the sewage system infrastructure due to an expanding population density in Southampton, it is questionable as to whether there will be any change in the shellfish quality as sewage overflows after heavy rain will still likely occur, (our assumption). (The population of Southampton grew by around 18 percent between 2001 and 2011; it is even higher now)

This is further re-inforced by the fact that climate change models predict far more frequent torrential downpours, leading to the increased risk of sewage overflow events (CSO's), allowing raw sewage to make its way into the shellfish production areas.

This is already an increasing problem in the Poole Harbour district, with at least one shellfish cultivation business currently being negatively affected.

As to the wider Solent: The current shellfish classification is taken to be Class B (which means the shellfish must be tanked for a short period with UV filtering in place). Any lowering of the water quality due to increasing sewage overflows and/or increasing sewage effluent discharges (from expanded development) will be a severe negative for the local fishing industry.

Part 2:

Analysis of the Nitrate Mitigation proposal (Natural England)

Author: Steve Matthews, Fishing Vessel, Sandie Ann, Warsash.

Disclaimer: The following analysis is solely that of the author alone and may not necessarily reflect the views of all inshore fishermen throughout the district. The causes of the wider Solent seaweed overgrowth problem outlined in the description above (Part 1), should be investigated by independent scientific assessment.

Pending further scientific study, it is reasonable to assume that the problem of the largely hidden red filamentous seaweed overgrowth issue we have uniquely outlined in Part 1 above is causally linked to the green seaweed inshore deposits, already identified as a significant problem on the SEMS mudflat areas by Natural England and wildlife organizations (Eutrophication).

It is also reasonable to assume that the existence of excess nitrogen compounds/phosphates and their sources (sewage and farm run-off being just two) is also causing the *offshore* red seaweed issue which can seriously interfere with commercial licensed fishing activities and has done so, unacknowledged by Government environmental bodies, for many years.

Our group estimates that for local set netting alone the seasonal fishery potential net worth is reduced by as much as 80% from May to September due to the presence of free-floating red weed restricting the effective use of fishing nets. This is therefore a serious concern.

Other trawler skippers that operated locally would also be able to give similar estimates.

The solution presented by Natural England (NE) of offsetting farmland in the water catchment area (taking out of agricultural production/re-wilding) has been suggested as a solution to the SEMS nitrate problem and looks, on the face of it, to be a reasonable one.

However, it is only a recent methodology, still highly hypothetical (rolled out in Poole, only a few years back) and there is no hard guarantee that the problem will be solved throughout each separate estuarine area and in the wider Solent (SEMS).

Indeed, the introduction of the Poole and Purbeck nitrogen mitigation scheme in 2017 may have had some local effect on the green weed overgrowth (has

that been scientifically demonstrated yet?), but clearly the shellfish cultivators there still have a problem with E-coli.

Therefore, it would appear that Combined Sewage Overflows (CSO's) are still occurring there (mitigation scheme or not and assuming sewage transfer from leisure craft have remained static) and that therefore, nitrogen is still being delivered directly into the aquatic environment from raw sewage sources, leading to ongoing seaweed overgrowth as well as associated E-coli/Norovirus shellfish contamination.

Since that is the case in Poole, serious doubts as to the effectiveness of the Nitrogen mitigation Scheme (Natural England) applied to the Solent water catchment are not unreasonable to raise.

Furthermore, the NE model appears not to factor in the climate change models into the N-mitigation methodology. Higher seawater temperatures will likely further accelerate seaweed growth, quite possibly negating any nitrogen-offsetting effect. The appearance of nocticula ('fire') as described in Part 1 is highly temperature dependant, just one or two degrees, as is the appearance of migrating fish.

Increasing torrential downpours will likely increase run off events and CSO's. Increasing housing development in the Solent catchment will lead to increasing hard-surfacing of the countryside and road building. *Those two causes, downpours and hard-surfacing, working together, will likely lead to an increasing irreversible compounded effect:* ie; a higher delivery rate of water run-off (and therefore nitrate/nitrogen compounds from various sources) to the SEMS. This does not appear to have been taken into account by the NE model.

Also, the nitrogen leaching effects from groundwater exacerbated by increasing run offs into the proposed development pond systems (SUDS) appear not to have been factored in either. Since those ponding systems are supposed to 'return water as quickly as possible', there is an un-quantified factor here also.

Additionally, the 110litre per day water compliance for developments is un-enforceable and therefore the wastewater flow determinations will likely to be higher in many cases.

The Natural England models and calculations assume complete tidal mixing of the run-offs and effluents with Solent tidal waters into the SEMS. As stated above, local fishermen's knowledge of the Solent seabed and tidal streams in the Solent is unparalleled and lead the author to conclude that if offsetting is carried out on the Isle of Wight (for example) to allow exclusive continued development of green-field sites on the mainland then the effluent nitrate offset from re-wilding a farm north of Wooton (for example) is highly unlikely to make any difference to seaweed overgrowth at Chilling (for example) due to the way the tidal flows move in Osbourne Bay.

That is a serious oversight by NE.

Note: The Southern Water sewer plume map (made available at time of writing) only shows the eastward flow of the plume from the outfall off Lee on Solent/Browndown. This is only the flood tide representation and not the ebb tide (westward flow). All of the hydrological modelling and mapping of the plume flows would need to be made available by Southern Water in order to be able to draw any further conclusions.

As well as the delivery of nitrogen via the watercourses, the NE calculations for nitrate loading and subsequent guidance for housing developers appear not to take into account sewage overflows (CSO's) after extended heavy rain/torrential downpours and subsequent likely nitrogen, bacterial and viral delivery and contamination of shellfish beds.

Unless developers are building adequate sewage flow infrastructure into the development then Combined Sewage Overflows (CSO's) will still likely increase in proportion to increased development. Food Standards Agency (FSA) limits for shellfish *may still continue to get worse* as they regularly do most years in Southampton Water after FSA monitoring.

In other words, the viability of our inshore shellfish beds will still likely be at risk and will likely have an even higher risk in proportion to ever increasing development in the SEMS catchment.

Even with nitrate land 'offsetting' more local to the proposed development this fact will likely not change due to CSO's.

The models used by the NE and the EA have not factored in the future (with increased development) considerable nitrogen loading into Solent catchment resulting from nitrogen loading from increasing car exhaust emissions and industrial development. All the science shows that with increasing development and road use and vehicle numbers, the nitrogen loading will increase significantly.

As with increased chance of CSO's after heavy rain due to more hard-surfacing, their will a similar increase delivery flow rate of dissolved nitrogen compounds to the SEMS; again, a factor not taken into account in the NE model.

The Fareham Borough and Eastleigh Council for example, must already know that the local road systems have been pushed to over-capacity in a very short time within the last few years, evidenced by virtual gridlock on the A27 road (just an example) at peak flow times: their highway modelling has already clearly failed local people who are living daily traffic nightmares in Locks heath, Sarisbury Green, Hamble, Fareham and Southampton. It is not clear whether any scientific assessment has been carried out as to the increased delivery of nitrogen compounds via vehicle exhaust emissions from increasingly free standing/engine idling traffic in gridlock and increased traffic flows in general. All of this extra nitrogen is likely ending up in the Solent and NE has failed to include it in their calculations. Another massive oversight.

And it is not just local. This would also include the entire road infrastructure, including motorway areas in South Hampshire, where exhaust emission nitrogen contaminated road water run-off feeds into SEMS. Increasingly wider gridlock events and increasing traffic in South Hampshire must be supplying significant emission-dissolved nitrogen compounds to the water catchment adjacent to many roads. (This has been widely studied in the USA).

Notwithstanding micro-particulates from tyre rubber and oils, washing into the same catchment systems; the biological effect on water borne fauna (like salmonids and other fish) from these particulates has simply not been scientifically determined.

All of this leads to the reasonable assertion that the calculations for nitrate loadings in the NE models are highly likely to be inaccurate by a significant degree, the expected offsetting effect: doubtful. There will still be a doubt regarding the current 'nitrate'/seaweed problem which is already being exacerbated by overdevelopment in the Hampshire water catchment zone feeding into the Solent (SEMS).

Further development in proportion with an ever-expanding population growth will likely further exacerbate these problems. It is simply the law of cause and effect in action.

The conclusion is that it is highly uncertain that the SEMS water quality with respect to nitrates/phosphates will *practically* change and that it is *highly*

uncertain that all the affected estuarine habitat (SAC's and SPA's) areas relating to seaweed overgrowth on mudflats and the wider SEMS where we fish will improve consistently throughout the district.

Secondly, it is highly unlikely that the water quality with respect to E.coli/norovirus contamination in shellfish will improve since CSO's will still be happening in proportion with increasing development without considerable improvements in the infrastructure/treatment of sewage.

Thirdly: any increasing CSO's will still deliver a loading of nitrogen (other than 'nitrate') in other nitrogen compound forms from raw sewage overflows, along with bacterial and viral contamination into the SEMS and Southampton Water, so there is some reasonable doubt that NE's nitrate offsetting methodology will actually be practically effective in reducing wider free-floating red seaweed overgrowth and improving the microbial quality of shellfish beds in Southampton Water and SEMS.

Regarding shellfish quality: most wider SEMS Food Standards Agency classifications are currently assumed as class B. However, that could easily be reduced to Class C with more frequent testing and an increasing CSO threat resulting from increased development. That must be avoided, the fishermen will not be happy if that happens.

Class C shellfish rating would be a disaster for the local clam shell fishing industry, the emerging Solent scallop fishery and the Solent Oyster Regeneration Project (Blue Marine Foundation). The potential loss of the Solent shell fishing industry would be incalculable. This is already a clear possibility and looming threat for Poole Harbour. Although Poole Harbour does not benefit from tidal flushing in the same way as the Solent, there is still a reasonable degree of doubt for the SEMS, so it would behove NE to take our warnings seriously. This year for example we have already seen an extension south, down the Southampton Water towards Chilling, of an unfavourable Class C rating for one clam species. (see FSA survey 2020).

Currently, in Poole Harbour, shellfish cultivation businesses are significantly being affected due to bacterial sewage contamination. (personal communication/Southern IFCA Committee meeting comment Sept 2020)

Any increase risk of contamination from sewage overflows applied to the local shellfish fishery most likely to prove detrimental to the quality of our local

shellfish beds and fishery will most certainly result in litigation with the water companies. We are watching the situation closely.

It appears that the local Councils together with NE and the Environment Agency have rushed through this nitrate mitigation 'solution' in order to enable the ever-expanding over-development of green field sites by developers within the SEMS water catchment area to continue. This will mean that over-development will continue and that the un-studied negative environmental effects like red seaweed overgrowth will also likely continue.

It is alarming that such on- the- hoof science (without hard, long-term proof that the measures will be successful) can be fast tracked through by Government Agencies who are failing to protect not only our green field areas but the very unique landscape of parts of southern England.

It should be their responsibility to assert that Central Government implement sensible policies which control the drivers of unsustainable housing demand (namely the drivers of population growth and movement of people). In short, sustainable policies for sustainable population growth, which include a revocation of existing legislation that currently enable unbridled green-field development by housing developers.

This would also help ease pressure on offshore marine aggregate dredging (which supports the building industry) which often takes place in environmentally sensitive juvenile fish spawning grounds in the English Channel and elsewhere. These grounds are being dredged back to bedrock in some cases, partly to feed ever-expanding UK housing/population growth.

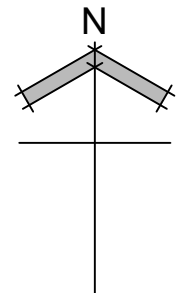

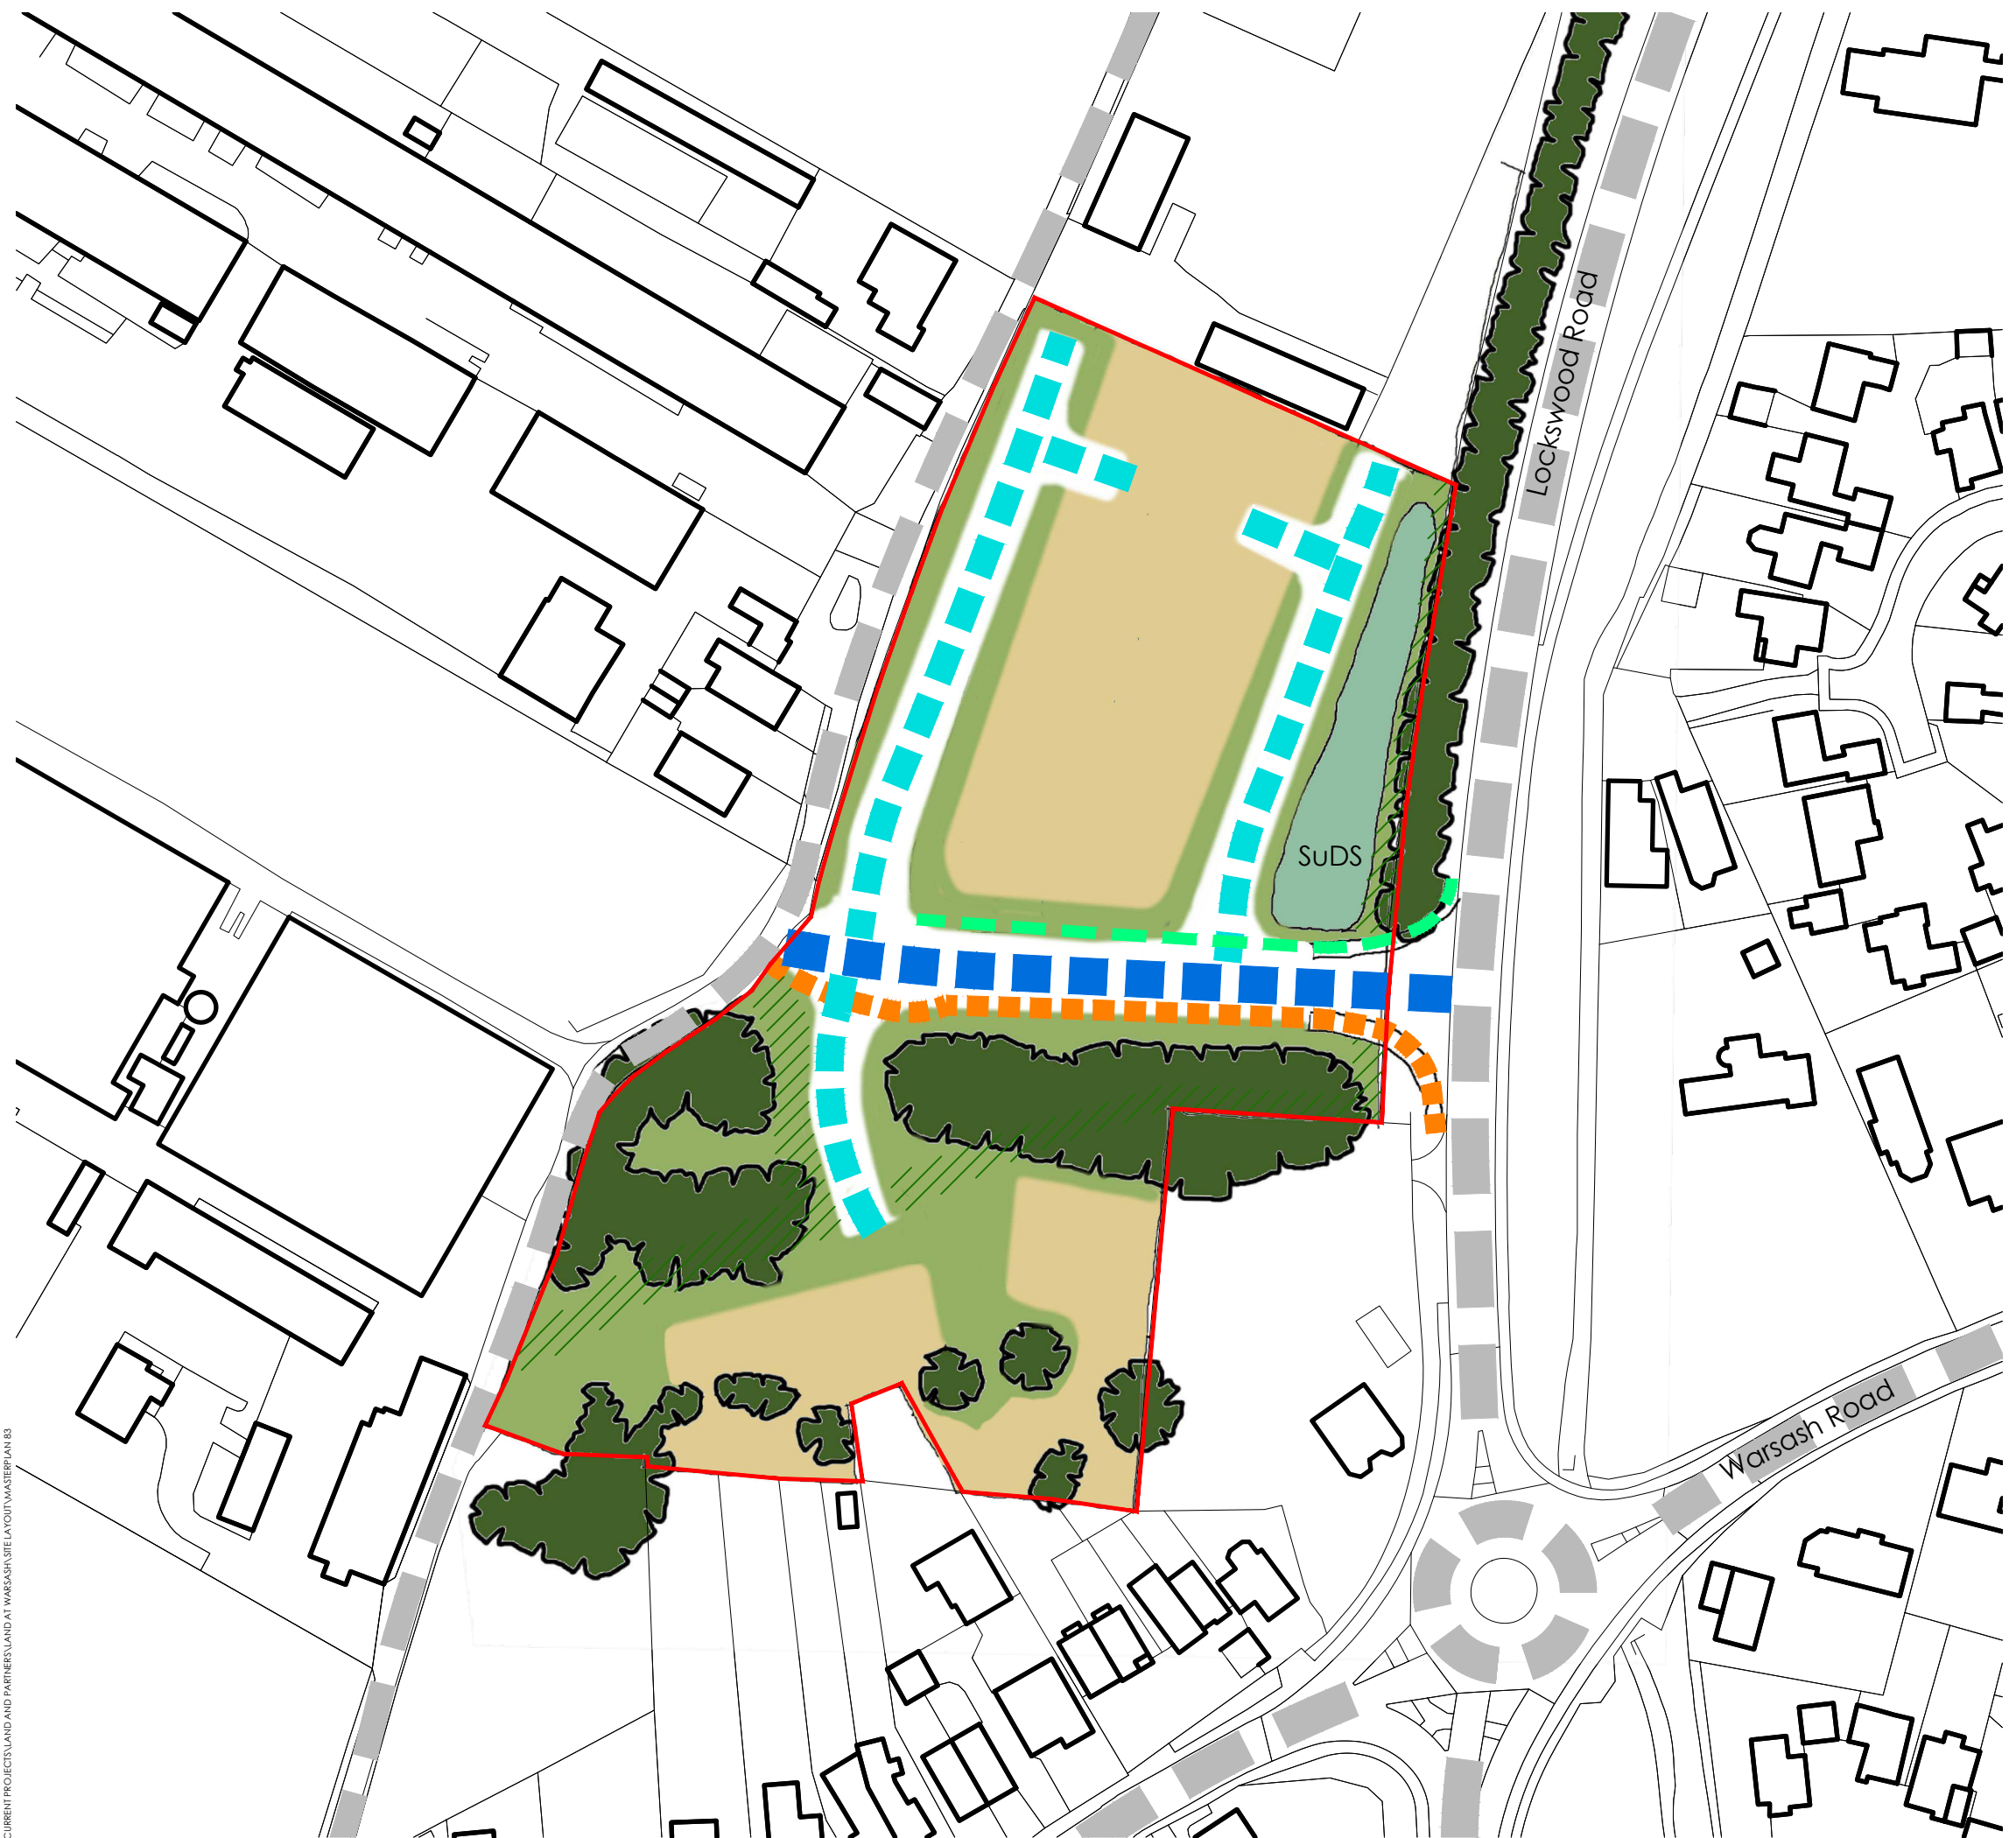

Therefore, pending those long overdue changes to Central Government policy, and taking into consideration our analysis above, it would be pertinent that all current development in the Solent (SEMS) water catchment cease with immediate effect, until further long-term studies and peer review has been carried out.

Steve Matthews

1) Policy: TIN2 - Highway Safety and Road Network

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

10.15 Transport plan does not include an analysis of streets where the majority of the houses are proposed. Why hasn't more consideration been given to HA1 in the transport assessment? There are 830 dwellings proposed in HA1. With an average of 2 cars per dwelling, an additional 1660 vehicles will be on local roads! Because of the lack of consideration, there is no reference for the mitigation required to reduce congestion by 2036. The Plan fails the Test of Soundness by not being Positively Prepared in this respect. QUOTE 14.6 of Final transport Assessment "In conclusions, based on the work of this Strategic Transport Assessment, it is considered that the quantum and distribution of the development proposed in the Fareham Local Plan, and the resulting transport impacts, are capable of mitigation at the strategic level, and that the plan is therefore deliverable and sound from a transport perspective." This statement doesn't include the area of the local plan with 800 homes isn't assessed within the document Transport plan. 10.27 All developers will provide monies under section 106 to contribute to the Infrastructure Delivery Plan (IDP) . However there is nothing identified within the IDP table as a required contribution to transport and travel or highways in the western wards.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

There is no reference for the mitigation required to reduce congestion by 2036. The Plan fails the Test of Soundness by not being Positively Prepared in this respect. This statement doesn't include the area of the local plan with 800 homes isn't assessed within the document Transport plan. 10.27 All developers will provide monies under section 106 to contribute to the Infrastructure Delivery Plan (IDP) . However there is nothing identified within the IDP table as a required contribution to transport and travel or highways in the western wards.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Complete a transport assessment and include this along with mitigations required to the area of HA1. Include the mitigation within the IDP and itemize the contributions for travel and highways in the western wards

Your suggested revised wording of any policy or text:

The statements and supporting documentation must include the 800 homes proposed in HA1. I can not suggest wording for this as the professionals (transport, highways and infrastructure engineers) should complete the calculations required for HA1 and provide mitigation measures as a result.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: TIN4 - Infrastructure Delivery

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

From the Infrastructure Delivery Plan Section 5.4 Education is planned by Hampshire County Council. However the period of the child placements to extent the local schools only covers up to 2021. Has the council fully engaged with HCC over the houses planned for Warsash and the Western Wards as they will be built over the next five years and the local plan extends up to 2036. Is this a sound approach for the borough and our children's education? The IDP table item 83 Calls for section 106 provisions of additional Early Years Foundation Provision (EYP) within the Western Wards, however HA1 does not show the placement of a nursery or pre-school within the developments area. Where is this contribution of child placement to be allocated as the IDP calls for the addition of 83No placements when there are over 1000 dwellings added to the area. The IDP calls for the expansion for health care in the Western Wards with additional of GP locations in the Western Wards, however within the table provided within the document the timeline of this project and its review is in the past (prior to adoption of the local plan). How is this a sound approach for the borough when addition of 830 dwellings in HA1 alone.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

From the IDP Section 5.4 Education is planned by Hampshire County Council. However the period of the child placements to extent the local schools only covers up to 2021. Has the council fully engaged with HCC over the houses planned for Warsash and the Western Wards as they will be built over the next five years and the local plan extends up to 2036. Is this a sound approach for the borough and our children's education? Extend the schools study to include the duration of the draft plan, or the next five years identified with the majority of growth in the area, especially HA1. The IDP table item 83 Calls for section 106 provisions of additional Early Years Foundation Provision (EYP) within the Western Wards, however HA1 does not show the placement of a nursery or pre-school within the developments area. Where is this contribution of child placement to be allocated as the IDP calls for the addition of 83No placements when there are over 1000 dwellings added to the area. Assign EYP within the area of HA1 with contributions made by each of the developers to ensure the IDP is met for the western wards. The IDP calls for the expansion for health care in the Western Wards with additional of GP locations in the Western Wards, however within the table provided within the document the timeline of this project and its review is in the past (prior to adoption of the local plan). How is this a sound approach for the borough when addition of 830 dwellings in HA1 alone. Complete the review inline with the timeframe set out in this local plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Complete the studies identified in the supporting documentation to ensure the local plan is sound for the provision of education, early years foundation provision and GP surgeries.

Your suggested revised wording of any policy or text:

I can not make a suggestion for wording changes as i am not a professional in these fields. Once the studies have completed the mitigation should be included within the local plan.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Paragraph: 7.13

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

7.13 Local retail/commercial facilities figures do not cater for the additional houses in Warsash. For example, No convenience goods floor space has been allocated to Warsash

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include convenience goods floor space in Warsash to account for the number of proposed houses in HA1.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Include a retail figure for the western wards.

Your suggested revised wording of any policy or text:

I can not calculate the retail figure for the western wards as i am not a professional in this field. Have the supporting documentation updated and add the figures to the local plan.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: D1 - High Quality Design and Placemaking

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

11.34 The council will support applications where development exceeds Building Regulations however no target has been set, is this 1% better or 10 % . The local plan is therefore is not sound and effective approach to carbon emissions as a borough. 11.36 Developers are encouraged to design for natural ventilation and green infrastructure but no standards are set. Just meeting building regulations will not see the country meet the carbon reductions promised by the government. The council therefore should set standards much like the London boroughs to ensure developers are designing for sustainable homes. These boroughs are also using new standards of design calculations (SAP10) which are not yet within building regulations which must be adhered too. The Fareham Design guidance do not give any guidance on sustainability.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

11.35 The council will support applications where development exceeds Building Regulations however no target has been set, is this 1% better or 10 % . The local plan is therefore is not sound and effective approach to carbon emissions as a borough. 11.36 Developers are encouraged to design for natural ventilation and green infrastructure but no standards are set. Just meeting building regulations will not see the country meet the carbon reductions promised by the government. The council therefore should set standards much like the London boroughs to ensure developers are designing for sustainable homes. These boroughs are also using new standards of design calculations (SAP10) which are not yet within building regulations which must be adhered too. The Fareham Design guidance do not give any guidance on sustainability, this should be updated to include potential green technologies that the council would accept as part of a planning proposal.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The energy strategy provided as supporting documentation only accounts for the Borough. The councils design guidance standard should include an ideal energy strategy that the developers can adopt and modify as part of their planning submission.

Your suggested revised wording of any policy or text:

11.35 The council require the developer to submit plans to see each dwelling be designed to achieve an energy efficiency 20% better than building regulations Part L1A 2013. Update the Fareham design guidance to include sustainable housing design.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

As a professional engineer in this field I will be able to provide further insight and evidence on this subject.

5) Policy: CC4 - Renewable and Low Carbon Energy

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Section 8 mentions the requirement of meeting CO2 emission reduction targets, but instead of stating what the targets should be, the Plan simply refers to power generation within the borough and not what each of the development sites should deliver over and above Building Regulations requirements, on this basis it is believed that the plan is not positively prepared

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Include targets for the next five, ten and fifteen year periods to ensure the developers have each follow the same targets and guidelines

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Include targets for the next five, ten and fifteen year periods to ensure the developers have each follow the same targets and guidelines. Targets should follow national standards to meet the climate change protocols

Your suggested revised wording of any policy or text:

i can not suggest wording on this.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Policy: H1 - Housing Provision

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The government have had a strategic rethink on how housing numbers are allocated to each area of the UK and issued within the timeframe of these comments. The Fareham local plan has used a now defuncted algorithm used to calculate the number of houses proposed within the area. The 800 plus homes allocated to the western wards should be recalculated using the new formula to ensure the western wards isn't saturated with new homes where it isn't required to meet government targets.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

To ensure the plan is sound and compliant with government requirements. the number of homes required within Fareham should be recalculated. Particular attention should be made to the western wards to ensure it is not saturated with houses and that Fareham as a whole borough is developed according to the latest formula.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

New housing figures mapped on to HA1 in particular.

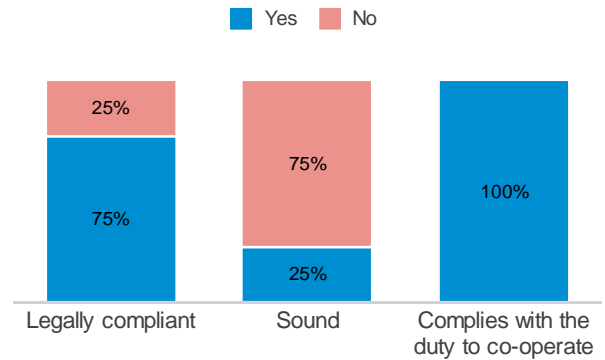

Your suggested revised wording of any policy or text:

i can not comment without completing the new calculations

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

	Legally compliant	Sound	Complies with the duty to co-operate
Total	4	4	4
Yes	3 75%	1 25%	4 100%
No	1 25%	3 75%	0 0%

Respondent: Unknown1 Unknown1 (Unknown1)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Re-Assess HA1 in respect of being outside the Urban settlement and in terms of OAHN and Local Sustainability from an amenities and infrastructure perspective

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure that Development in the Countryside is only considered with the requirements set forth in the relevant Policies and that any allocation proposed is locally sustainable through the addition of amenities and infrastructure to support the number of new dwellings proposed.

Your suggested revised wording of any policy or text:

HA1 Allocation needs to be re-evaluated to ensure the appropriate amount of infrastructure and amenities are delivered before any Development begins

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mrs Valerie Wyatt (1512-11057)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

This policy replaces a similarly worded one in the extant plan (DSP40). That has clearly failed to be effective and this one is just as lacking as Housing Allocations HA1 and HA32 are included in the plan but do not meet the criteria for development in this policy. A plan with these contradictions built into it is clearly unsound and therefore not legally compliant as the plan must be sound.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA1 and HA32 and tighten up HP4

How would the modification(s) you propose make the Local Plan legally compliant or sound?

HP4 should be written in such a way that there is absolutely no doubt. The words 'meet all of the following criteria' are obviously open to interpretation by officers although I fail to see why they have trouble with it.

Your suggested revised wording of any policy or text:

Perhaps 'For the avoidance of doubt - that is every single one of the criteria not just some of the criteria.' should be added before the criteria to make the message less easy to misinterpret.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Tim Haynes (1712-251420)

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Uncertainty about the borders of the Fareham - Stubbington Strategic Gap reduces the soundness of the plan in my mind, when taken together with Policy DS1 which outlines the conditions for any development in the Strategic Gaps. On its own Policy DS1 is innocuous enough, but it seems to be linked in Section e to a set of policies (HP1, HP2, HP4, HP5, HP6 and HP11) three of which might allow for exactly the development policy DS1 seeks to exclude. Policy HS4, which allows for the possibility that the Council may not meet the Five-Year Housing Supply criteria, seems to provide that the first place the Council will look to make good the deficit by looking outside Fareham's urban areas. Surely, the first look should be at brownfield sites in the borough. Failure to do so puts non-urban land; countryside, at risk.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I am not sure Fareham Borough Council will fully consider the effects of the policies they have proposed against the comments made by myself and others. I'd like to be able to make sure they do.

Respondent: Mrs Jane Wright (412-451119)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Policy HP4 (Para 5.24) HA1 fails to meet criteria e) as the proposal would demonstrably have unacceptable environmental, amenity and traffic implications. Policy HA1: Page 51 refers to traffic routes and despite recommendation to limit access to 6 dwellings on Greenaway Lane, the plan proposes for up to 140 dwellings to use this as access through a widening of the Lane. This will result in a considerable negative impact on the character of the lane and to the safety of its non-vehicular users. In general, Page 54 suggests 7 new accesses onto the already very busy Brook Lane and Lockswood Road, as well as one additional access at Brook Lane, via 3 entry points from Greenaway Lane. The position and proximity of these access points will be a recipe for serious gridlock and accident blackspots.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The LPA should consider alternative access points onto other streets than Brook Lane or reduce the number of dwellings

How would the modification(s) you propose make the Local Plan legally compliant or sound?

By reducing the impact of traffic and potential accidents.

Your suggested revised wording of any policy or text:

?

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Early Years requirements in major new developments – a summary

This document provides summary guidance for Hampshire County Council and other agencies in determining a requirement for early years and childcare places to support new housing developments and to inform local planners.

This document augments the extant guidance entitled 'Early Years requirements in major new developments' where detailed estimates of place requirements, take up of early education entitlements for government funded hours, and parental demand are provided. This document is a guide to supply and demand in localised areas, and specifically addresses the Early Years requirements for the area of:

Fareham Borough

In looking at the demand for childcare in an area the Services for Young Children (SfYC) team typically look at the ward and adjoining areas Small Area Population Forecast (SAPF) data and assess it against the known supply of places. Childcare places need to be monitored regularly as the demand for childcare is directly and indirectly influenced by national and local policies. This childcare sufficiency work is carried out by the SFYC team and it is requested that prior to any development we are consulted and are able to share our up to date knowledge of the childcare need in the area.

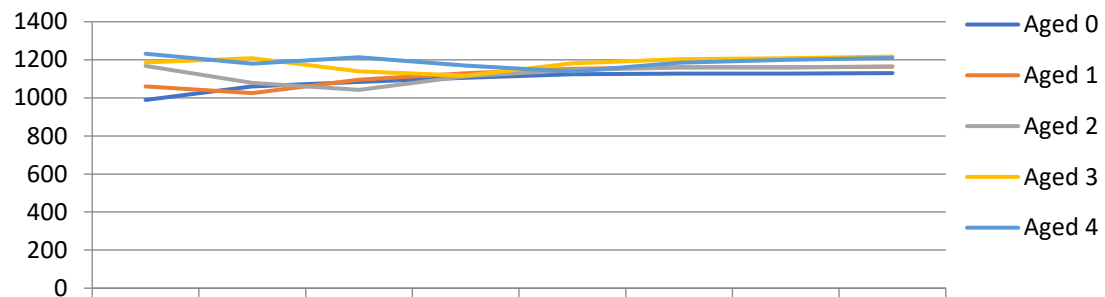

SfYC monitors childcare need for all early year's age cohorts. Early Years Education (EYE) is a statutory offer which is available universally to all three- and four-year olds from the term after their third birthday. For two-year olds, the offer is limited to children of families who meet low income criteria. There is no statutory EYE offer for children aged nought and one year old, but the local authority has a statutory duty under the Childcare Act 2006 to ensure working parents of children aged nought to five can access suitable childcare to meet their needs. This duty extends to children up to twelve years old for Out of School Care.

The overall Fareham area child population aged 0 and 4 years old dipped in 2019 by 83 but is projected to grow by a net 250 between 2018 and 2025 – 0.45% on 2018. The high-level trend projection to 2025 is shown below (Fig.1).

Significant growth in Fareham North ward is anticipated due to the impact of the Welbourne development. Most other ward areas are projected to see either a much slower increase or slight decrease in child numbers, with the overall picture apart from Fareham North showing a broadly static position.

Fig. 1

Fareham area population trend forecast 2018-2025

	2018	2019	2020	2021	2022	2023	2024	2025
Aged 0	989	1060	1083	1105	1124	1127	1127	1130
Aged 1	1060	1025	1095	1130	1153	1162	1160	1164
Aged 2	1168	1078	1042	1114	1146	1159	1162	1164
Aged 3	1186	1209	1140	1117	1181	1203	1209	1217
Aged 4	1232	1180	1213	1169	1138	1185	1200	1210

1. Demand for places:

The starting point is to calculate the number of children in each age group expected from the SAPF data. It must be noted that the SAPF is a modelled population forecast. It also does not take into account the fact that parents don't always take up their childcare places in the same district in which they live.

We know from market data that for each age cohort the percent of children requiring childcare in an early setting is typically:

Aged 0 – 1 yr old 17%
 Aged 2 yr old 70%
 Aged 3 yr old 99%
 Aged 4 yr old 66% (It is assumed that 34% of this age cohort is typically at school)

Early Years Education (EYE) is a statutory offer which is available universally to all 3- and 4-year olds. For two-year olds, the offer is limited to children of families who meet low income criteria. In Hampshire, children can start their free entitlement in the term after their second/third and fourth birthday and can receive a maximum of 570 hours per child's eligibility year. From 2017 the Government increased the offer to 1140 hours for working parents; publicly known as the "30 hours offer".

EYE hours are not limited to the school academic year, offering parents the flexibility to take up their hours across the number of weeks that the provision is open. The demand for three-year-old places is high and trend data in Hampshire indicates that in the region of 90-95% of the three-year-old population take up this entitlement. It is, therefore, expected that there will be continued high demand from this age group within any new housing development.

The demand for four-year-old places, prior to their starting school, is also high. However, due to four-year olds taking up their school place, often in the September after their fourth birthday, the demand within the pre-school and nursery sector is in the region of 32-36% of the four-year-old population.

The demand for two-year olds continues to grow for families who meet certain low income level criteria outlined in section 2 below.

2. Low income families

Where housing developments include a significant level of social housing, shared ownership schemes and/or dwellings that would attract low income families, developers and planners should consider accessibility to affordable early years education and childcare.

Developers and planners should be aware that, since September 2014, the provision of free early years education to eligible 2-year olds is a statutory offer. The offer provides the same choices for parents as the free early years' education entitlement for 3- and 4-year olds. The exception is that the eligibility is primarily based on income assessment.

3. Space requirements and regulations

The space required to fulfil these requirements is stipulated within the [Statutory Early Years Foundation Stage](#) ¹

Section 3.57 sets out premises requirements and states, the premises and equipment must be organised in a way that meets the needs of children. In registered provision, providers must meet the following indoor space requirements:

- Children under two years: 3.5 m² per child.
- Two-year olds: 2.5 m² per child.
- Children aged three to five years: 2.3 m² per child.

These calculations should be based on the net or useable areas of the rooms used by the children, not including storage areas, thoroughfares, dedicated staff areas, cloakrooms, utility rooms, kitchens and toilets.

All early years and childcare operators must register with Ofsted as the regulatory body. Ofsted will inspect an organisation's ability to meet expected standards covered within the Early Years Foundation Stage. The Early Years Foundation Stage also contains expected minimum requirements for the suitability of premises which can be found within the same statutory framework document (accessed through the link on page 3). It is expected that all early years and childcare providers are able to meet requirements to deliver the free early years entitlement at the highest quality and Hampshire providers are expected to achieve and maintain "good" and "outstanding" inspection results.

¹ Statutory Early Years Foundation Stage 2014

4. What developers should provide

Developers should consider 80 early years places for every 1,000 houses and that these places are offered through a mix of facilities where possible. The childcare planning should allow for flexible hours of opening and covering at least 7am to 7pm for full day care.

For 1,000 houses, it is anticipated that one full day provision of 50+ places, together with an additional 30 places from shared community premises, would meet the needs of this size of development.

Where developments provide a high number of social housing dwellings, it is considered there will be the potential for greater demand for affordable childcare and access for two-year-old funded provision. It is likely that this childcare will be required to support employment activities and, therefore, any provision to support lower income families should have regard to the flexibility of opening and closing times of childcare to meet the employment or return to learning requirements of parents and carers.

The location of the childcare provision is parental choice, some choose for their childcare to be located near to their home address and some choose childcare close to their work- place.

The childcare market has also seen parents preferring provision that is close to, or on the site of, infant or primary schools where the school site is large enough to accommodate the provision.

5. Timing of the early years and childcare development

There must be early consideration of the allocation of the sites and/or premises for early years and childcare. It is recommended that such provision is considered for development and occupation at the same time as that for primary schools. This is especially important within developments that have little or no accessible early years and childcare provision adjacent to the new housing development.

The impact of a new housing development, alongside current capacity in the early years and childcare market, should also be considered in terms of early occupation of families and their ability to access provision and whether any interim measures are put in place prior to thresholds of dwellings occupied being reached.

6. How this should be provided

Recent practice suggests to planners / developers that provision should be made for early years and childcare facilities for children 0- 5 years within their plans for the housing developments. Childcare facilities should either be associated within / alongside community facilities or in a dedicated space identified and available for development. In either case, it is suggested that there are advantages with locating adjacent to, or combined with, primary school sites.

For dedicated nursery/childcare facilities, we suggest an area of 0.25 hectares. For combined school / pre-school sites this can be reduced to 0.2 hectares as there can be economies with a more flexible site layout when both are planned together. These

site areas are estimates that the Council has used in other recently provided facilities but will need to be tested against the draft accommodation briefs.

It is assumed that the sites would be made available through an open and transparent process to interested early years and childcare providers; or through the district councils and community associations where it is expected that childcare will be operated within community facilities.

The location of any provision must enable good access for walking along safe and pushchair accessible routes as well as having good public transport and motor-vehicle transport links and be within a 1-2 mile radius of the main housing development.

It should be noted that early years and childcare provisions of 50+ places are considered more economically viable and may attract the best investment opportunity from the sector.

It is also a requirement that a childcare operator that is seeking to accommodate children for free early years education makes an application to Hampshire County Council prior to opening their provision. Any developer who has engaged a childcare establishment to deliver or take up opportunity on their site should ensure the childcare provider contacts Services For Young Children at Hampshire County Council via email childcare@hants.gov.uk at the earliest opportunity.

7. Comments on identified Sites in Fareham Local Plan 2037, Housing Need and Supply

https://www.fareham.gov.uk/PDF/planning/publicationplan/Publication_plan_FINA_L.pdf

Ha1 North and South Of Greenaway Lane (824 dwellings)	This proposal would generate demand for an additional 50+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution. These places are essential, to meet the needs of working families
HA3 Southampton Rd (348 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families.

HA4 Downend Rd East (350 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families. In our Spring 2020 Childcare Sufficiency Audit Portchester West was identified as an area to be closely monitored due to the collective new and planned housing developments in the area.
HA7 Warsash Maritime Academy (100 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed. In our Spring 2020 Childcare Sufficiency Audit Warsash was identified as an area to be closely monitored due to the collective new and planned housing developments in the area. Existing settings are close to capacity, including Out of School provision. These places are essential, to meet the needs of working families
HA9 Locksheath Rd (70 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed
HA10 Funtley Road Sth (55 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed

<p>FTC 1 (20 dwellings) FTC 2 (100 dwellings) FTC 3 (120 dwellings) FTC 4 (94 dwellings) FTC 5 (49 dwellings) FTC 6 (45 dwellings)</p>	<p>The plan does not indicate the provision of childcare facilities. These are generally small developments in dispersed locations; however collectively they create 428 dwellings in the Fareham Town Centre Area. A new Full Day Care nursery offering approximately 50 places has opened in Fareham Town Centre which may relieve the pressure on places in the area. The impact of new housing on childcare sufficiency in Fareham Town Centre will need to be closely monitored by SFYC.</p>
<p>Planned developments with less than 50 dwellings (HA12,HA13,HA15,HA19,HA22, HA23,HA24,HA26,HA27,HA28, HA29,HA30,HA32,HA33,HA34,HA35,HA36, HA37,HA38,HA39,HA41)</p>	<p>These are smaller developments in dispersed locations. Depending on the housing mix and age demographic of the residents any generated demand can most likely be accommodated in existing provision.</p>

8. Contact

Hampshire County Council's Children's Services can be contacted to discuss any support requirement in selection of appropriate high quality early years and childcare providers or any aspects of the regulation and legislation requirements.

The childcare and early years education development team can be contacted via childcare@hants.gov.uk

Links to documents that may support design of childcare buildings:

Planning Policy Manager
Fareham Borough Council

Enquiries to: Louise Hague

Our ref: Y00511

Your ref: Regulation 19 Local Plan
Consultation

Date: 18 December 2020

Dear Sir/Madam

Regulation 19 Local Plan Consultation

In response to the above consultation, please find attached the general landowner comments in written representations on behalf of Hampshire County Council Property Services, in its role as a public landowner to help inform the next stages of the emerging Local Plan Update to 2038. These are separate from the comments submitted on behalf of Hampshire County Council in respect of its regulatory functions.

As landowner, the County Council will be responding to the Local Plan Consultation on the following Policies/Paragraphs (please see attached):

- Strategic Policy H1: Housing Provision
- Policy D1: High Quality Design and Place Making
- Housing Allocation Policy: HA3 (Southampton Road)
- Housing Allocation Policy: HA9 (Heath Road)
- Housing Allocation Policy: HA13 (Hunts Pond Road)
- Housing Allocation Policy: HA22 (Wynton Way)
- Housing Allocation Policy: HA24 (335-337 Gosport Road)
- Strategic Policy R4: Community and Leisure Facilities
- Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent
- Policy D4: Water Quality and Resource
- Paragraphs 11.55/56

To date, Hampshire County Council in its capacity as landowner, has supported the earlier stages of the Local Plan Update to 2037. The purpose of the following is to offer comments, from a landowning perspective, to help inform the scope and soundness of Fareham Local Plan when examined by the Secretary of State as anticipated in Summer 2021.

I hope this is helpful to you in continuing to support the Borough Council in subsequent stages of the Local Plan Update to 2037.

Yours sincerely

Louise Hague MRICS MRTPI
Senior Development Manager

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy H1: Housing Provision

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its capacity as landowner supports the spatial approach to Policy H1 to distribute development through Local Plan allocations. The County Council considers that this is a sound approach that is positively prepared, justified and deliverable within the Plan period (effective) based on the Borough Council's objectively assessed needs and wider Local Plan evidence base.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

FAREHAM
BOROUGH COUNCIL

Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council, as landowner, supports Policy D1 as it considers that the density of schemes should be informed by and be sympathetic to the character of the surrounding areas, rather than having a set standard. This allows sufficient flexibility (effective) to support best practice urban design principles particularly with regards to legibility to emphasise the importance of place as well as sensitively manage the transition from an urban to rural settlement edge.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Hampshire County Council, as one of the landowners for this site, supports the inclusion of this draft allocation and has provided information through the Local Plan process to date to support the allocation. The County Council re-affirms that its land within Policy HA3 is available and deliverable within the Plan period.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council as a landowner supports the allocation of its land in Policy HA9. The site has a resolution to grant planning permission for 70 dwellings (insert ref). The County Council, as applicant, is currently engaged in on-going discussions with the Borough Council Planning Case Officer, Natural England and third-party providers to put in place sufficient mitigation to achieve a nitrate neutral development. The County Council as landowner has also submitted a pre-application submission to Natural England for consideration of its own land to mitigate the nitrate output of site Policy HA9. This evidence offers a realistic prospect that the site is capable of coming forward in within the early stages of the Plan period. The County Council, as landowner, re-affirms that it's land within Policy HA9 is available and deliverable.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

Strategic Policy R4: Community and Leisure Facilities

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the intentions of Policy R4 to maintain the provision of necessary community facilities during the Plan period. Notwithstanding its support for Policy R4, the County Council is still concerned that the draft policy does not meet the tests of soundness as it appears overly restrictive and not sufficiently flexible to respond to unexpected and ever-changing needs to community facilities brought through public service providers service reviews during the Plan period. This presents a risk that Policy R4 is not effective.

The County Council as a public service provider has an on-going need to review and, if necessary, rationalise surplus facilities as part of wider County Council strategies to improve local services in the community. Such County Council services include 'Children's Services' (pre-school through to the 14-19 year age group), 'Adult Services' (catering for those with learning disabilities, mental health, older people, and persons with physical disabilities), and 'Community and Cultural Services' (libraries, museums, sports, recreation, tourism).

The County Council would like to emphasise its statutory function to provide public services, and to remain effective in meeting this commitment, the County Council will be implementing a series of service-driven improvements, covering both frontline and support services. This may sometimes result in the 'necessary loss' of particular community buildings and land in County Council ownership, in order to reinvest proceeds of sale in local service improvements. The policy should have increased flexibility to accommodate the unique role and function of public service providers.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to accommodate the unique role and function of public service providers and so be effective.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council therefore recommends the following addition/ changes to Policy R4 to overcome its objection (see below). This draws on the wording of Basingstoke & Deane Borough Council's Adopted Local Plan 2011 – 2029, Policy CN8 – Community, Leisure and Cultural Facilities, part h, and South Downs Local Plan 2014– 2033, Development Management Policy SD43- New and Existing Community Facilities and is therefore a material consideration in Plan making. The County Council's proposed amendment would reinforce the unique role and function of public service providers and their need for managed change to deliver operational service improvements over the Plan period (be effective).

B4c Your suggested revised wording of any policy or text:

Development proposals that would result in the loss of community or publicly owned or managed facilities will be permitted where:

- i. The facility is no longer needed; and
- ii. No alternative community use of the facility is practical or viable; and
- iii. Any proposed replacement or improved facilities will be of equivalent or better in terms of quality, function and accessibility; or
- iv. the proposals are part of a public service provider's plans to re-provide or enhance local services and the proposal will clearly provide sufficient community benefit to outweigh the loss of the existing facility, meeting evidence of a local need.*

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

- Yes, I want to take part in a hearing session No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its role as a public landowner supports the intentions of Policy NE4 to protect the integrity of the designated sites from increased nutrients. The County Council has confidence that any increased wastewater production related to its draft allocated sites will be suitably mitigated through on-site and off-site mitigation measures as required under the policy.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Policy D4: Water Quality and Resources

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the principle of Policies CC1 and D4.

Notwithstanding this, the County Council is concerned that the draft policy does not meet the tests of soundness as it is not sufficiently flexible to respond to unexpected changes during the plan period.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to be consistent with national policy.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council would be mindful to overcome its objection if the policy is amended to introduce sufficient flexibility in the wording. This would still seek to achieve a high standard of sustainable development but would not require potentially unattainable standards to be met (be effective).

B4c Your suggested revised wording of any policy or text:

To minimise impact on the water environment and adapt to climate change, all new dwellings shall achieve as a minimum the Optional Technical Housing Standard for Water efficiency of no more than 110 litres per person per day, *unless sufficient evidence justifies meeting the mandatory national standard (no more than 125 litres per person per day)*. Development that achieves a higher technical standard of 100 litres per person per day will be supported.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

B3 Please provide details you have to support your answers above

Hampshire County Council, in its role as a public landowner and service provider, supports the policy aspiration to achieve energy efficiencies in new non-residential development. In particular the County Council notes that paragraph 11.55 considers how the BREEAM assessment process can influence viability of a proposal and make allowances for this, to ensure the plan will remain effective over the plan period. For example, as landowner, the County Council considers that any forthcoming draft policy should be open to demonstrating meeting this energy efficiency standard by alternative equivalent standards such as those based on an embodied carbon (CO₂ / Kg / sqm) metric as advocated by the RIBA 2030 Climate Challenge:
<https://www.architecture.com/-/media/files/Climate-action/RIBA-2030-Climate-Challenge.pdf>

Fareham Borough Council Local Plan (Reg.19) Proposed Submission Version Consultation

Hampshire County Council Response – 18 December 2020

Hampshire County Council does consider the local plan to be sound and legally compliant. The County Council welcomes the opportunity to respond on this consultation and sets out its comments firstly on the Transport Assessment and then on specific local plan policies in its capacity as the local highways authority, local education authority and in its role as an adult services provider with a focus on specialist care.

The County Council then sets out its comments on specific site allocations in its capacity as the local highway authority, local minerals and waste planning authority and also as the local education authority with responsibility for school place planning.

Policy HA2: Newgate Lane South (removal as a housing allocation)

Hampshire County Council is the Local Highway Authority (LHA) for all roads in Hampshire except for motorways and trunk roads and the LHA response is concerned with the potential highway and transportation impacts of the land use proposals set out by the borough council on the local road network. HCC's primary concern as highway authority is the efficient use, management and maintenance of the local highway network. Ensuring that all new development mitigates its impact on the Hampshire network is the function of the highway authority.

The LHA submitted comments in December 2017 and February 2020 in response to the draft local plan regulation 18 consultations. As part of both responses the LHA submitted an objection to policy HA2 (Newgate Lane South). This objection is not resubmitted due to the removal of policy HA2 as an allocated housing site from the revised development strategy in the Publication Plan.

Transport Assessment

At the time of the previous draft local plan consultation in January 2020 the evidence base did not include a completed Transport Assessment (TA) to replace the interim TA published in support of the 2017 draft local plan consultation therefore the local highway authority submitted a holding objection. The TA has now been finalised and forms part of the Publication Plan evidence base.

The LHA supports the methodology used by FBC in preparing a borough-wide TA and the use of the strategic model known as the Sub Regional Transport Model (SRTM) to assess the wider transport impacts of the strategic disposition of proposed development across the Borough.

The Fareham Local Plan - SRTM modelling report (2020) sets out the Baseline, the Do minimum (with local plan development) scenario and the Do Something (with mitigation) model runs and forms part of the transport evidence base. As part of the strategic transport modelling the LHA understands that a total of 2,150 dwellings was attributed to the proposed Strategic Growth Areas (SGAs) and included in the Do minimum scenario. This means that the strategic modelling was carried out using a higher housing number than is currently proposed in the Publication Plan. The LHA recognises that the strategic modelling with the higher housing number represents a worst-case scenario and that the limitations of the SRTM do not allow for localised impacts at junctions to be attributed to specific development sites. Consequently, it is not possible for the SRTM to isolate the transport impacts of the SGAs on the highway network. Therefore, the LHA accepts the outputs from the strategic modelling report and has not requested an additional model run of the SRTM to reflect the removal of the two SGAs and subsequent lower housing number.

The SRTM modelling report indicates that the incremental impact of all the site allocations including the SGAs is forecast to affect links and junctions across the highway network and particularly along the A27 corridor through Fareham borough. The future resilience of the A27 corridor is a concern for the LHA which is why the LHA is undertaking a transport study for the A27 corridor which the County Council will seek to adopt as future strategy. The strategy will seek to incorporate a multi modal approach that facilitates a modal shift away from private car use. Future transport assessments of development sites along the A27 corridor should take this into account and have regard to the emerging transport strategy.

A key aspect of the A27 corridor strategy will be the application of the 'Link and Place' approach to street planning and design. This approach recognises a street functions as both a link (that is movement by all modes of transport including pedestrians) and a place (destination in itself) and will help determine policy priorities between competing users with a greater emphasis on the function of places. This 'link and place' approach is being developed as a Hampshire County Council policy which will be fully imbedded in the next Local Transport Plan for Hampshire (Local Transport Plan 4).

The TA assessed the cumulative impacts of the site allocations and demonstrates that the significant transport impacts of the local plan development on the highway network can be mitigated through proposed highway interventions. The TA specifically highlights the junction at Parkway/Leafy lane which is north of the M27 junction 9 and serves the Whiteley business estate in the adjoining district of Winchester City Council. The Parkway/Leafy Lane junction is predicted to be significantly impacted by local plan development traffic (with long queues along Leafy Lane) and meets the criteria for requiring mitigation.

However, this junction does not warrant a Do Something mitigation scheme for increased junction capacity. This is because the Leafy Lane arm of the junction leads to a residential area with a 20mph zone reinforced by vertical speed reduction measures. The policy approach by the LHA is to reduce rat-running along Leafy Lane between

Fareham and Whiteley. Therefore, an alternative highway scheme which strengthens the current situation of suppressing flows along Leafy Lane should be the mitigation scheme to be taken forward. The LHA will need further discussions with both Fareham Borough Council and Winchester City Council to establish the form of any mitigation scheme if it is required.

The Do Something modelling for the TA proposed five mitigation schemes for increased junction capacity and modelled only the highway impacts of increased motorised vehicle traffic. There are other solutions for mitigating the transport impacts from local plan development which are more in line with the emerging policy agenda on decarbonising transport from Government and Hampshire County Council. These mitigation options would generally follow a sequential approach to assess their impact on the local road network and the role they can play in traffic reduction and reducing transport emissions starting with measures to avoid the need to travel, active travel measures, public transport (SE Hampshire rapid transit) and finally localised junction improvements. This wider and sequential approach to mitigation will need to be applied to all site-specific transport assessments.

Development Strategy

The LHA acknowledges that the Publication Plan proposes a lower housing number than in the previous draft local plans. This lower housing number is in response to a lower level of housing growth proposed by Government in its consultation in August 2020 on a new standard methodology for calculating the annual housing need. The LHA recognises that FBC need to await the outcome of the Government's consultation before the Publication Plan with the lower housing number can proceed to adoption in line with the FBC's revised Local Development Scheme (September 2020).

The consequence of a reduced housing number is a change to the development strategy and the removal of several housing sites. The LHA supports the removal of housing site HA2 Newgate Lane South. The LHA submitted an objection to policy HA2 in the previous draft local plan consultations.

The LHA also supports the removal of the Strategic Growth Area policy from the Publication Plan. The South of Fareham and North of Fareham Strategic Growth Areas were included in the draft local plan consultations and the LHA submitted a holding objection.

Climate Change

Fareham Borough Council as Local Planning Authority has a legal duty to help meet the requirements of the Climate Change Act 2008. The LHA wishes to be reassured that the borough Council has satisfied itself that the Publication Plan goes far enough in supporting the Government and Hampshire County Council policies on climate change that have emerged during the local plan preparation process. This is in view of the Hampshire County Council's recently adopted climate change strategy and targets to be

carbon neutral by 2050 and resilient to a two degree rise in temperature. For Hampshire to meet these targets, which are in line with Government legal requirements, land-use planning and transport policies at the local district level need to play a strong role and are likely to be most effective at the plan making stage.

The LHA acknowledges the transport evidence submitted in the Strategic Transport Assessment which shows how the traffic impact of the local plan development can be mitigated in traffic and transport terms. The LHA wishes to see demonstrated how the local plan proposals, in relation to transport and how we travel, will contribute to the longer-term goal of achieving carbon neutrality and building resilient networks and systems.

Strategic Policy CC1: Climate Change

The LHA supports the amended climate change chapter and strategic policy CC1 however the supporting text needs more detail with reference to the County Council's adopted Climate Change Strategy (2020) and targets including the resilience of the highway network.

Policy NE8: Air Quality

The local plan correctly identifies road transport emissions as the main source of air pollution which is relevant to the County Council's responsibilities as both highway and public health authority. The LHA supports the local plan commitments to reduce, minimise and mitigate road transport emissions and their impact. However, the Air Quality Policy NE8 needs to be more specific and should be amended to include the policy text 'development should deliver sustainable transport (public transport, walking and cycling) as part of improving air quality'.

Policy TIN1 Sustainable Transport

Given the connection between transport, local plan allocations, air quality and health, there is a lack of commentary or cross reference on air quality management within the Transport Chapter. For example, the supportive text needs to make clear how the transport policies (such as Sustainable Transport TIN1) contribute to both the climate change objectives of reducing CO2 emissions and to the air quality objectives of reducing air pollution.

The LHA recommend amending policy TIN1 on Sustainable Transport to make direct reference to the role of sustainable transport in improving air quality. The supporting policy text also needs to refer to the Air Quality Management Areas / Clean Air Zone designation (on sections of the A27 and A32) and the Air Quality Action Plans in place due to concerns over nitrogen dioxide levels caused by road traffic. Likewise, the Air Quality section needs to refer to the transport chapter and policies and the role they play in mitigating the transport impacts on air quality.

The Transport chapter needs to refer to the Strategic Transport Assessment and the impacts of the local plan traffic on air quality in particular air pollution from the M27, the A32 and A27. This should be cross-referenced with the air quality work carried out as part of the AQMAs and the local plan Sustainability Appraisal. The LHA supports transport mitigation measures of sustainable and active travel modes as an alternative to making private vehicle trips which help overall to reduce emissions harmful to human health and the environment. The LHA would not support any transport mitigation measures which threatened to undermine the success of the current Air Quality Management Areas.

The Transport chapter needs to strengthen the commitment to deliver high quality walking and cycling facilities with reference to the Government's new cycle infrastructure design guidance in Local Transport Note 1/20. Reference to cycle infrastructure design should also be included in the Design chapter.

To contribute to reducing car use, opportunities for enhancing and encouraging active travel to and from school should be encouraged and implemented working closely with Hampshire County Council Children's Services and Highways Departments. The County Council will require the provision of safe walking and cycle routes to schools and existing routes to be enhanced where necessary to improve walking and cycling numbers. Contributions from developers will be sought where necessary including for the production and monitoring of school travel plans (STP's).

Policy TIN3: Safeguarded Routes

The LHA supports the new policy TIN3 Safeguarded routes in relation to delivering bus rapid transit in Fareham and Portchester. However, the supporting text should refer to the future extensions of the SEHRT network to the west of Fareham towards Segensworth, Swanwick Station, Whiteley and the North Whiteley major development area and to serve the Solent Enterprise Zone at Daedalus and adjacent coastal settlements.

Strategic Policy R4 Community and Leisure Facilities

Hampshire County Council Children's Services consider that it is important that the impact of additional housing is assessed and where necessary developer contributions are provided to provide additional childcare places either through on-site facilities or the expansion of nearby provision. The impact will be assessed on a case-by-case basis.

The County Council also provides an Early Years guidance note on this issue for the Borough Council to consider in their plan making in relation to the future need and housing allocations.

Strategic Priority 8

Hampshire County Council Adult Services welcome the reference to affordable housing and the need to address the specific needs of different groups in the community, including the elderly and people with disabilities. However, it is recommended that reference is made to the need to meet a range of housing needs, including those in need of affordable housing and those in need of specialist housing including the elderly and people with disabilities in Strategic Policy H1: Housing Provision.

Consideration should also be given to whether opportunities are available to encourage specialist housing provision in specific site allocations.

Policy HP 5: Affordable Housing

The County Council recommend that Policy HP5 or the supporting text should encourage the provision of housing to meet a range of needs, including specialist housing to meet older persons' needs (such as extra care housing) and those with disabilities.

Policy HP7: Adaptable and Accessible Dwellings

The County Council notes that the Specialist Housing Topic Paper includes reference to the low cost of providing homes to above base accessibility standards. Although there is a correlation between age and mobility, people of all ages may have some mobility impairment, either permanently or temporarily.

The proposed percentages of housing the policy requires to be built to higher accessibility standards is modest and given the rate at which the stock is added to each year it will be a very long time before a significant supply of accessible housing is available in the Borough. With such modest levels of provision, the likelihood of a person who develops mobility impairment will find themselves in a home that can meet their needs is low. Adopting a requirement for a larger proportion of the stock to be built to Cat2 standards in particular would better meet individuals' changing needs and support the creation of sustainable communities by reducing the need to move to find suitable accommodation.

Policy HP 8: Older Persons and Specialist Housing Provision

The inclusion of an enabling policy is welcomed by the County Council; however it is recommended there is specific mention of specialist provision of affordable housing, including extra care housing and housing for those with disabilities. It is noted that specific housing allocations are made only in respect of sheltered accommodation (Policies HA42 / 43 /44). The County Council consider that these sites may also be suitable for other forms of specialist housing, including extra care housing and housing for those with disabilities. It is recommended those policies are amended to reflect this.

The County Council supports the opportunity for exception type development in specific circumstances in this policy and Policy HP6.

Housing Site Allocations

The County Council has considered the housing allocations in its capacity as the local highways authority, local education authority and local minerals and waste planning authority and provides the following commentary.

An initial assessment of the impact on school place planning has been considered based on the level of housing identified, and details are highlighted below for specific sites where there will be an impact on the supply of local school places at primary, secondary and education for pupils with Special Educational Needs and Disabilities (SEND).

The County Council as the local minerals and waste planning authority is pleased to see that some of the comments regarding mineral and waste safeguarding, from the Regulation 18 consultation, have been considered and included within the Regulation 19 proposed submission document. Within the County Council's Regulation 18 response a list of sites that were deemed to require a Mineral Resource Assessment as part of any potential application was provided. It is noted that all the allocated housing sites that the County Council made such comments on have been removed from the Proposed Submission Document as being no longer available or no longer suitable.

Housing Allocation Policy HA1 – North and south of Greenaway Lane – 824 dwellings

The development of 824 dwellings will create additional pressure for school places locally at primary, secondary and special schools. It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement j.

Housing Allocation Policy HA3 – Southampton Road – 384 dwellings

The identification of the need for developer contributions for education and ensuring safe walking/cycling routes to local schools are provided, is welcomed.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement k.

Housing Allocation Policy HA4 – Downend Road East, Portchester – 350 dwellings

It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirement j, that the site will require a Minerals Assessment prior to any development. The County Council would also like to bring to the Borough Council's attention that this allocated housing site sits within the safeguarded buffer zone of Warren Farm and Down End Quarry, a safeguarded waste site operated by Veolia Environmental Services (UK) Plc.

The safeguarded buffer zone is informed by the safeguarded sites list as defined through 'Policy 26: Safeguarding - waste infrastructure' of the adopted Hampshire Minerals and Waste Plan (2013) (HMWP). The purpose of this policy is to protect current and potential waste sites from pressures to be replaced by other forms of development, including through 'encroachment' where nearby land-uses impact their ability to continue operating.

It is often the case that appropriate buffers and mitigation measures can make potential nearby development compatible. Any mitigation measures would need to be undertaken by the proposed non-minerals or waste development (i.e. the allocated housing development) and reduce potential impacts to and from the safeguarded site to levels that would ensure the safeguarded site could continue its intended waste use.

Usually, the mitigation measures would need to focus on impacts such as noise, dust, visual impact, odour and traffic movements. They can take a variety of forms, including landscape design, tree planting, barriers, building design and orientation and use of different building materials.

The appropriate mitigation measures are best informed through direct discussions with the operator of the safeguarded site as they will be most be aware of operational requirements. However, the County Council is also available for further discussions, as well as facilitation, if required.

With regard to the above site, the County Council would therefore request further wording be added to the site-specific requirements of allocated housing site HA4 as set out below:

“the provision of evidence that the safeguarded site has been considered within any forthcoming planning application, how operator comments have been taken into account and what impacts these comments have had on the proposed development design. Details of any mitigation measures chosen as a result of the analysis should also be included with an application for the site”.

In the unlikely event that it is not possible to agree appropriate mitigation measures, the County Council would seek evidence that the waste management capacity can be relocated or provided elsewhere and delivered.

Housing Allocation Policy HA9 - Heath Road

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council’s data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement g.

Policy HA2: Newgate Lane South

The County Council as local highway authority supports the removal of policy HA2 Newgate Lane South.

Strategic Growth Area

The County Council as local highway authority supports the removal of the Strategic Growth Area policy.

Employment Allocations

The County Council has considered the employment site allocations in its capacity as local minerals and waste planning authority and provides the following commentary.

Policy E2 - Faraday Business Park

Whilst a number of the allocated housing sites have had site-specific requirements added to them for Minerals Assessments, allocated employment site E2 - Faraday Business Park has not had any added. In line with the County Council’s Regulation 18 response to the local plan consultation, the County Council again request that a site-specific requirement be added to this allocated site policy so that any forthcoming planning application would need to be accompanied by a Minerals Resource

Assessment. The County Council recommend adding the following site-specific wording: The site is within a Minerals Consultation Area. Minerals extraction may be appropriate, where environmentally suitable, subject to confirmation of the scale and quality of the resource.

The County Council would like to take this opportunity to reiterate that any development or significant redevelopments of land may impact mineral resources. As minerals can only be worked where they are found, it is important that viable mineral resources are 'safeguarded' (protected) from needless sterilisation by other development to help to secure a long-term future supply of minerals. Mineral resources are necessary for a vast array of construction activities and their availability is a prerequisite for any housing development. As such, the NPPF requires planning authorities to define Minerals Safeguarding Areas and adopt policies so that, 1) known locations of mineral resources of local and national importance are not needlessly sterilised by non-mineral development, 2) if it is necessary for non-mineral development to take place, the prior extraction of minerals, where practicable and environmentally feasible, is encouraged.

Subject: Fareham Local Plan 2037

Follow Up Flag: Follow up
Flag Status: Flagged

For Fareham Planning Department.

I must first recognise how much thought and work has gone into the Plan, and it reads well. Congratulations to the authors, who know their subject in such detail. Most of it I agree with, without reading every word, but comments have been invited.

Strategic Priorities. Para 2.21 (5). I think a vibrant future for the town centre might be positive with increased housing, ie FTC1, FTC2 and FTC6, but all these developments remove some existing parking space, or add to a car parking problem. If there is no new parking, where will out of town shoppers park their cars? Perhaps hidden within the text is an assumption that FBC can do nothing to halt changes to the retail trade: from increased IT shopping, click and collect, and the demise or closure of retail chains and local businesses. This was happening before the Covid19 outbreak, but has become much worse. So will people come from outlying communities like Stubbington, as they will not be able to buy what they want in Fareham anyway. I believe FBC will have to consider lowering business rates to counter balance lower footfall, or give help with high rents to encourage more local shops and businesses. Maybe entertainment options might bring some life to the centre. Whiteley is the main shopping centre for Fareham now, which unfortunately comes under Winchester. I would suggest that para 2.21 needs greater vision if the town centre is to survive, albeit in a different form than today.

Strategic Gap. Para 3.9 and 3.10. Para 3.9 reads positively, but 3.10 says 'a redefinition' does not preserve the size or shape of the existing. This is reinforced when read in conjunction with para 3.44 'spatial definition tightened', and 'redrawing boundaries' in para 3.46. I fear for the future of Strategic Gaps when referring back to Strategic Growth Areas in para 3.20: are these potential new SGAs, or a yet again redefinition of Strategic Gaps? My confidence in the existing SGs being retained is seriously diminished, and these conflicting phrases do not create trust in the FBC future decision making on this topic.

On this same topic of the boundaries of the Meon SG, I would greatly appreciate having or seeing a map of the Meon SG area, as my house backs on to open fields looking west to the river. This would help me to comment on any future development submission which involves land on the east side of the river along Old St and further north to Titchfield Road. Thank you.

Housing Allocation Policy HA3. What will happen to the existing business within this development outline?

Housing Allocation Policy HA41. I read this with interest, as it is local to me. A very interesting development, original thinking. But where will the residents park their cars without denying existing shoppers? And how will they be able to recharge batteries as there is no parking at the back of the existing building?

Employment. Two development sites are on Solent airfield, and the third at Whiteley. None of these is served by any form of public transport, so private transport will be essential. Does this fit with climate change? Or is it assumed e-vehicles of one sort or another will be commonplace after 2037? But in the meantime? Any thought about discussing new or revised bus routes with the bus companies?

Air Quality and Transport. Reading these as a current and topical issue worldwide, the policies read well, yet I feel quite strongly that there is something the FBC can do (other than address the issue for future planning applications) to reduce existing levels of pollution. Why not plan for the Strategic Gap between Fareham and Stubbington/Hill Head/Lee to be heavily planted with trees in the spaces between the new by-pass and existing dwellings to lower Co2 levels? This would help the environment, nature, keep communities separate, provide recreation space for good mental health, and improve air quality, all in the one exercise. More trees throughout the borough is already being studied, I understand. Central government will set the pace for reducing fossil fuel emissions, phasing out petrol and diesel. I feel the cost of e-vehicles will be prohibitive compared with existing cars, so the number of vehicles may fall. This will drive the need for better public transport. Locally, this should be a much better bus service, not just a

trunk route service as we have today in Stubbington. But I doubt that any bus service could meet the needs of the elderly, handicapped, young and old, and be available throughout the day, or be affordable. Nevertheless I would like to have found more sense of action or need in words on this under either of these two headings, and also something about car charging ports in the Housing Policy section. FBC has to lead on this last point, I believe.

Having struggled to page 244, I'm done for. But again, a very exhaustive Plan with many specialisations, and an eye opener for the uninitiated, which is me!

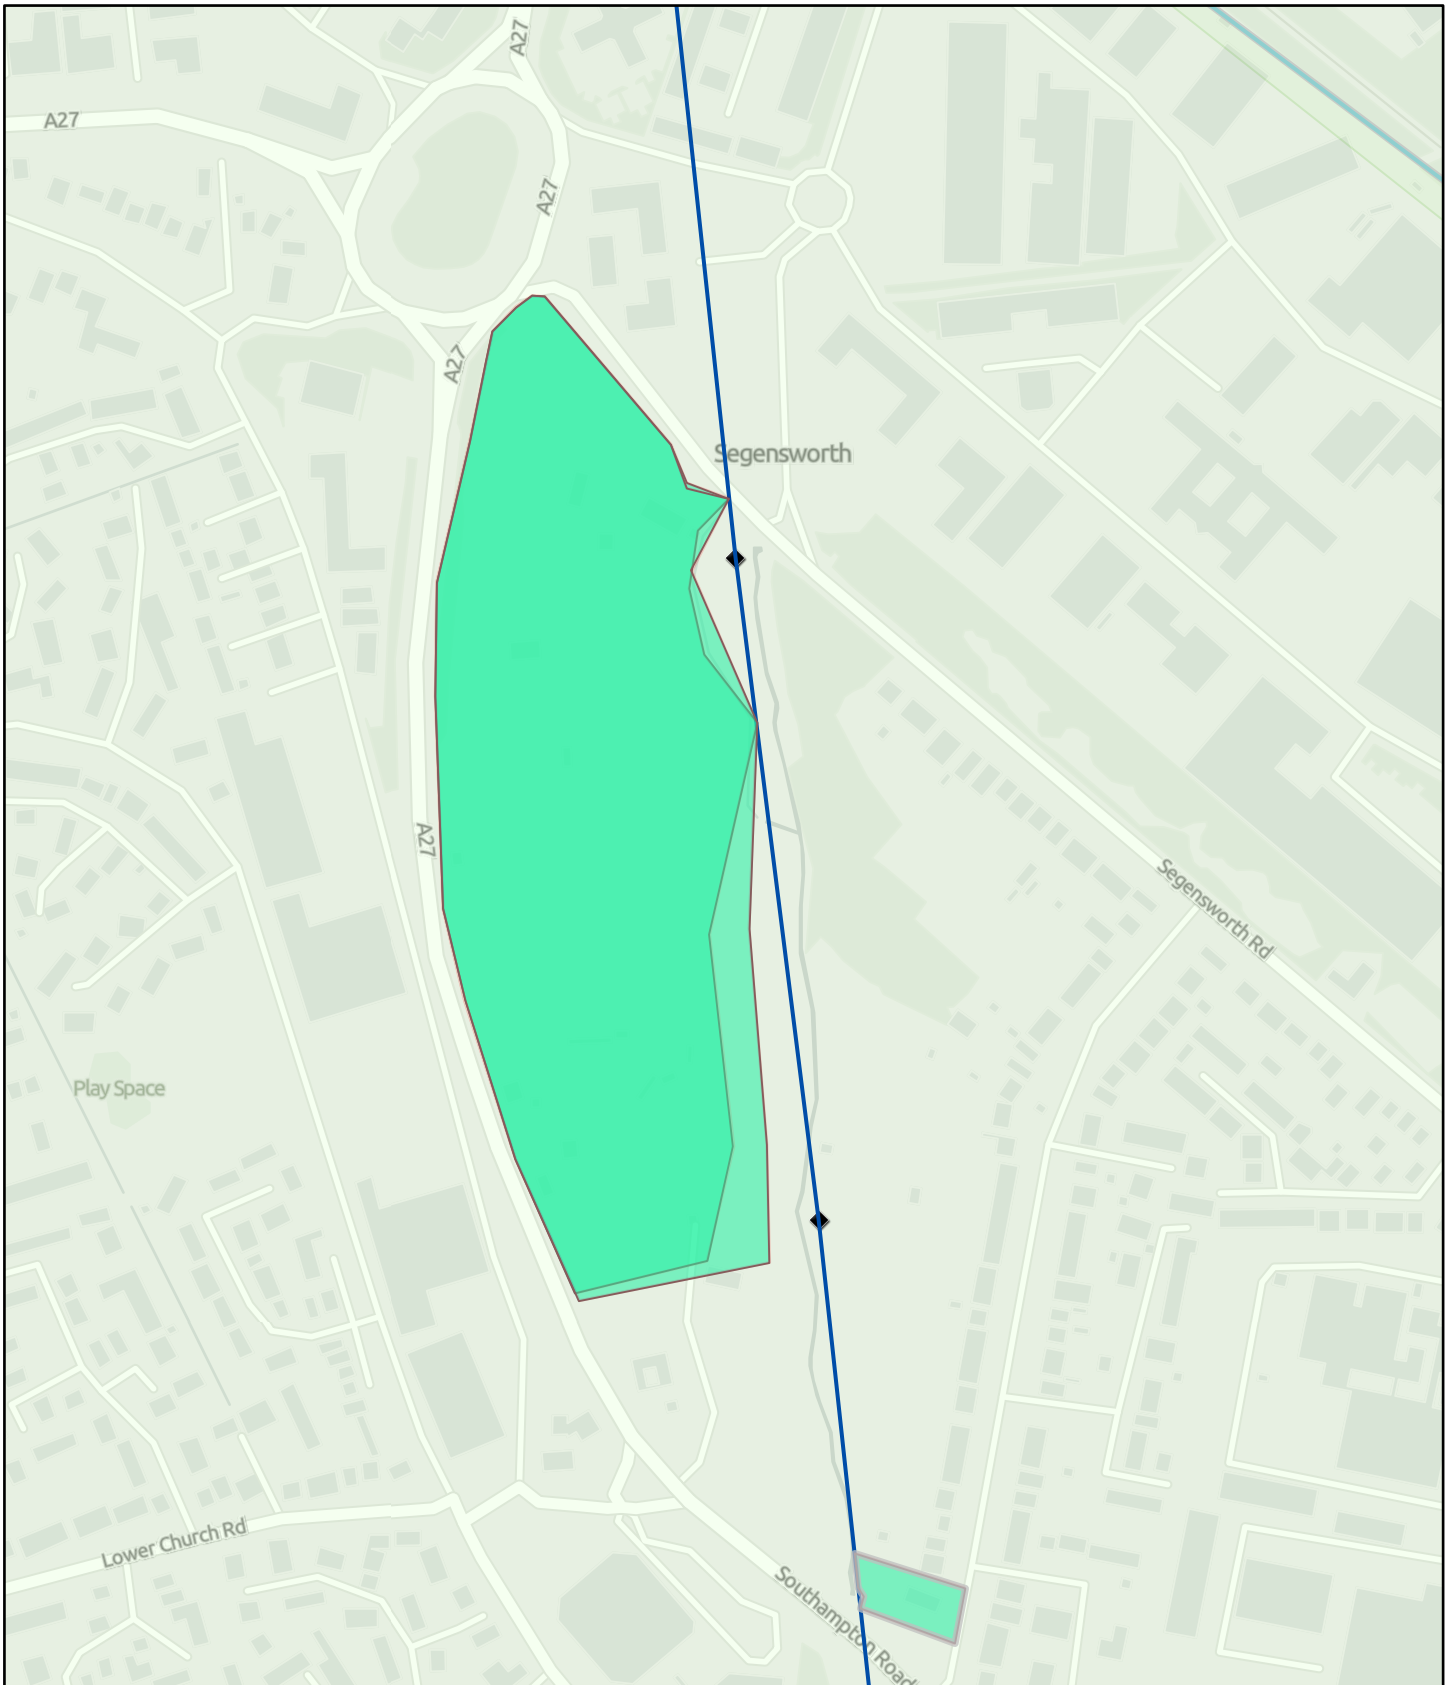

Thank you for your patience in reading this.

Subject: Local plan comments.

Name. Anne Brierley

Consultation on the local plan.
Comments on the local plan to 2037.

Firstly I would like to say that the deliveries of The Special addition of Fareham Today were not made to all areas. This led to a big delay in copies arriving and lost time in trying to understand or access the information given.. Not all people know how to use or have the technology to take part in this survey. By having to reply in the ways set out, is also off putting and in this remark i include myself. I would hope that this is still forwarded . I found also that when replying to the, Have Your Say On Our Future Development questionnaire, that there was not really any choice for development areas. Given the way the questionnaire was written it was no surprise to find that people wanted the development put at the outer edges of existing developments even if that ment using our country side.

HA4 Downend Road.

Ever since the 2017 draft plan was drawn up, the residents of the local area have had to constantly defend their rights and position on this.

Land WEST of Downend Road is not in the plan at the moment but it's only a matter of time before we will be defending this area too.

It is known that surveys have taken place and a wild life survey has continued all this year.

Several developers have been lining up, including the developers trying to get permission on land east of Downend Road. (Winnham Farm)

Housing Allocation

HA4

land east of Downend Road

Known as Winnham Farm.

First planning number P/18/0005/OA was DEFERRED and then DENIED over concerns with traffic and road safety at narrow bridge on Downend Road.

Went to appeal. App/A1720/w/19/3230015 Hearing on 23 to 25 September. Which was DISMISSED by the Inspector.

Resubmitted as number P/20/0912/OA DENIED again ON 18TH DEC 2020.

This area should of never been placed as a development site. The developers themselves knew of traffic problems from the start.

It went to the local plan that was never finalised 2017.

The council have left this area in the current plan and have never had any other intention but to keep it in, despite the area suffering SEVERE traffic congestion with many roads at a stand still. (Pre covid)
When the problems with Covid subside we will be back to square one.

Residents have very little faith in the traffic modelling, desk top surveys and transport assessments as they don't compare with reality.

Areas affected by SEVERE traffic congestion are:

M27 motorway and its slip roads,

The Delme Roundabout and A32 into Gosport

Downend Road and all side roads that join it. (Are regularly used as rat runs.)

Residents of Cams Hill Road, St Catherine's way, The Ridge Way, Ventnor Way, Alum Way and The Causeway . ALL have NO other exit route other than onto Downend Road. The Thicket on the west side of Downend Road also suffers rat running.

The A27 between Portchester to the Delme roundabout and onwards

The junction where Downend Road meets A27 & Shearwater Ave.

Who would then allow more development on Downend Road with such restrictions as, a bottle neck narrowing highway, over a narrow brick built network rail bridge ?

Traffic also impacts on the environment, amenity, health and well being of residents.

Poor air quality which is known to be very high, with some residents having had a letters about this.

If it were not for this year's Covid 19 crises reducing traffic numbers , we may of exceeded the limits.

If you walk along the A27 you can taste the fumes in the air.

Policy DSP40.

States that a planning proposal should not have unacceptable environmental, amenity, or traffic implications and plans should not create a bad relationship with the existing residential properties. I believe this continued application in this area fails the test on all counts.

Fareham council is breaking their own rules on policies.

Transport and other infrastructure.

Highways England, Hampshire County Council and Fareham Borough Council along with the Developers are all aware of how dire the situation is.

No spare capacity for new roads or spare capacity on the Delme roundabout.

The developers and HCC don't dispute this.

It is for this reason that the Developers are required to make a contribution to the Delme Roundabout and many other items to numerous to list.

The mitigation plans the developers and HCC have proposed will be at best a very temporary fix and will be negated by the increase in traffic from more people being attracted into the area. The predicted rise in vehicles ownership, regardless of engine type, and the enormous rise home deliveries and all traffic from other areas that pass through. There are going to be disruptions with the Downend Road /A27 Junction, possibly being worked on twice. Once for mitigation work, and again for extra lane for Bus Rapid Transit.

If the development goes forward I believe we would all face years of disruption.

Sustainable and alternative modes of transport for new developments.

A good idea but current residents know that to live in this area you need transport.

The few remaining shops at Portchester and Fareham are unlikely to be walked to.

The distances to bus stops is greater than the ideal distance for walking.

Only three buses on the A27 near the Thicket with one of them only running on a Wednesday between 11 & 2pm.

This did come up with the Inspector at appeal and he was hesitant until he was informed that there was to be the Bus Rapid Transit system.

How many years before it arrives ? And do they have the money to fund it ?

Reporting we are getting one and it arriving are very different things. Look at all the delays with Welborne.

Walking and cycling are more likely to be for leisure given every day time restraints, but senior school children will probably walk to Cams school most days.

Developments that are promoting walking and cycling will still have the choice of a motor vehicle and at the Downend location I believe they will.

1) Policies map: HOUSING ALLOCATIONS (HA1, HA3-4, HA7, HA9-10, HA12-13, HA15, HA17, HA19, HA22-24, HA26-44)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The area to the East of Downend Road is not suitable to be included in the local plan. The local road infrastructure is presently already congested. It often takes 15 minutes to exit The Causeway and turn right onto Downend Road at peak times. The additional 350 homes planned for the site will exacerbate this and the pollution levels on the A27 at Cams. I also believe the Ecological Report for the site to be untrue. This is a report commissioned and undertaken some 5 years ago, with a cursory desktop update. I have often observed Brent Geese on the neighbouring land to the West of Downend Road feeding and roosting in some numbers. I believe this also to be the case on the land East of Downend Road and this is contrary to Policy 7.1 and 7.2 W&BG 1, 2 et al in the Solent Waders and Brent Goose Strategy document.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove the land to the East of Downend Road for development

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would preserve important local chalk down land and the Brent Goose population that inhabits it during winter months.

Your suggested revised wording of any policy or text:

Remove this area.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

17th December 2020

Re Fareham Local Plan

Dear Sir or Madam

I wish to comment on the above plan with respect to HA4, the housing allocation east of Downend Road. As you are aware, the most recent proposed development by Miller Homes, P20/0912/OA, was rejected on 18th November 2020.

Despite the applicants claiming that “detailed modelling” by computer software did not suggest a “severe” impact on traffic movements on Downend Road, this failed completely to relate to the lived experience of both councillors and residents.

The effects of air pollution are now well known, causing an estimated 40,000 deaths per annum. The report from the Royal College of Physicians and the Royal College of Paediatrics and Child Health in 2016 showed the devastating impact of air pollution on all age groups, beginning with life before birth and continuing into advanced years.

As you are aware, the inquest by the coroner for Inner South London into the tragic death of a nine year old girl, Ella Kissi-Debra, concluded yesterday, 16th December 2020. The coroner’s verdict was that air pollution had contributed to her death from asthma. During her lifetime, recordings near her home showed that levels of Nitrogen Dioxide had exceeded national and EU limits and the levels of particulate matter had exceeded WHO levels.

Sanctioning an increase in traffic movement close to a known pollution hotspot carries a grave burden of responsibility.

The plan therefore cannot be legally compliant with the obligation to safeguard the well-being of residents.

I urge the Council to remove HA4 from the plan.

Yours sincerely

Dr Barry Cullen

Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

Now that the Planning Application P/20/0912/OA has been rejected for a second time that the land to the East of Downend Road be removed from Fareham's Local Plan.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove the land to the East of Downend Road from Fareham's Local Plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Removing the land to the East of Downend Road from Fareham's Local Plan would reflect the rejection of planning permission. This area is unsuitable for development unless the railway bridge is rebuilt which is not financially viable.

Your suggested revised wording of any policy or text:

Removal of the land to the East of Downend Road from Fareham's Local Plan.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

B3 Please provide details you have to support your answers above

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

N/A

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

N/A

B4c Your suggested revised wording of any policy or text:

N/A

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Sandford Lane
Wareham
BH20 4DY

Date: 07th December 2020
Your reference: Fareham Local Plan 2037 (reg 19)
Our reference: JH-3100

Dear Sir or Madam,

Response to the draft Fareham Local Plan 2037 regulation 19 consultation

On behalf of my client, Blackbrook Estates Ltd, I herein provide a response to the above draft local plan consultation.

The plan will need to meet the tests of soundness, as set out in paragraph 35 of the National Planning Policy Framework (NPPF), namely that it is:

*'a) **Positively prepared** – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*

*b) **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*

*c) **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*

*d) **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework'.*

This representation is structured with the above in mind and focusses on draft allocation ref. HA4 in respect of land at Downend Road East, Porchester.

By way of background, my client owns a parcel of land that includes 24/7 Fitness, whose boundary abuts the draft allocation at Downend Road East (see inset map). The site has a long established, existing use, which involves substantial traffic movements throughout the day including peak times, and is accessed to the north. Utilities and drainage infrastructure already serve the site. The landholding contains substantial hard surfacing and, at two storeys in height with a number of additional structures in the curtilage, it constitutes a significant brownfield site.

The access to the site is treelined and covered by a TPO. Just to the north of this is an area of trees and grassland recorded as an SSSI, adjacent to which is a waste transfer station. My client's site sits between the south and west of the allocation and these neighbouring features. This relationship is illustrated by the draft Policy HA4 framework plan excerpt in figure 1 below.

Figure 1: draft Policy HA4 framework plan excerpt (site location denoted by a red star)

Draft Policy HA4 contains a number of criteria for the proposed allocation to meet. Of particular interest to my client is:

'g. Proposals should ensure a buffer is designed to protect the SSSI at Downend Quarry and the creation and enhancement of ecological corridors...'

Quite understandably, given the position of their landholding relative to the proposed allocation, my client's fear is that their demise will be expected to play a role in the required mitigation or even provide enhancements. There is a danger that the Council will perceive my client's site as playing a role as a buffer between the SSSI and the waste transfer station, but it is clearly separate and has its own established use and is in third-party ownership.

As such, I would respectfully say that the responsibility for mitigation and enhancement lies solely with the developers of the allocation and my client would not wish to see their landholding compromised by being expected to play a role. Linking this back to the tests of soundness, a plan has to be deliverable in order to pass test c ('effective'). Therefore, any reliance on third-party land within my client's ownership would render Policy HA4 not deliverable and not sound.

I trust that the above will be considered and that any future mitigation and enhancements will be brought forward without any reliance on my client's landholding. I would be grateful if I could please be added to the Council's local plan contacts' database, so my client can be kept up-to-date with progress on this plan and future reviews.

Yours faithfully,

Steve Tapscott BA (Hons) MA MRTPI

Associate Director

1) Policy: TIN4 - Infrastructure Delivery

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

As I have previously addressed and advised, the HA4 plan conflicts with the 2008 Ambient Air Quality Directive. There is nothing in the plan for the additional infrastructure required to support the increase in traffic that can be expected at the junction of Downend Road and the A27. With a school at that junction, the increase in air pollution can only be harmful to the students. Local authorities have a fundamental role in leading the coordination and delivery of infrastructure that will support their areas. Effective infrastructure planning, prioritisation and governance of spend are critical to supporting the delivery of sustainable development and growth and in this case, it is lacking.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Proper infrastructure put in place. As I have previously suggested, the traffic should be directed away from the junction.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would effectively ensure the plan meets the requirements.

Your suggested revised wording of any policy or text:

The 2008 Ambient Air Quality Directive needs to be adhered to.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Early Years requirements in major new developments – a summary

This document provides summary guidance for Hampshire County Council and other agencies in determining a requirement for early years and childcare places to support new housing developments and to inform local planners.

This document augments the extant guidance entitled 'Early Years requirements in major new developments' where detailed estimates of place requirements, take up of early education entitlements for government funded hours, and parental demand are provided. This document is a guide to supply and demand in localised areas, and specifically addresses the Early Years requirements for the area of:

Fareham Borough

In looking at the demand for childcare in an area the Services for Young Children (SfYC) team typically look at the ward and adjoining areas Small Area Population Forecast (SAPF) data and assess it against the known supply of places. Childcare places need to be monitored regularly as the demand for childcare is directly and indirectly influenced by national and local policies. This childcare sufficiency work is carried out by the SFYC team and it is requested that prior to any development we are consulted and are able to share our up to date knowledge of the childcare need in the area.

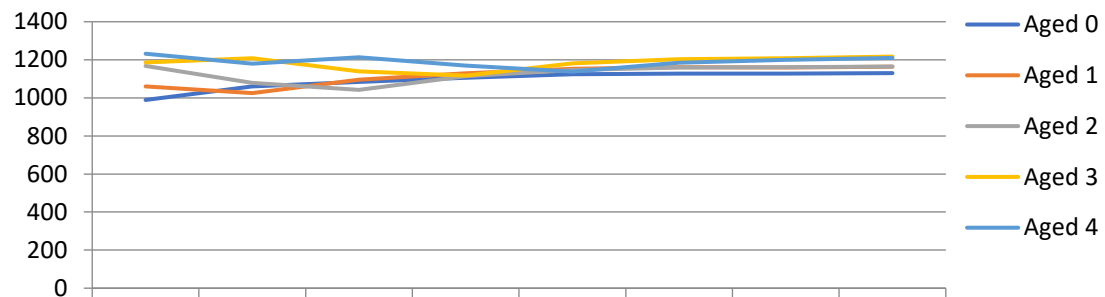

SFYC monitors childcare need for all early year's age cohorts. Early Years Education (EYE) is a statutory offer which is available universally to all three- and four-year olds from the term after their third birthday. For two-year olds, the offer is limited to children of families who meet low income criteria. There is no statutory EYE offer for children aged nought and one year old, but the local authority has a statutory duty under the Childcare Act 2006 to ensure working parents of children aged nought to five can access suitable childcare to meet their needs. This duty extends to children up to twelve years old for Out of School Care.

The overall Fareham area child population aged 0 and 4 years old dipped in 2019 by 83 but is projected to grow by a net 250 between 2018 and 2025 – 0.45% on 2018. The high-level trend projection to 2025 is shown below (Fig.1).

Significant growth in Fareham North ward is anticipated due to the impact of the Welbourne development. Most other ward areas are projected to see either a much slower increase or slight decrease in child numbers, with the overall picture apart from Fareham North showing a broadly static position.

Fig. 1

Fareham area population trend forecast 2018-2025

	2018	2019	2020	2021	2022	2023	2024	2025
Aged 0	989	1060	1083	1105	1124	1127	1127	1130
Aged 1	1060	1025	1095	1130	1153	1162	1160	1164
Aged 2	1168	1078	1042	1114	1146	1159	1162	1164
Aged 3	1186	1209	1140	1117	1181	1203	1209	1217
Aged 4	1232	1180	1213	1169	1138	1185	1200	1210

1. Demand for places:

The starting point is to calculate the number of children in each age group expected from the SAPF data. It must be noted that the SAPF is a modelled population forecast. It also does not take into account the fact that parents don't always take up their childcare places in the same district in which they live.

We know from market data that for each age cohort the percent of children requiring childcare in an early setting is typically:

Aged 0 – 1 yr old	17%
Aged 2 yr old	70%
Aged 3 yr old	99%
Aged 4 yr old	66% (It is assumed that 34% of this age cohort is typically at school)

Early Years Education (EYE) is a statutory offer which is available universally to all 3- and 4-year olds. For two-year olds, the offer is limited to children of families who meet low income criteria. In Hampshire, children can start their free entitlement in the term after their second/third and fourth birthday and can receive a maximum of 570 hours per child's eligibility year. From 2017 the Government increased the offer to 1140 hours for working parents; publicly known as the "30 hours offer".

EYE hours are not limited to the school academic year, offering parents the flexibility to take up their hours across the number of weeks that the provision is open. The demand for three-year-old places is high and trend data in Hampshire indicates that in the region of 90-95% of the three-year-old population take up this entitlement. It is, therefore, expected that there will be continued high demand from this age group within any new housing development.

The demand for four-year-old places, prior to their starting school, is also high. However, due to four-year olds taking up their school place, often in the September after their fourth birthday, the demand within the pre-school and nursery sector is in the region of 32-36% of the four-year-old population.

The demand for two-year olds continues to grow for families who meet certain low income level criteria outlined in section 2 below.

2. Low income families

Where housing developments include a significant level of social housing, shared ownership schemes and/or dwellings that would attract low income families, developers and planners should consider accessibility to affordable early years education and childcare.

Developers and planners should be aware that, since September 2014, the provision of free early years education to eligible 2-year olds is a statutory offer. The offer provides the same choices for parents as the free early years' education entitlement for 3- and 4-year olds. The exception is that the eligibility is primarily based on income assessment.

3. Space requirements and regulations

The space required to fulfil these requirements is stipulated within the [Statutory Early Years Foundation Stage](#) ¹

Section 3.57 sets out premises requirements and states, the premises and equipment must be organised in a way that meets the needs of children. In registered provision, providers must meet the following indoor space requirements:

- Children under two years: 3.5 m² per child.
- Two-year olds: 2.5 m² per child.
- Children aged three to five years: 2.3 m² per child.

These calculations should be based on the net or useable areas of the rooms used by the children, not including storage areas, thoroughfares, dedicated staff areas, cloakrooms, utility rooms, kitchens and toilets.

All early years and childcare operators must register with Ofsted as the regulatory body. Ofsted will inspect an organisation's ability to meet expected standards covered within the Early Years Foundation Stage. The Early Years Foundation Stage also contains expected minimum requirements for the suitability of premises which can be found within the same statutory framework document (accessed through the link on page 3). It is expected that all early years and childcare providers are able to meet requirements to deliver the free early years entitlement at the highest quality and Hampshire providers are expected to achieve and maintain "good" and "outstanding" inspection results.

¹ Statutory Early Years Foundation Stage 2014

4. What developers should provide

Developers should consider 80 early years places for every 1,000 houses and that these places are offered through a mix of facilities where possible. The childcare planning should allow for flexible hours of opening and covering at least 7am to 7pm for full day care.

For 1,000 houses, it is anticipated that one full day provision of 50+ places, together with an additional 30 places from shared community premises, would meet the needs of this size of development.

Where developments provide a high number of social housing dwellings, it is considered there will be the potential for greater demand for affordable childcare and access for two-year-old funded provision. It is likely that this childcare will be required to support employment activities and, therefore, any provision to support lower income families should have regard to the flexibility of opening and closing times of childcare to meet the employment or return to learning requirements of parents and carers.

The location of the childcare provision is parental choice, some choose for their childcare to be located near to their home address and some choose childcare close to their work- place.

The childcare market has also seen parents preferring provision that is close to, or on the site of, infant or primary schools where the school site is large enough to accommodate the provision.

5. Timing of the early years and childcare development

There must be early consideration of the allocation of the sites and/or premises for early years and childcare. It is recommended that such provision is considered for development and occupation at the same time as that for primary schools. This is especially important within developments that have little or no accessible early years and childcare provision adjacent to the new housing development.

The impact of a new housing development, alongside current capacity in the early years and childcare market, should also be considered in terms of early occupation of families and their ability to access provision and whether any interim measures are put in place prior to thresholds of dwellings occupied being reached.

6. How this should be provided

Recent practice suggests to planners / developers that provision should be made for early years and childcare facilities for children 0- 5 years within their plans for the housing developments. Childcare facilities should either be associated within / alongside community facilities or in a dedicated space identified and available for development. In either case, it is suggested that there are advantages with locating adjacent to, or combined with, primary school sites.

For dedicated nursery/childcare facilities, we suggest an area of 0.25 hectares. For combined school / pre-school sites this can be reduced to 0.2 hectares as there can be economies with a more flexible site layout when both are planned together. These

site areas are estimates that the Council has used in other recently provided facilities but will need to be tested against the draft accommodation briefs.

It is assumed that the sites would be made available through an open and transparent process to interested early years and childcare providers; or through the district councils and community associations where it is expected that childcare will be operated within community facilities.

The location of any provision must enable good access for walking along safe and pushchair accessible routes as well as having good public transport and motor-vehicle transport links and be within a 1-2 mile radius of the main housing development.

It should be noted that early years and childcare provisions of 50+ places are considered more economically viable and may attract the best investment opportunity from the sector.

It is also a requirement that a childcare operator that is seeking to accommodate children for free early years education makes an application to Hampshire County Council prior to opening their provision. Any developer who has engaged a childcare establishment to deliver or take up opportunity on their site should ensure the childcare provider contacts Services For Young Children at Hampshire County Council via email childcare@hants.gov.uk at the earliest opportunity.

7. Comments on identified Sites in Fareham Local Plan 2037, Housing Need and Supply

https://www.fareham.gov.uk/PDF/planning/publicationplan/Publication_plan_FINA_L.pdf

Ha1 North and South Of Greenaway Lane (824 dwellings)	This proposal would generate demand for an additional 50+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution. These places are essential, to meet the needs of working families
HA3 Southampton Rd (348 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families.

HA4 Downend Rd East (350 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families. In our Spring 2020 Childcare Sufficiency Audit Portchester West was identified as an area to be closely monitored due to the collective new and planned housing developments in the area.
HA7 Warsash Maritime Academy (100 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed. In our Spring 2020 Childcare Sufficiency Audit Warsash was identified as an area to be closely monitored due to the collective new and planned housing developments in the area. Existing settings are close to capacity, including Out of School provision. These places are essential, to meet the needs of working families
HA9 Locksheath Rd (70 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed
HA10 Funtley Road Sth (55 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed

<p>FTC 1 (20 dwellings) FTC 2 (100 dwellings) FTC 3 (120 dwellings) FTC 4 (94 dwellings) FTC 5 (49 dwellings) FTC 6 (45 dwellings)</p>	<p>The plan does not indicate the provision of childcare facilities. These are generally small developments in dispersed locations; however collectively they create 428 dwellings in the Fareham Town Centre Area. A new Full Day Care nursery offering approximately 50 places has opened in Fareham Town Centre which may relieve the pressure on places in the area. The impact of new housing on childcare sufficiency in Fareham Town Centre will need to be closely monitored by SFYC.</p>
<p>Planned developments with less than 50 dwellings (HA12,HA13,HA15,HA19,HA22, HA23,HA24,HA26,HA27,HA28, HA29,HA30,HA32,HA33,HA34,HA35,HA36, HA37,HA38,HA39,HA41)</p>	<p>These are smaller developments in dispersed locations. Depending on the housing mix and age demographic of the residents any generated demand can most likely be accommodated in existing provision.</p>

8. Contact

Hampshire County Council's Children's Services can be contacted to discuss any support requirement in selection of appropriate high quality early years and childcare providers or any aspects of the regulation and legislation requirements.

The childcare and early years education development team can be contacted via childcare@hants.gov.uk

Links to documents that may support design of childcare buildings:

Fareham Borough Council Local Plan (Reg.19) Proposed Submission Version Consultation

Hampshire County Council Response – 18 December 2020

Hampshire County Council does consider the local plan to be sound and legally compliant. The County Council welcomes the opportunity to respond on this consultation and sets out its comments firstly on the Transport Assessment and then on specific local plan policies in its capacity as the local highways authority, local education authority and in its role as an adult services provider with a focus on specialist care.

The County Council then sets out its comments on specific site allocations in its capacity as the local highway authority, local minerals and waste planning authority and also as the local education authority with responsibility for school place planning.

Policy HA2: Newgate Lane South (removal as a housing allocation)

Hampshire County Council is the Local Highway Authority (LHA) for all roads in Hampshire except for motorways and trunk roads and the LHA response is concerned with the potential highway and transportation impacts of the land use proposals set out by the borough council on the local road network. HCC's primary concern as highway authority is the efficient use, management and maintenance of the local highway network. Ensuring that all new development mitigates its impact on the Hampshire network is the function of the highway authority.

The LHA submitted comments in December 2017 and February 2020 in response to the draft local plan regulation 18 consultations. As part of both responses the LHA submitted an objection to policy HA2 (Newgate Lane South). This objection is not resubmitted due to the removal of policy HA2 as an allocated housing site from the revised development strategy in the Publication Plan.

Transport Assessment

At the time of the previous draft local plan consultation in January 2020 the evidence base did not include a completed Transport Assessment (TA) to replace the interim TA published in support of the 2017 draft local plan consultation therefore the local highway authority submitted a holding objection. The TA has now been finalised and forms part of the Publication Plan evidence base.

The LHA supports the methodology used by FBC in preparing a borough-wide TA and the use of the strategic model known as the Sub Regional Transport Model (SRTM) to assess the wider transport impacts of the strategic disposition of proposed development across the Borough.

The Fareham Local Plan - SRTM modelling report (2020) sets out the Baseline, the Do minimum (with local plan development) scenario and the Do Something (with mitigation) model runs and forms part of the transport evidence base. As part of the strategic transport modelling the LHA understands that a total of 2,150 dwellings was attributed to the proposed Strategic Growth Areas (SGAs) and included in the Do minimum scenario. This means that the strategic modelling was carried out using a higher housing number than is currently proposed in the Publication Plan. The LHA recognises that the strategic modelling with the higher housing number represents a worst-case scenario and that the limitations of the SRTM do not allow for localised impacts at junctions to be attributed to specific development sites. Consequently, it is not possible for the SRTM to isolate the transport impacts of the SGAs on the highway network. Therefore, the LHA accepts the outputs from the strategic modelling report and has not requested an additional model run of the SRTM to reflect the removal of the two SGAs and subsequent lower housing number.

The SRTM modelling report indicates that the incremental impact of all the site allocations including the SGAs is forecast to affect links and junctions across the highway network and particularly along the A27 corridor through Fareham borough. The future resilience of the A27 corridor is a concern for the LHA which is why the LHA is undertaking a transport study for the A27 corridor which the County Council will seek to adopt as future strategy. The strategy will seek to incorporate a multi modal approach that facilitates a modal shift away from private car use. Future transport assessments of development sites along the A27 corridor should take this into account and have regard to the emerging transport strategy.

A key aspect of the A27 corridor strategy will be the application of the 'Link and Place' approach to street planning and design. This approach recognises a street functions as both a link (that is movement by all modes of transport including pedestrians) and a place (destination in itself) and will help determine policy priorities between competing users with a greater emphasis on the function of places. This 'link and place' approach is being developed as a Hampshire County Council policy which will be fully imbedded in the next Local Transport Plan for Hampshire (Local Transport Plan 4).

The TA assessed the cumulative impacts of the site allocations and demonstrates that the significant transport impacts of the local plan development on the highway network can be mitigated through proposed highway interventions. The TA specifically highlights the junction at Parkway/Leafy lane which is north of the M27 junction 9 and serves the Whiteley business estate in the adjoining district of Winchester City Council. The Parkway/Leafy Lane junction is predicted to be significantly impacted by local plan development traffic (with long queues along Leafy Lane) and meets the criteria for requiring mitigation.

However, this junction does not warrant a Do Something mitigation scheme for increased junction capacity. This is because the Leafy Lane arm of the junction leads to a residential area with a 20mph zone reinforced by vertical speed reduction measures. The policy approach by the LHA is to reduce rat-running along Leafy Lane between

Fareham and Whiteley. Therefore, an alternative highway scheme which strengthens the current situation of suppressing flows along Leafy Lane should be the mitigation scheme to be taken forward. The LHA will need further discussions with both Fareham Borough Council and Winchester City Council to establish the form of any mitigation scheme if it is required.

The Do Something modelling for the TA proposed five mitigation schemes for increased junction capacity and modelled only the highway impacts of increased motorised vehicle traffic. There are other solutions for mitigating the transport impacts from local plan development which are more in line with the emerging policy agenda on decarbonising transport from Government and Hampshire County Council. These mitigation options would generally follow a sequential approach to assess their impact on the local road network and the role they can play in traffic reduction and reducing transport emissions starting with measures to avoid the need to travel, active travel measures, public transport (SE Hampshire rapid transit) and finally localised junction improvements. This wider and sequential approach to mitigation will need to be applied to all site-specific transport assessments.

Development Strategy

The LHA acknowledges that the Publication Plan proposes a lower housing number than in the previous draft local plans. This lower housing number is in response to a lower level of housing growth proposed by Government in its consultation in August 2020 on a new standard methodology for calculating the annual housing need. The LHA recognises that FBC need to await the outcome of the Government's consultation before the Publication Plan with the lower housing number can proceed to adoption in line with the FBC's revised Local Development Scheme (September 2020).

The consequence of a reduced housing number is a change to the development strategy and the removal of several housing sites. The LHA supports the removal of housing site HA2 Newgate Lane South. The LHA submitted an objection to policy HA2 in the previous draft local plan consultations.

The LHA also supports the removal of the Strategic Growth Area policy from the Publication Plan. The South of Fareham and North of Fareham Strategic Growth Areas were included in the draft local plan consultations and the LHA submitted a holding objection.

Climate Change

Fareham Borough Council as Local Planning Authority has a legal duty to help meet the requirements of the Climate Change Act 2008. The LHA wishes to be reassured that the borough Council has satisfied itself that the Publication Plan goes far enough in supporting the Government and Hampshire County Council policies on climate change that have emerged during the local plan preparation process. This is in view of the Hampshire County Council's recently adopted climate change strategy and targets to be

carbon neutral by 2050 and resilient to a two degree rise in temperature. For Hampshire to meet these targets, which are in line with Government legal requirements, land-use planning and transport policies at the local district level need to play a strong role and are likely to be most effective at the plan making stage.

The LHA acknowledges the transport evidence submitted in the Strategic Transport Assessment which shows how the traffic impact of the local plan development can be mitigated in traffic and transport terms. The LHA wishes to see demonstrated how the local plan proposals, in relation to transport and how we travel, will contribute to the longer-term goal of achieving carbon neutrality and building resilient networks and systems.

Strategic Policy CC1: Climate Change

The LHA supports the amended climate change chapter and strategic policy CC1 however the supporting text needs more detail with reference to the County Council's adopted Climate Change Strategy (2020) and targets including the resilience of the highway network.

Policy NE8: Air Quality

The local plan correctly identifies road transport emissions as the main source of air pollution which is relevant to the County Council's responsibilities as both highway and public health authority. The LHA supports the local plan commitments to reduce, minimise and mitigate road transport emissions and their impact. However, the Air Quality Policy NE8 needs to be more specific and should be amended to include the policy text 'development should deliver sustainable transport (public transport, walking and cycling) as part of improving air quality'.

Policy TIN1 Sustainable Transport

Given the connection between transport, local plan allocations, air quality and health, there is a lack of commentary or cross reference on air quality management within the Transport Chapter. For example, the supportive text needs to make clear how the transport policies (such as Sustainable Transport TIN1) contribute to both the climate change objectives of reducing CO2 emissions and to the air quality objectives of reducing air pollution.

The LHA recommend amending policy TIN1 on Sustainable Transport to make direct reference to the role of sustainable transport in improving air quality. The supporting policy text also needs to refer to the Air Quality Management Areas / Clean Air Zone designation (on sections of the A27 and A32) and the Air Quality Action Plans in place due to concerns over nitrogen dioxide levels caused by road traffic. Likewise, the Air Quality section needs to refer to the transport chapter and policies and the role they play in mitigating the transport impacts on air quality.

The Transport chapter needs to refer to the Strategic Transport Assessment and the impacts of the local plan traffic on air quality in particular air pollution from the M27, the A32 and A27. This should be cross-referenced with the air quality work carried out as part of the AQMAs and the local plan Sustainability Appraisal. The LHA supports transport mitigation measures of sustainable and active travel modes as an alternative to making private vehicle trips which help overall to reduce emissions harmful to human health and the environment. The LHA would not support any transport mitigation measures which threatened to undermine the success of the current Air Quality Management Areas.

The Transport chapter needs to strengthen the commitment to deliver high quality walking and cycling facilities with reference to the Government's new cycle infrastructure design guidance in Local Transport Note 1/20. Reference to cycle infrastructure design should also be included in the Design chapter.

To contribute to reducing car use, opportunities for enhancing and encouraging active travel to and from school should be encouraged and implemented working closely with Hampshire County Council Children's Services and Highways Departments. The County Council will require the provision of safe walking and cycle routes to schools and existing routes to be enhanced where necessary to improve walking and cycling numbers. Contributions from developers will be sought where necessary including for the production and monitoring of school travel plans (STP's).

Policy TIN3: Safeguarded Routes

The LHA supports the new policy TIN3 Safeguarded routes in relation to delivering bus rapid transit in Fareham and Portchester. However, the supporting text should refer to the future extensions of the SEHRT network to the west of Fareham towards Segensworth, Swanwick Station, Whiteley and the North Whiteley major development area and to serve the Solent Enterprise Zone at Daedalus and adjacent coastal settlements.

Strategic Policy R4 Community and Leisure Facilities

Hampshire County Council Children's Services consider that it is important that the impact of additional housing is assessed and where necessary developer contributions are provided to provide additional childcare places either through on-site facilities or the expansion of nearby provision. The impact will be assessed on a case-by-case basis.

The County Council also provides an Early Years guidance note on this issue for the Borough Council to consider in their plan making in relation to the future need and housing allocations.

Strategic Priority 8

Hampshire County Council Adult Services welcome the reference to affordable housing and the need to address the specific needs of different groups in the community, including the elderly and people with disabilities. However, it is recommended that reference is made to the need to meet a range of housing needs, including those in need of affordable housing and those in need of specialist housing including the elderly and people with disabilities in Strategic Policy H1: Housing Provision.

Consideration should also be given to whether opportunities are available to encourage specialist housing provision in specific site allocations.

Policy HP 5: Affordable Housing

The County Council recommend that Policy HP5 or the supporting text should encourage the provision of housing to meet a range of needs, including specialist housing to meet older persons' needs (such as extra care housing) and those with disabilities.

Policy HP7: Adaptable and Accessible Dwellings

The County Council notes that the Specialist Housing Topic Paper includes reference to the low cost of providing homes to above base accessibility standards. Although there is a correlation between age and mobility, people of all ages may have some mobility impairment, either permanently or temporarily.

The proposed percentages of housing the policy requires to be built to higher accessibility standards is modest and given the rate at which the stock is added to each year it will be a very long time before a significant supply of accessible housing is available in the Borough. With such modest levels of provision, the likelihood of a person who develops mobility impairment will find themselves in a home that can meet their needs is low. Adopting a requirement for a larger proportion of the stock to be built to Cat2 standards in particular would better meet individuals' changing needs and support the creation of sustainable communities by reducing the need to move to find suitable accommodation.

Policy HP 8: Older Persons and Specialist Housing Provision

The inclusion of an enabling policy is welcomed by the County Council; however it is recommended there is specific mention of specialist provision of affordable housing, including extra care housing and housing for those with disabilities. It is noted that specific housing allocations are made only in respect of sheltered accommodation (Policies HA42 / 43 /44). The County Council consider that these sites may also be suitable for other forms of specialist housing, including extra care housing and housing for those with disabilities. It is recommended those policies are amended to reflect this.

The County Council supports the opportunity for exception type development in specific circumstances in this policy and Policy HP6.

Housing Site Allocations

The County Council has considered the housing allocations in its capacity as the local highways authority, local education authority and local minerals and waste planning authority and provides the following commentary.

An initial assessment of the impact on school place planning has been considered based on the level of housing identified, and details are highlighted below for specific sites where there will be an impact on the supply of local school places at primary, secondary and education for pupils with Special Educational Needs and Disabilities (SEND).

The County Council as the local minerals and waste planning authority is pleased to see that some of the comments regarding mineral and waste safeguarding, from the Regulation 18 consultation, have been considered and included within the Regulation 19 proposed submission document. Within the County Council's Regulation 18 response a list of sites that were deemed to require a Mineral Resource Assessment as part of any potential application was provided. It is noted that all the allocated housing sites that the County Council made such comments on have been removed from the Proposed Submission Document as being no longer available or no longer suitable.

Housing Allocation Policy HA1 – North and south of Greenaway Lane – 824 dwellings

The development of 824 dwellings will create additional pressure for school places locally at primary, secondary and special schools. It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement j.

Housing Allocation Policy HA3 – Southampton Road – 384 dwellings

The identification of the need for developer contributions for education and ensuring safe walking/cycling routes to local schools are provided, is welcomed.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement k.

Housing Allocation Policy HA4 – Downend Road East, Portchester – 350 dwellings

It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirement j, that the site will require a Minerals Assessment prior to any development. The County Council would also like to bring to the Borough Council's attention that this allocated housing site sits within the safeguarded buffer zone of Warren Farm and Down End Quarry, a safeguarded waste site operated by Veolia Environmental Services (UK) Plc.

The safeguarded buffer zone is informed by the safeguarded sites list as defined through 'Policy 26: Safeguarding - waste infrastructure' of the adopted Hampshire Minerals and Waste Plan (2013) (HMWP). The purpose of this policy is to protect current and potential waste sites from pressures to be replaced by other forms of development, including through 'encroachment' where nearby land-uses impact their ability to continue operating.

It is often the case that appropriate buffers and mitigation measures can make potential nearby development compatible. Any mitigation measures would need to be undertaken by the proposed non-minerals or waste development (i.e. the allocated housing development) and reduce potential impacts to and from the safeguarded site to levels that would ensure the safeguarded site could continue its intended waste use.

Usually, the mitigation measures would need to focus on impacts such as noise, dust, visual impact, odour and traffic movements. They can take a variety of forms, including landscape design, tree planting, barriers, building design and orientation and use of different building materials.

The appropriate mitigation measures are best informed through direct discussions with the operator of the safeguarded site as they will be most be aware of operational requirements. However, the County Council is also available for further discussions, as well as facilitation, if required.

With regard to the above site, the County Council would therefore request further wording be added to the site-specific requirements of allocated housing site HA4 as set out below:

“the provision of evidence that the safeguarded site has been considered within any forthcoming planning application, how operator comments have been taken into account and what impacts these comments have had on the proposed development design. Details of any mitigation measures chosen as a result of the analysis should also be included with an application for the site”.

In the unlikely event that it is not possible to agree appropriate mitigation measures, the County Council would seek evidence that the waste management capacity can be relocated or provided elsewhere and delivered.

Housing Allocation Policy HA9 - Heath Road

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council’s data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement g.

Policy HA2: Newgate Lane South

The County Council as local highway authority supports the removal of policy HA2 Newgate Lane South.

Strategic Growth Area

The County Council as local highway authority supports the removal of the Strategic Growth Area policy.

Employment Allocations

The County Council has considered the employment site allocations in its capacity as local minerals and waste planning authority and provides the following commentary.

Policy E2 - Faraday Business Park

Whilst a number of the allocated housing sites have had site-specific requirements added to them for Minerals Assessments, allocated employment site E2 - Faraday Business Park has not had any added. In line with the County Council’s Regulation 18 response to the local plan consultation, the County Council again request that a site-specific requirement be added to this allocated site policy so that any forthcoming planning application would need to be accompanied by a Minerals Resource

Assessment. The County Council recommend adding the following site-specific wording: The site is within a Minerals Consultation Area. Minerals extraction may be appropriate, where environmentally suitable, subject to confirmation of the scale and quality of the resource.

The County Council would like to take this opportunity to reiterate that any development or significant redevelopments of land may impact mineral resources. As minerals can only be worked where they are found, it is important that viable mineral resources are 'safeguarded' (protected) from needless sterilisation by other development to help to secure a long-term future supply of minerals. Mineral resources are necessary for a vast array of construction activities and their availability is a prerequisite for any housing development. As such, the NPPF requires planning authorities to define Minerals Safeguarding Areas and adopt policies so that, 1) known locations of mineral resources of local and national importance are not needlessly sterilised by non-mineral development, 2) if it is necessary for non-mineral development to take place, the prior extraction of minerals, where practicable and environmentally feasible, is encouraged.

1) Policy: H1 - Housing Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The plan is not sound because housing allocation policy HA4 (Downend Road East) is not positively prepared. It does not meet the requirements for supporting infrastructure in line with the transport policy. The latter requires an efficient transport network (para 10.1) which facilitates management of network congestion to help achieve consistent journey times (10.3). While policy HA4 outlines plans for improved cycling/pedestrian routes, associated with the large block of proposed new housing, it fails to address the actual geographical context of the area in question and the known severe traffic bottleneck that already exists at peak times at the Downend road/A27 junction, before any development has even taken place. A key underlying problem is the relative isolation of the site, both from major shopping opportunities (Portchester is very limited) and from employment locations, such that use of public transport adds significant commuting time penalties. As a result, a high level of vehicle usage can be expected. When this is added to the large number of planned houses, and the current single planned vehicular exit from the site, onto an already very congested road (Downend Road), the resulting daily delays will be intolerable and the required transport efficiency criterion cannot be met. Multiple planning applications by developers have already been rejected as a result of the failure to address the access and traffic delay problems satisfactorily, and in the face of numerous evidence submissions from local residents (including myself) about the extent of the traffic problems that already exist. Unfortunately, the current Local Plan proposals offer little beyond that which developers have previously proposed, other than vague promises about future improvements in bus rapid transit. Neither the Plan nor developers seem willing to admit that much more substantial, and costly, infrastructure improvements will be needed to make this particular housing development feasible from a traffic management viewpoint, e.g. by creating a second new vehicular exit to the east of the site. Making major and lasting improvements to the traffic flow down the A27 to the Delme Roundabout and on into Fareham, would, in my view, require very substantial infrastructure expenditure at a level that neither the Borough nor Hampshire County Council seem willing to contemplate. Yet at the same time, both are willing to countenance major new housing developments that would add still further to existing traffic congestion, excessive road noise and potentially illegal air pollution levels.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Extensive further investment in road infrastructure to improve access to the HA4 (Downend Road East) from the eastern end of the site and to address knock-on increases in traffic on Downend Road and along to the Delme roundabout and beyond.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

They would enable traffic congestion to be reduced such that efficient and reliably timed traffic movement was possible, even at peak times.

Your suggested revised wording of any policy or text:

add sub-sections iv and v to section L of policy HA4, as follows : iv) create a vehicular road outlet to the east of the site to relieve congestion at the western end (Downend Road) v) re-design the Delme roundabout area to improve traffic flow - this may involve major engineering works, such as new flyover construction with noise mitigation measures

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Date: 18/12/2020

Dear Sir or Madam

Regulation 19 Local Plan Consultation

Thank you for consulting Historic England on the above document. Our main comments are set out in Appendices 1 and 2 to this letter.

Appendix 1 deals with all policies we wish to make comment on, excluding site allocation policies. Site allocation policies are located in Appendix 2. Appendix 3 is the same set of comments in Appendices 1 and 2, The official forms do not appear to be editable, so we have not used them.

We do not consider our appearance to be necessary at examination on any of the points we have raised, however, we would be happy to attend, should the Inspector request this.

Yours faithfully

Edward Winter

Historic Environment Planning Adviser

Historic England, 4th Floor, The Atrium, Cannon Bridge House, 25 Dowgate Hill, London EC4R 2YA

Appendix 1: Table of Historic England’s detailed comments on the Fareham Regulation 19 Local Plan Policies (excluding site allocations: see Appendix B for site allocations)

Policy/section	Soundness/legal compliance/DTC	Comments	Suggested change
Vision, strategic priorities	Not sound.	We welcome the reference to the continued protection of heritage in the vision, and strategic priorities 3 and 10. These are important elements of the positive strategy for the conservation and enjoyment of the historic environment, which the plan should demonstrate, as set out in NPPF paragraph 185. However, to be consistent with NPPF, and therefore sound , para 185, in Strategic Priority 10, “historical assets” should be replaced with “historic environment”.	In Strategic Priority 10, “historical assets” should be replaced with “historic environment”.
Policy HP1: New Residential Development	No comment.	No comment.	
Design chapter, Policy D1	Sound.	We welcome the characterisation of well-designed, contextual development that is “responsive to local history, culture and heritage”, and the reference to heritage in criterion (i) in Policy D1.	
Strategic Policy DS3: Landscape	Sound.	We support criterion (f) as part of the positive strategy for conserving and enhancing the historic environment	

Historic England, 4th Floor, The Atrium, Cannon Bridge House, 25 Dowgate Hill, London EC4R 2YA Telephone 020 7973 3700 HistoricEngland.org.uk

Correspondence or information which you send us may therefore become publicly available.

Strategic Policy HE1: Historic Environment and Heritage Assets	Sound.	We support having a strategic policy for the historic environment and heritage assets and welcome its identification in paragraph 1.35, which lists those policies that are considered to be strategic, in line with NPPF paragraph 21. The inclusion of a strategic policy for heritage complies with NPPF paragraph 20.	
Historic Environment Chapter (general approach)	Sound.	We support the approach the Council has taken, to have separate policies for conservation areas, listed buildings/structures & settings, archaeology, non-designated assets and heritage at risk. The separation of each of these asset-classes provides more detailed policy for each of the identified types of asset, which should be more useful to applicants and decision-makers. The detailed policies are supported by the strategic policy, which also references national heritage policy. NB: Fareham has locally listed parks and gardens, i.e. non-designated assets, but has no registered parks & gardens i.e. designated assets.	
Background paper	Sound.	We welcome the background paper as a useful tool in demonstrating that a suitable evidence base has informed the plan, in respect of the historic environment.

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
HA42	Land South of Cams Alders	Not sound	<p>Proposed site allocation H42 is one of three sites proposed to be allocated for sheltered housing, in this case for 60 dwellings, the site being 1.29 hectares in total area. The site allocation plan shows the extent of the scheduled area of Fort Fareham, as well as a 50m buffer around the monument. The site allocation area, is located approximately 70m due north of the monument, at the closest point. The site allocation area extends to the north-east and north-west of this point, with an irregular shape.</p> <p>The whole of the proposed allocation is considered to be located within the setting of Fort Fareham. The setting of the fort has already been significantly compromised by development in its setting, as well as within the monument itself. The northern corner of the monument, where the proposed allocation is located, therefore represents the only significant area that remains free from development, and this would have been part of the field of fire associated with the fort. This area does contain a tree belt,</p>	<p>Change criterion (h) to:</p> <p>“h. Provision of a heritage statement (in accordance with Policy HE3) that assesses the potential impact of proposals on the significance of Fort Fareham and through development in its setting, together with an archaeological assessment (in accordance with Policy HE4) and a scheme of mitigation to off-set any harm to the setting of the monument.”</p>

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>which, through blocking the field on fire, also compromises the setting, but as this is not development, we consider this is something that has the potential to be reversed at some point in the future.</p> <p>The allocation text or plan does not make clear to what extent the allocated area would be built upon, but with a stated capacity of 60 dwellings on a site of 1.29 hectares, we presume that no significant areas of the site would be left undeveloped. Therefore it is likely that the proposed development will affect the significance of the monument, through development in its setting.</p> <p>The NPPF states that “[heritage] assets are an irreplaceable resource, and should be conserved in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of existing and future generations” (184), and that “great weight should be given to the asset’s conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>substantial harm, total loss or less than substantial harm to its significance” (193). “Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting), should require clear and convincing justification” and “scheduled monuments are considered to be assets of the highest significance” (194).</p> <p>The NPPF also states that “significant adverse effects on [any of the sustainability] objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered) (32).</p> <p>We recognise that the site allocation requires a heritage statement and this is welcome.</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>In the SA of the publication version of the plan, the main reason for the site selection seems to be based on location: the SA asserts that demand for sheltered housing is most likely to occur in Portchester and Fareham South. Presumably, no other suitable sites are suitable, in terms of location (if other sites were available that do not cause significant adverse effects on a sustainability objective, following NPPF para 32, Land South of Cam Alders should not be allocated). However, given that the impact of the proposed allocation is recognised as ‘negative’ in the high level assessment result, in the historic environment objective, the policy should reflect the NPPF requirement to mitigate, as set out in para 32.</p> <p>Therefore the site allocation should require a mitigation plan to offset harm to the setting of Fort Fareham. Without this, we consider the policy to be inconsistent with national policy and therefore unsound.</p> <p>In addition to the above concern, the</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>policy is also somewhat unclear in terms of its wording, with regard to “conservation and setting...” and “grade II scheduled monument”. Fort Fareham is not a grade II scheduled monument: this classification does not exist. It is both a scheduled monument, AND a grade II listed building. In such cases, the scheduling take precedence. Describing Fort Fareham as a grade II scheduled monument could give the impression that it is not an asset of the highest significance. The reference to “conservation and setting” is considered to lack clarity. We suggest criterion (h) is amended as suggested below, to account for all three of our concerns. Without amendment, we consider the policy to be inconsistent with national policy and therefore unsound, for each of the three reasons we cite.</p> <p>“h. Provision of a heritage statement (in accordance with Policy HE3) that assesses the potential impact of proposals on the significance of Fort Fareham and through development in</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change

1) Policy: DS1 - Development in the Countryside

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

We were promised that all houses in the borough would have a paper copy of the plan delivered. This has not happened. No one in our road has had one delivered, and I cannot find anyone in the local area who has had one delivered either, except for one road who complained about not getting any, and then they were delivered. If you do not have a computer, use one, or have access to one, then you are put at a disadvantage to find out what is going on. A few weeks ago, the leaflet for Christmas bin collections was delivered by hand to all houses, so the council can do this delivery, and that would have been an ideal time to deliver the new plan information at the same time. I believe that FBC is deliberately trying to keep people in the dark on this, to try and cut down on the number of objections which it could receive about the plan.

Today is the 18th December 2020, which is the last day for comments. No one in this area has yet had a paper copy of the plan delivered, except for the one road which requested it. How are the majority of the residents supposed to know what is proposed? Is the council trying to keep this quiet? Also this week the government has revised it's housing allocation plans, yet again. Is the number of proposed houses, still the same, or should FBC start again with a different number of houses to reflect the changes?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Not to talk about not building in the countryside, and than to propose to do just that.

Check facts

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Truth

Correct number of houses

Your suggested revised wording of any policy or text:

FBC says that there are no housing developments proposed for Portsdown Hill. No. 3.9 Yes, there is site HA4, land to the east of Down end Road. It cannot have it both ways. On the map, figure 3.1 it clearly shows that this site is in the countryside. It says that Portsdown Hill is an area of special landscape quality, so should not be built on. This area has already been turned down three times by the planning committee of FBC on the grounds of unsafe access into the site across Down end Bridge. Latest application being P/20/0912/OA. Section 3.29 says that we need to protect the countryside from large scale development. 350 houses is large scale. Again FBC cannot have it both ways. Section 3.52 says that chalklands are an important component in the landscape of the north east of the borough around the southerner scarp face of Portsdown Hill This is exactly where site HA4 is. numbers

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

2) Paragraph: 3.9

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

In general terms this talks about development sites which should maximise development within the urban area, and away from the wilder countryside, respect the valued landscapes and spaces which contribute to settlement definition. No 3.9 says that there no development allocations in these areas, which includes Portsdown Hill. It goes on to say that planning should recognise the beauty of the countryside, and that Portsdown Hill is of special landscape quality. Land to the East of Down End Road, site HA4 is proposed for 350 houses, and this is definitely on Portsdown Hill. This site has already been turned down by FBC planning committee three times now, on the grounds of lack of safety of pedestrian and traffic over Down End Road Bridge. FBC is trying to say that site HA4 is not on Portsdown Hill, yet it is. Trying to have it both ways to suit their purposes. Latest application to be turned down was P/20/0912/OA

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Give everyone a paper copy of the plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Not to contradict facts

Your suggested revised wording of any policy or text:

Not to contradict facts

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Paragraph: 3.1

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Figure 3.1 quite clearly shows site HA4 to be in the countryside, yet the report says that there are no development allocations in these areas. Site HA4 is on the slopes of Porstdown Hill, and outside of the urban area and settlement boundaries. Council is trying to have it both ways, just to get their umbers up. The railway line is a very clear boundary.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Give everyone a paper copy

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Tell the truth about where the countryside starts

Your suggested revised wording of any policy or text:

Most of what is written about Portsdown Hill is misleading, as it talks a lot about the northern side, which is completely irrelevant, as most of that is in Winchester's area.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent details:

Title:	Mr
First Name:	Mat
Last Name:	Ananin
Job Title: (where relevant)	[No Reply]
Organisation: (where relevant)	[No Reply]
Address:	
Postcode:	
Telephone Number:	
Email Address:	

1) Policies map: HOUSING ALLOCATIONS (HA1, HA3-4, HA7, HA9-10, HA12-13, HA15, HA17, HA19, HA22-24, HA26-44)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

HA4 allows 350 new home with a single road access to services. The road is already heavily congested and the pollution during peak times must be a threat to the children living locally and attending the local school. There is no access to any local shops within reasonable walking distance which will force new residents to use vehicles. There is no access to any public transport either. This is a poorly thought out location for the volume of properties requested.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reduce the volume of builds. Remove the single developer allowing more self builds meaning a nicer array of different property types.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Increase the means of access for vehicles. A single congested point is not sufficient. Invest in on site infrastructure such as medical, dentistry and provisions.

Your suggested revised wording of any policy or text:

No longer part of the plan.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Keely, Lauren

Subject: RE: Winnham Farm (E of Downend Road) planning application

Follow Up Flag: Follow up
Flag Status: Flagged

Hi

This was in response to a specific planning application (Downend P/20/0912/OA), however, looking at the Local Planning Consultation, I do have some comments.

1. Very comprehensive and detailed! Apologies if some of my points below are explicitly addressed, however my time is limited to review the document(s).
2. General comment – it is feared by many in the area that while applications may be approved, once built they will not perform to expectations. I suggest that contracts include a significant/punitive element of retention – if the promised benefits (some or all) are not realised, that retention is used to address the problems that have been introduced – either by the responsible agents/contractor(s) or their replacements.
3. Where is linkage with National policies –
e.g. 1.47 – key reason that Fareham Shopping Centre is dying is that business rates are too high – and these are not managed by Fareham Council.
4. 2.6, 2.10 Ambience in Fareham is getting visibly worse with obvious drug abuse, begging and the dying shopping centre. What are the actions/timelines to address these?
5. 3.4 Good Growth – This should not allow high volumes of traffic through/adjacent existing housing – access by local residents (particularly peak times 0830-0930, 1630-1800), pollution, noise.
6. 3.42 I watched recent proceedings for Downend Planning Application P/20/0912/OA. There was little credibility with the councillors for the traffic modelling provided (I.e. they didn't believe what was being presented).
What can be done to ensure the analysis stands up to the real world situation under proposal? I also am not convinced they model accurately for peak traffic combined with bad weather (0830-0930, 1630-1800) when traffic is at it's worst - everyone using their cars instead of walking/cycling/public transport. We live in the UK and it rains a lot, so don't assume a balmy summers day for the analysis!!
7. 3.9 – I understand that currently there is no limit on the number of appeals that can be made for a development – can this be reduced to a reasonable number, e.g. 3 to avoid abuse, nuisance and fatigue of the process?
8. 4.4 – why should Fareham be responsible for another organisations Unmet Need? This creates additional pressure in the area, which is not desirable.
9. 4 - Interesting that Cams Golf Course not considered for development – good location for motorway, although similar traffic issues compared to Downend.
10. 7.8 – diverse night time choices – significantly reduced if developments from Railway station to Osborn Road are put in place.
11. 9.98 – In addition to Air quality (risk to life, e.g. Ella Kissi-Debrah death due to traffic pollution), what about other Quality of Life indicators – resultant heat/cold, humidity, moisture loss (air, soil) noise, traffic volumes?
12. Figure 9.2 – there should be an AQMA for A27/Downend/Motorway roundabout.
13. 10.6 – ensure REALISTIC expectations of sustainable transport. Experience is that projections are optimistic, leaving the residents to live with the resultant mess afterwards!
Ensure older population (e.g. 80 year olds) is explicitly addressed – lower mobility (up and down hills), shorter walking distances, lack of car, timely access to public transport, access to emergency support/vehicles.
14. 11.64 – what about garden space minima? Car Parking? Cycle Parking? Electric Charge Points for cars?

I look forward to your responses.

Regards
Nick Millett

Subject: Winnham Farm (E of Downend Road) planning application

Dear sir

I am pleased that outline planning has again been rejected for Winnham Farm (E of Downend Road). However this was only rejected through the casting vote of the chairman.

Bearing in mind the likely traffic chaos (both during building phase and afterwards) for school children, cyclists, pedestrians and drivers as well as the resultant air pollution and impact on quality of life for local residents (ref recent High Court confirmation of death of a London child Ella Kissi-Debrah due to traffic pollution) - Is there any way that the appellant can be limited to a finite number of appeals?

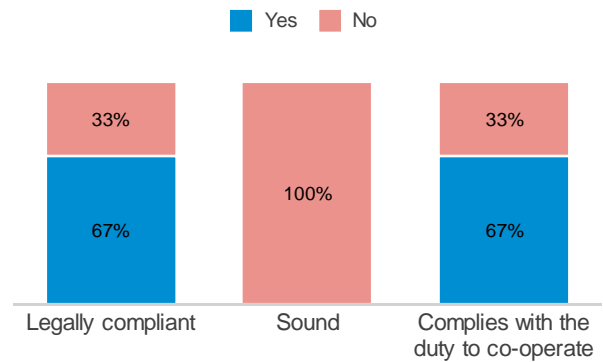

Please can resident's quality of life, air quality, traffic noise/pollution exposure be resubmitted as part of the discussion (since the only issue currently under discussion is the rail bridge's ability to handle traffic). At least as important is the health and quality of life for residents in the Downend area – as well as those who might live in the proposed development.

Regards
Nick Millett

Housing Allocation Policy HA4 (h) states that: 'The design of the development should take into account the close proximity to the waste transfer station with the potential for odour'. In our opinion the policy needs to go much further in directly referencing the Agent of Change principle. This point was made in our previous representation dated the 28 February 2020: In the 2018 National Planning Policy Framework (NPPF) amendments included a more prominent recognition of the 'agent of change principle' which encapsulates the position that a person or business (i.e. the agent) introducing a new land use is responsible for managing the impact of that change. There is no commentary or policy direction referenced in the plan generally or policy HA4, in respect of the agent of change and impact of residential encroachment on existing uses (incl Waste). Encroachment by sensitive development such as housing has the potential to create real issues for the ongoing operations on existing waste sites. While our waste facility has its own environmental controls it is for new applicants, bringing new uses into the immediate area, to establish and provide sufficient evidence there will be no significant issues arising post development (Agent of Change). Veolia can not retrospectively change our operations to accommodate newly introduced sensitive development nor are we required to. This needs to be referenced and explained in the local plan and preferably more formally included by way of a direct policy or policy subtext. The Agent of Change principle could also be defined in any glossary. To confirm we object to housing growth on our site boundaries (Housing Allocation HA4) without these policy safeguards in place as it is not consistent with national policy direction.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

recognition and commentary (which may include a policy amendment) on the Agent of Change principle within the plan generally and more specifically policy HA4.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

by complying with national policy direction (NPPF).

Your suggested revised wording of any policy or text:

For policy HA4 amend (h) to include reference to Agent of Change. Also look to have generally commentary within the plan.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To explain why the inclusion of this requirement is necessary. If a concession/amendment is acknowledged and made prior to any hearing and the inclusions agreed then attendance may not be required.

Respondent: Mr Melvyn Rees (1212-471610)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

I question the overall Soundness of the Proposed Local Plan In a number of areas of proposed housing allocation, there is no evidence of why a particular area has been included. Or in some cases excluded from the previous draft plan. Examples of this are HA4 Land to the East of Downend Road. This proposed allocation has been rejected 3 times, twice by the Fareham Planning Committee and once by the Government Planning Inspector, the grounds for refusal were Pedestrian Safety and Traffic Congestion. Yet like a bad penny up it comes again into the Local Plan, as though someone (the Planning Officers ?) have an obsession about including this site. Where is the Soundness in the Plan for calling up a 3x rejected site. No evidence or explanation given of what makes this Sound Similarly, the proposed development to the Newlands Farm South of Longfield Avenue site has been removed. Again no explanation or evidence of why. This site has good road infrastructure to north, east, south and west , bus services, cycle ways, and in no way impinges on the Fareham/ Stubbington / Meon Strategic gap, as this gap will be cut in two by the Stubbington by-pass. Yet this site has been removed. Where is the Soundness of this decision. Again No evidence to support this decision. Again maybe based on the views of a Councillor or the Planning Officers, but their views without evidence does not make this a Sound Decision

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Show evidence of why sites are included

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Transparency. Show reasons why sites are included or removed. Without transparency and evidence it appears hard to understand the justification.

Your suggested revised wording of any policy or text:

None

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Jonathan Isherwood (1512-371135)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The site allocation HA4 is flawed. It is a giant cul-de-sac with insufficient access. Unfortunately Fareham Planning Department have prescribed principle access via a single country road that goes over Downend Road railway bridge, an ancient narrow bridge that is not suitable for the anticipated traffic demand. A developer has submitted 2no failed applications that have failed due to this recommended route. The planners needs to prescribe alternative primary access. This should be via a new road from the development to the motorway junction. Adopting the local Veola trunk road would be a potential solution. Prescribing Downend Road as the primary access leads developers to presenting unsuitable schemes, given the unsuitability of the railway bridge and the associated traffic/pollution problems on the A27.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Prescribing alternate primary access to the site. Potentially via the Veola trunk road. A secondary access needs to be found to the east of the site. It is absurd that traffic destined for the east of the development would need to take a 1 mile detour to travel less than 0.25 miles

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would help to mitigate the effect on the existing traffic problems currently experienced at the Downend Road

Your suggested revised wording of any policy or text:

"(c). Primary highway access shall be focused on Downend Road; and " should be changed to "(c). Primary highway access shall be focused on a new access road to be provided to J11 of the M27; and"

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Geoffrey Foote (612-71719)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The fact that applications by Miller Homes to build 350 dwellings in this area has twice been rejected by Hampshire CC & also once turned down by HM government inspectorate shows that this area is not suitable for residential development due to insurmountable access issues. I therefore request that this land be removed from the local plan as is already the case with the land to the west of Downend Road

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Removal of the land to the east of Downend Road should be removed from the local plan as is already the case with the land to the west of Downend Road.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would prevent development of this area from unsuitable residential development

Your suggested revised wording of any policy or text:

As above

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Ms Charlotte Mayall (11  491141)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Southern Water is the statutory wastewater undertaker for Portchester. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure. Proposals for 350 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of foul flooding unless the requisite works are implemented in advance of occupation. This would not be consistent with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019), which requires planning policies to prevent new development from contributing to pollution of the environment. In addition, Paragraph 19 of the National Planning Practice Guidance (NPPG) states 'Good design and mitigation measures can be secured through site specific policies for allocated sites [...]. For example, they can be used to ensure that new development and mains water and wastewater infrastructure provision is aligned and to ensure new development is phased and not occupied until the necessary works relating to water and wastewater have been carried out.'

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Our proposed modification would help to ensure the local Plan is sound by ensuring it is consistent with the above national policies and guidance set out in the NPPF and NPPG.

Your suggested revised wording of any policy or text:

In consideration of the above, we recommend the following criterion is added to Policy HA4; 'Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.'

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Dr Alan Hawkins (1712-291147)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The Publication Local Plan online is out of date. It shows the status of this application up to July 2020. Since then a 'new' application by Miller Homes has again been rejected with a suggestion that an appeal would be inappropriate. The reasons for rejection surely indicate that this piece of land should be removed in its entirety from the plan, just as the land to the west of Downend Road has now been removed. This valuable farm land should be classified as protected under the proposed new Government classifications. We are assuming that it remains in the published plan due to an oversight or failure to update and need to alert Fareham Borough Council of the danger that leaving this in the current local plan could lead to it being 'set in stone' and open to 'do as you please' development in the future with absolutely no say either by local residents or Fareham Borough Council.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Bring it up to date with latest status.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

it would bring it up to date, as currently it is incomplete.

Your suggested revised wording of any policy or text:

Remove HA4 entirely from the Plan.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

- 4) Rookery Farm: Phase II Geo-Environmental Site Assessment 2018

1.0 INTRODUCTION AND SUMMARY

1.1 Southern Planning Practice are instructed by Raymond Brown Minerals & Recycling Ltd (Raymond Brown), to submit representations to the Regulation 19 version of the Fareham Local Plan 2037. Raymond Brown is acting on behalf of the two landowners, Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd (please see attached land ownership plan).

1.2 Raymond Brown is part of the Raymond Brown Group, a leading recycling and waste management business and distributor of primary and recycled aggregates for use in construction applications. One of their sites is at Rookery Farm, Fareham. The land is located immediately north of the M27 motorway and to the west of Whiteley. Access is from Botley Road, approximately 100m north of the bridge over the M27.

1.3 The Local Plan, as drafted, is assessed to be UNSOUND and also fails to comply with the Duty to Co-Operate. These representations set out the reasons why: -

1. the Plan is considered to be UNSOUND and
2. fails to comply with the Duty to Co-Operate

and sets out the steps that require to be taken to make the Plan SOUND.

1.4 Separate representation forms have been submitted against each policy and paragraph which is considered to be UNSOUND, but the case to be made is set out in full in this document.

1.5 In summary, OBJECTION is raised to Strategic Policy H1 Housing Provision on the grounds that the figures promoted are not soundly based or justified. This is addressed in detail in Section 2.0. Objection is also raised to the allocation of a number of the housing sites in that they are not suitable, and /or available and/or achievable, particularly within the Local Plan period. This is addressed under Section 3.0.

1.6 Section 4.0 sets out why Land at Rookery Farm should be allocated as a Housing Site to start to address the issues identified in Sections 2.0 and 3.0. Section 5.0 draws these matters together with consideration of modifications that are required to be made to the Plan

to ensure that it is SOUND and will provide a sound planning framework to deliver the much needed housing over the Plan Period.

- 1.7** It is concluded that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.
- 1.8** Objections are therefore raised to Policies H1, FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13 and the omission of an allocation for housing for Rookery Farm, Botley Road, Fareham. Objections are also raised to paragraphs 3.19 (including Figure 3.1) as well as paragraphs 4.1 – 4.20 including Tables 4.1, 4.2 and 4.3.

2.0 OBJECTION to Strategic Policy H1 – Housing Provision

Overview

2.1 The objections to this Policy are several and are addressed individually below. The individual and cumulative failings render the policy UNSOUND and as Strategic Policy H1 forms the basis for the provision of much needed housing across the whole Borough, it follows that the whole Plan is rendered UNSOUND. It should be noted that although the issues have been subdivided into several sections, many of the issues interrelate and cumulatively exacerbate the conclusions drawn that the Council is failing to provide properly for its housing need.

2.2 The objections to this Policy include:

- (i) The Housing Numbers used and in particular the reliance on the draft Standard Method set out in the Changes to the Current Planning System in the Government’s White Paper;
- (ii) Duty to Co-Operate and Unmet Need – Fareham has not undertaken this Duty in a sound manner;
- (iii) Additional factors Contributing to the Shortfall, including the 5 year Housing Land Supply Position;
- (iv) Over-reliance on Welborne to provide a significant proportion of Fareham’s housing which is considered unachievable, resulting in a need for more sites to be allocated;
- (v) Inability to meet the identified Affordable Housing Provision;
- (vi) Over-reliance on Windfall allowance

2.3 Before analysing the approach adopted by Fareham, it is first worth reviewing the clear guidance on the approach to be followed as set out under the National Planning Policy Framework (NPPF) and the Planning Practice Guidance (PPG). It is important to note that the NPPF makes it clear that “*strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas*” (Paragraph 11).

2.4 Paragraph 60 builds on this and states that “*To determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional*

circumstances justify an alternative approach which also reflects current and future demographic trends and market signals. In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.” This clarifies how the housing numbers calculated by the standard method should be considered when preparing a Local Plan. Paragraph: 004 (Reference ID: 2a-004-20190220) of the Planning Practice Guidance confirms that the standard method should be used to calculate a **minimum** (emphasis added) housing need figure.

2.5 In addition to the Borough’s own housing needs, as acknowledged by the draft Local Plan, its housing figure needs to incorporate the needs of neighbouring authorities. Paragraph 35 a) of the NPPF sets out that in order for a plan to be sound it must be positively prepared *“providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs (our emphasis); and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development”*.

2.6 The following sections demonstrate how Fareham has failed to follow this clear guidance with the result that Strategic Policy H1 and the Plan is UNSOUND.

i) **Housing Numbers: Reliance on the Standard Method set out in the ‘Changes to the Current Planning System’ White Paper.**

2.7 The Publication Draft correctly points out at Para 4.2 that *‘Local housing need should be determined by using the Standard Method set out in national Planning Practice Guidance (PPG). This Method currently combines 2014-based household projections with affordability data released in March 2020 to calculate the annual need. Using this method, the housing need for Fareham currently stands at a minimum of 514 dwellings per annum (dpa).’*

2.8 Fareham, however, has chosen to use the new Standard Method set out in the ‘Changes to the Current Planning System’ White Paper, which was published on 6th August 2020 with consultation closing on 1st October 2020.

2.9 Para 4.2 of the Publication Draft explains why the Council has ‘jumped the gun’ and used the draft new Method:

'The Council therefore considers it appropriate for this Publication Local Plan to plan for a scale of growth based on the proposed new Method, and not one based on out-of-date household projections. This reduces the housing need figure to 403 dpa, based on a base date of 2021. The new Method would be introduced with a change to the PPG and the timing of submission of this plan for examination will be determined by the precise wording of the government policy.'

- 2.10** ON 16 DECEMBER 2020, GOVERNMENT ANNOUNCED THEIR RESPONSE TO THE 'CHANGES TO THE CURRENT PLANNING SYSTEM' WHITE PAPER AND PUBLISHED REVISED PROPOSALS FOR ENABLING THE DELIVERY OF MORE HOMES ACROSS ENGLAND. IT IS UNDERSTOOD THAT GOVERNMENT WILL NOT NOW PROCEED WITH THE DRAFT NEW STANDARD METHODOLOGY ANNOUNCED EARLIER IN THE YEAR AND ON WHICH FAREHAM HAS BASED ITS HOUSING NUMBERS. INSTEAD, THE GOVERNMENT HAS ANNOUNCED THAT IT WILL CONTINUE TO RETAIN THE STANDARD METHOD IN ITS CURRENT FORM WITH THE ADDITION OF A 'TOP-UP' APPLICABLE TO ENGLAND'S 20 LARGEST CITIES. PLEASE SEE LINK:

<https://www.gov.uk/government/consultations/changes-to-the-current-planning-system/outcome/government-response-to-the-local-housing-need-proposals-in-changes-to-the-current-planning-system>

- 2.11** It follows that the only basis that Fareham can and should proceed at the current time is to use the existing Standard Method which would result in an uplift in its dwellings per annum (dpa) from 403 to at least 514.

ii) Duty to Co-Operate and Unmet Need from Neighbouring Authorities

- 2.12** Fareham Borough Council is a member of the Partnership for South Hampshire (PfSH). In September 2019, Fareham Borough Council and Havant Borough Council together with all the authorities of the PfSH published a Statement of Common Ground (SOCG). The SOCG sets out how the local authorities in South Hampshire have successfully worked together on strategic planning matters and how they continue to do so. As part of the Local Plan Review, a Statement of Compliance with the Duty to Cooperate has been produced. This is in accordance with Paragraph 24 of the NPPF. This confirms that the Council is proposing to

take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution (Paragraph 4.6).

- 2.13** Fareham Borough Council is identified as being within the Portsmouth Housing Market Area (HMA). The PfSH Strategic Housing Market Assessment (SHMA) indicates an overall objectively assessed need figure of 121,500 dwellings, over the whole PfSH area from 2014-2036. It should be noted that the SHMA was prepared in January 2014 and the identified housing need is not based on up to date figures, therefore its housing numbers are considered to be out-of-date. The SOCG acknowledges that the housing need figures within the PfSH Spatial Position Statement (SPS) (2016) are not in accordance with standard methodology set out in NPPF (2019). The SPS is being reviewed to bring it in line with updated development needs. However, there is no indicative timescale for the SPS review and given the recent Housing White Paper, such a statement is unlikely to come out ahead of the submission of the Fareham Local Plan.
- 2.14** One key issue arising for the PfSH Portsmouth HMA/PfSH East (Portsmouth, Havant, Fareham, Gosport, Winchester) is the challenge of delivering sufficient homes to meet the housing need of the area given the significant geographical constraints and nationally important environmental and landscape designations. It is acknowledged that some authorities within the PfSH East area are more constrained than others. Portsmouth, Havant and Gosport are all physically constrained as well as having coastal environmental designations, to varying degrees. Therefore, as Fareham Borough is less constrained and physically has the space to provide housing in addition to its own need, the Borough should look to accommodate unmet need from neighbouring authorities.
- 2.15** It is acknowledged that Portsmouth cannot meet its housing need and a key role of PfSH has been to consider the capacity of other local authorities in the PfSH area which could contribute to accommodating the unmet need arising from Portsmouth. As acknowledged, Fareham Borough has relatively few constraints compared to its neighbouring authorities, indeed Fareham Borough has been identified as an area which can help to accommodate the unmet need arising from Portsmouth. Paragraph 4.5 of the Publication Plan confirms that Portsmouth City Council have asked Fareham to contribute 1,000 dwellings to their unmet need. It also confirms that there is likely to be an unmet need arising from Gosport and Havant (this is now emphasised in Table 1, if the standard new method were applied). However, Fareham have only included 847 dwellings in the total housing requirement to

contribute to the unmet need of neighbouring authorities. This figure is alone not enough to provide for Portsmouth’s unmet need, never mind the other authorities within the PfSH East area. It is evident therefore that the plan is not appropriately planning for unmet need arising from neighbouring authorities and has not been positively prepared in accordance with paragraph 35 a) of the NPPF. It is therefore unsound.

2.16 The following table looks at the housing need per annum for all the authorities within the PfSH East area. It sets out the current local plan requirement, the average delivery rate over the last 3 years, the housing figure under the current standard methodology and the housing figures under the proposed new standard method set out in the August 2020 consultation ‘Planning for the Future’ White Paper. It should again be noted that Fareham Borough Council are using the housing need figure calculated by the proposed new standard method set out in the White Paper, not the current standard method required by the NPPF.

PfSH East	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard method	Proposed new standard method (at August 2020)	Change in housing requirement under SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1,025	+333
Total	1,804	1,828	2,802	3,430	+628

Table 1 – Housing need per annum and delivery rates for authorities within PfSH East

2.17 It is also pertinent to note that whilst Fareham has chosen to adopt the draft new Standard Methodology for its own figures, it has not acknowledged the implications arising in terms of the Duty to Co-operate and that there is a significant uplift overall in the housing requirements, including for those authorities potentially already struggling, including Havant and Gosport.

2.18 In Summary:

- No Local Authority in the PfSH East area is currently planning for enough homes to meet their identified need.
- Whilst the housing need as calculated by the proposed new standard method (August 2020) for Portsmouth and Fareham has slightly reduced from the current standard method, the housing need for Gosport, Havant and Winchester has significantly increased. This has resulted in an increase of just over 600 dwellings per annum in the PfSH East area.
- No Local Authority in the PfSH East has been able to deliver their housing need as required by the current standard method in the last 3 years.
- The total housing need in the PfSH East area under the proposed new standard method is far higher than the previously identified housing need.

iii) Additional Factors affecting Fareham's Housing Numbers

2.19 Table 1 (Housing need per annum and delivery rates for authorities within PfSH East) confirms that no Local Authority in the PfSH East area has been able to deliver their housing need as required by the current standard method in the last 3 years. There could be several explanations for the authorities not meeting their housing need including reliance on large sites not coming forward or delivering at the rate they should, not appropriately planning for the homes they need and the recent Solent nitrate issue could all be contributing factors.

2.20 In June 2020, Fareham published their 5 year housing land supply position. At this time, Fareham had a supply of 2.72 years. This supply obviously falls substantially below the government's requirement of a 5 year supply, as set out in Paragraph 73 of the NPPF. After reviewing the housing supply, as set out in the 5 Year Housing Land Supply Report, it is apparent that the Council remains reliant on a few large housing sites coming forward to contribute to the housing land supply in future years.

2.21 As such, Fareham Borough Council should look to bolster their supply through the allocation of a range of sites as encouraged by the NPPF.

2.22 To be able to meet the increased housing needs in a sustainable manner, and to maintain a 5 year supply of deliverable housing sites across the Plan period, the Council must look to

all tier settlements in the hierarchy to deliver homes through a range of sites. However, it should be noted that strategic sites should not be solely relied on due to lengthy lead in times. Instead, a mix of housing sites should be sought and allocated to enable a 5 year supply to be achieved and maintained.

2.23 In addition to bolstering the supply going forward, Fareham need to seek to address the backlog of unmet need. In particular, the South Coast Nitrate crisis put thousands of homes on hold for some time to resolve the eutrophication issues of the Solent to reduce impact on the protected habitats and species. The Nitrate Neutrality Update Report to PfSH Joint Committee (14 October 2019) acknowledged that *“given that there is a severely reduced number of permissions being granted in the PfSH in the financial year 2019/20, it is not unnecessary to assume that the delivery of homes will be suppressed in the years 2020/21 and 2021/22.”*

2.24 The submission Local Plan is very conservative in its ambitions for growth in the Borough, especially considering it is under a Duty-to-Cooperate to meet neighbouring authorities’ unmet need. It does not allocate many new sites and instead relies heavily on sites that have been allocated previously. Strategic Policy H1 confirms this, as the provision for 8,389 homes comprises the following:

- 552 homes already with planning permission
- 4,858 homes on sites with resolution to grant permission (Welborne contributes the large majority of these homes)

2.25 Therefore, around 65% of the housing provision already has planning permission or resolution to grant, meaning the Local Plan only allocates sites for approximately 1,750 homes for development over the plan period despite only 2.72 years of housing land supply and a record of under delivery in the Borough. It is of note that nearly 50% of the housing provision is reliant on the Welborne allocation. If this allocation is not to come forward in the plan period due to funding issues, or be significantly delayed, Fareham’s housing provision will be significantly reduced and identified housing needs will not be met. As such, the emerging Local Plan MUST look to allocate further sites accordingly.

2.26 Reflecting the above the application of a 15% contingency as shown under Table 4.3 and explained at paragraph 4.12 of the Plan appears woefully inadequate.

iv) Over Reliance on Welborne Garden Village

- 2.27** Fareham is relying very heavily on one strategic site to deliver almost 50% of its housing provision, namely Welborne Garden Village. Of the supply identified in Table 4.2 relating to Strategic Policy H1, some 4,020 of the overall provision of 8,389 is to come from this one strategic site. This is flawed and potentially undeliverable. Following a resolution to grant planning permission in October 2019 for the outline planning application under Ref: P/17/0266/OA, the Section 106 agreement has still not been signed and therefore planning permission has not yet been issued. According to the Council's website and details held on the outline planning application, a decision is due by 8th January 2021.
- 2.28** The Delivery Report¹ on Welborne Garden City sets out that up to 750 homes will be delivered in the first 5 years. However, this figure appears highly unrealistic and unachievable as set out in more detail below; in addition, the site cannot be developed until funding is secured for Junction 10 of the M27.
- 2.29** On 14 January 2020, Hampshire County Council published an Executive Decision Record on the M27 Junction 10. It confirmed that the progression of work on the Full Business Case is at an impasse, and it is understood that HCC were terminating the role as scheme promoter to avoid abortive work or expenditure, pending resolution of funding and delivery arrangements of the scheme.
- 2.30** The delivery of the Garden City is suggested to be over a 20 year period, with on average 300 dwellings a year being completed. It would be expected higher delivery in early years, lower delivery in later years. As acknowledged, the submission Local Plan relies on approximately 4,000 homes from Welborne coming forward in the plan period.
- 2.31** With regards to the delivery of the site, a key point of note is in the Council's latest 5 year Housing Land Supply (HLS) Position Statement (June 2020). This statement sets out, at paragraph 29, that the site promoter anticipates commencements/completions at Welborne to occur approximately two years later than that set out within the information supporting the

¹ Page 83 of the Delivery Document <https://welbornegardenvillage.co.uk/delivery/>

planning application. It is acknowledged that the site promoter has advised the Council of the following anticipated delivery rate:

- 30 dwellings in 2022-23
- 180 dwellings in 2023-24
- 240 dwellings in 2024-25

2.32 The above figures indicate that Welborne can only deliver 450 homes in the next 5 years, up to 2025. This is already a significant drop from the figure set out in the original planning application which was suggesting the delivery of 750 homes within 5 years of commencement. If Welborne can only deliver 450 homes in the next 5 years, it seems an impossible task to deliver the remaining circa 3,550 over the remaining 12 years of the plan period.

2.33 In addition, given the current lack of funding for the access, the anticipated delivery seems highly unlikely and this will have a dramatic effect on Fareham's 5 year HLS and securing its overall housing provision. Therefore, it is considered that relying on one site to deliver a significant number of houses is a high risk strategy. As such, a greater range of sites should be considered.

v) Affordable Housing

2.34 Paragraph 4.3 of the draft Local Plan confirms that '*The need for affordable housing in the Borough is based on the number of existing and newly formed households who lack their own housing and cannot afford to meet their housing needs in the market*'. The Council goes on to state that it is confident that it will meet its affordable housing needs through the provision based on its Policy HP5 and it does not need to make any further adjustments to its overall housing figures.

2.35 However, paragraph 5.29 of the draft Local Plan indicates that one of the key issues facing residents in the Borough is the unaffordability of homes to buy or to rent, and that therefore the delivery of homes that are affordable is a priority. The Council's Affordable Housing Strategy 2019 – 2036 (2019), as referenced at paragraph 5.30 of the draft Local Plan, indicates that there is a need for some 3,500 affordable homes up until 2036. It is not clear how the housing number can and will meet the identified affordable housing demand.

2.36 Key concerns include:

- The reliance on the number of houses, including affordable housing, to be delivered by Welborne. The very real concerns over the deliverability of housing from Welborne has already been addressed; the issues identified have a consequential impact on the delivery of affordable housing;
- The heavy reliance in terms of the overall housing provision on windfall sites, many of which are likely to fall under the threshold of 10 or more dwellings and therefore not deliver any affordable housing;
- The reliance on a range of allocated sites (Section 3) which appear to be aspirational rather than realistic and therefore again the impact on the provision of affordable housing.

2.37 The Council fully recognises its substantial affordable housing need across the Borough over the Plan period but it is simply not at all clear that the numbers required can be met under the housing provision being made. It is therefore concluded that the very clear potential that the need for affordable housing in the Borough will not be met leads to a need to increase the overall housing requirement.

vi) Windfall Allowance

2.38 Part of the Housing Provision is to be met through unexpected (windfall) development. There is no issue in principle with including an allowance for windfall development, but that figure must be realistic and based on evidence.

2.39 The NPPF defines windfall sites as 'sites not specifically identified in the development plan'. Paragraph 70 of the NPPF sets out that where an allowance for windfall sites is to be made, there should be compelling evidence that they will provide a reliable source of supply, using the strategic housing land availability evidence, historic windfall delivery rates and expected future trends to support such an allowance.

2.40 In this case the Council is relying on 1,224 new homes to come through windfall development out of total of 8,389 new homes. Whilst it is appreciated that the methodology for calculating windfall allowances have changed over time, it is worth noting that in the current adopted Local Plan Part 2: Development Sites and Policies (2015), the average historic windfall

allowance was calculated to be 20 (Appendix F). In the 5 Year Housing Land Supply Position Paper to Planning Committee on 24 June 2020, the Council included a small site windfall allowance of 37 dwellings for each of 2 years (years 4-5).

- 2.41 In the draft Local Plan the reliance on windfall sites has jumped to 1224 which if crudely divided by the length of the Plan period (16 years) gives an annual figure of 76.5. There is no explanation to justify such an over reliance on windfall figures.

Conclusions in respect of Strategic Policy H1

- 2.42 It is clear that there are fundamental concerns over many aspects of the Council's housing provision which have been explored in this Section. There can only be one conclusion that the provision is woefully inadequate and is **UNSOUND**.

3.0 Analysis of Housing Allocations

- 3.1** The Council has allocated and is relying on a number of ‘development’ sites to assist in the delivery of and in meeting its housing provision. However, the suitability, availability and achievability of several of these sites needs to be questioned and whether they can and will deliver the number of units proposed. It is acknowledged that these sites are not proposed for delivery of housing numbers in the early years of the Plan but it must still be questioned whether there is sufficient confidence that these sites will be brought forward, that they should be included in the plan.
- 3.2** This analysis has only focussed on the medium to larger of the sites, most of them proposing to bring forward in excess of 50 units and there may well be serious issues of suitability, availability and achievability with some of the smaller sites. It is noted that at least 9 of the sites are indicated to make provision for less than 10 units. It is unusual for sites yielding such a small number of units to be included as specific allocations; it begs the question as to whether the Council has needed to bring in such small sites to secure its numbers.
- 3.3** The number of sites where there are serious concerns and questions over their suitability, availability and achievability total at least 6, which in total would provide some 400 – 500 residential units. These sites are addressed below, and the order selected simply follows the order in which they are listed on pages 39 – 40 of the draft Plan and then considered in further detail under site specific policies.

FTC1 Palmerston Car Park (Indicative Dwelling Yield: 20) (SHELAA ref: 3233)

- 3.4** This is a constrained town centre car park site and the development of housing will be constrained by issues of noise and disturbance from the surrounding roads as well as the service access to the Shopping Centre. The setting of the adjacent Osborn Road Conservation Area to the north will need to be preserved. The Council is keen, under other policies to safeguard and promote Fareham town centre as its principal town centre but there appears to be no co-ordinated car parking strategy to ensure that the loss of existing car parking sites will not compromise those objectives.

- 3.5** At the very minimum the proposal that this site can deliver up to 20 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC2 Market Quay (Indicative Dwelling Yield: 100)
(SHELAA ref: 1425)**

- 3.6** This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 60 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 100 units. The site is also expected to deliver approx. 4000 sqm of commercial leisure space together with a new multi storey car park and new town square. The future and viability of town centre strategies may need a comprehensive review in a post Covid era. The site specific requirements also make reference to the possibility of a hotel which presumably, if brought forward, would impact on the achievement of other elements of the proposal, including the residential. There is no indication that there is any real prospect of bringing the site forward over and above aspirational objectives.
- 3.7** At the very minimum the proposal that this site can deliver up to 100 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC3 Fareham Station East (Indicative Dwelling Yield: 120)
(SHELAA ref: 0211)**

- 3.8** There are fundamental questions about the suitability and achievability of this site for the intended development. This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 90 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 120 units. Such an ambitious scheme would appear to depend on a comprehensive approach, particularly given the limited access options. Yet, even the SHELAA assessment identifies that the site is in multiple commercial and industrial uses, including railway related uses which brings into question site assembly issues both in terms of achievability and timing.

- 3.9** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC4: Fareham Station West (Indicative Dwelling Yield: 94)
(SHELAA Ref: 0212)**

- 3.10** This is a long and very narrow site sandwiched between the railway to the east and protected trees to the west. The allocation and the SHELAA recognise the multiple constraints facing this site in terms of bringing it forward for development. These constraints include, amongst others, the multiple uses existing on the site, the access constraints including that the existing access crosses land in Flood Zone 2, noise, contamination and amenity issues.

- 3.11** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC5: Crofton Conservatories (Indicative Dwelling Yield 49)
SHELAA Ref: 1325**

- 3.12** This site continues to be in active retail use, following the expiry of a temporary permission for retail use and the potential availability of the site is questioned.

**HA7: Warsash Maritime Academy (Indicative Dwelling Yield 100)
SHELAA Ref: 3088**

- 3.13** This site has a long history and has been carried forward from the Local Plan Part 2. The site faces considerable issues in terms of bringing forward a suitable and viable housing development, not least of which is that the western part of the site must be excluded from development because of flooding issues and discussions with Natural England would potentially exclude further land to secure appropriate buffers to sites of international nature conservation significance. As a result, the majority of the development and residential units

would necessarily be brought forward through the conversion of the existing listed buildings on site, potentially impacting on viability.

- 3.14** The site lies in the countryside and is remote from shops and facilities. There are traffic problems along Newton Road which is the only access solution leading to Warsash Centre and up to Park Gate where permission exists for some 800 residential units.
- 3.15** The viability and achievability of this site for some 100 residential units must therefore be questioned.
- 3.16** Due to the ecological and highway issues the Council has determined that any planning application should be submitted with an EIA.

HA13 Hunts Pond Road (Indicative Dwelling Yield 38)

SHELAA Ref: 305

- 3.17** Under the Local Plan Part 2 this site was allocated under Policy DSP53 for Community Uses as part of a larger scheme to include education and open space. It is understood that the site is no longer required by Hampshire County Council for educational purposes, but there is no confirmation that a proper assessment has been undertaken of the continued need of this land for local community uses.

HA4 Downend (Indicative Dwelling Yield 350)

SHELAA Ref 3030

- 3.18** Site HA4 at Downend for some 350 residential units has been the subject of two planning applications both of which were refused against officer recommendation. The first planning application was dismissed at appeal justifying the council's reason for refusal. It is likely the second application which was refused in November 2020 will be appealed however, the committee's stance in terms of determining both applications on this site brings into question whether the council really support this housing allocation. It is therefore questioned whether the Council should be relying on the site as a housing allocation which the Council has found, in the form of the most recent applications, wholly unacceptable.

Other Sites

- 3.19** There are potential constraints with a number of the other sites, which may at the very least delay their delivery or even bring into question their achievability. Site FTC6, Magistrates Court at Fareham and allocated for some 45 units is held up by a complicated deal to resolve the nitrates issue, involving land within Winchester District.

Conclusions and Implications Arising

- 3.20** This analysis demonstrates that there are serious and substantial questions over the suitability, availability and achievability of a number of the allocated sites and whether they will be able to provide the housing figures, either in whole or in part which Fareham is seeking to rely upon. It is therefore contended that it is UNSOUND for Fareham to rely on each and all of these housing sites to deliver all of the dwelling units proposed
- 3.21** This adds to the strength of the argument, as set out under Section 2, that Fareham needs to bring forward additional sites for allocation to help meet its housing need. The next section focuses on why land at Rookery Farm should be included as a housing allocation in the Local Plan.

4.0 Rookery Farm

4.1 It is clear from Sections 2.0 and 3.0 that not only has Fareham under provided on the housing figures it requires to meet over the Local Plan period, but it is very unlikely that it will be able to deliver even the numbers it is proposing to provide. Fareham therefore needs to allocate further housing sites to improve housing deliverability; Rookery Farm should be allocated as a housing site. This was allocated in the draft Reg 18 Supplement in early 2020 under the Policy Reference HAX (SHELAA ref: 0046).

Site Location

4.2 The site is located immediately north of the M27 Motorway and west of Whiteley. Access is from Botley Road approximately 100m north of the bridge over the Motorway. Please see attached site plan showing the land forming part of the proposed development area. It is estimated at this early stage that the site could accommodate in the region of 150-200 residential units including an element of affordable housing and a mix of housing types to accord with Fareham's policies and approach to housing mix.

4.3 146 Botley Road (also known as Rookery Farm) lies to the north of the land and is in separate private ownership. The dwelling is listed. Residential development along Swanwick Lane lies further to the north.

4.4 The residential development of Whiteley is to the east. To the south are the local centre at Park Gate and the railway station at Swanwick, both within easy walking distance of the site.

4.5 Rookery Avenue is opposite the access to the site. At present this is a cul de sac however there is a safeguarded road extension to continue Rookery Avenue into Whiteley, linking Botley Road to the Parkway South roundabout.

4.6 To the south of the site is a vehicular and pedestrian bridge that provides access to residential properties at Bridge Road.

The Site

- 4.7** The site as a whole occupies approximately 20.05 Ha of land accessed from Botley Road just to the north of the M27 Motorway. The front part of the site is visible from Botley Road however the access road, which is between an earth bund to the north and embankment to the south, drops to a lower central area where aggregate recycling has, until recently, taken place.
- 4.8** Adjacent to the motorway is a large embankment created by historic land raising. The central part of the site comprises a relatively flat operational area where recycling materials have been stockpiled. To the north is the Orchard where the land gradually drops towards the rear of properties fronting onto Swanwick Lane.
- 4.9** At present due to the change in levels and the surrounding housing only the front part of the site adjacent to Botley Road is visible from outside the site.
- 4.10** The site at present has two principal landowners Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd, with Raymond Brown acting on their behalf

Site Planning History

- 4.11** Rookery Farm was originally a fruit farm and some evidence of this former use is still evident in an area of remnant orchard to the north-west of the site. Part of the site adjacent to the M27 has been land raised and restored to grazing land. This forms a large embankment which screens the central part of the site from the M27 and Botley Road.
- 4.12** Planning permission was first granted on appeal in 1987 (APP/Z1700/A/55/049143) for the infilling of agricultural land with c.1.3 million cubic metres of construction and demolition wastes with restoration to agricultural use. Tipping commenced in 1988 and temporary planning permission for waste recovery (recycling) was granted in 1995.
- 4.13** A further temporary planning permission for the inert waste recycling operation was granted in 2006 (P/06/0443/CC), time limited to expire in 2021. This permission introduced an expiry date for land raising operations of 31st December 2026.

- 4.14** In 2014, planning permission (P/14/0857/CC) was granted for the permanent retention of the aggregate recycling facility. In 2016 (P/15/1213/CC) and 2018 (P/18/0978/CC) planning permission was granted which, in effect, extended the validity of the development pursuant to planning permission P/14/0857/CC until 25 October 2020. This date has also since been extended by way of The Business and Planning Act 2020 to 1 May 2021.
- 4.15** Details pursuant to the remaining pre-commencement conditions are to be submitted to Hampshire County Council for approval in January 2021. Following discharge of these conditions and implementation of the permission, conditions relating to restoration associated with the earlier land raising permissions fall away leaving just the permanent recycling use. The site will subsequently, in planning terms, predominately formally become previously developed (brownfield) land.
- 4.16** Note there have been no minerals operations at the site and any changes to the landscape are as a result of land raising, not from extraction activities.
- 4.17** The main body of the site is currently safeguarded for aggregates recycling in the Hampshire Minerals & Waste Plan. Hampshire County Council have indicated that there is overcapacity for inert waste recycling at present. As such if the site was to be allocated for housing then the safeguarding status would be reviewed.
- 4.18** It should be noted that in its comments on the draft Plan 2020 (Regulation 18 Draft Local Plan 2036 Supplement) when the site was allocated for residential development, Hampshire County Council as Minerals and Waste Authority advised:

Hampshire County Council has concluded that sufficient aggregate recycling capacity is currently in place to deal with the additional waste and as such no objection to this allocation will be raised

Site Appraisal

- 4.19** It is noted that the site was found to be a developable housing site within the Fareham Local Plan 2036 Strategic Housing and Employment Land Availability Assessment (SHELAA) December 2019, but subsequently discounted as unsuitable in the Fareham Local Plan 2037

Strategic Housing and Employment Land Availability Assessment (SHELAA) September 2020.

- 4.20** In considering the site developable, the SHELAA (2019) makes the following comments regarding suitability of the site:

‘Overall suitable for housing development. Further work required to ascertain an appropriate development structure and net developable areas, having regard to site ground conditions, drainage, habitat surveys, movement connections and retention of existing cover of woodlands, trees and hedgerows. Eastern part of site has good pedestrian accessibility to existing local services. Potential scope to include a small convenience store to improve sustainability of main core of the site. Suitable highways improvements required, with linkages to surrounding movement networks. Potential impact of noise and air quality to be assessed and appropriately mitigated’.

- 4.21** In subsequently discounting the site, the SHELAA (2020) makes the following comment regarding reason for discounting the site as un-developable:

‘Site topography and boundary likely to create isolated cul de sac development. Main developable area of the site is not well related to existing settlement and is relatively isolated from local services’.

- 4.22** The reasoning behind the change in conclusion reached by the SHELAA (2020) is unclear as there has been no substantive change in circumstances or new information related to the site not previously provided to the Local Planning Authority. Furthermore, the SHELAA (2020) attributes the same 8 out of 10 score for accessibility to facilities from the site as the SHELAA (2019), recognising the inherently sustainable location adjacent the urban area of Swanwick, the proximity to Swanwick Railway Station and nearby shops/amenities. As identified in the SHELAA (2019) suitability summary, if necessary, sustainability of the main core of the site could further be improved via development of a small convenience store in-situ.

- 4.23** Paragraph 4.28 of the SHELAA (2020) states that *‘the information from the SHELAA forms an important part of the evidence base for the Local Plan 2037, providing a source of developable sites which are suitable for future development needs, available within the plan*

period and viably achievable. Developable sites which can be brought forward under the Council's development strategy will contribute to the housing and employment supply for the Local Plan 2037...'

4.24 Paragraph 3.21 of the Publication Version of the Fareham Local Plan 2037 states:

'3.21 The development strategy proposed by the Local Plan includes:

...Development allocations on previously developed land where available, and on greenfield land around the edges of existing urban areas in order to meet remaining housing and employment needs, but otherwise managing appropriate levels of development outside of urban areas'.

4.25 As the site should be considered to be previously developed/brownfield land, it is sequentially preferable for development based on the Council's Local Plan development strategy. Furthermore, paragraph 4.18 (Assessing Site Suitability) of the SHELAA (2020) states that 'sites outside the urban area will not necessarily be excluded as they could be considered alongside a review of urban area boundaries as part of Local Plan development...'

4.26 Paragraph 3.3 of the Background Paper: Settlement Boundary Review (September 2020) states that 'the reasons for establishing settlement boundaries include:

- *Directing development to more sustainable locations in terms of accessibility and proximity to public transport, and in terms of being well served by existing essential services and facilities'....*
- *'To assist in urban regeneration, by encouraging the re-use of brownfield land'.*

4.27 Considering the proximity of the existing Settlement Boundary to the site (approximately seven metres distance on the opposite (eastern) side of Botley Road), Rookery Farm site would represent an entirely reasonable and logical extension to the established urban area which would be in accordance with the development strategy contained within the Local Plan.

4.28 Cul de sac type development formats are well established and entirely functional residential layout present in the vicinity of the site. Such a development format would therefore reflect the prevailing development pattern and design vernacular and be sympathetic to existing

communities. Indeed a number of the sites put forward in the current draft plan would potentially result in cul de sac developments, including:

FTC3 – Fareham Station (120 dwellings)

FTC4 – Fareham Station West (90 dwellings)

HA3 Southampton Road (348 dwellings)

HA4 Downend Road (350 dwellings)

- 4.29** The site presently benefits from permanent planning permission for development and use for aggregate recycling. This is significant in terms of both vehicle movements and future development potential. Current planning permissions contain conditions limiting HGV movements to 240 per day, all of which utilise the current site access point on Botley Road. These authorised HGV movements would be replaced by domestic vehicle movements, substantially mitigating any perceived increase in road traffic on Botley Road. In addition, the imminent completion of the North Whiteley Link Road is anticipated to reduce vehicle movements on Botley Road. Without wanting to pre-empt the outcome of any Transport Feasibility Assessment, development of the site could also facilitate the development of the western end of the Rookery Avenue extension as there is space within the site to accommodate a roundabout.
- 4.30** Planning permission P/18/0978/CC includes for considerable earthworks to create extended and raised bunding to re-model the site and mitigate against noise impacts from the recycling use. A significant proportion of this re-modelling is on the south western boundary of the site. Such earthworks would be very similar in scale and form to those likely to be required to reduce noise levels from motorway traffic to appropriate levels for inhabitants of any future residential development on the site.
- 4.31** The Council has previously been furnished with a Phase 1 Contaminated Land Assessment and Slope Stability Assessment for the site, identifying that the embankment/land raise slope adjacent to the M27 is stable and that the site could be suitable for re-development in accordance with the indicative masterplan previously submitted.
- 4.32** Any future development scheme pursuant to an allocation would also include mitigation to address potential air quality concerns associated with proximity to the motorway. Such

issues can be effectively managed through building design and layout amongst other techniques.

4.33 The site comprises circa 20 hectares of land with a net developable area of circa 10 hectares. Significant land is therefore available within the land ownership for biodiversity enhancement, on-site nitrate mitigation and dedication to public open space.

4.34 The following points detail the benefits of residential development on the Rookery Farm site:

- Once the permanent recycling permission is implemented the site will become previously development land/brownfield and its development will reduce the need for more sensitive (greenfield) sites within the Borough;
- The site is in a highly sustainable location in proximity to a railway station and amenities, is deliverable and would provide necessary housing capacity within the Plan;
- It should be noted that in its response to the draft 2020 Plan (Regulation 18 Draft Local Plan 2036 Supplement) showing the inclusion of Rookery Farm, the County Council responded as follows:

This allocation is close to Swanwick railway station. The County Council supports the opportunity for this site to provide high quality walking and cycling routes to Swanwick station. This may include a new active modes bridge over the motorway and enhanced interchange at Swanwick Station with new local bus services. The development brief also needs to include provision for off-site improvements to address the inadequate bus, walking and cycling connections to the Segensworth business parks.

- Provision of Public Open Space on a former land raise site and access to it from existing footpath routes;
- Removal of a 'heavy industry' use from an otherwise residential setting;
- Would facilitate the Rookery Avenue extension. This would provide better access to the motorway, the industrial area of Whiteley and Whiteley District Centre;
- Opens up pedestrian links across the motorway to Addison Road;
- The site would not be visually prominent and would form a logical urban extension. Development could enable biodiversity enhancements associated with long-term habitat management plans and the re-instatement of a pre-existing stream across the site;
- The development would be offset by the loss of 240 HGV vehicle movements a day.

- 4.35** Were recycling operations to cease and land raising be completed, circa one million tonnes of waste material would need to be imported to the site before planning permission expiry in December 2026. This will impact the surrounding ambient environment through noise, dust and exhaust/plant emissions associated with operations and significant numbers of HGV movements.
- 4.36** Resumption and completion of land raising would also result in the site and location becoming permanently sterilised for future development. This is therefore a unique opportunity to re-develop the site to meet a real and urgent need to provide homes in the Borough.

5.0 **Modifications Required to the Plan to Make it Sound**

- 5.1. There is no need to revisit the arguments and issues which have been set out at length in the earlier sections and which demonstrate that the Plan as drafted is UNSOUND. The modifications required are set out below in bullet form. It will be immediately clear that the required work to ensure that the Plan is SOUND extends well beyond detailed amendments to drafted policy wording; a fundamental review of the Plan and the basis upon which it has been prepared is required.
- 5.2. The revised approach to the preparation of the Plan, with consequential implications for the redrafting of **Strategic Policy H1**, requires:
- a) A thorough reassessment of the Housing numbers using the Standard Method as set out under the PPG; it is premature to use the draft new Standard Method which Government has now formally abandoned. The only reason it has been used by Fareham is because it appears to provide a lower number of units required. This is clearly UNSOUND and for the plan to made SOUND, the current Standard Method must be re-used and those sites proposed for allocation in the Local Plan Supplement be included.
 - b) The Duty to Co-operate has not been undertaken properly and thoroughly; Fareham has underprovided in terms of meeting the needs of the adjoining authorities who are struggling to meet their housing needs, including Portsmouth, Gosport and Havant all of which are geographically very constrained. The exercise needs to be undertaken again to ensure that Fareham properly plans to accommodate the needs arising from surrounding authorities. It is worth noting that the under provision is made even worse if account were to be taken of the draft new Standard Methodology where the housing requirements of adjoining constrained authorities is increased; Fareham appears to have decided to ignore this implication arising from the new draft Standard Method.
 - c) The Council has a history of under delivery of housing figures and its 5 year housing land supply figure currently stands at under 3 years. On the basis that the NPPF and PPG are both clear that the housing provision numbers should be regarded as

minimum, and reflecting the above position, Fareham requires to be considerably more ambitious in terms of its overall housing provision figures.

- d) There is a very concerning over reliance on the achievability of so much of the housing provision from one site, namely Welborne Garden Village. This is even more of a significant issue given the fundamental difficulties that appear to be encountered over the funding and provision of the new motorway junction which is fundamental to the progress of the overall development. The amount of reliance that can properly be placed on the delivery of housing numbers from this one development needs to be reviewed and significantly reduced.
- e) There is also a potential over reliance on windfalls to deliver a significant proportion of the overall housing figures; this requires to be revisited with a downward adjustment.
- f) The Council is in very real danger of not being able to meet its affordable housing requirements, given all the constraints identified. The housing numbers and potential affordable housing provision requires to be recalculated with the need to increase the overall housing numbers if the affordable housing needs are to be met.

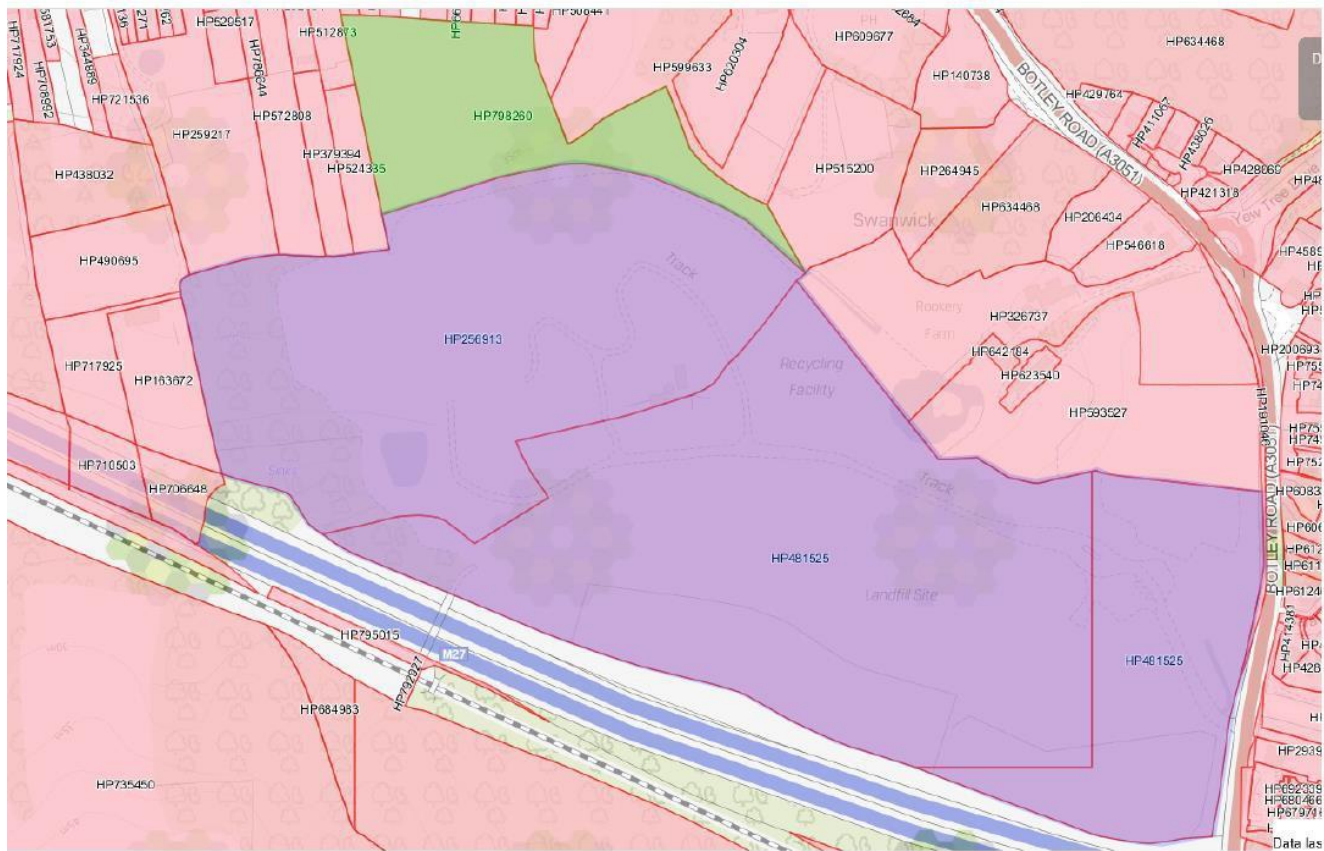

5.3 In addition to the above the Council also requires to re-address a number of its allocated housing sites, including at the very minimum **Sites FTC1, FTC2, FTC3, FTC4, FTC5, HA7 and HA13**. This reassessment in terms of suitability, achievability and availability is likely to reduce substantially the number of new dwelling units that can be achieved from these allocations.

5.4 The Council is clearly underproviding in terms of its overall housing numbers and the reliance it is placing on sites that face constraints and may not be achievable. The Council needs to make further allocations, and this should include Land at Rookery Farm which is suitable, available and achievable and subject to planning, deliverable within a 5 year period. The site has been considered suitable, available and achievable and was allocated in the Local Plan Supplement; the principal reason why it no longer appears as an allocation is because of the Council's unsound change in the methodology it is applying to calculate its housing numbers. **Rookery Farm should be reinstated as a housing allocation.**

- 5.5 It follows that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.

B1. Which part of the Local Plan is this representation about?

- Paragraph (B1a)
- Policy (B1b)
- Policies map (B1c)

B1a Which paragraph?

n/a

B1b Which policy?

HA4: Downend Road East

B1c Which part of the policies map?

n/a

B2. Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input type="checkbox"/>	<input checked="" type="checkbox"/>

B3. Please provide detail you have to support your answers above

Miller Homes support the allocation of the land to the east of Downend Road as a site that is in a sustainable and suitable location to deliver residential development. The proposed development is located adjacent to the existing settlement boundary and can be well integrated with the existing settlement. Whilst a recent outline planning application was refused by Members, the reasons for refusal were related to off-site highway improvements only, and planning officer's at Fareham Borough Council recognised the site as suitable for development and recommended the application for approval (reference P/20/0912/OA). Further, Hampshire County Council, as Highways' Authority, had no objection to the application and the Council's own Transport Consultant, Mayer Brown, has confirmed the acceptability of the allocation in transport terms – this report forms part of the Council's evidence base for the Local Plan and concludes that in transport terms the site is deliverable. It is Miller Homes intention to submit an appeal following the committee's decision and in terms of the allocation, there is no reason to doubt the deliverability of the site.

In terms of highway access the policy provides at (c) that primary access should be to Downend Road. The planning applications for the site have established that the only feasible access to the site is from Downend Road, and that there are no other opportunities. The policy should be clarified in this regard.

Whilst the site is considered to be in a suitable and sustainable location, supporting its allocation to deliver new homes, Miller Homes has specific concerns with some of the policy requirements, listed below, which mean the policy is not justified or sound in regard to those specific elements.

The site is close to the Downend Quarry SSSI. This SSSI is notable for its geological features. Natural England has confirmed that no mitigation measures are required because the site is on private land and will not be subject to increased recreational pressure as a result of the development. Natural England's response confirming this position was provided in response to outline planning application P/20/0912/OA, in an email from Alexander Wilson dated 12 October 2020. There is no requirement to provide a buffer, and to include this requirement in the policy is unjustified.

It is unclear as to why a minerals assessment is required. The site is within a minerals and waste consultation area because it lies close to the safeguarded site of Warren Farm and Down End Quarry which is a waste site operated by Veolia Environmental Services (UK) Plc. Outline application P/20/0912/OA did not provide this information and the officer's report confirms no objection to the proposed development by Hampshire County Council Minerals and Waste Planning Authority. In any event, if there were requirements for this information, it would be covered by Hampshire County Council's Minerals and Waste Plan Framework, which forms part of the development plan. This policy requirement should be removed.

A standalone new pedestrian footbridge is not required over the railway as part of this development. This has firmly been established, most recently through outline planning application P/20/0912/OA. The officer's report for that application clearly sets out Hampshire County Council's position on the proposed improvements to the bridge, which provide a well defined and safe footway across the existing bridge facilitated by signal-controlled shuttle working for vehicular traffic.

At paragraph 8.58 of the report the officer summaries that *"the improvements to the bridge crossing are both safe for pedestrians and other highway users and acceptable in terms of the modest queue lengths and delay anticipated. The proposal to install traffic signals enables an industry standard traffic model to be used which overcomes the uncertainty at the heart of the previous appeal"*.

It is important to conclude that the application does not provide or warrant a separate footbridge over the railway and no objection is raised by Hampshire County Council as Highways Authority on this matter. As such there is no need or reasonable justification for the policy to suggest the delivery should include a footbridge over the railway at Downend Road, improvements necessary can all be accommodated within the existing highway network. As part of its Evidence Base the Council commissioned its own transport consultants (Mayer Brown) to consider the deliverability of the site. This considered the content of the Planning Application (P/20/0912/OA) which deliver a footway across the bridge. The report concludes that the scheme is acceptable and does not identify the requirement for a footbridge. There is no evidence presented to show why a footbridge would be required, and its delivery falls outside of the control of the site promoter. This requirement is unjustified and should be removed.

It is noted that the indicative master plan for the site, figure 4.3, identifies provision of sports pitches to the east of the site. Whilst we note that the master plan is indicative, it is misleading to suggest that sports pitch provision could be accommodated of this size and scale. Due to the topography of the site, a sports pitch in the scale as indicated on the indicative masterplan would result in an impractical sports pitch, or

with necessary levelling works (cut and fill) that could have implications on the nationally important archaeological remains and undesirable visual consequence, such as large retaining walls.

In any event, the evidence base fails to justify a requirement for a full-size sports pitch in this location and it is unclear as to how the community would effectively utilise a single pitch in isolation from other pitches/sports provision.

As such sports pitch provision should not be shown in this scale as it is misleading to suggest such a provision could be accommodated here.

B4a. What modification(s) is necessary to make the Local Plan legally compliant and or sound?

The policy text should be amended as follows:

“Proposals should meet the following site-specific requirements:

- a. The quantum of housing proposed shall be broadly consistent with the indicative site capacity; and
- b. A design and layout that takes account of the site’s constraints and context, in particular the site’s landscape setting on Portsdown Hill, the Downend Chalk Pit SSSI and the potential presence of Palaeolithic archaeological remains; and
- c. Highway access shall be focused on Downend Road; and
- d. A network of interconnecting green and public access corridors throughout the site incorporating existing ecological and archaeological features and allowing only minimal highway cross over points (kept minimal in width); and
- e. The provision of pedestrian and cycle connectivity from the site to Downend Road, The Thicket and Upper Cornaway Lane; and
- f. Buildings heights limited to a maximum of 2.5 storeys, except for buildings which front onto the site access or perimeter, where heights will be limited to a maximum of 2 storeys; and
- ~~g. Proposals should ensure a buffer is designed to protect the SSSI at Downend Quarry and the creation and enhancement of ecological corridors; and~~
- h. The design of the development should take into account the close proximity to the waste transfer station with the potential for odour; and
- i. A robust archaeological survey of the site to determine the Palaeolithic potential at the site, with areas identified as having high potential being designed within areas of open space or green corridors; and
- ~~j. A Minerals Assessment will be required prior to any development in accordance with the Hampshire Minerals and Waste Plan; and~~
- k. A Neighbourhood Equipped Area of Play (NEAP) on-site within an accessible location; and
- l. Highway improvements to facilitate the development including:
 - i. A pedestrian footway ~~or footbridge~~ over the existing Downend Road bridge and connections and improvements to wider pedestrian and cycle networks at The Thicket and Upper Cornaway Lane; and
 - ii. Provision of pedestrian and cycle links towards the A27 Bus Services and future Rapid Transit connecting Fareham Town Centre and railway station, Portchester, Portsmouth and local employment hubs; and
 - iii. Improvements to the Downend Road, A27 and Shearwater Avenue junction.

- m. Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4 and NE3, including contributions towards improvements at Delme Roundabout

In addition, the size of the Park and Recreation area including sports pitch provision should be reduced in figure 4.3.

B4b. How would the modification(s) you propose make the Local Plan legally compliant or sound?

The modifications would resolve the issues raised and make this policy sound.

B4c. Your suggested revised working of any policy or text:

Please refer to the detailed response at B4a above.

B5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes:

No:

B5a. Please outline in the box below why you consider it necessary to take part in the hearing session(s):

Miller Homes should be provided with an opportunity to participate at the hearing part of the examination. The issues raised in regard to the soundness of the Draft Local Plan, in the submitted representation, require detailed examination before an independent inspector.

1) Policies map: HOUSING ALLOCATIONS (HA1, HA3-4, HA7, HA9-10, HA12-13, HA15, HA17, HA19, HA22-24, HA26-44)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

The area to the East of Downend should be removed from the Local Plan

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Listening to the Residents

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Listening to the residents

Your suggested revised wording of any policy or text:

Remove the land to the East of Downend for any development now and for the future

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To have a Resident's voice heard

Keely, Lauren

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson

[REDACTED]

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

1) Policy: FTC4 - Fareham Station West

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Part of this site lies within current day flood zone 2, there is also a culverted watercourse that flows beneath the site. We are supportive of bullet points (i) and (j) within this policy that recognise these key issues and require full consideration of them within any proposal that comes forward. This is essential to allow the safe redevelopment of the site by ensuring that flood risk is not increased and reduced wherever possible.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: HA7 - Warsash Maritime Academy

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Within this policy it is correctly recognised that part of the site lies within current day flood zones 2 and 3 and that this risk is likely to increase with climate change. We are therefore supportive of criteria (m) within the policy wording stating that development should avoid flood risk areas. This will ensure that the site is developed safely without increasing flood risk and reducing it where possible.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Policy: HA19 - 399-403 Hunts Pond Road

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

It is correctly recognised within the plan that part of this site lies within current day flood zones 2 and 3. We are pleased to see that a development criteria (f) has been included to specify that no development or site access should be within these areas. This will ensure the development and its occupants are not at increased risk of flooding.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: CC1 - Climate Change

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

We are very supportive of this policy on climate change, which we are happy to see is cross cutting and has specific reference to flood risk, water efficiency and green/blue infrastructure. This will help ensure that development in Fareham Borough is sustainable and resilient to climate change.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Policy: CC2 - Managing Flood Risk and Sustainable Drainage Systems

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

We support the inclusion of this policy and we see it as essential given the flood risk in the Borough from a variety of sources. We feel that it is a robust policy that provides a clear approach as to how potential flood risk from all sources of flooding should be managed through the planning application process. It will ensure that risk is not increased for either the new or existing population of the Borough.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Policy: D4 - Water Quality and Resources

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

We are very supportive of this policy. The inclusion of the higher water efficiency standard acknowledges the water resource sensitivity of South Hampshire and should help ensure that sustainable growth can be achieved throughout the Local Plan period. Reducing the amount of water entering the treatment works and receiving environments is also a key way of helping mitigate issues around the capacity of waste water treatment works and receiving environments, especially in relation to the discharge of Nitrogen into the surrounding harbours. We are also pleased to see the mention of water quality, ensuring that proposals are not detrimental to the water environment whilst also seeking opportunities to enhance it, helping achievement of Water Framework Directive objectives.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

7) Policy: HA44 - Assheton Court

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

This site has correctly been identified within the plan as lying partially within the current day flood zones 2 and 3, this risk is likely to increase with climate change. We understand that this policy proposes the redevelopment of an existing site but that it would result in additional units being proposed. We do not feel that enough evidence has currently been produced to demonstrate that this site could be delivered in a safe manner. We do not have details with regard to the particular flood risk characteristics that would affect the site but it is likely that there could be a significant depth of flooding in future years as a result of sea level rise. It must therefore be given careful consideration as to whether it would ever be possible to eliminate the risk of tidal flooding. If the proposal was for redevelopment of the site without the addition of additional units then there would be an opportunity to redesign the site to reduce the risk of flooding below what it would have been were there to be no changes made, this is obviously not the case if additional people are to be put at risk. Given the use of the site and the likely level of residual flood risk, consideration of flood response planning i.e. prior evacuation/safe refuge will be important. Our view is if this site is to be allocated for redevelopment then there should be no increase in occupancy, which would increase the number of people residing within an area of potentially significant flood risk. We would also point out that in the strategic flood risk assessment document that accompanies the plan, the column regarding whether the sequential test has been passed or not is blank. This obviously needs to be completed and we feel that the council should give consideration as to whether this is the correct type of development in this location. We acknowledge that sheltered accommodation already exists on this site but by redeveloping the site this extends the lifetime of the building over a time when the risk of flooding is also likely to increase.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Further consideration needs to be given to whether this is an acceptable location for the allocation. Currently there is no evidence that the sequential test has been passed for this site and that there are no other locations suitable in lower areas of flood risk. If the sequential test can be passed then further assessment of the future flood risk to the site should be undertaken to demonstrate that the site is deliverable in flood risk terms both now and in the future. If this can be demonstrated, we do not think that additional units should be included as part of this proposal as this would put more vulnerable people at risk and therefore the overall risk of the proposal would be increased.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It should be demonstrated that flood risk can be adequately managed for the site and there is no increase in risk to the site and its occupants. It would therefore be compliant with paragraphs 155 - 161 of the NPPF and policy CC2 of this plan.

Your suggested revised wording of any policy or text:

It should be demonstrated that flood risk can be adequately managed for the site and there is no increase in risk to the site and its occupants.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Early Years requirements in major new developments – a summary

This document provides summary guidance for Hampshire County Council and other agencies in determining a requirement for early years and childcare places to support new housing developments and to inform local planners.

This document augments the extant guidance entitled 'Early Years requirements in major new developments' where detailed estimates of place requirements, take up of early education entitlements for government funded hours, and parental demand are provided. This document is a guide to supply and demand in localised areas, and specifically addresses the Early Years requirements for the area of:

Fareham Borough

In looking at the demand for childcare in an area the Services for Young Children (SfYC) team typically look at the ward and adjoining areas Small Area Population Forecast (SAPF) data and assess it against the known supply of places. Childcare places need to be monitored regularly as the demand for childcare is directly and indirectly influenced by national and local policies. This childcare sufficiency work is carried out by the SFYC team and it is requested that prior to any development we are consulted and are able to share our up to date knowledge of the childcare need in the area.

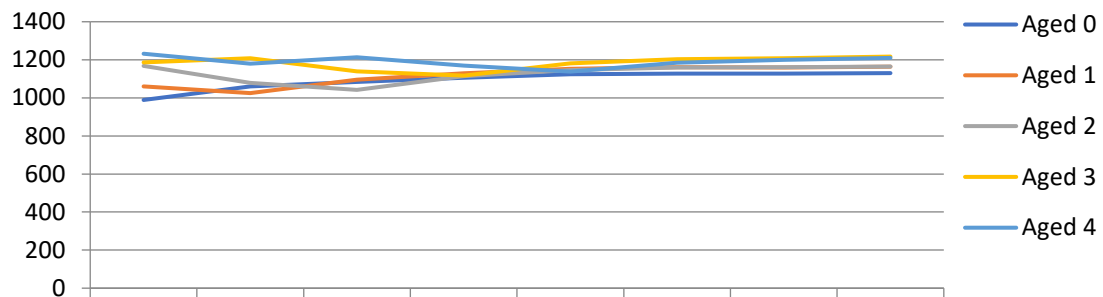

SfYC monitors childcare need for all early year's age cohorts. Early Years Education (EYE) is a statutory offer which is available universally to all three- and four-year olds from the term after their third birthday. For two-year olds, the offer is limited to children of families who meet low income criteria. There is no statutory EYE offer for children aged nought and one year old, but the local authority has a statutory duty under the Childcare Act 2006 to ensure working parents of children aged nought to five can access suitable childcare to meet their needs. This duty extends to children up to twelve years old for Out of School Care.

The overall Fareham area child population aged 0 and 4 years old dipped in 2019 by 83 but is projected to grow by a net 250 between 2018 and 2025 – 0.45% on 2018. The high-level trend projection to 2025 is shown below (Fig.1).

Significant growth in Fareham North ward is anticipated due to the impact of the Welbourne development. Most other ward areas are projected to see either a much slower increase or slight decrease in child numbers, with the overall picture apart from Fareham North showing a broadly static position.

Fig. 1

Fareham area population trend forecast 2018-2025

	2018	2019	2020	2021	2022	2023	2024	2025
Aged 0	989	1060	1083	1105	1124	1127	1127	1130
Aged 1	1060	1025	1095	1130	1153	1162	1160	1164
Aged 2	1168	1078	1042	1114	1146	1159	1162	1164
Aged 3	1186	1209	1140	1117	1181	1203	1209	1217
Aged 4	1232	1180	1213	1169	1138	1185	1200	1210

1. Demand for places:

The starting point is to calculate the number of children in each age group expected from the SAPF data. It must be noted that the SAPF is a modelled population forecast. It also does not take into account the fact that parents don't always take up their childcare places in the same district in which they live.

We know from market data that for each age cohort the percent of children requiring childcare in an early setting is typically:

Aged 0 – 1 yr old	17%
Aged 2 yr old	70%
Aged 3 yr old	99%
Aged 4 yr old	66% (It is assumed that 34% of this age cohort is typically at school)

Early Years Education (EYE) is a statutory offer which is available universally to all 3- and 4-year olds. For two-year olds, the offer is limited to children of families who meet low income criteria. In Hampshire, children can start their free entitlement in the term after their second/third and fourth birthday and can receive a maximum of 570 hours per child's eligibility year. From 2017 the Government increased the offer to 1140 hours for working parents; publicly known as the "30 hours offer".

EYE hours are not limited to the school academic year, offering parents the flexibility to take up their hours across the number of weeks that the provision is open. The demand for three-year-old places is high and trend data in Hampshire indicates that in the region of 90-95% of the three-year-old population take up this entitlement. It is, therefore, expected that there will be continued high demand from this age group within any new housing development.

The demand for four-year-old places, prior to their starting school, is also high. However, due to four-year olds taking up their school place, often in the September after their fourth birthday, the demand within the pre-school and nursery sector is in the region of 32-36% of the four-year-old population.

The demand for two-year olds continues to grow for families who meet certain low income level criteria outlined in section 2 below.

2. Low income families

Where housing developments include a significant level of social housing, shared ownership schemes and/or dwellings that would attract low income families, developers and planners should consider accessibility to affordable early years education and childcare.

Developers and planners should be aware that, since September 2014, the provision of free early years education to eligible 2-year olds is a statutory offer. The offer provides the same choices for parents as the free early years' education entitlement for 3- and 4-year olds. The exception is that the eligibility is primarily based on income assessment.

3. Space requirements and regulations

The space required to fulfil these requirements is stipulated within the [Statutory Early Years Foundation Stage](#) ¹

Section 3.57 sets out premises requirements and states, the premises and equipment must be organised in a way that meets the needs of children. In registered provision, providers must meet the following indoor space requirements:

- Children under two years: 3.5 m² per child.
- Two-year olds: 2.5 m² per child.
- Children aged three to five years: 2.3 m² per child.

These calculations should be based on the net or useable areas of the rooms used by the children, not including storage areas, thoroughfares, dedicated staff areas, cloakrooms, utility rooms, kitchens and toilets.

All early years and childcare operators must register with Ofsted as the regulatory body. Ofsted will inspect an organisation's ability to meet expected standards covered within the Early Years Foundation Stage. The Early Years Foundation Stage also contains expected minimum requirements for the suitability of premises which can be found within the same statutory framework document (accessed through the link on page 3). It is expected that all early years and childcare providers are able to meet requirements to deliver the free early years entitlement at the highest quality and Hampshire providers are expected to achieve and maintain "good" and "outstanding" inspection results.

¹ Statutory Early Years Foundation Stage 2014

4. What developers should provide

Developers should consider 80 early years places for every 1,000 houses and that these places are offered through a mix of facilities where possible. The childcare planning should allow for flexible hours of opening and covering at least 7am to 7pm for full day care.

For 1,000 houses, it is anticipated that one full day provision of 50+ places, together with an additional 30 places from shared community premises, would meet the needs of this size of development.

Where developments provide a high number of social housing dwellings, it is considered there will be the potential for greater demand for affordable childcare and access for two-year-old funded provision. It is likely that this childcare will be required to support employment activities and, therefore, any provision to support lower income families should have regard to the flexibility of opening and closing times of childcare to meet the employment or return to learning requirements of parents and carers.

The location of the childcare provision is parental choice, some choose for their childcare to be located near to their home address and some choose childcare close to their work- place.

The childcare market has also seen parents preferring provision that is close to, or on the site of, infant or primary schools where the school site is large enough to accommodate the provision.

5. Timing of the early years and childcare development

There must be early consideration of the allocation of the sites and/or premises for early years and childcare. It is recommended that such provision is considered for development and occupation at the same time as that for primary schools. This is especially important within developments that have little or no accessible early years and childcare provision adjacent to the new housing development.

The impact of a new housing development, alongside current capacity in the early years and childcare market, should also be considered in terms of early occupation of families and their ability to access provision and whether any interim measures are put in place prior to thresholds of dwellings occupied being reached.

6. How this should be provided

Recent practice suggests to planners / developers that provision should be made for early years and childcare facilities for children 0- 5 years within their plans for the housing developments. Childcare facilities should either be associated within / alongside community facilities or in a dedicated space identified and available for development. In either case, it is suggested that there are advantages with locating adjacent to, or combined with, primary school sites.

For dedicated nursery/childcare facilities, we suggest an area of 0.25 hectares. For combined school / pre-school sites this can be reduced to 0.2 hectares as there can be economies with a more flexible site layout when both are planned together. These

site areas are estimates that the Council has used in other recently provided facilities but will need to be tested against the draft accommodation briefs.

It is assumed that the sites would be made available through an open and transparent process to interested early years and childcare providers; or through the district councils and community associations where it is expected that childcare will be operated within community facilities.

The location of any provision must enable good access for walking along safe and pushchair accessible routes as well as having good public transport and motor-vehicle transport links and be within a 1-2 mile radius of the main housing development.

It should be noted that early years and childcare provisions of 50+ places are considered more economically viable and may attract the best investment opportunity from the sector.

It is also a requirement that a childcare operator that is seeking to accommodate children for free early years education makes an application to Hampshire County Council prior to opening their provision. Any developer who has engaged a childcare establishment to deliver or take up opportunity on their site should ensure the childcare provider contacts Services For Young Children at Hampshire County Council via email childcare@hants.gov.uk at the earliest opportunity.

7. Comments on identified Sites in Fareham Local Plan 2037, Housing Need and Supply

https://www.fareham.gov.uk/PDF/planning/publicationplan/Publication_plan_FINA_L.pdf

Ha1 North and South Of Greenaway Lane (824 dwellings)	This proposal would generate demand for an additional 50+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution. These places are essential, to meet the needs of working families
HA3 Southampton Rd (348 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families.

HA4 Downend Rd East (350 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families. In our Spring 2020 Childcare Sufficiency Audit Portchester West was identified as an area to be closely monitored due to the collective new and planned housing developments in the area.
HA7 Warsash Maritime Academy (100 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed. In our Spring 2020 Childcare Sufficiency Audit Warsash was identified as an area to be closely monitored due to the collective new and planned housing developments in the area. Existing settings are close to capacity, including Out of School provision. These places are essential, to meet the needs of working families
HA9 Locksheath Rd (70 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed
HA10 Funtley Road Sth (55 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed

<p>FTC 1 (20 dwellings) FTC 2 (100 dwellings) FTC 3 (120 dwellings) FTC 4 (94 dwellings) FTC 5 (49 dwellings) FTC 6 (45 dwellings)</p>	<p>The plan does not indicate the provision of childcare facilities. These are generally small developments in dispersed locations; however collectively they create 428 dwellings in the Fareham Town Centre Area. A new Full Day Care nursery offering approximately 50 places has opened in Fareham Town Centre which may relieve the pressure on places in the area. The impact of new housing on childcare sufficiency in Fareham Town Centre will need to be closely monitored by SFYC.</p>
<p>Planned developments with less than 50 dwellings (HA12,HA13,HA15,HA19,HA22, HA23,HA24,HA26,HA27,HA28, HA29,HA30,HA32,HA33,HA34,HA35,HA36, HA37,HA38,HA39,HA41)</p>	<p>These are smaller developments in dispersed locations. Depending on the housing mix and age demographic of the residents any generated demand can most likely be accommodated in existing provision.</p>

8. Contact

Hampshire County Council's Children's Services can be contacted to discuss any support requirement in selection of appropriate high quality early years and childcare providers or any aspects of the regulation and legislation requirements.

The childcare and early years education development team can be contacted via childcare@hants.gov.uk

Date: 18/12/2020

Dear Sir or Madam

Regulation 19 Local Plan Consultation

Thank you for consulting Historic England on the above document. Our main comments are set out in Appendices 1 and 2 to this letter.

Appendix 1 deals with all policies we wish to make comment on, excluding site allocation policies. Site allocation policies are located in Appendix 2. Appendix 3 is the same set of comments in Appendices 1 and 2, The official forms do not appear to be editable, so we have not used them.

We do not consider our appearance to be necessary at examination on any of the points we have raised, however, we would be happy to attend, should the Inspector request this.

Yours faithfully

Edward Winter

Historic Environment Planning Adviser

Correspondence or information which you send us may therefore become publicly available.

Appendix 1: Table of Historic England’s detailed comments on the Fareham Regulation 19 Local Plan Policies (excluding site allocations: see Appendix B for site allocations)

Policy/section	Soundness/legal compliance/DTC	Comments	Suggested change
Vision, strategic priorities	Not sound.	We welcome the reference to the continued protection of heritage in the vision, and strategic priorities 3 and 10. These are important elements of the positive strategy for the conservation and enjoyment of the historic environment, which the plan should demonstrate, as set out in NPPF paragraph 185. However, to be consistent with NPPF, and therefore sound , para 185, in Strategic Priority 10, “historical assets” should be replaced with “historic environment”.	In Strategic Priority 10, “historical assets” should be replaced with “historic environment”.
Policy HP1: New Residential Development	No comment.	No comment.	
Design chapter, Policy D1	Sound.	We welcome the characterisation of well-designed, contextual development that is “responsive to local history, culture and heritage”, and the reference to heritage in criterion (i) in Policy D1.	
Strategic Policy DS3: Landscape	Sound.	We support criterion (f) as part of the positive strategy for conserving and enhancing the historic environment	

Historic England, 4th Floor, The Atrium, Cannon Bridge House, 25 Dowgate Hill, London EC4R 2YA Telephone 020 7973 3700 HistoricEngland.org.uk

Please note that Historic England operates an access to information policy.

Correspondence or information which you send us may therefore become publicly available.

Strategic Policy HE1: Historic Environment and Heritage Assets	Sound.	We support having a strategic policy for the historic environment and heritage assets and welcome its identification in paragraph 1.35, which lists those policies that are considered to be strategic, in line with NPPF paragraph 21. The inclusion of a strategic policy for heritage complies with NPPF paragraph 20.	
Historic Environment Chapter (general approach)	Sound.	We support the approach the Council has taken, to have separate policies for conservation areas, listed buildings/structures & settings, archaeology, non-designated assets and heritage at risk. The separation of each of these asset-classes provides more detailed policy for each of the identified types of asset, which should be more useful to applicants and decision-makers. The detailed policies are supported by the strategic policy, which also references national heritage policy. NB: Fareham has locally listed parks and gardens, i.e. non-designated assets, but has no registered parks & gardens i.e. designated assets.	
Background paper	Sound.	We welcome the background paper as a useful tool in demonstrating that a suitable evidence base has informed the plan, in respect of the historic environment.	

Appendix 2: Table of Historic England’s detailed comments on the Fareham Regulation 19 Local Plan Site Allocation Policies

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
FTC1	Palmerston Car Park	Sound	A number of grade II listed buildings and structures, as well as a conservation area are located near to the site. These assets should be conserved and enhanced. The historic environment policies in section 12 of the plan and criteria c and d in policy FTC1 are considered appropriate for this purpose.	
FTC2	Market Quay	No comment.	No comment.

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
HA42	Land South of Cams Alders	Not sound	<p>Proposed site allocation H42 is one of three sites proposed to be allocated for sheltered housing, in this case for 60 dwellings, the site being 1.29 hectares in total area. The site allocation plan shows the extent of the scheduled area of Fort Fareham, as well as a 50m buffer around the monument. The site allocation area, is located approximately 70m due north of the monument, at the closest point. The site allocation area extends to the north-east and north-west of this point, with an irregular shape.</p> <p>The whole of the proposed allocation is considered to be located within the setting of Fort Fareham. The setting of the fort has already been significantly compromised by development in its setting, as well as within the monument itself. The northern corner of the monument, where the proposed allocation is located, therefore represents the only significant area that remains free from development, and this would have been part of the field of fire associated with the fort. This area does contain a tree belt,</p>	<p>Change criterion (h) to:</p> <p>“h. Provision of a heritage statement (in accordance with Policy HE3) that assesses the potential impact of proposals on the significance of Fort Fareham and through development in its setting, together with an archaeological assessment (in accordance with Policy HE4) and a scheme of mitigation to off-set any harm to the setting of the monument.”</p>

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>which, through blocking the field on fire, also compromises the setting, but as this is not development, we consider this is something that has the potential to be reversed at some point in the future.</p> <p>The allocation text or plan does not make clear to what extent the allocated area would be built upon, but with a stated capacity of 60 dwellings on a site of 1.29 hectares, we presume that no significant areas of the site would be left undeveloped. Therefore it is likely that the proposed development will affect the significance of the monument, through development in its setting.</p> <p>The NPPF states that “[heritage] assets are an irreplaceable resource, and should be conserved in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of existing and future generations” (184), and that “great weight should be given to the asset’s conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>substantial harm, total loss or less than substantial harm to its significance” (193). “Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting), should require clear and convincing justification” and “scheduled monuments are considered to be assets of the highest significance” (194).</p> <p>The NPPF also states that “significant adverse effects on [any of the sustainability] objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered) (32).</p> <p>We recognise that the site allocation requires a heritage statement and this is welcome.</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>In the SA of the publication version of the plan, the main reason for the site selection seems to be based on location: the SA asserts that demand for sheltered housing is most likely to occur in Portchester and Fareham South. Presumably, no other suitable sites are suitable, in terms of location (if other sites were available that do not cause significant adverse effects on a sustainability objective, following NPPF para 32, Land South of Cam Alders should not be allocated). However, given that the impact of the proposed allocation is recognised as ‘negative’ in the high level assessment result, in the historic environment objective, the policy should reflect the NPPF requirement to mitigate, as set out in para 32.</p> <p>Therefore the site allocation should require a mitigation plan to offset harm to the setting of Fort Fareham. Without this, we consider the policy to be inconsistent with national policy and therefore unsound.</p> <p>In addition to the above concern, the</p>	

Site ref	Site name	Soundness/legal compliance/DTC	Comments	Suggested Change
			<p>policy is also somewhat unclear in terms of its wording, with regard to “conservation and setting...” and “grade II scheduled monument”. Fort Fareham is not a grade II scheduled monument: this classification does not exist. It is both a scheduled monument, AND a grade II listed building. In such cases, the scheduling take precedence. Describing Fort Fareham as a grade II scheduled monument could give the impression that it is not an asset of the highest significance. The reference to “conservation and setting” is considered to lack clarity. We suggest criterion (h) is amended as suggested below, to account for all three of our concerns. Without amendment, we consider the policy to be inconsistent with national policy and therefore unsound, for each of the three reasons we cite.</p> <p>“h. Provision of a heritage statement (in accordance with Policy HE3) that assesses the potential impact of proposals on the significance of Fort Fareham and through development in</p>

1) Policy: H1 - Housing Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA 7 Reference 3088. 100 dwellings for this site is too intensive. This area borders on nature reserve and the coastal footpath is a vital to residents for leisure and recreation as well as being an important area for migratory birds. This area should not be developed to such a scale but existing buildings converted only. HA1 Ref - 3126 Page 51. (a) Again the number of houses built at 824 is far too intensive for this site, which is DESIGNATED COUNTRYSIDE and is important site for wildlife. Development numbers should be reduced allowing green space to border all road frontages so that the development doesn't impinge on existing residents. (b) There should be more access onto Lockswood Road so that Brook Lane which is a main cycle route for children going to the Secondary School are kept safe.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

It is not sound as it is focussing too much development in one small village.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Have consideration to the Designated Countryside and build on brownfield sites only.

Your suggested revised wording of any policy or text:

If this is my only chance to make a representation then you should make it easier to do so.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

1.0 INTRODUCTION AND SUMMARY

1.1 Southern Planning Practice are instructed by Raymond Brown Minerals & Recycling Ltd (Raymond Brown), to submit representations to the Regulation 19 version of the Fareham Local Plan 2037. Raymond Brown is acting on behalf of the two landowners, Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd (please see attached land ownership plan).

1.2 Raymond Brown is part of the Raymond Brown Group, a leading recycling and waste management business and distributor of primary and recycled aggregates for use in construction applications. One of their sites is at Rookery Farm, Fareham. The land is located immediately north of the M27 motorway and to the west of Whiteley. Access is from Botley Road, approximately 100m north of the bridge over the M27.

1.3 The Local Plan, as drafted, is assessed to be UNSOUND and also fails to comply with the Duty to Co-Operate. These representations set out the reasons why: -

1. the Plan is considered to be UNSOUND and
2. fails to comply with the Duty to Co-Operate

and sets out the steps that require to be taken to make the Plan SOUND.

1.4 Separate representation forms have been submitted against each policy and paragraph which is considered to be UNSOUND, but the case to be made is set out in full in this document.

1.5 In summary, OBJECTION is raised to Strategic Policy H1 Housing Provision on the grounds that the figures promoted are not soundly based or justified. This is addressed in detail in Section 2.0. Objection is also raised to the allocation of a number of the housing sites in that they are not suitable, and /or available and/or achievable, particularly within the Local Plan period. This is addressed under Section 3.0.

1.6 Section 4.0 sets out why Land at Rookery Farm should be allocated as a Housing Site to start to address the issues identified in Sections 2.0 and 3.0. Section 5.0 draws these matters together with consideration of modifications that are required to be made to the Plan

to ensure that it is SOUND and will provide a sound planning framework to deliver the much needed housing over the Plan Period.

- 1.7** It is concluded that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.
- 1.8** Objections are therefore raised to Policies H1, FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13 and the omission of an allocation for housing for Rookery Farm, Botley Road, Fareham. Objections are also raised to paragraphs 3.19 (including Figure 3.1) as well as paragraphs 4.1 – 4.20 including Tables 4.1, 4.2 and 4.3.

2.0 OBJECTION to Strategic Policy H1 – Housing Provision

Overview

2.1 The objections to this Policy are several and are addressed individually below. The individual and cumulative failings render the policy UNSOUND and as Strategic Policy H1 forms the basis for the provision of much needed housing across the whole Borough, it follows that the whole Plan is rendered UNSOUND. It should be noted that although the issues have been subdivided into several sections, many of the issues interrelate and cumulatively exacerbate the conclusions drawn that the Council is failing to provide properly for its housing need.

2.2 The objections to this Policy include:

- (i) The Housing Numbers used and in particular the reliance on the draft Standard Method set out in the Changes to the Current Planning System in the Government’s White Paper;
- (ii) Duty to Co-Operate and Unmet Need – Fareham has not undertaken this Duty in a sound manner;
- (iii) Additional factors Contributing to the Shortfall, including the 5 year Housing Land Supply Position;
- (iv) Over-reliance on Welborne to provide a significant proportion of Fareham’s housing which is considered unachievable, resulting in a need for more sites to be allocated;
- (v) Inability to meet the identified Affordable Housing Provision;
- (vi) Over-reliance on Windfall allowance

2.3 Before analysing the approach adopted by Fareham, it is first worth reviewing the clear guidance on the approach to be followed as set out under the National Planning Policy Framework (NPPF) and the Planning Practice Guidance (PPG). It is important to note that the NPPF makes it clear that “*strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas*” (Paragraph 11).

2.4 Paragraph 60 builds on this and states that “*To determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional*

circumstances justify an alternative approach which also reflects current and future demographic trends and market signals. In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.” This clarifies how the housing numbers calculated by the standard method should be considered when preparing a Local Plan. Paragraph: 004 (Reference ID: 2a-004-20190220) of the Planning Practice Guidance confirms that the standard method should be used to calculate a **minimum** (emphasis added) housing need figure.

2.5 In addition to the Borough’s own housing needs, as acknowledged by the draft Local Plan, its housing figure needs to incorporate the needs of neighbouring authorities. Paragraph 35 a) of the NPPF sets out that in order for a plan to be sound it must be positively prepared *“providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs (our emphasis); and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development”*.

2.6 The following sections demonstrate how Fareham has failed to follow this clear guidance with the result that Strategic Policy H1 and the Plan is UNSOUND.

i) **Housing Numbers: Reliance on the Standard Method set out in the ‘Changes to the Current Planning System’ White Paper.**

2.7 The Publication Draft correctly points out at Para 4.2 that *‘Local housing need should be determined by using the Standard Method set out in national Planning Practice Guidance (PPG). This Method currently combines 2014-based household projections with affordability data released in March 2020 to calculate the annual need. Using this method, the housing need for Fareham currently stands at a minimum of 514 dwellings per annum (dpa).’*

2.8 Fareham, however, has chosen to use the new Standard Method set out in the ‘Changes to the Current Planning System’ White Paper, which was published on 6th August 2020 with consultation closing on 1st October 2020.

2.9 Para 4.2 of the Publication Draft explains why the Council has ‘jumped the gun’ and used the draft new Method:

'The Council therefore considers it appropriate for this Publication Local Plan to plan for a scale of growth based on the proposed new Method, and not one based on out-of-date household projections. This reduces the housing need figure to 403 dpa, based on a base date of 2021. The new Method would be introduced with a change to the PPG and the timing of submission of this plan for examination will be determined by the precise wording of the government policy.'

- 2.10** ON 16 DECEMBER 2020, GOVERNMENT ANNOUNCED THEIR RESPONSE TO THE 'CHANGES TO THE CURRENT PLANNING SYSTEM' WHITE PAPER AND PUBLISHED REVISED PROPOSALS FOR ENABLING THE DELIVERY OF MORE HOMES ACROSS ENGLAND. IT IS UNDERSTOOD THAT GOVERNMENT WILL NOT NOW PROCEED WITH THE DRAFT NEW STANDARD METHODOLOGY ANNOUNCED EARLIER IN THE YEAR AND ON WHICH FAREHAM HAS BASED ITS HOUSING NUMBERS. INSTEAD, THE GOVERNMENT HAS ANNOUNCED THAT IT WILL CONTINUE TO RETAIN THE STANDARD METHOD IN ITS CURRENT FORM WITH THE ADDITION OF A 'TOP-UP' APPLICABLE TO ENGLAND'S 20 LARGEST CITIES. PLEASE SEE LINK:

<https://www.gov.uk/government/consultations/changes-to-the-current-planning-system/outcome/government-response-to-the-local-housing-need-proposals-in-changes-to-the-current-planning-system>

- 2.11** It follows that the only basis that Fareham can and should proceed at the current time is to use the existing Standard Method which would result in an uplift in its dwellings per annum (dpa) from 403 to at least 514.

ii) Duty to Co-Operate and Unmet Need from Neighbouring Authorities

- 2.12** Fareham Borough Council is a member of the Partnership for South Hampshire (PfSH). In September 2019, Fareham Borough Council and Havant Borough Council together with all the authorities of the PfSH published a Statement of Common Ground (SOCG). The SOCG sets out how the local authorities in South Hampshire have successfully worked together on strategic planning matters and how they continue to do so. As part of the Local Plan Review, a Statement of Compliance with the Duty to Cooperate has been produced. This is in accordance with Paragraph 24 of the NPPF. This confirms that the Council is proposing to

take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution (Paragraph 4.6).

- 2.13** Fareham Borough Council is identified as being within the Portsmouth Housing Market Area (HMA). The PfSH Strategic Housing Market Assessment (SHMA) indicates an overall objectively assessed need figure of 121,500 dwellings, over the whole PfSH area from 2014-2036. It should be noted that the SHMA was prepared in January 2014 and the identified housing need is not based on up to date figures, therefore its housing numbers are considered to be out-of-date. The SOCG acknowledges that the housing need figures within the PfSH Spatial Position Statement (SPS) (2016) are not in accordance with standard methodology set out in NPPF (2019). The SPS is being reviewed to bring it in line with updated development needs. However, there is no indicative timescale for the SPS review and given the recent Housing White Paper, such a statement is unlikely to come out ahead of the submission of the Fareham Local Plan.
- 2.14** One key issue arising for the PfSH Portsmouth HMA/PfSH East (Portsmouth, Havant, Fareham, Gosport, Winchester) is the challenge of delivering sufficient homes to meet the housing need of the area given the significant geographical constraints and nationally important environmental and landscape designations. It is acknowledged that some authorities within the PfSH East area are more constrained than others. Portsmouth, Havant and Gosport are all physically constrained as well as having coastal environmental designations, to varying degrees. Therefore, as Fareham Borough is less constrained and physically has the space to provide housing in addition to its own need, the Borough should look to accommodate unmet need from neighbouring authorities.
- 2.15** It is acknowledged that Portsmouth cannot meet its housing need and a key role of PfSH has been to consider the capacity of other local authorities in the PfSH area which could contribute to accommodating the unmet need arising from Portsmouth. As acknowledged, Fareham Borough has relatively few constraints compared to its neighbouring authorities, indeed Fareham Borough has been identified as an area which can help to accommodate the unmet need arising from Portsmouth. Paragraph 4.5 of the Publication Plan confirms that Portsmouth City Council have asked Fareham to contribute 1,000 dwellings to their unmet need. It also confirms that there is likely to be an unmet need arising from Gosport and Havant (this is now emphasised in Table 1, if the standard new method were applied). However, Fareham have only included 847 dwellings in the total housing requirement to

contribute to the unmet need of neighbouring authorities. This figure is alone not enough to provide for Portsmouth's unmet need, never mind the other authorities within the PfSH East area. It is evident therefore that the plan is not appropriately planning for unmet need arising from neighbouring authorities and has not been positively prepared in accordance with paragraph 35 a) of the NPPF. It is therefore unsound.

- 2.16** The following table looks at the housing need per annum for all the authorities within the PfSH East area. It sets out the current local plan requirement, the average delivery rate over the last 3 years, the housing figure under the current standard methodology and the housing figures under the proposed new standard method set out in the August 2020 consultation 'Planning for the Future' White Paper. It should again be noted that Fareham Borough Council are using the housing need figure calculated by the proposed new standard method set out in the White Paper, not the current standard method required by the NPPF.

PfSH East	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard method	Proposed new standard method (at August 2020)	Change in housing requirement under SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1,025	+333
Total	1,804	1,828	2,802	3,430	+628

Table 1 – Housing need per annum and delivery rates for authorities within PfSH East

- 2.17** It is also pertinent to note that whilst Fareham has chosen to adopt the draft new Standard Methodology for its own figures, it has not acknowledged the implications arising in terms of the Duty to Co-operate and that there is a significant uplift overall in the housing requirements, including for those authorities potentially already struggling, including Havant and Gosport.

2.18 In Summary:

- No Local Authority in the PfSH East area is currently planning for enough homes to meet their identified need.
- Whilst the housing need as calculated by the proposed new standard method (August 2020) for Portsmouth and Fareham has slightly reduced from the current standard method, the housing need for Gosport, Havant and Winchester has significantly increased. This has resulted in an increase of just over 600 dwellings per annum in the PfSH East area.
- No Local Authority in the PfSH East has been able to deliver their housing need as required by the current standard method in the last 3 years.
- The total housing need in the PfSH East area under the proposed new standard method is far higher than the previously identified housing need.

iii) Additional Factors affecting Fareham's Housing Numbers

2.19 Table 1 (Housing need per annum and delivery rates for authorities within PfSH East) confirms that no Local Authority in the PfSH East area has been able to deliver their housing need as required by the current standard method in the last 3 years. There could be several explanations for the authorities not meeting their housing need including reliance on large sites not coming forward or delivering at the rate they should, not appropriately planning for the homes they need and the recent Solent nitrate issue could all be contributing factors.

2.20 In June 2020, Fareham published their 5 year housing land supply position. At this time, Fareham had a supply of 2.72 years. This supply obviously falls substantially below the government's requirement of a 5 year supply, as set out in Paragraph 73 of the NPPF. After reviewing the housing supply, as set out in the 5 Year Housing Land Supply Report, it is apparent that the Council remains reliant on a few large housing sites coming forward to contribute to the housing land supply in future years.

2.21 As such, Fareham Borough Council should look to bolster their supply through the allocation of a range of sites as encouraged by the NPPF.

2.22 To be able to meet the increased housing needs in a sustainable manner, and to maintain a 5 year supply of deliverable housing sites across the Plan period, the Council must look to

all tier settlements in the hierarchy to deliver homes through a range of sites. However, it should be noted that strategic sites should not be solely relied on due to lengthy lead in times. Instead, a mix of housing sites should be sought and allocated to enable a 5 year supply to be achieved and maintained.

2.23 In addition to bolstering the supply going forward, Fareham need to seek to address the backlog of unmet need. In particular, the South Coast Nitrate crisis put thousands of homes on hold for some time to resolve the eutrophication issues of the Solent to reduce impact on the protected habitats and species. The Nitrate Neutrality Update Report to PfSH Joint Committee (14 October 2019) acknowledged that *“given that there is a severely reduced number of permissions being granted in the PfSH in the financial year 2019/20, it is not unnecessary to assume that the delivery of homes will be suppressed in the years 2020/21 and 2021/22.”*

2.24 The submission Local Plan is very conservative in its ambitions for growth in the Borough, especially considering it is under a Duty-to-Cooperate to meet neighbouring authorities’ unmet need. It does not allocate many new sites and instead relies heavily on sites that have been allocated previously. Strategic Policy H1 confirms this, as the provision for 8,389 homes comprises the following:

- 552 homes already with planning permission
- 4,858 homes on sites with resolution to grant permission (Welborne contributes the large majority of these homes)

2.25 Therefore, around 65% of the housing provision already has planning permission or resolution to grant, meaning the Local Plan only allocates sites for approximately 1,750 homes for development over the plan period despite only 2.72 years of housing land supply and a record of under delivery in the Borough. It is of note that nearly 50% of the housing provision is reliant on the Welborne allocation. If this allocation is not to come forward in the plan period due to funding issues, or be significantly delayed, Fareham’s housing provision will be significantly reduced and identified housing needs will not be met. As such, the emerging Local Plan MUST look to allocate further sites accordingly.

2.26 Reflecting the above the application of a 15% contingency as shown under Table 4.3 and explained at paragraph 4.12 of the Plan appears woefully inadequate.

iv) Over Reliance on Welborne Garden Village

- 2.27** Fareham is relying very heavily on one strategic site to deliver almost 50% of its housing provision, namely Welborne Garden Village. Of the supply identified in Table 4.2 relating to Strategic Policy H1, some 4,020 of the overall provision of 8,389 is to come from this one strategic site. This is flawed and potentially undeliverable. Following a resolution to grant planning permission in October 2019 for the outline planning application under Ref: P/17/0266/OA, the Section 106 agreement has still not been signed and therefore planning permission has not yet been issued. According to the Council's website and details held on the outline planning application, a decision is due by 8th January 2021.
- 2.28** The Delivery Report¹ on Welborne Garden City sets out that up to 750 homes will be delivered in the first 5 years. However, this figure appears highly unrealistic and unachievable as set out in more detail below; in addition, the site cannot be developed until funding is secured for Junction 10 of the M27.
- 2.29** On 14 January 2020, Hampshire County Council published an Executive Decision Record on the M27 Junction 10. It confirmed that the progression of work on the Full Business Case is at an impasse, and it is understood that HCC were terminating the role as scheme promoter to avoid abortive work or expenditure, pending resolution of funding and delivery arrangements of the scheme.
- 2.30** The delivery of the Garden City is suggested to be over a 20 year period, with on average 300 dwellings a year being completed. It would be expected higher delivery in early years, lower delivery in later years. As acknowledged, the submission Local Plan relies on approximately 4,000 homes from Welborne coming forward in the plan period.
- 2.31** With regards to the delivery of the site, a key point of note is in the Council's latest 5 year Housing Land Supply (HLS) Position Statement (June 2020). This statement sets out, at paragraph 29, that the site promoter anticipates commencements/completions at Welborne to occur approximately two years later than that set out within the information supporting the

¹ Page 83 of the Delivery Document <https://welbornegardenvillage.co.uk/delivery/>

planning application. It is acknowledged that the site promoter has advised the Council of the following anticipated delivery rate:

- 30 dwellings in 2022-23
- 180 dwellings in 2023-24
- 240 dwellings in 2024-25

2.32 The above figures indicate that Welborne can only deliver 450 homes in the next 5 years, up to 2025. This is already a significant drop from the figure set out in the original planning application which was suggesting the delivery of 750 homes within 5 years of commencement. If Welborne can only deliver 450 homes in the next 5 years, it seems an impossible task to deliver the remaining circa 3,550 over the remaining 12 years of the plan period.

2.33 In addition, given the current lack of funding for the access, the anticipated delivery seems highly unlikely and this will have a dramatic effect on Fareham's 5 year HLS and securing its overall housing provision. Therefore, it is considered that relying on one site to deliver a significant number of houses is a high risk strategy. As such, a greater range of sites should be considered.

v) Affordable Housing

2.34 Paragraph 4.3 of the draft Local Plan confirms that '*The need for affordable housing in the Borough is based on the number of existing and newly formed households who lack their own housing and cannot afford to meet their housing needs in the market*'. The Council goes on to state that it is confident that it will meet its affordable housing needs through the provision based on its Policy HP5 and it does not need to make any further adjustments to its overall housing figures.

2.35 However, paragraph 5.29 of the draft Local Plan indicates that one of the key issues facing residents in the Borough is the unaffordability of homes to buy or to rent, and that therefore the delivery of homes that are affordable is a priority. The Council's Affordable Housing Strategy 2019 – 2036 (2019), as referenced at paragraph 5.30 of the draft Local Plan, indicates that there is a need for some 3,500 affordable homes up until 2036. It is not clear how the housing number can and will meet the identified affordable housing demand.

2.36 Key concerns include:

- The reliance on the number of houses, including affordable housing, to be delivered by Welborne. The very real concerns over the deliverability of housing from Welborne has already been addressed; the issues identified have a consequential impact on the delivery of affordable housing;
- The heavy reliance in terms of the overall housing provision on windfall sites, many of which are likely to fall under the threshold of 10 or more dwellings and therefore not deliver any affordable housing;
- The reliance on a range of allocated sites (Section 3) which appear to be aspirational rather than realistic and therefore again the impact on the provision of affordable housing.

2.37 The Council fully recognises its substantial affordable housing need across the Borough over the Plan period but it is simply not at all clear that the numbers required can be met under the housing provision being made. It is therefore concluded that the very clear potential that the need for affordable housing in the Borough will not be met leads to a need to increase the overall housing requirement.

vi) Windfall Allowance

2.38 Part of the Housing Provision is to be met through unexpected (windfall) development. There is no issue in principle with including an allowance for windfall development, but that figure must be realistic and based on evidence.

2.39 The NPPF defines windfall sites as 'sites not specifically identified in the development plan'. Paragraph 70 of the NPPF sets out that where an allowance for windfall sites is to be made, there should be compelling evidence that they will provide a reliable source of supply, using the strategic housing land availability evidence, historic windfall delivery rates and expected future trends to support such an allowance.

2.40 In this case the Council is relying on 1,224 new homes to come through windfall development out of total of 8,389 new homes. Whilst it is appreciated that the methodology for calculating windfall allowances have changed over time, it is worth noting that in the current adopted Local Plan Part 2: Development Sites and Policies (2015), the average historic windfall

allowance was calculated to be 20 (Appendix F). In the 5 Year Housing Land Supply Position Paper to Planning Committee on 24 June 2020, the Council included a small site windfall allowance of 37 dwellings for each of 2 years (years 4-5).

- 2.41 In the draft Local Plan the reliance on windfall sites has jumped to 1224 which if crudely divided by the length of the Plan period (16 years) gives an annual figure of 76.5. There is no explanation to justify such an over reliance on windfall figures.

Conclusions in respect of Strategic Policy H1

- 2.42 It is clear that there are fundamental concerns over many aspects of the Council's housing provision which have been explored in this Section. There can only be one conclusion that the provision is woefully inadequate and is **UNSOUND**.

3.0 Analysis of Housing Allocations

- 3.1** The Council has allocated and is relying on a number of ‘development’ sites to assist in the delivery of and in meeting its housing provision. However, the suitability, availability and achievability of several of these sites needs to be questioned and whether they can and will deliver the number of units proposed. It is acknowledged that these sites are not proposed for delivery of housing numbers in the early years of the Plan but it must still be questioned whether there is sufficient confidence that these sites will be brought forward, that they should be included in the plan.
- 3.2** This analysis has only focussed on the medium to larger of the sites, most of them proposing to bring forward in excess of 50 units and there may well be serious issues of suitability, availability and achievability with some of the smaller sites. It is noted that at least 9 of the sites are indicated to make provision for less than 10 units. It is unusual for sites yielding such a small number of units to be included as specific allocations; it begs the question as to whether the Council has needed to bring in such small sites to secure its numbers.
- 3.3** The number of sites where there are serious concerns and questions over their suitability, availability and achievability total at least 6, which in total would provide some 400 – 500 residential units. These sites are addressed below, and the order selected simply follows the order in which they are listed on pages 39 – 40 of the draft Plan and then considered in further detail under site specific policies.

FTC1 Palmerston Car Park (Indicative Dwelling Yield: 20) (SHELAA ref: 3233)

- 3.4** This is a constrained town centre car park site and the development of housing will be constrained by issues of noise and disturbance from the surrounding roads as well as the service access to the Shopping Centre. The setting of the adjacent Osborn Road Conservation Area to the north will need to be preserved. The Council is keen, under other policies to safeguard and promote Fareham town centre as its principal town centre but there appears to be no co-ordinated car parking strategy to ensure that the loss of existing car parking sites will not compromise those objectives.

- 3.5** At the very minimum the proposal that this site can deliver up to 20 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC2 Market Quay (Indicative Dwelling Yield: 100)
(SHELAA ref: 1425)**

- 3.6** This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 60 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 100 units. The site is also expected to deliver approx. 4000 sqm of commercial leisure space together with a new multi storey car park and new town square. The future and viability of town centre strategies may need a comprehensive review in a post Covid era. The site specific requirements also make reference to the possibility of a hotel which presumably, if brought forward, would impact on the achievement of other elements of the proposal, including the residential. There is no indication that there is any real prospect of bringing the site forward over and above aspirational objectives.

- 3.7** At the very minimum the proposal that this site can deliver up to 100 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC3 Fareham Station East (Indicative Dwelling Yield: 120)
(SHELAA ref: 0211)**

- 3.8** There are fundamental questions about the suitability and achievability of this site for the intended development. This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 90 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 120 units. Such an ambitious scheme would appear to depend on a comprehensive approach, particularly given the limited access options. Yet, even the SHELAA assessment identifies that the site is in multiple commercial and industrial uses, including railway related uses which brings into question site assembly issues both in terms of achievability and timing.

- 3.9** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC4: Fareham Station West (Indicative Dwelling Yield: 94)
(SHELAA Ref: 0212)**

- 3.10** This is a long and very narrow site sandwiched between the railway to the east and protected trees to the west. The allocation and the SHELAA recognise the multiple constraints facing this site in terms of bringing it forward for development. These constraints include, amongst others, the multiple uses existing on the site, the access constraints including that the existing access crosses land in Flood Zone 2, noise, contamination and amenity issues.

- 3.11** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC5: Crofton Conservatories (Indicative Dwelling Yield 49)
SHELAA Ref: 1325**

- 3.12** This site continues to be in active retail use, following the expiry of a temporary permission for retail use and the potential availability of the site is questioned.

**HA7: Warsash Maritime Academy (Indicative Dwelling Yield 100)
SHELAA Ref: 3088**

- 3.13** This site has a long history and has been carried forward from the Local Plan Part 2. The site faces considerable issues in terms of bringing forward a suitable and viable housing development, not least of which is that the western part of the site must be excluded from development because of flooding issues and discussions with Natural England would potentially exclude further land to secure appropriate buffers to sites of international nature conservation significance. As a result, the majority of the development and residential units

would necessarily be brought forward through the conversion of the existing listed buildings on site, potentially impacting on viability.

3.14 The site lies in the countryside and is remote from shops and facilities. There are traffic problems along Newton Road which is the only access solution leading to Warsash Centre and up to Park Gate where permission exists for some 800 residential units.

3.15 The viability and achievability of this site for some 100 residential units must therefore be questioned.

3.16 Due to the ecological and highway issues the Council has determined that any planning application should be submitted with an EIA.

HA13 Hunts Pond Road (Indicative Dwelling Yield 38)

SHELAA Ref: 305

3.17 Under the Local Plan Part 2 this site was allocated under Policy DSP53 for Community Uses as part of a larger scheme to include education and open space. It is understood that the site is no longer required by Hampshire County Council for educational purposes, but there is no confirmation that a proper assessment has been undertaken of the continued need of this land for local community uses.

HA4 Downend (Indicative Dwelling Yield 350)

SHELAA Ref 3030

3.18 Site HA4 at Downend for some 350 residential units has been the subject of two planning applications both of which were refused against officer recommendation. The first planning application was dismissed at appeal justifying the council's reason for refusal. It is likely the second application which was refused in November 2020 will be appealed however, the committee's stance in terms of determining both applications on this site brings into question whether the council really support this housing allocation. It is therefore questioned whether the Council should be relying on the site as a housing allocation which the Council has found, in the form of the most recent applications, wholly unacceptable.

Other Sites

- 3.19** There are potential constraints with a number of the other sites, which may at the very least delay their delivery or even bring into question their achievability. Site FTC6, Magistrates Court at Fareham and allocated for some 45 units is held up by a complicated deal to resolve the nitrates issue, involving land within Winchester District.

Conclusions and Implications Arising

- 3.20** This analysis demonstrates that there are serious and substantial questions over the suitability, availability and achievability of a number of the allocated sites and whether they will be able to provide the housing figures, either in whole or in part which Fareham is seeking to rely upon. It is therefore contended that it is UNSOUND for Fareham to rely on each and all of these housing sites to deliver all of the dwelling units proposed
- 3.21** This adds to the strength of the argument, as set out under Section 2, that Fareham needs to bring forward additional sites for allocation to help meet its housing need. The next section focuses on why land at Rookery Farm should be included as a housing allocation in the Local Plan.

4.0 Rookery Farm

4.1 It is clear from Sections 2.0 and 3.0 that not only has Fareham under provided on the housing figures it requires to meet over the Local Plan period, but it is very unlikely that it will be able to deliver even the numbers it is proposing to provide. Fareham therefore needs to allocate further housing sites to improve housing deliverability; Rookery Farm should be allocated as a housing site. This was allocated in the draft Reg 18 Supplement in early 2020 under the Policy Reference HAX (SHELAA ref: 0046).

Site Location

4.2 The site is located immediately north of the M27 Motorway and west of Whiteley. Access is from Botley Road approximately 100m north of the bridge over the Motorway. Please see attached site plan showing the land forming part of the proposed development area. It is estimated at this early stage that the site could accommodate in the region of 150-200 residential units including an element of affordable housing and a mix of housing types to accord with Fareham's policies and approach to housing mix.

4.3 146 Botley Road (also known as Rookery Farm) lies to the north of the land and is in separate private ownership. The dwelling is listed. Residential development along Swanwick Lane lies further to the north.

4.4 The residential development of Whiteley is to the east. To the south are the local centre at Park Gate and the railway station at Swanwick, both within easy walking distance of the site.

4.5 Rookery Avenue is opposite the access to the site. At present this is a cul de sac however there is a safeguarded road extension to continue Rookery Avenue into Whiteley, linking Botley Road to the Parkway South roundabout.

4.6 To the south of the site is a vehicular and pedestrian bridge that provides access to residential properties at Bridge Road.

The Site

- 4.7** The site as a whole occupies approximately 20.05 Ha of land accessed from Botley Road just to the north of the M27 Motorway. The front part of the site is visible from Botley Road however the access road, which is between an earth bund to the north and embankment to the south, drops to a lower central area where aggregate recycling has, until recently, taken place.
- 4.8** Adjacent to the motorway is a large embankment created by historic land raising. The central part of the site comprises a relatively flat operational area where recycling materials have been stockpiled. To the north is the Orchard where the land gradually drops towards the rear of properties fronting onto Swanwick Lane.
- 4.9** At present due to the change in levels and the surrounding housing only the front part of the site adjacent to Botley Road is visible from outside the site.
- 4.10** The site at present has two principal landowners Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd, with Raymond Brown acting on their behalf

Site Planning History

- 4.11** Rookery Farm was originally a fruit farm and some evidence of this former use is still evident in an area of remnant orchard to the north-west of the site. Part of the site adjacent to the M27 has been land raised and restored to grazing land. This forms a large embankment which screens the central part of the site from the M27 and Botley Road.
- 4.12** Planning permission was first granted on appeal in 1987 (APP/Z1700/A/55/049143) for the infilling of agricultural land with c.1.3 million cubic metres of construction and demolition wastes with restoration to agricultural use. Tipping commenced in 1988 and temporary planning permission for waste recovery (recycling) was granted in 1995.
- 4.13** A further temporary planning permission for the inert waste recycling operation was granted in 2006 (P/06/0443/CC), time limited to expire in 2021. This permission introduced an expiry date for land raising operations of 31st December 2026.

- 4.14** In 2014, planning permission (P/14/0857/CC) was granted for the permanent retention of the aggregate recycling facility. In 2016 (P/15/1213/CC) and 2018 (P/18/0978/CC) planning permission was granted which, in effect, extended the validity of the development pursuant to planning permission P/14/0857/CC until 25 October 2020. This date has also since been extended by way of The Business and Planning Act 2020 to 1 May 2021.
- 4.15** Details pursuant to the remaining pre-commencement conditions are to be submitted to Hampshire County Council for approval in January 2021. Following discharge of these conditions and implementation of the permission, conditions relating to restoration associated with the earlier land raising permissions fall away leaving just the permanent recycling use. The site will subsequently, in planning terms, predominately formally become previously developed (brownfield) land.
- 4.16** Note there have been no minerals operations at the site and any changes to the landscape are as a result of land raising, not from extraction activities.
- 4.17** The main body of the site is currently safeguarded for aggregates recycling in the Hampshire Minerals & Waste Plan. Hampshire County Council have indicated that there is overcapacity for inert waste recycling at present. As such if the site was to be allocated for housing then the safeguarding status would be reviewed.
- 4.18** It should be noted that in its comments on the draft Plan 2020 (Regulation 18 Draft Local Plan 2036 Supplement) when the site was allocated for residential development, Hampshire County Council as Minerals and Waste Authority advised:

Hampshire County Council has concluded that sufficient aggregate recycling capacity is currently in place to deal with the additional waste and as such no objection to this allocation will be raised

Site Appraisal

- 4.19** It is noted that the site was found to be a developable housing site within the Fareham Local Plan 2036 Strategic Housing and Employment Land Availability Assessment (SHELAA) December 2019, but subsequently discounted as unsuitable in the Fareham Local Plan 2037

Strategic Housing and Employment Land Availability Assessment (SHELAA) September 2020.

- 4.20** In considering the site developable, the SHELAA (2019) makes the following comments regarding suitability of the site:

‘Overall suitable for housing development. Further work required to ascertain an appropriate development structure and net developable areas, having regard to site ground conditions, drainage, habitat surveys, movement connections and retention of existing cover of woodlands, trees and hedgerows. Eastern part of site has good pedestrian accessibility to existing local services. Potential scope to include a small convenience store to improve sustainability of main core of the site. Suitable highways improvements required, with linkages to surrounding movement networks. Potential impact of noise and air quality to be assessed and appropriately mitigated’.

- 4.21** In subsequently discounting the site, the SHELAA (2020) makes the following comment regarding reason for discounting the site as un-developable:

‘Site topography and boundary likely to create isolated cul de sac development. Main developable area of the site is not well related to existing settlement and is relatively isolated from local services’.

- 4.22** The reasoning behind the change in conclusion reached by the SHELAA (2020) is unclear as there has been no substantive change in circumstances or new information related to the site not previously provided to the Local Planning Authority. Furthermore, the SHELAA (2020) attributes the same 8 out of 10 score for accessibility to facilities from the site as the SHELAA (2019), recognising the inherently sustainable location adjacent the urban area of Swanwick, the proximity to Swanwick Railway Station and nearby shops/amenities. As identified in the SHELAA (2019) suitability summary, if necessary, sustainability of the main core of the site could further be improved via development of a small convenience store in-situ.

- 4.23** Paragraph 4.28 of the SHELAA (2020) states that *‘the information from the SHELAA forms an important part of the evidence base for the Local Plan 2037, providing a source of developable sites which are suitable for future development needs, available within the plan*

period and viably achievable. Developable sites which can be brought forward under the Council's development strategy will contribute to the housing and employment supply for the Local Plan 2037...'

4.24 Paragraph 3.21 of the Publication Version of the Fareham Local Plan 2037 states:

'3.21 The development strategy proposed by the Local Plan includes:

...Development allocations on previously developed land where available, and on greenfield land around the edges of existing urban areas in order to meet remaining housing and employment needs, but otherwise managing appropriate levels of development outside of urban areas'.

4.25 As the site should be considered to be previously developed/brownfield land, it is sequentially preferable for development based on the Council's Local Plan development strategy. Furthermore, paragraph 4.18 (Assessing Site Suitability) of the SHELAA (2020) states that 'sites outside the urban area will not necessarily be excluded as they could be considered alongside a review of urban area boundaries as part of Local Plan development...'

4.26 Paragraph 3.3 of the Background Paper: Settlement Boundary Review (September 2020) states that 'the reasons for establishing settlement boundaries include:

- *Directing development to more sustainable locations in terms of accessibility and proximity to public transport, and in terms of being well served by existing essential services and facilities'....*
- *'To assist in urban regeneration, by encouraging the re-use of brownfield land'.*

4.27 Considering the proximity of the existing Settlement Boundary to the site (approximately seven metres distance on the opposite (eastern) side of Botley Road), Rookery Farm site would represent an entirely reasonable and logical extension to the established urban area which would be in accordance with the development strategy contained within the Local Plan.

4.28 Cul de sac type development formats are well established and entirely functional residential layout present in the vicinity of the site. Such a development format would therefore reflect the prevailing development pattern and design vernacular and be sympathetic to existing

communities. Indeed a number of the sites put forward in the current draft plan would potentially result in cul de sac developments, including:

FTC3 – Fareham Station (120 dwellings)

FTC4 – Fareham Station West (90 dwellings)

HA3 Southampton Road (348 dwellings)

HA4 Downend Road (350 dwellings)

- 4.29** The site presently benefits from permanent planning permission for development and use for aggregate recycling. This is significant in terms of both vehicle movements and future development potential. Current planning permissions contain conditions limiting HGV movements to 240 per day, all of which utilise the current site access point on Botley Road. These authorised HGV movements would be replaced by domestic vehicle movements, substantially mitigating any perceived increase in road traffic on Botley Road. In addition, the imminent completion of the North Whiteley Link Road is anticipated to reduce vehicle movements on Botley Road. Without wanting to pre-empt the outcome of any Transport Feasibility Assessment, development of the site could also facilitate the development of the western end of the Rookery Avenue extension as there is space within the site to accommodate a roundabout.
- 4.30** Planning permission P/18/0978/CC includes for considerable earthworks to create extended and raised bunding to re-model the site and mitigate against noise impacts from the recycling use. A significant proportion of this re-modelling is on the south western boundary of the site. Such earthworks would be very similar in scale and form to those likely to be required to reduce noise levels from motorway traffic to appropriate levels for inhabitants of any future residential development on the site.
- 4.31** The Council has previously been furnished with a Phase 1 Contaminated Land Assessment and Slope Stability Assessment for the site, identifying that the embankment/land raise slope adjacent to the M27 is stable and that the site could be suitable for re-development in accordance with the indicative masterplan previously submitted.
- 4.32** Any future development scheme pursuant to an allocation would also include mitigation to address potential air quality concerns associated with proximity to the motorway. Such

issues can be effectively managed through building design and layout amongst other techniques.

4.33 The site comprises circa 20 hectares of land with a net developable area of circa 10 hectares. Significant land is therefore available within the land ownership for biodiversity enhancement, on-site nitrate mitigation and dedication to public open space.

4.34 The following points detail the benefits of residential development on the Rookery Farm site:

- Once the permanent recycling permission is implemented the site will become previously development land/brownfield and its development will reduce the need for more sensitive (greenfield) sites within the Borough;
- The site is in a highly sustainable location in proximity to a railway station and amenities, is deliverable and would provide necessary housing capacity within the Plan;
- It should be noted that in its response to the draft 2020 Plan (Regulation 18 Draft Local Plan 2036 Supplement) showing the inclusion of Rookery Farm, the County Council responded as follows:

This allocation is close to Swanwick railway station. The County Council supports the opportunity for this site to provide high quality walking and cycling routes to Swanwick station. This may include a new active modes bridge over the motorway and enhanced interchange at Swanwick Station with new local bus services. The development brief also needs to include provision for off-site improvements to address the inadequate bus, walking and cycling connections to the Segensworth business parks.

- Provision of Public Open Space on a former land raise site and access to it from existing footpath routes;
- Removal of a 'heavy industry' use from an otherwise residential setting;
- Would facilitate the Rookery Avenue extension. This would provide better access to the motorway, the industrial area of Whiteley and Whiteley District Centre;
- Opens up pedestrian links across the motorway to Addison Road;
- The site would not be visually prominent and would form a logical urban extension. Development could enable biodiversity enhancements associated with long-term habitat management plans and the re-instatement of a pre-existing stream across the site;
- The development would be offset by the loss of 240 HGV vehicle movements a day.

- 4.35** Were recycling operations to cease and land raising be completed, circa one million tonnes of waste material would need to be imported to the site before planning permission expiry in December 2026. This will impact the surrounding ambient environment through noise, dust and exhaust/plant emissions associated with operations and significant numbers of HGV movements.
- 4.36** Resumption and completion of land raising would also result in the site and location becoming permanently sterilised for future development. This is therefore a unique opportunity to re-develop the site to meet a real and urgent need to provide homes in the Borough.

5.0 **Modifications Required to the Plan to Make it Sound**

- 5.1. There is no need to revisit the arguments and issues which have been set out at length in the earlier sections and which demonstrate that the Plan as drafted is UNSOUND. The modifications required are set out below in bullet form. It will be immediately clear that the required work to ensure that the Plan is SOUND extends well beyond detailed amendments to drafted policy wording; a fundamental review of the Plan and the basis upon which it has been prepared is required.
- 5.2. The revised approach to the preparation of the Plan, with consequential implications for the redrafting of **Strategic Policy H1**, requires:
- a) A thorough reassessment of the Housing numbers using the Standard Method as set out under the PPG; it is premature to use the draft new Standard Method which Government has now formally abandoned. The only reason it has been used by Fareham is because it appears to provide a lower number of units required. This is clearly UNSOUND and for the plan to made SOUND, the current Standard Method must be re-used and those sites proposed for allocation in the Local Plan Supplement be included.
 - b) The Duty to Co-operate has not been undertaken properly and thoroughly; Fareham has underprovided in terms of meeting the needs of the adjoining authorities who are struggling to meet their housing needs, including Portsmouth, Gosport and Havant all of which are geographically very constrained. The exercise needs to be undertaken again to ensure that Fareham properly plans to accommodate the needs arising from surrounding authorities. It is worth noting that the under provision is made even worse if account were to be taken of the draft new Standard Methodology where the housing requirements of adjoining constrained authorities is increased; Fareham appears to have decided to ignore this implication arising from the new draft Standard Method.
 - c) The Council has a history of under delivery of housing figures and its 5 year housing land supply figure currently stands at under 3 years. On the basis that the NPPF and PPG are both clear that the housing provision numbers should be regarded as

minimum, and reflecting the above position, Fareham requires to be considerably more ambitious in terms of its overall housing provision figures.

- d) There is a very concerning over reliance on the achievability of so much of the housing provision from one site, namely Welborne Garden Village. This is even more of a significant issue given the fundamental difficulties that appear to be encountered over the funding and provision of the new motorway junction which is fundamental to the progress of the overall development. The amount of reliance that can properly be placed on the delivery of housing numbers from this one development needs to be reviewed and significantly reduced.
- e) There is also a potential over reliance on windfalls to deliver a significant proportion of the overall housing figures; this requires to be revisited with a downward adjustment.
- f) The Council is in very real danger of not being able to meet its affordable housing requirements, given all the constraints identified. The housing numbers and potential affordable housing provision requires to be recalculated with the need to increase the overall housing numbers if the affordable housing needs are to be met.

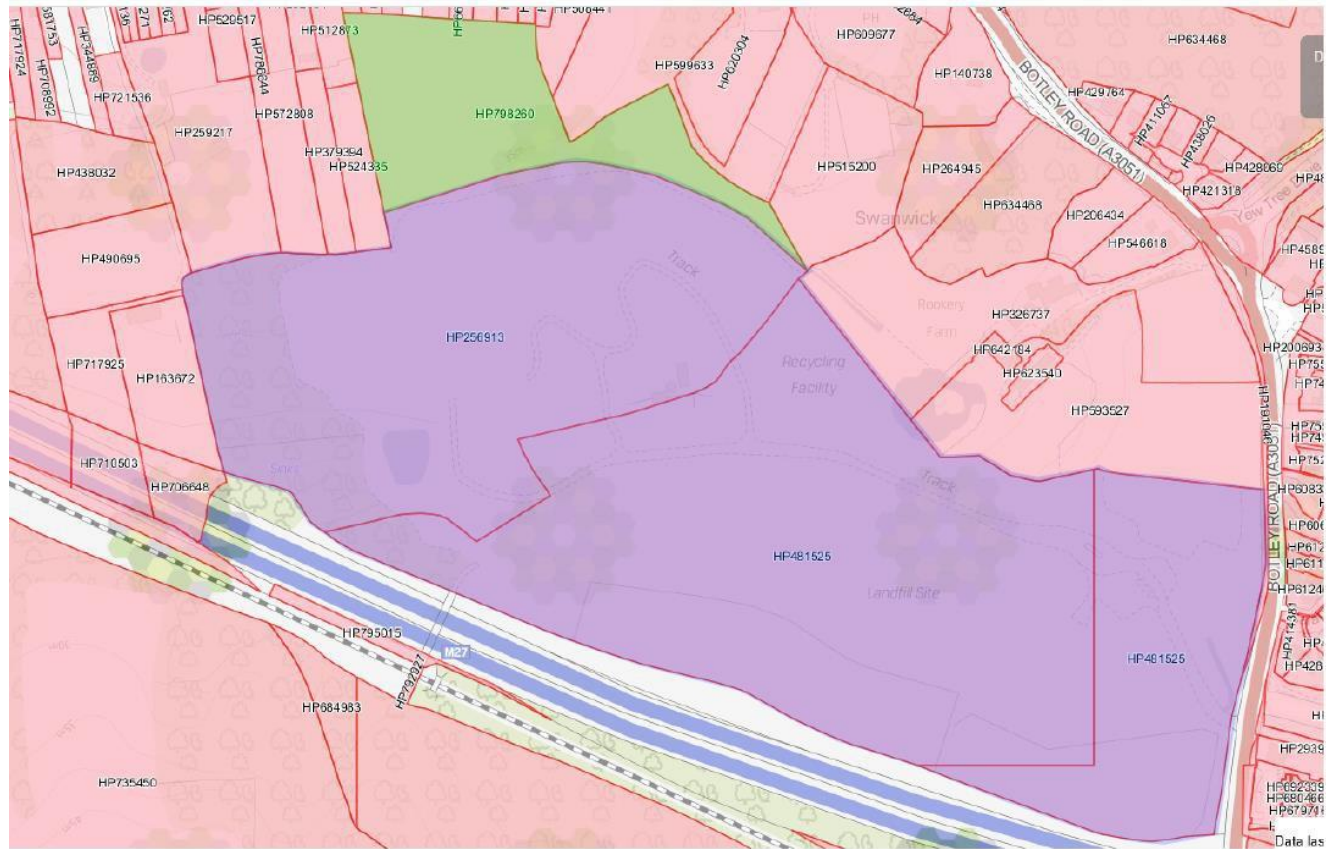

5.3 In addition to the above the Council also requires to re-address a number of its allocated housing sites, including at the very minimum **Sites FTC1, FTC2, FTC3, FTC4, FTC5, HA7 and HA13**. This reassessment in terms of suitability, achievability and availability is likely to reduce substantially the number of new dwelling units that can be achieved from these allocations.

5.4 The Council is clearly underproviding in terms of its overall housing numbers and the reliance it is placing on sites that face constraints and may not be achievable. The Council needs to make further allocations, and this should include Land at Rookery Farm which is suitable, available and achievable and subject to planning, deliverable within a 5 year period. The site has been considered suitable, available and achievable and was allocated in the Local Plan Supplement; the principal reason why it no longer appears as an allocation is because of the Council's unsound change in the methodology it is applying to calculate its housing numbers. **Rookery Farm should be reinstated as a housing allocation.**

- 5.5 It follows that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.

mervyn.mcfarland@turley.co.uk

Client
Solent University

Our reference
SOUS3009
18 December 2020

1. Introduction

- 1.1 These representations have been prepared by Turley on behalf of Solent University.
- 1.2 Our client owns the land interest at Warsash Maritime Academy, Fareham which forms the proposed Policy HA7 allocation.
- 1.3 Each of our responses relates to a particular policy or paragraph and this report is structured accordingly.
- 1.4 We can confirm we wish to appear at the Examination in Public in due course and look forward to continuing to engage with the Local Plan process.

2. Policy H1: Housing Provision

- 2.1 Policy H1, of the Publication Version of the Fareham Local Plan 2037 does not properly address housing provision as it does not set out the minimum number of homes the Council is required to deliver.
- 2.2 It is appreciated that there has been some uncertainty around the housing requirement figure due to on-going national debate relating to the standard method to be adopted by the Government. At the time of submitting this response, the government has confirmed its approach which will require the Council to deliver 508 new homes per annum.
- 2.3 The 508 dwelling per annum figure should be viewed in the context of the unmet housing need which identifies in adjacent local authority areas, specifically Portsmouth. It is acknowledged that the Council has identified additional homes to help meet the identified short-fall in adjacent areas however this contribution is likely to be insufficient and we consider that the Council should do more to contribute to the substantial unmet needs across the south Hampshire sub-region.
- 2.4 Paragraph 2a-010 of Planning Practice Guidance (PPG) outlines that there will be circumstances where it is appropriate to plan for a higher housing figure than that identified through the standard method. One of these is where an authority has agreed to take on the unmet needs of another area (in this case Portsmouth) as discussed above. The minimum level of housing required should therefore be the local housing need figure plus unmet need within a neighbouring area which the Council has agreed to take.
- 2.5 Housing need arising from other growth strategies, for example the Partnership for South Hampshire (PfSH) strategy for sub-regional employment growth should also be taken into account in determining the minimum housing requirement.
- 2.6 We consider therefore that Policy H1 is not sound as currently drafted on the basis that:
 - (a) It does not adopt the recently confirmed standard method approach;
 - (b) It does not take sufficient account of the scale of unmet housing need in adjacent local authority areas, nor make sufficient provision to help address this unmet need, as required by the NPPF;
 - (c) It does not sufficiently take account of economic growth strategies for the wider (PfSH) area.

3. Policy HA7: Warsash Maritime Academy,

- 3.1 Part of the land at Warsash Maritime Academy, which is no longer required for educational use, was proposed for allocation in the preceding version of the Fareham Local Plan 2037 and we submitted representations on behalf of Solent University at that stage. A copy of the previous representations is attached as Appendix 1.
- 3.2 Solent University supports the allocation of the Warsash Maritime Academy site for a primarily residential re-development as proposed by Policy HA7. The site comprises previously developed land which is no longer required for educational use by the University and can be brought forward for redevelopment at an early stage in the local plan period. The Council is at an advanced stage in negotiations for the sale of the site to a third party who will deliver a residential-led redevelopment proposal.
- 3.3 Whilst the University, as land-owner is fully supportive of the principle of the allocation however, it considers that there are certain detailed requirements within the policy that need to be amended to ensure that Policy HA7 is effective and that development on the site is deliverable, at an early stage in the plan process, and is not unnecessarily constrained. In its current form the policy is considered unsound
- 3.4 We have set out in detail below the changes which we consider are required to Policy HA7 to ensure that it is effective.

Allocated Use

- 3.5 The draft allocation identifies the proposed use of the site as “residential” with an indicative yield of 100 dwellings.
- 3.6 SSU supports this allocation and acknowledges that it is intended to bring forward a residential-led redevelopment of the site. The policy should acknowledge however that the site includes two Listed Buildings (Shackleton and Moyana) which will be retained and converted as part of any redevelopment proposal. Flexibility is sought in terms of other uses that might be provided within these buildings to ensure that the site makes the greatest possible contribution to meeting identified needs (including the need for housing) and that beneficial uses can be found for the Listed Buildings. Whilst it is possible that both Shackleton and Moyana could be redeveloped for residential use, proposals have yet to be developed and the form and internal spaces of the buildings could be equally suited to other uses, for example as commercial space (Use Class E) in the case of Moyana or hotel accommodation in the case of Shackleton. It is not intended that these uses would be prioritised above residential use however, to provide an appropriate degree of flexibility to secure the optimum use of the Listed Buildings, the potential for alternative use should be recognised in the allocation.
- 3.7 We therefore request that the wording in respect of the Allocated Use is amended to state:

Allocated Use: Residential (including Use Classes C1, C2, C2a C3 and C4) with potential for commercial (Class E), Institutional (Class F1) or Community (Class F2) use of Moyana.

Indicative Yield

- 3.8 Policy HA7 identifies an Indicative Yield for the allocation of 100 dwellings.
- 3.9 Having regard to our comments in respect of Policy H1, we consider it important that each allocated housing site should make the maximum possible contribution to meeting identified housing need, compatible with the environmental character of the site and surrounding area.
- 3.10 The University has previously made submissions to the SHLAA suggesting that the indicative site capacity should be increased and remains of the view that the indicative yield of 100 units is an underestimate of site capacity. Feasibility work undertaken in the context of the disposal of the site indicated that the site could potentially accommodate around 150 homes. The final number of homes delivered will be affected by the nature of the uses introduced to the Listed Buildings and it is acknowledged that if non-residential uses are introduced then the number of dwellings provide as part of the comprehensive redevelopment of the site will be lower.
- 3.11 We propose that the indicative yield should be amended to refer to 150 units, with the final capacity determined through the development management process taking account of the re-use of the Listed Buildings.

Site Specific Requirements

Requirement (a)

- 3.12 The University acknowledges that there may be potential for the Listed Shackleton building to be converted to flats however this should not be a requirement. It is possible that alternative uses (for example hotel use (Use Class C1) or residential institutional use (Use Class C2) could be accommodated within the building and would equally, or better, safeguard its architectural and historic interest. The policy does not need to be prescriptive with regard to the use of the Listed building and, to our knowledge, no work has been undertaken by the LPA to establish that conversion to flats would represent the optimal use.
- 3.13 Accordingly, we request that the words "including conversion of the building currently known as the Shackleton building to flats" are deleted from requirement (a).

Requirement (g)

- 3.14 The need to deliver an appropriate re-use of the Listed Buildings on the site as part of proposals for the comprehensive redevelopment of the allocated site is recognised. The agreement of Historic England to proposals for re-use of the buildings is not required and there is no reason why Historic England would need to be involved in proposals for the re-use of the buildings which are Listed at Grade II.
- 3.15 Accordingly we request that the words "(subject to agreement with Historic England) are deleted from requirement (g) and that the words "or other compatible uses" are added at the end of the requirement.

Requirement (j)

- 3.16 The University recognises that it is important in both landscape and biodiversity terms, to ensure that efforts are made to incorporate the best quality trees into a future development proposal. We object however to the requirement for all trees on the site to be retained.
- 3.17 Area Tree Preservation Orders are recognised to be a 'blunt-tool' in dealing with tree protection. Moreover, the Area Tree Preservation Order which is imposed upon the site dates from 1993. As part of its work to assess the development potential of the Upper Site the University has commissioned an updated Tree Survey. The University has engaged with the LPA with a view to reviewing and refining the Area Tree Preservation Order such that it identifies and protects the most important trees on the site.
- 3.18 The university requests that the wording of Requirement (j) is amended to require the submission of a tree survey and arboricultural impact assessment as part of any planning application for the redevelopment of the site such that tree retention can be fully assessed through the development management process. The requirement to retain all trees should be deleted.

4. Policy D5: Internal Space Standards

- 4.1 Policy D5 requires developments to meet national spaces standards as a minimum.
- 4.2 The University wishes to see good quality homes delivered on the HA7 allocation site however the presence of Listed Buildings, which will need to be sensitively converted and adapted to new use, means that circumstances may arise on the site, and elsewhere in the Borough, where it may not be possible to fully achieve national space standards working within the existing building fabric.
- 4.3 We consider that Policy D5 is unsound as it has not been justified and should not be applied in a blanket manner to all developments.

5. Summary and Conclusions

- 5.1 These representations have been prepared by Turley on behalf of Solent University in respect of the Fareham Borough Local Plan 2037 Consultation.
- 5.2 Our client owns the land interest at Warsash Maritime Academy, Fareham which forms the proposed Policy HA7 allocation.
- 5.3 In summary:
- The plan is unsound in that Policy H1 does not set out the minimum number of homes the Council is required to deliver and the quantum of housing being planned for is in itself insufficient to meet identified housing needs when the unmet needs of adjacent areas are taken into account.
 - We fully support the proposed allocation of the HA7 site at Warsash Maritime Academy. The land is surplus to the University's requirements as part of its educational estate with teaching and learning activities which previously took place on the site having been relocated. The site is available, and capable of delivering much needed housing, in the early years of the plan period.
 - Whilst supporting the principle of the HA7 allocation, we consider that there are various detailed aspects of the allocation policy which require amendment in order for the policy to be effective.
 - We have concerns regarding policy D5 - Internal Space Standards which we consider is not justified.

**Appendix 1: Representations to Regulation 18
Fareham Local Plan Consultation**

1) Paragraph: 2.12

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Strategic priorities 1 and 11 fail to address FBC's commitment to carbon neutrality by 2030. FBC made a commitment to the borough to achieving carbon neutrality by 2030 in an Oct 2019 council meeting. A carbon reduction plan has yet to be published but it seems FBC is limiting this ambition to activities over which it has direct control. This is very disappointing. Surely, in a local plan of this scope and reach, where FBC has the power of approval, FBC should be prepared to take a lead in energy conservation and carbon neutrality by mandating building design policies which to help achieve these objectives, not only in 'the embodied energy' of construction materials (para 11.24) but also in whole-life energy consumption and reduced CO2 emissions through insulation, choice of heating systems and re-usable energy sources.

- By echoing a national preference for 'mass transit and other means of transport', without suggesting how these alternative transport systems might become available/practical, the housing policies HA1 and HA7 (approx. 950 homes) aggravate the already serious congestion faced by car (and bus) passengers attempting to reach the A27 or the M27 from the Warsash peninsular in peak periods. These policies attracted hundreds of reasoned objections, mostly about transport and local facilities in the 2017 consultation. In the current plan, however, these allocations seem unchanged. They are in evident conflict with plan statements with regard to Transport and Other Infrastructure (10.3) on 'accessibility improvement' and 'management of network congestion'. The bullet list of road improvements at para 10.15 does include improvements to Warsash/Abshot Road but neither of these appear to be of relevance to the problems of A27 or M27 access.
- The plan (para 11.10) states that 'Development should avoid being in a place that is dominated by vehicle access and movement priority'. So don't build on a roundabout. However, out-of-scale development (HA1 & 6 again) will generate vehicle access and movement priority by further extending the existing commuter and school access traffic jams.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Where FBC has the power of approval, FBC should be prepared to take a lead in energy conservation and carbon neutrality by mandating building design policies which to help achieve its declared carbon neutrality objective, not only in 'the embodied energy' of construction materials (para 11.24) but also in whole-life energy consumption and reduced CO2 emissions through insulation, choice of heating systems and re-usable energy sources.

Substantially reduce the HA1 and HA7 housing allocation (preferred option) or commit to road improvements to cope with existing problems and to cope with projected increases in use.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

FBC would then be honouring its commitment.

Self evident

Your suggested revised wording of any policy or text:

Above words should be summarised to extend the wording of Strategic Priorities 1 and 11 at para 2.12 to include the FBC carbon neutral commitment. Full wording to be included later in the report in the Climate Change and Design sections (8 & 11)

This could depend on how FBC elects to address this problem. It's worth noting, however, that the Total Housing Requirement at para 4.6 Table 4.1 is stated as 8,389. Puzzlingly, this includes a 15% contingency instead of the national requirement of 10%. So the plan includes a surplus of 364 homes over the requirement. One might therefore look no further than a 364 house reduction to the HA1/HA7 allocation to bring the total requirement back into line.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

2) Paragraph: 10.3

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Transport and other infrastructure. para 10.3 . The plan gives insufficient attention to 'accessibility improvement' or 'management of network congestion', particularly in respect of the Warsash peninsular and the effects of HA1 and HA6 in their contribution of traffic associated approx 950 new homes which will aggravate the already serious congestion faced by car (and bus) passengers attempting to reach the A27 or the M27 in peak periods. These policies attracted hundreds of reasoned objections, mostly about transport and local facilities in the 2017 consultation. In the current plan, however, these allocations seem unchanged. They are in evident conflict with plan statements with regard to Transport and Other Infrastructure (10.3) on 'accessibility improvement' and 'management of network congestion'. The bullet list of road improvements at para 10.15 does include improvements to Warsash/Abshot Road but neither of these appear to be of relevance to the problems of A27 or M27 access. The plan (para 11.10) states that 'Development should avoid being in a place that is dominated by vehicle access and movement priority'. However, out-of-scale development (HA1 & 7 again) will generate vehicle access and movement priority by further extending the existing commuter and school access traffic jams . The plan is therefore internally inconsistent.

This allocation takes over a significant portion of the Locks Heath Centre Car Park, as does HA37 which is represented separately. There is no evidence that the car park under-utilised. On the contrary, cars using the centre overflow inconveniently onto adjacent roads at the busiest periods. Subpara (g) of HA36 states :Reconfiguration of car parking needs to consider requirements and functions of the existing shopping centre; The existing 'Requirements and functions' therefore show this allocation to be without merit

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The plan should either include a plan or priority statement making introducing significant improvement to roads connecting the Warsash peninsular to the A27 and M27 or, alternatively and preferably, drastically reduce the housing allocations at HA1 and HA7.

Delete HA36

How would the modification(s) you propose make the Local Plan legally compliant or sound?

See above

Self evident

Your suggested revised wording of any policy or text:

See above

See above

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

No, I don't want to take part in a hearing session

3) Policy: HA37 - Former Locks Heath Filing Station

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

This allocation takes over a significant portion of the Locks Heath Centre Car Park, as does HA36 which is represented separately. There is no evidence that the car park under-utilised. On the contrary, cars using the centre overflow inconveniently onto adjacent roads at the busiest periods. This allocation is without merit.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Delete HA37

Your suggested revised wording of any policy or text:

See above

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: HA7 - Warsash Maritime Academy

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA7 states at sub para (a) that: The quantum of housing proposed shall be broadly consistent with the indicative site capacity, including conversion of the building currently known as the Shackleton building to flats; This relatively modern building is described in the plan as a 'Statutory Listed Building'. I have no objection to this part of the proposal per se, except for a general objection to over-building on the Warsash peninsular. However, the former Warsash Academy site includes a row of four coastguard cottages, constructed in approx 1900 which alone preserve the historic identity of the site and appear to be without protection. I suggest that this should be re-considered.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Consider protection of the 'Coastguard' building, by sympathetic conversion into housing.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Self evident

Your suggested revised wording of any policy or text:

Reword HA7 as suggested above

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson

[REDACTED]

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

Early Years requirements in major new developments – a summary

This document provides summary guidance for Hampshire County Council and other agencies in determining a requirement for early years and childcare places to support new housing developments and to inform local planners.

This document augments the extant guidance entitled 'Early Years requirements in major new developments' where detailed estimates of place requirements, take up of early education entitlements for government funded hours, and parental demand are provided. This document is a guide to supply and demand in localised areas, and specifically addresses the Early Years requirements for the area of:

Fareham Borough

In looking at the demand for childcare in an area the Services for Young Children (SfYC) team typically look at the ward and adjoining areas Small Area Population Forecast (SAPF) data and assess it against the known supply of places. Childcare places need to be monitored regularly as the demand for childcare is directly and indirectly influenced by national and local policies. This childcare sufficiency work is carried out by the SFYC team and it is requested that prior to any development we are consulted and are able to share our up to date knowledge of the childcare need in the area.

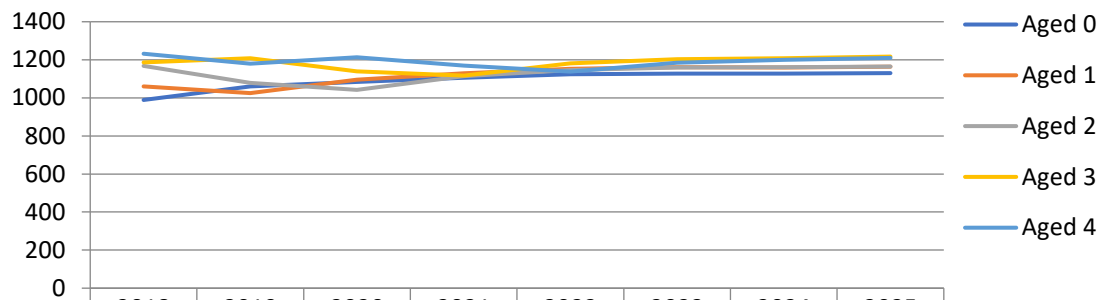

SfYC monitors childcare need for all early year's age cohorts. Early Years Education (EYE) is a statutory offer which is available universally to all three- and four-year olds from the term after their third birthday. For two-year olds, the offer is limited to children of families who meet low income criteria. There is no statutory EYE offer for children aged nought and one year old, but the local authority has a statutory duty under the Childcare Act 2006 to ensure working parents of children aged nought to five can access suitable childcare to meet their needs. This duty extends to children up to twelve years old for Out of School Care.

The overall Fareham area child population aged 0 and 4 years old dipped in 2019 by 83 but is projected to grow by a net 250 between 2018 and 2025 – 0.45% on 2018. The high-level trend projection to 2025 is shown below (Fig.1).

Significant growth in Fareham North ward is anticipated due to the impact of the Welbourne development. Most other ward areas are projected to see either a much slower increase or slight decrease in child numbers, with the overall picture apart from Fareham North showing a broadly static position.

Fig. 1

Fareham area population trend forecast 2018-2025

	2018	2019	2020	2021	2022	2023	2024	2025
Aged 0	989	1060	1083	1105	1124	1127	1127	1130
Aged 1	1060	1025	1095	1130	1153	1162	1160	1164
Aged 2	1168	1078	1042	1114	1146	1159	1162	1164
Aged 3	1186	1209	1140	1117	1181	1203	1209	1217
Aged 4	1232	1180	1213	1169	1138	1185	1200	1210

1. Demand for places:

The starting point is to calculate the number of children in each age group expected from the SAPF data. It must be noted that the SAPF is a modelled population forecast. It also does not take into account the fact that parents don't always take up their childcare places in the same district in which they live.

We know from market data that for each age cohort the percent of children requiring childcare in an early setting is typically:

Aged 0 – 1 yr old 17%
 Aged 2 yr old 70%
 Aged 3 yr old 99%
 Aged 4 yr old 66% (It is assumed that 34% of this age cohort is typically at school)

Early Years Education (EYE) is a statutory offer which is available universally to all 3- and 4-year olds. For two-year olds, the offer is limited to children of families who meet low income criteria. In Hampshire, children can start their free entitlement in the term after their second/third and fourth birthday and can receive a maximum of 570 hours per child's eligibility year. From 2017 the Government increased the offer to 1140 hours for working parents; publicly known as the "30 hours offer".

EYE hours are not limited to the school academic year, offering parents the flexibility to take up their hours across the number of weeks that the provision is open. The demand for three-year-old places is high and trend data in Hampshire indicates that in the region of 90-95% of the three-year-old population take up this entitlement. It is, therefore, expected that there will be continued high demand from this age group within any new housing development.

The demand for four-year-old places, prior to their starting school, is also high. However, due to four-year olds taking up their school place, often in the September after their fourth birthday, the demand within the pre-school and nursery sector is in the region of 32-36% of the four-year-old population.

The demand for two-year olds continues to grow for families who meet certain low income level criteria outlined in section 2 below.

2. Low income families

Where housing developments include a significant level of social housing, shared ownership schemes and/or dwellings that would attract low income families, developers and planners should consider accessibility to affordable early years education and childcare.

Developers and planners should be aware that, since September 2014, the provision of free early years education to eligible 2-year olds is a statutory offer. The offer provides the same choices for parents as the free early years' education entitlement for 3- and 4-year olds. The exception is that the eligibility is primarily based on income assessment.

3. Space requirements and regulations

The space required to fulfil these requirements is stipulated within the [Statutory Early Years Foundation Stage](#) ¹

Section 3.57 sets out premises requirements and states, the premises and equipment must be organised in a way that meets the needs of children. In registered provision, providers must meet the following indoor space requirements:

- Children under two years: 3.5 m² per child.
- Two-year olds: 2.5 m² per child.
- Children aged three to five years: 2.3 m² per child.

These calculations should be based on the net or useable areas of the rooms used by the children, not including storage areas, thoroughfares, dedicated staff areas, cloakrooms, utility rooms, kitchens and toilets.

All early years and childcare operators must register with Ofsted as the regulatory body. Ofsted will inspect an organisation's ability to meet expected standards covered within the Early Years Foundation Stage. The Early Years Foundation Stage also contains expected minimum requirements for the suitability of premises which can be found within the same statutory framework document (accessed through the link on page 3). It is expected that all early years and childcare providers are able to meet requirements to deliver the free early years entitlement at the highest quality and Hampshire providers are expected to achieve and maintain "good" and "outstanding" inspection results.

¹ Statutory Early Years Foundation Stage 2014

4. What developers should provide

Developers should consider 80 early years places for every 1,000 houses and that these places are offered through a mix of facilities where possible. The childcare planning should allow for flexible hours of opening and covering at least 7am to 7pm for full day care.

For 1,000 houses, it is anticipated that one full day provision of 50+ places, together with an additional 30 places from shared community premises, would meet the needs of this size of development.

Where developments provide a high number of social housing dwellings, it is considered there will be the potential for greater demand for affordable childcare and access for two-year-old funded provision. It is likely that this childcare will be required to support employment activities and, therefore, any provision to support lower income families should have regard to the flexibility of opening and closing times of childcare to meet the employment or return to learning requirements of parents and carers.

The location of the childcare provision is parental choice, some choose for their childcare to be located near to their home address and some choose childcare close to their work- place.

The childcare market has also seen parents preferring provision that is close to, or on the site of, infant or primary schools where the school site is large enough to accommodate the provision.

5. Timing of the early years and childcare development

There must be early consideration of the allocation of the sites and/or premises for early years and childcare. It is recommended that such provision is considered for development and occupation at the same time as that for primary schools. This is especially important within developments that have little or no accessible early years and childcare provision adjacent to the new housing development.

The impact of a new housing development, alongside current capacity in the early years and childcare market, should also be considered in terms of early occupation of families and their ability to access provision and whether any interim measures are put in place prior to thresholds of dwellings occupied being reached.

6. How this should be provided

Recent practice suggests to planners / developers that provision should be made for early years and childcare facilities for children 0- 5 years within their plans for the housing developments. Childcare facilities should either be associated within / alongside community facilities or in a dedicated space identified and available for development. In either case, it is suggested that there are advantages with locating adjacent to, or combined with, primary school sites.

For dedicated nursery/childcare facilities, we suggest an area of 0.25 hectares. For combined school / pre-school sites this can be reduced to 0.2 hectares as there can be economies with a more flexible site layout when both are planned together. These

site areas are estimates that the Council has used in other recently provided facilities but will need to be tested against the draft accommodation briefs.

It is assumed that the sites would be made available through an open and transparent process to interested early years and childcare providers; or through the district councils and community associations where it is expected that childcare will be operated within community facilities.

The location of any provision must enable good access for walking along safe and pushchair accessible routes as well as having good public transport and motor-vehicle transport links and be within a 1-2 mile radius of the main housing development.

It should be noted that early years and childcare provisions of 50+ places are considered more economically viable and may attract the best investment opportunity from the sector.

It is also a requirement that a childcare operator that is seeking to accommodate children for free early years education makes an application to Hampshire County Council prior to opening their provision. Any developer who has engaged a childcare establishment to deliver or take up opportunity on their site should ensure the childcare provider contacts Services For Young Children at Hampshire County Council via email childcare@hants.gov.uk at the earliest opportunity.

7. Comments on identified Sites in Fareham Local Plan 2037, Housing Need and Supply

https://www.fareham.gov.uk/PDF/planning/publicationplan/Publication_plan_FINA_L.pdf

Ha1 North and South Of Greenaway Lane (824 dwellings)	This proposal would generate demand for an additional 50+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution. These places are essential, to meet the needs of working families
HA3 Southampton Rd (348 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families.

HA4 Downend Rd East (350 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families. In our Spring 2020 Childcare Sufficiency Audit Portchester West was identified as an area to be closely monitored due to the collective new and planned housing developments in the area.
HA7 Warsash Maritime Academy (100 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed. In our Spring 2020 Childcare Sufficiency Audit Warsash was identified as an area to be closely monitored due to the collective new and planned housing developments in the area. Existing settings are close to capacity, including Out of School provision. These places are essential, to meet the needs of working families
HA9 Locksheath Rd (70 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed
HA10 Funtley Road Sth (55 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed

<p>FTC 1 (20 dwellings) FTC 2 (100 dwellings) FTC 3 (120 dwellings) FTC 4 (94 dwellings) FTC 5 (49 dwellings) FTC 6 (45 dwellings)</p>	<p>The plan does not indicate the provision of childcare facilities. These are generally small developments in dispersed locations; however collectively they create 428 dwellings in the Fareham Town Centre Area. A new Full Day Care nursery offering approximately 50 places has opened in Fareham Town Centre which may relieve the pressure on places in the area. The impact of new housing on childcare sufficiency in Fareham Town Centre will need to be closely monitored by SFYC.</p>
<p>Planned developments with less than 50 dwellings (HA12,HA13,HA15,HA19,HA22, HA23,HA24,HA26,HA27,HA28, HA29,HA30,HA32,HA33,HA34,HA35,HA36, HA37,HA38,HA39,HA41)</p>	<p>These are smaller developments in dispersed locations. Depending on the housing mix and age demographic of the residents any generated demand can most likely be accommodated in existing provision.</p>

8. Contact

Hampshire County Council's Children's Services can be contacted to discuss any support requirement in selection of appropriate high quality early years and childcare providers or any aspects of the regulation and legislation requirements.

The childcare and early years education development team can be contacted via childcare@hants.gov.uk

Links to documents that may support design of childcare buildings:

Planning Policy Manager
Fareham Borough Council

Enquiries to: Louise Hague

Our ref: Y00511

Tel: 0370 7794077

Your ref: Regulation 19 Local Plan
Consultation

Date: 18 December 2020

Dear Sir/Madam

Regulation 19 Local Plan Consultation

In response to the above consultation, please find attached the general landowner comments in written representations on behalf of Hampshire County Council Property Services, in its role as a public landowner to help inform the next stages of the emerging Local Plan Update to 2038. These are separate from the comments submitted on behalf of Hampshire County Council in respect of its regulatory functions.

As landowner, the County Council will be responding to the Local Plan Consultation on the following Policies/Paragraphs (please see attached):

- Strategic Policy H1: Housing Provision
- Policy D1: High Quality Design and Place Making
- Housing Allocation Policy: HA3 (Southampton Road)
- Housing Allocation Policy: HA9 (Heath Road)
- Housing Allocation Policy: HA13 (Hunts Pond Road)
- Housing Allocation Policy: HA22 (Wynton Way)
- Housing Allocation Policy: HA24 (335-337 Gosport Road)
- Strategic Policy R4: Community and Leisure Facilities
- Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent
- Policy D4: Water Quality and Resource
- Paragraphs 11.55/56

To date, Hampshire County Council in its capacity as landowner, has supported the earlier stages of the Local Plan Update to 2037. The purpose of the following is to offer comments, from a landowning perspective, to help inform the scope and soundness of Fareham Local Plan when examined by the Secretary of State as anticipated in Summer 2021.

I hope this is helpful to you in continuing to support the Borough Council in subsequent stages of the Local Plan Update to 2037.

Yours sincerely

Louise Hague MRICS MRTPI
Senior Development Manager

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy H1: Housing Provision

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its capacity as landowner supports the spatial approach to Policy H1 to distribute development through Local Plan allocations. The County Council considers that this is a sound approach that is positively prepared, justified and deliverable within the Plan period (effective) based on the Borough Council's objectively assessed needs and wider Local Plan evidence base.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council, as landowner, supports Policy D1 as it considers that the density of schemes should be informed by and be sympathetic to the character of the surrounding areas, rather than having a set standard. This allows sufficient flexibility (effective) to support best practice urban design principles particularly with regards to legibility to emphasise the importance of place as well as sensitively manage the transition from an urban to rural settlement edge.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B3 Please provide details you have to support your answers above

Hampshire County Council as a landowner supports the allocation of its land in Policy HA9. The site has a resolution to grant planning permission for 70 dwellings (insert ref). The County Council, as applicant, is currently engaged in on-going discussions with the Borough Council Planning Case Officer, Natural England and third-party providers to put in place sufficient mitigation to achieve a nitrate neutral development. The County Council as landowner has also submitted a pre-application submission to Natural England for consideration of its own land to mitigate the nitrate output of site Policy HA9. This evidence offers a realistic prospect that the site is capable of coming forward in within the early stages of the Plan period. The County Council, as landowner, re-affirms that it's land within Policy HA9 is available and deliverable.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

Strategic Policy R4: Community and Leisure Facilities

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the intentions of Policy R4 to maintain the provision of necessary community facilities during the Plan period. Notwithstanding its support for Policy R4, the County Council is still concerned that the draft policy does not meet the tests of soundness as it appears overly restrictive and not sufficiently flexible to respond to unexpected and ever-changing needs to community facilities brought through public service providers service reviews during the Plan period. This presents a risk that Policy R4 is not effective.

The County Council as a public service provider has an on-going need to review and, if necessary, rationalise surplus facilities as part of wider County Council strategies to improve local services in the community. Such County Council services include 'Children's Services' (pre-school through to the 14-19 year age group), 'Adult Services' (catering for those with learning disabilities, mental health, older people, and persons with physical disabilities), and 'Community and Cultural Services' (libraries, museums, sports, recreation, tourism).

The County Council would like to emphasise its statutory function to provide public services, and to remain effective in meeting this commitment, the County Council will be implementing a series of service-driven improvements, covering both frontline and support services. This may sometimes result in the 'necessary loss' of particular community buildings and land in County Council ownership, in order to reinvest proceeds of sale in local service improvements. The policy should have increased flexibility to accommodate the unique role and function of public service providers.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to accommodate the unique role and function of public service providers and so be effective.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council therefore recommends the following addition/ changes to Policy R4 to overcome its objection (see below). This draws on the wording of Basingstoke & Deane Borough Council's Adopted Local Plan 2011 – 2029, Policy CN8 – Community, Leisure and Cultural Facilities, part h, and South Downs Local Plan 2014– 2033, Development Management Policy SD43- New and Existing Community Facilities and is therefore a material consideration in Plan making. The County Council's proposed amendment would reinforce the unique role and function of public service providers and their need for managed change to deliver operational service improvements over the Plan period (be effective).

B4c Your suggested revised wording of any policy or text:

Development proposals that would result in the loss of community or publicly owned or managed facilities will be permitted where:

- i. The facility is no longer needed; and
- ii. No alternative community use of the facility is practical or viable; and
- iii. Any proposed replacement or improved facilities will be of equivalent or better in terms of quality, function and accessibility; or
- iv. the proposals are part of a public service provider's plans to re-provide or enhance local services and the proposal will clearly provide sufficient community benefit to outweigh the loss of the existing facility, meeting evidence of a local need.*

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

- Yes, I want to take part in a hearing session No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

B3 Please provide details you have to support your answers above

Hampshire County Council in its role as a public landowner supports the intentions of Policy NE4 to protect the integrity of the designated sites from increased nutrients. The County Council has confidence that any increased wastewater production related to its draft allocated sites will be suitably mitigated through on-site and off-site mitigation measures as required under the policy.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

- Yes, I want to take part in a hearing session No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

FAREHAM
BOROUGH COUNCIL

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy D4: Water Quality and Resources

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the principle of Policies CC1 and D4.

Notwithstanding this, the County Council is concerned that the draft policy does not meet the tests of soundness as it is not sufficiently flexible to respond to unexpected changes during the plan period.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to be consistent with national policy.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council would be mindful to overcome its objection if the policy is amended to introduce sufficient flexibility in the wording. This would still seek to achieve a high standard of sustainable development but would not require potentially unattainable standards to be met (be effective).

B4c Your suggested revised wording of any policy or text:

To minimise impact on the water environment and adapt to climate change, all new dwellings shall achieve as a minimum the Optional Technical Housing Standard for Water efficiency of no more than 110 litres per person per day, *unless sufficient evidence justifies meeting the mandatory national standard (no more than 125 litres per person per day)*. Development that achieves a higher technical standard of 100 litres per person per day will be supported.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council, in its role as a public landowner and service provider, supports the policy aspiration to achieve energy efficiencies in new non-residential development. In particular the County Council notes that paragraph 11.55 considers how the BREEAM assessment process can influence viability of a proposal and make allowances for this, to ensure the plan will remain effective over the plan period. For example, as landowner, the County Council considers that any forthcoming draft policy should be open to demonstrating meeting this energy efficiency standard by alternative equivalent standards such as those based on an embodied carbon (CO2 / Kg / sqm) metric as advocated by the RIBA 2030 Climate Challenge:
<https://www.architecture.com/-/media/files/Climate-action/RIBA-2030-Climate-Challenge.pdf>

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Thank you for taking part and having your say.

Fareham Borough Council Local Plan (Reg.19) Proposed Submission Version Consultation

Hampshire County Council Response – 18 December 2020

Hampshire County Council does consider the local plan to be sound and legally compliant. The County Council welcomes the opportunity to respond on this consultation and sets out its comments firstly on the Transport Assessment and then on specific local plan policies in its capacity as the local highways authority, local education authority and in its role as an adult services provider with a focus on specialist care.

The County Council then sets out its comments on specific site allocations in its capacity as the local highway authority, local minerals and waste planning authority and also as the local education authority with responsibility for school place planning.

Policy HA2: Newgate Lane South (removal as a housing allocation)

Hampshire County Council is the Local Highway Authority (LHA) for all roads in Hampshire except for motorways and trunk roads and the LHA response is concerned with the potential highway and transportation impacts of the land use proposals set out by the borough council on the local road network. HCC's primary concern as highway authority is the efficient use, management and maintenance of the local highway network. Ensuring that all new development mitigates its impact on the Hampshire network is the function of the highway authority.

The LHA submitted comments in December 2017 and February 2020 in response to the draft local plan regulation 18 consultations. As part of both responses the LHA submitted an objection to policy HA2 (Newgate Lane South). This objection is not resubmitted due to the removal of policy HA2 as an allocated housing site from the revised development strategy in the Publication Plan.

Transport Assessment

At the time of the previous draft local plan consultation in January 2020 the evidence base did not include a completed Transport Assessment (TA) to replace the interim TA published in support of the 2017 draft local plan consultation therefore the local highway authority submitted a holding objection. The TA has now been finalised and forms part of the Publication Plan evidence base.

The LHA supports the methodology used by FBC in preparing a borough-wide TA and the use of the strategic model known as the Sub Regional Transport Model (SRTM) to assess the wider transport impacts of the strategic disposition of proposed development across the Borough.

The Fareham Local Plan - SRTM modelling report (2020) sets out the Baseline, the Do minimum (with local plan development) scenario and the Do Something (with mitigation) model runs and forms part of the transport evidence base. As part of the strategic transport modelling the LHA understands that a total of 2,150 dwellings was attributed to the proposed Strategic Growth Areas (SGAs) and included in the Do minimum scenario. This means that the strategic modelling was carried out using a higher housing number than is currently proposed in the Publication Plan. The LHA recognises that the strategic modelling with the higher housing number represents a worst-case scenario and that the limitations of the SRTM do not allow for localised impacts at junctions to be attributed to specific development sites. Consequently, it is not possible for the SRTM to isolate the transport impacts of the SGAs on the highway network. Therefore, the LHA accepts the outputs from the strategic modelling report and has not requested an additional model run of the SRTM to reflect the removal of the two SGAs and subsequent lower housing number.

The SRTM modelling report indicates that the incremental impact of all the site allocations including the SGAs is forecast to affect links and junctions across the highway network and particularly along the A27 corridor through Fareham borough. The future resilience of the A27 corridor is a concern for the LHA which is why the LHA is undertaking a transport study for the A27 corridor which the County Council will seek to adopt as future strategy. The strategy will seek to incorporate a multi modal approach that facilitates a modal shift away from private car use. Future transport assessments of development sites along the A27 corridor should take this into account and have regard to the emerging transport strategy.

A key aspect of the A27 corridor strategy will be the application of the 'Link and Place' approach to street planning and design. This approach recognises a street functions as both a link (that is movement by all modes of transport including pedestrians) and a place (destination in itself) and will help determine policy priorities between competing users with a greater emphasis on the function of places. This 'link and place' approach is being developed as a Hampshire County Council policy which will be fully imbedded in the next Local Transport Plan for Hampshire (Local Transport Plan 4).

The TA assessed the cumulative impacts of the site allocations and demonstrates that the significant transport impacts of the local plan development on the highway network can be mitigated through proposed highway interventions. The TA specifically highlights the junction at Parkway/Leafy lane which is north of the M27 junction 9 and serves the Whiteley business estate in the adjoining district of Winchester City Council. The Parkway/Leafy Lane junction is predicted to be significantly impacted by local plan development traffic (with long queues along Leafy Lane) and meets the criteria for requiring mitigation.

However, this junction does not warrant a Do Something mitigation scheme for increased junction capacity. This is because the Leafy Lane arm of the junction leads to a residential area with a 20mph zone reinforced by vertical speed reduction measures. The policy approach by the LHA is to reduce rat-running along Leafy Lane between

Fareham and Whiteley. Therefore, an alternative highway scheme which strengthens the current situation of suppressing flows along Leafy Lane should be the mitigation scheme to be taken forward. The LHA will need further discussions with both Fareham Borough Council and Winchester City Council to establish the form of any mitigation scheme if it is required.

The Do Something modelling for the TA proposed five mitigation schemes for increased junction capacity and modelled only the highway impacts of increased motorised vehicle traffic. There are other solutions for mitigating the transport impacts from local plan development which are more in line with the emerging policy agenda on decarbonising transport from Government and Hampshire County Council. These mitigation options would generally follow a sequential approach to assess their impact on the local road network and the role they can play in traffic reduction and reducing transport emissions starting with measures to avoid the need to travel, active travel measures, public transport (SE Hampshire rapid transit) and finally localised junction improvements. This wider and sequential approach to mitigation will need to be applied to all site-specific transport assessments.

Development Strategy

The LHA acknowledges that the Publication Plan proposes a lower housing number than in the previous draft local plans. This lower housing number is in response to a lower level of housing growth proposed by Government in its consultation in August 2020 on a new standard methodology for calculating the annual housing need. The LHA recognises that FBC need to await the outcome of the Government's consultation before the Publication Plan with the lower housing number can proceed to adoption in line with the FBC's revised Local Development Scheme (September 2020).

The consequence of a reduced housing number is a change to the development strategy and the removal of several housing sites. The LHA supports the removal of housing site HA2 Newgate Lane South. The LHA submitted an objection to policy HA2 in the previous draft local plan consultations.

The LHA also supports the removal of the Strategic Growth Area policy from the Publication Plan. The South of Fareham and North of Fareham Strategic Growth Areas were included in the draft local plan consultations and the LHA submitted a holding objection.

Climate Change

Fareham Borough Council as Local Planning Authority has a legal duty to help meet the requirements of the Climate Change Act 2008. The LHA wishes to be reassured that the borough Council has satisfied itself that the Publication Plan goes far enough in supporting the Government and Hampshire County Council policies on climate change that have emerged during the local plan preparation process. This is in view of the Hampshire County Council's recently adopted climate change strategy and targets to be

carbon neutral by 2050 and resilient to a two degree rise in temperature. For Hampshire to meet these targets, which are in line with Government legal requirements, land-use planning and transport policies at the local district level need to play a strong role and are likely to be most effective at the plan making stage.

The LHA acknowledges the transport evidence submitted in the Strategic Transport Assessment which shows how the traffic impact of the local plan development can be mitigated in traffic and transport terms. The LHA wishes to see demonstrated how the local plan proposals, in relation to transport and how we travel, will contribute to the longer-term goal of achieving carbon neutrality and building resilient networks and systems.

Strategic Policy CC1: Climate Change

The LHA supports the amended climate change chapter and strategic policy CC1 however the supporting text needs more detail with reference to the County Council's adopted Climate Change Strategy (2020) and targets including the resilience of the highway network.

Policy NE8: Air Quality

The local plan correctly identifies road transport emissions as the main source of air pollution which is relevant to the County Council's responsibilities as both highway and public health authority. The LHA supports the local plan commitments to reduce, minimise and mitigate road transport emissions and their impact. However, the Air Quality Policy NE8 needs to be more specific and should be amended to include the policy text 'development should deliver sustainable transport (public transport, walking and cycling) as part of improving air quality'.

Policy TIN1 Sustainable Transport

Given the connection between transport, local plan allocations, air quality and health, there is a lack of commentary or cross reference on air quality management within the Transport Chapter. For example, the supportive text needs to make clear how the transport policies (such as Sustainable Transport TIN1) contribute to both the climate change objectives of reducing CO2 emissions and to the air quality objectives of reducing air pollution.

The LHA recommend amending policy TIN1 on Sustainable Transport to make direct reference to the role of sustainable transport in improving air quality. The supporting policy text also needs to refer to the Air Quality Management Areas / Clean Air Zone designation (on sections of the A27 and A32) and the Air Quality Action Plans in place due to concerns over nitrogen dioxide levels caused by road traffic. Likewise, the Air Quality section needs to refer to the transport chapter and policies and the role they play in mitigating the transport impacts on air quality.

The Transport chapter needs to refer to the Strategic Transport Assessment and the impacts of the local plan traffic on air quality in particular air pollution from the M27, the A32 and A27. This should be cross-referenced with the air quality work carried out as part of the AQMAs and the local plan Sustainability Appraisal. The LHA supports transport mitigation measures of sustainable and active travel modes as an alternative to making private vehicle trips which help overall to reduce emissions harmful to human health and the environment. The LHA would not support any transport mitigation measures which threatened to undermine the success of the current Air Quality Management Areas.

The Transport chapter needs to strengthen the commitment to deliver high quality walking and cycling facilities with reference to the Government's new cycle infrastructure design guidance in Local Transport Note 1/20. Reference to cycle infrastructure design should also be included in the Design chapter.

To contribute to reducing car use, opportunities for enhancing and encouraging active travel to and from school should be encouraged and implemented working closely with Hampshire County Council Children's Services and Highways Departments. The County Council will require the provision of safe walking and cycle routes to schools and existing routes to be enhanced where necessary to improve walking and cycling numbers. Contributions from developers will be sought where necessary including for the production and monitoring of school travel plans (STP's).

Policy TIN3: Safeguarded Routes

The LHA supports the new policy TIN3 Safeguarded routes in relation to delivering bus rapid transit in Fareham and Portchester. However, the supporting text should refer to the future extensions of the SEHRT network to the west of Fareham towards Segensworth, Swanwick Station, Whiteley and the North Whiteley major development area and to serve the Solent Enterprise Zone at Daedalus and adjacent coastal settlements.

Strategic Policy R4 Community and Leisure Facilities

Hampshire County Council Children's Services consider that it is important that the impact of additional housing is assessed and where necessary developer contributions are provided to provide additional childcare places either through on-site facilities or the expansion of nearby provision. The impact will be assessed on a case-by-case basis.

The County Council also provides an Early Years guidance note on this issue for the Borough Council to consider in their plan making in relation to the future need and housing allocations.

Strategic Priority 8

Hampshire County Council Adult Services welcome the reference to affordable housing and the need to address the specific needs of different groups in the community, including the elderly and people with disabilities. However, it is recommended that reference is made to the need to meet a range of housing needs, including those in need of affordable housing and those in need of specialist housing including the elderly and people with disabilities in Strategic Policy H1: Housing Provision.

Consideration should also be given to whether opportunities are available to encourage specialist housing provision in specific site allocations.

Policy HP 5: Affordable Housing

The County Council recommend that Policy HP5 or the supporting text should encourage the provision of housing to meet a range of needs, including specialist housing to meet older persons' needs (such as extra care housing) and those with disabilities.

Policy HP7: Adaptable and Accessible Dwellings

The County Council notes that the Specialist Housing Topic Paper includes reference to the low cost of providing homes to above base accessibility standards. Although there is a correlation between age and mobility, people of all ages may have some mobility impairment, either permanently or temporarily.

The proposed percentages of housing the policy requires to be built to higher accessibility standards is modest and given the rate at which the stock is added to each year it will be a very long time before a significant supply of accessible housing is available in the Borough. With such modest levels of provision, the likelihood of a person who develops mobility impairment will find themselves in a home that can meet their needs is low. Adopting a requirement for a larger proportion of the stock to be built to Cat2 standards in particular would better meet individuals' changing needs and support the creation of sustainable communities by reducing the need to move to find suitable accommodation.

Policy HP 8: Older Persons and Specialist Housing Provision

The inclusion of an enabling policy is welcomed by the County Council; however it is recommended there is specific mention of specialist provision of affordable housing, including extra care housing and housing for those with disabilities. It is noted that specific housing allocations are made only in respect of sheltered accommodation (Policies HA42 / 43 /44). The County Council consider that these sites may also be suitable for other forms of specialist housing, including extra care housing and housing for those with disabilities. It is recommended those policies are amended to reflect this.

The County Council supports the opportunity for exception type development in specific circumstances in this policy and Policy HP6.

Housing Site Allocations

The County Council has considered the housing allocations in its capacity as the local highways authority, local education authority and local minerals and waste planning authority and provides the following commentary.

An initial assessment of the impact on school place planning has been considered based on the level of housing identified, and details are highlighted below for specific sites where there will be an impact on the supply of local school places at primary, secondary and education for pupils with Special Educational Needs and Disabilities (SEND).

The County Council as the local minerals and waste planning authority is pleased to see that some of the comments regarding mineral and waste safeguarding, from the Regulation 18 consultation, have been considered and included within the Regulation 19 proposed submission document. Within the County Council's Regulation 18 response a list of sites that were deemed to require a Mineral Resource Assessment as part of any potential application was provided. It is noted that all the allocated housing sites that the County Council made such comments on have been removed from the Proposed Submission Document as being no longer available or no longer suitable.

Housing Allocation Policy HA1 – North and south of Greenaway Lane – 824 dwellings

The development of 824 dwellings will create additional pressure for school places locally at primary, secondary and special schools. It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement j.

Housing Allocation Policy HA3 – Southampton Road – 384 dwellings

The identification of the need for developer contributions for education and ensuring safe walking/cycling routes to local schools are provided, is welcomed.

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council's data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement k.

Housing Allocation Policy HA4 – Downend Road East, Portchester – 350 dwellings

It is welcomed that the need for developer contributions has been identified and they will be sought to provide additional educational infrastructure where required. Pedestrian and cycle paths should be provided to local schools and existing routes enhanced where necessary to promote active travel to and from schools.

Whilst the County Council welcome the inclusion of site-specific requirement j, that the site will require a Minerals Assessment prior to any development. The County Council would also like to bring to the Borough Council's attention that this allocated housing site sits within the safeguarded buffer zone of Warren Farm and Down End Quarry, a safeguarded waste site operated by Veolia Environmental Services (UK) Plc.

The safeguarded buffer zone is informed by the safeguarded sites list as defined through 'Policy 26: Safeguarding - waste infrastructure' of the adopted Hampshire Minerals and Waste Plan (2013) (HMWP). The purpose of this policy is to protect current and potential waste sites from pressures to be replaced by other forms of development, including through 'encroachment' where nearby land-uses impact their ability to continue operating.

It is often the case that appropriate buffers and mitigation measures can make potential nearby development compatible. Any mitigation measures would need to be undertaken by the proposed non-minerals or waste development (i.e. the allocated housing development) and reduce potential impacts to and from the safeguarded site to levels that would ensure the safeguarded site could continue its intended waste use.

Usually, the mitigation measures would need to focus on impacts such as noise, dust, visual impact, odour and traffic movements. They can take a variety of forms, including landscape design, tree planting, barriers, building design and orientation and use of different building materials.

The appropriate mitigation measures are best informed through direct discussions with the operator of the safeguarded site as they will be most be aware of operational requirements. However, the County Council is also available for further discussions, as well as facilitation, if required.

With regard to the above site, the County Council would therefore request further wording be added to the site-specific requirements of allocated housing site HA4 as set out below:

“the provision of evidence that the safeguarded site has been considered within any forthcoming planning application, how operator comments have been taken into account and what impacts these comments have had on the proposed development design. Details of any mitigation measures chosen as a result of the analysis should also be included with an application for the site”.

In the unlikely event that it is not possible to agree appropriate mitigation measures, the County Council would seek evidence that the waste management capacity can be relocated or provided elsewhere and delivered.

Housing Allocation Policy HA9 - Heath Road

Whilst the County Council welcome the inclusion of site-specific requirements for Minerals Assessments across the Proposed Submission Document, based upon the County Council’s data, this site does not sit within the Minerals and Waste Consultation Area (MWCA). As such, the County Council do not require that an application for the site be accompanied by a Minerals Assessment, as outlined in site-specific requirement g.

Policy HA2: Newgate Lane South

The County Council as local highway authority supports the removal of policy HA2 Newgate Lane South.

Strategic Growth Area

The County Council as local highway authority supports the removal of the Strategic Growth Area policy.

Employment Allocations

The County Council has considered the employment site allocations in its capacity as local minerals and waste planning authority and provides the following commentary.

Policy E2 - Faraday Business Park

Whilst a number of the allocated housing sites have had site-specific requirements added to them for Minerals Assessments, allocated employment site E2 - Faraday Business Park has not had any added. In line with the County Council’s Regulation 18 response to the local plan consultation, the County Council again request that a site-specific requirement be added to this allocated site policy so that any forthcoming planning application would need to be accompanied by a Minerals Resource

Assessment. The County Council recommend adding the following site-specific wording: The site is within a Minerals Consultation Area. Minerals extraction may be appropriate, where environmentally suitable, subject to confirmation of the scale and quality of the resource.

The County Council would like to take this opportunity to reiterate that any development or significant redevelopments of land may impact mineral resources. As minerals can only be worked where they are found, it is important that viable mineral resources are 'safeguarded' (protected) from needless sterilisation by other development to help to secure a long-term future supply of minerals. Mineral resources are necessary for a vast array of construction activities and their availability is a prerequisite for any housing development. As such, the NPPF requires planning authorities to define Minerals Safeguarding Areas and adopt policies so that, 1) known locations of mineral resources of local and national importance are not needlessly sterilised by non-mineral development, 2) if it is necessary for non-mineral development to take place, the prior extraction of minerals, where practicable and environmentally feasible, is encouraged.

Dear Sir/Madam,

Regulation 19 Local Plan Consultation (6th November – 18th December 2020)

Thank you for your consultation dated 06 November 2020 which was received by Natural England on the same date.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Natural England welcomes the Council's approach to achieving sustainable development through its Local Plan, particularly through its suite of Natural Environment policies that include protection of internationally, nationally and locally designated sites, the enhancement of the local ecological network and the requirement for biodiversity net gain.

Our comments on the Regulation 19 Local Plan and supporting Habitats Regulations Assessment (HRA) and Sustainability Appraisal (SA) are made below.

Strategic Policy DS1: Development in the Countryside

It is recommended this Policy also requires proposals to ensure compliance with Natural Environment policies, in particular Strategic Policy NE1 and Policy NE2, to ensure impacts on nature conservation interests are properly considered and addressed, and biodiversity net gain is achieved (for applicable development).

With regards to soils, the local plan outlines that 'the benefits of protecting the Best and Most Versatile (BMV) agricultural land are considered against the need for development'. This Policy requires development proposals to demonstrate they 'Conserve and enhance landscapes, sites of biodiversity or geological value and soils'.

The National Planning Policy Framework sets out that:

'Plans should: distinguish between the hierarchy of international, national and locally designated sites; allocate land with the least environmental or amenity value, where consistent with other policies in this Framework¹; take a strategic approach to maintaining and enhancing networks of habitats and green infrastructure; and plan for the enhancement of natural capital at a catchment or landscape scale across local authority boundaries.'

1 Where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality.

It is recommended that this Policy is amended to give appropriate weight to the roles performed by the area's soils. These should be valued as a finite multi-functional resource which underpin our wellbeing and prosperity. Decisions about development should take full account of the impact on soils, their intrinsic character and the sustainability of the many ecosystem services they deliver. The plan should safeguard the long term capability of BMV agricultural land (Grades 1, 2 and 3a in the Agricultural Land Classification) as a resource for the future.

Where site allocations are sited on BMV land, the Plan should outline a requirement for the protection of soils during construction where possible, referencing the '[Defra Code of practice for the sustainable use of soils on construction sites](#)'.

Strategic Policy DS3: Landscape

Natural England welcomes the proposed designation of eight Areas of Special Landscape Quality within the Borough, and the requirement for development in these areas to meet stringent criteria that seek to protect and enhance landscape.

Strategic Policy CC1: Climate Change

Natural England advise all Local Plans consider climate change adaption and recognise the role of the natural environment to deliver measures to reduce the effects of climate change, for example tree planting to moderate heat island effects. In addition factors which may lead to exacerbate climate change (through more greenhouse gases) should be avoided (e.g. pollution, habitat fragmentation, loss of biodiversity) and the natural environment's resilience to change should be protected. Green Infrastructure and resilient ecological networks play an important role in aiding climate change adaptation.

Natural England welcomes Strategic Policy CC1: Climate Change that promotes mitigation and adaptation to climate change through various methods including the integration of green and blue infrastructure into the design of developments, adopting higher water efficiency standards, the integration of energy efficiency, renewable and low carbon technologies into all development, and reducing reliance on car travel.

Natural England supports the embedding of policy that will deliver measures to increase sustainability of development over the Plan period. This should also include reducing consumption of raw natural resources, sourcing more renewable or 'green' energy, and reducing waste. Consideration should be given to the collection of financial contributions from development to offset residual carbon emissions elsewhere in the Borough. Consideration can also be given to the retrofitting of existing development with technology that improves energy and water efficiency.

It is recommended that Local Plan policy also seeks measures that help natural habitats across the Borough adapt to the effects of climate change. We would encourage you to refer to the Natural England and RSPB [Climate Change Adaptation Manual](#) and look at the step by step approach to identifying the climate resilience of habitats that occur in the Borough. Consideration should be given to addressing issues on habitats and protected sites that will be exacerbated by climate change, such as flooding, drought, reduction of water resources etc.- the Manual can also help identify these.

Consideration can be given to delivering specific projects within the Borough. For example, to maximise climate change adaptation and mitigation through the establishment of a Nature Recovery Network (NRN), and the Local Nature Recovery Strategy in which the NRN would sit, to ensure climate change resilience at their core. Such projects could potentially benefit from carbon offsetting contributions from development over the local plan period.

Such an approach could link into other aspects of the Plan such as water and air quality, nutrient mitigation for Solent European designated sites, delivery of biodiversity net gain, natural flood management, and green infrastructure implementation among others. Natural England would be happy to advise further on this aspect.

Policy CC2: Managing Flood Risk and Sustainable Drainage Systems

Natural England welcome this Policy that requires development ensures flood and surface drainage are properly addressed, and that Sustainable Drainage Systems (SuDS) are designed in accordance with CIRIA C753 SuDs Manual, to be as 'natural' as possible.

It is advised that the policy makes clear that where a development drains to a protected site(s), an additional treatment component (i.e. over and above that required for standard discharges), or other equivalent protection may be required to ensure water quality impacts are avoided.

Where SuDS are proposed serving as mitigation for protected sites, development should ensure that appropriate resources are put in place to ensure their long-term (in perpetuity) monitoring, maintenance/replacement, and funding.

Policy CC3: Coastal Change Management Areas (CCMAs)

Sea level rise and coastal change are inevitable and bring both challenges and opportunities for people and nature. Sustainable coastal management needs to embrace long-term change and achieve positive outcomes for both.

Policy CC3 identifies that the North Solent Shoreline Management Plan (SMP) policy for the majority of Fareham Borough's coastline is 'Hold the Line', and identifies two CCMAs between Hook spit and Meon Shore, with an identified coastal management policy of 'No Active Intervention'. The Policy will ensure that development in these areas will appropriately consider coastal change. It also will ensure replacement coastal defence schemes 'are consistent with the relevant Shoreline Management Plan and that there will be no severe adverse impact on the environment, the English Coast Path, and the rights of way network'.

We would advise that the Local Plan should also help facilitate the relocation of valued environmental assets away from areas of risk.

Strategic Policy NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

Natural England welcomes this policy that sets out clearly the hierarchy of nature conservation and the requirement for development to 'demonstrate clearly that the mitigation hierarchy has been followed' in terms of avoiding, mitigating or compensating (as a last resort) impacts on biodiversity. Natural England welcomes the Local Ecological Network (LEN) approach that has been included in the local plan.

It is helpful that the LEN and the Council's Green Infrastructure Strategy have been suggested as tools to provide opportunity for enhancements across the Borough. Please read our comments below in relation to Policy NE2 that regards the choosing of suitable opportunities for biodiversity enhancement.

Policy NE2: Biodiversity Net Gain

Natural England is fully supportive of the inclusion in the local plan of a Policy for biodiversity net gain. It is welcomed that the policy refers to the benefits to Borough residents from the ecosystem services that being close to nature provides, and outlines an expectation that offsite net gain must be sought as close to the development as possible. However in some instances this may be difficult, and Natural England recommends that consideration is given to developing a suite of projects across the LEN that development within the Borough can contribute to thereby ensuring the biodiversity within the Borough is protected and enhanced. For example, partners that manage Local Nature Reserves and Sites of Importance for Natural Conservation in the Borough could submit projects to the local planning authority to enhance the ecological value of these sites. These projects could be funded by development that requires offsite compensation or additional enhancements to achieve biodiversity net gain. This approach can also be used by development with limited opportunities for biodiversity net gain on-site.

The Policy outlines that the Council may prepare and adopt a Supplementary Planning Document (SPD) for Biodiversity Net Gain. Due to the need to ensure net gain is delivered in a suitably

strategic way, and having regard to the timescales of the legislative requirement for net gain and further national guidance, Natural England would support the development of such an SPD and would encourage Policy NE2 to outline this as a clear intention of the Council, in order to provide further guidance and support to aid sustainable development across the borough. Natural England will be happy to advise further to aid the development of such an SPD.

- *Calculating net gain*

Please note that Biodiversity Metric 3.0 is due to be published early 2021, which will supersede [Biodiversity Metric 2.0](#). We advise that the Policy is updated accordingly and that this metric is used to measure gains and losses to biodiversity resulting from development, and implement development plan policies on biodiversity net gain.

Please note that although the Policy includes 'nesting and roosting features' as suggestions for achieving net gain, it is our advice that features such as bird and bat boxes, swift bricks, bee hotels etc should be classed as general biodiversity enhancements that should be included as part of a wider biodiversity enhancement and mitigation plan. Net gain specifically should derive strictly from habitat enhancement and creation, required as calculated using the metric.

- *Wider environmental gains*

The reference to seeking wider environmental gains, for example to address water/air quality, flooding, climate change etc. is welcomed. Opportunities for environmental gains, including nature based solutions to help adapt to climate change, might include:

- Identifying opportunities for new multi-functional green and blue infrastructure.
- Managing existing and new public spaces to be more wildlife friendly (e.g. by sowing wild flower strips, changing cutting regime of open spaces and road verges*) and climate resilient
- Planting trees, including street trees, characteristic to the local area to make a positive contribution to the local landscape.
- Improving access and links to existing greenspace, identifying improvements to the existing public right of way network or extending the network to create missing footpath or cycleway links.
- Restoring neglected environmental features (e.g. a hedgerow or stone wall or clearing away an eyesore)
- Designing a scheme to encourage wildlife, for example by ensuring lighting does not pollute areas of open space or existing habitats

*Please see this [paper](#) regarding cost-effective and low-maintenance management for species-rich grassland on road verges and the value it can contribute to biodiversity and ecosystem services.

Please note that Natural England and Defra are developing an Environmental Net Gain/metric for Natural Capital Net Gain that can be used in conjunction with the Biodiversity Metric (but not instead of). Further information will be available in 2021.

- *Monitoring of net gain*

Your plan should include requirements to monitor biodiversity net gain. This should include indicators to demonstrate the amount and type of gain provided through development. The indicators should be as specific as possible to help build an evidence base to take forward for future reviews of the plan, for example the total number and type of biodiversity units created, the number of developments achieving biodiversity net gains and a record of on-site and off-site contributions.

LPAs should work with local partners, including the Local Environmental Record Centre and wildlife trusts, to share data and consider requirements for long term habitat monitoring. Monitoring requirements should be clear on what is expected from landowners who may be delivering biodiversity net gains on behalf of developers. This will be particularly important for strategic housing allocations and providing as much up front information on monitoring will help to streamline the project stage.

Policy NE3: Recreational Disturbance on the Solent Special Protection Areas (SPAs)

Natural England welcome this policy that will require new residential development to address in-combination effects on the Solent SPAs via recreational disturbance. It is recommended the Policy also outlines that other types of development (such as new hotels, student accommodation, care homes etc.) may also need to address recreational disturbance impacts, both alone and in-combination. Such development should be assessed on a case by case basis.

Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

Natural England welcome this policy that will require new development that propose a net increase in overnight accommodation to address in-combination effects on the Solent designated sites via eutrophication from nutrients in wastewater.

Policy NE5: Solent Wader and Brent Goose Sites

Natural England welcome this policy that will require development to address effects on sites identified by the Solent Wader and Brent Goose Strategy (SWBGS) which serve as functionally linked land to the Solent SPAs.

It is recommended that the following wording within the Policy "*Sites which are used by Solent Waders and/or Brent Geese (as shown on the Policies map)*" is amended to read "*Sites which are used by Solent Waders and/or Brent Geese (as identified within the most up to date version of the Solent Wader and Brent Goose Strategy)*" to take account of any changes to sites and their distribution across the Borough, as these updates can be implemented at irregular times. Any further references to the Policies map should be similarly amended to refer to the SWBGS mapping.

Core Areas – due to their essential function within the SWBG network, it is advised these sites are identified for protection by the Policy. Any development that would result in impacts to a Core Area will need to be carefully assessed on a case-by-case basis. There are limited options where the function of a Core site can be fully replicated elsewhere in terms of its suitability and appropriate locality; where such land is available, an assessment of replicability will need to be undertaken through discussions with Natural England and the Local Planning Authority.

Financial contributions – it is welcomed that the Policy outlines that financial contributions proposed as mitigation will be used for the management and enhancement of an 'agreed suitable identified site for Solent Waders and Brent Geese'. Such proposals should demonstrate how such funds will be used to enhance, manage and monitor sites within the wider Solent Waders and Brent Geese network, in perpetuity. It is suggested that the Council works with relevant partners/stakeholders, including cross-boundary partnerships, to develop a strategic project(s), such as a bird reserve, and/or list of projects to enhance, manage and monitor the wider Solent wader and brent goose ecological network, to which contributions can be directed.

Policy NE6: Trees, Woodland and Hedgerows

Natural England welcomes this Policy that seeks to protect and enhance trees, woodland and hedgerows within the Borough. It is recommended that this Policy requires development proposals that affect ancient woodland, ancient trees and veteran trees, to ensure they are in line with [standing advice](#) published by Natural England and the Forestry Commission.

Policy NE8: Air Quality

It is welcomed that the Policy recognises that 'poor levels of air quality can also lead to environmental issues'. The Policy includes a need for planning applications to consider if they will have a 'potential adverse effect on biodiversity, especially where it would affect sites designated for their biodiversity value'.

The Policy outlines that the Local Plan HRA concludes the Plan 'would not have a likely significant effect on the internationally important habitats and species present in the area'. As this issue has

been considered within the HRA appropriate assessment, the wording here should be amended to use the correct terminology under the Habitats Regulations, i.e. the HRA concludes the Plan will not result in an 'adverse effect on integrity' (the term 'likely significant effect' is used at the screening stage of the HRA). See further comments on air quality below in regards to the Local Plan HRA.

Policy NE9: Green Infrastructure

Natural England welcomes this Policy that seeks to fully integrate green infrastructure (GI) into development and maximise opportunities to connect to the wider environment. The provision of enhanced green infrastructure and sites of nature conservation value can not only help address some of the mental and physical health problems that are experienced in the Borough's population, but can also benefit society in other ways including improvements to local air and water quality, reducing the risk of flooding, alleviating noise levels and aiding climate change adaptation.

Policy NE10: Protection and Provision of Open Space

This Policy references protection of public rights of way. Natural England advises that the Policy should also seek to secure enhancement of public rights of way and National Trails, as outlined in paragraph 98 of the NPPF. Recognition should be given to the value of rights of way and access to the natural environment in relation to health and wellbeing and links to the wider green infrastructure network. It is welcomed the plan seeks new access opportunities; it should seek to link existing rights of way where possible. The plan should avoid building on open space of public value as outlined in paragraph 97 of the NPPF.

It is welcomed that the Policy makes provision for appropriate quantity and quality of green space to meet identified local needs (as outlined in paragraph 96 of the NPPF) based on Natural England's work on [Accessible Natural Greenspace Standard \(ANGSt\)](#) in assessing the level of accessible natural greenspace; it is also welcomed that it recognises development may be required to 'provide more open space above what is required by the standards to make the development more acceptable'.

Policy D1: High Quality Design and Place Making

Natural England welcomes this Policy that requires the design of developments to integrate existing and new habitats and biodiversity within a coherent and well managed, connected structure. It is advised that landscaping of developments and open spaces seeks to use appropriate native and locally sourced species as far as possible to cater for local wildlife.

Policy D4: Water Quality and Resources

Natural England welcome this policy that seeks to conserve water and improve its quality.

Southern Water's Water Resources Management Plan (WRMP) 2019, that covers the planning period 2020-2070, projects a significant supply demand deficit during periods of drought in the Western Area, and commits to implementing a long term water resources scheme to restore the supply demand balance whilst avoiding and/or mitigating impacts on European sites, including the River Itchen SAC.

It is Natural England's advice that in advance of any permitting of such a suitable long term scheme, uncertainty remains with regards to water resources and the impacts of abstraction on protected sites.

Although it is welcomed that Policy D4 requires a water consumption for new dwellings of no more than 110 litres per person per day, Natural England strongly recommend all new development within the Southern Water supply area adopt a higher standard of water efficiency of 100 litres/per person/day, including external water use and re-use, in line with Southern Water's Target 100 demand reduction programme which is committed to within their WRMP19. Natural England also recommends that the Policy encourages the wise use of water in conjunction with the water companies, for example by developments incorporating grey water recycling systems and efficient appliances

Please see Natural England advice above in relation to Policies NE4 and Policy CC2 with regards to nutrients and surface water treatment via SuDS.

Neighbourhood Plans

Currently there are no Neighbourhood Plans in the Borough, but the Local Plan provides a 'strategic evidence base' which will inform any future Neighbourhood Plans.

It is recommended that any future Neighbourhood Plans which allocate housing should also identify spaces for environmental enhancement, for the purpose of offsetting environmental impacts, e.g. through the designation of Local Green Spaces. Such a local approach could give communities more ownership over such green spaces and provide a more strategic route to addressing common environmental impacts from development in that area, such as air and water pollution, habitat and species loss and increased carbon emissions, and could deliver biodiversity net gain and nutrient offsetting.

Such spaces could include the development of community orchards and play areas, woodlands and nature reserves, and serve a variety of functions that benefit both nature and the local community, for example providing benefits to health and wellbeing, offsetting nutrient discharges from allocated development and providing further scope for carbon sequestration.

Specific comments on Housing Allocation Policies

- HA9 - Heath Road (70 dwellings)

It is acknowledged this allocation site has resolution to grant permission for 70 dwellings. It is recommended this Policy includes the requirement to secure an appropriate level of offsite compensation to address the loss of secondary woodland on site which may in parts qualify as lowland mixed deciduous woodland habitat.

- HA29 - Land East of Church Road (20 dwellings)

Much of this site shows as Lowland Mixed Deciduous Woodland priority habitat on the Ecological Network mapping for Hampshire. Part of the site is designated as a Site of Importance for Nature Conservation (SINC) according to the Policy map. The Policy outlines a requirement for ecological mitigation for the site-specific construction and operational impacts of a development proposal. It is advised the Policy outlines a requirement to secure an appropriate level of offsite compensation to address any loss of priority habitat on site to ensure compliance with Policy NE1.

- HA31 - Hammond Industrial Estate (64 bed care home)

The Policy should ensure the impact of nutrients in wastewater is addressed to ensure compliance with Policy NE4.

- HA37 - Former Locks Heath Filling Station (30 dwellings)

This site is adjacent to an area of Lowland Mixed Deciduous Woodland priority habitat as shown on the Ecological Network mapping. The Policy should ensure that impacts on priority habitats and protected species are taken into account and appropriately addressed.

- HA38 – 68 Titchfield Park Road (9 dwellings)

The site is adjacent to Sylvan Glade SINC, much of which is ancient semi-natural woodland. The Policy should ensure compliance with standing advice on ancient woodland, ancient trees and veteran trees and that impacts on the SINC and protected species are appropriately addressed.

- HA42 - Land South of Cams Alders (60 sheltered housing)

This allocation site is located on 'Fort Fareham Grassland' SINC that supports woodland and meadow communities. It also lies adjacent to Fort Fareham SINC known for supporting wet woodland communities.

As previously advised in our response to the Supplement to the Reg 18 Local Plan (letter dated 23rd April 2020), allocations and development proposals should ensure they engage the mitigation

hierarchy, where impacts on designated ecological sites/features should first be avoided, and where not possible, adequately mitigated. Where this is not possible, any loss of priority habitat should be appropriately compensated. All residual ecological impacts will need to be addressed before any net gain for biodiversity can be achieved.

Natural England recommends that where loss of SINC habitat cannot be avoided, the policy should make clear how requirements set out within the NPPF, NERC Act 2006 and Local Plan Natural Environment policies will be met. It is advised an appropriate level of offsite compensation should be required to address any loss of priority habitat on site to ensure compliance with Policy NE1 .

- E4: Solent 2 (Employment - 23,500 sq. metres)

This employment allocation is located on Whiteley Meadow - Plot 2184 SINC and Ashley Wood, Fareham SINC. The Hampshire Ecological Network Mapping dataset shows much of this area as Lowland Mixed Deciduous Woodland, a priority habitat listed as required under Section 41 of the Natural Environmental and Rural Communities Act 2006. The site is also situated adjacent to the Gull Coppice (South-West Remnant) SINC which comprises ancient semi-natural woodland.

It is acknowledged that this site is an existing allocation within the adopted Fareham Local Plan Part 2 (2015). The current Policy outlines a requirement for this development to protect existing woodland and avoid habitat severance, and appropriate mitigation and compensation for any loss of protected trees. However, it is our view that a significant area of habitat, including mature woodland, is likely to be lost as a result of development. The Policy should ensure that it is compliant with Strategic Policy NE1 with regards to impacts on the local ecological network in this locality. In line with existing national and local policy and legislation, it is Natural England's advice that the mitigation hierarchy of avoid, mitigate and lastly compensate is employed where considering impacts on these habitats, particularly those designated as SINC. Measures should be sought to protect and enhance the local ecological network. Where impacts cannot be avoided or adequately mitigated, a comprehensive compensation package should be required that addresses the loss of all priority habitat on site (rather than just specifying protected trees), that seeks to enhance and connect habitat in the locality.

Comments on the HRA

Natural England notes that your authority, as competent authority, has undertaken an appropriate assessment of the Local Plan in accordance with regulation 63 of the Conservation of Species and Habitats Regulations 2017 (as amended). Natural England is a statutory consultee on the appropriate assessment stage of the Habitats Regulations Assessment process.

We have the following comments on the HRA:

- *Recreational disturbance – New Forest designated sites*

The Local Plan HRA screening assessment outlines that although the Borough falls within the 25km buffer of the New Forest designated sites (via a straight line), the minimum actual travel distance by car is of approximately 30km travel distance (via the M27). In comparison to the number of visits from residents closer to the New Forest, the assessment states 'visits to the New Forest SAC/SPA/Ramsar associated with increased housing development in Fareham Borough contribute a significantly lower proportion of overall visits to the designated sites and it is not considered likely that significant effects associated with recreational disturbance from Fareham housing development would arise'. The HRA screens this impact pathway out from an appropriate assessment on this basis.

It is understood Footprint Ecology are currently conducting further analysis on several aspects of their latest visitor surveys. This analysis will assist the definition of a robust catchment area for recreational impacts. It will help in the preparation of a strategic, cross-boundary approach with neighbouring competent authorities to deliver habitat mitigation for the New Forest SPA/SAC/Ramsar. This work is due to be completed shortly and will provide a useful update to the evidence base against which such impacts from new development from surrounding local authority areas can be assessed.

Therefore, whilst acknowledging that the level of additional impacts from new residents is known to significantly decrease with distance from the New Forest designated sites, Natural England consider at this time there remains some uncertainty with regard to the evidence confirming the level of additional impacts from new residents of Fareham local plan development. We therefore advise this issue is taken forward to the appropriate assessment stage where further work may be carried out to ascertain the level of impacts as accurately as possible.

Where impacts are identified, suitable and proportionate mitigation should be proposed; we recommend the Council works with the New Forest National Park Authority and the other partner authorities to develop a strategic approach to addressing recreational impacts from new development on the New Forest designated sites. Such an approach should include developer contributions towards the New Forest National Park Authority's Habitat Mitigation Scheme to enable the authority to deliver site specific mitigation measures on behalf of applicants.

Natural England will be happy to provide further advice to the Council on this aspect as the evidence base develops.

- *Air quality*

The Local Plan is supported by an Air Quality Habitats Regulations Assessment (Ricardo, Sept 2020). The conclusions drawn in the Local Plan HRA in regards to air quality impacts are based on those drawn within the Ricardo report. Natural England concurs with the conclusions drawn in the report.

The Ricardo report suggests that the Council regularly reviews the Defra airborne NOx forecast levels. This is welcomed as a way to ensure any changes in forecasting and potential consequential changes to conclusions drawn in the report for this pollutant can be appropriately reviewed and addressed during the local plan period.

- *Water quality – nutrients*

The HRA calculates a nitrogen budget for the local plan of 2536.99 kgTN/yr. Appendix III of the HRA outlines various mitigation schemes that can be utilised or progressed as a means to ensure nutrient neutrality can be delivered by new development.

The HRA states within its Summary of Findings that the sites Chichester and Langstone Harbours SPA/Ramsar, Portsmouth Harbour SPA/Ramsar and Solent and Dorset Coast SPA are screened out of an appropriate assessment in relation to water pollution impacts. Much of development within Fareham borough is served by Peel Common wastewater treatment works (WwTW), which is a coastal WwTW that discharges effluent several kilometres out into the Solent. It is our advice that long-shore outfall pipes are likely to have shifted and widened the distribution of nitrogen loading within the effluent across the Solent SAC and SPAs. It is important to recognise the loading from Peel Common WwTW contributes to a number of estuaries and catchments within the Solent (including Portsmouth Harbour, Langstone Harbour, Chichester Harbour, River Meon, Wootton Creek and the Medina Estuary catchments). It is therefore Natural England's view that, because of this wide distribution of nitrogen loading, all designated sites should be screened in.

- *Other comments on the HRA*

Section 7.7.3 – this paragraph refers to the 'SAC' although it is relating to Portsmouth Harbour SPA and Ramsar.

Comments on the SA

We are broadly satisfied that the objectives and indicators within the Sustainability Appraisal cover our key interests, and welcome the identification of the need to conserve and enhance biodiversity, landscape character, and to reduce pollution. We also welcome the need to address minimise the

effects of climate change, and to minimise impacts on best and most versatile agricultural land. Please see some more specific comments below.

- SA5: To Minimise Carbon Emissions and Promote Adaptation to Climate Change

This SA objective to address the effects of climate change is welcomed. It is suggested a further monitoring parameter(s) is included to monitor the implementation of new GI/habitat that can seek to alleviate the pressures of climate change on species and the ecological network whilst also providing other benefits as described further in our advice above; e.g. percentage of new GI/ extent of priority habitat within the ecological network.

- SA7: To Conserve and Enhance Biodiversity

We advise that this SA objective also seeks to conserve and enhance geodiversity within the Borough, in line with national planning policy.

The SA outlines the Plan 'is predicted to lead to negative impacts to ecological receptors in the short to medium term, but many of these impacts are capable of being mitigated. Long-term effects are likely to be both positive and negative, and highly site-specific'. It is acknowledged these effects can be avoided/mitigated by the implementation of several policies including NE1, NE3, NE4 and NE5. It is advised Local Plan Policy requires relevant development to carry out site-level Habitats Regulations Assessments in order to ensure impacts on European sites are suitably addressed.

It is also suggested that further monitoring parameters are incorporated to ensure impacts on internationally, nationally and locally designated sites are monitored throughout the Plan period, e.g. via the number, extent and condition of sites designated for nature conservation. We would advise the use of a green infrastructure standard as an indicator, such as Natural England's Accessible Natural Greenspace Standard (ANGSt). Parameters for measuring the implementation of net gain should be introduced, see further above for our advice on net gain monitoring.

We would be very happy to comment further as the plan process progresses. If you have any queries relating to the detail in this letter please contact me on 07787005505.

Yours faithfully

Rebecca Aziz

1) Policy: HP1 - New Residential Development

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Housing Allocation Policy: HA9 SHELAA Reference: 1007 Name: Heath Road Allocated Use: Residential Location: Locks Heath Indicative Yield: 70 dwellings Size: 2.43 ha Planning Status as at 1 July 2020: Resolution to grant permission The above proposed development area is unsound, in that it contravenes : a) the Government Guidelines on biodiversity and Ecosystems (<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>) which direct all public authorities to conserve and enhance biodiversity b) The National Planning Policy Framework (NPPF) para. 170 "Planning policies and decisions should contribute to and enhance the natural and local environment ---" and "---minimising impacts on and providing net gains for biodiversity" and para 175 "development resulting in the loss or deterioration of irreplaceable habitats ---- should be refused" c) its own Local Plan Strategic Priorities 2.12 "9. Protect and enhance the Borough's landscape features, valued landscapes, biodiversity,-----" d) ditto, para.9.15 : "Development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are reasons of overriding public interests and a suitable compensation strategy." e) ditto, Strategic Policy NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network : "----Development within the Borough whose primary objective is to conserve and enhance biodiversity ----" and it ignores f) its own Sustainability Appraisal para 6.8.1 "Biodiversity in the borough is likely to be affected by development proposals, although policies DSP13-15 include requirements for biodiversity gain and avoidance of negative impacts" - The development of HA9 does not conserve or enhance biodiversity; it destroys it. HA9 is the last remaining area of wildness in Locks Heath. As an area of secondary woodland and scrub, it is the last undisturbed habitat for birds and mammals (mice, squirrels, hedgehogs, foxes, deer, and perhaps badgers). It is the major source of the biodiversity of Locks Heath and is an irreplaceable natural habitat. It should not be selected as a development site in the first place. Its development would have a considerable adverse impact on the local biodiversity. However, but if that is inevitable, then its plan must designate a considerable area of 'Corridors and areas managed for wildlife and biodiversity with no public access', as in HA1. To merely retain isolated trees and surround them with mown grass destroys all existing shelter and food supply for the current wildlife in the area. ---- The inclusion of HA9 as a development site with 70 additional homes is unsound in that it is not consistent with national policy as regards accessible services. a) on traffic It ignores its own Sustainability Appraisal para 4.7.1 : " Many key roads and junctions in the wider area suffer from severe congestion---- --- the scale of development proposed, together with anticipated growth in the demand for travel from existing communities within the sub-region, will place further demand on already stretched transport networks. In this context demand management measures will be required to limit the effects of growth in the area" - The suggestion that the major exit should be onto Heath Road is wrong; at peak times, the traffic on this road is already constant, with hold-ups at the junction with Locks Road, and the proposed development of HA1 and other areas in Warsash, will cause this to get worse. b) on Primary Care Provision It ignores its own Infrastructure Delivery Plan for Primary Care Provision (page 41) : "Proposed development in Locks heath (HA9 Heath Road---) : There are two primary care practices located near to this development, Locks wood Surgery and brook Lane Surgery. At this stage neither practice has scope to expand their current estate and therefore the CCG would not be assured that the practices would be able to cope with a significant growth in their list size." - it is already almost impossible to make a doctors' appointment ---- The inclusion of HA9 as a development site with 70 additional homes is unsound in that it is not consistent with NPPF policy on Climate Change : para 149 "plans should take --- into account the long-term implications for flood risk ---- and the risk of overheating from rising temperatures" - The subsoil is gravel and clay (of Bracklesham & Barton Beds). Surface water does not drain well. An increase in roofs & hard surfaces in HAP and a decrease in tree roots and vegetation will increase the danger of flash flooding onto Heath Road. It also contravenes the Fareham's own declared policies in the Plan's para 9.81 : "Trees, woodlands and hedgerows contribute to the environment in many ways; they improve the quality of the air removing dust particles and harmful gas emissions such as carbon dioxide. In urban areas they help to reduce the heat island effect, reduce soil erosion and flash flooding by slowing down and capturing fast flowing water. In addition, trees, woodlands and hedgerows help to improve biodiversity and provide landscape character whilst also adding a sense of place in our communities. These benefits all help to improve the health and wellbeing of people and in turn improve the quality of life for those who live and work in Fareham. - It is the lung for surrounding homes. Its loss will degrade air quality and increase pollution along Heath Road. - It contains the last remaining traces of the former character of Locks Heath, giving it its name. It gives a sense of place and makes Locks Heath 'home'. Without it we shall just be another artificial desert.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

De-classify HA9 as a Development Site. If that is unavoidable, then a) designate a large area of natural habitat without public access b) specify rainfall run-off depressions, to prevent flash-flooding onto Heath Road c) specify no vehicle exits onto Heath Road d) specify retaining the trees along the southern boundary with Heath Road to provide shade for any new houses there

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would make the Local Plan more compliant with preserving biodiversity, and with making provision for future climatic change.. It would lessen the impact on primary health care provision, local traffic and local character.

Your suggested revised wording of any policy or text:

para 4.20 Housing Allocation Policies - remove HA9 Heath Road from the list

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Keely, Lauren

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

Early Years requirements in major new developments – a summary

This document provides summary guidance for Hampshire County Council and other agencies in determining a requirement for early years and childcare places to support new housing developments and to inform local planners.

This document augments the extant guidance entitled 'Early Years requirements in major new developments' where detailed estimates of place requirements, take up of early education entitlements for government funded hours, and parental demand are provided. This document is a guide to supply and demand in localised areas, and specifically addresses the Early Years requirements for the area of:

Fareham Borough

In looking at the demand for childcare in an area the Services for Young Children (SfYC) team typically look at the ward and adjoining areas Small Area Population Forecast (SAPF) data and assess it against the known supply of places. Childcare places need to be monitored regularly as the demand for childcare is directly and indirectly influenced by national and local policies. This childcare sufficiency work is carried out by the SFYC team and it is requested that prior to any development we are consulted and are able to share our up to date knowledge of the childcare need in the area.

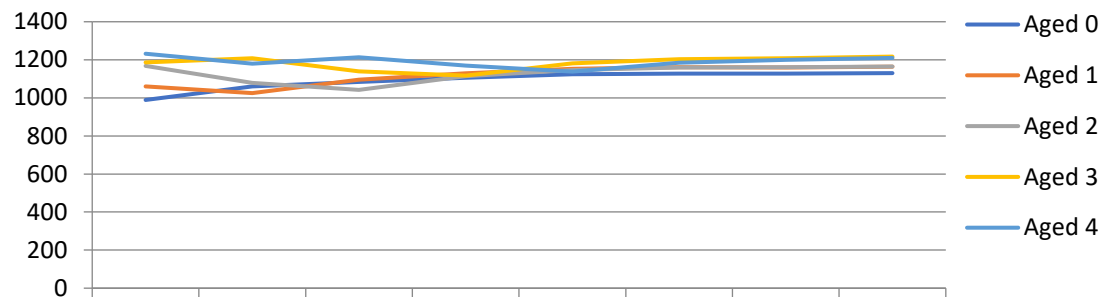

SFYC monitors childcare need for all early year's age cohorts. Early Years Education (EYE) is a statutory offer which is available universally to all three- and four-year olds from the term after their third birthday. For two-year olds, the offer is limited to children of families who meet low income criteria. There is no statutory EYE offer for children aged nought and one year old, but the local authority has a statutory duty under the Childcare Act 2006 to ensure working parents of children aged nought to five can access suitable childcare to meet their needs. This duty extends to children up to twelve years old for Out of School Care.

The overall Fareham area child population aged 0 and 4 years old dipped in 2019 by 83 but is projected to grow by a net 250 between 2018 and 2025 – 0.45% on 2018. The high-level trend projection to 2025 is shown below (Fig.1).

Significant growth in Fareham North ward is anticipated due to the impact of the Welbourne development. Most other ward areas are projected to see either a much slower increase or slight decrease in child numbers, with the overall picture apart from Fareham North showing a broadly static position.

Fig. 1

Fareham area population trend forecast 2018-2025

	2018	2019	2020	2021	2022	2023	2024	2025
Aged 0	989	1060	1083	1105	1124	1127	1127	1130
Aged 1	1060	1025	1095	1130	1153	1162	1160	1164
Aged 2	1168	1078	1042	1114	1146	1159	1162	1164
Aged 3	1186	1209	1140	1117	1181	1203	1209	1217
Aged 4	1232	1180	1213	1169	1138	1185	1200	1210

1. Demand for places:

The starting point is to calculate the number of children in each age group expected from the SAPF data. It must be noted that the SAPF is a modelled population forecast. It also does not take into account the fact that parents don't always take up their childcare places in the same district in which they live.

We know from market data that for each age cohort the percent of children requiring childcare in an early setting is typically:

Aged 0 – 1 yr old 17%
 Aged 2 yr old 70%
 Aged 3 yr old 99%
 Aged 4 yr old 66% (It is assumed that 34% of this age cohort is typically at school)

Early Years Education (EYE) is a statutory offer which is available universally to all 3- and 4-year olds. For two-year olds, the offer is limited to children of families who meet low income criteria. In Hampshire, children can start their free entitlement in the term after their second/third and fourth birthday and can receive a maximum of 570 hours per child's eligibility year. From 2017 the Government increased the offer to 1140 hours for working parents; publicly known as the "30 hours offer".

EYE hours are not limited to the school academic year, offering parents the flexibility to take up their hours across the number of weeks that the provision is open. The demand for three-year-old places is high and trend data in Hampshire indicates that in the region of 90-95% of the three-year-old population take up this entitlement. It is, therefore, expected that there will be continued high demand from this age group within any new housing development.

The demand for four-year-old places, prior to their starting school, is also high. However, due to four-year olds taking up their school place, often in the September after their fourth birthday, the demand within the pre-school and nursery sector is in the region of 32-36% of the four-year-old population.

The demand for two-year olds continues to grow for families who meet certain low income level criteria outlined in section 2 below.

2. Low income families

Where housing developments include a significant level of social housing, shared ownership schemes and/or dwellings that would attract low income families, developers and planners should consider accessibility to affordable early years education and childcare.

Developers and planners should be aware that, since September 2014, the provision of free early years education to eligible 2-year olds is a statutory offer. The offer provides the same choices for parents as the free early years' education entitlement for 3- and 4-year olds. The exception is that the eligibility is primarily based on income assessment.

3. Space requirements and regulations

The space required to fulfil these requirements is stipulated within the [Statutory Early Years Foundation Stage](#) ¹

Section 3.57 sets out premises requirements and states, the premises and equipment must be organised in a way that meets the needs of children. In registered provision, providers must meet the following indoor space requirements:

- Children under two years: 3.5 m² per child.
- Two-year olds: 2.5 m² per child.
- Children aged three to five years: 2.3 m² per child.

These calculations should be based on the net or useable areas of the rooms used by the children, not including storage areas, thoroughfares, dedicated staff areas, cloakrooms, utility rooms, kitchens and toilets.

All early years and childcare operators must register with Ofsted as the regulatory body. Ofsted will inspect an organisation's ability to meet expected standards covered within the Early Years Foundation Stage. The Early Years Foundation Stage also contains expected minimum requirements for the suitability of premises which can be found within the same statutory framework document (accessed through the link on page 3). It is expected that all early years and childcare providers are able to meet requirements to deliver the free early years entitlement at the highest quality and Hampshire providers are expected to achieve and maintain "good" and "outstanding" inspection results.

¹ Statutory Early Years Foundation Stage 2014

4. What developers should provide

Developers should consider 80 early years places for every 1,000 houses and that these places are offered through a mix of facilities where possible. The childcare planning should allow for flexible hours of opening and covering at least 7am to 7pm for full day care.

For 1,000 houses, it is anticipated that one full day provision of 50+ places, together with an additional 30 places from shared community premises, would meet the needs of this size of development.

Where developments provide a high number of social housing dwellings, it is considered there will be the potential for greater demand for affordable childcare and access for two-year-old funded provision. It is likely that this childcare will be required to support employment activities and, therefore, any provision to support lower income families should have regard to the flexibility of opening and closing times of childcare to meet the employment or return to learning requirements of parents and carers.

The location of the childcare provision is parental choice, some choose for their childcare to be located near to their home address and some choose childcare close to their work- place.

The childcare market has also seen parents preferring provision that is close to, or on the site of, infant or primary schools where the school site is large enough to accommodate the provision.

5. Timing of the early years and childcare development

There must be early consideration of the allocation of the sites and/or premises for early years and childcare. It is recommended that such provision is considered for development and occupation at the same time as that for primary schools. This is especially important within developments that have little or no accessible early years and childcare provision adjacent to the new housing development.

The impact of a new housing development, alongside current capacity in the early years and childcare market, should also be considered in terms of early occupation of families and their ability to access provision and whether any interim measures are put in place prior to thresholds of dwellings occupied being reached.

6. How this should be provided

Recent practice suggests to planners / developers that provision should be made for early years and childcare facilities for children 0- 5 years within their plans for the housing developments. Childcare facilities should either be associated within / alongside community facilities or in a dedicated space identified and available for development. In either case, it is suggested that there are advantages with locating adjacent to, or combined with, primary school sites.

For dedicated nursery/childcare facilities, we suggest an area of 0.25 hectares. For combined school / pre-school sites this can be reduced to 0.2 hectares as there can be economies with a more flexible site layout when both are planned together. These

site areas are estimates that the Council has used in other recently provided facilities but will need to be tested against the draft accommodation briefs.

It is assumed that the sites would be made available through an open and transparent process to interested early years and childcare providers; or through the district councils and community associations where it is expected that childcare will be operated within community facilities.

The location of any provision must enable good access for walking along safe and pushchair accessible routes as well as having good public transport and motor-vehicle transport links and be within a 1-2 mile radius of the main housing development.

It should be noted that early years and childcare provisions of 50+ places are considered more economically viable and may attract the best investment opportunity from the sector.

It is also a requirement that a childcare operator that is seeking to accommodate children for free early years education makes an application to Hampshire County Council prior to opening their provision. Any developer who has engaged a childcare establishment to deliver or take up opportunity on their site should ensure the childcare provider contacts Services For Young Children at Hampshire County Council via email childcare@hants.gov.uk at the earliest opportunity.

7. Comments on identified Sites in Fareham Local Plan 2037, Housing Need and Supply

https://www.fareham.gov.uk/PDF/planning/publicationplan/Publication_plan_FINA_L.pdf

Ha1 North and South Of Greenaway Lane (824 dwellings)	This proposal would generate demand for an additional 50+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution. These places are essential, to meet the needs of working families
HA3 Southampton Rd (348 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families.

HA4 Downend Rd East (350 dwellings)	This proposal would generate demand for an additional 20+ childcare places. The respective development allocations within the draft local plan require proposals to address these needs either directly or by way of a financial contribution towards the expansion of existing provision. These places are essential, to meet the needs of working families. In our Spring 2020 Childcare Sufficiency Audit Portchester West was identified as an area to be closely monitored due to the collective new and planned housing developments in the area.
HA7 Warsash Maritime Academy (100 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed. In our Spring 2020 Childcare Sufficiency Audit Warsash was identified as an area to be closely monitored due to the collective new and planned housing developments in the area. Existing settings are close to capacity, including Out of School provision. These places are essential, to meet the needs of working families
HA9 Locksheath Rd (70 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed
HA10 Funtley Road Sth (55 dwellings)	The plan does not indicate the provision of childcare facilities. Depending on the housing mix and age demographic of the residents, a small number of additional childcare places for age 2-4 yr olds could be needed

<p>FTC 1 (20 dwellings) FTC 2 (100 dwellings) FTC 3 (120 dwellings) FTC 4 (94 dwellings) FTC 5 (49 dwellings) FTC 6 (45 dwellings)</p>	<p>The plan does not indicate the provision of childcare facilities. These are generally small developments in dispersed locations; however collectively they create 428 dwellings in the Fareham Town Centre Area. A new Full Day Care nursery offering approximately 50 places has opened in Fareham Town Centre which may relieve the pressure on places in the area. The impact of new housing on childcare sufficiency in Fareham Town Centre will need to be closely monitored by SFYC.</p>
<p>Planned developments with less than 50 dwellings (HA12,HA13,HA15,HA19,HA22, HA23,HA24,HA26,HA27,HA28, HA29,HA30,HA32,HA33,HA34,HA35,HA36, HA37,HA38,HA39,HA41)</p>	<p>These are smaller developments in dispersed locations. Depending on the housing mix and age demographic of the residents any generated demand can most likely be accommodated in existing provision.</p>

8. Contact

Hampshire County Council's Children's Services can be contacted to discuss any support requirement in selection of appropriate high quality early years and childcare providers or any aspects of the regulation and legislation requirements.

The childcare and early years education development team can be contacted via childcare@hants.gov.uk

Dear Sir / Madam

REPRESENTATIONS TO FAREHAM LOCAL PLAN 2037

These representations to the Publication Version of the Fareham Local Plan 2037 are made on behalf of Reside Developments Ltd ('Reside') in relation to the land they control at Funtley. This includes the site to the south of Funtley Road ('Funtley South') which is the focus of these representations and is identified as a proposed allocation under policy HA10.

Background

The Funtley South site was initially proposed as an allocation with an indicative capacity of 55 dwellings within the Draft Local Plan during the consultation held in 2017. In addition to residential development, Policy HA10 also showed a substantial area of new open space to the south of the site between the developable area and the M27 motorway.

Since then, a number of planning applications have been made in relation to this site, (detailed in full at Appendix 1); notably:

- Outline planning permission being granted in September 2020 (ref. P/18/0067/OA) for residential Development of up To 55 Dwellings (Including 3 Custom-Build Homes) (Use Class C3), Community Building Incorporating a Local Shop 250 Sqm (Use Classes A1, A3, D1 & D2), Accesses And Associated Landscaping, Infrastructure And Development Works.
- Full planning permission granted in October 2018 (ref. P/18/0066/CU) for a change of use of an area of land containing the Public Open Space Allocation and an additional parcel of land to the east to form a new Community Park.

Since these approvals, two further applications were submitted on 6th October 2020, both of which are currently under consideration:

6th Floor North
2 Charlotte Place
Southampton
SO14 0TB

T 023 8072 4888 turley.co.uk

- Outline application to provide up to 125 one, two, three and four-bedroom dwellings including 6 self or custom build plots, community building or local shop (use class E & F.2) with associated infrastructure, new community park, landscaping and access, following demolition of existing buildings. (Ref: P/20/1168/OA)
- Change of use of land from equestrian/paddock to community park following demolition of existing buildings. (Ref: P/20/1166/CU)

The thrust of our representation is that the Publication Version Local Plan does not plan to meet the council's minimum local housing need as required by national planning policy. We set out how land south of Funtley Road can assist in delivering a higher number of dwellings on-site, by appropriately increasing the density of the proposal and extending the site boundary slightly further to the south, while still providing a significant benefit in the form of a community park. This proposal is detailed in the two live planning applications - P/20/1168/OA and P/20/1166/CU.

We have previously submitted representations on behalf of Reside to the Local Plan Supplement in February 2020, the Local Plan Issues and Options consultation in the summer of 2019, as well as earlier consultation on the Draft Local Plan in 2017. In these representations we were supportive of the council's acknowledgement that the Borough has an increased housing need but noted that additional housing, including on existing sites and proposed allocations, would need to be identified to meet this higher need.

The continual identification of this site has been supported, and evidence provided by Reside in response to these consultations showed that the Funtley South site was capable of accommodating additional dwellings to meet the housing need without any adverse impacts to character or landscape. It is disappointing that the Publication Version has not reflected these previous submissions and it remains unclear if they have informed this current consultation.

REPRESENTATIONS

Strategic Policy DS2: Development in Strategic Gaps

DS2 seeks to prevent development which will significantly affect the integrity of the gap and the physical and visual separation of settlements. This policy seeks to introduce a new strategic gap in the vicinity of our clients' interests, without justification. The Policies Map illustrates that the proposed allocation lies outside of the strategic gap, however this does not fully reflect the boundary of Reside's proposal as per the live planning application P/20/1168/OA, where the application site's southern edge falls within the area proposed as Strategic Gap under policy DS2.

The Council's Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not provide justification for this boundary and merely states that *"Wrapping the gap boundary tightly around the settlement (and future approved development), would allow Funtley to expand moderately, but still retain its separate identity and not become contiguous with North Fareham."* The evidence base appears to entirely ignore the detailed submission made in our previous representations. We therefore resubmit these with this submission at Appendix 3.

We submit that there is no need for the identification of a new strategic gap in this locality. The evidence base does not support it, and having considered the site against the adopted Landscape Character Assessment and policy context, there is no reason to conclude that the site has any elevated landscape status or importance above the rest of the surrounding landscape within the proposed Strategic Gap. Moreover, there is no extant designation such as public open space that would elevate the status in terms of local community association.

The site's intrinsic character in a landscape sense does not preclude development, the nature of which could incorporate elements of the landscape into a sensitively designed scheme.

Were the Council to continue to seek to impose a new Strategic Gap in this location, and not withstanding our submissions against this approach, we would request amending the Strategic Gap boundary to reflect the site boundary of the live application P/20/1168/OA, as illustrated at Appendix 2. This would ensure that the aims of policy DS2 are achieved as it would allow Funtley to expand moderately, but also retain its own identity and it would not coalesce with North Fareham. This would be guaranteed by the provision of the community park proposed through application P/20/1166/CU. This will be transferred to the council, so there is no need to designate that area as Strategic Gap.

Strategic Policy DS3: Landscape

DS3 allows for development in areas of special landscape quality only where the landscape will be protected and enhanced. The Policies Map shows the proposed area of special landscape quality as following the boundary of the proposed allocation, and in the same way as the strategic gap designation, this does not correspond with the boundary of our client's site as per the live planning application P/20/1168/OA. The site's southern edge falls within the proposed Area of Special Landscape Quality 4 (ASLQ 4) Meon Valley under policy DS3.

We submitted a Technical Note in relation to the proposed Meon Valley ASLQ alongside our representations to the Fareham Local Plan Supplement in February 2020. This is reattached at Appendix 3. It supports our objection to the boundary of ASLQ 4 Meon Valley taking in land to the east of the disused railway known as the Deviation Line.

The council's Technical Review of Areas of Special Landscape Quality and Strategic Gaps does not provide justification for inclusion of this land in ASLQ 4. In describing the special landscape qualities of the Meon Valley, the report emphasises the southern part of the proposed designation; *"The area has high scenic quality and topographic and visual unity, particularly in the lower reaches."* The report notes that the *"Major road and rail corridors pass through the upper section, but much of the area retains a sense of seclusion."* This area has its tranquillity impacted by the M27 to the south and the active Eastleigh to Fareham Railway line to the east.

It is important the ASLQ boundaries do not incorporate areas that could form allocations, as it could unduly restrict developable areas and affect housing supply numbers. ASLQ 4 around Funtley does not seem to relate to those in the LDA 2017 report, nor the current Local Plan. The boundary for the Meon Valley ASLQ should be delineated by the Deviation Line to the west of Funtley, rather than cross over it.

The area affected is largely proposed for a community park under application P/20/1166/CU and therefore can make a significant contribution to the landscape throughout the plan period; however, there is no justification for it being included within the ASLQ boundary as it stands. Any such designation must be robust, clearly defined and supported by evidence. As currently drafted, it is not, and therefore it is unsound as it is not justified.

Strategic Policy H1: Housing Provision

Policy H1 does not make provision for sufficient housing to meet local needs. The policy is based on delivering a level of housing set out in the consultation draft revised standard methodology (August 2020), of 403 dpa. This was never adopted policy and should not have been used as the basis for the Regulation 19 Draft Local Plan. The National Planning Practice Guidance sets out the current standard methodology and produces a minimum need of 514 dpa for Fareham Borough.

On 16th December 2020, the Government published the response to the consultation on the standard method for assessing local housing need. In a statement, the Secretary of State for the Ministry of Housing Communities and Local Government said, “we plan to leave the standard method as it was created in 2017 for the majority of the country.” The Government’s published response to the consultation indeed confirms that Fareham’s local housing need is 514 dpa.

Therefore, policy H1 is unsound as it is not positively prepared, providing a strategy which, as minimum seeks to meet the areas objectively assessed needs and it is not in accordance with national policy, NPPF paragraph 60.

Furthermore, policy H1 does not fully address the duty to co-operate in terms of meeting the unmet of needs of more constrained local authorities within the housing market area. H1 is therefore not effective on cross-boundary strategic matters.

In the Local Plan Supplement (January 2020), FBC set out a strategy to deliver 520 dpa, and it is considered that the Local Plan 2037 which is the subject of this Regulation 19 consultation, rows back significantly from the ambitions for sustainable growth that were outlined in the earlier strategy.

The implications of not planning for sufficient housing are significant and will no doubt be debated at the Examination hearings. We set out below how land at Funtley South could assist in helping to deliver a higher level of housing.

Housing Allocation Policy HA10: proposes to allocate 5.74ha of land at Funtley Road South for 55 dwellings.

Paragraph 117 of the NPPF requires planning policies to encourage the effective use of land in meeting the need for homes and other uses while safeguarding and improving the environment and ensuring safe and healthy living conditions. Paragraphs 122 and 123 set out policy on achieving appropriate densities. They state that “Planning policies and decisions should support development that makes efficient use of land,” and “Where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site.”

Policy HA10 is not consistent with national policy in this regard as it does not make most efficient use of land. As stated in our representations to previous Local Plan consultations, we consider the council is missing an opportunity by not making additional use of proposed allocation at Funtley Road South to address the Borough’s housing need. In addition, it is missing an opportunity to protect sensitive areas of the borough from potential development.

By proposing to allocate the site and the recent grant of planning permission for 55 dwellings, the council has indicated it considers the site to be sustainable, and this is supported by the Sustainability Appraisal. We contend that the indicative yield should be amended to 125 dwellings and the site boundary should be realigned, as illustrated in Appendix 2, to incorporate some additional land to the south. This would result in a site size of 6.23 hectares. The live planning application P/20/1168/OA provides evidence to justify this.

Specifically, in relation to the live planning application for 125 dwellings on the larger site area:

- The Illustrative Masterplan demonstrates how the development of up to 125 dwellings, community building or local shop with associated infrastructure, new community park,

landscaping and access, could be accommodated on the proposed larger site in a sustainable way (Appendix 4)

- The Landscape and Visual Appraisal (Appendix 5) concludes that an appropriate development can be provided without substantial harm to landscape or views, but which provides a number of community and landscape benefits.
- The Ecological Assessment demonstrates that there are no adverse effects on any designated sites or protected species resulting from a development of 125 dwellings on a larger site area and also sets out appropriate mitigation and enhancement measures.
- The Transport Assessment concludes that the proposed development is considered to be acceptable in transport policy terms and meets with national and local policy criteria. The assessment work undertaken has indicated that there would be no demonstrable harm arising from the proposed scheme and there are no identifiable severe impacts. The Travel Plan includes a range of measures to maximise sustainable transport opportunities.
- All other reports and supporting documentation, including in relation to trees, flood risk, contamination, noise, sustainability, utilities, and archaeology demonstrate that the site can accommodate 125 dwellings.

Policy HA10 sets out 11 site-specific requirements (a-k). A number of these criteria are not sound and we have explained why in the table below.

a) The quantum of housing proposed should be broadly consistent with the indicative site capacity; and	Unsound, for the reasons set out above.
b) Primary highway access should be from Funtley Road; and	Sound. In accordance with consented development and live application.
c) Building heights are limited to a maximum of 2 storeys; and	Unsound as this is not justified by evidence. This is better determined at the detailed planning application (reserved matters) stage. Policy D1 will provide an adequate framework to ensure building heights are acceptable. This criterion should be deleted.
d) Safe pedestrian and cycle crossing points across Funtley Road and connectivity with the existing footpath/bridleway network in the vicinity of the site and eastwards towards the centre of Funtley village in order to maximising connectivity to nearby facilities and services; and	Sound. In accordance with consented development and live application.
e) The creation of a vehicular loop road on the site, allowing for pedestrian and cycle permeability across the site; and	Unsound as this is not justified or effective. It is not clear what is meant by a vehicular loop road. The requirement for pedestrian and cycle permeability across and through the site is supported.

<p>f) Proposals shall take account of the site’s landscape context by incorporating view corridors from Funtley Road through to the public open space allocation to the south of the residential allocation. The view corridors should form part of the on-site open space and should incorporate pedestrian and cycle links, whilst vehicular crossing of links should be limited; and</p>	<p>Sound. In accordance with consented development and live application.</p>
<p>g) The existing woodland on-site shall be retained and incorporated within the design and layout of proposals in a manner that does not impact on living conditions or prevent damage to any nearby dwellings, roads, footpaths or other infrastructure; and</p>	<p>Sound. In accordance with consented development and live application.</p>
<p>h) A landscape buffer shall be incorporated between development and the Great Beamond Coppice SINC to the east of the site; and</p>	<p>Sound. In accordance with consented development and live application.</p>
<p>i) The provision of a building/ buildings for community uses, located in an accessible location to enable a range of uses for both existing and new residents; and</p>	<p>Sound. In accordance with consented development and live application.</p>
<p>j) The site is identified as a mineral safeguarded site (brick clay is likely to underlay site). A Minerals Assessment will be required prior to any development in accordance with the Hampshire Minerals and Waste Plan (2013); and</p>	<p>The site benefits from an extant outline permission. No such conditions are required under that consent, or were requested during the determination. This requirement is therefore not considered necessary or reasonable, and should be deleted.</p>
<p>k) Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4 and NE3.</p>	<p>Sound, although it should be recognised that contributions towards some forms of infrastructure are provided for by CIL.</p>

We would very much welcome the opportunity to work with the council to address these concerns and amend the criteria where possible, and therefore would wish to attend the Examination hearings.

HP1: New Residential Development

This policy allows for new residential development within the urban area boundary as shown on the Policies Map. Our representation relates to the proposed urban area boundary at Funtley South, which should be amended to incorporate the site boundary proposed under application P/20/1168/OA. Evidence submitted with this application demonstrates that this would result in sustainable development. Furthermore, it would enable the site to contribute a greater level of housing to meet Fareham’s housing land supply.

HP4: Five Year Housing Land Supply

This policy is supported, however, we would urge the council to consider increasing the number of homes proposed for allocation at Funtley South through Policy HA10 as a way of contributing to addressing the current deficit in five-year housing land supply within the Borough. The Publication Version Local Plan could do more to address the shortfall in the short term.

HP5: Provision of affordable housing

The policy requirement at criterion **iii** is unsound as it is not consistent with national policy. Paragraph 64 of the NPPF expects 10% of all homes on major development involving housing provision to be available for affordable home ownership. Footnote 29 then confirms that these homes are then included as part of the overall affordable housing contribution. The draft policy only requires 10% of all affordable housing to be available for affordable home ownership.

HP9: Self and Custom Build Homes

The Self and Custom Build Housing Background Paper (FBC, 2020) indicated that only 56 people wished to remain on the council's register. 40 of those said they would consider a plot on a larger self-build development and only 25 said they would consider a serviced plot on a standard development. This evidence indicates that demand for self and custom build often arises on smaller sites, so focusing delivery of self/custom build on sites of over 40 homes, may not respond to demand. As such we are concerned that there is not a significant demand for plots on larger housing being developed by housebuilders and that the 10% requirement in HP9 is unjustified.

We would suggest that 5% is a more reasonable level to apply to larger sites, as this would allow for self and custom build to come forward on these sites, but also for self and custom build homes to be delivered on smaller sites too. Reside have proposed to deliver six self-build units on land south of Funtley Road, which will assist the council in meeting its obligation with regard to those who wish to develop their own homes.

NE2: Biodiversity Net Gain

The council have included the Government's suggestion that new development should improve the biodiversity on their site to show a 10% net gain over the pre-development baseline within this policy. Whilst we recognise that this is the Government's current favoured position it is likely that there will be transition period to allow the development industry to adapt to the proposed changes. As such we would suggest that the council remains consistent with paragraph 170 of national policy to seek net gains in biodiversity and not include the requirement to show a 10% net gain. A policy without a specific percentage requirement would be consistent with current policy and should the relevant legislation be enacted as currently proposed such a policy would be sufficiently flexible to support a 10% requirement and any transition period.

NE8: Air Quality

The policy requires one EV Charge Point per dwelling. The Government has made a commitment to end the sale of new petrol and diesel cars in the UK by 2030. With this in mind, we would suggest that the council consider a phased introduction of the EV Charge Point requirement, gradually ramping up to 100% provision, given that there is currently not the demand.

CONCLUSION

At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, for the following reasons:

- The Plan is not positively prepared or consistent with national policy as it does not seek to meet the areas' objectively assessed needs
- The boundaries of the proposed Strategic Gap and Area of Special Landscape Quality are not justified
- The proposed allocation policy HA10 is not fully justified because it does not take into account the reasonable alternative of a delivering a higher number of dwellings
- A number of the specific policy requirements are not justified or effective

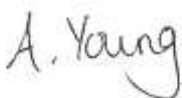

Funtley South is a sustainable and deliverable site in its own right, but also has synergy with the key strategic site at Welborne, were this to come forward. The Funtley South site was previously identified in the Draft Local Plan as having an indicative capacity of 55 dwellings. The allocation of the site and its recent planning permission clearly demonstrates the residential proposals for the site represents sustainable development, there are no constraints that would preclude this development at the higher number of dwellings and the site is deliverable in the short term.

Evidence provided by Reside demonstrates the site is capable of comfortably accommodating more dwellings without any adverse impacts to character or landscape. This can be achieved through a combination of a 0.4ha increase in the developable area and an increase in density (to match that surrounding the site). Funtley South can therefore do even more to help the Council meet its increased housing requirements and we would of course be pleased to provide any further information to the Council, if so required, with regards to this matter.

We would like to participate in the Examination hearings so that a full discussion can be held on these matters.

We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and Examination.

Yours faithfully

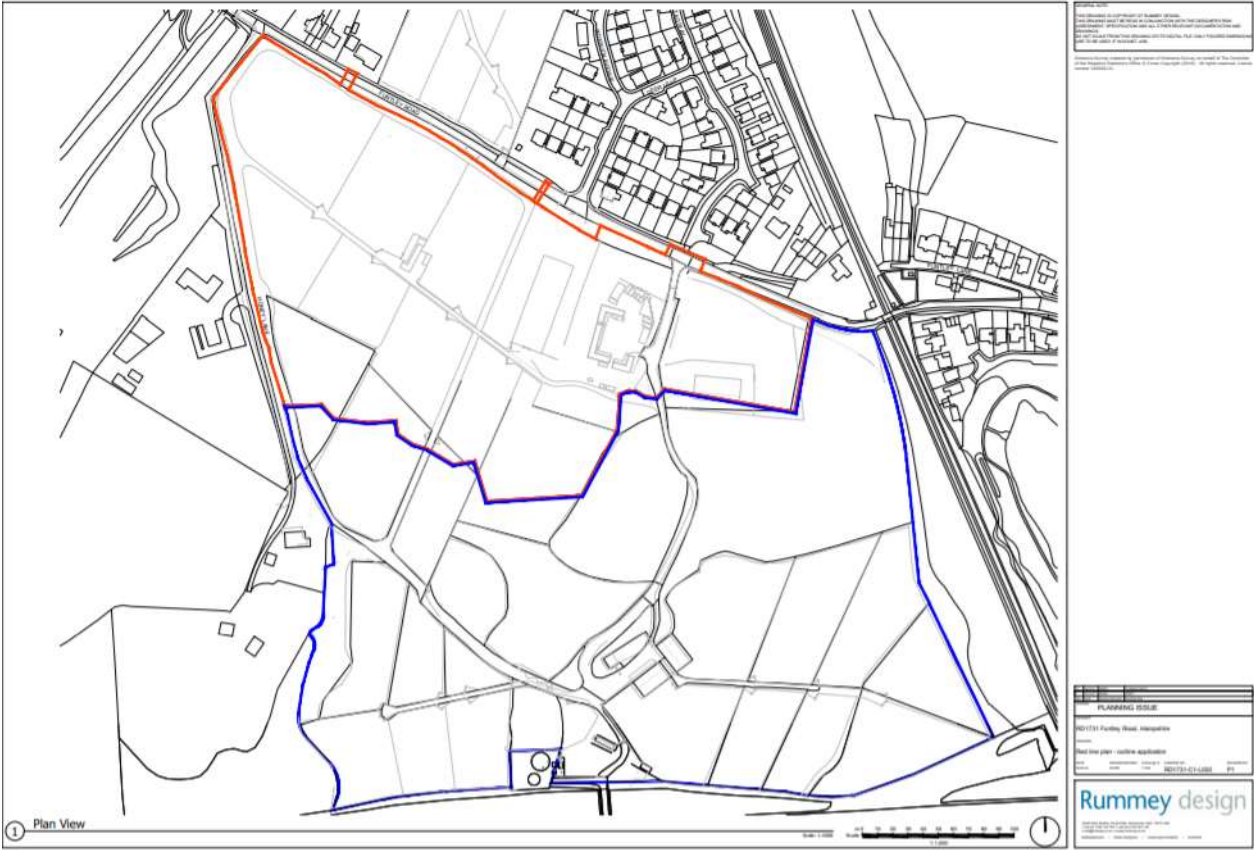

Alison Young

Introduction

This Technical Note is prepared in support of representations to the Fareham Local Plan 2036 Supplement consultation and is made on behalf of Reside Developments Ltd (Reside) in relation to the land they control at Funtley. This includes the site to the south of Funtley Road (Funtley South) which is the focus of these representations and is identified as a proposed allocation.

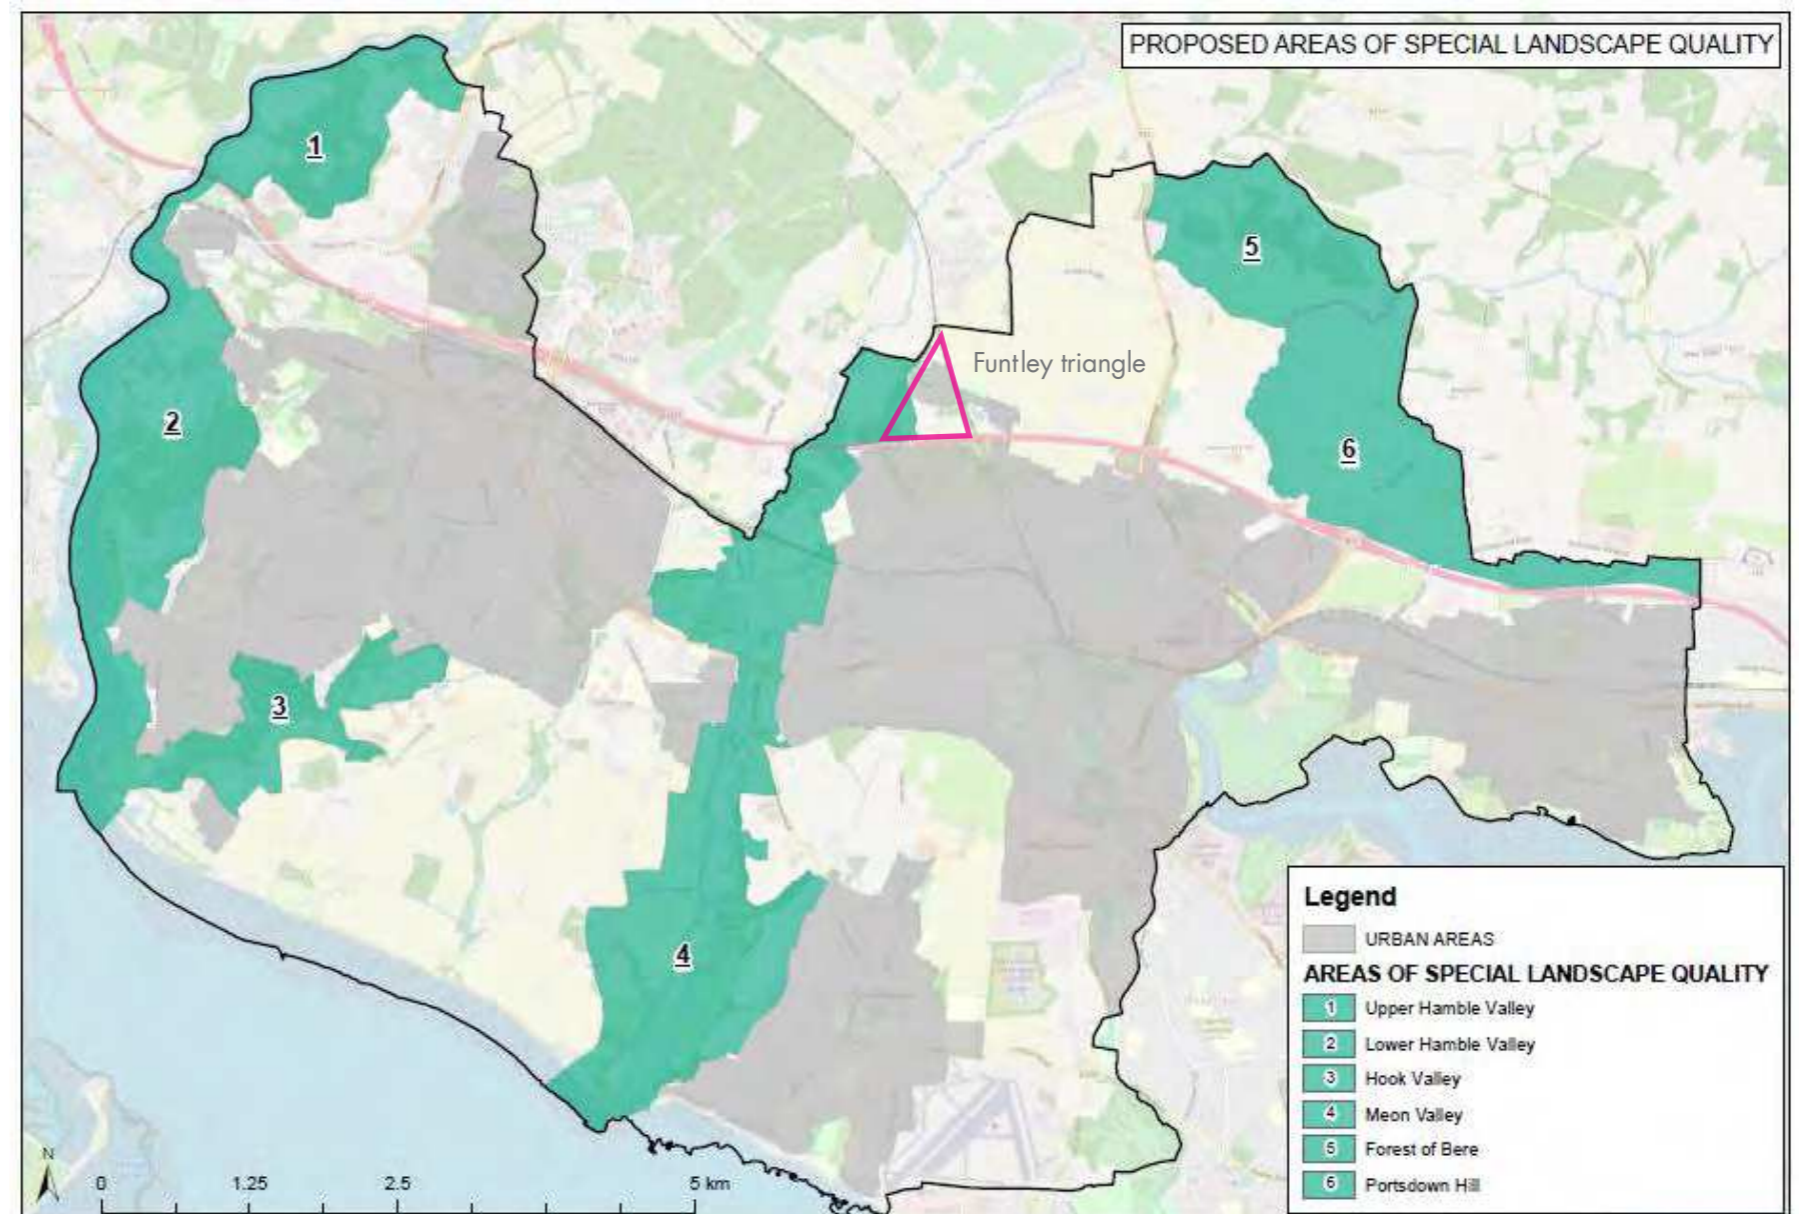

Fareham Borough Local Plan to 2036 proposes an Area of Special Landscape Quality (ASLQ) in the Meon Valley, along with other river valleys and Portsdown Hill. The policy states that there will be a presumption against major development in such areas unless it can be demonstrated that the quality and distinctiveness of the landscape will be conserved. The Meon Valley is also a Strategic Gap and the ASLQ will offer an additional level of protection, although the policies would now differentiate between the need to retain settlement identity and conserve landscape character.

Figure 4.2 in the FBC consultation document identifies indicative proposed Areas of Special Landscape Quality to be protected through Policy NEXX: Landscape. However, whilst this proposed policy is intended to guide development in such areas, there is no definition on what merits an area being included in an ASLQ, other than that it has been identified as a 'valued landscape' in consultation. It would be reasonable to assume that the ASLQ would be underpinned by Landscape Character Assessment evidence, the latest version of which is LDA Design's Fareham Landscape Assessment, 2017.

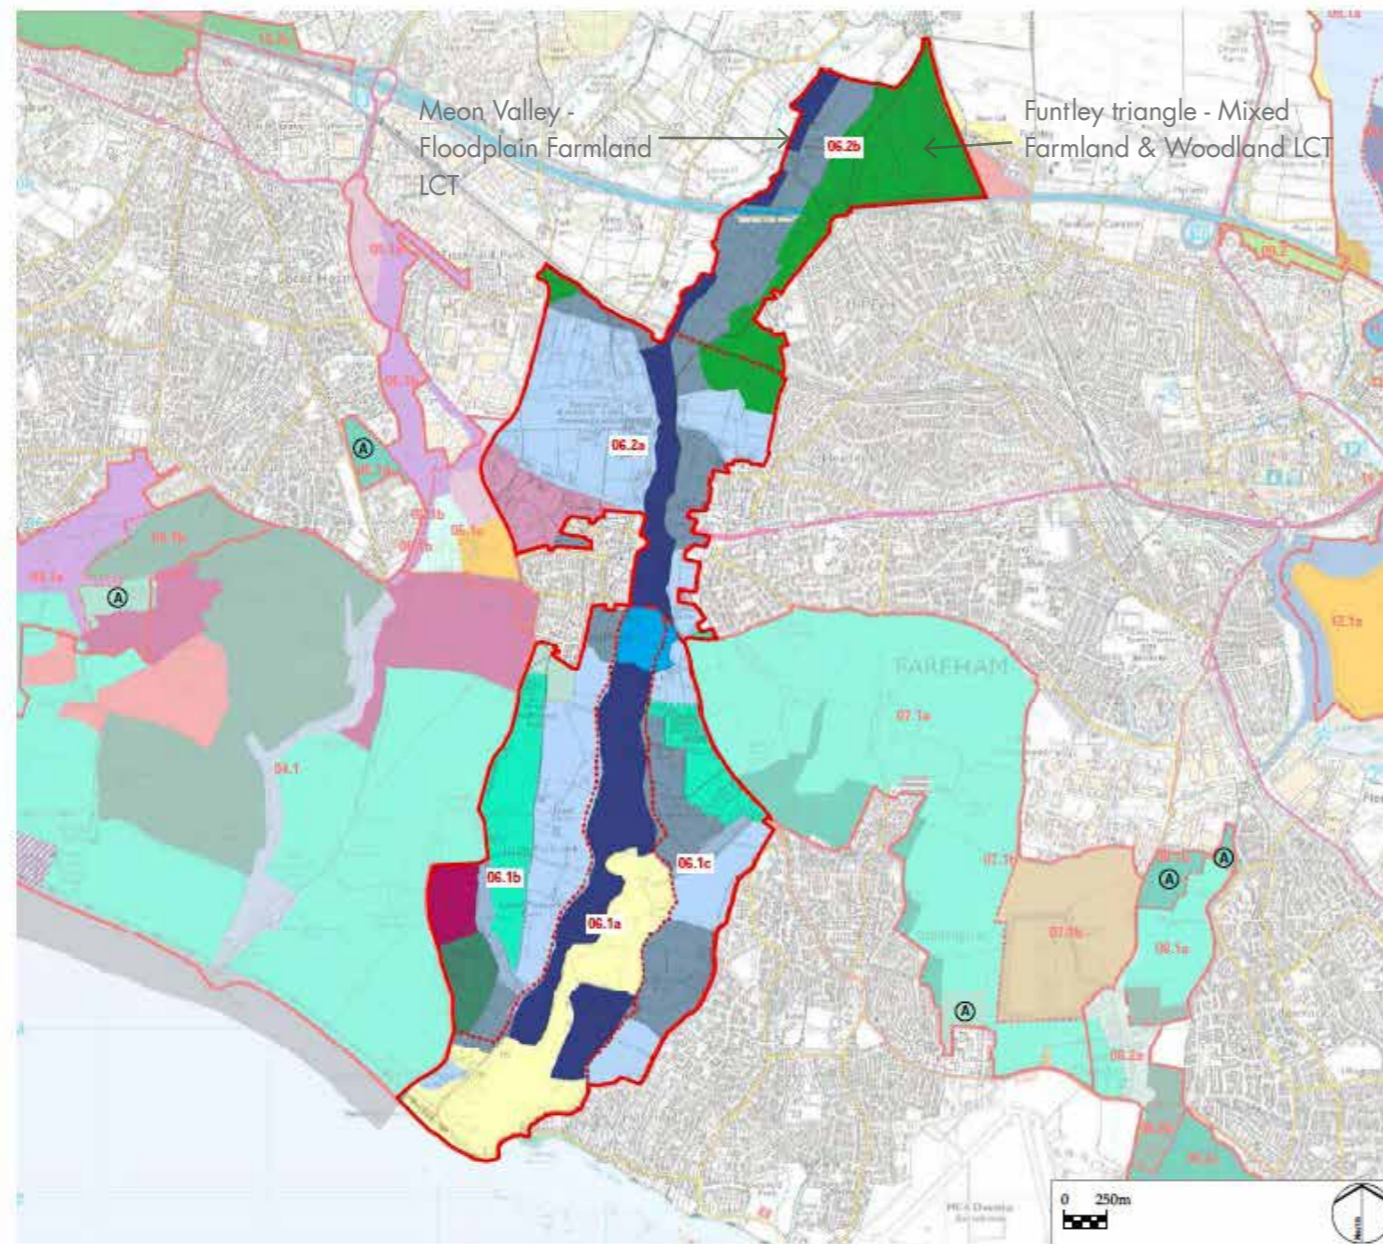

The assessment notes that in Fareham Borough it is the chalklands, coastal plains, river valleys and coast that provide the broad framework for the complex and distinctive landscape character within the Borough. We would agree that these broad 'framework' landscapes shape the character of the Borough and that, where they have special qualities and high sensitivity, these should be conserved. However it is important to define the extent of these areas in a robust manner.

The mapping of the Upper Meon Valley ASLQ in relation to the Funtley triangle, which lies at the northern end of the Borough is however unclear, due to the low resolution of the indicative map. The ASLQ appears to include some land to the east of the disused railway (known as the Deviation Line) in the area south of Funtley Road, an area already proposed for housing allocation. We propose that the ASLQ should extend only to the Deviation Line for the reasons set out below.

Figure 4.2. Proposed Areas of Special Landscape Quality

Area 4 represents the indicative proposed Meon valley ASLQ (reproduced from FBC Local plan 2036 supplement). The proposed Meon Valley ASLQ appears to extend into the Funtley 'triangle' which is a fringe landscape and does not share the special landscape qualities or character of the Meon Valley to the west

LCA6 Meon Valley Landscape Character Area (LCA) and detailed Landscape Character Types (reproduced from LDA Landscape Assessment report). This map clearly distinguishes between the Meon Valley Floodplain Farmland LCTs and the Mixed Farmland and Woodland LCT that includes the Funtley triangle, to the east. The character transition appears to be to the west of the railway line and includes the woodland associated with the railway within the Mixed Farmland & Woodland LCT. The railway also physically and visually separates the valley from the fringe land to the east.

Fareham Borough Council's evidence

The Borough of Fareham has a complex landscape consisting of mixed rural valleys, coastal plain, farmland and woodland and extensive built-up areas, as well as the M27 motorway and railway lines which cross the Borough. The most recent Landscape Assessment undertaken by LDA Design, and published in 2017, recognises the intrinsic character and distinctiveness of the relatively undeveloped areas of the Borough. It would be expected that this would be the evidence base for the proposed ASLQs, since these are based on landscape character and its key qualities and sensitivity. It is stated that the ASLQs will not include any development allocations.

The proposed extent of the Meon Valley ASLQ, the upper reaches of which lie to the west of the Funtley Road triangle, is stated to be based on the landscape types (LCT) defined within the original county-wide landscape assessment produced by Hampshire County Council in 1993. The assessment identified ten detailed, rural landscape types within Fareham Borough and this formed the basis for the initial landscape characterisation and the subsequent update in the LDA Design 2017 Fareham Landscape Assessment.

This assessment clearly differentiates between the *'Mixed Farmland and Woodland: small scale'* LCT, which includes the Funtley 'triangle' up to and including the wooded Deviation Line to the west, and the landscape types in the Meon valley which include both *'Open and Enclosed Floodplain Farmland'* LCTs. The Borough Landscape Assessment notes that the Mixed Farmland and Woodland LCTs vary in scale from large to small scale and describes the 'fringe' character of the Mixed Farmland and Woodland along the M27 corridor (p40). The M27 corridor defines the southern edge of the Funtley triangle.

The Fareham Landscape Assessment further defines a number of Landscape Character Areas (LCAs), which consist of several landscape types to produce identifiable areas of landscape of consistent character. The Meon Valley (LCA6) is further subdivided into Lower and Upper Meon Valley since its characteristics, influences and function vary significantly between the upper, more tightly contained, inland reaches and the wider, lower, river valley which traverses the coastal plain.

The proposed Meon Valley ASLQ boundary appears to include only selected areas of LCA6 consisting of all or parts of a number of different landscape character types. This is presumably based on a recognition that the landscape quality varies significantly within the LCA, although how the ASLQ boundary has been defined is not explained.

The character variance is highlighted in the Fareham Landscape Assessment. Whilst including the area around Funtley within the Meon Valley LCA6 it specifically notes that part of the Upper Meon valley (LCA 06.2b) on the eastern valley sides are *'typically subdivided into paddocks for horse grazing, bounded by open fences and containing various shelters and small-scale structures. In themselves these have a somewhat scruffy, fringe character'*. The assessment also recognises the role that extensive woodland plays in integrating these fringe uses.

The assessment also specifically refers to the existing housing along Funtley Road as a *'rather anomalous area of recent residential development off the Funtley Road in the northern tip of Area 06.2b. Lying on the opposite side of the railway this has little visual connection to the settlement of Funtley and is out of character with the surrounding landscape'*.

In summarising the development opportunities in the LCA it also notes that there is an opportunity to develop pockets of residential development, such as off Funtley Road, as long as these can be sensitively integrated into the landscape.

FBCs own evidence base clearly implies that the Funtley triangle is suitable for sensitive development and does not exhibit the landscape qualities or visual connection to the Meon Valley that might warrant its inclusion in the ASLQ.

The proposed indicative boundary, on this basis appears to be arbitrary and does not reflect Fareham's Landscape Character and sensitivity assessment.

Landscape of the Meon Valley

In considering the special qualities of the Meon Valley its northern extents within the Borough consists of a tightly enclosed valley landscape of open and enclosed floodplain farmland, contained by well-wooded margins and topography, as detailed in the Fareham Landscape Assessment, 2017.

The photos below show the qualities of the Meon Valley floodplain landscape in its upper reaches in Fareham. It is clear that these riverine landscapes which help to shape the Borough are of high sensitivity and have the qualities that would support their inclusion in an 'Area of Special Landscape Quality' as well as providing an important separating element between settlements.

The enclosure and separation of the Meon Valley, to the west of Funtley, is reinforced by the man-made,embanked Deviation Line, which visually and physically separates the two distinctly different character types.

photo reproduced from Fareham Landscape Assessment, 2017 (LDA Design)

Landscape of the Funtley Triangle

In contrast to the Meon Valley, the Funtley Triangle, as confirmed in the Fareham Landscape Assessment, is strongly influenced by the loss of landscape features, with hedgerows being replaced by horse paddock fencing, the presence of stables, sheds, hardstanding and catteries etc. In addition the housing development along Funtley Road and in the west of the area, as well as the railway and M27 corridor have given this landscape an 'urban fringe' character with lower sensitivity to further change. These are not the qualities that would merit inclusion in an 'Area of Special Landscape Quality'.

The Funtley triangle is entirely separate from the Meon Valley to the west of the Deviation Line as illustrated by the bottom photograph.

Paddock fencing, stables, sheds, hardstanding, housing development, noise, street lighting etc. all contribute to the urban fringe character of the Funtley triangle

Supporting evidence

The Landscape and Visual Appraisal (LVA) prepared by Fabrik in 2018 and submitted with Reside's Funtley South planning application (which has a resolution to approve, subject to completion of a S106 agreement) also supports the view that the landscape character sensitivity of the area in the Funtley triangle has been influenced by a number of detractors including adjacent urban development, road and railway noise and its land use for paddocks, resulting in loss of landscape features. The LVA assessed the local landscape character as having low to medium sensitivity for this reason.

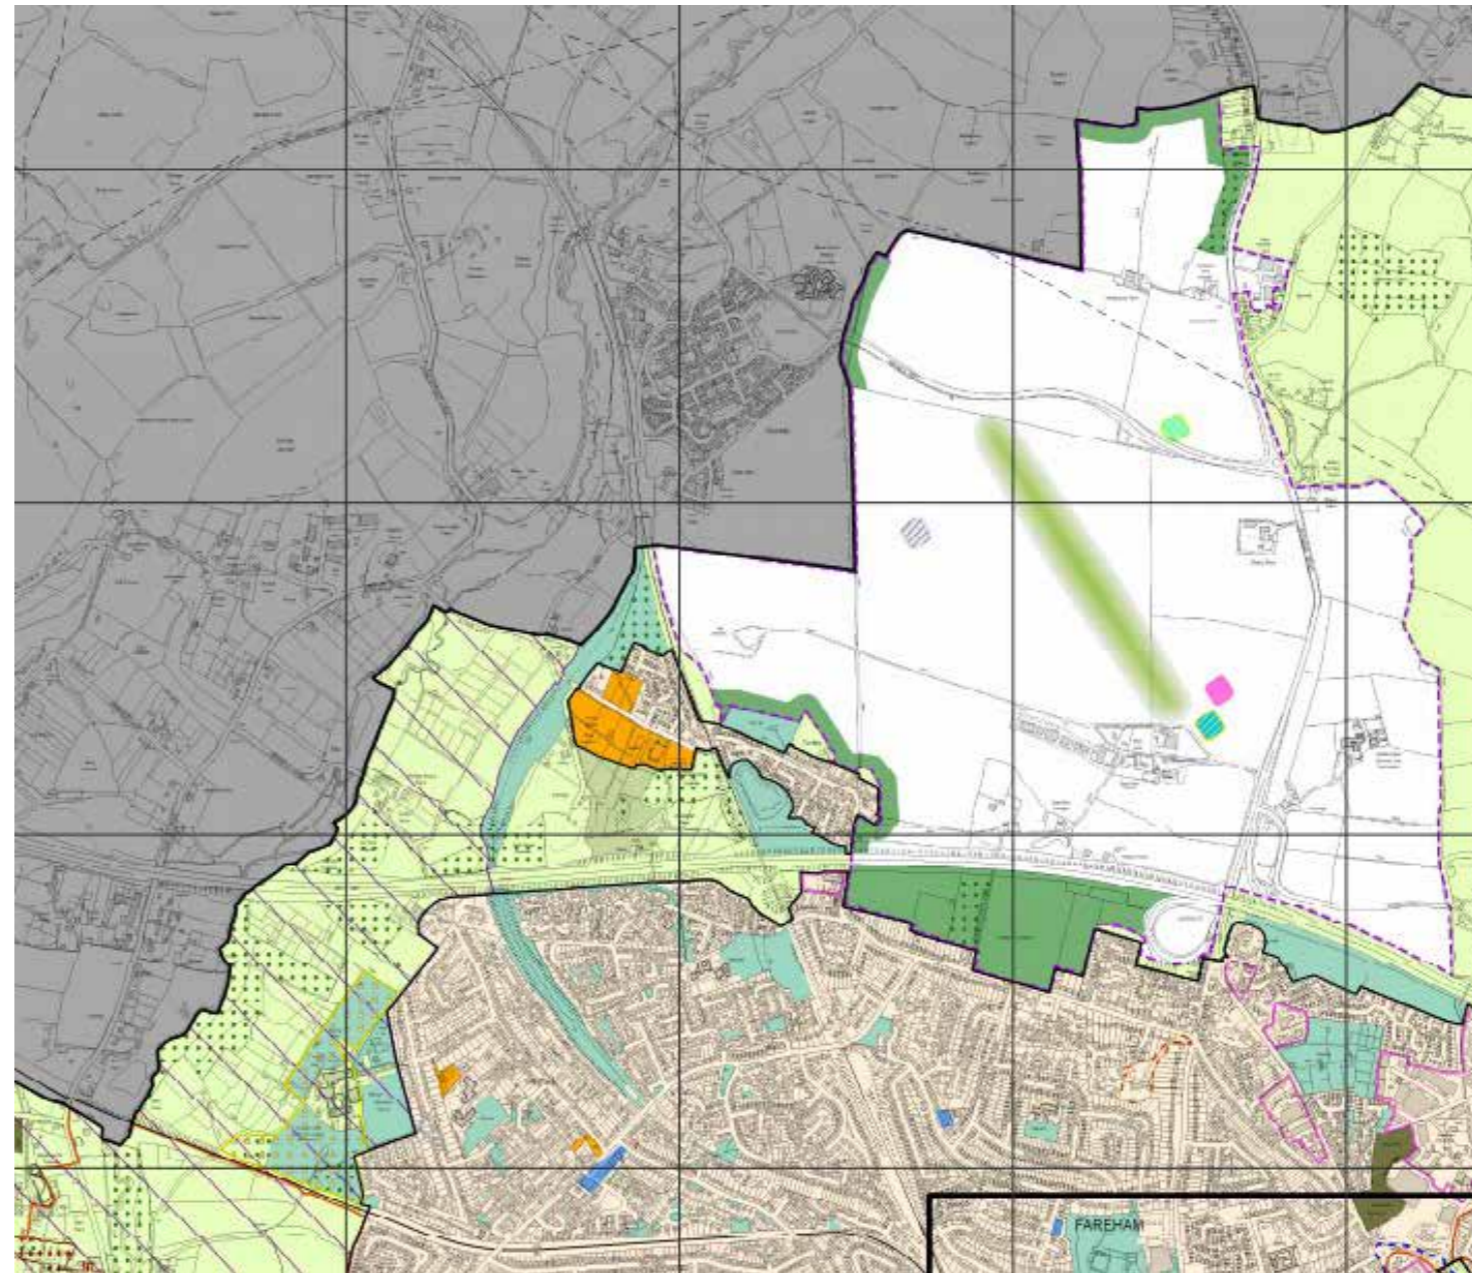

The LVA visual assessment also assessed a range of public viewpoints, both short and long distance, including several within the Meon Valley to the west. The LVA concluded that there is no visual connection between the site and the Meon Valley, due to the Deviation Line and its wooded margins, which provide significant physical and visual screening and separation.

Conclusion

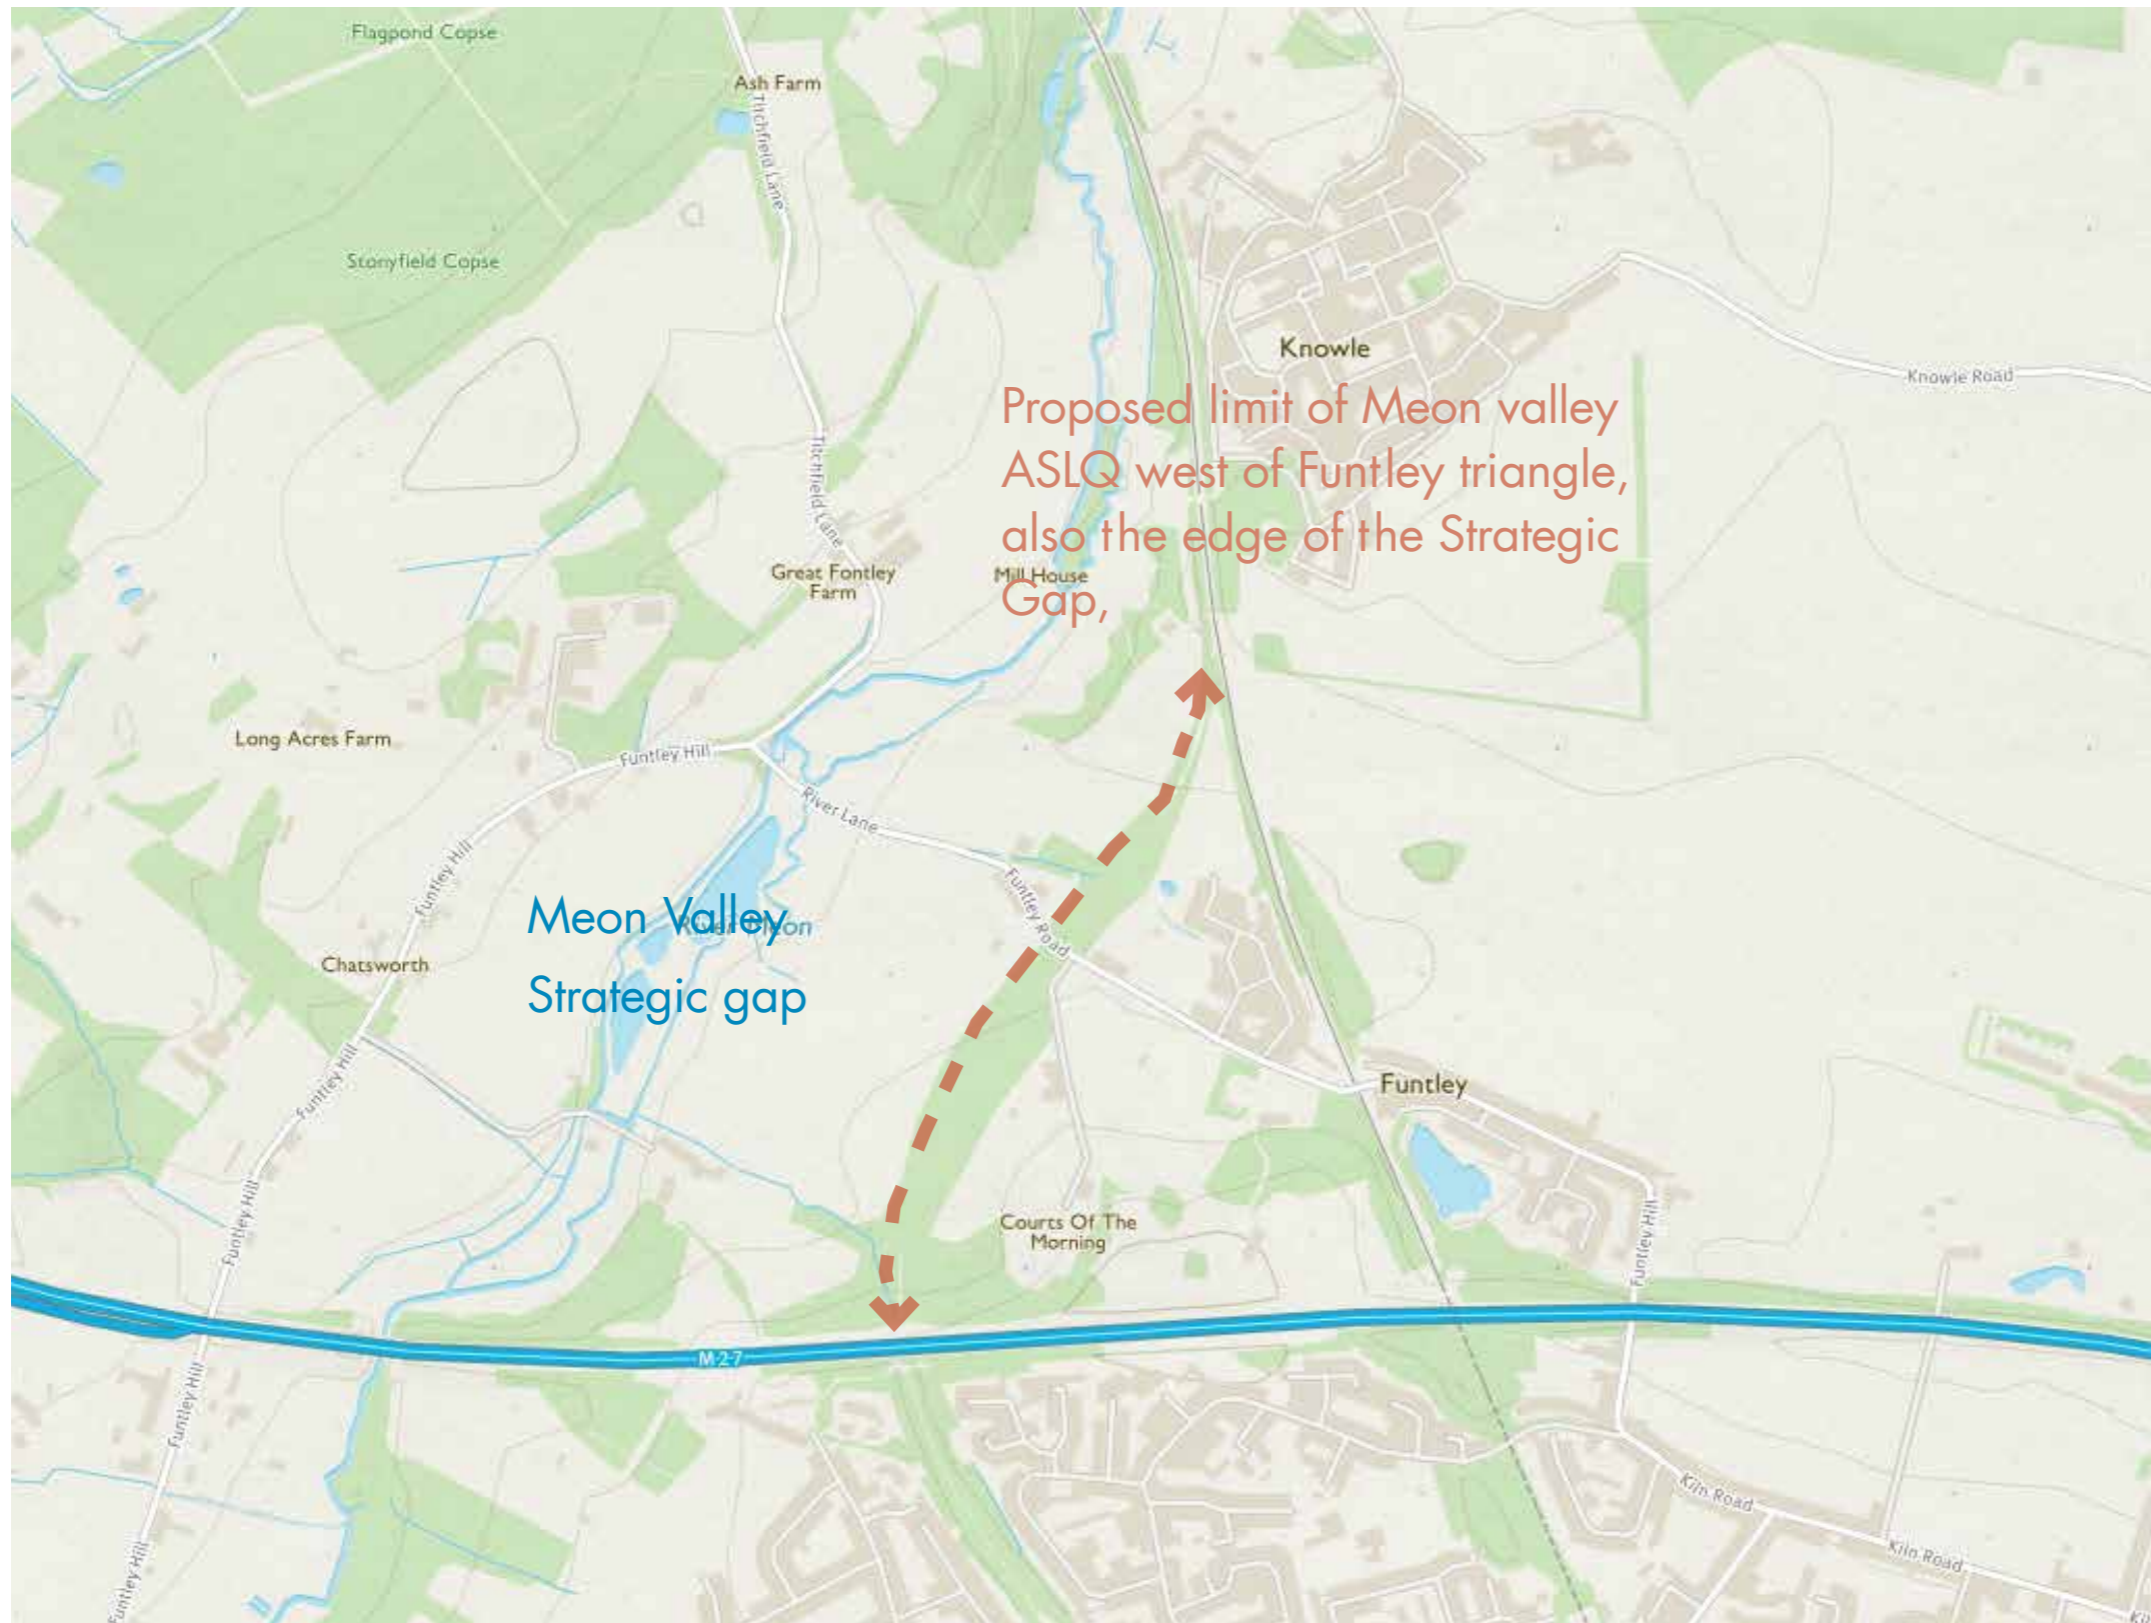

In defining the Meon Valley ASLQ it is important for unambiguous policy that there is a defensible boundary, based on robust evidence. Hampshire County Council and FBC's more recent detailed assessment of landscape character types shows that the embanked Deviation Line encloses the Meon Valley and marks the landscape character transition from the low lying river valley farmland associated with the course of the Meon river, to the small scale wooded farmland to the east, with its 'urban fringe' influences. In the Funtley triangle, character is particularly compromised by a number of suburban, horticulture and perceptual influences (primarily noise arising from the railway and M27). Visually the embanked railway and the associated woodland, which separates the character types, also forms the edge of the Meon Valley to the west preventing intervisibility and so reinforcing the Meon valley's function as a Strategic Gap. The Deviation Line and associated woodland is covered by an open space designation on the draft policies map protecting its recreational and landscape value.

FBC's own evidence base, together with other studies carried out in relation to the Funtley South planning application by Reside's landscape consultants, show that the eastern boundary of the Meon valley ASLQ should be defined by the Deviation Line and that there is no logical reason, based on landscape and visual evidence, that this should be breached and include land within the Funtley triangle.

Therefore we propose that the boundary of the Meon Valley ASLQ should be defined by the Deviation line, as shown on the plan opposite, coinciding with the Strategic Gap, rather extending to an arbitrary location within the Funtley triangle to the east. This is readily defensible with respect to its landscape character and qualities and the visual enclosure that the man-made Deviation line affords to the Meon Valley.

FBC Local Plan draft policies map in the northern extent of the Borough showing allocations at Funtley North and South and the Deviation Line included as an open space designation. The Meon Valley Strategic Gap lies to the west of the Deviation Line

The proposed limit of the Meon Valley ASLQ lies at the character transition between character types and open space designation along the disused Deviation Line (now a bridleway), west of the Funtley triangle

Development proposal	8
Landscape and visual implications of development proposal	10
Appendix i Landscape and Visual Appraisal prepared by Fabrik, January 2018	

Funtley triangle is enclosed by substantial treebelts and topography so is visually discrete. The landscape character has been eroded by suburban development and urban fringe uses including horse paddocks and associated structures, lighting and motorway noise....

Introduction

Funtley South lies within the Funtley triangle north of Fareham and the M27 motorway and is contained by the well-wooded Deviation Line to the west, which separates it physically and visually from the Meon Valley. The main railway contains the eastern edge and separates Funtley North and South from the historic heart of Funtley village and the consented Welborne Garden Village (c.6000 homes) to the north-east of Funtley Village.

In September 2020, Fareham Borough Council granted outline consent for demolition of the existing buildings and construction of 55 dwellings (including 3 custom-build homes) community building incorporating a local shop, access and associated landscaping, infrastructure and development works at the site. The principle of housing on this site has therefore been established.

The application was supported by a Landscape and Visual Appraisal (LVA) prepared by Fabrik Chartered Landscape Architects dated January 2018. The LVA prepared by Fabrik in 2018 and referred to in this Addendum document is found at Appendix i. The comprehensive LVA assessed the potential landscape and visual impacts of the previously approved scheme.

This addendum report analyses where the proposed scheme for up to 125 houses and a Community Park has changed, the landscape-led rationale for the revised scheme, (which is more fully described in the DAS), and then assesses how this has affected the conclusions of the Landscape and Visual Appraisal. This report draws conclusions as to the likely landscape and visual implications associated with the revised development proposals and any mitigation measures that might be required to minimise impacts or optimise the benefits with respect to landscape character and visual amenity.

The existing LVA prepared by Fabrik Ltd (Jan 2018), which was submitted with the consented planning application P/18/0067/OA, sets out the landscape policies relevant to the site and describes the baseline conditions of the site and its surrounding context. The LVA also provides a comprehensive visual study identifying potential visual receptors both within the Funtley triangle and areas beyond this, including public footpaths and roads.

The baseline conditions have not changed from that described in this report except that detailed permission has been granted for housing at Funtley North (23 dwellings) opposite the site and Funtley South has outline consent for up to 55 houses. In addition Welborne Garden Village has also received Resolution to grant by Members for c.6000 dwellings, currently negotiating S106 Agreement.

Representations were made in February 2020, as part of the consultation process on the emerging Local Plan to 2035, concerning the potential inclusion of a small area of the Funtley triangle within the Meon valley Area of Special Landscape Quality (ASLQ). These representations are contained within Rummey Design's Technical Note re proposed Meon Valley ASLQ (Rummey Design Feb 2020) and clearly sets out the reasons why the ASLQ should be defined by the Deviation Line, which lies to the west of Funtley triangle, and exclude any areas within Funtley triangle.

Landscape character

The landscape character baseline, as outlined within the LVA, recognises the existing urban influences within the Funtley triangle that affect landscape character. The LVA also recognises that the equestrian uses on site have changed and degraded the character of the farmland landscape, concluding that the landscape character sensitivity and value is Low to Medium.

Visual receptors

The LVA identified and assessed visual amenity and views from a wide range of visual receptors both within the Funtley triangle and across the wider area from publicly accessible locations. The viewpoints clearly illustrate the range of potential views towards the site and show that it is well-contained within the immediate vegetation cover and topography that encloses the triangle. Notably the rising topography to the south encloses the site and prevents any views southwards. The Deviation Line to the west is embanked separating the site from any views from the Meon valley, whilst vegetation along the main railway encloses views to the north and east.

The visual impact assessment informed the development proposals confirming that development should be confined to the lower, less visible slopes, that landscape features should be retained and that the higher, southern parts of the site should be retained to provide public open space.

Assessment of landscape and visual effects

The assessment concludes that the proposed development would not noticeably alter the landscape character at National, County or Borough level.

At worst it assesses a Moderate-major negative effect on the landscape character at site level, where development is proposed due to the change of use from equestrian fields to residential development. It predicts that there are potential benefits to landscape character in the long term.

With respect to visual effects the assessment predicts that the only negative effects on views are likely to be experienced by residents along Funtley Road/Stage Way/Roebuck Avenue and Honey Lane but that these can be mitigated through planting. It is worth noting that there is only one property that has views into the site on Honey Lane due to a gap in vegetation and that many properties within the residential development areas to the north have vegetation or built form screening views from ground floor windows. These are considered, in best practice guidance, to be to be more important than those from upstairs bedrooms.

No notable effects are predicted on views and visual amenity from public footpaths except for a short section of bridleway on the Deviation Line where there could be glimpsed views into the site in winter. However the appraisal acknowledges that planting on the western edge of the site would mitigate this change.

Overall no widespread landscape and visual effects are predicted and those negative effects that are predicted on the immediate context and at site level are assessed as being able to be effectively mitigated.

The LVA recognises that the development would be well contained within the existing landscape framework and that all important landscape features are retained.

The LVA also concludes that there is an opportunity to secure the long term management of the site, Ancient Woodland and Green Infrastructure as well as providing publicly accessible open space where none exists at present.

The existing LVA does not specifically analyse historic pattern through mapping, which helps to understand the evolution of the landscape and how, by taking this into account, development can more effectively be integrated into the landscape and bring about greater landscape benefits.

Mapping shows the former brickworks and clay pits in the area which, together with the railway, have shaped its character. The 1963 map shows that the Deviation Line has added to the enclosure and isolation of the triangle with the claypits north of Funtley Road becoming the site of an abattoir. Residential areas now occupy this site together with much of the other land north of Funtley Road. The M27 has also had a significant impact cutting an east-west swathe across the landscape, severing the triangle from Fareham North and further isolating it.

Extensive areas of coppice woodland are evident in late Victorian times with a notable field pattern of hedgerows linking the wooded horizons on the upper slopes to the valley bottom. These compartmentalised the landscape and connected landscape features.

The hedgerows have been lost in the latter part of the 20th century and are now only marked by a few isolated trees. The coppice woodland has been lost and fragmented since Victorian times, although the remaining woodland areas and tree groups still give the impression of wooded horizons.

Small paddocks are now defined by a proliferation of post and rail fencing, which, together with hard surfaced areas, stables, large barns and other clutter have eroded the rural character.

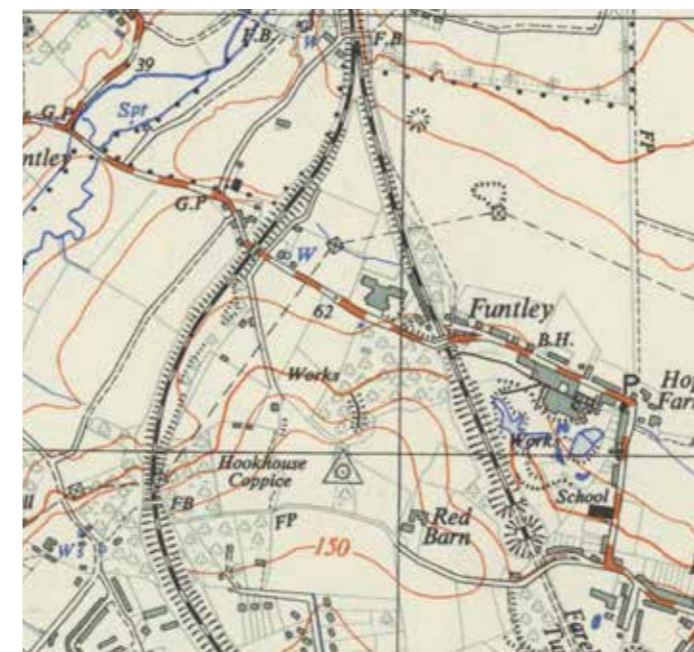

Restoring the historic pattern in green fingers to integrate development and reconnect the valley landscape with the wooded horizons has been one of the key landscape drivers for the revised layout reflected, on the illustrative masterplan by green links and rural edge treatments, which structure the neighbourhoods and provide significant amenity value.

1859 The hamlet of Funtley is next to the railway line with adjacent rectangular field patterns and extensive coppice woodland in the surrounding areas.

1898 coppice woodland is a dominant feature with smaller fields on Funtley South. Brickworks and claypits occupy part of Funtley north

1963 coppice woodland is now fragmented, an abattoir lies north of Funtley Road & the Deviation Line severs the triangle from the Meon valley

2020 the M27 cuts an east-west swathe across the ridge so that Funtley triangle is now isolated on all sides.

development proposal

development proposal

The development is to provide for up to 125 dwellings, community building incorporating a local shop with associated infrastructure, new Community Park, landscaping and access as shown on the Illustrative Masterplan opposite.

The site is set within an undulating landscape where the dominant feature is the topography and its wooded horizons which are characteristic. This mature landscape effectively unifies the landscape and helps contain development, where it has occurred. The site itself contributes to the wooded horizons with remnant coppice woodland on the higher ground in the south.

Other significant landscape features on the site include areas of ancient replanted woodland in Great Beamond Coppice, treebelts and mature trees. The proposed development ensures that these key landscape features are retained and enhanced. The smaller scale field pattern that once compartmentalised the site (now only indicated by a few remnant trees) once linked the wooded horizons to the valley floor.

This pattern will be reinstated through the proposed north-south green links which will incorporate the remaining trees and provide access routes, SuDS, biodiversity corridors and new native tree and shrub planting, as well as species-diverse grasslands.

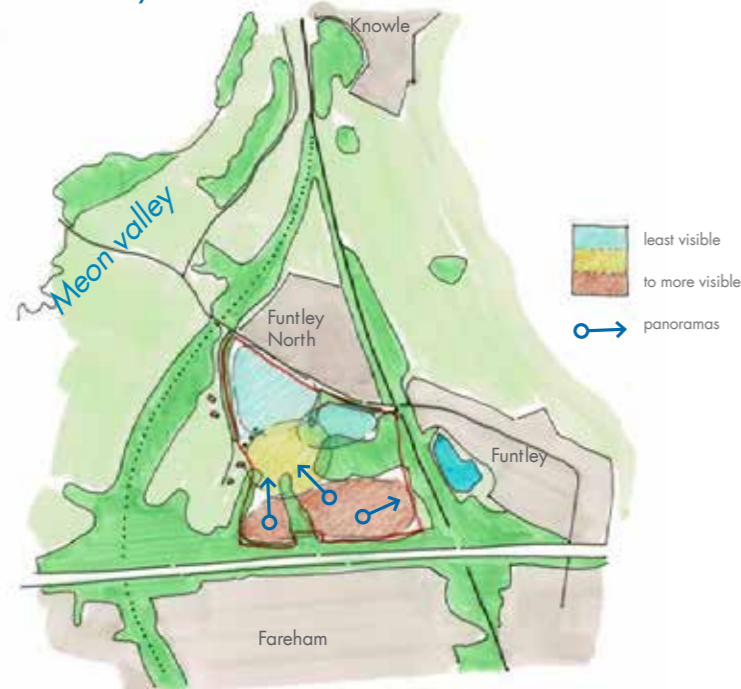

An interconnected network of footpath and cycle routes will link the site to Fareham North to the south and the Meon valley trail and wider countryside to the north, also allowing existing and new communities to access the Community Park located on the higher slopes south of the residential development. This area benefits from panoramic views northwards towards the South Downs and Meon Valley, which will now become accessible to the community.

The Community Park will provide significant areas of open space for informal recreation, with habitats enhanced through management and planting.

The landscape will be managed as part of the development adding to its amenity, biodiversity, recreational, educational and landscape value. Management regimes that might be considered could include traditional methods such as coppicing of woodland and diversification of meadows through green haying or grazing.

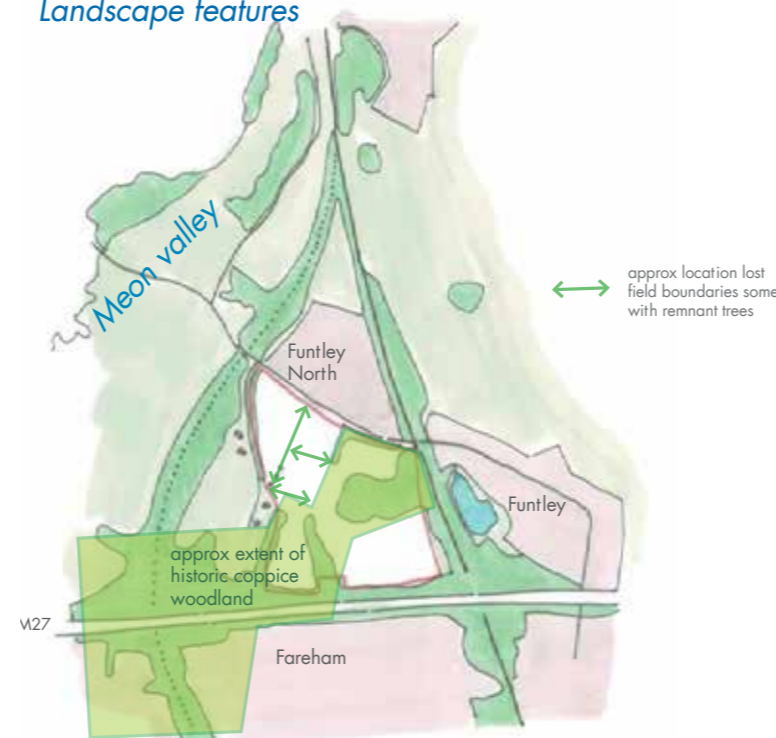

The character of Funtley Road frontage will be designed to reflect the essence of other Meon valley village frontages helping to connect the existing and new communities but also providing a locally distinctive setting within which to integrate development.

Visibility & Views

concentrate development in less visible areas on lower slopes, in valley and areas contained by vegetation. Community open space in areas with wider views maintaining and celebrating key panoramas to wooded horizons ...

Landscape features

historic features such as the north-south hedgerows and interconnected coppice woodland were present into the 20th century but have now been significantly reduced in area or lost. These connected the upper slopes to the valley floor. The repaired landscape structure can bring back some of these features and provide context and sense of place for development, integrating it into its setting ...

Landscape character

reconnect the site with the wider landscape and Meon valley reinforcing the wooded horizons; soften character transition of built development through density gradients within a repaired landscape pattern ...

landscape & visual implications of development proposal

preliminary aerial view from the north looking towards Fareham

— — — — —> wooded horizon reinforced

• • • —> multifunctional green links reinstate smaller scale historic field pattern

landscape & visual implications of development proposal

The landscape character of Funtley South, which has been affected by adjacent residential development and uses such as a cattery, equestrian activities, stables, vehicle parking, noise from the M27, etc is best described as urban fringe. The urban influences will increase when Welborne Garden village is constructed, to the north-east.

The landscape led approach to the scheme is based on the retention of key landscape features including the replanted Ancient Woodland, the habitats of value within the site and the need to effect landscape restoration to restore the landscape pattern and character which has been eroded. The enhanced landscape will also provide the setting for the proposed development so that it integrates into the site. The enhanced setting will also help mitigate any impacts on visual amenity for local residents that face the site at present from the residential area to the north. Additional benefits are likely to include enhanced recreational opportunities including those provided by the proposed Community Park as well as better connectivity both with Fareham North and the footpath network, including the Meon Trail within the wider countryside.

Landscape impacts

The potential landscape effects have been assessed at site level, at Borough level LCA and also at County and National character area level. Landscape effects are also assessed on landscape features.

The arboricultural impact assessment confirms that all significant trees are to be retained and protected. The proposal allows for replanting within the greenlinks, reinstating smaller scale landscape compartments for development, based on historic pattern. These also physically and visually connect the wooded slopes and horizons with the valley floor. Additional planting around the rural edge of the site will enhance the existing landscape structure. New and existing vegetation will be managed as part of the development. The effect on landscape features is assessed as beneficial.

The landscape character of the site has been eroded through past uses. The proposed development, although over a slightly increased area compared to the previous proposal, is still located on the lower, less visible slopes and its edges have been carefully defined to relate to the topography and slopes for reasons of visibility and landscape character. The form of development also responds more closely to the landscape pattern, based on studies of its historic evolution.

The effect on landscape character of the proposed development at site level was previously assessed as a Moderate-Major negative effect on the landscape character at site level, where development is proposed due to the change of use from equestrian fields to residential development.

Whilst we would agree that this is a significant change we reiterate that the character of the site and indeed the entire Funtley triangle has been affected by changing uses over a long period with the effect that coppice woodland and field boundaries have been lost and replaced with fencing, sheds, and other buildings. Non-native planting has also been introduced, especially around the existing buildings near the entrance and the general visual amenity that the site provides has declined. In addition there has been little management of the key landscape features such as the woodlands and remaining field trees, which can be expected to decline further without intervention.

The site has been deemed suitable for limited residential development in both published landscape characterisation studies and by the Council, in granting planning permission for 55 houses. A well-designed, landscape-led residential development which respects the character and restores lost features is not necessarily negative, and in this case is positive, particularly in the longer term. Whilst the short term effects on landscape character may be Moderate adverse, the long term effect on landscape character is likely to be Minor adverse at worst with the potential to be beneficial. This could stop the century long decline in landscape structure and produce an appropriate and enhanced setting leading to a stronger landscape framework maturing into the 21st and 22nd centuries.

Visual impacts

We agree with the previous LVA assessment that the site is well enclosed so that the visual effects are likely to be restricted to receptors within the residential areas in Funtley North and road users along Funtley Road.

The proposed development, whilst over a slightly increased area, is still located on the lower, less visible parts of the site and the landscape structure throughout the site is to be enhanced. In addition, rather than cutting the site off from Funtley Road the proposals seek to create a positive, locally distinctive Meon valley village ambience where built form, water and vegetation provide the frontage along Funtley Road. This will enhance the character on both sides of Funtley Road.

Whilst there will be a discernible change in views for residents to the north of Funtley Road, it is assessed that the impacts are likely to be minor to moderate adverse in the short term (mainly related to construction impacts) with the potential for long term benefits as the landscape matures and development is integrated.

Landscape improvements in the Community Park, including the removal of buildings on the upper slopes, new tree planting and enhanced management of both the existing and new vegetation and grasslands are assessed as beneficial to views and visual amenity. This change of use will also give public access so that the panoramic views from the upper parts of the site, which are currently not available to the general public, will be available to all users.

The effects of this renewed landscape structure, combined with the enhanced public footpath access, will produce an enhanced landscape for the public and wildlife alike well into the 21st and even 22nd centuries. This will arrest the continuing decline and fragmentation of the landscape and produce the opportunity for improved landscape management; this new landscape structure will be 're-purposed' as part of the shift from agricultural to residential and leisure landscapes with changing social, economic and environmental circumstances.

1. Introduction

1.1 Introduction

fabrik Chartered Landscape Architects have been appointed by Reside Developments Ltd to carry out a Landscape and Visual Appraisal (LVA) of the land to the south of Funtley Road, Funtley, Hampshire (the Application Site, refer to **Figure 1.1**) and its environs, in order to consider the likely physical and visual impacts arising as a result of the proposed development.

This LVA forms one of the suite of documents provided with the outline application. It sets out landscape policy and then goes on to describe the existing topography, land cover, vegetation, landscape features, landscape character and visual receptors of the local area in order to assess the landscape and visual effects of the proposed development which together inform the landscape character. The LVA also describes the baseline character and amenity of the identified visual receptors (considering the visual envelope, the different groups of people, places affected, the nature of the view and the visual amenity). This document describes the development proposals and then sets out a statement of landscape and visual effects.

This LVA should be read in conjunction with the suite of documents submitted with the outline application (all matters reserved except for access).

The methodology for the LVA is based on the 'Guidelines for Landscape and Visual Impact Assessment' (third edition) by the Landscape Institute and Institute of Environmental Management and Assessment (Routledge, 2013) and is set out at Appendix 1.

Where the terms 'Site' and 'Application Site' are used in this LVIA, these both refer to the land defined by the red line boundary shown in Figure 1.1; which is the subject of two separate planning applications:

1) Outline Application

Following demolition of existing buildings residential development of up to 55 dwellings (including 3 self-build homes) (Use Class C3), community building incorporating a local shop 250 sqm (Use Classes A1, A3, D1 & D2), accesses and associated landscaping, infrastructure and development works.

2) Change of Use

Change of use of land from equestrian/grazing to community park following demolition of existing buildings

1.2 Overview of Proposed Development

The proposed development comprises of 55 dwellings, a community building incorporating a local shop, with associated infrastructure, new community park, landscape planting and access. The Site area is 16.18 hectares (ha) and the Site is a proposed development allocation (ref. HA10) in the emerging Fareham Local Plan 2036.

1.3 Desktop Research and Study Area

The desktop survey carried out as part of the LVA included the review of previous proposals, Ordnance Survey maps, interactive maps, aerial photography, published landscape character assessment documents and planning policy. This was further verified through field work, to determine the potential zone of landscape and visual influence of the site and proposed development, including views requested by the Principal Planner of Fareham Borough Council on 25/05/2017.

The study area was found to generally extend to around 2.0km from the centre of the Site. Beyond this the landscape is visually divorced from the area by the intervening topography, vegetation and in places, built form. The LVA nevertheless considers the wider landscape, planning and designations context to the land within the Site.

1.4 Field Work

The field work was initially carried out on 07/06/17 and recorded the existing landscape elements within the Site; the contextual landscape elements; and identified a series of key visual receptors. The visual assessment element includes a photographic survey of the land within the Site taken from a series of representative key views, chosen to represent a range of public views, distances and directions within the study area. The photographic survey was updated to reflect winter views on 05/01/2018.

Viewpoints 15-19 were omitted from the winter photographic survey, since the summer views demonstrated such an extent of screening of the views (by vegetation and/or landform in the intervening areas), that it was considered that no significant visual change would occur in winter.

However, additional winter views were taken from the bridleway following the disused railway line west of the Site, since the lack of leaf cover in winter revealed glimpsed views to parts of the Site and nearby existing dwellings. Summer viewpoint 4 is represented by a viewpoint taken from within the Site, but standing very close to the low hedge at the boundary with the adjacent property (containing a dwelling at the southern end of Honey Lane).

While the summer and winter views show slight differences in the position of the viewpoint and focal lengths of camera lens used, there are otherwise, no material differences in the view.

1. Introduction

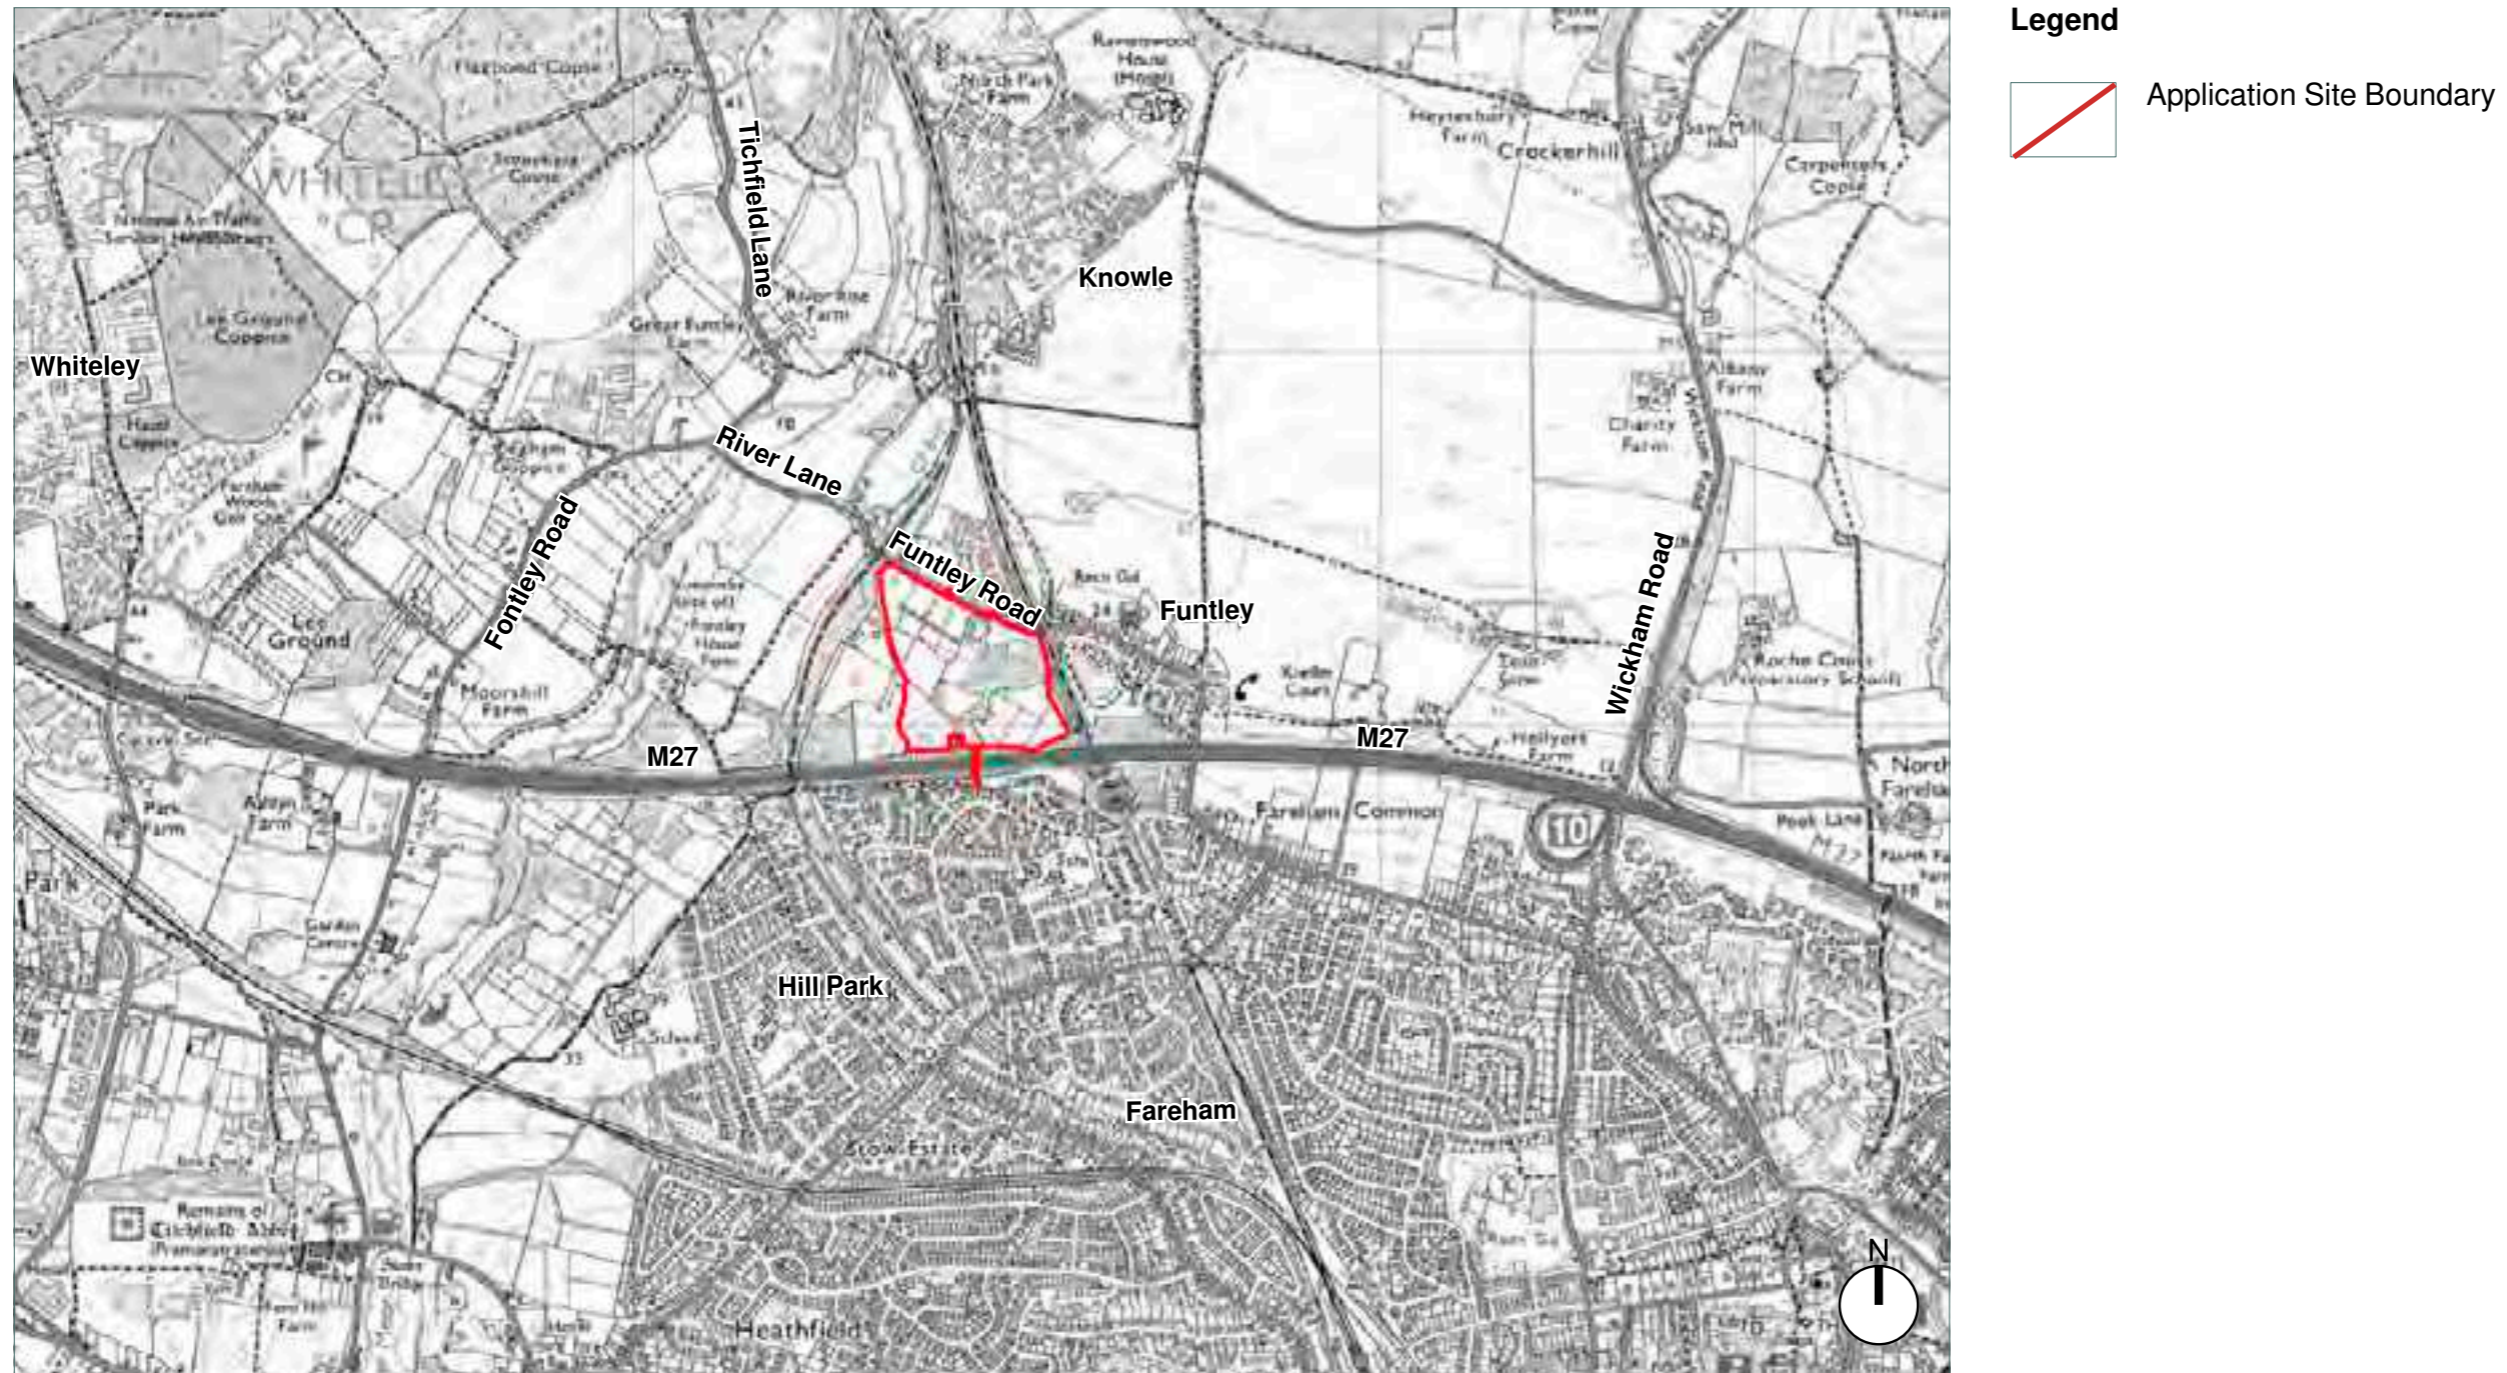

Figure 1.1 – Extract from Ordnance Survey Plan showing the Application Site location and boundary (fabrik, 2018)

2. Baseline Conditions

2.1 Landscape and Heritage Designation

The land within the Site lies wholly within the jurisdiction of Fareham Borough Council and is located within the landscape designation of Area Outside of Defined Urban Settlement Boundary. The area within the north-western part of the Site is designated as Existing Open Space in the Fareham Core Strategy (Adopted August 2011).

Within the Study Area, there are a number of Listed Buildings, Scheduled Ancient Monuments, Ancient Woodlands and Historic Parks and Gardens. The Scheduled Ancient Monument of Tichfield Abbey and Fishponds with a group of Grade II Listed Building of Abbey Cottage, Fisherman's Arms, Place House Cottage and Garden are situated along Mill Lane to the south west of the Application Site. There are no Listed Buildings which abut the Application Site or which have intervisibility with the Application Site.

The South Downs National Park (SDNP) is located approximately 3.7km to north east of the Application Site (and therefore outside of the 3km radius of the study area). This was further verified through field survey work to determine that views of the Application Site are truncated from the SDNP due to intervening topography, built form and vegetation (refer to the visual baseline on Pages 45 and 47).

The Grade II Listed buildings of Church of St Francis is located approximately 510m along Funtley Road to the east of the Application Site. A Scheduled Ancient Monument (the Site of Funtley Iron Works) together with a group of Grade II Listed buildings (including Ironmaster's House and Funtley House) are situated approximately 500m to the south west of Application Site along Ironmill Lane.

The Application Site contains Great Beamond Coppice, an Ancient Re-planted Woodland. This woodland, together with the tree blocks within central northern and south-western sections of the Application Site, are designated as a Site of Importance of Nature Conservation (SINC) and are also covered by a Tree preservation Order (TPO). Another Ancient Woodland of Hookhouse Coppice is also located approximately 200m to the south west of Application Site.

There are no other landscape or heritage designations within nor adjacent to the Application Site.

The above designations are shown on **Figures 2.1 and 2.2** on the following pages.

Land to the east of Funtley is designated for a new settlement known as Welborne. Settlement buffers are proposed in key locations, including along the eastern edge of Funtley.

2.2 National Landscape Policy

The National Planning Policy Framework (NPPF) (March 2012) seeks the presumption in favour of sustainable development. The following issues and policies are pertinent to this LVA.

Section 7 sets out the requirements of good design. Paragraph 56 states that: *"The Government attaches great importance to the design of the built environment. Good design is a key aspect of sustainable development, is indivisible from good planning and should contribute positively to making places better for people."*

Paragraph 57 goes on to state that: *"It is important to plan positively for the achievement of high quality and inclusive design for all development, including individual buildings, public and private spaces..."*

Paragraph 58 looks to ensure that developments:

- *"will function well and add to the overall quality of the area, not just for the short term, but over the lifetime of the development;*
- *establish a strong sense of place, using streetscapes and buildings to create attractive and comfortable places to live, work and visit;*
- *optimise the potential of the site to accommodate development, create and sustain an appropriate mix of uses (including incorporation of green and other public space as part of developments) and support local facilities and transport networks;*
- *respond to local character and history, and reflect the identity of local surroundings and materials, while not preventing or discouraging appropriate innovation;*

- *create safe and accessible environments...; and*
- *are visually attractive as a result of good architecture and appropriate landscaping."*

Furthermore, Paragraph 65 states that: *"Local planning authorities should not refuse planning permission for buildings or infrastructure which promote high levels of sustainability because of concerns about incompatibility with an existing townscape, if those concerns have been mitigated by good design (unless the concern relates to a designated heritage asset and the impact would cause material harm to the asset or its setting which is not outweighed by the proposal's economic, social and environmental benefits)."*

Section 8 of the NPPF deals with 'Promoting healthy communities' and seeks to achieve:

- *"Opportunities for meetings between members of the community who might not otherwise come into contact with each other, including through mix-use developments, strong neighbourhood centres and active street frontages which bring together those who work, live and play in the vicinity;*
- *Safe and accessible environments where crime and disorder, and the fear of crime, do not undermine quality of life or community cohesion; and*
- *Safe and accessible developments, containing clear and legible pedestrian routes, and high quality public space, which encourage the active and continual use of public areas."*

Section 10 deals with climate change. Paragraph 96 sets out that development should take into account the landform, layout, building orientation, massing and landscaping to minimise energy consumption. Furthermore, Paragraph 99 states that: *"... When new development is brought forward in areas which are vulnerable, care should be taken to ensure that risks can be managed through suitable adaptation measures, including through the planning of green infrastructure."*

2. Baseline Conditions

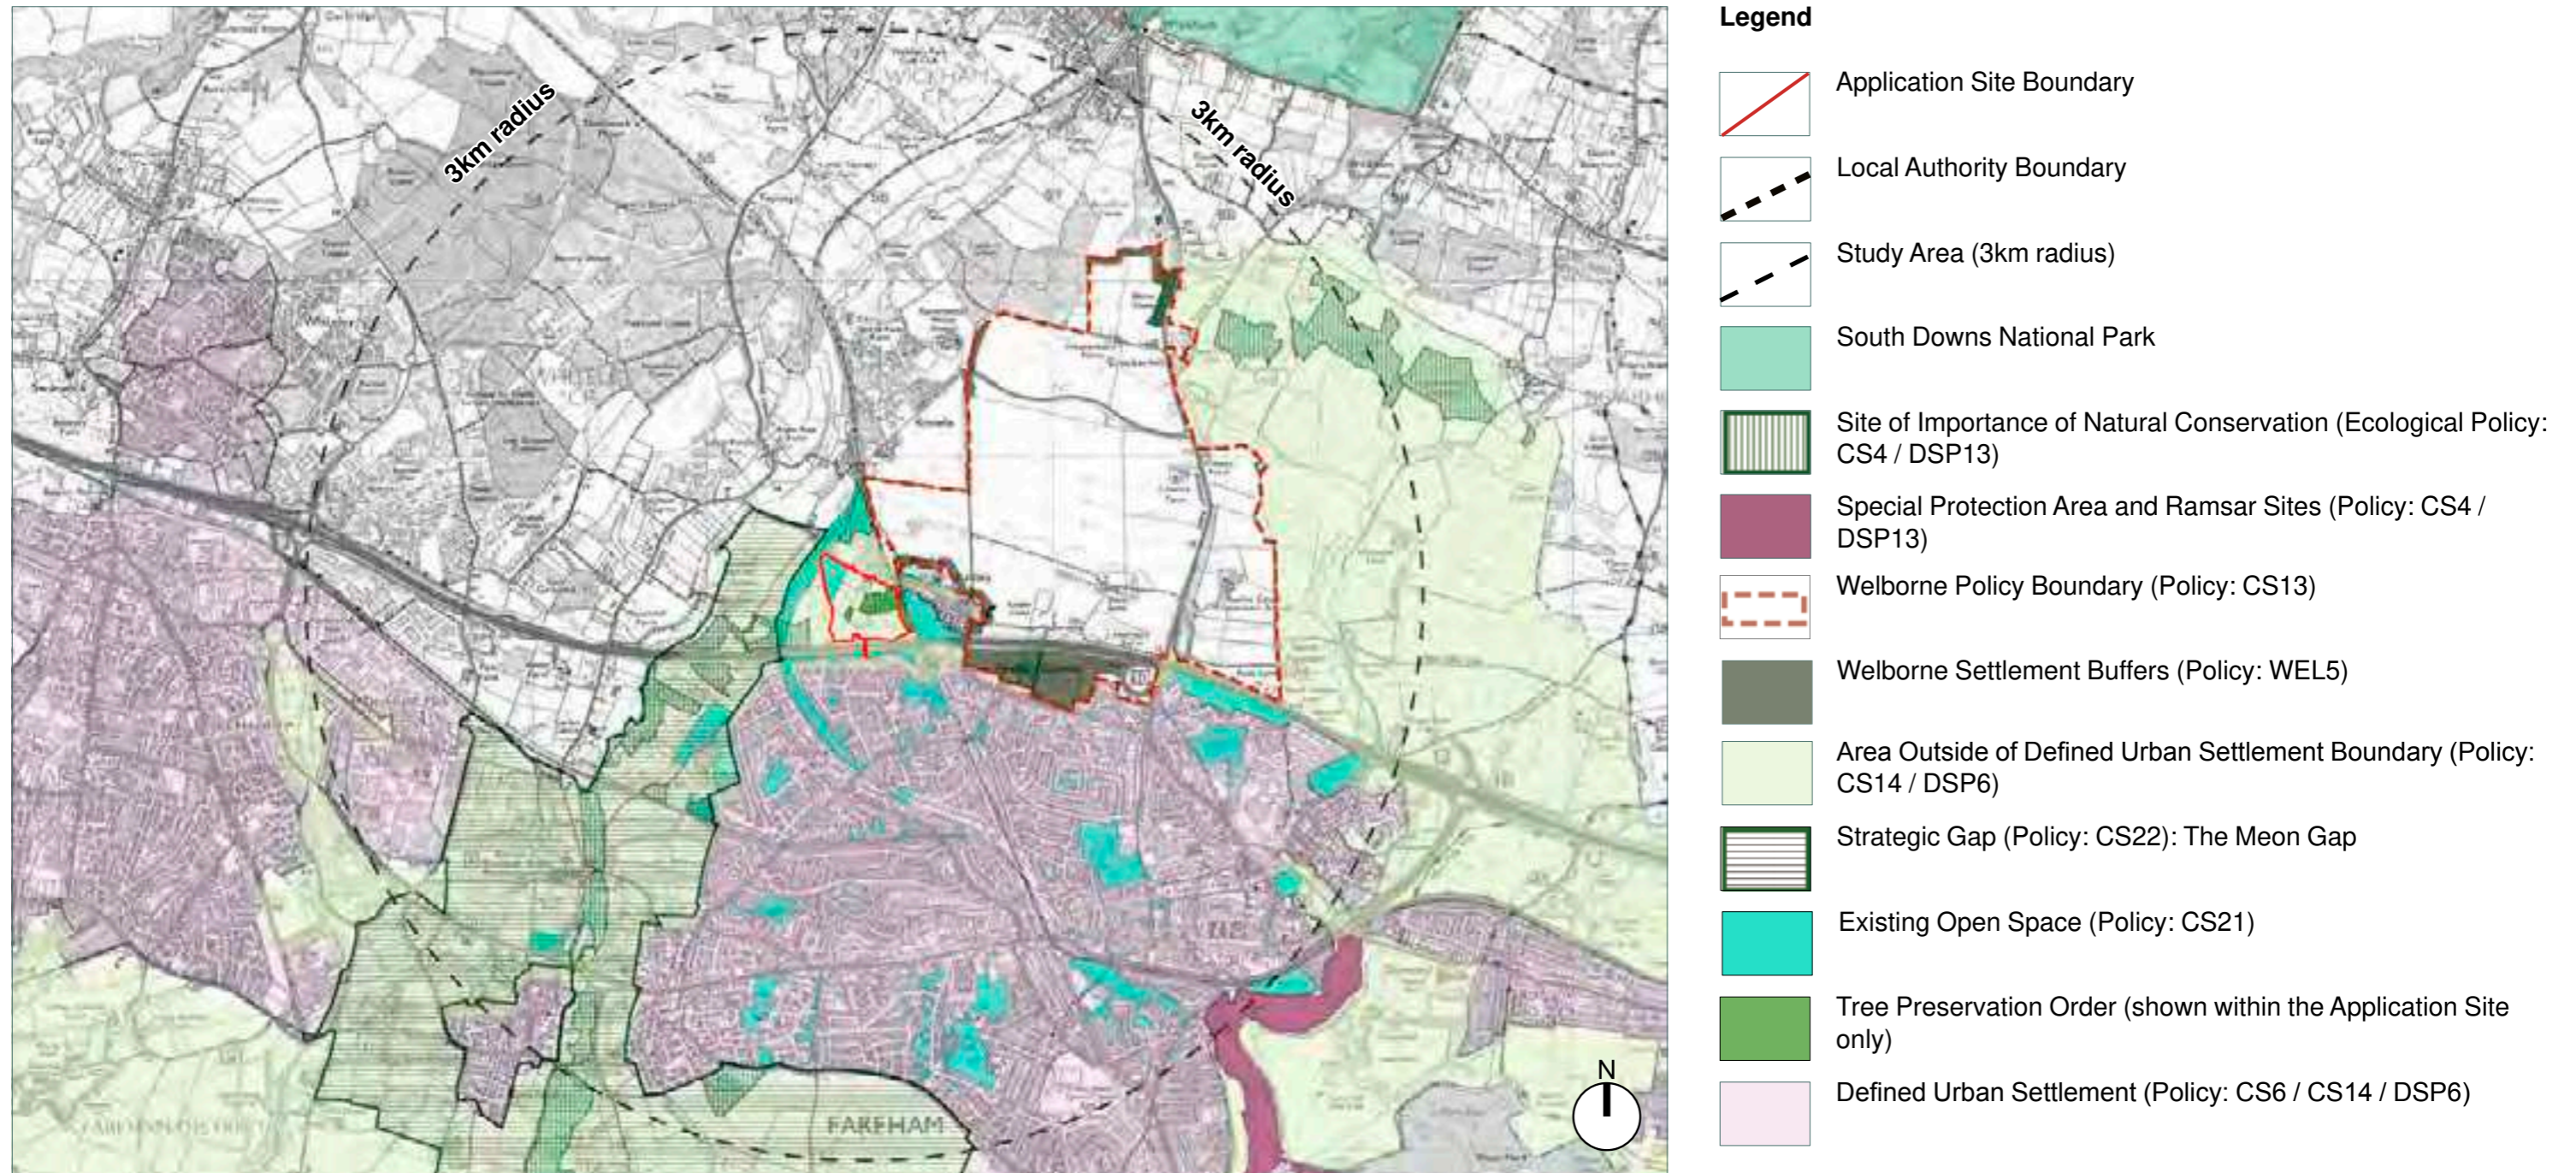

Figure 2.1 – Plan illustrating landscape and ecological designations as shown on the Fareham Borough Council 2015 Adopted Local Plan Proposals Map (fabrik, 2018)

2. Baseline Conditions

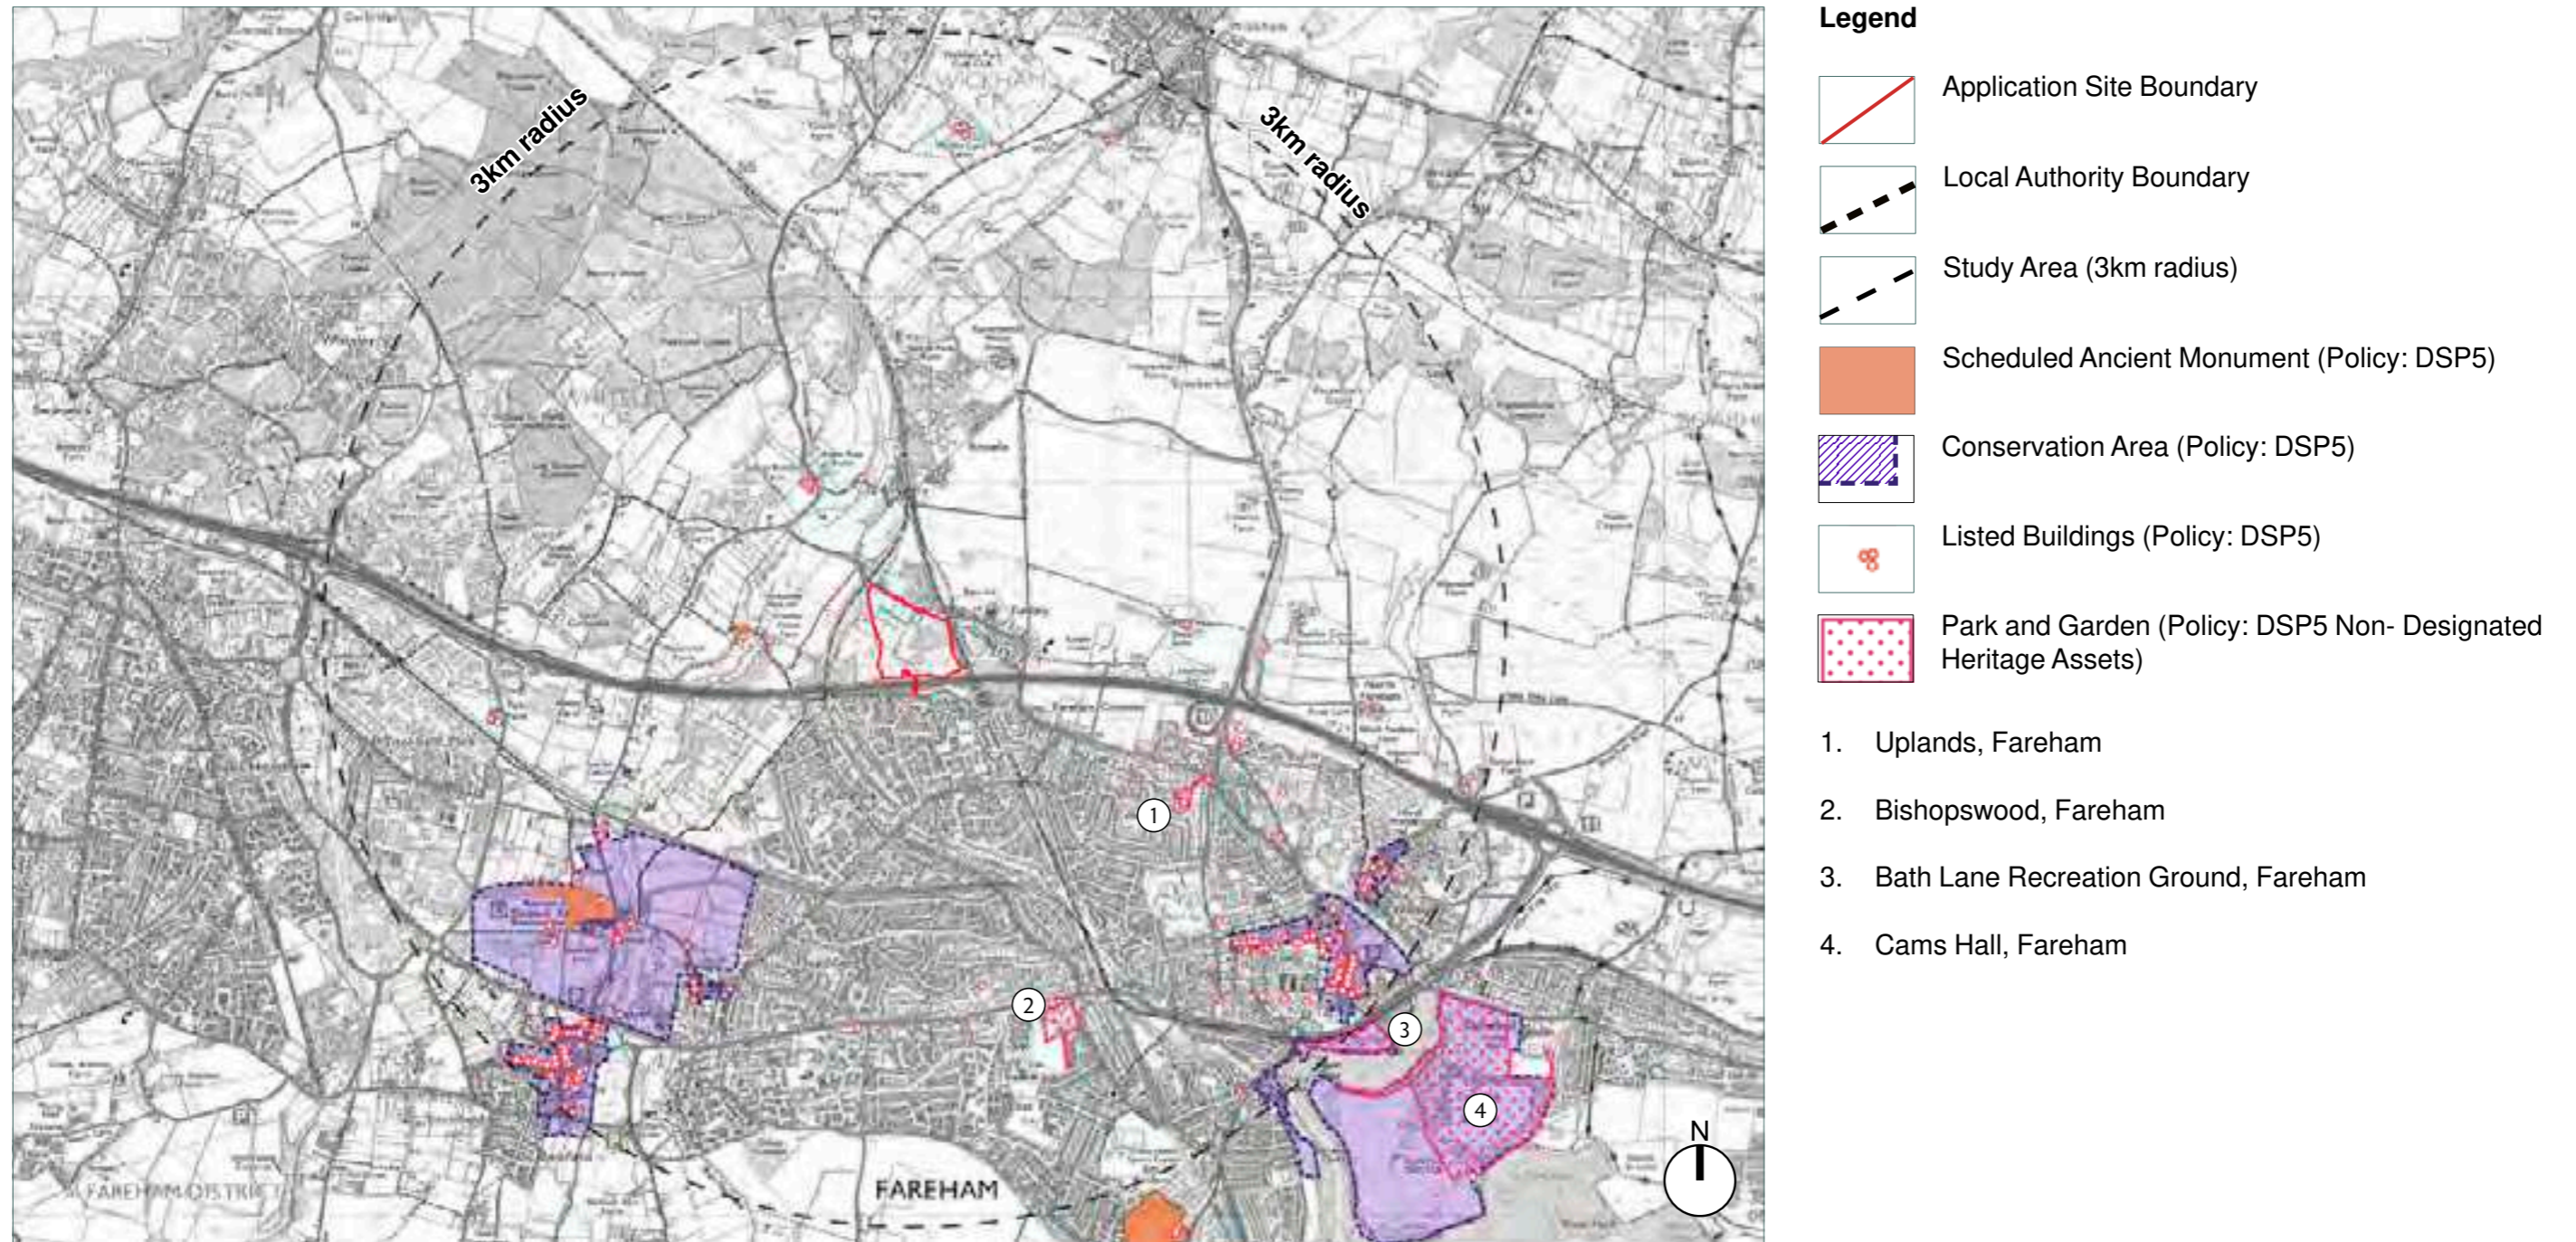

Figure 2.2 – Plan illustrating heritage assets within the 3km study area (fabrik, 2018)

2. Baseline Conditions

2.2 National Landscape Policy (continued)

Conserving and enhancing the natural environment is the topic of Section 11. Paragraph 109 states that: *“The planning system should contribute to and enhance the natural and local environment by:*

- *protecting and enhancing valued landscapes, geological conservation interests and soils;*
- *recognising the wider benefits of ecosystem services;*
- *minimising impacts on biodiversity and providing net gains in biodiversity.”*

Paragraph 115 goes on to state that: *“Great weight should be given to conserving landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty.”*

The Application Site does not lie within or form part of the setting to a valued landscape.

National Planning Practice Guidance - NPPG (March 14)

The NPPG is now supported by the on-line resource Planning Policy Guidance (PPG). There are a number of sections that relate to this LVA as set out below.

The PPG sets out guidance on Design at section ID 26 (updated on 6 March 2014) and the elements to be considered to achieve good design. Paragraph 001 under this section states that: *“The National Planning Policy Framework recognises that design quality matters and that planning should drive up standards across all forms of development. As a core planning principle, plan-makers and decision takers should always seek to secure high quality design.*

Achieving good design is about creating places, buildings, or spaces that work well for everyone, look good, last well, and will adapt to the needs of future generations.

Good design responds in a practical and creative way to both the function and identity of a place. It puts land, water, drainage, energy, community, economic, infrastructure and other such resources to the best possible use - over the long as well as the short term.”

Paragraph 002 states that: *“Good design should:*

- *ensure that development can deliver a wide range of planning objectives*
- *enhance the quality buildings and spaces, by considering amongst other things form and function; efficiency and effectiveness and their impact on well being address the need for different uses sympathetically.”*

Paragraph 004 goes on to state that: *“Development proposals should reflect the requirement for good design set out in national and local policy. Local planning authorities will assess the design quality of planning proposals against their Local Plan policies, national policies and other material considerations.”*

Paragraph 007 states that planning should promote local character (including landscape setting) - states:

“Development should seek to promote character in townscape and landscape by responding to and reinforcing locally distinctive patterns of development, local man-made and natural heritage and culture, while not preventing or discouraging appropriate innovation.

The successful integration of all forms of new development with their surrounding context is an important design objective, irrespective of whether a site lies on the urban fringe or at the heart of a town centre.

When thinking about new development the site’s land form should be taken into account. Natural features and local heritage resources can help give shape to a development and integrate it into the wider area, reinforce and sustain local distinctiveness, reduce its impact on nature and contribute to a sense of place. Views into and out of larger sites should also be carefully considered from the start of the design process.

Paragraph 009 relative to greenspaces and public places - includes the following:

“Development should promote public spaces and routes that are attractive, accessible, safe, uncluttered and work effectively for all users – including families, disabled people and elderly people. A system of open and green spaces that respect natural features and are easily accessible can be a valuable local resource and helps create successful places. A high quality landscape, including trees and semi-natural habitats where appropriate, makes an important contribution to the quality of an area.”

Landscape is a sub section under Section ID 8 on the Natural Environment (updated on 6 March 2014). Paragraph 001 on landscape character states that: *“One of the core principles in the National Planning Policy Framework is that planning should recognise the intrinsic character and beauty of the countryside. Local plans should include strategic policies for the conservation and enhancement of the natural environment, including landscape. This includes designated landscapes, but also the wider countryside.*

Where appropriate, landscape character assessments should be prepared to complement Natural England’s National Character Area profiles. Landscape Character Assessment is a tool to help understand the character and local distinctiveness of the landscape and identify the features that give it a sense of place. It can help to inform, plan and manage change and may be undertaken at a scale appropriate to local and neighbourhood plan-making.”

Under the biodiversity, ecosystems and green infrastructure section, paragraph 015 on green infrastructure defined this as: *“... a network of multi-functional green space, urban and rural, which is capable of delivering a wide range of environmental and quality of life benefits for local communities. Green infrastructure includes parks, open spaces, playing fields, woodlands, street trees, allotments and private gardens.”*

2. Baseline Conditions

2.3 Local Landscape Policy

Introduction

The Fareham Borough Council is undergoing the process of producing a new Local Plan to reflect new housing and employment needs within the borough up to 2036. Before the emerging local plan is adopted by the Council, the policies within the Fareham Local Development Framework, Core Strategy (Adopted August 2011) form the principal documents within the Local Plan.

Current Policy: Fareham Local Development Framework, Core Strategy (Adopted August 2011)

Within the Adopted Core Strategy, the Council has set out strategic objectives to reflect the national policies, as well as to monitor and deliver a sustainable community within the borough.

The following objectives are pertinent to this LVA.

Strategic Objective SO1 aims to: *“To deliver the South Hampshire Strategy in a sustainable way, focussing development in Fareham, the Strategic Development Area north of Fareham and the Western Wards.”*

Strategic Objective SO8 aims to: *“To deliver a new sustainable settlement to the north of Fareham, creating 6,500-7,500 homes, up to 90,750 sq.m employment floorspace, a new district centre and other supporting retail and community provision.”* This relates to the Welborne settlement proposed to the east of Funtley.

SO10 states that the Local Authority wishes to: *“...manage, maintain and improve the built and natural environment to deliver quality places, through high quality design sustainability and maintenance standards, taking into account the character and setting of existing settlements and neighbourhoods and seeking safe environments which help to reduce crime and the fear of crime.”*

Whilst SO11 is concerned with green infrastructure, aiming to: *“... protect and enhance access to green infrastructure, the countryside,*

coast and historic environment whilst protecting sensitive habitats or historic features from recreational pressure, and protect the separate identity of settlements, including through the designation of strategic gaps.”

In terms of development proposals and designations, the following policies are pertinent to this LVA.

Policy CS4 relates to the green infrastructure within the borough and states: *“Habitats important to the biodiversity of the Borough, including Sites of Special Scientific Interest, Sites of Importance for Nature Conservation, areas of woodland, the coast and trees will be protected ...”* The policy goes on and states: *“Development Proposals will be permitted where Green Infrastructure provision in accordance with the Green Infrastructure Strategy has been integrated within the development where this is appropriate. Development proposals will provide for appropriate access to green space for informal recreation to avoid adverse impacts from recreation and other impacts on European 31 and Ramsar sites and on nationally and locally important sites.”*

Within the Core Strategy and the proposal map, the Welborne Policy Boundary is within the close distance to the Application Site to the north-east (refer to Figure 2.1). This future development allocates up to 6,000 dwellings with associated transportation links, green infrastructure and open spaces. The relevant Policy is CS13 North of Fareham Strategic Development Area and states that: *“Permission will be granted for the development of a Strategic Development Area to the north of Fareham following the adoption of an Area Action Plan and the preparation of a comprehensive masterplan for the development. The development will include provision for between 6,500- 7,500 dwellings, unless it is found that this level of housing cannot be delivered without adversely affecting the integrity of protected European conservation sites. If any potential adverse effects cannot be avoided or adequately mitigated, the level and scale of development would need to be reduced accordingly to ensure that there are no adverse effects on the integrity of any European sites. The development will also provide supporting environmental, social and physical infrastructure, retail and employment floorspace to both support the development and to contribute towards meeting*

the development objectives of the South Hampshire Sub-Region. The new community will aim to be as self-contained as possible, whilst complementing and supporting the established town centre of Fareham and adjoining settlements.”

Policy CS14 refers to Development outside the defined settlement boundary, stating: *“Built development on land outside the defined settlements will be strictly controlled to protect the countryside and coastline from development which would adversely affect its landscape character, appearance and function.”*

Policy CS17 is concerned with High Quality Design, with focus on landscape and stating: *“All development, buildings and spaces will be of a high quality of design and be safe and easily accessed by all members of the community. Proposals will need to demonstrate adherence to the principles of urban design and sustainability to help create quality places. In particular development will be designed to:*

- *respond positively to and be respectful of the key characteristics of the area, including heritage assets, landscape, scale, form, spaciousness and use of external materials;*
- *provide continuity of built form, a sense of enclosure with active frontages to the street and safety of the public realm;*
- *provide green infrastructure, including landscaping, open spaces, greenways and trees within the public realm...”*

The policy relating to the Protection and Provision of Open Spaces, CS21 states: *“The Borough Council will safeguard and enhance existing open spaces and establish networks of Green Infrastructure to add value to their wildlife and recreational functions. Development which would result in the loss of or reduce the recreational value of open space, including public and private playing fields, allotments and informal open space will not be permitted, unless it is of poor quality, under-used, or has low potential for open space and a better quality replacement site is provided which is equivalent in terms of accessibility and size.”*

Policy CS22 deals with developments within Strategic Gaps and states: *“Land within a Strategic Gap will be treated as countryside. Development proposals will not be permitted either individually or*

2. Baseline Conditions

2.3 Local Landscape Policy (continued)

cumulatively where it significantly affects the integrity of the gap and the physical and visual separation of settlements.

Strategic Gaps have been identified between Fareham/Stubbington and Western Wards/Whiteley (the Meon gap)...

Fareham Borough Local Plan Part 2: Development Sites and Policies (Adopted June 2015)

The Local Plan Part 2 reinforces the Core Strategy's policies relating to the natural environment. Paragraph 4.1 summarises: *"The Natural Environment is a key asset of the Borough, which provides a significant contribution to the quality of life of residents and visitors. It not only provides a natural, green setting for the Borough's settlement, but is also important for recreation and leisure uses as well as supporting the Borough's biodiversity including internationally important habitats for wildlife. The Plan is important in establishing the right balance between planning for growth and protecting the natural environment."*

Policy DSP40 Housing Allocations includes the following, which is of relevance to the proposed development site:

"Where it can be demonstrated that the Council does not have a five year supply of land for housing against the requirements of the Core Strategy (excluding Welborne) additional housing sites, outside the urban area boundary, may be permitted where they meet all of the following criteria:

- i. The proposal is relative in scale to the demonstrated 5 year housing and supply shortfall;*
- ii. The proposal is sustainably located adjacent to, and well related to, the existing urban settlement boundaries, and can be well integrated with the neighbouring settlement;*
- iii. The proposal is sensitively designed to reflect the character of the neighbouring settlement and to minimise any adverse impact on the Countryside and, if relevant, the Strategic Gaps;*

iv. It can be demonstrated that the proposal is deliverable in the short term; and

v. The proposal would not have any unacceptable environmental, amenity or traffic implications."

Policy DSP2 concerns with any environmental impact of new developments to the existing development and wider landscape, and go on stating: *"Development proposals should not, individually, or cumulatively, have a significant adverse impact, either on neighbouring development, adjoining land, or the wider environment, by reason of noise, heat, liquids, vibration, light or air pollution (including dust, smoke, fumes or odour)...."*

Policy DSP5 relates to any developments affecting the setting of historical assets and states: *"Designated and non-designated heritage assets are an irreplaceable resource that will be conserved in a manner appropriate to their significance, to be enjoyed for their contribution to the quality of life of this and future generations. The wider social, cultural, economic and environmental benefits of their conservation will also be taken into account in decision making...."* The policy goes on and state: *"...The Council will conserve Scheduled Monuments, and archaeological sites that are demonstrably of national significance, by supporting proposals that sustain and where appropriate enhance their heritage significance. Proposals that unacceptably harm their heritage significance, including their setting, will not be permitted."*

Non-designated heritage assets including locally listed buildings, historic parks and gardens, and sites of archaeological importance will be protected from development that would unacceptably harm their Architectural and historic interest, and/or setting taking account of their significance.

Policy DSP6 relates to the Core Strategy CS14 on Development Outside of the Defined Urban Settlement Boundaries and states: *"There will be a presumption against new residential development outside of the defined urban settlement boundaries (as identified on the Policies Map)....A change of use of land outside of the defined urban settlement boundary to residential garden will only be permitted where:*

i. It is in keeping with the character, scale and appearance of the surrounding area; and

ii. It will not detract from the existing landscape; and

iii. It respects views into and out of the site."

Policy DSP13 relates to the impact of new development on the nature conservation areas within the borough and states: *"Development may be permitted where it can be demonstrated that;*

i. designated sites and sites of nature conservation value are protected and where appropriate enhanced;

ii. protected and priority species populations and their associated habitats, breeding areas, foraging areas are protected and, where appropriate, enhanced;

iii. where appropriate, opportunities to provide a net gain in biodiversity have been explored and biodiversity enhancements incorporated; and

iv. The proposal would not prejudice or result in the fragmentation of the biodiversity network.

Proposals resulting in detrimental impacts to the above shall only be granted where the planning authority is satisfied that (this section of the policy should not be applied to impacts on SPA designated sites which are subject to stricter protection tests as set out in The Conservation of Species and Habitats Regulations (as amended) 2010);

i. Impacts are outweighed by the need for, and benefits of, the development; and

ii. Adverse impacts can be minimised and provision is made for mitigation and, where necessary, compensation for those impacts is provided.

Enhancements that contribute to local habitat restoration and creation initiatives as set out in the Hampshire Biodiversity Action Plan (or other similar relevant document) will be supported."

2. Baseline Conditions

Supplementary Planning Documents

Planning Obligations Supplementary Planning Document for the Borough of Fareham (Excluding Welborne) Adopted April 2016

In terms of public open space, outdoor sport and children's play equipment, Appendix B sets out that for developments of between 50-299 dwellings, 1.5ha per 1000 population is to be provided for parks and amenity open space. No sport provision is required for this scale of development. In terms of play provision, for developments between 50-199 dwellings, a LEAP is required.

Emerging Policy: Fareham Local Plan 2036 (Draft, Consultation Version)

Figure 2.3 on the following page illustrates the proposed amendments to the policies map. **Figure 2.4** shows the development allocation plan from Appendix G of the emerging local plan. The Application Site is proposed for residential development and new open space. Land to the north is also proposed as a residential allocation. Extracts of the policies relative to landscape matters are set out below:

Policy HA10 sets out the requirements of the proposed allocation, with a capacity for 55 dwellings and states that: "Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- a) The quantum of housing proposed shall be broadly consistent with the indicative site capacity; and
- b) Primary highway access shall be from Funtley Road; and
- c) Building heights are limited to a maximum of 2 storeys; and
- d) Safe pedestrian and cycle crossing points across Funtley Road and connectivity with the existing footpath/bridleway network in the vicinity of the site and eastwards towards the centre of Funtley village in order to maximise connectivity to nearby facilities and services; and

- e) The creation of a vehicular loop road on the site, allowing for pedestrians and cycle permeability across the site; and
- f) Proposals shall take account of the site's landscape context by incorporating view corridors from Funtley Road through to the public open space allocation to the south of the residential allocation (as illustratively shown in Appendix G). The view corridors should form part of the on-site open space and should incorporate pedestrian and cycle links, whilst vehicular crossing links should be limited; and
- g) A 15m buffer shall be incorporated between development and the Great Beamond Coppice SINC to the east of the site; and
- i) The provision of a building / buildings for community uses, located in an accessible location to enable a range of uses for both existing and new residents; and
- j) Proposals shall either provide directly, or provide financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Public open space on and off-site (as illustratively shown in Appendix G) (in line with the Council's Planning Obligations SPD); and
 - a Local Area of Play (LEAP) on-site (in line with the Council's Planning Obligations SPD).

In light of the landscape setting, this development allocation is required to take a looser, less dense approach, applying a density of around 20 dwellings per hectare (dph). In light of the rural setting, significant natural landscaping should be incorporated, so that proposals are assimilated into the landscape. Part of this assimilation includes the incorporation of view corridors, between Funtley Road and the open space south of the site, which are required to maintain visual and physical connections through the site.

Additionally, the delivery of the community uses building and public open space are critical elements in making the development

acceptable, by providing additional assets for both the existing and new community. The community building envisaged is one that is multi-functional and flexible to allow for a range of small-scale community uses, whilst the proposed public open space should be more informal in nature, to take account of and strengthen the landscape setting.

Appendix F is a visual demonstration of the suggested approach to development in this location, taking account of the approach detailed above."

The other pertinent policies of the Local Plan, relative to landscape and visual matters are:

Policy CF6: Provision and Protection of Open Space, which states that: "Proposals for new residential development will be required to provide open space to meet the needs of new residents in accordance with the thresholds and requirements set out in the Council's Planning Obligations SPD.

Proposals seeking to develop on open space will not be permitted unless it can be clearly demonstrated that:

- a) The open space is surplus to local requirements and will not be needed in the long-term following a robust assessment; and
- b) Replacement provision will be at least equivalent or better in terms of quantity, quality and accessibility and there will be no overall negative impact on the provision of open space; or
- c) The development is for alternative recreational provision, which meets locally identified needs and clearly outweighs the loss of the original open space; or
- d) The loss of open space is replaced by a scheme which delivers high quality community, educational or health benefits and clearly outweighs the scale of the net loss of open space."

2. Baseline Conditions

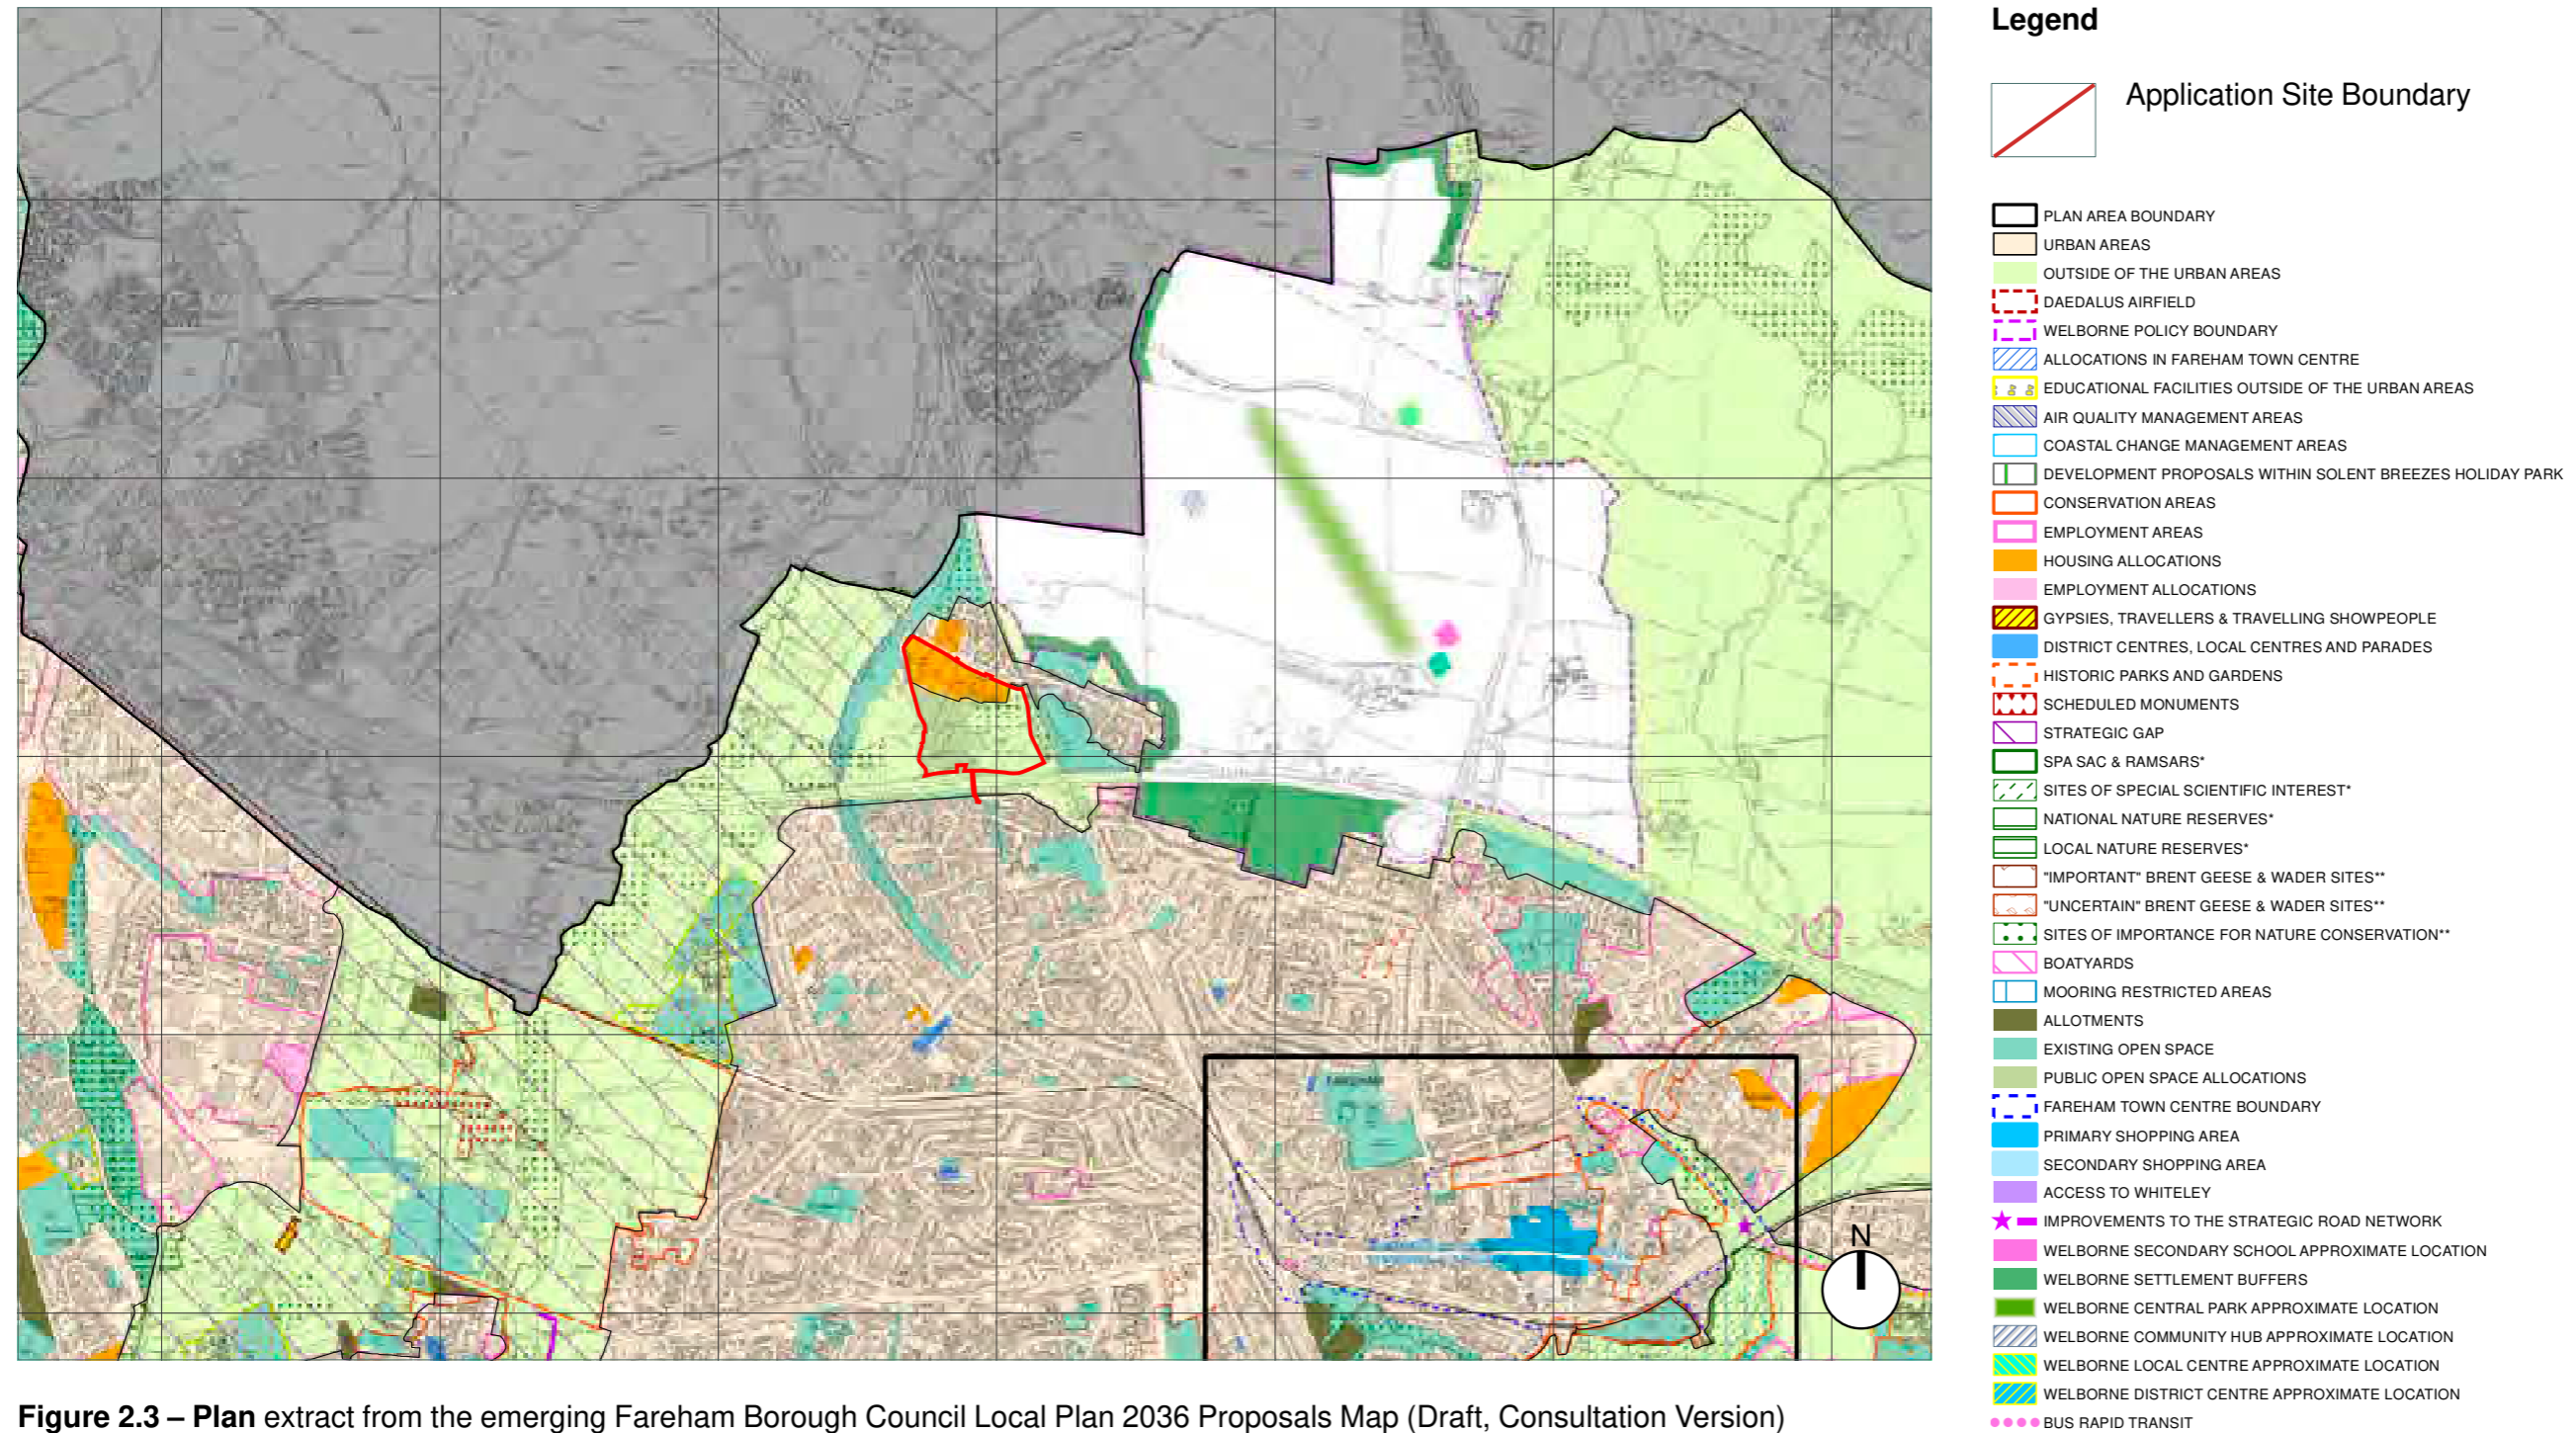

Figure 2.3 – Plan extract from the emerging Fareham Borough Council Local Plan 2036 Proposals Map (Draft, Consultation Version)

2. Baseline Conditions

Emerging Policy: Fareham Local Plan 2036 (Draft, Consultation Version) Continued

Policy NE1 deals with Landscape and states that: *“Development for all major applications will be permitted only where it can be demonstrated, through a robust landscape assessment that the proposals satisfy the specific development criteria contained within the Council’s Landscape Sensitivity Assessment for the character area in which the development is located.*

Development proposals must respect, enhance and not have severe adverse impacts on the character or function of the landscape that may be affected, with particular regard to:

- a) Intrinsic landscape character, quality and important features;*
- b) Visual setting, including to/from key views;*
- c) The landscape as a setting for settlements, including important views to, across, within and out of settlements;*
- d) The landscape’s role as part of the existing Green Infrastructure network;*
- e) The local character and setting of buildings and settlements;*
- f) Natural landscape features, such as trees, ancient woodland, hedgerows, water features and their function as ecological networks; and*
- g) The character of the Borough’s rivers and coastline, which should be safeguarded.*

Major development proposals shall include a comprehensive landscaping mitigation and enhancement scheme to ensure that the development is able to successfully integrate with the landscape and surroundings. The landscaping scheme shall be proportionate to the scale and nature of the development proposed and shall be in accordance with the enhancement opportunities specified in the

Council’s Landscape Sensitivity Assessment.”

Policy D1 is the topic for High Quality Design, setting out that all development proposals and spaces are to be of high quality, based on principles of urban design and sustainability to help create quality places. It includes the following:

“Development proposals will be permitted where they:

- a) Respond positively to and be respectful of key characteristics of the area, including heritage assets, landscape, trees and landscape features, scale, spaciousness, form and the use of external materials;...*

In all instances proposals shall have regard to the adopted Borough Design Guidance SPD.”

In addition to the allocation pertaining to the Site, land to the north of Funtley Road (Funtley Road North Site HA18) is subject to an allocation for around 23 dwellings on land around 0.96ha in size (see Figure 2.4).

2. Baseline Conditions

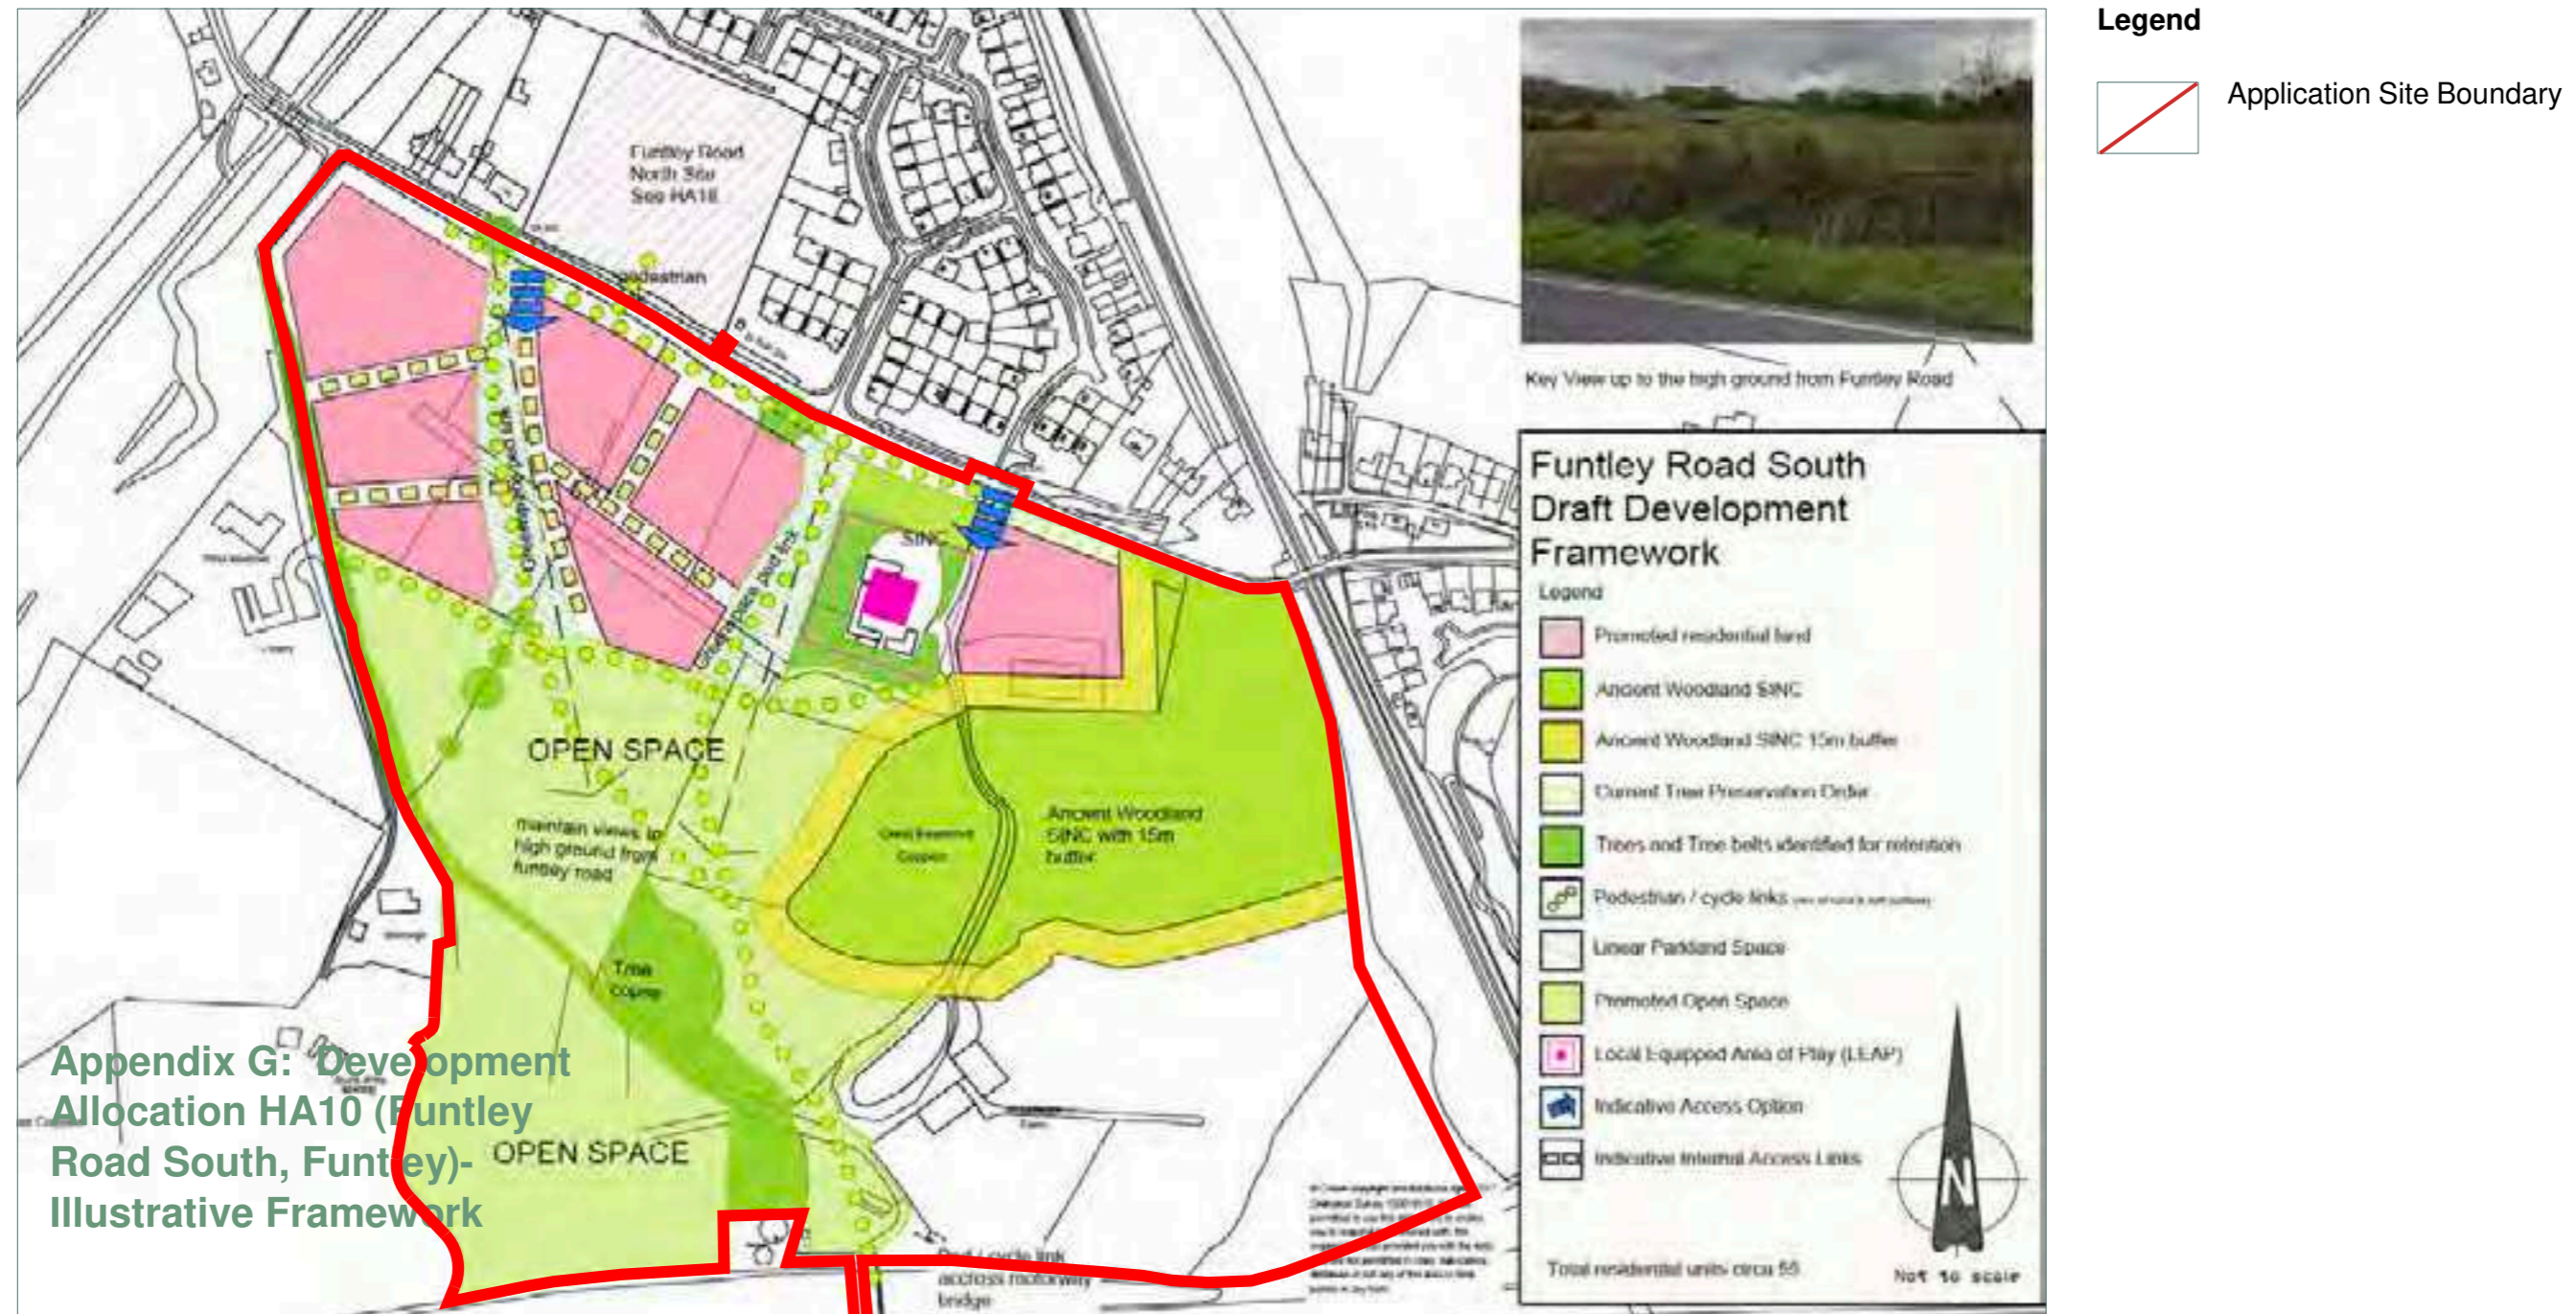

Figure 2.4 – Plan illustrating Development Allocation HA10 from the emerging Fareham Borough Council Local Plan 2036 (Draft Consultation Version)

2. Baseline Conditions

2.4 Introduction

The following paragraphs describe the landscape receptors firstly at contextual level and secondly at Application Site level.

2.5 Topographic Context

The topography of the study area is illustrated on the plan opposite in **Figure 2.5**.

Within the northern part of the study area, two major ridgelines predominately run in a broadly east to west orientation and stretch across the northern and north-eastern section of the study area. The heights are varied and reach approximately 50m AOD to Sager's Down located to the north west of the village of Knowle.

The River Meon runs in a north-east to south-west direction across the central part of the study area. It creates a large area of valley floor between the major settlement of Fareham and smaller suburb communities and villages to the west of the study area. To the east of the study area, the eastern section of the M27 motorway with the easternmost part of Fareham sits on the valley floor, which is formed by the Wallington River to the east of the study area.

The Application Site sits on the south-western fringe of Funtley village. The southern part of the Application Site lies on a ridgeline reaching approximately 55m AOD. The topography then falls towards Honey Lane to the west and Funtley Road to the north.

The value of this landscape receptor is assessed as ranging from **Low - Medium**.

2. Baseline Conditions

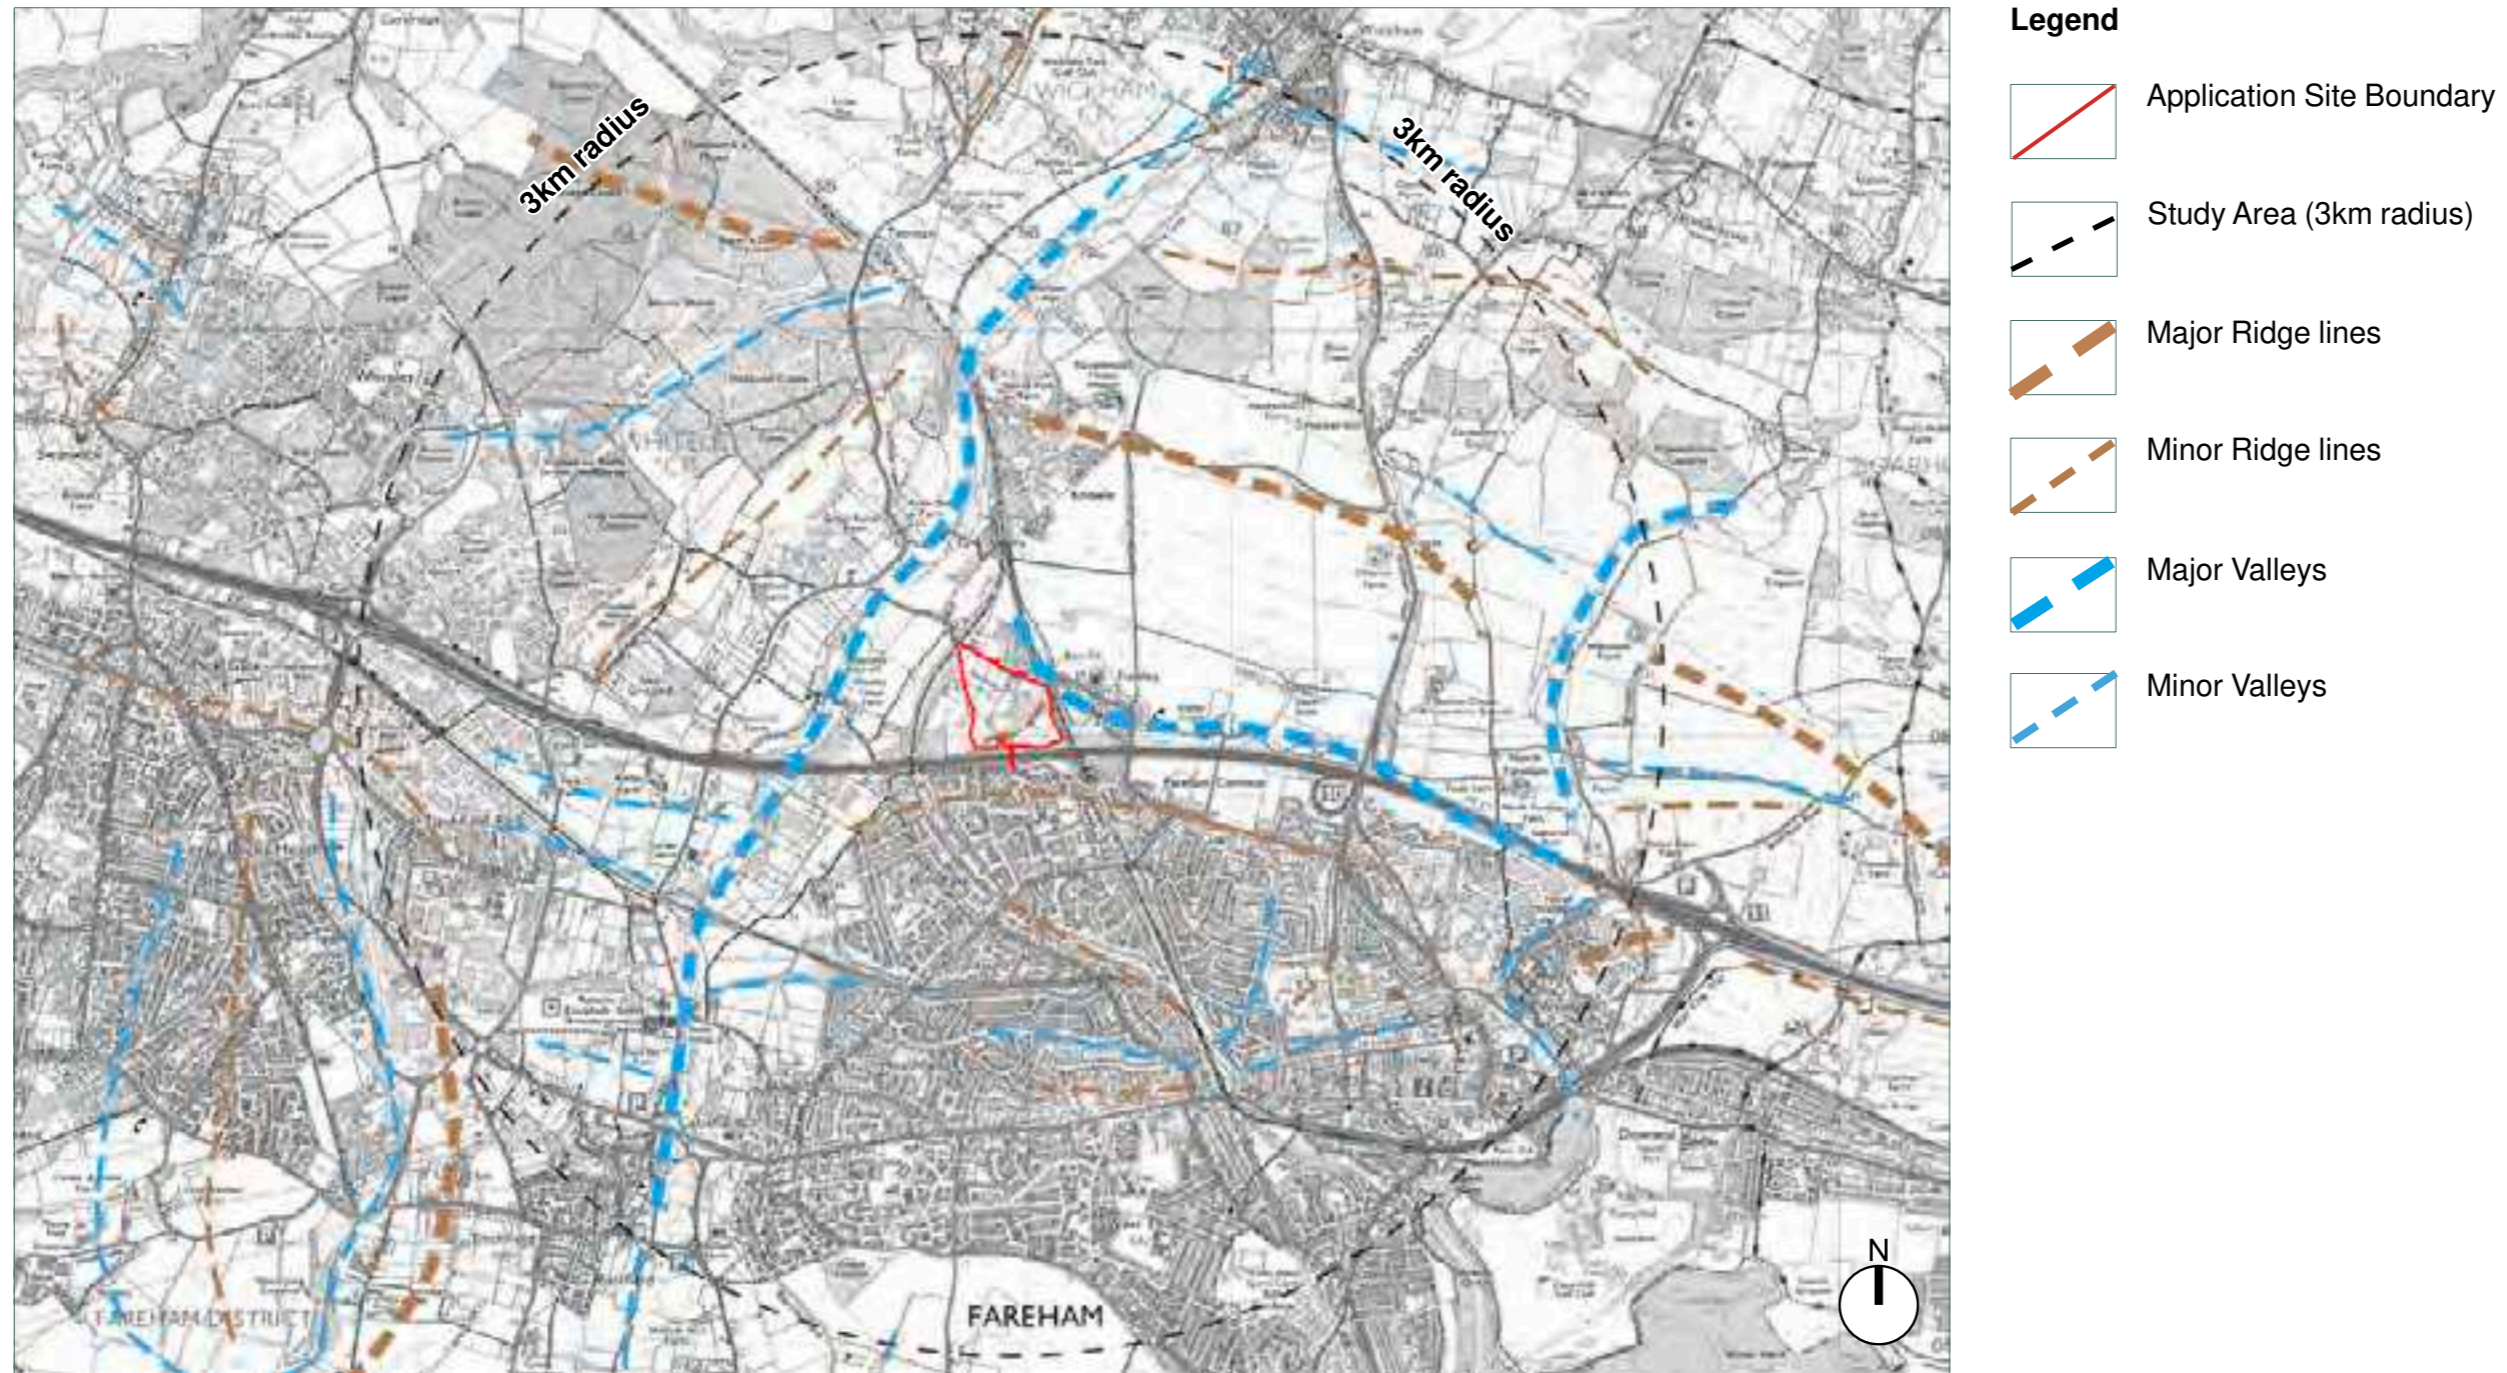

Figure 2.5 – Plan illustrating Topography and Drainage (fabrik, 2018)

2. Baseline Conditions

2.6 Contextual Landscape Elements

Broad Land Use and Land Cover:

Land cover across the northern part of study area is predominantly agricultural. A number of woodlands within the study area are either Ancient or Re-planted Woodlands. The Ancient Re-planted Woodland of Great Beamond Coppice is located within the north-eastern section of the Application Site.

The Great Beamond Coppice and the tree blocks within central northern and south-western section of the Application Site are also designated as Site of Importance for Nature Conservation (SINC) and are covered by a Tree Preservation Order (TPO).

Field patterns within the study area are predominantly of small to medium scale and bounded by dense hedgerows, trees and enclosed rural lanes. The settlement of Fareham and its associated suburban areas dominates the southern part of the study area, whilst the village of Knowle is located to the north east of the Application Site. A number of smaller settlements and farmsteads are also scattered across the study area.

There are a series of locally designated Historic Park and Gardens present within the study area. Uplands is located approximately 1.5km to the south east of the Application Site, whilst the Bishopswood is located approximately 1.9km to the south east.

Additionally, the Scheduled Ancient Monument of Funtley Iron Works, with a group of Grade II Listed buildings including Ironmaster's House and Funtley House, are situated approximately 500m to the south west of the Application Site along the Ironmill Lane.

The value of this landscape receptor are assessed as ranging from **Low - Medium**.

2. Baseline Conditions

Figure 2.6 – Plan illustrating land use within the study area (fabrik, 2018).

2. Baseline Conditions

2.7 Contextual Public Rights of Way

A series of public footpaths, bridleways with long distance trails are present across the study area.

Public footpaths 85, 513a, 513b, 513c and 513d traverse the landscape to the north east of the Application Site and provide connectivity between Lakeside, Funtley Road and Totsome Cottage to the north. Bridleway 515 to the north west of the Application Site connects Funtley Road and Mayles Lane to the north-west, over the M27 to the south west. To the south of the Application Site footpath 91 runs in a north west - south east direction along the M27 and creates the connection between bridleway 82 to the west, Red Barn Lane and Highlands Road to the south east.

The long distance walk of Allan King Way is located at the south-eastern edge of the study area, approximately 3.63km to the south east of the Application Site. This route provides the connection between the eastern fringe of Fareham to the wider landscape via Paradise Lane to the north east and Downend Road to the south east.

The value of these landscape receptors are assessed as ranging from **Medium - High**.

2. Baseline Conditions

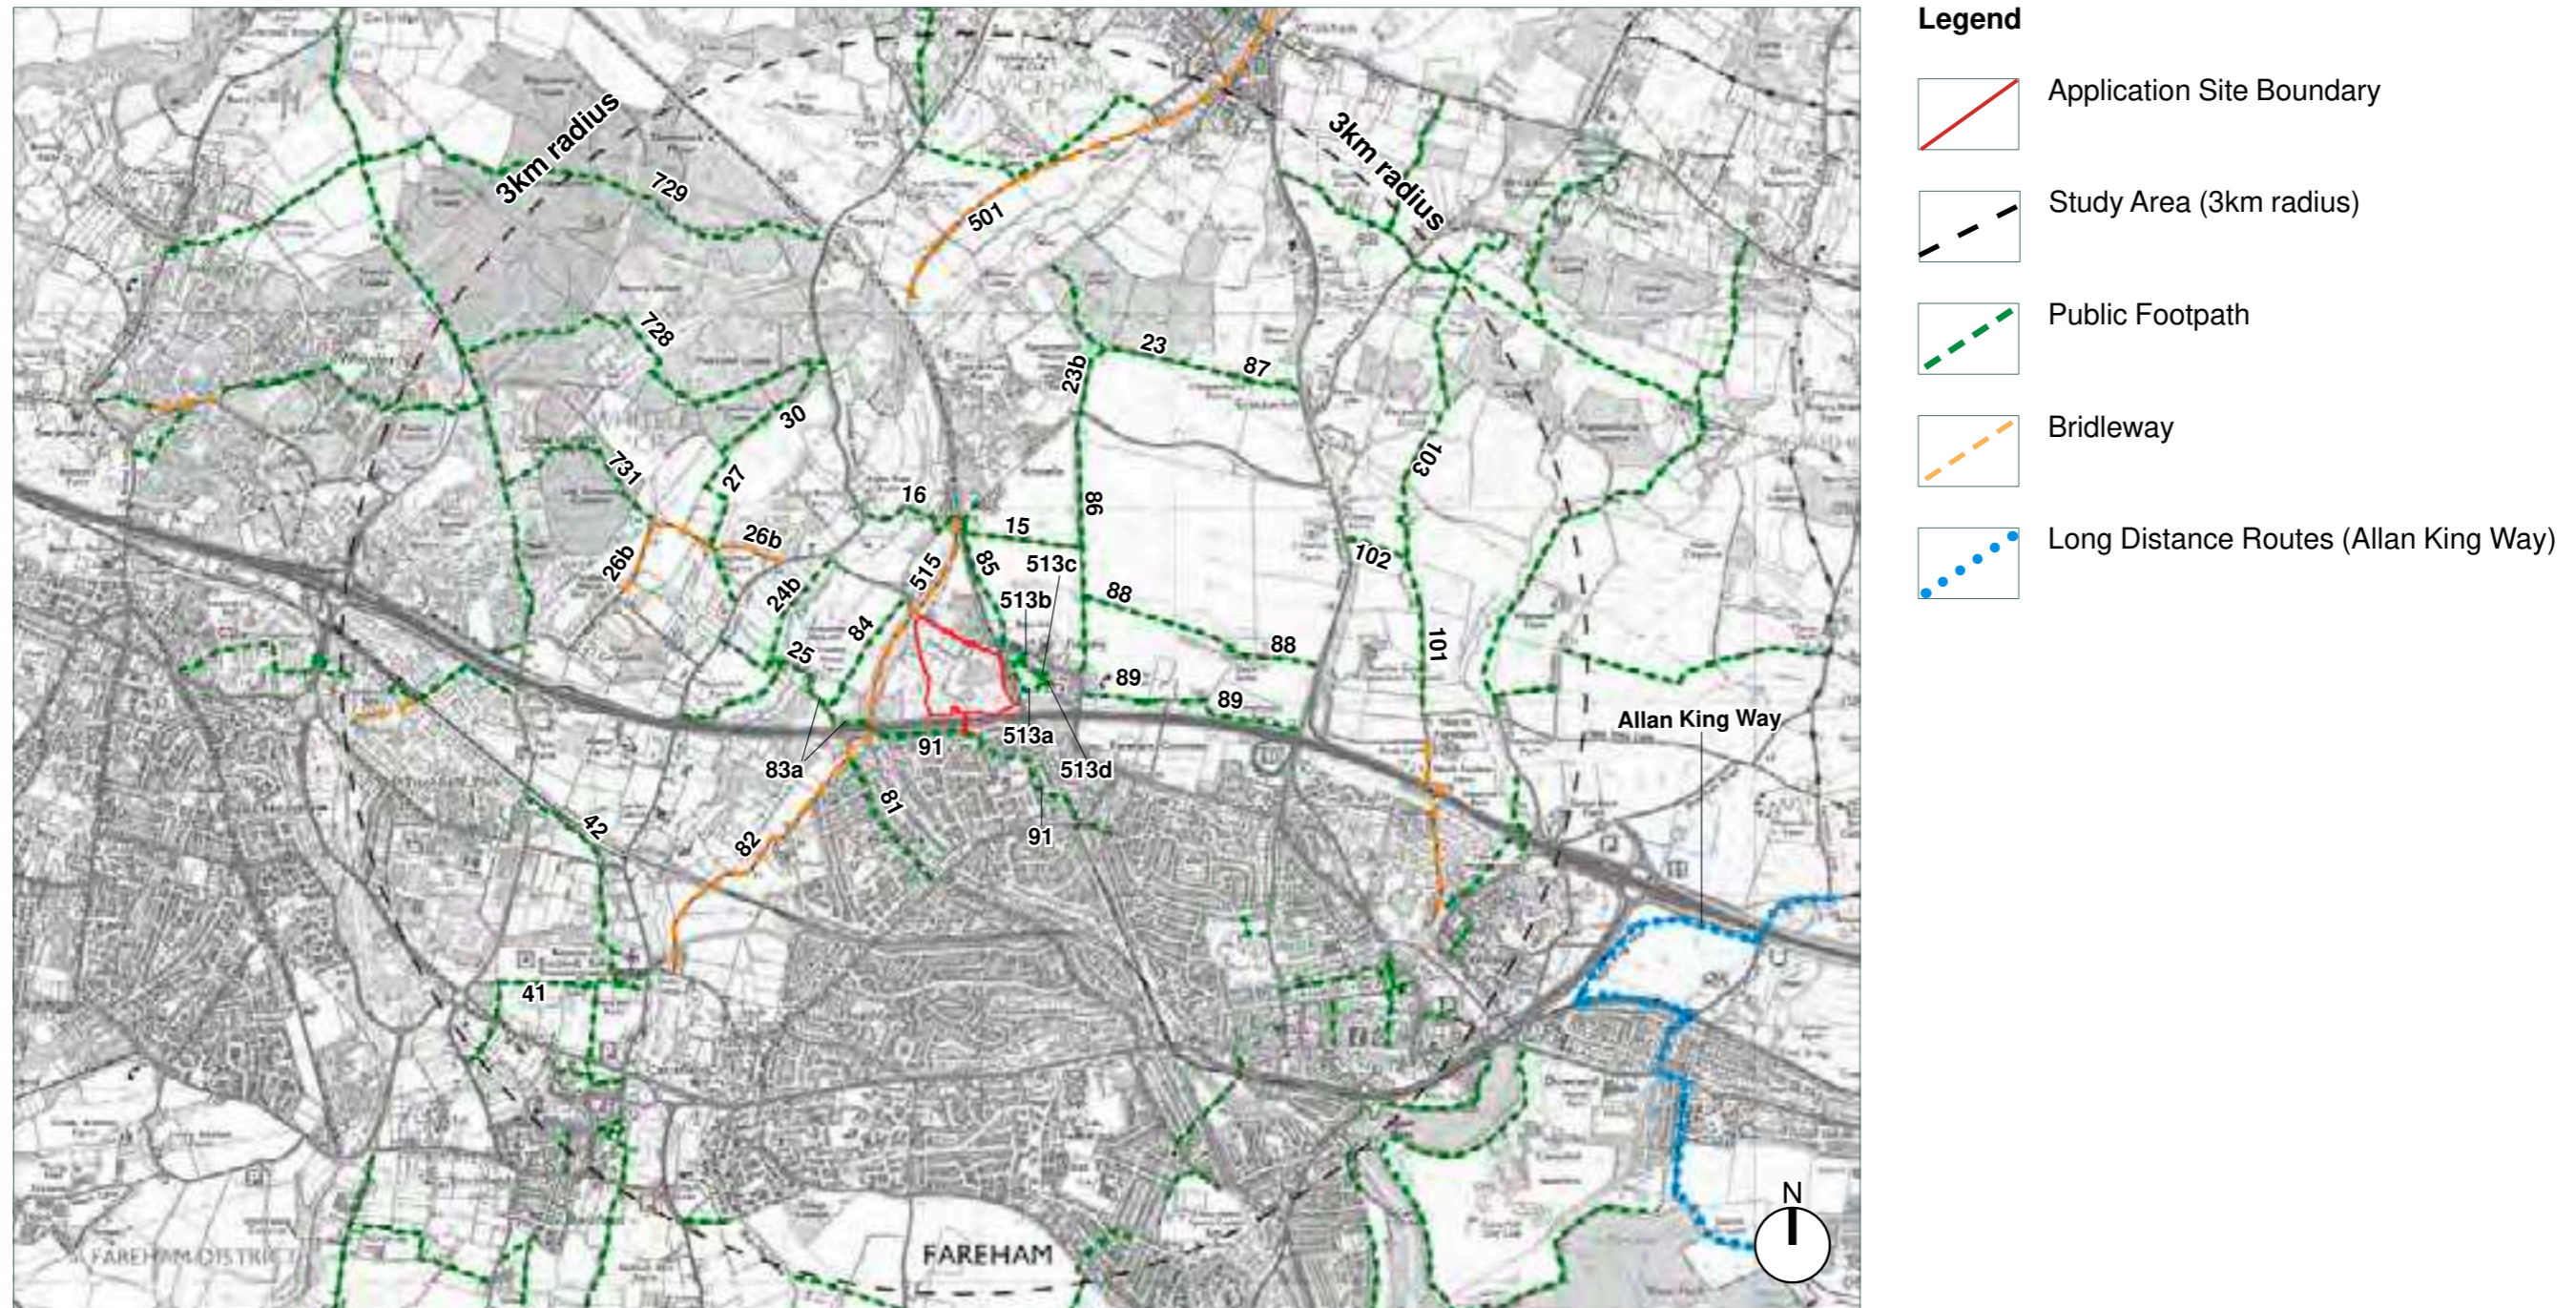

Figure 2.7 – Plan illustrating public rights of way and long distant routes within the study area (fabrik, 2018).

2. Baseline Conditions

2.8 Contextual Movement Corridors

The M27 motorway is the major transport link crossing the study area in an east - west orientation immediately south of the Application Site. The A32 (Wickham Road) and A27 are the primary links from the M27 into Wickham to the north and Portchester to the east.

The secondary and tertiary roads provide connections between Fareham and smaller villages such as Funtley and Knowle. Within the immediate setting of the Application Site, Funtley Road runs along the northern boundary and connects to Tichfield Lane to the north and Kiln Road to the south.

The nearest mainline railway station to the Site is approximately 2km away in Fareham to the south-east. It provides train connections to London Waterloo, Portsmouth and Southampton.

The value of the movement corridors as a receptor are assessed as ranging from **Low - Medium**.

2. Baseline Conditions

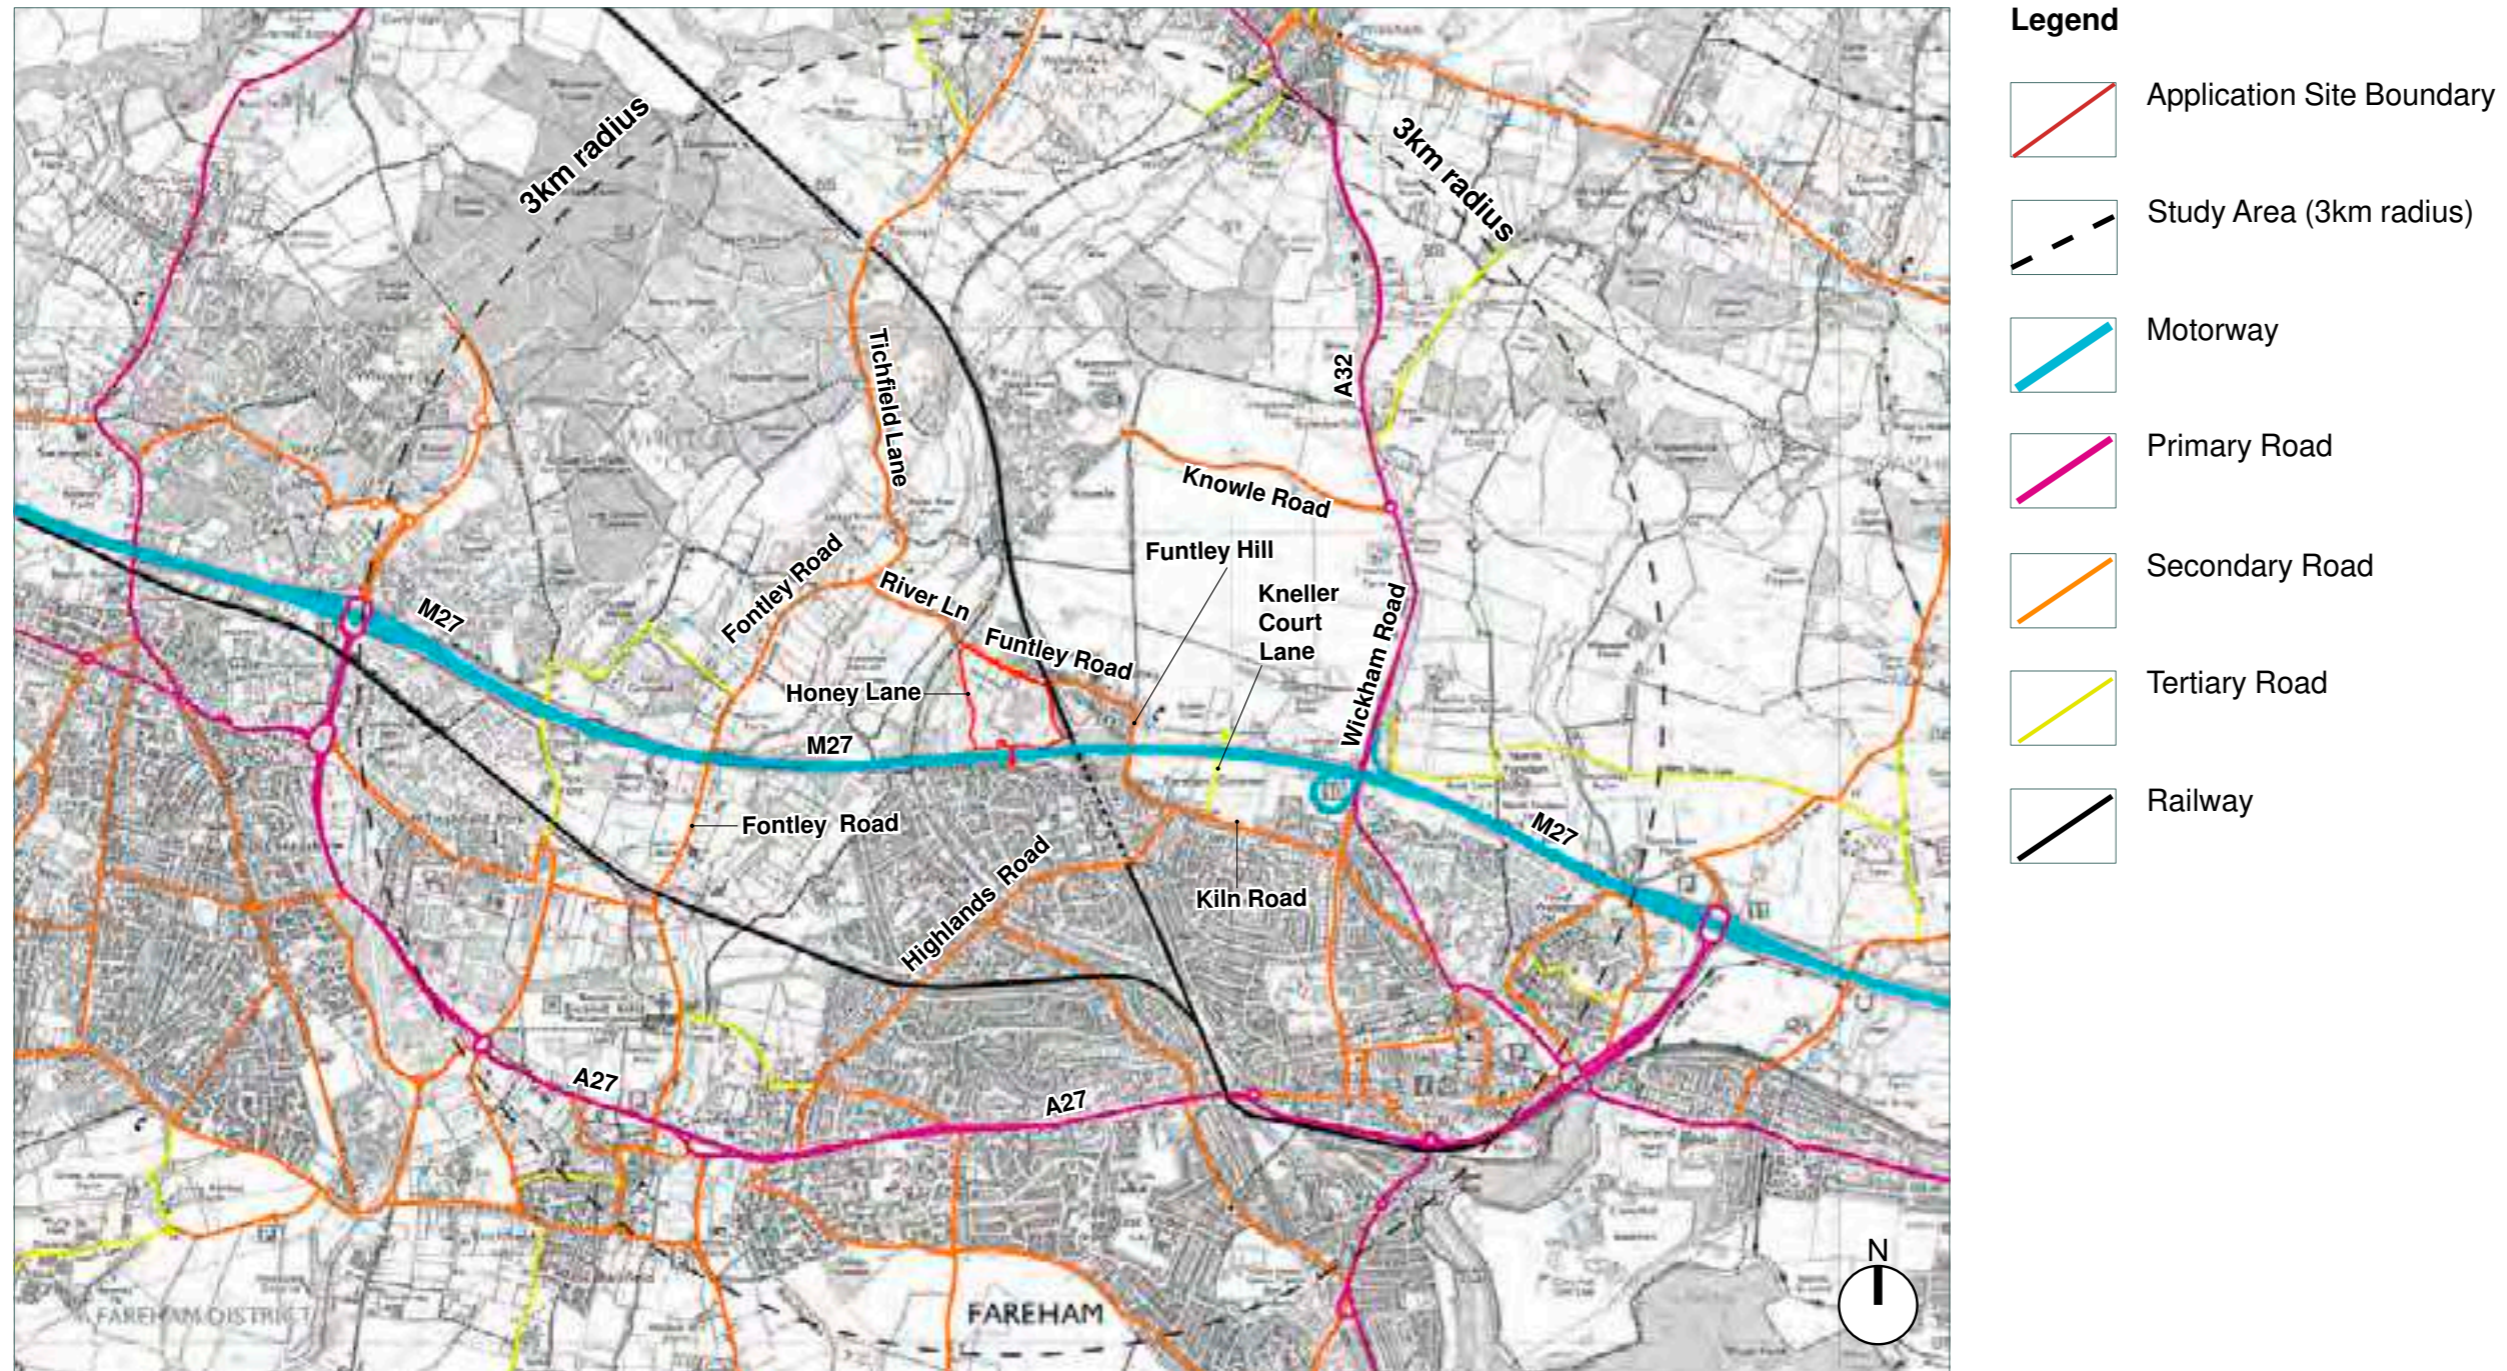

Figure 2.8 – Plan showing transportation links and road network within the study area (fabrik, 2018).

2. Baseline Conditions

2.9 Landscape Character Context

Introduction

The term 'landscape' commonly refers to the view or appearance of the land as perceived by people. Landscape applies to any natural, rural, urban, peri-urban areas, in land, water and seascape areas.

Landscape character is the combination of both natural / physical, cultural / social and perceptual / aesthetic influences, which give rise to a distinct, recognisable and consistent pattern of elements in the landscape that makes one landscape different from another, rather than better or worse and which define the 'sense of place'. The landscape is not therefore simply a visual phenomenon.

The following sections set out the landscape character framework of the study area from the national and regional level through to county and district scale based upon existing character assessments undertaken by Natural England, Hampshire County Council and Fareham Borough Council.

National Landscape Character Assessment

The general character of the English countryside has been described at a national level in the Natural England publications 'National Character Area Profiles'. The Application Site is located in National Character Area 128: South Hampshire Lowlands (2014). Refer to **Figure 2.9**.

The summary of the landscape character related to the study area is described below:

"The South Hampshire Lowlands National Character Area (NCA) is a low lying plain between the chalk hills of the Hampshire and South Downs and Southampton Water. Its highest point is an outlying chalk ridge – Portsdown Hill – but the bedrock geology is mostly open marine, estuarine and freshwater Tertiary deposits. The NCA

is dominated by the city and port of Southampton and its adjoining towns and suburbs – 29 per cent of the area is urban. In the more rural areas, it is a mixture of farmland, particularly pasture, and woodland.

Some 18 per cent of the land cover of the NCA is woodland, of which almost half is designated ancient woodland, a legacy of the Forest of Bere, a Royal Hunting Forest that once covered the area. Today the most significant blocks of woodland are West Walk near Wickham, Botley Wood at Swanwick and Ampfield Wood near Romsey.

The NCA is drained by several rivers: the lower reaches of the Test and Itchen, the source and headwaters of the Hamble and the middle section of the Meon....."

The key characteristics pertinent to the study area are described as:

- *"Low-lying, undulating plain abutting the chalk downs to the north... Soils over much of the area are heavy and clayey with localised pockets of more freely draining soils on higher land.*
- *Fast-flowing chalk rivers in wide, open valleys with watermeadows and riparian vegetation that provide valuable wildlife habitats...*
- *Well-wooded farmed landscape (particularly to the east of Southampton), characterised by ancient woodland such as Botley Wood and West Walk.....*
- *Mixed agricultural landscape dominated by pasture with small pockets of horticulture and arable.*
- *An intimate and enclosed field pattern with many small and irregular fields generally bounded by mixed-species hedgerows or woodland.*
- *In parts, a very urban NCA dominated by the city and port of Southampton and other large towns such as Waterlooville and*

Havant. The more rural hinterland is characterised by small, loosely clustered or dispersed settlements, intermixed with isolated farmsteads.

- *Fragmented by major transport links, including the M3 to London and the M27 to Portsmouth which cross the NCA.*

The Site is partly typical of the description for the NCA, forming part of farmland at the fringe of a major urban area. The context to the Site also includes major transport links, as well as dispersed settlements and a wider more rural agricultural landscape.

The value of this landscape receptor is assessed as ranging from **Low - High**.

2. Baseline Conditions

2.9 Landscape Character Context (continued)

County Landscape Character Assessment - 3E: Meon Valley

Within the Hampshire County Council Integrated Landscape Character Assessment (May 2012), the Application Site falls within LCA 3E: Meon Valley character area. Refer to **Figures 2.10 and 2.11**. The key characteristics pertinent to the study area as described as:

- “A fairly narrow major river valley with a relatively narrow valley floor, which passes through downland, lowland mosaic and coastal plain landscapes.
- Southern valley sides are indented by dry valleys and scarp faces in the downland section.
- Increasing proportion of grazing and improved grassland land on the valley sides from the downland to the lowland landscapes.
- Woodland is common on the steeper slopes and is a particular feature where the Meon passes through the lowland mosaic and coastal plain landscapes.
- Major communication links follow close above the valley floor, eg A32, B3334 and the disused Meon Valley railway (now a recreational route).
- Extensive informal enclosure field patterns and significant water meadow (fairly simple layout) survive in the downs section while assarts and formal parliamentary enclosures dominate the lowland mosaic section.
- Strong pattern of nucleated settlements within the valley at strategic river crossing points with relatively little 20th century expansion.

The physical character and land use related to the study area sets out that:

“... The Meon Valley can be divided into upper, middle and lower reaches associated with changing geology and landform of the downs, lowland clay and coastal plain respectively...”

The middle section (Soberton Heath to just north of Titchfield Abbey) is characterised by the presence of waterlogged soils associated with London clay. Sandier lighter soils do occur in association with the Wittering formation either side of the Meon around Wickham. The valley sides are generally a shallower gradient than in the downland setting and the valley width is narrower. Improved grassland and dairying predominate and there is a greater presence of semi and unimproved grassland on the valley bottom and woodland cover on the sides...”

The experience and perceptual character related to the study area is summarised as one where: *“The Meon Valley is full of contrasts and diversity. The downland section and lower reaches of the coastal section tend to be open landscapes whilst the opposite is true of the section in the lowland mosaic landscape. The course of the Meon valley is very distinct when viewed from the surrounding downland, appearing deceptively wooded in comparison to the surrounding chalk landscape. The river valley channel is rarely glimpsed amongst the heavily wooded landscapes in the lowland mosaic landscape.*

There are numerous opportunities for public access along and through the Meon Valley, including sections of several long distance routes such as the Wayfarer’s Walk, Monarch’s Way, South Downs Way and Solent Way. There is also a disused single rail track which linked Fareham, Wickham and Alton which today provides a popular, relatively flat multi user route.

The valley landscape has largely resisted expansion from adjoining urban areas and has remained relatively unchanged in recent times. As a result there is a strong sense of ruralness, seclusion, and

intimate landscape character and lack of development where the valley cuts through the south Hampshire clay lowlands. In the section where the A32 runs through the valley it is generally less tranquil than the surrounding downland landscape....”

The ‘Biodiversity Character’ is summarised as: *“... Beyond specific designations this landscape character area comprises improved grassland and arable land with patches of unimproved and semi-improved grassland (neutral or calcareous) and are often associated with the river, suggestive of water meadows. Woodlands form discrete patches within this landscape, ranging in size and type there are broadleaved woodlands, mixed plantations and parkland, some limited coniferous plantation and active coppice with standards. Ancient woodland is very limited in this landscape...”*

The Site is partly typical of the description for the county LCA, forming part of a valley that contains grazing land and woodland, with a nearby disused railway and public rights of way. The immediate Site context includes areas of relatively recent development and this and the Site is subject to some noise intrusion from the M27.

The value of this landscape receptor is assessed as ranging from **Low - High**.

2. Baseline Conditions

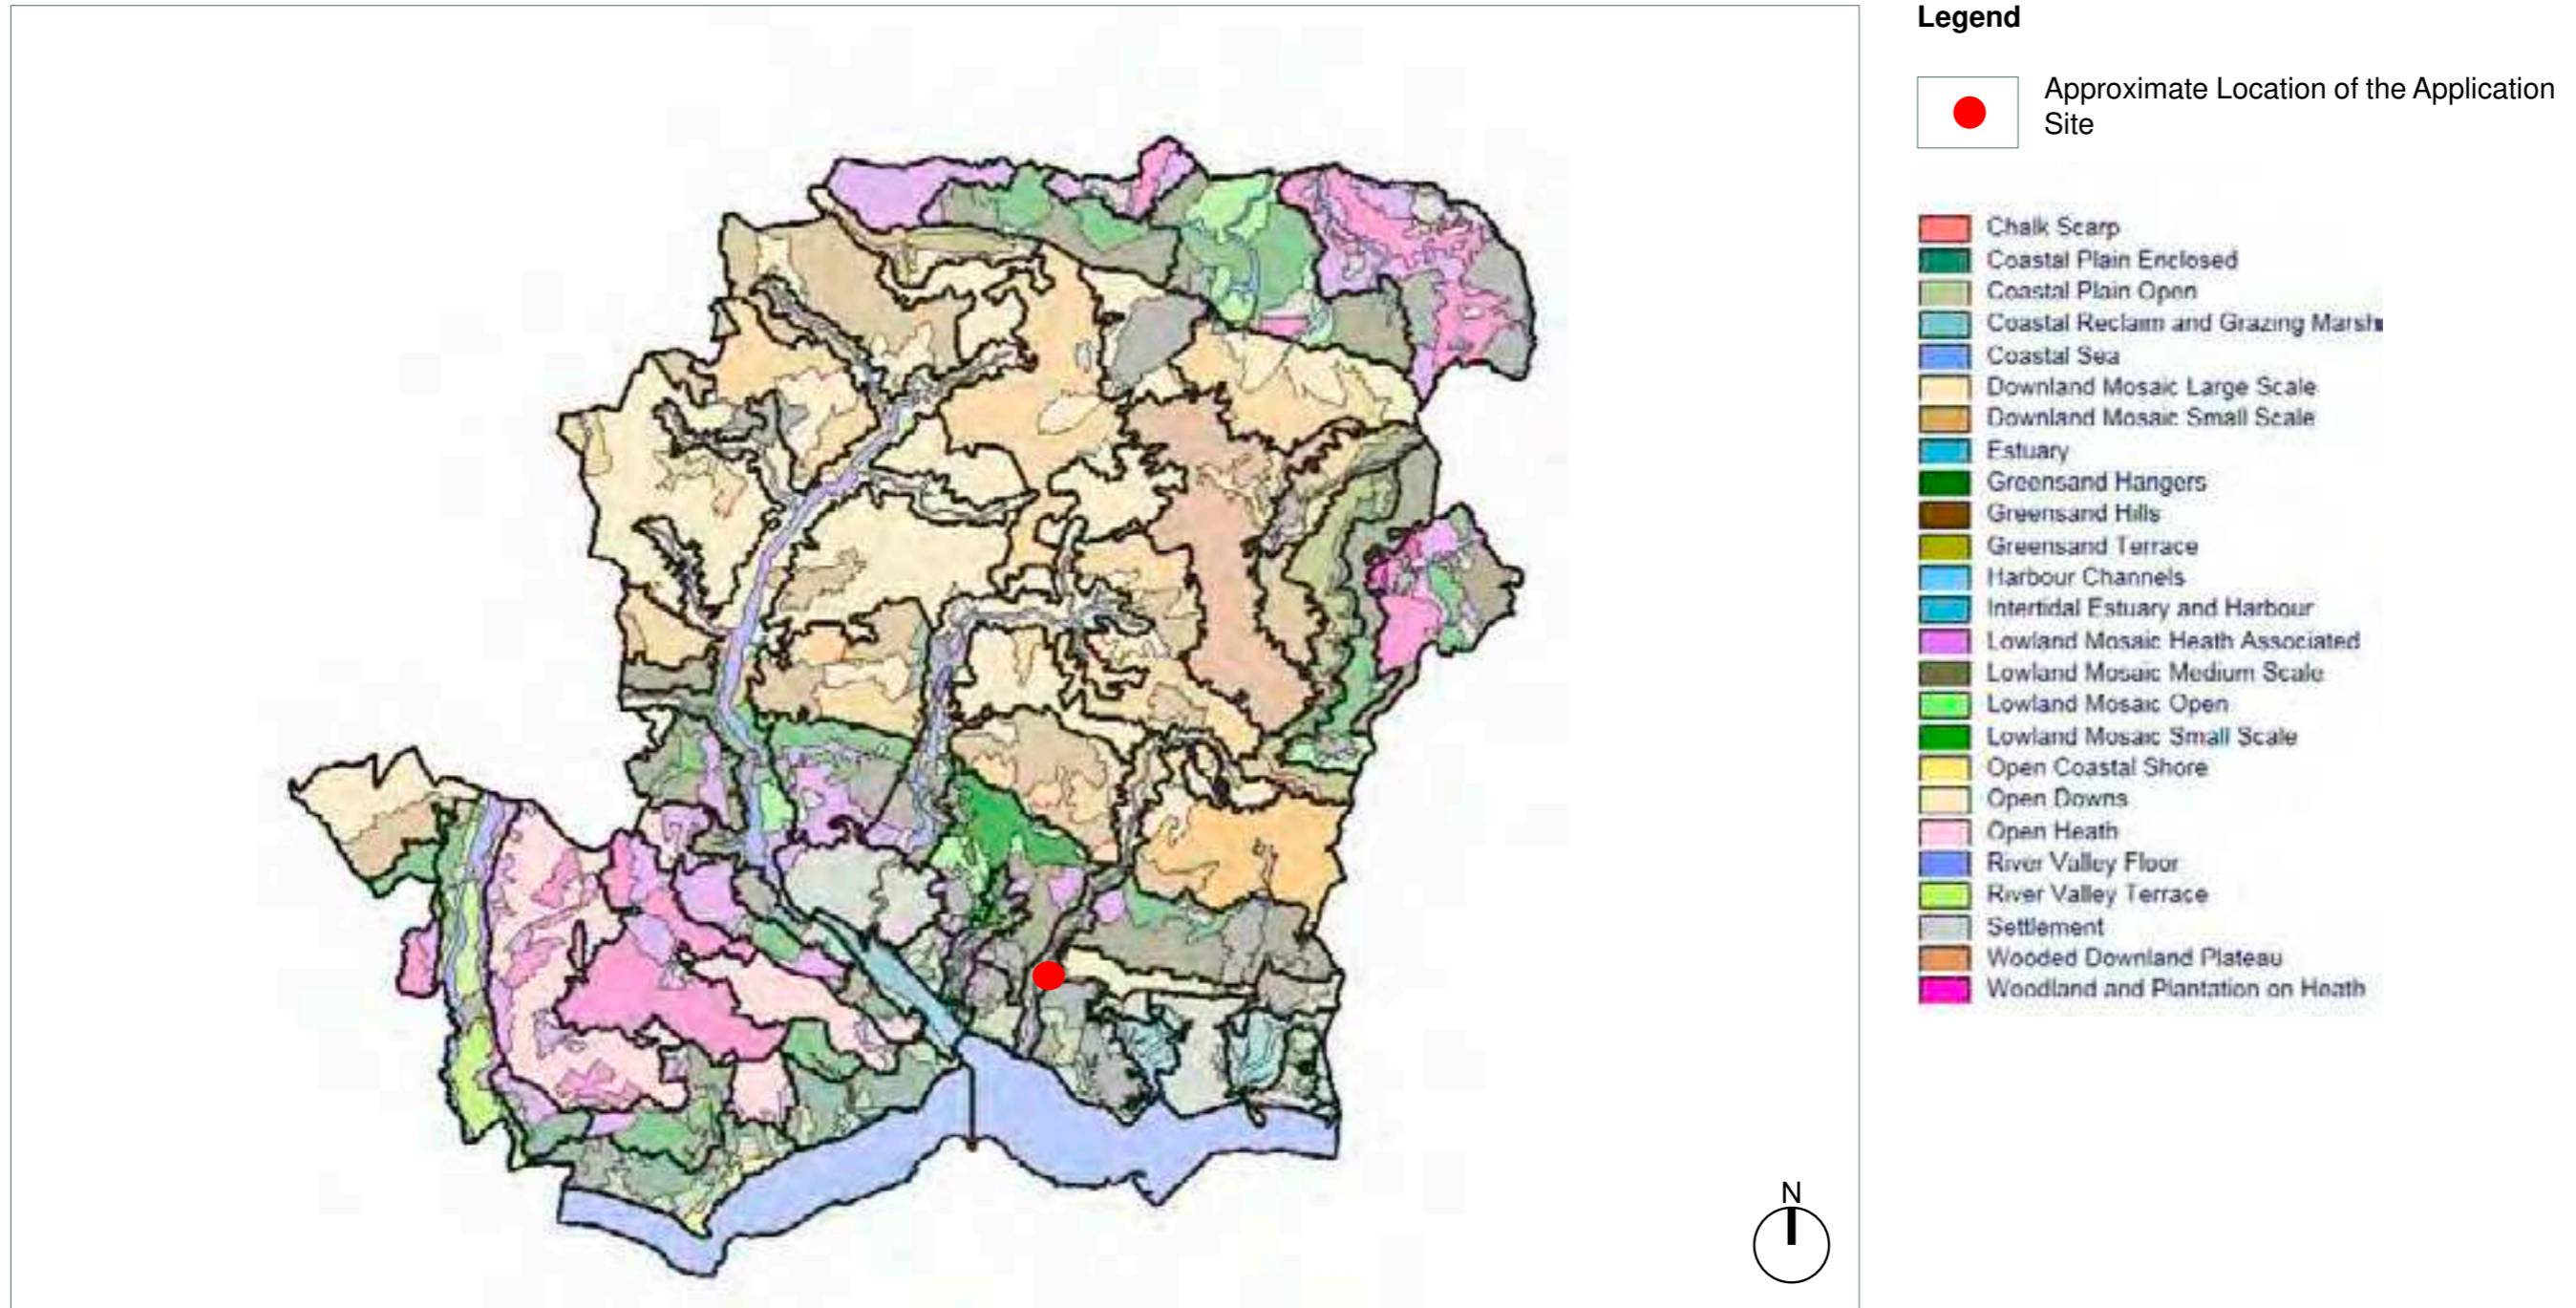

Figure 2.10 – Extract from Hampshire County Council Integrated Character Assessment Map (May 2012) showing the landscape types

2. Baseline Conditions

2.9 Landscape Character Context (continued)

Local Level

Current Fareham Borough Landscape Assessment (May 1997)

This borough wide landscape character Assessment was carried out by Scott Wilson Resource Consultants for Fareham Borough Council in 1996 and covers both rural and urban areas.

Landscape Characters

Within Fareham Borough the assessment subdivides the landscape into 35 character areas (refer to **Figure 2.12**).

The Application Site is located entirely within the Landscape Character Area 6: Meon Valley. The character area is summarised as an area where:

“The Meon Valley character area embraces the whole length of the valley within the Borough, from Funtley in the north to the coast at Titchfield Haven. Although the immediate floor and valley sides are quite narrow in places, the character area embraces a wider swathe of landscape on either side of the valley that broadly defines the extent of open countryside within the corridor between the urban edges of Stubbington, Hill Head and Fareham to the east and Titchfield Village and Titchfield Park to the west.”

The following key characteristics are pertinent to the Application Site and its environs:

- *“ a relatively gentle but distinctive valley landform, running through the Borough from Funtley in the north to the coast at Hill Head; Frequent woodland blocks;*
- *distinct valley floor characterised by small-scale pasture and variable cover of trees (typically willow and alder) in the narrower, upper reaches and broadening into open floodplain pasture and*

complex of wetland communities to the south at Titchfield Haven, where the natural qualities of the valley and maritime influences are most strongly evident; Small copses add to wooded character;

- *restricted vehicular access to the valley floor resulting in a generally quiet and intimate character in the northern and southern sections of the valley, making it attractive for quiet recreation and for wildlife;*
- *a mosaic of open farmland (part of the wider coastal plain farmland), minor wooded valleys and smaller, enclosed pastures bordering the valley to the south of Titchfield, the latter helping to buffer the intrusion of adjacent urban development and fringe farmland to the east on the setting of Titchfield Haven;*
- *a more fragmented character and stronger influences of urban development and roads within the central section of the valley, resulting in some damage to the integrity of the valley form and a more suburban character;*
- *garden centre and horticultural activity around Titchfield Abbey which detract from the setting of the historic Abbey and associated buildings (a Conservation Area);*
- *dense mosaic of wooded farmland mainly to the north of the railway which provides an intimate, rural context for the river valley, but with localised intrusion of the M27 motorway bridge.”*

In terms of enhancement opportunities, the assessment at para 4.27 states that: “... the Meon Valley is comparatively unspoilt and of a high quality but it is affected by roads, commercial horticultural activities and urban intrusions, particularly the central section. The emphasis should be to protect the important landscape and ecological resources of the river corridor, mitigate the effects of intrusive activities and undertake measures to reinforce the river valley character and strengthen its overall integrity.”

The priorities for enhancement, relative to the Application Site include:

- *“to protect the important landscape, ecological and historical resources... the pastoral character and features of the valley floor, the complex of wooded farmland...”*
- *to protect the overall integrity of the valley system from further fragmentation;*
- *to resist changes that would have an adverse impact on the rural character of the valley;*
- *to reduce the impact of roads, urban edges and horticultural development, possibly through new planting.”*

2. Baseline Conditions

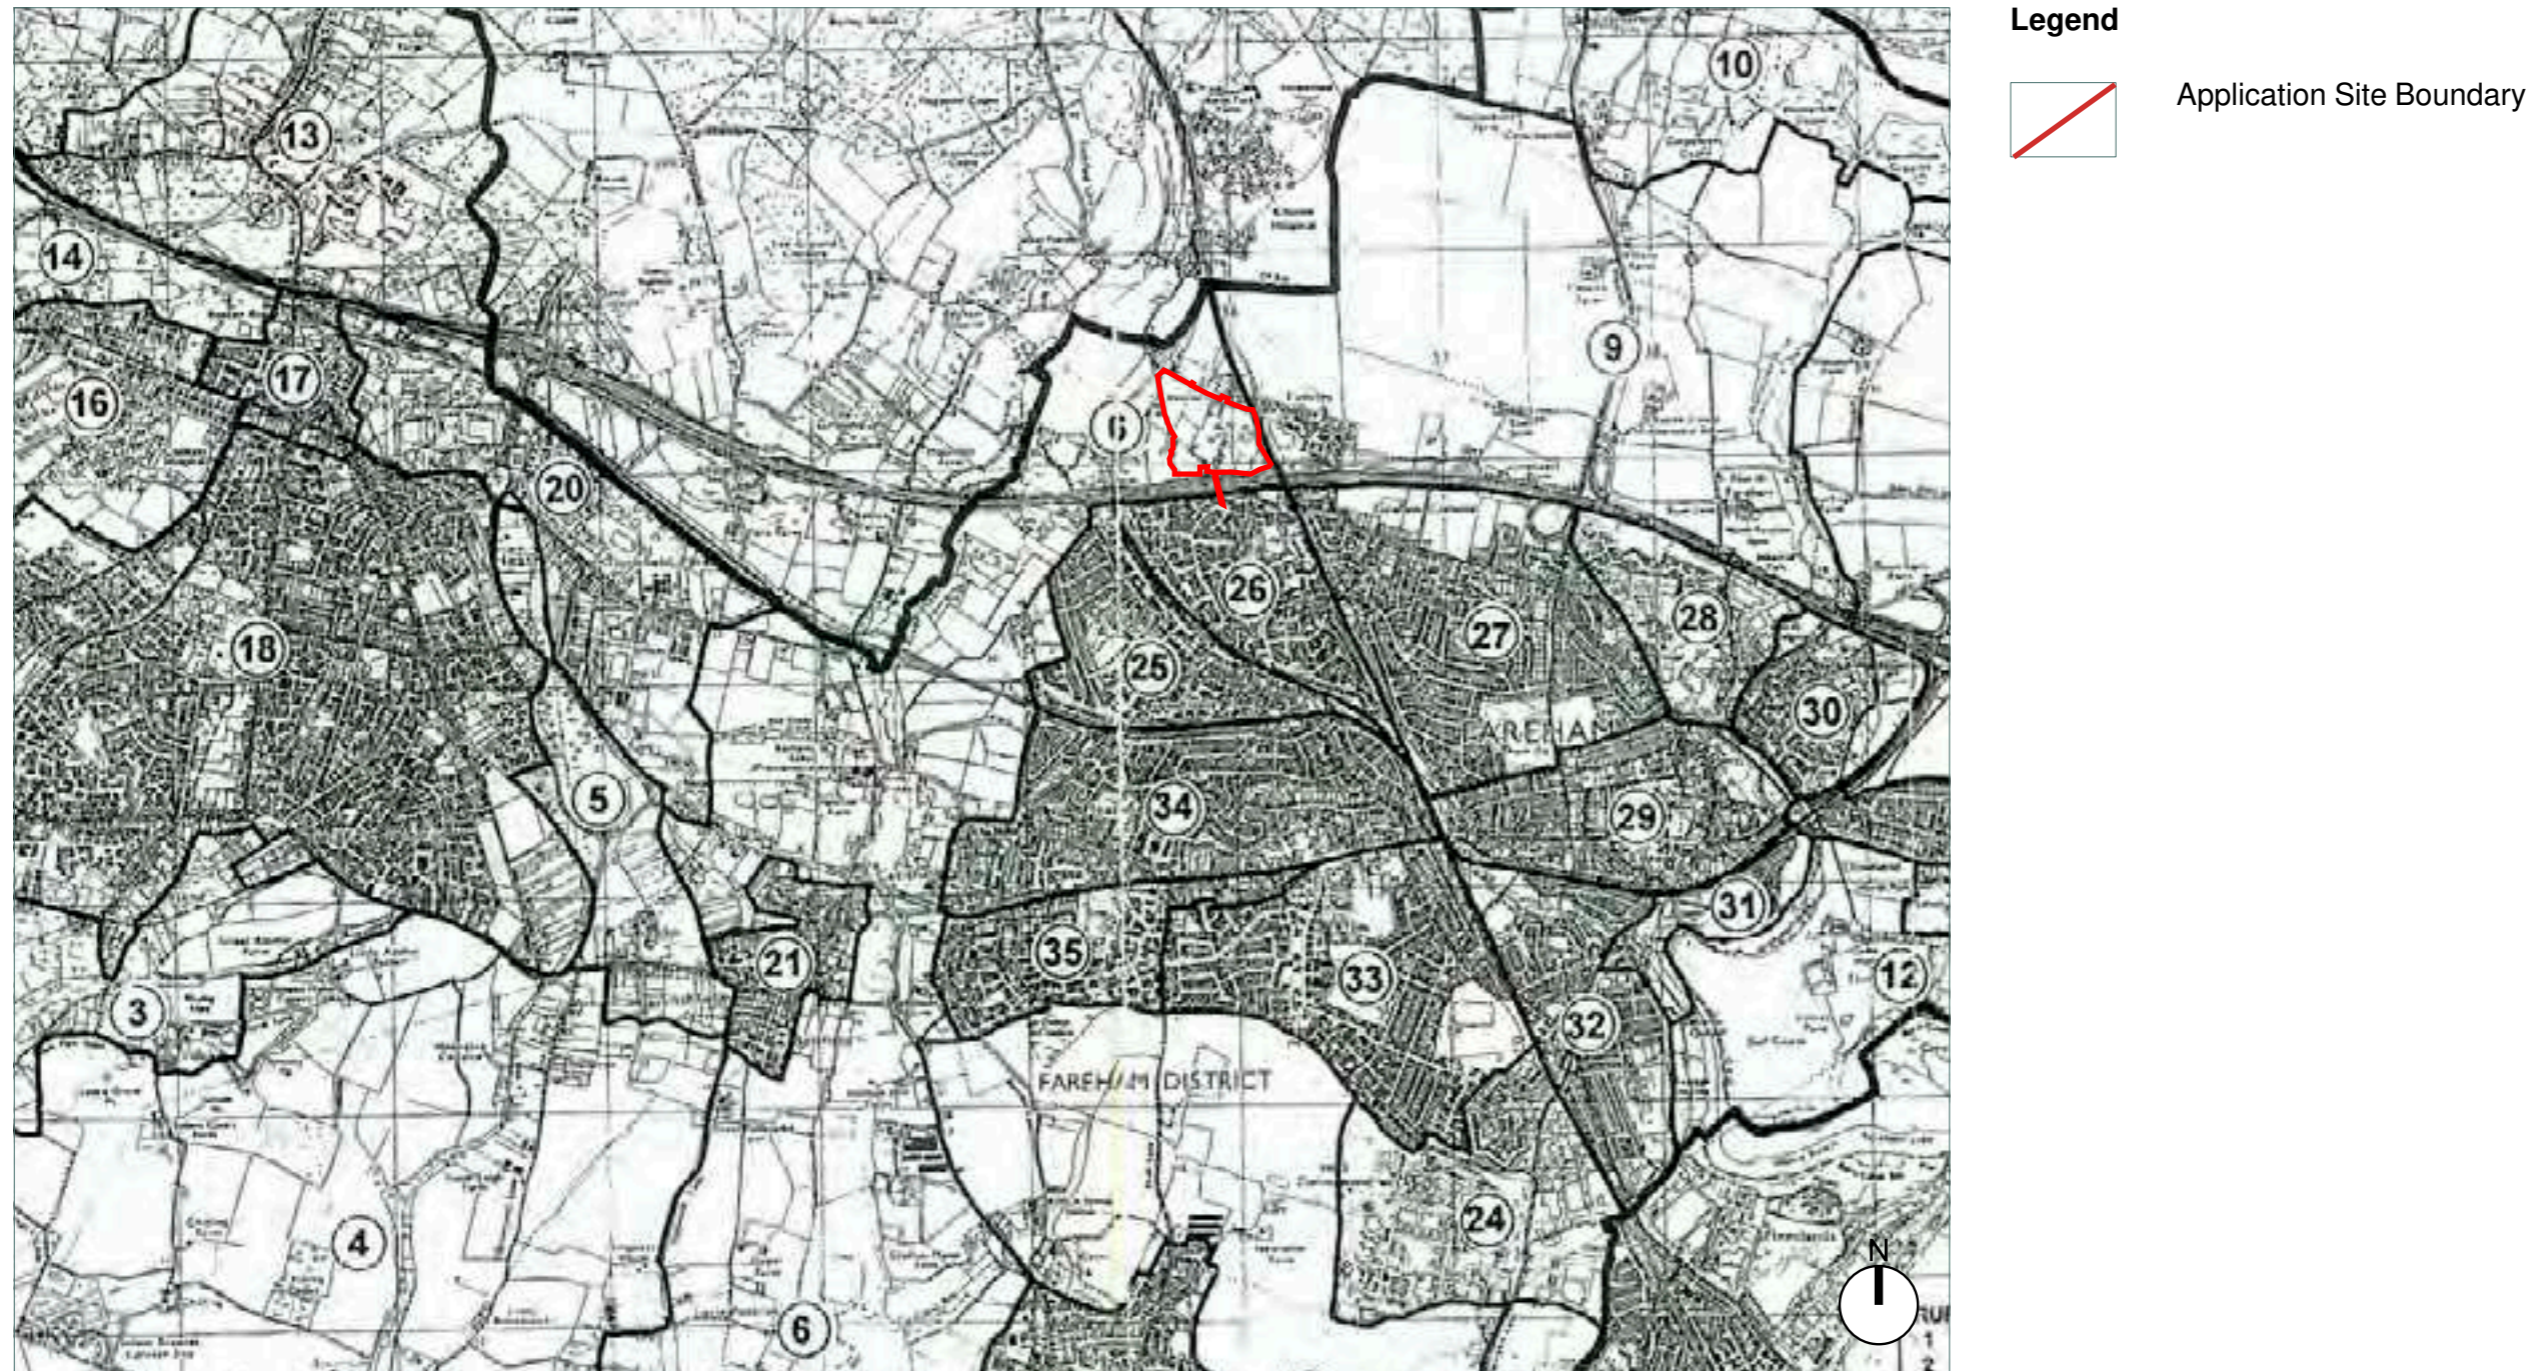

Figure 2.12 – Extract from Fareham Borough Landscape Character Assessment (May 1996) illustrating character areas.

2. Baseline Conditions

2.9 Landscape Character Context (continued)

Landscape Assessment (August 2017) Evidence Base to the Fareham Borough Council Local Plan 2036

As part of the evidence base to the emerging Local Plan, the Landscape Character Assessment has been updated. Part 1 includes the character assessment, with a landscape Sensitivity Assessment at Part 2.

In the updated assessment, the Application Site continues to be located in LCA 6: Meon Valley and within the Mixed Farmland and Woodland: Small Scale landscape type. The following extract is pertinent to the Application Site:

“The Meon Valley character area embraces the whole length of the valley within the Borough, from Funtley in the north to the coast at Titchfield Haven. Although the immediate floor and valley sides are quite narrow in places, the character area embraces a wider swathe of landscape on either side of the valley that broadly defines the extent of open countryside within the corridor between the urban edges of Stubbington, Hill Head and Fareham to the east and Titchfield Village and Titchfield Park to the west.

The Meon Valley is characterised by:

- A relatively gentle but distinctive valley landform, running through the Borough from Funtley in the north to the coast at Hill Head;
- Distinct valley floor characterised by small-scale pasture and variable cover of trees (typically willow and alder) in the narrower, upper reaches and broadening into open floodplain pasture and complex of wetland communities to the south at Titchfield Haven...;
- A mosaic of open farmland (part of the wider coastal plain farmland), minor wooded valleys and smaller, enclosed pastures...;

- A more fragmented character and stronger influences of urban development and roads within the central section of the valley, resulting in some damage to the integrity of the valley form and a more suburban character;
- Dense mosaic of wooded farmland mainly to the north of the railway which provides an intimate, rural context for the river valley, but with localised intrusion of the M27 motorway bridge.”

In Part 2 of the LCA, in the Sensitivity Assessment, the Application Site lies within Area 6.2 and sub section b, which is described as where: *“...built development also screens public views in from the edge of the Fareham urban boundary to the east.... The motorway cutting and railway corridors prevent views into the northern part of this area from the edge of Fareham and from the main village of Funtley. Wider views from the countryside areas to the north-west of this area are also screened by extensive vegetation cover and intervening landform, road and rail corridors etc...*

Within the area, there are no views from the motorway or rail corridors that cross the valley, and views from much of the road network within the area (including Southampton Road, Segensworth Road and Titchfield Road), are also substantially screened by roadside vegetation or buildings, with only very occasional glimpses. There are, however, some more open views through or over the roadside hedgerows into the river floodplain from Mill Lane, the lower part of Fishers Hill and from Bridge Street, which forms the southern boundary, and from Funtley Road and River Lane in the north.

The main views of the area are obtained from the extensive public rights of way network that runs through the valley landscape... Further routes run parallel to the railway embankment that divides areas 6.2a and 6.2b, and along the valley sides and disused railway line in the vicinity of Funtley to the north. These routes are generally well connected, and offer an appreciation of the various landscape, ecological and historic features within the valley and an opportunity to experience its unspoilt qualities and underlying sense of seclusion. Overall the quality and value of the available views and visual amenity is high, although affected in places by the influence of built

development or unsightly land uses....

The main people who could potentially be affected by changes in views would therefore be local residents, users of the PRow network within the valley... and users of the local road network within the area itself.”

In terms of Visual Sensitivity and Development Potential, the assessment identifies that: *“There are a few small pockets of land which are enclosed by strong hedgerows or vegetation an less visible, and/or lie within areas where views are already affected by built development or intrusive/ unsightly land uses (e.g. small pockets of undeveloped land within existing residential areas off the Funtley Road...) In all cases, any development would need to be small scale and sensitively integrated within the existing or new vegetation structure to avoid adverse visual impacts. Measures to improve the quality of views through the removal of intrusive or unsightly features... should be encouraged.”*

The assessment identifies the following relative to the Contribution to Green Infrastructure Network: *“This area makes a significant contribution to green infrastructure, particularly in respect of the riparian habitats and extensive areas of semi-natural woodland and tree cover within the river corridor (designated as SINC)s which are valuable ecological and landscape features. It also makes a significant contribution through the network of public rights of way that provide access for quiet recreation and appreciation of landscape, ecological and heritage assets... Crucially, this network provides both cross-valley links with the surrounding urban areas and links along the valley to the north and south. In addition to the PRow network, the area includes a few areas of publicly accessible open space, including a recreation ground to the north of the Southampton Road near Titchfield and playing fields, woodlands and the corridor of a disused railway line in the northern part of the area. The Meon Valley*

2.9 Landscape Character Context (continued)

Landscape Assessment (August 2017) Evidence Base to the

2. Baseline Conditions

Fareham Borough Council Local Plan 2036

is identified in the PUSH GI strategy as a 'sub-regional scale blue corridor' and project C6 of the strategy applies to the Upper Meon Valley and seeks "to conserve and enhance this area to ensure continued contribution to sense of place, climate change adaptation, providing open space close to urban areas for recreation and tourism".

The Fareham GI Strategy 2014 proposes a number of GI enhancement projects across the area, the majority of which form part of larger "borough wide" projects that will enhance the area's contribution to the wider GI network. These include:" (relevant to the local area and the Application Site)

"BW6 – General programme for the improvement/ repair of bridges within the rights of way network to ensure the continuation of high quality access to the countryside.

BW10 – Project to create a circular walking route encompassing the Meon Valley Trail, Shipwright's Way and South Down's Way, linking these existing routes together while enhancing their connectivity with the settlements of Fareham and Titchfield and the wider PRow network.

BW13 – Same as the PUSH Project C6 which applies to the whole of the Meon Valley LCA.

In terms of Sensitivity and Development Potential relative to GI the assessment states that: "Existing GI assets (e.g. the mosaic of riparian, grassland and woodland habitats as well as existing PRow and areas with public access) should be protected and, where possible, enhanced to maximise their ecological, landscape and amenity value, and development that would adversely affect them should be avoided. The emphasis in this area is more on making further improvements to the existing access and habitat links along the valley to the north and south, and the GI infrastructure within the urban areas to the east and west."

The conclusions of the study for the 6.2 area are set out under a sub-section, Development Criteria and Enhancement Opportunities. Those aspects pertinent to the Application Site state that: "This is an

area of high overall sensitivity, particularly in respect of the character and quality of the landscape resource, the abundance of valued landscape, ecological and heritage features across a large proportion of the area, its role in preventing the coalescence of settlements and maintaining their distinctive separate identities and landscape settings, and its significant contribution to green infrastructure, particularly in respect of ecological and landscape assets and the extensive network of public rights of way and access routes within the area.

This wide range of sensitivities mean that development potential is highly constrained across the entire valley landscape and any significant development is likely to have unacceptable impacts upon one or more of the area's important attributes. The only opportunity may be to accommodate development within small pockets of undeveloped land within existing residential areas, e.g. off the Funtley Road..., as long as it is of a similar character and scale to other dwellings within the locality and can be sensitively integrated within the landscape to avoid adverse impacts.

In order to protect and enhance the character and quality of landscape resources, views and visual amenity, urban character and green infrastructure, development proposals would need to:

- Protect and enhance features of recognised landscape, ecological, heritage or amenity value within the area as a whole, and the extensive network of public rights of way and other access routes within the valley...
- Protect and enhance the existing cover of woodland, trees, hedgerows and other mature vegetation along field boundaries, watercourses and roadsides, to maximise its screening, landscape and wildlife potential;
- Maintain the essentially secluded, rural and unspoilt countryside character of the valley landscape, and the local lanes and access routes within the area, avoiding intrusive or inappropriate urban styles of lighting, signage, paving etc. and other intrusive features;
- Be of a small-scale and located only in places where it can be carefully integrated within well-treed, strongly enclosed plots

of land in association with existing development, fits within the existing field pattern and is of a similar character and scale to similar built development within the locality;

- Maintain and enhance the function and quality of the existing GI network (in accordance with the PUSH and Fareham GI strategies) and take advantage of opportunities to strengthen and extend access and habitat links within the area, in particular with other parts of the Meon Valley and the urban areas on either side of the valley;
- Provide enhancement of the valley landscape... through removal or mitigation of intrusive or unsightly features, and restoration of field boundaries and other landscape features within 'denuded' or degraded landscapes (e.g. areas used for horse grazing or horticulture with a weak hedgerow structure and 'fringe' characteristics)."

The Site is largely typical of the description for the borough LCA, forming part of a valley with pasture, open farmland, urban development and areas of woodland. The M27 motorway results in some intrusion, and this, and the woodland and landform limit views. As described by the LCA, the Site forms a pocket of land that is enclosed by vegetation and is already somewhat affected by existing residential areas off Funtley Road. Vegetation within the Site is also important to the green infrastructure network of the character area. Significant development is inappropriate but small pockets of development such as off Funtley Road may be accommodated if of a similar scale or character to other dwellings.

The value of the landscape character area are assessed as being Low - **Medium**.

2. Baseline Conditions

2.10 Existing Landscape Conditions at Site Level

Figure 2.14 illustrates the existing landscape elements within the Application Site.

Landscape Designations

The Application Site lies wholly in an Area Outside of the Defined Urban Settlement. The north-western section of the Application Site is designated as Existing Open Space. However, the emerging local plan proposes deletion of this existing open space and the incorporation of the site within the Funtley settlement boundary.

Great Beamond Coppice in the eastern part of the Application Site is an Ancient Re-planted Woodland, which together with the tree blocks within central northern and south-western sections of the Application Site are also designated as a SINC and are covered by a TPO.

Heritage Assets

There are no heritage designations on or adjacent to the Application Site, nor does it sit within or adjoin a Conversation Area.

Within the context to the Site is the Grade II Listed buildings of the Church of St Francis (to the east on Funtley Road). A Scheduled Ancient Monument, the site of Funtley Iron Works together with a group of Grade II Listed buildings including Ironmaster's House and Funtley House are situated approximately 500m to the south west of Application Site, along the Ironmill Lane.

As such, at the site level, the value of this receptor is **Low**.

Topography

The Application Site lies on a north east facing slope with the localised steep ridgeline forming the southern boundary. The landform reaches approximately 52.98m AOD in the south west corner and falls towards a low point of approximately 18.77m AOD to the north-western corner of the Site.

The landform around the existing stables and built form within the north-eastern and southern part of the Application Site have been modified and where there is a level change of approximately 2m.

The value of this landscape receptor is assessed as **Medium** overall.

Land Use and Vegetation

The Application Site lies on the south-western fringe of the village of Funtley and is bound by Funtley Road to the north, Honey Lane to the west (and the elevated disused railway beyond) and the M27 to the south. There is currently no public access into the Site from the M27 and the footbridge. The Application Site is currently accessed from Funtley Road (opposite Stag Way).

The land use within the Application Site is predominantly pasture land (at the time of the assessment used as horse paddocks) bound by in the main by fencing comprising of timber post and rail, with additional wire in places. Woodland or hedgerows form some external and all external boundaries. There are also fences at the outer boundaries, within the vegetation. Access to the paddock is provided via a series of informal, mainly grassed private routes with the Site. Some hard surfacing occurs along the main access drive and parts of two tracks running west of this.

Small areas within the Application Site have been historically used as brick pit and brick yard. These have been restored back to agricultural use with imported clean soil and proposed planting following by the approval of the reinstatement scheme in April 2003 (Application Reference: P/03/0253/MW).

Great Beamond Coppice, alongside the other informal tree groups and treebelts form significant landscape features of the Application Site.

The value of this landscape receptor is assessed as **Medium** overall.

Landscape Character

The landscape character of the Application Site is described as consisting predominantly of a series of pasture fields with agricultural built form and associated hardstanding. The mature boundary vegetation and Great Beamond Coppice frames the fields and together with the landform, provides significant visual enclosure to the Application Site from the wider landscape.

The immediate setting to the Application Site comprises the predominantly two storey dwellings of Funtley to the north; the M27 motorway and the urban fringe of Fareham to the south; a combination of fields and dwellings to the west which is contained from the wider landscape by the mature tree belt associated with the elevated disused railway line; and to the east by the railway line in cutting and associated vegetation.

The northern section of the Application Site is therefore already influenced by the existing residential edges and is of a typical semi-enclosed character, consistent with the western edge of Funtley.

As set out under the published landscape character assessment section above, the Site is largely typical of the defined borough character area within which it lies.

The value of this landscape receptor is assessed as **Medium**.

Public Rights of Way

There are no public rights of ways located within or along the Site. However, the bridleway 515 (former railway line) is located in close proximity (approximately 38m) to the north-western part of the Site.

The value of this landscape receptor is therefore assessed as **Low**.

2. Baseline Conditions

Figure 2.14 – Plan showing the existing landscape conditions within the Site (fabrik, 2018)

2. Baseline Conditions

Table 2.2 Summary of Landscape Receptors and Value within Site

Landscape Receptors	Value
Landscape Character	Medium
Heritage Assets	Low
Topography	Medium
Land Use and Vegetation	Medium
Landscape Character	Medium
Public Rights of Way	Low

2. Baseline Conditions

2.11 Internal Visual Survey

A visual inspection of the Application Site was conducted on 7th June 2017. A winter visual appraisal was carried out on 5th January 2018.

Figure 2.15 on the following page illustrates the location of the internal photographic viewpoints to the Site. Photos 1- 15 which follow, illustrate the existing Application Site conditions. Photos 14A and 15A are taken from slightly different positions to the summer photos. Photo 13A is taken from inside the Site, adjacent to the boundary, representing a winter view that is similar to summer external viewpoint 4.

While the summer and winter views show slight differences in the position of the viewpoint and focal lengths of camera lens used, there are otherwise, no material differences in the view.

2. Baseline Conditions

Figure 2.15 – Plan illustrating locations of internal photographs within the Site (fabrik, 2018)

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site

Summer Views

Photograph – Viewpoint S1

View looking south from Funtley Road towards the northern portion of the Application Site. The existing tarmacadam access road is visible centrally within this view. The access road is lined by mature trees and established vegetation, which largely obscures views into the internal ground plane of the Site.

Photograph – Viewpoint S3

View looking north towards the northern Site boundary from the north-eastern part of the Application Site. The existing pasture grassland dominates this view with topography sloping towards the northern boundary. The mature tree belt lines along the north-eastern boundary obscure views out of the Application Site from this location.

Photograph – Viewpoint S2

View looking south west across the eastern portion of the Application Site from north-eastern corner. The existing pasture land dominates the foreground with topography rising towards the south. The existing built form is apparent in the middle distance with the Ancient Re-planted Woodland of Great Beamond Coppice evident in the distance. Views out to the east, west and south are obscured by the intervening mature boundary vegetation and landform.

Photograph – Viewpoint S4

View looking west towards the western boundary of the Application Site. The existing hardstanding forms the foreground of this view, interspersed with existing stable units in the middle distance. The existing mature trees and vegetation are apparent behind the existing stable blocks and obscure views out to the west from this location.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site

Winter Views

Photograph – Viewpoint S1 Winter View
There is little change to the visibility across the Site in winter.

Photograph – Viewpoint S2 Winter View
There is little change to the visibility across the Site in winter.

Photograph – Viewpoint S3 Winter View
There is slightly increased visibility towards vehicles on Funtley Road and of dwellings to the north of the Site, in winter.

Photograph – Viewpoint S4 Winter View
There is little change to the visibility across the Site in winter.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Summer Views

Photograph – Viewpoint S5
View looking south west across paddocks within northern central section of the Application Site. The existing pasture grassland dominates the foreground, set on rising ground. Due to a section of lower hedging along the south-western Application Site boundary, the existing built form along southern section of Honey Lane is apparent in the distance.

Photograph – Viewpoint S6
View looking south west across paddocks within northern central section of the Application Site. The existing pasture grassland dominates the foreground with topography rising to meet the southern and south-western Site boundaries in the distance. Due to a section of lower hedging along the south-western Application Site boundary, the existing built form along southern section of Honey Lane is apparent in the distance.

Photograph – Viewpoint S7
View looking south west across paddocks within the south-eastern section of the Application Site. The existing pasture grassland dominates the foreground with topography rising towards the ridgeline in the middle distance. The existing vegetation is apparent in the distance, however, glimpsed views of the roofline of the existing residential built form along Lechlade Gardens (south of the M27) are apparent from this location.

Photograph – Viewpoint S8
View looking west across paddocks within the south-eastern part of the Application Site. The existing grass path and pasture grassland dominates this view with topography gently rising to meet the existing barns in the distance. The existing mature vegetation along the southern part of the Application Site and Great Beamond Coppice is evident in the distance and along with topography, obscures views out to the west and south from this location.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Winter Views

Photograph – Viewpoint S5 - Winter View
 Visibility across the Site remains largely the same in winter.

Photograph – Viewpoint S6 - Winter View
 Visibility across the Site remains largely the same in winter, albeit there is slightly increased visibility of the property along Honey Lane. The landform prevents significant views beyond the Site boundary despite reduced leaf cover.

Photograph – Viewpoint S7 - Winter View
 Visibility across the Site remains largely the same in winter. There is however, slightly increased visibility of existing dwellings south of the M27, without leaf cover to vegetation.

Photograph – Viewpoint S8 - Winter View
 Visibility across the Site remains largely the same in winter. The landform prevents significant views beyond the Site boundary despite reduced leaf cover.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Summer Views

Photograph – Viewpoint S9

View looking east across paddocks within the south-western section of the Application Site. The existing pasture grassland dominates the foreground with the landform falling towards the mature tree line in the middle distance. The existing mature vegetation along the south east section of the Application Site is apparent in the distance and obscures the majority of views out to the east and south. However, glimpsed views of rooflines of the existing residential built form within Funtley beyond the site, are apparent in the distance.

Photograph – Viewpoint S10

View looking north east within the central part of the Application Site. The existing understorey vegetation dominates the foreground with mature trees along the internal field boundaries. The existing topography slopes towards the north with views of Great Beamond Coppice apparent in the middle distance. Due to the existing landform, the roofline of existing residential built form along Funtley Road and Roebuck Avenue are apparent in the distance. Glimpsed views of an existing 3 storey built form within neighbouring village of Knowle are also evident in the far distance, through gaps within the existing boundary vegetation and landform.

Photograph – Viewpoint S11

View looking north across paddocks within the south-western section of the Application Site. The existing pasture grassland dominates this view with topography rising to meet the field boundary. Existing vegetation along the western boundary and trees to the east are apparent and with landform, limits views out to the west and east. However, glimpsed views of a wider elevated landscape are evident in the distance to the north.

Photograph – Viewpoint S12

View looking north across paddocks within the south-western section of the Application Site. The existing pasture grassland dominates this view with the existing topography falling steeply towards the north. An existing tree line to the east is evident in the distance and obscures views out to the east from this location. However, views of wider landscape to the north are evident with existing built form along Funtley Road visible due to existing landform.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Winter Views

Photograph – Viewpoint S9 - Winter View
There is slightly increased visibility beyond the Site, including of dwellings within Funtley, in winter.

Photograph – Viewpoint S10 - Winter View
The photo is taken standing slightly closer to the fenceline than in summer. The lack of leaf cover allows increased visibility across the Site and to existing dwellings within Funtley and within Knowle village.

Photograph – Viewpoint S11 - Winter View
The viewing position is from a slightly higher point, allowing views across the Application Site as it slopes down to the north, and of existing properties just north of the Site, the disused railway line to the west, and wider elevated landscape beyond the built form at Funtley. Parts of built form at Knowle village and pylons form part of the scene to the north.

Photograph – Viewpoint S12 - Winter View
There is slightly increased visibility within the Site in winter, with glimpses of the barns in the south-eastern part area. The glimpses of Funtley and Knowle village (to left, beyond edge of photo) remain in winter.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Summer Views

Photograph – Viewpoint S13

View looking north east across paddocks within the western part of the Application Site. The existing pasture grassland dominates this view with topography falling steeply towards the northern boundary. Partial views of hardstanding within the northern part of the Application Site are evident in the distance to the north east. Due to the existing topography, views of wider landscape beyond the Application Site are evident with existing built form along Funtley Road and Roebuck Avenue apparent from this location.

Photograph – Viewpoint S14

View looking east across paddocks within the north-western part of the Application Site. The existing pasture dominates this view with existing undulating topography rising towards to east and south west. The existing vegetation along northern boundary of the Application Site is visible with views of Great Beamond Coppice evident in the distance. Views out to east and south are obscured by the dense vegetation within Application Site. However, views of roof and upper storey of existing two storey built form along western part of Funtley Road are apparent through gaps within vegetation and landform.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Winter Views

Photograph – Viewpoint S13 Winter View
In winter, the reduced leaf cover reveals more of the existing built form to the north of the Site.

Photograph – Viewpoint S14A Winter View
The viewpoint is taken from the access path south of the paddock from which summer view 14 was taken. In winter, there is slightly increased visibility of existing built form at Funtley to the north of the Site.

Photograph – Viewpoint S13A additional Winter View
View looking north to north-east from the south-western edge of the Site, by the boundary hedge which separates the Site from the existing property at the southern end of Honey Lane. This photo also provides a winter equivalent of external viewpoint 4. Existing built form at Funtley and further north of the village is visible beyond the Site. Existing outbuildings and part of Great Beamond Coppice are visible to the right in the photo.

2. Baseline Conditions

2.11 Photographic Study - views within the Application Site (Continued)

Summer and Winter Views

Photograph – Viewpoint S15

View looking south east across paddocks from the north-western part of the Application Site. The existing pasture dominates this view with existing undulating topography rising towards the south. The existing vegetation along the western Application Site boundary is visible with views of Great Beamond Coppice evident in the distance. The dense vegetation within the Application Site obscures views out to the west and south.

Photograph – Viewpoint S15A Winter View

The viewpoint is taken from the access path north of the paddock from which summer view 15 was taken. The landform and dense vegetation within the Site and at its boundaries mean that visibility beyond the Site remains similar in winter. There is a very limited glimpse of the roof of the building at the south end of Honey Lane (adjacent to the Site) and of the roof of a vehicle parked within its curtilage.

3. Visual Baseline Conditions and Sensitivities

3.1 Introduction

The extent to which the internal ground plane and vegetation associated with the Application Site are visible from the surrounding landscape is based on grading degrees of visibility. It is determined from a visual inspection of the land within the Site and its context from roads, public rights of way and properties.

Seasonal change in existing evergreen and deciduous plant material will affect the available views. Typically views will be different through the seasons with a greater sense of enclosure in the summer months when deciduous trees are in leaf.

The plans that follow show the actual visual summary of the Application Site from the immediate environs. The photographs 1-19 then describe each of these views.

No winter views were taken for photo viewpoints 15-19 due to the significant level of visual screening by vegetation and in places, by landform.

3.2 Visual Appraisal

The plans on the following pages (Figures 3.1 and 3.2) illustrate the visual summary of the land within the Application Site from the surrounding landscape.

Views of the internal ground plane and vegetation of the Application Site are limited to the immediate local landscape due to the undulating topography and intervening layers of vegetation and built form.

Residential Receptors

Views from residential receptors are limited to those located in close proximity to the Site along the Funtley Road, Roebuck Avenue, Stag Way and Honey Lane. Refer to photographs 4 - 8.

There is slightly increased visibility of the Site in winter, in particular for properties along the south sides of Funtley Road which have windows facing in the direction of the Site.

The value of the residential receptors is judged to be **medium**.

Historic Receptors

There are no views from the Listed Buildings and Scheduled Ancient Monument located in the study area - along the Ironmill Lane and Skylark Meadows within Skylark Golf and Country Club. Refer to photographs 11 and 19. There is no significant change in the visibility in winter, and these receptors are not considered as part of the visual impact appraisal.

Transport Corridors

There are open and partial views of the internal ground plane and landscape features of the Application Site from Funtley Road, Roebuck Avenue and southern section of Honey Lane. Views are only from those parts of these roads in close proximity to the Site. Views from the wider road network are truncated. Refer to photographs 4 - 8.

There are slightly increased views into the Site in winter from Funtley Road and Roebuck Avenue, without leaf cover. Views from Honey Lane remain largely obscured except for two sections to the north and south where there is a gap in the vegetation (north) and a low hedge (south) at the boundary with the Site.

The value of the transport corridors is judged to be **low**.

Public Rights of Way

The majority of receptors from the public rights of ways within the local, middle distance and wider landscape are truncated due to intervening topography, vegetation and built form. Refer to photographs 1, 2, 11 - 19.

In winter, from viewpoint 2 (path around the lake by Lakeside) within Funtley, there are increased glimpses through the vegetation along the railway embankments. As the ground plane of the Site is not discernible, it is not possible to distinguish any vegetation within the Site from the general dense vegetation visible around the railway line from this location.

Reduced leaf cover to vegetation along the disused railway line to the west of the Site (Bridleway 515) allows glimpses through to the ground plane of the Site, but only from positions in close proximity to the crossing over Funtley Road (photographs 12A and 14A). In these views, existing built form at Funtley is also visible.

The highest part of the Site to the south, around the existing telecommunications mast is visible as a part of panoramic views looking back to Funtley village from two Public Rights of Way to the east - see photographs 9 and 10 (from Footpaths 88 and 89 respectively).

From viewpoint 9 in winter, the ground plane of a small part of the south-eastern part of the Site, the telecomms mast and nearby existing barns are visible, together with Great Beamond Coppice and other boundary vegetation within the south eastern area of the Site.

From viewpoint 10 in winter, the upper part of the mast, barns and small part of the Copse are visible above existing dwellings and vegetation at the edge of Funtley. The ground plane of the Site is obscured, even in winter.

No extensive views across the ground plane of the Site are available from these locations.

The existing southern boundary vegetation is visible from the M27 footbridge to the immediate south (photograph 3) however, this vegetation in turn obscures internal views of the land within the Application Site.

The value of the users of the public rights of way is judged to be **medium**.

3. Visual Baseline Conditions and Sensitivities

3.3 Visual Appraisal from the Local Area

Summer Views

Photograph – Viewpoint 1

View looking south west towards the Application Site from the eastern section of Funtley Lane (Footpath 85). The existing residential built form along Funtley Lane dominates this view with mature hedgerow forming a vegetated edge along this part of the lane. Glimpsed views of the top section of Great Beamond Coppice along the north-eastern edge of the Application Site is apparent. Views of the internal ground plane within the Application Site are truncated.

Photograph – Viewpoint 2

View looking west towards the Application Site from an informal footpath at the edge of the lake to the south west of Lakeside (south of Funtley Road). Mature trees and vegetation dominate this view and forms a green corridor along the path. The intervening vegetation, which includes that alongside the live railway (right, truncates any views of the internal ground plane within the Application Site from this location).

Photograph – Viewpoint 3

View looking north towards the Application Site from the footbridge to the south of the Application Site over the M27. The footbridge and the mature tree belt planted along the motorway edge dominates this view. Partial views of the existing mature trees and vegetation along the southern Application Site are evident behind the existing vegetation that lines the motorway. Views into other areas across the Application Site are truncated by the intervening vegetation and topography from this location.

3.4 Visual Appraisal from the Wider Study Area

Summer Views

Photograph – Viewpoint 15

View looking south west towards the Application Site from Footpath 11 adjacent to Wickham Road (southern boundary of South Downs National Park). Views of existing mature vegetation along either side of the footpath dominates this view and obscures any views towards the Application Site from this location.

Photograph – Viewpoint 16

View looking south west towards the Application Site from the junction of Footpath 10 (Castle Farm Lane) and Forest Lane. Mature trees and vegetation along the lane dominate this view and create a green corridor along the lane. Views of the Application Site are wholly truncated by the intervening vegetation and topography.

Photograph – Viewpoint 17

View looking south west towards the Application Site from the cycle and footpath along the eastern section of Knowle Road. The cycle / footpath is apparent centrally within this view with mature hedgerows and vegetation evident on either side of the path. Due to intervening vegetation, views of the Application Site are wholly truncated from this location.

Photograph – Viewpoint 18

View looking south west towards the Application Site from Footpath 23b located along the southern part of Aylesbury Copse. Views of arable fields dominate this view with topography gently sloping towards the west. The existing tree belt to the south of Knowle Road is apparent in the distance from this location. Any views of the Application Site are truncated due to intervening topography and vegetation.

3. Visual Baseline Conditions and Sensitivities

3.4 Visual Appraisal from the Wider Study Area

Summer Views

Photograph – Viewpoint 19

View looking south east towards the Application Site from Bridleway 26b located in close proximity to a barn 20 metres south of Lee Ground (Grade II Listed Building) and Skylark Golf and Country Club. Mature trees and vegetation define the localised field boundaries and create a green corridor along the bridleway. Views of the Application Site are wholly truncated by the intervening vegetation and land form.

3. Visual Baseline Conditions and Sensitivities

Table 3.1 – Summary of Visual Receptors

Representative Visual Receptor Viewpoint No.	Landscape Designation	Receptors	Extent of the land visible within the Application Site	Character and Amenity of the View	Elevation	Distance to Site	Value
1	Public footpath 85	Residential; Transient receptors on foot and bike and vehicle.	The internal ground plane within the Application Site is truncated from this location. However, the glimpsed view of top section of Great Beamond Coppice along the north-eastern is evident from this location.	View looking south west towards the Application Site from the eastern section of Funtley Lane (Footpath 85). The existing residential built form along Funtley Lane dominates this view with mature hedgerow forming a vegetated edge along this part of the lane. Glimpsed views of the top section of Great Beamond Coppice along the north-eastern edge of the Application Site is apparent. Views of the internal ground plane within the Application Site are truncated. There is no significant change in the visibility of the Site in winter.	Approximately 20m AOD	Approximately 174m	Medium - Low
2	Existing Open Space	Transient receptors on foot	The internal ground plane and the existing vegetation within the Application Site are truncated from this location.	View looking west towards the Application Site from an informal footpath at the edge of the lake to the south west of Lakeside (south of Funtley Road). Mature trees and vegetation dominate this view and forms a green corridor along the path. The intervening vegetation, which includes that alongside the live railway (right, truncates any views of the internal ground plane within the Application Site from this location). There is no significant change in the visibility of the Site in winter.	Approximately 20m AOD	Approximately 122m	Medium
3	Area Outside of Defined Urban Settlement Boundary	Transient receptors on foot	The internal ground plane within the Application Site is truncated from this location. However, partial views of the existing tree and vegetation across the southern section of the Application Site are evident from this location.	View looking north towards the Application Site from the footbridge to the south of the Application Site over the M27. The footbridge and the mature tree belt planted along the motorway edge dominates this view. Partial views of the existing mature trees and vegetation along the southern Application Site are evident behind the existing vegetation that lines the motorway. Views into other areas across the Application Site are truncated by the intervening vegetation and topography from this location. There is no significant change in the visibility of the Site in winter.	Approximately 50m AOD	Approximately 285m	Medium - Low

Table 3.1 – Summary of Visual Receptors

Representative Visual Receptor Viewpoint No.	Landscape Designation	Receptors	Extent of the land visible within the Application Site	Character and Amenity of the View	Elevation	Distance to Site	Value
4	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot and vehicle.	<p>Open views of existing vegetation and built form within the Application Site occur from this location.</p> <p>Open views of existing boundary vegetation, built form and ground plane of the Application Site are visible from this location</p>	<p>View looking east towards the Application Site from the existing hardstanding area associated with the private dwelling 'Bramleigh' located on Honey Lane. The existing boundary vegetation and pasture grassland within the Application Site dominates the view. Open view of the internal plane, boundary vegetation and the Great Beamond Coppice are apparent from this location.</p> <p>For the winter view see Site Internal Viewpoint 13A, which is taken from the Site-side of the hedge at the boundary with the property. Existing built form at Funtley and further north of the village is visible beyond the Site. Existing outbuildings and part of Great Beamond Coppice are visible to the right in the photo.</p>	Approximately 35m AOD	Approximately 176m	Medium
5	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot and bike and vehicle.	Open views of existing boundary vegetation associated the Application Site occur from this location.	<p>View looking south east towards the Application Site from Funtley Road (by properties just east of the disused railway bridge). Views of existing residential built form along Funtley Road dominate the foreground with mature trees and vegetation along the northern Application Site boundary apparent. Views of the internal ground plane within the Site are truncated due to intervening boundary vegetation.</p> <p>In winter, the ground plane of the Site becomes apparent without leaf cover to the northern boundary vegetation.</p>	Approximately 18m AOD	Approximately 230m	Medium
6	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot and bike and vehicle.	Open views of existing mature tree and vegetation along the northern boundary of the Application Site occur from this location.	<p>View looking south east towards the Application Site from the junction of Roebuck Avenue and Funtley Road. Views of existing residential built form around the entrance of Roebuck Avenue and mature trees and vegetation along the northern Site are apparent. Views of the internal ground plane within the Application Site are truncated due to intervening boundary vegetation.</p> <p>There is little change in the visibility of the Site in winter.</p>	Approximately 19m AOD	Approximately 22m	Medium

3. Visual Baseline Conditions and Sensitivities

Table 3.1 – Summary of Visual Receptors

Representative Visual Receptor Viewpoint No.	Landscape Designation	Receptors	Extent of the land visible within the Application Site	Character and Amenity of the View	Elevation	Distance to Site	Value
6b	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot and bike and vehicle.	Open views of central part of internal ground plane within the Application Site occur with mature vegetation evident in the distance.	View looking south east towards the Application Site from Roebuck Avenue. The residential built form with its associated private garden along Roebuck Avenue dominates this view with the topography within the Application Site rising towards the local ridgeline. Open views of the central part within the Application Site occur, funnelled along the road with mature vegetation evident in the distance. Views into other areas within the Application Site are truncated by intervening vegetation, topography and built form from this location. There is slightly increased visibility of the Site in winter.	Approximately 20m AOD	Approximately 59m	Medium
7	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot, bike and vehicle.	Open views of existing mature tree and vegetation and the entrance access road along northern boundary of the Application Site occur. A small section of the existing northern boundary vegetation within the Application Site occur, evident in the middle distance.	View looking south west towards the Application Site from the junction of Stag Way and Funtley Road. Views of mature trees and boundary vegetation along the northern Site boundary dominate this view and form a green corridor along Funtley Road. Views of the existing access road and entrance gate within the Application Site are apparent. Views of the ground plane within the Application Site are, however, truncated by the intervening vegetation. There is slightly increased visibility into the Site in winter.	Approximately 20m AOD	Approximately 8m	Medium
8	Area Outside of Defined Urban Settlement Boundary	Residential; Transient receptors on foot, bike and vehicle.	Open views of existing mature tree and vegetation along north-eastern boundary of the Application Site occur from this location.	View looking south west towards the Application Site from Funtley Road. Views of mature boundary vegetation and tree planting along the northern boundary of the Application Site dominate this view and form a green corridor along Funtley Road. Views of the internal ground plane of the Application Site are in turn truncated due to intervening boundary vegetation. There are glimpses of the ground plane of the Site in winter without leaf cover.	Approximately 23m AOD	Approximately 60m	Medium

3. Visual Baseline Conditions and Sensitivities

Table 3.1 – Summary of Visual Receptors

16	Area Outside of Defined Urban Settlement Boundary; Public footpath 10	Transient receptors on foot and bike and vehicle.	Views of the internal ground plane and the existing vegetation within the Application Site are truncated from this location.	View looking south west towards the Application Site from the junction of Footpath 10 (Castle Farm Lane) and Forest Lane. Mature trees and vegetation along the lane dominate this view and create a green corridor along the lane. Views of the Application Site are wholly truncated by the intervening vegetation and topography.	Approximately 55m AOD	Approximately 3km	Medium - High
17	Welborne Policy Boundary	Transient receptors on foot and bike.	Views of the internal ground plane and the existing vegetation within the Application Site are truncated from this location.	View looking south west towards the Application Site from the cycle and footpath along the eastern section of Knowle Road. The cycle / footpath is apparent centrally within this view with mature hedgerows and vegetation evident on either side of the path. Due to intervening vegetation, views of the Application Site are wholly truncated from this location.	Approximately 45m AOD	Approximately 1.62km	Medium
18	Welborne Policy Boundary	Transient receptors on foot.	Views of the internal ground plane and the existing vegetation within the Application Site truncated from this location.	View looking south west towards the Application Site from Footpath 23b located along the southern part of Aylesbury Copse. Views of arable fields dominate this view with topography gently sloping towards the west. The existing tree belt to the south of Knowle Road is apparent in the distance from this location. Any views of the Application Site are truncated due to intervening topography and vegetation.	Approximately 42m AOD	Approximately 1.74km	Medium - High
19	Public bridleway 26b; in close proximity of Barn 20m south of Lee Ground (Grade II Listed Building) and Skylark Golf & Country Club	Transient receptors on foot and horseback.	Views of the internal ground plane and the existing vegetation within the Application Site are truncated from this location.	View looking south east towards the Application Site from Bridleway 26b located in close proximity to a barn 20 metres south of Lee Ground (Grade II Listed Building) and Skylark Golf and Country Club. Mature trees and vegetation define the localised field boundaries and create a green corridor along the bridleway. Views of the Application Site are wholly truncated by the intervening vegetation and land form.	Approximately 35m AOD	Approximately 1.72km	Medium - High

4. Landscape Constraints and Opportunities

4.1 Introduction

The following landscape elements form a series of constraints and opportunities that will inform future development proposals:

4.2 Constraints

- The Ancient Woodland is to be retained and protected by a 15m buffer, with no development within this zone.
- Existing tree groups designed as SINC and TPO within the Site are to be retained and protected.
- Retention of the majority of the existing hedgerows along the ownership boundaries, with limited removal required to facilitate safe access into and out of the Site.
- The rooting zones and canopies of existing trees and hedges to be retained would be protected during construction works in accordance with the recommendations of the project arboriculturist and ecologist.
- While land within north-eastern part of the Site is designated as open space within the Core Strategy (adopted August 2011) in fact this is privately owned pasture land used for horse keeping and is not currently accessible to the public. The area is also proposed for deletion in the emerging local plan. The proposed development explores options to relocate this elsewhere within the Site, so that development within this less sensitive location near to the road and existing settlement may be developed.
- The existing topography within the northern section of the ownership is gently sloping towards Funtley Road. However, the undulating topography then rises sharply from the central part of the Site to meet the southern western boundary, and then falls again towards the south-eastern boundary. This restricts development to the area of land in the vicinity of Funtley Road.
- Timber pylons carrying overhead wires within the north-western part of the Site may be undergrounded where practicable.

- Due to the existing land form and close proximity to the neighbouring residential built form, there are a number of open views of the boundary vegetation, or views of the internal ground plane within the Site evident from neighbouring houses and the transient receptors in vehicles / on foot using Funtley Road and Honey Lane.

4.3 Opportunities

- Existing access into the Site (opposite Stag Way) to be retained and enhanced for vehicular and pedestrian access into the future development parcels.
- Bus route along Funtley Road passing by the Site.
- Large mature trees surrounding and within the Site present an opportunity to create a mature, well-established green structure.
- The potential to create green buffers with the opportunity for additional tree planting around future development parcels to provide an improved green settlement edge.
- To create a positive interface with the landscape where development parcels front the green infrastructure.
- Potential to create areas of public open space with pedestrian links within the development and to the wider landscape beyond. This may include opening up access to the bridge crossing over the M27.
- Potential to create a well-designed, discrete and accessible urban extension to Funtley and Fareham, rounding off the settlement, which is well contained by the existing boundary vegetation and topography of the Site.
- Land within the Site historically subject to excavation has been since reinstated back to agricultural use (as discussed in section 2.10). Therefore this land does not pose a constraint to development in terms of further excavation.

4. Landscape Constraints and Opportunities

Figure 4.1 – Plan showing the landscape constraints and opportunities (fabrik, 2018)

5. Illustrative Proposed Development Parameters

5.1 Landscape Development Parameters

The landscape development parameters illustrated on **Figure 5.1** have been prepared by considering the landscape features of the Site and other areas within the Site along with landscape policy, landscape character and the visual constraints associated with the local landscape.

The parameters therefore seek to:

- Locate the development parcels on the lower slopes of the Site to the north to minimise cut and fill as well as in-keeping within the local residential character of Funtley and the northern fringe of Fareham.
- Minimise the visual impact of the future development by providing landscape buffer planting along the development boundaries.
- Maintain and enhance the existing landscape features of the Site by retaining, where possible, existing trees and supplementing with additional trees, woodland and hedgerow planting.
- Make use of the existing access to the Site for access to the proposed development, and provide replacement and enhancement planting within this area. A secondary emergency access from Funtley Road may also be required to the north-west of this.
- Where appropriate, contribute to an improved ecological value of the Site through the incorporation of native species within the landscape planting and grassland proposals.
- Make use of any sustainable drainage features to integrate a more diverse range of plant species, suited to temporary flooding.
- Provide public open space within the development and to the south. Incorporate pedestrian links to serve the new residents and the wider community within Funtley and Fareham. This would provide an alternative option to the existing designated open space within the north-western part of the Site (Core Strategy 2011). Pedestrian links may extend to the south through the opening up of the M27 footbridge.

5. Illustrative Proposed Development Parameters

Figure 5.1 – Plan showing the illustrative landscape development parameters (fabrik, 2018)

6. Appraisal of Landscape and Visual Effects

6.1 Effects on Heritage Assets

The Site does not contain nor is adjacent to any heritage assets (such as Listed Building, Scheduled Ancient Monument and Conservation Areas). Therefore, there will be no change to the character of the landscape around these assets, and no views towards the proposed development are predicted from them (**neutral** effect).

6.2 Effects on Topography

Study area topography:

There will be no physical change to the existing topography across the wider study area since the changes will occur at Site and immediate Site level only.

The value is low - medium; susceptibility is low; and sensitivity is low. The magnitude of change would be neutral. Therefore the effect on the topography at the study area level is **neutral**.

Site topography:

The proposed development parcels have been carefully located on the lower slopes within northern part of the Site. Some limited regrading where the Site meets the public highway may be required to facilitate ease of access for all. There may be some localised modifications to the existing landform within the proposed development parcels, to facilitate access and to form effective development platforms. In addition, localised excavations would be made to create sustainable drainage features. It is expected that suitable excavated material would be retained on Site and reused in the open spaces where grassed areas and planting are proposed. Care would be taken to avoid impacts on the rooting zones of existing vegetation. Any inert spoil excavated may be suitable for reuse within areas of proposed hardstanding, subject to confirmation by the project engineer.

The value is medium; susceptibility is low - medium; and sensitivity is low - medium. The magnitude of change would be low - medium. Therefore, the effects on this receptor is likely to result in **minor - moderate** adverse effects at the construction phase. Since no

further earthworks would occur beyond the construction stage, the operational phase effects on the Site topography would be **neutral**.

6.3 Effects on Land Use

Study area land use:

Farmland

At wider landscape level, there will be no direct change to the wider arable and pasture lands across the study area as the proposed changed to the existing land use will occur at Site level only. Furthermore, existing areas of farmland are largely separated from the Site by existing settlement, the existing and disused railway lines and mature vegetation.

During construction, there may be some views of construction plant / structures from elevated areas of private farmland north of Funtley, up to Knowle village (indirect effect). During operation, there may be some partial views of the upper elements of the built form (namely rooflines) from this private farmland, seen in context with existing built form within the valley through which Funtley Road passes. Any views of open and planted land south of the proposed development would remain. This is also an indirect effect and no direct changes to these farmed areas would occur.

Settlement and transport corridors

The Site forms a context and setting to a small part of the existing Funtley village and a short section of Funtley Road. This would change through the introduction of built development within the northern part of the Site. This would result in a limited change to the settlement pattern and character of the road corridor by extending built form to the south of Funtley Road. A broad context of open, unbuilt land would remain to the south of the proposed built area. In addition, longer views towards the elevated land within the southern parts of the Site from existing built areas and of the canopy of mature trees and woodland in these parts of the Site, are likely to be maintained. The road corridor would become more enclosed by built form, albeit this is proposed to be set well back from the existing Site boundary hedge, incorporating open space, sustainable drainage

features and additional planting.

The settlement pattern of Fareham would remain unchanged, and there would be no change to the pattern of roads around the Site or wider study area.

Open spaces

There would also be no physical change to existing open spaces across the study area, including that at Lakeside to the east of the Site.

Appraisal of study area land use effects

The value of the land use at study area level is low - medium; susceptibility is low; and sensitivity is low - medium. The magnitude of change would be low - medium, with the greatest level of change experienced by those land uses within very close proximity to the Site (Funtley Road and a part of Funtley village). A number of areas would experience no change (Fareham and rural landscapes east and west of the Site). Limited indirect visual change may be experienced from farmland further north of Funtley up to Knowle village. Therefore, the effect on land use at the study area level would be at worst, **minor** negative, with the effects being very localised to the Site.

The many areas of mitigation planting associated with the proposed development would reduce the effects to at worst **minor** negative to **neutral** in the long term (year 15). Other positive benefits are predicted through the creation of new public open spaces that would be accessible to both existing and new residents.

There would therefore be a **neutral** effect to the settlement pattern of Fareham, existing open spaces and the existing transportation network.

6. Appraisal of Landscape and Visual Effects

6.3 Effects on Land Use (continued)

Site land use:

The areas within the Site would be permanently changed from privately owned pasture land to a residential development. The new uses would include associated green infrastructure incorporating, retained vegetation and woodland; new trees and boundary buffer planting; planting throughout the built areas; sustainable drainage features and a series green, open spaces within the built area and to the south of it.

The Site lies entirely within the landscape designation of Area Outside Of Defined Urban Settlement within the Core Strategy (adopted August 2011) and a part of the Site to the north-west is designated as existing open space within the Core Strategy. The latter is not currently accessible to the public and the land is within private ownership for equestrian uses.

The changes to incorporate a built development and new publicly accessible open spaces within these areas is consistent with Local Plan Part 2 Policy DSP40 Housing Allocations, and with emerging the emerging Local Plan 2036, which allocates the Site for residential development. In addition, the supporting Landscape Assessment update (part of the evidence base to the Plan) indicates that small scale and sensitively integrated development may be appropriate in this location, given the existing residential areas of Funtley Road.

At enabling construction stage, the existing uses of the Site would change, particularly in the areas proposed for built development and new access. However, change would be limited within the proposed open spaces of the community park to the south, except for the creation of new paths, and implementation of green infrastructure such as sustainable drainage, new grasslands and planting.

The construction site would gradually change to a built development, with associated landscape planting. The built element, while wholly changing land use, would only occur in a part of the Site to the north. The proposed community park would retain a largely open character to land to the south, and would incorporate new paths for walkers. This park, together with further linear greenspaces and an open

space incorporating play features, would be provide facilities for use by new and existing residents.

The value of the land use at Site level is medium; the susceptibility is medium - high; and sensitivity is medium - high. The magnitude of change would be medium - high at the enabling, construction and early years operational stages. Therefore, as with any greenfield site, the level of effects would be **moderate - major** negative, arising principally from the introduction of built form to the paddocks. In addition, the provision of publicly accessible open spaces would result in a **minor - moderate** positive effect from completion of development (Year 1).

By Year 15, mitigation planting would further temper the effects on the Site land use, so that at worst, **minor** negative effects are predicted. The positive effects of the open spaces would remain, while the many new areas of planting within the Site, and management of existing vegetation are also expected to give rise to positive effects (see para. 6.4).

6.4 Effects on Existing Vegetation

Study area vegetation:

There are expected to be no physical changes to the existing vegetation across the wider study area since the changes are proposed at Site level only. Existing vegetation along the north side of Funtley Road is not expected to be affected by the provision of new access into the Site.

The value is low - medium; susceptibility is low; and sensitivity is low. The magnitude of change would be neutral. Therefore the effect on the vegetation at the study area level is **neutral**.

Site vegetation:

The Great Beamond Coppice, the existing tree groups near the existing access entrance and the tree blocks within the south-western part of the Site are designated as Sites of Importance for Nature Conservation in the Core Strategy. The mature vegetation and trees within these areas are to be retained and protected during

the construction works, with careful consideration given to the recommendations of the project ecologist and arboriculturist.

The proposed development would protect and retain the Ancient Replanted Woodland of Great Beamond Coppice and majority of mature trees and boundary vegetation within the Site. A 15m buffer would be retained to the Coppice.

There is expected to be some loss of existing trees and boundary vegetation within the Site to accommodate the proposed development parcels and access roads. A part of this includes dense, ornamental conifers of limited value to landscape character. Further arboricultural works may be undertaken to other vegetation within the wider Site area, if deemed necessary by the relevant professional for health and safety reasons, to remove any dead, dying, diseased or dangerous parts of the retained vegetation.

The value of the vegetation at Site level is medium; susceptibility is medium; and sensitivity is medium. The magnitude of change arising from the limited necessary vegetation loss at enabling / construction stage is predicted to be medium, giving rise to at worst, **moderate** negative effects. However these effects would be localised to the northern part of the Site where built form is proposed.

Effects on the majority of the vegetation within the Site are expected to be **neutral** or potentially positive, where management of vegetation would ensure its retention and longevity.

There is ample opportunity within and around the proposed built area and proposed community park, for replacement and additional tree, hedge, shrub and other planting, including landscape buffer planting, making use of species appropriate to the space, position and function. This would mitigate for and improve, the visual and landscape effects of the vegetation removal required to facilitate effective development.

Further details are set out in the Design and Access Statement (DAS) accompanying the planning application.

6. Appraisal of Landscape and Visual Effects

6.4 Effects on Existing Vegetation (continued)

The planting would be implemented during the construction stage with the effects in place by Year 1 of the operational stage. The low magnitude of change would give rise to **minor** positive effects. The positive effects of this planting on the landscape assets of the Site, and views within and towards the built area, would further increase over time, as this matures. The effect on the Site vegetation by Year 15 would therefore be **moderate** positive.

6.5 Effects on Public Rights of Way

Study area public rights of way:

There would be no physical change to the existing public rights of way network during construction or operation. Visual effects are considered separately.

The value is medium - high; susceptibility is low; and sensitivity is medium. The magnitude of change would be neutral. Therefore the effect on the topography at the study area level during construction and operation is **neutral**.

There are opportunities to provide pedestrian connections between the proposed development and existing Bridleway 515 (along the disused railway line) to the immediate west. It may also be possible to open up a connection to Fareham via the footbridge over the M27 to the immediate south of the Site. This in turn could facilitate access by existing residents in this location to the open space and rights of way network north of the motorway.

As such, at the operational stage, the magnitude of change is predicted to be low, with effects the effects being **minor - moderate** positive in Years 1 and 15.

6.6 Effects on Landscape Character

National and county landscape character:

There would be **negligible** effects to the landscape character at national character level (NCA128 South Hampshire Lowlands) and county character level (LCA 3E Meon Valley). This is because the limited scale of the proposed development, and relatively high level of physical and visual enclosure of the Site, would result in changes that occur principally at the Site, and immediate local level.

There would be no change to the Portsdown Hill chalk ridge or Meon River described at NCA level, and the proposed development would form a very small part of NCA128 that is described as being dominated by large towns and with fragmentation by major transport links including the M27.

At county level, the proposed development would not affect the recreational route along the disused railway line to the west, and would retain a significant area of unbuilt land to the south, separating it from the motorway and Fareham settlement. Vegetation within the Site would be retained and protected as far as is practicable and potential adverse effects on the SINC and Ancient Replanted woodland within the Site have been designed out of the development proposals.

The value of the national and district character varies from low - high; susceptibility is low; and sensitivity is low - medium. The magnitude of change would be negligible, and therefore the effects would be **negligible**.

Borough and Site landscape character:

At Fareham Borough level, the Site lies within LCA 6: Meon Valley. While the Site comprises of pasture land, it is nonetheless subject to the nearby influences of relatively recent built form at Funtley, the live railway to the east and M27 and Fareham urban fringe to the south. The proposed development would form a limited addition to this existing built context.

The proposed development is set out to closely follow the parameters for the Site allocation set out in the emerging Local Plan. Thus, there would be built form in the northerly, lower lying and more level parts of the Site, forming a limited extension to the existing Funtley village. Like the existing residential development north of Funtley Road, development would be set back to allow a leafy green and spacious character to be retained along the road. Development is not proposed on the steep slopes or high ground of the Site.

In accordance with the LCA, the proposal protects the important landscape features of the Site - the steeply sloping landforms, unbuilt skyline, mature vegetation and openness to the south; while proposing to integrate many new areas of planting, including in association with new sustainable drainage features.

Development would, like the existing village, be kept to the relatively low lying part of the valley within which it lies, limiting the potential for widespread visual effects.

The proposed built form would respond to the positive aspects of existing built form both north of Funtley village and within the wider settled areas. A generous network of green infrastructure and open spaces are proposed. Further details are set out in the DAS accompanying the planning application.

The value of the borough character varies from low - medium; susceptibility is medium; and sensitivity is low - medium. The magnitude of change would be medium - high at the Site level only, reducing to negligible - low with distance across LCA6 from the Site. Therefore, the effects would be at worst, **moderate - major** negative for the parts of the Site proposed for built development at the construction and operational stage (Year 1). This is due to the change in character from semi-enclosed pasture fields to a residential development.

The changes beyond the proposed built area, would be at worst, **minor - moderate** negative (Year 1) for those areas immediately around the proposed built area - the existing village to the north and open land retained to the south - due to changes to the context and setting of these areas.

6. Appraisal of Landscape and Visual Effects

6.6 Effects on Landscape Character (continued)

However, further afield, the effects would be at worst, **minor** or **negligible**, due to the physical and visual separation of the Site from most of the area of Fareham borough LCA 6: Meon Valley.

As the planting associated with the green infrastructure areas matures through time, the landscape and visual effects would improve, so that at Site level, these are expected to be no greater than **minor** negative (on a clear day in winter) and at best, **minor - moderate** positive (Year 15) due to the additional physical enclosure, landscape integration and visual softening and screening provided by the proposed planting. In turn, the effects on the parts of the character area surrounding the Site would also be further tempered in the medium to long terms.

6.7 Effects on Visual Receptors

Residential Receptors

The residential receptors that will experience the most direct and proximate views of the construction site and emerging built development would be occupants of the few dwellings to the north side of Funtley Road, just east of the railway Bridge (Viewpoint 5).

Some additional residents along the north side of Funtley Road would also experience direct views, albeit with filtering of views through tall vegetation along both sides of Funtley Road - see Viewpoints 6, S13A, and winter views S3 and 7. This vegetation becomes more of a screen in summer views (with leaf cover). However, parts of this may require removal to facilitate access into the Site from Funtley Road and the built development, which in turn, may further increase visibility into the Site in the short term.

Further visual receptors along Roebuck Avenue and Stag Way may experience some partial and oblique views of the construction site and emerging built form where the roads themselves allow visibility toward parts of the Site - see Viewpoints 6b and 7 (winter view). The

Site boundary vegetation provides a greater level of visual screening to some views in summer. As above, some loss of vegetation may be required to facilitate access into the Site and the development itself, which may further increase visibility into the Site in the short term.

In all of these views, construction hoardings may partially obscure views.

There would also be oblique and more distant views of the construction site and emerging built development from the property (Bramleigh) at the south end of Honey Lane, due to its position on elevated ground and the relatively low level hedge at the boundary with the Site (Viewpoints S5, S6 and S13A, and summer Viewpoint 4). The views would be in context with existing views towards built form north of Funtley Road. While built form would be brought forward in the view, existing longer distance views towards the lower Downs, part of Knowle village and other built areas to the north of Funtley would be largely retained.

The completed development and newly implemented planting would create a new element in these views, replacing part of existing views of pasture fields. The areas of the Site remaining unbuilt would appear as a park with new areas of planting.

The value of the residential receptors is medium; susceptibility is medium - high; and sensitivity is medium - high. The magnitude of change at the construction and Year 1 operational stage would be medium - high, and therefore the effects would be at worst, **moderate - major** negative (Year 1), for the relatively limited number of residents with potential views towards the proposed development. The many areas of mitigation planting would contribute to some visual softening of the built areas in the early years. However in the mid to long terms this is predicted to create a significant amount of visual softening and screening, and therefore a bettering of the visual effects. Thus by Year 15, the effects are predicted to reduce to at worst, **minor** negative (the greater effects being on a clear day in winter).

Views from the dwelling at the south end of Honey Lane would retain long views out to the distant countryside to the north, albeit beyond additional areas of built form and planting within the valley. Views from dwellings to the north side of Funtley Road are likely to retain some partial views of the higher, southern parts of the Site, as a backcloth to the built form in the foreground.

Receptors using Roads

The views would be very similar to those described for the residential receptors above, and therefore includes parts of Funtley Road, Honey Lane, Roebuck Avenue and Stag Way (see Viewpoints 4-7, 8 and S13A). In all cases, the views would be transitory and Site hoardings may partly screen views.

Views from the western part of Funtley Road are likely to be more open due to the more limited nature of existing vegetation here, albeit the necessary vegetation removal to facilitate access and development to the east may also increase visibility into the Site in the short term.

Views from Honey Lane are rather more limited by existing vegetation at the boundary with the Site, even in winter. Visibility is mainly from two gaps in this vegetation at the north and south ends of the lane.

The value of the receptors using the roads is low; susceptibility is low; and sensitivity is low. The magnitude of change at the construction and Year 1 operational stage would be medium - high, and therefore the effects would be at worst, **minor - moderate** negative (Year 1). The setback of development from the roads edging the Site and landscape buffer planting would contribute to mitigating effects in the short to medium terms. By year 15, the landscape buffers would provide more robust visual softening and screening, reducing the effects to at worst, **minor** negative.

6. Appraisal of Landscape and Visual Effects

6.7 Effects on Visual Receptors (continued)

Receptors using Public Rights of Way and M27 footbridge

There is a slight possibility that users of Public Footpaths 88 and 89 to the east of Funtley (Viewpoints 9 and) may be aware of tall construction plant within the Site, should this be required to facilitate development. There may also be some awareness of works to provide the proposed community park in the south-eastern part of the Site. Any potential views to the construction site would be distant and form part of a wide panorama that includes parts of Funtley, the telecommunications mast on the Site and pylons carrying overhead wires, as well as farmland and vegetation in the intervening areas. The construction effects are therefore predicted to be **negligible**.

Due to the landform of the Site and vegetation and built form in the intervening areas, no notable views of the proposed development or associated proposed community park are predicted from these two footpaths. The operational effects are therefore predicted to be **neutral**.

From Public Bridleway 515 to the immediate west of the Site, walkers and equestrians in the vicinity of the bridge crossing over Funtley Road are likely to gain glimpsed views of the construction site and emerging built form. Views would be filtered by existing vegetation along the disused railway embankment and less apparent from the section north of Funtley Road than from that to the south - see winter Viewpoints 12A and 14A. By the operational stage, these glimpses would be replaced by a completed development, seen in context with existing partial views through the vegetation of existing dwellings north of Funtley Road.

The value of the receptors using Bridleway 515 is medium; susceptibility is medium; and sensitivity is medium. The magnitude of change at the construction and Year 1 operational stage would be medium, and therefore the effects would be at worst, **moderate** negative (Year 1). The setback of development from the western and

northern edges of the Site and landscape buffer planting here and to the south would contribute to mitigating effects in the short to medium terms. By year 15, the landscape buffers would provide more robust visual softening and screening, reducing the effects to at worst, **minor** negative. In summer, views to the proposed development are likely to be less evident as existing vegetation would reduce visibility towards the Site.

From the bridge crossing over the M27, there is little opportunity for views into the Site and no notable views of the construction phase for the southern community park are proposed. The land proposed for the built development would not be visible either during or following construction. Therefore effects are judged to be **minor** for this receptor.

Discounted Visual Receptors

No views during construction or operation are predicted from the following middle distance and wider area locations as the views are truncated by landform, vegetation and / or built form: Viewpoints 1 and 2 - Funtley Lane and Lakeside; summer Viewpoints 12 and 14 from Bridleway 515, to the west; and more distant Viewpoints 11, 13 and 19 (from the west / north-west) and 15 - 18 (from the north-east). No views towards the Site were identified from the South Downs National Park.

7. Policy Compliance

7.1 Emerging Fareham Local Plan 2036 (Draft Consultation Version)

The proposed development is consistent with the Development Allocation for the Site (Policy HA10), set out in the emerging Fareham Local Plan 2036 (see Figure 2.4). It confines the proposed development to the northern parts of the Site; and creates new public open space in the form of parkland with paths to the south. It respects a 15m buffer to Great Beamond Coppice and protects the majority of the existing vegetation within and bounding the Site. The proposal creates new public open space with play elements in the north, incorporating existing vegetation designated as a SINC. The proposed open spaces more than compensate for the loss of the existing designated open space land within the Site (which is not currently accessible to the public).

Access is proposed to be taken from Funtley Road, making use of the existing access track into the Site. Green corridors, buffers and spaces are integral to the proposed built and green infrastructure areas. Sustainable drainage features are proposed, potentially contributing to the biodiversity and landscape value of the Site. View corridors would be retained between development blocks, allowing views towards the undeveloped southern slopes from Funtley Road to be retained. In accordance with emerging Policy CF6, the open space provision would more than compensate for the change of use of the existing open space designation with the Site (which is not currently accessible to the public).

A total of 55No dwellings are proposed in accordance with the Site allocation. The built form would respect the positive aspects of existing settlement character, and further details on this, and the proposed landscape mitigation are set out in the DAS. Community facilities and pedestrian and cycle links to surrounding areas to the north, south, west and east are also proposed (Policy D1).

The setbacks of the proposed development from the Site boundaries to the north and west, and proposals for landscape buffers with many new areas of planting here and to the south, would create a significant landscape framework that together with the retained

vegetation would contribute to effective landscape integration of the built areas.

In turn, this planting, as well as planting within the built areas would contribute to meaningful visual softening and partial screening of the development from surrounding built areas, while partial views of the higher, undeveloped slopes of the Site would be retained. This is consistent with the aims of the policy.

The confinement of the proposed built area to the existing, developed valley floor (through which Funtley Road runs) would limit the extent to which the proposals would impact on the character of the Site and wider surrounding landscape (Policies NE1 and D1). This is because this part of the Site already benefits from a high degree of landscape and visual containment, by surrounding landform (including railway embankments), built form and existing mature and dense vegetation. The higher slopes of the Site, which are intervisible with elevated farmland north of Funtley and up to Knowle village, would remain undeveloped and additional planting is proposed in these locations.

7.2 National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG)

In terms of section 7 of the NPPF and NPPG section ID 26 relating to design, the proposed development seeks to provide attractive, high quality and inclusive design; with a strong sense of place, that is integrated with and respectful to the character and pattern of the local area. The proposed provision of a community building, community park and public open space with play areas provide opportunities for social interaction and active lifestyles. The built areas would be developed on the basis of perimeter blocks with good natural surveillance to all public areas. Adaptability and efficiency of the built environment would be important considerations. The proposed development carefully considers the topography of the Site and potential impact on views in the layout and form of the built areas.

In accordance with sections 8 (healthy communities) and 10 (climate change) of the NPPF, the areas of green and blue infrastructure would support action to combat effects of climate change through

provision of shading, water attenuation, and carbon absorption. Consistent with section 10 of the NPPF. Regarding NPPF section 11 (natural environment) the proposals protect the undulating landform of the Site and the majority of the existing vegetation, and seek to improve the biodiversity of the Site by creating further diversity to the range of planting and grassland types within it.

In accordance with NPPG Paragraphs 009 and 015 the proposed development promotes green infrastructure including a number of open and green public spaces; it respects natural features, and promotes a high quality landscape with many areas of planting that contributes to the quality of the local area. By placing development in the lower parts of the Site, and in association with existing built form, the wider landscapes of the Site would be maintained as open, while there would be negligible impact on surrounding areas (NPPG section ID 8).

7.3 Fareham Local Development Framework, Core Strategy (Adopted August 2011)

In turn, these proposals for the Site are consistent with the Fareham Core Strategy (2011) Strategic Objectives SO10 (to manage, maintain and improve the built and natural environment to deliver quality places, taking into account the character and setting of existing settlements); SO11 (to protect sensitive habitats and maintain separate settlement identity); as well as Policy CS4 (protection of habitats important to biodiversity and provision of accessible green space for informal recreation); Policy CS14 (to protect countryside from adverse effects on landscape, character and function arising from development); Policy C17 (to create high quality development that adheres to good urban design and sustainability principles, that is respectful of landscape, scale, form and spaciousness, and that includes greenways and trees within the public realm); Policy CS21 (to seek to provide alternative, and better public open space provision to replace the designated area of open space within the Site); and, Policy CS22 (the proposal does not affect the Strategic Gap located west of the disused railway line).

7. Policy Compliance

7.4 Fareham Borough Local Plan Part 2: Development Sites and Policies (Adopted June 2015)

Referring to the Fareham Borough Local Plan Part 2 (2015), the proposed development:

- Seeks to mitigate and improve any potential impacts on neighbouring development and adjoining land, through respectful layout and provision of a robust landscape framework (In accordance with Policies DSP2 and DSP40);
- Does not adversely affect heritage assets (In accordance with Policies DSP5 and DSP40);
- Lies outside of the Defined Urban Settlement Boundary, but is located close to and would be in keeping with the character, scale and appearance of surrounding areas; is sited and designed to integrate with the existing settlement and prevent detracting from existing landscape; and is laid out to respect views into and out of the Site and to the elevated land to the south (In accordance with Policies DSP6 and DSP40);
- Protects designated nature conservation sites and provides additional planting within or around these; provides a wide range of new grassland, herbaceous, aquatic, shrub, hedge and tree planting, including native species and species supporting potential habitat creation, nectar and pollen provision; and retains the majority of the existing vegetation on the Site, providing a number of new landscape buffers and other areas of planting, as well as sustainable drainage ponds that would contribute to maintaining and reinforcing the biodiversity network (In accordance with Policies DSP13 and DSP40); and
- Does not adversely affect a Strategic Gap (In accordance with Policy DSP40).

In terms of the Planning Obligations Supplementary Planning Document for the Borough of Fareham (Excluding Welborne) Adopted April 2016, the proposed development provides a village green integrating play features to the north; and a community park to the south. In total, over 53% of the Site area (8.62ha out of 16.18ha) would remain undeveloped, for use as open spaces and for green and blue infrastructure.

7.5 Landscape Character

In accordance with Statement of Opportunity 1 (SEO1) set out in the profile for **National Character Area 128: South Hampshire Lowlands**, the proposed development promotes creative and effective sustainable development, including a well-connected network of high-quality greenspace, which would benefit local communities, protect local distinctiveness, encourage public understanding and enjoyment of the natural environment, and help to mitigate the impacts of climate change.

In addition, in accordance with SEO2, the proposed development would protect, manage and enhance the area's historic well-wooded character – including its ancient semi-natural woodlands and hedgerows – to link and strengthen habitats for wildlife, and improve recreational opportunities.

There is also opportunity, in accordance with SEO3 to diversify the grassland habitats with the Site, providing recreational opportunities and potential improved biodiversity.

In accordance with the opportunities for **Hampshire County Landscape Character Area 3E: Meon Valley**, the proposed development:

- Keeps development within the valley bottom and avoids building on the slopes and elevated parts of the Site;
- Retains the majority of the existing vegetated boundary structure to the Site;
- Provides many areas of green infrastructure with retained and new planting; and
- Creates potential pedestrian / cycle links to existing settlements and public rights of way.

In accordance with the priorities for enhancement for **Fareham Borough Landscape Character Area 6: Meon Valley**, the proposed development:

- Protects important landscape and ecological resources, woodland and the slopes and ridge of the Site, which form part of the valley within which it lies;
- Creates a development that is limited in extent and which relates well to the existing Funtley village, maintaining an informal, rural character to the southern parts of the Site (community park);
- Provides opportunity to remove unsightly features from the Site;
- Sets development away from the Site boundaries, providing space to reinforce existing boundary vegetation with additional landscape buffers, that protect the character of the nearby roads and settlement. Where vegetation removal is required to facilitate safe access and egress from the Site, this would be minimised as far as possible, with new planting provided within the Site, outside of visibility splays; and
- Reinforces the retained green infrastructure network with many new areas of planting, including as part of the sustainable drainage strategy.

8. Summary and Conclusions

8.1 Summary of the baseline conditions

The Site is located at south-western edge of Funtley village in Hampshire and is bound by Funtley Road to the north and Honey Lane to the west.

The Site lies wholly within the landscape designation of 'Areas outside of Defined Urban Settlement' as defined in the proposal map of the Fareham Borough Core Strategy (adopted August 2011), whilst the area within north-western part of the Site is also designated as 'Existing Open Space' albeit this is not currently accessible to the public. The Ancient Woodland of Great Beamond Coppice is also located within the north east of the Site.

The Great Beamond Coppice is designated as a Site of Importance for Nature Conservation together with the existing tree groups located near the existing access entrance along the northern boundary and south-western boundary as shown on Figures 2.1 and 4.1. There are no other landscape designations within the Site. The Site is also subject to the influences of the nearby M27 motorway, settlement at Funtley village and the live railway to the east; with the addition of a telecommunications mast and timber poles carrying overhead lines within the Site. Therefore, the existing Site is considered to have a medium landscape value overall.

The Site is allocated for residential units in the emerging Fareham Local Plan 2036, subject to Policy HA10. In addition, the updated Borough Landscape Assessment (part of the Local Plan evidence base) indicates that small scale and sensitively integrated development could be accommodated in this location. The development allocation would remove the open space designation within the Site, albeit other existing policy provision seeks the provision of alternative or better uses. Several new, publicly accessible open spaces are therefore included as part of the scheme proposals.

Across the study area, there are a number of heritage assets comprising of Listed Buildings, Scheduled Ancient Monuments and local non-designated heritage asset Historic Parks and Gardens. There are no heritage assets located within or adjacent to the Site and none would be affected by the proposed development.

Views of the Site from the wider landscape (including the South Downs National Park) are truncated due to the undulating landform and intervening vegetation, whilst open and partial views of the internal ground plane and vegetation within and along the Site are apparent from the receptors located within close proximity of the Site - along parts of Funtley Road, Stag Way, Roebuck Avenue, Honey Lane; along part of Bridleway 515 to the west, near the bridge crossing over Funtley Road; and from parts of Public Footpaths 88 and 89 to the east of Funtley.

8.2 Summary of the landscape effects

The proposed development within the Site would not noticeably alter the landscape character at the national or county levels as discussed in this LVIA (**negligible** effects).

It is predicted that there would be, at worst, a **moderate - major** negative effect on land use landscape character at Site level - that is, the parts of the Site proposed for built development, due to the change in character from semi-enclosed pasture fields. Beyond this built area, the effects on the character of the wider Site and immediate context is predicted to be at worst, **minor - moderate** negative, but on the wider Borough character area, effects would be no greater than **negligible** or **minor**. Nevertheless, the proposed development is sited in close proximity to existing settlement and would not affect separate settlement identity or gaps.

Some modifications to landform would be required within the Site to provide safe access into, out of and within the proposed development, and to provide effective development platforms. The more steeply sloping and elevated parts of the Site would not be built on, with localised ground modelling only required to construct new pedestrian and cycle paths.

The effect on the Site landform is predicted to be at worst, **minor - moderate** negative at the construction stage only. Vegetation removal within the Site would be limited to that essential to facilitate effective development, to provide a safe area for new residents, or for other arboricultural or ecological reasons as identified by the relevant project specialists. The effects are predicted to be at worst, **moderate** negative at the construction stage, albeit these effects would be largely localised to the area proposed for built form.

The proposed development would, from the outset, be contained within an existing landscape framework of retained and protected mature hedges, trees, tree belts and woodland. There would also be retained open land (for community park uses) to the south. The proposed village green open space to the north would include play facilities and incorporate the retained SINC.

As the many areas of proposed landscape mitigation planting mature, the short term negative effects on land use and landscape character identified above would improve considerably with time, further reinforcing landscape integration, visual softening and partial screening.

Thus the effects on Site character and the immediate context would reduce by Year 15 to at worst **minor** negative (a clear day in winter) to at best **minor - moderate** positive, due to the ongoing positive management of the existing vegetation within the Site, and reinforcement of this with an additional robust network of varied landscape planting, diverse grasslands and planting associated with the proposed sustainable drainage features.

The many new areas of planting proposed would replace vegetation lost, while providing a considerable additional resource to the Site. Therefore, the effect on the Site vegetation is predicted to be **minor** positive in Year 1 and **moderate** positive by Year 15 when this is maturing.

8. Summary and Conclusions

8.2 Summary of the landscape effects (continued)

In terms of land use and the designated open space area of the Site, the provision of a total of 8.62ha of new publicly accessible open space with the proposed development is predicted to give rise to **minor - moderate** positive effects from Year 1 of operation. This would mean that over 53% of the total Site area of 16.18ha) would remain undeveloped and semi-rural in character.

Furthermore, the potential to provide pedestrian and cycle links to existing settlement north of Funtley Road, to Bridleway 515 to the west, and to Fareham to the south (by opening up the bridge link over the M27), the proposed development is predicted to give rise to **minor - moderate** positive effects on the public rights of way network from Year 1.

8.3 Summary of the visual effects

Regarding visual effects, the most noticeable visual change arising from the proposed development would be for the road users of Funtley Road and residents along the north side of the road, including a few residents of Stag Way and Roebuck Avenue. The views would be direct and in close range of the Site, albeit some views would be partly filtered by existing boundary vegetation.

Residents of Bramleigh at the south end of Honey Lane would have more distant and elevated views to the proposed development, seen in context with existing development at Funtley, and the farmland, and built areas including part of Knowle village to the north of Funtley. While development would be brought forward in these views, overall, the character and amenity of the panoramic views would be retained.

The construction and Year 1 operational effects are predicted to be at worst, **moderate - major** negative for residents along Funtley Road / Stage Way / Roebuck Avenue / Honey Lane; and **minor - moderate** negative for the transient receptors using Funtley Road. The mitigation planting associated with the built development would reduce these visual effects to at worst, **minor** negative for Funtley

Road residents and road users by Year 15. The scheme proposes to retain views beyond the built area to the elevated and more open higher ground within the community park to the south.

No notable visual effects are predicted from Public Footpaths 88 and 89 to the east of Funtley, due to the limited areas of the Site visible, and screening by landform, built form at Funtley and vegetation in the intervening areas.

From Bridleway 515 to the west, some partial views and glimpses of the proposed development would be seen beyond existing vegetation along the embankments of the disused railway line. These views would be in context with partial views and glimpses of existing built form to the north of the Site, and would be in context with retained semi-open parkland with additional planting south of the built area. The Year 1 effects are predicted to be at worst, **moderate** negative, and only from a short section of the Bridleway in the vicinity of the bridge crossing over Funtley Road. By Year 15, the softening and enclosing effect of mitigation planting is predicted to reduce the visual effects to at worst, **minor** negative. There would be no views of the development from most sections of the Bridleway due to physical and visual separation by dense vegetation in the intervening areas.

8.3 Conclusions

It is considered that the proposed development, which is subject to an allocation in the emerging Fareham Local Plan 2036, would represent a relatively limited and logical extension to an existing settlement. No widespread landscape or visual effects are predicted, and those effects predicted to occur at a Site and immediate site context level can be effectively mitigated and compensated for. The proposed development also offers opportunity for long term management of the Site and its mature vegetation (including Ancient Replanted Woodland); and provision of an additional robust structure of green infrastructure incorporating a diverse range of planting and grasslands, including within the areas of sustainable drainage. There would be the provision of a considerable area of new publicly accessible open space. The development is proposed to

be well connected to existing settlement and public rights of way. In conclusion, therefore, with careful consideration of the constraints and opportunities of the Site, an appropriate development can be provided without substantial harm to landscape or views, but which provides a number of community and landscape benefits.

Appendix 1 – fabrik LVA Methodology

A1.1 Introduction

The methodology employed in carrying out an LVA or LVA with an impact statement of the Site, is drawn from the Landscape Institute and the Institute of Environmental Management and Assessment's "Guidelines for Landscape and Visual Impact Assessment" (GLVIA) Third Edition (Routledge 2013).

The term landscape is defined as an area perceived by people, whose character is the result of the action and interaction of nature and / or human factors. It results from the way that different components of our environment – both natural and cultural / historical interact together and are perceived by us. The term does not mean just special, valued or designated landscapes and it does not only apply to the countryside. The definition of landscape can be classified as:

- All types of rural landscape, from high mountains and wild countryside to urban fringe farmland (rural landscapes);
- Marine and coastal landscapes (seascapes); and
- The landscape of villages, towns and cities (townscapes).

An LVA with an impact statement provides a description of the baseline conditions and sets out how the study area and site appears, or would appear, prior to the proposed development. The baseline assessment is then used to predict the landscape and visual impacts arising from the proposed development. The assessment of impact is carried out as part of the iterative design process in order to build in mitigation measures to reduce the impacts as much as possible. The impact assessment will identify and assess effects during the construction and operational stages of the proposed development.

A1.2 Summary Overview of LVA Methodology

The LVA baseline assessment describes:

- Each of the landscape elements which then collectively inform landscape character for the contextual area to the site and the site itself;
- The character, amenity and degree of openness of the view from a range of visual receptors (either transient, serial or static views);
- The current baseline scenarios;
- The value of each of the landscape and visual receptors.

Landscape effects derive from changes in either direct or in-direct changes to the physical landscape, which may give rise to changes to the individual landscape components which in turn effects the landscape character and potentially changes how the landscape is experienced and valued.

Visual effects relate to the changes that arise in the composition, character and amenity of the view as a result of changes to the landscape elements.

The assessment of effects therefore systematically:

- Combines the value of the receptor with the susceptibility to the proposed change to determine the sensitivity of the receptor;
- Combines the size, scale, geographic extent, duration of the proposals and its reversibility in order to understand the magnitude of the proposal.
- Combines the sensitivity of the each of the receptors and the magnitude of effect to determine the significance of the effect.
- Presents the landscape and visual effects in a factual logical, well-reasoned and objective fashion.
- Indicates the measures proposed over and above those designed into the scheme to prevent/avoid, reduce, offset, remedy, compensate for the effects (mitigation measures) or which provide an overall landscape and visual enhancement;

- Sets out any assumptions considered throughout the assessment of effects.

Effects may be positive (beneficial) or negative (adverse) direct or indirect, residual, permanent or temporary short, medium or long term. They can also arise at different scales (national, regional, local or site level) and have different levels of significance (major, moderate, low, negligible or neutral / no change). The combination of the above factors influences the professional judgement and opinion on the significance of the landscape and visual effect.

The following sections sets out in more detail the assessment process employed.

A1.3 Establishing the Landscape Baseline

Desk and Field Studies: The initial step is to identify the existing landscape and visual resource in the vicinity of the proposed development – the baseline landscape and visual conditions. The purpose of baseline study is to record and analyse the existing landscape, in terms of its constituent elements, features, characteristics, geographic extent, historical and cultural associations, condition, the way the landscape is experienced and the value / importance of that particular landscape. The baseline assessment will also identify any potential changes likely to occur in the local landscape or townscape which will change the characteristics of either the site or its setting.

An desk study is carried out to establish the physical components of the local landscape and to broadly identify the boundaries of the study area. Ordnance survey (OS) maps and digital data is used to identify local features relating to topography/ drainage pattern, land cover, vegetation, built developments/settlement pattern, transport corridors/definitive public rights of way and any historic or prominent landscape features, which together combine to create a series of key characteristics and character areas. Vertical aerial photography will be used, to supplement the OS information. At this stage, any special designated landscapes (such as Areas of Outstanding Natural Beauty, National Parks, Green Belt, Conservation Areas, Listed Buildings, Areas of Special Character); heritage or ecological assets are identified. A review of information available in terms of any published historic landscape characterisation together with any other landscape / capacity / urban fringe and visual related studies is carried out at this stage.

Landscape character assessment, is the tool for classifying the landscape into distinct character areas or types, which share common features and characteristics. There is a well established methodology developed in the UK by the Countryside Agency and Scottish Natural Heritage in 2002, with further guidance published by Natural England in 2014. The national and regional level character assessments are often available in published documents, however the local / district or site levels may need to be set out

based on a combination of desk studies and field survey work. The character assessment will also identify environmental and landscape opportunities, recent changes, future trends and forces for change where they may be important in relation to the proposal, especially considering how the landscape appears, or would appear prior to the commencement of development. The condition of the landscape, i.e. the physical state of an individual area of landscape, is described as factually as possible. The assessment of landscape importance includes reference to policy or designations as an indicator of recognised value, including specific features or characteristics that justify the designation of the area. The value of that landscape by different stakeholders or user groups may also influence the baseline assessment.

If published local / site level landscape character assessments are not available, the landscape is to be classified into distinctive character areas and / or types, based on variations in landform, land cover, vegetation / settlement pattern, field pattern, enclosure, condition, value and etc. The classification will take into account any National, County/District and Parish level landscape character assessments.

These desk based studies are then used as a basis for verification in the field.

Judgements on the value of both the landscape and visual receptor are made at the baseline stage.

Landscape Value

Value is concerned with the relative value or importance that is attached to different landscapes. The baseline assessment considers any environmental, historical and cultural aspects, physical and visual components together with any statutory and non-statutory designations and takes into account other values to society, which may be expressed by the local community or consultees. These tables are considered a starting point for consideration in the field. The landscape designations are to be considered in terms of their 'meaning' to today's context. The following table sets out the criteria

and definitions used in the baseline assessment to determine landscape value at the local or site level (in addition to condition / quality as set out on the previous page). Wherever possible information and opinions on landscape value is to be sought through discussions with consultees, stakeholders and user groups.

Table A1.1 sets out the criteria used to determine landscape condition / quality and value at the local or site level in the field.

Table A1.1 – Landscape Value Criteria

Criteria
<p>High (Very Good / Good Condition) International - National - Regional Scale</p> <ul style="list-style-type: none"> • Exceptional landscape with outstanding perceptual qualities. Very attractive, intact, natural, scenic, rare, wild and tranquil. The landscape may include World Heritage Sites, National Parks, Areas of Outstanding Natural Beauty or Heritage Coast or key elements/features within them; together with any non-statutory designations. Alternatively, the landscape may be un-designated but is valued as set out in published landscape character assessments and which, for example, identify and artistic and literary connections which assist in informing the identify of a local area (such as 'Constable Country'); • Recognisable landscape or townscape structure, characteristic patterns and combinations of landform and landcover are evident, resulting in a strong sense of place; • No or limited potential for substitution and which is susceptible to small changes; • A landscape that contains particular characteristics or elements important to the character of the area; • A valued landscape for recreational activity where the experience of the landscape is important; • Good condition with -appropriate management for land use and land cover, or with some scope to improve certain elements; • Distinct features worthy of conservation; • Unique sense of place; • No or limited detracting features.

Criteria
<p>Medium (Good - Ordinary Condition) Regional - Local Scale</p> <ul style="list-style-type: none"> • Ordinary landscape and perceptual qualities. The landscape may include local designations such as Special Landscape Areas, Areas of Great Landscape Value, Strategic or Local Gaps; or un-designated but value expressed through literature, historical and / or cultural associations; or through demonstrable use by the local community; together with any non-statutory designations. Alternatively, the landscape may be valued through the landscape character assessment approach. • Distinguishable landscape or townscape structure, with some characteristic patterns of landform and landcover; • Potential for substitution and tolerant of some change; • Typical, commonplace farmed landscape or a townscape with limited variety or distinctiveness; • A landscape which provides recreational activity where there are focused areas to experience the landscape qualities; • Scope to improve management; • Some dominant features worthy of conservation; • Some detracting features.
<p>Low (Ordinary - Poor Condition) Local /Site Scale</p> <ul style="list-style-type: none"> • Poor landscape and perceptual qualities. Generally un-designated. Certain individual landscape elements or features may be worthy of conservation and landscape either identified or would benefit from restoration or enhancement (such as local parks and open spaces). Alternatively, the landscape may be valued through the landscape character assessment approach. • Monotonous, weak, uniform or degraded landscape or townscape which has lost most of it's natural or built heritage features and where the landcover are often masked by land use; • Tolerant of substantial change; • A landscape which provides some recreational activities with limited focus on the landscape attributes; • Lack of management and intervention has resulted in degradation; • Frequent dominant detracting features; • Disturbed or derelict land requires treatment.

A1.4 Establishing in the Visual Baseline

Desk and Field Studies: The visual baseline will establish the area in which the site and the proposed development may be visible, the different groups of people who may experience the views, the places where they will be affected and the nature, character and amenity of those views.

The area of study for the Visual Assessment is determined through identifying the area from which the existing site and proposal may be visible (the Zone of Theoretical Visibility or ZTV). The baseline ZTV of the site is determined through either manual topographical analysis (a combination of desk and field based analysis which are considered appropriate for Landscape and Visual Appraisals and projects below the EIA threshold) or digital mapping based on bare earth modelling, (which do not take account of features such as vegetation or built form) constructing a map showing the area where the proposal may theoretically be visible. The extent of the mapping will depend on the type of proposal. The actual extent of visibility is checked in the field (both in the summer and winter months if the project timescales allow) to record the screening effect of buildings, walls, fences, trees, hedgerows and banks not identified in the initial bare ground mapping stage and to provide an accurate baseline assessment of visibility. Viewpoints within the ZTV should also be identified during the desk assessment, and the viewpoints used for photographs selected to demonstrate the relative visibility of the site (and any existing landscape and built forms). The selection of a range of key viewpoints will be based on the following criteria for determination in the field:

- The requirement to provide an even spread of representative, specific, illustrative or static / kinetic / sequential / transient viewpoints within the ZTV and around all sides of the Site.
- From locations which represent a range of near, middle and long distance views (although the most distant views may be discounted in the impact assessment if it is judged that visibility from this distance will be extremely limited).
- Views from sensitive receptors within designated, historic or cultural landscapes or heritage assets (such as from within World Heritage Sites; adjacent to Listed Buildings - and co-ordinated

with the heritage consultant - Areas of Outstanding Natural Beauty or Registered Parks and Gardens) key tourist locations and public vantage points (such as viewpoints identified on OS maps).

- The inclusion of strategic / important / designed views and vistas identified in published documents.

Views from the following are to be included in the visual assessment:

1. Individual private dwellings. These are to be collated as representative viewpoints as it may not be practical to visit all properties that might be affected.
2. Key public buildings, where relevant (e.g. libraries; hospitals, churches, community halls etc)
3. Transient views from public viewpoints, i.e. from roads, railway lines and public rights of way (including tourist or scenic routes and associated viewpoints);
4. Areas of open space, recreation grounds and visitor attractions; and
5. Places of employment, are to be included in the assessment where relevant.

A1.4 Establishing in the Visual Baseline (continued)

The final selection of the key viewpoints for inclusion in the LVA will be based proportionately in relation to the scale and nature of the development proposals and likely significant effects and in agreement with the LPA.

The visual assessment should record:

- The character and amenity of the view, including topographic, geological and drainage features, woodland, tree and hedgerow cover, land use, field boundaries, artefacts, access and rights of way, direction of view and potential seasonal screening effects will be noted, and any skyline elements or features.
- The type of view, whether panoramas, vistas or glimpses.

The baseline photographs are to be taken in accordance with the Landscape Institutes technical guidance on Photography and Photomontage in LVIA (Landscape Institute 2011). The extent of visibility of the range of receptors is based on a grading of degrees of visibility, from a visual inspection of the site and surrounding area. There will be a continuity of degree of visibility ranging from no view of the site to full open views. Views are recorded, even if views are truncated of the existing site, as the proposed development may be visible in these views. To indicate the degree of visibility of the site from any location three categories are used:

a) Open View:

An open, unobstructed and clear view of a significant proportion of the ground plane of the site; or its boundary elements; or a clear view of part of the site and its component elements in close proximity.

b) Partial View:

A view of part of the site, a filtered or glimpsed view of the site, or a distant view where the site is perceived as a small part of the wider view;

c) Truncated View:

No view of the site or the site is difficult to perceive.

Following the field survey (which should cover ideally both winter and summer views) the extent to which the site is visible from the surrounding area will be mapped. A Photographic Viewpoint Plan will be prepared to illustrate the representative, specific and illustrative views into / towards and within the Site (if publicly accessible) and the degree of visibility of the site noted. This Plan will be included in a Key Views document for agreement with the Local Planning Authority and any other statutory consultees as part of the consultation process. The visual assessment will include a series of annotated photographs, the location and extent of the site within the view together with identifying the character and amenity of the view, together with any specific elements or important component features such as landform, buildings or vegetation or detracting features which interrupt, filter or otherwise influence views. The photograph will also be annotated with the Value attributed to the receptor or group of receptors.

By the end of this stage of the combined landscape and visual site study, it will be possible to advise, in landscape and visual terms, on any specific mitigation measures required in terms of the developments preferred siting, layout and design.

Value of Visual Receptors

Judgements on the value attached the views experienced are based on the following criteria.

Table A1.2 – Value Attached to Views

Value	Criteria
High	Views from landscapes / viewpoints of national importance, or highly popular visitor attractions where the view forms an important part of the experience, or with important cultural associations. This may include residential receptors in Listed Buildings where the primary elevation of the dwelling is orientated to take advantage of a particular view (for example across a Registered Park and Garden or National Park).
Medium	Views from landscapes / viewpoints of regional / district importance or moderately popular visitor attractions where the view forms part of the experience, or with local cultural associations. This may include residential receptors where the primary elevation of the dwelling is orientated to take advantage of a particular view.
Low	Views from landscapes / viewpoints with no designation, not particularly important and with minimal or no cultural associations. This may include views from the rear elevation of residential properties.

Susceptibility of the Visual Receptor to the Proposed Change

The susceptibility to the proposed changes in views and visual amenity occur as a result of the occupation or activity of people experiencing the view and the extent to which their attention or interest may be focused on the views and the visual amenity they experience. The grouping of susceptibility of the visual receptors is set out later in this document.

A1.5 Predicting and Describing the Landscape and Visual Effects

An assessment of visual effect deals with the change on the character and amenity arising from the proposal on the range of visual receptors.

The assessment of effects aims to:

- Identify systematically and separately the likely landscape and visual effects of the development;
- Identify the components and elements of the landscape that are likely to be affected by the scheme;
- Identify interactions between the landscape receptors and the different components of the development at all its different stages (e.g. enabling, construction, operation, restoration etc);
- Indicate the secondary mitigation measures over and above those already designed into the scheme proposed to avoid, reduce, remedy or compensate for these effects;
- Estimate the magnitude of the effects as accurately as possible and considering this in relation to the sensitivity of the receptor; and
- Provide an assessment of the significance of these effects in a logical and well-reasoned fashion.

Having established the value of the landscape and visual receptor, the effects are then considered in relation to the magnitude of change, which includes the size / scale, geographical extent of the areas influenced and the duration and reversibility.

Wherever possible tables or matrixes will be used, linked with the illustrative plans, so that the landscape and visual effects are recorded and quantified in a systematic and logical manner. Consideration is given to the impacts on completion of development at Year 1 and at maturity (Year 15) (to represent short, medium and long term effects) so that the effects of the development after mitigation has matured are identified. Assumptions or limitations to the assessment will also be set out.

Effects will include the direct and/or indirect impacts of the development on individual landscape elements / features as well as the effect upon the general landscape character and visual receptors.

Landscape Susceptibility

Landscape susceptibility is evaluated by its ability to accommodate the proposed change (i.e. the degree to which the landscape is able to accommodate the **proposed** change without undue consequences for the maintenance of the baseline situation and / or the achievement of landscape planning policies and strategies) as set out in Table A1.2.

As part of the assessment of the landscape character and its component parts, conclusions will be drawn as to the overall susceptibility of the landscape / landscape elements and visual environment to the type of development proposed. Existing landscape capacity assessments may form a starting point for the refinement of the assessment of landscape susceptibility at the local and site level.

Table A1.3 – Landscape Susceptibility Criteria

Susceptibility	Criteria
High	A landscape or townscape particularly susceptible to the proposed change, which would result in significant negative effects on landscape character, value, features or individual elements.
Medium	A landscape or townscape capable of accepting some of the proposed change with some negative effects on landscape character, value, features or elements.
Low	A landscape or townscape capable of accommodating the proposed change without significant negative effects on landscape character, value, features or elements.

Landscape Sensitivity

The assessment of landscape sensitivity is then combined through a judgement on the value attributed to that landscape receptor / component and the susceptibility of the landscape receptor to the proposed change using the following matrix.

Table A1.4 - Landscape Sensitivity

		Landscape Receptor Susceptibility		
		High	Medium	Low
Landscape Value	High	High	High - Medium	Medium
	Medium	High - Medium	Medium	Medium - Low
	Low	Medium	Medium - Low	Low - Negligible

Visual Susceptibility

The susceptibility of the different types of people to the changes proposed is based on the occupation of the activity of the viewer at a given location; and the extent to which the persons attention or interest may be focussed on a view, considering the visual character and amenity experienced at a given view. The criteria used to assess the susceptibility of a visual receptor are summarised below.

Table A1.5 – Visual Susceptibility Criteria

Susceptibility	Criteria
High	People with particular interest in the view, with prolonged viewing opportunity, including: Residents where views contribute to the landscape setting enjoyed by the community; those engaged in outdoor recreation, such as those using public rights of way; views from within the designated landscapes and heritage assets where the views of the surroundings are an important contributor to the experience; travellers along scenic routes.
Medium	People with moderate interest in the view and their surroundings, including: Communities where the development results in changes in the landscape setting or value of views enjoyed by the community; people travelling through the landscape, where the appreciation of the view contributes to the enjoyment and quality of that journey; people engaged in outdoor recreation, where their appreciation of their surrounding and particular view is incidental to their enjoyment of that activity.
Low	People with momentary, or little interest in the view and their surroundings, including: People engaged in outdoor sport; People at their work place; Travellers where the view is fleeting or incidental to the journey.

Visual Sensitivity

The sensitivity of visual receptors in views is based on the professional judgement combining the value and susceptibility to change on that visual receptor.

Table A1.6 - Visual Sensitivity

		Visual Receptor Susceptibility		
		High	Medium	Low
Value of Visual Receptor	High	High	High - Medium	Medium
	Medium	High - Medium	Medium	Low
	Low	Medium	Low	Low - Negligible

A1.6 Magnitude of Effects

In determining the magnitude of landscape effects, this will consider:

1. Scale and size of the change in the landscape (considering the changes to individual components and the effect this has on contribution to landscape character; the degree to which aesthetic or perceptual aspects of the landscape are altered; whether the effect changes the key characteristics of the landscape);
2. Geographic extent over which the landscape effects will be experienced (effects limited to the site level; effects on the immediate setting; effects relating to the scale of the landscape type or character area; effects on a larger scale such as influencing several landscape character areas); and
3. The duration, permanence and reversibility of the proposal.

Similar to landscape effects, the magnitude of visual effects will consider:

1. Scale and size of the change to the view (considering loss or addition of features to the view and proportion of the view occupied by the proposed development; the degree of contrast or integration of any new landscape features or changes in the landscape and characteristics in terms of form, scale, mass, line, height, colour and texture; and the nature of the view of the proposed development relative to the time over which it will be experienced and whether views will be full, partial or glimpses).
2. Geographical extent (including the angle of the view; the distance of the viewpoint to the proposed development; and the extent of the area over which the changes would be visible).
3. The duration, permanence and reversibility of the proposal.

A1.7 Significance of Effects

The two principal criteria determining the significance of effects are the sensitivity of the receptor in relation to the magnitude of effect. A higher level of significance is generally attached to the magnitude of change on a sensitive receptor; for example, a low magnitude of change on highly sensitive receptor can be of greater significance than very high magnitude of change on low sensitivity receptor. Therefore, whilst the table opposite sets out a starting point for the assessment, it is important that a balanced and well reasoned professional judgement of these two criteria is provided and an explanation provided.

In order to develop thresholds of significance, both the sensitivity of receptors and the magnitude of change must be classified for both landscape receptors and visual receptors as set out in the tables below. Where landscape effects are judged to be adverse, additional mitigation or compensatory measures are to be considered. The significant landscape effects remaining after mitigation are then to be summarised as the residual effects.

Magnitude Elements					Overall Magnitude of Change
Size / Scale	Geographic Extent	Duration	Permanence	Reversibility	
Major	Wide or Local; Direct and open view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	High
Major	Site Level; Direct and open view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	High - Medium
Moderate	Local / Site Level; Direct or oblique, partial view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	Medium - Low
Minor	Local / Site level; Oblique partial or glimpsed view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	Low
Negligible	All of the above and a truncated view	Long - Short Term	Permanent or Temporary	Irreversible or Reversible	Negligible

The criteria for each of the above is to be determined relative to the size and scale of the individual project applying professional judgement and opinion.

However, the following are typically used:

Size and Scale: relates to the combination of the following (and are linked to the descriptions set out under table A1.9):

- extent of existing landscape elements that will be lost (to proportion of the total extent that is lost) and the contribution that the element has to landscape character;
- the degree to which aesthetic or perceptual aspects of the landscape are altered (addition or removal of features and elements)
- whether the effect changes the key distinctive characteristics of the landscape;
- size and scale of change in the view with respect to the loss or addition of features in the view and changes to the composition, including the proportion of the view occupied by the proposed development;
- the degree of contrast or integration of any new features or changes in the townscape with the existing or remaining townscape or landscape elements and characteristic terms of form, scale, mass, line, height, colour and texture;
- the nature of the view of the proposed development, in terms of relative amount of time over which it will be experienced and whether views will be open, partial, glimpsed.

Geographic Extent: The geographic area over which the landscape effects will be felt relative to the proposal; and relative to visual receptors is to reflect the angle of the view; the distance of the viewpoint; the extent of the area over which the changes would be visible.

Duration, Permanence and Reversibility: These are separate but linked considerations and are project specific. For example, changes to a brownfield urban site could be reversible. Construction impacts are likely to be short term, temporary, but see the start of a permanent change. Operational effects are likely to be long term, permanent and either irreversible or reversible, depending on the nature of the project.

No change: If there is no change to the landscape or visual receptor then the overall magnitude of change will be **Neutral**.

A1.7 Significance of Effects (continued)

Effects will be described clearly and objectively, and the extent and duration of any negative / positive effects quantified, using four categories of effects, indicating a gradation from high to low.

Table A1.7 - Sensitivity and Magnitude of Effects

		Landscape and Visual Receptor Sensitivity		
		High	Medium	Low
Magnitude of Change	High	Major	Moderate to Major	Moderate
	Medium	Moderate to Major	Moderate	Minor - Moderate
	Low	Moderate to Major	Minor - Moderate	Minor
	Negligible	Negligible	Negligible	Negligible
	Neutral	Neutral	Neutral	Neutral

The degree of effect is graded on the following scale in relation to the significance criteria above:

Table A1.9 - Significance of Landscape and Visual Effects

Effect Significance	Criteria
Substantial negative / adverse effect	Where the proposals would cause the substantial or significant loss of key mature landscape elements and characteristic features / a significant deterioration in the character and amenity of the view in terms of perceptual qualities / or introduce element(s) considered to be wholly and substantially uncharacteristic of the area; and where the proposals would result in a significant change, or more notable change in more distant views, on the character and amenity of the view from the range of visual receptors.
Major negative / adverse effect	Where the proposals would cause the total loss of key mature landscape elements and characteristic features / a major deterioration in the character and amenity of the view in terms of perceptual qualities / or introduce element(s) considered to be wholly and substantially uncharacteristic of the area; and where the proposals would result in a significant change, or more notable change in more distant views, on the character and amenity of the view from the range of visual receptors.
Moderate negative / adverse effect	Where the proposals would cause the loss of some of the key landscape elements and / or particularly representative characteristic features / or introduce elements considered significantly uncharacteristic of the area; and a noticeable deterioration in the character and amenity of the view from the range of visual receptors.
Minor negative / adverse effect	Where the proposals would cause the loss of some landscape elements or characteristic features / introduce elements characteristic of the area; and a barely perceptible deterioration in the character and amenity of the view from the range of visual receptors.

Negligible	Where the proposals would have no discernible deterioration or improvement in the existing baseline situation in terms of landscape elements or view.
Neutral	Where the proposals would result in no change overall (resulting in no net improvement or adverse effect).
Minor positive / beneficial effect	Where the proposals would result in minor loss or alteration or improvement of the key elements and features / provide a small enhancement to the existing landscape elements or characteristic features; and cause a barely perceptible improvement in the existing view for the range of receptors.
Moderate positive / beneficial effect	Where the proposals would cause some enhancement to the existing landscape elements or characteristic features / noticeable improvement in the character and amenity of the existing view from a range of visual receptors.
Major positive / beneficial effect	Where the proposals would cause a major enhancement to the existing landscape elements or characteristic features / noticeable improvement in the character and amenity of the existing view from a range of visual receptors.
Substantial positive / beneficial effect	Where the proposals would cause a significant enhancement to the existing landscape elements or characteristic features / wholesale improvement in the character and amenity of the existing view from a range of visual receptors.

Effects assessed as being greater than moderate are considered to be a significant effect.

A1.8 Effects During Site Enabling and Construction

It is recognised that project characteristics and hence sources of effects, will vary through time. The initial effects arise from the site enabling and construction works. Sources of landscape and visual effects may include:

- The location of the site access and haulage routes;
- The origin and nature of materials stockpiles, stripping of material and cut and fill operations / disposal and construction compounds;
- The construction equipment and plant (and colour);
- The provision of utilities, including lighting and any temporary facilities;
- The scale, location and nature of any temporary parking areas and on-site accommodation;
- The measures for the temporary protection of existing features (such as vegetation, trees, ponds, etc) and any temporary screening (such as hoarding lines); and
- The programme of work and phasing of development.

A1.9 Effects During Operation (at Year 1)

At the operational stage, the sources of landscape and visual effects may include:

- The location, scale, height, mass and design of buildings in terms of elevational treatment; structures and processes, including any other features;
- Details of service arrangements such as storage areas or infrastructure elements and utilities and haulage routes;
- Access arrangements and traffic movements;
- Lighting;
- Car parking;
- The noise and movement of vehicles in terms of perceived effects on tranquillity;
- Visible plumes from chimneys;
- Signage and boundary treatments;
- Outdoor activities that may be visible;

- The operational landscape, including landform, structure planting, green infrastructure and hard landscape features;
- Land management operations and objectives; and
- The enhancement or restoration of any landscape resource of particular view.

A1.10 Mitigation and Compensatory Measures

The purpose of mitigation is to avoid, reduce and where possible, remedy or offset, any significant (major to minor) negative (adverse) effects on the landscape and visual receptors arising from the proposed development. Mitigation is thus not solely concerned with “damage limitation”, but may also consider measures that could compensate for unavoidable residual effects. Mitigation measures may be considered under three categories:

- Primary measures that intrinsically comprise part of the development design through an iterative process;
- Standard construction and operational management practices for avoiding and reducing environmental effects; and
- Secondary (or residual) measures designed to specifically address the remaining effects after the primary and standard construction practices have been incorporated.

If planting is required as part of the mitigation measures, it is proposed that areas of planting are introduced as part of the proposed development and the height of this planting will be considered as follows (dependent on plant specification and details of the scheme):

- Planting at completion / short term: 3-5 metres (dependent on plant specification).

Strategies to address likely negative (adverse) effects include:

- Prevention and avoidance of an impact by changing the form of development;
- Reduce impact by changing siting, location and form of development;

- Remediation of impact, e.g. by screen planting;
- Compensation of impact e.g. by replacing felled trees with new trees; and
- Enhancement e.g. creation of new landscape or habitat.

A1.11 Guidelines for Mitigation:

- Consultation with local community and special interest groups, if possible, on the proposed mitigation measures is important;
- Landscape mitigation measures should be designed to suit the existing landscape character and needs of the locality, respecting and building on local landscape distinctiveness and helping to address any relevant existing issues in the landscape;

Many mitigation measures, especially planting, are not immediately effective. Where planting is intended to provide a visual screen for the development, it may also be appropriate to assess residual effects for different periods of time, such as day of opening at Year 1.

- The proposed mitigation measures should identify and address specific landscape issues, objectives and performance standards for the establishment, management maintenance and monitoring of new landscape features.
- A programme of appropriate monitoring may be agreed with the regulatory authority, so that compliance and effectiveness can be readily monitored and evaluated.

Planning Policy Manager
Fareham Borough Council

Enquiries to: Louise Hague

Our ref: Y00511

Tel: 0370 7794077

Your ref: Regulation 19 Local Plan
Consultation

Date: 18 December 2020

Dear Sir/Madam

Regulation 19 Local Plan Consultation

In response to the above consultation, please find attached the general landowner comments in written representations on behalf of Hampshire County Council Property Services, in its role as a public landowner to help inform the next stages of the emerging Local Plan Update to 2038. These are separate from the comments submitted on behalf of Hampshire County Council in respect of its regulatory functions.

As landowner, the County Council will be responding to the Local Plan Consultation on the following Policies/Paragraphs (please see attached):

- Strategic Policy H1: Housing Provision
- Policy D1: High Quality Design and Place Making
- Housing Allocation Policy: HA3 (Southampton Road)
- Housing Allocation Policy: HA9 (Heath Road)
- Housing Allocation Policy: HA13 (Hunts Pond Road)
- Housing Allocation Policy: HA22 (Wynton Way)
- Housing Allocation Policy: HA24 (335-337 Gosport Road)
- Strategic Policy R4: Community and Leisure Facilities
- Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent
- Policy D4: Water Quality and Resource
- Paragraphs 11.55/56

To date, Hampshire County Council in its capacity as landowner, has supported the earlier stages of the Local Plan Update to 2037. The purpose of the following is to offer comments, from a landowning perspective, to help inform the scope and soundness of Fareham Local Plan when examined by the Secretary of State as anticipated in Summer 2021.

I hope this is helpful to you in continuing to support the Borough Council in subsequent stages of the Local Plan Update to 2037.

Yours sincerely

Louise Hague MRICS MRTPI
Senior Development Manager

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

A1 Is an Agent Appointed?

Yes

No

A2 Please provide your details below:

You can check which paragraph, policy etc you want to comment on by looking at the

You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy H1: Housing Provision

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its capacity as landowner supports the spatial approach to Policy H1 to distribute development through Local Plan allocations. The County Council considers that this is a sound approach that is positively prepared, justified and deliverable within the Plan period (effective) based on the Borough Council's objectively assessed needs and wider Local Plan evidence base.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council, as landowner, supports Policy D1 as it considers that the density of schemes should be informed by and be sympathetic to the character of the surrounding areas, rather than having a set standard. This allows sufficient flexibility (effective) to support best practice urban design principles particularly with regards to legibility to emphasise the importance of place as well as sensitively manage the transition from an urban to rural settlement edge.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Hampshire County Council as a landowner supports the allocation of its land in Policy HA9. The site has a resolution to grant planning permission for 70 dwellings (insert ref). The County Council, as applicant, is currently engaged in on-going discussions with the Borough Council Planning Case Officer, Natural England and third-party providers to put in place sufficient mitigation to achieve a nitrate neutral development. The County Council as landowner has also submitted a pre-application submission to Natural England for consideration of its own land to mitigate the nitrate output of site Policy HA9. This evidence offers a realistic prospect that the site is capable of coming forward in within the early stages of the Plan period. The County Council, as landowner, re-affirms that it's land within Policy HA9 is available and deliverable.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

Strategic Policy R4: Community and Leisure Facilities

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the intentions of Policy R4 to maintain the provision of necessary community facilities during the Plan period. Notwithstanding its support for Policy R4, the County Council is still concerned that the draft policy does not meet the tests of soundness as it appears overly restrictive and not sufficiently flexible to respond to unexpected and ever-changing needs to community facilities brought through public service providers service reviews during the Plan period. This presents a risk that Policy R4 is not effective.

The County Council as a public service provider has an on-going need to review and, if necessary, rationalise surplus facilities as part of wider County Council strategies to improve local services in the community. Such County Council services include 'Children's Services' (pre-school through to the 14-19 year age group), 'Adult Services' (catering for those with learning disabilities, mental health, older people, and persons with physical disabilities), and 'Community and Cultural Services' (libraries, museums, sports, recreation, tourism).

The County Council would like to emphasise its statutory function to provide public services, and to remain effective in meeting this commitment, the County Council will be implementing a series of service-driven improvements, covering both frontline and support services. This may sometimes result in the 'necessary loss' of particular community buildings and land in County Council ownership, in order to reinvest proceeds of sale in local service improvements. The policy should have increased flexibility to accommodate the unique role and function of public service providers.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to accommodate the unique role and function of public service providers and so be effective.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council therefore recommends the following addition/ changes to Policy R4 to overcome its objection (see below). This draws on the wording of Basingstoke & Deane Borough Council's Adopted Local Plan 2011 – 2029, Policy CN8 – Community, Leisure and Cultural Facilities, part h, and South Downs Local Plan 2014– 2033, Development Management Policy SD43- New and Existing Community Facilities and is therefore a material consideration in Plan making. The County Council's proposed amendment would reinforce the unique role and function of public service providers and their need for managed change to deliver operational service improvements over the Plan period (be effective).

B4c Your suggested revised wording of any policy or text:

Development proposals that would result in the loss of community or publicly owned or managed facilities will be permitted where:

- i. The facility is no longer needed; and
- ii. No alternative community use of the facility is practical or viable; and
- iii. Any proposed replacement or improved facilities will be of equivalent or better in terms of quality, function and accessibility; or
- iv. the proposals are part of a public service provider's plans to re-provide or enhance local services and the proposal will clearly provide sufficient community benefit to outweigh the loss of the existing facility, meeting evidence of a local need.*

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its role as a public landowner supports the intentions of Policy NE4 to protect the integrity of the designated sites from increased nutrients. The County Council has confidence that any increased wastewater production related to its draft allocated sites will be suitably mitigated through on-site and off-site mitigation measures as required under the policy.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy D4: Water Quality and Resources

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the principle of Policies CC1 and D4.

Notwithstanding this, the County Council is concerned that the draft policy does not meet the tests of soundness as it is not sufficiently flexible to respond to unexpected changes during the plan period.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to be consistent with national policy.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council would be mindful to overcome its objection if the policy is amended to introduce sufficient flexibility in the wording. This would still seek to achieve a high standard of sustainable development but would not require potentially unattainable standards to be met (be effective).

B4c Your suggested revised wording of any policy or text:

To minimise impact on the water environment and adapt to climate change, all new dwellings shall achieve as a minimum the Optional Technical Housing Standard for Water efficiency of no more than 110 litres per person per day, *unless sufficient evidence justifies meeting the mandatory national standard (no more than 125 litres per person per day)*. Development that achieves a higher technical standard of 100 litres per person per day will be supported.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council, in its role as a public landowner and service provider, supports the policy aspiration to achieve energy efficiencies in new non-residential development. In particular the County Council notes that paragraph 11.55 considers how the BREEAM assessment process can influence viability of a proposal and make allowances for this, to ensure the plan will remain effective over the plan period. For example, as landowner, the County Council considers that any forthcoming draft policy should be open to demonstrating meeting this energy efficiency standard by alternative equivalent standards such as those based on an embodied carbon (CO₂ / Kg / sqm) metric as advocated by the RIBA 2030 Climate Challenge:
<https://www.architecture.com/-/media/files/Climate-action/RIBA-2030-Climate-Challenge.pdf>

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

1.0 INTRODUCTION AND SUMMARY

1.1 Southern Planning Practice are instructed by Raymond Brown Minerals & Recycling Ltd (Raymond Brown), to submit representations to the Regulation 19 version of the Fareham Local Plan 2037. Raymond Brown is acting on behalf of the two landowners, Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd (please see attached land ownership plan).

1.2 Raymond Brown is part of the Raymond Brown Group, a leading recycling and waste management business and distributor of primary and recycled aggregates for use in construction applications. One of their sites is at Rookery Farm, Fareham. The land is located immediately north of the M27 motorway and to the west of Whiteley. Access is from Botley Road, approximately 100m north of the bridge over the M27.

1.3 The Local Plan, as drafted, is assessed to be UNSOUND and also fails to comply with the Duty to Co-Operate. These representations set out the reasons why: -

1. the Plan is considered to be UNSOUND and
2. fails to comply with the Duty to Co-Operate

and sets out the steps that require to be taken to make the Plan SOUND.

1.4 Separate representation forms have been submitted against each policy and paragraph which is considered to be UNSOUND, but the case to be made is set out in full in this document.

1.5 In summary, OBJECTION is raised to Strategic Policy H1 Housing Provision on the grounds that the figures promoted are not soundly based or justified. This is addressed in detail in Section 2.0. Objection is also raised to the allocation of a number of the housing sites in that they are not suitable, and /or available and/or achievable, particularly within the Local Plan period. This is addressed under Section 3.0.

1.6 Section 4.0 sets out why Land at Rookery Farm should be allocated as a Housing Site to start to address the issues identified in Sections 2.0 and 3.0. Section 5.0 draws these matters together with consideration of modifications that are required to be made to the Plan

to ensure that it is SOUND and will provide a sound planning framework to deliver the much needed housing over the Plan Period.

- 1.7** It is concluded that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.
- 1.8** Objections are therefore raised to Policies H1, FTC1, FTC2, FTC3, FTC4, FTC5, HA7, HA13 and the omission of an allocation for housing for Rookery Farm, Botley Road, Fareham. Objections are also raised to paragraphs 3.19 (including Figure 3.1) as well as paragraphs 4.1 – 4.20 including Tables 4.1, 4.2 and 4.3.

2.0 OBJECTION to Strategic Policy H1 – Housing Provision

Overview

2.1 The objections to this Policy are several and are addressed individually below. The individual and cumulative failings render the policy UNSOUND and as Strategic Policy H1 forms the basis for the provision of much needed housing across the whole Borough, it follows that the whole Plan is rendered UNSOUND. It should be noted that although the issues have been subdivided into several sections, many of the issues interrelate and cumulatively exacerbate the conclusions drawn that the Council is failing to provide properly for its housing need.

2.2 The objections to this Policy include:

- (i) The Housing Numbers used and in particular the reliance on the draft Standard Method set out in the Changes to the Current Planning System in the Government’s White Paper;
- (ii) Duty to Co-Operate and Unmet Need – Fareham has not undertaken this Duty in a sound manner;
- (iii) Additional factors Contributing to the Shortfall, including the 5 year Housing Land Supply Position;
- (iv) Over-reliance on Welborne to provide a significant proportion of Fareham’s housing which is considered unachievable, resulting in a need for more sites to be allocated;
- (v) Inability to meet the identified Affordable Housing Provision;
- (vi) Over-reliance on Windfall allowance

2.3 Before analysing the approach adopted by Fareham, it is first worth reviewing the clear guidance on the approach to be followed as set out under the National Planning Policy Framework (NPPF) and the Planning Practice Guidance (PPG). It is important to note that the NPPF makes it clear that “*strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas*” (Paragraph 11).

2.4 Paragraph 60 builds on this and states that “*To determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional*

circumstances justify an alternative approach which also reflects current and future demographic trends and market signals. In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for." This clarifies how the housing numbers calculated by the standard method should be considered when preparing a Local Plan. Paragraph: 004 (Reference ID: 2a-004-20190220) of the Planning Practice Guidance confirms that the standard method should be used to calculate a **minimum** (emphasis added) housing need figure.

2.5 In addition to the Borough's own housing needs, as acknowledged by the draft Local Plan, its housing figure needs to incorporate the needs of neighbouring authorities. Paragraph 35 a) of the NPPF sets out that in order for a plan to be sound it must be positively prepared "*providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs (our emphasis); and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development*".

2.6 The following sections demonstrate how Fareham has failed to follow this clear guidance with the result that Strategic Policy H1 and the Plan is UNSOUND.

i) **Housing Numbers: Reliance on the Standard Method set out in the 'Changes to the Current Planning System' White Paper.**

2.7 The Publication Draft correctly points out at Para 4.2 that '*Local housing need should be determined by using the Standard Method set out in national Planning Practice Guidance (PPG). This Method currently combines 2014-based household projections with affordability data released in March 2020 to calculate the annual need. Using this method, the housing need for Fareham currently stands at a minimum of 514 dwellings per annum (dpa).*'

2.8 Fareham, however, has chosen to use the new Standard Method set out in the 'Changes to the Current Planning System' White Paper, which was published on 6th August 2020 with consultation closing on 1st October 2020.

2.9 Para 4.2 of the Publication Draft explains why the Council has 'jumped the gun' and used the draft new Method:

'The Council therefore considers it appropriate for this Publication Local Plan to plan for a scale of growth based on the proposed new Method, and not one based on out-of-date household projections. This reduces the housing need figure to 403 dpa, based on a base date of 2021. The new Method would be introduced with a change to the PPG and the timing of submission of this plan for examination will be determined by the precise wording of the government policy.'

- 2.10** ON 16 DECEMBER 2020, GOVERNMENT ANNOUNCED THEIR RESPONSE TO THE 'CHANGES TO THE CURRENT PLANNING SYSTEM' WHITE PAPER AND PUBLISHED REVISED PROPOSALS FOR ENABLING THE DELIVERY OF MORE HOMES ACROSS ENGLAND. IT IS UNDERSTOOD THAT GOVERNMENT WILL NOT NOW PROCEED WITH THE DRAFT NEW STANDARD METHODOLOGY ANNOUNCED EARLIER IN THE YEAR AND ON WHICH FAREHAM HAS BASED ITS HOUSING NUMBERS. INSTEAD, THE GOVERNMENT HAS ANNOUNCED THAT IT WILL CONTINUE TO RETAIN THE STANDARD METHOD IN ITS CURRENT FORM WITH THE ADDITION OF A 'TOP-UP' APPLICABLE TO ENGLAND'S 20 LARGEST CITIES. PLEASE SEE LINK:

<https://www.gov.uk/government/consultations/changes-to-the-current-planning-system/outcome/government-response-to-the-local-housing-need-proposals-in-changes-to-the-current-planning-system>

- 2.11** It follows that the only basis that Fareham can and should proceed at the current time is to use the existing Standard Method which would result in an uplift in its dwellings per annum (dpa) from 403 to at least 514.

ii) Duty to Co-Operate and Unmet Need from Neighbouring Authorities

- 2.12** Fareham Borough Council is a member of the Partnership for South Hampshire (PfSH). In September 2019, Fareham Borough Council and Havant Borough Council together with all the authorities of the PfSH published a Statement of Common Ground (SOCG). The SOCG sets out how the local authorities in South Hampshire have successfully worked together on strategic planning matters and how they continue to do so. As part of the Local Plan Review, a Statement of Compliance with the Duty to Cooperate has been produced. This is in accordance with Paragraph 24 of the NPPF. This confirms that the Council is proposing to

take the approach that the issue of unmet need is not dealt with as specific to any authority, but as a general contribution (Paragraph 4.6).

- 2.13** Fareham Borough Council is identified as being within the Portsmouth Housing Market Area (HMA). The PfSH Strategic Housing Market Assessment (SHMA) indicates an overall objectively assessed need figure of 121,500 dwellings, over the whole PfSH area from 2014-2036. It should be noted that the SHMA was prepared in January 2014 and the identified housing need is not based on up to date figures, therefore its housing numbers are considered to be out-of-date. The SOCG acknowledges that the housing need figures within the PfSH Spatial Position Statement (SPS) (2016) are not in accordance with standard methodology set out in NPPF (2019). The SPS is being reviewed to bring it in line with updated development needs. However, there is no indicative timescale for the SPS review and given the recent Housing White Paper, such a statement is unlikely to come out ahead of the submission of the Fareham Local Plan.
- 2.14** One key issue arising for the PfSH Portsmouth HMA/PfSH East (Portsmouth, Havant, Fareham, Gosport, Winchester) is the challenge of delivering sufficient homes to meet the housing need of the area given the significant geographical constraints and nationally important environmental and landscape designations. It is acknowledged that some authorities within the PfSH East area are more constrained than others. Portsmouth, Havant and Gosport are all physically constrained as well as having coastal environmental designations, to varying degrees. Therefore, as Fareham Borough is less constrained and physically has the space to provide housing in addition to its own need, the Borough should look to accommodate unmet need from neighbouring authorities.
- 2.15** It is acknowledged that Portsmouth cannot meet its housing need and a key role of PfSH has been to consider the capacity of other local authorities in the PfSH area which could contribute to accommodating the unmet need arising from Portsmouth. As acknowledged, Fareham Borough has relatively few constraints compared to its neighbouring authorities, indeed Fareham Borough has been identified as an area which can help to accommodate the unmet need arising from Portsmouth. Paragraph 4.5 of the Publication Plan confirms that Portsmouth City Council have asked Fareham to contribute 1,000 dwellings to their unmet need. It also confirms that there is likely to be an unmet need arising from Gosport and Havant (this is now emphasised in Table 1, if the standard new method were applied). However, Fareham have only included 847 dwellings in the total housing requirement to

contribute to the unmet need of neighbouring authorities. This figure is alone not enough to provide for Portsmouth’s unmet need, never mind the other authorities within the PfSH East area. It is evident therefore that the plan is not appropriately planning for unmet need arising from neighbouring authorities and has not been positively prepared in accordance with paragraph 35 a) of the NPPF. It is therefore unsound.

2.16 The following table looks at the housing need per annum for all the authorities within the PfSH East area. It sets out the current local plan requirement, the average delivery rate over the last 3 years, the housing figure under the current standard methodology and the housing figures under the proposed new standard method set out in the August 2020 consultation ‘Planning for the Future’ White Paper. It should again be noted that Fareham Borough Council are using the housing need figure calculated by the proposed new standard method set out in the White Paper, not the current standard method required by the NPPF.

PfSH East	Current Local Plan Requirement	Average Delivery (last 3 years)	Current Standard method	Proposed new standard method (at August 2020)	Change in housing requirement under SM
Portsmouth	547	328	855	730	-125
Fareham	147	310	514	403	-111
Gosport	170	145	238	309	+71
Havant	315	402	504	963	+459
Winchester	625	643	692	1,025	+333
Total	1,804	1,828	2,802	3,430	+628

Table 1 – Housing need per annum and delivery rates for authorities within PfSH East

2.17 It is also pertinent to note that whilst Fareham has chosen to adopt the draft new Standard Methodology for its own figures, it has not acknowledged the implications arising in terms of the Duty to Co-operate and that there is a significant uplift overall in the housing requirements, including for those authorities potentially already struggling, including Havant and Gosport.

2.18 In Summary:

- No Local Authority in the PfSH East area is currently planning for enough homes to meet their identified need.
- Whilst the housing need as calculated by the proposed new standard method (August 2020) for Portsmouth and Fareham has slightly reduced from the current standard method, the housing need for Gosport, Havant and Winchester has significantly increased. This has resulted in an increase of just over 600 dwellings per annum in the PfSH East area.
- No Local Authority in the PfSH East has been able to deliver their housing need as required by the current standard method in the last 3 years.
- The total housing need in the PfSH East area under the proposed new standard method is far higher than the previously identified housing need.

iii) Additional Factors affecting Fareham's Housing Numbers

2.19 Table 1 (Housing need per annum and delivery rates for authorities within PfSH East) confirms that no Local Authority in the PfSH East area has been able to deliver their housing need as required by the current standard method in the last 3 years. There could be several explanations for the authorities not meeting their housing need including reliance on large sites not coming forward or delivering at the rate they should, not appropriately planning for the homes they need and the recent Solent nitrate issue could all be contributing factors.

2.20 In June 2020, Fareham published their 5 year housing land supply position. At this time, Fareham had a supply of 2.72 years. This supply obviously falls substantially below the government's requirement of a 5 year supply, as set out in Paragraph 73 of the NPPF. After reviewing the housing supply, as set out in the 5 Year Housing Land Supply Report, it is apparent that the Council remains reliant on a few large housing sites coming forward to contribute to the housing land supply in future years.

2.21 As such, Fareham Borough Council should look to bolster their supply through the allocation of a range of sites as encouraged by the NPPF.

2.22 To be able to meet the increased housing needs in a sustainable manner, and to maintain a 5 year supply of deliverable housing sites across the Plan period, the Council must look to

all tier settlements in the hierarchy to deliver homes through a range of sites. However, it should be noted that strategic sites should not be solely relied on due to lengthy lead in times. Instead, a mix of housing sites should be sought and allocated to enable a 5 year supply to be achieved and maintained.

2.23 In addition to bolstering the supply going forward, Fareham need to seek to address the backlog of unmet need. In particular, the South Coast Nitrate crisis put thousands of homes on hold for some time to resolve the eutrophication issues of the Solent to reduce impact on the protected habitats and species. The Nitrate Neutrality Update Report to PfSH Joint Committee (14 October 2019) acknowledged that *“given that there is a severely reduced number of permissions being granted in the PfSH in the financial year 2019/20, it is not unnecessary to assume that the delivery of homes will be suppressed in the years 2020/21 and 2021/22.”*

2.24 The submission Local Plan is very conservative in its ambitions for growth in the Borough, especially considering it is under a Duty-to-Cooperate to meet neighbouring authorities’ unmet need. It does not allocate many new sites and instead relies heavily on sites that have been allocated previously. Strategic Policy H1 confirms this, as the provision for 8,389 homes comprises the following:

- 552 homes already with planning permission
- 4,858 homes on sites with resolution to grant permission (Welborne contributes the large majority of these homes)

2.25 Therefore, around 65% of the housing provision already has planning permission or resolution to grant, meaning the Local Plan only allocates sites for approximately 1,750 homes for development over the plan period despite only 2.72 years of housing land supply and a record of under delivery in the Borough. It is of note that nearly 50% of the housing provision is reliant on the Welborne allocation. If this allocation is not to come forward in the plan period due to funding issues, or be significantly delayed, Fareham’s housing provision will be significantly reduced and identified housing needs will not be met. As such, the emerging Local Plan MUST look to allocate further sites accordingly.

2.26 Reflecting the above the application of a 15% contingency as shown under Table 4.3 and explained at paragraph 4.12 of the Plan appears woefully inadequate.

iv) Over Reliance on Welborne Garden Village

- 2.27** Fareham is relying very heavily on one strategic site to deliver almost 50% of its housing provision, namely Welborne Garden Village. Of the supply identified in Table 4.2 relating to Strategic Policy H1, some 4,020 of the overall provision of 8,389 is to come from this one strategic site. This is flawed and potentially undeliverable. Following a resolution to grant planning permission in October 2019 for the outline planning application under Ref: P/17/0266/OA, the Section 106 agreement has still not been signed and therefore planning permission has not yet been issued. According to the Council's website and details held on the outline planning application, a decision is due by 8th January 2021.
- 2.28** The Delivery Report¹ on Welborne Garden City sets out that up to 750 homes will be delivered in the first 5 years. However, this figure appears highly unrealistic and unachievable as set out in more detail below; in addition, the site cannot be developed until funding is secured for Junction 10 of the M27.
- 2.29** On 14 January 2020, Hampshire County Council published an Executive Decision Record on the M27 Junction 10. It confirmed that the progression of work on the Full Business Case is at an impasse, and it is understood that HCC were terminating the role as scheme promoter to avoid abortive work or expenditure, pending resolution of funding and delivery arrangements of the scheme.
- 2.30** The delivery of the Garden City is suggested to be over a 20 year period, with on average 300 dwellings a year being completed. It would be expected higher delivery in early years, lower delivery in later years. As acknowledged, the submission Local Plan relies on approximately 4,000 homes from Welborne coming forward in the plan period.
- 2.31** With regards to the delivery of the site, a key point of note is in the Council's latest 5 year Housing Land Supply (HLS) Position Statement (June 2020). This statement sets out, at paragraph 29, that the site promoter anticipates commencements/completions at Welborne to occur approximately two years later than that set out within the information supporting the

¹ Page 83 of the Delivery Document <https://welbornegardenvillage.co.uk/delivery/>

planning application. It is acknowledged that the site promoter has advised the Council of the following anticipated delivery rate:

- 30 dwellings in 2022-23
- 180 dwellings in 2023-24
- 240 dwellings in 2024-25

2.32 The above figures indicate that Welborne can only deliver 450 homes in the next 5 years, up to 2025. This is already a significant drop from the figure set out in the original planning application which was suggesting the delivery of 750 homes within 5 years of commencement. If Welborne can only deliver 450 homes in the next 5 years, it seems an impossible task to deliver the remaining circa 3,550 over the remaining 12 years of the plan period.

2.33 In addition, given the current lack of funding for the access, the anticipated delivery seems highly unlikely and this will have a dramatic effect on Fareham's 5 year HLS and securing its overall housing provision. Therefore, it is considered that relying on one site to deliver a significant number of houses is a high risk strategy. As such, a greater range of sites should be considered.

v) Affordable Housing

2.34 Paragraph 4.3 of the draft Local Plan confirms that '*The need for affordable housing in the Borough is based on the number of existing and newly formed households who lack their own housing and cannot afford to meet their housing needs in the market*'. The Council goes on to state that it is confident that it will meet its affordable housing needs through the provision based on its Policy HP5 and it does not need to make any further adjustments to its overall housing figures.

2.35 However, paragraph 5.29 of the draft Local Plan indicates that one of the key issues facing residents in the Borough is the unaffordability of homes to buy or to rent, and that therefore the delivery of homes that are affordable is a priority. The Council's Affordable Housing Strategy 2019 – 2036 (2019), as referenced at paragraph 5.30 of the draft Local Plan, indicates that there is a need for some 3,500 affordable homes up until 2036. It is not clear how the housing number can and will meet the identified affordable housing demand.

2.36 Key concerns include:

- The reliance on the number of houses, including affordable housing, to be delivered by Welborne. The very real concerns over the deliverability of housing from Welborne has already been addressed; the issues identified have a consequential impact on the delivery of affordable housing;
- The heavy reliance in terms of the overall housing provision on windfall sites, many of which are likely to fall under the threshold of 10 or more dwellings and therefore not deliver any affordable housing;
- The reliance on a range of allocated sites (Section 3) which appear to be aspirational rather than realistic and therefore again the impact on the provision of affordable housing.

2.37 The Council fully recognises its substantial affordable housing need across the Borough over the Plan period but it is simply not at all clear that the numbers required can be met under the housing provision being made. It is therefore concluded that the very clear potential that the need for affordable housing in the Borough will not be met leads to a need to increase the overall housing requirement.

vi) Windfall Allowance

2.38 Part of the Housing Provision is to be met through unexpected (windfall) development. There is no issue in principle with including an allowance for windfall development, but that figure must be realistic and based on evidence.

2.39 The NPPF defines windfall sites as 'sites not specifically identified in the development plan'. Paragraph 70 of the NPPF sets out that where an allowance for windfall sites is to be made, there should be compelling evidence that they will provide a reliable source of supply, using the strategic housing land availability evidence, historic windfall delivery rates and expected future trends to support such an allowance.

2.40 In this case the Council is relying on 1,224 new homes to come through windfall development out of total of 8,389 new homes. Whilst it is appreciated that the methodology for calculating windfall allowances have changed over time, it is worth noting that in the current adopted Local Plan Part 2: Development Sites and Policies (2015), the average historic windfall

allowance was calculated to be 20 (Appendix F). In the 5 Year Housing Land Supply Position Paper to Planning Committee on 24 June 2020, the Council included a small site windfall allowance of 37 dwellings for each of 2 years (years 4-5).

- 2.41 In the draft Local Plan the reliance on windfall sites has jumped to 1224 which if crudely divided by the length of the Plan period (16 years) gives an annual figure of 76.5. There is no explanation to justify such an over reliance on windfall figures.

Conclusions in respect of Strategic Policy H1

- 2.42 It is clear that there are fundamental concerns over many aspects of the Council's housing provision which have been explored in this Section. There can only be one conclusion that the provision is woefully inadequate and is **UNSOUND**.

3.0 Analysis of Housing Allocations

- 3.1** The Council has allocated and is relying on a number of ‘development’ sites to assist in the delivery of and in meeting its housing provision. However, the suitability, availability and achievability of several of these sites needs to be questioned and whether they can and will deliver the number of units proposed. It is acknowledged that these sites are not proposed for delivery of housing numbers in the early years of the Plan but it must still be questioned whether there is sufficient confidence that these sites will be brought forward, that they should be included in the plan.
- 3.2** This analysis has only focussed on the medium to larger of the sites, most of them proposing to bring forward in excess of 50 units and there may well be serious issues of suitability, availability and achievability with some of the smaller sites. It is noted that at least 9 of the sites are indicated to make provision for less than 10 units. It is unusual for sites yielding such a small number of units to be included as specific allocations; it begs the question as to whether the Council has needed to bring in such small sites to secure its numbers.
- 3.3** The number of sites where there are serious concerns and questions over their suitability, availability and achievability total at least 6, which in total would provide some 400 – 500 residential units. These sites are addressed below, and the order selected simply follows the order in which they are listed on pages 39 – 40 of the draft Plan and then considered in further detail under site specific policies.

FTC1 Palmerston Car Park (Indicative Dwelling Yield: 20) (SHELAA ref: 3233)

- 3.4** This is a constrained town centre car park site and the development of housing will be constrained by issues of noise and disturbance from the surrounding roads as well as the service access to the Shopping Centre. The setting of the adjacent Osborn Road Conservation Area to the north will need to be preserved. The Council is keen, under other policies to safeguard and promote Fareham town centre as its principal town centre but there appears to be no co-ordinated car parking strategy to ensure that the loss of existing car parking sites will not compromise those objectives.

- 3.5** At the very minimum the proposal that this site can deliver up to 20 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC2 Market Quay (Indicative Dwelling Yield: 100)
(SHELAA ref: 1425)**

- 3.6** This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 60 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 100 units. The site is also expected to deliver approx. 4000 sqm of commercial leisure space together with a new multi storey car park and new town square. The future and viability of town centre strategies may need a comprehensive review in a post Covid era. The site specific requirements also make reference to the possibility of a hotel which presumably, if brought forward, would impact on the achievement of other elements of the proposal, including the residential. There is no indication that there is any real prospect of bringing the site forward over and above aspirational objectives.

- 3.7** At the very minimum the proposal that this site can deliver up to 100 residential units must be questioned; furthermore, there is no confidence that the site is suitable, available and achievable.

**FTC3 Fareham Station East (Indicative Dwelling Yield: 120)
(SHELAA ref: 0211)**

- 3.8** There are fundamental questions about the suitability and achievability of this site for the intended development. This site has been carried forward from the adopted Local Plan Part 2 where it was allocated for some 90 residential units, but has now, without explanation, been increased in the draft Plan to accommodate some 120 units. Such an ambitious scheme would appear to depend on a comprehensive approach, particularly given the limited access options. Yet, even the SHELAA assessment identifies that the site is in multiple commercial and industrial uses, including railway related uses which brings into question site assembly issues both in terms of achievability and timing.

- 3.9** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC4: Fareham Station West (Indicative Dwelling Yield: 94)
(SHELAA Ref: 0212)**

- 3.10** This is a long and very narrow site sandwiched between the railway to the east and protected trees to the west. The allocation and the SHELAA recognise the multiple constraints facing this site in terms of bringing it forward for development. These constraints include, amongst others, the multiple uses existing on the site, the access constraints including that the existing access crosses land in Flood Zone 2, noise, contamination and amenity issues.

- 3.11** This is one of the sites where the issue does not simply relate to whether the site can properly accommodate the number of units being proposed, but the suitability availability and achievability must be questioned.

**FTC5: Crofton Conservatories (Indicative Dwelling Yield 49)
SHELAA Ref: 1325**

- 3.12** This site continues to be in active retail use, following the expiry of a temporary permission for retail use and the potential availability of the site is questioned.

**HA7: Warsash Maritime Academy (Indicative Dwelling Yield 100)
SHELAA Ref: 3088**

- 3.13** This site has a long history and has been carried forward from the Local Plan Part 2. The site faces considerable issues in terms of bringing forward a suitable and viable housing development, not least of which is that the western part of the site must be excluded from development because of flooding issues and discussions with Natural England would potentially exclude further land to secure appropriate buffers to sites of international nature conservation significance. As a result, the majority of the development and residential units

would necessarily be brought forward through the conversion of the existing listed buildings on site, potentially impacting on viability.

- 3.14** The site lies in the countryside and is remote from shops and facilities. There are traffic problems along Newton Road which is the only access solution leading to Warsash Centre and up to Park Gate where permission exists for some 800 residential units.
- 3.15** The viability and achievability of this site for some 100 residential units must therefore be questioned.
- 3.16** Due to the ecological and highway issues the Council has determined that any planning application should be submitted with an EIA.

HA13 Hunts Pond Road (Indicative Dwelling Yield 38)

SHELAA Ref: 305

- 3.17** Under the Local Plan Part 2 this site was allocated under Policy DSP53 for Community Uses as part of a larger scheme to include education and open space. It is understood that the site is no longer required by Hampshire County Council for educational purposes, but there is no confirmation that a proper assessment has been undertaken of the continued need of this land for local community uses.

HA4 Downend (Indicative Dwelling Yield 350)

SHELAA Ref 3030

- 3.18** Site HA4 at Downend for some 350 residential units has been the subject of two planning applications both of which were refused against officer recommendation. The first planning application was dismissed at appeal justifying the council's reason for refusal. It is likely the second application which was refused in November 2020 will be appealed however, the committee's stance in terms of determining both applications on this site brings into question whether the council really support this housing allocation. It is therefore questioned whether the Council should be relying on the site as a housing allocation which the Council has found, in the form of the most recent applications, wholly unacceptable.

Other Sites

- 3.19** There are potential constraints with a number of the other sites, which may at the very least delay their delivery or even bring into question their achievability. Site FTC6, Magistrates Court at Fareham and allocated for some 45 units is held up by a complicated deal to resolve the nitrates issue, involving land within Winchester District.

Conclusions and Implications Arising

- 3.20** This analysis demonstrates that there are serious and substantial questions over the suitability, availability and achievability of a number of the allocated sites and whether they will be able to provide the housing figures, either in whole or in part which Fareham is seeking to rely upon. It is therefore contended that it is UNSOUND for Fareham to rely on each and all of these housing sites to deliver all of the dwelling units proposed
- 3.21** This adds to the strength of the argument, as set out under Section 2, that Fareham needs to bring forward additional sites for allocation to help meet its housing need. The next section focuses on why land at Rookery Farm should be included as a housing allocation in the Local Plan.

4.0 Rookery Farm

4.1 It is clear from Sections 2.0 and 3.0 that not only has Fareham under provided on the housing figures it requires to meet over the Local Plan period, but it is very unlikely that it will be able to deliver even the numbers it is proposing to provide. Fareham therefore needs to allocate further housing sites to improve housing deliverability; Rookery Farm should be allocated as a housing site. This was allocated in the draft Reg 18 Supplement in early 2020 under the Policy Reference HAX (SHELAA ref: 0046).

Site Location

4.2 The site is located immediately north of the M27 Motorway and west of Whiteley. Access is from Botley Road approximately 100m north of the bridge over the Motorway. Please see attached site plan showing the land forming part of the proposed development area. It is estimated at this early stage that the site could accommodate in the region of 150-200 residential units including an element of affordable housing and a mix of housing types to accord with Fareham's policies and approach to housing mix.

4.3 146 Botley Road (also known as Rookery Farm) lies to the north of the land and is in separate private ownership. The dwelling is listed. Residential development along Swanwick Lane lies further to the north.

4.4 The residential development of Whiteley is to the east. To the south are the local centre at Park Gate and the railway station at Swanwick, both within easy walking distance of the site.

4.5 Rookery Avenue is opposite the access to the site. At present this is a cul de sac however there is a safeguarded road extension to continue Rookery Avenue into Whiteley, linking Botley Road to the Parkway South roundabout.

4.6 To the south of the site is a vehicular and pedestrian bridge that provides access to residential properties at Bridge Road.

The Site

- 4.7** The site as a whole occupies approximately 20.05 Ha of land accessed from Botley Road just to the north of the M27 Motorway. The front part of the site is visible from Botley Road however the access road, which is between an earth bund to the north and embankment to the south, drops to a lower central area where aggregate recycling has, until recently, taken place.
- 4.8** Adjacent to the motorway is a large embankment created by historic land raising. The central part of the site comprises a relatively flat operational area where recycling materials have been stockpiled. To the north is the Orchard where the land gradually drops towards the rear of properties fronting onto Swanwick Lane.
- 4.9** At present due to the change in levels and the surrounding housing only the front part of the site adjacent to Botley Road is visible from outside the site.
- 4.10** The site at present has two principal landowners Raymond Brown Rookery Properties Ltd and Prospective Estates Ltd, with Raymond Brown acting on their behalf

Site Planning History

- 4.11** Rookery Farm was originally a fruit farm and some evidence of this former use is still evident in an area of remnant orchard to the north-west of the site. Part of the site adjacent to the M27 has been land raised and restored to grazing land. This forms a large embankment which screens the central part of the site from the M27 and Botley Road.
- 4.12** Planning permission was first granted on appeal in 1987 (APP/Z1700/A/55/049143) for the infilling of agricultural land with c.1.3 million cubic metres of construction and demolition wastes with restoration to agricultural use. Tipping commenced in 1988 and temporary planning permission for waste recovery (recycling) was granted in 1995.
- 4.13** A further temporary planning permission for the inert waste recycling operation was granted in 2006 (P/06/0443/CC), time limited to expire in 2021. This permission introduced an expiry date for land raising operations of 31st December 2026.

- 4.14** In 2014, planning permission (P/14/0857/CC) was granted for the permanent retention of the aggregate recycling facility. In 2016 (P/15/1213/CC) and 2018 (P/18/0978/CC) planning permission was granted which, in effect, extended the validity of the development pursuant to planning permission P/14/0857/CC until 25 October 2020. This date has also since been extended by way of The Business and Planning Act 2020 to 1 May 2021.
- 4.15** Details pursuant to the remaining pre-commencement conditions are to be submitted to Hampshire County Council for approval in January 2021. Following discharge of these conditions and implementation of the permission, conditions relating to restoration associated with the earlier land raising permissions fall away leaving just the permanent recycling use. The site will subsequently, in planning terms, predominately formally become previously developed (brownfield) land.
- 4.16** Note there have been no minerals operations at the site and any changes to the landscape are as a result of land raising, not from extraction activities.
- 4.17** The main body of the site is currently safeguarded for aggregates recycling in the Hampshire Minerals & Waste Plan. Hampshire County Council have indicated that there is overcapacity for inert waste recycling at present. As such if the site was to be allocated for housing then the safeguarding status would be reviewed.
- 4.18** It should be noted that in its comments on the draft Plan 2020 (Regulation 18 Draft Local Plan 2036 Supplement) when the site was allocated for residential development, Hampshire County Council as Minerals and Waste Authority advised:

Hampshire County Council has concluded that sufficient aggregate recycling capacity is currently in place to deal with the additional waste and as such no objection to this allocation will be raised

Site Appraisal

- 4.19** It is noted that the site was found to be a developable housing site within the Fareham Local Plan 2036 Strategic Housing and Employment Land Availability Assessment (SHELAA) December 2019, but subsequently discounted as unsuitable in the Fareham Local Plan 2037

Strategic Housing and Employment Land Availability Assessment (SHELAA) September 2020.

- 4.20** In considering the site developable, the SHELAA (2019) makes the following comments regarding suitability of the site:

‘Overall suitable for housing development. Further work required to ascertain an appropriate development structure and net developable areas, having regard to site ground conditions, drainage, habitat surveys, movement connections and retention of existing cover of woodlands, trees and hedgerows. Eastern part of site has good pedestrian accessibility to existing local services. Potential scope to include a small convenience store to improve sustainability of main core of the site. Suitable highways improvements required, with linkages to surrounding movement networks. Potential impact of noise and air quality to be assessed and appropriately mitigated’.

- 4.21** In subsequently discounting the site, the SHELAA (2020) makes the following comment regarding reason for discounting the site as un-developable:

‘Site topography and boundary likely to create isolated cul de sac development. Main developable area of the site is not well related to existing settlement and is relatively isolated from local services’.

- 4.22** The reasoning behind the change in conclusion reached by the SHELAA (2020) is unclear as there has been no substantive change in circumstances or new information related to the site not previously provided to the Local Planning Authority. Furthermore, the SHELAA (2020) attributes the same 8 out of 10 score for accessibility to facilities from the site as the SHELAA (2019), recognising the inherently sustainable location adjacent the urban area of Swanwick, the proximity to Swanwick Railway Station and nearby shops/amenities. As identified in the SHELAA (2019) suitability summary, if necessary, sustainability of the main core of the site could further be improved via development of a small convenience store in-situ.

- 4.23** Paragraph 4.28 of the SHELAA (2020) states that *‘the information from the SHELAA forms an important part of the evidence base for the Local Plan 2037, providing a source of developable sites which are suitable for future development needs, available within the plan*

period and viably achievable. Developable sites which can be brought forward under the Council's development strategy will contribute to the housing and employment supply for the Local Plan 2037...'

4.24 Paragraph 3.21 of the Publication Version of the Fareham Local Plan 2037 states:

'3.21 The development strategy proposed by the Local Plan includes:

...Development allocations on previously developed land where available, and on greenfield land around the edges of existing urban areas in order to meet remaining housing and employment needs, but otherwise managing appropriate levels of development outside of urban areas'.

4.25 As the site should be considered to be previously developed/brownfield land, it is sequentially preferable for development based on the Council's Local Plan development strategy. Furthermore, paragraph 4.18 (Assessing Site Suitability) of the SHELAA (2020) states that 'sites outside the urban area will not necessarily be excluded as they could be considered alongside a review of urban area boundaries as part of Local Plan development...'

4.26 Paragraph 3.3 of the Background Paper: Settlement Boundary Review (September 2020) states that 'the reasons for establishing settlement boundaries include:

- *Directing development to more sustainable locations in terms of accessibility and proximity to public transport, and in terms of being well served by existing essential services and facilities'....*
- *'To assist in urban regeneration, by encouraging the re-use of brownfield land'.*

4.27 Considering the proximity of the existing Settlement Boundary to the site (approximately seven metres distance on the opposite (eastern) side of Botley Road), Rookery Farm site would represent an entirely reasonable and logical extension to the established urban area which would be in accordance with the development strategy contained within the Local Plan.

4.28 Cul de sac type development formats are well established and entirely functional residential layout present in the vicinity of the site. Such a development format would therefore reflect the prevailing development pattern and design vernacular and be sympathetic to existing

communities. Indeed a number of the sites put forward in the current draft plan would potentially result in cul de sac developments, including:

FTC3 – Fareham Station (120 dwellings)

FTC4 – Fareham Station West (90 dwellings)

HA3 Southampton Road (348 dwellings)

HA4 Downend Road (350 dwellings)

- 4.29** The site presently benefits from permanent planning permission for development and use for aggregate recycling. This is significant in terms of both vehicle movements and future development potential. Current planning permissions contain conditions limiting HGV movements to 240 per day, all of which utilise the current site access point on Botley Road. These authorised HGV movements would be replaced by domestic vehicle movements, substantially mitigating any perceived increase in road traffic on Botley Road. In addition, the imminent completion of the North Whiteley Link Road is anticipated to reduce vehicle movements on Botley Road. Without wanting to pre-empt the outcome of any Transport Feasibility Assessment, development of the site could also facilitate the development of the western end of the Rookery Avenue extension as there is space within the site to accommodate a roundabout.
- 4.30** Planning permission P/18/0978/CC includes for considerable earthworks to create extended and raised bunding to re-model the site and mitigate against noise impacts from the recycling use. A significant proportion of this re-modelling is on the south western boundary of the site. Such earthworks would be very similar in scale and form to those likely to be required to reduce noise levels from motorway traffic to appropriate levels for inhabitants of any future residential development on the site.
- 4.31** The Council has previously been furnished with a Phase 1 Contaminated Land Assessment and Slope Stability Assessment for the site, identifying that the embankment/land raise slope adjacent to the M27 is stable and that the site could be suitable for re-development in accordance with the indicative masterplan previously submitted.
- 4.32** Any future development scheme pursuant to an allocation would also include mitigation to address potential air quality concerns associated with proximity to the motorway. Such

issues can be effectively managed through building design and layout amongst other techniques.

4.33 The site comprises circa 20 hectares of land with a net developable area of circa 10 hectares. Significant land is therefore available within the land ownership for biodiversity enhancement, on-site nitrate mitigation and dedication to public open space.

4.34 The following points detail the benefits of residential development on the Rookery Farm site:

- Once the permanent recycling permission is implemented the site will become previously development land/brownfield and its development will reduce the need for more sensitive (greenfield) sites within the Borough;
- The site is in a highly sustainable location in proximity to a railway station and amenities, is deliverable and would provide necessary housing capacity within the Plan;
- It should be noted that in its response to the draft 2020 Plan (Regulation 18 Draft Local Plan 2036 Supplement) showing the inclusion of Rookery Farm, the County Council responded as follows:

This allocation is close to Swanwick railway station. The County Council supports the opportunity for this site to provide high quality walking and cycling routes to Swanwick station. This may include a new active modes bridge over the motorway and enhanced interchange at Swanwick Station with new local bus services. The development brief also needs to include provision for off-site improvements to address the inadequate bus, walking and cycling connections to the Segensworth business parks.

- Provision of Public Open Space on a former land raise site and access to it from existing footpath routes;
- Removal of a 'heavy industry' use from an otherwise residential setting;
- Would facilitate the Rookery Avenue extension. This would provide better access to the motorway, the industrial area of Whiteley and Whiteley District Centre;
- Opens up pedestrian links across the motorway to Addison Road;
- The site would not be visually prominent and would form a logical urban extension. Development could enable biodiversity enhancements associated with long-term habitat management plans and the re-instatement of a pre-existing stream across the site;
- The development would be offset by the loss of 240 HGV vehicle movements a day.

- 4.35** Were recycling operations to cease and land raising be completed, circa one million tonnes of waste material would need to be imported to the site before planning permission expiry in December 2026. This will impact the surrounding ambient environment through noise, dust and exhaust/plant emissions associated with operations and significant numbers of HGV movements.
- 4.36** Resumption and completion of land raising would also result in the site and location becoming permanently sterilised for future development. This is therefore a unique opportunity to re-develop the site to meet a real and urgent need to provide homes in the Borough.

5.0 **Modifications Required to the Plan to Make it Sound**

- 5.1. There is no need to revisit the arguments and issues which have been set out at length in the earlier sections and which demonstrate that the Plan as drafted is UNSOUND. The modifications required are set out below in bullet form. It will be immediately clear that the required work to ensure that the Plan is SOUND extends well beyond detailed amendments to drafted policy wording; a fundamental review of the Plan and the basis upon which it has been prepared is required.
- 5.2. The revised approach to the preparation of the Plan, with consequential implications for the redrafting of **Strategic Policy H1**, requires:
- a) A thorough reassessment of the Housing numbers using the Standard Method as set out under the PPG; it is premature to use the draft new Standard Method which Government has now formally abandoned. The only reason it has been used by Fareham is because it appears to provide a lower number of units required. This is clearly UNSOUND and for the plan to made SOUND, the current Standard Method must be re-used and those sites proposed for allocation in the Local Plan Supplement be included.
 - b) The Duty to Co-operate has not been undertaken properly and thoroughly; Fareham has underprovided in terms of meeting the needs of the adjoining authorities who are struggling to meet their housing needs, including Portsmouth, Gosport and Havant all of which are geographically very constrained. The exercise needs to be undertaken again to ensure that Fareham properly plans to accommodate the needs arising from surrounding authorities. It is worth noting that the under provision is made even worse if account were to be taken of the draft new Standard Methodology where the housing requirements of adjoining constrained authorities is increased; Fareham appears to have decided to ignore this implication arising from the new draft Standard Method.
 - c) The Council has a history of under delivery of housing figures and its 5 year housing land supply figure currently stands at under 3 years. On the basis that the NPPF and PPG are both clear that the housing provision numbers should be regarded as

minimum, and reflecting the above position, Fareham requires to be considerably more ambitious in terms of its overall housing provision figures.

- d) There is a very concerning over reliance on the achievability of so much of the housing provision from one site, namely Welborne Garden Village. This is even more of a significant issue given the fundamental difficulties that appear to be encountered over the funding and provision of the new motorway junction which is fundamental to the progress of the overall development. The amount of reliance that can properly be placed on the delivery of housing numbers from this one development needs to be reviewed and significantly reduced.
- e) There is also a potential over reliance on windfalls to deliver a significant proportion of the overall housing figures; this requires to be revisited with a downward adjustment.
- f) The Council is in very real danger of not being able to meet its affordable housing requirements, given all the constraints identified. The housing numbers and potential affordable housing provision requires to be recalculated with the need to increase the overall housing numbers if the affordable housing needs are to be met.

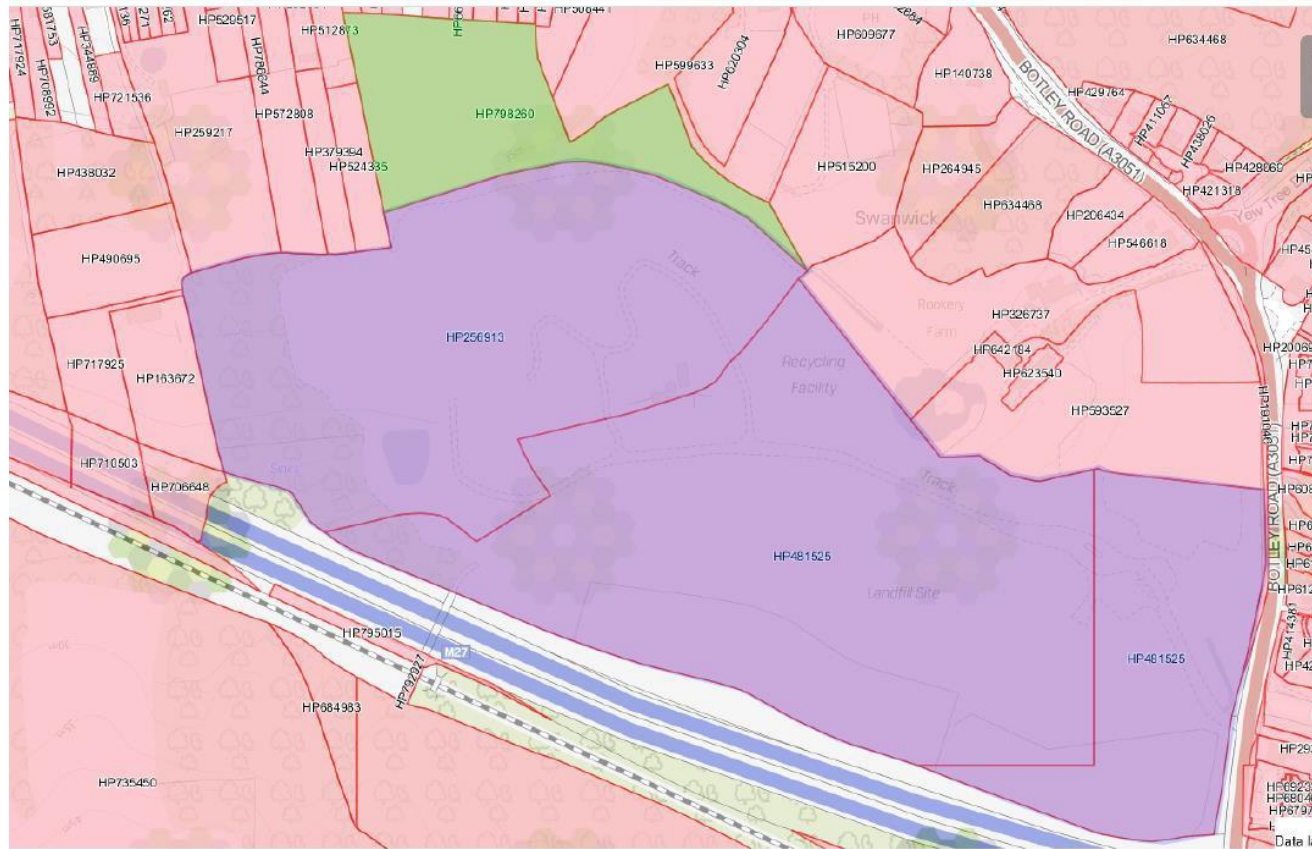

5.3 In addition to the above the Council also requires to re-address a number of its allocated housing sites, including at the very minimum **Sites FTC1, FTC2, FTC3, FTC4, FTC5, HA7 and HA13**. This reassessment in terms of suitability, achievability and availability is likely to reduce substantially the number of new dwelling units that can be achieved from these allocations.

5.4 The Council is clearly underproviding in terms of its overall housing numbers and the reliance it is placing on sites that face constraints and may not be achievable. The Council needs to make further allocations, and this should include Land at Rookery Farm which is suitable, available and achievable and subject to planning, deliverable within a 5 year period. The site has been considered suitable, available and achievable and was allocated in the Local Plan Supplement; the principal reason why it no longer appears as an allocation is because of the Council's unsound change in the methodology it is applying to calculate its housing numbers. **Rookery Farm should be reinstated as a housing allocation.**

- 5.5 It follows that the Plan cannot be made SOUND without a fundamental review of the main elements of the housing figures, including methodology and will require additional sites to be allocated; Rookery Farm should be included as an allocation in the Plan, being suitable, available and achievable and, indeed, deliverable.

Appendix 2

Appendix 3 and 4 submitted separately

Sent by email to: consultation@fareham.gov.uk

15th December 2020

Dear Sir/Madam,

Response to the consultation on the Fareham Borough Local Plan 2037

Foreman Homes would like to thank Fareham Borough Council for giving us the opportunity to comment on the emerging Local Plan. We would welcome, in due course, participating in hearings of the Examination in Public.

The following comments are related to:

- Policy H1: Housing Provision
- Policy HP2: New Small-Scale Development outside the Urban Areas
- Policy HP4: Five-year Housing Land Supply
- Policy HP5: Provision of Affordable Housing
- Policy HP9: Self and Custom Build Houses
- Policy NE2: Biodiversity Net Gain
- Policy HA1: North and South of Greenaway Lane
- Policy HA15: Beacon Bottom West, Park Gate
- Policy HA27: Land off Rookery Avenue
- Policy HA34: Sovereign Crescent

Policy H1: Housing Provision

The policy is not sound as it is not consistent with national policy.

Housing Requirement

Paragraph 4.2

The paragraph sets out how the housing need is determined through the use of the standard methodology set out in National Planning Practice Guidance (PPG). Under this method the housing need for Fareham currently stands at a minimum 514 dwellings per annum (dpa), the Council have

**Unit 1, Station Industrial Park, Duncan Road,
Park Gate, Southampton SO30 1BX**
0330 333 7365 foremanhomes.co.uk

Foreman Homes Limited registered in England Company no 03313213

not however, adopted this method in calculating the housing need. As it is rightly said, in August 2020 the Government released a consultation on a new standard methodology and this is how the housing requirement has been calculated. This methodology is, however, yet to be adopted and therefore the resultant identified housing requirement figure set out in the policy falls way below what is currently required to accommodate the growing need in the Borough (as per the current standard methodology). Due to this shortfall, the policy is contrary to paragraph 60 of the National Planning Policy Framework which states that the strategic policies should be informed by a local housing need assessment, conducted using the standard method in the NPPG, and therefore the Council's approach to calculating housing need is incorrect and considered unsound.

Housing Supply

Paragraph 4.8

The paragraph sets out that in order to meet the requirement, the Council have taken into account existing commitments including applications that have 'resolution to grant' which equate to 4,858 (including Welbourne). The latest Five Year Housing Land Supply Position (June 2020) sets out that Planning Inspectors found that applications with a 'resolution to grant planning permission' are not considered deliverable in terms of the definition set out in Annex 2 of the NPPF. The sites with resolution to grant, except for those that relate to allocated housing sites within the Council's adopted Local Plan, should not be included in the five year housing land supply calculations. A number of sites are dependent on nutrient neutrality solutions, and although these are now starting to come forward there is no guarantee these sites will be deliverable. It is not clear as to whether these figures have been removed from the projected land supply calculation in the Local Plan 2037, but if they haven't these numbers need to be adjusted to reflect the projected housing land supply.

Housing Provision

Paragraph 4.19

The paragraph sets out a number of previous housing allocations that have been removed as they are considered to be no longer available or suitable. Not all sites have been examined as part of these comments, however, the removal of allocations HA16 (Military Road) and HA20 (North Wallington and Standard Way) is considered unjustified (Appendix 1). These sites are available and are also suitable for development in the short term, these sites were identified in the SHELAA as being suitable, available and achievable (Appendix 2). There has been no change in circumstances since

these sites were allocated in the previous iteration of the plan, therefore they should not be removed. There are live applications for both sites (ref: P/19/0130/OA and P/19/0894/OA). The allocation site HA16 would contribute 26 self-build dwellings and HA20 would provide 29 dwellings towards the housing numbers. These sites are important in bringing forward housing numbers to meet Fareham's land supply. The de-allocation of the self-build site is contrary to policy 61 of the NPPF which states that "housing need for different groups (including those wishing to commission or build their own homes) should be assessed and reflected in planning policies". The removal is also contrary to the self and custom build requirement that the Council promotes in Policy HP9 which identifies a need for these dwellings in the Borough. The proposed developments include the provision of both market and affordable units the removal of the allocation is again contrary to paragraph 61 of the NPPF. The removal of these sites is unjustified and will result in the loss of much needed housing, including affordable and self-build, the policy is therefore considered unsound.

Conclusions on Policy H1

The Policy is not sound as considered on the basis that:

- It uses a standard method for assessing housing need that is still out to consultation and potentially subject to change.
- It is not clear as to whether the calculated land supply includes applications which have resolutions to grant, if sites have been incorporated numbers should be adjusted to remove these permissions in accordance with the definition of "deliverable" as set out in the NPPF.
- The removal of allocated sites HA16 and H20 is unjustified as they were previously considered by the Council to be suitable and deliverable and there have been no changes in circumstances.

Policy HA1: North and South of Greenaway Lane

The policy is sound as it is consistent with national policy

The allocation allows for 824 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the strategic development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF which states "*Planning policies should identify a supply of a) specific, deliverable sites for years one to five*

of the plan period and b) specific, developable sites or broad locations for growth for 6-10 and where possible for years 11-15 of the plan.” The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

Foreman Homes have submitted two outline applications on two parcels of land on the northern side of Greenaway Lane. An outline application for the land to the east of Brook Lane (ref: P/17/0845/OA) for the development of up to 180 dwellings with access off Brook Lane has a resolution to grant planning permission. The second application was submitted in 2018 and for residential development of up to 80 dwellings on the site known as land to the west of Lockwood Road (ref: P/18/0590/OA). Both sites are developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HA15: Beacon Bottom West, Park Gate

The policy is sound as it is consistent with national policy

The allocation allows for 29 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a current planning application for 29 dwellings (P/18/1258/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HA27: Land off Rookery Avenue

The policy is sound as it is consistent with national policy

The allocation allows for 32 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a current planning application for 32 dwellings (P/19/0870/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted. The site is defined as brownfield land, therefore development would make effective use of the land and policy is supported by the NPPF Paragraph 117-119.

Policy HA34: Sovereign Crescent

The policy is sound as it is consistent with national policy

The allocation allows for 38 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a resolution to grant an application for 38 dwellings (P/18/0484/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HP2: New Small-scale Development

The policy is not sound as it is not consistent with national policy.

The overarching principle of this policy is supported, however, the policy as it is currently written is not consistent with national policy. Paragraph 122 and 123 of the NPPF set out that planning policies should support development that makes efficient use of land in order to meet as much of the identified need for housing within the area. The restriction of 4 dwellings on sites on the edge of urban areas may not be constructive to making efficient use of the land as some sites may be able to accommodate more. It is suggested that the threshold be increased to 10 units which would reflect the definition of a minor development as set out in Annex 2 of the NPPF.

Paragraph 5.16

Paragraph 5.16 supports Policy HP2 (New Small-Scale Development Outside the Urban Area) and sets out what is considered to be sustainable in relation to walking distances from the site to nearby facilities. These criteria are based only on walking and not cycling distances, which should be considered as it is another form of transport that the Council is promoting. The distances set out in the criteria should be based on the Manual for Streets which sets out what is considered to be sustainable:

- 800m is a comfortable walking distance.
- 2km is a reasonable walking distance.
- Cycle distance has a range up to 5 miles.

Recommendations

The threshold of not more than 4 dwellings should be amended to a threshold of not more than 10 dwellings.

Walking distances set out in the policy should be changed to be in line with the Manual for Streets. Cycling distances should also be considered as cycling is promoted as a sustainable alternative to the

use of a car. If the distances are set to those currently suggested in the draft plan, a number of sustainable sites will be discounted and the policy would not make sufficient use of land

Conclusions on Policy HP2

Although the Policy is generally supported, as it is written it is currently considered to be unsound:

- The limit of 4 dwellings is not constructive to making the most efficient use of land as set out in paragraphs 122 and 123 of the NPPF
- Sustainable distances only consider walking distances and not cycling or multi modal trips.

Policy HP4: Five-year Housing Land Supply

The policy is sound as it is consistent with national policy

Policy is positively prepared and justified and is consistent with paragraph 35 of the NPPF. The policy reflects the existing policy DSP40 of the Local Plan Part 2 which has allowed for the delivery of dwellings towards the housing land supply of the borough. The continuation of this approach to providing housing land supply is considered appropriate and pro-active. This will allow for a contingency plan if the developments set out in Policy HP1 do not come forward within the plan period and the 5 year housing land supply falls short.

Policy HP9: Self and Custom Build Houses

The policy is unsound as it has not been justified

Although it is agreed that provisions should be made for self and custom build dwellings and applications should be supported in principle, the requirement for sites over 40 to set aside 10% of dwellings is unjustified and inconsistent with national policy.

The requirement would place burdens on house builders which may not be justified. The Self and Custom Build Background Paper suggests that a significant proportion of sites were met through windfall sites and this is likely to continue. Evidence therefore suggests that the Council, through normal development management processes, is supporting sufficient plots to come forward without imposing a requirement on major developments. In addition, Policy H2 will support the delivery of additional sites that will be more attractive to both self and custom build housing. If the demand is being met by smaller sites, as it currently is, there is no requirement or justification to rely on major housing developments, which are likely to be less attractive. The requirement for a developer to wait

12 months before selling a dwelling as it is not required as a self-build is unjustified and reduces the amount of housing available on the open market and as a result reduce housing figures.

Conclusion of Policy HP9

The policy is unjustified and is not positively prepared in accordance with paragraph 35 of the NPPF. The policy is not required there should be deleted.

Strategic Policy E1: Employment Land Provision

The policy is unsound as it is not in accordance with national policy

The policy sets out there is a requirement of 104,000m² of new employment floor space required over the plan period and this will be provided over three sites. It is suggested that there is a need for a contingency plan in case these sites do not come forward to meet the required space. A number of employment allocations, which were allocated in the previous iteration of the draft local plan, have been removed which is considered to be unjustified as they were considered sustainable and deliverable and key to bringing forward much needed employment space. It is argued that further sites should be allocated to ensure there is no shortfall if the allocated sites do not come forward or are not suitable for the needs of future employers.

The employment allocation E5 (Standard Way, Appendix 3) included in the previous edition of the emerging Local Plan 2037 was identified as a site that could provide 2000m² of flexible employment floor space. This site was identified in the SHELAA as being suitable, available and achievable (Appendix 4). There has been no change in circumstances since these sites were allocated in the previous iteration of the plan, therefore they should not be removed. The site is still available and developable which is evident through the live application on site – P/19/0196/OA.

Conclusion of Policy E1

The reliance on three allocations does not allow for flexibility if these sites do not come forward. The floorspace required over the plan period does not take into consideration fluctuation in the employment market, therefore, further allocations should be included in the policy.

Policy NE2: Biodiversity Net Gain

The policy is unsound as it is not in accordance with national policy

Policy reflects the Government's suggestion that new development should improve the biodiversity on their site to show a 10% net gain over the pre-development baseline. Whilst it is recognised that this is the Government's current favoured position, it is likely that there will be transition period to allow the development industry to adapt to the proposed changes. As such, it is suggested that the policy remains consistent with paragraph 170 of national policy to seek net gains in biodiversity and not include the requirement to show a 10% net gain. A policy without a specific percentage requirement would be consistent with current policy and should the relevant legislation be enacted, as currently proposed, such a policy would be sufficiently flexible to support a 10% requirement and any transition period.

Conclusion of Policy NE2

Although policy reflects the Government's current favoured position a percentage requirement should not be set as it is contrary to paragraph 170 which does not set out a specific percentage.

Conclusion

At present it is not considered that the plan is sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, for the following reasons:

- Housing needs have not been assessed in accordance with standard methodology as set out in the PPG;
- It is not clear as to whether the calculated land supply includes applications which have resolutions to grant, if sites have been incorporated, numbers should be adjusted to remove these permissions in accordance with the definition of "deliverable" as set out in the NPPF.
- The removal of allocated sites is unjustified
- Policy H2 is inconsistent with national policy with regard to making the most effective use of land;
- Requirement for 10% of plots on sites over 40 units be allocated for self-builders is unjustified;

A number of policies are considered sound in accordance with paragraph 35 of the NPPF in that they are positively prepared, justified and effective. These include:

- Policy HA1: North and South of Greenaway Lane

- Policy HA15: Beacon Bottom West, Park Gate
- Policy HA27: Land off Rookery Avenue
- Policy HA34: Sovereign Crescent
- Policy HP4: Five-year Housing Land Supply

We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and examination. Should you require any further clarification on the issues raised in this representation please contact me.

Yours faithfully,

Katherine Richards BSc MSc MRTPI

Appendix 1: Allocations HA16 and H20 removed from the Local Plan

DEVELOPMENT ALLOCATIONS

Housing Site: HA16	SHLAA Reference: 27
Name: Military Road	Proposed Use: Self and Custom Build
Location: Wallington	Capacity: 26 dwellings
Size: 2.2 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- The provision of land for self and custom build housing, to include the provision of serviced plots; and
- Provision of an illustrative masterplan to identify the layout of individual plots;
- The quantum of housing proposed is broadly consistent with the indicative site capacity; and
- Primary highway access shall be focused from Military Road; and
- Building heights shall be limited to a maximum of 2 storeys; and
- Safe pedestrian and cycle access and crossing points from the site to Pallant Gardens, Drift Road and Pinks Hill housing allocation (HA8); and
- Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living

DEVELOPMENT ALLOCATIONS

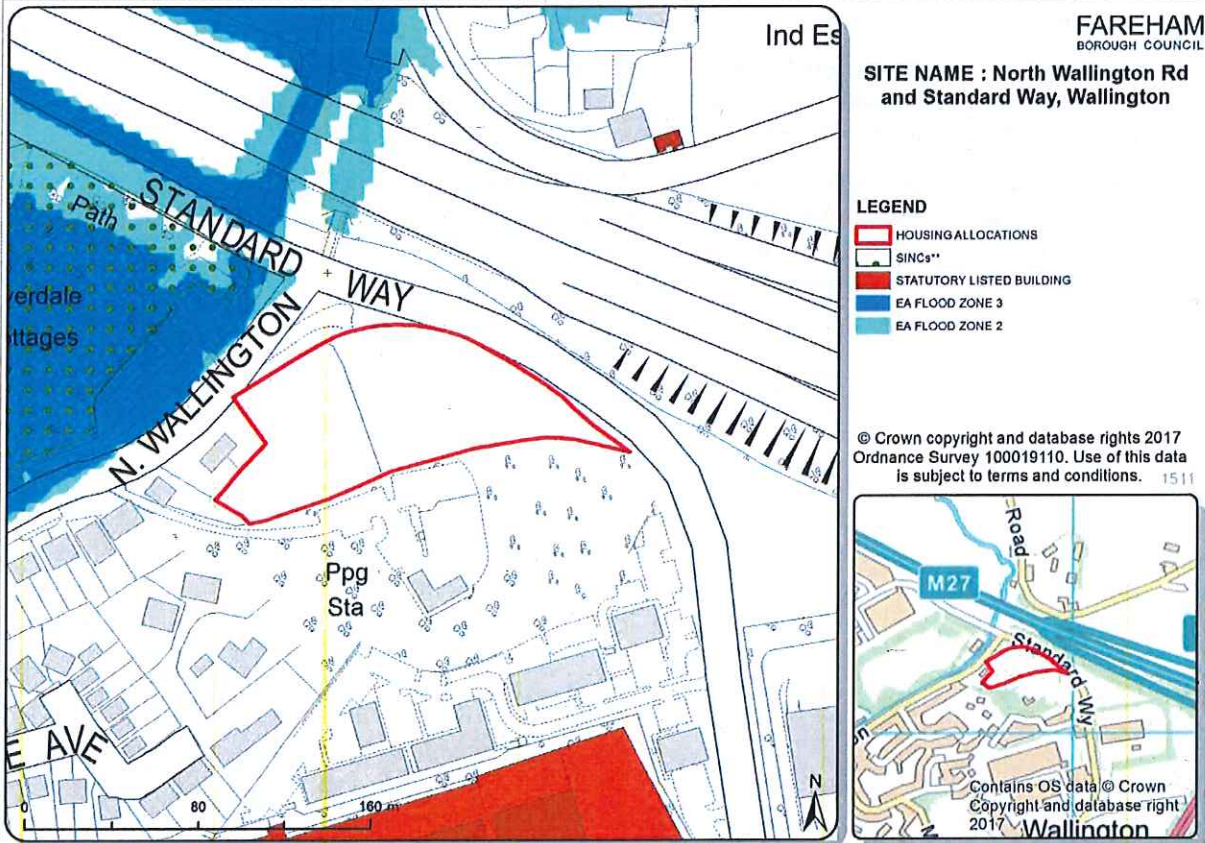

conditions or prevent damage to any nearby dwellings, roads, footpaths or other infrastructure; and

- h) A Heritage Statement shall accompany any application to provide details on the potential impact of proposals on the conservation and setting of the Fort Wallington façade; and
- i) Proposals shall demonstrate that the development will have no adverse impacts upon groundwater in respect of its location in Zone 1; and
- l) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Off-site highway improvement and mitigations works; and
 - Local schools and early-years childcare infrastructure (as identified by the Local Education Authority); and
 - On-site open space which shall be provided on the eastern part of the site in order to provide an appropriate setting to the Fort Wallington façade.

DEVELOPMENT ALLOCATIONS

Housing Site: HA20	SHLAA Reference: 324
Name: North Wallington and Standard Way	Proposed Use: Residential
Location: Wallington	Indicative Capacity: 21 dwellings
Size: 0.87 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- a) The quantum of housing proposed is broadly consistent with the indicative site capacity; and
- b) Primary highway access shall be focused from North Wallington; and
- c) The height of buildings shall be limited to a maximum of 2 storeys; and
- d) The design and layout of proposals shall retain and strengthen the existing tree boundary located along the southern perimeter of the site. The existing trees and hedgerows shall also be retained along North Wallington and Standard Way frontage except where access points may be required; and
- e) Proposals will need to minimise any impact upon the amenity of the adjacent public house residences; and
- f) Proposals shall include a safe pedestrian and cycle crossing point of North Wallington

DEVELOPMENT ALLOCATIONS

to/from the site with Standard Way; and

- g) A noise assessment shall accompany an application for residential development to assess the level of noise from the M27. The design and layout of proposals must take account of any noise mitigation measures that are identified by the assessment; and
- h) Provision of an air quality assessment to identify appropriate on-site measures to mitigate NO₂ emissions arising from the M27 (in accordance with Policy INF2); and
- i) Proposals shall demonstrate that the development will have no adverse impacts upon groundwater in respect of its location in Zone 1; and
- j) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Off-site highway improvement and mitigations works; and
 - Local schools and early-years childcare infrastructure (as identified by the Local Education Authority); and
 - Enhancements to existing off-site open space.

Appendix 2: SHELAA Site 27 (Military Road) and Site 324 (North Wallington and Standard Way)

5. Developable Housing Site Assessments

SITE DETAILS		Developable Housing Site	Fareham East
ID:	27	Site Name:	Military Road, Wallington
Current Land Use:	Paddock		
Surrounding Land Use:	Residential to north and along south boundary. Employment (Fort Wallington) to northeast (Grade II Listed Building)		
Gross Site Area (ha):	2.17	Housing Yield (estimate):	26
Employment Yield (estimate):	0	Gypsy and Traveller Pitches (estimate):	0
SUITABILITY			
Constraints:	Public ROW, Agricultural Land Grade 2, Minerals and Waste 2016 Brick Clay and Superficial sand/gravel, Within 500m of SPA, Within 500m of Ramsar, Within 500m of SSSI, TPOs, Ground Water Protection Zone, Countryside		
Highways/ Pedestrian Access:	Access via Drift Road would be unsuitable. Improvements to the Military Road/ Pinks Hill junction would be required but is considered feasible. Pinks Hill would require improvement to the A27 slip road. Pedestrian and cycle connections would be required to link the site to local services.		
Conservation Comments:	Fort Wallington is a grade II listed building. One of a series of forts built in the 19th century for the defence of Portsmouth Harbour. The south facing curtain wall survives, development of the eastern area would harm the setting of the listed building. The existing northern boundary marks the line of the fort perimeter, retaining a break to define the outline of the former fort would be preferable.		
Noise/Air Quality Assessment:	A noise assessment would be required given the sites proximity to Fort Wallington Industrial Estate but otherwise unlikely to be any issues in this regard.		
Archaeology:	Site not within identified area of archaeological potential.		
Ecology Comment:	Site provides good habitat for notable invertebrate and supports dormice and reptiles. Bat flight line connectivity between wooded habitats and flight line/grazing/roosting habitat for intertidal grazing birds. Woodland should be maintained and any introduced gaps should minimise loss of connectivity. Lighting strategy should leave edges dark.		
Accessible Facility Types: 7/10	Within 1600m of a Secondary School, within 800m of a Convenience Store or Supermarket, within 1200m of a GP Surgery, within 1600m of a Major Employment Areas, within 800m of a Accessible Green or Play Space, within 1600m of a Town/District or Local Centre, within 800m of a Community/Leisure Facility		
Suitability Comment:	Suitable highways improvements required. Development must have regard to TPOs, Listed Building and ecological potential. Proximity of Fort Wallington Industrial Estate with regards to noise impact should be considered.		
Is the site suitable?	Yes	Is the site available?	Yes
		Is the site considered achievable?	Yes

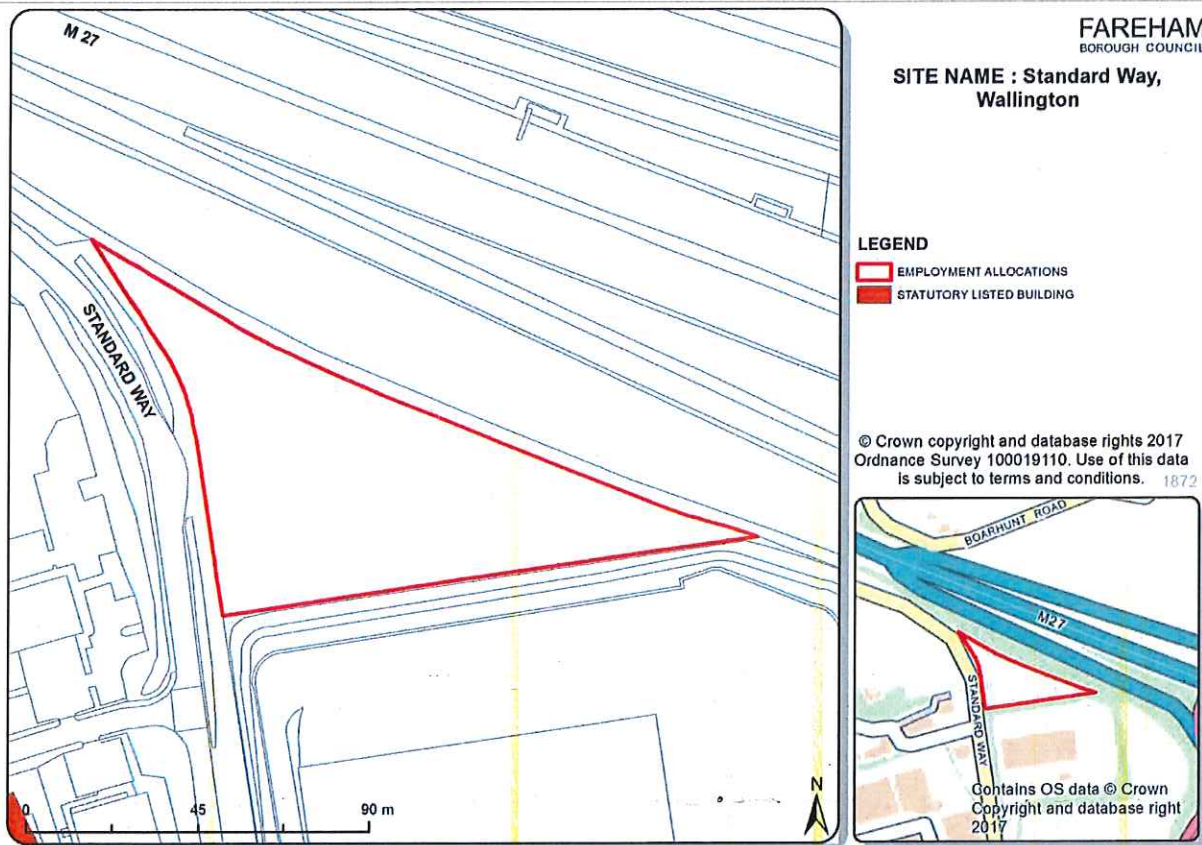

Appendix 3: Allocation E5 removed from the Local Plan

DEVELOPMENT ALLOCATIONS

Employment Site: E5	SELAA Reference: 20
Name: Standard Way	Proposed Use: Employment (B1, B2 or B8)
Location: Standard Way, Wallington	Capacity: 2,000 sq. metres
Size: 0.6 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- The quantum of employment floorspace shall be broadly consistent with the indicative site capacity; and
- Primary vehicular access shall be obtained from Standard Way; and
- Provision of safe pedestrian and cycle connections from the site and along Standard Way up to the junction with North Wallington; and
- Provision of a noise assessment that identifies appropriate mitigation to address noise from the A27, M27 and neighbouring industrial area; and
- Provision of an air quality assessment to identify appropriate measures to mitigate NO₂ emissions arising from the development in accordance with Policy INF2; and
- Boundary vegetation and trees should be retained, apart from where removal is necessary for highways safety reasons; and

DEVELOPMENT ALLOCATIONS

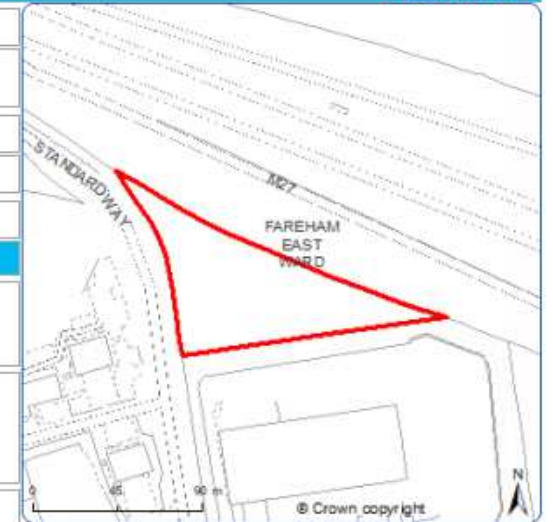

- g) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure:
- Off-site highway improvement and mitigations works.

Appendix 4: SHELAA Site 20 (Standard Way)

7. Developable Employment Site Assessments

SITE DETAILS		Developable Employment Site	Fareham East
ID:	20	Site Name:	Standard Way, Wallington
Current Land Use:	Vacant. Small paddock area located to the north of Standard Way and to the north of Fareham Heights office park. Lined with trees with access off of Standard Way and M27 to north.		
Surrounding Land Use:	Adjoining motorway M27 to northeast; Frontage to Standard Way to west; adjoining WTS to south.		
Gross Site Area (ha):	0.59	Housing Yield (estimate):	0
Employment Yield (estimate):	2,000sqm	Gypsy and Traveller Pitches (estimate):	0
SUITABILITY			
Constraints:	Public ROW, Agricultural Land Grade 2, Minerals and Waste 2016 Brick Clay, Superficial sand/gravel and Safeguarded Site, Ground Water Protection Zone, Countryside, Within 50m of potentially infilled and gassing ground, groundwater source protection zone.		
Highways/ Pedestrian Access:	This site would appear to have the potential for access created from Standard Way. The junction location would need to be towards the southern end of the frontage for visibility purposes. Measures would also need to be put in place to limit additional commercial vehicle activity on Pinks Hill or to make width improvements along its length.		
Conservation Comments:	No known constraints		
Noise/Air Quality Assessment:	No known issues.		
Archaeology:	There are no archaeological sites currently recorded at this location although Fort Wallington sits within the immediate vicinity. It is in an area that might be regarded as within the field of fire (setting) of the fort, but the fort and the views from t		
Ecology Comment:	The site comprises Priority Habitat Coastal and Floodplain Grazing Marsh with woodland boundaries. Buffers to be retained with significant margins. Appears suitable for bats, badger and may support territory of barn owl.		
Accessible Facility Types:	4/10	Within 1600m of a Major Employment Areas, within 800m of a Accessible Green or Play Space, within 1600m of a Town/District or Local Centre, within 800m of a Community/Leisure Facility	
Suitability Comment:	The site falls within an area that has an overriding 'urban fringe' character, due to the urban character of the adjoining industrial estate and waste transfer. The site lies within a field to the north of the waste transfer station, which is mostly hidden by vegetation, with only occasional glimpses through gateways along Standard Way. Visibility of the site is therefore relatively limited, and visual sensitivity is quite low, whilst strong vegetation cover significantly reduces intrusion from the motorway, and creates an enclosed and attractive parcel of land of lower quality landscape value. Site is suited for either B2 or B8 employment uses.		
Is the site suitable?	Yes	Is the site available?	Yes
		Is the site considered achievable?	Yes

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson
[REDACTED]

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

1) Policy: FTC4 - Fareham Station West

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Part of this site lies within current day flood zone 2, there is also a culverted watercourse that flows beneath the site. We are supportive of bullet points (i) and (j) within this policy that recognise these key issues and require full consideration of them within any proposal that comes forward. This is essential to allow the safe redevelopment of the site by ensuring that flood risk is not increased and reduced wherever possible.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: HA7 - Warsash Maritime Academy

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Within this policy it is correctly recognised that part of the site lies within current day flood zones 2 and 3 and that this risk is likely to increase with climate change. We are therefore supportive of criteria (m) within the policy wording stating that development should avoid flood risk areas. This will ensure that the site is developed safely without increasing flood risk and reducing it where possible.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

3) Policy: HA19 - 399-403 Hunts Pond Road

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

It is correctly recognised within the plan that part of this site lies within current day flood zones 2 and 3. We are pleased to see that a development criteria (f) has been included to specify that no development or site access should be within these areas. This will ensure the development and its occupants are not at increased risk of flooding.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

4) Policy: CC1 - Climate Change

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

We are very supportive of this policy on climate change, which we are happy to see is cross cutting and has specific reference to flood risk, water efficiency and green/blue infrastructure. This will help ensure that development in Fareham Borough is sustainable and resilient to climate change.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

5) Policy: CC2 - Managing Flood Risk and Sustainable Drainage Systems

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

We support the inclusion of this policy and we see it as essential given the flood risk in the Borough from a variety of sources. We feel that it is a robust policy that provides a clear approach as to how potential flood risk from all sources of flooding should be managed through the planning application process. It will ensure that risk is not increased for either the new or existing population of the Borough.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

6) Policy: D4 - Water Quality and Resources

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

We are very supportive of this policy. The inclusion of the higher water efficiency standard acknowledges the water resource sensitivity of South Hampshire and should help ensure that sustainable growth can be achieved throughout the Local Plan period. Reducing the amount of water entering the treatment works and receiving environments is also a key way of helping mitigate issues around the capacity of waste water treatment works and receiving environments, especially in relation to the discharge of Nitrogen into the surrounding harbours. We are also pleased to see the mention of water quality, ensuring that proposals are not detrimental to the water environment whilst also seeking opportunities to enhance it, helping achievement of Water Framework Directive objectives.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

7) Policy: HA44 - Assheton Court

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

This site has correctly been identified within the plan as lying partially within the current day flood zones 2 and 3, this risk is likely to increase with climate change. We understand that this policy proposes the redevelopment of an existing site but that it would result in additional units being proposed. We do not feel that enough evidence has currently been produced to demonstrate that this site could be delivered in a safe manner. We do not have details with regard to the particular flood risk characteristics that would affect the site but it is likely that there could be a significant depth of flooding in future years as a result of sea level rise. It must therefore be given careful consideration as to whether it would ever be possible to eliminate the risk of tidal flooding. If the proposal was for redevelopment of the site without the addition of additional units then there would be an opportunity to redesign the site to reduce the risk of flooding below what it would have been were there to be no changes made, this is obviously not the case if additional people are to be put at risk. Given the use of the site and the likely level of residual flood risk, consideration of flood response planning i.e. prior evacuation/safe refuge will be important. Our view is if this site is to be allocated for redevelopment then there should be no increase in occupancy, which would increase the number of people residing within an area of potentially significant flood risk. We would also point out that in the strategic flood risk assessment document that accompanies the plan, the column regarding whether the sequential test has been passed or not is blank. This obviously needs to be completed and we feel that the council should give consideration as to whether this is the correct type of development in this location. We acknowledge that sheltered accommodation already exists on this site but by redeveloping the site this extends the lifetime of the building over a time when the risk of flooding is also likely to increase.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Further consideration needs to be given to whether this is an acceptable location for the allocation. Currently there is no evidence that the sequential test has been passed for this site and that there are no other locations suitable in lower areas of flood risk. If the sequential test can be passed then further assessment of the future flood risk to the site should be undertaken to demonstrate that the site is deliverable in flood risk terms both now and in the future. If this can be demonstrated, we do not think that additional units should be included as part of this proposal as this would put more vulnerable people at risk and therefore the overall risk of the proposal would be increased.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It should be demonstrated that flood risk can be adequately managed for the site and there is no increase in risk to the site and its occupants. It would therefore be compliant with paragraphs 155 - 161 of the NPPF and policy CC2 of this plan.

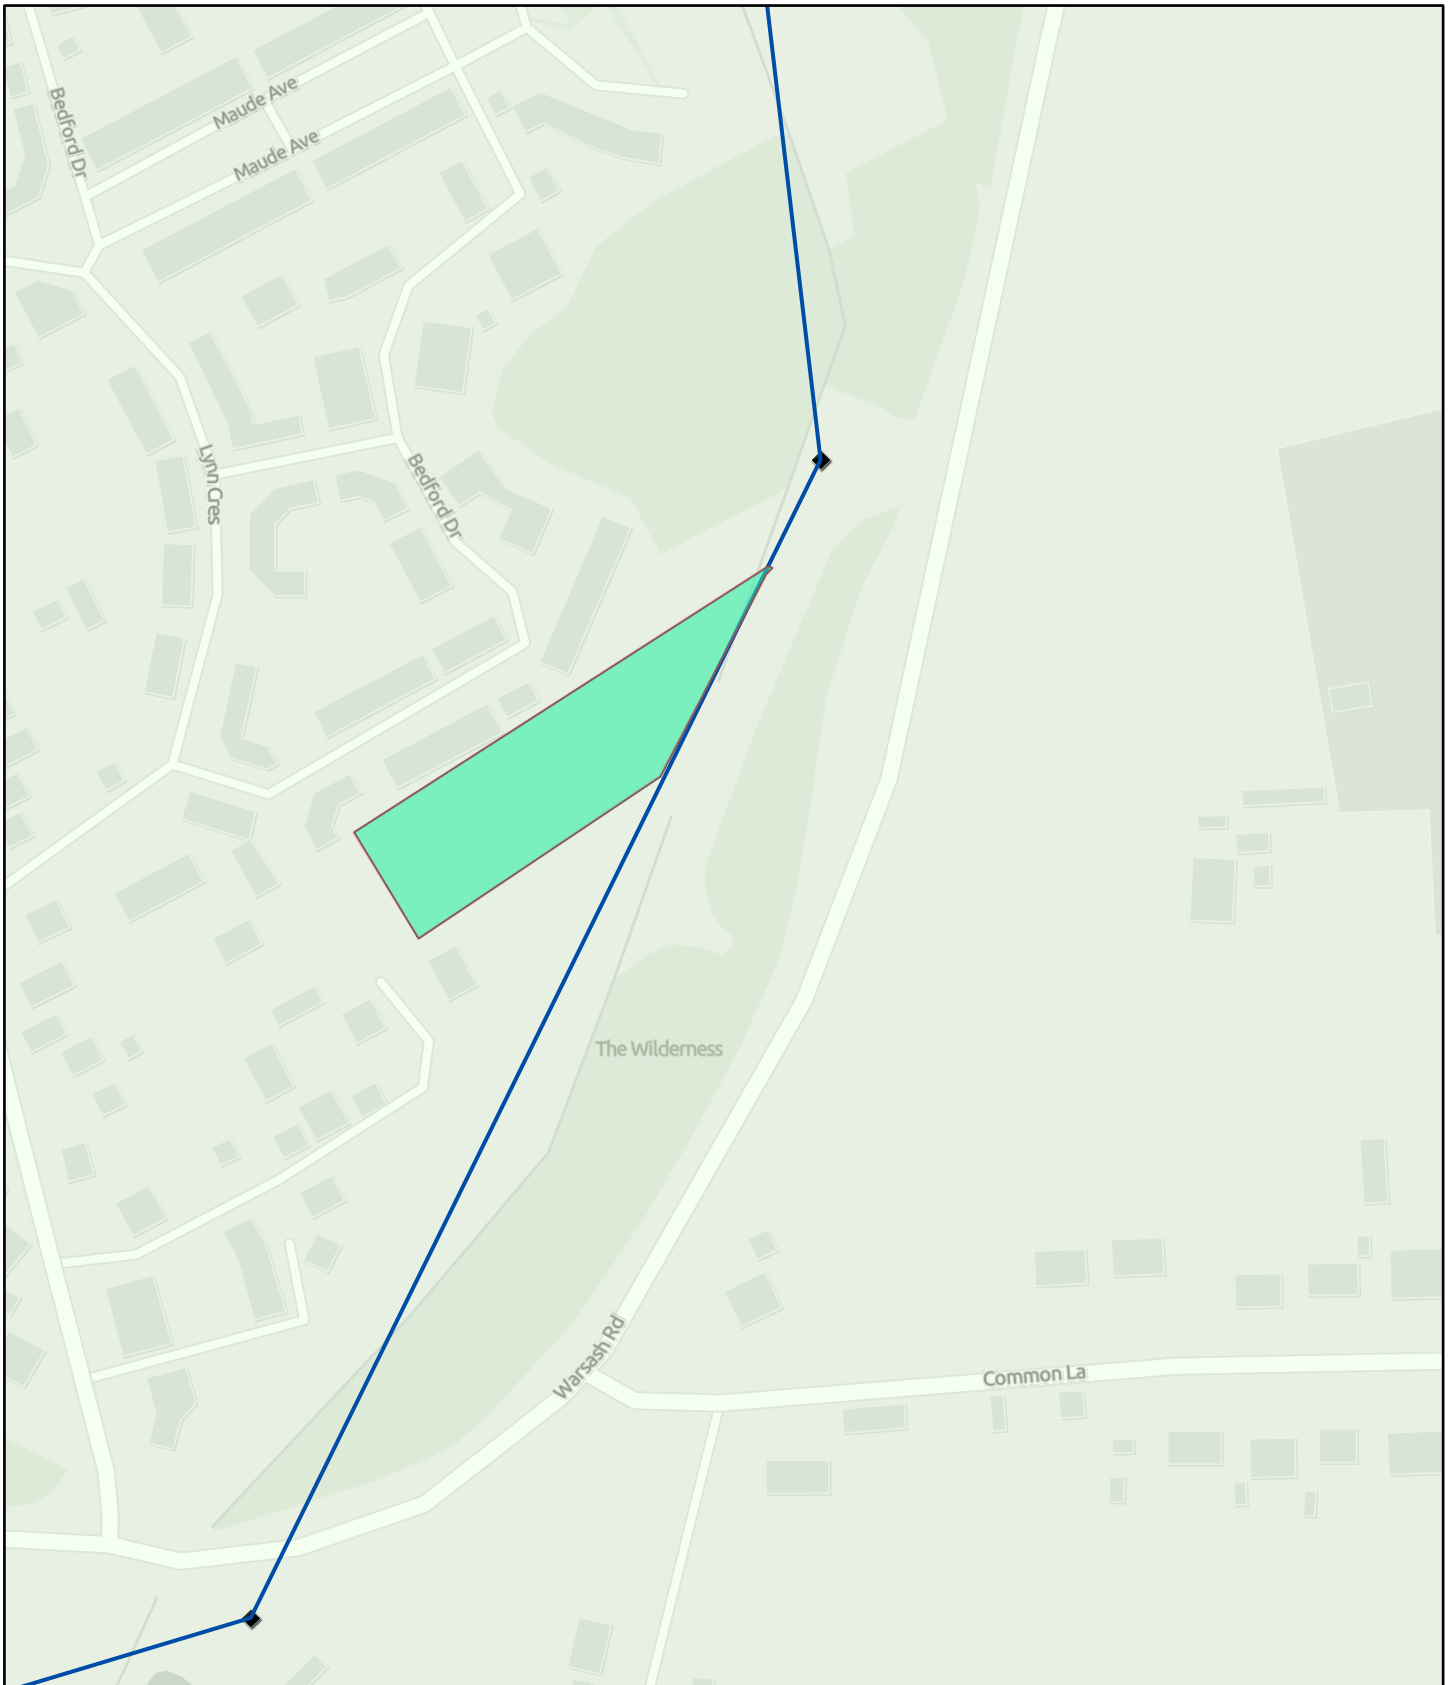

Your suggested revised wording of any policy or text:

It should be demonstrated that flood risk can be adequately managed for the site and there is no increase in risk to the site and its occupants.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson

[REDACTED]

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

Your ref: Regulation 19 Local Plan
Consultation

Date: 18 December 2020

Dear Sir/Madam

Regulation 19 Local Plan Consultation

In response to the above consultation, please find attached the general landowner comments in written representations on behalf of Hampshire County Council Property Services, in its role as a public landowner to help inform the next stages of the emerging Local Plan Update to 2038. These are separate from the comments submitted on behalf of Hampshire County Council in respect of its regulatory functions.

As landowner, the County Council will be responding to the Local Plan Consultation on the following Policies/Paragraphs (please see attached):

- Strategic Policy H1: Housing Provision
- Policy D1: High Quality Design and Place Making
- Housing Allocation Policy: HA3 (Southampton Road)
- Housing Allocation Policy: HA9 (Heath Road)
- Housing Allocation Policy: HA13 (Hunts Pond Road)
- Housing Allocation Policy: HA22 (Wynton Way)
- Housing Allocation Policy: HA24 (335-337 Gosport Road)
- Strategic Policy R4: Community and Leisure Facilities
- Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent
- Policy D4: Water Quality and Resource
- Paragraphs 11.55/56

To date, Hampshire County Council in its capacity as landowner, has supported the earlier stages of the Local Plan Update to 2037. The purpose of the following is to offer comments, from a landowning perspective, to help inform the scope and soundness of Fareham Local Plan when examined by the Secretary of State as anticipated in Summer 2021.

I hope this is helpful to you in continuing to support the Borough Council in subsequent stages of the Local Plan Update to 2037.

Yours sincerely

Louise Hague MRICS MRTPI
Senior Development Manager

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy H1: Housing Provision

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its capacity as landowner supports the spatial approach to Policy H1 to distribute development through Local Plan allocations. The County Council considers that this is a sound approach that is positively prepared, justified and deliverable within the Plan period (effective) based on the Borough Council's objectively assessed needs and wider Local Plan evidence base.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

FAREHAM

Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council, as landowner, supports Policy D1 as it considers that the density of schemes should be informed by and be sympathetic to the character of the surrounding areas, rather than having a set standard. This allows sufficient flexibility (effective) to support best practice urban design principles particularly with regards to legibility to emphasise the importance of place as well as sensitively manage the transition from an urban to rural settlement edge.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Housing Allocation Policy: HA3 (Southampton Road)

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council, as one of the landowners for this site, supports the inclusion of this draft allocation and has provided information through the Local Plan process to date to support the allocation. The County Council re-affirms that that its land within Policy HA3 is available and deliverable within the Plan period.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

B3 Please provide details you have to support your answers above

Hampshire County Council as a landowner supports the allocation of its land in Policy HA9. The site has a resolution to grant planning permission for 70 dwellings (insert ref). The County Council, as applicant, is currently engaged in on-going discussions with the Borough Council Planning Case Officer, Natural England and third-party providers to put in place sufficient mitigation to achieve a nitrate neutral development. The County Council as landowner has also submitted a pre-application submission to Natural England for consideration of its own land to mitigate the nitrate output of site Policy HA9. This evidence offers a realistic prospect that the site is capable of coming forward in within the early stages of the Plan period. The County Council, as landowner, re-affirms that it's land within Policy HA9 is available and deliverable.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

Strategic Policy R4: Community and Leisure Facilities

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the intentions of Policy R4 to maintain the provision of necessary community facilities during the Plan period. Notwithstanding its support for Policy R4, the County Council is still concerned that the draft policy does not meet the tests of soundness as it appears overly restrictive and not sufficiently flexible to respond to unexpected and ever-changing needs to community facilities brought through public service providers service reviews during the Plan period. This presents a risk that Policy R4 is not effective.

The County Council as a public service provider has an on-going need to review and, if necessary, rationalise surplus facilities as part of wider County Council strategies to improve local services in the community. Such County Council services include 'Children's Services' (pre-school through to the 14-19 year age group), 'Adult Services' (catering for those with learning disabilities, mental health, older people, and persons with physical disabilities), and 'Community and Cultural Services' (libraries, museums, sports, recreation, tourism).

The County Council would like to emphasise its statutory function to provide public services, and to remain effective in meeting this commitment, the County Council will be implementing a series of service-driven improvements, covering both frontline and support services. This may sometimes result in the 'necessary loss' of particular community buildings and land in County Council ownership, in order to reinvest proceeds of sale in local service improvements. The policy should have increased flexibility to accommodate the unique role and function of public service providers.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to accommodate the unique role and function of public service providers and so be effective.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council therefore recommends the following addition/ changes to Policy R4 to overcome its objection (see below). This draws on the wording of Basingstoke & Deane Borough Council's Adopted Local Plan 2011 – 2029, Policy CN8 – Community, Leisure and Cultural Facilities, part h, and South Downs Local Plan 2014– 2033, Development Management Policy SD43- New and Existing Community Facilities and is therefore a material consideration in Plan making. The County Council's proposed amendment would reinforce the unique role and function of public service providers and their need for managed change to deliver operational service improvements over the Plan period (be effective).

B4c Your suggested revised wording of any policy or text:

Development proposals that would result in the loss of community or publicly owned or managed facilities will be permitted where:

- i. The facility is no longer needed; and
- ii. No alternative community use of the facility is practical or viable; and
- iii. Any proposed replacement or improved facilities will be of equivalent or better in terms of quality, function and accessibility; or
- iv. the proposals are part of a public service provider's plans to re-provide or enhance local services and the proposal will clearly provide sufficient community benefit to outweigh the loss of the existing facility, meeting evidence of a local need.*

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

- Yes, I want to take part in a hearing session No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its role as a public landowner supports the intentions of Policy NE4 to protect the integrity of the designated sites from increased nutrients. The County Council has confidence that any increased wastewater production related to its draft allocated sites will be suitably mitigated through on-site and off-site mitigation measures as required under the policy.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Policy D4: Water Quality and Resources

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the principle of Policies CC1 and D4.

Notwithstanding this, the County Council is concerned that the draft policy does not meet the tests of soundness as it is not sufficiently flexible to respond to unexpected changes during the plan period.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to be consistent with national policy.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council would be mindful to overcome its objection if the policy is amended to introduce sufficient flexibility in the wording. This would still seek to achieve a high standard of sustainable development but would not require potentially unattainable standards to be met (be effective).

B4c Your suggested revised wording of any policy or text:

To minimise impact on the water environment and adapt to climate change, all new dwellings shall achieve as a minimum the Optional Technical Housing Standard for Water efficiency of no more than 110 litres per person per day, *unless sufficient evidence justifies meeting the mandatory national standard (no more than 125 litres per person per day)*. Development that achieves a higher technical standard of 100 litres per person per day will be supported.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

B3 Please provide details you have to support your answers above

Hampshire County Council, in its role as a public landowner and service provider, supports the policy aspiration to achieve energy efficiencies in new non-residential development. In particular the County Council notes that paragraph 11.55 considers how the BREEAM assessment process can influence viability of a proposal and make allowances for this, to ensure the plan will remain effective over the plan period. For example, as landowner, the County Council considers that any forthcoming draft policy should be open to demonstrating meeting this energy efficiency standard by alternative equivalent standards such as those based on an embodied carbon (CO₂ / Kg / sqm) metric as advocated by the RIBA 2030 Climate Challenge:
<https://www.architecture.com/-/media/files/Climate-action/RIBA-2030-Climate-Challenge.pdf>

Planning Policy Manager
Fareham Borough Council

Enquiries to: Louise Hague

Our ref: Y00511

Tel: 0370 7794077

Your ref: Regulation 19 Local Plan
Consultation

Date: 18 December 2020

Dear Sir/Madam

Regulation 19 Local Plan Consultation

In response to the above consultation, please find attached the general landowner comments in written representations on behalf of Hampshire County Council Property Services, in its role as a public landowner to help inform the next stages of the emerging Local Plan Update to 2038. These are separate from the comments submitted on behalf of Hampshire County Council in respect of its regulatory functions.

As landowner, the County Council will be responding to the Local Plan Consultation on the following Policies/Paragraphs (please see attached):

- Strategic Policy H1: Housing Provision
- Policy D1: High Quality Design and Place Making
- Housing Allocation Policy: HA3 (Southampton Road)
- Housing Allocation Policy: HA9 (Heath Road)
- Housing Allocation Policy: HA13 (Hunts Pond Road)
- Housing Allocation Policy: HA22 (Wynton Way)
- Housing Allocation Policy: HA24 (335-337 Gosport Road)
- Strategic Policy R4: Community and Leisure Facilities
- Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent
- Policy D4: Water Quality and Resource
- Paragraphs 11.55/56

To date, Hampshire County Council in its capacity as landowner, has supported the earlier stages of the Local Plan Update to 2037. The purpose of the following is to offer comments, from a landowning perspective, to help inform the scope and soundness of Fareham Local Plan when examined by the Secretary of State as anticipated in Summer 2021.

I hope this is helpful to you in continuing to support the Borough Council in subsequent stages of the Local Plan Update to 2037.

Yours sincerely

Louise Hague MRICS MRTPI
Senior Development Manager

FAREHAM Local Plan 2037

Introduction

The Council has published the Publication Version of the Local Plan. This consultation is the final stage before the Plan is submitted to a Government Planning Inspector for independent examination.

The Statement of Representations Procedure and Statement of Fact sets out how and when you can view the Local Plan and respond to the consultation.

You can make comments on the Plan, known as representations, up to 18 December 2020.

What can I make a representation on?

This consultation is different from previous ones as it no longer seeks views on alternative options. You will be asked whether you think the Plan is:

- **Legally Compliant:** Does the Plan meet the legal requirements for plan making as set out by planning laws?
- **Sound:** Has the Plan been positively prepared? Is it justified, effective, and consistent with national policy?
- **Complies with the Duty to Co-operate:** Has the Council engaged and worked effectively with neighbouring authorities and statutory bodies?

You can make a representation on any part of the plan, but only comments that address the three questions above can be taken into account.

You can find out more about each of the questions by reading Fareham Today and the Frequently Asked Questions.

What happens next?

A Planning Inspector will be appointed to consider the Plan and comments from the consultation on behalf of the Secretary of State. All representations will be forwarded, together with the Publication Plan, to the Planning Inspector for consideration.

PERSONAL DETAILS

Data Protection Privacy Statement – Consultation on the Local Plan in accordance with regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012

In order to deliver services to the citizens and communities in Fareham Borough, it is necessary for the Council to collect, gather and process personal data.

In relation to the consultation on the Local Plan in accordance regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, Fareham Borough Council will collect and process personal data for the following processing purposes:

- Receiving representations to the consultation and submitting the Local Plan for examination in public.

The Council is processing this personal data by virtue of the following Lawful Basis:

- Compliance with a legal obligation
- Performance of a task carried out in the public interest.

Consultation responses will be entered onto the online consultation form. The company that host the online consultation form, Snap Surveys are ISO 27001 certified and will store the data on a secure UK server.

The Town and Country Planning (Local Planning) (England) Regulations 2012 requires that, when the Council submits the Local Plan and associated documents to the Secretary of State, for examination in public, the responses made to the consultation on the Local Plan must also be submitted. This includes the personal data collected, such as name, address and contact details.

In addition, any representations submitted will be made available on the Fareham Borough Council website. Addresses, email addresses and phone numbers will not be published.

Representations linked to plan making will be retained for no more than 5 years following adoption of the Local Plan. We will not keep this information for longer than is necessary.

You have certain rights under the General Data Protection Regulations (GDPR) in respect of your personal information. More information about your rights can be found on the Council's website or on request.

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Strategic Policy H1: Housing Provision

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its capacity as landowner supports the spatial approach to Policy H1 to distribute development through Local Plan allocations. The County Council considers that this is a sound approach that is positively prepared, justified and deliverable within the Plan period (effective) based on the Borough Council's objectively assessed needs and wider Local Plan evidence base.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4c Your suggested revised wording of any policy or text:

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

Policy D1: High Quality Design and Place Making

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council, as landowner, supports Policy D1 as it considers that the density of schemes should be informed by and be sympathetic to the character of the surrounding areas, rather than having a set standard. This allows sufficient flexibility (effective) to support best practice urban design principles particularly with regards to legibility to emphasise the importance of place as well as sensitively manage the transition from an urban to rural settlement edge.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

Hampshire County Council as a landowner supports the allocation of its land in Policy HA9. The site has a resolution to grant planning permission for 70 dwellings (insert ref). The County Council, as applicant, is currently engaged in on-going discussions with the Borough Council Planning Case Officer, Natural England and third-party providers to put in place sufficient mitigation to achieve a nitrate neutral development. The County Council as landowner has also submitted a pre-application submission to Natural England for consideration of its own land to mitigate the nitrate output of site Policy HA9. This evidence offers a realistic prospect that the site is capable of coming forward in within the early stages of the Plan period. The County Council, as landowner, re-affirms that it's land within Policy HA9 is available and deliverable.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

Strategic Policy R4: Community and Leisure Facilities

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan.

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the intentions of Policy R4 to maintain the provision of necessary community facilities during the Plan period. Notwithstanding its support for Policy R4, the County Council is still concerned that the draft policy does not meet the tests of soundness as it appears overly restrictive and not sufficiently flexible to respond to unexpected and ever-changing needs to community facilities brought through public service providers service reviews during the Plan period. This presents a risk that Policy R4 is not effective.

The County Council as a public service provider has an on-going need to review and, if necessary, rationalise surplus facilities as part of wider County Council strategies to improve local services in the community. Such County Council services include 'Children's Services' (pre-school through to the 14-19 year age group), 'Adult Services' (catering for those with learning disabilities, mental health, older people, and persons with physical disabilities), and 'Community and Cultural Services' (libraries, museums, sports, recreation, tourism).

The County Council would like to emphasise its statutory function to provide public services, and to remain effective in meeting this commitment, the County Council will be implementing a series of service-driven improvements, covering both frontline and support services. This may sometimes result in the 'necessary loss' of particular community buildings and land in County Council ownership, in order to reinvest proceeds of sale in local service improvements. The policy should have increased flexibility to accommodate the unique role and function of public service providers.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to accommodate the unique role and function of public service providers and so be effective.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council therefore recommends the following addition/ changes to Policy R4 to overcome its objection (see below). This draws on the wording of Basingstoke & Deane Borough Council's Adopted Local Plan 2011 – 2029, Policy CN8 – Community, Leisure and Cultural Facilities, part h, and South Downs Local Plan 2014– 2033, Development Management Policy SD43- New and Existing Community Facilities and is therefore a material consideration in Plan making. The County Council's proposed amendment would reinforce the unique role and function of public service providers and their need for managed change to deliver operational service improvements over the Plan period (be effective).

B4c Your suggested revised wording of any policy or text:

Development proposals that would result in the loss of community or publicly owned or managed facilities will be permitted where:

- i. The facility is no longer needed; and
- ii. No alternative community use of the facility is practical or viable; and
- iii. Any proposed replacement or improved facilities will be of equivalent or better in terms of quality, function and accessibility; or
- iv. the proposals are part of a public service provider's plans to re-provide or enhance local services and the proposal will clearly provide sufficient community benefit to outweigh the loss of the existing facility, meeting evidence of a local need.*

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Policy D4: Water Quality and Resources

B1c Which part of the Policies Map?

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council in its role, as both a public landowner and service provider, supports the principle of Policies CC1 and D4.

Notwithstanding this, the County Council is concerned that the draft policy does not meet the tests of soundness as it is not sufficiently flexible to respond to unexpected changes during the plan period.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

The policy should have increased flexibility to be consistent with national policy.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

The County Council would be mindful to overcome its objection if the policy is amended to introduce sufficient flexibility in the wording. This would still seek to achieve a high standard of sustainable development but would not require potentially unattainable standards to be met (be effective).

B4c Your suggested revised wording of any policy or text:

To minimise impact on the water environment and adapt to climate change, all new dwellings shall achieve as a minimum the Optional Technical Housing Standard for Water efficiency of no more than 110 litres per person per day, *unless sufficient evidence justifies meeting the mandatory national standard (no more than 125 litres per person per day)*. Development that achieves a higher technical standard of 100 litres per person per day will be supported.

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The County Council could offer further clarification on the points raised.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Hampshire County Council, in its role as a public landowner and service provider, supports the policy aspiration to achieve energy efficiencies in new non-residential development. In particular the County Council notes that paragraph 11.55 considers how the BREEAM assessment process can influence viability of a proposal and make allowances for this, to ensure the plan will remain effective over the plan period. For example, as landowner, the County Council considers that any forthcoming draft policy should be open to demonstrating meeting this energy efficiency standard by alternative equivalent standards such as those based on an embodied carbon (CO₂ / Kg / sqm) metric as advocated by the RIBA 2030 Climate Challenge:
<https://www.architecture.com/-/media/files/Climate-action/RIBA-2030-Climate-Challenge.pdf>

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson

[REDACTED]

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

A1 Is an Agent Appointed?

You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan. You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

N/A

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

HA26 – Beacon Bottom East

B1c Which part of the Policies Map?

N/A

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Legally compliant There is no reason to believe the Plan has not met the legal requirements for plan making as set out by planning laws.

Complies with the duty to co-operate The onus is on Fareham Borough Council to demonstrate that the Plan complies with the duty to co-operate. It will have to provide evidence that it has engaged and worked effectively with neighbouring authorities and statutory bodies.

Sound Southcott Homes (Fareham) Ltd considers that Policy HA26, as currently written, is unsound.

Southcott Homes (Fareham) Ltd has submitted a planning application for 9 dwellings at the site under planning reference P/19/1061/FP. This is described as 'Erection Of 9 Dwellings With Associated Parking And Access Following Demolition Of Outbuildings'.

The site has also been promoted to the Council through the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA). It has been given a SHELAA reference of 3180.

There is continued support for housing allocation HA26 and the site promoter is grateful that the Council has increased the indicative yield of the allocation to reconcile with the planning application and SHELAA submission of 9 dwellings, but there is an objection to some of the criteria within the policy.

The majority of the criteria and requirements of Policy HA26 are supported (a, b, c, e, f and g); however, criteria d and h, as currently written, are not justified nor effective.

The site is approximately 150m west of Beacon Bottom's junction with Botley Road. Beacon Bottom is a two-way single carriageway road which serves a predominantly residential area. It is approximately 4.8m wide in the vicinity of the site and is subject to a speed limit of 30mph. To the east access is provided to Botley Road, and to the west access is provided to a number of residential areas where the road narrows.

There is no footway on the northern side of Beacon Bottom and only a narrow pavement on the southern side outside the site. There is not sufficient space within the existing carriageway to provide a pedestrian/cycle link. This new policy requirement under criterion d) is, therefore, not justified nor effective.

Criterion h) is also objectionable and is currently misleading. A development proposal for fewer than 10 dwellings and on a site measuring less than 0.5 hectares would not normally have to provide any of the financial contributions listed, although a contribution to mitigate the impact of a development on the Solent Special Protection Areas would be required for a scheme of any size in line with Policy NE3. Only Policy NE3 is listed in the wording of the policy.

It is not considered that the scheme for 9 dwellings results in a requirement for any infrastructure provision or contributions, with the one exception outlined in the above paragraph.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

- Delete criterion d)
- Amend criterion h) to make clear that the contributions listed may only be required for any scheme proposing 10 or more dwellings (or a site area of 0.5 hectares or more). A contribution towards the cost of measures to mitigate the impact of a development on the Solent Special Protection Areas would be required for a scheme of any size and should be added to the policy.

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

Some of the changes sought under B4a above are simply to address what has previously been agreed with the Council as part of their consideration of application P/19/1061/FP. Other changes seek to delete a requirement which is plainly absurd and, in the case of criterion h), to clarify when contributions can legitimately be required.

B4c Your suggested revised wording of any policy or text:

Criterion d) delete

Criterion h) amend to say:

Infrastructure provision and contributions including but not limited to health, education and transport shall be provided in line with Policy TIN4, unless a scheme for fewer than 10 dwellings (or the site area is 0.49 hectares or less) is submitted. A contribution towards the cost of measures to mitigate the impact of a development on the Solent Special Protection Areas shall be provided in line with Policy NE3

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

- Yes, I want to take part in a hearing session No, I don't want to take part in a hearing session

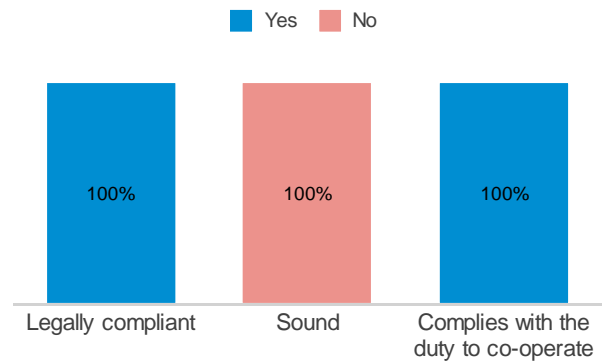

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

It will be necessary to attend the examination and to assist the Inspector by expanding upon the changes being sought to Policy HA26.

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

	Legally compliant	Sound	Complies with the duty to co-operate
Total	1	1	1
Yes	1 100%	0 0%	1 100%
No	0 0%	1 100%	0 0%

Respondent: Mr Robert Marshall (1812-4594)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This site is sound in relation to its proximity to public transport and shops. However, the proposed site allocation is unsound given the indicative yield on 9 dwellings. Undetermined application F/19/1061/FP for this number of houses on the site indicated houses would so close the highway as to be detrimental to the character and appearance of the area and harmful to the setting of the adjoining locally listed cottage. A tall western boundary hedge would have unacceptably shaded the gardens of many houses on the site. Given how small the site is revised layouts are unlikely to overcome this harm. There would thus be conflict with NPPF requirements that: planning should ensure that developments add to the overall quality of the area and be sympathetic to local character (NPPF para 127); and on the prevention of harm to Heritage Assets (paras 193/4)

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The allocation should either be withdrawn from the Plan or alternatively the indicative yield deleted or substantially reduced in number.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b Prevent the harm outlined in B3 above.

Your suggested revised wording of any policy or text:

B4c. See above - potentially the removal of the indicative yield or its revision downwards.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

Sent by email to: consultation@fareham.gov.uk

15th December 2020

Dear Sir/Madam,

Response to the consultation on the Fareham Borough Local Plan 2037

Foreman Homes would like to thank Fareham Borough Council for giving us the opportunity to comment on the emerging Local Plan. We would welcome, in due course, participating in hearings of the Examination in Public.

The following comments are related to:

- Policy H1: Housing Provision
- Policy HP2: New Small-Scale Development outside the Urban Areas
- Policy HP4: Five-year Housing Land Supply
- Policy HP5: Provision of Affordable Housing
- Policy HP9: Self and Custom Build Houses
- Policy NE2: Biodiversity Net Gain
- Policy HA1: North and South of Greenaway Lane
- Policy HA15: Beacon Bottom West, Park Gate
- Policy HA27: Land off Rookery Avenue
- Policy HA34: Sovereign Crescent

Policy H1: Housing Provision

The policy is not sound as it is not consistent with national policy.

Housing Requirement

Paragraph 4.2

The paragraph sets out how the housing need is determined through the use of the standard methodology set out in National Planning Practice Guidance (PPG). Under this method the housing need for Fareham currently stands at a minimum 514 dwellings per annum (dpa), the Council have

**Unit 1, Station Industrial Park, Duncan Road,
Park Gate, Southampton SO30 1BX**
0330 333 7365 foremanhomes.co.uk

Foreman Homes Limited registered in England Company no 03313213

not however, adopted this method in calculating the housing need. As it is rightly said, in August 2020 the Government released a consultation on a new standard methodology and this is how the housing requirement has been calculated. This methodology is, however, yet to be adopted and therefore the resultant identified housing requirement figure set out in the policy falls way below what is currently required to accommodate the growing need in the Borough (as per the current standard methodology). Due to this shortfall, the policy is contrary to paragraph 60 of the National Planning Policy Framework which states that the strategic policies should be informed by a local housing need assessment, conducted using the standard method in the NPPG, and therefore the Council's approach to calculating housing need is incorrect and considered unsound.

Housing Supply

Paragraph 4.8

The paragraph sets out that in order to meet the requirement, the Council have taken into account existing commitments including applications that have 'resolution to grant' which equate to 4,858 (including Welbourne). The latest Five Year Housing Land Supply Position (June 2020) sets out that Planning Inspectors found that applications with a 'resolution to grant planning permission' are not considered deliverable in terms of the definition set out in Annex 2 of the NPPF. The sites with resolution to grant, except for those that relate to allocated housing sites within the Council's adopted Local Plan, should not be included in the five year housing land supply calculations. A number of sites are dependent on nutrient neutrality solutions, and although these are now starting to come forward there is no guarantee these sites will be deliverable. It is not clear as to whether these figures have been removed from the projected land supply calculation in the Local Plan 2037, but if they haven't these numbers need to be adjusted to reflect the projected housing land supply.

Housing Provision

Paragraph 4.19

The paragraph sets out a number of previous housing allocations that have been removed as they are considered to be no longer available or suitable. Not all sites have been examined as part of these comments, however, the removal of allocations HA16 (Military Road) and HA20 (North Wallington and Standard Way) is considered unjustified (Appendix 1). These sites are available and are also suitable for development in the short term, these sites were identified in the SHELAA as being suitable, available and achievable (Appendix 2). There has been no change in circumstances since

these sites were allocated in the previous iteration of the plan, therefore they should not be removed. There are live applications for both sites (ref: P/19/0130/OA and P/19/0894/OA). The allocation site HA16 would contribute 26 self-build dwellings and HA20 would provide 29 dwellings towards the housing numbers. These sites are important in bringing forward housing numbers to meet Fareham's land supply. The de-allocation of the self-build site is contrary to policy 61 of the NPPF which states that "housing need for different groups (including those wishing to commission or build their own homes) should be assessed and reflected in planning policies". The removal is also contrary to the self and custom build requirement that the Council promotes in Policy HP9 which identifies a need for these dwellings in the Borough. The proposed developments include the provision of both market and affordable units the removal of the allocation is again contrary to paragraph 61 of the NPPF. The removal of these sites is unjustified and will result in the loss of much needed housing, including affordable and self-build, the policy is therefore considered unsound.

Conclusions on Policy H1

The Policy is not sound as considered on the basis that:

- It uses a standard method for assessing housing need that is still out to consultation and potentially subject to change.
- It is not clear as to whether the calculated land supply includes applications which have resolutions to grant, if sites have been incorporated numbers should be adjusted to remove these permissions in accordance with the definition of "deliverable" as set out in the NPPF.
- The removal of allocated sites HA16 and H20 is unjustified as they were previously considered by the Council to be suitable and deliverable and there have been no changes in circumstances.

Policy HA1: North and South of Greenaway Lane

The policy is sound as it is consistent with national policy

The allocation allows for 824 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the strategic development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF which states "*Planning policies should identify a supply of a) specific, deliverable sites for years one to five*

of the plan period and b) specific, developable sites or broad locations for growth for 6-10 and where possible for years 11-15 of the plan.” The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

Foreman Homes have submitted two outline applications on two parcels of land on the northern side of Greenaway Lane. An outline application for the land to the east of Brook Lane (ref: P/17/0845/OA) for the development of up to 180 dwellings with access off Brook Lane has a resolution to grant planning permission. The second application was submitted in 2018 and for residential development of up to 80 dwellings on the site known as land to the west of Lockwood Road (ref: P/18/0590/OA). Both sites are developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HA15: Beacon Bottom West, Park Gate

The policy is sound as it is consistent with national policy

The allocation allows for 29 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a current planning application for 29 dwellings (P/18/1258/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HA27: Land off Rookery Avenue

The policy is sound as it is consistent with national policy

The allocation allows for 32 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a current planning application for 32 dwellings (P/19/0870/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted. The site is defined as brownfield land, therefore development would make effective use of the land and policy is supported by the NPPF Paragraph 117-119.

Policy HA34: Sovereign Crescent

The policy is sound as it is consistent with national policy

The allocation allows for 38 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a resolution to grant an application for 38 dwellings (P/18/0484/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HP2: New Small-scale Development

The policy is not sound as it is not consistent with national policy.

The overarching principle of this policy is supported, however, the policy as it is currently written is not consistent with national policy. Paragraph 122 and 123 of the NPPF set out that planning policies should support development that makes efficient use of land in order to meet as much of the identified need for housing within the area. The restriction of 4 dwellings on sites on the edge of urban areas may not be constructive to making efficient use of the land as some sites may be able to accommodate more. It is suggested that the threshold be increased to 10 units which would reflect the definition of a minor development as set out in Annex 2 of the NPPF.

Paragraph 5.16

Paragraph 5.16 supports Policy HP2 (New Small-Scale Development Outside the Urban Area) and sets out what is considered to be sustainable in relation to walking distances from the site to nearby facilities. These criteria are based only on walking and not cycling distances, which should be considered as it is another form of transport that the Council is promoting. The distances set out in the criteria should be based on the Manual for Streets which sets out what is considered to be sustainable:

- 800m is a comfortable walking distance.
- 2km is a reasonable walking distance.
- Cycle distance has a range up to 5 miles.

Recommendations

The threshold of not more than 4 dwellings should be amended to a threshold of not more than 10 dwellings.

Walking distances set out in the policy should be changed to be in line with the Manual for Streets. Cycling distances should also be considered as cycling is promoted as a sustainable alternative to the

use of a car. If the distances are set to those currently suggested in the draft plan, a number of sustainable sites will be discounted and the policy would not make sufficient use of land

Conclusions on Policy HP2

Although the Policy is generally supported, as it is written it is currently considered to be unsound:

- The limit of 4 dwellings is not constructive to making the most efficient use of land as set out in paragraphs 122 and 123 of the NPPF
- Sustainable distances only consider walking distances and not cycling or multi modal trips.

Policy HP4: Five-year Housing Land Supply

The policy is sound as it is consistent with national policy

Policy is positively prepared and justified and is consistent with paragraph 35 of the NPPF. The policy reflects the existing policy DSP40 of the Local Plan Part 2 which has allowed for the delivery of dwellings towards the housing land supply of the borough. The continuation of this approach to providing housing land supply is considered appropriate and pro-active. This will allow for a contingency plan if the developments set out in Policy HP1 do not come forward within the plan period and the 5 year housing land supply falls short.

Policy HP9: Self and Custom Build Houses

The policy is unsound as it has not been justified

Although it is agreed that provisions should be made for self and custom build dwellings and applications should be supported in principle, the requirement for sites over 40 to set aside 10% of dwellings is unjustified and inconsistent with national policy.

The requirement would place burdens on house builders which may not be justified. The Self and Custom Build Background Paper suggests that a significant proportion of sites were met through windfall sites and this is likely to continue. Evidence therefore suggests that the Council, through normal development management processes, is supporting sufficient plots to come forward without imposing a requirement on major developments. In addition, Policy H2 will support the delivery of additional sites that will be more attractive to both self and custom build housing. If the demand is being met by smaller sites, as it currently is, there is no requirement or justification to rely on major housing developments, which are likely to be less attractive. The requirement for a developer to wait

12 months before selling a dwelling as it is not required as a self-build is unjustified and reduces the amount of housing available on the open market and as a result reduce housing figures.

Conclusion of Policy HP9

The policy is unjustified and is not positively prepared in accordance with paragraph 35 of the NPPF. The policy is not required there should be deleted.

Strategic Policy E1: Employment Land Provision

The policy is unsound as it is not in accordance with national policy

The policy sets out there is a requirement of 104,000m² of new employment floor space required over the plan period and this will be provided over three sites. It is suggested that there is a need for a contingency plan in case these sites do not come forward to meet the required space. A number of employment allocations, which were allocated in the previous iteration of the draft local plan, have been removed which is considered to be unjustified as they were considered sustainable and deliverable and key to bringing forward much needed employment space. It is argued that further sites should be allocated to ensure there is no shortfall if the allocated sites do not come forward or are not suitable for the needs of future employers.

The employment allocation E5 (Standard Way, Appendix 3) included in the previous edition of the emerging Local Plan 2037 was identified as a site that could provide 2000m² of flexible employment floor space. This site was identified in the SHELAA as being suitable, available and achievable (Appendix 4). There has been no change in circumstances since these sites were allocated in the previous iteration of the plan, therefore they should not be removed. The site is still available and developable which is evident through the live application on site – P/19/0196/OA.

Conclusion of Policy E1

The reliance on three allocations does not allow for flexibility if these sites do not come forward. The floorspace required over the plan period does not take into consideration fluctuation in the employment market, therefore, further allocations should be included in the policy.

Policy NE2: Biodiversity Net Gain

The policy is unsound as it is not in accordance with national policy

Policy reflects the Government's suggestion that new development should improve the biodiversity on their site to show a 10% net gain over the pre-development baseline. Whilst it is recognised that this is the Government's current favoured position, it is likely that there will be transition period to allow the development industry to adapt to the proposed changes. As such, it is suggested that the policy remains consistent with paragraph 170 of national policy to seek net gains in biodiversity and not include the requirement to show a 10% net gain. A policy without a specific percentage requirement would be consistent with current policy and should the relevant legislation be enacted, as currently proposed, such a policy would be sufficiently flexible to support a 10% requirement and any transition period.

Conclusion of Policy NE2

Although policy reflects the Government's current favoured position a percentage requirement should not be set as it is contrary to paragraph 170 which does not set out a specific percentage.

Conclusion

At present it is not considered that the plan is sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, for the following reasons:

- Housing needs have not been assessed in accordance with standard methodology as set out in the PPG;
- It is not clear as to whether the calculated land supply includes applications which have resolutions to grant, if sites have been incorporated, numbers should be adjusted to remove these permissions in accordance with the definition of "deliverable" as set out in the NPPF.
- The removal of allocated sites is unjustified
- Policy H2 is inconsistent with national policy with regard to making the most effective use of land;
- Requirement for 10% of plots on sites over 40 units be allocated for self-builders is unjustified;

A number of policies are considered sound in accordance with paragraph 35 of the NPPF in that they are positively prepared, justified and effective. These include:

- Policy HA1: North and South of Greenaway Lane

- Policy HA15: Beacon Bottom West, Park Gate
- Policy HA27: Land off Rookery Avenue
- Policy HA34: Sovereign Crescent
- Policy HP4: Five-year Housing Land Supply

We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and examination. Should you require any further clarification on the issues raised in this representation please contact me.

Yours faithfully,

Katherine Richards BSc MSc MRTPI

**Unit 1, Station Industrial Park, Duncan Road,

Foreman Homes Limited registered in England Company no 03313213

Appendix 1: Allocations HA16 and H20 removed from the Local Plan

DEVELOPMENT ALLOCATIONS

Housing Site: HA16	SHLAA Reference: 27
Name: Military Road	Proposed Use: Self and Custom Build
Location: Wallington	Capacity: 26 dwellings
Size: 2.2 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- The provision of land for self and custom build housing, to include the provision of serviced plots; and
- Provision of an illustrative masterplan to identify the layout of individual plots;
- The quantum of housing proposed is broadly consistent with the indicative site capacity; and
- Primary highway access shall be focused from Military Road; and
- Building heights shall be limited to a maximum of 2 storeys; and
- Safe pedestrian and cycle access and crossing points from the site to Pallant Gardens, Drift Road and Pinks Hill housing allocation (HA8); and
- Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living

DEVELOPMENT ALLOCATIONS

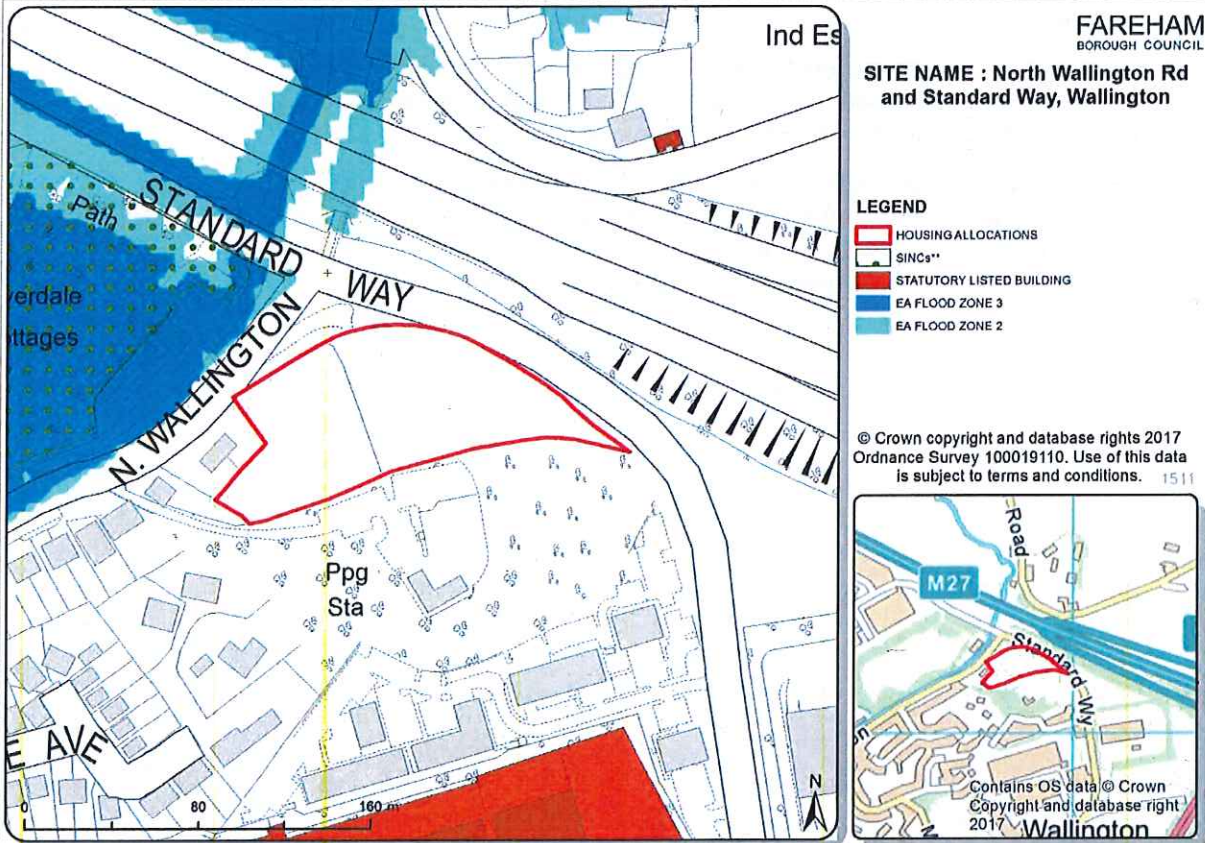

conditions or prevent damage to any nearby dwellings, roads, footpaths or other infrastructure; and

- h) A Heritage Statement shall accompany any application to provide details on the potential impact of proposals on the conservation and setting of the Fort Wallington façade; and
- i) Proposals shall demonstrate that the development will have no adverse impacts upon groundwater in respect of its location in Zone 1; and
- l) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Off-site highway improvement and mitigations works; and
 - Local schools and early-years childcare infrastructure (as identified by the Local Education Authority); and
 - On-site open space which shall be provided on the eastern part of the site in order to provide an appropriate setting to the Fort Wallington façade.

DEVELOPMENT ALLOCATIONS

Housing Site: HA20	SHLAA Reference: 324
Name: North Wallington and Standard Way	Proposed Use: Residential
Location: Wallington	Indicative Capacity: 21 dwellings
Size: 0.87 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- a) The quantum of housing proposed is broadly consistent with the indicative site capacity; and
- b) Primary highway access shall be focused from North Wallington; and
- c) The height of buildings shall be limited to a maximum of 2 storeys; and
- d) The design and layout of proposals shall retain and strengthen the existing tree boundary located along the southern perimeter of the site. The existing trees and hedgerows shall also be retained along North Wallington and Standard Way frontage except where access points may be required; and
- e) Proposals will need to minimise any impact upon the amenity of the adjacent public house residences; and
- f) Proposals shall include a safe pedestrian and cycle crossing point of North Wallington

DEVELOPMENT ALLOCATIONS

to/from the site with Standard Way; and

- g) A noise assessment shall accompany an application for residential development to assess the level of noise from the M27. The design and layout of proposals must take account of any noise mitigation measures that are identified by the assessment; and
- h) Provision of an air quality assessment to identify appropriate on-site measures to mitigate NO₂ emissions arising from the M27 (in accordance with Policy INF2); and
- i) Proposals shall demonstrate that the development will have no adverse impacts upon groundwater in respect of its location in Zone 1; and
- j) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Off-site highway improvement and mitigations works; and
 - Local schools and early-years childcare infrastructure (as identified by the Local Education Authority); and
 - Enhancements to existing off-site open space.

Appendix 2: SHELAA Site 27 (Military Road) and Site 324 (North Wallington and Standard Way)

5. Developable Housing Site Assessments

SITE DETAILS		Developable Housing Site	Fareham East
ID:	27	Site Name:	Military Road, Wallington
Current Land Use:	Paddock		
Surrounding Land Use:	Residential to north and along south boundary. Employment (Fort Wallington) to northeast (Grade II Listed Building)		
Gross Site Area (ha):	2.17	Housing Yield (estimate):	26
Employment Yield (estimate):	0	Gypsy and Traveller Pitches (estimate):	0
SUITABILITY			
Constraints:	Public ROW, Agricultural Land Grade 2, Minerals and Waste 2016 Brick Clay and Superficial sand/gravel, Within 500m of SPA, Within 500m of Ramsar, Within 500m of SSSI, TPOs, Ground Water Protection Zone, Countryside		
Highways/ Pedestrian Access:	Access via Drift Road would be unsuitable. Improvements to the Military Road/ Pinks Hill junction would be required but is considered feasible. Pinks Hill would require improvement to the A27 slip road. Pedestrian and cycle connections would be required to link the site to local services.		
Conservation Comments:	Fort Wallington is a grade II listed building. One of a series of forts built in the 19th century for the defence of Portsmouth Harbour. The south facing curtain wall survives, development of the eastern area would harm the setting of the listed building. The existing northern boundary marks the line of the fort perimeter, retaining a break to define the outline of the former fort would be preferable.		
Noise/Air Quality Assessment:	A noise assessment would be required given the sites proximity to Fort Wallington Industrial Estate but otherwise unlikely to be any issues in this regard.		
Archaeology:	Site not within identified area of archaeological potential.		
Ecology Comment:	Site provides good habitat for notable invertebrate and supports dormice and reptiles. Bat flight line connectivity between wooded habitats and flight line/grazing/roosting habitat for intertidal grazing birds. Woodland should be maintained and any introduced gaps should minimise loss of connectivity. Lighting strategy should leave edges dark.		
Accessible Facility Types: 7/10	Within 1600m of a Secondary School, within 800m of a Convenience Store or Supermarket, within 1200m of a GP Surgery, within 1600m of a Major Employment Areas, within 800m of a Accessible Green or Play Space, within 1600m of a Town/District or Local Centre, within 800m of a Community/Leisure Facility		
Suitability Comment:	Suitable highways improvements required. Development must have regard to TPOs, Listed Building and ecological potential. Proximity of Fort Wallington Industrial Estate with regards to noise impact should be considered.		
Is the site suitable?	Yes	Is the site available?	Yes
		Is the site considered achievable?	Yes

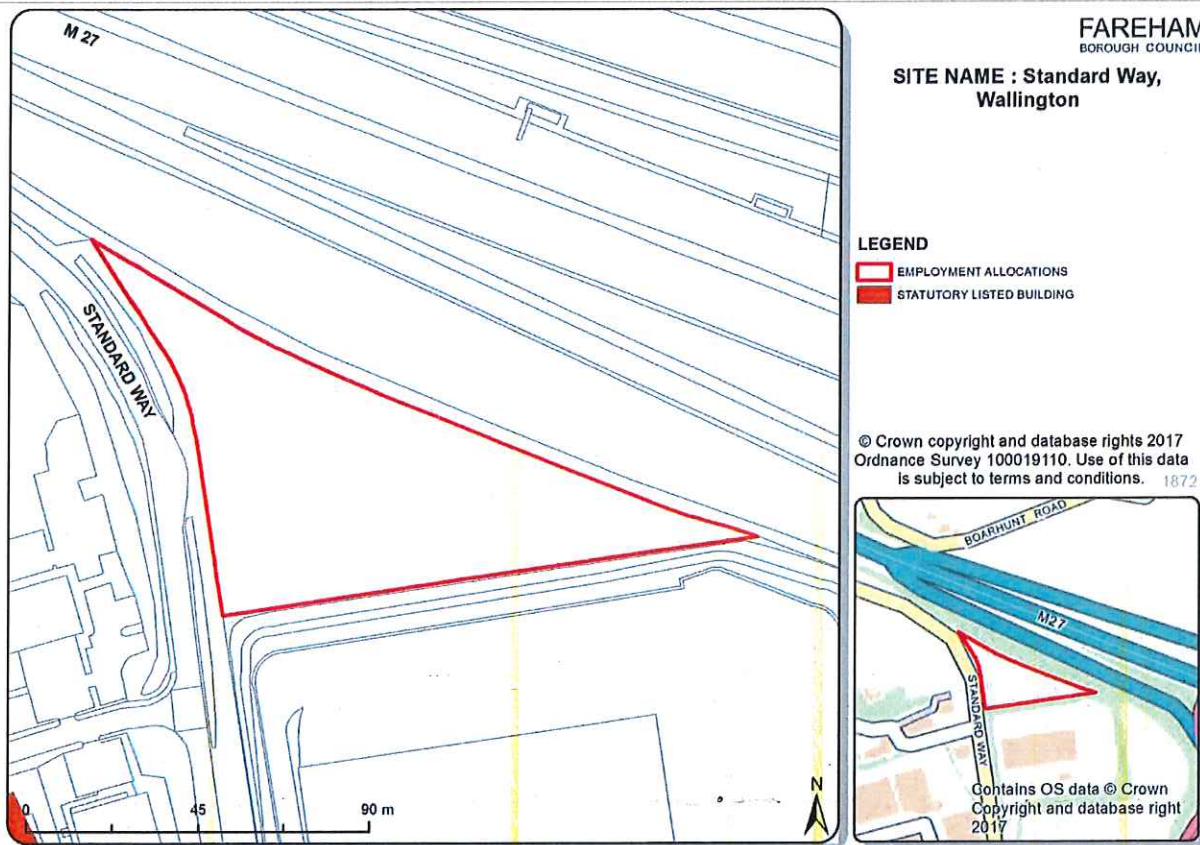

Appendix 3: Allocation E5 removed from the Local Plan

DEVELOPMENT ALLOCATIONS

Employment Site: E5	SELAA Reference: 20
Name: Standard Way	Proposed Use: Employment (B1, B2 or B8)
Location: Standard Way, Wallington	Capacity: 2,000 sq. metres
Size: 0.6 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- The quantum of employment floorspace shall be broadly consistent with the indicative site capacity; and
- Primary vehicular access shall be obtained from Standard Way; and
- Provision of safe pedestrian and cycle connections from the site and along Standard Way up to the junction with North Wallington; and
- Provision of a noise assessment that identifies appropriate mitigation to address noise from the A27, M27 and neighbouring industrial area; and
- Provision of an air quality assessment to identify appropriate measures to mitigate NO₂ emissions arising from the development in accordance with Policy INF2; and
- Boundary vegetation and trees should be retained, apart from where removal is necessary for highways safety reasons; and

DEVELOPMENT ALLOCATIONS

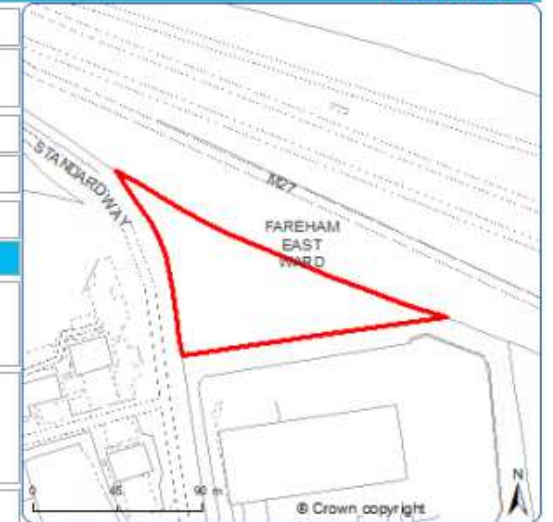

- g) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure:
- Off-site highway improvement and mitigations works.

Appendix 4: SHELAA Site 20 (Standard Way)

7. Developable Employment Site Assessments

SITE DETAILS		Developable Employment Site	Fareham East
ID:	20	Site Name:	Standard Way, Wallington
Current Land Use:	Vacant. Small paddock area located to the north of Standard Way and to the north of Fareham Heights office park. Lined with trees with access off of Standard Way and M27 to north.		
Surrounding Land Use:	Adjoining motorway M27 to northeast; Frontage to Standard Way to west; adjoining WTS to south.		
Gross Site Area (ha):	0.59	Housing Yield (estimate):	0
Employment Yield (estimate):	2,000sqm	Gypsy and Traveller Pitches (estimate):	0
SUITABILITY			
Constraints:	Public ROW, Agricultural Land Grade 2, Minerals and Waste 2016 Brick Clay, Superficial sand/gravel and Safeguarded Site, Ground Water Protection Zone, Countryside, Within 50m of potentially infilled and gassing ground, groundwater source protection zone.		
Highways/ Pedestrian Access:	This site would appear to have the potential for access created from Standard Way. The junction location would need to be towards the southern end of the frontage for visibility purposes. Measures would also need to be put in place to limit additional commercial vehicle activity on Pinks Hill or to make width improvements along its length.		
Conservation Comments:	No known constraints		
Noise/Air Quality Assessment:	No known issues.		
Archaeology:	There are no archaeological sites currently recorded at this location although Fort Wallington sits within the immediate vicinity. It is in an area that might be regarded as within the field of fire (setting) of the fort, but the fort and the views from t		
Ecology Comment:	The site comprises Priority Habitat Coastal and Floodplain Grazing Marsh with woodland boundaries. Buffers to be retained with significant margins. Appears suitable for bats, badger and may support territory of barn owl.		
Accessible Facility Types:	4/10	Within 1600m of a Major Employment Areas, within 800m of a Accessible Green or Play Space, within 1600m of a Town/District or Local Centre, within 800m of a Community/Leisure Facility	
Suitability Comment:	The site falls within an area that has an overriding 'urban fringe' character, due to the urban character of the adjoining industrial estate and waste transfer. The site lies within a field to the north of the waste transfer station, which is mostly hidden by vegetation, with only occasional glimpses through gateways along Standard Way. Visibility of the site is therefore relatively limited, and visual sensitivity is quite low, whilst strong vegetation cover significantly reduces intrusion from the motorway, and creates an enclosed and attractive parcel of land of lower quality landscape value. Site is suited for either B2 or B8 employment uses.		
Is the site suitable?	Yes	Is the site available?	Yes
		Is the site considered achievable?	Yes

Good to have 27 houses in this location with good road access and local shops etc.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Fareham Local Plan 2037 Consultation

December 2020

Response from the Woodland Trust

The Woodland Trust (“the Trust”) is the UK’s leading woodland conservation charity, and wants to see a UK that is rich in native woods and trees, for people and wildlife. We aim to achieve this by restoring and improving woodland biodiversity and increasing people’s understanding and enjoyment of woods and trees.

We own over 1,275 sites across the UK, covering over 23,580 hectares and we have around 500,000 members and supporters. The Trust is recognised as a national authority on woods and trees and a protector of the benefits and values that they deliver for society.

We welcome the opportunity to comment on the Fareham Local Plan 2037 publication draft.

- I am willing for my contact information to be shared.
- The Woodland Trust is willing to give evidence at the Examination in Public.

Please find below the Trust’s comments on individual policies.

Policy CC1: Climate Change

We welcome the priority given to tackling climate change. This policy sets strategic policy aims including c) integrating Green and Blue infrastructure, and refers to the intention to improve tree canopy cover. However, it fails to set any specific policy requirements or targets that will deliver this policy and so risks being unsound in practice. In order to be sound, we recommend a more specific and robust policy wording.

This should include policy in support of new tree planting and woodland creation. A rapid increase in the rate of woodland creation has been proposed by the UK's Committee on Climate Change, to provide a key mechanism to lock up carbon in trees and soils, provide an alternative to fossil fuel energy and resource-hungry building material, and importantly to stem the declines in biodiversity. We recommend setting a target for borough-wide tree canopy cover as part of this policy.

We further recommend setting a target for tree canopy cover on individual development sites, ideally of 30 per cent, to be pursued through the retention of important trees, appropriate replacement of trees lost through development, ageing or disease and by new planting to support green infrastructure.

Proposed amendment

Expand c) as follows:

c) Integrating Green and Blue Infrastructure into the design of developments through approaches such as mandatory biodiversity net gain; a minimum of 30% tree canopy cover, which will help to reduce CO2 concentrations and mitigate the urban heat island effect; and the use of Sustainable Drainage Systems which helps reduce the risk of flooding.

Reason

The independent Committee on Climate Change recommends increasing woodland cover in the UK from 13% to a minimum of 15% by 2035 and 18% by 2050, to ensure the country achieves net zero carbon emissions. Development sites make an important contribution to this target. By setting a 30% canopy cover target for development sites as part of wider Green Infrastructure and net gain requirements, local authorities can help deliver the necessary overall increase to 18%.

Further information can be found in the Trust's [Emergency Tree Plan](#) (2020) ¹.

¹ <https://www.woodlandtrust.org.uk/media/47692/emergency-tree-plan.pdf>

Policy NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

This policy wording is permissive rather than explicitly ruling out development that adversely affects protected sites. We fear that this risks being unsound in failing to afford adequate protection to ancient woodland and veteran trees.

We welcome the explanatory wording in paragraph 9.15 “Development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are reasons of overriding public interests and a suitable compensation strategy” and would like to see that incorporated directly into the policy.

Proposed amendment

In order to make the policy sound, we ask that it be strengthened it, based on the on the wording recommended by the Woodland Trust, either by adding this wording to NE1 or alternatively to Policy NE6 Trees, Woodland and Hedgerows.

- i. Development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are wholly exceptional reasons.*
- ii. As ancient woodland and ancient or veteran trees are irreplaceable, discussions over possible compensation should not form part of the assessment to determine whether the exceptional benefits of the development proposal outweigh the loss.*
- iii. Ancient wood pasture and historic parkland should receive the same consideration as other forms of ancient woodland. The protection of the whole habitat is necessary even though tree cover may be comparatively sparse. Development on open space between trees in an area of ancient wood pasture or historic parkland should not be permitted.*

Reason

The National Planning Policy Framework (NPPF) (paragraph 175c) states: “When determining planning applications, local planning authorities should apply the following principles: c) development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are wholly exceptional reasons and a suitable compensation strategy exists”.

We recognise the intense pressure to identify and bring forward new sites for housing and employment uses. This pressure makes it all the more important that vital protections for ancient woodland and veteran trees are upheld.

Ancient woods are irreplaceable. They are our richest terrestrial wildlife habitats, with complex ecological communities that have developed over centuries, and contain a high proportion of rare and threatened species, many of which are dependent on the particular conditions that this habitat affords. For this reason, ancient woods are reservoirs of biodiversity, but because the resource is limited and highly fragmented, they and their associated wildlife are particularly vulnerable.

Where it is deemed that there is going to be unavoidable residual damage or loss to ancient woodland, the measures taken to compensate for this must be of a scale and quality commensurate with loss of irreplaceable habitat. Where ancient woodland is to be replaced

by new woodland, this should aim to create 30 hectares of new woodland for every hectare lost.

Further information is available in the Trust's [*Planners' Manual for ancient woodland \(2019\)*](#)².

² <https://www.woodlandtrust.org.uk/media/3731/planners-manual-for-ancient-woodland.pdf>

Policy NE6 Trees, Woodland and Hedgerows

This policy wording is permissive rather than explicitly ruling out development that adversely affects protected sites. We fear that this risks being unsound in failing to afford adequate protection to ancient woodland and veteran trees.

It is also insufficiently robust in specifying the level of replacement where woodland and trees are removed in order to deliver net gain in line with policy NE2. The explanatory wording in paragraphs 9.84 and 9.85 indicate a welcome presumption against loss of existing trees and woodland, in particular ancient woodland and veteran trees, but are insufficiently robust in our view.

Where it is deemed that there is going to be unavoidable residual damage or loss to ancient woodland, the measures taken to compensate for this must be of a scale and quality commensurate with loss of irreplaceable habitat. Where ancient woodland is to be replaced by new woodland, this should aim to create 30 hectares of new woodland for every hectare lost.

For other trees, we recommend setting a proposed ratio of tree replacement, with a ratio of at least 2:1 for all but the smallest trees and ratios of up to 8:1 for the largest trees. We would further encourage the specification where possible of UK sourced and grown tree stock for new planting, to support biodiversity and resilience.

Proposed amendments

Amendment 1

In order to make the policy sound, we ask that it be strengthened it, based on the on the wording recommended by the Woodland Trust, either by adding this wording to NE6 or alternatively to Policy NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network.

- i. Development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are wholly exceptional reasons.*
- ii. As ancient woodland and ancient or veteran trees are irreplaceable, discussions over possible compensation should not form part of the assessment to determine whether the exceptional benefits of the development proposal outweigh the loss.*
- iii. Ancient wood pasture and historic parkland should receive the same consideration as other forms of ancient woodland. The protection of the whole habitat is necessary even though tree cover may be comparatively sparse. Development on open space between trees in an area of ancient wood pasture or historic parkland should not be permitted.*

Reason

The National Planning Policy Framework (NPPF) (paragraph 175c) states: “When determining planning applications, local planning authorities should apply the following principles: c) development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are wholly exceptional reasons and a suitable compensation strategy exists”.

We recognise the intense pressure to identify and bring forward new sites for housing and employment uses. This pressure makes it all the more important that vital protections for ancient woodland and veteran trees are upheld.

Ancient woods are irreplaceable. They are our richest terrestrial wildlife habitats, with complex ecological communities that have developed over centuries, and contain a high proportion of rare and threatened species, many of which are dependent on the particular conditions that this habitat affords. For this reason, ancient woods are reservoirs of biodiversity, but because the resource is limited and highly fragmented, they and their associated wildlife are particularly vulnerable.

Further information is available in the Trust's [Planners' Manual for ancient woodland \(2019\)](#)³.

Amendment 2

We propose amending the final lines of Policy NE6 to read

“The removal of protected trees, groups of trees (including veteran trees), woodland (including ancient woodland) or hedgerows will only be permitted in wholly exceptional circumstances. Where it is deemed that there is going to be unavoidable residual damage or loss to ancient woodland, the measures taken to compensate for this must be of a scale and quality commensurate with loss of irreplaceable habitat. Where ancient woodland is to be replaced by new woodland, this should aim to create 30 hectares of new woodland for every hectare lost. Where protected trees, woodland and hedgerows are subject to removal, a replacement of an appropriate number, species and size in an appropriate location will be required, at a level that will deliver net gain in tree canopy cover.”

Reason

The current policy fails to specify adequately the level of replacement required to meet statutory biodiversity obligations including the emerging requirement to deliver biodiversity net gain. In addition, the policy fails to ensure increased tree canopy cover at a time when such increases are a goal of national and local policy.

Further information is available in the Trust's guidance on [Local Authority Tree Strategies](#) (2016)⁴.

³ <https://www.woodlandtrust.org.uk/media/3731/planners-manual-for-ancient-woodland.pdf>

⁴ <https://www.woodlandtrust.org.uk/publications/2016/07/local-authority-tree-strategies/>

Policy NE10: Protection and Provision of Open Space

We support the policy that residential development will be required to provide open and play space to meet the needs of new residents. In addition, we recommend including standards for access to natural green space and woodland for existing and new developments.

Proposed amendment

To expand the final lines of policy NE10 as follows:

“Residential development will be required to provide open and play space to meet the needs of new residents, including access to natural green space and woodland in line with the Accessible Natural Greenspace and Woodland Access Standards. Where possible, development shall address any additional identified deficiencies in open space highlighted within the most recent Open Space study.”

Reason

Without specific standards, the policy risks being ineffective and therefore unsound.

Natural England’s Accessible Natural Green Space Standard recommends that all people should have accessible natural green space:

- Of at least two hectares in size, no more than 300m (five minutes’ walk) from home.
- At least one accessible 20-hectare site within 2km of home.
- One accessible 100-hectare site within 5km of home.
- One accessible 500-hectare site within 10km of home.
- A minimum of one hectare of statutory local nature reserves per 1,000 people.

The Woodland Trust has developed a Woodland Access Standard to complement the Accessible Natural Green Space Standard. This recommends that:

- That no person should live more than 500m from at least one area of accessible woodland of no less than 2ha in size.
- That there should also be at least one area of accessible woodland of no less than 20ha within 4km (8km round trip) of people’s homes.

Further information is available in the Trust’s guidance [*Residential developments and trees*](#) (2019).⁵

⁵ <https://www.woodlandtrust.org.uk/media/1688/residential-developments-and-trees.pdf>

Policy HA27, Rookery Avenue, Sarisbury.

As the draft policy notes, this site is adjacent to ancient woodland at Gull Coppice. Where development sites are adjacent to ancient woodland, we recommend that as a precautionary principle, a minimum 50 metre buffer should be maintained between a development and the ancient woodland, including through the construction phase, unless the applicant can demonstrate very clearly how a smaller buffer would suffice. A larger buffer may be required for particularly significant engineering operations, or for after-uses that generate significant disturbance.

Proposed amendment

Add the following to f) ... *Proposals should seek to enhance the Gull Coppice SINC, while maintaining a 50m protective buffer.*

Reason

In line with the NPPF protection for ancient woodland, buffers shield ancient woodland from damaging edge effects such as encroachment, fragmentation and pollution. If a 50m buffer is not accepted at this location, then we would still recommend specifying a minimum 15m buffer, in line with Natural England's guidance.

Well-planned buffers can offer recreation opportunities as well as contributing to biodiversity net gain. The preferred approach is to create new habitat, including native woodland, around existing ancient woodland. This will help reverse the historic fragmentation of this important habitat. The consequent increase in ecological connectivity between areas of ancient woodland will create the resilient landscapes recommended in *Making Space for Nature* published by Defra (2010).

Further information is available in the Trust's [*Planners' Manual for ancient woodland \(2019\)*](#)⁶.

Dear Sir/Madam,

Regulation 19 Local Plan Consultation (6th November – 18th December 2020)

Thank you for your consultation dated 06 November 2020 which was received by Natural England on the same date.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Natural England welcomes the Council's approach to achieving sustainable development through its Local Plan, particularly through its suite of Natural Environment policies that include protection of internationally, nationally and locally designated sites, the enhancement of the local ecological network and the requirement for biodiversity net gain.

Our comments on the Regulation 19 Local Plan and supporting Habitats Regulations Assessment (HRA) and Sustainability Appraisal (SA) are made below.

Strategic Policy DS1: Development in the Countryside

It is recommended this Policy also requires proposals to ensure compliance with Natural Environment policies, in particular Strategic Policy NE1 and Policy NE2, to ensure impacts on nature conservation interests are properly considered and addressed, and biodiversity net gain is achieved (for applicable development).

With regards to soils, the local plan outlines that 'the benefits of protecting the Best and Most Versatile (BMV) agricultural land are considered against the need for development'. This Policy requires development proposals to demonstrate they 'Conserve and enhance landscapes, sites of biodiversity or geological value and soils'.

The National Planning Policy Framework sets out that:

'Plans should: distinguish between the hierarchy of international, national and locally designated sites; allocate land with the least environmental or amenity value, where consistent with other policies in this Framework¹; take a strategic approach to maintaining and enhancing networks of habitats and green infrastructure; and plan for the enhancement of natural capital at a catchment or landscape scale across local authority boundaries.'

1 Where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality.

It is recommended that this Policy is amended to give appropriate weight to the roles performed by the area's soils. These should be valued as a finite multi-functional resource which underpin our wellbeing and prosperity. Decisions about development should take full account of the impact on soils, their intrinsic character and the sustainability of the many ecosystem services they deliver. The plan should safeguard the long term capability of BMV agricultural land (Grades 1, 2 and 3a in the Agricultural Land Classification) as a resource for the future.

Where site allocations are sited on BMV land, the Plan should outline a requirement for the protection of soils during construction where possible, referencing the '[Defra Code of practice for the sustainable use of soils on construction sites](#)'.

Strategic Policy DS3: Landscape

Natural England welcomes the proposed designation of eight Areas of Special Landscape Quality within the Borough, and the requirement for development in these areas to meet stringent criteria that seek to protect and enhance landscape.

Strategic Policy CC1: Climate Change

Natural England advise all Local Plans consider climate change adaption and recognise the role of the natural environment to deliver measures to reduce the effects of climate change, for example tree planting to moderate heat island effects. In addition factors which may lead to exacerbate climate change (through more greenhouse gases) should be avoided (e.g. pollution, habitat fragmentation, loss of biodiversity) and the natural environment's resilience to change should be protected. Green Infrastructure and resilient ecological networks play an important role in aiding climate change adaptation.

Natural England welcomes Strategic Policy CC1: Climate Change that promotes mitigation and adaptation to climate change through various methods including the integration of green and blue infrastructure into the design of developments, adopting higher water efficiency standards, the integration of energy efficiency, renewable and low carbon technologies into all development, and reducing reliance on car travel.

Natural England supports the embedding of policy that will deliver measures to increase sustainability of development over the Plan period. This should also include reducing consumption of raw natural resources, sourcing more renewable or 'green' energy, and reducing waste. Consideration should be given to the collection of financial contributions from development to offset residual carbon emissions elsewhere in the Borough. Consideration can also be given to the retrofitting of existing development with technology that improves energy and water efficiency.

It is recommended that Local Plan policy also seeks measures that help natural habitats across the Borough adapt to the effects of climate change. We would encourage you to refer to the Natural England and RSPB [Climate Change Adaptation Manual](#) and look at the step by step approach to identifying the climate resilience of habitats that occur in the Borough. Consideration should be given to addressing issues on habitats and protected sites that will be exacerbated by climate change, such as flooding, drought, reduction of water resources etc.- the Manual can also help identify these.

Consideration can be given to delivering specific projects within the Borough. For example, to maximise climate change adaptation and mitigation through the establishment of a Nature Recovery Network (NRN), and the Local Nature Recovery Strategy in which the NRN would sit, to ensure climate change resilience at their core. Such projects could potentially benefit from carbon offsetting contributions from development over the local plan period.

Such an approach could link into other aspects of the Plan such as water and air quality, nutrient mitigation for Solent European designated sites, delivery of biodiversity net gain, natural flood management, and green infrastructure implementation among others. Natural England would be happy to advise further on this aspect.

Policy CC2: Managing Flood Risk and Sustainable Drainage Systems

Natural England welcome this Policy that requires development ensures flood and surface drainage are properly addressed, and that Sustainable Drainage Systems (SuDS) are designed in accordance with CIRIA C753 SuDs Manual, to be as 'natural' as possible.

It is advised that the policy makes clear that where a development drains to a protected site(s), an additional treatment component (i.e. over and above that required for standard discharges), or other equivalent protection may be required to ensure water quality impacts are avoided.

Where SuDS are proposed serving as mitigation for protected sites, development should ensure that appropriate resources are put in place to ensure their long-term (in perpetuity) monitoring, maintenance/replacement, and funding.

Policy CC3: Coastal Change Management Areas (CCMAs)

Sea level rise and coastal change are inevitable and bring both challenges and opportunities for people and nature. Sustainable coastal management needs to embrace long-term change and achieve positive outcomes for both.

Policy CC3 identifies that the North Solent Shoreline Management Plan (SMP) policy for the majority of Fareham Borough's coastline is 'Hold the Line', and identifies two CCMAs between Hook spit and Meon Shore, with an identified coastal management policy of 'No Active Intervention'. The Policy will ensure that development in these areas will appropriately consider coastal change. It also will ensure replacement coastal defence schemes 'are consistent with the relevant Shoreline Management Plan and that there will be no severe adverse impact on the environment, the English Coast Path, and the rights of way network'.

We would advise that the Local Plan should also help facilitate the relocation of valued environmental assets away from areas of risk.

Strategic Policy NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

Natural England welcomes this policy that sets out clearly the hierarchy of nature conservation and the requirement for development to 'demonstrate clearly that the mitigation hierarchy has been followed' in terms of avoiding, mitigating or compensating (as a last resort) impacts on biodiversity. Natural England welcomes the Local Ecological Network (LEN) approach that has been included in the local plan.

It is helpful that the LEN and the Council's Green Infrastructure Strategy have been suggested as tools to provide opportunity for enhancements across the Borough. Please read our comments below in relation to Policy NE2 that regards the choosing of suitable opportunities for biodiversity enhancement.

Policy NE2: Biodiversity Net Gain

Natural England is fully supportive of the inclusion in the local plan of a Policy for biodiversity net gain. It is welcomed that the policy refers to the benefits to Borough residents from the ecosystem services that being close to nature provides, and outlines an expectation that offsite net gain must be sought as close to the development as possible. However in some instances this may be difficult, and Natural England recommends that consideration is given to developing a suite of projects across the LEN that development within the Borough can contribute to thereby ensuring the biodiversity within the Borough is protected and enhanced. For example, partners that manage Local Nature Reserves and Sites of Importance for Natural Conservation in the Borough could submit projects to the local planning authority to enhance the ecological value of these sites. These projects could be funded by development that requires offsite compensation or additional enhancements to achieve biodiversity net gain. This approach can also be used by development with limited opportunities for biodiversity net gain on-site.

The Policy outlines that the Council may prepare and adopt a Supplementary Planning Document (SPD) for Biodiversity Net Gain. Due to the need to ensure net gain is delivered in a suitably

strategic way, and having regard to the timescales of the legislative requirement for net gain and further national guidance, Natural England would support the development of such an SPD and would encourage Policy NE2 to outline this as a clear intention of the Council, in order to provide further guidance and support to aid sustainable development across the borough. Natural England will be happy to advise further to aid the development of such an SPD.

- *Calculating net gain*

Please note that Biodiversity Metric 3.0 is due to be published early 2021, which will supersede [Biodiversity Metric 2.0](#). We advise that the Policy is updated accordingly and that this metric is used to measure gains and losses to biodiversity resulting from development, and implement development plan policies on biodiversity net gain.

Please note that although the Policy includes 'nesting and roosting features' as suggestions for achieving net gain, it is our advice that features such as bird and bat boxes, swift bricks, bee hotels etc should be classed as general biodiversity enhancements that should be included as part of a wider biodiversity enhancement and mitigation plan. Net gain specifically should derive strictly from habitat enhancement and creation, required as calculated using the metric.

- *Wider environmental gains*

The reference to seeking wider environmental gains, for example to address water/air quality, flooding, climate change etc. is welcomed. Opportunities for environmental gains, including nature based solutions to help adapt to climate change, might include:

- Identifying opportunities for new multi-functional green and blue infrastructure.
- Managing existing and new public spaces to be more wildlife friendly (e.g. by sowing wild flower strips, changing cutting regime of open spaces and road verges*) and climate resilient
- Planting trees, including street trees, characteristic to the local area to make a positive contribution to the local landscape.
- Improving access and links to existing greenspace, identifying improvements to the existing public right of way network or extending the network to create missing footpath or cycleway links.
- Restoring neglected environmental features (e.g. a hedgerow or stone wall or clearing away an eyesore)
- Designing a scheme to encourage wildlife, for example by ensuring lighting does not pollute areas of open space or existing habitats

*Please see this [paper](#) regarding cost-effective and low-maintenance management for species-rich grassland on road verges and the value it can contribute to biodiversity and ecosystem services.

Please note that Natural England and Defra are developing an Environmental Net Gain/metric for Natural Capital Net Gain that can be used in conjunction with the Biodiversity Metric (but not instead of). Further information will be available in 2021.

- *Monitoring of net gain*

Your plan should include requirements to monitor biodiversity net gain. This should include indicators to demonstrate the amount and type of gain provided through development. The indicators should be as specific as possible to help build an evidence base to take forward for future reviews of the plan, for example the total number and type of biodiversity units created, the number of developments achieving biodiversity net gains and a record of on-site and off-site contributions.

LPAs should work with local partners, including the Local Environmental Record Centre and wildlife trusts, to share data and consider requirements for long term habitat monitoring. Monitoring requirements should be clear on what is expected from landowners who may be delivering biodiversity net gains on behalf of developers. This will be particularly important for strategic housing allocations and providing as much up front information on monitoring will help to streamline the project stage.

Policy NE3: Recreational Disturbance on the Solent Special Protection Areas (SPAs)

Natural England welcome this policy that will require new residential development to address in-combination effects on the Solent SPAs via recreational disturbance. It is recommended the Policy also outlines that other types of development (such as new hotels, student accommodation, care homes etc.) may also need to address recreational disturbance impacts, both alone and in-combination. Such development should be assessed on a case by case basis.

Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

Natural England welcome this policy that will require new development that propose a net increase in overnight accommodation to address in-combination effects on the Solent designated sites via eutrophication from nutrients in wastewater.

Policy NE5: Solent Wader and Brent Goose Sites

Natural England welcome this policy that will require development to address effects on sites identified by the Solent Wader and Brent Goose Strategy (SWBGS) which serve as functionally linked land to the Solent SPAs.

It is recommended that the following wording within the Policy "*Sites which are used by Solent Waders and/or Brent Geese (as shown on the Policies map)*" is amended to read "*Sites which are used by Solent Waders and/or Brent Geese (as identified within the most up to date version of the Solent Wader and Brent Goose Strategy)*" to take account of any changes to sites and their distribution across the Borough, as these updates can be implemented at irregular times. Any further references to the Policies map should be similarly amended to refer to the SWBGS mapping.

Core Areas – due to their essential function within the SWBG network, it is advised these sites are identified for protection by the Policy. Any development that would result in impacts to a Core Area will need to be carefully assessed on a case-by-case basis. There are limited options where the function of a Core site can be fully replicated elsewhere in terms of its suitability and appropriate locality; where such land is available, an assessment of replicability will need to be undertaken through discussions with Natural England and the Local Planning Authority.

Financial contributions – it is welcomed that the Policy outlines that financial contributions proposed as mitigation will be used for the management and enhancement of an 'agreed suitable identified site for Solent Waders and Brent Geese'. Such proposals should demonstrate how such funds will be used to enhance, manage and monitor sites within the wider Solent Waders and Brent Geese network, in perpetuity. It is suggested that the Council works with relevant partners/stakeholders, including cross-boundary partnerships, to develop a strategic project(s), such as a bird reserve, and/or list of projects to enhance, manage and monitor the wider Solent wader and brent goose ecological network, to which contributions can be directed.

Policy NE6: Trees, Woodland and Hedgerows

Natural England welcomes this Policy that seeks to protect and enhance trees, woodland and hedgerows within the Borough. It is recommended that this Policy requires development proposals that affect ancient woodland, ancient trees and veteran trees, to ensure they are in line with [standing advice](#) published by Natural England and the Forestry Commission.

Policy NE8: Air Quality

It is welcomed that the Policy recognises that 'poor levels of air quality can also lead to environmental issues'. The Policy includes a need for planning applications to consider if they will have a 'potential adverse effect on biodiversity, especially where it would affect sites designated for their biodiversity value'.

The Policy outlines that the Local Plan HRA concludes the Plan 'would not have a likely significant effect on the internationally important habitats and species present in the area'. As this issue has

been considered within the HRA appropriate assessment, the wording here should be amended to use the correct terminology under the Habitats Regulations, i.e. the HRA concludes the Plan will not result in an 'adverse effect on integrity' (the term 'likely significant effect' is used at the screening stage of the HRA). See further comments on air quality below in regards to the Local Plan HRA.

Policy NE9: Green Infrastructure

Natural England welcomes this Policy that seeks to fully integrate green infrastructure (GI) into development and maximise opportunities to connect to the wider environment. The provision of enhanced green infrastructure and sites of nature conservation value can not only help address some of the mental and physical health problems that are experienced in the Borough's population, but can also benefit society in other ways including improvements to local air and water quality, reducing the risk of flooding, alleviating noise levels and aiding climate change adaptation.

Policy NE10: Protection and Provision of Open Space

This Policy references protection of public rights of way. Natural England advises that the Policy should also seek to secure enhancement of public rights of way and National Trails, as outlined in paragraph 98 of the NPPF. Recognition should be given to the value of rights of way and access to the natural environment in relation to health and wellbeing and links to the wider green infrastructure network. It is welcomed the plan seeks new access opportunities; it should seek to link existing rights of way where possible. The plan should avoid building on open space of public value as outlined in paragraph 97 of the NPPF.

It is welcomed that the Policy makes provision for appropriate quantity and quality of green space to meet identified local needs (as outlined in paragraph 96 of the NPPF) based on Natural England's work on [Accessible Natural Greenspace Standard \(ANGSt\)](#) in assessing the level of accessible natural greenspace; it is also welcomed that it recognises development may be required to 'provide more open space above what is required by the standards to make the development more acceptable'.

Policy D1: High Quality Design and Place Making

Natural England welcomes this Policy that requires the design of developments to integrate existing and new habitats and biodiversity within a coherent and well managed, connected structure. It is advised that landscaping of developments and open spaces seeks to use appropriate native and locally sourced species as far as possible to cater for local wildlife.

Policy D4: Water Quality and Resources

Natural England welcome this policy that seeks to conserve water and improve its quality.

Southern Water's Water Resources Management Plan (WRMP) 2019, that covers the planning period 2020-2070, projects a significant supply demand deficit during periods of drought in the Western Area, and commits to implementing a long term water resources scheme to restore the supply demand balance whilst avoiding and/or mitigating impacts on European sites, including the River Itchen SAC.

It is Natural England's advice that in advance of any permitting of such a suitable long term scheme, uncertainty remains with regards to water resources and the impacts of abstraction on protected sites.

Although it is welcomed that Policy D4 requires a water consumption for new dwellings of no more than 110 litres per person per day, Natural England strongly recommend all new development within the Southern Water supply area adopt a higher standard of water efficiency of 100 litres/per person/day, including external water use and re-use, in line with Southern Water's Target 100 demand reduction programme which is committed to within their WRMP19. Natural England also recommends that the Policy encourages the wise use of water in conjunction with the water companies, for example by developments incorporating grey water recycling systems and efficient appliances

Please see Natural England advice above in relation to Policies NE4 and Policy CC2 with regards to nutrients and surface water treatment via SuDS.

Neighbourhood Plans

Currently there are no Neighbourhood Plans in the Borough, but the Local Plan provides a 'strategic evidence base' which will inform any future Neighbourhood Plans.

It is recommended that any future Neighbourhood Plans which allocate housing should also identify spaces for environmental enhancement, for the purpose of offsetting environmental impacts, e.g. through the designation of Local Green Spaces. Such a local approach could give communities more ownership over such green spaces and provide a more strategic route to addressing common environmental impacts from development in that area, such as air and water pollution, habitat and species loss and increased carbon emissions, and could deliver biodiversity net gain and nutrient offsetting.

Such spaces could include the development of community orchards and play areas, woodlands and nature reserves, and serve a variety of functions that benefit both nature and the local community, for example providing benefits to health and wellbeing, offsetting nutrient discharges from allocated development and providing further scope for carbon sequestration.

Specific comments on Housing Allocation Policies

- HA9 - Heath Road (70 dwellings)

It is acknowledged this allocation site has resolution to grant permission for 70 dwellings. It is recommended this Policy includes the requirement to secure an appropriate level of offsite compensation to address the loss of secondary woodland on site which may in parts qualify as lowland mixed deciduous woodland habitat.

- HA29 - Land East of Church Road (20 dwellings)

Much of this site shows as Lowland Mixed Deciduous Woodland priority habitat on the Ecological Network mapping for Hampshire. Part of the site is designated as a Site of Importance for Nature Conservation (SINC) according to the Policy map. The Policy outlines a requirement for ecological mitigation for the site-specific construction and operational impacts of a development proposal. It is advised the Policy outlines a requirement to secure an appropriate level of offsite compensation to address any loss of priority habitat on site to ensure compliance with Policy NE1.

- HA31 - Hammond Industrial Estate (64 bed care home)

The Policy should ensure the impact of nutrients in wastewater is addressed to ensure compliance with Policy NE4.

- HA37 - Former Locks Heath Filling Station (30 dwellings)

This site is adjacent to an area of Lowland Mixed Deciduous Woodland priority habitat as shown on the Ecological Network mapping. The Policy should ensure that impacts on priority habitats and protected species are taken into account and appropriately addressed.

- HA38 – 68 Titchfield Park Road (9 dwellings)

The site is adjacent to Sylvan Glade SINC, much of which is ancient semi-natural woodland. The Policy should ensure compliance with standing advice on ancient woodland, ancient trees and veteran trees and that impacts on the SINC and protected species are appropriately addressed.

- HA42 - Land South of Cams Alders (60 sheltered housing)

This allocation site is located on 'Fort Fareham Grassland' SINC that supports woodland and meadow communities. It also lies adjacent to Fort Fareham SINC known for supporting wet woodland communities.

As previously advised in our response to the Supplement to the Reg 18 Local Plan (letter dated 23rd April 2020), allocations and development proposals should ensure they engage the mitigation

hierarchy, where impacts on designated ecological sites/features should first be avoided, and where not possible, adequately mitigated. Where this is not possible, any loss of priority habitat should be appropriately compensated. All residual ecological impacts will need to be addressed before any net gain for biodiversity can be achieved.

Natural England recommends that where loss of SINC habitat cannot be avoided, the policy should make clear how requirements set out within the NPPF, NERC Act 2006 and Local Plan Natural Environment policies will be met. It is advised an appropriate level of offsite compensation should be required to address any loss of priority habitat on site to ensure compliance with Policy NE1 .

- E4: Solent 2 (Employment - 23,500 sq. metres)

This employment allocation is located on Whiteley Meadow - Plot 2184 SINC and Ashley Wood, Fareham SINC. The Hampshire Ecological Network Mapping dataset shows much of this area as Lowland Mixed Deciduous Woodland, a priority habitat listed as required under Section 41 of the Natural Environmental and Rural Communities Act 2006. The site is also situated adjacent to the Gull Coppice (South-West Remnant) SINC which comprises ancient semi-natural woodland.

It is acknowledged that this site is an existing allocation within the adopted Fareham Local Plan Part 2 (2015). The current Policy outlines a requirement for this development to protect existing woodland and avoid habitat severance, and appropriate mitigation and compensation for any loss of protected trees. However, it is our view that a significant area of habitat, including mature woodland, is likely to be lost as a result of development. The Policy should ensure that it is compliant with Strategic Policy NE1 with regards to impacts on the local ecological network in this locality. In line with existing national and local policy and legislation, it is Natural England's advice that the mitigation hierarchy of avoid, mitigate and lastly compensate is employed where considering impacts on these habitats, particularly those designated as SINC. Measures should be sought to protect and enhance the local ecological network. Where impacts cannot be avoided or adequately mitigated, a comprehensive compensation package should be required that addresses the loss of all priority habitat on site (rather than just specifying protected trees), that seeks to enhance and connect habitat in the locality.

Comments on the HRA

Natural England notes that your authority, as competent authority, has undertaken an appropriate assessment of the Local Plan in accordance with regulation 63 of the Conservation of Species and Habitats Regulations 2017 (as amended). Natural England is a statutory consultee on the appropriate assessment stage of the Habitats Regulations Assessment process.

We have the following comments on the HRA:

- *Recreational disturbance – New Forest designated sites*

The Local Plan HRA screening assessment outlines that although the Borough falls within the 25km buffer of the New Forest designated sites (via a straight line), the minimum actual travel distance by car is of approximately 30km travel distance (via the M27). In comparison to the number of visits from residents closer to the New Forest, the assessment states 'visits to the New Forest SAC/SPA/Ramsar associated with increased housing development in Fareham Borough contribute a significantly lower proportion of overall visits to the designated sites and it is not considered likely that significant effects associated with recreational disturbance from Fareham housing development would arise'. The HRA screens this impact pathway out from an appropriate assessment on this basis.

It is understood Footprint Ecology are currently conducting further analysis on several aspects of their latest visitor surveys. This analysis will assist the definition of a robust catchment area for recreational impacts. It will help in the preparation of a strategic, cross-boundary approach with neighbouring competent authorities to deliver habitat mitigation for the New Forest SPA/SAC/Ramsar. This work is due to be completed shortly and will provide a useful update to the evidence base against which such impacts from new development from surrounding local authority areas can be assessed.

Therefore, whilst acknowledging that the level of additional impacts from new residents is known to significantly decrease with distance from the New Forest designated sites, Natural England consider at this time there remains some uncertainty with regard to the evidence confirming the level of additional impacts from new residents of Fareham local plan development. We therefore advise this issue is taken forward to the appropriate assessment stage where further work may be carried out to ascertain the level of impacts as accurately as possible.

Where impacts are identified, suitable and proportionate mitigation should be proposed; we recommend the Council works with the New Forest National Park Authority and the other partner authorities to develop a strategic approach to addressing recreational impacts from new development on the New Forest designated sites. Such an approach should include developer contributions towards the New Forest National Park Authority's Habitat Mitigation Scheme to enable the authority to deliver site specific mitigation measures on behalf of applicants.

Natural England will be happy to provide further advice to the Council on this aspect as the evidence base develops.

- *Air quality*

The Local Plan is supported by an Air Quality Habitats Regulations Assessment (Ricardo, Sept 2020). The conclusions drawn in the Local Plan HRA in regards to air quality impacts are based on those drawn within the Ricardo report. Natural England concurs with the conclusions drawn in the report.

The Ricardo report suggests that the Council regularly reviews the Defra airborne NOx forecast levels. This is welcomed as a way to ensure any changes in forecasting and potential consequential changes to conclusions drawn in the report for this pollutant can be appropriately reviewed and addressed during the local plan period.

- *Water quality – nutrients*

The HRA calculates a nitrogen budget for the local plan of 2536.99 kgTN/yr. Appendix III of the HRA outlines various mitigation schemes that can be utilised or progressed as a means to ensure nutrient neutrality can be delivered by new development.

The HRA states within its Summary of Findings that the sites Chichester and Langstone Harbours SPA/Ramsar, Portsmouth Harbour SPA/Ramsar and Solent and Dorset Coast SPA are screened out of an appropriate assessment in relation to water pollution impacts. Much of development within Fareham borough is served by Peel Common wastewater treatment works (WwTW), which is a coastal WwTW that discharges effluent several kilometres out into the Solent. It is our advice that long-shore outfall pipes are likely to have shifted and widened the distribution of nitrogen loading within the effluent across the Solent SAC and SPAs. It is important to recognise the loading from Peel Common WwTW contributes to a number of estuaries and catchments within the Solent (including Portsmouth Harbour, Langstone Harbour, Chichester Harbour, River Meon, Wootton Creek and the Medina Estuary catchments). It is therefore Natural England's view that, because of this wide distribution of nitrogen loading, all designated sites should be screened in.

- *Other comments on the HRA*

Section 7.7.3 – this paragraph refers to the 'SAC' although it is relating to Portsmouth Harbour SPA and Ramsar.

Comments on the SA

We are broadly satisfied that the objectives and indicators within the Sustainability Appraisal cover our key interests, and welcome the identification of the need to conserve and enhance biodiversity, landscape character, and to reduce pollution. We also welcome the need to address minimise the

effects of climate change, and to minimise impacts on best and most versatile agricultural land. Please see some more specific comments below.

- SA5: To Minimise Carbon Emissions and Promote Adaptation to Climate Change

This SA objective to address the effects of climate change is welcomed. It is suggested a further monitoring parameter(s) is included to monitor the implementation of new GI/habitat that can seek to alleviate the pressures of climate change on species and the ecological network whilst also providing other benefits as described further in our advice above; e.g. percentage of new GI/ extent of priority habitat within the ecological network.

- SA7: To Conserve and Enhance Biodiversity

We advise that this SA objective also seeks to conserve and enhance geodiversity within the Borough, in line with national planning policy.

The SA outlines the Plan 'is predicted to lead to negative impacts to ecological receptors in the short to medium term, but many of these impacts are capable of being mitigated. Long-term effects are likely to be both positive and negative, and highly site-specific'. It is acknowledged these effects can be avoided/mitigated by the implementation of several policies including NE1, NE3, NE4 and NE5. It is advised Local Plan Policy requires relevant development to carry out site-level Habitats Regulations Assessments in order to ensure impacts on European sites are suitably addressed.

It is also suggested that further monitoring parameters are incorporated to ensure impacts on internationally, nationally and locally designated sites are monitored throughout the Plan period, e.g. via the number, extent and condition of sites designated for nature conservation. We would advise the use of a green infrastructure standard as an indicator, such as Natural England's Accessible Natural Greenspace Standard (ANGSt). Parameters for measuring the implementation of net gain should be introduced, see further above for our advice on net gain monitoring.

We would be very happy to comment further as the plan process progresses. If you have any queries relating to the detail in this letter please contact me on 07787005505.

Yours faithfully

Sent by email: consultation@fareham.gov.uk

Dear Sir / Madam,

RE: Representation on the Publication Version of the Local Plan – Site HA31: Hammond Industrial Estate, Stubbington.

I act on behalf of Frontier Estates (FAR) Limited who have an ongoing interest in the above site and write in response to the current consultation on the Fareham Local Plan 2037. I trust that these representations, duly made within the determined timescales, will be formally accepted and considered alongside the submitted questionnaire.

Background to the site

By way of background, a pre-application enquiry for the redevelopment of the site to provide a care home was submitted to FBC on the 16th October 2019 under reference Q/023319. Meetings to discuss this pre-app were held on the 21st November 2019 and the 17th March 2020. These meetings confirmed that the principle of development would be acceptable.

A call for sites form promoting the site for provision of a care home was submitted to FBC in April 2020. Additional information further to the evolution of the scheme following pre-application discussions was submitted in October 2020. This update suggested the number of bedrooms increase to 68 from 64.

Public consultation was undertaken in November 2020 and included leaflet distribution to 252 local residents; a dedicated project website; and a Survey Monkey Survey for comments to be provided.

A planning application will be submitted to FBC on the 18th December 2020 for the following proposed development:

‘Demolition of existing buildings and erection of a care home (within Class C2). Proposal includes provision of a substation, parking, access, landscaping and other associated works’.

For clarity, the planning application seeks permission for a 68-bed care home set across 2.5 storeys.

Comments on proposed policy HA31: Hammond Industrial Estate

On behalf of Frontier Estates (FAR) Limited, I write to support proposed site allocation HA31: Hammond Industrial Estate. I do however, respectfully request that the following comments on the detail of this allocation policy are reflected in the final draft of the submission plan for formal examination by the Planning Inspectorate in due course.

1. Red Line Boundary and Site Area

At present, the red line boundary in allocation policy HA31 incorrectly includes the residential dwellings at no.129 - 135 Stubbington Lane to the north of the Hammond Industrial Estate site. The land which should not be included is highlighted in yellow below:

Figure 1: Area incorrectly included in allocation policy shown in yellow.

Whilst this land is currently within the same ownership as the Hammond Industrial Estate site, the existing dwellings at no, 129 – 135 Stubbington Lane are to remain in residential use. They do not form part of the contract red line that has been agreed between the current landowner and Frontier Estates (FAR) Limited as part of the land transfer for the site associated with both the planning application and the site allocation. The correct red line for the site is shown below and includes an area covering 0.4ha:

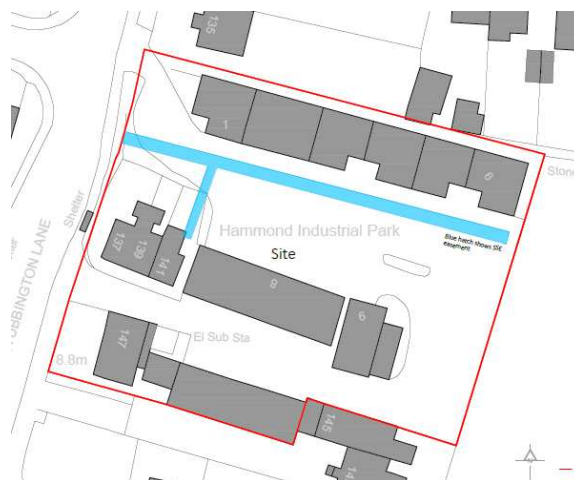

Figure 2: The correct red line for the site.

The site plan for submission with the planning application is shown below and reflects the red line shown in Figure 2.

Point g) refers to the need for a contamination assessment due to the site's close proximity to Solent Airport. It is not considered relevant to specify Solent Airport in this point and so we respectfully request that point h) is amended to read as follows:

'g) A Contamination Assessment demonstrating no unacceptable adverse impact on future occupiers and users of the development shall accompany any application; and'

Point i) refers to the need for a Construction Environment Management Plan. It is noted that this is something that is normally secured through planning condition and we respectfully request that this is reflected in point i) as follows:

'i) A Construction Environmental Management Plan to avoid adverse impacts of construction on the Solent designated sites shall be secured through an appropriately worded planning condition; and'

Point k) refers to infrastructure provision and specifies health, education and transport. We note that the relevant infrastructure provision and contributions will be determined on a case by case basis and will depend on the nature of development proposed. Notwithstanding, it should be noted that Class C2 care home uses do not give rise to a demand for education and so it is respectfully requested that reference to education is removed from point h). Furthermore, the reference to NE3 relates to the Solent Disturbance Mitigation Project which is considered to be irrelevant in this case. Again, C2 care homes do not give rise to additional recreational pressure due to:

- The advanced needs of residents making them unable to leave unaccompanied in most cases;
- The provision of garden space on site for residents (which fulfils their recreational needs); and
- The absence of pets.

As such, it is respectfully requested that point k) is amended to read as follows:

'k) Infrastructure provision and contributions including but not limited to health and transport shall be provided in line with Policy TIN4'.

Conclusion

I trust that this submission is useful in confirming my clients overall support for policy HA31 for the provision of a C2 care home and respectfully request that the minor amendments referred to above are accounted for in the final draft of the submission plan for formal Examination by the Planning Inspectorate in due course. These points are considered to be important as they reflect the optimum use of this previously developed site in response to an identified local need for care beds. It is demonstrated in the planning application submission that a 68-bed care home on the red line shown in Figure 2 can comfortably be accommodated in compliance with the site-specific points listed in policy HA31.

We look forward to engaging further in the process and would be grateful if you could keep us updated with regards to the emerging Fareham Local Plan 2037, and its timetable for preparation. In the meantime, please do not hesitate to contact me to discuss further.

Yours Faithfully

Laura Grimason

Dear Sir/Madam,

Regulation 19 Local Plan Consultation (6th November – 18th December 2020)

Thank you for your consultation dated 06 November 2020 which was received by Natural England on the same date.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Natural England welcomes the Council's approach to achieving sustainable development through its Local Plan, particularly through its suite of Natural Environment policies that include protection of internationally, nationally and locally designated sites, the enhancement of the local ecological network and the requirement for biodiversity net gain.

Our comments on the Regulation 19 Local Plan and supporting Habitats Regulations Assessment (HRA) and Sustainability Appraisal (SA) are made below.

Strategic Policy DS1: Development in the Countryside

It is recommended this Policy also requires proposals to ensure compliance with Natural Environment policies, in particular Strategic Policy NE1 and Policy NE2, to ensure impacts on nature conservation interests are properly considered and addressed, and biodiversity net gain is achieved (for applicable development).

With regards to soils, the local plan outlines that 'the benefits of protecting the Best and Most Versatile (BMV) agricultural land are considered against the need for development'. This Policy requires development proposals to demonstrate they 'Conserve and enhance landscapes, sites of biodiversity or geological value and soils'.

The National Planning Policy Framework sets out that:

'Plans should: distinguish between the hierarchy of international, national and locally designated sites; allocate land with the least environmental or amenity value, where consistent with other policies in this Framework¹; take a strategic approach to maintaining and enhancing networks of habitats and green infrastructure; and plan for the enhancement of natural capital at a catchment or landscape scale across local authority boundaries.'

1 Where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality.

It is recommended that this Policy is amended to give appropriate weight to the roles performed by the area's soils. These should be valued as a finite multi-functional resource which underpin our wellbeing and prosperity. Decisions about development should take full account of the impact on soils, their intrinsic character and the sustainability of the many ecosystem services they deliver. The plan should safeguard the long term capability of BMV agricultural land (Grades 1, 2 and 3a in the Agricultural Land Classification) as a resource for the future.

Where site allocations are sited on BMV land, the Plan should outline a requirement for the protection of soils during construction where possible, referencing the '[Defra Code of practice for the sustainable use of soils on construction sites](#)'.

Strategic Policy DS3: Landscape

Natural England welcomes the proposed designation of eight Areas of Special Landscape Quality within the Borough, and the requirement for development in these areas to meet stringent criteria that seek to protect and enhance landscape.

Strategic Policy CC1: Climate Change

Natural England advise all Local Plans consider climate change adaption and recognise the role of the natural environment to deliver measures to reduce the effects of climate change, for example tree planting to moderate heat island effects. In addition factors which may lead to exacerbate climate change (through more greenhouse gases) should be avoided (e.g. pollution, habitat fragmentation, loss of biodiversity) and the natural environment's resilience to change should be protected. Green Infrastructure and resilient ecological networks play an important role in aiding climate change adaptation.

Natural England welcomes Strategic Policy CC1: Climate Change that promotes mitigation and adaptation to climate change through various methods including the integration of green and blue infrastructure into the design of developments, adopting higher water efficiency standards, the integration of energy efficiency, renewable and low carbon technologies into all development, and reducing reliance on car travel.

Natural England supports the embedding of policy that will deliver measures to increase sustainability of development over the Plan period. This should also include reducing consumption of raw natural resources, sourcing more renewable or 'green' energy, and reducing waste. Consideration should be given to the collection of financial contributions from development to offset residual carbon emissions elsewhere in the Borough. Consideration can also be given to the retrofitting of existing development with technology that improves energy and water efficiency.

It is recommended that Local Plan policy also seeks measures that help natural habitats across the Borough adapt to the effects of climate change. We would encourage you to refer to the Natural England and RSPB [Climate Change Adaptation Manual](#) and look at the step by step approach to identifying the climate resilience of habitats that occur in the Borough. Consideration should be given to addressing issues on habitats and protected sites that will be exacerbated by climate change, such as flooding, drought, reduction of water resources etc.- the Manual can also help identify these.

Consideration can be given to delivering specific projects within the Borough. For example, to maximise climate change adaptation and mitigation through the establishment of a Nature Recovery Network (NRN), and the Local Nature Recovery Strategy in which the NRN would sit, to ensure climate change resilience at their core. Such projects could potentially benefit from carbon offsetting contributions from development over the local plan period.

Such an approach could link into other aspects of the Plan such as water and air quality, nutrient mitigation for Solent European designated sites, delivery of biodiversity net gain, natural flood management, and green infrastructure implementation among others. Natural England would be happy to advise further on this aspect.

Policy CC2: Managing Flood Risk and Sustainable Drainage Systems

Natural England welcome this Policy that requires development ensures flood and surface drainage are properly addressed, and that Sustainable Drainage Systems (SuDS) are designed in accordance with CIRIA C753 SuDs Manual, to be as 'natural' as possible.

It is advised that the policy makes clear that where a development drains to a protected site(s), an additional treatment component (i.e. over and above that required for standard discharges), or other equivalent protection may be required to ensure water quality impacts are avoided.

Where SuDS are proposed serving as mitigation for protected sites, development should ensure that appropriate resources are put in place to ensure their long-term (in perpetuity) monitoring, maintenance/replacement, and funding.

Policy CC3: Coastal Change Management Areas (CCMAs)

Sea level rise and coastal change are inevitable and bring both challenges and opportunities for people and nature. Sustainable coastal management needs to embrace long-term change and achieve positive outcomes for both.

Policy CC3 identifies that the North Solent Shoreline Management Plan (SMP) policy for the majority of Fareham Borough's coastline is 'Hold the Line', and identifies two CCMAs between Hook spit and Meon Shore, with an identified coastal management policy of 'No Active Intervention'. The Policy will ensure that development in these areas will appropriately consider coastal change. It also will ensure replacement coastal defence schemes 'are consistent with the relevant Shoreline Management Plan and that there will be no severe adverse impact on the environment, the English Coast Path, and the rights of way network'.

We would advise that the Local Plan should also help facilitate the relocation of valued environmental assets away from areas of risk.

Strategic Policy NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

Natural England welcomes this policy that sets out clearly the hierarchy of nature conservation and the requirement for development to 'demonstrate clearly that the mitigation hierarchy has been followed' in terms of avoiding, mitigating or compensating (as a last resort) impacts on biodiversity. Natural England welcomes the Local Ecological Network (LEN) approach that has been included in the local plan.

It is helpful that the LEN and the Council's Green Infrastructure Strategy have been suggested as tools to provide opportunity for enhancements across the Borough. Please read our comments below in relation to Policy NE2 that regards the choosing of suitable opportunities for biodiversity enhancement.

Policy NE2: Biodiversity Net Gain

Natural England is fully supportive of the inclusion in the local plan of a Policy for biodiversity net gain. It is welcomed that the policy refers to the benefits to Borough residents from the ecosystem services that being close to nature provides, and outlines an expectation that offsite net gain must be sought as close to the development as possible. However in some instances this may be difficult, and Natural England recommends that consideration is given to developing a suite of projects across the LEN that development within the Borough can contribute to thereby ensuring the biodiversity within the Borough is protected and enhanced. For example, partners that manage Local Nature Reserves and Sites of Importance for Natural Conservation in the Borough could submit projects to the local planning authority to enhance the ecological value of these sites. These projects could be funded by development that requires offsite compensation or additional enhancements to achieve biodiversity net gain. This approach can also be used by development with limited opportunities for biodiversity net gain on-site.

The Policy outlines that the Council may prepare and adopt a Supplementary Planning Document (SPD) for Biodiversity Net Gain. Due to the need to ensure net gain is delivered in a suitably

strategic way, and having regard to the timescales of the legislative requirement for net gain and further national guidance, Natural England would support the development of such an SPD and would encourage Policy NE2 to outline this as a clear intention of the Council, in order to provide further guidance and support to aid sustainable development across the borough. Natural England will be happy to advise further to aid the development of such an SPD.

- *Calculating net gain*

Please note that Biodiversity Metric 3.0 is due to be published early 2021, which will supersede [Biodiversity Metric 2.0](#). We advise that the Policy is updated accordingly and that this metric is used to measure gains and losses to biodiversity resulting from development, and implement development plan policies on biodiversity net gain.

Please note that although the Policy includes 'nesting and roosting features' as suggestions for achieving net gain, it is our advice that features such as bird and bat boxes, swift bricks, bee hotels etc should be classed as general biodiversity enhancements that should be included as part of a wider biodiversity enhancement and mitigation plan. Net gain specifically should derive strictly from habitat enhancement and creation, required as calculated using the metric.

- *Wider environmental gains*

The reference to seeking wider environmental gains, for example to address water/air quality, flooding, climate change etc. is welcomed. Opportunities for environmental gains, including nature based solutions to help adapt to climate change, might include:

- Identifying opportunities for new multi-functional green and blue infrastructure.
- Managing existing and new public spaces to be more wildlife friendly (e.g. by sowing wild flower strips, changing cutting regime of open spaces and road verges*) and climate resilient
- Planting trees, including street trees, characteristic to the local area to make a positive contribution to the local landscape.
- Improving access and links to existing greenspace, identifying improvements to the existing public right of way network or extending the network to create missing footpath or cycleway links.
- Restoring neglected environmental features (e.g. a hedgerow or stone wall or clearing away an eyesore)
- Designing a scheme to encourage wildlife, for example by ensuring lighting does not pollute areas of open space or existing habitats

*Please see this [paper](#) regarding cost-effective and low-maintenance management for species-rich grassland on road verges and the value it can contribute to biodiversity and ecosystem services.

Please note that Natural England and Defra are developing an Environmental Net Gain/metric for Natural Capital Net Gain that can be used in conjunction with the Biodiversity Metric (but not instead of). Further information will be available in 2021.

- *Monitoring of net gain*

Your plan should include requirements to monitor biodiversity net gain. This should include indicators to demonstrate the amount and type of gain provided through development. The indicators should be as specific as possible to help build an evidence base to take forward for future reviews of the plan, for example the total number and type of biodiversity units created, the number of developments achieving biodiversity net gains and a record of on-site and off-site contributions.

LPAs should work with local partners, including the Local Environmental Record Centre and wildlife trusts, to share data and consider requirements for long term habitat monitoring. Monitoring requirements should be clear on what is expected from landowners who may be delivering biodiversity net gains on behalf of developers. This will be particularly important for strategic housing allocations and providing as much up front information on monitoring will help to streamline the project stage.

Policy NE3: Recreational Disturbance on the Solent Special Protection Areas (SPAs)

Natural England welcome this policy that will require new residential development to address in-combination effects on the Solent SPAs via recreational disturbance. It is recommended the Policy also outlines that other types of development (such as new hotels, student accommodation, care homes etc.) may also need to address recreational disturbance impacts, both alone and in-combination. Such development should be assessed on a case by case basis.

Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

Natural England welcome this policy that will require new development that propose a net increase in overnight accommodation to address in-combination effects on the Solent designated sites via eutrophication from nutrients in wastewater.

Policy NE5: Solent Wader and Brent Goose Sites

Natural England welcome this policy that will require development to address effects on sites identified by the Solent Wader and Brent Goose Strategy (SWBGS) which serve as functionally linked land to the Solent SPAs.

It is recommended that the following wording within the Policy "*Sites which are used by Solent Waders and/or Brent Geese (as shown on the Policies map)*" is amended to read "*Sites which are used by Solent Waders and/or Brent Geese (as identified within the most up to date version of the Solent Wader and Brent Goose Strategy)*" to take account of any changes to sites and their distribution across the Borough, as these updates can be implemented at irregular times. Any further references to the Policies map should be similarly amended to refer to the SWBGS mapping.

Core Areas – due to their essential function within the SWBG network, it is advised these sites are identified for protection by the Policy. Any development that would result in impacts to a Core Area will need to be carefully assessed on a case-by-case basis. There are limited options where the function of a Core site can be fully replicated elsewhere in terms of its suitability and appropriate locality; where such land is available, an assessment of replicability will need to be undertaken through discussions with Natural England and the Local Planning Authority.

Financial contributions – it is welcomed that the Policy outlines that financial contributions proposed as mitigation will be used for the management and enhancement of an 'agreed suitable identified site for Solent Waders and Brent Geese'. Such proposals should demonstrate how such funds will be used to enhance, manage and monitor sites within the wider Solent Waders and Brent Geese network, in perpetuity. It is suggested that the Council works with relevant partners/stakeholders, including cross-boundary partnerships, to develop a strategic project(s), such as a bird reserve, and/or list of projects to enhance, manage and monitor the wider Solent wader and brent goose ecological network, to which contributions can be directed.

Policy NE6: Trees, Woodland and Hedgerows

Natural England welcomes this Policy that seeks to protect and enhance trees, woodland and hedgerows within the Borough. It is recommended that this Policy requires development proposals that affect ancient woodland, ancient trees and veteran trees, to ensure they are in line with [standing advice](#) published by Natural England and the Forestry Commission.

Policy NE8: Air Quality

It is welcomed that the Policy recognises that 'poor levels of air quality can also lead to environmental issues'. The Policy includes a need for planning applications to consider if they will have a 'potential adverse effect on biodiversity, especially where it would affect sites designated for their biodiversity value'.

The Policy outlines that the Local Plan HRA concludes the Plan 'would not have a likely significant effect on the internationally important habitats and species present in the area'. As this issue has

been considered within the HRA appropriate assessment, the wording here should be amended to use the correct terminology under the Habitats Regulations, i.e. the HRA concludes the Plan will not result in an 'adverse effect on integrity' (the term 'likely significant effect' is used at the screening stage of the HRA). See further comments on air quality below in regards to the Local Plan HRA.

Policy NE9: Green Infrastructure

Natural England welcomes this Policy that seeks to fully integrate green infrastructure (GI) into development and maximise opportunities to connect to the wider environment. The provision of enhanced green infrastructure and sites of nature conservation value can not only help address some of the mental and physical health problems that are experienced in the Borough's population, but can also benefit society in other ways including improvements to local air and water quality, reducing the risk of flooding, alleviating noise levels and aiding climate change adaptation.

Policy NE10: Protection and Provision of Open Space

This Policy references protection of public rights of way. Natural England advises that the Policy should also seek to secure enhancement of public rights of way and National Trails, as outlined in paragraph 98 of the NPPF. Recognition should be given to the value of rights of way and access to the natural environment in relation to health and wellbeing and links to the wider green infrastructure network. It is welcomed the plan seeks new access opportunities; it should seek to link existing rights of way where possible. The plan should avoid building on open space of public value as outlined in paragraph 97 of the NPPF.

It is welcomed that the Policy makes provision for appropriate quantity and quality of green space to meet identified local needs (as outlined in paragraph 96 of the NPPF) based on Natural England's work on [Accessible Natural Greenspace Standard \(ANGSt\)](#) in assessing the level of accessible natural greenspace; it is also welcomed that it recognises development may be required to 'provide more open space above what is required by the standards to make the development more acceptable'.

Policy D1: High Quality Design and Place Making

Natural England welcomes this Policy that requires the design of developments to integrate existing and new habitats and biodiversity within a coherent and well managed, connected structure. It is advised that landscaping of developments and open spaces seeks to use appropriate native and locally sourced species as far as possible to cater for local wildlife.

Policy D4: Water Quality and Resources

Natural England welcome this policy that seeks to conserve water and improve its quality.

Southern Water's Water Resources Management Plan (WRMP) 2019, that covers the planning period 2020-2070, projects a significant supply demand deficit during periods of drought in the Western Area, and commits to implementing a long term water resources scheme to restore the supply demand balance whilst avoiding and/or mitigating impacts on European sites, including the River Itchen SAC.

It is Natural England's advice that in advance of any permitting of such a suitable long term scheme, uncertainty remains with regards to water resources and the impacts of abstraction on protected sites.

Although it is welcomed that Policy D4 requires a water consumption for new dwellings of no more than 110 litres per person per day, Natural England strongly recommend all new development within the Southern Water supply area adopt a higher standard of water efficiency of 100 litres/per person/day, including external water use and re-use, in line with Southern Water's Target 100 demand reduction programme which is committed to within their WRMP19. Natural England also recommends that the Policy encourages the wise use of water in conjunction with the water companies, for example by developments incorporating grey water recycling systems and efficient appliances

Please see Natural England advice above in relation to Policies NE4 and Policy CC2 with regards to nutrients and surface water treatment via SuDS.

Neighbourhood Plans

Currently there are no Neighbourhood Plans in the Borough, but the Local Plan provides a 'strategic evidence base' which will inform any future Neighbourhood Plans.

It is recommended that any future Neighbourhood Plans which allocate housing should also identify spaces for environmental enhancement, for the purpose of offsetting environmental impacts, e.g. through the designation of Local Green Spaces. Such a local approach could give communities more ownership over such green spaces and provide a more strategic route to addressing common environmental impacts from development in that area, such as air and water pollution, habitat and species loss and increased carbon emissions, and could deliver biodiversity net gain and nutrient offsetting.

Such spaces could include the development of community orchards and play areas, woodlands and nature reserves, and serve a variety of functions that benefit both nature and the local community, for example providing benefits to health and wellbeing, offsetting nutrient discharges from allocated development and providing further scope for carbon sequestration.

Specific comments on Housing Allocation Policies

- HA9 - Heath Road (70 dwellings)

It is acknowledged this allocation site has resolution to grant permission for 70 dwellings. It is recommended this Policy includes the requirement to secure an appropriate level of offsite compensation to address the loss of secondary woodland on site which may in parts qualify as lowland mixed deciduous woodland habitat.

- HA29 - Land East of Church Road (20 dwellings)

Much of this site shows as Lowland Mixed Deciduous Woodland priority habitat on the Ecological Network mapping for Hampshire. Part of the site is designated as a Site of Importance for Nature Conservation (SINC) according to the Policy map. The Policy outlines a requirement for ecological mitigation for the site-specific construction and operational impacts of a development proposal. It is advised the Policy outlines a requirement to secure an appropriate level of offsite compensation to address any loss of priority habitat on site to ensure compliance with Policy NE1.

- HA31 - Hammond Industrial Estate (64 bed care home)

The Policy should ensure the impact of nutrients in wastewater is addressed to ensure compliance with Policy NE4.

- HA37 - Former Locks Heath Filling Station (30 dwellings)

This site is adjacent to an area of Lowland Mixed Deciduous Woodland priority habitat as shown on the Ecological Network mapping. The Policy should ensure that impacts on priority habitats and protected species are taken into account and appropriately addressed.

- HA38 – 68 Titchfield Park Road (9 dwellings)

The site is adjacent to Sylvan Glade SINC, much of which is ancient semi-natural woodland. The Policy should ensure compliance with standing advice on ancient woodland, ancient trees and veteran trees and that impacts on the SINC and protected species are appropriately addressed.

- HA42 - Land South of Cams Alders (60 sheltered housing)

This allocation site is located on 'Fort Fareham Grassland' SINC that supports woodland and meadow communities. It also lies adjacent to Fort Fareham SINC known for supporting wet woodland communities.

As previously advised in our response to the Supplement to the Reg 18 Local Plan (letter dated 23rd April 2020), allocations and development proposals should ensure they engage the mitigation

hierarchy, where impacts on designated ecological sites/features should first be avoided, and where not possible, adequately mitigated. Where this is not possible, any loss of priority habitat should be appropriately compensated. All residual ecological impacts will need to be addressed before any net gain for biodiversity can be achieved.

Natural England recommends that where loss of SINC habitat cannot be avoided, the policy should make clear how requirements set out within the NPPF, NERC Act 2006 and Local Plan Natural Environment policies will be met. It is advised an appropriate level of offsite compensation should be required to address any loss of priority habitat on site to ensure compliance with Policy NE1 .

- E4: Solent 2 (Employment - 23,500 sq. metres)

This employment allocation is located on Whiteley Meadow - Plot 2184 SINC and Ashley Wood, Fareham SINC. The Hampshire Ecological Network Mapping dataset shows much of this area as Lowland Mixed Deciduous Woodland, a priority habitat listed as required under Section 41 of the Natural Environmental and Rural Communities Act 2006. The site is also situated adjacent to the Gull Coppice (South-West Remnant) SINC which comprises ancient semi-natural woodland.

It is acknowledged that this site is an existing allocation within the adopted Fareham Local Plan Part 2 (2015). The current Policy outlines a requirement for this development to protect existing woodland and avoid habitat severance, and appropriate mitigation and compensation for any loss of protected trees. However, it is our view that a significant area of habitat, including mature woodland, is likely to be lost as a result of development. The Policy should ensure that it is compliant with Strategic Policy NE1 with regards to impacts on the local ecological network in this locality. In line with existing national and local policy and legislation, it is Natural England's advice that the mitigation hierarchy of avoid, mitigate and lastly compensate is employed where considering impacts on these habitats, particularly those designated as SINC. Measures should be sought to protect and enhance the local ecological network. Where impacts cannot be avoided or adequately mitigated, a comprehensive compensation package should be required that addresses the loss of all priority habitat on site (rather than just specifying protected trees), that seeks to enhance and connect habitat in the locality.

Comments on the HRA

Natural England notes that your authority, as competent authority, has undertaken an appropriate assessment of the Local Plan in accordance with regulation 63 of the Conservation of Species and Habitats Regulations 2017 (as amended). Natural England is a statutory consultee on the appropriate assessment stage of the Habitats Regulations Assessment process.

We have the following comments on the HRA:

- *Recreational disturbance – New Forest designated sites*

The Local Plan HRA screening assessment outlines that although the Borough falls within the 25km buffer of the New Forest designated sites (via a straight line), the minimum actual travel distance by car is of approximately 30km travel distance (via the M27). In comparison to the number of visits from residents closer to the New Forest, the assessment states 'visits to the New Forest SAC/SPA/Ramsar associated with increased housing development in Fareham Borough contribute a significantly lower proportion of overall visits to the designated sites and it is not considered likely that significant effects associated with recreational disturbance from Fareham housing development would arise'. The HRA screens this impact pathway out from an appropriate assessment on this basis.

It is understood Footprint Ecology are currently conducting further analysis on several aspects of their latest visitor surveys. This analysis will assist the definition of a robust catchment area for recreational impacts. It will help in the preparation of a strategic, cross-boundary approach with neighbouring competent authorities to deliver habitat mitigation for the New Forest SPA/SAC/Ramsar. This work is due to be completed shortly and will provide a useful update to the evidence base against which such impacts from new development from surrounding local authority areas can be assessed.

Therefore, whilst acknowledging that the level of additional impacts from new residents is known to significantly decrease with distance from the New Forest designated sites, Natural England consider at this time there remains some uncertainty with regard to the evidence confirming the level of additional impacts from new residents of Fareham local plan development. We therefore advise this issue is taken forward to the appropriate assessment stage where further work may be carried out to ascertain the level of impacts as accurately as possible.

Where impacts are identified, suitable and proportionate mitigation should be proposed; we recommend the Council works with the New Forest National Park Authority and the other partner authorities to develop a strategic approach to addressing recreational impacts from new development on the New Forest designated sites. Such an approach should include developer contributions towards the New Forest National Park Authority's Habitat Mitigation Scheme to enable the authority to deliver site specific mitigation measures on behalf of applicants.

Natural England will be happy to provide further advice to the Council on this aspect as the evidence base develops.

- *Air quality*

The Local Plan is supported by an Air Quality Habitats Regulations Assessment (Ricardo, Sept 2020). The conclusions drawn in the Local Plan HRA in regards to air quality impacts are based on those drawn within the Ricardo report. Natural England concurs with the conclusions drawn in the report.

The Ricardo report suggests that the Council regularly reviews the Defra airborne NOx forecast levels. This is welcomed as a way to ensure any changes in forecasting and potential consequential changes to conclusions drawn in the report for this pollutant can be appropriately reviewed and addressed during the local plan period.

- *Water quality – nutrients*

The HRA calculates a nitrogen budget for the local plan of 2536.99 kgTN/yr. Appendix III of the HRA outlines various mitigation schemes that can be utilised or progressed as a means to ensure nutrient neutrality can be delivered by new development.

The HRA states within its Summary of Findings that the sites Chichester and Langstone Harbours SPA/Ramsar, Portsmouth Harbour SPA/Ramsar and Solent and Dorset Coast SPA are screened out of an appropriate assessment in relation to water pollution impacts. Much of development within Fareham borough is served by Peel Common wastewater treatment works (WwTW), which is a coastal WwTW that discharges effluent several kilometres out into the Solent. It is our advice that long-shore outfall pipes are likely to have shifted and widened the distribution of nitrogen loading within the effluent across the Solent SAC and SPAs. It is important to recognise the loading from Peel Common WwTW contributes to a number of estuaries and catchments within the Solent (including Portsmouth Harbour, Langstone Harbour, Chichester Harbour, River Meon, Wootton Creek and the Medina Estuary catchments). It is therefore Natural England's view that, because of this wide distribution of nitrogen loading, all designated sites should be screened in.

- *Other comments on the HRA*

Section 7.7.3 – this paragraph refers to the 'SAC' although it is relating to Portsmouth Harbour SPA and Ramsar.

Comments on the SA

We are broadly satisfied that the objectives and indicators within the Sustainability Appraisal cover our key interests, and welcome the identification of the need to conserve and enhance biodiversity, landscape character, and to reduce pollution. We also welcome the need to address minimise the

effects of climate change, and to minimise impacts on best and most versatile agricultural land. Please see some more specific comments below.

- SA5: To Minimise Carbon Emissions and Promote Adaptation to Climate Change

This SA objective to address the effects of climate change is welcomed. It is suggested a further monitoring parameter(s) is included to monitor the implementation of new GI/habitat that can seek to alleviate the pressures of climate change on species and the ecological network whilst also providing other benefits as described further in our advice above; e.g. percentage of new GI/ extent of priority habitat within the ecological network.

- SA7: To Conserve and Enhance Biodiversity

We advise that this SA objective also seeks to conserve and enhance geodiversity within the Borough, in line with national planning policy.

The SA outlines the Plan 'is predicted to lead to negative impacts to ecological receptors in the short to medium term, but many of these impacts are capable of being mitigated. Long-term effects are likely to be both positive and negative, and highly site-specific'. It is acknowledged these effects can be avoided/mitigated by the implementation of several policies including NE1, NE3, NE4 and NE5. It is advised Local Plan Policy requires relevant development to carry out site-level Habitats Regulations Assessments in order to ensure impacts on European sites are suitably addressed.

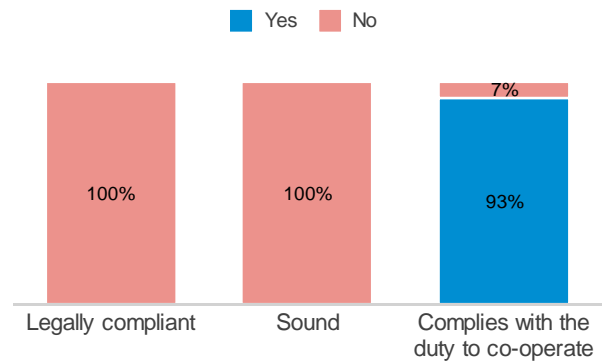

It is also suggested that further monitoring parameters are incorporated to ensure impacts on internationally, nationally and locally designated sites are monitored throughout the Plan period, e.g. via the number, extent and condition of sites designated for nature conservation. We would advise the use of a green infrastructure standard as an indicator, such as Natural England's Accessible Natural Greenspace Standard (ANGSt). Parameters for measuring the implementation of net gain should be introduced, see further above for our advice on net gain monitoring.

We would be very happy to comment further as the plan process progresses. If you have any queries relating to the detail in this letter please contact me on 07787005505.

Yours faithfully

Rebecca Aziz

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

This Housing Allocation should be removed from the plan pending the outcome of the Judicial Review that is underway. The planning status given on page 98 is untrue. As at 1 July 2020 the status was 'still under consideration' To publish the Housing Allocation in this way could be seen as the council being 'pre-determined' on the matter as it had yet not followed the legal process to that point where it was legally granted. The council ignored the policies in the extant plan to recommend and then resolve to grant permission on 19th August 2020. The site is not adjacent to the urban boundary and is in a sensitive location less than 200m from Natura 2000 sites. It is adjacent to Holly Hill Nature Reserve. Ancient woodland is located only 34 metres from the boundary of the site. The Areas of Special Landscape Quality shown in Figure 3.3 has this allocation shown to the north of Warsash and the west of Locks Heath as a small cut out. This is the only such cut out and makes absolutely no sense at all and is therefore unsound. It is also counter to the Strategic Priorities points 2 and 9 in 2.12 of this plan and therefore inconsistent which must also make it unsound.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Take out HA32 as a Housing Allocation

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Take out HA32 as a Housing Allocation

Your suggested revised wording of any policy or text:

Take out HA32 as a Housing Allocation

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Ronald Wyatt (1812-12959)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

This site is shown in the Hamble Valley of Special Landscape quality yet paragraph 3.9 says that there "remain no development allocations in these areas". That is an untrue statement. The plan states that as of 1st July 2020 outline planning was granted. This is also an untrue statement. One has to ask whether the council had already predetermined this site. That would be unlawful. HA32 is subject to a live judicial review as it fails Fareham's own extant plan requirements. It is not adjacent to the urban boundary (against DSP40). The site is subject to a legal challenge (already delivered to Fareham Council) that it is not deliverable as it does not include land required to meet a public highway (also against DSP40) HA32 is also only 200metres from the protected Natura 2000 Sites and only 34 metres from ancient woodland. HA32 should be removed from the plan as a developable site.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

The removal of HA32

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Remove HA32

Your suggested revised wording of any policy or text:

Not applicable if the site was removed and the plan is shaded in the same way as all the countryside area around it in Fig. 3.3

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

I am the Chairman of Brook Avenue Residents Against Development. As there is a live Judicial Review taking place regarding HA32 the situation could change and I wish to reserve my right to update and add evidence.

Respondent: Mr Peter Jackson (1612-351741)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA Allocation should be removed from the development plan. HA32 is an allocation in the HambleValley Area of special landscape quality. Inclusion of HA32 contradicts paragraph 3.9. HA32 is the subject of Judicial Review because it did not comply with the extant plan. Nitrate mitigation relies on untenable assumptions and the application does not include land needed to reach the public highway.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 allocation.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would remove an undeliverable housing allocation.

Your suggested revised wording of any policy or text:

Remove HA32 allocation.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Miss Melissa Marshall (1712-15837)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA32 Allocation should be removed from the development plan. HA32 is an allocation in the Hamble Valley Area of Special Landscape Quality, paragraph 3.9 of the Development plan says 'there remain no development allocations in these areas.' Inclusion of HA32 contradicts paragraph 3.9 Planning status of HA32 as noted in the Development plan reads 'Planning Status as at 1st July 2020: Outline planning permission granted (P/18/0592/OA)'. This is not true. The planning committee meeting did not take place until 19th August 2020. This could be indicative of FBC pre-determining the decision that the councillors might make and therefore be unlawful. HA32 Is the subject of Judicial Review because it did not comply with the policies in the extant plan, the Nitrate calculation included as mitigation relies on untenable assumptions, the application does not include land needed to reach the public highway. The site is considered by residents, and a leading planning QC to be undeliverable due to a number of reasons & therefore should not be included in the housing allocations.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 allocation

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would remove an undeliverable housing allocation from the plan

Your suggested revised wording of any policy or text:

Remove HA32 allocation

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: MRS PENNY SYMONS (1412-25179)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

This is supposed to be countryside, and it not adjacent to the urban boundary and is and always has been agricultural with very light traffic. There will be a large increase in traffic during construction and in final usage. This is a private road with restrictions in existing residents deeds against future developments with no right of use for any additional residents. This rights are being challenged legally by the Brook Avenue Residents Association which represents most residents/existing homes in the road.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

This is countryside

How would the modification(s) you propose make the Local Plan legally compliant or sound?

This is countryside and abuts Holly Hill.

Your suggested revised wording of any policy or text:

this site should not be developed and should continue to be protected as being in the countryside zone being adjacent to Holly Hill and also located off a private road for which there is no legal right of access and no alternative access via the public highway.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mrs Lois Read (1812-81641)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA32 Allocation should be removed from the development plan. HA32 is an allocation in the Hamble Valley Area of Special Landscape Quality, paragraph 3.9 of the Development plan says 'there remain no development allocations in these areas.' Inclusion of HA32 contradicts paragraph 3.9 Planning status of HA32 as noted in the Development plan reads 'Planning Status as at 1st July 2020: Outline planning permission granted (P/18/0592/OA)'. This is not true. The planning committee meeting did not take place until 19th August 2020. This could be indicative of FBC pre-determining the decision that the councillors might make and therefore be unlawful. HA32 Is the subject of Judicial Review because it did not comply with the policies in the extant plan, the Nitrate calculation included as mitigation relies on untenable assumptions, the application does not include land needed to reach the public highway. The site is considered by residents, and a leading planning QC to be undeliverable due to a number of reasons & therefore should not be included in the housing allocations.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would remove an undeliverable housing allocation from the plan

Your suggested revised wording of any policy or text:

Remove HA32 allocation

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr John Chase (1712-161957)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Remove HA32 from development plan. HA32 is situated within Hamble Valley Area of Special Landscape Quality and is in designated countryside. Development plan, paragraph 3.9 says “there remains no development allocations in these areas’ : inclusion of HA32 contradicts paragraph 3.2 Development Plan reads Planning status of HA32 as at 1st July 2020 : Outline planning permission granted (P/0592/OA) . This is incorrect and not true. Planning meeting granting OA permission did not take place until 19th August 2020. This then could be indicative of FBC pre-determining the decision and therefore be unlawful. HA32 is the subject of an ongoing Judicial Review because the site is considered by residents and an eminent leading planning QC to be undeliverable for a number of reasons. It does not comply with the policies in the extant plan, the Nitrate calculation included as mitigation relies on untenable assumptions and being within a Private Road the application does not include land needed to reach the public highway. This latter fact has been pointed out to FBC and the applicant by both the eminent QC and a Planning Consultant and has been repeatedly ignored. Considered as undeliverable it should therefore not be included in the housing allocations.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 allocation

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would remove an undeliverable housing allocation from the plan.

Your suggested revised wording of any policy or text:

Remove HA32

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr John Read (1612-361346)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA32 Allocation should be removed from the development plan. HA32 is an allocation in the Hamble Valley Area of Special Landscape Quality, paragraph 3.9 of the Development plan says ‘there remain no development allocations in these areas.’ Inclusion of HA32 contradicts paragraph 3.9 Planning status of HA32 as noted in the Development plan reads ‘Planning Status as at 1st July 2020: Outline planning permission granted (P/18/0592/OA)’. This is not true. The planning committee meeting did not take place until 19th August 2020. This could be indicative of FBC pre-determining the decision that the councillors might make and therefore be unlawful. HA32 Is the subject of Judicial Review because it did not comply with the policies in the extant plan, the Nitrate calculation included as mitigation relies on untenable assumptions, the application does not include land needed to reach the public highway. The site is considered by residents, and a leading planning QC to be undeliverable due to a number of reasons & therefore should not be included in the housing allocations.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 allocation

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would remove an undeliverable housing allocation from the plan

Your suggested revised wording of any policy or text:

Remove HA32 allocation

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Ms Fiona Earle (1612-391050)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA32 Housing allocation is undeliverable, it is also in an area this plan designates as special landscape character countryside & therefore should not be included.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 housing allocation from the Draft plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

The site is undeliverable as there is no established right of way to the public Highway, removing HA32 would prevent an undeliverable site being included in the development plan.

Your suggested revised wording of any policy or text:

Remove HA32 housing allocation from the Draft plan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

The site is currently subject to the beginning of a Judicial review case, FBC have consistently ignored residents statements that the site is not deliverable for a number of reasons including: 1) Lack of road access. The red line of the approved outline planning permission does not reach a public Highway, therefore that planning application and its approval are unlawful. 2) Inaccurate Nitrate calculations for nitrate mitigation, occupancy figure of 2.4 people is being used for large 5 bedroom houses. The site applicants position as chair of the local Conservative Club has rendered decision making by FBC in relation to this site biased and residents need an impartial judgement to take place on the inclusion of this site in the local plan.

Respondent: Mr Gianmarco Fiorentino (1612-58224)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

Allocation should be removed from the development plan. HA32 is an allocation in the Hamble Valley Area of Special Landscape Quality, paragraph 3.9 of the Development plan says 'there remain no development allocations in these areas.' Inclusion of HA32 contradicts paragraph 3.9 Planning status of HA32 as noted in the Development plan reads 'Planning Status as at 1st July 2020: Outline planning permission granted (P/18/0592/OA)'. This is not true. The planning committee meeting did not take place until 19th August 2020. What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 allocation

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would remove an undeliverable housing allocation from the plan

Your suggested revised wording of any policy or text:

Remove HA32 allocation

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Gordon Bonney (1612-521152)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The outline planning permission granted on site HA32 is currently subject to the begining of a judical review as the site is not considered deliverable and therefore should not be included in the housing allocation

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 from the plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Removing a site of only 8 houses with an unlawful planning permission will make the Local plan more sound & legally compliant

Your suggested revised wording of any policy or text:

Remove HA32 from the plan

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Chris Sherman (1612-251438)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA32 Allocation should be removed from the development plan. What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA32 Allocation

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would remove an undeliverable housing allocation from the Local Plan

Your suggested revised wording of any policy or text:

Remove HA32 Allocation

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mrs Andrea Chase (1712-281859)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA32 Allocation should be REMOVED from the development plan because it is situated within the countryside within the Hamble Valley Area of Special Landscape Quality. The Development Plan says "there remains no development allocations in these areas" (paragraph 3.9). The inclusion of HA32 CONTRADICTS this paragraph! The planning status of HA32 as noted in the Development Plan states "Planning status as at 1st July 2020 is "Outline planning permission granted (P/18/0592/OA. THIS IS NOT TRUE and could be indicative of FBC pre-determining the decision councillors might make and therefore BE UNLAWFUL. HA32 is situated in a Private Road and is the subject of a JUDICIAL REVIEW because: 1. The application does not include land needed to reach the highway. FBC and the applicant continually ignore this requirement despite it being pointed out by a Planning Consultant and a Q.C. on numerous occasions. 2. The Nitrate calculation included as mitigation relies on untenable assumptions. 3. HA32 is the subject of a Judicial Review because it did not comply with the policies in the extant plan. 4. The site is considered by residents, and a leading planning Q.C. to be UNDELIVERABLE due to a number of reasons and therefore should NOT be included in the housing allocations.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

REMOVE HA32 allocation.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would remove an undeliverable housing allocation from the plan

Your suggested revised wording of any policy or text:

Remove HA32 allocation.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Andy Beadsworth (1612-211335)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

HA32 Allocation should be removed from the development plan. HA32 is an allocation in the Hamble Valley Area of Special Landscape Quality, paragraph 3.9 of the Development plan says 'there remain no development allocations in these areas.' Inclusion of HA32 contradicts paragraph 3.9 Planning status of HA32 as noted in the Development plan reads 'Planning Status as at 1st July 2020: Outline planning permission granted (P/18/0592/OA)'. This is not true. The planning committee meeting did not take place until 19th August 2020. You can check which paragraph, policy etc you want to comment on by looking at the Publication Local Plan. You can find out more about what you can comment on by reading Fareham Today and the Frequently Asked Questions.

B1 Which part of the Local Plan is this representation about?

- A paragraph Go to B1a
- A policy Go to B1b
- The policies map Go to B1c

B1a Which paragraph? Please enter the correct paragraph found in the Local Plan e.g. 1.5 would be the fifth paragraph in Chapter 1 (Introduction).

N/A

B1b Which Policy? Please enter the correct Policy Codes found in the Local Plan e.g. HA9 – Heath Road, is the Housing Allocation policy for Heath Road, Locks Heath

HA33 – Land east of Bye Road, Swanwick

B1c Which part of the Policies Map?

N/A

B2 Do you think the Publication Local Plan is:

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Complies with the duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

B3 Please provide details you have to support your answers above

Legally compliant There is no reason to believe the Plan has not met the legal requirements for plan making as set out by planning laws.

Complies with the duty to co-operate The onus is on Fareham Borough Council to demonstrate that the Plan complies with the duty to co-operate. It will have to provide evidence that it has engaged and worked effectively with neighbouring authorities and statutory bodies.

Sound Steven Richard Dunleavy SSAS considers that Policy HA33, as currently written, is sound.

Outline planning permission has been granted for 7 custom build dwellings under planning reference P/19/0061/VC. Pre-commencement planning conditions have been discharged and Ordinary Watercourse Consent has been obtained to discharge surface water to a watercourse. The landowner is currently trying to obtain an agreement with Hampshire County Council under s.278 of the Highways Act 1980 for works on the public highway.

Please remember this may be your only chance to make a representation, so try to make sure you put in all the evidence and information needed to support your representation.

B4a What modification(s) is necessary to make the Local Plan legally compliant or sound?

None

B4b How would the modification(s) you propose make the Local Plan legally compliant or sound?

None

B4c Your suggested revised wording of any policy or text:

None

B5 If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

- Yes, I want to take part in a hearing session No, I don't want to take part in a hearing session

B5a Please outline in the box below why you consider it necessary to take part in the hearing session(s):

N/A

The Inspector will decide on who will appear at the hearing(s). You may be asked to take part when the Inspector has identified the matters and issues for examination.

Thank you for taking part and having your say.

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

Sent by email to: consultation@fareham.gov.uk

15th December 2020

Dear Sir/Madam,

Response to the consultation on the Fareham Borough Local Plan 2037

Foreman Homes would like to thank Fareham Borough Council for giving us the opportunity to comment on the emerging Local Plan. We would welcome, in due course, participating in hearings of the Examination in Public.

The following comments are related to:

- Policy H1: Housing Provision
- Policy HP2: New Small-Scale Development outside the Urban Areas
- Policy HP4: Five-year Housing Land Supply
- Policy HP5: Provision of Affordable Housing
- Policy HP9: Self and Custom Build Houses
- Policy NE2: Biodiversity Net Gain
- Policy HA1: North and South of Greenaway Lane
- Policy HA15: Beacon Bottom West, Park Gate
- Policy HA27: Land off Rookery Avenue
- Policy HA34: Sovereign Crescent

Policy H1: Housing Provision

The policy is not sound as it is not consistent with national policy.

Housing Requirement

Paragraph 4.2

The paragraph sets out how the housing need is determined through the use of the standard methodology set out in National Planning Practice Guidance (PPG). Under this method the housing need for Fareham currently stands at a minimum 514 dwellings per annum (dpa), the Council have

**Unit 1, Station Industrial Park, Duncan Road,
Park Gate, Southampton SO30 1BX**
0330 333 7365 foremanhomes.co.uk

Foreman Homes Limited registered in England Company no 03313213

not however, adopted this method in calculating the housing need. As it is rightly said, in August 2020 the Government released a consultation on a new standard methodology and this is how the housing requirement has been calculated. This methodology is, however, yet to be adopted and therefore the resultant identified housing requirement figure set out in the policy falls way below what is currently required to accommodate the growing need in the Borough (as per the current standard methodology). Due to this shortfall, the policy is contrary to paragraph 60 of the National Planning Policy Framework which states that the strategic policies should be informed by a local housing need assessment, conducted using the standard method in the NPPG, and therefore the Council's approach to calculating housing need is incorrect and considered unsound.

Housing Supply

Paragraph 4.8

The paragraph sets out that in order to meet the requirement, the Council have taken into account existing commitments including applications that have 'resolution to grant' which equate to 4,858 (including Welbourne). The latest Five Year Housing Land Supply Position (June 2020) sets out that Planning Inspectors found that applications with a 'resolution to grant planning permission' are not considered deliverable in terms of the definition set out in Annex 2 of the NPPF. The sites with resolution to grant, except for those that relate to allocated housing sites within the Council's adopted Local Plan, should not be included in the five year housing land supply calculations. A number of sites are dependent on nutrient neutrality solutions, and although these are now starting to come forward there is no guarantee these sites will be deliverable. It is not clear as to whether these figures have been removed from the projected land supply calculation in the Local Plan 2037, but if they haven't these numbers need to be adjusted to reflect the projected housing land supply.

Housing Provision

Paragraph 4.19

The paragraph sets out a number of previous housing allocations that have been removed as they are considered to be no longer available or suitable. Not all sites have been examined as part of these comments, however, the removal of allocations HA16 (Military Road) and HA20 (North Wallington and Standard Way) is considered unjustified (Appendix 1). These sites are available and are also suitable for development in the short term, these sites were identified in the SHELAA as being suitable, available and achievable (Appendix 2). There has been no change in circumstances since

these sites were allocated in the previous iteration of the plan, therefore they should not be removed. There are live applications for both sites (ref: P/19/0130/OA and P/19/0894/OA). The allocation site HA16 would contribute 26 self-build dwellings and HA20 would provide 29 dwellings towards the housing numbers. These sites are important in bringing forward housing numbers to meet Fareham's land supply. The de-allocation of the self-build site is contrary to policy 61 of the NPPF which states that "housing need for different groups (including those wishing to commission or build their own homes) should be assessed and reflected in planning policies". The removal is also contrary to the self and custom build requirement that the Council promotes in Policy HP9 which identifies a need for these dwellings in the Borough. The proposed developments include the provision of both market and affordable units the removal of the allocation is again contrary to paragraph 61 of the NPPF. The removal of these sites is unjustified and will result in the loss of much needed housing, including affordable and self-build, the policy is therefore considered unsound.

Conclusions on Policy H1

The Policy is not sound as considered on the basis that:

- It uses a standard method for assessing housing need that is still out to consultation and potentially subject to change.
- It is not clear as to whether the calculated land supply includes applications which have resolutions to grant, if sites have been incorporated numbers should be adjusted to remove these permissions in accordance with the definition of "deliverable" as set out in the NPPF.
- The removal of allocated sites HA16 and H20 is unjustified as they were previously considered by the Council to be suitable and deliverable and there have been no changes in circumstances.

Policy HA1: North and South of Greenaway Lane

The policy is sound as it is consistent with national policy

The allocation allows for 824 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the strategic development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF which states "*Planning policies should identify a supply of a) specific, deliverable sites for years one to five*

of the plan period and b) specific, developable sites or broad locations for growth for 6-10 and where possible for years 11-15 of the plan.” The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

Foreman Homes have submitted two outline applications on two parcels of land on the northern side of Greenaway Lane. An outline application for the land to the east of Brook Lane (ref: P/17/0845/OA) for the development of up to 180 dwellings with access off Brook Lane has a resolution to grant planning permission. The second application was submitted in 2018 and for residential development of up to 80 dwellings on the site known as land to the west of Lockwood Road (ref: P/18/0590/OA). Both sites are developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HA15: Beacon Bottom West, Park Gate

The policy is sound as it is consistent with national policy

The allocation allows for 29 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a current planning application for 29 dwellings (P/18/1258/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HA27: Land off Rookery Avenue

The policy is sound as it is consistent with national policy

The allocation allows for 32 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a current planning application for 32 dwellings (P/19/0870/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted. The site is defined as brownfield land, therefore development would make effective use of the land and policy is supported by the NPPF Paragraph 117-119.

Policy HA34: Sovereign Crescent

The policy is sound as it is consistent with national policy

The allocation allows for 38 dwellings which make a significant contribution towards the five year housing land supply. The policy is consistent with Paragraph 61 which states the housing needed for different groups in the community should be assessed and reflected in the planning policies, the development will allow for the provision of a different size, type and tenure of houses which will accommodate different groups. The policy is also compliant with paragraph 67 of the NPPF (as set out above). The site specific policies are positively prepared and effective in accordance with paragraph 35 of the NPPF. The allocation sets out housing numbers which have been incorporated into the five year housing land supply calculations and it is therefore considered essential in bringing forward housing numbers over the plan period.

There is a resolution to grant an application for 38 dwellings (P/18/0484/FP) which meets the policy requirement and is supported by the Council. The site is developable and available in the short term and can be built out within years one to five of the plan period once planning permission is granted.

Policy HP2: New Small-scale Development

The policy is not sound as it is not consistent with national policy.

The overarching principle of this policy is supported, however, the policy as it is currently written is not consistent with national policy. Paragraph 122 and 123 of the NPPF set out that planning policies should support development that makes efficient use of land in order to meet as much of the identified need for housing within the area. The restriction of 4 dwellings on sites on the edge of urban areas may not be constructive to making efficient use of the land as some sites may be able to accommodate more. It is suggested that the threshold be increased to 10 units which would reflect the definition of a minor development as set out in Annex 2 of the NPPF.

Paragraph 5.16

Paragraph 5.16 supports Policy HP2 (New Small-Scale Development Outside the Urban Area) and sets out what is considered to be sustainable in relation to walking distances from the site to nearby facilities. These criteria are based only on walking and not cycling distances, which should be considered as it is another form of transport that the Council is promoting. The distances set out in the criteria should be based on the Manual for Streets which sets out what is considered to be sustainable:

- 800m is a comfortable walking distance.
- 2km is a reasonable walking distance.
- Cycle distance has a range up to 5 miles.

Recommendations

The threshold of not more than 4 dwellings should be amended to a threshold of not more than 10 dwellings.

Walking distances set out in the policy should be changed to be in line with the Manual for Streets. Cycling distances should also be considered as cycling is promoted as a sustainable alternative to the

use of a car. If the distances are set to those currently suggested in the draft plan, a number of sustainable sites will be discounted and the policy would not make sufficient use of land

Conclusions on Policy HP2

Although the Policy is generally supported, as it is written it is currently considered to be unsound:

- The limit of 4 dwellings is not constructive to making the most efficient use of land as set out in paragraphs 122 and 123 of the NPPF
- Sustainable distances only consider walking distances and not cycling or multi modal trips.

Policy HP4: Five-year Housing Land Supply

The policy is sound as it is consistent with national policy

Policy is positively prepared and justified and is consistent with paragraph 35 of the NPPF. The policy reflects the existing policy DSP40 of the Local Plan Part 2 which has allowed for the delivery of dwellings towards the housing land supply of the borough. The continuation of this approach to providing housing land supply is considered appropriate and pro-active. This will allow for a contingency plan if the developments set out in Policy HP1 do not come forward within the plan period and the 5 year housing land supply falls short.

Policy HP9: Self and Custom Build Houses

The policy is unsound as it has not been justified

Although it is agreed that provisions should be made for self and custom build dwellings and applications should be supported in principle, the requirement for sites over 40 to set aside 10% of dwellings is unjustified and inconsistent with national policy.

The requirement would place burdens on house builders which may not be justified. The Self and Custom Build Background Paper suggests that a significant proportion of sites were met through windfall sites and this is likely to continue. Evidence therefore suggests that the Council, through normal development management processes, is supporting sufficient plots to come forward without imposing a requirement on major developments. In addition, Policy H2 will support the delivery of additional sites that will be more attractive to both self and custom build housing. If the demand is being met by smaller sites, as it currently is, there is no requirement or justification to rely on major housing developments, which are likely to be less attractive. The requirement for a developer to wait

12 months before selling a dwelling as it is not required as a self-build is unjustified and reduces the amount of housing available on the open market and as a result reduce housing figures.

Conclusion of Policy HP9

The policy is unjustified and is not positively prepared in accordance with paragraph 35 of the NPPF. The policy is not required there should be deleted.

Strategic Policy E1: Employment Land Provision

The policy is unsound as it is not in accordance with national policy

The policy sets out there is a requirement of 104,000m² of new employment floor space required over the plan period and this will be provided over three sites. It is suggested that there is a need for a contingency plan in case these sites do not come forward to meet the required space. A number of employment allocations, which were allocated in the previous iteration of the draft local plan, have been removed which is considered to be unjustified as they were considered sustainable and deliverable and key to bringing forward much needed employment space. It is argued that further sites should be allocated to ensure there is no shortfall if the allocated sites do not come forward or are not suitable for the needs of future employers.

The employment allocation E5 (Standard Way, Appendix 3) included in the previous edition of the emerging Local Plan 2037 was identified as a site that could provide 2000m² of flexible employment floor space. This site was identified in the SHELAA as being suitable, available and achievable (Appendix 4). There has been no change in circumstances since these sites were allocated in the previous iteration of the plan, therefore they should not be removed. The site is still available and developable which is evident through the live application on site – P/19/0196/OA.

Conclusion of Policy E1

The reliance on three allocations does not allow for flexibility if these sites do not come forward. The floorspace required over the plan period does not take into consideration fluctuation in the employment market, therefore, further allocations should be included in the policy.

Policy NE2: Biodiversity Net Gain

The policy is unsound as it is not in accordance with national policy

Policy reflects the Government's suggestion that new development should improve the biodiversity on their site to show a 10% net gain over the pre-development baseline. Whilst it is recognised that this is the Government's current favoured position, it is likely that there will be transition period to allow the development industry to adapt to the proposed changes. As such, it is suggested that the policy remains consistent with paragraph 170 of national policy to seek net gains in biodiversity and not include the requirement to show a 10% net gain. A policy without a specific percentage requirement would be consistent with current policy and should the relevant legislation be enacted, as currently proposed, such a policy would be sufficiently flexible to support a 10% requirement and any transition period.

Conclusion of Policy NE2

Although policy reflects the Government's current favoured position a percentage requirement should not be set as it is contrary to paragraph 170 which does not set out a specific percentage.

Conclusion

At present it is not considered that the plan is sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, for the following reasons:

- Housing needs have not been assessed in accordance with standard methodology as set out in the PPG;
- It is not clear as to whether the calculated land supply includes applications which have resolutions to grant, if sites have been incorporated, numbers should be adjusted to remove these permissions in accordance with the definition of "deliverable" as set out in the NPPF.
- The removal of allocated sites is unjustified
- Policy H2 is inconsistent with national policy with regard to making the most effective use of land;
- Requirement for 10% of plots on sites over 40 units be allocated for self-builders is unjustified;

A number of policies are considered sound in accordance with paragraph 35 of the NPPF in that they are positively prepared, justified and effective. These include:

- Policy HA1: North and South of Greenaway Lane

- Policy HA15: Beacon Bottom West, Park Gate
- Policy HA27: Land off Rookery Avenue
- Policy HA34: Sovereign Crescent
- Policy HP4: Five-year Housing Land Supply

We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and examination. Should you require any further clarification on the issues raised in this representation please contact me.

Yours faithfully,

Katherine Richards BSc MSc MRTPI

Appendix 1: Allocations HA16 and H20 removed from the Local Plan

DEVELOPMENT ALLOCATIONS

Housing Site: HA16	SHLAA Reference: 27
Name: Military Road	Proposed Use: Self and Custom Build
Location: Wallington	Capacity: 26 dwellings
Size: 2.2 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- The provision of land for self and custom build housing, to include the provision of serviced plots; and
- Provision of an illustrative masterplan to identify the layout of individual plots;
- The quantum of housing proposed is broadly consistent with the indicative site capacity; and
- Primary highway access shall be focused from Military Road; and
- Building heights shall be limited to a maximum of 2 storeys; and
- Safe pedestrian and cycle access and crossing points from the site to Pallant Gardens, Drift Road and Pinks Hill housing allocation (HA8); and
- Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that does not impact on living

DEVELOPMENT ALLOCATIONS

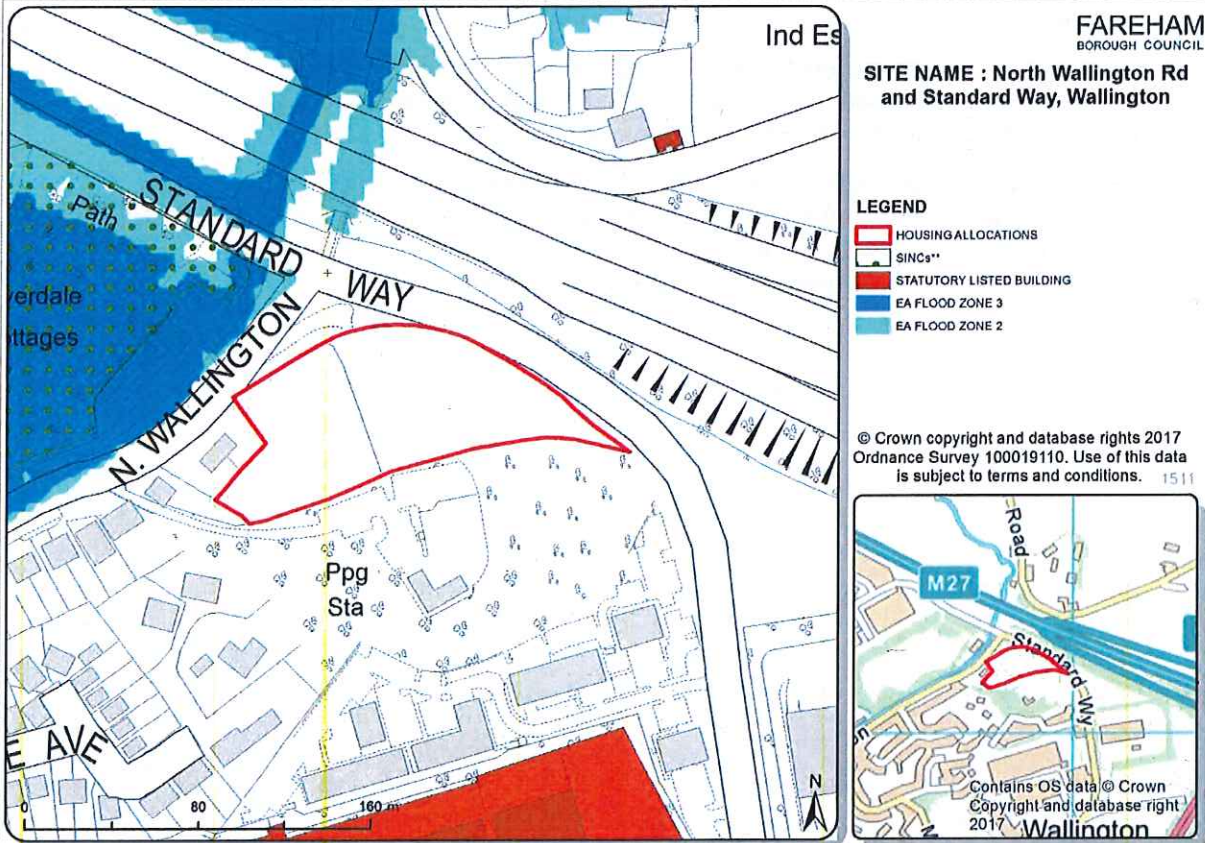

conditions or prevent damage to any nearby dwellings, roads, footpaths or other infrastructure; and

- h) A Heritage Statement shall accompany any application to provide details on the potential impact of proposals on the conservation and setting of the Fort Wallington façade; and
- i) Proposals shall demonstrate that the development will have no adverse impacts upon groundwater in respect of its location in Zone 1; and
- l) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Off-site highway improvement and mitigations works; and
 - Local schools and early-years childcare infrastructure (as identified by the Local Education Authority); and
 - On-site open space which shall be provided on the eastern part of the site in order to provide an appropriate setting to the Fort Wallington façade.

DEVELOPMENT ALLOCATIONS

Housing Site: HA20	SHLAA Reference: 324
Name: North Wallington and Standard Way	Proposed Use: Residential
Location: Wallington	Indicative Capacity: 21 dwellings
Size: 0.87 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- a) The quantum of housing proposed is broadly consistent with the indicative site capacity; and
- b) Primary highway access shall be focused from North Wallington; and
- c) The height of buildings shall be limited to a maximum of 2 storeys; and
- d) The design and layout of proposals shall retain and strengthen the existing tree boundary located along the southern perimeter of the site. The existing trees and hedgerows shall also be retained along North Wallington and Standard Way frontage except where access points may be required; and
- e) Proposals will need to minimise any impact upon the amenity of the adjacent public house residences; and
- f) Proposals shall include a safe pedestrian and cycle crossing point of North Wallington

DEVELOPMENT ALLOCATIONS

to/from the site with Standard Way; and

- g) A noise assessment shall accompany an application for residential development to assess the level of noise from the M27. The design and layout of proposals must take account of any noise mitigation measures that are identified by the assessment; and
- h) Provision of an air quality assessment to identify appropriate on-site measures to mitigate NO₂ emissions arising from the M27 (in accordance with Policy INF2); and
- i) Proposals shall demonstrate that the development will have no adverse impacts upon groundwater in respect of its location in Zone 1; and
- j) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure, in line with the Council's Planning Obligations SPD:
 - Off-site highway improvement and mitigations works; and
 - Local schools and early-years childcare infrastructure (as identified by the Local Education Authority); and
 - Enhancements to existing off-site open space.

Appendix 2: SHELAA Site 27 (Military Road) and Site 324 (North Wallington and Standard Way)

5. Developable Housing Site Assessments

SITE DETAILS		Developable Housing Site	Fareham East
ID:	27	Site Name:	Military Road, Wallington
Current Land Use:	Paddock		
Surrounding Land Use:	Residential to north and along south boundary. Employment (Fort Wallington) to northeast (Grade II Listed Building)		
Gross Site Area (ha):	2.17	Housing Yield (estimate):	26
Employment Yield (estimate):	0	Gypsy and Traveller Pitches (estimate):	0
SUITABILITY			
Constraints:	Public ROW, Agricultural Land Grade 2, Minerals and Waste 2016 Brick Clay and Superficial sand/gravel, Within 500m of SPA, Within 500m of Ramsar, Within 500m of SSSI, TPOs, Ground Water Protection Zone, Countryside		
Highways/ Pedestrian Access:	Access via Drift Road would be unsuitable. Improvements to the Military Road/ Pinks Hill junction would be required but is considered feasible. Pinks Hill would require improvement to the A27 slip road. Pedestrian and cycle connections would be required to link the site to local services.		
Conservation Comments:	Fort Wallington is a grade II listed building. One of a series of forts built in the 19th century for the defence of Portsmouth Harbour. The south facing curtain wall survives, development of the eastern area would harm the setting of the listed building. The existing northern boundary marks the line of the fort perimeter, retaining a break to define the outline of the former fort would be preferable.		
Noise/Air Quality Assessment:	A noise assessment would be required given the sites proximity to Fort Wallington Industrial Estate but otherwise unlikely to be any issues in this regard.		
Archaeology:	Site not within identified area of archaeological potential.		
Ecology Comment:	Site provides good habitat for notable invertebrate and supports dormice and reptiles. Bat flight line connectivity between wooded habitats and flight line/grazing/roosting habitat for intertidal grazing birds. Woodland should be maintained and any introduced gaps should minimise loss of connectivity. Lighting strategy should leave edges dark.		
Accessible Facility Types: 7/10	Within 1600m of a Secondary School, within 800m of a Convenience Store or Supermarket, within 1200m of a GP Surgery, within 1600m of a Major Employment Areas, within 800m of a Accessible Green or Play Space, within 1600m of a Town/District or Local Centre, within 800m of a Community/Leisure Facility		
Suitability Comment:	Suitable highways improvements required. Development must have regard to TPOs, Listed Building and ecological potential. Proximity of Fort Wallington Industrial Estate with regards to noise impact should be considered.		
Is the site suitable?	Yes	Is the site available?	Yes
		Is the site considered achievable?	Yes

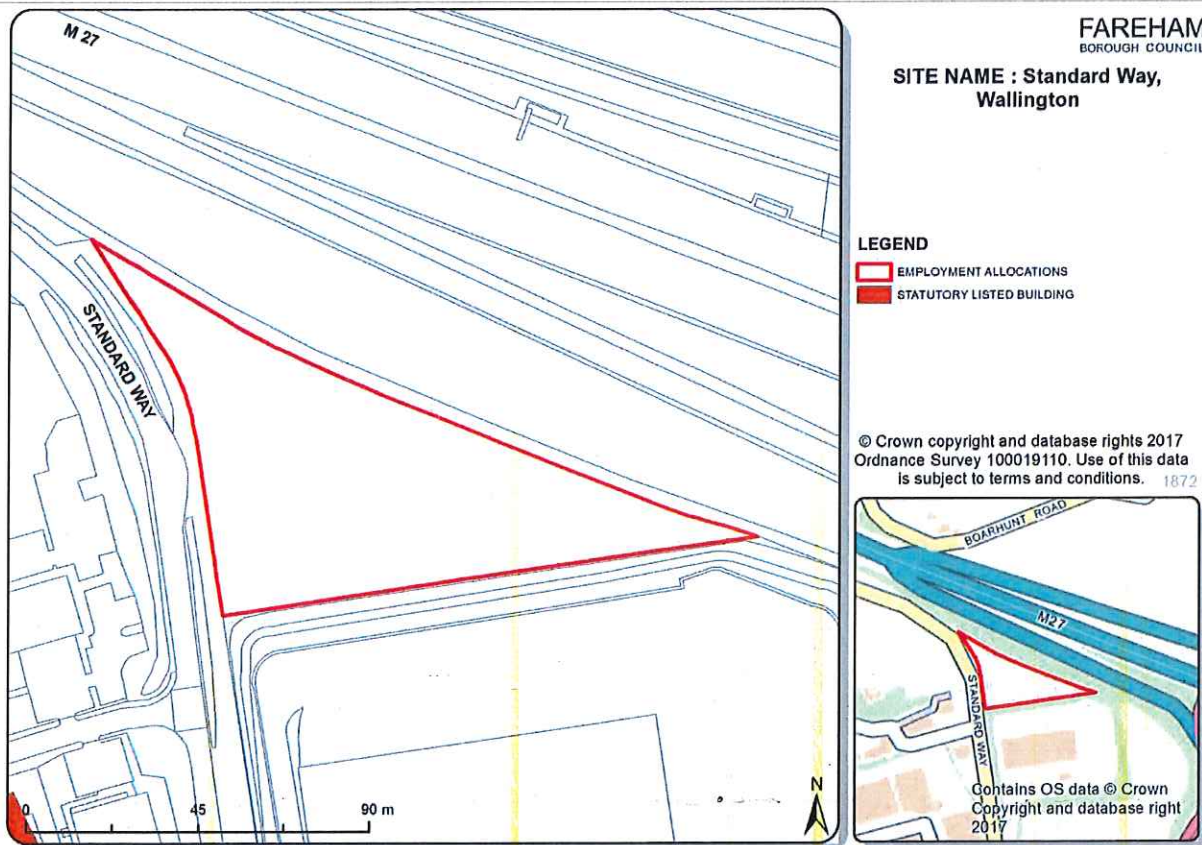

Appendix 3: Allocation E5 removed from the Local Plan

DEVELOPMENT ALLOCATIONS

Employment Site: E5	SELAA Reference: 20
Name: Standard Way	Proposed Use: Employment (B1, B2 or B8)
Location: Standard Way, Wallington	Capacity: 2,000 sq. metres
Size: 0.6 ha	Planning Status: None

Planning permission will be granted provided that detailed proposals accord with the policies in the Local Plan and meet the following site specific requirements:

- The quantum of employment floorspace shall be broadly consistent with the indicative site capacity; and
- Primary vehicular access shall be obtained from Standard Way; and
- Provision of safe pedestrian and cycle connections from the site and along Standard Way up to the junction with North Wallington; and
- Provision of a noise assessment that identifies appropriate mitigation to address noise from the A27, M27 and neighbouring industrial area; and
- Provision of an air quality assessment to identify appropriate measures to mitigate NO₂ emissions arising from the development in accordance with Policy INF2; and
- Boundary vegetation and trees should be retained, apart from where removal is necessary for highways safety reasons; and

DEVELOPMENT ALLOCATIONS

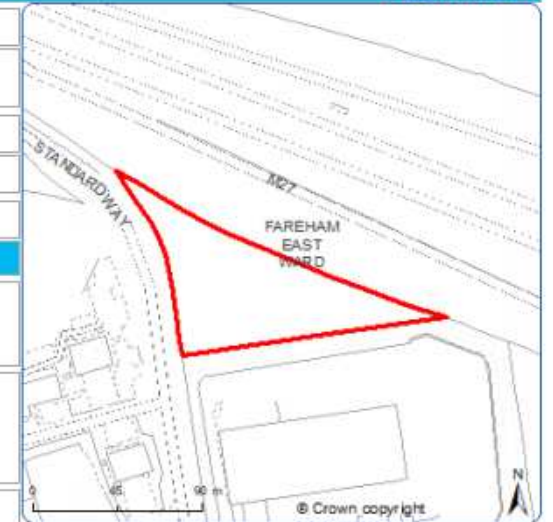

- g) Proposals shall either provide directly, or provide a financial contribution towards the delivery (and maintenance where deemed necessary) of the following infrastructure:
- Off-site highway improvement and mitigations works.

Appendix 4: SHELAA Site 20 (Standard Way)

7. Developable Employment Site Assessments

SITE DETAILS		Developable Employment Site	Fareham East
ID:	20	Site Name:	Standard Way, Wallington
Current Land Use:	Vacant. Small paddock area located to the north of Standard Way and to the north of Fareham Heights office park. Lined with trees with access off of Standard Way and M27 to north.		
Surrounding Land Use:	Adjoining motorway M27 to northeast; Frontage to Standard Way to west; adjoining WTS to south.		
Gross Site Area (ha):	0.59	Housing Yield (estimate):	0
Employment Yield (estimate):	2,000sqm	Gypsy and Traveller Pitches (estimate):	0
SUITABILITY			
Constraints:	Public ROW, Agricultural Land Grade 2, Minerals and Waste 2016 Brick Clay, Superficial sand/gravel and Safeguarded Site, Ground Water Protection Zone, Countryside, Within 50m of potentially infilled and gassing ground, groundwater source protection zone.		
Highways/ Pedestrian Access:	This site would appear to have the potential for access created from Standard Way. The junction location would need to be towards the southern end of the frontage for visibility purposes. Measures would also need to be put in place to limit additional commercial vehicle activity on Pinks Hill or to make width improvements along its length.		
Conservation Comments:	No known constraints		
Noise/Air Quality Assessment:	No known issues.		
Archaeology:	There are no archaeological sites currently recorded at this location although Fort Wallington sits within the immediate vicinity. It is in an area that might be regarded as within the field of fire (setting) of the fort, but the fort and the views from t		
Ecology Comment:	The site comprises Priority Habitat Coastal and Floodplain Grazing Marsh with woodland boundaries. Buffers to be retained with significant margins. Appears suitable for bats, badger and may support territory of barn owl.		
Accessible Facility Types:	4/10	Within 1600m of a Major Employment Areas, within 800m of a Accessible Green or Play Space, within 1600m of a Town/District or Local Centre, within 800m of a Community/Leisure Facility	
Suitability Comment:	The site falls within an area that has an overriding 'urban fringe' character, due to the urban character of the adjoining industrial estate and waste transfer. The site lies within a field to the north of the waste transfer station, which is mostly hidden by vegetation, with only occasional glimpses through gateways along Standard Way. Visibility of the site is therefore relatively limited, and visual sensitivity is quite low, whilst strong vegetation cover significantly reduces intrusion from the motorway, and creates an enclosed and attractive parcel of land of lower quality landscape value. Site is suited for either B2 or B8 employment uses.		
Is the site suitable?	Yes	Is the site available?	Yes
		Is the site considered achievable?	Yes

1) Paragraph: 4.2

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

I disagree with the proposed allocation of houses at the SW of Sovereign Crescent in principle - However - it is impossible to tell if point 'e' is complete or is an unfinished sentence ?

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Re-issue and be clear

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Re-issue and be clear

Your suggested revised wording of any policy or text:

-

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent details:

Title:	Mr
First Name:	Robert
Last Name:	Marshall
Job Title: (where relevant)	[No Reply]
Organisation: (where relevant)	Fareham Society
Address:	
Postcode:	
Telephone Number:

1) Policy: HP1 - New Residential Development

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is unsound in so far that it contains no restriction on the size of replacement dwellings or house extensions. Overlarge replacement dwellings and extended dwellings can detract from the undeveloped rural character and appearance of the countryside. Thus the Policy as worded fails to have regard to NPPF para. 170 which seeks to ensure that ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The proposed Policy merely seeks that replacement dwellings be of an appropriate character to their location. This is insufficient in itself to adequately control such development, and nor does it take account of extensions. The modification that is necessary is to impose, in addition, a floorspace limitation upon replacement dwellings and extended dwellings.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b The suggestion is, in addition, to require replacement dwellings to have a floorspace increase no larger than 30% over and above the existing dwelling. To ensure that the Policy only applies where the added floorspace of an extension would have an adverse visual impact floorspace provided within the existing building envelope would not be taken into account in determining the percentage increase.

Your suggested revised wording of any policy or text:

B4c The Policy should be reworded to add b) it is for a replacement dwelling which is of an appropriate character to the location and in any event no greater than 30% larger than the existing dwelling c) it is for an extension that would result in an increase in floorspace which is of an appropriate character to the location and in any event no more than a 30% increase in floorspace over and above the existing dwelling. Explanatory text should be added to say that “for the interpretation of this Policy floorspace figures should be measured externally, for extensions any addition within the existing building envelope shall not be taken into account in determining the percentage increase, and in determining whether a replacement dwelling or extended dwelling is of an appropriate character to the location regard shall be had of the need to avoid harm though the cumulative effect of such development and the impact of past development will be taken into account.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's view are discussed and an opportunity is given to respond to the views of others.

2) Policy: HP2 - New Small-scale Development Outside Defined Urban Areas

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound because the impact of development of this scale, and potentially in depth, beyond the settlement boundary would harm the rural character and appearance of the countryside. It has the potential to substantially consolidate the built form in these areas (see figure 5.1 in the emerging plan), the cumulative impact of which would blur the important distinction between the countryside and the urban area. It fails to have regard to NPPF para. 170 which seeks to ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ. Thus it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. To make the plan sound this Policy should be deleted from the Plan. To ensure that some residential development could take place beyond the settlement boundary a Policy similar to Policy DSP6 of the adopted plan could be used. This allows limited frontage infill of up to 2 dwellings. This would have less impact on the character and appearance of the countryside and thus accord with the NPPF.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would ensure that replacement and extended dwellings would meet the NPPF objective in para 170.

Your suggested revised wording of any policy or text:

B4c. The suggested rewording: “New residential development will be permitted outside the defined urban settlement boundaries (as identified on the Policies Map) where it comprises one or two new dwellings which infill an existing and continuous built-up residential frontage, where: a) The new dwellings and plots are consistent in terms of size and character to the adjoining properties and would not harm the character of the area; b) It does not result in the extension of an existing frontage or the consolidation of an isolated group of dwellings; and c) It does not involve the siting of dwellings at the rear of the new or existing dwellings.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

3) Policy: HP3 - Change of Use to Garden Land

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that it fails to have regard to a key factor, ancillary buildings on garden land, that can lead to such changes of use detracting from the character and appearance of areas beyond the development boundary. Thus, the Policy as worded fails to have regard to NPPF para. 170 which seeks to ensure that ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. To make the Policy sound refence must be made to the impact of ancillary buildings.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would ensure that garden extensions would meet the the NPPF objectives in para 170.

Your suggested revised wording of any policy or text:

B4c. Amend HP3b to say "It, along with ancillary buildings allowed as permitted development will not detract from the existing landscape"

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

4) Policy: HP6 - Exception Sites

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 The Policy on rural exception sites is unsound as its wording and that of the explanatory text clearly indicates that it refers to rural areas. This District although it contains countryside is not categorised as a rural authority and has no rural communities. It thus does not have all the particular housing and social issues that need to be addressed in such areas.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The Policy on rural exception sites should be deleted from the plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b It would remove an irrelevant Policy on rural exception sites.

Your suggested revised wording of any policy or text:

B4c Not applicable

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the vies of others.

5) Policy: HP8 - Older Persons' and Specialist Housing Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that it opens up the possibility of such accommodation being provided in the countryside beyond the settlement boundary. Such development is often large in scale and such would detract from the character and appearance of the countryside. Re-development opportunities do arise within the urban area and older person/specialist housing provision should be treated no differently than normal flatted development. Thus, the Policy as worded fails to have regard to NPPF para. 170 which seeks to ensure that ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus, it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a To make the Policy sound the possibility of older person/specialist accommodation outside the urban boundary should be deleted.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b This would ensure that there is no contravention of the requirements in para 170 of the NPPF..

Your suggested revised wording of any policy or text:

B4c. Revise the last sentence in the Policy simply to say "New older persons or specialist housing shall be provided within the Urban Area boundary."

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed an an opportunity is given to respond to the view of others.

6) Policy: HP10 - Ancillary Accommodation

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound, in part, on 3 counts. First, much of the explanatory text is so essential to the satisfactory operation of the Policy that it should be within the Policy itself. Second, the Policy should specifically require ancillary accommodation to be close to the principal dwelling. This is to prevent later pressure, which may be difficult to resist, for such accommodation to be turned into separate dwellings contrary to the aim of the NPPF in providing well designed places. And in rural areas the potential for ancillary buildings to become separate dwellings would be contrary to NPPF para. 170 which seeks to ensure that new development contributes to and enhances the natural and local environment. It would also thereby, in rural areas, give rise to car dependent housing contrary to the NPPF environmental objective of seeking to use natural resources prudently and moving to a low carbon economy. Third, explanatory paragraph 5.82 needs to be more clearly worded to make it clear that it is saying that an unrelated unit of accommodation is in effect a new dwelling and will not be regarded as Ancillary Accommodation under this Policy.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. Move much of the explanatory test into the main Policy and amend the Policy to require to require ancillary accommodation to be close to the principal dwelling.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined in B3 above.

Your suggested revised wording of any policy or text:

B4c. Amend HP10a to "a) It is within the curtilage of the principal dwelling and close it;" Add to HP10: f) The ancillary accommodation shall remain within the curtilage of, and in same ownership as, the principal dwelling. A planning condition will be imposed to prevent the use of the ancillary accommodation as a separate dwelling. g) the principal dwelling shall remain larger than the ancillary accommodation. Explanatory paragraph 5.83 altered to "an unrelated unit of accommodation is in effect a new dwelling and will not be regarded as ancillary accommodation under this Policy."

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

7) Policy: HA45 - Rear of 77 Burrige Road

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that the necessary mitigation required given the site's location on and partly adjoining a SINC would require the developer or occupier to have ownership of, or some rights over, the SINC. There is no evidence from the past history of the site that this is so. The site's allocation would thus conflict with NPPF requirements on conserving and enhancing the natural environment by protecting and enhancing sites of biodiversity in a manner commensurate with their identified quality in the development plan.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. To make the plan sound the allocation should be removed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. By preventing conflict with NPPF requirements on conserving and enhancing the natural environment.

Your suggested revised wording of any policy or text:

BC4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

8) Policy: R1 - Retail Hierarchy and Protecting the Vitality and Viability of Centres

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This is unsound in so far that the second paragraph of the Policy refers to main town centres uses being permitted within defined town centres. The whole of the designated Fareham Town Centre is so widely drawn that it includes important residential areas and large open spaces unsuitable for town centre uses. Such uses outside the designated Primary Shopping Area would conflict with the NPPF requirement of achieving well-designed places and better places in which to live.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The policy should be reworded so that it applies to the more limited designated Primary Shopping Area, where such uses would be acceptable.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By preventing main town centre uses in areas where they would no longer acceptable.

Your suggested revised wording of any policy or text:

B4c The second paragraph should be amended to say “Where planning permission is required, main town centre uses, as defined in the National Planning Policy Framework (NPPF), will be permitted within the defined Primary Shopping Area of Fareham Town Centre, district and local centres.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

9) Policy: R4 - Community and Leisure Facilities

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that it does not deal with the limitations that should apply to any of these uses, such as sports venues and open space, that may be applied for outside settlement boundaries. Such uses, if large scale and containing substantial buildings, can be especially intrusive in the countryside. Thus they should only be allowed if they are small scale uses and the associated buildings are also small scale. Without this limitation such development would detract from the character and appearance of the countryside. Thus, the Policy fails to have regard NPPF para. 170 which seeks to ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus, it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The Policy should specify that such uses are generally acceptable only within the development boundaries but that any that may be considered acceptable beyond those boundaries, such as sports venues and open space, must be small scale uses with small scale buildings.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By preventing the harm identified above.

Your suggested revised wording of any policy or text:

B4c A criteria e) should be added “Such facilities should generally be permitted only within the development boundary, and any uses outside those boundaries such as sports venues and open space shall, as well as complying with the other criteria above, need to be small scale use with small scale buildings”.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity given to respond to the views of others.

10) Policy: E1- Employment Land Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is sound in all but one respect on the two Daedalus allocations. This is a strategic allocation originally brought forward in adopted Core Strategy CS12. This said that development will be permitted on the site where, amongst other things, it delivers, or facilitates the delivery of high quality development including a) employment development that retains and strengthens the marine and aviation employment clusters, particularly those that require direct access to an operational airfield. This accords with the Council's vision for the site and the Lambeth Smith Hampton background paper to the emerging Local Plan refers to this and says that the advanced manufacturing such as that pursued at Daedalus is a sector regarded as one of the most significant opportunities for the UK to rebalance and reinvigorate the economy. The emerging Policy does not promote the idea of such advanced manufacturing for the site, and without doing so there is a danger that this valuable site could be lost to commercial uses less valuable to the economy. This would run counter to the requirement in the NPPF of building a strong and competitive economy and that each area should build on its strengths especially where Britain can be a leader in innovation.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The Policy should be revised to include the wording similar to that of Core Policy CS12 referred to above.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b This would ensure that the Policy met the objective of the NPPF on the building of a strong and competitive economy.

Your suggested revised wording of any policy or text:

B4c See B4a above.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

11) Policy: NE8 - Air Quality

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is unsound in so far that the main text of the Policy does not make it clear that explanatory text paragraphs 9.108 – 9.110 set out what may be required to meet the Policy requirement. This may lead to developers, especially small-scale developer, to be unaware of the requirements and prevent them being taken on board and discussed with the LPA. This runs counter to the intentions of Government policy (PPG on Air Quality (2019)) which says that it is important that applicants engage early on with the local planning authority and environmental health departments to establish the need for and scope of any assessment to support an application.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The Policy should guide applicants for small scale schemes to the relevant explanatory text.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b It would ensure that developers of minor development take on board relevant requirements and discuss them with the LPA.

Your suggested revised wording of any policy or text:

B4c Amend the second sentence of the Policy to read “Minor development should reduce its impacts on air quality and have regard to explanatory text paragraphs 9.108 – 9.110.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

12) Policy: NE9 - Green Infrastructure

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is unsound in so far as there is no indication that it would be effective. To be effective applicant's and Council case officers would need an easy and ready way of knowing where future and proposed Green Infrastructure existed. For this a single compendium of such space is required, indicating where they exist, to obviate the necessity for looking at the myriad of resources referred to.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a A compendium, capable of being updated, should be provided of Green Infrastructure in the District. The Policy should then be amended to make reference to this.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By ensuring that applicants and Council case officers are aware of the location of Green infrastructure so as to ensure it is safeguarded.

Your suggested revised wording of any policy or text:

B4c By adding to the Policy “all Green infrastructure covered by this Policy may be found on the Council's compendium of such spaces.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

13) Policy: NE10 - Provision and Protection of Open Space

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is unsound in so far as it does not in the Policy text set out, or refer to, the minimum open space and play space requirements for new development set out in explanatory text paragraph 9.134 table 9.1. Thus the Policy might encourage applicants to argue for lesser space standards than what are clearly the minimum acceptable. Given this the Policy would not ensure satisfactory space standards and the NPPF intentions that planning policies should enable and support healthy lifestyles through the provision of safe and accessible greenspace (NPPF para91) would not be met.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The text of the Plan should set the space standards set out in Table 9.1 as the minimum requirement to be met.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By ensuring NPPF objectives on promoting healthy communities would be met.

Your suggested revised wording of any policy or text:

B4c By amending the penultimate sentence of the last paragraph of this Policy to read "Residential development will be required to provide open and play space that will satisfactorily meet the needs of new residents. Table 9.1 below is a minimum space standard and developments will be required to meet higher levels of open and play space provision where that is necessary to make the development acceptable." The final sentence to be retained.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

14) Policy: FTC1 - Palmerston Car Park

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This proposed allocation is unsound on 2 grounds. First, there would be an unacceptable loss of town centre car parking spaces well located to meet the needs of the town centre shopping area and the shops in West Street. Second, the proposed indicative yield of 20 dwellings would lead to housing forward of the building line to detriment of the character and appearance of the area generally and the adjoining Osborn Conservation area to the north of Osborn Road. The Osborn Road Conservation Area Character Assessment Feb 2006 describes the area as comprising a series of Victorian villas set in large gardens. It describes the development pattern as being unique in Fareham and says that its setting includes the land opposite the Conservation Area to the South of Osborn Road, which thus includes the allocation site. Where modern development to the south of Osborn Road has been undertaken it has been well set back from the road and screened by mature planting. The provision of residential development forward of the building line would seriously detract from the character and appearance of the Conservation Area. On the first ground the proposed allocation would be harmful to the vitality of the town centre and West Street and as such conflict with the NPPF. Whilst the NPPF supports some housing in Town Centres for the role it plays in their vitality, this is with the caveat that it should be on appropriate sites, and this is not such a site (NPPF para 85.f) Harm on the second ground conflicts with NPPF policies on protecting Heritage Assets.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be withdrawn from the Plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the conflict with the NPPF referred to above.

Your suggested revised wording of any policy or text:

B4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

15) Policy: FTC2 - Market Quay

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as the site is considered incapable of accommodating the extent of mixed-use development referred to. There are also reservations over the maximum suggested height of development given the prominence of the site off a major traffic roundabout and the extent to which the site rises in height from south to north and is seen from short, medium and long-distance viewpoints. No sketch site briefs have been provided to indicate otherwise. Given the importance of this town centre site, and the multiplicity of uses suggested a detailed development brief is essential to guide future development of the site to ensure a site that functions well and enhances this part of the town centre. However, the Policy does not set out this requirement. Given the above the allocation as proposed would fail to ensure that future development of the site would meet the NPPF requirements for achieving well designed places set out in paragraphs 124-127.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. In the absence of evidence to support the building heights proposed reference to specific building heights should be removed. And it should be stated that the Council will support a mixed-use development incorporating some of the uses set out. The allocation should specify that a comprehensive development of the site will only take place in accordance with a detailed development brief.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would ensure that development of this important town centre site is undertaken in a way that complies with the NPPF objective of achieving well designed places.

Your suggested revised wording of any policy or text:

B4c. The supporting text to the allocation should say that “The Council will support a mixed-use development incorporating some of the uses set out in the bullet points and subject to development being in accordance with a development brief (to be subject to public consultation) that sets out how the site will function and enhance this part of the town centre and have regard to the prominence and visibility of the site.” Reference in the bullet points to commercial/leisure floorspace and housing numbers should be removed, along with reference to building heights.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

16) Policy: FTC3 - Fareham Station East

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This is a sustainable location for housing given its proximity to Fareham railway station, bus routes and shops etc. and an element of retail and café uses would also fit in well. However, the site has the following constraints to development: Much of the site comprises the railway station car park and this is essential in encouraging rail travel. The Policy refers to retention of sufficient car parking to serve the railway station without saying how much this is. The fire station may need to be retained on site if it can't be relocated; Sufficient space is required to ensure a good public realm at the station approach. The adjacent gravel yard would potentially be a bad neighbour in terms of noise and dust – and this has not been taken into account. No evidence has been put forward to show that the maximum 5 storey height would not be too high. It has not been shown how, in light of the above, the proposed development at the scale outlined could be satisfactorily achieved. Given the above the allocation as proposed would fail to ensure that future development of the site would to meet the NPPF requirements for achieving well designed places set out in paragraphs 124-127.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. This is not an allocation that can be agreed to at this stage as there is no evidence, by way of a development brief, that the site could be developed as proposed in a satisfactory way. The allocation should be delated from the plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. By preventing development of the site until a development brief has been prepared to show that development could be undertaken satisfactorily given all the constraints referred to.

Your suggested revised wording of any policy or text:

B4c. Not applicable .

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others

17) Policy: HA26 - Beacon Bottom East

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This site is sound in relation to its proximity to public transport and shops. However, the proposed site allocation is unsound given the indicative yield on 9 dwellings. Undetermined application F/19/1061/FP for this number of houses on the site indicated houses would so close the highway as to be detrimental to the character and appearance of the area and harmful to the setting of the adjoining locally listed cottage. A tall western boundary hedge would have unacceptably shaded the gardens of many houses on the site. Given how small the site is revised layouts are unlikely to overcome this harm. There would thus be conflict with NPPF requirements that: planning should ensure that developments add to the overall quality of the area and be sympathetic to local character (NPPF para 127); and on the prevention of harm to Heritage Assets (paras 193/4)

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The allocation should either be withdrawn from the Plan or alternatively the indicative yield deleted or substantially reduced in number.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b Prevent the harm outlined in B3 above.

Your suggested revised wording of any policy or text:

B4c. See above - potentially the removal of the indicative yield or its revision downwards.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

18) Policy: HA36 - Locks Heath District Centre

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as it would result in the loss of car parking for the Locks Heath District Centre. A detailed assessment of this Centre was carried out in the Fareham Retail and Commercial Leisure Study: Update Report Litchfields 2020, a background paper to the Local Plan. This report refers to a large area of free surface parking adjacent to the Centre and says that this is one of its strengths. This is unsurprising because this centre, built in 1983, lies in an area known as the Fareham Western Wards developed in the 1970/80's and which, typical of that period, is highly car dependant. The loss of a substantial portion of the car park would thus be detrimental to the Centre's health and vitality. This would be contrary to Strategic Policy R1 of the emerging Local Plan which says that any development that would significantly harm the vitality and viability of a defined centre will not be permitted. It would also be contrary to the NPPF which seeks to ensure the vitality of town centres and which, although recognising the role that housing can play in such areas, says that this must be on appropriate sites.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be removed from the Local Plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined above to the health and vitality of the centre

Your suggested revised wording of any policy or text:

B4c Not applicable

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

19) Policy: HA36 - Locks Heath District Centre

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as it would result in the loss of car parking for the Locks Heath District Centre. A detailed assessment of this Centre was carried out in the Fareham Retail and Commercial Leisure Study: Update Report Litchfields 2020, a background paper to the Local Plan. This report refers to a large area of free surface parking adjacent to the Centre and says that this is one of its strengths. This is unsurprising because this centre, built in 1983, lies in an area known as the Fareham Western Wards developed in the 1970/80's and which, typical of that period, is highly car dependant. The loss of a substantial portion of the car park would thus be detrimental to the Centre's health and vitality. This would be contrary to Strategic Policy R1 of the emerging Local Plan which says that any development that would significantly harm the vitality and viability of a defined centre will not be permitted. It would also be contrary to the NPPF which seeks to ensure the vitality of town centres and which, although recognising the role that housing can play in such areas, says that this must be on appropriate sites.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be removed from the Local Plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined above to the health and vitality of the centre.

Your suggested revised wording of any policy or text:

B4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

20) Policy: HA37 - Former Locks Heath Filing Station

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as it would result in the loss of car parking for the Locks Heath District Centre (although the allocation simply refers to the site as a former petrol filling station it also encompasses a significant parking area for the Centre). A detailed assessment of this Centre was carried out in the Fareham Retail and Commercial Leisure Study: Update Report Litchfields 2020, a background paper to the Local Plan. This report refers to a large area of free surface parking adjacent to the Centre and says that this is one of its strengths. This is unsurprising because this centre, built in 1983, lies in an area known as the Fareham Western Wards developed in the 1970/80's and which, typical of that period, is highly car dependant. The loss of a substantial portion of the car park would thus be detrimental to the Centre's health and vitality. This would be contrary to Strategic Policy R1 of the emerging Local Plan which says that any development that would significantly harm the vitality and viability of a defined centre will not be permitted. It would also be contrary to the NPPF which seeks to ensure the vitality of town centres and which, although recognising the role that housing can play in such areas says that this must be on appropriate sites.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be removed from the Local Plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined above to the health and vitality of the centre.

Your suggested revised wording of any policy or text:

B4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

21) Policy: HA38 - 68 Titchfield Park Road

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This is a sound site for housing in locational terms. However, the site appears too small to accommodate the indicative yield of 9 dwellings without unacceptable tree loss and harm to the living conditions of those directly to the north. There would thus be conflict with NPPF requirements that: planning should ensure that developments add to the overall quality of the area and be sympathetic to local character (NPPF para 127); and on the social objective of ensuring a well- designed environment.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The allocation should either be withdrawn from the Plan or alternatively the indicative yield deleted or substantially reduced in number.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b Prevent the harm outlined in B3 above.

Your suggested revised wording of any policy or text:

B4c. See above - potentially the removal of the indicative yield or its revision downwards.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

22) Policy: HA42 - Land South of Cams Alders

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This allocation is unsound as the Proposals Map seems to show most if it in a SINC and close to Fort Fareham, an ancient monument. Development of the site would be harmful to the ecological interest of the SINC and potentially harmful to the setting of the ancient monument. It would also detract from the pleasant wooded aspect of the southern boundary of Cams Alders which, with land on nearby Fort Fareham, provides an attractive area for casual recreation. As such the allocation would conflict with the objectives of the NPPF on ecology, the protection of Heritage Assets and on securing attractive spaces.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be removed from the Plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By preventing the harm found above.

Your suggested revised wording of any policy or text:

B4c Not applicable.

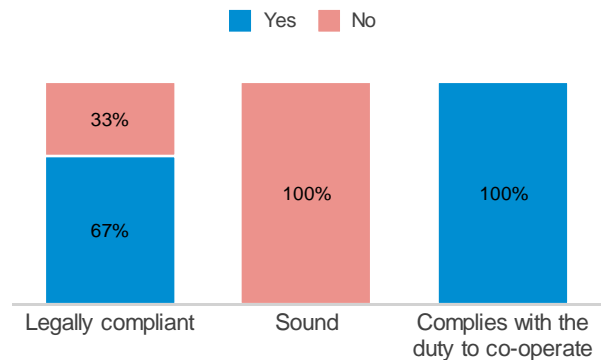

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

	Legally compliant	Sound	Complies with the duty to co-operate
Total	6	6	6

No	2 33%	6 100%	0 0%

Respondent: Mr Simon Dawkins (1812-46927)

Agent: Mr Peter Keenan | Q A Planning Ltd

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

NRR support the principle of the proposed housing allocation. NRR are also currently consulting on the changes to the highways infrastructure that would be required to facilitate the delivery of this site, which could be brought forward quickly if the application is approved. This would fulfil part (g) of the draft policy. NRR’s only request is to ensure that sufficient flexibility is built into the policy to allow for future applications to adapt their design to make the best use of this brownfield land and therefore improve its effectiveness. The policy provides for 30 dwellings and a maximum height of 3 storeys on this site. Contextually, it is noted that the NPPF encourages the following: Para 111 states policies should ‘promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained and available sites could be used more effectively (for example converting space above shops, and building on or above service yards, car parks, lock-ups...’ Para 123: ‘..important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site’ Para 123a ‘policies...include the use of minimum density standards for city and town centres and other locations that are well served by public transport. These standards should seek a significant uplift in the average density of residential development within these areas, unless it can be shown that there are strong reasons why this would be inappropriate; To make the best use of land in a sustainable location, then a design led approach needs to be taken which makes the best use of land taking into account the context of the site. It is noted the policy provides an indicative dwelling yield and height limit. We would not wish to prejudge the eventual design solution on the site but note that the existing shopping centre exceeds 3 storeys and has buildings in different land uses. Whilst a simple ‘storey height’ limit is a helpful guide, when considering adjacent buildings, it is important to consider the roof pitch, floor to ceiling height and finished floor levels. As such, a well-designed building that exceeds 3 storeys should not be resisted if it makes the best use of land and relates well to the surrounding area. This in turn could potentially result in a higher dwelling yield.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy revised to ensure flexibility in design

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would improve its effectiveness and ensure consistency with national policy.

Your suggested revised wording of any policy or text:

The change proposed is as follows: a 'The quantity of housing proposed shall be broadly consistent with the indicative site capacity, unless a design led solution can justify a higher quantum c 'Building heights should be a maximum of 3 storeys, or should not exceed the height of the existing shopping centre' In our view, this does not change the fundamental aims of the allocation but delivers a degree of flexibility to ensure that any developments make the best use of land.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

New River Retail are promoting the site for development and whilst it supports the principle subject to policy wording changes, its presence at the hearing session would be beneficial to both answer questions from the Inspector and it advance its case for the changes.

Respondent: Mr Robert Marshall (1812-4594)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as it would result in the loss of car parking for the Locks Heath District Centre. A detailed assessment of this Centre was carried out in the Fareham Retail and Commercial Leisure Study: Update Report Litchfields 2020, a background paper to the Local Plan. This report refers to a large area of free surface parking adjacent to the Centre and says that this is one of its strengths. This is unsurprising because this centre, built in 1983, lies in an area known as the Fareham Western Wards developed in the 1970/80's and which, typical of that period, is highly car dependant. The loss of a substantial portion of the car park would thus be detrimental to the Centre's health and vitality. This would be contrary to Strategic Policy R1 of the emerging Local Plan which says that any development that would significantly harm the vitality and viability of a defined centre will not be permitted. It would also be contrary to the NPPF which seeks to ensure the vitality of town centres and which, although recognising the role that housing can play in such areas, says that this must be on appropriate sites.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be removed from the Local Plan.

B4a. The allocation should be removed from the Local Plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined above to the health and vitality of the centre

B4b. It would prevent the harm outlined above to the health and vitality of the centre.

Your suggested revised wording of any policy or text:

B4c Not applicable

B4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

Respondent: Mr Robin Webb (212-421914)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

This allocation takes over a significant portion of the Locks Heath Centre Car Park, as does HA37 which is represented separately. There is no evidence that the car park under-utilised. On the contrary, cars using the centre overflow inconveniently onto adjacent roads at the busiest periods. Subpara (g) of HA36 states :Reconfiguration of car parking needs to consider requirements and functions of the existing shopping centre; The existing 'Requirements and functions' therefore show this allocation to be without merit

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Delete HA36

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Self evident

Your suggested revised wording of any policy or text:

See above

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Martin Ashdown (1612-431658)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The proposed allocation is not in alignment with policy R1. The proposed allocation will remove parking for the shopping centre and add additional housing units. Note also that some 800-1000 new units are proposed in the catchment areas so demand for access and parking will increase whilst it is already stretched at peak. Any reduction of parking will have a negative impact on usage of the Centre.

The proposed allocation is not in alignment with policy R1. The proposed allocation will remove parking for the shopping centre and add additional housing units. Note also that some 800-1000 new units are proposed in the catchment areas so demand for access and parking will increase whilst it is already stretched at peak. Any reduction of parking will have a negative impact on usage of the Centre.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA36 or require provision of at least same number of parking units displaced by it.

Remove the policy or require provision of at least as many displaced parking spaces.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

.

1) Policy: HP1 - New Residential Development

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is unsound in so far that it contains no restriction on the size of replacement dwellings or house extensions. Overlarge replacement dwellings and extended dwellings can detract from the undeveloped rural character and appearance of the countryside. Thus the Policy as worded fails to have regard to NPPF para. 170 which seeks to ensure that ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The proposed Policy merely seeks that replacement dwellings be of an appropriate character to their location. This is insufficient in itself to adequately control such development, and nor does it take account of extensions. The modification that is necessary is to impose, in addition, a floorspace limitation upon replacement dwellings and extended dwellings.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b The suggestion is, in addition, to require replacement dwellings to have a floorspace increase no larger than 30% over and above the existing dwelling. To ensure that the Policy only applies where the added floorspace of an extension would have an adverse visual impact floorspace provided within the existing building envelope would not be taken into account in determining the percentage increase.

Your suggested revised wording of any policy or text:

B4c The Policy should be reworded to add b) it is for a replacement dwelling which is of an appropriate character to the location and in any event no greater than 30% larger than the existing dwelling c) it is for an extension that would result in an increase in floorspace which is of an appropriate character to the location and in any event no more than a 30% increase in floorspace over and above the existing dwelling. Explanatory text should be added to say that “for the interpretation of this Policy floorspace figures should be measured externally, for extensions any addition within the existing building envelope shall not be taken into account in determining the percentage increase, and in determining whether a replacement dwelling or extended dwelling is of an appropriate character to the location regard shall be had of the need to avoid harm though the cumulative effect of such development and the impact of past development will be taken into account.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's view are discussed and an opportunity is given to respond to the views of others.

2) Policy: HP2 - New Small-scale Development Outside Defined Urban Areas

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound because the impact of development of this scale, and potentially in depth, beyond the settlement boundary would harm the rural character and appearance of the countryside. It has the potential to substantially consolidate the built form in these areas (see figure 5.1 in the emerging plan), the cumulative impact of which would blur the important distinction between the countryside and the urban area. It fails to have regard to NPPF para. 170 which seeks to ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ. Thus it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. To make the plan sound this Policy should be deleted from the Plan. To ensure that some residential development could take place beyond the settlement boundary a Policy similar to Policy DSP6 of the adopted plan could be used. This allows limited frontage infill of up to 2 dwellings. This would have less impact on the character and appearance of the countryside and thus accord with the NPPF.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would ensure that replacement and extended dwellings would meet the NPPF objective in para 170.

Your suggested revised wording of any policy or text:

B4c. The suggested rewording: “New residential development will be permitted outside the defined urban settlement boundaries (as identified on the Policies Map) where it comprises one or two new dwellings which infill an existing and continuous built-up residential frontage, where: a) The new dwellings and plots are consistent in terms of size and character to the adjoining properties and would not harm the character of the area; b) It does not result in the extension of an existing frontage or the consolidation of an isolated group of dwellings; and c) It does not involve the siting of dwellings at the rear of the new or existing dwellings.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

3) Policy: HP3 - Change of Use to Garden Land

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that it fails to have regard to a key factor, ancillary buildings on garden land, that can lead to such changes of use detracting from the character and appearance of areas beyond the development boundary. Thus, the Policy as worded fails to have regard to NPPF para. 170 which seeks to ensure that ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. To make the Policy sound refence must be made to the impact of ancillary buildings.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would ensure that garden extensions would meet the the NPPF objectives in para 170.

Your suggested revised wording of any policy or text:

B4c. Amend HP3b to say "It, along with ancillary buildings allowed as permitted development will not detract from the existing landscape"

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

4) Policy: HP6 - Exception Sites

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 The Policy on rural exception sites is unsound as its wording and that of the explanatory text clearly indicates that it refers to rural areas. This District although it contains countryside is not categorised as a rural authority and has no rural communities. It thus does not have all the particular housing and social issues that need to be addressed in such areas.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The Policy on rural exception sites should be deleted from the plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b It would remove an irrelevant Policy on rural exception sites.

Your suggested revised wording of any policy or text:

B4c Not applicable

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the vies of others.

5) Policy: HP8 - Older Persons' and Specialist Housing Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that it opens up the possibility of such accommodation being provided in the countryside beyond the settlement boundary. Such development is often large in scale and such would detract from the character and appearance of the countryside. Re-development opportunities do arise within the urban area and older person/specialist housing provision should be treated no differently than normal flatted development. Thus, the Policy as worded fails to have regard to NPPF para. 170 which seeks to ensure that ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus, it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a To make the Policy sound the possibility of older person/specialist accommodation outside the urban boundary should be deleted.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b This would ensure that there is no contravention of the requirements in para 170 of the NPPF..

Your suggested revised wording of any policy or text:

B4c. Revise the last sentence in the Policy simply to say "New older persons or specialist housing shall be provided within the Urban Area boundary."

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed an an opportunity is given to respond to the view of others.

6) Policy: HP10 - Ancillary Accommodation

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound, in part, on 3 counts. First, much of the explanatory text is so essential to the satisfactory operation of the Policy that it should be within the Policy itself. Second, the Policy should specifically require ancillary accommodation to be close to the principal dwelling. This is to prevent later pressure, which may be difficult to resist, for such accommodation to be turned into separate dwellings contrary to the aim of the NPPF in providing well designed places. And in rural areas the potential for ancillary buildings to become separate dwellings would be contrary to NPPF para. 170 which seeks to ensure that new development contributes to and enhances the natural and local environment. It would also thereby, in rural areas, give rise to car dependent housing contrary to the NPPF environmental objective of seeking to use natural resources prudently and moving to a low carbon economy. Third, explanatory paragraph 5.82 needs to be more clearly worded to make it clear that it is saying that an unrelated unit of accommodation is in effect a new dwelling and will not be regarded as Ancillary Accommodation under this Policy.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. Move much of the explanatory test into the main Policy and amend the Policy to require to require ancillary accommodation to be close to the principal dwelling.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined in B3 above.

Your suggested revised wording of any policy or text:

B4c. Amend HP10a to "a) It is within the curtilage of the principal dwelling and close it;" Add to HP10: f) The ancillary accommodation shall remain within the curtilage of, and in same ownership as, the principal dwelling. A planning condition will be imposed to prevent the use of the ancillary accommodation as a separate dwelling. g) the principal dwelling shall remain larger than the ancillary accommodation. Explanatory paragraph 5.83 altered to "an unrelated unit of accommodation is in effect a new dwelling and will not be regarded as ancillary accommodation under this Policy."

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

7) Policy: HA45 - Rear of 77 Burrige Road

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that the necessary mitigation required given the site's location on and partly adjoining a SINC would require the developer or occupier to have ownership of, or some rights over, the SINC. There is no evidence from the past history of the site that this is so. The site's allocation would thus conflict with NPPF requirements on conserving and enhancing the natural environment by protecting and enhancing sites of biodiversity in a manner commensurate with their identified quality in the development plan.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. To make the plan sound the allocation should be removed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. By preventing conflict with NPPF requirements on conserving and enhancing the natural environment.

Your suggested revised wording of any policy or text:

BC4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

8) Policy: R1 - Retail Hierarchy and Protecting the Vitality and Viability of Centres

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This is unsound in so far that the second paragraph of the Policy refers to main town centres uses being permitted within defined town centres. The whole of the designated Fareham Town Centre is so widely drawn that it includes important residential areas and large open spaces unsuitable for town centre uses. Such uses outside the designated Primary Shopping Area would conflict with the NPPF requirement of achieving well-designed places and better places in which to live.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The policy should be reworded so that it applies to the more limited designated Primary Shopping Area, where such uses would be acceptable.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By preventing main town centre uses in areas where they would no longer acceptable.

Your suggested revised wording of any policy or text:

B4c The second paragraph should be amended to say “Where planning permission is required, main town centre uses, as defined in the National Planning Policy Framework (NPPF), will be permitted within the defined Primary Shopping Area of Fareham Town Centre, district and local centres.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

9) Policy: R4 - Community and Leisure Facilities

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that it does not deal with the limitations that should apply to any of these uses, such as sports venues and open space, that may be applied for outside settlement boundaries. Such uses, if large scale and containing substantial buildings, can be especially intrusive in the countryside. Thus they should only be allowed if they are small scale uses and the associated buildings are also small scale. Without this limitation such development would detract from the character and appearance of the countryside. Thus, the Policy fails to have regard NPPF para. 170 which seeks to ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus, it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The Policy should specify that such uses are generally acceptable only within the development boundaries but that any that may be considered acceptable beyond those boundaries, such as sports venues and open space, must be small scale uses with small scale buildings.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By preventing the harm identified above.

Your suggested revised wording of any policy or text:

B4c A criteria e) should be added “Such facilities should generally be permitted only within the development boundary, and any uses outside those boundaries such as sports venues and open space shall, as well as complying with the other criteria above, need to be small scale use with small scale buildings”.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity given to respond to the views of others.

10) Policy: E1- Employment Land Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is sound in all but one respect on the two Daedalus allocations. This is a strategic allocation originally brought forward in adopted Core Strategy CS12. This said that development will be permitted on the site where, amongst other things, it delivers, or facilitates the delivery of high quality development including a) employment development that retains and strengthens the marine and aviation employment clusters, particularly those that require direct access to an operational airfield. This accords with the Council's vision for the site and the Lambeth Smith Hampton background paper to the emerging Local Plan refers to this and says that the advanced manufacturing such as that pursued at Daedalus is a sector regarded as one of the most significant opportunities for the UK to rebalance and reinvigorate the economy. The emerging Policy does not promote the idea of such advanced manufacturing for the site, and without doing so there is a danger that this valuable site could be lost to commercial uses less valuable to the economy. This would run counter to the requirement in the NPPF of building a strong and competitive economy and that each area should build on its strengths especially where Britain can be a leader in innovation.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The Policy should be revised to include the wording similar to that of Core Policy CS12 referred to above.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b This would ensure that the Policy met the objective of the NPPF on the building of a strong and competitive economy.

Your suggested revised wording of any policy or text:

B4c See B4a above.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

11) Policy: NE8 - Air Quality

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is unsound in so far that the main text of the Policy does not make it clear that explanatory text paragraphs 9.108 – 9.110 set out what may be required to meet the Policy requirement. This may lead to developers, especially small-scale developer, to be unaware of the requirements and prevent them being taken on board and discussed with the LPA. This runs counter to the intentions of Government policy (PPG on Air Quality (2019)) which says that it is important that applicants engage early on with the local planning authority and environmental health departments to establish the need for and scope of any assessment to support an application.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The Policy should guide applicants for small scale schemes to the relevant explanatory text.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b It would ensure that developers of minor development take on board relevant requirements and discuss them with the LPA.

Your suggested revised wording of any policy or text:

B4c Amend the second sentence of the Policy to read “Minor development should reduce its impacts on air quality and have regard to explanatory text paragraphs 9.108 – 9.110.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

12) Policy: NE9 - Green Infrastructure

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is unsound in so far as there is no indication that it would be effective. To be effective applicant's and Council case officers would need an easy and ready way of knowing where future and proposed Green Infrastructure existed. For this a single compendium of such space is required, indicating where they exist, to obviate the necessity for looking at the myriad of resources referred to.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a A compendium, capable of being updated, should be provided of Green Infrastructure in the District. The Policy should then be amended to make reference to this.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By ensuring that applicants and Council case officers are aware of the location of Green infrastructure so as to ensure it is safeguarded.

Your suggested revised wording of any policy or text:

B4c By adding to the Policy “all Green infrastructure covered by this Policy may be found on the Council's compendium of such spaces.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

13) Policy: NE10 - Provision and Protection of Open Space

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is unsound in so far as it does not in the Policy text set out, or refer to, the minimum open space and play space requirements for new development set out in explanatory text paragraph 9.134 table 9.1. Thus the Policy might encourage applicants to argue for lesser space standards than what are clearly the minimum acceptable. Given this the Policy would not ensure satisfactory space standards and the NPPF intentions that planning policies should enable and support healthy lifestyles through the provision of safe and accessible greenspace (NPPF para91) would not be met.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The text of the Plan should set the space standards set out in Table 9.1 as the minimum requirement to be met.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By ensuring NPPF objectives on promoting healthy communities would be met.

Your suggested revised wording of any policy or text:

B4c By amending the penultimate sentence of the last paragraph of this Policy to read "Residential development will be required to provide open and play space that will satisfactorily meet the needs of new residents. Table 9.1 below is a minimum space standard and developments will be required to meet higher levels of open and play space provision where that is necessary to make the development acceptable." The final sentence to be retained.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

14) Policy: FTC1 - Palmerston Car Park

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This proposed allocation is unsound on 2 grounds. First, there would be an unacceptable loss of town centre car parking spaces well located to meet the needs of the town centre shopping area and the shops in West Street. Second, the proposed indicative yield of 20 dwellings would lead to housing forward of the building line to detriment of the character and appearance of the area generally and the adjoining Osborn Conservation area to the north of Osborn Road. The Osborn Road Conservation Area Character Assessment Feb 2006 describes the area as comprising a series of Victorian villas set in large gardens. It describes the development pattern as being unique in Fareham and says that its setting includes the land opposite the Conservation Area to the South of Osborn Road, which thus includes the allocation site. Where modern development to the south of Osborn Road has been undertaken it has been well set back from the road and screened by mature planting. The provision of residential development forward of the building line would seriously detract from the character and appearance of the Conservation Area. On the first ground the proposed allocation would be harmful to the vitality of the town centre and West Street and as such conflict with the NPPF. Whilst the NPPF supports some housing in Town Centres for the role it plays in their vitality, this is with the caveat that it should be on appropriate sites, and this is not such a site (NPPF para 85.f) Harm on the second ground conflicts with NPPF policies on protecting Heritage Assets.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be withdrawn from the Plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the conflict with the NPPF referred to above.

Your suggested revised wording of any policy or text:

B4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

15) Policy: FTC2 - Market Quay

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as the site is considered incapable of accommodating the extent of mixed-use development referred to. There are also reservations over the maximum suggested height of development given the prominence of the site off a major traffic roundabout and the extent to which the site rises in height from south to north and is seen from short, medium and long-distance viewpoints. No sketch site briefs have been provided to indicate otherwise. Given the importance of this town centre site, and the multiplicity of uses suggested a detailed development brief is essential to guide future development of the site to ensure a site that functions well and enhances this part of the town centre. However, the Policy does not set out this requirement. Given the above the allocation as proposed would fail to ensure that future development of the site would meet the NPPF requirements for achieving well designed places set out in paragraphs 124-127.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. In the absence of evidence to support the building heights proposed reference to specific building heights should be removed. And it should be stated that the Council will support a mixed-use development incorporating some of the uses set out. The allocation should specify that a comprehensive development of the site will only take place in accordance with a detailed development brief.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would ensure that development of this important town centre site is undertaken in a way that complies with the NPPF objective of achieving well designed places.

Your suggested revised wording of any policy or text:

B4c. The supporting text to the allocation should say that “The Council will support a mixed-use development incorporating some of the uses set out in the bullet points and subject to development being in accordance with a development brief (to be subject to public consultation) that sets out how the site will function and enhance this part of the town centre and have regard to the prominence and visibility of the site.” Reference in the bullet points to commercial/leisure floorspace and housing numbers should be removed, along with reference to building heights.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

16) Policy: FTC3 - Fareham Station East

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This is a sustainable location for housing given its proximity to Fareham railway station, bus routes and shops etc. and an element of retail and café uses would also fit in well. However, the site has the following constraints to development: Much of the site comprises the railway station car park and this is essential in encouraging rail travel. The Policy refers to retention of sufficient car parking to serve the railway station without saying how much this is. The fire station may need to be retained on site if it can't be relocated; Sufficient space is required to ensure a good public realm at the station approach. The adjacent gravel yard would potentially be a bad neighbour in terms of noise and dust – and this has not been taken into account. No evidence has been put forward to show that the maximum 5 storey height would not be too high. It has not been shown how, in light of the above, the proposed development at the scale outlined could be satisfactorily achieved. Given the above the allocation as proposed would fail to ensure that future development of the site would to meet the NPPF requirements for achieving well designed places set out in paragraphs 124-127.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. This is not an allocation that can be agreed to at this stage as there is no evidence, by way of a development brief, that the site could be developed as proposed in a satisfactory way. The allocation should be delated from the plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. By preventing development of the site until a development brief has been prepared to show that development could be undertaken satisfactorily given all the constraints referred to.

Your suggested revised wording of any policy or text:

B4c. Not applicable .

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others

17) Policy: HA26 - Beacon Bottom East

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This site is sound in relation to its proximity to public transport and shops. However, the proposed site allocation is unsound given the indicative yield on 9 dwellings. Undetermined application F/19/1061/FP for this number of houses on the site indicated houses would so close the highway as to be detrimental to the character and appearance of the area and harmful to the setting of the adjoining locally listed cottage. A tall western boundary hedge would have unacceptably shaded the gardens of many houses on the site. Given how small the site is revised layouts are unlikely to overcome this harm. There would thus be conflict with NPPF requirements that: planning should ensure that developments add to the overall quality of the area and be sympathetic to local character (NPPF para 127); and on the prevention of harm to Heritage Assets (paras 193/4)

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The allocation should either be withdrawn from the Plan or alternatively the indicative yield deleted or substantially reduced in number.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b Prevent the harm outlined in B3 above.

Your suggested revised wording of any policy or text:

B4c. See above - potentially the removal of the indicative yield or its revision downwards.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

18) Policy: HA36 - Locks Heath District Centre

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as it would result in the loss of car parking for the Locks Heath District Centre. A detailed assessment of this Centre was carried out in the Fareham Retail and Commercial Leisure Study: Update Report Litchfields 2020, a background paper to the Local Plan. This report refers to a large area of free surface parking adjacent to the Centre and says that this is one of its strengths. This is unsurprising because this centre, built in 1983, lies in an area known as the Fareham Western Wards developed in the 1970/80's and which, typical of that period, is highly car dependant. The loss of a substantial portion of the car park would thus be detrimental to the Centre's health and vitality. This would be contrary to Strategic Policy R1 of the emerging Local Plan which says that any development that would significantly harm the vitality and viability of a defined centre will not be permitted. It would also be contrary to the NPPF which seeks to ensure the vitality of town centres and which, although recognising the role that housing can play in such areas, says that this must be on appropriate sites.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be removed from the Local Plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined above to the health and vitality of the centre

Your suggested revised wording of any policy or text:

B4c Not applicable

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

19) Policy: HA36 - Locks Heath District Centre

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as it would result in the loss of car parking for the Locks Heath District Centre. A detailed assessment of this Centre was carried out in the Fareham Retail and Commercial Leisure Study: Update Report Litchfields 2020, a background paper to the Local Plan. To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

20) Policy: HA37 - Former Locks Heath Filing Station

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as it would result in the loss of car parking for the Locks Heath District Centre (although the allocation simply refers to the site as a former petrol filling station it also encompasses a significant parking area for the Centre). A detailed assessment of this Centre was carried out in the Fareham Retail and Commercial Leisure Study: Update Report Litchfields 2020, a background paper to the Local Plan. This report refers to a large area of free surface parking adjacent to the Centre and says that this is one of its strengths. This is unsurprising because this centre, built in 1983, lies in an area known as the Fareham Western Wards developed in the 1970/80's and which, typical of that period, is highly car dependant. It would also be contrary to the NPPF which seeks to ensure the vitality of town centres and which, although recognising the role that housing can play in such areas says that this must be on appropriate sites.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be removed from the Local Plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined above to the health and vitality of the centre.

Your suggested revised wording of any policy or text:

B4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

21) Policy: HA38 - 68 Titchfield Park Road

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This is a sound site for housing in locational terms. However, the site appears too small to accommodate the indicative yield of 9 dwellings without unacceptable tree loss and harm to the living conditions of those directly to the north. There would thus be conflict with NPPF requirements that: planning should ensure that developments add to the overall quality of the area and be sympathetic to local character (NPPF para 127); and on the social objective of ensuring a well- designed environment.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The allocation should either be withdrawn from the Plan or alternatively the indicative yield deleted or substantially reduced in number.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b Prevent the harm outlined in B3 above.

Your suggested revised wording of any policy or text:

B4c. See above - potentially the removal of the indicative yield or its revision downwards.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

22) Policy: HA42 - Land South of Cams Alders

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This allocation is unsound as the Proposals Map seems to show most if it in a SINC and close to Fort Fareham, an ancient monument. Development of the site would be harmful to the ecological interest of the SINC and potentially harmful to the setting of the ancient monument. It would also detract from the pleasant wooded aspect of the southern boundary of Cams Alders which, with land on nearby Fort Fareham, provides an attractive area for casual recreation. As such the allocation would conflict with the objectives of the NPPF on ecology, the protection of Heritage Assets and on securing attractive spaces.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be removed from the Plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By preventing the harm found above.

Your suggested revised wording of any policy or text:

B4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

Respondent details:

Title:	Mr
First Name:	Martin
Last Name:	Ashdown
Job Title: (where relevant)	[No Reply]

1) Policy: HA36 - Locks Heath District Centre

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The proposed allocation is not in alignment with policy R1. The proposed allocation will remove parking for the shopping centre and add additional housing units. Note also that some 800-1000 new units are proposed in the catchment areas so demand for access and parking will increase whilst it is already stretched at peak. Any reduction of parking will have a negative impact on usage of the Centre.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove HA36 or require provision of at least same number of parking units displaced by it.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

.

Your suggested revised wording of any policy or text:

.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

2) Policy: HA36 - Locks Heath District Centre

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The proposed allocation is not in alignment with policy R1. The proposed allocation will remove parking for the shopping centre and add additional housing units. Dear Sir/Madam,

Regulation 19 Local Plan Consultation (6th November – 18th December 2020)

Thank you for your consultation dated 06 November 2020 which was received by Natural England on the same date.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Natural England welcomes the Council's approach to achieving sustainable development through its Local Plan, particularly through its suite of Natural Environment policies that include protection of internationally, nationally and locally designated sites, the enhancement of the local ecological network and the requirement for biodiversity net gain.

Our comments on the Regulation 19 Local Plan and supporting Habitats Regulations Assessment (HRA) and Sustainability Appraisal (SA) are made below.

Strategic Policy DS1: Development in the Countryside

It is recommended this Policy also requires proposals to ensure compliance with Natural Environment policies, in particular Strategic Policy NE1 and Policy NE2, to ensure impacts on nature conservation interests are properly considered and addressed, and biodiversity net gain is achieved (for applicable development).

With regards to soils, the local plan outlines that 'the benefits of protecting the Best and Most Versatile (BMV) agricultural land are considered against the need for development'. This Policy requires development proposals to demonstrate they 'Conserve and enhance landscapes, sites of biodiversity or geological value and soils'.

The National Planning Policy Framework sets out that:

'Plans should: distinguish between the hierarchy of international, national and locally designated sites; allocate land with the least environmental or amenity value, where consistent with other policies in this Framework¹; take a strategic approach to maintaining and enhancing networks of habitats and green infrastructure; and plan for the enhancement of natural capital at a catchment or landscape scale across local authority boundaries.'

1 Where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality.

It is recommended that this Policy is amended to give appropriate weight to the roles performed by the area's soils. These should be valued as a finite multi-functional resource which underpin our wellbeing and prosperity. Decisions about development should take full account of the impact on soils, their intrinsic character and the sustainability of the many ecosystem services they deliver. The plan should safeguard the long term capability of BMV agricultural land (Grades 1, 2 and 3a in the Agricultural Land Classification) as a resource for the future.

Where site allocations are sited on BMV land, the Plan should outline a requirement for the protection of soils during construction where possible, referencing the '[Defra Code of practice for the sustainable use of soils on construction sites](#)'.

Strategic Policy DS3: Landscape

Natural England welcomes the proposed designation of eight Areas of Special Landscape Quality within the Borough, and the requirement for development in these areas to meet stringent criteria that seek to protect and enhance landscape.

Strategic Policy CC1: Climate Change

Natural England advise all Local Plans consider climate change adaption and recognise the role of the natural environment to deliver measures to reduce the effects of climate change, for example tree planting to moderate heat island effects. In addition factors which may lead to exacerbate climate change (through more greenhouse gases) should be avoided (e.g. pollution, habitat fragmentation, loss of biodiversity) and the natural environment's resilience to change should be protected. Green Infrastructure and resilient ecological networks play an important role in aiding climate change adaptation.

Natural England welcomes Strategic Policy CC1: Climate Change that promotes mitigation and adaptation to climate change through various methods including the integration of green and blue infrastructure into the design of developments, adopting higher water efficiency standards, the integration of energy efficiency, renewable and low carbon technologies into all development, and reducing reliance on car travel.

Natural England supports the embedding of policy that will deliver measures to increase sustainability of development over the Plan period. This should also include reducing consumption of raw natural resources, sourcing more renewable or 'green' energy, and reducing waste. Consideration should be given to the collection of financial contributions from development to offset residual carbon emissions elsewhere in the Borough. Consideration can also be given to the retrofitting of existing development with technology that improves energy and water efficiency.

It is recommended that Local Plan policy also seeks measures that help natural habitats across the Borough adapt to the effects of climate change. We would encourage you to refer to the Natural England and RSPB [Climate Change Adaptation Manual](#) and look at the step by step approach to identifying the climate resilience of habitats that occur in the Borough. Consideration should be given to addressing issues on habitats and protected sites that will be exacerbated by climate change, such as flooding, drought, reduction of water resources etc.- the Manual can also help identify these.

Consideration can be given to delivering specific projects within the Borough. For example, to maximise climate change adaptation and mitigation through the establishment of a Nature Recovery Network (NRN), and the Local Nature Recovery Strategy in which the NRN would sit, to ensure climate change resilience at their core. Such projects could potentially benefit from carbon offsetting contributions from development over the local plan period.

Such an approach could link into other aspects of the Plan such as water and air quality, nutrient mitigation for Solent European designated sites, delivery of biodiversity net gain, natural flood management, and green infrastructure implementation among others. Natural England would be happy to advise further on this aspect.

Policy CC2: Managing Flood Risk and Sustainable Drainage Systems

Natural England welcome this Policy that requires development ensures flood and surface drainage are properly addressed, and that Sustainable Drainage Systems (SuDS) are designed in accordance with CIRIA C753 SuDs Manual, to be as 'natural' as possible.

It is advised that the policy makes clear that where a development drains to a protected site(s), an additional treatment component (i.e. over and above that required for standard discharges), or other equivalent protection may be required to ensure water quality impacts are avoided.

Where SuDS are proposed serving as mitigation for protected sites, development should ensure that appropriate resources are put in place to ensure their long-term (in perpetuity) monitoring, maintenance/replacement, and funding.

Policy CC3: Coastal Change Management Areas (CCMAs)

Sea level rise and coastal change are inevitable and bring both challenges and opportunities for people and nature. Sustainable coastal management needs to embrace long-term change and achieve positive outcomes for both.

Policy CC3 identifies that the North Solent Shoreline Management Plan (SMP) policy for the majority of Fareham Borough's coastline is 'Hold the Line', and identifies two CCMAs between Hook spit and Meon Shore, with an identified coastal management policy of 'No Active Intervention'. The Policy will ensure that development in these areas will appropriately consider coastal change. It also will ensure replacement coastal defence schemes 'are consistent with the relevant Shoreline Management Plan and that there will be no severe adverse impact on the environment, the English Coast Path, and the rights of way network'.

We would advise that the Local Plan should also help facilitate the relocation of valued environmental assets away from areas of risk.

Strategic Policy NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

Natural England welcomes this policy that sets out clearly the hierarchy of nature conservation and the requirement for development to 'demonstrate clearly that the mitigation hierarchy has been followed' in terms of avoiding, mitigating or compensating (as a last resort) impacts on biodiversity. Natural England welcomes the Local Ecological Network (LEN) approach that has been included in the local plan.

It is helpful that the LEN and the Council's Green Infrastructure Strategy have been suggested as tools to provide opportunity for enhancements across the Borough. Please read our comments below in relation to Policy NE2 that regards the choosing of suitable opportunities for biodiversity enhancement.

Policy NE2: Biodiversity Net Gain

Natural England is fully supportive of the inclusion in the local plan of a Policy for biodiversity net gain. It is welcomed that the policy refers to the benefits to Borough residents from the ecosystem services that being close to nature provides, and outlines an expectation that offsite net gain must be sought as close to the development as possible. However in some instances this may be difficult, and Natural England recommends that consideration is given to developing a suite of projects across the LEN that development within the Borough can contribute to thereby ensuring the biodiversity within the Borough is protected and enhanced. For example, partners that manage Local Nature Reserves and Sites of Importance for Natural Conservation in the Borough could submit projects to the local planning authority to enhance the ecological value of these sites. These projects could be funded by development that requires offsite compensation or additional enhancements to achieve biodiversity net gain. This approach can also be used by development with limited opportunities for biodiversity net gain on-site.

The Policy outlines that the Council may prepare and adopt a Supplementary Planning Document (SPD) for Biodiversity Net Gain. Due to the need to ensure net gain is delivered in a suitably

strategic way, and having regard to the timescales of the legislative requirement for net gain and further national guidance, Natural England would support the development of such an SPD and would encourage Policy NE2 to outline this as a clear intention of the Council, in order to provide further guidance and support to aid sustainable development across the borough. Natural England will be happy to advise further to aid the development of such an SPD.

- *Calculating net gain*

Please note that Biodiversity Metric 3.0 is due to be published early 2021, which will supersede [Biodiversity Metric 2.0](#). We advise that the Policy is updated accordingly and that this metric is used to measure gains and losses to biodiversity resulting from development, and implement development plan policies on biodiversity net gain.

Please note that although the Policy includes 'nesting and roosting features' as suggestions for achieving net gain, it is our advice that features such as bird and bat boxes, swift bricks, bee hotels etc should be classed as general biodiversity enhancements that should be included as part of a wider biodiversity enhancement and mitigation plan. Net gain specifically should derive strictly from habitat enhancement and creation, required as calculated using the metric.

- *Wider environmental gains*

The reference to seeking wider environmental gains, for example to address water/air quality, flooding, climate change etc. is welcomed. Opportunities for environmental gains, including nature based solutions to help adapt to climate change, might include:

- Identifying opportunities for new multi-functional green and blue infrastructure.
- Managing existing and new public spaces to be more wildlife friendly (e.g. by sowing wild flower strips, changing cutting regime of open spaces and road verges*) and climate resilient
- Planting trees, including street trees, characteristic to the local area to make a positive contribution to the local landscape.
- Improving access and links to existing greenspace, identifying improvements to the existing public right of way network or extending the network to create missing footpath or cycleway links.
- Restoring neglected environmental features (e.g. a hedgerow or stone wall or clearing away an eyesore)
- Designing a scheme to encourage wildlife, for example by ensuring lighting does not pollute areas of open space or existing habitats

*Please see this [paper](#) regarding cost-effective and low-maintenance management for species-rich grassland on road verges and the value it can contribute to biodiversity and ecosystem services.

Please note that Natural England and Defra are developing an Environmental Net Gain/metric for Natural Capital Net Gain that can be used in conjunction with the Biodiversity Metric (but not instead of). Further information will be available in 2021.

- *Monitoring of net gain*

Your plan should include requirements to monitor biodiversity net gain. This should include indicators to demonstrate the amount and type of gain provided through development. The indicators should be as specific as possible to help build an evidence base to take forward for future reviews of the plan, for example the total number and type of biodiversity units created, the number of developments achieving biodiversity net gains and a record of on-site and off-site contributions.

LPAs should work with local partners, including the Local Environmental Record Centre and wildlife trusts, to share data and consider requirements for long term habitat monitoring. Monitoring requirements should be clear on what is expected from landowners who may be delivering biodiversity net gains on behalf of developers. This will be particularly important for strategic housing allocations and providing as much up front information on monitoring will help to streamline the project stage.

Policy NE3: Recreational Disturbance on the Solent Special Protection Areas (SPAs)

Natural England welcome this policy that will require new residential development to address in-combination effects on the Solent SPAs via recreational disturbance. It is recommended the Policy also outlines that other types of development (such as new hotels, student accommodation, care homes etc.) may also need to address recreational disturbance impacts, both alone and in-combination. Such development should be assessed on a case by case basis.

Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

Natural England welcome this policy that will require new development that propose a net increase in overnight accommodation to address in-combination effects on the Solent designated sites via eutrophication from nutrients in wastewater.

Policy NE5: Solent Wader and Brent Goose Sites

Natural England welcome this policy that will require development to address effects on sites identified by the Solent Wader and Brent Goose Strategy (SWBGS) which serve as functionally linked land to the Solent SPAs.

It is recommended that the following wording within the Policy "*Sites which are used by Solent Waders and/or Brent Geese (as shown on the Policies map)*" is amended to read "*Sites which are used by Solent Waders and/or Brent Geese (as identified within the most up to date version of the Solent Wader and Brent Goose Strategy)*" to take account of any changes to sites and their distribution across the Borough, as these updates can be implemented at irregular times. Any further references to the Policies map should be similarly amended to refer to the SWBGS mapping.

Core Areas – due to their essential function within the SWBG network, it is advised these sites are identified for protection by the Policy. Any development that would result in impacts to a Core Area will need to be carefully assessed on a case-by-case basis. There are limited options where the function of a Core site can be fully replicated elsewhere in terms of its suitability and appropriate locality; where such land is available, an assessment of replicability will need to be undertaken through discussions with Natural England and the Local Planning Authority.

Financial contributions – it is welcomed that the Policy outlines that financial contributions proposed as mitigation will be used for the management and enhancement of an 'agreed suitable identified site for Solent Waders and Brent Geese'. Such proposals should demonstrate how such funds will be used to enhance, manage and monitor sites within the wider Solent Waders and Brent Geese network, in perpetuity. It is suggested that the Council works with relevant partners/stakeholders, including cross-boundary partnerships, to develop a strategic project(s), such as a bird reserve, and/or list of projects to enhance, manage and monitor the wider Solent wader and brent goose ecological network, to which contributions can be directed.

Policy NE6: Trees, Woodland and Hedgerows

Natural England welcomes this Policy that seeks to protect and enhance trees, woodland and hedgerows within the Borough. It is recommended that this Policy requires development proposals that affect ancient woodland, ancient trees and veteran trees, to ensure they are in line with [standing advice](#) published by Natural England and the Forestry Commission.

Policy NE8: Air Quality

It is welcomed that the Policy recognises that 'poor levels of air quality can also lead to environmental issues'. The Policy includes a need for planning applications to consider if they will have a 'potential adverse effect on biodiversity, especially where it would affect sites designated for their biodiversity value'.

The Policy outlines that the Local Plan HRA concludes the Plan 'would not have a likely significant effect on the internationally important habitats and species present in the area'. As this issue has

been considered within the HRA appropriate assessment, the wording here should be amended to use the correct terminology under the Habitats Regulations, i.e. the HRA concludes the Plan will not result in an 'adverse effect on integrity' (the term 'likely significant effect' is used at the screening stage of the HRA). See further comments on air quality below in regards to the Local Plan HRA.

Policy NE9: Green Infrastructure

Natural England welcomes this Policy that seeks to fully integrate green infrastructure (GI) into development and maximise opportunities to connect to the wider environment. The provision of enhanced green infrastructure and sites of nature conservation value can not only help address some of the mental and physical health problems that are experienced in the Borough's population, but can also benefit society in other ways including improvements to local air and water quality, reducing the risk of flooding, alleviating noise levels and aiding climate change adaptation.

Policy NE10: Protection and Provision of Open Space

This Policy references protection of public rights of way. Natural England advises that the Policy should also seek to secure enhancement of public rights of way and National Trails, as outlined in paragraph 98 of the NPPF. Recognition should be given to the value of rights of way and access to the natural environment in relation to health and wellbeing and links to the wider green infrastructure network. It is welcomed the plan seeks new access opportunities; it should seek to link existing rights of way where possible. The plan should avoid building on open space of public value as outlined in paragraph 97 of the NPPF.

It is welcomed that the Policy makes provision for appropriate quantity and quality of green space to meet identified local needs (as outlined in paragraph 96 of the NPPF) based on Natural England's work on [Accessible Natural Greenspace Standard \(ANGSt\)](#) in assessing the level of accessible natural greenspace; it is also welcomed that it recognises development may be required to 'provide more open space above what is required by the standards to make the development more acceptable'.

Policy D1: High Quality Design and Place Making

Natural England welcomes this Policy that requires the design of developments to integrate existing and new habitats and biodiversity within a coherent and well managed, connected structure. It is advised that landscaping of developments and open spaces seeks to use appropriate native and locally sourced species as far as possible to cater for local wildlife.

Policy D4: Water Quality and Resources

Natural England welcome this policy that seeks to conserve water and improve its quality.

Southern Water's Water Resources Management Plan (WRMP) 2019, that covers the planning period 2020-2070, projects a significant supply demand deficit during periods of drought in the Western Area, and commits to implementing a long term water resources scheme to restore the supply demand balance whilst avoiding and/or mitigating impacts on European sites, including the River Itchen SAC.

It is Natural England's advice that in advance of any permitting of such a suitable long term scheme, uncertainty remains with regards to water resources and the impacts of abstraction on protected sites.

Although it is welcomed that Policy D4 requires a water consumption for new dwellings of no more than 110 litres per person per day, Natural England strongly recommend all new development within the Southern Water supply area adopt a higher standard of water efficiency of 100 litres/per person/day, including external water use and re-use, in line with Southern Water's Target 100 demand reduction programme which is committed to within their WRMP19. Natural England also recommends that the Policy encourages the wise use of water in conjunction with the water companies, for example by developments incorporating grey water recycling systems and efficient appliances

Please see Natural England advice above in relation to Policies NE4 and Policy CC2 with regards to nutrients and surface water treatment via SuDS.

Neighbourhood Plans

Currently there are no Neighbourhood Plans in the Borough, but the Local Plan provides a 'strategic evidence base' which will inform any future Neighbourhood Plans.

It is recommended that any future Neighbourhood Plans which allocate housing should also identify spaces for environmental enhancement, for the purpose of offsetting environmental impacts, e.g. through the designation of Local Green Spaces. Such a local approach could give communities more ownership over such green spaces and provide a more strategic route to addressing common environmental impacts from development in that area, such as air and water pollution, habitat and species loss and increased carbon emissions, and could deliver biodiversity net gain and nutrient offsetting.

Such spaces could include the development of community orchards and play areas, woodlands and nature reserves, and serve a variety of functions that benefit both nature and the local community, for example providing benefits to health and wellbeing, offsetting nutrient discharges from allocated development and providing further scope for carbon sequestration.

Specific comments on Housing Allocation Policies

- HA9 - Heath Road (70 dwellings)

It is acknowledged this allocation site has resolution to grant permission for 70 dwellings. It is recommended this Policy includes the requirement to secure an appropriate level of offsite compensation to address the loss of secondary woodland on site which may in parts qualify as lowland mixed deciduous woodland habitat.

- HA29 - Land East of Church Road (20 dwellings)

Much of this site shows as Lowland Mixed Deciduous Woodland priority habitat on the Ecological Network mapping for Hampshire. Part of the site is designated as a Site of Importance for Nature Conservation (SINC) according to the Policy map. The Policy outlines a requirement for ecological mitigation for the site-specific construction and operational impacts of a development proposal. It is advised the Policy outlines a requirement to secure an appropriate level of offsite compensation to address any loss of priority habitat on site to ensure compliance with Policy NE1.

- HA31 - Hammond Industrial Estate (64 bed care home)

The Policy should ensure the impact of nutrients in wastewater is addressed to ensure compliance with Policy NE4.

- HA37 - Former Locks Heath Filling Station (30 dwellings)

This site is adjacent to an area of Lowland Mixed Deciduous Woodland priority habitat as shown on the Ecological Network mapping. The Policy should ensure that impacts on priority habitats and protected species are taken into account and appropriately addressed.

- HA38 – 68 Titchfield Park Road (9 dwellings)

The site is adjacent to Sylvan Glade SINC, much of which is ancient semi-natural woodland. The Policy should ensure compliance with standing advice on ancient woodland, ancient trees and veteran trees and that impacts on the SINC and protected species are appropriately addressed.

- HA42 - Land South of Cams Alders (60 sheltered housing)

This allocation site is located on 'Fort Fareham Grassland' SINC that supports woodland and meadow communities. It also lies adjacent to Fort Fareham SINC known for supporting wet woodland communities.

As previously advised in our response to the Supplement to the Reg 18 Local Plan (letter dated 23rd April 2020), allocations and development proposals should ensure they engage the mitigation

hierarchy, where impacts on designated ecological sites/features should first be avoided, and where not possible, adequately mitigated. Where this is not possible, any loss of priority habitat should be appropriately compensated. All residual ecological impacts will need to be addressed before any net gain for biodiversity can be achieved.

Natural England recommends that where loss of SINC habitat cannot be avoided, the policy should make clear how requirements set out within the NPPF, NERC Act 2006 and Local Plan Natural Environment policies will be met. It is advised an appropriate level of offsite compensation should be required to address any loss of priority habitat on site to ensure compliance with Policy NE1 .

- E4: Solent 2 (Employment - 23,500 sq. metres)

This employment allocation is located on Whiteley Meadow - Plot 2184 SINC and Ashley Wood, Fareham SINC. The Hampshire Ecological Network Mapping dataset shows much of this area as Lowland Mixed Deciduous Woodland, a priority habitat listed as required under Section 41 of the Natural Environmental and Rural Communities Act 2006. The site is also situated adjacent to the Gull Coppice (South-West Remnant) SINC which comprises ancient semi-natural woodland.

It is acknowledged that this site is an existing allocation within the adopted Fareham Local Plan Part 2 (2015). The current Policy outlines a requirement for this development to protect existing woodland and avoid habitat severance, and appropriate mitigation and compensation for any loss of protected trees. However, it is our view that a significant area of habitat, including mature woodland, is likely to be lost as a result of development. The Policy should ensure that it is compliant with Strategic Policy NE1 with regards to impacts on the local ecological network in this locality. In line with existing national and local policy and legislation, it is Natural England's advice that the mitigation hierarchy of avoid, mitigate and lastly compensate is employed where considering impacts on these habitats, particularly those designated as SINC. Measures should be sought to protect and enhance the local ecological network. Where impacts cannot be avoided or adequately mitigated, a comprehensive compensation package should be required that addresses the loss of all priority habitat on site (rather than just specifying protected trees), that seeks to enhance and connect habitat in the locality.

Comments on the HRA

Natural England notes that your authority, as competent authority, has undertaken an appropriate assessment of the Local Plan in accordance with regulation 63 of the Conservation of Species and Habitats Regulations 2017 (as amended). Natural England is a statutory consultee on the appropriate assessment stage of the Habitats Regulations Assessment process.

We have the following comments on the HRA:

- *Recreational disturbance – New Forest designated sites*

The Local Plan HRA screening assessment outlines that although the Borough falls within the 25km buffer of the New Forest designated sites (via a straight line), the minimum actual travel distance by car is of approximately 30km travel distance (via the M27). In comparison to the number of visits from residents closer to the New Forest, the assessment states 'visits to the New Forest SAC/SPA/Ramsar associated with increased housing development in Fareham Borough contribute a significantly lower proportion of overall visits to the designated sites and it is not considered likely that significant effects associated with recreational disturbance from Fareham housing development would arise'. The HRA screens this impact pathway out from an appropriate assessment on this basis.

It is understood Footprint Ecology are currently conducting further analysis on several aspects of their latest visitor surveys. This analysis will assist the definition of a robust catchment area for recreational impacts. It will help in the preparation of a strategic, cross-boundary approach with neighbouring competent authorities to deliver habitat mitigation for the New Forest SPA/SAC/Ramsar. This work is due to be completed shortly and will provide a useful update to the evidence base against which such impacts from new development from surrounding local authority areas can be assessed.

Therefore, whilst acknowledging that the level of additional impacts from new residents is known to significantly decrease with distance from the New Forest designated sites, Natural England consider at this time there remains some uncertainty with regard to the evidence confirming the level of additional impacts from new residents of Fareham local plan development. We therefore advise this issue is taken forward to the appropriate assessment stage where further work may be carried out to ascertain the level of impacts as accurately as possible.

Where impacts are identified, suitable and proportionate mitigation should be proposed; we recommend the Council works with the New Forest National Park Authority and the other partner authorities to develop a strategic approach to addressing recreational impacts from new development on the New Forest designated sites. Such an approach should include developer contributions towards the New Forest National Park Authority's Habitat Mitigation Scheme to enable the authority to deliver site specific mitigation measures on behalf of applicants.

Natural England will be happy to provide further advice to the Council on this aspect as the evidence base develops.

- *Air quality*

The Local Plan is supported by an Air Quality Habitats Regulations Assessment (Ricardo, Sept 2020). The conclusions drawn in the Local Plan HRA in regards to air quality impacts are based on those drawn within the Ricardo report. Natural England concurs with the conclusions drawn in the report.

The Ricardo report suggests that the Council regularly reviews the Defra airborne NOx forecast levels. This is welcomed as a way to ensure any changes in forecasting and potential consequential changes to conclusions drawn in the report for this pollutant can be appropriately reviewed and addressed during the local plan period.

- *Water quality – nutrients*

The HRA calculates a nitrogen budget for the local plan of 2536.99 kgTN/yr. Appendix III of the HRA outlines various mitigation schemes that can be utilised or progressed as a means to ensure nutrient neutrality can be delivered by new development.

The HRA states within its Summary of Findings that the sites Chichester and Langstone Harbours SPA/Ramsar, Portsmouth Harbour SPA/Ramsar and Solent and Dorset Coast SPA are screened out of an appropriate assessment in relation to water pollution impacts. Much of development within Fareham borough is served by Peel Common wastewater treatment works (WwTW), which is a coastal WwTW that discharges effluent several kilometres out into the Solent. It is our advice that long-shore outfall pipes are likely to have shifted and widened the distribution of nitrogen loading within the effluent across the Solent SAC and SPAs. It is important to recognise the loading from Peel Common WwTW contributes to a number of estuaries and catchments within the Solent (including Portsmouth Harbour, Langstone Harbour, Chichester Harbour, River Meon, Wootton Creek and the Medina Estuary catchments). It is therefore Natural England's view that, because of this wide distribution of nitrogen loading, all designated sites should be screened in.

- *Other comments on the HRA*

Section 7.7.3 – this paragraph refers to the 'SAC' although it is relating to Portsmouth Harbour SPA and Ramsar.

Comments on the SA

We are broadly satisfied that the objectives and indicators within the Sustainability Appraisal cover our key interests, and welcome the identification of the need to conserve and enhance biodiversity, landscape character, and to reduce pollution. We also welcome the need to address minimise the

effects of climate change, and to minimise impacts on best and most versatile agricultural land. Please see some more specific comments below.

- SA5: To Minimise Carbon Emissions and Promote Adaptation to Climate Change

This SA objective to address the effects of climate change is welcomed. It is suggested a further monitoring parameter(s) is included to monitor the implementation of new GI/habitat that can seek to alleviate the pressures of climate change on species and the ecological network whilst also providing other benefits as described further in our advice above; e.g. percentage of new GI/ extent of priority habitat within the ecological network.

- SA7: To Conserve and Enhance Biodiversity

We advise that this SA objective also seeks to conserve and enhance geodiversity within the Borough, in line with national planning policy.

The SA outlines the Plan 'is predicted to lead to negative impacts to ecological receptors in the short to medium term, but many of these impacts are capable of being mitigated. Long-term effects are likely to be both positive and negative, and highly site-specific'. It is acknowledged these effects can be avoided/mitigated by the implementation of several policies including NE1, NE3, NE4 and NE5. It is advised Local Plan Policy requires relevant development to carry out site-level Habitats Regulations Assessments in order to ensure impacts on European sites are suitably addressed.

It is also suggested that further monitoring parameters are incorporated to ensure impacts on internationally, nationally and locally designated sites are monitored throughout the Plan period, e.g. via the number, extent and condition of sites designated for nature conservation. We would advise the use of a green infrastructure standard as an indicator, such as Natural England's Accessible Natural Greenspace Standard (ANGSt). Parameters for measuring the implementation of net gain should be introduced, see further above for our advice on net gain monitoring.

We would be very happy to comment further as the plan process progresses. If you have any queries relating to the detail in this letter please contact me on 07787005505.

Yours faithfully

Rebecca Aziz
Sustainable Development Senior Advisor

1) Policy: R1 - Retail Hierarchy and Protecting the Vitality and Viability of Centres

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

This policy includes a general approach to the hierarchy of centres, consistent with paragraph 85a of the NPPF. However, the policy is silent on the ability of centres to deliver residential. Paragraph 85d states that policies should 'recognise that residential development often plays an important role in ensuring the vitality of centres and encourage residential development on appropriate sites.' It is appreciated that the draft plan allocates two residential sites within Locks Heath district centre and in other centres and indeed paragraph 7.8 makes a passing reference to the appropriateness of residential in town centres. Given the importance of delivering sustainable residential development on brownfield sites, in our view the policy needs to be stronger on the in-principle support given to residential development in town centres. As the impact of Covid-19 and the wider macro-economic pressures on town centres is felt, there will be other development opportunities that present themselves as 'windfall' sites and providing a clear policy steer to develop under-utilised land in town centres for residential will improve the effectiveness of the policy, consistent with the NPPF. Therefore, we propose that the policy is strengthened to provide a clear commitment to support residential on appropriate sites within town centres.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Reference to the potential for residential within town centres to be included within the policy wording itself

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure consistency with national policy and improve its effectiveness to ensure delivery of housing in sustainable brownfield locations,

Your suggested revised wording of any policy or text:

'Residential development on appropriate sites in designated town centres will be supported subject to compliance with other policies within this plan'.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

New River Retail own one of the district centres and its expertise will assist at the hearing sessions.

2) Policy: HA36 - Locks Heath District Centre

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

NRR support the principle of the proposed housing allocation. NRR are also currently consulting on the changes to the highways infrastructure that would be required to facilitate the delivery of this site, which could be brought forward quickly if the application is approved. This would fulfil part (g) of the draft policy. NRR's only request is to ensure that sufficient flexibility is built into the policy to allow for future applications to adapt their design to make the best use of this brownfield land and therefore improve its effectiveness. The policy provides for 30 dwellings and a maximum height of 3 storeys on this site. Contextually, it is noted that the NPPF encourages the following: Para 111 states policies should 'promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained and available sites could be used more effectively (for example converting space above shops, and building on or above service yards, car parks, lock-ups...'. Para 123: '..important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site' Para 123a 'policies...include the use of minimum density standards for city and town centres and other locations that are well served by public transport. These standards should seek a significant uplift in the average density of residential development within these areas, unless it can be shown that there are strong reasons why this would be inappropriate; To make the best use of land in a sustainable location, then a design led approach needs to be taken which makes the best use of land taking into account the context of the site. It is noted the policy provides an indicative dwelling yield and height limit. We would not wish to prejudge the eventual design solution on the site but note that the existing shopping centre exceeds 3 storeys and has buildings in different land uses. Whilst a simple 'storey height' limit is a helpful guide, when considering adjacent buildings, it is important to consider the roof pitch, floor to ceiling height and finished floor levels. As such, a well-designed building that exceeds 3 storeys should not be resisted if it makes the best use of land and relates well to the surrounding area. This in turn could potentially result in a higher dwelling yield.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Policy revised to ensure flexibility in design

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would improve its effectiveness and ensure consistency with national policy.

Your suggested revised wording of any policy or text:

The change proposed is as follows: a 'The quantity of housing proposed shall be broadly consistent with the indicative site capacity, unless a design led solution can justify a higher quantum c 'Building heights should be a maximum of 3 storeys, or should not exceed the height of the existing shopping centre' In our view, this does not change the fundamental aims of the allocation but delivers a degree of flexibility to ensure that any developments make the best use of land.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

New River Retail are promoting the site for development and whilst it supports the principle subject to policy wording changes, its presence at the hearing session would be beneficial to both answer questions from the Inspector and it advance its case for the changes.

3) Policy: HA37 - Former Locks Heath Filing Station

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

NRR support the principle of the proposed housing allocation. NRR are also currently consulting on the changes to the highways infrastructure that would be required to facilitate the delivery of this site, which could be brought forward quickly if the application is approved. This would fulfil part (g) of the draft policy. NRR's only request is to ensure that sufficient flexibility is built into the policy to allow for future applications to adapt their design to make the best use of this brownfield land and therefore improve its effectiveness. The policy provides for 30 dwellings and a maximum height of 3 storeys on this site. Contextually, it is noted that the NPPF encourages the following: Para 111 states policies should 'promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained and available sites could be used more effectively (for example converting space above shops, and building on or above service yards, car parks, lock-ups...'. Para 123: '..important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site' Para 123a 'policies...include the use of minimum density standards for city and town centres and other locations that are well served by public transport. These standards should seek a significant uplift in the average density of residential development within these areas, unless it can be shown that there are strong reasons why this would be inappropriate; To make the best use of land in a sustainable location, then a design led approach needs to be taken which makes the best use of land taking into account the context of the site. It is noted the policy provides an indicative dwelling yield and height limit. We would not wish to prejudge the eventual design solution on the site but note that the existing shopping centre exceeds 3 storeys and has buildings in different land uses. Whilst a simple 'storey height' limit is a helpful guide, when considering adjacent buildings, it is important to consider the roof pitch, floor to ceiling height and finished floor levels. As such, a well-designed building that exceeds 3 storeys should not be resisted if it makes the best use of land and relates well to the surrounding area. This in turn could potentially result in a higher dwelling yield.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Revision to the policy conditions to ensure there is flexibility in design

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure consistency with national policy and the effectiveness of the policy

Your suggested revised wording of any policy or text:

The change proposed is as follows: a 'The quantity of housing proposed shall be broadly consistent with the indicative site capacity, unless a design led solution can justify a higher quantum c 'Building heights should be a maximum of 3 storeys, or should not exceed the height of the existing shopping centre

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

New River Retail and promoting this site for development and support its allocation subject to changes to the wording to ensure flexibility. Its appearance would benefit the Inspector to answer questions and in order to advance its case for the changes.

4) Policy: HP5 - Provision of Affordable Housing

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

It is noted that this policy states that 35% of housing will be affordable on brownfield sites and in the case of sites located within the defined Fareham town centre boundary, it will only be 20% of dwellings. This level is based on the Local Plan Viability Assessment (2019), which in respect of Fareham town centre states: Discussion with the council has identified a number of recent schemes where both CIL liable and non-CIL liable schemes in Fareham town centre in particular have struggled to deliver and when coming forward have provided less than policy compliant affordable housing for viability reasons. For consistency, we consider that the approach should also apply to all other sites within the designated town and district centres.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Refer to other centres

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure consistency with the evidence base

Your suggested revised wording of any policy or text:

We propose that the 20% level also applies to other sites within defined the defined district centres

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

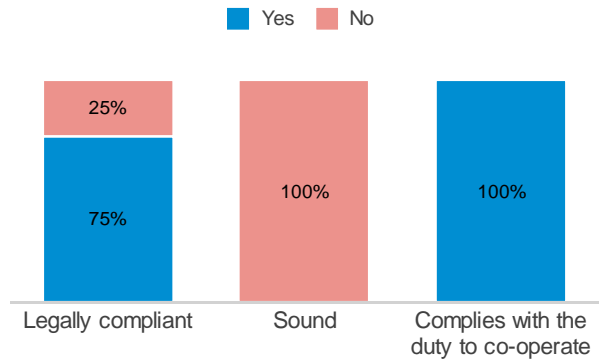

No, I don't want to take part in a hearing session

Agent: Mr Peter Keenan | Q A Planning Ltd

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

NRR support the principle of the proposed housing allocation. NRR are also currently consulting on the changes to the highways infrastructure that would be required to facilitate the delivery of this site, which could be brought forward quickly if the application is approved. This would fulfil part (g) of the draft policy. NRR's only request is to ensure that sufficient flexibility is built into the policy to allow for future applications to adapt their design to make the best use of this brownfield land and therefore improve its effectiveness. The policy provides for 30 dwellings and a maximum height of 3 storeys on this site. Contextually, it is noted that the NPPF encourages the following: Para 111 states policies should 'promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained and available sites could be used more effectively (for example converting space above shops, and building on or above service yards, car parks, lock-ups...)' Para 123: '..important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site' Para 123a 'policies...include the use of minimum density standards for city and town centres and other locations that are well served by public transport. These standards should seek a significant uplift in the average density of residential development within these areas, unless it can be shown that there are strong reasons why this would be inappropriate; To make the best use of land in a sustainable location, then a design led approach needs to be taken which makes the best use of land taking into account the context of the site. It is noted the policy provides an indicative dwelling yield and height limit. We would not wish to prejudge the eventual design solution on the site but note that the existing shopping centre exceeds 3 storeys and has buildings in different land uses. Whilst a simple 'storey height' limit is a helpful guide, when considering adjacent buildings, it is important to consider the roof pitch, floor to ceiling height and finished floor levels. As such, a well-designed building that exceeds 3 storeys should not be resisted if it makes the best use of land and relates well to the surrounding area. This in turn could potentially result in a higher dwelling yield.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Revision to the policy conditions to ensure there is flexibility in design

How would the modification(s) you propose make the Local Plan legally compliant or sound?

It would ensure consistency with national policy and the effectiveness of the policy

Your suggested revised wording of any policy or text:

The change proposed is as follows: a 'The quantity of housing proposed shall be broadly consistent with the indicative site capacity, unless a design led solution can justify a higher quantum c 'Building heights should be a maximum of 3 storeys, or should not exceed the height of the existing shopping centre

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

New River Retail and promoting this site for development and support its allocation subject to changes to the wording to ensure flexibility. Its appearance would benefit the Inspector to answer questions and in order to advance its case for the changes.

Respondent: Mr Robert Marshall (1812-4594)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This allocation is unsound as it would result in the loss of car parking for the Locks Heath District Centre (although the allocation simply refers to the site as a former petrol filling station it also encompasses a significant parking area for the Centre). A detailed assessment of this Centre was carried out in the Fareham Retail and Commercial Leisure Study: Update Report Litchfields 2020, a background paper to the Local Plan. This report refers to a large area of free surface parking adjacent to the Centre and says that this is one of its strengths. This is unsurprising because this centre, built in 1983, lies in an area known as the Fareham Western Wards developed in the 1970/80's and which, typical of that period, is highly car dependant. The loss of a substantial portion of the car park would thus be detrimental to the Centre's health and vitality. This would be contrary to Strategic Policy R1 of the emerging Local Plan which says that any development that would significantly harm the vitality and viability of a defined centre will not be permitted. It would also be contrary to the NPPF which seeks to ensure the vitality of town centres and which, although recognising the role that housing can play in such areas says that this must be on appropriate sites.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The allocation should be removed from the Local Plan

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined above to the health and vitality of the centre.

Your suggested revised wording of any policy or text:

B4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of othes.

Respondent: Mr Robin Webb (212-421914)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

This allocation takes over a significant portion of the Locks Heath Centre Car Park, as does HA36 which is represented separately. There is no evidence that the car park under-utilised. On the contrary, cars using the centre overflow inconveniently onto adjacent roads at the busiest periods. This allocation is without merit.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Delete HA37

How would the modification(s) you propose make the Local Plan legally compliant or sound?

Self evident

Your suggested revised wording of any policy or text:

See above

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Respondent: Mr Martin Ashdown (1612-431658)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The proposed allocation is not in alignment with policy R1. The proposed allocation will remove parking for the shopping centre and add additional housing units. Note also that some 800-1000 new units are proposed in the catchment areas so demand for access and parking will increase whilst it is already stretched at peak. Any reduction of parking will have a negative impact on usage of the Centre.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

Remove policy or require at least the same number of parking spaces removed to be reinstated in new development

How would the modification(s) you propose make the Local Plan legally compliant or sound?

.

Your suggested revised wording of any policy or text:

.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

Keely, Lauren

Dear Sir/ Madam,

I am attaching my response to the Local Plan. I tried to do this on a form but was unable to find a way of filling one in on a computer. I hope I have included all the necessary details.
If not please get in touch.

Yours faithfully

Anne Stephenson

[REDACTED]

Fareham Local Plan Representation:

Please note I tried to fill in an on line form but none of the links seemed to work or took me to a form which I couldn't type on to. I am therefore emailing my comments on a word document. If there is anything that is unclear then please get in touch.

A1: No Agent

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

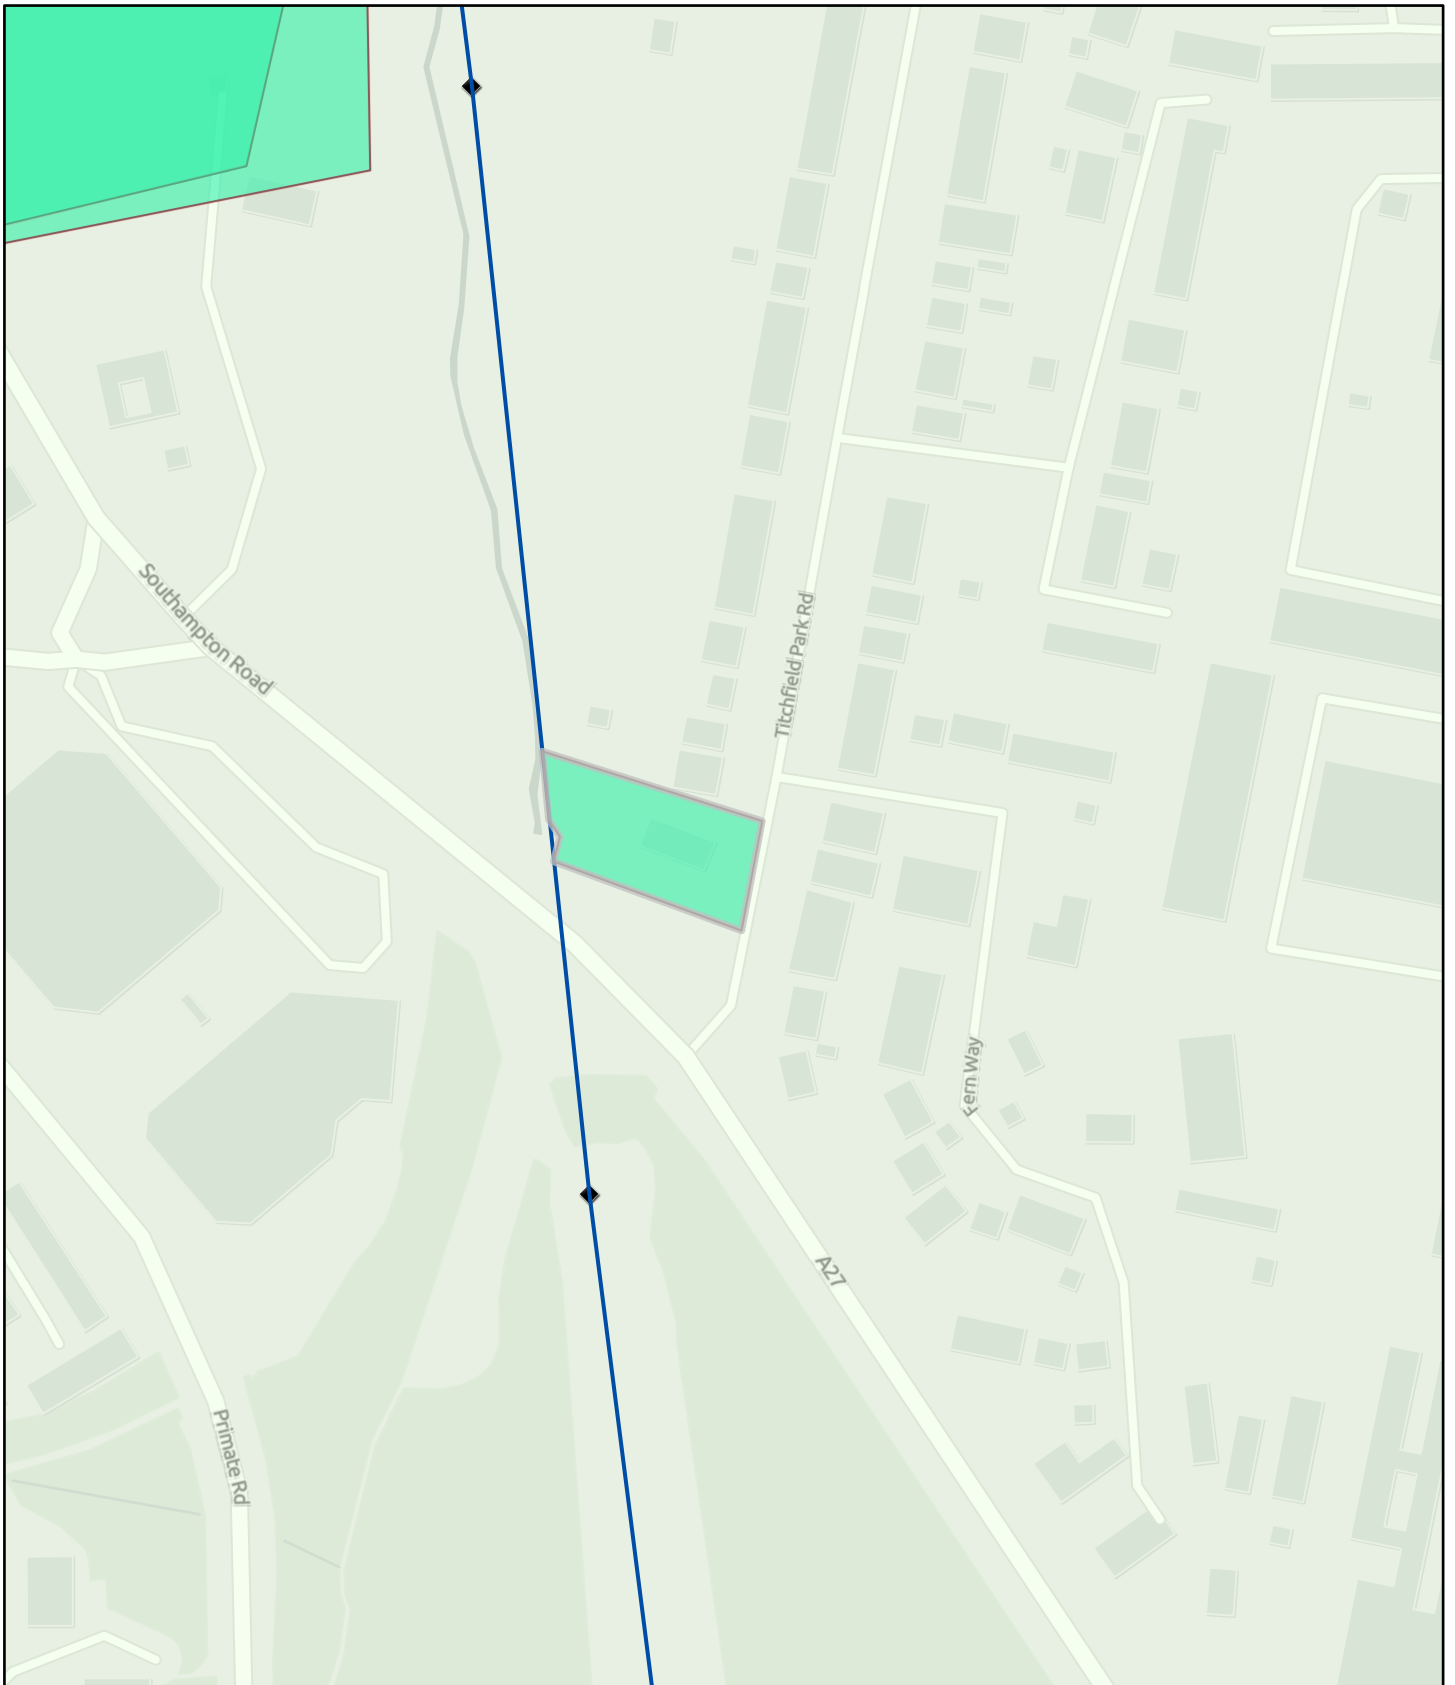

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

Dear Sir/Madam,

Regulation 19 Local Plan Consultation (6th November – 18th December 2020)

Thank you for your consultation dated 06 November 2020 which was received by Natural England on the same date.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Natural England welcomes the Council's approach to achieving sustainable development through its Local Plan, particularly through its suite of Natural Environment policies that include protection of internationally, nationally and locally designated sites, the enhancement of the local ecological network and the requirement for biodiversity net gain.

Our comments on the Regulation 19 Local Plan and supporting Habitats Regulations Assessment (HRA) and Sustainability Appraisal (SA) are made below.

Strategic Policy DS1: Development in the Countryside

It is recommended this Policy also requires proposals to ensure compliance with Natural Environment policies, in particular Strategic Policy NE1 and Policy NE2, to ensure impacts on nature conservation interests are properly considered and addressed, and biodiversity net gain is achieved (for applicable development).

With regards to soils, the local plan outlines that 'the benefits of protecting the Best and Most Versatile (BMV) agricultural land are considered against the need for development'. This Policy requires development proposals to demonstrate they 'Conserve and enhance landscapes, sites of biodiversity or geological value and soils'.

The National Planning Policy Framework sets out that:

'Plans should: distinguish between the hierarchy of international, national and locally designated sites; allocate land with the least environmental or amenity value, where consistent with other policies in this Framework¹; take a strategic approach to maintaining and enhancing networks of habitats and green infrastructure; and plan for the enhancement of natural capital at a catchment or landscape scale across local authority boundaries.'

1 Where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality.

It is recommended that this Policy is amended to give appropriate weight to the roles performed by the area's soils. These should be valued as a finite multi-functional resource which underpin our wellbeing and prosperity. Decisions about development should take full account of the impact on soils, their intrinsic character and the sustainability of the many ecosystem services they deliver. The plan should safeguard the long term capability of BMV agricultural land (Grades 1, 2 and 3a in the Agricultural Land Classification) as a resource for the future.

Where site allocations are sited on BMV land, the Plan should outline a requirement for the protection of soils during construction where possible, referencing the '[Defra Code of practice for the sustainable use of soils on construction sites](#)'.

Strategic Policy DS3: Landscape

Natural England welcomes the proposed designation of eight Areas of Special Landscape Quality within the Borough, and the requirement for development in these areas to meet stringent criteria that seek to protect and enhance landscape.

Strategic Policy CC1: Climate Change

Natural England advise all Local Plans consider climate change adaption and recognise the role of the natural environment to deliver measures to reduce the effects of climate change, for example tree planting to moderate heat island effects. In addition factors which may lead to exacerbate climate change (through more greenhouse gases) should be avoided (e.g. pollution, habitat fragmentation, loss of biodiversity) and the natural environment's resilience to change should be protected. Green Infrastructure and resilient ecological networks play an important role in aiding climate change adaptation.

Natural England welcomes Strategic Policy CC1: Climate Change that promotes mitigation and adaptation to climate change through various methods including the integration of green and blue infrastructure into the design of developments, adopting higher water efficiency standards, the integration of energy efficiency, renewable and low carbon technologies into all development, and reducing reliance on car travel.

Natural England supports the embedding of policy that will deliver measures to increase sustainability of development over the Plan period. This should also include reducing consumption of raw natural resources, sourcing more renewable or 'green' energy, and reducing waste. Consideration should be given to the collection of financial contributions from development to offset residual carbon emissions elsewhere in the Borough. Consideration can also be given to the retrofitting of existing development with technology that improves energy and water efficiency.

It is recommended that Local Plan policy also seeks measures that help natural habitats across the Borough adapt to the effects of climate change. We would encourage you to refer to the Natural England and RSPB [Climate Change Adaptation Manual](#) and look at the step by step approach to identifying the climate resilience of habitats that occur in the Borough. Consideration should be given to addressing issues on habitats and protected sites that will be exacerbated by climate change, such as flooding, drought, reduction of water resources etc.- the Manual can also help identify these.

Consideration can be given to delivering specific projects within the Borough. For example, to maximise climate change adaptation and mitigation through the establishment of a Nature Recovery Network (NRN), and the Local Nature Recovery Strategy in which the NRN would sit, to ensure climate change resilience at their core. Such projects could potentially benefit from carbon offsetting contributions from development over the local plan period.

Such an approach could link into other aspects of the Plan such as water and air quality, nutrient mitigation for Solent European designated sites, delivery of biodiversity net gain, natural flood management, and green infrastructure implementation among others. Natural England would be happy to advise further on this aspect.

Policy CC2: Managing Flood Risk and Sustainable Drainage Systems

Natural England welcome this Policy that requires development ensures flood and surface drainage are properly addressed, and that Sustainable Drainage Systems (SuDS) are designed in accordance with CIRIA C753 SuDs Manual, to be as 'natural' as possible.

It is advised that the policy makes clear that where a development drains to a protected site(s), an additional treatment component (i.e. over and above that required for standard discharges), or other equivalent protection may be required to ensure water quality impacts are avoided.

Where SuDS are proposed serving as mitigation for protected sites, development should ensure that appropriate resources are put in place to ensure their long-term (in perpetuity) monitoring, maintenance/replacement, and funding.

Policy CC3: Coastal Change Management Areas (CCMAs)

Sea level rise and coastal change are inevitable and bring both challenges and opportunities for people and nature. Sustainable coastal management needs to embrace long-term change and achieve positive outcomes for both.

Policy CC3 identifies that the North Solent Shoreline Management Plan (SMP) policy for the majority of Fareham Borough's coastline is 'Hold the Line', and identifies two CCMAs between Hook spit and Meon Shore, with an identified coastal management policy of 'No Active Intervention'. The Policy will ensure that development in these areas will appropriately consider coastal change. It also will ensure replacement coastal defence schemes 'are consistent with the relevant Shoreline Management Plan and that there will be no severe adverse impact on the environment, the English Coast Path, and the rights of way network'.

We would advise that the Local Plan should also help facilitate the relocation of valued environmental assets away from areas of risk.

Strategic Policy NE1: Protection of Nature Conservation, Biodiversity and the Local Ecological Network

Natural England welcomes this policy that sets out clearly the hierarchy of nature conservation and the requirement for development to 'demonstrate clearly that the mitigation hierarchy has been followed' in terms of avoiding, mitigating or compensating (as a last resort) impacts on biodiversity. Natural England welcomes the Local Ecological Network (LEN) approach that has been included in the local plan.

It is helpful that the LEN and the Council's Green Infrastructure Strategy have been suggested as tools to provide opportunity for enhancements across the Borough. Please read our comments below in relation to Policy NE2 that regards the choosing of suitable opportunities for biodiversity enhancement.

Policy NE2: Biodiversity Net Gain

Natural England is fully supportive of the inclusion in the local plan of a Policy for biodiversity net gain. It is welcomed that the policy refers to the benefits to Borough residents from the ecosystem services that being close to nature provides, and outlines an expectation that offsite net gain must be sought as close to the development as possible. However in some instances this may be difficult, and Natural England recommends that consideration is given to developing a suite of projects across the LEN that development within the Borough can contribute to thereby ensuring the biodiversity within the Borough is protected and enhanced. For example, partners that manage Local Nature Reserves and Sites of Importance for Natural Conservation in the Borough could submit projects to the local planning authority to enhance the ecological value of these sites. These projects could be funded by development that requires offsite compensation or additional enhancements to achieve biodiversity net gain. This approach can also be used by development with limited opportunities for biodiversity net gain on-site.

The Policy outlines that the Council may prepare and adopt a Supplementary Planning Document (SPD) for Biodiversity Net Gain. Due to the need to ensure net gain is delivered in a suitably

strategic way, and having regard to the timescales of the legislative requirement for net gain and further national guidance, Natural England would support the development of such an SPD and would encourage Policy NE2 to outline this as a clear intention of the Council, in order to provide further guidance and support to aid sustainable development across the borough. Natural England will be happy to advise further to aid the development of such an SPD.

- *Calculating net gain*

Please note that Biodiversity Metric 3.0 is due to be published early 2021, which will supersede [Biodiversity Metric 2.0](#). We advise that the Policy is updated accordingly and that this metric is used to measure gains and losses to biodiversity resulting from development, and implement development plan policies on biodiversity net gain.

Please note that although the Policy includes 'nesting and roosting features' as suggestions for achieving net gain, it is our advice that features such as bird and bat boxes, swift bricks, bee hotels etc should be classed as general biodiversity enhancements that should be included as part of a wider biodiversity enhancement and mitigation plan. Net gain specifically should derive strictly from habitat enhancement and creation, required as calculated using the metric.

- *Wider environmental gains*

The reference to seeking wider environmental gains, for example to address water/air quality, flooding, climate change etc. is welcomed. Opportunities for environmental gains, including nature based solutions to help adapt to climate change, might include:

- Identifying opportunities for new multi-functional green and blue infrastructure.
- Managing existing and new public spaces to be more wildlife friendly (e.g. by sowing wild flower strips, changing cutting regime of open spaces and road verges*) and climate resilient
- Planting trees, including street trees, characteristic to the local area to make a positive contribution to the local landscape.
- Improving access and links to existing greenspace, identifying improvements to the existing public right of way network or extending the network to create missing footpath or cycleway links.
- Restoring neglected environmental features (e.g. a hedgerow or stone wall or clearing away an eyesore)
- Designing a scheme to encourage wildlife, for example by ensuring lighting does not pollute areas of open space or existing habitats

*Please see this [paper](#) regarding cost-effective and low-maintenance management for species-rich grassland on road verges and the value it can contribute to biodiversity and ecosystem services.

Please note that Natural England and Defra are developing an Environmental Net Gain/metric for Natural Capital Net Gain that can be used in conjunction with the Biodiversity Metric (but not instead of). Further information will be available in 2021.

- *Monitoring of net gain*

Your plan should include requirements to monitor biodiversity net gain. This should include indicators to demonstrate the amount and type of gain provided through development. The indicators should be as specific as possible to help build an evidence base to take forward for future reviews of the plan, for example the total number and type of biodiversity units created, the number of developments achieving biodiversity net gains and a record of on-site and off-site contributions.

LPAs should work with local partners, including the Local Environmental Record Centre and wildlife trusts, to share data and consider requirements for long term habitat monitoring. Monitoring requirements should be clear on what is expected from landowners who may be delivering biodiversity net gains on behalf of developers. This will be particularly important for strategic housing allocations and providing as much up front information on monitoring will help to streamline the project stage.

Policy NE3: Recreational Disturbance on the Solent Special Protection Areas (SPAs)

Natural England welcome this policy that will require new residential development to address in-combination effects on the Solent SPAs via recreational disturbance. It is recommended the Policy also outlines that other types of development (such as new hotels, student accommodation, care homes etc.) may also need to address recreational disturbance impacts, both alone and in-combination. Such development should be assessed on a case by case basis.

Policy NE4: Water Quality Effects on the Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar Sites of the Solent

Natural England welcome this policy that will require new development that propose a net increase in overnight accommodation to address in-combination effects on the Solent designated sites via eutrophication from nutrients in wastewater.

Policy NE5: Solent Wader and Brent Goose Sites

Natural England welcome this policy that will require development to address effects on sites identified by the Solent Wader and Brent Goose Strategy (SWBGS) which serve as functionally linked land to the Solent SPAs.

It is recommended that the following wording within the Policy “*Sites which are used by Solent Waders and/or Brent Geese (as shown on the Policies map)*” is amended to read “*Sites which are used by Solent Waders and/or Brent Geese (as identified within the most up to date version of the Solent Wader and Brent Goose Strategy)*” to take account of any changes to sites and their distribution across the Borough, as these updates can be implemented at irregular times. Any further references to the Policies map should be similarly amended to refer to the SWBGS mapping.

Core Areas – due to their essential function within the SWBG network, it is advised these sites are identified for protection by the Policy. Any development that would result in impacts to a Core Area will need to be carefully assessed on a case-by-case basis. There are limited options where the function of a Core site can be fully replicated elsewhere in terms of its suitability and appropriate locality; where such land is available, an assessment of replicability will need to be undertaken through discussions with Natural England and the Local Planning Authority.

Financial contributions – it is welcomed that the Policy outlines that financial contributions proposed as mitigation will be used for the management and enhancement of an ‘agreed suitable identified site for Solent Waders and Brent Geese’. Such proposals should demonstrate how such funds will be used to enhance, manage and monitor sites within the wider Solent Waders and Brent Geese network, in perpetuity. It is suggested that the Council works with relevant partners/stakeholders, including cross-boundary partnerships, to develop a strategic project(s), such as a bird reserve, and/or list of projects to enhance, manage and monitor the wider Solent wader and brent goose ecological network, to which contributions can be directed.

Policy NE6: Trees, Woodland and Hedgerows

Natural England welcomes this Policy that seeks to protect and enhance trees, woodland and hedgerows within the Borough. It is recommended that this Policy requires development proposals that affect ancient woodland, ancient trees and veteran trees, to ensure they are in line with [standing advice](#) published by Natural England and the Forestry Commission.

Policy NE8: Air Quality

It is welcomed that the Policy recognises that ‘poor levels of air quality can also lead to environmental issues’. The Policy includes a need for planning applications to consider if they will have a ‘potential adverse effect on biodiversity, especially where it would affect sites designated for their biodiversity value’.

The Policy outlines that the Local Plan HRA concludes the Plan ‘would not have a likely significant effect on the internationally important habitats and species present in the area’. As this issue has

been considered within the HRA appropriate assessment, the wording here should be amended to use the correct terminology under the Habitats Regulations, i.e. the HRA concludes the Plan will not result in an 'adverse effect on integrity' (the term 'likely significant effect' is used at the screening stage of the HRA). See further comments on air quality below in regards to the Local Plan HRA.

Policy NE9: Green Infrastructure

Natural England welcomes this Policy that seeks to fully integrate green infrastructure (GI) into development and maximise opportunities to connect to the wider environment. The provision of enhanced green infrastructure and sites of nature conservation value can not only help address some of the mental and physical health problems that are experienced in the Borough's population, but can also benefit society in other ways including improvements to local air and water quality, reducing the risk of flooding, alleviating noise levels and aiding climate change adaptation.

Policy NE10: Protection and Provision of Open Space

This Policy references protection of public rights of way. Natural England advises that the Policy should also seek to secure enhancement of public rights of way and National Trails, as outlined in paragraph 98 of the NPPF. Recognition should be given to the value of rights of way and access to the natural environment in relation to health and wellbeing and links to the wider green infrastructure network. It is welcomed the plan seeks new access opportunities; it should seek to link existing rights of way where possible. The plan should avoid building on open space of public value as outlined in paragraph 97 of the NPPF.

It is welcomed that the Policy makes provision for appropriate quantity and quality of green space to meet identified local needs (as outlined in paragraph 96 of the NPPF) based on Natural England's work on [Accessible Natural Greenspace Standard \(ANGSt\)](#) in assessing the level of accessible natural greenspace; it is also welcomed that it recognises development may be required to 'provide more open space above what is required by the standards to make the development more acceptable'.

Policy D1: High Quality Design and Place Making

Natural England welcomes this Policy that requires the design of developments to integrate existing and new habitats and biodiversity within a coherent and well managed, connected structure. It is advised that landscaping of developments and open spaces seeks to use appropriate native and locally sourced species as far as possible to cater for local wildlife.

Policy D4: Water Quality and Resources

Natural England welcome this policy that seeks to conserve water and improve its quality.

Southern Water's Water Resources Management Plan (WRMP) 2019, that covers the planning period 2020-2070, projects a significant supply demand deficit during periods of drought in the Western Area, and commits to implementing a long term water resources scheme to restore the supply demand balance whilst avoiding and/or mitigating impacts on European sites, including the River Itchen SAC.

It is Natural England's advice that in advance of any permitting of such a suitable long term scheme, uncertainty remains with regards to water resources and the impacts of abstraction on protected sites.

Although it is welcomed that Policy D4 requires a water consumption for new dwellings of no more than 110 litres per person per day, Natural England strongly recommend all new development within the Southern Water supply area adopt a higher standard of water efficiency of 100 litres/per person/day, including external water use and re-use, in line with Southern Water's Target 100 demand reduction programme which is committed to within their WRMP19. Natural England also recommends that the Policy encourages the wise use of water in conjunction with the water companies, for example by developments incorporating grey water recycling systems and efficient appliances

Please see Natural England advice above in relation to Policies NE4 and Policy CC2 with regards to nutrients and surface water treatment via SuDS.

Neighbourhood Plans

Currently there are no Neighbourhood Plans in the Borough, but the Local Plan provides a 'strategic evidence base' which will inform any future Neighbourhood Plans.

It is recommended that any future Neighbourhood Plans which allocate housing should also identify spaces for environmental enhancement, for the purpose of offsetting environmental impacts, e.g. through the designation of Local Green Spaces. Such a local approach could give communities more ownership over such green spaces and provide a more strategic route to addressing common environmental impacts from development in that area, such as air and water pollution, habitat and species loss and increased carbon emissions, and could deliver biodiversity net gain and nutrient offsetting.

Such spaces could include the development of community orchards and play areas, woodlands and nature reserves, and serve a variety of functions that benefit both nature and the local community, for example providing benefits to health and wellbeing, offsetting nutrient discharges from allocated development and providing further scope for carbon sequestration.

Specific comments on Housing Allocation Policies

- HA9 - Heath Road (70 dwellings)

It is acknowledged this allocation site has resolution to grant permission for 70 dwellings. It is recommended this Policy includes the requirement to secure an appropriate level of offsite compensation to address the loss of secondary woodland on site which may in parts qualify as lowland mixed deciduous woodland habitat.

- HA29 - Land East of Church Road (20 dwellings)

Much of this site shows as Lowland Mixed Deciduous Woodland priority habitat on the Ecological Network mapping for Hampshire. Part of the site is designated as a Site of Importance for Nature Conservation (SINC) according to the Policy map. The Policy outlines a requirement for ecological mitigation for the site-specific construction and operational impacts of a development proposal. It is advised the Policy outlines a requirement to secure an appropriate level of offsite compensation to address any loss of priority habitat on site to ensure compliance with Policy NE1.

- HA31 - Hammond Industrial Estate (64 bed care home)

The Policy should ensure the impact of nutrients in wastewater is addressed to ensure compliance with Policy NE4.

- HA37 - Former Locks Heath Filling Station (30 dwellings)

This site is adjacent to an area of Lowland Mixed Deciduous Woodland priority habitat as shown on the Ecological Network mapping. The Policy should ensure that impacts on priority habitats and protected species are taken into account and appropriately addressed.

- HA38 – 68 Titchfield Park Road (9 dwellings)

The site is adjacent to Sylvan Glade SINC, much of which is ancient semi-natural woodland. The Policy should ensure compliance with standing advice on ancient woodland, ancient trees and veteran trees and that impacts on the SINC and protected species are appropriately addressed.

- HA42 - Land South of Cams Alders (60 sheltered housing)

This allocation site is located on 'Fort Fareham Grassland' SINC that supports woodland and meadow communities. It also lies adjacent to Fort Fareham SINC known for supporting wet woodland communities.

As previously advised in our response to the Supplement to the Reg 18 Local Plan (letter dated 23rd April 2020), allocations and development proposals should ensure they engage the mitigation

hierarchy, where impacts on designated ecological sites/features should first be avoided, and where not possible, adequately mitigated. Where this is not possible, any loss of priority habitat should be appropriately compensated. All residual ecological impacts will need to be addressed before any net gain for biodiversity can be achieved.

Natural England recommends that where loss of SINC habitat cannot be avoided, the policy should make clear how requirements set out within the NPPF, NERC Act 2006 and Local Plan Natural Environment policies will be met. It is advised an appropriate level of offsite compensation should be required to address any loss of priority habitat on site to ensure compliance with Policy NE1 .

- E4: Solent 2 (Employment - 23,500 sq. metres)

This employment allocation is located on Whiteley Meadow - Plot 2184 SINC and Ashley Wood, Fareham SINC. The Hampshire Ecological Network Mapping dataset shows much of this area as Lowland Mixed Deciduous Woodland, a priority habitat listed as required under Section 41 of the Natural Environmental and Rural Communities Act 2006. The site is also situated adjacent to the Gull Coppice (South-West Remnant) SINC which comprises ancient semi-natural woodland.

It is acknowledged that this site is an existing allocation within the adopted Fareham Local Plan Part 2 (2015). The current Policy outlines a requirement for this development to protect existing woodland and avoid habitat severance, and appropriate mitigation and compensation for any loss of protected trees. However, it is our view that a significant area of habitat, including mature woodland, is likely to be lost as a result of development. The Policy should ensure that it is compliant with Strategic Policy NE1 with regards to impacts on the local ecological network in this locality. In line with existing national and local policy and legislation, it is Natural England's advice that the mitigation hierarchy of avoid, mitigate and lastly compensate is employed where considering impacts on these habitats, particularly those designated as SINC. Measures should be sought to protect and enhance the local ecological network. Where impacts cannot be avoided or adequately mitigated, a comprehensive compensation package should be required that addresses the loss of all priority habitat on site (rather than just specifying protected trees), that seeks to enhance and connect habitat in the locality.

Comments on the HRA

Natural England notes that your authority, as competent authority, has undertaken an appropriate assessment of the Local Plan in accordance with regulation 63 of the Conservation of Species and Habitats Regulations 2017 (as amended). Natural England is a statutory consultee on the appropriate assessment stage of the Habitats Regulations Assessment process.

We have the following comments on the HRA:

- *Recreational disturbance – New Forest designated sites*

The Local Plan HRA screening assessment outlines that although the Borough falls within the 25km buffer of the New Forest designated sites (via a straight line), the minimum actual travel distance by car is of approximately 30km travel distance (via the M27). In comparison to the number of visits from residents closer to the New Forest, the assessment states 'visits to the New Forest SAC/SPA/Ramsar associated with increased housing development in Fareham Borough contribute a significantly lower proportion of overall visits to the designated sites and it is not considered likely that significant effects associated with recreational disturbance from Fareham housing development would arise'. The HRA screens this impact pathway out from an appropriate assessment on this basis.

It is understood Footprint Ecology are currently conducting further analysis on several aspects of their latest visitor surveys. This analysis will assist the definition of a robust catchment area for recreational impacts. It will help in the preparation of a strategic, cross-boundary approach with neighbouring competent authorities to deliver habitat mitigation for the New Forest SPA/SAC/Ramsar. This work is due to be completed shortly and will provide a useful update to the evidence base against which such impacts from new development from surrounding local authority areas can be assessed.

Therefore, whilst acknowledging that the level of additional impacts from new residents is known to significantly decrease with distance from the New Forest designated sites, Natural England consider at this time there remains some uncertainty with regard to the evidence confirming the level of additional impacts from new residents of Fareham local plan development. We therefore advise this issue is taken forward to the appropriate assessment stage where further work may be carried out to ascertain the level of impacts as accurately as possible.

Where impacts are identified, suitable and proportionate mitigation should be proposed; we recommend the Council works with the New Forest National Park Authority and the other partner authorities to develop a strategic approach to addressing recreational impacts from new development on the New Forest designated sites. Such an approach should include developer contributions towards the New Forest National Park Authority's Habitat Mitigation Scheme to enable the authority to deliver site specific mitigation measures on behalf of applicants.

Natural England will be happy to provide further advice to the Council on this aspect as the evidence base develops.

- *Air quality*

The Local Plan is supported by an Air Quality Habitats Regulations Assessment (Ricardo, Sept 2020). The conclusions drawn in the Local Plan HRA in regards to air quality impacts are based on those drawn within the Ricardo report. Natural England concurs with the conclusions drawn in the report.

The Ricardo report suggests that the Council regularly reviews the Defra airborne NOx forecast levels. This is welcomed as a way to ensure any changes in forecasting and potential consequential changes to conclusions drawn in the report for this pollutant can be appropriately reviewed and addressed during the local plan period.

- *Water quality – nutrients*

The HRA calculates a nitrogen budget for the local plan of 2536.99 kgTN/yr. Appendix III of the HRA outlines various mitigation schemes that can be utilised or progressed as a means to ensure nutrient neutrality can be delivered by new development.

The HRA states within its Summary of Findings that the sites Chichester and Langstone Harbours SPA/Ramsar, Portsmouth Harbour SPA/Ramsar and Solent and Dorset Coast SPA are screened out of an appropriate assessment in relation to water pollution impacts. Much of development within Fareham borough is served by Peel Common wastewater treatment works (WwTW), which is a coastal WwTW that discharges effluent several kilometres out into the Solent. It is our advice that long-shore outfall pipes are likely to have shifted and widened the distribution of nitrogen loading within the effluent across the Solent SAC and SPAs. It is important to recognise the loading from Peel Common WwTW contributes to a number of estuaries and catchments within the Solent (including Portsmouth Harbour, Langstone Harbour, Chichester Harbour, River Meon, Wootton Creek and the Medina Estuary catchments). It is therefore Natural England's view that, because of this wide distribution of nitrogen loading, all designated sites should be screened in.

- *Other comments on the HRA*

Section 7.7.3 – this paragraph refers to the 'SAC' although it is relating to Portsmouth Harbour SPA and Ramsar.

Comments on the SA

We are broadly satisfied that the objectives and indicators within the Sustainability Appraisal cover our key interests, and welcome the identification of the need to conserve and enhance biodiversity, landscape character, and to reduce pollution. We also welcome the need to address minimise the

effects of climate change, and to minimise impacts on best and most versatile agricultural land. Please see some more specific comments below.

- SA5: To Minimise Carbon Emissions and Promote Adaptation to Climate Change

This SA objective to address the effects of climate change is welcomed. It is suggested a further monitoring parameter(s) is included to monitor the implementation of new GI/habitat that can seek to alleviate the pressures of climate change on species and the ecological network whilst also providing other benefits as described further in our advice above; e.g. percentage of new GI/ extent of priority habitat within the ecological network.

- SA7: To Conserve and Enhance Biodiversity

We advise that this SA objective also seeks to conserve and enhance geodiversity within the Borough, in line with national planning policy.

The SA outlines the Plan 'is predicted to lead to negative impacts to ecological receptors in the short to medium term, but many of these impacts are capable of being mitigated. Long-term effects are likely to be both positive and negative, and highly site-specific'. It is acknowledged these effects can be avoided/mitigated by the implementation of several policies including NE1, NE3, NE4 and NE5. It is advised Local Plan Policy requires relevant development to carry out site-level Habitats Regulations Assessments in order to ensure impacts on European sites are suitably addressed.

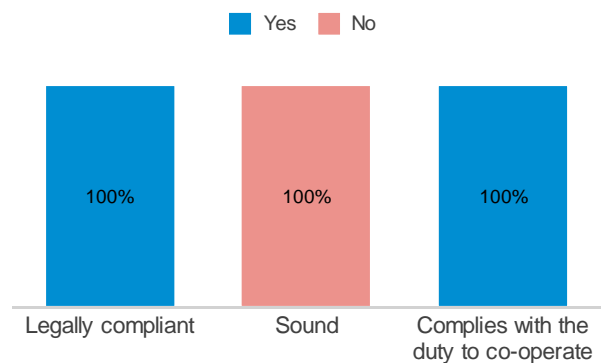

It is also suggested that further monitoring parameters are incorporated to ensure impacts on internationally, nationally and locally designated sites are monitored throughout the Plan period, e.g. via the number, extent and condition of sites designated for nature conservation. We would advise the use of a green infrastructure standard as an indicator, such as Natural England's Accessible Natural Greenspace Standard (ANGSt). Parameters for measuring the implementation of net gain should be introduced, see further above for our advice on net gain monitoring.

We would be very happy to comment further as the plan process progresses. If you have any queries relating to the detail in this letter please contact me on 07787005505.

Yours faithfully

Rebecca Aziz
Sustainable Development Senior Advisor
Thames Solent Area Team

	Legally compliant	Sound	Complies with the duty to co-operate
Total	1	1	1
Yes	1 100%	0 0%	1 100%
No	0 0%	1 100%	0 0%

Respondent: Mr Robert Marshall (1812-4594)

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This is a sound site for housing in locational terms. However, the site appears too small to accommodate the indicative yield of 9 dwellings without unacceptable tree loss and harm to the living conditions of those directly to the north. There would thus be conflict with NPPF requirements that: planning should ensure that developments add to the overall quality of the area and be sympathetic to local character (NPPF para 127); and on the social objective of ensuring a well- designed environment.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The allocation should either be withdrawn from the Plan or alternatively the indicative yield deleted or substantially reduced in number.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b Prevent the harm outlined in B3 above.

Your suggested revised wording of any policy or text:

B4c. See above - potentially the removal of the indicative yield or its revision downwards.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

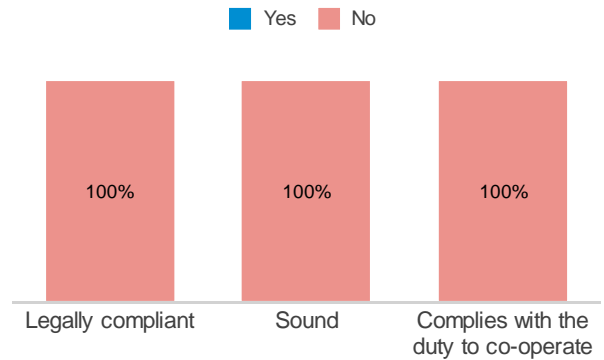

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

	Legally compliant	Sound	Complies with the duty to co-operate
Total	1	1	1
Yes	0 0%	0 0%	0 0%

Respondent: MRS PENNY SYMONS (1412-25179)

Legally compliant	No
Sound	No
Complies with the duty to co-operate	No

Please provide details you have to support your answers above

This is agricultural land and should be left as such - especially as so many houses have already been given pp in this immediate area. Too much traffic etc.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

countryside

How would the modification(s) you propose make the Local Plan legally compliant or sound?

keep as countryside

Your suggested revised wording of any policy or text:

keep as open space /countryside.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

No, I don't want to take part in a hearing session

A2: Personal details

Ms

Anne

Stephenson

All representations are about whether the policy is Sound

Strategic Priorities

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

1) Policies map: HOUSING ALLOCATIONS (HA1, HA3-4, HA7, HA9-10, HA12-13, HA15, HA17, HA19, HA22-24, HA26-44)

Legally compliant	Yes
Sound	Yes
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

The land the subject of Allocation HA40 is bounded by Northfield Park to the east, the Garden of Rest to the south and Down End Farm to the west. Notwithstanding the dismissed appeal re P/18/0005/OA, the allocation of Down End Farm for housing development has been re-affirmed. The Agricultural Land Assessment undertaken by Geo-Environmental asserted that this site is Grade 3b ie it is not 'Best and most versatile land' Residents of Northfield Park enjoy safe and convenient access to a 'Premier' convenience store (just five minutes walk away to the east) for the purchase of newspapers and provisions, a 'Tesco Express' store and 'The Seagull' public house just 4 minutes walk to the south, and the Westlands Medical Centre (11 minutes walk to the southeast). Portchester train station is 12 minutes walk away to the east, while Dore Avenue forms part of the route followed by the 'First' bus service that takes passengers southeast to Portchester district centre and then east to Cosham district centre via Paulsgrove. Northfield Park is a sustainable location for aged-persons' park homes. Northfield Park and Eleanor's Wood (to the west of Dore Avenue, Portchester) together comprise 71 residential park homes and the park rules require that "All persons residing on the park must be 55 years of age or over." Turnover rates are low (only 30 have changed hands since 2013) but demand is consistently high, especially from local people who wish to retain their independence by down-sizing to a home with reduced maintenance liabilities, within an established aged-persons community. The majority of the new residents have come from local post-code areas (PO2, PO7, PO12, PO16), with a small number from further afield (eg Bristol, Middlesex) that wished to spend their retirement years close to relatives. Mrs Trimmings wishes it to be made known that she wholeheartedly supports Housing Allocation HA40 and would be pleased to bring forward the proposal for 22 aged-persons park homes at the earliest opportunity.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To confirm Mrs Trimmings' wholehearted support for Housing Allocation HA40.

Subject: Fareham Local Plan 2037

Follow Up Flag: Follow up
Flag Status: Flagged

For Fareham Planning Department.

I must first recognise how much thought and work has gone into the Plan, and it reads well. Congratulations to the authors, who know their subject in such detail. Most of it I agree with, without reading every word, but comments have been invited.

Strategic Priorities. Para 2.21 (5). I think a vibrant future for the town centre might be positive with increased housing, ie FTC1, FTC2 and FTC6, but all these developments remove some existing parking space, or add to a car parking problem. If there is no new parking, where will out of town shoppers park their cars? Perhaps hidden within the text is an assumption that FBC can do nothing to halt changes to the retail trade: from increased IT shopping, click and collect, and the demise or closure of retail chains and local businesses. This was happening before the Covid19 outbreak, but has become much worse. So will people come from outlying communities like Stubbington, as they will not be able to buy what they want in Fareham anyway. I believe FBC will have to consider lowering business rates to counter balance lower footfall, or give help with high rents to encourage more local shops and businesses. Maybe entertainment options might bring some life to the centre. Whiteley is the main shopping centre for Fareham now, which unfortunately comes under Winchester. I would suggest that para 2.21 needs greater vision if the town centre is to survive, albeit in a different form than today.

Strategic Gap. Para 3.9 and 3.10. Para 3.9 reads positively, but 3.10 says 'a redefinition' does not preserve the size or shape of the existing. This is reinforced when read in conjunction with para 3.44 'spatial definition tightened', and 'redrawing boundaries' in para 3.46. I fear for the future of Strategic Gaps when referring back to Strategic Growth Areas in para 3.20: are these potential new SGAs, or a yet again redefinition of Strategic Gaps? My confidence in the existing SGs being retained is seriously diminished, and these conflicting phrases do not create trust in the FBC future decision making on this topic.

On this same topic of the boundaries of the Meon SG, I would greatly appreciate having or seeing a map of the Meon SG area, as my house backs on to open fields looking west to the river. This would help me to comment on any future development submission which involves land on the east side of the river along Old St and further north to Titchfield Road. Thank you.

Housing Allocation Policy HA3. What will happen to the existing business within this development outline?

Housing Allocation Policy HA41. I read this with interest, as it is local to me. A very interesting development, original thinking. But where will the residents park their cars without denying existing shoppers? And how will they be able to recharge batteries as there is no parking at the back of the existing building?

Employment. Two development sites are on Solent airfield, and the third at Whiteley. None of these is served by any form of public transport, so private transport will be essential. Does this fit with climate change? Or is it assumed e-vehicles of one sort or another will be commonplace after 2037? But in the meantime? Any thought about discussing new or revised bus routes with the bus companies?

Air Quality and Transport. Reading these as a current and topical issue worldwide, the policies read well, yet I feel quite strongly that there is something the FBC can do (other than address the issue for future planning applications) to reduce existing levels of pollution. Why not plan for the Strategic Gap between Fareham and Stubbington/Hill Head/Lee to be heavily planted with trees in the spaces between the new by-pass and existing dwellings to lower Co2 levels? This would help the environment, nature, keep communities separate, provide recreation space for good mental health, and improve air quality, all in the one exercise. More trees throughout the borough is already being studied, I understand. Central government will set the pace for reducing fossil fuel emissions, phasing out petrol and diesel. I feel the cost of e-vehicles will be prohibitive compared with existing cars, so the number of vehicles may fall. This will drive the need for better public transport. Locally, this should be a much better bus service, not just a

trunk route service as we have today in Stubbington. But I doubt that any bus service could meet the needs of the elderly, handicapped, young and old, and be available throughout the day, or be affordable. Nevertheless I would like to have found more sense of action or need in words on this under either of these two headings, and also something about car charging ports in the Housing Policy section. FBC has to lead on this last point, I believe.

Having struggled to page 244, I'm done for. But again, a very exhaustive Plan with many specialisations, and an eye opener for the uninitiated, which is me!

Thank you for your patience in reading this.

2.12 The strategic priorities are not in the correct order and this is reflected in the structure of the report.

The need to respond to the UK governments declaration of a Climate Emergency and to support it in reaching its commitments under the Paris agreement are alluded to but more as an afterthought rather than something that should be at the heart of planning. The need for an increase in green infrastructure and as a way to mitigate climate change and also improve the local environment needs to be more strategically planned and should be nearer the top of the priorities, as should the need for good design which will reduce carbon emissions and help to produce renewable energy. I think the design chapter should be up front as part of the development vision as should the idea of building a resilient community which is why Climate change should also be at the beginning of the report.

Housing Need and Supply:

FTC2 Market Quay Development

g) It is important that any retail doesn't draw people away from the present shopping areas as at present there are empty outlets in the precinct. Any town square needs feel a safe space and should not detract from the present town square which already seems under used and a bit of a 'ghost town' feel at times. I acknowledge the mention of roof gardens and balconies and think it is important to incorporate a green feel to this area as I think this is lacking in the present town centre. Use of green walls, street trees, water features that will actually work and be enjoyed (I have never seen the only water feature in West Street ever in operation and have lived here for 20 years). For example fountains that come out of the paving in a 'random' way that children could play in. Bearing in mind the projections for climate change bringing dryer and hotter summer we need opportunities for people to enjoy cool and shady areas and areas with a green and natural feel are known to improve mental health.

FTC4 Fareham Station West

e) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA1 North and South of Greenaway Lane

g)) TPOs **must** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA7 : Warsash Maritime Academy

j) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

m) Flood risk: considering the site this should be a much higher priority in the planning process. Is this actually a realistic site for development considering projected sea level changes and increasing likelihood of storms etc. affecting tidal areas?

HA9 Heath Road

f) TPOs **MUST** be respected as mature trees are so important to maintain biodiversity and landscape value as even if trees are planted in their place it takes a long time for them to grow to replace properly mature trees that are felled. There should also be a 5 new for one policy to replace any trees felled and a requirement for any developer to maintain any trees planted for at least 3 years after planting.

HA10 Funtley Road South

g) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA19: 399-403 Hunts Pond Road

Should this include some reference to the trees in the area so trees with TPOs are retained?

HA22 Wynton Way:

f) This should be re-written to change the emphasis:

The design and layout of dwellings, roads, footpaths or other infrastructure proposals should be in a manner that does not impact on, and prevents damage to, the existing woodland on-site which shall be retained and incorporated within the development.

HA26 Beacon Bottom East

No mention of preservation of trees not even those with TPOs which seem to be part of the site

H 33 Land East of Bye Road, Swanwick

No mention of preservation of trees not even those with TPOs or woodland which seems to be part of the site

HA34 : Land South West of Sovereign Crescent

No mention of preservation of trees with TPOs which seem to be part of the site

HA36: Land at Locks Heath District Centre

d) Is the reference to winter gardens correct as I'm not sure what this means?

HA38 68 Titchfield Park Road

e) it should clearly state the need to retain existing trees.

HA40 Land west of Northfield Park

d) Should be re-written:

Existing trees subject to a Tree Preservation Order should be retained and incorporated within the design and layout of proposals in a manner that **does not impact on the trees**

HA42 Land South of Cams Alders

This is taking place on land identified as important for nature conservation. The Council should avoid such areas as the Government has noted the need to keep biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

Employment

Policy E4

SHELAA Reference: part of 124 (ID 2850)

Solent 2

This is on a site of importance for nature conservation. The Council should avoid such areas as the Government has noted the need to maintain biodiversity and green space. This development should occur on a brown field site e.g. the town centre where retail units are closing.

d) There should be a wildlife corridor to avoid the area to the west being cut off.

Policy E7: Solent Airport

6.41 There should be no extension or growth of aviation as this goes counter to the advice of the Committee on Climate Change which says there should be no airport expansion if the UK is to meet its commitments to reduce carbon emissions. The expansion is also counter to FBC commitment to becoming carbon neutral.

Retail

7.13/7.16: The need for retail space is likely to be lower due to the growth of on-line shopping.

7.23 There should be a focus on '15 minute communities' to reduce the need for car travel.

Strategic Policy on Climate Change

8.6 This should be framed more positively so it is clear that the Council commits to finding areas to actively increase tree cover as part of its obligation to play its part in reducing Carbon emissions as trees sequester carbon. FBC should aim for 40% tree canopy cover on streets to mitigate temperature rise (the urban heat island) this is being done in Hackney. Trees also help to reduce air pollution.

Policy CC4: Renewable and Low Carbon Energy

Developments should be orientated to allow maximum potential for solar power use. It could be a stipulation that all new builds have solar panels.

Policy NE6: Trees, Woodland and Hedgerows

Please change wording: Where protected trees, woodland and hedgerows are subject to removal, a replacement of an *appropriate number*, species and size in an appropriate location will be required.

Wording here should be made clearer to reinforce the idea that there will need to be a net biodiversity increase if protected trees and hedgerows are removed for example the number of replacement trees will be 5/3 times that of those felled and there will be maintenance required for at least 3 years afterwards to ensure the trees are established.

Design:

11.7 should include reference to climate change, reducing carbon footprint by insulation etc and incorporating renewable energy production using solar panels etc.

11.23 Add "need to take into account the requirement to be low energy and carbon neutral"

1) Policy: HP1 - New Residential Development

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This Policy is unsound in so far that it contains no restriction on the size of replacement dwellings or house extensions. Overlarge replacement dwellings and extended dwellings can detract from the undeveloped rural character and appearance of the countryside. Thus the Policy as worded fails to have regard to NPPF para. 170 which seeks to ensure that ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The proposed Policy merely seeks that replacement dwellings be of an appropriate character to their location. This is insufficient in itself to adequately control such development, and nor does it take account of extensions. The modification that is necessary is to impose, in addition, a floorspace limitation upon replacement dwellings and extended dwellings.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b The suggestion is, in addition, to require replacement dwellings to have a floorspace increase no larger than 30% over and above the existing dwelling. To ensure that the Policy only applies where the added floorspace of an extension would have an adverse visual impact floorspace provided within the existing building envelope would not be taken into account in determining the percentage increase.

Your suggested revised wording of any policy or text:

B4c The Policy should be reworded to add b) it is for a replacement dwelling which is of an appropriate character to the location and in any event no greater than 30% larger than the existing dwelling c) it is for an extension that would result in an increase in floorspace which is of an appropriate character to the location and in any event no more than a 30% increase in floorspace over and above the existing dwelling. Explanatory text should be added to say that “for the interpretation of this Policy floorspace figures should be measured externally, for extensions any addition within the existing building envelope shall not be taken into account in determining the percentage increase, and in determining whether a replacement dwelling or extended dwelling is of an appropriate character to the location regard shall be had of the need to avoid harm though the cumulative effect of such development and the impact of past development will be taken into account.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's view are discussed and an opportunity is given to respond to the views of others.

2) Policy: HP2 - New Small-scale Development Outside Defined Urban Areas

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound because the impact of development of this scale, and potentially in depth, beyond the settlement boundary would harm the rural character and appearance of the countryside. It has the potential to substantially consolidate the built form in these areas (see figure 5.1 in the emerging plan), the cumulative impact of which would blur the important distinction between the countryside and the urban area. It fails to have regard to NPPF para. 170 which seeks to ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ. Thus it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. To make the plan sound this Policy should be deleted from the Plan. To ensure that some residential development could take place beyond the settlement boundary a Policy similar to Policy DSP6 of the adopted plan could be used. This allows limited frontage infill of up to 2 dwellings. This would have less impact on the character and appearance of the countryside and thus accord with the NPPF.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would ensure that replacement and extended dwellings would meet the NPPF objective in para 170.

Your suggested revised wording of any policy or text:

B4c. The suggested rewording: “New residential development will be permitted outside the defined urban settlement boundaries (as identified on the Policies Map) where it comprises one or two new dwellings which infill an existing and continuous built-up residential frontage, where: a) The new dwellings and plots are consistent in terms of size and character to the adjoining properties and would not harm the character of the area; b) It does not result in the extension of an existing frontage or the consolidation of an isolated group of dwellings; and c) It does not involve the siting of dwellings at the rear of the new or existing dwellings.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

3) Policy: HP3 - Change of Use to Garden Land

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that it fails to have regard to a key factor, ancillary buildings on garden land, that can lead to such changes of use detracting from the character and appearance of areas beyond the development boundary. Thus, the Policy as worded fails to have regard to NPPF para. 170 which seeks to ensure that ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. To make the Policy sound refence must be made to the impact of ancillary buildings.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would ensure that garden extensions would meet the the NPPF objectives in para 170.

Your suggested revised wording of any policy or text:

B4c. Amend HP3b to say "It, along with ancillary buildings allowed as permitted development will not detract from the existing landscape"

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

4) Policy: HP6 - Exception Sites

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 The Policy on rural exception sites is unsound as its wording and that of the explanatory text clearly indicates that it refers to rural areas. This District although it contains countryside is not categorised as a rural authority and has no rural communities. It thus does not have all the particular housing and social issues that need to be addressed in such areas.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The Policy on rural exception sites should be deleted from the plan.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b It would remove an irrelevant Policy on rural exception sites.

Your suggested revised wording of any policy or text:

B4c Not applicable

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the vies of others.

5) Policy: HP8 - Older Persons' and Specialist Housing Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that it opens up the possibility of such accommodation being provided in the countryside beyond the settlement boundary. Such development is often large in scale and such would detract from the character and appearance of the countryside. Re-development opportunities do arise within the urban area and older person/specialist housing provision should be treated no differently than normal flatted development. Thus, the Policy as worded fails to have regard to NPPF para. 170 which seeks to ensure that ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus, it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a To make the Policy sound the possibility of older person/specialist accommodation outside the urban boundary should be deleted.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b This would ensure that there is no contravention of the requirements in para 170 of the NPPF..

Your suggested revised wording of any policy or text:

B4c. Revise the last sentence in the Policy simply to say "New older persons or specialist housing shall be provided within the Urban Area boundary."

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed an an opportunity is given to respond to the view of others.

6) Policy: HP10 - Ancillary Accommodation

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound, in part, on 3 counts. First, much of the explanatory text is so essential to the satisfactory operation of the Policy that it should be within the Policy itself. Second, the Policy should specifically require ancillary accommodation to be close to the principal dwelling. This is to prevent later pressure, which may be difficult to resist, for such accommodation to be turned into separate dwellings contrary to the aim of the NPPF in providing well designed places. And in rural areas the potential for ancillary buildings to become separate dwellings would be contrary to NPPF para. 170 which seeks to ensure that new development contributes to and enhances the natural and local environment. It would also thereby, in rural areas, give rise to car dependent housing contrary to the NPPF environmental objective of seeking to use natural resources prudently and moving to a low carbon economy. Third, explanatory paragraph 5.82 needs to be more clearly worded to make it clear that it is saying that an unrelated unit of accommodation is in effect a new dwelling and will not be regarded as Ancillary Accommodation under this Policy.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. Move much of the explanatory test into the main Policy and amend the Policy to require to require ancillary accommodation to be close to the principal dwelling.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. It would prevent the harm outlined in B3 above.

Your suggested revised wording of any policy or text:

B4c. Amend HP10a to "a) It is within the curtilage of the principal dwelling and close it;" Add to HP10: f) The ancillary accommodation shall remain within the curtilage of, and in same ownership as, the principal dwelling. A planning condition will be imposed to prevent the use of the ancillary accommodation as a separate dwelling. g) the principal dwelling shall remain larger than the ancillary accommodation. Explanatory paragraph 5.83 altered to "an unrelated unit of accommodation is in effect a new dwelling and will not be regarded as ancillary accommodation under this Policy."

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

7) Policy: HA45 - Rear of 77 Burrige Road

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that the necessary mitigation required given the site's location on and partly adjoining a SINC would require the developer or occupier to have ownership of, or some rights over, the SINC. There is no evidence from the past history of the site that this is so. The site's allocation would thus conflict with NPPF requirements on conserving and enhancing the natural environment by protecting and enhancing sites of biodiversity in a manner commensurate with their identified quality in the development plan.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. To make the plan sound the allocation should be removed

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b. By preventing conflict with NPPF requirements on conserving and enhancing the natural environment.

Your suggested revised wording of any policy or text:

BC4c Not applicable.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

8) Policy: R1 - Retail Hierarchy and Protecting the Vitality and Viability of Centres

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3 This is unsound in so far that the second paragraph of the Policy refers to main town centres uses being permitted within defined town centres. The whole of the designated Fareham Town Centre is so widely drawn that it includes important residential areas and large open spaces unsuitable for town centre uses. Such uses outside the designated Primary Shopping Area would conflict with the NPPF requirement of achieving well-designed places and better places in which to live.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a The policy should be reworded so that it applies to the more limited designated Primary Shopping Area, where such uses would be acceptable.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By preventing main town centre uses in areas where they would no longer acceptable.

Your suggested revised wording of any policy or text:

B4c The second paragraph should be amended to say “Where planning permission is required, main town centre uses, as defined in the National Planning Policy Framework (NPPF), will be permitted within the defined Primary Shopping Area of Fareham Town Centre, district and local centres.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity is given to respond to the views of others.

9) Policy: R4 - Community and Leisure Facilities

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above

B3. This Policy is unsound in so far that it does not deal with the limitations that should apply to any of these uses, such as sports venues and open space, that may be applied for outside settlement boundaries. Such uses, if large scale and containing substantial buildings, can be especially intrusive in the countryside. Thus they should only be allowed if they are small scale uses and the associated buildings are also small scale. Without this limitation such development would detract from the character and appearance of the countryside. Thus, the Policy fails to have regard NPPF para. 170 which seeks to ensure that new development contributes to and enhances the natural and local environment. This is of particular importance given that the extensively built-up nature of the Borough means that the rural areas are highly valued as a counterpoint. Moreover, the quality of the rural area is high, with much of it designated in this plan as an Area of Special Landscape Quality (ASLQ). Thus, it is all the more important that the intrinsic character and beauty of the countryside is recognised and valued landscapes protected.

What modification(s) is necessary to make the Local Plan legally compliant or sound?

B4a. The Policy should specify that such uses are generally acceptable only within the development boundaries but that any that may be considered acceptable beyond those boundaries, such as sports venues and open space, must be small scale uses with small scale buildings.

How would the modification(s) you propose make the Local Plan legally compliant or sound?

B4b By preventing the harm identified above.

Your suggested revised wording of any policy or text:

B4c A criteria e) should be added “Such facilities should generally be permitted only within the development boundary, and any uses outside those boundaries such as sports venues and open space shall, as well as complying with the other criteria above, need to be small scale use with small scale buildings”.

If your representation is seeking a modification to the plan, do you consider it necessary to participate in the examination hearing session(s)?

Yes, I want to take part in a hearing session

Please outline in the box below why you consider it necessary to take part in the hearing session(s):

To ensure that the Fareham Society's views are discussed and an opportunity given to respond to the views of others.

10) Policy: E1- Employment Land Provision

Legally compliant	Yes
Sound	No
Complies with the duty to co-operate	Yes

Please provide details you have to support your answers above
