PLANNING AND TRANSPORTATION

Dear Sir/Madam

I write to express my concerns re the proposed building of 15 flats for the elderly on Station Rd.

1) I may be wrong but my understanding is that when properties were built the council has to provide adequate car parking. The potential is that the traffic entering and leaving Station Rd will build up especially at peak periods.

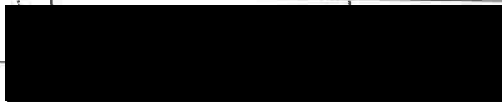

2) Station Rd is considered by the environmental agency to be a flood way. More problems with the subway!

3) It is a small area of green which offers many residents of Portlестel a small oasis of respite.

The trees are beautiful in bloom
and despite your comments to
remove them I fear that they
will not be saved.

5) Just an afterthought to
point out. How much pollution
will be created by traffic
idling and waiting to leave
or enter Station Rd

Yours truly
