To Whom It May Concern

Re: Proposed Installation Of Storage Facilities
At RedStar Food Service Ltd,
26, Brunel Way, Fareham. PO15 5SD

RedStar Food Service Ltd is a well-established business and has been operating from Fareham for many years. It provides a vital food distribution service that many local businesses rely upon. The company also distributes goods to many other customers nationwide.

The proposed installation of additional equipment is necessary to improve the smooth running of the distribution service.

The proposal is to install a combined storage and chiller unit on the Northwest corner of the site. The area is presently used as a random storage site for discarded materials.

The 'building' will be constructed from standard mobile containers, similar to those used as international shipping containers. As such, it is not a building fit or designed for permanent habitation, it is merely a giant store cupboard.

Therefore, an increase in staff is not required. The present requirement for car parking spaces is eighteen, but twenty-two could easily be accommodated, if planners consider the store as a habitable building.

Drawing number 2514-RS-11 indicates the parking facilities for the day staff.

Drawing number 2514-RS-12 indicates the parking facilities for the night staff.

The business is manned twenty-four hours a day, with the vans and lorries being loaded during the night. They all leave in the early hours of the morning and do not normally clash with the day staff, who arrive at around seven in the morning. The car parking layouts demonstrate that there is ample room to accommodate both

arrangements.

I trust that the above explanation will assist in producing a speedy positive response to RedStar's planning application.

Yours Sincerely,
