Technical Appendices

Introduction

This Technical Appendix accompanies the Site Allocations Issues and Options Development Plan Document (DPD).

The main Site Allocations DPD contains a series of tables within each topic chapter. The tables are also encompassed within the technical appendix but here they provide a lot more detail relating to all the individual sites.

The Technical Appendix is set out by topic, reflecting the structure of the main Site Allocations DPD. Within each topic area are detailed tables accompanied by individual site maps and, where appropriate, Borough-wide maps which help to indicate the overall distribution of the sites.

Towards the end of the document is a Sustainability Appraisal. This contains an explanation of the process and a detailed assessment of a number of the sites.
