Re Proposed Development at the corner of Station Road and the A27

Dear Sir

I hereby tender my objection to the revised planning application for a three storey high building of 15 retirement flats on the green at the corner of Station Road and the A27. I had no objection to the previous plans shown in the Portchester Library for Bungalows.

These revised plans will clearly invade the privacy of adjacent residents like myself. This proposed revised plan was agreed to be included by the Fareham Borough Council at a meeting held on 10th February 2015 and which adjoining residents were not previously made aware.

I am informed that a viability Report was completed in December 2014 for 15 retirement Flats.

This was plenty of time for the Council to inform adjacent residents of the revised plan.
