Welcome to the new look Fareham Today, this edition is extra special as the magazine is celebrating its tenth birthday! It’s been 10 years since residents in the Borough of Fareham, first began receiving the Council magazine direct to their doorstep, replacing the old newspaper format of the Fareham Borough News.

Did you know we produce the quarterly Borough magazine at the Civic Offices and distribute over 49,000 copies to every household across the Borough, local businesses and a variety of community organisations and outlets for each edition?

To celebrate our ten year success we’ve decided to refresh Fareham Today’s look. Our new updated style will have more feature based articles, bigger and better images and a chance for you to regularly ‘air your views’ in our new letters page - we hope you’ll take the opportunity to send us your questions and comments regarding the Council and its services, and we’ll do our best to include them in a future issue, together with a useful response!

We know that Fareham Today is read by thousands of you across the Borough and we have worked hard to keep this a FREE publication, keeping you up to date with all the latest news; we hope you enjoy our birthday edition.

All that is left is to wish you Happy reading...

Summer 1995
Fareham Today magazine is launched. Printed in two colours, it replaced the old Fareham News which had a compact newspaper format.

In this issue we brought you news of Millennium funding and asked - How should we mark the end of the century? There were also details of the planned new style for the shopping centre and the new Ranvilles Community Centre.

Spring 1999
Fareham Today gets the full colour treatment and the two main colours change to green and purple, making the magazine brighter and fresher in appearance.

This issue brought you details of the new Fareham Leisure Card, launched by former Harlem Globetrotter, Alan Cunningham at Fareham Leisure Centre.

Also included for the first time was a pull out supplement dedicated to Parks and Open Spaces.

Spring 2005
This was the 36th edition of Fareham Today and the last in the old format. Packed with interesting and informative features, this issue looked at Healthy eating, How we can recycle 40% of our waste, new building regulations, and the pet ID scheme, to name but a few!

The supplement covered details of our corporate objectives and how we were rated “Good” as a Council in 2003/2004.

Summer 2005
In this birthday edition we celebrate the official opening of the long awaited Market Quay scheme; help you get the most out of the changes to your rubbish collections; see why grasslands are so important to our local environment, with details of how you can make your own meadow; we advise on how you could cut your Council Tax and introduce a letters page.

We will also be including the usual features like, What’s On, details about your local councillors, the A to Z of Council Services and Other Useful Numbers.
Help! It won’t all go in my bin!

Over 2/3 of what we throw away CAN be recycled, so it is easy to manage with fortnightly collections of rubbish and recyclables. What we throw away can be broken down into three categories,

1. Your kerbside blue top bin,
2. Recycling in other ways, eg composting, bring banks, etc and
3. in your refuse bin. Fareham Today takes a closer look at where we should be putting our rubbish.

34% in your blue top bin

- 29% is recyclable paper and cardboard.
- 3% is metal tins and cans.
- 2% is plastic bottles.

Please remember: Clean, dry and loose in your blue top bin.

35% Recycle in other ways

- 11% is fruit & vegetable peelings, these can be composted at home. If this is not possible, wrap them in a bin liner and put them in your green bin.
- 15% is garden waste which will be banned from your bins in September. This can be composted at home, or use the Council’s new Green Waste Collection scheme.

Home composting your fruit and vegetable waste reduces your rubbish and will give you more space in your green bin.

- 4% is glass bottles and jars. All must be recycled in bottle banks.
- 5% is textiles & shoes. All must either be recycled in textile banks (even worn and tatty items can be recycled) or donated to charity shops.

Your old books, DVDs, CDs and videos can also be recycled in bring banks across the Borough.

31% in your refuse bin

- 10.75% is non-recyclable plastics, eg yogurt pots, margarine tubs, food trays, plastic film & bags, plastic packaging. These can’t be recycled even if they have the logo, so must go in your refuse bin. Squash them first to get more in your bin.
- 10% is miscellaneous. Nappies - double wrap in plastic bag to minimise smells (or try washable nappies). Broken crockery and toys, etc and vacuum bags should all go in your refuse bin.
- 5% is uneaten food. Wrap in a plastic bag or bin liner and put in your refuse bin.
- 3% is liquid cartons, greasy paper & card items, eg pizza delivery boxes and fish & chip paper, has to go in your refuse bin. Squash them to save space.
- 2% is made up of aerosols, aluminium foil etc.
  The following should be taken to your nearest Household Waste Recycling Centre. Batteries of all sizes, hazardous household waste, large metal items etc.
- 0.25% is other glass, eg broken drinking glasses, window glass. These must be put in your refuse bin.

By fully using your blue top bin, garden waste collection service and recycling banks, your refuse bin will contain only 31% of your total rubbish, making alternate weekly collections sufficient.
From Bouquets to Compost to Blooms

The cycle of composting your flowers

Flowers brighten up any home, but what happens when they have finished blooming? If you throw them away in your refuse bin, they’ll end up on the landfill site, eventually turning into and extracting methane gas. However, if you use the Council’s new garden waste collection service (available during the month of September) you can put your old bouquet in your green sack and the flowers will be taken away for composting (please remove all non-organic material such as ties, ribbons, plastic wrappings, etc). The green sacks will be emptied fortnightly into our dedicated vehicle. The material will then be taken to a central composting facility.

The central composting facility is already composting garden waste collected at the Household Waste Recycling Centres (where you could take your flowers if you don’t use the garden waste collection). Material is visually sorted and any large contamination removed. It is chopped up, and spread into a long row called a windrow.

Here the natural decomposing process begins. Bacteria and bugs start to break down the plant material. The windrows are turned regularly, and heat is given off as our flowers, along with grass, prunings and trimmings, decay into rich, brown soil.

The end product, an organically certified soil conditioner, is an excellent growing medium, and is used by organic market gardeners on the Isle of Wight, as well as being sold to Hampshire residents at Household Waste Recycling Centres.

Our old bouquet nourishes new flowers growing in the gardens of the green-fingered amongst us!

For more information about composting, garden waste collection sacks and general recycling and refuse enquiries, please contact Waste Management, tel: 01329 236100, email: waste@fareham.gov.uk or visit: www.fareham.gov.uk/recycling

Or you can make your own...

It’s easy, and the result is a valuable soil conditioner for the garden completely FREE! One of the advantages to home composting is that as well as using your garden waste, you can also add organic matter from the kitchen such as peelings, tea-leaves and egg shells. Please remember no form of animal waste should be put in a home composter.

Buy the bin that makes your garden more beautiful!

Compost Converter 330ltr £5 (RRP £49.95)
KOMP250 250ltr £10 (RRP £52.45)
KOMP700 700ltr £20 (RRP £98.65)

To order your bin tel: 0845 073 2002
Did you know?

- It takes 25 plastic bottles to make 1 fleece jacket
- It takes seven days to recycle a newspaper into a new one
- A recycled aluminium can saves enough energy to run a television for three hours
- Most homes get through 600 cans a year, that’s the length of seven buses
- 900,000 tonnes of municipal waste was collected in Hampshire in 2003/04 – equivalent in weight to almost 6 Queen Mary II Cruise Liners
- Recycle your daily newspaper and within a year you will have saved more than your own body weight in paper
- In 2004/05 it cost approximately £36 million to dispose of Hampshire’s waste – you could easily buy David Beckham to play for your local football team and still have plenty of change!
- The average British household throws away six trees worth of paper each year. In total, that’s a forest over 35 times the size of the New Forest each and every year
- The average person in Hampshire throws away over half a tonne of waste a year

- Enough energy is saved by recycling one aluminium can to light a 100 watt light bulb for 20 hours
- Five out of every six glass bottles are thrown straight into the rubbish bin
- Your recycled steel can could be made into a number of things including: cars; paperclips; bridges; sculptures; sinks; weights; springs; bolts; cables; cutlery; locks; electricity pylons; jewellery; and washing machines
- The energy saved by recycling one glass bottle will power a computer for 25 minutes
- In one hour we produce enough waste in the UK to fill the Albert Hall
- More than 18 billion cans are produced each year in the UK. Most of these (13 billion) are made from recycled steel. If you put all these steel cans together end to end they’d stretch to the moon three times!
- It takes 5 plastic bottles to make 1 fleece hat
- In a landfill site it may take as long as 20 years for a plastic bag to decompose. 50 years for a tin can to decompose and 1 million years for a glass bottle!
Touch and Go!

This summer, Fareham will be welcoming four new ‘residents’ to the Town Centre. At just over six feet tall, with a smart, colourful visage these new additions will be attracting a lot of attention. So, who are our new neighbours? The Town Centre Information Points, of course!

Updated weekly, new glass fronted multimedia Information Points give you quick and easy access to details of nearby shops, restaurants, bars and hotels, as well as lively trailers of forthcoming attractions at the new Apollo Cinema and Fareham Hall. Maps show you how to get there, where you could park or where to get a bus home. Colourful, guides to Fareham’s historic sites, beaches, parks and woodlands may entice you on a trip out of town.

The unique glass fronted touch screens have been developed by the Council through a joint venture with Apollo’s sister company, Creative Touch and local Internet Service Provider, NewNet plc. The idea behind them is to encourage more people to use online services. The screens use TV-style imagery and are a breath of fresh air from the usual, and rather imposing, Internet machines that require you to have loads of techie know-how to get anything at all out of them. Enveloped in a smart blue neon light, the screens demand your attention and beg you to walk up to them and press digit to glass over one of the floating touch zones.

An early idea of how one of the pages may look.

In short, these Information Points will be very simple to use. Users are literally a touch of a button away from accessing information on Fareham and Council services, such as contacting their Councillor or finding directions to the local gym. Not only this, but you may find that where you’ve been parking in Civic Way multi-storey for your visits to the Town Centre, has meant you’ve missed all those shops located near the Osborn Road multi-storey!

If you haven’t got a pen to hand to jot down valuable numbers or addresses, there’s no problem. Much of the information, as well as some unique special offers, are available via simple text downloads. Send the text to some friends and the perfect night out takes shape.

Getting your shop, pub, business or service featured on the screens is easy. Simply log on to www.fareham.gov.uk/informationpoints

Parks - Gardens - Countryside - Woodlands

In this 10th anniversary year of the Fareham in Bloom campaign the Borough is looking beautiful in readiness for fareham’s representation in the UK finals of the prestigious Britain in Bloom competition. The summer floral schemes in partnership with local businesses are bringing a riot of colour, through our parks, gardens and highways.

There are two new sponsors for this summer, MacArthy and Stone who are part sponsoring the Station roundabout, and Fareham Shopping Centre who will be providing a splash of colour at the Mill Road roundabout by Fareham Quay. This autumn we’ll be giving away even more bulbs for local communities to plant and bring a ray of sunshine to a well established Bulb and Tree adoption scheme.

There are 60 sacks available and they will be a double flowered bright yellow variety called Planet, flowering in mid March 2006. There are also 20 trees available with the theme this year being trees that have beautiful silver foliage. They’ll be planted in your chosen location ready for you to look after from 25 November as part of national tree week.

If you have a local green area that you would like to brighten up with some bulbs or a tree then we’d like to hear from you. Each 15kg sack of bulbs contains around 250 bulbs and successful applicants will receive theirs, ready for planting, week commencing 26 September.

N.B. It’s unfortunate that due to underground services and safety it’s not possible to plant these trees and bulbs on highway verges. In some cases we may have to suggest an alternative location.

Please complete and return your application form by Friday 26 August.

Become a Volunteer

Park Warden

Do you care about your local park? Would you be able to spare a few hours a week to keep a caring eye on it? Letting us know about any required repairs or any incidents of vandalism? If the answer’s yes, then we’d like to hear from you. Volunteer Park Wardens will be non-uniformed and act as the eyes and ears, providing information to enable the Council to react more quickly and develop a friendly link to our local park users.

Trial sites are planned for Blackbrook, Porchester, Stubbington and Lockenhall parks. For more information and to fill in an online form visit: www.fareham.gov.uk/parks or contact Matt Wakefield, tel: 01329 824543.

Protecting and Enhancing our Natural Environment

As you travel throughout the Borough you may notice areas that to the ‘untrained’ eye appear uncared for and left to run wild. Well, yes in a way they have been ‘left’ to run wild, but with good reason. These ‘Grasslands’ contain a variety of important and often rare plant and insect species. You may be surprised to note that there are a number of different grasslands within our Borough, the first of these is referred to as Neutral Grassland, which covers a wide range of grasslands, including hay meadows and wet and dry pastures, found on slightly acid to neutral soils. They are particularly threatened in the UK with 97% being lost between 1930 and 1984. This is damaging to farmland biodiversity which formerly relied heavily on neutral grasslands. There are only a handful of neutral grasslands left in Fareham, these include Bushy Land meadow, Whiteley and the Meon Valley.

Next in our list is Calcareous grassland which occurs on the chalk soils of Portsdown Hill and is more commonly known as chalk downland. Botanically it is very rich and it also supports a good range of invertebrates including a number of threatened butterflies such as the small blue. Portchester Common and Anson Grove are good examples of calcareous grassland.

Amenity grassland (eg. road verges) often has poor structure and diversity. It is generally extremely species poor, often containing just a few non-native grass species and is managed very intensively which prevents flowering. In addition, the cuttings are usually dropped onto the grass which maintains high nutrient levels and favours vigorous species.

Many of Fareham’s open spaces were created on areas of existing grassland. The majority of these sites are managed intensively for recreation and visual amenity however, on a number of sites the mowing regimes have been adjusted to help biodiversity. On these sites, areas of grass are left to grow and flower over the summer. In the autumn, after the flowers have set seed, the grass is cut and the cuttings are collected and put on a compost heap. These areas of grass may be around the perimeter or in the centre, depending on the size of the site. Where larger blocks are left, paths are cut to enable people to walk through these meadows.

Making your own mini-meadow

If you like grassland flowers and butterflies why not have a go at creating a mini-meadow in your garden? The easiest way to create a meadow is to start with bare ground. First find out what type of soil you have and pick a suitable wildflower/grass seed mix. Most nurseries selling wildflowers will have ready made mixes for a variety of soil types.

Did you know...?

Grasslands are habitats where grasses and flowers predominate and trees and shrubs are largely absent. In lowland areas such as Hampshire, grasslands are mostly the result of human activity. They have developed through forest clearance and wetland drainage, dating back over 6000 years, to provide grazing for livestock. They are described as semi-natural habitats.

For more information and a list of suitable plants, visit www.fareham.gov.uk or contact the Countryside Officer, tel: 01329 236100 ext 2383. Other useful websites: Landlife - www.landlife.org.uk, BTCV - www.btcv.org, Wildlife Trust - www.wht.org.uk

Grasslands attract a host of insects, the most recognisable being butterflies, which come in a variety of colours and sizes.

The Small Skipper is a common butterfly of rough grasslands where Yorkshire Fog and other grasses are allowed to grow tall. Large numbers occur along the edge of woodlands and abandoned grasslands however, small colonies also occur on thin strips of land including road verges and hedges. The main caterpillar food plant is Yorkshire Fog whilst the adult will visit the flowers of thistles and daisies. The adults fly from July to early August with a rapid darting flight. They have a wingspan of between 22 to 25mm and rest with their wings at an angle.

The Common Blue is the most widespread blue butterfly in Britain and is found in a variety of grassy habitats. Its main food plant is Common Bird’s-foot-trefoil which grows in sunny, sheltered situations on downland, road verges, acid grassland, and woodland clearings. This butterfly is also found in waste ground, disused chalk pits, golf courses, and urban habitats such as cemeteries. The Common Blue has a wingspan of 35mm and can be seen flying from May to October.

The Marbled White is a large butterfly with striking black and white coloration. It’s main flight period is July to August and it has a wingspan of between 51 and 58mm. They occur in a range of grasslands including woodland rides, road verges and embankments but are most common on chalk downland. The adults favour knapweed, scabious and thistle whilst the main food plant of the caterpillar is red fescue.

TIP:

- Mow around the edge of your mini-meadow during the summer to keep it looking neat.
- If you don’t have space for a mini-meadow, you can always plant a range of grassland flowers in a tub, you will still be able to attract butterflies and other insects.

Water in the seeds with a fine sprinkler

Mix the seed with three times its volume of fine sand to help you spread it evenly.

Sprinkle the mix through your fingertips whilst walking backwards, forwards and crossways over your mini-meadow.

Test to see if the soil is damp, if not water it lightly.

Finally, leave the meadow to settle and to attract butterflies and other insects.

TIP:

- If you like grassland flowers and butterflies, why not have a go at creating a mini-meadow in your garden? The easiest way to create a meadow is to start with bare ground. First find out what type of soil you have and pick a suitable wildflower/grass seed mix. Most nurseries selling wildflowers will have ready made mixes for a variety of soil types.

Unimproved grasslands (that’s grasslands that have not had fertilisers applied) can be very species rich. Good quality chalk downland can have over 50 flowering plants per square metre. Unfortunately these grasslands declined greatly during the last century between 1930 and 1991 it is estimated that 97% of unimproved lowland grasslands were lost. This decline is due to a variety of reasons including agricultural improvement, loss of grazing, inappropriate management and urban development.
To claim Council Tax Benefit, fill in this coupon and send it back to us at the above address. We will then let you know what assistance we can give you.

Address: Postcode:

I wish to claim Council Tax Benefit with my application.

If you claim Pension Credit, Income Support or Jobseeker’s Allowance you will also get a form to claim Council Tax Benefit.

We will work out if you qualify for help, taking account of your individual circumstances. This will include your income, savings, capital, housing costs and any other relevant factors.

To apply, please fill in the coupon below and send it to:

Fareham Borough Council, Benefits, PO Box 13, Civic Offices, Civic Way, Fareham PO16 7PU

You can get more information about Council Tax Benefit by visiting our website: www.fareham.gov.uk/benefits

What should I do next?

We will work out if you qualify for help, taking account of your individual circumstances. This will include your age and whether you live alone.

How could I pay less?

Council Tax Benefit could help pay towards some or all of your Council Tax bill if you are on a low income, even if you own your own home.

How is Council Tax Benefit worked out?

Council Tax Benefit is worked out in a similar way to other benefits. We take into account your income, savings, capital, housing costs and any other relevant factors.

Find out if you should be paying less.

How is it done?

The personal information you have provided, or which has been obtained from other sources, will only be used for the purpose of processing applications and for auditing, monitoring, statistical and other research. The information will be retained by the Council for a period not exceeding 5 years and may be shared with other Council departments and partner agencies.

Find out if you should be paying less.

How to apply:

You should apply straight away - Council Tax Benefit is available now.

To apply, please fill in the coupon below and send it to:

Fareham Borough Council, Benefits, PO Box 13, Civic Offices, Civic Way, Fareham PO16 7PU

You can get more information about Council Tax Benefit by visiting our website: www.fareham.gov.uk/benefits

If you wish to claim Council Tax Benefit, email: benefits@fareham.gov.uk or tel: 01329 824646 for an application form.

If you claim Pension Credit, Income Support or Jobseeker’s Allowance you will also get a form to claim Council Tax Benefit with your application.

More information about the nationwide scheme is available at: www.neighbourhoodwatch.net/
MARY KEEBLE, RN

Originally from Staffordshire, Leslie and his wife Christine moved to Fareham in 1962. Having spent 31 years in the Royal Navy, two of which were in Singapore, Leslie worked for Mencap for four years before taking up his present job with a Motor Homes company.

Married to Christine (Mayoress) for 44 years, they have a daughter, Tina and a son, David and three grandchildren John, David and Sarah.

Leslie’s main interests are motor home travel, playing bridge and family life. At one time a keen sailor, he was in the ill-fated 1979 Fastnet Race and took part in rescuing 6 Frenchmen from their stricken yacht.

Since becoming a Fareham Borough Councillor in 2000, he has served on the Leisure and Health Committee, Environmental Committee, Personnel Review Sub-Committee and Licensing and Regulatory Affairs Committee.

Leslie was, for 2 years, the Executive Member for Health and Environment under the new Cabinet system and upon becoming Deputy Mayor, chaired the Best Value Panel and was Vice-Chairman of the Scrutiny Board.

During their Mayoral year Leslie and Christine look forward to meeting many residents and visitors to the Borough, and raising money for the Mayor’s chosen charities for 2005/06 which are:

The Rainbow Centre helps children with motor impairment (most commonly Cerebral Palsy) to overcome their difficulties using a system of learning called Conductive Education.

The Centre works daily with pre-school children, sometimes as young as six months, until school age. It also provides a Saturday Club for school-aged children as well as individually tailored sessions in some cases.

The Royal Naval Benevolent Trust exists to give help at times of need to the Royal Navy, two of which were in Singapore, Leslie worked for Mencap for four years before taking up his present job with a Motor Homes company.

The Royal Naval Benevolent Trust exists to give help at times of need to the Royal Navy, two of which were in Singapore, Leslie worked for Mencap for four years before taking up his present job with a Motor Homes company.

The Rainbow Centre and The Royal Naval Benevolent Trust

The Rainbow Centre helps children with motor impairment (most commonly Cerebral Palsy) to overcome their difficulties using a system of learning called Conductive Education.

The Centre works daily with pre-school children, sometimes as young as six months, until school age. It also provides a Saturday Club for school-aged children as well as individually tailored sessions in some cases.
