> Sir/Madam,

I believe the main modifications have not gone far enough to make the Welborne Plan sound. I would like to echo the collective response from the Community Groups and do not wish to duplicate your reading.

> I would also reiterate that MM3 and MM16 are unsound as they are unjustified as they are NOT the most appropriate strategy as they have NOT been considered against ANY alternatives let alone "reasonable" ones and the "strategy" (buffers, landscape structuring) is NOT based on "proportionate evidence" as the evidence base (CD38) is INACCURATE, the illustrations used in the appendix of CD38 bear no resemblance to the site north of Funtley, there is no topographical information and so both MMs fail every stage of the "justified" definition.

MM23, There still has NOT been the addition of any independent monitoring to the "Strategic Group" (para11.6) which consultee's have consistently requested to ensure transparency within the monitoring of the plan. Therefore again unsound.
