

Ref item 11

I would like to add to the plan examination.

Re examine transport infrastructure which relies almost 100% totally on the car The plan under estimates peoples desire to move about freely with available methods of transport Alternative methods of transport for day to day living quoted such as cycling and walking shuld be removed as major transport methods as seldom used for this purpose. Re examine government assistance for more public transport.

Investigate the use tramway system to transport large numbers of people around. some years ago there was proposed tramway system to serve this area.

Raise the profile to a higher level than present by examining the effects of traffic ambient traffic noise,and pollution.

Add increase public education and awareness regarding how their quality of life will change corresponding deterioration in quality of life. What can we expect from increased waiting times for basic services.

Add letter from Mp enclosed showing the council is not binded by the government strategy if it has concerns about viability
